Acute disease management and reinforcement of clinical judgment, prioritization, psychomotor skills, and professional behavior with diverse patient populations in a variety of health care settings; application of evidence-based nursing practice and safe person-centered practice in the nursing process to adult patients with acute health care needs; emphasis on building leadership skills, independent decision making, interprofessional collaboration, person-centered education, and prioritization with adult patients who have acute health care needs. Corequisites: NURS:3438.

**NURS:5225 Community Health Across the Lifespan Practicum 4 s.h.**

Integration of specialty populations knowledge in providing care to individuals and communities of diverse backgrounds; experiences take place in community, pediatric/mother/baby/family, and geriatric settings; students use nursing process to deliver person-centered care within spheres of disease prevention/promotion of health and well-being, and hospice/palliative and supportive care in a variety of population settings; focus on improvement of health outcomes at individual, family, and community level within context of population-focused practice. Corequisites: NURS:3620 and NURS:3631 and NURS:3632.

**NURS:5401 The Care of the Frail Elderly 3 s.h.**

Clinical management of the elderly; emphasis on economic considerations, principles of gerontological care, common syndromes, ethical issues; clinical application experience in a long-term care setting. Prerequisites: NURS:5035. Corequisites: NURS:6200 and NURS:6701. Same as ASP:5401.

**NURS:5636 Clinical Nurse Leader Seminar 2-3 s.h.**

Evolution of clinical nurse leader (CNL) role, eight core role functions, and the process of integration of CNL role into health care system. Requirements: admission to M.S.N.-CNL program.

**NURS:5666 Leadership in the Microsystem 3 s.h.**

Assessment of the microsystem of practice, clinical nurse leader role as leader embedded in a microsystem, and identification of opportunities to enhance care delivery in the microsystem.

**NURS:5696 Clinical Nurse Leader Capstone Clinical Immersion 6 s.h.**

Intensive immersion in role and practice expectations of the clinical nurse leader (CNL); experienced leaders within the microsystem, who are experts in the provision of clinical services at the point of care/services, serve as mentors. Requirements: enrollment in final semester of M.S.N.-CNL program.

**NURS:5697 Specialty Practice in Nursing Systems 4 s.h.**

Practice in nursing and health care leadership; interventions that influence health care outcomes for individuals, populations, or systems; final capstone concepts and experiences prepare students to deliver and manage safe, effective, and quality care to diverse populations in a variety of settings and roles, and master nursing and health care leadership principles; 165-hour guided capstone program implementation and practicum is the centerpiece of learning experience.

**NURS:5800 Independent Study arr.**

Supervised study and/or clinical practice adjusted to needs of master's degree students.

**NURS:5801 Master's Project 2-3 s.h.**

Opportunity for in-depth analysis and synthesis of a chosen topic that contributes to some aspect of nursing practice.

**NURS:5802 Master's Portfolio 0 s.h.**

Opportunity for clear and cohesive synthesis of clinical or professional experiences and competencies, including those gained in graduate study, that portray students' clinical or professional strengths and career goals.

**NURS:5803 Distance Education: Master's Independent Study arr.**

Supervised study and/or clinical practice adjusted to needs of master's degree students.

**NURS:5804 Distance Education: Master's Portfolio 0 s.h.**

Clear and cohesive synthesis of clinical or professional experiences and competencies, including those gained in graduate study; students' clinical or professional strengths and career goals.

**NURS:5806 Distance Education: Master's Project 2-3 s.h.**

In-depth analysis and synthesis of a chosen topic that contributes to some aspect of nursing practice.

**NURS:6000 Human Anatomy for Advanced Practice****3 s.h.**

Integrated study of interrelationships between anatomic structure and physiological function in health and disease at various points in the lifespan; mechanisms governing and supporting cellular, organ, and system function; internal milieu; relationship of study to clinical assessment of functional integrity of individual organ systems utilizing pertinent objective and subjective data; implications of pathophysiology for anesthesia and implications of anesthesia for pathophysiology; foundation for clinical practicums and courses in nurse anesthesia. Requirements: completion of an undergraduate human anatomy and physiology course and admission to anesthesia nursing program. Same as ACB:6000.

**NURS:6004 Scientific Principles for Anesthesia Practice****4 s.h.**

Applicable chemical and physical properties of molecules important in anesthesia; technological principles and equipment used to safely deliver those molecules to patients and monitor patients during anesthesia; topics include basic chemical and physical calculations, properties of substances in solution, measurement, behavior of gases and other fluids, effects of heat transfer, and the specific chemistry of inhaled and intravenous anesthetics and adjuvant drugs. Corequisites: NURS:6006. Same as ANES:6004.

**NURS:6006 Pharmacology of Anesthesia Practice****3 s.h.**

Builds on content from foundational graduate pharmacology course; focus on safe prescribing, administration, and management of medications used to provide general, regional, or local anesthesia and analgesia for all patient populations across lifespan undergoing varied surgical, obstetrical, or other procedures in any health care setting. Prerequisites: PCOL:6204 with a minimum grade of B-. Requirements: enrollment in anesthesia nursing program. Same as ANES:6006.

**NURS:6007 Basic Principles of Anesthesia Practice****5 s.h.**

Overview and integration of anesthetic agents and techniques; patient assessment, preoperative airway evaluation, anesthetic planning, principles of fluid management, and arterial blood gas interpretation; principles of general and regional anesthesia and techniques as they pertain to each surgical specialty; Occupational, Safety and Health Administration (OSHA), The Joint Commission (TJC), and institutional regulations and requirements pertinent to anesthesia practice. Prerequisites: NURS:6004 with a minimum grade of B- and NURS:6006 with a minimum grade of B-. Same as ANES:6007.

**NURS:6010 Advanced Principles of Anesthesia Practice I****4 s.h.**

Special needs and intraoperative anesthetic management of complex patient populations and those with advanced pathologic states; anesthetic techniques for specific surgical subspecialties including pediatrics, obstetrics, neurosurgery, cardiac, vascular, thoracic, transplant, trauma, EENT, dental, and aesthetic or reconstructive procedures; pertinent pathophysiology and anesthetic monitoring and management techniques; clinical case conferences provide opportunities to discuss perianesthetic complications and challenges. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as ANES:6010.

**NURS:6012 Advanced Principles of Anesthesia Practice II****1 s.h.**

Acute and chronic pain treatment modalities for all patients presenting for a variety of medical or surgical procedures across the lifespan. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as ANES:6012.

**NURS:6050 Introductory Clinical Anesthesia****2 s.h.**

Initial mentorship in clinical anesthesia; development of basic clinical skills needed for a career as nurse anesthetist; application and integration of theoretical knowledge in clinical setting. Prerequisites: NURS:6004 and NURS:6006. Corequisites: NURS:6007. Same as ANES:6050.

**NURS:6051 Clinical Anesthesia I****2 s.h.**

Mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialties including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6050 or ANES:6050. Corequisites: NURS:6010. Same as ANES:6051.

**NURS:6052 Clinical Anesthesia II****2 s.h.**

Additional mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialties including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6051 or ANES:6051. Same as ANES:6052.

**NURS:6053 Advanced Clinical Anesthesia****2 s.h.**

Mentored clinical anesthesia at selected sites; development of advanced clinical skills and critical thinking by providing anesthesia for all surgical specialties and invasive diagnostic procedures in all anesthetizing locations; providing anesthesia for all patients in all settings, including on call emergency surgeries. Prerequisites: NURS:6052. Same as ANES:6053.

**NURS:6054 Obstetrical Anesthesia****2 s.h.**

Experience delivering analgesia and anesthesia for parturients during labor and delivery process. Prerequisites: NURS:6052. Same as ANES:6054.

**NURS:6055 Rural Anesthesia****2 s.h.**

Opportunity to develop experience providing anesthesia and associated health care services at UI-affiliated clinical sites in rural settings. Prerequisites: NURS:6052. Same as ANES:6055.

**NURS:6100 Primary Care: Infants, Children, and Adolescents I****3 s.h.**

Enhancement of clinical knowledge and skills for infant, child, adolescent care. Prerequisites: NURS:5035. Corequisites: NURS:6701.

**NURS:6101 Primary Care: Infants, Children, and Adolescents II****3 s.h.**

Enhancement of clinical knowledge and skills for infant, child, adolescent care; development and refinement of knowledge and skills in primary health care delivery. Prerequisites: NURS:6100. Corequisites: NURS:6702. Same as PEDS:6101.

**NURS:6104 Essentials of Pediatric Primary Care: Infants, Children, and Adolescents** 3 s.h.

Builds on prior graduate coursework to enhance foundational knowledge and skills in infant, child, and adolescent population; application of essential concepts of pediatric primary care to identify, diagnose, and manage health issues; emphasis on concepts (e.g., growth and development, anticipatory guidance, common pediatric health concerns) managed in ambulatory health care systems. Prerequisites: NURS:5031. Corequisites: NURS:5035.

**NURS:6200 Primary Care: Adults and Older Individuals I** 3 s.h.

Pathophysiologic alterations and clinical management of associated health care problems in adults, the elderly. Prerequisites: NURS:5035. Corequisites: NURS:6701.

**NURS:6201 Primary Care: Adults and Older Individuals II** 3 s.h.

Continuation of NURS:6200. Prerequisites: NURS:6200. Corequisites: NURS:6702.

**NURS:6400 Pediatric Acute Care I** 3 s.h.

First of two courses exploring management of complex acute, critical, and chronically ill patients with urgent and emergent conditions; focus on alterations in pathophysiology, advanced assessment, diagnosis, and collaborative management of infants, children and adolescents with selected episodic/chronic health problems in acute/critical care. Prerequisites: NURS:5035. Corequisites: NURS:6701.

**NURS:6401 Pediatric Acute Care II** 3 s.h.

Second of two courses exploring management of complex acute, critical, and chronically ill patients with urgent and emergent conditions; focus on alterations in pathophysiology, advanced assessment, diagnosis, and collaborative management of infants, children and adolescents with selected episodic/chronic health problems in acute/critical care. Prerequisites: NURS:6400. Corequisites: NURS:6702.

**NURS:6410 Adult-Gerontology Acute Care I** 3 s.h.

First of two courses exploring management of complex acute, critical, and chronically ill patients with urgent and emergent conditions; focus on alterations in pathophysiology, advanced assessment, diagnosis, and collaborative management of adults and older adults with selected episodic/chronic health problems in acute/critical care. Prerequisites: NURS:5035. Corequisites: NURS:6701.

**NURS:6411 Adult-Gerontology Acute Care II** 3 s.h.

Second of two courses building on prior acute care content and focusing on critical, complex, and end of life care; emphasis on evidence-based strategies to stabilize patient's condition, assessment of risk for and prevention of complications, restoration and maintenance of optimal health and functioning, and/or provision of palliative care in context of patient's physical and psychosocial environment. Prerequisites: NURS:6410. Corequisites: NURS:6702.

**NURS:6500 Psychiatric/Mental Health Nursing for Advanced Practice Didactic I** 3 s.h.

Introduction to psychological principles and theories as they relate to mental health across the lifespan, intersections between physical and mental health, and role of advanced practice nurse in psychiatric/mental health care; examination of psychological theory within a life span developmental framework from infancy to older adult; introduction to role of cultural diversity in mental health; emphasis on assessment, diagnosis, and management of mental disorders that are common in adults. Prerequisites: NURS:5032 and NURS:5036. Corequisites: NURS:6701.

**NURS:6501 Psychiatric/Mental Health Nursing for Advanced Practice Didactic II** 3 s.h.

Builds on prior lifespan content with specific focus on selected populations, families, and groups; students further define and expand their practice of psychiatric/mental health nursing based on the integration of theory, standardized languages, and research; exploration of a variety of approaches and issues of service delivery; emphasis on methods and skills for completing a comprehensive mental health assessment and managing common psychiatric illness in childhood/adolescence and late life. Prerequisites: NURS:6500. Corequisites: NURS:6702.

**NURS:6550 Advanced Leadership and Management** 3-4 s.h.

Leadership and management concepts and theories; application to roles unique to executive nurse leader in health care organizations in institutional and community settings; emphasis on advanced leadership roles for facilitating, integrating, and coordinating complex structures, processes, and outcomes in health care systems.

**NURS:6551 Financial Management** 3-4 s.h.

Preparation for nurse leaders and practitioners to use techniques for financial analysis and decision making for patient care programs across the health care continuum; focus on efficient and effective management of resources for delivery of quality health care services.

**NURS:6552 Executive Management in the Organization** 3-4 s.h.

Manage operations of patient care services across health care continuum within the framework of an established health care organization; focus on efficient and effective management of the structure, governance, patient care delivery system of care, and outcomes of care.

**NURS:6553 Seminar on Innovations** 4 s.h.

Strategizing about taking meaningful action, disrupting stable processes, diffusing innovation, and sustaining change; emerging innovations in nursing and health care systems that impact the functions and responsibilities of nurse leaders.

**NURS:6554 Seminar on Healthy Work Environments** 3 s.h.

Application of leadership and management knowledge specific to creating and sustaining healthy work environments in health care; current and emerging issues focused on health care work environments.

**NURS:6555 Care Coordination Across Professional and Organizational Boundaries** 3-4 s.h.

Structures, processes, concepts, tools and experience that leads to effective coordination of patient care, case and population health management as well as information, management and financial systems supporting care coordination; knowledge and skills for understanding structures, processes, challenges, solutions and innovations in coordinating patient care across professional disciplines and organizational boundaries; impacts of care coordination issues on patient experience, care quality and costs; evaluate interventions for informed and effective care processes in field experience.

**NURS:6556 Marketing and Communications for Health Care Leaders** 3 s.h.

Preparation to strategically plan, establish, and manage a customer-centric marketing strategy; focus on marketing frameworks and theories, and development of a strategic marketing approach with appropriate leadership strategy and positioning to ensure customer value; health care leaders' role in the marketing mix, mobilization of partners, crisis management, and crisis communication planning and response skills.

**NURS:6557 Clinical Practice Management and Leadership for Advanced Practice Providers** 3-4 s.h.

Overview of key aspects for health care provider leadership in clinical practice management and health care enterprise; advanced practice providers are expected to deliver health care services, lead to deliver value, achieve maximum reimbursement, and meet the Institute for Healthcare Improvement's quadruple aims; focus on value management, revenue cycle management, professional leadership, provider leadership, and clinical practice management; students read, discuss, explore, critique, and practice skills related to course topics.

**NURS:6701 Advanced Practice Clinical Practicum I** 3-4 s.h.

Application of advanced physical assessment, pathophysiology, and diagnostic reasoning in a clinical setting appropriate to a specific population. Prerequisites: NURS:5035 or NURS:5036. Corequisites: NURS:6100 or NURS:6400 or NURS:6410 or NURS:6500 or (NURS:5401 and NURS:6200) or (NURS:6100 and NURS:6200).

**NURS:6702 Advanced Practice Clinical Practicum II** 3-4 s.h.

Continuation of NURS:6701; emphasis on diagnostic reasoning and formulation of treatment plans. Prerequisites: NURS:6701. Corequisites: NURS:6101 or NURS:6201 or NURS:6401 or NURS:6411 or NURS:6501 or (NURS:6101 and NURS:6201).

**NURS:6703 Advanced Practice Clinical Practicum III** 3-4 s.h.

Synthesis of role expectations for advanced practice with focus on clinical competencies appropriate to the specialization. Prerequisites: NURS:6702.

**NURS:6704 Practicum in Executive Leadership and Management** 4 s.h.

Immersion experience in application of principles and methods of leadership, management, and evaluation to facilitate health care operations in various settings; student collaboration with a preceptor for mentored in-depth immersion in systems practice.

**NURS:6802 Health Policy, Law, and Advocacy** 3 s.h.

Issues that shape health care economics and policy development; framework for understanding work of legislators and other policy makers; emphasis on state and national level; health issues in developing countries; health care system, its economics, financing, role of government, not-for-profit entities, and nongovernmental organizations.

**NURS:6808 Population Health for Advanced Practice** 3 s.h.

Coordination and integration of care delivery for population health and clinical effectiveness across the continuum of care; management of optimized outcomes; emphasis on informatics infrastructure and translation of evidence-based practice to managing care provision and achieving desired outcomes as a result of care provision.

**NURS:6809 Advanced Practice Role I: Introduction** 2-3 s.h.

Introduction to competencies necessary for advanced nursing practice at the doctoral level; introduction to topics related to knowledge, skills, and abilities that enable doctorate of nursing practice graduates to function as leaders in a health care and nursing practice; topics may include advanced nursing practice role development, communication, collaboration, leadership, ethics, finance, organizational structure, and scope of practice and regulatory issues; first in a two-course sequence. Requirements: doctoral standing.

**NURS:6810 Advanced Practice Role II: Integration** 2-3 s.h.

Focus on transition to leadership roles that nurses prepared with a Doctor of Nursing Practice degree are expected to fill in practice; students are called upon to demonstrate synthesis of content from previous D.N.P. program courses; discussion of topics pertinent to advanced roles in nursing practice including challenges and opportunities, leadership in health systems and the profession, interprofessional communication and collaboration, conflict management, dissemination of evidence and expertise to improve health care, advocacy and ethical decision making. Prerequisites: NURS:6809.

**NURS:6811 Social Determinants of Health and Health System Inequities** 3 s.h.

Social determinants of health outcomes and inequities; social and economic forces that shape them using various perspectives and lenses; conceptualization and measurement of variables representing risk and inequities that serve as the organizing framework for course discussions, including individual and social factors; critical analysis of research studies for social bias.

**NURS:6826 Doctor of Nursing Practice Project I** 2 s.h.

Identification and analysis of a practice, system, or policy problem related to advanced nursing practice; development of an evidence-based proposal to improve outcomes for a group, population, or community; project will reflect student's independent scholarship and includes 370 minimum cumulative hours in the Doctor of Nursing Practice project series; first in a four-course sequence. Requirements: doctoral standing.

**NURS:6827 Doctor of Nursing Practice Project II** 1-2 s.h.

Students obtain project site approvals, complete human subjects review, begin implementation once approved, and prepare for project evaluation; project will reflect student's independent scholarship; Doctor of Nursing Practice project series; second in a four-course sequence. Prerequisites: NURS:6826. Requirements: doctoral standing.

**NURS:6828 Doctor of Nursing Practice Project III** 1-2 s.h.

Students continue implementation, begin to evaluate outcomes of their chosen project, and prepare a rough draft of documents for defense of the project; project will reflect the student's independent scholarship; Doctor of Nursing Practice project series; third in a four-course sequence. Prerequisites: NURS:6827. Requirements: doctoral standing.

**NURS:6829 Doctor of Nursing Practice Project IV** 1-2 s.h.

Students finish evaluation; prepare and defend their project to faculty, peers, and the community; and give a final report to the project site; project will reflect student's independent scholarship; Doctor of Nursing Practice project series; fourth in a four-course sequence. Prerequisites: NURS:6828. Requirements: doctoral standing.

- NURS:6900 Computational Intelligence** 3 s.h.  
 Concepts, models, algorithms, and tools for development of intelligent systems; data mining, expert systems, neural networks for engineering, medical and systems applications. Prerequisites: ISE:3700. Same as ISE:6350.
- NURS:7000 Philosophy and Sociology of Nursing Science** 3 s.h.  
 Introduction to philosophical, historical, and sociological underpinnings of contemporary science and traces history of nursing as scientific and applied discipline; exploration of the nature of knowledge, different ways of knowing, history of science, various philosophical approaches, goals of knowledge generation; analysis of sociology of science to identify the norms, cultural and political influences, differences among scientific disciplines; emphasis on interdisciplinary science; identification of concepts and conceptual definitions, especially as these differ across disciplines. Requirements: Ph.D. standing.
- NURS:7001 Qualitative Research** 4 s.h.  
 Provides a foundation in the design of qualitative and mixed methods research and analysis of qualitative and mixed methods data; emphasis on interactions among research purpose, question, aims, and interaction of that triad with sampling, setting, data collection, and analysis; using interpretive description as an exemplar, students design and conduct a small qualitative study relevant to their own interests; College of Nursing faculty present overviews of methods in which they have expertise, such as feminist research, ethnography, and narrative. Prerequisites: NURS:7000 and NURS:7002 and NURS:7006. Requirements: Ph.D. standing.
- NURS:7002 Designing Research** 3 s.h.  
 Introduction to designing research studies; identifying a problem and determining overall goal of the study; research goal subsequently leading to purpose, specific aims, and choice of a specific design; focus on issues related to maintaining continuity throughout the design of a study. Prerequisites: NURS:7000 and NURS:7006. Requirements: Ph.D. standing.
- NURS:7003 Quantitative Research** 4 s.h.  
 Refinement of student's understanding of the application of scientific logic; discussion of various quantitative methods; sampling theory and approaches to sample selection, recruitment, and methods to avoid bias; issues related to study validity, intervention development and evaluation, instrument selection, management of large data sets, and maintenance of data integrity; lab is designed as a workshop using guided exercises, peer sharing, and collaborative work groups to provide experiences integrated with content covered in didactic section of the course. Prerequisites: NURS:7002 and NURS:7006.
- NURS:7006 Theory and Model Development** 3 s.h.  
 Critical role of theories in science and the importance of continuous refinement of theory throughout a program of research; focus on theory construction and model building; examination of relationships linking concepts; analysis of structure, scope, and forms of theories/models; construction of micro- or mid-range theories/models using positivistic and inductive approaches; emphasis on critical analysis of literature. Prerequisites: NURS:7000. Requirements: Ph.D. standing.
- NURS:7310 Measurement in Health Research** 3 s.h.  
 How to develop and employ measures that are operationalized within the context of theories and conceptual models; sound measurement principles and practices, as well as adequate testing for reliability and validity using appropriate methods and procedures. Prerequisites: NURS:7006.
- NURS:7404 Biological Markers in Health Research** 3 s.h.  
 Use of biomarkers as surrogate clinical endpoints, measure of behavior, and measures of exposures; judicious integration of biomarkers into an overall program of health research in light of pertinent considerations, including validity and reliability, feasibility and cost. Prerequisites: NURS:6811 and NURS:7002 and NURS:7003.
- NURS:7509 Research Residency** 1-3 s.h.  
 Participation in a research project based on an individualized plan of study, under guidance of an experienced researcher; students register with the respective faculty member for a residency that takes place at the University of Iowa, or register with their advisor for a residency that takes place outside the University of Iowa. Requirements: admission to the Ph.D. in nursing.
- NURS:7800 Independent Study** arr.  
 Supervised study adjusted to needs of doctoral degree students. Requirements: doctoral enrollment.
- NURS:7801 Seminar: Research Scholarship Role Development** 3 s.h.  
 Preparation for successful completion of doctoral coursework, comprehensive examination, and dissertation; faculty-guided structure provides opportunities for students to assimilate knowledge and behavior of a scholar and activities that facilitate and optimize socialization and success as nurse scientists and academic faculty. Requirements: Ph.D. standing.
- NURS:7803 Research Practicum I** 2 s.h.  
 First of two practicums that serve as a system of apprenticeship by which students are mentored through selected aspects of scientific processes, methodologies, analysis, and dissemination of results; projects relevant to student's area of study. Requirements: Ph.D. standing.
- NURS:7804 Research Practicum II** 2 s.h.  
 Second of two practicums that serve as a system of apprenticeship by which students are mentored through selected aspects of scientific processes, methodologies, analysis, and dissemination of results; project relevant to student's area of study. Requirements: Ph.D. standing.
- NURS:7805 Dissertation Research** arr.

# Bachelor of Science in Nursing, B.S.N.

The College of Nursing offers two paths to the Bachelor of Science in Nursing (B.S.N.): a prelicensure program for students who do not hold a nursing license (see the Bachelor of Science in Nursing [p. 1880] in this section of the Catalog) and a program for registered nurses (see Nursing-RN [p. 1882] in this section of the Catalog).

The B.S.N. programs prepare students for careers caring for patients in hospitals and in community agencies such as public health services, schools, homes, and industries. They also provide a base for graduate study in nursing.

In addition to combining general education with specialized career preparation, the University of Iowa programs in nursing offer the advantages of full participation in the social, cultural, and recreational activities of a highly diverse campus community. A university education enables students to prepare for a career as well as a life of thought and action informed by knowledge, introspection, and contemplation.

The B.S.N. programs provide a basis for nurses' roles in wellness and health promotion, in acute care, and in long-term care for chronic illness. The professional nurse may provide care to individuals, families, groups, and communities along a continuum of health, illness, and disability in any sector of the health care system.

In addition to providing care, the nurse serves as a coordinator of health care by organizing and facilitating the delivery of comprehensive, efficient, and appropriate service to individuals, families, groups, and communities. The nurse demonstrates the ability to conceptualize the total continuing health needs of the patient, including legal and ethical aspects of care. The University of Iowa programs' goal is to produce graduates who are competent, committed, creative, and compassionate.

## Expenses and Insurance

Students pay University of Iowa student fees throughout the B.S.N. program. They must purchase uniforms, shoes, a stethoscope, and a watch with a full-sweep second hand, and they must pay the cost of computer testing, supplies, and materials for required nursing courses. All nursing students arrange and pay for their own health screening requirements, health insurance, and transportation once they are enrolled in clinical nursing courses. They also pay fees that cover the cost of criminal background checks, laboratory equipment, professional liability insurance, and simulation.

## Mandatory Health Insurance

B.S.N. prelicensure students upon admission to the College of Nursing and each August afterward must provide verification that they have obtained and currently hold health insurance that satisfies the following minimal standards of coverage (or an equivalent alternative health care plan):

- \$250,000 lifetime benefit;
- coverage for hospitalization, including coverage for room and board, physician visits, surgeon services, X-ray, and lab services;
- inpatient deductible under an individual policy not exceeding \$500 per admission and a 20 percent copayment/coinsurance requirement; and

- coverage for medically necessary care, including physician services, X-ray, and lab services for treatment of emergencies, illness, accident, and injury.

## Professional Liability Insurance

All students in the College of Nursing are required to carry professional liability insurance throughout the duration of their program. Agencies that provide clinical practicums for College of Nursing programs require that students have insurance coverage. The College of Nursing provides students with information about the liability insurance requirement during orientation.

B.S.N. prelicensure students and nursing-RN students are covered by a group policy supported by student fees.

## Bachelor of Science in Nursing

The Bachelor of Science in Nursing prelicensure program of study requires a minimum of 128 s.h., including 64 s.h. in the nursing major and 64 s.h. in supporting coursework that is prerequisite to the nursing major. The program is intended for students beginning their education in nursing. A B.S.N. program for registered nurses is described under Nursing-RN [p. 1882] in this section of the Catalog. All students must earn a g.p.a. of at least 2.00 to earn the degree.

B.S.N. students may complete their entire program at Iowa, enrolling in the College of Liberal Arts and Sciences to complete courses that are prerequisite to the nursing major, or they may transfer from an institution that offers comparable prerequisite courses that are approved by the University of Iowa and the College of Nursing. They must earn standard admission to the College of Nursing once they have completed the prerequisite coursework. Highly qualified applicants may be admitted to the College of Nursing directly from high school under the B.S.N. direct admission program; see Admission [p. 1883] in this section of the Catalog.

Students who are part of the B.S.N. direct admission program spend their first four semesters (two years) on prerequisite coursework and complete the requirements for the nursing major during the next four semesters (their third and fourth years), earning the B.S.N. in a total of four academic years. Students who earn standard admission to the College of Nursing have five semesters to complete prerequisite coursework. They begin work for the nursing major in spring of their third year and complete the major in four semesters, earning the B.S.N. degree.

University of Iowa students who have declared an interest in the prelicensure nursing program are advised at the University's Academic Advising Center until they are admitted to the College of Nursing. After admission to the college, each student is assigned a professional advisor in the college's Felton Student Success Center.

Nursing courses are based on concepts of health, deviations from health, and nursing intervention. Coursework progresses in complexity across the curriculum. The curriculum reflects the current trend in health care delivery toward emphasis on nursing as a service provided both inside and outside hospitals. Students have access to clinical experiences selected from a multitude of agencies in Iowa and around the country.

The following coursework is required for B.S.N. students.

Code	Title	Hours
<b>Prerequisite Courses</b>		
	General Education Prerequisites	13
	Natural Science Prerequisites	23
	Social Science Prerequisites	9-10
	Other Prerequisites	19
<b>Courses Required for the Major</b>		<b>64</b>
<b>Total Hours</b>		<b>128-129</b>

The B.S.N. prelicensure program requires the following coursework. Students must complete the prerequisite coursework before beginning work required for the major in nursing.

## Prerequisite Courses

Direct admission students complete all of the following prerequisites during their first and second years of enrollment at the University of Iowa. Standard admission students must complete all of the following prerequisites, with the exception of two natural science courses and two social science courses, before they may apply for admission to the College of Nursing.

### General Education Prerequisites

Code	Title	Hours
All of these:		
RHET:1030	Rhetoric	4
	International and Global Issues course	3
	Literary, Visual, and Performing Arts course	3
	Values and Culture or Diversity and Inclusion course	3

### Natural Science Prerequisites

Code	Title	Hours
All of these:		
ACB:3110	Principles of Human Anatomy	3
BIOL:1141	Human Biology: Health Professions	4
CHEM:1070	General Chemistry I	3
CHEM:1080	General Chemistry II	3
HHP:1300	Fundamentals of Human Physiology	3
HHP:2310	Nutrition and Health	3
MICR:3164	Microbiology and Human Health	4

### Social Science Prerequisites

Code	Title	Hours
Both of these:		
NURS:1030	Human Development and Behavior	3
PSY:1001	Elementary Psychology	3
And one of these:		
SOC:1010	Introduction to Sociology	3-4
SOC:1030	Contemporary Social Problems	3-4

## Other Prerequisites

## Honors in Nursing

The College of Nursing Honors Program provides seminars and independent study experience for qualified students. In order to pursue honors studies in nursing, students must maintain a University of Iowa g.p.a. and a nursing major g.p.a. of at least 3.50.

The honors program in nursing enables students to explore subject matter based on individual interests, needs, and goals. It provides opportunities for self-initiative, research experience, scholarly writing, intellectual and personal development, and challenges students to grow and excel. Students who fulfill the requirements of the program graduate with honors in nursing.

In addition to honors in their majors, prelicensure B.S.N. students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the University's honors program.

## Nursing-RN

The nursing-RN program of study requires 32 s.h. of credit. Students must hold a valid Iowa nursing license (RN) and an Associate Degree in Nursing or Diploma in Nursing. They must earn a g.p.a. of at least 2.00 to earn the degree.

The program is designed to offer registered nurses the opportunity to build on their nursing knowledge and experience by earning a Bachelor of Science in Nursing. Students take courses that focus on professionalism and patient safety, research, improvement of health systems, leadership, professional engagement, and community and public health.

Students may transfer coursework completed at other colleges and universities to satisfy the prerequisites, general education requirements, and electives for admission to the College of Nursing (see "Admission to the Nursing-RN Program" under Admission [p. 1883] in this section of the Catalog). Once a student is admitted to the program, the student has the option of completing the required 32 s.h. in three semesters, four semesters, or in five semesters.

The program is delivered online, with limited face-to-face meetings for the community health practicum experience and leadership project. Students must complete a practicum experience in Iowa or an emersion experience in Eswatini, Africa, and may be required to drive up to 100 miles to a regional practicum setting.

The College of Nursing participates as a receiving institution in the Iowa Statewide Articulation Plan for Nursing Education: RN to Baccalaureate.

The nursing-RN program requires the following College of Nursing coursework.

## Honors in Nursing

The College of Nursing Honors Program provides seminars and independent study experience for qualified students. In order to pursue honors studies in nursing, students must maintain a University of Iowa g.p.a. and a nursing major g.p.a. of at least 3.50.

The honors program in nursing enables students to explore subject matter based on individual interests, needs, and goals. It provides opportunities for self-initiative, research experience, scholarly writing, intellectual and personal development, and challenges students to grow and excel. Students who fulfill the requirements of the program graduate with honors in nursing.

## Combined Programs

### Nursing-RN/D.N.P. (Adult Gerontology Acute Care Nurse Practitioner or Adult Gerontology Primary Care Nurse Practitioner or Health Systems or Pediatric Nurse Practitioner—Primary Care Subprograms)

Students who are interested in earning a Doctor of Nursing Practice degree with an adult gerontology acute care nurse practitioner, adult gerontology primary care nurse practitioner, health systems, or pediatric nurse practitioner—primary care subprogram may apply to the combined program offered by the College of Nursing. For information about the D.N.P. degree, see the Doctor of Nursing Practice, D.N.P. [p. 1889] in the Catalog.

## Admission

Students entering the University who are not licensed registered nurses (RN) apply to the B.S.N. prelicensure program. Registered nurses apply to the RN-B.S.N. program.

All entering first-year and undergraduate transfer students who have earned fewer than 24 s.h. when they apply for admission to the University of Iowa must complete the American College Test (ACT) or the Scholastic Aptitude Test (SAT). For information about the American College Test, visit the ACT website; for information about the Scholastic Aptitude Test, visit the College Board website.

Applicants to the B.S.N. and RN-B.S.N. programs whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL). Registered nurses educated outside the United States are required to present verification of having passed the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination and specified Excelsior baccalaureate nursing examinations.

Applicants admitted to the College of Nursing are expected to be able to meet the curriculum's performance standards; see "Technical Standards" below.

A criminal background check is conducted for all prelicensure and undergraduate students before they begin the nursing major. Admission to all programs is conditional pending successful review of criminal background and abuse registry.

### Admission to the B.S.N. Prelicensure Program

All applicants to the B.S.N. prelicensure program (direct and standard admission applicants) must have satisfied the following minimum high school course requirements.

- English: four years.
- Mathematics: three years, including algebra I, algebra II, and geometry.
- Science: one year of biology, one year of chemistry, and one year of physics.
- Social science: three years.
- World languages: four years (fourth-level proficiency) of the same world language; or two years (second-level proficiency) in two different world languages; or two years of the same world language plus one 3 s.h. course from the GE CLAS Core [p. 20] International and Global Issues, Values and Culture, or Diversity and Inclusion.

### B.S.N. Direct Admission

A select group of highly qualified students are admitted to the College of Nursing directly from high school through the B.S.N. Direct Admission Program. To be considered for the direct admission, students must meet the following requirements:

- an ACT composite score of at least 28 or SAT combined score of at least 1300,
- a g.p.a. of at least 3.80, and
- completion of all the minimum high school course requirements listed under "Admission to the B.S.N. Prelicensure Program" above.

Students who lack one of the requirements can submit an application for the early admission program. High school requirements must be satisfied prior to enrollment at the University of Iowa.

Students admitted through the Direct Admission Program must maintain a cumulative g.p.a. of at least 3.00 and have clean criminal and student life records during their first four semesters in the program. Students who fail to meet these requirements may be subject to probation or dismissal from the College of Nursing.

### B.S.N. Standard Admission

In order to apply for standard admission to the College of Nursing, students must:

- have a cumulative g.p.a. of at least 3.00;
- have a minimum of 48 s.h. of college credit;
- have completed the minimum high school course requirements listed under "Admission to the B.S.N. Prelicensure Program" above, with any deficiencies satisfied through college coursework;
- have completed all B.S.N. prerequisite coursework listed under the Bachelor of Science in Nursing [p. 1880] (a maximum of two natural science prerequisites and two social science prerequisites may be in progress or planned at the time of application); and
- must have a grade of C (2.00) or higher on all prerequisite coursework.

In order to enter the College of Nursing, successful competitive admission applicants must:

- maintain a cumulative g.p.a. of at least 3.00;
- have a minimum of 64 s.h. of college credit; and
- have completed any remaining prerequisite coursework listed under the Bachelor of Science in Nursing [p. 1880], including any remaining natural science and/or social science prerequisites.

Successful competitive admission students must complete any remaining natural science prerequisite no more than 10 years before they enter the College of Nursing and enroll in coursework for the nursing major.

### Admission to the Nursing-RN Program

Applicants to the program must hold an RN license and an Associate Degree in Nursing or Diploma in Nursing. They must have a cumulative g.p.a. of at least 3.00. Admission is highly competitive, with emphasis on the natural sciences (anatomy, biology, chemistry, microbiology, physiology), writing (composition I and II), and mathematics (statistics).

Applicants must be enrolled in or have completed prerequisite coursework at the time of application to the Nursing-RN (RN to B.S.N.) program and additional elective coursework before entering the program. They may complete these requirements at a community college.

World language is not an admission requirement.

### Technical Standards

Applicants to the College of Nursing are expected to be capable of completing the entire nursing curriculum and of earning a B.S.N. degree. Nursing is a practice discipline with cognitive, sensory, affective, and psychomotor performance requirements. The college's technical standards provide an objective measure on which to base informed decisions about whether individual students will be able to participate in the nursing program. Technical standards also help students

determine whether they will need accommodations or modifications in order to participate.

The technical standards are provided to all students before matriculation and are available online in the Bachelor of Science in Nursing Handbook; see Section VIII: Clinical Course and Health Science Student Requirements. Students with disabilities who believe that they may need assistance in meeting the core performance standards should contact Student Disability Services.

## Selection

The college's admission committee recommends to the dean the applicants who appear to be best qualified. Fulfillment of minimum admission requirements does not guarantee admission to the College of Nursing. The committee may require personal interviews. A physical examination report and specific health screening requirements must be on file at University of Iowa Student Health 10 days before the class opens for the first clinical nursing course.

## Application Deadlines

- B.S.N. prelicensure direct admission: November 1 for early action; February 1 for regular admission.
- B.S.N. prelicensure standard admission: April 1 for spring entry.
- Nursing-RN (RN to B.S.N.) program: March 1 for fall entry; September 1 for spring entry.

## Financial Support

In addition to general assistance available to University students, there are assistance programs specifically for nursing students. Information about financial aid is available from the University's Office of Student Financial Aid.

## Career Advancement

The University of Iowa's B.S.N. program provides broad preparation in clinical, scientific, community health, and patient education skills, and promises outstanding career options. With a B.S.N. degree, students are eligible to work as a staff nurse; flight nurse; a nurse on medical, oncology, surgical, pediatric, emergency, or intensive care units; a nurse in outpatient or neighborhood clinics; or a home health care nurse.

The U.S. Bureau of Labor Statistics projects that employment for registered nurses to be among the top occupations in terms of job growth through 2029.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# Master of Science in Nursing, M.S.N.

The College of Nursing offers the Master of Science in Nursing (M.S.N.) with two subprogram focus areas: clinical nurse leader (CNL) and nursing systems administration (NSA).

## Requirements

The Master of Science in Nursing (M.S.N.) requires 33 or 39 s.h., depending on the subprogram students choose to complete. Students maintain a g.p.a. of at least 2.75 in coursework for the M.S.N. degree.

Graduate students in the College of Nursing must adhere to all Graduate College policies regarding academic standing, probation, and dismissal. Transfer credit applicable to the M.S.N. is limited and must be approved by the College of Nursing executive associate dean for academic affairs. Coursework taken 10 years or more before the M.S.N. final examination must be updated according to University policy.

## Clinical Nurse Leader (CNL)

The Master of Science in Nursing with a clinical nurse leader subprogram requires 39 s.h., including a core component of 21 s.h., which students take with College of Nursing doctoral students, and a specialization component of 18 s.h. that centers on the clinical nurse leader role. The clinical nurse leader subprogram focuses on improving the quality of patient care and helping professional nurses to thrive in the health care system. The clinical nurse leader role has demonstrated effectiveness in improving outcomes, elevating current evidence-based practice, enhancing quality, and providing continuous leadership in the microsystem.

Students must successfully complete a capstone project.

## Two-Year Plan

The M.S.N. with a clinical nurse leader subprogram requires the following coursework for a two-year plan.

### First Year

Code	Title	Hours
NURS:5009	Evaluating Evidence for Practice	3
NURS:5017	Quality and Safety	3
NURS:5018	Clinical Education in the Care Environment	3
NURS:5021	Physiology, Pathophysiology, and Pharmacology I for the Clinical Nurse Leader	3
NURS:5022	Physiology, Pathophysiology, and Pharmacology II for the Clinical Nurse Leader	3
NURS:5636	Clinical Nurse Leader Seminar	3
NURS:5666	Leadership in the Microsystem	3

**Total Hours** **21**

## Second Year

NURS:5007	Applied Epidemiology	3
NURS:5010	Clinical Data Management and Evaluation	3
NURS:5016	Health Care Infrastructure and Informatics	3
NURS:5037	Health Promotion and Assessment for Clinical Nurse Leaders	3
NURS:5696	Clinical Nurse Leader Capstone Clinical Immersion	6

**Total Hours** **18**

## Three-Year Plan

The M.S.N. with a clinical nurse leader subprogram requires the following coursework for a three-year plan.

### First Year

Code	Title	Hours
NURS:5009	Evaluating Evidence for Practice	3
NURS:5018	Clinical Education in the Care Environment	3
NURS:5021	Physiology, Pathophysiology, and Pharmacology I for the Clinical Nurse Leader	3

NURS:5636	Clinical Nurse Leader Seminar	3

**Total Hours** **15**

## Second Year

Code	Title	Hours
NURS:5007	Applied Epidemiology	3
NURS:5017	Quality and Safety	3
NURS:5037	Health Promotion and Assessment for Clinical Nurse Leaders	3
NURS:5666	Leadership in the Microsystem	3

**Total Hours** **12**

## Third Year

Code	Title	Hours
NURS:5010	Clinical Data Management and Evaluation	3
NURS:5016	Health Care Infrastructure and Informatics	3
NURS:5696	Clinical Nurse Leader Capstone Clinical Immersion	6

**Total Hours** **12**

See the M.S.N. course plan on the College of Nursing website for a semester-by-semester course schedule.

## Nursing Systems Administration (NSA)

The Master of Science in Nursing with a nursing systems administration subprogram requires 33 s.h., and focuses on preparing nurse leaders to serve in a variety of managerial and leadership capacities in all practice environments. The program focuses on graduate-level practice in nursing and health care leadership and the interventions that influence health care outcomes for individuals, populations, or systems.

Students must successfully complete a graduate-level guided capstone program implementation project.

The M.S.N. with a nursing systems administration subprogram requires the following coursework for a two and a half year plan (of five semesters).

### First Year

Code	Title	Hours
NURS:5002	Leadership and Management Essentials	3
NURS:5009	Evaluating Evidence for Practice	3
NURS:6550	Advanced Leadership and Management	3
NURS:6553	Seminar on Innovations	4

**Total Hours** **13**

### Second Year

Code	Title	Hours
NURS:5010	Clinical Data Management and Evaluation	3
NURS:5017	Quality and Safety	3
NURS:6551	Financial Management	4
NURS:6808	Population Health for Advanced Practice	3

**Total Hours** **13**

### Third Year

Code	Title	Hours
NURS:5016	Health Care Infrastructure and Informatics	3
NURS:5697	Specialty Practice in Nursing Systems	4

**Total Hours** **7**

See the M.S.N. course plan on the College of Nursing website for a semester-by-semester course schedule.

## Admission

Applicants to College of Nursing graduate programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must have a g.p.a. of at least 3.00. A criminal background check is required for all students upon admission. The College of Nursing has additional application requirements, as follows.

## Admission to the M.S.N. Program

Application requirements specific to the M.S.N. program are:

- a bachelor's or advanced degree with a major in nursing from an accredited program;
- satisfaction of the legal requirements for the practice of nursing;
- transcripts from institutions for all undergraduate and graduate coursework; and
- completion of an upper-level statistics course within five years of the application deadline (acceptable University of Iowa courses include BIOS:4120 Introduction to Biostatistics, PSQF:4143 Introduction to Statistical Methods, STAT:3510 Biostatistics, and STAT:4143 Introduction to Statistical Methods).

Applications are reviewed once a year. To be reviewed, the application must be complete with all materials submitted.

Due to the level of web-based coursework required, international students in the M.S.N. clinical nurse leader program are not eligible for F-1 or J-1 student immigration status. Questions regarding visas and immigration documentation should be directed to International Student and Scholar Services (ISSS).

## Admission to the Clinical Nurse Leader Subprogram

Additional application requirements specific to the M.S.N. with a clinical nurse leader subprogram are:

- current written recommendations from three persons knowledgeable about the applicant's competence in the practice of nursing and potential for leadership and scholarship (forms required);
- approximately one year of experience; and
- a current résumé, goal statement (statement of purpose), statement of disclosure, and supplemental/information form.

Applicant interviews are required, and in some cases, virtual interviews may be arranged.

## Admission to the Nursing Systems Administration Subprogram

Additional application requirements specific to the M.S.N. with a nursing systems administration subprogram are:

- current written recommendations from three persons knowledgeable about the applicant's competence in the practice of nursing and potential for leadership and scholarship (forms required); and
- a current résumé, goal statement (statement of purpose), statement of disclosure, and supplemental/information form.

Applicant interviews are required, and in some cases, virtual interviews may be arranged.

## Application Deadlines

Application deadlines to the M.S.N. programs are:

- M.S.N. with clinical nurse leader subprogram: February 1 for fall entry.
- M.S.N. with nursing systems administration subprogram: February 1 for fall entry.

## Career Advancement

The M.S.N. prepares nurses to be equipped with knowledge and skills to lead change, promote health, and elevate care in various roles and settings. M.S.N. graduates are prepared for critical action with complex, changing systems, including health, educational, and organizational systems.

# Doctor of Nursing Practice, D.N.P.

## Requirements

The Doctor of Nursing Practice (D.N.P.) requires a minimum of 73 s.h. of graduate credit. Students may complete the program in three to five years, depending on their focus area. Students must maintain a cumulative g.p.a. of at least 3.00.

Those who enter the program with a master's degree must complete a minimum of 72 s.h., although some coursework from the master's degree program may count toward the D.N.P. degree. Students who enter with a non-nursing master's degree who are interested in pursuing a focus in health administration can complete D.N.P. degree requirements in health systems. Individuals who have been granted an M.S.N./APRN may complete the D.N.P. with a minimum of 29 s.h. of graduate credit earned at the University of Iowa after D.N.P. program admission and with a minimum of 43 s.h. of transfer credit previously earned from the UI or elsewhere.

A dual certification program is available that allows students to combine two of the nurse practitioner specialties, except for anesthesia nursing or health systems. In addition, a combined program is available for B.S.N. students with the nursing-RN subprogram who are interested in earning the D.N.P. degree with an adult gerontology primary care nurse practitioner, health systems, or pediatric nurse practitioner—primary care subprogram.

Students choose from a number of specialties, including adult gerontology acute care nurse practitioner, adult gerontology primary care nurse practitioner, anesthesia nursing, family nurse practitioner, pediatric nurse practitioner—acute care, pediatric nurse practitioner—primary care, psychiatric/mental health nurse practitioner; and health systems. For yearly plans that detail coursework in these specialty areas, see "Plans of Study" below. Visit D.N.P. Plans of Study on the College of Nursing website for a semester-by-semester view of required coursework for each D.N.P. specialty.

D.N.P. students complete basic graduate core courses, specialty courses, advanced core courses, and practicums. In didactic coursework, they explore clinical leadership, public policy and advocacy, specialty systems, change theory, finance and business, and entrepreneurial tools.

Students must complete a minimum of 1,000 practice experience hours. Individuals who enter the program having completed an M.S.N. may transfer approved clinical hours from their M.S.N. program to the D.N.P. program. The clinical hours requirement is evaluated for each student who has completed an M.S.N. with a specialty program. Students who completed more than 1,000 practice experience hours in an M.S.N. advanced practice program still must complete the number of D.N.P. practicum and project hours determined in consultation with their advisor and the D.N.P. program director.

Transfer credit applicable to the D.N.P. is limited and must be approved by the College of Nursing assistant dean for graduate practice programs. Transcripts for individuals who have completed an M.S.N. are evaluated individually.

Students must adhere to all Graduate College policies regarding academic standing, probation, and dismissal.

Coursework taken 10 or more years before a student plans to graduate from the D.N.P. program must be updated according to University policy.

### Admission

Applicants to College of Nursing graduate programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must have a g.p.a. of at least 3.00; applicants for the dual certification programs must have a minimum g.p.a. of at least 3.50. A criminal background check is required for all students upon admission. The College of Nursing has additional application requirements, as follows.

### Admission to the D.N.P. Program

Application requirements specific to the D.N.P. program are:

- a bachelor's degree with a major in nursing from an accredited program;
- satisfaction of the legal requirements for the practice of nursing;
- current written recommendations from three persons knowledgeable about the applicant's competence in the practice of nursing and potential for leadership and scholarship (forms required);
- a current résumé, goal statement (statement of purpose), statement of disclosure, and supplemental/information form;
- transcripts from all undergraduate and graduate coursework;
- D.N.P. applicants to the direct care programs with master's degrees in nursing from other schools must provide verification of completed clinical hours from their institution's graduate director or must submit appropriate course syllabi; and
- an upper-level statistics course (undergraduate course at junior/senior level) completed within five years of application deadline; acceptable University of Iowa courses are as follows—STAT:3510 Biostatistics, PSQF:4143 Introduction to Statistical Methods, STAT:4143 Introduction to Statistical Methods, or BIOS:4120 Introduction to Biostatistics (equivalent courses from other colleges also will be accepted).\*

\*For statistics courses taken at another institution, refer to that institution's catalog or registrar's office to verify course

numbering scheme. Community college courses are considered to be at a lower level (first-year/sophomore) and are not acceptable as an admission prerequisite statistics course. For further questions, regarding the admission upper-level statistics course requirement contact the graduate nursing programs office.

Application deadline for the D.N.P. program is February 1 for all specialties except anesthesia nursing, which has a June 1 application deadline.

Applications are reviewed once a year. In order to be reviewed, the application must be complete, with all materials submitted.

Applicant interviews are required for the D.N.P. program; in some cases, virtual interviews such as through Zoom may be arranged.

Due to the level of web-based coursework required, international students in the D.N.P. program of study are not eligible for F-1 or J-1 student immigration status. Questions regarding visas and immigration documentation should be directed to International Student and Scholar Services (ISSS).

## Career Advancement

The D.N.P. program prepares nurses for leadership and advanced practice roles within today's complex health care system. Graduates acquire the knowledge and skills to provide the highest standard of care for individuals, families, and communities.

# Nursing, Ph.D.

## Requirements

The Doctor of Philosophy program in nursing requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00.

The program prepares students to advance nursing science and contribute to the body of nursing knowledge. It emphasizes student participation with faculty members on research teams; focused coursework; presentation and publication of research-based knowledge; and interdisciplinary learning experiences.

Graduate students in the College of Nursing must adhere to all Graduate College policies regarding academic standing, probation, and dismissal. Coursework taken 10 or more years before a student plans to graduate from the Ph.D. program must be updated according to University policy.

The Ph.D. with a major in nursing requires the following work.

This course (minimum of 11 s.h.):		
NURS:7805	Dissertation Research	arr.

## Admission

Applicants to College of Nursing graduate programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

The program is open to individuals who have earned a bachelor's degree in nursing, an associate's degree in nursing with a bachelor's or advanced degree in any field, an advanced degree in nursing, or an advanced degree in a health-related field.

A criminal background check is required for all students upon admission. The College of Nursing has additional application requirements, as follows.

## Admission to the Ph.D. Program

Ph.D. applicants who have completed an accredited basic nursing program must hold a current license to practice nursing.

Applicants must have a g.p.a. of at least 3.00. They also must have successfully completed an upper-level statistics course within five years prior to the application deadline.

Applicants must submit along with their application:

- a two-to-three-page statement describing their educational objectives, career goals, and an area of research for their doctoral study;
- three recommendations from nursing professionals that speak to the applicant's potential as a scholar;
- a current résumé or curriculum vitae; and
- a complete transcript of all college programs and courses.

Applicants whose first language is not English must score at least 81 (internet-based) on the Test of English as a Foreign Language (TOEFL); at least 7.0 on the International English Language Testing System (IELTS), with no subscore less than 6; or at least 105 on the Duolingo English Test (DET).

Application deadline for the Ph.D. program is January 15. In order to be reviewed, the applicant's file must be complete, with all materials submitted.

## Career Advancement

The Ph.D. program prepares scholars to move nursing and health science forward. Graduates are prepared for careers as faculty members in college and university settings as well as researchers, consultants, and leaders in military, academic or industry venues, and in other nonacademic settings.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

The hallmarks of a University of Iowa pharmacy degree are patient-centered practice, strong grounding in science and evidence-based practice, exploration of career choices through required and elective courses, and exposure to leadership opportunities within the college, the University, and the profession. Career options may include community and/or hospital pharmacy, public service, consulting and long-term care, teaching and research in academia, managed care, pharmaceutical industry, or research careers.

The University of Iowa's Pharm.D. program synthesizes basic scientific principles and practice through caring and communication in an integrated professional program. The role of a pharmacist ranges from managing medication for individuals to shaping national health care policy. Students learn to manage aspects of practice, to solve problems, make clinical decisions, clearly communicate ideas, practice ethically, and become leaders in their communities and profession. Students study with professors who, in many cases, are pioneering the development of new drugs and defining the appropriate use of others to solve chronic health problems.

In addition to offering the Doctor of Pharmacy (Pharm.D.) degree, the professional Certificate in Palliative Care, the Master of Science in pharmacy, the Doctor of Philosophy in pharmacy, and three undergraduate certificates in drug delivery, drug discovery, and drug disposition and metabolism, the College of Pharmacy collaborates with the College of Public Health to offer the combined Doctor of Pharmacy/M.P.H. degree, and with the Graduate College to offer the Doctor of Pharmacy/M.S. in informatics degree.

## College Organization

The College of Pharmacy's faculty and programs are organized in two academic units. These units provide coursework for the Doctor of Pharmacy curriculum and for the college's graduate programs.

## Pharmacy Practice and Science

Faculty in Pharmacy Practice and Science (PPS) provide expertise and education in the professional practice of pharmacy. They specialize in a wide variety of clinical pharmacy practices; conduct research on patient and population outcomes related to medication therapy; contribute to the scholarship of teaching and learning in pharmacy education; and provide instruction in the pharmacist's professional role and the safe, effective use of medications.

This unit offers Master of Science and Doctor of Philosophy curricula in health services research, which encompasses the behavioral, economic, social, and administrative sciences; and elements of pharmacy practice. It offers coursework through its Applied Clinical Sciences Division and its Health Services Research Division.

## Applied Clinical Sciences (ACS) Division

Teaching and research in this division focus on the delivery of care and related services to patients and the education of student and resident pharmacists in practice settings. Courses are offered in pharmacotherapy, communication and practice skill development, clinical problem solving, and patient care. Professional practice mentoring and education are provided in introductory and advanced pharmacy practice experiences.

## Health Services Research (HSR) Division

Teaching and research in this division involve economic, social, behavioral, and administrative components of pharmacy practice and medication use. Courses are offered on the health care system, practice management, the professional and business aspects of pharmacy practice, and on learning and applying economic and social psychological theories to the study of health services and medication use.

To learn more about the department and its two divisions, visit Pharmacy Practice and Science on the College of Pharmacy website.

## Pharmaceutical Sciences and Experimental Therapeutics

Faculty in Pharmaceutical Sciences and Experimental Therapeutics (PSET) provide expertise and education in areas that include the fundamental basis for drug therapy outcomes in patients, factors responsible for specific drug actions in individual patients and larger patient populations, drug metabolism, pharmaceutical toxicology, organic synthesis, structure-activity relationships, drug design, computer-aided drug discovery, bioanalytical chemistry, biopolymeric drugs, molecular pharmacology, dosage form development and performance, pharmaceutical applications of nanotechnology, industrial and manufacturing pharmacy, pharmacokinetics, and pharmacodynamics.

In addition to its educational roles in the Doctor of Pharmacy program, PSET offers Ph.D. and M.S. degrees in three graduate areas: clinical pharmaceutical sciences, medicinal and natural products chemistry, and pharmaceuticals. Clinical pharmaceutical sciences focuses on investigating drug therapy outcomes in patients and identifying factors responsible for specific drug actions in individual patients, related patient groups, and large patient populations. Medicinal and natural products chemistry includes aspects of drug design, organic synthesis, structure-activity relationships, drug metabolism, pharmaceutical toxicology, computer-aided drug discovery, bioanalytical chemistry, biopolymeric drugs, and molecular pharmacology. Pharmaceuticals focuses on characterization of pharmaceuticals and their component materials, development of new dosage forms and drug delivery systems, pharmaceutical applications of nanotechnology, and the pharmacokinetic and pharmacodynamic evaluation of drug actions and interactions.

The department also offers multidisciplinary opportunities with programs in medicine, chemistry, biochemistry, pharmacology, engineering, dentistry, and public health. Its national and international collaborations further enhance the breadth of research activities available to students.

To learn more, visit Pharmaceutical Sciences and Experimental Therapeutics on the College of Pharmacy website.

### Programs

## Undergraduate Programs of Study

### Certificates

- Certificate in Drug Delivery [p. 1922]
- Certificate in Drug Discovery [p. 1923]
- Certificate in Drug Disposition and Metabolism [p. 1924]

## Professional Programs of Study

### Major

- Doctor of Pharmacy [p. 1925]

### Certificate

- Certificate in Palliative Care [p. 1931]

## Graduate Programs of Study Majors

- Master of Science in Pharmacy [p. 1932]
- Doctor of Philosophy in Pharmacy [p. 1933]

### Facilities

## Pharmacy Building

A new, state-of-the-art building has set the stage for advancements in science and discovery, and for world-class pharmacy education to continue to grow and thrive. Classroom space is designed for collaborative and hands-on learning. The building boasts 16 collaborative research spaces and 23 learning spaces—centers and team rooms with aspects of universal design. In addition, the college has added 16,000 square feet of manufacturing space with a sterile products processing facility.

The original facility, now called the Pharmaceutical Sciences Research Building, continues to house classrooms, labs, offices, and a manufacturing facility.

The College of Pharmacy is located on the University's health sciences campus in close proximity to five professional schools. Students collaborate with expert health care providers at the Carver College of Medicine, and at the Colleges of Dentistry [p. 1263], Nursing [p. 1868], and Public Health [p. 1937]. The College of Pharmacy is located in close proximity to University of Iowa Hospitals & Clinics, the Bowen Science Building, and the Hardin Library for the Health Sciences.

For more than 125 years, the University of Iowa College of Pharmacy has led the way in educating pharmacists and pharmaceutical scientists. The college is well known for its high quality pharmacy education, advanced practice models, patient care, drug discovery, product development, and contract manufacturing.

## University of Iowa Pharmaceuticals

University of Iowa Pharmaceuticals is a pharmaceutical manufacturing facility registered with the U.S. Food and Drug Administration that develops pharmaceutical dosage forms and has manufactured clinical supplies in compliance with Good Manufacturing Practices since 1974. University of Iowa Pharmaceuticals has clients worldwide, including pharmaceutical companies, biotechnology firms, medical departments, and government agencies. Its staff works closely with clients and pharmaceuticals faculty members to produce virtually every type of pharmaceutical dosage form, supplying new pharmaceutical agents for use in clinical trials and other research. For more information, visit the University of Iowa Pharmaceuticals website.

### Courses

Students must be enrolled in the College of Pharmacy to enroll in professional-level (Pharm.D.) coursework numbered 8000-9999. Students who meet prerequisite requirements may register for the college's undergraduate- and graduate-level courses numbered 1100-7999.

## College of Pharmacy Courses

### **PHAR:1000 First-Year Seminar** 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

### **PHAR:1100 Introduction to Pharmaceutical Sciences: Drug Development** 1-2 s.h.

Introduction to drug discovery, development, and approval pathways used in the United States; specific focus on career pathways related to pharmaceutical development including the natural and biomedical sciences, clinical, regulatory and legal affairs, sales and marketing, and business development.

### **PHAR:1111 Need a New Drug?** 1 s.h.

Introduction to drug discovery, development, and approval process in the United States; focus on preclinical and clinical development activities and role of the FDA and other regulatory bodies in approval and oversight of available drug products.

### **PHAR:1200 Medicines That Changed the World** 1 s.h.

Herbal remedies and ancient traditional medicines have led to the discovery of life-saving drug therapies; as science has evolved, how the discovery of other important medicines have come about through advances in chemistry and biology and now through advances in computer science and informatics; students learn about the discovery history of some of the most important drug therapies of the 20th and 21st centuries and how those discoveries are leading to even more important, life-saving treatments.

### **PHAR:1812 What's in My Medicine Cabinet? An Introduction to Over-the-Counter Medications and Self Care** 2 s.h.

Introduction to nonprescription medications for treatment of minor illness and health maintenance; causes, signs, and symptoms of common ailments with information about selection of appropriate over-the-counter therapies and considerations for the need for further care; self-care strategies for disease prevention and wellness.

### **PHAR:3740 End-of-Life Care for Adults and Families** 3 s.h.

End-of-life issues in care of adults, older adults, and their families. Same as ASP:3740, MED:3740, NURS:3740.

### **PHAR:3994 Undergraduate Research in Pharmaceutical Sciences** 1-4 s.h.

Individual scientific research conducted under the guidance of a faculty member.

### **PHAR:3995 Undergraduate Independent Study** 1-4 s.h.

Supervised study. Requirements: enrollment in College of Pharmacy undergraduate certificate program.

### **PHAR:4146 Drug Disposition and Pharmacokinetics** 2 s.h.

Introduction to drug absorption, distribution, and elimination processes controlling overall drug exposure in humans; basic quantitative measurements presented and used to demonstrate the influence of drug properties and physiologic action on drug disposition. Prerequisites: (MATH:1380 or MATH:1460 or MATH:1550 or MATH:1850) and (BIOL:1140 or BIOL:1141 or BIOL:1411 or BIOL:1412) and (STAT:1020 or PSQF:1020 or STAT:1030 or STAT:2010).

### **PHAR:4501 Basic Principles of Toxicology** 3 s.h.

Basic principles and mechanisms of toxicology as it relates to drugs and environmental agents. Prerequisites: BIOC:3110.

### **PHAR:4502 Toxic Agents** 1 s.h.

Specific toxicants and toxicity not related to organ systems including carcinogenesis and oxidative stress; clinical toxicology and antidotes. Prerequisites: BIOC:3110.

### **PHAR:4503 Organ and Organism Toxicity** 1 s.h.

How toxicants, such as drugs, interact with organ systems and organisms. Prerequisites: BIOC:3110.

### **PHAR:4512 Principles of Drug Discovery** 3 s.h.

Focus on understanding drug targets as receptors, receptor theory, drug discovery, and new drug approval processes; areas of novel drug target identification, pharmacological characterization of new drugs, G protein coupled receptors as targets, and analysis of drug-receptor interactions. Prerequisites: BIOC:3110. Recommendations: one semester of pharmacology.

### **PHAR:4521 High Throughput Screening in Drug Discovery** 1 s.h.

Introduction to high throughput screening (HTS) and its application in pharmaceutical and biomedical sciences; description and use of HTS in identification of biologically active small molecules for use as probes, tool compounds, and drug leads; detection systems, robotic liquid handling instruments, and compound libraries; case studies of HTS approaches used in drug discovery. Prerequisites: ((CHEM:2220 or CHEM:2240) and BIOC:3110) or (BIOC:3120 and BIOC:3130). Requirements: one semester of analytical chemistry or analytical biochemistry.

### **PHAR:4537 Principles of Drug Metabolism** 3 s.h.

Principles of drug metabolism based on current knowledge of involved enzymes. Prerequisites: (CHEM:2220 or CHEM:2240) and (BIOC:3120 or BIOC:3110).

### **PHAR:4700 Pharmaceutical Chemical Analysis** 4 s.h.

Introduction to the use and selection of analytical methods used to evaluate pharmaceutical products; basic laboratory skills, data analysis, and record keeping. Prerequisites: (CHEM:2220 or CHEM:2240) and (CHEM:2410 or CHEM:2420). Requirements: no prior enrollment in PHAR:5700.

### **PHAR:4736 Properties of Dosage Forms I** 3 s.h.

Introduction to principles of physical and chemical sciences important in drug product development; solubility, colligative properties, and partitioning behavior, as well as ionic equilibria, pH control, and chemical stability are evaluated in context of their importance in liquid dosage forms; emphasis on issues impacting drug product quality. Prerequisites: (CHEM:2220 or CHEM:2240) and (MATH:1460 or MATH:1380 or MATH:1550 or MATH:1850).

### **PHAR:4737 Properties of Dosage Forms II** 3 s.h.

Physical and chemical properties and measurements of materials used in pharmaceuticals; introduction to material properties of drugs and excipients used in development of semi-solid and solid pharmaceuticals; emphasis on material selection, dosage form performance characteristics, and evaluation of drug product quality. Prerequisites: PHAR:4736.

### **PHAR:4740 Materials in Drug and Gene Delivery** 3 s.h.

Different types of materials used in drug and gene delivery including synthetic and natural polymers (poly lactic-co-glycolic acid and chitosan respectively); different forms of delivery systems including (but not limited to) liposomes, micelles, biodegradable nanoparticles, nondegradable nanoparticles, and solid porous scaffolds; applications of these material-based delivery systems from targeted chemotherapy to bone regeneration to vaccination applications.

- PHAR:4741 Immunology and Immunotherapies** 2 s.h.  
Introduction to basics of the immune system and how it protects against infection and disease; in-depth lectures on vaccines against infectious diseases and cancer in terms of their formulations and how they work; focus on past seminal findings, current treatment modalities, and cutting-edge technologies likely to impact future immunotherapeutic strategies.
- PHAR:4745 Drug Delivery I** arr.  
Advanced design and development of drug delivery systems; emphasis on selection of materials and designs suitable for specific applications; comparison and evaluation of available and emerging technologies. Prerequisites: (BIOC:3110 or BIOC:3120) and (MATH:1460 or MATH:1550 or MATH:1850 or MATH:1380) and (CHEM:2220 or CHEM:2240) and PHAR:4737. Corequisites: PHAR:4146 (if not taken as a prerequisite). Requirements: one semester of human physiology.
- PHAR:4799 Special Topics in Pharmaceutics** arr.  
Current topics in pharmaceutics. Prerequisites: MATH:2560 and CHEM:4431.
- PHAR:4800 Chemical and Biophysical Properties of Drugs** 1 s.h.  
Introduction to design of drug molecules based on an understanding of drug-like properties including chemical reactivity and structural optimization; minimization of potentially toxic biotransformations; optimization of absorption; screening methods for selection and classification of optimized molecules. Prerequisites: ((CHEM:2220 or CHEM:2240) and BIOC:3110) or (BIOC:3120 and BIOC:3130).
- PHAR:4850 Upstream Biotechnology Processes** 2 s.h.  
Introduction to fermentation, fermenter preparation, cell growth and medium requirements, inoculation, sampling, process termination, separation of cells, fermentation case study, enzyme activity, and biocatalysis. Same as CHEM:4850.
- PHAR:4851 Radiopharmaceuticals in Diagnostics and Therapy** 2 s.h.  
Use of radionuclides for diagnosis and monitoring of disease and in development of new therapeutic agents; strategies for provision of effective agents, regulatory processes, and safe handling and administration. Prerequisites: CHEM:2220 or CHEM:2240. Recommendations: one semester of physics, one semester of biology, one semester of anatomy or physiology, and one semester of pharmacology.
- PHAR:5110 Clinical Pharmaceutical Sciences Seminar** 1-2 s.h.  
Research by faculty, graduate students.
- PHAR:5310 Health Services Research Seminar** 1-2 s.h.  
Recent research in pharmacy administration.
- PHAR:5350 Introduction to Research Methods** 3 s.h.  
Scientific inquiry, experimental design, data collection, statistical methods used in the study of health services and clinical investigations; focus on understanding the research process and evaluating published studies. Recommendations: introductory statistics.
- PHAR:5510 Pharmaceutical Sciences and Experimental Therapeutics Seminar** 1-2 s.h.
- PHAR:5512 Drug Discovery and Mechanisms** 3 s.h.  
Process of modern drug discovery, focus on high throughput screening strategies, target validation, pharmacological characterization of new compounds; mechanism of drugs targeting G protein coupled receptors, ion channels and transporters, targets in biological systems.
- PHAR:5515 Perspectives in MNPC Research** 2 s.h.  
Contemporary research in medicinal chemistry and natural products.
- PHAR:5520 Medicinal and Natural Products Chemistry Research** arr.
- PHAR:5521 High Throughput Screening for Pharmaceutical and Biomedical Sciences** 1 s.h.  
Broad introduction to high throughput screening (HTS) and its application in pharmaceutical and biomedical sciences; HTS as a modern technology platform integrated with robust detection systems and robotic liquid handling instruments; use of HTS platforms to identify biologically active small organic molecules to validate drug targets, screen compound libraries; identification of biologically active small molecules for use as probes, tool compounds, drug leads; systematic, unbiased, and/or focused hypothesis-based approaches for mechanistic studies in biological and medical sciences. Recommendations: bachelor degree in biochemistry, chemistry, molecular biology, pharmacology, or equivalent.
- PHAR:5525 Drug Delivery Systems for Insoluble Compounds** 3 s.h.  
Specialized disperse systems (e.g., emulsions, nanoemulsions, microemulsions, micelle) used for insoluble systems; introduction to basics of lipid systems to understand behavior in aqueous media when delivered to the body.
- PHAR:5530 Pharmaceutical Sciences and Experimental Therapeutics Seminar** 1-2 s.h.
- PHAR:5537 Enzymatic Basis of Drug Metabolism** 3 s.h.  
Current literature on catalytic and physical properties, distribution, and substrate specificity of enzymes involved in mammalian drug metabolism. Prerequisites: CHEM:2220.
- PHAR:5541 Total Synthesis of Biologically Active Natural Products** 3 s.h.  
Total synthesis of natural products; use of strategies and tactics for synthetic maneuvering; selectivity of important and complex medicinal compounds; modern chemical methods for construction of carbon-carbon bonds.
- PHAR:5542 Biophysical Chemistry II, Module I** 1 s.h.  
Enzymes as unparalleled catalysts that represent a unique class of drug targets; focus on organic chemistry of enzyme catalyzed reactions and enzyme inhibition by small molecules from a medicinal chemistry perspective; chemical and enzyme kinetics, sources of catalytic power, chemical mechanisms used in enzyme catalysis, role of coenzymes; strategies in enzyme inhibition, drug resistance, drug synergism, reversible enzyme inhibitors, transition state analogs, slow tight binding inhibitors, irreversible inhibition; taken alone or as part of BIOC:5242. Requirements: introductory course in biochemistry. Same as BIOC:5244.
- PHAR:5545 Current Medicinal Chemistry** 3 s.h.  
Modern techniques used in drug discovery; important drug classes, their chemical mechanism of action.
- PHAR:5549 Analytical Biochemistry** 3 s.h.  
Application of modern chromatographic and detection methods used to isolate, characterize, and quantify drugs and macromolecules.
- PHAR:5700 Quantitative Research Methods in Pharmacy I** 3-4 s.h.  
Collection and interpretation of analytical data; instrumental analysis and separation techniques.

- PHAR:5702 Clinical Pharmacokinetics** 2 s.h.  
Fundamental concepts in pharmacokinetics and pharmacodynamics; application in dose regimen optimization and rational drug use.
- PHAR:5745 Drug Delivery: Principles and Applications I** arr.  
Advanced design and development of drug delivery systems with emphasis on selection of materials and designs suitable for specific applications; comparison and evaluation of available and emerging technologies. Prerequisites: (BIOC:3110 or BIOC:3120) and (MATH:3600 or MATH:2560) and (CHEM:2220 or CHEM:2240) and PHAR:4737. Corequisites: PHAR:4146 (if not taken as a prerequisite). Requirements: one semester of human anatomy and physiology.
- PHAR:5875 Perspectives in Biocatalysis** 1-3 s.h.  
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BIOC:5875, CBE:5875, CEE:5875, CHEM:5875, MICR:5875.
- PHAR:6120 Clinical Pharmaceutical Sciences Research** arr.  
**PHAR:6305 Foundation Literature in Health Services Research** arr.  
Issues related to pharmacy administration, social and behavioral pharmacy, pharmacy education.
- PHAR:6320 Health Services Research** arr.  
**PHAR:6330 Models of Patient Behavior and Choice** 3 s.h.  
Theoretical models used to describe behavior and choice in pharmaceutical socioeconomic research; models from economics, health services research, health behavior, clinical decision making.
- PHAR:6331 Models of Provider Behavior and Choice** 3 s.h.  
Theoretical background for study of provider decision making and behavior; models based on a classic economic approach, models used to study provider behavior.
- PHAR:6501 Principles and Mechanisms of Chemical Toxicology** 3 s.h.  
General principles and basic mechanisms of chemical and pharmaceutical toxicology; drug/toxicant disposition, including biotransformation and bioactivation to electrophiles.
- PHAR:6502 Toxic Agents and Concepts in Toxicology** 1 s.h.  
Specific classes of toxicants and non-organ directed toxicity, including chemical carcinogenesis, oxidative stress, teratogenesis; clinical toxicology, antidotes, methods and models in toxicology.
- PHAR:6503 Target-Organ Toxicity** 1 s.h.  
Role of drugs/toxicants in systems toxicity (target organ); hepatotoxicity, neurotoxicity, cardiotoxicity, and toxic responses of immune system.
- PHAR:6504 Mastering Reproducible Science** 1 s.h.  
Training in methods for conducting rigorous and reproducible science; features an array of faculty who provide lectures and discussions based on their areas of expertise (i.e., research with animals, synthetic chemistry, high throughput screening, etc.) to provide broad exposure and training in these areas; critical evaluation of literature outside of student's own specific field of study.
- PHAR:6700 Advanced Pharmacokinetics and Pharmacodynamics** 3 s.h.  
Application of pharmacokinetics and pharmacodynamics principles in pharmaceutical research. Prerequisites: PHAR:8146 or PHAR:4146. Requirements: two semesters of calculus and one semester of statistics.
- PHAR:6701 Stability of Pharmaceuticals** 3 s.h.  
Mechanisms of degradation of pharmaceuticals; prediction of shelf life of pharmaceuticals, stabilization. Prerequisites: CHEM:4432.
- PHAR:6706 Equilibria Processes** 3 s.h.  
Equilibria pertaining to ionic systems, complexation, partitioning, solubility. Prerequisites: CHEM:2220 or CHEM:2240.
- PHAR:6710 Pharmaceutics Graduate Seminar** 1-2 s.h.  
**PHAR:6720 Pharmaceutics Research** arr.  
**PHAR:7101 Principles of Experimental Therapeutics** 3 s.h.  
Introduction to key principles and concepts for research in experimental therapeutics; basic principles related to drug disposition, toxicity, and efficacy.
- PHAR:7102 Applied Clinical and Translational Science** 3 s.h.  
Application of clinical and translational science in a multidisciplinary collaborative environment to develop, conduct, and report research.
- PHAR:7331 Analytic Issues in Health Services Research II** 3 s.h.  
Continuation of HMP:7960; advanced applications, including panel data and qualitative response models. Prerequisites: HMP:7960. Same as HMP:7965.
- PHAR:7701 Surface Phenomena** arr.  
Behavior of matter in phase boundaries, especially adsorptive processes at liquid-solid and vapor-solid interfaces. Prerequisites: CHEM:4431.
- PHAR:7703 Transport Phenomena** 3 s.h.  
Diffusion and mass transport phenomena related to pharmaceutical systems.
- PHAR:8130 Foundations of Pharmacy Practice I** 4 s.h.  
Introduction to contemporary pharmacy practice; small-group discussion, application of core concepts through active hands-on learning approaches; for first-year student pharmacists. Requirements: P1 standing.
- PHAR:8131 Engagement: Professional Skills and Values** 2 s.h.  
Opportunity for student engagement in the College of Pharmacy prior to Professionalism Ceremony; development as a responsible partner in learning process by nurturing collaboration, leadership, service, compassion, community, self development, and social enrichment among students, faculty, and staff. Requirements: P1 standing.

**PHAR:8132 Continuing Professional Development 1 s.h.**

Engagement with profession of pharmacy and community through service and leadership activities, reflection; use of Continuous Professional Development Cycle (CPD) approach to learning. Requirements: P3 standing.

**PHAR:8133 Introductory Pharmacy Practice Experience Career Exploration 1 s.h.**

Hands-on exposure to various pharmacist career opportunities in four different pharmacy practice patient care settings; settings include practice areas and rotation types required for P4 Advanced Pharmacy Practice Experience (APPE) sites in community pharmacy, hospital pharmacy, ambulatory care/family practice, acute care medicine, and other elective practice settings; work with faculty mentor. Requirements: P1 standing.

**PHAR:8134 Foundations of Health Services 3 s.h.**

Foundation issues for pharmacist practice related to social, cultural, behavioral, economic, and organization design components of pharmacy care. Requirements: P1 standing.

**PHAR:8135 Health Information Retrieval and Informatics 3 s.h.**

Introduction and overview of health care information retrieval, organization, and dissemination; retrieval and organization of health information from pharmacy and medical primary and tertiary literature using secondary resources; knowledge and skills to manage, analyze, and legally share health information in electronic health records, pharmacy information systems, and automated systems. Requirements: P1 standing.

**PHAR:8136 Foundations of Pharmaceutical Sciences 6 s.h.**

Introduction and overview of foundations of pharmaceutical sciences. Requirements: P1 standing.

**PHAR:8140 Foundations of Pharmacy Practice II 4 s.h.**

Introduction to contemporary pharmacy practice for first-year student pharmacists; classroom methods include small group discussion-based and active hands-on learning approaches where students will apply core concepts.

**PHAR:8141 Discovery I: Introduction and Background 3 s.h.**

Create and disseminate new knowledge related to pharmacy or health care; broadly based scholarly effort with topics ranging from patient case studies, literature reviews, and analysis of pharmacy practice problems or basic research.

**PHAR:8142 Foundations of Health, Wellness, and Disease 2 s.h.**

Overview of the basic processes of good health and practices that promote wellness; emphasis on the mechanistic causes of human disease.

**PHAR:8146 Foundations of Pharmaceutical Sciences III 2 s.h.**

Continuation of PHAR:8137.

**PHAR:8147 Foundations of Pharmaceutical Sciences IV 3 s.h.**

Continuation of PHAR:8146.

**PHAR:8148 Pharmacokinetics and Dose Optimization 2 s.h.****PHAR:8149 Foundations of Pharmacology and Toxicology 3 s.h.**

Principles of pharmacology and toxicology.

**PHAR:8150 Foundations of Health, Wellness, and Disease 2 s.h.**

Overview of basic processes of good health and practices that promote wellness; emphasis on mechanistic causes of human disease.

**PHAR:8151 Discovery I: Introduction and Background 3 s.h.**

Creation and dissemination of new knowledge related to pharmacy or health care; broadly based scholarly effort with topics ranging from patient case studies, literature reviews, and analysis of pharmacy practice problems or basic research.

**PHAR:8152 Fundamentals of Compounding 1 s.h.**

Introduction to personalized drug delivery systems through the art of compounding.

**PHAR:8153 Integrated Pharmacotherapy: Dermatology and Sensory 2 s.h.**

Key elements of science and practice of pharmacy presented in an integrated manner and focused on particular organ systems or disease states. Requirements: P1 standing.

**PHAR:8202 Pharm.D. Learning Portfolio I 1 s.h.**

Students demonstrate and document mastery of experiential and didactic coursework and assignments, as well as self-assessment of their progress. Requirements: P2 standing.

**PHAR:8207 Introductory Pharmacy Practice Experiences Community 3 s.h.**

Exposure to the provision of care in a community pharmacy setting; activities focus on those experiences related to the community pharmacy environment, medication distribution, special products and populations, and related professional activities; delivered in set time blocks over winter break and during summer session before or after the P2 year.

**PHAR:8209 Introductory Pharmacy Practice Experiences Hospital 3 s.h.**

Exposure to the provision of care in a hospital pharmacy setting; activities focus on those experiences related to the hospital pharmacy environment, medication distribution, special products and populations, and related professional activities.

**PHAR:8250 Applications of Pharmacy Practice I 1 s.h.**

Expands on skills and concepts taught in the foundations of pharmacy practice course series and includes skills relevant to the disease states in the specific aligned component courses; taught using a variety of classroom methods including small-group, discussion-based, and active hands-on learning approaches where students will apply core concepts.

**PHAR:8251 Integrated Pharmacotherapy: Dermatology and Sensory 3 s.h.**

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

**PHAR:8252 Integrated Pharmacotherapy: Musculoskeletal 4 s.h.**

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

**PHAR:8253 Integrated Pharmacotherapy: Genitourinary and Reproductive 3 s.h.**

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

- PHAR:8254 Integrated Pharmacotherapy: Endocrine** 3 s.h.  
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
- PHAR:8255 Discovery II: Design and Methods** arr.  
Create and disseminate new knowledge related to pharmacy or health care with emphasis on design methods and data collection.
- PHAR:8260 Integrated Pharmacotherapy: Cardiovascular** 4 s.h.  
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
- PHAR:8261 Integrated Pharmacotherapy: Neurology and Psychiatry** 4 s.h.  
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
- PHAR:8262 Integrated Pharmacotherapy: Oncology** 3 s.h.  
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
- PHAR:8263 Integrated Pharmacotherapy: Infectious Diseases** 4 s.h.  
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
- PHAR:8264 Discovery III: Data Collection and Results** 1 s.h.  
Create and disseminate new knowledge related to pharmacy or health care with emphasis on data collection and results.
- PHAR:8265 Applications of Pharmacy Practice II** 1 s.h.  
Expands on skills and concepts taught in the foundations of pharmacy practice course series and includes skills relevant to the disease states in the specific integrated pharmacotherapy courses; taught using a variety of classroom methods including small group, discussion-based, and active hands-on learning approaches where students apply core concepts.
- PHAR:8301 Introductory Pharmacy Practice Experience Clinical** 1 s.h.  
This third IPPE clinical is completed as an introduction to the Advanced Pharmacy Practice Experiences (APPE) to which student pharmacists are exposed during their P4 year; the IPPE clinical involves a P3 student observing and participating with a P4 student currently on an APPE rotation.
- PHAR:8370 Integrated Pharmacotherapy: Respiratory and Allergy** 3 s.h.  
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
- PHAR:8371 Integrated Pharmacotherapy: Oncology and Hematology** 3 s.h.  
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
- PHAR:8372 Integrated Pharmacotherapy: Gastroenterology and Nutrition** 3 s.h.  
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
- PHAR:8373 Integrated Pharmacotherapy: Renal, Fluids, and Electrolytes** 2 s.h.  
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
- PHAR:8374 Applications of Pharmacy Practice III** 1 s.h.  
Expands on skills and concepts taught in the foundations of pharmacy practice course series and includes skills relevant to the disease states in the specific aligned component courses; taught using a variety of classroom methods including small group, discussion-based, and active hands-on learning approaches where students apply core concepts.
- PHAR:8375 Advanced Topics in Health Services** 2 s.h.  
Exploration of advanced topics in health service.
- PHAR:8376 Discovery IV: Presentation of Results** 1 s.h.  
Dissemination and presentation of new knowledge related to pharmacy or health care with emphasis on design methods and data collection.
- PHAR:8377 Integrated Pharmacotherapy: Capstone** 4 s.h.  
Capstone serves as a culminating academic and research project for students and mentors, integrating all areas of professional discovery.
- PHAR:8378 Pharmacy Law and Ethics** 2 s.h.  
Topics include ethical behavior for pharmacists and student of pharmacy law.
- PHAR:8379 Advanced Pharmacy Practice Experiences Preparation** 1 s.h.  
Guidance provided for advanced pharmacy practice experiences.
- PHAR:8380 Learning Portfolio** 1 s.h.  
Compilation of student work.
- PHAR:8387 Capstone: Skills-Based Assessment** 1 s.h.  
Further development of assessment skills.
- PHAR:8400 Introductory Pharmacy Practice Experience Transitions** 1 s.h.  
This final IPPE transitions is completed as an introduction to the Advanced Pharmacy Practice Experiences (APPE) to which student pharmacists are exposed during the P4 year; student pharmacists work alongside a pharmacist preceptor to assist them in making a smooth transition to the APPE curriculum; students identify, collect pertinent information, evaluate, and document a patient case or problem encountered at a pharmacy practice site.
- PHAR:8402 Pharm.D. Learning Portfolio II** 1 s.h.  
Students continue to demonstrate and document mastery of experiential and didactic coursework and assignments, as well as self-assessment of progression. Requirements: P4 standing.
- PHAR:8500 Advanced Drug Literature Evaluation and Application** 2 s.h.  
Critical evaluation, utilization, and clinical application of drug literature.
- PHAR:8501 Introduction to Nuclear Pharmacy** 2 s.h.  
Nuclear pharmacy as a specialty area of pharmacy practice that involves preparation of radioactive materials for patient administration.
- PHAR:8502 Advanced Pharmacopalliation of Pain** 2 s.h.  
Exploration of symptom management across the trajectory of serious illness through a series of longitudinal patient cases.

**PHAR:8503 Advanced Pharmacopalliation of Non-Pain Symptoms** 3 s.h.

Terminal extubation, terminal agitation, discontinuing life sustaining therapies, and pharmacokinetic and pharmacologic issues in advanced illness.

**PHAR:8504 Sustained Clinical Pharmacy Services** 2 s.h.

Pharmacists may find themselves needing to justify their salary, the cost effectiveness of their pharmacy services, or may wish to create a new clinical service; introduction to pharmacists' role in initiating and sustaining clinical services in the ambulatory setting; writing a business plan; identifying and communicating with key stakeholders; finding billable opportunities.

**PHAR:8505 Advanced Topics in Infectious Disease, HIV, and Antimicrobial Therapy** 2 s.h.

Topics in antimicrobial treatment of infectious diseases beyond those in the required pharmacy curriculum, including topics covered in the infectious disease therapeutics course; lectures, case discussion, class participation, and summary presentations of an uncommon organism or antimicrobial agent.

**PHAR:8506 Health Informatics Essentials** 2 s.h.

Health informatics as a multidisciplinary field that uses health information technology to improve health care services for patients.

**PHAR:8507 Personal and Professional Transformation** 2 s.h.

How to maximize personal and professional goals; focus on what students want to achieve in their personal and professional life.

**PHAR:8508 Interprofessional Case Studies** 2 s.h.

Interdisciplinary collaboration to formulate pharmacologic treatments of common diseases; case-based learning utilized with peer teaching; medical and pharmacy students revisit and share foundational science concepts from their disciplines, including mechanisms of health and disease and principles of pharmacokinetics and pharmacodynamics; discussions led by students and facilitated with a Carver College of Medicine clinician and a College of Pharmacy clinical pharmacist; students formulate treatment plans using the World Health Organization's six step approach to good prescribing. Requirements: P3 standing.

**PHAR:8509 Leaders Read: A Book Club Elective** 2 s.h.

Introduction to concepts from *The Five Practices for Exemplary Leaders* by Kouzes and Posner; overview of all five practices with focus on first practice of "Modeling the Way;" values and skills of servant leadership through reading, reflection, and discussion; servant leadership philosophy where the main goal of the leader is to serve, and exploration of why servant leadership is critical; students articulate their own "why" and the importance of service in leadership. Requirements: P1, P2, or P3 standing.

**PHAR:8706 Pharmacy Projects** arr.

Basic and applied research problems of pharmaceutical interest.

**PHAR:8708 Substance Abuse** 2 s.h.

Emphasis on the most important themes and concepts in the field of substance use and treatment; drugs of misuse include stimulants, opioids, sedative-hypnotics, alcohol, hallucinogens, marijuana, and performance enhancing compounds; drug use prevention and treatment; depiction of substance use in modern culture.

**PHAR:8709 Pharmacist Role in Health Coaching and Nutrition** 2 s.h.

Exploration of pharmacist role in health coaching and nutrition.

**PHAR:8712 Nonprescription Pharmacotherapy and Self-Care** 2 s.h.

Introduction to nonprescription medications; development of patient assessment and consultation skills; understanding of pharmacist's role in patient self-care. Requirements: P3 standing.

**PHAR:8717 Ambulatory Care Pharmacy** 2 s.h.

Additional experience in the practice of clinical pharmacy; focus on key therapeutic areas where ambulatory care clinical pharmacists currently have a significant impact improving patient care, including anticoagulation management, hyperlipidemia management, and diabetes management; opportunity to develop expertise in clinical decision making, improve problem solving abilities, and continued development in writing and oral presentation skills. Requirements: P3 standing.

**PHAR:8718 Special Topics in Acute Care** 2 s.h.

Pharmacotherapy for common but varied inpatient medicine topics; review of disorder, therapeutic goals, treatment plans, patient education, monitoring; lecture or case-based classes; anticoagulation, hemostasis, diabetic ketoacidosis, ICU overview, hepatic failure, renal replacement therapies, ACLS, antimicrobial and antifungal selection, septic shock, cardiogenic shock, neurogenic shock and neuro/neurosurgical emergencies, burns, sedation.

**PHAR:8721 Leadership and Political Advocacy** arr.

Contemporary issues in pharmacy; role of leadership and advocacy in shaping profession; becoming effective advocates within political and policy making process; development of advocacy and leadership skills essential to improve self, profession, and community. Requirements: P1, P2, or P3 standing. Recommendations: PHAR:8702 and PHAR:8722.

**PHAR:8722 Current Topics in Health Policy** 2 s.h.

Legislative process and broad range of current issues in health policy; general- and pharmacy-specific health policy topics at state and federal levels. Requirements: P1, P2, P3, or graduate standing.

**PHAR:8724 Hospital Pharmacy Practice Management Elective** 2 s.h.

Organizational structure of pharmacy departments in hospitals and health care systems; models for delivery of pharmaceutical care; pharmacy's role in drug-policy decision making; provision of drug information; clinical and distributive pharmacy services; control of pharmacy and pharmacy costs; use of information technology and automation for service delivery; supervisory management; quality improvement. Requirements: P3 standing.

**PHAR:8725 Career Pathways in Pharmacy** 1 s.h.

Career preparation through writing, speaking, reading, and listening; writing résumés, curricula vitae, cover letters; interviewing techniques; electronic portfolios; web-based career information; guest speakers from pharmacy associations, major chains; workshop approach. Requirements: P2 or P3 standing.

**PHAR:8790 Sustainable Clinical Pharmacy Services: Leadership, Management, and Implementation 2 s.h.**

Practical knowledge and understanding of how to implement and sustain clinical pharmacy services in a variety of practice settings; how to identify outcomes to evaluate the success of ongoing services; students explore the perspective of leadership and management as it pertains to clinical pharmacy services.

**PHAR:8793 Introduction to Global Health Studies 1 s.h.**

Overview of topics pertaining to international health and cultural diversity in relation to pharmacy and global health; preparation for student pharmacists to become health care practitioners who optimize the health of patients and society; inspires students to advance the profession by fostering collaboration, global and public health leadership, professionalism and civic engagement; introduction and discussion of important topics in global health, focusing specifically on care of the underserved in a global context.

**PHAR:8794 Emergency Medicine and Toxicology 2 s.h.**

Pharmacology in the world of emergency medicine and toxicology; students learn through lecture, case discussion, class participation, and evaluation of evidence-based medicine literature in emergency medicine and toxicology.

**PHAR:8795 Foundations of Palliative Care 2 s.h.**

Introduction to palliative care as a public health issue; exploration of the principles and practice of palliative care including interdisciplinary care of the whole person and family, communication, and self care.

**PHAR:8796 Introduction to Travel Medicine 1 s.h.**

Overview of services provided to travelers to prevent and management conditions that may arise prior to, during, and after international travel; students learn about topics pertaining to each of these areas.

**PHAR:8797 Ethics and Spirituality in Health Care 3 s.h.**

Case-based examination of ethical issues in caring for patients with serious illness; exploration of suffering, spirituality, death, and dying. Requirements: P2 or P3 standing.

**PHAR:8798 Continuing Professional Development in Palliative Care 1 s.h.**

Self-directed learning and development in palliative care; creation and implementation of a professional development plan including activities in service, scholarship and education, leadership and advocacy, and self-care and personal resilience.

**PHAR:8799 Active Residency Preparation 2 s.h.**

Students develop the best understanding of what a residency is, what programs exist, the usual qualifications for placement, and the necessary pathway and components of residency attainment; hands-on experience with preparation process; for pharmacy students interested in pursuing residency training following graduation. Requirements: P3 standing.

**PHAR:8811 New Drugs for New Therapies: Introduction to Drug Discovery, Development, and Registration 1-2 s.h.**

From "magic bullets" to "personalized medicine," the quest for new drugs to treat disease involves serendipity, science, and business success; through lectures, presentations, readings, and discussion, students will learn how potential new drug therapies are identified and what happens between finding a drug that seems to work and the launch of a commercial drug product.

**PHAR:9401 Ambulatory Care Rotation 6 s.h.**

Clinical experience in providing pharmaceutical care in outpatient clinic settings. Requirements: P4 standing.

**PHAR:9402 Elective Ambulatory Care Rotation 6 s.h.**

Clinical experience providing pharmaceutical care in specialty outpatient settings. Requirements: P4 standing.

**PHAR:9403 Elective Nuclear Pharmacy Rotation 6 s.h.**

Practical experience in the handling and clinical use of radiopharmaceuticals. Requirements: P4 standing.

**PHAR:9404 Community Clinical Rotation 6 s.h.**

Clinical experience in the community setting; emphasis on delivery of pharmaceutical care. Requirements: P4 standing.

**PHAR:9405 Elective Hospice and Palliative Care Rotation 6 s.h.**

Clinical experience providing pharmacotherapy for end-of-life care. Requirements: P4 standing.

**PHAR:9406 Elective: Drug Information Rotation 6 s.h.**

Practice experience applying drug information knowledge to service and research projects. Requirements: P4 standing.

**PHAR:9407 Elective Family Medicine Rotation 6 s.h.**

Clinical practice experience applying primary care therapeutics in family medicine practice settings. Requirements: P4 standing.

**PHAR:9408 Elective Hematology/Oncology Rotation 6 s.h.**

Drug therapy management of oncology patients and patients with hematologic malignancies, aplastic anemia, sickle cell disease, hemophilia. Requirements: P4 standing.

**PHAR:9409 Elective Home Health Care Rotation 6 s.h.**

Clinical experience in the team approach to health care delivery, including total parenteral nutrition, chemotherapy, intravenous antibiotics, lab analysis, hospice care, and pain management. Requirements: P4 standing.

**PHAR:9410 Hospital Pharmacy Rotation 6 s.h.**

Instruction and practical experience in various components of hospital pharmacy; emphasis on hospital organization, inpatient and outpatient services, IV admixtures, unit dose, and clinical services. Requirements: P4 standing.

**PHAR:9411 Elective Long Term Care Rotation 6 s.h.**

Practice in consulting and providing services to varied long-term patient care environments. Requirements: P4 standing.

**PHAR:9412 Elective Managed Care Rotation 6 s.h.**

Practice experience in providing pharmaceutical care or pharmacy-related services in a managed care organization. Requirements: P4 standing.

**PHAR:9413 Acute Care Medicine Rotation 6 s.h.**

Clinical experience applying therapeutic skills for the pharmacotherapeutic management of patients on general medicine or specialty inpatient areas. Requirements: P4 standing.

**PHAR:9415 Elective: Pediatrics Rotation 6 s.h.**

Clinical experience in drug therapy management of general and specialty pediatric patients. Requirements: P4 standing.

**PHAR:9416 Elective: Pharmacy Rotation 6 s.h.**

Selected practice experiences in various pharmacy practice settings. Requirements: P4 standing.

**PHAR:9417 Elective Psychiatry Rotation 6 s.h.**

Clinical experience in the rational use of drugs in psychiatric disorders. Requirements: P4 standing.

- PHAR:9418 Elective Research Rotation 6 s.h.**  
Practice experience in basic pharmaceutical or clinical research; proposal, study design, data collection and analysis, presentation of results. Requirements: P4 standing.
- PHAR:9419 Elective: Surgery Rotation 6 s.h.**  
Clinical experience in drug therapy management on a surgery unit. Requirements: P4 standing.
- PHAR:9420 Elective Pharmacy Practice Underserved Population Rotation 6 s.h.**  
Opportunity to learn the best practices for pharmaceutical management; approaches to enhance access to and appropriate use of medicines in underserved and resource-limited environments. Requirements: P4 standing.
- PHAR:9421 Elective Community Management Rotation 6 s.h.**  
Practice exposure to community pharmacy operations and management at the store, district, or corporate level. Requirements: P4 standing.
- PHAR:9422 Elective: Compounding/Complementary Alternative Medicine Rotation 6 s.h.**  
Clinical work in a community setting with focus on team approach; experience developing extemporaneous compounds to optimize patient care and/or integrating traditional and nontraditional medicine. Requirements: P4 standing.
- PHAR:9423 Elective: Critical Care Medicine Rotation 6 s.h.**  
Practice experience providing pharmaceutical services to intensive care unit patients. Requirements: P4 standing.
- PHAR:9424 Elective Emergency Medicine Rotation 6 s.h.**  
Clinical experience providing pharmaceutical care for patients treated in the emergency department. Requirements: P4 standing.
- PHAR:9425 Elective Hospital Management Rotation 6 s.h.**  
Practice experience in hospital pharmacy operations and management. Requirements: P4 standing.
- PHAR:9426 Elective Infectious Disease Rotation 6 s.h.**  
Clinical experience providing pharmacotherapeutic management of patients receiving antimicrobial medications. Requirements: P4 standing.
- PHAR:9427 Elective Medication Use Evaluation Rotation 6 s.h.**  
Practical experience in drug use evaluation to improve patient outcomes. Requirements: P4 standing.
- PHAR:9428 Elective Pharmacy Industry Rotation 6 s.h.**  
Practice experience in an area of the pharmaceutical or related industries. Requirements: P4 standing.
- PHAR:9429 Elective: Pharmacy Regulatory Rotation 6 s.h.**  
Practice experience with a pharmacy regulatory body. Requirements: P4 standing.
- PHAR:9430 Elective: Professional Association Rotation 6 s.h.**  
Practice experience in professional association management environment at the state or national level. Requirements: P4 standing.
- PHAR:9431 Elective: Veterinary Pharmacy Rotation 6 s.h.**  
Practice experience in managing drug therapy for animals. Requirements: P4 standing.
- PHAR:9432 Elective Community Rotation 6 s.h.**  
Community pharmacy experience emphasizing patient-centered care. Requirements: P4 standing.
- PHAR:9433 Elective Academic Rotation 6 s.h.**  
Practice experience delivering pharmacy education with a College of Pharmacy faculty member. Requirements: P4 standing.
- PHAR:9434 Elective International Pharmacy Non-Patient Care Rotation 6 s.h.**  
Practice experiences in pharmacy practice outside the United States with a focus on research, health care policy, and/or pharmacy education. Requirements: P4 standing.
- PHAR:9435 Administrative Bye Rotation 6 s.h.**
- PHAR:9436 Elective Transitions of Care Rotation 6 s.h.**  
Practice experience consulting and providing services to patients transitioning through different patient care environments.
- PHAR:9437 Elective Informatics Rotation 6 s.h.**  
Practice experience in informatics in health care setting.
- PHAR:9438 Elective International Pharmacy Patient Care Rotation 6 s.h.**  
Practice experiences in pharmacy practice outside the United States with a patient care focus.
- PHAR:9440 Elective Virtual Rotation 6 s.h.**  
Experience with disease state management and board preparation; students examine medical literature to answer drug information questions, reflect on current issues facing the medical community, and identify potential solutions to problems for individual patients and populations; activities are intended to guide students toward professional competency. Requirements: P4 standing.
- PHAR:9441 Elective Neurology Rotation 6 s.h.**  
Clinical experience in pharmacotherapeutic and pathophysiologic considerations of neurological disorders. Requirements: P4 standing.

# Drug Delivery, Certificate

## Requirements

The undergraduate Certificate in Drug Delivery requires a minimum of 18 s.h. of credit. Students must maintain a g.p.a. of at least 2.50 in required coursework for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

Students may count a maximum of 6 s.h. completed for a major, minor, or another certificate toward the Certificate in Drug Delivery.

The certificate program offers students the opportunity to become knowledgeable about techniques used to provide and administer drugs to humans and to animals. Students learn about the selection of materials for use in drug products; characteristics of delivery systems used for injectable, oral, and topical drugs; targeting strategies to limit side effects; design strategies to match drugs with biologics; product quality standards and testing; and the role of drug development in the regulatory approval process. They will be prepared for opportunities in the biopharmaceutical and pharmaceutical industries; health sciences professions; regulatory agencies; or for advanced graduate or professional education.

Some of these courses have prerequisites; students must complete all of a course's prerequisites before they may register for a course. Prerequisite coursework does not count toward certificate requirements.

The Certificate in Drug Delivery requires the following coursework.

Code	Title	Hours
One of these:		
PHAR:1100	Introduction to Pharmaceutical Sciences: Drug Development	1-2
PHAR:1111	Need a New Drug?	1
One of these:		
PHAR:4700	Pharmaceutical Chemical Analysis	4
A bioanalytical techniques course (consult advisor)		2-3
All of these:		
PHAR:4146	Drug Disposition and Pharmacokinetics	2
PHAR:4736	Properties of Dosage Forms I	3
PHAR:4737	Properties of Dosage Forms II	3
PHAR:4740	Materials in Drug and Gene Delivery	3
PHAR:4745	Drug Delivery I	3
PHAR:4800	Chemical and Biophysical Properties of Drugs	1

## Admission

Applicants must have a cumulative g.p.a. of at least 3.00, and earn a minimum grade of B-minus in all prerequisite coursework. Those who do not meet the admission requirements should contact the associate dean for

undergraduate education to discuss admission to the certificate program.

Students must submit an enrollment questionnaire to the College of Pharmacy's Office of Undergraduate Education (OUE) to request admission to the certificate program.

# Drug Discovery, Certificate

## Requirements

The undergraduate Certificate in Drug Discovery requires a minimum of 18 s.h. of credit. Students must maintain a g.p.a. of at least 2.50 in required coursework for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

Students may count a maximum of 6 s.h. completed for a major, minor, or another certificate toward the Certificate in Drug Discovery.

The certificate program provides an introduction to the properties of molecules that influence their suitability and effectiveness as drug therapies. Students learn about concepts and approaches used in successful drug design, synthetic and biological approaches to produce high-quality drug substances, common metabolic and toxicologic pathways that affect drug safety, biological targets for drug action and high throughput methods leading to the discovery of active drug molecules, chemical and material properties of active agents suitable for drug product development, and the approval process for drug candidates. They will be prepared for opportunities in the pharmaceutical and biotechnology industries, regulatory agencies or sciences, or for advanced graduate or professional education.

Some of these courses have prerequisites; students must complete all of a course's prerequisites before they may register for a course. Prerequisite coursework does not count toward certificate requirements.

The Certificate in Drug Discovery requires the following coursework.

Code	Title	Hours
One of these:		
PHAR:1100	Introduction to Pharmaceutical Sciences: Drug Development	2
PHAR:1111	Need a New Drug?	1
All of these:		
PHAR:1200	Medicines That Changed the World	1
PHAR:4501	Basic Principles of Toxicology	3
PHAR:4512	Principles of Drug Discovery	3
PHAR:4800	Chemical and Biophysical Properties of Drugs	1
PHAR:4851	Radiopharmaceuticals in Diagnostics and Therapy	2
PHAR:5545	Current Medicinal Chemistry	3
One of these:		
PHAR:4521	High Throughput Screening in Drug Discovery	1
Introduction to biocatalysis in drug discovery course (consult advisor)		2
One of these:		
PCOL:2220	Drug Use and Abuse	3

PCOL:3101	Pharmacology I: A Drug's Fantastic Journey	3
PCOL:4130	Drug Mechanisms and Actions (preferred)	3

## Admission

Applicants must have a cumulative g.p.a. of at least 3.00, and earn a minimum grade of B-minus in all prerequisite coursework. Those who do not meet the admission requirements should contact the associate dean for undergraduate education to discuss admission to the certificate program.

Students must submit an enrollment questionnaire to the College of Pharmacy's Office of Undergraduate Education (OUE) to request admission to the certificate program.

# Drug Disposition and Metabolism, Certificate

## Requirements

The undergraduate Certificate in Drug Disposition and Metabolism requires 15-18 s.h. of credit. Students must maintain a g.p.a. of at least 2.50 in required coursework for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

Students may count a maximum of 6 s.h. completed for a major, minor, or another certificate toward the Certificate in Drug Disposition and Metabolism.

The certificate program prepares students to quantitatively describe the distribution properties of drugs throughout the body in order to optimize drug action and predict and prevent toxicity. Courses focus on the molecular basis for drug action; identification of common chemical properties and biochemical transformations that result in toxic responses; and recognition of biochemical pathways affected by environmental, drug, food, and accidental exposures. Additional courses provide an understanding of the role of drug development in the regulatory approval process. Students will be prepared to play important roles in biomedical and clinical investigation with additional opportunities in the biotechnology, biopharmaceutical, and pharmaceutical industries; health sciences professions; regulatory agencies; or for advanced graduate or professional education.

Some of these courses have prerequisites; students must complete all of a course's prerequisites before they may register for a course. Prerequisite coursework does not count toward certificate requirements.

Certificate students have the option to select from two certificate subprograms—kinetic processes and modeling, or toxicology. Students take the courses required for all certificate students and the course(s) for their subprogram from the following.

## Required Courses

All students complete the required coursework below.

Code	Title	Hours
One of these:		
PCOL:2220	Drug Use and Abuse	3

## Kinetic Processes and Modeling

Code	Title	Hours
Kinetic processes and modeling students take one of these:		
PHAR:6700	Advanced Pharmacokinetics and Pharmacodynamics	3
PCOL:5136	Pharmacogenetics and Pharmacogenomics	1

## Toxicology

Code	Title	Hours
Toxicology students take this course:		
PHAR:4501	Basic Principles of Toxicology	3

## Admission

Applicants must have a cumulative g.p.a. of at least 3.00, and earn a minimum grade of B-minus in all prerequisite coursework. Those who do not meet the admission requirements should contact the associate dean for undergraduate education to discuss admission to the certificate program.

Students must submit an enrollment questionnaire to the College of Pharmacy's Office of Undergraduate Education (OUE) to request admission to the certificate program.

# Doctor of Pharmacy, Pharm.D.

## Requirements

The Doctor of Pharmacy (Pharm.D.) program provides professional education in a number of areas, including pharmaceutical technology, biopharmaceutics, medicinal chemistry and natural products, pharmaceutical socioeconomics, pharmacotherapy, patient care, clinical and hospital pharmacy, and aspects of biotechnology. Graduates of the program are qualified to take the Iowa Board of Pharmacy examination that is required for licensure as a pharmacist.

The program requires four years of full-time pharmacy study preceded by at least two years of pre-pharmacy study in the College of Liberal Arts and Sciences at the University of Iowa or at an accredited community or liberal arts college in the United States or Canada. During pre-pharmacy study, students complete the prerequisites for admission to the Pharm.D. program (see Admission [p. 1928] in this section of the Catalog for a list of prerequisite coursework). If possible, students should complete all 20 s.h. of their general education work before they enter the Pharm.D. program. Courses in moral reasoning or ethics, communication, computer science, business, behavioral and social sciences, and the humanities are recommended. Courses in physical education skills, applied music, and studio art do not count toward the general education electives requirement. Students must maintain a pharmacy and cumulative g.p.a. of at least 2.00.

For rules and regulations concerning academic probation, pass/nonpass, credit by examination, maximum schedule, second-grade-only option, waiver or substitution of courses, cancellation of registration, and drop date, see Pharm.D. Student Resources on the College of Pharmacy website.

The College of Pharmacy provides students with the highest possible quality in the professional experiential program. Faculty and adjunct faculty serve as preceptors, providing introductory and advanced practice experience at institutions and pharmacies in Iowa, nationwide, and around the world.

## Professional Curriculum

The Pharm.D. degree requires the coursework listed below, including at least 6 s.h. of professional electives. In addition, students must complete all prerequisites for admission to the Pharm.D. program, including a minimum of 12 s.h. of general education courses chosen from behavioral, social, humanistic, and business disciplines (see Admission [p. 1928] in this section of the Catalog). They also must complete an additional 8 s.h. of general education coursework either before or after admission to the Pharm.D. program.

## Professional Electives

Pharm.D. students must complete at least 6 s.h. of professional electives, which they may choose from the following list.

Code	Title	Hours
PHAR:4740	Materials in Drug and Gene Delivery	3
PHAR:4741	Immunology and Immunotherapies	2
PHAR:8500	Advanced Drug Literature Evaluation and Application	2
PHAR:8501	Introduction to Nuclear Pharmacy	2
PHAR:8502	Advanced Pharmacopalliation of Pain	2
PHAR:8503	Advanced Pharmacopalliation of Non-Pain Symptoms	3
PHAR:8505	Advanced Topics in Infectious Disease, HIV, and Antimicrobial Therapy	2
PHAR:8506	Health Informatics Essentials	2
PHAR:8508	Interprofessional Case Studies	2
PHAR:8509	Leaders Read: A Book Club Elective	2
PHAR:8706	Pharmacy Projects	1-3
PHAR:8708	Substance Abuse	2
PHAR:8709	Pharmacist Role in Health Coaching and Nutrition	2
PHAR:8712	Nonprescription Pharmacotherapy and Self-Care	2
PHAR:8717	Ambulatory Care Pharmacy	2
PHAR:8718	Special Topics in Acute Care	2
PHAR:8721	Leadership and Political Advocacy	arr.

## Combined Programs

### Pharm.D./M.P.H.

The College of Pharmacy and the College of Public Health offer the combined Doctor of Pharmacy/Master of Public Health program. The combined program requires 42 s.h. of graduate credit in addition to the requirements of the Pharm.D. degree. Students who complete the program are granted both degrees.

The Pharm.D./M.P.H. program helps students develop expertise in public health related to pharmacotherapy, health promotion, disease prevention, and medication safety. Its graduates may work in areas of interest common to pharmacy and public health, such as spread and treatment of disease, community health, and immunology; bioterrorism, terrorism, and preparedness; genetics; insurance; managed care; family and juvenile health; and protection of special populations. Employment opportunities are available in hospitals and clinics and with health care providers; private practice; insurance and managed care organizations; local, county, state, and federal government; public health governmental agencies; and colleges and universities.

Separate admission to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program.

See the Master of Public Health, M.P.H. [p. 1956] in the Catalog to learn about curriculum and admission requirements.

### Pharm.D./M.S. in Informatics (Health Informatics Subprogram)

The College of Pharmacy and the Graduate College offer the combined Doctor of Pharmacy/Master of Science in informatics with a health informatics subprogram. The combined degree program requires completion of 32 s.h. beyond the bachelor's degree. Students who complete the program are granted both degrees.

The Pharm.D./M.S. program assists students to develop special expertise in information technology, including management of electronic health records, health information exchange standards, electronic prescribing, medication management, decision support, as well as other competencies. Graduates will be prepared for employment in industry or academic institutions with skills to address pharmacotherapy issues as well as information technology management.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. It is recommended that students apply to the Graduate College for admission to the M.S. program before entering the spring semester of their first year in the pharmacy program.

For information about the Master of Science degree, see the M.S. in informatics [p. 1642] (Graduate College) in the Catalog.

## Admission

Individuals apply to the Pharm.D. program using PharmCAS, the American Association of College of Pharmacy application service. Applicants also must submit a supplemental application, including the application fee, to the University of Iowa College of Pharmacy; see Doctor of Pharmacy on the University of Iowa Graduate Admissions website for more information.

By selecting the University of Iowa College of Pharmacy, students choose to be part of the legacy of leaders for which the College of Pharmacy has become well known. Iowa pharmacy shapes pharmacy practice nationally and internationally with evidence-based practice models and collaborative pharmacy care innovations.

As aspiring Doctor of Pharmacy students, the first two years are spent completing general education and prerequisite courses to prepare candidates for the Pharm.D. degree. Just before they complete their required courses, they apply to the program itself, which is comprised of an additional four years of integrated courses, hands-on research involvement, and practical experiences.

Applicants must complete the college-level work listed under "Prerequisites for Admission to the Pharm.D. Program" below. They also must have an overall cumulative g.p.a. of at least 2.50 and must submit two letters of recommendation and a personal statement. Applicants considered for admission must have a personal interview; the college contacts applicants to arrange interview appointments.

Fulfillment of the admission requirements listed above does not ensure admission to the College of Pharmacy. The admissions committee considers applicants who meet these requirements and selects individuals who, in their judgment, are the best qualified for the study and practice of pharmacy.

Applicants who are accepted for admission are required to submit to a criminal background check and pay an admission acceptance fee. The fee is applied to tuition for the student's first semester of enrollment in the college. The deposit is not refunded to applicants who do not enroll in the College of Pharmacy.

Entering health sciences students are required to have an annual tuberculin skin test (TST) and proof of immunization against mumps, measles and rubella (2 MMRs), tetanus, diphtheria and varicella before classes begin. The usual regimen of three doses of Hepatitis B vaccine and a Hepatitis B titre must be completed by the second semester of the first year. All students are required to have hospitalization and health insurance.

## Prerequisites for Admission to the Pharm.D. Program

Applicants to the Pharm.D. program must have completed the following college-level work.

- Rhetoric: 4 s.h. (RHET:1030 Rhetoric) or 6 s.h. of transfer credit in English composition and rhetoric and 3 s.h. in speech.
- Biochemistry: 3 s.h. (BIOC:3110 Biochemistry).

- General biology: 8 s.h. (BIOL:1411 Foundations of Biology and BIOL:1412 Diversity of Form and Function).
- General chemistry: 8 s.h. (CHEM:1110 Principles of Chemistry I and CHEM:1120 Principles of Chemistry II).
- Human anatomy: 3 s.h. (ACB:3110 Principles of Human Anatomy).
- Human physiology: 3 s.h. (HHP:3500 Human Physiology).
- Organic chemistry: 6 s.h. (CHEM:2210 Organic Chemistry I and CHEM:2220 Organic Chemistry II).
- Mathematics: 3-4 s.h. of a satisfactory differential and integral calculus course (MATH:1460 Calculus for the Biological Sciences).
- Microeconomics: 3-4 s.h. (ECON:1100 Principles of Microeconomics).
- Physics: one year of high school physics or one semester of college-level physics with a lab (PHYS:1400 Basic Physics).
- Statistics: 3 s.h.
- General education electives: a minimum of 12 s.h.

Courses in moral reasoning or ethics, communications, computer science, and business, behavioral and social sciences, and the humanities are accepted. Courses in physical education skills, applied music, and studio art do not count toward the general education requirement.

## Financial Support

Each year the College of Pharmacy awards scholarships to student pharmacists through a variety of awards. In 2020, the college awarded over \$1.2 million to help cover the cost of education. Around half of the student body receives a scholarship, with 235 scholarships given out in 2020.

**Albrecht/Winckler Scholarship:** for a deserving pharmacy student.

**Steve and Teresa Berge Scholarship:** for a pharmacy student who is a U.S. citizen and has a g.p.a. of at least 3.00; experience doing volunteer work highly desirable.

**Seymour M. Blaug Memorial Award:** for a pharmacy student with above-average academic achievement.

**Dennis and Bev Boussetot Scholarship:** life insurance gift bequest.

**Ilse O. Buckner Scholarship:** for a pharmacy student who maintains satisfactory academic progress; nonrenewable, financial need is considered.

**Burroughs-Wellcome Scholarship Fund:** for a student of the committee's choice.

**David and James Carlson Scholarship:** for two pharmacy students interested in clinical or hospital practice; preference is given to students who reside north of U.S. Interstate 80 and west of U.S. Interstate 35 and show financial need.

**Class of 1970 Award:** qualifications vary.

**Class of 2009 Award:** qualifications vary.

**Jordan and Jana Cohen Doctor of Pharmacy Scholarship:** for a pharmacy student in good academic standing; based on merit and need; renewable.

**College of Pharmacy Executive Leadership Board Excellence Fund:** for the senior class president and/or qualifications vary.

**Vernon Conzemius Scholarship:** for a pharmacy student who demonstrates financial need; preference is given to students in the upper half of their class.

**John and Margo Daniel Scholarship:** preference is given to a student from Webster County, Iowa.

**Donor-Endowed Awards:** for Pharm.D. students in their second, third, or fourth year in the program; see College of Pharmacy website to learn more about donor scholarships.

**Max Eggleston Scholarship:** for a student who has completed one year; preference is given to students from Iowa and based on financial need.

**Lori A. Grimes Memorial Scholarship:** based on financial need; renewable.

**Dick and Brenda Hartig Scholarship:** for a student who demonstrates financial need; preference is given to students from Dubuque, Waukon, Dyersville, and Iowa City, Iowa; and Galena and Stockton, Illinois.

**Thomas D. Hill Scholarship:** for a pharmacy student in good academic standing.

**Janet Hinderliter Scholarship:** for a P3 or P4 student with a g.p.a. of at least 3.00 and demonstrated involvement in campus and community affairs.

**Frances T. and Charles Holub Memorial Award:** for a third-year pharmacy student; financial need is considered; renewable once.

**Iowa Pharmacy Access Award:** for incoming first-year nonresident Pharm.D. students who are U.S. citizens or permanent residents or international students who graduate from a U.S. high school.

**Iowa Pharmacy Foundation Scholarships:** for selected pharmacy students who are residents of Iowa and who demonstrate outstanding academic ability; financial need is considered (Eggleston-Granberg Scholarship is awarded from this fund).

**Iowa Pharmacy Scholars Award:** for incoming Pharm.D. students who are Iowa residents who submit a complete application by March 1; awards are based on merit (standardized test scores and grade-point average) and exceptional promise at the University of Iowa.

**R.A. Kuever Scholarship Fund:** for a pharmacy student from Iowa who is in good academic standing.

**Ronald Madden Scholarship:** for an Iowa high school graduate in good academic standing.

**Charles J. Malecek Pharmacy Scholarship:** for a student of the committee's choice.

**Virgil R. McCutchan Memorial Scholarship:** for a deserving pharmacy student.

**J. Patrick McDonnel Scholarship:** qualifications vary.

**Carleton Mikkelsen Scholarship:** for the top P4 student based on final P3 grade-point average; in case of a tie, the committee chooses the recipient.

**Miller-Ruegnitz Scholarships:** based on financial need; nonrenewable.

**NACDS Scholarship:** for a student interested in community pharmacy.

**Opportunity Award:** for students who submit a complete application; award is based on leadership experiences, unique personal abilities or talents, health care experiences, racial,

ethnic, geographic and/or intellectual diversity, perseverance in overcoming obstacles to academic success or others.

**Petersen Linder Scholarship:** for a pharmacy student in excellent academic standing who has outstanding leadership skills; based on financial need.

**Pharmacists Mutual Scholarship:** for a student of the committee's choice.

**Pharmacy Student Aid Scholarship:** for a student of the committee's choice.

**Quad Cities Area Pharmacists Association Scholarships:** for students who demonstrate financial need; preferably one student from Iowa and one from Illinois.

**Robert E. and Barbara J. Rehal Family Scholarship:** for a student who has interest in independent or community pharmacy; preferably from Sioux City, Iowa.

**Sattler Family Scholarship:** for a student of the committee's choice, alternates with the Carver College of Medicine.

**Scherling Scholarship:** for a student who demonstrates superior academic achievement in organic chemistry.

**Hal Schimmelpfenning Scholarship Fund:** for a pharmacy student from Sigourney, Iowa.

**Schlumberger Scholarship:** qualifications vary.

**Chuck and Jacqueline Schwenke Scholarship:** for a student of the committee's choice.

**Gordon H. Sheffield Scholarship:** for a P3 or P4 student from Iowa; preference is given to a student who demonstrates leadership and financial need.

**Shutt Pharmacy Scholarship:** preference is given to Iowa residents; based on financial need.

**H. Curtis Snyder Award:** for a pharmacy student in good standing.

**Paul G. and Vivian Soderdahl:** for a student of the committee's choice.

**Wilber J. Teeters and the Teeters/Wahl Scholarships:** for a pharmacy student who has completed at least one year in the college; financial need is considered.

**Thompson Scholarship Fund in Memory of Rob Chabal:** preference is given to a fourth-year student committed to community pharmacy practice.

**John S. Thor (Nash) Scholarship Fund:** for a pharmacy student in good standing; renewable.

**Donald J. and Nancy L. Unash Scholarship:** qualifications vary.

**Colonel Thomas C. Veach Class of 1952 Scholarship Fund:** preference is given to a student interested in compounding or industrial pharmacy.

**Walgreens Diversity Scholarship:** for a student who has made significant efforts toward raising awareness about matters of diversity that affect the pharmacy profession.

**Jo H. and Robert A. Wiley Scholarship Fund:** for a pharmacy student who is an Iowa native and shows financial need.

**Louis C. Zopf Memorial Award:** for a pharmacy student who is academically qualified; financial need is considered.

**John D. Zuelke Scholarship:** for a pharmacy student (preferably P3 or P4) from Wapello County, Iowa.

## Career Advancement

The College of Pharmacy has had nearly a 100 percent placement rate for its graduates for many years.

Pharmacists often choose to practice in a community pharmacy or a hospital setting. They hold positions in government, independent businesses, home health care, consulting, clinical pharmacy, managed care facilities, higher education, or the pharmaceutical industry.

# Palliative Care, Professional Certificate

## Requirements

The professional Certificate in Palliative Care requires 17 s.h. of credit. Students must maintain a pharmacy and cumulative g.p.a. of at least 3.00 in work for the certificate.

The certificate program prepares students to practice as palliative care generalists upon graduation from the Doctor of Pharmacy (Pharm.D.) program. Students who complete the certificate will possess the knowledge, skills, and attitudes to serve patients living with serious illnesses across the trajectory of life in a variety of general pharmacy practice environments and non-palliative pharmacy specialties, including critical care, emergency medicine, geriatrics, and cardiology. The program addresses the educational needs of pharmacy students who may provide pharmaceutical care in a community pharmacy setting, a long-term care pharmacy, oncology, cardiology, infectious disease, critical care, transplant, and emergency medicine. The certificate also prepares graduates to pursue advanced postgraduate clinical training in palliative care and hospice, including palliative care residencies and fellowships.

The Certificate in Palliative Care requires the following coursework.

Code	Title	Hours
PHAR:8795	Foundations of Palliative Care	2
PHAR:8797	Ethics and Spirituality in Health Care	3
PHAR:8798	Continuing Professional Development in Palliative Care	1
PHAR:8502	Advanced Pharmacopalliation of Pain	2
PHAR:8503	Advanced Pharmacopalliation of Non-Pain Symptoms	3
PHAR:9405	Elective Hospice and Palliative Care Rotation	6

## Admission

Applicants must have a cumulative g.p.a. of at least 3.00.

They should submit an application that includes:

- a letter of intent;
- one letter of recommendation from the student's College of Pharmacy faculty mentor; and
- one letter of recommendation from a professional reference outside the College of Pharmacy, such as an employer, previous professor, coach, colleague or supervisor of a volunteer experience.

Applicants are then selected for an interview with certificate committee members. Students are notified if they are selected.

# Pharmacy, M.S.

## Requirements

The Master of Science in pharmacy requires at least 30 s.h. of credit, which may include 6 s.h. of research. The degree usually requires a thesis. Students must maintain a cumulative g.p.a. of at least 2.75. Programs are offered in four areas: clinical pharmaceutical sciences, health services research, medicinal and natural products chemistry, and pharmaceuticals.

The clinical pharmaceutical sciences area is designed for students interested in clinical research. The goal of the program is to advance the science of human pharmacology and therapeutics and to improve the safe, effective, and economical use of medications by patients. The program emphasizes the integration of clinical and basic research. It involves advanced studies of clinical pharmacology, pharmacokinetics, pharmacodynamics, pharmacogenetics, and the requirements for regulatory approval of new drugs.

The health services research area provides an innovative approach to studying the challenges facing the health care system and provides evidence to support policy-based solutions. The program combines ideas across several distinct scientific paradigms (sociology, economics, psychology, business, and anthropology) to better understand the factors leading to decisions in health care and the consequences of these decisions. Students gain broad knowledge of health and pharmaceutical care, informed by theories from economics and social psychology. The program teaches intellectual and practical skills to investigate research questions dealing with current issues.

The medicinal and natural products chemistry area educates students in the chemistry and biology of drug discovery. The program offers an interdisciplinary course of study and challenging opportunities to do fundamental drug-related research in the basic chemical and biological sciences. Contemporary research geared toward drug discovery and design is the cornerstone of graduate study in this area. Students design a course of study, including core courses in synthesis, spectroscopy, enzymology, pharmacology, analytical chemistry, toxicology, and drug design as well as elective courses to maintain breadth and achieve depth in a research area.

The pharmaceuticals area is a multidisciplinary science that examines the development, production, and characterization of dosage forms, as well as the disposition and action of drugs in the body. As pharmaceutical scientists have been engaged in the development of novel biomaterials for sophisticated drug delivery systems, they also have expanded into research with applications in the development of medical devices and tissue engineering.

For more information about graduate study, visit the College of Pharmacy website.

## Admission

Applicants must meet the admission requirements of the Graduate College. They must:

- hold a bachelor's degree from a U.S. institution or an equivalent degree from another country as determined by the University of Iowa Office of Admissions;
- have a g.p.a. of at least 3.00;

- submit a Graduate Record Examination (GRE) General Test score; and
- if an international applicant, receive a Test of English as a Foreign Language (TOEFL) minimum score of 81, an International English Language Testing System (IELTS) minimum overall score of 7.0 with no individual score below 6.0, or a Duolingo English Test (DET) minimum score of 105; however, if an applicant has a master's degree from a U.S. institution, this requirement is waived.

Visit How to Apply on the College of Pharmacy website for a list of program requirements and application deadlines. Academic requirements for maintaining graduate registration are determined by the Graduate College and by the individual divisions in the College of Pharmacy.

## Career Advancement

Advanced study in the pharmaceutical sciences prepares students for research, teaching, and administrative positions in the pharmaceutical industry, in colleges and universities, in government agencies, and in health-related institutions and organizations.

## Pharmacy, Ph.D.

The College of Pharmacy offers a Doctor of Philosophy degree in pharmacy with subprograms in four areas: clinical pharmaceutical sciences, health services research, medicinal and natural products chemistry, and pharmaceutics.

The clinical pharmaceutical sciences subprogram is designed for students interested in clinical research. The goal is to advance the science of human pharmacology and therapeutics and to improve the safe, effective, and economical use of medications by patients. The subprogram emphasizes the integration of clinical and basic research. It involves advanced studies of clinical pharmacology, pharmacokinetics, pharmacodynamics, pharmacogenetics, and the requirements for regulatory approval of new drugs.

The health services research subprogram provides an innovative approach to studying the challenges facing the health care system and provides evidence to support policy-based solutions. It combines ideas across several distinct scientific paradigms (sociology, economics, psychology, business, and anthropology) to better understand the factors leading to decisions in health care and the consequences of these decisions. Students gain broad knowledge of health and pharmaceutical care, informed by theories from economics and social psychology. The subprogram teaches intellectual and practical skills to investigate research questions dealing with current issues.

The medicinal and natural products chemistry subprogram educates students in the chemistry and biology of drug discovery. It offers an interdisciplinary course of study and challenging opportunities to do fundamental drug-related research in the basic chemical and biological sciences. The subprogram spans many aspects of the subdisciplines of chemistry, biochemistry, and pharmacology with a common theme of drug discovery. This includes extensive laboratory research aimed at testing a novel hypothesis, which is written and defended as a student's thesis. Contemporary research geared toward drug discovery and design is the cornerstone of graduate study in this area. Students design a course of study, including core courses in synthesis, spectroscopy, enzymology, pharmacology, analytical chemistry, toxicology, and drug design as well as elective courses to maintain breadth and achieve depth in a research area.

The pharmaceutics subprogram provides a multidisciplinary science focus that examines the development, production, and characterization of dosage forms, as well as the disposition and action of drugs in the body. As pharmaceutical scientists have been engaged in the development of novel biomaterials for sophisticated drug delivery systems, they also have expanded into research with applications in the development of medical devices and tissue engineering.

For more information about graduate study, visit the College of Pharmacy website.

### Clinical Pharmaceutical Sciences

The Doctor of Philosophy in pharmacy with a subprogram in clinical pharmaceutical sciences requires 72 s.h. of credit, including 22 s.h. of didactic coursework that consists of required courses and electives. The remaining 50 s.h. consist of research credits, seminars, and additional coursework. Students must maintain a cumulative g.p.a. of at least 3.00.

The Doctor of Philosophy in pharmacy with a subprogram in clinical pharmaceutical sciences requires the following work.

## Comprehensive Examination

The comprehensive examination follows completion of the majority of didactic coursework, usually at the end of the second year in the Ph.D. program. The comprehensive examination assesses the candidate's mastery of the major and related fields of study, and of the research tools in which competence has been certified. It also helps identify any weaknesses in a candidate's knowledge base that needs to be corrected with additional coursework or instruction.

Successfully passing the comprehensive examination indicates that candidates can continue work toward the doctorate. Examination times are scheduled at the discretion of the clinical pharmaceutical sciences graduate program. An examination may be scheduled during the fall, spring, or summer semesters. Questions for the comprehensive examination are solicited from graduate faculty members and from the examination committee. The questions may be

directly or indirectly related to the area of each candidate's research proposal. The format of the questions is left up to the faculty member, but may include the interpretation of published literature or written questions designed to test a candidate's knowledge. The oral portion of the examination is scheduled to occur within two weeks of completion for the written part, and allows the committee to evaluate a candidate's knowledge and oral communication skills.

## Thesis Defense

Students schedule a data session with their doctoral committee during their third or fourth year, at a time that is approximately one year prior to their final defense. Data sessions include a progress report to seek the scientific advice and approval of the committee. For these sessions, students should prepare a brief written summary, present research results, and clearly explain the immediate and final goals of their project.

The defense is a formal public 45-minute presentation, scheduled as a regular division seminar if possible, during which students present the details of their thesis research. Following the public presentation, students and their thesis committee meet in a separate session to ask more detailed questions.

## Health Sciences Research

The Doctor of Philosophy in pharmacy with a subprogram in health sciences research requires 74 s.h. of credit. Students must maintain a cumulative g.p.a. of at least 3.00.

In the first two years in the program, students participate in on-going research and complete coursework. In the third year, emphasis is placed on developing a dissertation topic. The following two years are spent on research and writing of the dissertation.

The Doctor of Philosophy in pharmacy with a subprogram in health sciences research requires the following work.

## Core Competencies

Students complete the following coursework before they take the Core Competency Qualifying Exam.

## Health Services Research

Code	Title	Hours
All of these:		
PHAR:6320	Health Services Research	arr.
PHAR:6330	Models of Patient Behavior and Choice	3
PHAR:6331	Models of Provider Behavior and Choice	3
HMP:4000	Introduction to the U.S. Health Care System (or equivalent as approved by advisor)	3

## Research Methods and Statistics

Code	Title	Hours
All of these:		
PHAR:5350	Introduction to Research Methods	3
BIOS:4120	Introduction to Biostatistics	3

BIOS:5120/ IGPI:5120/ STAT:5610	Regression Modeling and ANOVA in the Health Sciences	3
Additional statistics coursework (biostatistics, economics, education, psychology, mathematics, or sociobiology)		6

## Specialty

The specialty area requires at least 24 s.h. of coursework. With the guidance of their faculty advisor, students develop a plan of study that encompasses an area of expertise or specialty.

## Additional Requirements

Students are expected to participate in specific aspects of ongoing research. These research activities are often paid graduate research assistantships; course credit is not available for paid assistantships. By the end of their third year, students are expected to present the results from one completed research project at a regional or national meeting.

Code	Title	Hours
PHAR:5310	Health Services Research Seminar (students enroll in the seminar for 1 s.h. each semester they are on campus, excluding summer session)	1
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I (taken in second year)	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II (taken in second year)	0

## Medicinal and Natural Products Chemistry

The Doctor of Philosophy in pharmacy with a subprogram in medicinal and natural products chemistry requires 72 s.h. of credit. Students complete 24 s.h. of didactic coursework, of which a minimum of 15 s.h. must be divisional courses. The remaining hours may be fulfilled by selecting from interdisciplinary elective courses. Students must maintain a cumulative g.p.a. of at least 3.00.

The Ph.D. is based upon interdisciplinary study in courses offered by the biochemistry, medicinal and natural products chemistry, pharmacology, and toxicology disciplines. Students complete the majority of their coursework during the first two years of study while simultaneously gaining research experience in the laboratory. The degree is granted only after students complete and defend an original research-based thesis project, typically in five years.

Entering students who do not have basic knowledge in all subjects are advised to complete one or more prerequisite electives during their first and second years.

The Doctor of Philosophy in pharmacy with a subprogram in medicinal and natural products chemistry requires the following work.

## Required Coursework

Code	Title	Hours
All of these:		
PHAR:5510	Pharmaceutical Sciences and Experimental Therapeutics Seminar	1-2
PHAR:5515	Perspectives in MNPC Research (taken every fall semester)	2
PHAR:5520	Medicinal and Natural Products Chemistry Research (taken every fall and spring semester)	arr.
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I (taken in second year)	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II (taken in second year)	0
CCP:3169	Internship in Graduate Studies (taken summer of third year)	0

## Interdisciplinary Electives

Code	Title	Hours
3-6 s.h., taken every fall and spring semester		

## Divisional Courses

Code	Title	Hours
3-6 s.h., taken every fall and spring semester, from these:

## Pharmaceutics

The Doctor of Philosophy in pharmacy with a subprogram in pharmaceutics requires 72 s.h. of credit. The degree requires 30 s.h. in didactic coursework, including a minimum of 15 s.h. in divisional courses and 15 s.h. of pharmacy or elective coursework. The remaining 42 s.h. can be fulfilled with research or electives. Students must maintain a cumulative g.p.a. of at least 3.00.

Entering students who do not have basic knowledge in all subjects follow a plan of study in order to complete divisional requirements during their first and second years.

The Doctor of Philosophy in pharmacy with a subprogram in pharmaceutics requires the following work.

### Required Courses

Code	Title	Hours
All of these:		
PHAR:4146	Drug Disposition and Pharmacokinetics	2
PHAR:4736	Properties of Dosage Forms I (or equivalent)	3
PHAR:4737	Properties of Dosage Forms II	3
PHAR:4800	Chemical and Biophysical Properties of Drugs	1
PHAR:5700	Quantitative Research Methods in Pharmacy I	3-4
PHAR:5745	Drug Delivery: Principles and Applications I	arr.
PHAR:6700	Advanced Pharmacokinetics and Pharmacodynamics	3
PHAR:6706	Equilibria Processes	3
PHAR:6710	Pharmaceutics Graduate Seminar (enrollment required each semester until completion of comprehensive exam)	1
PHAR:6720	Pharmaceutics Research	arr.
BMED:7270	Scholarly Integrity/Responsible Conduct of Research I (taken in second year)	0
BMED:7271	Scholarly Integrity/Responsible Conduct of Research II (taken in second year)	0

### Elective Courses

Students choose appropriate electives for individual research objectives.

### Comprehensive Examination

Students take the comprehensive examination between the beginning and end of their third year of graduate study.

### Dissertation

The dissertation is defended in a final oral examination.

## Admission

Applicants must meet the admission requirements of the Graduate College. They must:

- hold a bachelor's degree from a U.S. institution or an equivalent degree from another country as determined by the University of Iowa Office of Admissions;
- have a minimum g.p.a. of at least 3.00;
- submit a Graduate Record Examination (GRE) General Test score; and
- if an international applicant, receive a Test of English as a Foreign Language (TOEFL) minimum score of 81, an International English Language Testing System (IELTS) minimum overall score of 7.0 with no individual score below 6.0, or a Duolingo English Test (DET) minimum score of 105; however, if an applicant has a master's degree from a U.S. institution, this requirement is waived.

Visit How to Apply on the College of Pharmacy website for a list of program requirements and application deadlines. Academic requirements for maintaining graduate registration are determined by the Graduate College and by the individual divisions in the College of Pharmacy.

## Career Advancement

Advanced study in the pharmaceutical sciences prepares students for research, teaching, and administrative positions in the pharmaceutical industry, in colleges and universities, in government agencies, and in health-related institutions and organizations.

**Undergraduate major:** public health (B.A., B.S.)

**Undergraduate certificate:** public health

**Graduate degrees:** M.H.A.; M.P.H.; M.S.; Ph.D.

**Graduate certificates:** agricultural safety and health; biostatistics; emerging infectious disease epidemiology; healthcare management; public health; translational and clinical investigation

**Website:** <https://www.public-health.uiowa.edu/>

The College of Public Health, established in 1999, is a partner with the Carver College of Medicine and the Colleges of Dentistry, Nursing, and Pharmacy in striving to improve human health and well-being. Consistent with the interdisciplinary traditions of public health, the college also collaborates with non-health science colleges across the University and with other Board of Regents, State of Iowa institutions, state and local agencies, and the private sector.

Public health is the science of protecting and improving the health of communities. Professionals in this field use specialized knowledge and skills to better understand the root causes of diseases and injuries and, whenever possible, develop strategies to prevent them.

A population-based approach to health is a distinguishing feature of public health and of the college. For public health practitioners—a wide range of professionals including physicians, nurses, dentists, pharmacists, social workers, nutritionists, environmental scientists, health educators, and health service administrators—the primary focus is on the health of entire communities rather than individual patients. Tools that public health professionals use to improve and enhance quality of life include analytical methods to identify, describe, and monitor the health of communities and populations at risk; education and prevention programs, methods of assuring access to appropriate and cost-effective care; and formulation of sound public policies.

The public health approach has led to many important health improvements over the past century. Vaccination campaigns, improved sanitation, fluoridation of drinking water, and efforts to reduce tobacco use are among the most recognizable public health initiatives. Public health programs also have led to safer workplaces, reduction of deaths from coronary heart disease and stroke, improved motor vehicle safety,

and creation of effective health systems to provide care to those who need it. Today, public health professionals play an important role worldwide in seeking better approaches to complex issues such as quality of life for the elderly, drug and alcohol abuse, teen pregnancy, new and reemerging infectious diseases, bioterrorism, health literacy, nutrition, and food safety.

The College of Public Health provides educational opportunities to students campuswide. In addition to training and educating public health students, the college welcomes students from the Tippie College of Business, the Carver College of Medicine, the Graduate College, and the Colleges of Dentistry, Education, Engineering, Law, Nursing, and Pharmacy who enroll in public health courses. Undergraduate students in the College of Liberal Arts and Sciences and graduate students from programs such as anthropology, microbiology, and statistics also register for public health courses. The college's faculty members, staff members, and graduate and postdoctoral students contribute to teaching and research activities throughout the health sciences campus and provide services to Iowa and the nation. Partnerships for teaching and research extend across the campus. This background provides a rich array of educational opportunities.

The college includes the Departments of Biostatistics [p. 1970], Community and Behavioral Health [p. 1980], Epidemiology [p. 1987], Health Management and Policy [p. 2001], and Occupational and Environmental Health [p. 2011]. It offers programs leading to two undergraduate degrees: Bachelor of Arts (B.A.) and Bachelor of Science (B.S.). It also offers programs leading to four graduate degrees: Master of Health Administration (M.H.A.), Master of Public Health (M.P.H.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.). In addition, it offers the Certificate in Agricultural Safety and Health [p. 1969], the Certificate in Biostatistics [p. 1979], the Certificate in Emerging Infectious Disease Epidemiology [p. 1986], the Certificate in Healthcare Management [p. 2010], the undergraduate Certificate in Public Health [p. 1955], the graduate Certificate in Public Health [p. 1967], and the Certificate in Translational and Clinical Investigation [p. 2021].

The undergraduate and graduate programs of the college are accredited by the Council on Education for Public Health (CEPH), the accrediting body for schools and programs of public health. Three programs in the college also are accredited: the industrial hygiene M.S. training program is accredited by the Accreditation Board for Engineering and Technology (ABET), the Master of Health Administration is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME), and the Occupational Medicine Residency is accredited by the Accreditation Council for Graduate Medical Education (ACGME).

## Faculty

The college's faculty includes members with single appointments in the College of Public Health as well as secondary and adjunct appointments. See the Faculty A-to-Z List on the college's website for more information.

## Programs

### Undergraduate Programs of Study

The College of Public Health offers the Bachelor of Arts (B.A.) and the Bachelor of Science (B.S.); see the B.A. in public health [p. 1945] and the B.S. in public health [p. 1950] in the Catalog for more information. The college also offers the undergraduate Certificate in Public Health [p. 1955].

### Graduate Programs of Study

The College of Public Health offers the Master of Public Health [p. 1956] (M.P.H.); the Master of Health Administration [p. 2004] (M.H.A.), the Master of Science (M.S.), and the Doctor of Philosophy (Ph.D.); see the Biostatistics [p. 1970], Community and Behavioral Health [p. 1980], Epidemiology [p. 1987], Health Management and Policy [p. 2001], and Occupational and Environmental Health [p. 2011] departmental sections of the Catalog for more information.

The College of Public Health also offers graduate Certificates in Public Health [p. 1967], Agricultural Safety and Health [p. 1969], Biostatistics [p. 1979], Emerging Infectious Disease Epidemiology [p. 1986], Healthcare Management [p. 2010], and Translational and Clinical Investigation [p. 2021].

## Undergraduate Rules and Procedures

### Academic Advising

First-year students directly admitted to the College of Public Health major are advised by undergraduate program staff at the College of Public Health. First-year College of Liberal Arts and Sciences (CLAS) public health interest students are advised at the University's Academic Advising Center. CLAS public health interest students who apply and are admitted to the College of Public Health are advised at the College of Public Health by undergraduate program staff. All students are required to have a conference with their advisor before registering for classes each semester.

### Application for Degree

Students who wish to be considered for graduation must submit an Application for Degree through MyUI the session before they are eligible to graduate or before the deadline date during the session in which they expect to graduate.

Students who do not graduate in the session they submitted their Application for Degree must submit another application through MyUI for the next applicable session. Students do not need to be registered to apply for a degree.

See Degree Application on the Office of the Registrar website.

### Academic Recognition

#### Dean's List

Undergraduate students in the College of Public Health who achieve a g.p.a. of 3.50 or higher on 12 s.h. or more of University of Iowa graded coursework during a given semester or summer session and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean's List for that semester.

### President's List

Undergraduate students in the College of Public Health who achieve a g.p.a. of 4.00 on 12 s.h. or more of University of Iowa graded coursework and who have no semester hours of I (incomplete) or O (no grade reported) for two consecutive semesters (excluding summer sessions) are recognized by inclusion on the President's List.

### Graduation with Distinction

Graduation with distinction recognizes high academic achievement based on grades. The Office of the Registrar certifies to the dean of the College of Public Health the names of students eligible to graduate with distinction. To be eligible for consideration, the graduate must complete the public health major at the University of Iowa. The grade-point average upon which distinction is determined includes all college-level work (cumulative UI and total) undertaken prior to the opening of the final session.

- To graduate with highest distinction, the cumulative g.p.a. must be 3.90 to 4.00.
- To graduate with high distinction, the cumulative g.p.a. must be 3.80 to 3.89.
- To graduate with distinction, the cumulative g.p.a. must be 3.75 to 3.79.

### Graduation with Honors

Graduation with honors recognizes high academic achievement based on both grades and exceptional accomplishment.

#### Honors in the Major

Students majoring in public health have the opportunity to graduate with honors in the major. To graduate with honors in public health, students must successfully complete all college requirements with a g.p.a. of at least 3.33 in all courses for the major, in all college coursework, and in all UI coursework.

In addition, students must complete an honors thesis in CPH:4990 Mentored Independent Undergraduate Research in Public Health, where they must write a brief research proposal summarizing background and goals of honors research, defend their research proposal to a honors project faculty member and a honors advisor, conduct research, submit their honors thesis, and conclude with an oral and/or poster presentation.

Outstanding undergraduate students in the college have an opportunity to undertake independent study and to work closely with faculty members. Completion of requirements for honors in the major also will satisfy the experiential learning requirement.

### Academic Standards

#### Maximum Schedule

Course schedules of more than 19 s.h. for a semester, 12 s.h. for a summer session, or 3 s.h. for a winter session require approval of the advising staff in the undergraduate program office.

#### Classification of Students

Students are classified by the number of semester hours of credit they have earned toward the bachelor's degree.

Code	Title	Hours
First year:	0-29 s.h.	
Second year:	30-59 s.h.	
Junior:	60-89 s.h.	
Senior:	90 s.h. or more	

## Credit and Grading

### Credit by Examination

Students may earn up to 30 s.h. of credit by examination by taking selected tests from the College Level Examination Program (CLEP) and the Advanced Placement Program (AP) of the College Board, the Cambridge International Examinations (CIE), or the International Baccalaureate Program (IB). For information about when and how to take the CLEP and AP examinations, contact the University's Office of Teaching, Learning & Technology.

The College of Public Health has information on scores, credit, and course duplicates for all CLEP, AP, and IB tests accepted by the college. Ordinarily, credit earned through examination is applied first to the General Education Requirements. Credit also may be applied to requirements of a major, minor, or certificate, or as elective credit.

### Credit From Other Colleges

Students who have taken courses at another institution that are similar to those approved for the public health major or the General Education Requirements may request that these courses be evaluated for transfer credit. When students apply for admission to the College of Public Health, they must submit official transcripts from each college attended along with their application for admission. After the credit has been certified by the Office of Admissions as college-level work from an accredited institution and after admission has been granted, the credit is evaluated by the undergraduate program either before or during the student's first semester of enrollment in the college.

### Grading System

The college uses a letter grading system. A denotes superior performance, B denotes above average, C denotes average, D denotes below average, and F denotes failure of the course. Plus and minus designate gradations of performance between letter grades. Letter grades and their numerical equivalents are as follows.

A+	4.33
A (superior)	4.00
A-	3.67
B+	3.33
B (above average)	3.00
B-	2.67
C+	2.33
C (average)	2.00
C-	1.67
D+	1.33
D (below average)	1.00
D-	0.67
F (failing)	0

### Adding and Dropping Courses

Students may drop courses, except College of Law courses, any time before the deadline published in the University's academic deadline calendar. Deadlines are different for

regular and off-cycle courses. See Academic Calendar on the Office of the Registrar website.

Students must obtain approval from the college that offers the course in order to request permission to add or drop a course after these deadlines.

### Auditing Courses

College of Public Health students may choose to take courses without earning credit for them (audit) with the permission of the course instructor and their advisor. Students are still charged for auditing courses. The mark of AUS (audit successful) is assigned to students registered for zero credit if attendance and performance in the course are satisfactory; if unsatisfactory, the mark of AUU (audit unsuccessful) is assigned. Courses completed with a mark of AUS do not meet any requirements nor do they carry any credit toward graduation. Auditing may not be used as a second-grade-only option.

To register for a course on an audit basis, students must obtain the instructor's authorizing signature and their advisor's signature and must register for 0 s.h. To change registration from audit to credit or from credit to audit, a change in registration form is used. These changes must be made during the period when adding courses is allowed.

### Pass/Nonpass Courses

Undergraduate students in the College of Public Health may not use courses taken P/N (pass/nonpass) to satisfy General Education Requirements, high school course requirements, prerequisite or major public health course requirements, or any course in the College of Public Health. Major public health requirements include any course that fulfills the major course requirements (including public health electives), regardless of the college offering the course. The College accepts a maximum of 15 s.h. of P (pass) credit from the University of Iowa toward the bachelor's degree and a maximum of 30 s.h. of P (pass) and S (satisfactory) grades from all sources (UI as well as transfer work) toward the bachelor's degree.

Pass/nonpass registration must be completed during the first 10 days of a fall or spring semester or the first one-and-one-half weeks of a summer session, and it requires the approval of the advisor and the instructor. For courses taken pass/nonpass, an earned grade of C-minus or higher is recorded as a P; an earned grade of D-plus or lower is recorded as an N. Pass/nonpass credit is not included in grade-point average calculations.

### Satisfactory/Fail Courses

The College of Public Health Direct Admit Seminar, Second Year Undergraduate Public Health Seminar, and Third Year Undergraduate Public Health Seminar are offered only satisfactory/fail (S/F). A grade of F (fail) earned for these seminars does not satisfy any portion of the professional development seminar requirement.

Certain other College of Public Health courses are offered satisfactory/fail (S/F). All students registered for these courses receive one of these marks.

Semester hours of S graded coursework are not used in computing grade-point averages, but hours of F graded coursework are used. Semester hours of S graded coursework are counted as semester hours earned toward graduation; semester hours of F graded coursework do not count as semester hours earned toward graduation.

College of Public Health undergraduates may not use S graded coursework to fulfill General Education Requirements.

The college accepts a maximum of 15 s.h. of S credit from the University of Iowa toward the bachelor's degree and a maximum of 30 s.h. of S and P grades from all sources (UI as well as transfer work) toward the bachelor's degree.

### **Incomplete Grades**

Instructors may report a mark of I (incomplete) only if the unfinished part of a student's work in a course other than research, thesis, or independent study is small; if the work is unfinished for reasons acceptable to the instructor; and if a student's standing in the course is satisfactory.

Students should not re-enroll in a course for which they have an incomplete. Incomplete grades must be removed by completing the unfinished part of the work. Faculty and students are encouraged to state clearly in a written agreement how the incomplete is to be completed and the due date for the remaining work. Both the faculty member and the student should keep a record of the written agreement.

Failure to remove the incomplete before the end of the next full semester, excluding summer and winter sessions, results in replacement of the I with a grade of F, regardless of whether a student is enrolled during that semester. A grade change may be submitted to convert a grade of F to another letter grade, with the instructor's approval.

Students cannot graduate with an I mark on their record. They must either complete the course for a passing grade, or allow the Incomplete to lapse to a grade of F.

### **Second-Grade-Only Option for CLAS Public Health Interest Students**

Public health interest students must follow the rules established by the College of Liberal Arts and Sciences (CLAS). Contact the CLAS Academic Programs and Student Development office or consult the CLAS Academic Policies Handbook for more information.

### **Second-Grade-Only Option**

College of Public Health students may repeat up to three courses taken at the University of Iowa regardless of the grade originally earned in the course and may only be used once per class. A course may not be repeated under the second-grade-only option once it has been used as a prerequisite for a more advanced course that the student has completed successfully. The second-grade-only option cannot be used to remove a grade of incomplete, which must be removed in the usual manner.

The second-grade-only option may be used only for University of Iowa courses. A course taken at another college or university may not be repeated at the University of Iowa under the second-grade-only option, nor may a UI course be repeated at another institution under the second-grade-only option.

Any second-grade-only options used before entry to the College of Public Health count toward the maximum of three second-grade-only options allowed.

If the course was taken for a grade the first time, it must be taken for a grade the second time.

If the course was taken satisfactory/fail the first time, a student may choose to take the course for a grade or as satisfactory/fail the second time.

Any University of Iowa course taken in any mode of delivery—during a regular semester, a summer session, an intensive session, through distance education, or through Distance and Online Education [p. 2050]—may be repeated in the same mode of delivery or in any other mode of delivery.

Students who have been awarded a degree from the University of Iowa may not use the second-grade-only option on a course taken before the degree was awarded.

Students must register as usual for the course that is to be repeated. After the session in which the course is being repeated has begun, students must request the second-grade-only option by completing the Second-Grade-Only Option Request Form. Students must follow this procedure or both grades will be counted in their University of Iowa grade-point average.

The permanent record is adjusted by placing a pound symbol (#) next to the first grade to indicate that it is no longer being included in the grade-point-average calculation, and only the semester hours from the second registration have been counted as semester hours earned. Once placed on the record, the option may not be retracted. Graduate or professional colleges may recalculate grade-point averages using all grades visible on the permanent record.

### **Student Academic Misconduct**

Policies regarding cases of cheating or plagiarism are outlined in the Undergraduate Student Handbook; see Examples of Academic Misconduct on the College of Public Health website.

### **Academic Probation and Dismissal**

College of Public Health students are expected to meet academic standards set by the college and to demonstrate reasonable progress toward a degree. To be considered in good academic standing, students must earn a minimum cumulative public health major g.p.a., a minimum UI cumulative g.p.a., and a minimum cumulative g.p.a. for all college work of at least 2.00, and a required University of Iowa session g.p.a. of 1.50 or higher during any spring, summer, or fall enrollment. If a student does not meet all grade-point average conditions, then the student is placed on academic probation.

Students usually are allowed only one session to return to good academic standing. They are required to meet with an academic advisor. Students on academic probation who withdraw registration after the deadline for dropping courses may be dismissed.

The college reviews academic records for all students at the end of the fall and spring semesters. There is no review at the end of the summer session. Students are placed on probation, dismissed for unsatisfactory progress (with or without previous probationary status), or restored to good standing only at the end of the fall and spring semesters.

Students who do not make satisfactory progress may be dismissed from the college without an intervening probationary period. Students who are dismissed from the college for unsatisfactory academic progress due to circumstances beyond their control, such as a death in their immediate family or extended personal illness, may appeal for a revocation of the dismissal. A student dismissed in January must submit a written appeal by the second day of spring semester classes. A student dismissed in May must submit the written appeal by June 15.

Students dismissed from the college for poor scholarship may appeal to re-enroll after an interval of at least one

calendar year following the end of the term in which they were dismissed. A written appeal for reinstatement must be submitted to the Undergraduate Program Office. Appeals must be submitted before June 15 for reinstatement in a fall semester or before December 1 for reinstatement in a spring semester.

For details, see the Undergraduate Student Handbook on the college's website.

## Reinstatement

Students dismissed for unsatisfactory scholarship for the first time are not permitted to register again for one year. Students dismissed for the second time may or may not be granted a second reinstatement. Requests for reinstatement must be made in writing and should be addressed to the Associate Dean for Academic Affairs, College of Public Health. Arrangements for a reinstatement interview must be made with the associate dean for academic affairs. The interview must take place between March 1 and July 1 for reinstatement for fall semester, or between October 1 and December 1 for reinstatement to spring semester. Late requests are deferred to the following semester.

Students who are permitted to register following dismissal are registered on academic probation and ordinarily are allowed two semesters to achieve good standing. Most reinstatements include a limit on the number of semester hours the student may take upon reinstatement. Very poor academic work in the first semester of a reinstatement, however, may result in dismissal at the close of that semester.

## Facilities

The College of Public Health Building, a state-of-the-art facility that opened in 2012 on the University's health sciences campus, houses the college's administrative, departmental, and faculty offices. The college's research centers, institutes, and specialized laboratories are located in Westlawn, on the health sciences campus; in University Capitol Centre, on the main campus east; and at the University of Iowa Research Park.

Four student computer laboratories are housed at the college. More than 55 software packages are available for student use, most without charge. Software includes Microsoft Office products, SAS, and S+. Some specialty labs are equipped with RedHat Linux and are loaded with R, Macanova, Xlispstat, Mathematica, and other software.

Students, faculty, and staff draw on extensive library resources available across campus. Hardin Library for the Health Sciences serves as a central resource for all of the health sciences colleges. Hardin Library's Information Commons, a state-of-the-art health sciences educational technology facility, provides central support and delivery for courseware development, classroom instruction, health-related research, and independent learning. It offers high-end multimedia development workstations, networked electronic classrooms, a case-based learning and conference room, and information research workstations for searching health-related databases and the internet.

## Research Centers and Institutes

The College of Public Health is home to 23 centers and institutes that conduct research and provide public service. These multidisciplinary centers and institutes—most of which are supported by federal grants—focus their investigative efforts on important public health topics. They conduct an

array of outreach, service, and policy activities through which the College of Public Health engages with agencies, communities, and organizations throughout Iowa, the Midwest, the nation, and the world. Students are encouraged to explore opportunities for involvement with any of the college's centers and institutes.

For more information, see Research Centers and Programs on the college's website.

## Courses

### College of Public Health Courses

- CPH:1000 First-Year Seminar** **1 s.h.**  
Small discussion class taught by faculty member; topics chosen by instructor; may include outside activities (e.g., films, readings, visits to research facilities).
- CPH:1050 College of Public Health Direct Admit Seminar** **1 s.h.**  
Introduction for first-year students to student life and the public health profession; tips for student success, resources on campus, coping with adversity, advising responsibilities, curriculum choices and career objectives, and community building events.
- CPH:1400 Fundamentals of Public Health** **3 s.h.**  
Introduction to public health; emphasis on issues, challenges, achievements, careers; historical events that serve as a foundation for public health practice. GE: Social Sciences.
- CPH:1600 Public Health Science: Inquiry and Investigation in Public Health** **3 s.h.**  
Introduction to epidemiology, biostatistics, and the interdisciplinary nature of public health research and practice; how public policy and population-based interventions are subsequently shaped by public health evidence. GE: Quantitative or Formal Reasoning.
- CPH:1800 Social and Psychological Determinants of Health: Changing Behavior, Improving Health** **3 s.h.**  
Study of the social and psychological aspects of health, including understanding behavior change to improve health.
- CPH:2050 Second Year Undergraduate Public Health Seminar** **1 s.h.**  
Preparation for experiential learning opportunities, including development of interpersonal, teamwork, leadership, and communication skills; ethical decision making; understanding the cultural contexts in which professionals work; working with communities and the role of advocacy; professionalism.
- CPH:2200 Climageddon: Understanding Climate Change and Associated Impacts on Health** **2 s.h.**  
Discovery, underlying principles, and impacts of global climate change; scientific evidence, global climate models, international treaties, ethics, advocacy and denial of climate change; strategies for climate adaptation and mitigation of unsustainable practices.
- CPH:2210 Introduction to Maternal and Infant Health Epidemiology** **2 s.h.**  
Introductory overview of maternal and infant health concepts, methods, and issues, both domestic and abroad, including contraception and fertility, pregnancy complications, caesarean delivery, maternal and infant morbidity and mortality, and child survival.

**CPH:2220 Building a Healthier Tomorrow: Public Health Methods to Minimize Disease and Pollutant Exposures** 3 s.h.

Introduction to historical public health practices developed to prevent exposures to environmental contaminants; major sources of those contaminants that adversely affect natural waters and air are evaluated relative to methods used to provide safe drinking water and clean air; in-class exercises involve critical thinking and creativity to understand concepts and tools needed to utilize prior public health successes and application to current and future environmental health events.

**CPH:2230 Finding Patient Zero: The Exploration of Infectious Disease Transmission and Pandemic Threats** 3 s.h.

Exploration of lay and scientific literature, pandemic infection games, and popular culture television programming to evaluate past and fictional pandemics—are these pandemics rooted in fact or fiction?

**CPH:2240 Health Disparities and Intersectionality with U.S. Latina/o/x Peoples** 3 s.h.

Exploration of intersectionality—related to gender, immigration status, and more—and U.S. health disparities, particularly as they impact U.S. Latina/o/x peoples; Latina/o/x as a heterogeneous group originating from a variety of countries, with families that may have mixed immigration, education, class, and/or nationality status; public health approaches and concepts; intersectionality, social determinants of health, the Social Ecological Model, Ecosocial Theory, and Critical Race Theory; examination of various levels of racism, sexism, and other forms of intersectional discrimination. Same as GWSS:2400, LATS:2400.

**CPH:2400 The U.S. Health System in a Global Context** 3 s.h.

Fundamental organizational structures of the U.S. health system and the difference between systems globally; basic concepts of legal, ethical, economic, and regulatory dimensions of health care and policy and roles, influences, and responsibilities of government agencies.

**CPH:2600 Introduction to Public Health Methods** 3 s.h.

Introductory quantitative and qualitative methods used in public health practice and research. Prerequisites: CPH:1600 with a minimum grade of C-.

**CPH:3050 Third Year Undergraduate Public Health Seminar** 1 s.h.

Development and preparation for post-college plans, including how to conduct a job search, write a résumé and cover letter, interview, and apply to graduate programs in public health and related fields.

**CPH:3100 Health Economics** 3 s.h.

Introduction to microeconomic theory and applications to health and health care, including demand for health and health services, health insurance coverage, health care markets, behavior of health care providers, and role of government.

**CPH:3200 Death at Work: Case Studies of Workplace Safety and Health** 3 s.h.

Case-study approach to understanding the rights of workers to a safe and healthful workplace; relevant risk factors (physical, economic, social) among several working environments.

**CPH:3210 Nutrition in Public Health** 3 s.h.

Concepts and methods of obtaining and using food and nutrition information from federal databases and research publications; how food and nutrition knowledge, policy, and research are used for improvement of the health of populations.

**CPH:3220 Public Health as a Public Good: Economics and Decision Making in Public Health Systems** 3 s.h.

Role of government in the economy from a public health perspective; emphasis on the importance of public goods, behavioral economics in public health solutions, and key methods for evaluation of public programs.

**CPH:3230 Human Genetics and Public Health** 3 s.h.

Introduction to human genome and its impact on public health; students learn about public health initiatives and policies that include genetics (e.g., newborn screening, birth defects surveillance, cancer screening). Prerequisites: BIOL:1140 or BIOL:1141 or BIOL:1411.

**CPH:3240 Global Health Today** 1 s.h.

Attendance at diverse on-campus, local, and regional global health events. Same as GHS:3030.

**CPH:3300 Undergraduate Independent Study in Public Health** arr.

In-depth pursuit of an area of special interest in public health.

**CPH:3400 Health, Work, and the Environment** 3 s.h.

Survey of environmental and occupational health hazards and the associated health risks of exposure; how public health protects society from these hazards; how public health policy can be influenced by science. Same as GEOG:3210.

**CPH:3500 Global Public Health** 3 s.h.

Exploration of historical, current, and forecasted trends in global public health, the factors influencing health demographics in human populations, sources of health inequalities, and appropriate policy and intervention approaches for addressing global public health challenges. Same as GHS:3500.

**CPH:3600 Applied Public Health Methods** 3 s.h.

Application of quantitative and qualitative methods used in public health practice and research. Prerequisites: CPH:1600 with a minimum grade of C- and CPH:2600 with a minimum grade of C-.

**CPH:3700 Methods for Program Implementation and Evaluation** 3 s.h.

Introduction of theory and practice of program implementation and evaluation for health care and public health interventions focusing on programs implemented at the community level, including projects in government and nonprofit organizations. Prerequisites: CPH:1600 and CPH:2600.

**CPH:3750 Undergraduate Service Learning in Public Health** arr.

Community service learning experience directly related to goals and objectives of a specific public health course for undergraduate students; faculty-guided planning and reflection; satisfies the experiential learning public health degree requirement for undergraduate public health majors. Recommendations: CPH:2050 strongly recommended.

**CPH:3800 Public Health Theories and Society** 3 s.h.

Examination of public health and social science theories as they relate to socioeconomics, policy, institutions, communities, individual decision making, behavior, and health. Prerequisites: CPH:1400 and CPH:2600.

**CPH:3900 Fundamentals in Public Health Emergency Preparedness and Response 3 s.h.**

Basic concepts and principles used in emergency prevention, preparedness, response, and recovery at the local, state, and national levels with emphasis on roles and responsibilities of public health that align with policies, laws, and systems. Prerequisites: CPH:1400.

**CPH:3999 Undergraduate Research Experience in Public Health arr.**

Hands-on involvement in scholarly public health research activities under the supervision of faculty or research staff; satisfies the experiential learning degree requirement for undergraduate public health majors. Recommendations: CPH:2050 strongly recommended.

**CPH:4200 Agriculture, Food Systems, and Sustainability 3 s.h.**

Identification and development of tools to measure environmental and social sustainability of global agricultural practices, including interactions with the environment, social considerations, and the ability of agriculture to support farmers' livelihoods.

**CPH:4210 Making a Difference: Public Health Policy and Advocacy 3 s.h.**

Important role of policy in health, including policy structures, implementation, advocacy, and evaluation; students focus their work on a policy of their specific interest.

**CPH:4220 Global Road Safety 3 s.h.**

Road safety problem, data sources, research methods used in field, and how intervention and prevention programs are developed and evaluated; lecture, hands-on approaches. Same as GHS:4530, OEH:4530.

**CPH:4230 Injury and Violence Prevention 3 s.h.**

Theory, research, and practice of injury control; unintentional and intentional injuries; local, national, international injury issues. Same as EPID:4510, OEH:4510.

**CPH:4240 Special Topics arr.**

Didactic material in public health; may include tutorial, seminar, or faculty-directed work; may be a special topic or experience taught one time or on a first-time basis.

**CPH:4250 Field Experiences in Public Health 1 s.h.**

Direct involvement in actions being taken at local community level; topics include environmental health, infectious diseases, chronic diseases, and pediatric health; practical examples and hands-on experiences during site visits for topic-specific field investigations. Offered spring semesters. Prerequisites: BIOL:1140 or BIOL:1141 or BIOL:1411. Requirements: biology or microbiology coursework. Same as EPID:4314.

**CPH:4750 Undergraduate Global Learning in Public Health arr.**

Global public health experience; satisfies the experiential learning public health degree requirement for undergraduate public health majors. Recommendations: CPH:2050 strongly recommended.

**CPH:4755 International Perspectives: Xicotepec 2 s.h.**

Interdisciplinary service-learning course to enrich understanding of Mexican culture and history; students hone teamwork, leadership, cultural sensitivity, cultural humility, and project management skills while developing and carrying out public health projects that address community-identified needs; coordinated with the support of Rotary International.

**CPH:4850 Undergraduate Public Health Internship arr.**

Public health internship experience; satisfies the experiential learning public health degree requirement for undergraduate public health majors. Recommendations: CPH:2050 strongly recommended.

**CPH:4990 Mentored Independent Undergraduate Research in Public Health arr.**

Independent student research project under the supervision of a faculty mentor; satisfies the experiential learning degree requirement for undergraduate public health majors. Corequisites: CPH:3600. Recommendations: CPH:2050 strongly recommended.

**CPH:4999 Public Health Capstone: Practice of Evidence-Based Public Health 3 s.h.**

Students in their final year synthesize and apply knowledge through cumulative and integrative activities that serve as a capstone to their educational experience. Prerequisites: CPH:1800 and CPH:2400 and CPH:3050 and CPH:3400 and CPH:3500 and CPH:3600 and CPH:3700.

**CPH:5100 Introduction to Public Health 3 s.h.**

Concepts, structures, and activities in public health practice. Offered fall semesters and summer sessions.

**CPH:5201 Interprofessional Education and Practice for M.P.H. Students I 0 s.h.**

Students gain knowledge and skills in interprofessional practice between health professionals including medicine, pharmacy, dentistry, physical therapy, nursing, health administration, and public health; understanding roles/responsibilities, values, and ethics across health professions; development of teamwork skills.

**CPH:5202 Interprofessional Education and Practice for M.P.H. Students II 0 s.h.**

Students gain knowledge and skills in interprofessional practice between health professionals including medicine, pharmacy, dentistry, physical therapy, nursing, health administration, and public health; understanding roles/responsibilities, values, and ethics across health professions; development of teamwork skills.

**CPH:5203 Interprofessional Education and Practice for M.P.H. Students III 0 s.h.**

Students gain knowledge and skills in interprofessional practice between health professionals including medicine, pharmacy, dentistry, physical therapy, nursing, health administration, and public health; understanding roles/responsibilities, values, and ethics across health professions; development of teamwork skills.

**CPH:6100 Essentials of Public Health 2 s.h.**

Introduction and overview of the scope of public health; emphasis on history, definitions, issues, achievements, and future challenges; examples of public health research and practice.

**CPH:6500 Independent Study in Public Health arr.**

In-depth pursuit of an area of special interest in public health. Requirements: approval from the College of Public Health.

**CPH:6600 Service-Learning in Public Health arr.**

Community service learning experience directly related to goals and objectives of a specific public health course; faculty-guided planning and reflection.

**CPH:6700 Public Health Emergency Preparedness for Veterinarians and Other Public Health Disciplines 3 s.h.**

Introduction to public health emergency preparedness from a one health perspective; emergency preparedness from federal, state, and local perspectives; important elements for preparing responders; preparedness information systems and communication techniques.

**CPH:7000 M.P.H. Practicum Experience 0-6 s.h.**

Comprehensive and integrated application of knowledge acquired in the M.P.H. program in a practice setting; demonstration of professional competence in public health practice. Prerequisites: CBH:4105 and (HMP:5005 or HMP:4000) and EPID:4400 and BIOS:4120 and OEH:4240 and CPH:5100. Requirements: an approved practicum proposal.

**CPH:7200 M.P.H. Capstone Experience 1 s.h.**

Students gain knowledge and skills in public health practice by working on an interdisciplinary team to solve a real-world public health issue; each student has the opportunity to apply classroom and practical experience received throughout their M.P.H. coursework into an integrative experience; students particularly gain skills in advocacy, communication with diverse audiences on public health issues, and the role of different public health disciplines in solving health issues in the community. Prerequisites: CBH:4105 and (HMP:5005 or HMP:4000) and EPID:4400 and BIOS:4120 and OEH:4240 and CPH:5100.

**CPH:7270 Principles of Scholarly Integrity: Public Health 0-1 s.h.**

Training in the responsible conduct of research and scholarly activities; discussion of student/mentor responsibilities in pursuit of scholarly work and intellectual dialogues; responsibilities to the institution/scholarly community/society; public health core discipline examples are utilized.

**CPH:7500 M.P.H. Applied Practice Experience 1-2 s.h.**

Comprehensive and integrated application of knowledge acquired in the M.P.H. program in a practice setting; demonstration of professional competence in public health practice. Prerequisites: CBH:4105 and (HMP:5005 or HMP:4000) and EPID:4400 and BIOS:4120 and OEH:4240 and CPH:5100.

**CPH:7604 Principles of Scholarly Integrity: Public Health - Postdoc/K Awardees 0 s.h.**

Training in the responsible conduct of research and scholarly activities; discussion of student/mentor responsibilities in pursuit of scholarly work and intellectual dialogues; responsibilities to institution/scholarly community/society; utilization of public health core discipline examples; for public health postdoc/K awardees.

## Public Health, B.A.

The Bachelor of Arts (B.A.) degree provides students with a basic understanding of the five core public health knowledge areas: biostatistics, social and behavioral sciences, epidemiology, health policy and management, and occupational and environmental health sciences. Students will be prepared to enter the workforce or continue their education.

A public health core provides the degree with breadth in the biological, social, economic, quantitative, geographic, and educational components of health and health disparities within and across populations. Students complete a cumulative capstone experience during which they will integrate, apply, and synthesize public health knowledge. As an integral part of their education, students also will be exposed to public health professionals and agencies.

### Requirements

The Bachelor of Arts with a major in public health requires a minimum of 120 s.h., including at least 61 s.h. of work for the major. Students must have a cumulative g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major; in all college coursework and in all UI coursework; and in all college coursework in public health and in all UI public health coursework, including any courses administered by the College of Public Health in the Departments of Biostatistics, Community and Behavioral Health, Epidemiology, Health Management and Policy, and Occupational and Environmental Health. Students are required to earn a minimum of 30 s.h. in public health coursework at the University of Iowa.

The B.A. with a major in public health requires the following coursework.

### College Success Requirement

All students are required to complete CSI:1600 Success at Iowa during the fall semester; students complete part one before participating in an orientation program. The course is designed to help students successfully transition to college life. The course covers information about online tools that are specific to the University, such as MyUI and Iowa Courses Online (ICON), and also discusses resources for navigating life on campus. Additional content includes financial aid literacy, strategies for making healthy behavior choices, sexual assault awareness and prevention, and the comprehensive transitional survey known as MAP-Works.

### General Education Requirements

Code	Title	Hours
RHET:1030	Rhetoric	4
ENGL:1200	The Interpretation of Literature	3
World Languages		0-10
Natural Sciences		7
Quantitative or Formal Reasoning		3
Social Sciences		3
Historical Perspectives		3
Diversity and Inclusion		3
International and Global Issues		3
Literary, Visual, and Performing Arts		3
Values and Culture		3

## World Languages

Students may complete the world languages requirement using one of the following three options. One year of high school language study is generally equivalent to one semester of college language study.

### Option One

Attain fourth-level proficiency in a single world language, usually by completing four years of that language in high school or four semesters in college or an equivalent combination of high school and college coursework; or pass an achievement test or evaluation at fourth-level proficiency.

### Option Two

Attain second-level proficiency in each of two world languages, usually by completing two years of each language in high school or two semesters of each language in college or an equivalent combination of high school and college coursework; or pass achievement tests and/or evaluations at second-level proficiency in each language. Option two does not fulfill the World Languages requirement for the College of Liberal Arts and Sciences or qualify students to earn credit under the Furthering Language Incentive Program (FLIP).

### Option Three

Attain second-level proficiency in a single world language, usually by completing two years of that language in high school or two semesters of that language in college plus one 3 s.h. course from the GE CLAS Core [p. 20] in International and Global Issues, Values and Culture, or Diversity and Inclusion. Option three does not fulfill the World Languages requirement for the College of Liberal Arts and Sciences or qualify students to earn credit under the Furthering Language Incentive Program (FLIP).

Students may count courses taken to fulfill General Education Requirements toward other requirements for the B.A. degree.

## Prerequisites for Admission to the College

Students who wish to enter the major in public health after declaring the public health interest through the College of Liberal Arts and Sciences must complete the following by the end of the semester in which they apply before they may enter the major:

- completion of at least 12 s.h. at the University of Iowa;
- completion of CPH:1400 Fundamentals of Public Health with a grade of B-minus or higher;
- completion of CPH:1600 Public Health Science: Inquiry and Investigation in Public Health with a grade of B-minus or higher; and
- a cumulative g.p.a. of at least 2.75 in all courses taken at the University of Iowa and in all college-level coursework attempted.

## Public Health Core Courses

Students must complete all of the following (30 s.h.).

Code	Title	Hours
CPH:1050	College of Public Health Direct Admit Seminar	1
CPH:1400	Fundamentals of Public Health	3

CPH:1600	Public Health Science: Inquiry and Investigation in Public Health	3

## B.A./CLAS Undergraduate Degree

Students admitted to or enrolled in the B.A. in public health program may pursue an additional degree in the College of Liberal Arts and Sciences (CLAS). Students pursuing an additional degree outside the College of Public Health are:

- expected to meet all degree requirements, General Education Requirements, and GE CLAS Core requirements for both degree programs;
- required to satisfy the collegiate residence requirements of both colleges;
- assigned two advisors, one in each college; and
- assessed tuition for the primary program of study in accordance with the rules of the Registrar's Office.

Additional considerations:

- Students may be awarded degrees in the two colleges simultaneously or separately without requiring additional coursework beyond the degree requirements.
- Current students enrolled in the College of Public Health who want to add a CLAS major should use the Change of College Application found in MyUI.
- Students who wish to discontinue the additional degree program will need to file a Discontinuation of Combined Degree Program form in the collegiate office of the program of study they are dropping.

Students may change majors with either college in the college academic programs office and still remain in the additional degree program.

## Combined Programs

### B.A./Graduate Degree

Combined undergraduate to graduate programs provide an opportunity for students to earn both their B.A. and a master's degree in five years by beginning to earn graduate credit during their fourth year of undergraduate study.

Students in the combined programs must complete all requirements for each degree. Students apply for admission to the combined program during their third year as undergraduates and enter the program at the beginning of their fourth year.

Applicants also must apply for admission to the master's degree program and must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. For more information, see Undergrad to Grad (U2G) on the College of Public Health website.

Public health majors intending to pursue the Undergrad to Grad (U2G) combined degree program in public health must

complete 120 s.h. Up to 15 s.h. may be earned in graduate credit by the end of a student's fourth year.

Public health majors must complete all of the following requirements in addition to the 15 s.h. of graduate coursework.

### Public Health Major Degree Requirements

Coursework for the following requirements total approximately 60 s.h.

- public health core courses
- B.A. coursework
- public health elective coursework
- experiential learning requirement
- General Education Requirement courses

### General Electives

- UI (nonmajor) coursework to total 120 s.h. by end of the fourth year; this could include up to 15 s.h. of graduate credit in public health coursework taken as an undergraduate student

Graduate courses taken during the fourth year do not count toward major requirements (including public health electives) for the undergraduate public health major. However, these semester hours may count as general elective credits needed to complete the 120 s.h. required for a bachelor's degree.

## Honors

### Honors in the Major

Students majoring in public health have the opportunity to graduate with honors in the major. To graduate with honors in public health, students must successfully complete all college requirements with a g.p.a. of at least 3.33 in all courses for the major, in all college coursework, and in all UI coursework.

In addition, students must complete an honors thesis in CPH:4990 Mentored Independent Undergraduate Research in Public Health, where they must write a brief research proposal summarizing background and goals of honors research, defend their research proposal to a honors project faculty member and a honors advisor, conduct research, submit their honors thesis, and conclude with an oral and/or poster presentation.

Outstanding undergraduate students in the college have an opportunity to undertake independent study and to work closely with faculty members. Completion of requirements for honors in the major also will satisfy the experiential learning requirement. Consult the College of Public Health undergraduate program office for more information.

### University of Iowa Honors Program

Public health interest students interested in honors study are encouraged to participate in the University of Iowa Honors Program until they are admitted to the College of Public Health. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not a requirement for applying to or graduating with honors in the public health major.

## Admission

Admission to the Bachelor of Arts program in public health is selective. Students who meet the minimum admission requirements are not guaranteed admission.

Students may be admitted to the College of Public Health either through direct admission or standard admission.

### Direct Admission

Direct admission is designed for students applying to the university as first-year students for the fall semester. Applicants who meet the high school course requirements and present a Regent Admission Index (RAI) of 265 or higher, and a high school g.p.a. of at least 3.33 are directly admitted to the college. Applicants who meet course requirements and either the RAI or grade-point average requirement are carefully considered. Students who are denied direct admission may file an online petition for direct admission to the College of Public Health.

Students granted direct admission to the college are eligible to apply for first-year scholarships. The scholarship application process is competitive and is based on high school record and short essay responses.

First-year students not admitted directly to the College of Public Health may be admitted to the College of Liberal Arts and Sciences as a public health interest student.

Transfer student applications are not being accepted at this time for direct admission to the College of Public Health. Transfer students may apply to the College of Liberal Arts and Sciences public health interest designation.

### Standard Admission

University of Iowa students are eligible to apply for standard admission to the College of Public Health, typically after their first year, once they complete prerequisite courses and earn the required grade-point average.

Application deadline for fall admission is May 1. Application deadline for spring admission is December 1. Students should meet the following requirements by the end of the semester in which they apply:

- completion of at least 12 s.h. at the University of Iowa;
- completion of CPH:1400 Fundamentals of Public Health with a grade of B-minus or higher;
- completion of CPH:1600 Public Health Science: Inquiry and Investigation in Public Health with a grade of B-minus or higher; and
- a minimum g.p.a. of 2.75 in all University of Iowa coursework and in all college coursework.

Students who are denied standard admission may file an online appeal for denial of admission to the College of Public Health if they can provide documentation of extenuating circumstances that affected their academic performance.

## Career Advancement

The B.A. program provides knowledge of the community and behavioral aspects of public health for students interested in working in health education, health communication, public health program development, or public health policy in local, federal, or international governmental or nongovernmental agencies. Students will be prepared for advanced education in the social sciences, communication studies, social and

community health, health policy and management, and other fields.

## Academic Plans

### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

The Four-Year Graduation Plan applies only to students who are directly admitted to the College of Public Health or students who meet the prerequisites and submit an application for standard admission before the third semester begins (including public health interest students).

**Before the second semester begins:** CPH:1050 College of Public Health Direct Admit Seminar (for direct admits only).

**Before the third semester begins:** CPH:1400 Fundamentals of Public Health, CPH:1600 Public Health Science: Inquiry and Investigation in Public Health, and at least one-quarter of the semester hours required for graduation.

**Before the fourth semester begins:** CPH:2050 Second Year Undergraduate Public Health Seminar and CPH:2600 Introduction to Public Health Methods.

**Before the fifth semester begins:** one-half of the semester hours required for graduation.

**Before the sixth semester begins:** CPH:3050 Third Year Undergraduate Public Health Seminar and CPH:3600 Applied Public Health Methods.

**Before the seventh semester begins:** CPH:3700 Methods for Program Implementation and Evaluation and at least three-quarters of the semester hours required for graduation.

**Before the eighth semester begins:** all public health core courses, except CPH:4999 Public Health Capstone: Practice of Evidence-Based Public Health, and the experiential learning requirement.

**During the eighth semester:** all remaining General Education Requirement courses, enrollment in all remaining coursework in the major, including CPH:4999 Public Health Capstone: Practice of Evidence-Based Public Health, and a sufficient number of semester hours to graduate.

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- j All core courses must be complete prior to enrollment in CPH:4999.
- k Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Public Health, B.S.

The Bachelor of Science (B.S.) degree provides students with a basic understanding of the five core public health knowledge areas: biostatistics, social and behavioral sciences, epidemiology, health policy and management, and occupational and environmental health sciences. Students will be prepared to enter the workforce or continue their education.

A public health core provides the degree with breadth in the biological, social, economic, quantitative, geographic, and educational components of health and health disparities within and across populations. Students complete a cumulative capstone experience during which they will integrate, apply, and synthesize public health knowledge. As an integral part of their education, students also will be exposed to public health professionals and agencies.

## Requirements

The Bachelor of Science with a major in public health requires a minimum of 120 s.h., including at least 62 s.h. of work for the major. Students must have a cumulative g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major; in all college coursework and in all UI coursework; and in all college coursework in public health and in all UI public health coursework, including any courses administered by the College of Public Health in the Departments of Biostatistics, Community and Behavioral Health, Epidemiology, Health Management and Policy, and Occupational and Environmental Health. Students are required to earn a minimum of 30 s.h. in public health coursework at the University of Iowa.

The B.S. with a major in public health requires the following coursework.

## College Success Requirement

All students are required to complete CSI:1600 Success at Iowa during the fall semester; students complete part one before participating in an orientation program. The course is designed to help students successfully transition to college life. The course covers information about online tools that are specific to the University, such as MyUI and Iowa Courses Online (ICON), and also discusses resources for navigating life on campus. Additional content includes financial aid literacy, strategies for making healthy behavior choices, sexual assault awareness and prevention, and the comprehensive transitional survey known as MAP-Works.

## General Education Requirements

Code	Title	Hours
RHET:1030	Rhetoric	4
ENGL:1200	The Interpretation of Literature	3
World Languages		0-10
Natural Sciences		7
Quantitative or Formal Reasoning		3
Social Sciences		3
Historical Perspectives		3
Diversity and Inclusion		3
International and Global Issues		3
Literary, Visual, and Performing Arts		3
Values and Culture		3

## World Languages

Students may complete the world languages requirement using one of the following three options. One year of high school language study is generally equivalent to one semester of college language study.

### Option One

Attain fourth-level proficiency in a single world language, usually by completing four years of that language in high school or four semesters in college or an equivalent combination of high school and college coursework; or pass an achievement test or evaluation at fourth-level proficiency.

### Option Two

Attain second-level proficiency in each of two world languages, usually by completing two years of each language in high school or two semesters of each language in college or an equivalent combination of high school and college coursework; or pass achievement tests and/or evaluations at second-level proficiency in each language. Option two does not fulfill the World Languages requirement for the College of Liberal Arts and Sciences or qualify students to earn credit under the Furthering Language Incentive Program (FLIP).

### Option Three

Attain second-level proficiency in a single world language, usually by completing two years of that language in high school or two semesters of that language in college plus one 3 s.h. course from the GE CLAS Core [p. 20] in International and Global Issues, Values and Culture, or Diversity and Inclusion. Option three does not fulfill the World Languages requirement for the College of Liberal Arts and Sciences or qualify students to earn credit under the Furthering Language Incentive Program (FLIP).

Students may count courses taken to fulfill General Education Requirements toward other requirements for the B.S.

## Prerequisites for Admission to the College

Students who wish to enter the major in public health after declaring the public health interest through the College of Liberal Arts and Sciences must complete the following by the end of the semester in which they apply before they may enter the major:

- completion of at least 12 s.h. at the University of Iowa;
- completion of CPH:1400 Fundamentals of Public Health with a grade of B-minus or higher;
- completion of CPH:1600 Public Health Science: Inquiry and Investigation in Public Health with a grade of B-minus or higher; and
- a cumulative g.p.a. of at least 2.75 in all courses taken at the University of Iowa and in all college-level coursework attempted.

## Public Health Core Courses

Students must complete all of the following (30 s.h.).

Code	Title	Hours
CPH:1050	College of Public Health Direct Admit Seminar	1
CPH:1400	Fundamentals of Public Health	3

CPH:1600	Public Health Science: Inquiry and Investigation in Public Health	3	CPH:2230	Finding Patient Zero: The Exploration of Infectious Disease Transmission and Pandemic Threats	3

## B.S./CLAS Undergraduate Degree

Students admitted to or enrolled in the B.S. in public health program may pursue an additional degree in the College of Liberal Arts and Sciences (CLAS). Students pursuing an additional degree outside the College of Public Health are:

- expected to meet all degree requirements, General Education Requirements, and GE CLAS Core requirements for both degree programs;
- required to satisfy the collegiate residence requirements of both colleges;
- assigned two advisors, one in each college; and
- assessed tuition for the primary program of study in accordance with the rules of the Registrar's Office.

#### Additional considerations:

- Students may be awarded degrees in the two colleges simultaneously or separately without requiring additional coursework beyond the degree requirements.
- Current students enrolled in the College of Public Health who want to add a CLAS major should use the Change of College Application found in MyUI.
- Students who wish to discontinue the additional degree program will need to file a Discontinuation of Combined Degree Program form in the collegiate office of the program of study they are dropping.

Students may change majors with either college in the college academic programs office and still remain in the additional degree program.

## Combined Programs

### B.S./Graduate Degree

Combined undergraduate to graduate programs provide an opportunity for students to earn both their B.S. and a master's degree in five years by beginning to earn graduate credit during their fourth year of undergraduate study.

Students in the combined programs must complete all requirements for each degree. Students apply for admission to the combined program during their third year as undergraduates and enter the program at the beginning of their fourth year.

Applicants also must apply for admission to the master's degree program and must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. For more information, visit Undergrad to Grad (U2G) on the College of Public Health website.

Public health majors intending to pursue the Undergrad to Grad (U2G) combined degree program in public health must complete 120 s.h. Up to 15 s.h. may be earned in graduate credit by the end of a student's fourth year.

Public health majors must complete all of the following requirements in addition to the 15 s.h. of graduate coursework.

### Public Health Major Degree Requirements

- public health core courses
- B.S. coursework
- public health elective coursework
- experiential learning requirement
- General Education Requirement courses

### General Electives

- UI (nonmajor) coursework to total 120 s.h. by end of the fourth year; this could include up to 15 s.h. of

graduate credit in public health coursework taken as an undergraduate student

Graduate courses taken during the fourth year do not count toward major requirements (including public health electives) for the undergraduate public health major. However, these semester hours may count as general elective credits needed to complete the 120 s.h. required for a bachelor's degree.

## Honors

### Honors in the Major

Students majoring in public health have the opportunity to graduate with honors in the major. To graduate with honors in public health, students must successfully complete all college requirements with a g.p.a. of at least 3.33 in all courses for the major, in all college coursework, and in all UI coursework.

In addition, students must complete an honors thesis in CPH:4990 Mentored Independent Undergraduate Research in Public Health, where they must write a brief research proposal summarizing background and goals of honors research, defend their research proposal to a honors project faculty member and a honors advisor, conduct research, submit their honors thesis, and conclude with an oral and/or poster presentation.

Outstanding undergraduate students in the college have an opportunity to undertake independent study and to work closely with faculty members. Completion of requirements for honors in the major also will satisfy the experiential learning requirement. Consult the College of Public Health undergraduate program office for more information.

### University of Iowa Honors Program

Public health interest students interested in honors study are encouraged to participate in the University of Iowa Honors Program until they are admitted to the College of Public Health. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not a requirement for applying to or graduating with honors in the public health major.

## Admission

Admission to the Bachelor of Science program in public health is selective. Students who meet the minimum admission requirements are not guaranteed admission.

Students may be admitted to the College of Public Health either through direct admission or standard admission.

### Direct Admission

Direct admission is designed for students applying to the university as first-year students for the fall semester. Applicants who meet the high school course requirements and present a Regent Admission Index (RAI) of 265 or higher, and a high school g.p.a. of at least 3.33 are directly admitted to the college. Applicants who meet course requirements and either the RAI or grade-point average requirement are carefully considered. Students who are denied direct admission may file an online petition for direct admission to the College of Public Health.

Students granted direct admission to the college are eligible to apply for first-year scholarships. The scholarship application process is competitive and is based on high school record and short essay responses.

First-year students not admitted directly to the College of Public Health may be admitted to the College of Liberal Arts and Sciences as a public health interest student.

Transfer student applications are not being accepted at this time for direct admission to the College of Public Health. Transfer students may apply to the College of Liberal Arts and Sciences public health interest designation.

## Standard Admission

University of Iowa students are eligible to apply for standard admission to the College of Public Health, typically after their first year, once they complete prerequisite courses and earn the required grade-point average.

Application deadline for fall admission is May 1. Application deadline for spring admission is December 1. Students should meet the following requirements by the end of the semester in which they apply:

- completion of at least 12 s.h. at the University of Iowa;
- completion of CPH:1400 Fundamentals of Public Health with a grade of B-minus or higher;
- completion of CPH:1600 Public Health Science: Inquiry and Investigation in Public Health with a grade of B-minus or higher; and
- a minimum g.p.a. of 2.75 in all University of Iowa coursework and in all college coursework.

Students who are denied standard admission may file an online appeal for denial of admission to the College of Public Health if they can provide documentation of extenuating circumstances that affected their academic performance.

## Career Advancement

The B.S. program provides knowledge of the natural sciences for students interested in working in a research setting or preparing for advanced study in programs such as biostatistics, dentistry, environmental health, epidemiology, medicine, nursing, occupational health, pharmacy, or veterinary medicine.

## Academic Plans

### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

The Four-Year Graduation Plan applies only to students who are directly admitted to the College of Public Health or students who meet the prerequisites and submit an application for standard admission before the third semester begins (including public health interest students).

**Before the second semester begins:** CPH:1050 College of Public Health Direct Admit Seminar (for direct admits only).

**Before the third semester begins:** CPH:1400 Fundamentals of Public Health, CPH:1600 Public Health Science: Inquiry and Investigation in Public Health, and

at least one-quarter of the semester hours required for graduation.

**Before the fourth semester begins:** CPH:2050 Second Year Undergraduate Public Health Seminar and CPH:2600 Introduction to Public Health Methods.

**Before the fifth semester begins:** one-half of the semester hours required for graduation.

**Before the sixth semester begins:** CPH:3050 Third Year Undergraduate Public Health Seminar and CPH:3600 Applied Public Health Methods.

**Before the seventh semester begins:** CPH:3700 Methods for Program Implementation and Evaluation and at least three-quarters of the semester hours required for graduation.

**Before the eighth semester begins:** all public health core courses, except CPH:4999 Public Health Capstone: Practice of Evidence-Based Public Health, and the experiential learning requirement.

**During the eighth semester:** all remaining General Education Requirement courses, enrollment in all remaining coursework in the major, including CPH:4999 Public Health Capstone: Practice of Evidence-Based Public Health, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# Public Health, Undergraduate Certificate

For more information about the program, visit Undergraduate Certificate in Public Health on the College of Public Health website.

## Requirements

The undergraduate Certificate in Public Health requires 18 s.h. of credit. Students must maintain a g.p.a. of at least 2.00 in work for the certificate. They should contact the certificate coordinator to complete a plan of study before they begin certificate coursework.

The certificate is intended for non-public health majors and anyone interested in obtaining knowledge about public health concepts to enhance their ability to succeed in their chosen field. Students completing the certificate will have an understanding of emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, and the changing health care system in the United States.

The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a graduate or professional degree program, except for those students who are earning a B.A. or B.S. with a major in public health or by those who have received one of those degrees.

The undergraduate Certificate in Public Health requires the following coursework. Fundamentals of Public Health (CPH:1400) must be taken prior to or concurrent with other certificate courses.

# Master of Public Health, M.P.H.

The Master of Public Health (M.P.H.) is recognized as the primary professional degree in public health. The objective of Iowa's M.P.H. program is to provide education and practical training in public health to students who will be leaders in their respective communities. The program is appropriate for individuals who already have professional experience and/or training in public health as well as for those whose expertise lies outside of public health.

Students may earn the Master of Public Health (M.P.H.) as a single degree, or they may pursue one of several combined degree programs. The College of Public Health offers combined M.P.H./professional degree programs with the Carver College of Medicine and the Colleges of Law and Pharmacy. It also offers two programs in collaboration with the College of Veterinary Medicine at Iowa State University. See "M.P.H./D.V.M. (Iowa State University)" and descriptions of the combined degree programs under Combined Programs [p. 1961] in this section of the Catalog.

Undergraduate students can pursue a M.P.H. degree in the following subprograms: biostatistics, community and behavioral health, epidemiology, occupational and environmental health, or policy. Undergraduate students work with their undergraduate advisor and the College of Public Health Undergrad to Grad (U2G) coordinator to determine eligibility. In addition, the College of Public Health collaborates with Grinnell College, Cornell College, and Coe College to offer bachelor's degrees and Master of Public Health programs for undergraduate students who would like to earn an M.P.H. degree.

The Master of Public Health program is offered by the College of Public Health; the degree is awarded by the Graduate College.

## Requirements

The Master of Public Health requires 42 s.h. of graduate credit. Students must choose one of the following subprograms: biostatistics, community and behavioral health, epidemiology, occupational and environmental health, policy, or practicing veterinarians.

Degree requirements include a core course in public health practice and in each of the five core disciplines of public health (biostatistics, epidemiology, environmental health, health policy and management, and social and behavioral sciences), a set of content-specific required courses and electives, one interprofessional education course, an applied practice experience, and a capstone experience. Students in the epidemiology subprogram must complete a bioscience course.

All M.P.H. students complete the coursework listed under "Common Requirements." In addition, students complete the coursework listed for their chosen subprogram.

## Common Requirements

The following coursework is required for all M.P.H. students. Students must earn a B-minus or higher in each core course. Students may repeat courses to achieve this standard.

## Core Courses

Code	Title	Hours
All of these (18 s.h.):		
CPH:5100	Introduction to Public Health	3
BIOS:4120	Introduction to Biostatistics (students in the quantitative methods subprogram may substitute BIOS:5710)	3
CBH:4105	Introduction to Health Promotion and Disease Prevention	3
EPID:4400	Epidemiology I: Principles	3
HMP:4000	Introduction to the U.S. Health Care System	3
OEH:4240	Global Environmental Health	3

## Interprofessional Education Course

This course is required for all M.P.H. students. Those students in the combined degree programs (M.D./M.P.H., Pharm.D./M.P.H., and D.V.M./M.P.H.) and professional M.P.H. option students (practicing veterinary, practicing medical) will have this requirement waived since the content is covered in pharmacy, medicine, or veterinary courses or professional experience prior to enrollment in the M.P.H. program.

Code	Title	Hours
This course:		
CPH:5203	Interprofessional Education and Practice for M.P.H. Students III	0

## Applied Practice Experience

This requirement is a fieldwork experience in which students show proficiency in applying academic principles in community settings. There are many applied practice opportunities for M.P.H. students locally, nationally, and internationally.

Before they register for and begin the applied practice experience, students choose an approved topic. A final written report with an oral presentation or a poster presentation is required.

Code	Title	Hours

## Biostatistics Subprogram

The Master of Public Health with the biostatistics subprogram requires 42 s.h. of graduate credit. The subprogram is offered by the Department of Biostatistics [p. 1970].

The subprogram is designed to train public health professionals who can provide leadership in the analysis of public health data and the design of studies for public health investigations. It is intended for individuals who are interested

in public health and who have quantitative ability but not advanced mathematics training.

Applicants to the subprogram must meet all M.P.H. admission requirements; see Admission [p. 1962] in this section of the Catalog. They also should have a cumulative g.p.a. of at least 3.00 and should have completed the following math and computer science coursework: single variable calculus and matrix algebra, satisfied by one semester of calculus equivalent to AP Calculus AB and a high school algebra course involving matrices; and elementary computer programming instruction in any commonly used modern programming language (e.g., Python, Java, C++). Individuals who are admitted to the subprogram without having met all of these requirements must satisfy unmet requirements during their first semester of enrollment in the program.

In addition to the M.P.H. coursework listed under "Common Requirements" above, the biostatistics subprogram requires the following courses.

BIOS:5510	Biostatistical Computing (when topic is programming with SAS)	2

Students with sufficient mathematical background can substitute BIOS:5710 Biostatistical Methods I, BIOS:5720 Biostatistical Methods II, and BIOS:5730 Biostatistical Methods in Categorical Data in place of BIOS:4120 Introduction to Biostatistics, BIOS:5120 Regression Modeling and ANOVA in the Health Sciences, and BIOS:5130 Applied Categorical Data Analysis. The advanced sequence requires 2 s.h. of fewer elective credits.

### Biostatistics Electives

Electives (12 s.h.) may be chosen from the following list, and may include any related course approved by the student's advisor.

Code	Title	Hours
BIOL:4213	Bioinformatics	4
BIOS:6210	Applied Survival Analysis	3
BIOS:6310	Introductory Longitudinal Data Analysis	3

## Community and Behavioral Health Subprogram

The Master of Public Health with the community and behavioral health subprogram requires 42 s.h. of graduate credit. The subprogram is offered by the Department of Community and Behavioral Health [p. 1980].

The subprogram prepares public health practitioners for a variety of positions related to community development, health program implementation, and health education. Students learn how to design, implement, and evaluate evidence-based interventions directed toward identified public health problems in populations.

A bachelor's degree in the social and behavioral sciences is good preparation for this program, but students come from a variety of educational backgrounds. Preference is given to applicants who have professional experience.

In addition to the M.P.H. coursework listed under "Common Requirements" above, the community and behavioral health subprogram requires the following courses.

### Community and Behavioral Health Subprogram Core

Students earn 18 s.h. in the required subprogram core.

#### Theory

Code	Title	Hours
This course:		
CBH:5220	Health Behavior and Health Education	3

#### Community and Society

Code	Title	Hours
This course:		
CBH:6230	Health Equity, Disparities, and Social Justice	3

#### Intervention

Code	Title	Hours
One of these:		
CBH:6205	Designing and Implementing Interventions	3
CBH:6220	Health Communication Campaigns	3

#### Methods

Code	Title	Hours
Both of these:		
CBH:5305	Evaluation: Approaches and Applications	3

CBH:6335	Research Methods in Community and Behavioral Health	3
----------	---	---

One of these:

CBH:5235	Community-Based Participatory Research	3
CBH:5310	Qualitative Research for Public Health	3

## Community and Behavioral Health Electives

Students must take an additional 3 s.h. of elective community and behavioral health coursework or, with the approval of their advisor, they can select coursework in another area. In addition, once the 18 s.h. of required community and behavioral health credit is met, students may take any of the other courses as electives.

The following is a list of suggested elective courses.

Code	Title	Hours
CBH:4140	Feminist Activism and Global Health	3
CBH:5350	Foundations of Maternal and Child Health	3
CBH:5435	Substance Abuse Prevention and Early Intervention	3
CBH:5440	Prevention and Early Intervention of Mental Health Disorders	3
CBH:6115	Ethnographic Field Methods	3
CBH:6405	Global Maternal, Newborn, and Child Health	3
CBH:6415	Independent Study in Community and Behavioral Health	arr.
HMP:6360	Nonprofit Organizational Effectiveness I	3
SOC:6420	Seminar: Selected Topics in Deviance and Control	3
URP:6253	Designing Sustainable and Healthy Cities	1-3
URP:6260	Transportation Policy and Planning	3

## Epidemiology Subprogram

The Master of Public Health with the epidemiology subprogram requires 42 s.h. of graduate credit. The subprogram is offered by the Department of Epidemiology [p. 1987].

The subprogram focuses on fundamental epidemiological concepts and methods and provides training in the use of public health data and methods for disease assessment and in methods for evaluating the need and outcome of programs and interventions. Graduates of the program work in public health departments and other health care settings.

Epidemiology subprogram students are required to attend departmental seminars and journal club. They also must present one scientific poster at an international, national, regional, state, university, or departmental poster session.

In addition to the M.P.H. coursework listed under "Common Requirements" above, the epidemiology subprogram requires the following courses.

## Epidemiology Subprogram Core

Code	Title	Hours
All of these (15 s.h.):		
EPID:5241	Statistical Methods in Epidemiology	4
EPID:5925	Epidemiology Journal Club: Evaluating the Literature (taken three times)	0
EPID:5540	Public Health Surveillance Mechanisms, Applications, and Data	3
EPID:5580	Public Health Laboratory Techniques	1
EPID:5600	Introduction to Epidemiology Data Management and Analysis	3
EPID:6400	Epidemiology II: Advanced Methods	4
Bioscience—one of these (3-4 s.h.):		
PATH:5270	Pathogenesis of Major Human Diseases	3
PATH:8133	Introduction to Human Pathology for Graduate Students	3-4

Students who already have completed a course equivalent to one of the bioscience courses, PATH:5270 Pathogenesis of Major Human Diseases or PATH:8133 Introduction to Human Pathology for Graduate Students, may substitute an additional elective.

## Epidemiology Electives

Additional approved elective coursework must be taken to complete the 42 s.h. total required for the M.P.H. At least 3 s.h. of elective credit must be earned in courses offered by the Department of Epidemiology (prefix EPID) or in one of the following biostatistics courses.

Code	Title	Hours
BIOS:6210	Applied Survival Analysis	3
BIOS:6310	Introductory Longitudinal Data Analysis	3

## Other Requirements

### Department of Epidemiology Seminar

Every week during the academic year, the Department of Epidemiology seminar provides a forum for speakers to present information or research pertaining to diverse topics in epidemiology. Contact information for the seminar coordinators is located on the Department of Epidemiology website under Preceptorship, Journal Club, and Seminar Contacts. Information about the schedule is distributed each semester and also is available on the University of Iowa Events Calendar. Students are expected to achieve at least 80 percent attendance at the seminar during each semester of enrollment.

### Journal Club for First-Year Students

Journal Club for first-year students is for those who are new to the department and is offered in the fall semester. The focus is for students to gain experience reading, in interpretation,

and in critically evaluating recently published journal articles. Students should register in EPID:5925 Epidemiology Journal Club: Evaluating the Literature, section 1.

### Journal Club

Every other week during the academic year, the Journal Club meets to discuss articles of interest in the field. Contact information for the Journal Club coordinators can be found on the Department of Epidemiology website under Preceptorship, Journal Club, and Seminar Contacts. Information about the schedule is distributed to students each semester. Students are required to achieve at least 80 percent attendance at Journal Club for three semesters during their time in the program.

## Occupational and Environmental Health Subprogram

The Master of Public Health with the occupational and environmental health subprogram requires 42 s.h. of graduate credit. The subprogram is offered by the Department of Occupational and Environmental Health [p. 2011].

The subprogram provides students with a broad perspective on public health and career preparation for a variety of professional positions in occupational and environmental health. Public health experience provides desirable background for this subprogram.

In addition to the M.P.H. coursework listed under "Common Requirements" above, the occupational and environmental health subprogram requires the following courses.

### Occupational and Environmental Health Subprogram Core

Students earn 13 s.h. in the required subprogram core.

Code	Title	Hours
All of these (4 s.h.):		
OEH:5010	Occupational and Environmental Health Seminar (taken three times; twice for 0 s.h. and once for 1 s.h.)	0-1
OEH:5620	Occupational Health	3
Three of these (9 s.h.):		
OEH:4260	Global Water and Health	3
OEH:4510	Injury and Violence Prevention	3
OEH:5410	Occupational Safety	3
OEH:6110	Rural Health and Agricultural Medicine	3
OEH:6510	Environmental and Occupational Epidemiology	3
OEH:6710	Human Toxicology and Risk Assessment	3

### Occupational and Environmental Health Electives

Students can earn the remainder of credit for their degree in elective courses (8 s.h.) offered by a department in the College of Public Health.

The following is a list of suggested elective courses.

Code	Title	Hours
OEH:4260	Global Water and Health	3
OEH:4310	Occupational Ergonomics: Principles	3
OEH:4510	Injury and Violence Prevention	3
OEH:4530	Global Road Safety	3
OEH:5410	Occupational Safety	3
OEH:6110	Rural Health and Agricultural Medicine	3
OEH:6120	Current Topics in Agriculture and Rural Health	0-1
OEH:6420	Methods in Exposure Science	3
OEH:6431	Assessing Noise Hazards	1
OEH:6432	Assessing Nonionizing Radiation Hazards	1
OEH:6433	Assessing Ionizing Radiation Hazards	1
OEH:6510	Environmental and Occupational Epidemiology	3
OEH:6520	Injury Epidemiology	3
OEH:6710	Human Toxicology and Risk Assessment	3

### Policy Subprogram

The Master of Public Health with the policy subprogram requires 42 s.h. of graduate credit. The subprogram is offered by the Department of Health Management and Policy [p. 2001].

The subprogram offers coursework and applied learning experiences that prepare students for careers in health policy analysis, system and organizational planning, and program evaluation. Graduates of the program find positions in federal, state, and local government; professional associations; and private agencies. Varied academic backgrounds are appropriate preparation for this program, including business, liberal arts and sciences, and the health professions.

In addition to the M.P.H. coursework listed under "Common Requirements" above, the policy and administration subprogram requires the following courses.

### Policy Subprogram Core

Code	Title	Hours
All of these:		
HMP:5610	Health Policy	3
HMP:5650	Health Policy Analysis	3
HMP:6610	Legal Aspects of Healthcare	3
HMP:6750	Seminar in Health Policy	3

### Policy Electives

Code	Title	Hours
At least 9 s.h. chosen from these:		
HMP:5310	Healthcare Quality Management	2-3
HMP:5410	Health Economics I	3
HMP:5450	Health Insurance and Managed Care	3
HMP:5750	Medicare and Medicaid Policy	3

HMP:6710	Federalism and Health Policy	3
LAW:8562	Health Law	3
HMP:6850	Independent Study and Research	arr.
POLI:3100	American State Politics	3

## Practicing Veterinarians Subprogram

The Master of Public Health with the practicing veterinarians subprogram requires a minimum of 42 s.h. of graduate credit. The program is presented through a collaboration between the University of Iowa College of Public Health and the College of Veterinary Medicine at Iowa State University and is offered primarily by distance learning. It enables students to prepare for new career opportunities and equips them to respond to public health challenges such as zoonotic diseases, food security and foodborne illnesses, bioterrorism, and environmental health.

Students participate in two summer institutes, one on each campus during consecutive summers (two weeks in May and June); the rest of the program is internet-based, so students may complete requirements at times that fit their schedules. Specific courses are required each semester of the program.

In addition to the M.P.H. coursework listed under "Common Requirements" above, the practicing veterinarians subprogram requires the following courses.

### Practicing Veterinarians Subprogram Core

Code	Title	Hours
All of these (21 s.h.):		
CPH:6700	Public Health Emergency Preparedness for Veterinarians and Other Public Health Disciplines	3
EPID:5200	Principles of Public Health Informatics	3
EPID:5300	Food Safety	3
EPID:5470	Applied Veterinary Epidemiology/Biostatistics	3
EPID:5550	Diagnostic Microbiology for Epidemiology	3
EPID:5570	Zoonotic Diseases	3
OEH:6110	Rural Health and Agricultural Medicine	3

### Professional M.P.H. Option

Individuals who have already earned a professional degree can choose to complete the professional M.P.H. degree option allowing greater flexibility in elective course selection. Typically, students who pick this option are fellows, medical residents, practicing nurses, or physicians. Completion of the program can enhance physicians ability to receive primary certification from the American Board of Preventive Medicine. Physicians who are considering this certification should review the Become Certified requirements on the American Board of Preventive Medicine website. Students can take core courses on campus or asynchronously online, accommodating a variety of schedules. Students work closely with their advisor to develop a plan of study that is tailored to their specific background and goals.

A typical student completes the M.P.H. in two years. The following is a sample plan based on a full-time student starting in the fall. Students work with their advisor to choose a plan that works best for them.

In addition to the M.P.H. coursework listed under "Common Requirements" above, the professional program requires the following courses.

### Professional Program Core

Students earn 9 s.h. in the required core.

Code	Title	Hours
Both of these:		
OEH:6110	Rural Health and Agricultural Medicine	3
CPH:6700	Public Health Emergency Preparedness for Veterinarians and Other Public Health Disciplines	3
One of these:		
EPID:5500	Introduction to Clinical Epidemiology	3
EPID:6910	Pharmacoepidemiology and Comparative Effectiveness Research	3

### Professional Program Electives

Code	Title	Hours
At least 12 s.h. chosen from these:		
BIOS:5120	Regression Modeling and ANOVA in the Health Sciences	3
BIOS:5130	Applied Categorical Data Analysis	3
CBH:5220	Health Behavior and Health Education	3
CBH:5435	Substance Abuse Prevention and Early Intervention	3
CBH:5440	Prevention and Early Intervention of Mental Health Disorders	3
CBH:6220	Health Communication Campaigns	3
CBH:6230	Health Equity, Disparities, and Social Justice	3
EPID:5200	Principles of Public Health Informatics	3
EPID:5570	Zoonotic Diseases	3
HMP:5610	Health Policy	1-3
HMP:6360	Nonprofit Organizational Effectiveness I	3
HMP:6365	Nonprofit Organizational Effectiveness II	3
OEH:4260	Global Water and Health	3
OEH:4510	Injury and Violence Prevention	3
OEH:5410	Occupational Safety	3
OEH:6510	Environmental and Occupational Epidemiology	3

## Combined Programs

### M.P.H. (Policy Subprogram)/J.D.

The combined Master of Public Health with a policy subprogram/Juris Doctor requires a minimum of 30 s.h. of graduate credit in addition to the requirements for the J.D. degree. A total of 6 s.h. from the J.D. degree will count toward the 42 s.h. required to earn the M.P.H. degree. The program helps students develop special expertise in public health legal issues. It is designed to train qualified students for leadership roles in both the public and private sectors.

Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the combined degree program.

The combined M.P.H. (policy subprogram)/J.D. requires the following coursework.

Code	Title	Hours
HMP:5610	Health Policy	1-3
HMP:5650	Health Policy Analysis	3
HMP:6610	Legal Aspects of Healthcare	3
HMP:6750	Seminar in Health Policy	2-3

These courses count toward both degrees.

Code	Title	Hours
LAW:8467	Family Law	3
LAW:8562	Health Law	3

### M.P.H. Common Requirements

Students must complete courses listed under "Common Requirements" (core courses and practicum) under Master of Public Health Requirements [p. 1956] in this section of the Catalog.

### J.D. Requirements

Students in the combined M.P.H. (policy subprogram)/J.D. degree program must complete the curriculum of the J.D. program; see Juris Doctor, J.D. [p. 1707] (College of Law) in the Catalog. Students must be enrolled in the College of Law to take College of Law courses.

### M.P.H./M.D.

The combined Master of Public Health/Doctor of Medicine requires a minimum of 30 s.h. of graduate credit in addition to the requirements for the M.D. degree. A total of 12 s.h. from the M.D. degree will count toward the 42 s.h. required to earn the M.P.H. degree. Students who complete the program enjoy expanded career opportunities and are well prepared to apply the principles of medicine and public health in their work.

Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the combined program.

The combined M.P.H./M.D. requires the following coursework.

Code	Title	Hours
Both of these:		
OEH:6110	Rural Health and Agricultural Medicine	3
CPH:6700	Public Health Emergency Preparedness for Veterinarians and Other Public Health Disciplines	3

One of these:

EPID:5500	Introduction to Clinical Epidemiology	3
EPID:6910	Pharmacoepidemiology and Comparative Effectiveness Research	3

All of the following courses count toward the M.D. degree; 12 s.h. from these count toward the M.P.H. degree.

Code	Title	Hours
MED:8121	Clinical and Professional Skills I	3
MED:8122	Medicine and Society I	3
MED:8132	Medicine and Society II	4
MED:8222	Medicine and Society III	4

### M.P.H. Common Requirements

Students must complete courses listed as "Common Requirements" (core courses and practicum) under Master of Public Health Requirements [p. 1956] in this section of the Catalog.

### M.D. Requirements

Students in the combined M.P.H./M.D. program must complete the curriculum of the M.D. program; see Doctor of Medicine, M.D. [p. 1752] (Carver College of Medicine) in the Catalog.

### M.P.H./Pharm.D.

The combined Master of Public Health/Doctor of Pharmacy requires 42 s.h. of graduate credit in addition to the requirements of the Pharm.D. degree. The program helps students develop expertise in public health related to pharmacotherapy, health promotion, disease prevention, and medication safety.

Graduates of the program may work in areas of interest common to pharmacy and public health, such as spread and treatment of disease, community health, and immunology; bioterrorism, terrorism, and preparedness; genetics; insurance; managed care; family and juvenile health; and protection of special populations. Employment opportunities are available in hospitals and clinics and with health care providers; private practice; insurance and managed care organizations; local, county, state, and federal government; public health governmental agencies; and colleges and universities.

Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the combined degree program.

The combined M.P.H./Pharm.D. requires the following coursework.

Code	Title	Hours
Both of these:		
CPH:6700	Public Health Emergency Preparedness for Veterinarians and Other Public Health Disciplines	3
OEH:6110	Rural Health and Agricultural Medicine	3
One of these:		
EPID:5500	Introduction to Clinical Epidemiology	3

EPID:6910	Pharmacoepidemiology and Comparative Effectiveness Research	3
-----------	---	---

All of the following courses count toward the Pharm.D. degree; 12 s.h. from these count toward the M.P.H. degree.

Code	Title	Hours
PHAR:8250	Applications of Pharmacy Practice I	1
PHAR:8263	Integrated Pharmacotherapy: Infectious Diseases	4
PHAR:8265	Applications of Pharmacy Practice II	1
PHAR:8374	Applications of Pharmacy Practice III	1
PHAR:8375	Advanced Topics in Health Services	2
PHAR:8377	Integrated Pharmacotherapy: Capstone	4
PHAR:8378	Pharmacy Law and Ethics	2

## M.P.H. Common Requirements

Students must complete courses listed as "Common Requirements" (core courses and practicum) under Master of Public Health Requirements [p. 1956] in this section of the Catalog.

## Pharm.D. Requirements

Students in the combined M.P.H./Pharm.D. program must complete the curriculum of the Pharm.D. program; see Doctor of Pharmacy, Pharm.D. [p. 1925] (College of Pharmacy) in the Catalog. Students must be enrolled in the College of Pharmacy in order to take College of Pharmacy courses.

## M.P.H./D.V.M. (Iowa State University)

The Master of Public Health/Doctor of Veterinary Medicine is offered by the University of Iowa College of Public Health and the College of Veterinary Medicine at Iowa State University. It requires a minimum of 30 s.h. in addition to the requirements for the D.V.M. degree (see College of Veterinary Medicine in the Iowa State University Catalog). A total of 12 s.h. from the D.V.M. degree will count toward the 42 s.h. required to earn the M.P.H. degree. The program prepares students for work as state veterinarians, as college and university faculty members, in local and state departments of public health, in the Public Health Service Commissioned Corps, in state agricultural departments, and for public health positions in the military.

Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the M.P.H./D.V.M. degree program. For M.P.H. admission requirements, see Admission [p. 1962] in this section of the Catalog.

The M.P.H./D.V.M. requires the following coursework.

Code	Title	Hours
All of these:		
EPID:5300	Food Safety	3

EPID:5470	Applied Veterinary Epidemiology/Biostatistics	3
EPID:5570	Zoonotic Diseases	3

## M.P.H. Common Requirements

Students must complete courses listed as "Common Requirements" (core courses and practicum) under Master of Public Health Requirements [p. 1956] in this section of the Catalog.

## M.P.H. Electives

Code	Title	Hours
At least 9 s.h. from these:		
CPH:6700	Public Health Emergency Preparedness for Veterinarians and Other Public Health Disciplines	3
EPID:5200	Principles of Public Health Informatics	3
EPID:5550	Diagnostic Microbiology for Epidemiology (distance education course)	3
OEH:6110	Rural Health and Agricultural Medicine	3

## Admission

Applicants to the M.P.H. program must apply through the Schools of Public Health Application Service (SOPHAS) and then set up a University of Iowa account and pay the UI supplemental fee. For detailed application information, visit Prospective Graduate Students on the Master of Public Health website.

Applicants to the M.P.H. program must have successfully completed one semester each of college algebra and biology.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or another assessment approved by the Graduate College.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Students may enter the M.P.H. program in fall and summer. Application deadline for fall or summer entrance to the M.P.H. program is April 15.

Application deadline for the M.P.H. for practicing veterinarians is March 1.

Application deadline for the Undergrad to Grad (U2G) program is February 1.

Students may enter the M.P.H. combined programs in fall, spring, and summer. Contact the individual combined programs for deadline information.

## Financial Support

A limited number of tuition scholarship awards are available each year for M.P.H. students. For information on financing education through jobs, grants, and loans, contact the University's Office of Student Financial Aid.

## Career Advancement

For more information about careers in public health, visit This is Public Health online.

## Academic Plans

### Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# Public Health, Graduate Certificate

## Requirements

The graduate Certificate in Public Health requires 18 s.h. of credit. Students must complete the certificate's required coursework within five years of entering the program and must maintain a g.p.a. of at least 2.75 in work for the certificate. All certificate courses are offered online at least once a year, and all courses are offered on campus. Students who are only enrolled in the Certificate in Public Health program may not register for courses other than those required for the certificate.

The certificate program is designed to improve public health practice and public health workforce capacity in Iowa and the upper Midwest. It is intended primarily for individuals in public health practice, those in the workforce, and those interested in strengthening their knowledge and skills in basic public health competencies.

The graduate Certificate in Public Health requires the following coursework.

Code	Title	Hours
All of these:		
CPH:5100	Introduction to Public Health	3
BIOS:4120	Introduction to Biostatistics	3
CBH:4105	Introduction to Health Promotion and Disease Prevention	3
EPID:4400	Epidemiology I: Principles	3
HMP:4000	Introduction to the U.S. Health Care System	3
OEH:4240	Global Environmental Health	3

For more information about the program, visit Graduate Certificate in Public Health on the College of Public Health website.

## Admission

Applicants to the certificate program must hold a bachelor's degree and must have a cumulative g.p.a. of at least 2.75. They must submit official transcript(s), a statement of purpose, two reference letters, a résumé, and an online application.

For more information about how to apply, visit the Graduate Certificate in Public Health web page.

# Agricultural Safety and Health

## Head, Department of Occupational and Environmental Health

- Peter S. Thorne

### Director

- Diane Rohlman (Occupational and Environmental Health)

**Graduate certificate:** agricultural safety and health

**Website:** <https://www.public-health.uiowa.edu/certificate-ash/>

The certificate program in agricultural safety and health trains students to detect safety and illness hazards, and treat and prevent farm-related illnesses and injuries. The program is available for students in related health science, environmental science, or occupational health and safety programs who want to supplement other training with agricultural health information.

The certificate may enhance employment opportunities in health care delivery, government, and the private sector.

The Certificate in Agricultural Safety and Health is administered by the Department of Occupational and Environmental Health [p. 2011]. The Graduate College grants the certificate.

<b>Total Hours</b>		<b>12</b>

For more information, visit Graduate Certificate in Agricultural Safety and Health on the College of Public Health website.

## Admission

Admission requirements include:

- a bachelor's degree with a g.p.a. of at least 2.50 from an accredited university or equivalent experience and education,
- a letter of interest that explains the applicant's current position and educational objectives,
- a résumé, and
- completion of the application form.

For more information, and how to apply, visit the Graduate Certificate in Agricultural Safety and Health web page.

# Biostatistics

## Head

- Joseph E. Cavanaugh

**Graduate degrees:** M.S. in biostatistics; Ph.D. in biostatistics

**Graduate certificate:** biostatistics

**Faculty:** <https://www.public-health.uiowa.edu/biostatistics-faculty-list/>

**Website:** <https://www.public-health.uiowa.edu/biostat/>

The Department of Biostatistics prepares students for professional and academic careers in biostatistics. Graduates find positions in pharmaceutical, health care, and research companies and institutions; in universities and government agencies; and as consultants. The department also provides training for non-biostatistics students.

Biostatistics faculty members work closely with both clinical and basic science investigators on the University of Iowa health sciences campus in the design and analysis of research projects. The department has research expertise representing a broad array of methodological areas of statistics and biostatistics, including clinical trials, computational statistics, Bayesian modeling and inference, high-dimensional data analysis, statistical genetics and genomics, bioinformatics, informatics, statistical and machine learning, spatial and spatio-temporal modeling, time series analysis, survival data analysis, longitudinal data analysis, network analysis, causal inference, comparative effectiveness studies, model selection, epidemic modeling, and syndromic surveillance. Many of these areas represent current, cutting-edge areas of disciplinary focus in a rapidly evolving field.

In addition to the M.S. and the Ph.D. degrees in biostatistics, the department offers a subprogram for the Master of Public Health (M.P.H.) degree in biostatistics. See "M.P.H. Subprogram" below.

## M.P.H. Subprogram

The Department of Biostatistics offers the biostatistics subprogram for the Master of Public Health degree. The subprogram is designed to train public health professionals for leadership in the analysis of public health data and the design of studies for public health investigations. See the Master of Public Health, M.P.H. [p. 1956] in the Catalog.

## Programs

### Graduate Programs of Study

#### Majors

- Biostatistics subprogram for the Master of Public Health [p. 1956] degree
- Master of Science in Biostatistics [p. 1973]
- Doctor of Philosophy in Biostatistics [p. 1976]

#### Certificate

- Certificate in Biostatistics [p. 1979]

## Facilities

Department of Biostatistics resources and activities include three centers. The Biostatistics Consulting Center provides opportunities for students to gain valuable experience working with faculty and staff in the health sciences at the

University of Iowa. The Clinical Trials Statistical and Data Management Center serves the statistical design, data management, and analysis needs of a variety of multicenter clinical trials, and among those are Acute to Chronic Pain Signatures (A2CPS) Consortium, Network of Excellence in Neuroscience Clinical Trials (NeuroNEXT), and the Parkinson's Progression Markers Initiative (PPMI). The Center for Public Health Statistics facilitates the collection, analysis, and dissemination of health data in support of the research, teaching, and service missions of the College of Public Health. This includes collaborative relationships in the area of public health statistics including data management and statistical analysis services.

## Courses

### Biostatistics Courses

#### **BIOS:4110 General Biostatistics** 3 s.h.

Biostatistics and biostatistical computation; biostatistical aspects of health-related problems; clinical trials; statistical issues in big data problems; disease modeling; disease mapping; genetics and epidemiology; brief introduction to survival and longitudinal analyses.

#### **BIOS:4120 Introduction to Biostatistics** 3 s.h.

Application of statistical techniques to biological data including descriptive statistics, probability and distributions, sampling distributions, nonparametric methods, hypothesis tests, confidence intervals, analysis of categorical data, and simple linear regression; designed for non-biostatistics majors and M.P.H. students. Requirements: college algebra or ALEKS score of 65% or higher.

#### **BIOS:5120 Regression Modeling and ANOVA in the Health Sciences** 3 s.h.

Continuation of BIOS:4120; correlation, simple and multiple linear regression, confounding, interactions, model selection, single and multiple factor ANOVA (analysis of variance) models, contrasts, multiple comparisons, nested and block designs, and an introduction to mixed models; designed for non-biostatistics majors. Offered spring semesters and summer sessions. Prerequisites: BIOS:4120. Same as IGPI:5120, STAT:5610.

#### **BIOS:5130 Applied Categorical Data Analysis** 3 s.h.

Analysis of proportions, risk measures, and measures of association; Mantel-Haenszel method; logistic regression for binary responses and for matched data; logistic regression for multi-category responses; analysis of count data (Poisson regression and negative binomial regression); analysis of clustered data (generalized estimating equations and generalized linear mixed effects model); special topics include the application of propensity score methods; designed for non-biostatistics majors. Offered fall semesters. Prerequisites: BIOS:5120. Same as IGPI:5130.

#### **BIOS:5310 Research Data Management** 3 s.h.

Introduction to data management techniques and problems encountered in gathering and processing data from biomedical investigations; introduction to SAS, techniques taught in SAS; designed for non-biostatistics majors. Offered fall and spring semesters. Recommendations: prior programming experience with C, C++, Python, Java, or other. Same as IGPI:5310, STAT:5810.

- BIOS:5510 Biostatistical Computing** 2 s.h.  
Introduction to computer programming using SAS and R statistical software packages; programming language syntax, constructs, procedures, and techniques for data management, data analysis, and statistical programming commonly encountered in biostatistics; designed for first-year biostatistics majors. Offered fall semesters. Corequisites: BIOS:5710. Same as IGPI:5510.
- BIOS:5710 Biostatistical Methods I** 4 s.h.  
Probability distributions, moments, estimation, parametric and nonparametric inference for one-sample and two-sample problems, analysis of frequency data; emphasis on use of computers; designed for first-year biostatistics majors. Offered fall semesters. Requirements: two semesters of calculus. Same as IGPI:5710.
- BIOS:5720 Biostatistical Methods II** 4 s.h.  
Continuation of BIOS:5710; multi-factor ANOVA (analysis of variance), multiple comparisons, orthogonal contrasts, linear regression and correlation, regression diagnostics and remedial measures, model selection, and mixed models; designed for first-year biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5710. Requirements: one semester of linear algebra. Same as IGPI:5720.
- BIOS:5730 Biostatistical Methods in Categorical Data** 3 s.h.  
Estimation of proportions, rates, risks, relative risks, and odds ratios; Mantel-Haenszel method; logistic regression (including ordinal logistic regression and multi-category nominal logistic regression); Poisson regression and negative binomial regression; methods for correlated or clustered data (conditional logistic regression, generalized estimating equations, and mixed effects models); special topics include an introduction to generalized linear models and likelihood-based inferential techniques in this framework; designed for first-year biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5510 and BIOS:5710. Corequisites: BIOS:5720. Same as IGPI:5730.
- BIOS:6210 Applied Survival Analysis** 3 s.h.  
Nonparametric, parametric, and semi-parametric methods for time-to-event data; types of censoring; Kaplan-Meier estimation; Cox proportional hazards models, including methods for assessing adequacy of the proportional hazards assumption; time varying covariates; sample size calculations for comparison of two or more groups; focus on analysis of real data sets and examples using statistical software. Offered spring semesters. Prerequisites: BIOS:5120 or BIOS:5720. Same as IGPI:6210.
- BIOS:6310 Introductory Longitudinal Data Analysis** 3 s.h.  
Introduction to statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; focus on applications and computer software methods for ANOVA based methods, hierarchical linear models, linear mixed models, correlated regression models, generalized estimating equations, and generalized linear mixed models. Offered fall semesters. Prerequisites: BIOS:5120 or STAT:3200. Same as IGPI:6310, STAT:6550.
- BIOS:6420 Survey Design and Analysis** 3 s.h.  
Methodological issues regarding design, sampling approach, implementation, analysis, and interpretation of surveys and questionnaires in public health research. Offered spring semesters of even years. Prerequisites: EPID:4400 and BIOS:5120. Same as EPID:6420.
- BIOS:6610 Statistical Methods in Clinical Trials** 3 s.h.  
Survey of statistical methods commonly used in clinical trials; primary focus on methodologic perspective for the design, conduct, analysis, and interpretation of all phases of clinical trials; logistical and operational aspects of conducting multisite clinical trials; designed for biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5720. Requirements: familiarity with SAS and R programming. Same as IGPI:6610.
- BIOS:6650 Causal Inference** 3 s.h.  
Concepts of causal inference, counterfactuals, confounding, causal graphs, internal/external validity, and heterogeneity of treatment effect; methods include propensity score matching (i.e., optimal pair, multiple control and full matching; near-exact, fine-balance, risk set matching) and stratification; covariate balance checks; sensitivity analysis; inverse probability of treatment weighted estimation; doubly robust estimators; mediation analysis; marginal structural models. Prerequisites: BIOS:5720 and BIOS:5730 and ((STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101)). Same as IGPI:6650.
- BIOS:6720 Statistical Machine Learning for Biomedical and Public Health Data** 3 s.h.  
Statistical machine learning techniques for analysis of biomedical and public health data; methodology and application of unsupervised learning, supervised learning for regression and classification, ensemble learning, model assessment, feature selection, and high-dimensional inference. Prerequisites: BIOS:5510 and BIOS:5720 and (STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101). Requirements: BIOS:5510 with topic of programming with R.
- BIOS:6810 Bayesian Methods and Design** 3 s.h.  
Theory and application of Bayesian methods in biomedical research; foundations of Bayesian statistics including decision theory, study design, model development, inference and implementation of computational algorithms; designed for biostatistics majors. Offered fall semesters of even years. Prerequisites: BIOS:5510 and BIOS:5720 and BIOS:5730 and STAT:4100 and STAT:4101.
- BIOS:7110 Likelihood Theory and Extensions** 4 s.h.  
Theoretical foundations of inferential methods based on likelihood and its extensions (e.g., profile, conditional, partial, marginal, pseudo likelihood). Prerequisites: (BIOS:5720 and STAT:5100 and STAT:5101) or (STAT:4100 and STAT:4101).
- BIOS:7120 Advanced Topics in Biostatistics** 4 s.h.  
Classical likelihood-based inference, numerical optimization, model and data deficiencies, expectation-maximization (EM) algorithm, M-estimation, nonparametrics and marginal likelihood, and the bootstrap. Prerequisites: BIOS:7110.
- BIOS:7210 Survival Data Analysis** 3 s.h.  
Types of censoring and truncation; survival function estimation; parametric inference using exponential, Weibull, and accelerated failure time models; nonparametric tests; sample size calculation; Cox regression with stratification and time-dependent covariates; regression diagnostics; competing risks; topics may include analysis of correlated survival data and/or recurrent events; designed for biostatistics and statistics majors. Offered fall semesters of odd years. Prerequisites: BIOS:5720 and ((STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101)). Same as IGPI:7210, STAT:7570.

- BIOS:7230 Advanced Clinical Trials** 3 s.h.  
Modules that address advanced topics and issues encountered when conducting a clinical trial; discussions of recent publications and FDA guidance documents dealing with current topics in clinical trials. Prerequisites: (STAT:4101 or STAT:5101) and BIOS:6610. Requirements: familiarity with SAS and R programming.
- BIOS:7240 High-Dimensional Data Analysis** 3 s.h.  
Analysis of high-dimensional data with emphasis on use of penalized regression models such as lasso, elastic net, minimax concave penalty (MCP), smoothly clipped absolute deviation (SCAD), and group lasso; large-scale hypothesis testing and false discovery rate estimation; inference for penalized likelihoods. Prerequisites: (STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101) and BIOS:5510 and BIOS:5720. Requirements: BIOS:5510 with section subtitle of programming with R.
- BIOS:7250 Theory of Linear and Generalized Linear Models** 4 s.h.  
Theoretical foundations of traditional linear models and generalized linear models; emphasis on modeling structures, estimability and identifiability, estimation and testing. Prerequisites: STAT:5100 and STAT:5101 and BIOS:5720.
- BIOS:7270 Scholarly Integrity in Biostatistics** 1 s.h.  
Responsible conduct of research training; emphasis on issues of particular relevance to biostatisticians including authorship, communication, student/mentor relationships, plagiarism, fabrication and falsification of data, bias, Type I/II errors, reproducible research, data confidentiality and security, conflicts of interest, and human/animal subjects. Requirements: graduate standing in biostatistics.
- BIOS:7310 Longitudinal Data Analysis** 3 s.h.  
Statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; includes ANOVA based methods, hierarchical linear models, linear mixed models, error structures, generalized estimating equations, and generalized linear mixed models; may include Bayesian approaches; designed for biostatistics and statistics majors. Offered spring semesters of odd years. Prerequisites: (BIOS:5720 and STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101). Same as IGPI:7310.
- BIOS:7330 Advanced Biostatistical Computing** 3 s.h.  
Advanced topics in biostatistical computing and large or complicated data/models; matrix decomposition, optimization, Bayesian computing, parallel programming, working with campus high performance computing (HPC) resources; topics are explored in R, including package development and efficient R code. Prerequisites: MATH:2700 and BIOS:5510 and STAT:4101. Requirements: BIOS:5510 with section subtitle of programming with R.
- BIOS:7410 Analysis of Categorical Data** 3 s.h.  
Models for discrete data, distribution theory, maximum likelihood and weighted least squares estimation for categorical data, tests of fit, models selection. Offered spring semesters. Prerequisites: (BIOS:5720 or STAT:5200) and (STAT:5101 or STAT:4101). Same as STAT:7510.
- BIOS:7500 Preceptorship in Biostatistics** arr.  
Work experience using knowledge and skill acquired in classroom; arranged in conjunction with ongoing departmental or collegiate activities or with governmental agencies or private industry; preparation of prospectus and presentation of research results in a department seminar.
- BIOS:7600 Advanced Biostatistics Seminar** 0-3 s.h.  
Current topics; supervised experience in reading and interpreting biostatistical literature. Same as IGPI:7600.
- BIOS:7604 Scholarly Integrity in Biostatistics for Postdocs** 0 s.h.  
Responsible conduct of research training; emphasis on issues of particular relevance to biostatisticians and statisticians including authorship, communication, student/mentor relationships, plagiarism, fabrication and falsification of data, bias, Type I/II errors, reproducible research, data confidentiality and security, conflicts of interest, human/animal subjects. Requirements: postdoctoral research scholar/fellow standing in biostatistics or statistics.
- BIOS:7700 Problems/Special Topics in Biostatistics** arr.  
Didactic material in biostatistics; may include tutorials, seminars, faculty-directed independent work (e.g. literature search, project, short research project).
- BIOS:7800 Independent Study in Biostatistics** arr.  
In-depth pursuit of an area of special interest in biostatistics requiring substantial creativity and independence.
- BIOS:7850 Research in Biostatistics** arr.  
Research that may lead to a dissertation.
- BIOS:7900 Thesis/Dissertation** arr.

# Biostatistics, M.S.

## Requirements

The Master of Science program in biostatistics requires a minimum of 38 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. of coursework may be dismissed from the program.

The program provides training in the design of experiments and in analysis of data related to biomedical or public health problems. It emphasizes mathematical, statistical, and computer methods for dealing with quantitative information and provides opportunities for students to gain statistical consulting experience with a variety of problems.

M.S. students are required to complete an in-depth preceptorship under the direction of a departmental faculty member and a final comprehensive-style examination.

The M.S. with a major in biostatistics requires the following coursework.

## Core Courses

Code	Title	Hours
All of these:		
BIOS:5510	Biostatistical Computing (taken twice for 2 s.h. each; topics should be programming with R and programming with SAS)	4
BIOS:5710 & BIOS:5720	Biostatistical Methods I-II	8
BIOS:5730	Biostatistical Methods in Categorical Data	3
BIOS:6610	Statistical Methods in Clinical Trials	3
BIOS:7500	Preceptorship in Biostatistics	3

## Admission

Applicants to the M.S. program in biostatistics must apply through the Schools of Public Health Application Service (SOPHAS). After the SOPHAS application is verified, the applicant pays a supplemental Graduate College admission fee to the University of Iowa Office of Admissions. For detailed application information, visit Requirements and How to Apply to Biostatistics on the Department of Biostatistics website.

The biostatistics faculty considers several factors when evaluating applications for admission, including Graduate Record Examination (GRE) General Test scores, grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests.

All applicants must hold a bachelor's degree, have a cumulative g.p.a. of at least 3.00, and have taken the Graduate Record Examination (GRE) General Test. Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). They must score at least 100 (internet-based) on the TOEFL. Applicants with lower scores are not considered for admission. In place of TOEFL scores, the department accepts IELTS scores of 7.0 or higher, with no subscore below 6.0, and the Duolingo English Test (DET) with a score of at least 105.

All biostatistics applicants are required to have strong written and oral communication skills.

All applicants must be competent in at least one computer programming language. They also must have mathematical sciences training in methods and techniques of single variable and multivariable differential and integral calculus, and in linear algebra. Previous coursework or experience in statistical methods or data analysis is preferred.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Students may enter in the fall; the priority application deadline is December 1.

## Financial Support

A limited number of teaching and research assistantships are available. Assistantships offer financial support and tuition assessed at the resident tuition rate along with a tuition scholarship. They also provide valuable on-the-job training experience.

For information on financing education through jobs, grants, and loans, contact the University's Office of Student Financial Aid.

## Career Advancement

Graduates find career opportunities in many areas, including pharmaceuticals, health care, research companies and institutions, consulting firms, universities, and government agencies.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# Biostatistics, Ph.D.

## Requirements

The Doctor of Philosophy program in biostatistics requires a minimum of 79 s.h. of graduate credit, including credit from a master's degree. Students must maintain a cumulative g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. of coursework may be dismissed from the program.

All students must successfully complete a comprehensive examination and a dissertation. The research topic and content, which vary depending on the program of study, must be approved by a student's dissertation committee. Other degree requirements include approved electives chosen from Department of Biostatistics and other University of Iowa courses.

The Ph.D. with a major in biostatistics requires the following work.

## Master of Science Background

Ph.D. students must take the following courses required for the Master of Science in biostatistics. Students who have completed equivalent coursework at other institutions may request waivers and/or transfers of credit. Students who earned a Master of Science with a major in biostatistics at the University of Iowa automatically receive credit for these courses.

With approval of their advisor, students choose 16-23 s.h. of courses according to their interest in biostatistics, statistics, genetics, computing, public health, or in other areas. No more than 5 s.h. in nonquantitative courses (e.g., epidemiology, environmental health) may count toward the electives requirement. Courses required for the M.S. degree that are not listed above also may be used to satisfy the electives requirement, although BIOS:7800 Independent Study in Biostatistics does not generally count as an elective. At least 6 s.h. of elective coursework must be taken with grades awarded.

These courses are recommended, but other coursework may be selected; students should consult their advisor.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biostatistics in a combined degree program offered by the Carver College of Medicine and the College of Public Health. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

### Admission

Applicants to the Ph.D. program in biostatistics must apply through the Schools of Public Health Application Service (SOPHAS). After the SOPHAS application is verified, the applicant pays a supplemental Graduate College admission fee to the University of Iowa Office of Admissions. For detailed application information, visit Requirements and How to Apply to Biostatistics on the Department of Biostatistics website.

The biostatistics faculty considers several factors when evaluating applications for admission, including Graduate Record Examination (GRE) General Test scores, grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests.

All applicants must hold a bachelor's degree, have a cumulative g.p.a. of at least 3.00, and have taken the Graduate Record Examination (GRE) General Test. Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). They must score at least 100 (internet-based) on the TOEFL. Applicants with lower scores are not considered for admission. In place of TOEFL scores, the department accepts IELTS scores of 7.0 or higher, with no subscore below 6.0, and the Duolingo English Test (DET) with a score of at least 105.

All biostatistics applicants are required to have strong written and oral communication skills.

Completion of an M.S. program in statistics or biostatistics generally is required for admission to the Ph.D. program.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Ph.D. application deadlines are posted on the Department of Biostatistics website. The priority application deadline is December 1. Visit Requirements and How to Apply to Biostatistics on the department's website.

### Financial Support

A limited number of teaching and research assistantships are available. Assistantships offer financial support and tuition assessed at the resident tuition rate along with a tuition scholarship. They also provide valuable on-the-job training experience.

For information on financing education through jobs, grants, and loans, contact the University's Office of Student Financial Aid.

## Career Advancement

The program prepares students for professional and academic careers in biostatistics, especially for positions that emphasize developing and applying statistical methodology to solve important biological and public health problems.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# Biostatistics, Graduate Certificate

for admission. Visit the Certificate in Biostatistics on the department's website for an application form.

## Requirements

The graduate Certificate in Biostatistics requires a minimum of 15 s.h. of graduate credit. Students must earn a grade of at least B-minus in each certificate course and must maintain a cumulative g.p.a. of at least 3.00 in order to earn the certificate. The certificate is designed for students who would like to add a formal biostatistics emphasis to their graduate programs.

The program is open to students enrolled in a University of Iowa graduate degree program outside the Department of Biostatistics. It is also open to individuals who hold graduate degrees in science disciplines or professional degrees in the health sciences and are admitted to the Graduate College as nondegree students.

The certificate requires two core courses (6 s.h.) and three electives (9 s.h.). Students should work with an advisor to plan their coursework carefully, since some certificate courses have prerequisites, require permission for enrollment, or are not offered every year. They must complete at least 6 s.h. of the required coursework after being admitted to the certificate program, and they may count a maximum of 6 s.h. of certificate credit toward a degree or another certificate earned at the University. At least 6 s.h. of the certificate plan of study must be exclusively applied to the certificate.

The Certificate in Biostatistics requires the following coursework.

## Core Courses

BIOS:6310/ STAT:6550	Introductory Longitudinal Data Analysis	3
BIOS:6420	Survey Design and Analysis	3

Other courses may be approved as electives by the Department of Biostatistics director of graduate studies. Contact the Department of Biostatistics for more information.

## Admission

Enrollment is limited; applicants who have completed at least one of the certificate's required courses and whose research will be advanced by biostatistics training are given priority

# Community and Behavioral Health

## Head

- Mark W. Vander Weg

**Graduate degree:** Ph.D. in community and behavioral health

**Faculty:** <https://www.public-health.uiowa.edu/cbh-faculty-list/>

**Website:** <https://www.public-health.uiowa.edu/cbh/>

The Department of Community and Behavioral Health examines the relationship between human behavior and community health and focuses on creating effective strategies for change. Community and behavioral health students learn how to design, implement, and evaluate interventions directed toward identified public health problems in communities.

The Department of Community and Behavioral Health advances teaching, research, and practice in four strategic areas: rural health; community engagement and participatory approaches; theory-based culturally informed intervention development, implementation, and evaluation; and social justice, health equity, and health disparities.

Department faculty members come from a variety of disciplines within the social and health sciences, drawn together by an interest in health behavior and promoting healthy communities.

In addition to the Ph.D. degree in community and behavioral health, the department offers a subprogram for the Master of Public Health (M.P.H.) degree. see "M.P.H. Subprogram" below.

## M.P.H. Subprogram

The Department of Community and Behavioral Health offers a subprogram for the Master of Public Health degree.

The M.P.H. subprogram in community and behavioral health prepares public health practitioners for a variety of positions related to intervention development, implementation, and evaluation using community participatory approaches with a focus on decreasing health disparities and inequities.

For detailed information about the M.P.H. degree, see the Master of Public Health, M.P.H. [p. 1956] in the Catalog.

## Programs

### Graduate Programs of Study

#### Majors

- Community and behavioral health subprogram for the Master of Public Health [p. 1956] degree
- Doctor of Philosophy in Community and Behavioral Health [p. 1982]

## Facilities

The department houses two centers. The Prevention Research Center for Rural Health focuses on improving the health of rural Iowans. The National American Indian and Alaska Native Addiction Technology Transfer Center disseminates culturally legitimate evidence-based practice in substance abuse and behavioral health, and provides technical assistance, training,

and systems change assistance to urban as well as tribal providers across the country.

Graduate students may have opportunities to work with ongoing research projects in the centers.

## Courses

### Community and Behavioral Health Courses

#### CBH:3102 Medical Anthropology 3 s.h.

Major theoretical, methodological approaches; international health and development; biomedicine as a cultural system; ethnomedicine; anthropology and AIDS, human reproduction, epidemiology, ethnopsychiatry. Prerequisites: ANTH:1101 or ANTH:2100 or ANTH:2164 or GHS:2000. Same as ANTH:3102, GHS:3102.

#### CBH:3150 Media and Health 3 s.h.

Potential and limits of mass media's ability to educate the public about health; research and theory on the influence of information and entertainment media; theories, models, assumptions of mass communication in relation to public health issues. Same as GHS:3150, JMC:3150.

#### CBH:4105 Introduction to Health Promotion and Disease Prevention 3 s.h.

Basic concepts, strategies, and methods of health promotion and disease prevention; health promotion in the context of public health, theories and principles that underpin health promotion; overview of policy formation and health promotion planning, implementation, evaluation.

#### CBH:4140 Feminist Activism and Global Health 3 s.h.

How female gender intersects with culture, environment, and political economy to shape health and illness; reproductive health, violence, drug use, cancer; readings in anthropology, public health. Prerequisites: ANTH:1101 or GWSS:1001 or CPH:1400 or GHS:2000. Same as ANTH:4140, GHS:4140, GWSS:4140.

#### CBH:4350 Maternal and Child Health Seminar 1 s.h.

Historical and applied perspective on maternal and child health problems and programs aimed at reducing morbidity, mortality, and health disparities across the life span. Same as EPID:4350.

#### CBH:5220 Health Behavior and Health Education 3 s.h.

Common theories of health behavior and health education and their application to varied public health problems and settings.

#### CBH:5230 Public Health Issues in Overweight Management 3 s.h.

Overview of overweight and obesity from a public health perspective, including epidemiology, measurement issues, and intervention approaches at individual, community, and policy levels. Prerequisites: CPH:5100 or CBH:4105.

#### CBH:5235 Community-Based Participatory Research 3 s.h.

How community-based participatory research (CBPR) has emerged as a critical approach to conduct research and produce scholarship; opportunities, challenges, needed skills, and methods by which researchers and community members partner to conduct research that leads to community well-being and health; students share their experiences, explore, and learn through case studies, guest lectures, and interactive activities; application of research methods through a CBPR approach.

**CBH:5305 Evaluation: Approaches and Applications****3 s.h.**

Focus on program evaluation methods for use in public health and related educational and social service programs; exploration of methods and approaches, as well as planning strategies for conducting program evaluations; exposure to all components of evaluation from planning to dissemination of findings. Prerequisites: CBH:5220 and BIOS:4120 and EPID:4400. Requirements: enrollment in College of Public Health.

**CBH:5310 Qualitative Research for Public Health****3 s.h.**

Introduction to methods and theories of qualitative research that facilitate description and explanation of social phenomena related to health behavior, illness, prevention, and treatment in the public health domain.

**CBH:5350 Foundations of Maternal and Child Health****3 s.h.**

Life course approach to understanding determinants, mechanisms, and systems that promote and maintain health, safety, and well-being of mothers and their children. Prerequisites: EPID:4350. Same as EPID:5350.

**CBH:5435 Substance Abuse Prevention and Early Intervention****3 s.h.**

Prevalence and characteristics of several substance use disorders and the impact of such disorders on the individual, the community, and public health workers; how prevalence of substance use disorders varies among different ethnic and cultural groups, between men and women, across the life span, and through different socio-economic levels; how outcomes of substance abuse disorders vary at both the individual and community level as a function of these factors.

**CBH:5440 Prevention and Early Intervention of Mental Health Disorders****3 s.h.**

Prevalence and characteristics of mental health disorders; differences between ethnicity and culture, gender, age, and socioeconomic background; primary and secondary prevention; assessment and tertiary treatment approaches to mental health disorders.

**CBH:6115 Ethnographic Field Methods****3 s.h.**

Basic data-gathering techniques for field research in sociocultural anthropology. Same as ANTH:6115.

**CBH:6205 Designing and Implementing Interventions****3 s.h.**

Theoretical foundations, phases, and skills necessary to plan, design, and implement a public health intervention program; techniques and strategies for designing and implementing public health interventions; emphasis on community engagement; evidence-based, culturally and contextually situated methods and skills to plan, design, and implement public health intervention program; analysis of case studies, individual and small group work on assignments and development of a data-driven program. Prerequisites: CBH:5220. Requirements: admission to College of Public Health.

**CBH:6220 Health Communication Campaigns****3 s.h.**

Intervention design and analysis of health campaigns; theory, practice, methods; mass media, community, organization, and interpersonal approaches. Same as COMM:6220.

**CBH:6230 Health Equity, Disparities, and Social Justice****3 s.h.**

Introduction to the concept of health equity and an overview of U.S. health disparities; students gain a better understanding of research and interventions through readings, lectures, reflection papers, in-class exercises, and research assignments. Same as EPID:6075.

**CBH:6335 Research Methods in Community and Behavioral Health****3 s.h.**

Overview of quantitative and qualitative research methods for community and behavioral health; major elements of behavioral and social science research, critical evaluation of research related to community and behavioral health, application of research methods in public health practice; opportunities for students to build skills for evaluation of research and application of quantitative and qualitative research methods.

**CBH:6405 Global Maternal, Newborn, and Child Health****3 s.h.**

Overview of global demographic trends in maternal, newborn, and child health; focus on low- and middle-income countries as well as programs, interventions, and policies that have successfully improved the health of women and children around the globe.

**CBH:6410 Special Topics****arr.**

Didactic material in community and behavioral health that may include tutorial, seminar, or faculty-directed independent work (e.g., literature search, project, short research project).

**CBH:6415 Independent Study in Community and Behavioral Health****arr.**

Pursuit of an interest in community and behavioral health requiring substantial creativity and independence.

**CBH:7100 Community and Behavioral Health Doctoral Seminar****1 s.h.**

Introduction to the Department of Community and Behavioral Health; essential skills for success in academia, individual faculty member's work, and doctoral program requirements; for incoming Ph.D. students.

**CBH:7200 Advanced Intervention Research****3 s.h.**

Intervention research development and implementation including conceptualization, design, development of research team and intervention approaches, statistical power, and research ethics. Prerequisites: CBH:6205.

**CBH:7300 Advanced Behavioral Theories****3 s.h.**

Seminar on behavioral theory in public health; builds on student's previous training in theory with an emphasis on applications to guide research and thereby ensuring skills necessary to function as an independent scientist; examination of general principles of behavioral theory and several behavioral theories at different ecological levels; current state of theory development (i.e., gaps, future directions for research); emphasis on critical analysis and application of theory; students gain a better understanding of the role of behavioral theory in population health research. Prerequisites: CBH:5220. Requirements: doctoral standing.

**CBH:7505 CBH Thesis/Dissertation****arr.**

Work on M.S. thesis or Ph.D. dissertation in community and behavioral health, with thesis/dissertation advisor.

# Community and Behavioral Health, Ph.D.

## Learning Outcomes

Graduates of the Doctor of Philosophy program in community and behavioral health will be able to:

- apply social and behavioral science theories in public health research;
- produce effective scientific writing;
- demonstrate grant-writing skills;
- participate in interdisciplinary research;
- communicate research findings to various audiences, including policy makers and community members;
- design a research study that incorporates knowledge of pertinent cultural, social, behavioral, and biological factors;
- design a theory-informed, community-based intervention research project;
- design an implementation and evaluation plan for a theory-informed, community-based intervention;
- formulate focused research questions to address gaps in community and behavioral health knowledge;
- evaluate social and behavioral science research design, methodology, and analysis related to public health; and
- evaluate how structural bias, social inequities, and racism undermine health and create challenges to achieving health equity at organizational, community, and societal levels.

## Requirements

The Ph.D. program in community and behavioral health requires at least 75 s.h. of graduate credit, including approved credit earned from a master's degree. Students must maintain a cumulative g.p.a. of at least 3.00.

Students must successfully complete a qualifying exam, a comprehensive exam, and a dissertation. The research topic must be approved by a student's dissertation committee.

During the first semester, students work with their academic advisor to develop a plan of study that satisfies their interests and professional goals as well as the program's requirements.

## College of Public Health Core

Students complete the following (13 s.h.).

Code	Title	Hours
CBH:4105	Introduction to Health Promotion and Disease Prevention	3
CBH:7100	Community and Behavioral Health Doctoral Seminar	1
BIOS:4120	Introduction to Biostatistics	3
CPH:6100	Essentials of Public Health	2
CPH:7270	Principles of Scholarly Integrity: Public Health	1
EPID:4400	Epidemiology I: Principles	3

## Behavioral and Social Sciences Core

Students complete the following (21 s.h.).

Code	Title	Hours
All of these:		
CBH:5220	Health Behavior and Health Education	3
CBH:5235	Community-Based Participatory Research	3
CBH:6205	Designing and Implementing Interventions	3
CBH:6220	Health Communication Campaigns	3
CBH:6230	Health Equity, Disparities, and Social Justice	3
CBH:7200	Advanced Intervention Research	3
CBH:7300	Advanced Behavioral Theories	3

## Research Methods Core

Students complete the following (15 s.h.).

Code	Title	Hours
Both of these:		
CBH:5305	Evaluation: Approaches and Applications	3
CBH:5310	Qualitative Research for Public Health	3
9 s.h. from these:

CBH:6335	Research Methods in Community and Behavioral Health	3
BIOS:5120	Regression Modeling and ANOVA in the Health Sciences	3
BIOS:5130	Applied Categorical Data Analysis	3
EPLS:6209	Survey Research and Design	3
EPLS:6370	Quantitative Methods for Policy Analysis	3
HMP:7940	Primary Data and Mixed Methods	3
PSQF:6243	Intermediate Statistical Methods	3
PSQF:6244	Correlation and Regression	4
PSQF:6249	Factor Analysis and Structural Equation Models	3
PSQF:6252	Introduction to Multivariate Statistical Methods	3
PSQF:7375	Topics in Educational Measurement and Statistics	1-3
SOC:5160	Research Design and Methods	3
SOC:6170	Introduction to Sociological Data Analysis	3
SOC:6180	Linear Models in Sociological Research	3

SOC:7170	Advanced Statistical Modeling of Data	3
SOC:7180	Structural Equation Modeling	3

## Content Area Electives

Students complete 14 s.h. of elective coursework in consultation with their advisor. The following is a list of suggested coursework; however, other courses may be approved with consent of the advisor.

Code	Title	Hours
CBH:4140	Feminist Activism and Global Health	3
CBH:5230	Public Health Issues in Overweight Management	3
CBH:5350	Foundations of Maternal and Child Health	3
CBH:5435	Substance Abuse Prevention and Early Intervention	3
CBH:5440	Prevention and Early Intervention of Mental Health Disorders	3
CBH:6405	Global Maternal, Newborn, and Child Health	3
CBH:6410	Special Topics	arr.
CBH:6415	Independent Study in Community and Behavioral Health	arr.
GEOG:4150	Health and Environment: GIS Applications	3
HMP:5005	Introduction to Healthcare Organization and Policy	3
HMP:7940	Primary Data and Mixed Methods	3
HMP:7950	Design Issues in Health Service Research	3
HMP:7960	Analytic Issues in Health Services Research I	3
HMP:7965	Analytic Issues in Health Services Research II	3

## Dissertation

Students complete 12 s.h. in the following.

Code	Title	Hours
CBH:7505	CBH Thesis/Dissertation	12

## Admission

Ph.D. applicants must apply through the Schools of Public Health Application Service (SOPHAS). Applications must include academic transcripts, Graduate Record Exam (GRE) General Test scores, three letters of recommendation, statement of purpose, and a writing sample. International transcripts should be evaluated by the World Education Service (WES) and submitted to SOPHAS. For detailed application information, visit How to Apply to the Ph.D. in Community and Behavioral Health on the Department of Community and Behavioral Health website.

The community and behavioral health admission committee considers several factors when evaluating applications for admission, including scores on the GRE, grade-point averages, letters of recommendation, intent and motivation for graduate

study, and research interests. Students with deficiencies in one area may be admitted if all other components of their application are very strong.

Applicants must have a graduate g.p.a. of at least 3.40 and have earned a graduate degree from an accredited college or university in a related public health, social science, or clinical health field. Applicants who do not hold a graduate degree should apply to a master's program prior to application for the Ph.D. program. Preference is given to applicants with Graduate Record Exam (GRE) General Test verbal scores of at least 154, quantitative scores of at least 150, and analytical writing scores of at least 4.0 (GRE scores must be less than five years old). Ph.D. program applicants also must submit their master's thesis, or if no thesis is available, a sample of their scholarly writing.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). An acceptable TOEFL score is a minimum of 600 (250 computer-based test or 100 internet-based test) or a minimum IELTS score of 7.0 (with no subscore lower than 6.0). Automatic waivers of this requirement are granted for persons who have, or will have, completed a bachelor's degree or more advanced degree at an accredited university in the United States, United Kingdom, Canada (excluding French Quebec), Africa (English speaking), Australia, or New Zealand.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

The application deadline is January 15 for the fall semester. Applications are not accepted for spring or summer semesters.

## Financial Support

The graduate program coordinator and advisor works with admitted students to explore funding opportunities. A limited number of teaching and research assistantships are available. Assistantships offer financial support and tuition assessed at the resident tuition rate along with a tuition scholarship. They also provide valuable on the job training experience.

For more information on financing education through jobs, grants, and loans, contact the University's Office of Student Financial Aid.

## Career Advancement

The program prepares individuals for academic, research, and policy-making work in the social and behavioral health sciences. This academic specialty offers many career opportunities in academic and research institutions.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# Emerging Infectious Disease Epidemiology

## Head, Department of Epidemiology

- Elizabeth A. Chrischilles

**Graduate certificate:** emerging infectious disease epidemiology

**Website:** <https://www.public-health.uiowa.edu/certificate-in-emerging-infectious-disease-epidemiology/>

Emerging infectious diseases increasingly are recognized as global and regional issues. Some infectious diseases are controlled effectively with the help of modern technology. But new diseases—such as SARS, West Nile, and avian influenza virus infections—appear frequently, and older ones, including malaria, tuberculosis, and bacterial pneumonia, are now appearing in forms that are resistant to drug treatments. All of them have the potential to seriously affect human and animal health as well as economies locally and worldwide. They pose novel and unceasing challenges for professionals in health care, government, and private agencies.

The Certificate in Emerging Infectious Disease Epidemiology is administered by the Department of Epidemiology [p. 1987]. The Graduate College grants the certificate.

### Graduate Program of Study Certificate

- Certificate in Emerging Infectious Disease Epidemiology

# Emerging Infectious Disease Epidemiology, Graduate Certificate

## Requirements

The graduate Certificate in Emerging Infectious Disease Epidemiology requires 12-13 s.h. of graduate credit. Students must complete the certificate's required coursework within five years of entering the program and must maintain a g.p.a. of at least 2.75 in work toward the certificate. Three of the required courses must be completed on campus: EPID:5570 Zoonotic Diseases, EPID:5580 Public Health Laboratory Techniques, and EPID:5590 Applied Infectious Disease Epidemiology or EPID:6550 Epidemiology of Infectious Diseases. The remaining courses may be completed on campus or by distance education.

The certificate program provides basic information and training related to infectious diseases. It is designed for a broad range of individuals, including graduate students, international public health professionals, laboratory professionals, physicians, nurses, veterinarians, and medical technologists.

The Certificate in Emerging Infectious Disease Epidemiology requires the following coursework.

Code	Title	Hours
Both of these:		
EPID:5570	Zoonotic Diseases	3
EPID:5580	Public Health Laboratory Techniques	1
One of these:		
EPID:5590	Applied Infectious Disease Epidemiology	2
EPID:6550	Epidemiology of Infectious Diseases	3
Two of these:		
BIOS:4120	Introduction to Biostatistics	3
EPID:4400	Epidemiology I: Principles	3
EPID:5550	Diagnostic Microbiology for Epidemiology	3
OEH:4240	Global Environmental Health	3

For more information about the program, visit the Certificate in Emerging Infectious Disease Epidemiology on the Department of Epidemiology website.

## Admission

Applications are only being accepted from current University of Iowa degree-seeking graduate students.

Applicants to the certificate program must hold a baccalaureate degree from an accredited college or university and must have a g.p.a. of at least 2.75 (or international equivalent). For more information about how to apply, visit the Certificate in Emerging Infectious Disease Epidemiology web page.

# Epidemiology

## Head

- Elizabeth A. Chrischilles

**Graduate degrees:** M.S. in clinical investigation; M.S. in epidemiology; Ph.D. in epidemiology

**Faculty:** <https://www.public-health.uiowa.edu/epi-faculty-list/>

**Website:** <https://www.public-health.uiowa.edu/epi/>

The Department of Epidemiology focuses on surveillance for disease, risk factors for disease in the general population, behavioral factors in disease, use and outcome of health interventions and care, and the establishment and evaluation of disease control measures in the community. Students are guided by faculty members whose research interests include epidemiology of communication disorders, pharmacoepidemiology, cancer epidemiology, infectious disease epidemiology, adverse reproductive outcome epidemiology, anatomic pathology, genetics, cardiovascular disease, nutrition, smoking cessation, epidemiology of reproduction, dental epidemiology, clinical epidemiology, neuroepidemiology, meta-analysis, intervention trials, international health, and effects of aging.

In addition to the M.S. in epidemiology, the M.S. in clinical investigation, and the Ph.D. in epidemiology, the department offers the epidemiology subprogram for the Master of Public Health degree; see Master of Public Health, M.P.H. [p. 1956] in the Catalog. The subprogram focuses on fundamental concepts and methods, and provides training in the use of data and methods for disease assessment and for evaluation of programs and interventions.

The M.S. in epidemiology and the M.P.H. with an epidemiology subprogram are offered as part of the Undergraduate to Graduate (U2G) program which provides an opportunity for University of Iowa students interested in health science to earn both their undergraduate and graduate degrees in five years. For more information about the U2G program that combines an undergraduate degree with the M.S. in epidemiology, see Undergrad to Grad on the Department of Epidemiology website or M.P.H. (epidemiology subprogram) Undergrad to Grad on the College of Public Health website.

## Certificates

### Emerging Infectious Disease Epidemiology

The Department of Epidemiology offers the graduate Certificate in Emerging Infectious Disease Epidemiology. The certificate program provides basic information and training related to infectious diseases. It is designed for a broad range of individuals, including graduate students, international public health professionals, laboratory professionals, physicians, nurses, veterinarians, and medical technologists. To learn more, see the Certificate in Emerging Infectious Disease Epidemiology [p. 1986] in the Catalog.

### Translational and Clinical Investigation

The Department of Epidemiology and the Institute for Clinical and Translational Science offer the graduate certificate program in translational and clinical investigation; see the Certificate in Translational and Clinical Investigation [p. 2021] in the Catalog.

## Programs

### Graduate Programs of Study

#### Majors

- Epidemiology subprogram for the Master of Public Health [p. 1956] degree
- Master of Science in Clinical Investigation [p. 1991]
- Master of Science in Epidemiology [p. 1994]
- Doctor of Philosophy in Epidemiology [p. 1997]

## Facilities and Resources

The State Health Registries of Iowa, which encompasses the Iowa Cancer Registry and the Iowa Registry for Congenital and Inherited Disorders, works in cooperation with the Iowa Department of Public Health to collect medical data on Iowans. The Iowa Cancer Registry is one of 18 registries nationwide that report data to the National Cancer Institute.

The Preventive Intervention Center conducts population-based intervention trials to prevent occurrence and recurrence of disease and to promote wellness, with a focus on the elderly. It also specializes in research promoting prevention of cardiovascular disease and provides an interdisciplinary approach to risk factor interventions. The Health Effectiveness Research Center is a collaborative research enterprise with the College of Pharmacy that studies whether particular health care treatments or services are over- or underutilized. The Center for Emerging Infectious Diseases employs epidemiological methods, laboratory technologies, and clinical evaluations to achieve a better understanding of emerging infectious diseases. The Nutrition Center provides expertise in nutrition and dietary assessment, dietary interventions, and nutrition lifestyle change strategies.

## Courses

### Epidemiology Courses

#### **EPID:4314 Field Experiences in Public Health** 1 s.h.

Direct involvement in actions being taken at local community level; topics include environmental health, infectious diseases, chronic diseases, and pediatric health; practical examples and hands-on experiences during site visits for topic-specific field investigations. Offered spring semesters. Prerequisites: BIOL:1140 or BIOL:1141 or BIOL:1411. Requirements: biology or microbiology coursework. Same as CPH:4250.

#### **EPID:4350 Maternal and Child Health Seminar** 1 s.h.

Historical and applied perspective on maternal and child health problems and programs aimed at reducing morbidity, mortality, and health disparities across the life span. Same as CBH:4350.

#### **EPID:4400 Epidemiology I: Principles** 3 s.h.

Epidemiological concepts and methods; design of descriptive and analytic studies, such as aggregate, case series, cross-sectional, case-control, cohort studies, clinical trials; application of epidemiology to public health practice; communication and dissemination of epidemiological findings.

#### **EPID:4510 Injury and Violence Prevention** 3 s.h.

Theory, research, and practice of injury control; unintentional and intentional injuries; local, national, international injury issues. Same as CPH:4230, OEH:4510.

**EPID:4990 Practicing Evidence-Based Public Health 3 s.h.**

How epidemiologic and other scientific studies underlie public health practice; relationship between evidence and action; controversies at interface of science and policy.

**EPID:5200 Principles of Public Health Informatics 3 s.h.**

Systematic applications of information science, computer science, and technology to public health practice, research, and learning; methods of disease surveillance, data collection, analysis, and reporting with health informatics. Offered fall semesters. Same as IGPI:5220.

**EPID:5214 Meta-Analysis of Epidemiologic Studies 3 s.h.**

Methods for quantitative pooling of analytic study associations (cohort and case-control) between exposure and a dichotomous outcome; literature searches, data abstraction, test of homogeneity, publication bias and consideration of adjusted risk ratios (effects of confounding). Offered spring semesters of odd years. Prerequisites: BIOS:5120 and EPID:4400.

**EPID:5241 Statistical Methods in Epidemiology 4 s.h.**

Overview of methods to analyze data from epidemiologic investigations; estimation of relative measures of risk, attributable risk, stratified analysis; model-fitting approaches using linear, logistic, and Poisson regression analysis; confounding and effect modification; analysis of epidemiologic data sets. Offered spring semesters.

**EPID:5300 Food Safety 3 s.h.**

Current issues and concepts of food safety in the United States, from plant to table; foodborne illness from microbial agents, food toxins, adulterants; disease investigation, risk analysis, risk mitigation, prevention. Offered summer sessions.

**EPID:5320 Exotic and Emerging Diseases of Animals 1 s.h.**

Major exotic and emerging animal diseases; veterinarian's role in recognizing and diagnosing such diseases; how outbreaks affect economies and veterinary medicine; public health concerns; responding agencies and their roles in control and eradication.

**EPID:5350 Foundations of Maternal and Child Health 3 s.h.**

Life course approach to understanding determinants, mechanisms, and systems that promote and maintain health, safety, and well-being of mothers and their children. Prerequisites: EPID:4350. Same as CBH:5350.

**EPID:5470 Applied Veterinary Epidemiology/ Biostatistics 3 s.h.**

Epidemiology and biostatistics applied to veterinary public health; outbreak investigations, surveillance, analyzing and evaluating diagnostic tests, translation methodology, risk assessment, data analysis software programs. Offered summer sessions. Prerequisites: EPID:4400.

**EPID:5500 Introduction to Clinical Epidemiology 3 s.h.**

Epidemiologic applications and methods used in clinical settings to evaluate clinical medicine and other health profession disciplines including health measurement, health outcome determination, diagnostic process, risk assessment and communication, prognosis, study design, patient surveys, clinical trials, decision analysis and meta-analysis, health services research. Offered fall semesters. Corequisites: EPID:4400, if not taken as a prerequisite.

**EPID:5540 Public Health Surveillance Mechanisms, Applications, and Data 3 s.h.**

Introduction to fundamentals of public health surveillance with emphasis on cancer registration; use of resulting surveillance-based databases and information systems available to public health practitioners and researchers. Offered fall semesters. Prerequisites: EPID:4400.

**EPID:5550 Diagnostic Microbiology for Epidemiology 3 s.h.**

Introduction to microbiological culture, antigen detection, immunological and molecular amplification laboratory techniques for bacteria, viruses, parasites, fungi. Offered spring semesters. Prerequisites: MICR:2157 or MICR:3164.

**EPID:5560 Introduction to Molecular Epidemiology 3 s.h.**

Introduction to basic techniques of molecular biology (DNA, RNA, protein techniques) and their use in epidemiological research (e.g., diagnosis of disease, biomarker discovery, validation). Offered spring semesters. Corequisites: EPID:4400, if not taken as a prerequisite.

**EPID:5570 Zoonotic Diseases 3 s.h.**

Introduction to epidemiology and control of zoonotic diseases; zoonoses endemic to the midwestern United States. Offered summer sessions. Prerequisites: EPID:5550 or EPID:6550 or MICR:2157 or MICR:3164.

**EPID:5580 Public Health Laboratory Techniques 1 s.h.**

Common laboratory techniques in emerging infectious respiratory disease research and epidemiologic surveillance laboratories; emphasis on techniques for culturing, characterization, and serological surveillance of exposure to influenza viruses. Offered spring semesters. Requirements: completion of online Basic Biological Safety and Blood-Borne Pathogens courses; completed certificates must be brought to class.

**EPID:5590 Applied Infectious Disease Epidemiology 2 s.h.**

Introduction to infectious disease surveillance, outbreak investigations, interventions, biodefense, emerging infectious diseases, subject recruitment, mathematical modeling, and analytic approaches pertaining to infectious disease prevention and control; emphasis on practical knowledge and how to apply basic infectious disease epidemiology to real-life scenarios and research projects.

**EPID:5600 Introduction to Epidemiology Data Management and Analysis 3 s.h.**

Organization, collection, management, and analysis of epidemiological data using computer programs. Offered fall semesters. Corequisites: EPID:4400, if not taken as a prerequisite.

**EPID:5610 Intermediate Epidemiology Data Analysis with SAS and R 3 s.h.**

Basic principles of data analysis and collaborative research; SAS fundamentals; data manipulation and interpretation techniques. Offered spring semesters.

**EPID:5900 Problems and Special Topics in Epidemiology arr.**

Didactic material in epidemiology; may include tutorial, seminar, faculty-directed independent work (e.g. literature search, project, short research project); topics may include comparative effectiveness and patient-centered outcomes, neuroepidemiology, and epidemiology of aging.

- EPID:5925 Epidemiology Journal Club: Evaluating the Literature** **0-1 s.h.**  
Critical evaluation of primary epidemiologic methods and research papers; informative, challenging, and current topics from scientific literature. Requirements: epidemiology M.S., M.P.H., or Ph.D. standing.
- EPID:5950 Preceptorship in Epidemiology** **arr.**  
Quantitative research-oriented project performed with a preceptor; preparation of prospectus, presentation of research results in a publication-quality report and a scientific poster session.
- EPID:6000 Independent Study in Epidemiology** **arr.**  
In-depth pursuit of an area of special interest in epidemiology requiring substantial creativity and independence.
- EPID:6050 Research in Epidemiology** **arr.**  
Research that may lead to a dissertation.
- EPID:6075 Health Equity, Disparities, and Social Justice** **3 s.h.**  
Introduction to the concept of health equity and an overview of U.S. health disparities; students gain a better understanding of research and interventions through readings, lectures, reflection papers, in-class exercises, and research assignments. Same as CBH:6230.
- EPID:6100 Writing a Grant Proposal** **3 s.h.**  
Small group projects to develop grant proposals using epidemiological study designs; presentation and defense of proposals before faculty site visitors. Offered fall semesters.
- EPID:6150 Writing for Medical Journals** **1 s.h.**  
Skill development in writing medical journal articles for publication. Offered spring semesters.
- EPID:6200 Environmental and Occupational Epidemiology** **3 s.h.**  
Overview of methods to interpret and perform environmental and occupational epidemiologic studies with focus on exposure assessment; valuable insights into identifying regional, national, global environmental, and occupational health-related issues. Prerequisites: EPID:4400. Same as OEH:6510.
- EPID:6250 Genetics and Epidemiology** **3 s.h.**  
Basic human molecular genetics and population genetics principles; methods of integrating genetic principles into epidemiological studies; advancing genomic technologies, hot topics in genetics research. Offered fall semesters of odd years. Prerequisites: EPID:4400.
- EPID:6330 Global Nutrition Policy** **2-3 s.h.**  
Concepts and methods used in setting public health nutrition policy; evidence-based aspects of nutrition policy formation in public health settings; evaluation of nutritional public health policy implementation and ways of changing policy in China, Korea, Micronesia, Hawaii, Italy, and the United States. Offered spring semesters.
- EPID:6350 Nutritional Epidemiology** **2 s.h.**  
Application of epidemiology study designs to nutrition variables and chronic disease; analysis of nutrition epidemiology studies; research protocol design. Offered spring semesters. Recommendations: a basic nutrition course.
- EPID:6360 Nutrition Intervention in Clinical Trials Research** **2 s.h.**  
Nutrition interventions in clinical trials; disease related to nutrition variables; research that links effects of diet on chronic diseases. Offered fall semesters. Recommendations: a basic nutrition course.
- EPID:6370 Nutrition Intervention in Research Lab** **3 s.h.**  
Development and demonstration of group counseling skills in ongoing nutrition research projects at the University of Iowa. Offered fall semesters. Corequisites: EPID:6360, if not taken as a prerequisite.
- EPID:6400 Epidemiology II: Advanced Methods** **4 s.h.**  
Epidemiologic study design and analysis; bias, confounding, and effect modification; case-control studies; cohort studies; field methods; measurement principles; exposure and disease classification; acute and chronic disease examples. Offered spring semesters. Prerequisites: EPID:4400 and EPID:5600.
- EPID:6410 Introduction to Simulation and Computational Modeling in Epidemiology** **3 s.h.**  
Applications, concepts, and methods within computational epidemiology with emphasis on simulation modelling; programming principles and techniques using R programming language; methods for resampling and data generation; equation- and agent-based simulations.
- EPID:6420 Survey Design and Analysis** **3 s.h.**  
Methodological issues regarding design, sampling approach, implementation, analysis, and interpretation of surveys and questionnaires in public health research. Offered spring semesters of even years. Prerequisites: EPID:4400 and BIOS:5120. Same as BIOS:6420.
- EPID:6510 Injury Epidemiology** **3 s.h.**  
How epidemiology can be applied to injury prevention and control: epidemiology literature, specific methodological problems involved in the epidemiology of injuries, critical evaluation of research articles. Offered spring semesters of odd years. Prerequisites: EPID:4400. Same as OEH:6520.
- EPID:6550 Epidemiology of Infectious Diseases** **3 s.h.**  
Underlying epidemiological concepts of infection disease, including causation and surveillance; prevention and control; case studies. Offered fall semesters. Prerequisites: EPID:4400. Same as GHS:6550.
- EPID:6560 Hospital Epidemiology** **2 s.h.**  
Health care associated infections; surveillance, investigative methods, resistant organisms, and molecular epidemiology; methods for preventing spread of pathogens, including isolation precautions; environmental issues, construction, and sterilization; interactive exercises. Offered spring semesters of odd years. Prerequisites: EPID:4400.
- EPID:6570 Infectious Causes of Chronic Disease** **3 s.h.**  
Evidence linking various infectious agents with the development of different types of chronic disease. Offered spring semesters of even years. Corequisites: EPID:4400, if not taken as a prerequisite.
- EPID:6600 Epidemiology of Chronic Diseases** **3 s.h.**  
Chronic disease epidemiology; survey of leading chronic diseases including measurement of disease, lifestyle, nutrition, occupation, and family history. Offered fall semesters. Prerequisites: EPID:4400.
- EPID:6620 Neuroepidemiology** **2 s.h.**  
Basic epidemiologic concepts of neurologic disease; concepts, methods, examples of neuroepidemiology; varied diseases, methods. Prerequisites: EPID:4400 and EPID:5600.
- EPID:6650 Cardiovascular Disease Epidemiology** **3 s.h.**  
Natural history of atherosclerotic disease in humans and risk factors affecting its development; atherosclerotic disease by age, sex, and in varied populations worldwide; recent guidelines and clinical trials to delay onset, reduce incidence, improve outcome of cardiovascular disease. Prerequisites: EPID:4400.

**EPID:6700 Cancer Epidemiology and Control 3 s.h.**

Incidence, mortality, and survival; risk factors for major cancer sites; comprehensive cancer control; introduction to SEER\*Stat and its application. Offered spring semesters of odd years. Prerequisites: EPID:4400 and PATH:8133.

**EPID:6900 Design of Intervention and Clinical Trials 3 s.h.**

Methodologic introduction to rationale and design of clinical trials; basics of clinical trial design, variety of designs, and examples from clinical trials. Offered fall semesters.

**EPID:6910 Pharmacoepidemiology and Comparative Effectiveness Research 3 s.h.**

Drug approval process, methods for identification and attribution of adverse drug events, and current understanding of the epidemiology of adverse drug events; study designs and data sources for pharmacoepidemiology and pharmacoconomics. Offered fall semesters of even years. Prerequisites: EPID:4400.

**EPID:6920 Applied Administrative Data Analysis 2 s.h.**

Concepts and methods for analysis of administrative health insurance claims data; focus on understanding types and sources of data, useful resources for classifying data, and applying SAS programming skills and common analytic approaches to studies using such data. Offered fall semesters. Prerequisites: EPID:5610 or BIOS:5310 or BIOS:5510. Requirements: EPID:5610 or BIOS:5310 or BIOS:5510 or SAS programming experience; and (concurrent or prior enrollment in BIOS:5120 and BIOS:5730) or (EPID:5241 and EPID:5610) or prior equivalent biostatistical coursework or experience.

**EPID:6950 Clinical Research Ethics 2-3 s.h.**

Ethical and regulatory aspects of clinical research; historical background, current regulations, and Institutional Review Board (IRB) requirements related to human subjects protection issues. Offered spring semesters. Requirements: K30 training grant or enrollment in degree program with clinical research project.

**EPID:7000 Thesis/Dissertation arr.****EPID:7200 Teaching in Epidemiology 3 s.h.**

Teaching methods in epidemiology; guided practicum experience in teaching epidemiology, in preparation for academic careers. Prerequisites: EPID:4400 and EPID:5600 and EPID:6400.

**EPID:7400 Epidemiology III: Theories 3 s.h.**

How epidemiology fits into the wider context of scientific inquiry. Offered fall semesters of odd years. Prerequisites: EPID:4400 and EPID:5241 and EPID:6400.

# Clinical Investigation, M.S.

## Requirements

The Master of Science program in clinical investigation requires 37 s.h. of graduate credit. In addition to completing the program's required coursework, students must write a thesis in the form of a manuscript, or a grant proposal for a National Institutes of Health (NIH) career award or its equivalent, with oral defense. Graduate students must maintain a cumulative g.p.a. of at least 3.00. Those who receive a grade of C in 7 s.h. of coursework may be dismissed from the program.

The program, which is offered in collaboration with the University's Institute for Clinical and Translational Science, is designed for clinicians interested in pursuing careers in clinical research. It includes in-depth training in biostatistics, epidemiology, research ethics, and academic survival skills as well as didactic training applicable to clinical research careers. Graduates of the program are able to critically evaluate clinical literature, write competitive grant proposals, design and conduct clinical research projects, work effectively with other researchers and support staff, and disseminate research results through manuscripts and presentations.

## Prerequisites

The M.S. program requires at least 6 s.h. of prerequisite coursework in the disciplines of pathology, physiology, and/or pharmacology. Students accepted into the degree program who have not completed at least 6 s.h. from those disciplines may meet the requirement while they are enrolled.

The M.S. with a major in clinical investigation requires the following coursework.

## Core Courses

Students must take CPH:7270 Principles of Scholarly Integrity: Public Health during their first year in the fall semester (enroll for 0 s.h.) and in the spring semester (enroll for 1 s.h.). They must retake CPH:7270 if they completed the course more than four years ago or if they have changed degree programs.

## Capstone Requirement

While a student does not take a final examination of courses, the evaluation of the student for graduation is based upon a positive review of a mentored K or R grant or a mentored publishable research paper. The grant or paper is completed in the second year of the program and based on the area of focus. The capstone is a mentored activity which requires approval by a clinical mentor and a Department of Epidemiology primary faculty member. Successful completion of the course is denoted with a satisfactory (S) grade. The complete grant or paper will be due no later than one month prior to graduation for review.

### Admission

Applicants must apply through the Schools of Public Health Application Service (SOPHAS); they also must pay the required application fee to the Graduate College through the University of Iowa Office of Admissions when prompted. For detailed application information, visit How to Apply to the Department of Epidemiology web page.

Applicants must hold a doctoral-level degree in a clinical discipline (e.g., M.D., D.O., D.D.S., Ph.D., Pharm.D., D.V.M.) or be enrolled in the Medical Scientist Training Program [p. 1772] (Carver College of Medicine). They must hold a baccalaureate degree with a cumulative g.p.a. of at least 3.00; foreign-trained applicants must have an outstanding doctoral training record evidenced by research publications.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Applicants are considered based on their credentials, prior training, and research training plans. Applicants with deficiencies in one area may be admitted if all other components of their application are strong. Individuals must have a sponsoring department.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Application deadlines for fall admission are June 1 for U.S. citizens, April 15 for international applicants. For summer admission, the deadline is April 1; for spring admission, December 1.

### Financial Support

A limited number of graduate research assistantships are available for advanced students; for information, consult the department. For information on financing education through jobs, grants, and loans, contact the University's Office of Student Financial Aid.

Opportunities for funded predoctoral fellowships are available. Funded positions sponsored by federal agencies are available only to U.S. citizens.

## Academic Plans

# Epidemiology, M.S.

## Requirements

The Master of Science program in epidemiology requires at least 39 s.h. of graduate credit and is offered with or without thesis. Students who choose to complete the degree without thesis are required to pass a comprehensive examination. All students must maintain a cumulative g.p.a. of at least 3.00. Those who receive a grade of C in 7 s.h. of coursework may be dismissed from the program.

Students are required to attend 80 percent of all Department of Epidemiology seminar meetings and journal club meetings for three semesters. They must present one scientific poster at the departmental level before they may graduate, and the department recommends that they present at the international, national, regional, state, or University level before graduating.

The Master of Science with a major in epidemiology requires the following coursework.

## Core Courses

Students must take CPH:7270 Principles of Scholarly Integrity: Public Health during their first year in the fall semester (enroll for 0 s.h.) and in the spring semester (enroll for 1 s.h.). They must retake CPH:7270 if they completed the course more than four years ago or if they have changed degree programs.

Students enrolled part-time (less than 9 s.h.) who have a graduate research assistantship appointment may choose to register in EPID:5925 Epidemiology Journal Club: Evaluating the Literature for 1 s.h.; however, the credit earned for this course will not be applied toward the minimum semester hours required for the M.S. in epidemiology.

Students with a strong biosciences background may choose to substitute PATH:5270 Pathogenesis of Major Human Diseases in place of PATH:8133 Introduction to Human Pathology for Graduate Students if it better complements their training plan. This is an advanced course that requires a strong foundation in molecular biology and related disciplines, but may be suitable for some students.

## Electives

Students must earn a minimum of 5 s.h. in elective coursework from Department of Epidemiology courses (prefix EPID) and 2 s.h. in additional graduate coursework pertinent to a student's educational goals and background (the additional 2 s.h. may be earned in an epidemiology course or in another graduate course, with the advisor's approval). The following courses are recommended.

Code	Title	Hours

CBH:5220	Health Behavior and Health Education	3
HMP:4000	Introduction to the U.S. Health Care System	3
OEH:4240	Global Environmental Health	3

Students may need additional elective coursework in order to complete the minimum 39 s.h. required for the degree.

## Other Requirements

### Department of Epidemiology Seminar

Every week during the academic year, the Department of Epidemiology seminar provides a forum for speakers to present information or research pertaining to diverse topics in epidemiology. Contact information for the seminar coordinators is located on the Department of Epidemiology website under Preceptorship, Journal Club, and Seminar Contacts. Information about the schedule is distributed each semester and also is available on the University of Iowa Events Calendar. Students are expected to achieve at least 80 percent attendance at the seminar during each semester of enrollment.

### Journal Club for First-Year Students

Journal Club for first-year students is for those who are new to the department and is offered in the fall semester. The focus

is for students to gain experience reading, in interpretation, and in critically evaluating recently published journal articles. Students should register in EPID:5925 Epidemiology Journal Club: Evaluating the Literature, section 1.

## Journal Club

Every other week during the academic year, the Journal Club meets to discuss articles of interest in the field. Contact information for the Journal Club coordinators can be found on the Department of Epidemiology website under Preceptorship, Journal Club, and Seminar Contacts. Information about the schedule is distributed to students each semester. Students are required to achieve at least 80 percent attendance at Journal Club for three semesters during their time in the program.

## Scientific Poster Requirement

Every student is required to present at least one scientific poster at the department level, and is encouraged to present at the international, national, regional, state, or university level at some point prior to graduation. A student's advisor or thesis/preceptorship mentor can help determine the suitability and timeline for the poster presentation.

For nonthesis students, this poster requirement takes the place of an oral seminar presentation as part of the preceptorship requirement. Nonthesis students would typically formulate preceptorship research into a poster presentation, though the requirement may be met by a poster presentation of other research, such as from an independent study or research related to employment.

For thesis students, the poster requirement is in addition to the oral seminar presentation requirement for the thesis. Thesis students would typically formulate thesis research into a poster presentation, though the requirement may be met by a poster presentation of other research, such as from an independent study or research related to employment. The poster must be submitted for review to the student's advisor or thesis/preceptorship mentor a minimum of 10 days before the poster session. A Department of Epidemiology poster session is held at the end of the fall and spring semesters.

## Master's Final Examination for the M.S. Without Thesis

The master's examination is a written in-class exam that measures learning of epidemiological concepts and knowledge of epidemiological thoughts as presented in required courses. This exam is offered twice per year.

## Master's Thesis Defense for the M.S. With Thesis

The master's thesis defense is an oral presentation of the purpose, methods, and results of the thesis research. A specially formed committee thoroughly examines a student's area of knowledge associated with the context of the work. The goal of the thesis is a document that is publishable in a peer-reviewed journal.

## Combined Programs

### Undergraduate Degree/M.S.

The Undergrad to Grad program (U2G) provides an opportunity for University of Iowa students interested in health science to earn their undergraduate and graduate

degrees in five years. Undergraduate students should apply to the program by February 1 of their junior year.

For additional information, visit M.S. in Epidemiology—Undergrad to Grad on the Department of Epidemiology website.

## Admission

Applicants must apply through the Schools of Public Health Application Service (SOPHAS); they also must pay the required application fee to the Graduate College through the University of Iowa Office of Admissions when prompted. For detailed application information, visit How to Apply to the Department of Epidemiology web page.

The epidemiology faculty considers several factors when evaluating applications for admission, including Graduate Record Exam (GRE) General Test scores, grade-point average, letters of recommendation, intent and motivation for graduate study, and research interests. Students with deficiencies in one area may be admitted if all other components of their application are very strong.

All applicants must hold a baccalaureate degree and have a cumulative g.p.a. of at least 3.00. Undergraduate preparation must include two semesters of biological sciences and mathematics through algebra. Coursework in statistics is highly recommended.

Applicants must have taken the Graduate Record Examination (GRE) General Test, the Medical College Admission Test (MCAT), or the Dental Admission Test (DAT), scoring above the 50th percentile, within four years before applying to the epidemiology program. The department prefers recent test scores, particularly for applicants who completed educational programs and/or courses after taking one of these tests.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

All applicants and students are required to have strong written and oral communication skills.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Application deadlines for fall admission are June 1 for U.S. citizens, April 15 for international applicants.

## Financial Support

A limited number of graduate research assistantships are available for advanced students; for information, consult the department. For information on financing education through jobs, grants, and loans, contact the University's Office of Student Financial Aid.

Opportunities for funded predoctoral fellowships are available. Funded positions sponsored by federal agencies are available only to U.S. citizens.

## Career Advancement

The program prepares graduate students for professional careers in which specialized knowledge of epidemiological methods and analytic techniques are essential. Graduates find employment in local, state, and federal health agencies;

academic institutions; and private enterprise, such as hospitals, pharmaceutical and device companies, insurance companies, and foundations.

## Electives

### Research Interest Area Electives

Students are encouraged to choose a recommended Research Interest Area plan of study. In consultation with their advisor, a student may propose a modified research interest area of the same name. If there is not a good fit with one of the recommended plans, students may propose a new research interest area plan of study in consultation with their advisor. Students must prepare a proposed name for the new plan and a brief rationale. Modified and new research interest areas will be reviewed and approved by a majority decision by the Plan of Study committee.

### Additional Epidemiology Electives

In addition, students must select at least 3 s.h. from Department of Epidemiology courses (prefix EPID) outside their research interest area.

## Dissertation

Students must successfully complete a Ph.D. thesis.

Code	Title	Hours
EPID:7000	Thesis/Dissertation	10-18

## Other Requirements

### Preceptorship Requirement

Doctoral students who did not complete the M.S. program in epidemiology at the University of Iowa are required to take EPID:5950 Preceptorship in Epidemiology or demonstrate that an equivalent course has been completed, such as a completed master's thesis at another institution. This requirement must be fulfilled within one year of admission to the Ph.D. program.

### Department of Epidemiology Seminar

Every week during fall and spring semesters, the Department of Epidemiology seminar provides a forum for speakers to present information or research pertaining to diverse topics in epidemiology. Students are expected to achieve at least 80 percent attendance at the seminar during each semester of enrollment.

### Journal Club for First-Year Students

Journal Club for first-year students is for those who are new to the department. The focus is for students to gain experience reading, in interpretation, and in critically evaluating recently published journal articles. Students should register in EPID:5925 Epidemiology Journal Club: Evaluating the Literature. Ph.D. students who have experience with journal reviews may ask to participate in the regular Journal Club.

## Journal Club

Every other week during the academic year, the Journal Club meets to discuss articles of interest in the field. Contact information for the Journal Club coordinators can be found on the Department of Epidemiology website under Preceptorship, Journal Club, and Seminar Contacts. Information about the schedule is distributed to students each semester. Students are required to achieve at least 80 percent attendance at Journal Club for five semesters during their time in the program. Attendance earned while enrolled as a M.S. student does not count towards the required five semesters.

## Scientific Poster Requirement

Every student is required to present at least one scientific poster at the department level and one poster at the international, national, regional, state, or University level, at some point prior to graduation. A student's advisor or dissertation mentor can help determine the suitability and timeline for the poster presentation.

## Seminar Presentation

In addition to the dissertation defense, students are required to make a presentation at a Department of Epidemiology seminar. It is recommended that students complete the seminar presentation and dissertation defense in the same semester, with the seminar presentation scheduled before the defense so the seminar can serve as preparation for the defense.

## Human Subjects Protections (IRB) Certification

Students are required to provide evidence that they have completed an approved education program in human subjects protections. This should be done at the time of appointment to a graduate research assistantship position, at the start of the preceptorship, or at the start of thesis/dissertation research. More information is available about the human subjects protections certification on the University of Iowa's Human Subjects Office website.

## Examinations

All doctoral students must successfully complete a qualifying examination, a comprehensive examination, a dissertation prospectus, and a dissertation. The research topic and content, which vary depending on the program of study, must be approved by a student's dissertation committee.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in epidemiology in a combined degree program offered by the Carver College of Medicine and the College of Public Health. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

## Admission

Applicants must apply through the Schools of Public Health Application Service (SOPHAS); they also must pay the required application fee to the Graduate College through the University of Iowa Office of Admissions when prompted. For detailed

application information, visit How to Apply to the Department of Epidemiology web page.

The epidemiology faculty considers several factors when evaluating applications for admission, including Graduate Record Exam (GRE) General Test scores, grade-point average, letters of recommendation, intent and motivation for graduate study, and research interests. Students with deficiencies in one area may be admitted if all other components of their application are very strong.

All applicants must hold a baccalaureate degree (an M.S. or M.P.H. usually is required) and must have a cumulative g.p.a. of at least 3.00. Courses in the biological, physical, and mathematical sciences provide important background; one semester of calculus, one semester of statistics or biostatistics, and two semesters of biological sciences are highly recommended. Computing skills also are desirable.

Applicants must have taken the Graduate Record Examination (GRE) General Test, the Medical College Admission Test (MCAT), or the Dental Admission Test (DAT), scoring above the 50th percentile, within four years before applying to the epidemiology program. The department prefers recent test scores, particularly for applicants who completed educational programs and/or courses after taking one of these tests.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

All applicants and students are required to have strong written and oral communication skills.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

The application deadline for fall admission is April 1.

## Financial Support

A limited number of graduate research assistantships are available for advanced students; for information, consult the department. For information on financing education through jobs, grants, and loans, contact the University's Office of Student Financial Aid.

Scholarships for incoming students are available; for information, visit the Department of Epidemiology website.

Opportunities for funded predoctoral fellowships are available. Funded positions sponsored by federal agencies are available only to U.S. citizens.

## Career Advancement

The program prepares graduate students for careers as scientists, teachers, and practitioners of epidemiologic methods. Employment opportunities exist in academic institutions; local, state, and federal health agencies; and in private enterprises.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and

should be discussed with an academic advisor. For additional sample plans, see MyUI.

- Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- Students who did not complete the Epidemiology MS program at UI are required to take EPID:5950 Preceptorship or receive program approval to substitute a previously completed equivalent course; must be completed by end of the first year.
- Taken during spring semester of the first year (or after completion of epidemiology core coursework); same as the MS final examination with the addition of an essay exam.
- Students must attend the Epidemiology department seminar and are expected to achieve at least 80% attendance during each semester of enrollment; PhD students are required to make one presentation at Department Seminar preferably during the semester of the dissertation defense.
- Taken in the fall and spring of first year for 0 s.h. and 1 s.h., respectively.
- PhD students are required to achieve at least 80% attendance for five semesters; prior MS attendance does not count. If taken for 1 s.h., the credit will not be applied toward the minimum semesters hours required for the PhD in Epidemiology.

- g Students with a strong biosciences background may substitute PATH:5270 for PATH:8133 if it fits better with their training plan. PATH:5270 is an advanced course that requires a strong foundation in molecular biology and related disciplines, but may be suitable for some students.
- h Students must complete either BIOS:6210 (typically during second year fall semester) or BIOS:6310 (typically during third year fall semester).
- i At least 3 s.h. of electives must be from the Epidemiology department (prefix EPID) and outside of Research Interest Area; see General Catalog and website for coursework and specifics. Work with faculty advisor to select appropriate graduate elective coursework in Research Interest Area.
- j Taken after the majority of coursework for the PhD degree has been completed.
- k Dissertation defense.

# Health Management and Policy

## Head

- Keith Mueller

**Graduate degrees:** M.H.A.; M.S. in health policy; Ph.D. in health services and policy

**Faculty:** <https://www.public-health.uiowa.edu/hmp-faculty-list/>

**Website:** <https://www.public-health.uiowa.edu/hmp/>

The Department of Health Management and Policy educates health care professionals for leadership roles in an increasingly complex and dynamic health care system. Graduates hold key executive, academic, research, government, and consulting positions in all areas of health management and policy, both in the United States and abroad.

The department offers the M.H.A. in a traditional program track and an executive track. It also collaborates with the Tippie College of Business and the College of Law to provide concurrent and combined M.H.A./graduate and professional degree programs. In addition, the M.S. in health policy, the policy subprogram for the Master of Public Health (M.P.H.), the Ph.D. in health services and policy, and the graduate Certificate in Healthcare Management [p. 2010] are offered.

The department's degree programs rank among the foremost in the field. The M.H.A. is accredited by the Commission on Accreditation of Healthcare Management Education. The Ph.D. program, established in 1950, was the nation's first doctoral program in health care management.

## M.P.H. Subprogram

The subprogram prepares individuals for careers in health policy analysis, system and organizational planning, and program evaluation. Graduates find positions in federal, state, and local government as well as in professional associations and private agencies. See the Master of Public Health, M.P.H. [p. 1956] in the Catalog.

## Alumni Relations

An active alumni association with more than 1,000 members supports the M.H.A. program in a number of ways including scholarships, consultation on curriculum, continuing education, research, and fund development. Alumni serve as visiting faculty, consultants, mentors, and preceptors for summer internships, residencies, and fellowships. The alumni association also provides a network for graduates entering the profession.

Graduates maintain their Iowa connection and learn about news of their classmates, the department, and faculty members and students through the website and social media.

## Samuel Levey Healthcare Leadership Symposium

The Department of Health Management and Policy and its alumni association jointly sponsor the annual Samuel Levey Healthcare Leadership Symposium, which is held in the spring. Renowned speakers from across the country present a variety of symposium topics. Health care leaders, alumni, educators, students, and friends of the department attend the

symposium, which offers students a high quality educational experience in addition to the opportunity to network with faculty and alumni.

## Programs

### Graduate Programs of Study

#### Majors

- Master of Health Administration [p. 2004]
- Master of Science in Health Policy [p. 2006]
- Doctor of Philosophy in Health Services and Policy [p. 2007]

## Facilities

The Center for Health Policy and Research, the research arm of the Department of Health Management and Policy, is a University-wide interdisciplinary research facility. Faculty members from the Carver College of Medicine, the Tippie College of Business, and the Colleges of Dentistry, Liberal Arts and Sciences, Nursing, Pharmacy, and Public Health serve as investigators in a variety of studies at the center. Graduate students assist with ongoing research projects.

Primary project funding for the center comes from the National Institutes of Health, the State of Iowa, the Agency for Healthcare Research and Quality, and the Patient-Centered Outcomes Research Initiative, as well as from foundations and private organizations.

The center also sponsors educational activities and promotes collaboration among health organizations through frequent exchanges with professional and provider associations, policy and planning groups, insurance organizations, health delivery institutions, and other members of the health services research community.

## Courses

### Health Management and Policy Courses

#### HMP:3055 International Development: India Winterim

2-3 s.h.

Exploration of issues in India through varied disciplinary lenses. Winter session.

#### HMP:4000 Introduction to the U.S. Health Care System

3 s.h.

The U.S. health care system; socioeconomic, political, and environmental forces that influence the organization, financing, and delivery of personal and public health services; health services, policy, concepts, terminology.

#### HMP:5000 Professional Development Seminar

0-1 s.h.

Development of critical foundational management skills: business writing, personal presentation, teamwork, providing feedback, self-assessment, engaging other professionals, and organizational ethics.

3 s.h.

Concepts and methods related to developing and leading interprofessional teams; emphasis on roles and responsibilities in health care teams, communication, and conflict management; team development.

- HMP:5002 Interprofessional Health Care Administration II** 3 s.h.  
Concepts and methods related to developing and leading interprofessional teams with an emphasis on values and ethics, including human resources concepts and skills, and building an organizational culture that supports interprofessional collaborative practice. Prerequisites: HMP:5001.
- HMP:5005 Introduction to Healthcare Organization and Policy** 3 s.h.  
Organization of U.S. healthcare system, health policies that shape its development; historical, socioeconomic, political, environmental forces that influence the organization, financing, and delivery of personal and public health services; health services, policy concepts, and terminology, including health determinants, access to care, system integration, policy development, federalism.
- HMP:5200 Healthcare Management** 3 s.h.  
Application of basic management principles such as leadership, goal setting, decision making, and human resource management to healthcare organizations.
- HMP:5230 Managerial Epidemiology** 1-2 s.h.  
Relationship between health care needs and utilization; emphasis on epidemiological concepts related to presence of disease and health care needs in a community; approaches to forecasting need and utilization of services.
- HMP:5291 Performance Improvement in Healthcare** 1-3 s.h.  
General lean and six sigma principles; application to health care solutions; examples from University of Iowa Hospitals & Clinics, other institutions.
- HMP:5310 Healthcare Quality Management** 2-3 s.h.  
Fundamentals of patient safety, quality improvement techniques, performance measurement approaches, and analytical tools including data collection methodologies used by managers in healthcare and public health settings.
- HMP:5315 Health Information Systems** 2-3 s.h.  
Conceptual, practical aspects of analysis, development, and use of computer-based information systems; emphasis on application to the health sciences environment.
- HMP:5320 Analytics for Healthcare Management** 3 s.h.  
Introduction to analytical techniques for making business decisions with emphasis on health care; using Excel and associated tools in practical problem solving; probability and statistical concepts and applications in strategic settings.
- HMP:5342 Lean Six Sigma in Health Care** 2-3 s.h.  
Managerial approach combining Six Sigma methods and tools with lean manufacturing enterprise philosophy; eliminating waste of physical resources, time, effort, and talent while assuring quality in production and organizational processes; provides basic understanding of Six Sigma and Lean and DMAIC process (Six Sigma structure); application of basic tools to reduce waste while augmenting satisfaction among health care customers.
- HMP:5350 Hospital Organization and Management** 2-3 s.h.  
Role of hospitals, governance, organizational structure, medical staff organization, departmental operations. Prerequisites: HMP:5005 and HMP:5200.
- HMP:5370 Health Informatics** 3 s.h.  
Technological tools that support health care administration, management, and decision making. Same as IGPI:5200, ISE:5860, MED:5300, SLIS:5900.
- HMP:5402 Corporate Financial Reporting** arr.  
Introduction to accounting concepts, principles, and analyses; contemporary financial reporting practices with emphasis on preparation, analysis, and use of financial statement information for management decisions; fundamentals of accounting measurement and disclosure.
- HMP:5410 Health Economics I** 3 s.h.  
Microeconomic principles applied to health care, health insurance, information and uncertainty, models of physician and hospital behavior, theory of the firm, market structure, regulation, competitive reform, managed care.
- HMP:5450 Health Insurance and Managed Care** 3 s.h.  
History and theory of insurance, comparative health systems, health systems and networks, HMOs, public health insurance, care for uninsured; emphasis on public policy. Prerequisites: HMP:5005. Corequisites: PHAR:6330 or HMP:5410. Same as GHS:5455.
- HMP:5610 Health Policy** 1-3 s.h.  
Policy process, policies and programs that shape provision of health care in the United States; health policies such as Medicare, Medicaid, Older Americans Act.
- HMP:5650 Health Policy Analysis** 3 s.h.  
Introduction to analysis of contemporary health policy issues; frameworks for conducting analysis of health policy process and content; qualitative and quantitative methods for policy analysis; how to present policy-relevant information effectively. Prerequisites: HMP:5005.
- HMP:5750 Medicare and Medicaid Policy** 3 s.h.  
Health policies most pertinent to Americans over age of 65. Same as ASP:5750.
- HMP:5810 M.H.A. Internship** arr.
- HMP:6055 Topics in Health Administration** 1-3 s.h.  
Topics related to contemporary problems that concern health care students, administrators.
- HMP:6110 Strategic Planning and Marketing** 3-4 s.h.  
Strategy in health care including role of mission, vision, values, environmental analysis, strategic alternatives, organizational design, and evaluation of strategic decisions. Prerequisites: HMP:5200.
- HMP:6150 M.H.A. Integrative Capstone** 2-3 s.h.  
Integration and application of theories, concepts, principles; case studies. Prerequisites: HMP:5200 and HMP:6110.
- HMP:6310 Human Resources Management in Healthcare** 1-3 s.h.  
Overview of human resource management theories and practices for health care organizations; strategic human resource management, equal employment, staffing, training and development, appraisal, compensation. Prerequisites: HMP:5200.
- HMP:6315 Healthcare Ethics** 1-2 s.h.  
Biomedical and organization ethics in the contemporary healthcare environment; ethical concepts and principles, ethical issues that confront executive, clinical, and governance leaders in context of complex health organizations.
- HMP:6350 Medical Practice Administration** 3 s.h.  
Survey of medical practice culture, operations, governance, financials, role(s) in health care system, and future. Prerequisites: HMP:5005 and HMP:5200.

- HMP:6355 Leadership of Healthcare Organizations** 2-3 s.h.  
Management and leadership concepts and their application in healthcare organizations. Prerequisites: HMP:5200.
- HMP:6360 Nonprofit Organizational Effectiveness I** 3 s.h.  
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as MGMT:9150, PBAF:6278, RELS:6070, SPST:6010, SSW:6247, URP:6278.
- HMP:6365 Nonprofit Organizational Effectiveness II** 3 s.h.  
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: for HMP:6365—HMP:6360 or MGMT:9150. Same as MGMT:9160, PBAF:6279, RELS:6075, SPST:6020, SSW:6248, URP:6279.
- HMP:6410 Healthcare Financial Management** 3 s.h.  
Issues in working capital management, capital financing, cost analysis and rate setting, budgeting, reimbursement, managed care contracting and health reform initiatives; emphasis on use of information from accounting, financial management systems.
- HMP:6610 Legal Aspects of Healthcare** 3 s.h.  
Statutory and common law frameworks applicable to healthcare system; court decisions that illustrate applications of general legal doctrines in hospital and health settings.
- HMP:6710 Federalism and Health Policy** 3 s.h.  
How American government's organization shapes development and implementation of health policy, programs, services.
- HMP:6750 Seminar in Health Policy** 2-3 s.h.  
Contemporary health policy issues; theoretical and applied perspectives; social justice and health care for vulnerable populations (e.g., mental health, nursing homes); readings, discussion. Prerequisites: HMP:5610.
- HMP:6850 Independent Study and Research** arr.  
Supervised tutorial.
- HMP:6855 Administrative Practicum** 2-3 s.h.  
Experience with operational and planning matters in a health care setting. Requirements: second-year standing and g.p.a. of at least 3.00 for two consecutive semesters.
- HMP:6860 Administrative Residency/Fellowship** arr.
- HMP:7250 Organizational Behavior and Theory in Health Care** 3 s.h.  
Key concepts of organizational behavior and organizational theory and their application to health care organizations and health services; perspectives from theoretical writings and empirical studies. Requirements: Ph.D. standing and knowledge of human services organizations.
- HMP:7550 Cost Effectiveness and Decision Analysis** 3 s.h.  
Methods of cost-effectiveness analysis and decision analysis; applications to resource allocation decisions in public health and medicine.
- HMP:7910 Seminar in Contemporary Health Issues** 0 s.h.  
Review of relevant literature on methodological substantive issues in health care, presentations by researchers on health services and policy research.
- HMP:7920 Ph.D. Guided Research** 1-3 s.h.  
Experience with empirical research, guided by a faculty mentor; structured and supervised research activities.
- HMP:7930 Ph.D. Independent Research** 1-3 s.h.  
Experience in empirical research through one or more substantive research experiences, with faculty mentor; authorship or coauthorship of at least one manuscript suitable for publication in peer review journal. Requirements: Ph.D. in health services and policy and satisfactory completion of Ph.D. preliminary exams.
- HMP:7940 Primary Data and Mixed Methods** 3 s.h.  
Overview of research design and methods used to address health services research questions; collection of primary data and use of qualitative and mixed methods approaches.
- HMP:7950 Design Issues in Health Service Research** 3 s.h.  
Design and causal inference reliability and validity in measurement; rules of evidence; research design for randomized-control trials, observational studies, meta-analysis.
- HMP:7960 Analytic Issues in Health Services Research I** 3 s.h.  
Analytic tools used in health services research; focus on applications in nonexperimental research settings, such as analyses using administrative claims data or preexisting public use data sets.
- HMP:7965 Analytic Issues in Health Services Research II** 3 s.h.  
Continuation of HMP:7960; advanced applications, including panel data and qualitative response models. Prerequisites: HMP:7960. Same as PHAR:7331.
- HMP:7970 Seminar in Instruction and Professional Development** 1-3 s.h.  
Opportunity for Ph.D. students to develop research and teaching skills through presentations, readings, and workshops on professional development topics. Requirements: satisfactory completion of Ph.D. preliminary exams.
- HMP:7990 Thesis/Dissertation** arr.  
Research for preparation of dissertation; seminar presentation.

# Master of Health Administration, M.H.A.

## Requirements

The Master of Health Administration (M.H.A.) requires 60 s.h. of graduate credit earned in two academic years of full-time study. Transfer credit and course waivers may be accepted, but all students are expected to complete a minimum of 54 s.h. at the University of Iowa during their course of study. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree.

The program prepares students for a wide variety of positions in health care management. It is designed to provide a comprehensive understanding of issues encountered by health care delivery organizations and strong business skills. Graduates are well prepared to advance to senior executive roles in a variety of health care organizations.

Students work with their advisors to create a plan of study that incorporates required and elective coursework that supports their career goals in areas such as operations management, managed care, or financial management. Required courses in management, economics, law, managerial finance, and financial accounting focus on health care applications. Students also may take coursework in other University of Iowa departments and programs, such as business, planning and public affairs, and aging and longevity studies.

During the first year, students are introduced to the social, political, economic, and financial environments of health care organizations. The concepts, tools, and techniques necessary for effective management also are presented. During the second year, courses focus on in-depth health care applications of management concepts that integrate prior coursework and develop skills in areas relating to students' special interests and career objectives.

The Master of Health Administration requires the following coursework.

## Core Courses

**Total Hours** **51**

## Electives

Students choose 9 s.h. of elective coursework; they may count a maximum of 6 s.h. of elective credit earned outside the Department of Health Management and Policy toward the M.H.A. degree.

## Summer Internships, Fellowships, Residencies

The department facilitates placement of M.H.A. students in required summer internships between the first and second years of study. Internships offer opportunities for practical experience interacting with executives in a health care setting. Internships are full-time positions that usually last 10-12 weeks. Students normally receive a salary or stipend, and in some cases, assistance with living arrangements.

Most M.H.A. students complement their academic training with a postgraduate fellowship or residency. Such experiences provide opportunities to observe, develop, and demonstrate management skills and to develop connections with colleagues. The department takes an active role in helping students identify and secure fellowship and residency positions.

## Executive M.H.A. Subprogram

The executive Master of Health Administration subprogram (EMHA) requires 45 s.h. of graduate credit and typically is completed in two years. The plan of study is designed for working professionals who wish to advance their knowledge and skills in order to become effective health care administrators. The EMHA objectives are to:

- provide working professionals with advanced knowledge and skills in health care management;
- position experienced professionals to become effective health care administrators; and
- meet the need for leadership in transforming health care financing and delivery in dynamic environments.

The EMHA's curricular emphases are basic administrative skills, administrative skills specific to health care, population health administration, and interprofessional health care administration.

Students complete three courses each fall and spring semester and one course in each of two summer sessions.

Courses are taught face-to-face on Iowa City and Des Moines campuses by combinations of expert executives and faculty. Instruction is case- and team-focused.

The Master of Health Administration (executive M.H.A. subprogram) requires the following coursework.

<b>Total Hours</b>		<b>45</b>

For more information, visit Executive M.H.A. Track on the College of Public Health website.

## Combined Programs

Students interested in combining an M.H.A. with a master's or professional degree in another field should discuss their plans with both academic units and indicate their interest when they apply to the M.H.A. program.

## M.H.A. (Law Subprogram)/J.D.

The combined Master of Health Administration with a law subprogram/Juris Doctor requires 123 s.h. of postbaccalaureate credit. The program allows students to gain training in both health care management and law. Students typically complete the program in four years; they enroll only in law courses during the first year.

Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the J.D., see Juris Doctor, J.D. [p. 1707] (College of Law) in the Catalog.

## Admission

Applicants must apply through the Schools of Public Health Application Service (SOPHAS) or the Health Administration,

Management & Policy Centralized Application Service (HAMPCAS). All applicants also must submit the supplemental University of Iowa application fee. For detailed application information, visit HMP Degree Programs on the Department of Health Management and Policy website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Students begin the program in fall semester. Personal interviews are required before admission; the admissions committee conducts Skype interviews with applicants unable to visit campus.

## Financial Support

A variety of financial assistance is available, including scholarships and awards, student loans, and graduate research assistantships. Every effort is made to provide financial support to students who demonstrate need and maintain satisfactory academic standards. Some awards are offered in recognition of outstanding academic performance and experience, regardless of need.

Graduate research assistantships generally are awarded on the basis of student merit and the department's need. Assistantships afford valuable experience in health services research and management projects. Graduate research assistants work 10 hours per week and must apply for reappointment each year. Assistantships provide a stipend, some tuition assistance, and entitle students to the resident tuition rate.

Opportunities also exist for part-time employment both on and off campus. For information and financial aid application forms, contact the University's Office of Student Financial Aid.

# Health Policy, M.S.

## Requirements

The Master of Science program in health policy requires 48 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree.

Students learn how to quickly identify, evaluate, and formulate policies, and conduct quantitative and qualitative health policy research. These skills are developed through a combination of coursework and applied learning opportunities, including special lectures and conferences.

The M.S. with a major in health policy requires the following coursework.

## Electives

Students choose 6 s.h. of elective coursework.

## Thesis

Students complete 3 s.h. of thesis work in the following course.

Code	Title	Hours
HMP:7990	Thesis/Dissertation	3

## Admission

Applicants must apply through the Schools of Public Health Application Service (SOPHAS). All applicants also must submit the supplemental University of Iowa application fee. For detailed application information, visit HMP Degree Programs on the Department of Health Management and Policy website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Students begin the program in fall semester. Campus visits are encouraged.

## Financial Support

A variety of financial assistance is available, including scholarships and awards, student loans, and graduate research assistantships. Every effort is made to provide financial support to students who demonstrate need and maintain satisfactory academic standards. Some awards are offered in recognition of outstanding academic performance and experience, regardless of need.

Graduate research assistantships generally are awarded on the basis of student merit and the department's need. Assistantships afford valuable experience in health policy research and management projects. Graduate research assistants work 10 hours per week and must apply for reappointment each year. Assistantships provide a stipend, some tuition assistance, and entitle students to the resident tuition rate.

Opportunities also exist for part-time employment both on and off campus. For information and financial aid application forms, contact the University's Office of Student Financial Aid.

## Career Advancement

Graduates will have acquired the subject matter expertise and methodological skills sought by academic institutions, government agencies, and private and nonprofit organizations engaged in health policy analysis, development, and implementation. Additionally, graduates will be prepared to pursue doctoral studies in health policy, health services research, and other closely related fields.

# Health Services and Policy, Ph.D.

## Requirements

The Doctor of Philosophy program in health services and policy requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.25 to earn the degree. Those who enter with a master's degree can apply to use transfer credit toward their doctorate degree with approval of the health services and policy program.

The Ph.D. program is oriented toward applied, interdisciplinary research and scholarly inquiry. Students develop mastery of theories and research methodologies necessary to study the complex American health system. They work closely with faculty mentors on research projects and develop research design and methodology skills through coursework and an apprenticeship model of training.

Individual plans of study allow students to prepare for specific careers, and small class size encourages frequent student-faculty interaction, including participation in research projects as well as scholarly publications.

The Ph.D. program has three focus areas: health economics, health management and organization, or health policy. Students work with a faculty advisor and a mentorship team of faculty members from their focus area; the advisor and mentorship team participate in initial planning with a student during orientation and in annual professional development reviews. Students conduct required independent study and thesis research in their focus area; their comprehensive exam and dissertation committees include faculty members from their focus area.

## Focus Areas

The health economics focus area provides students with in-depth training in economic theory and its applications to health and health care. Students in this area acquire advanced theoretical knowledge and state-of-the-art analytical and econometric skills that enable them to build careers as health economists in academic departments, research organizations, and health care industries. The health economics focus area provides comprehensive coursework covering all main areas in health and health care economics, including demand for health and health care, economic determinants and consequences of health behaviors, health insurance, economic organization of health care markets, impact of government policy and regulation, econometric methods, and economic evaluation methods.

The health management and organization focus area prepares students to conduct research on organizational, strategic, and operational issues that confront health institutions and systems. Emphasis is placed on health care applications of theories, concepts, and models from the fields of organizational theory (macro), organizational behavior (micro), strategic management, and operations management. Students in this area may conduct research on topics such as effectiveness of health care organizations; improving the organization and management of health delivery processes; measuring performance and productivity of health care organizations; examining the relative influence of mission, culture, and financial incentives in hospitals and health organizations; and management of professional groups.

Graduates of the health management and organization focus area should find employment in academic and research organizations, integrated delivery systems, and governmental units that are interested in the impact of organizational structures and managerial practices on performance.

The health policy focus area prepares students to undertake health services and policy research aimed at improving care and management of illness and disability and enhancing individual and community health outcomes. Students develop the skills necessary to conduct health services and policy research. They take courses in the basic disciplines that contribute to the fields of public and social policy (e.g., law, political science, public affairs) and courses that focus on the structure and organization of health policy making in the United States. They study the formation and implementation of health policies; the effect of health policies on the organization, financing, and delivery of health services; the effect of health policies on access to, use of, and costs of health services; and approaches to improve access and effectiveness of care for vulnerable populations. Students who complete the health policy focus area are prepared for employment in academic research institutions, policy organizations, and governmental agencies and departments.

The Ph.D. with a major in health services and policy requires the following.

## Coursework

Students take coursework in core content areas covering health care systems, health economics, health management and organizations, and health policy and courses in research design and statistical analysis. Credit may be awarded for guided and independent research project work. Students may waive specific courses, depending on their background. For more detailed information about Ph.D. and focus area curricula, see the Ph.D. in Health Services and Policy on the Department of Health Management and Policy website.

POLI:5100	American Politics	4
POLI:7202	Public Opinion and Electoral Behavior	4
SOC:6810	Social Stratification	3

## Electives

Students take elective coursework so that they are exposed to other areas or to gain greater depth within their area of focus.

## Examinations

Students must pass a preliminary examination that tests mastery of core material covered during the first year in the department, including American health systems, health services research methods, and foundation courses in their focus area.

Students take the comprehensive examination at or near the end of their formal coursework. The comprehensive exam focuses on a student's specific area of research and theoretical interest.

## Dissertation

Doctoral candidates prepare dissertations based on original research that tests, extends, or applies concepts or principles to a health care problem related to their chosen focus area. Students may complete a traditional dissertation or a dissertation based on three publishable papers.

## Admission

Applicants must apply through the Schools of Public Health Application Service (SOPHAS). All applicants also must submit the supplement University of Iowa application fee. For detailed application information, visit HMP Degree Programs on the Department of Health Management and Policy website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Students begin the program in fall semester. Personal interviews are required before admission; the admissions committee conducts Skype interviews with applicants.

## Financial Support

A variety of financial assistance is available, including scholarships and awards, student loans, and graduate research assistantships. Every effort is made to provide financial support to students who demonstrate need and maintain satisfactory academic standards. Some awards are offered in recognition of outstanding academic performance and experience, regardless of need.

Graduate research assistantships generally are awarded on the basis of student merit and the department's need. Assistantships afford valuable experience in health services research and management projects. Graduate research assistants work 10-20 hours per week and must apply for reappointment each year. Assistantships provide a stipend, some tuition assistance, and entitle students to the resident tuition rate.

Opportunities also exist for part-time employment both on and off campus. For information and financial aid application forms, contact the University's Office of Student Financial Aid.

## Career Advancement

The program prepares students for careers in health services research, education, and policy leadership in universities, government agencies, and health organizations.

# Healthcare Management

## Head, Department of Health Management and Policy

- Keith Mueller

**Graduate certificate:** healthcare management

**Website:** <https://www.public-health.uiowa.edu/healthcare-management-certificate/>

The graduate Certificate in Healthcare Management provides physicians, nurses, other clinicians, and managers the foundational business and leadership skills specific to health care. The certificate is administered by the Department of Health Management and Policy [p. 2001]. The Graduate College grants the certificate.

### Programs

## Graduate Program of Study Certificate

- Certificate in Healthcare Management [p. 2010]

# Healthcare Management, Graduate Certificate

## Requirements

The graduate Certificate in Healthcare Management requires a minimum of 15 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 in order to earn the certificate. Enrollment is limited to 10 students.

The required courses provide foundational business and leadership skills specific to health care. They are offered in five-week blocks at University of Iowa campuses in Iowa City and Des Moines. Students complete the five health care courses over a period of 15 months; all 15 s.h. earned in the certificate program may be used toward degree requirements for the Master of Health Administration, M.H.A. [p. 2004] executive subprogram (EMHA).

The Certificate in Healthcare Management requires the following coursework.

<b>Code</b>	<b>Title</b>	<b>Hours</b>
HMP:5200	Healthcare Management	3
HMP:5402	Corporate Financial Reporting	3
HMP:5610	Health Policy	3
HMP:6355	Leadership of Healthcare Organizations	3
HMP:6410	Healthcare Financial Management	3

# Occupational and Environmental Health

## Head

- Peter S. Thorne

**Graduate degrees:** M.S. in occupational and environmental health; Ph.D. in occupational and environmental health

**Faculty:** <https://www.public-health.uiowa.edu/oeh-faculty-list/>

**Website:** <https://www.public-health.uiowa.edu/oeh/>

The Department of Occupational and Environmental Health focuses on assessment of risk factors in the physical environment and their relationship to disease—particularly health problems of agricultural and industrial workers. Students are guided by faculty members whose research interests include rural health care delivery, agricultural health, environmental health, occupational medicine, occupational lung disease, mammalian toxicology, inhalation toxicology, ergonomics, indoor air quality, occupational injury, injury epidemiology, injury prevention programs, aerosol physics, air and water quality, environmental chemistry, analytical toxicology, and environmental health in developing countries.

In addition to the M.S. and Ph.D. degrees in occupational and environmental health, the department offers a subprogram for the Master of Public Health (M.P.H.) degree in occupational and environmental health. The subprogram provides students with a broad perspective on public health and career preparation for a variety of professional positions in occupational and environmental health. Students have the option of selecting focused coursework in the following areas: global environmental health, occupational health, rural health and safety, injury and violence prevention, and environmental and occupational epidemiology. For more information, see the Master of Public Health [p. 1956] in the Catalog.

The department also offers the College of Public Health's graduate Certificate in Agricultural Safety and Health; see Agricultural Safety and Health [p. 1968] in the Catalog.

## Programs

### Graduate Programs of Study

#### Majors

- Occupational and environmental health subprogram for the Master of Public Health [p. 1956] degree
- Master of Science in Occupational and Environmental Health [p. 2014]
- Doctor of Philosophy in Occupational and Environmental Health [p. 2018]

## Facilities

The Department of Occupational and Environmental Health is housed in the College of Public Health Building, on the University's health sciences campus, and at the Institute for Rural and Environmental Health, at the University of Iowa Research Park. College of Public Health-based laboratory facilities give researchers and students access to cutting-edge technologies for the study of occupational and environmental health.

## Pulmonary Toxicology Facility

The Pulmonary Toxicology Facility provides a full array of inhalation toxicology, aerosol science, and bioaerosol assay services. A primary focus of the facility is the study of toxicants found in the agricultural environment and related exposure situations. The facility is particularly well-equipped for studying organic dusts and bioaerosols.

## Industrial Hygiene Laboratory

The Industrial Hygiene Laboratory provides expertise and equipment for exposure assessment in occupational settings. The laboratory offers a range of sample collection capabilities and an extensive inventory of sampling equipment. Field and laboratory services are available through laboratory support exposure-response studies and control technology development studies in a variety of occupational arenas, including agriculture, construction, and indoor environments (home and office).

A computer laboratory is available for student use, and a library collection is located at the Institute for Rural and Environmental Health.

## Heartland Center for Occupational Health and Safety

The Heartland Center for Occupational Health and Safety, one of 18 education and research centers funded by the National Institute of Occupational Safety and Health, provides training, education, and outreach. Its program areas are industrial hygiene, occupational safety, ergonomics, agricultural safety and health, occupational injury prevention, occupational epidemiology, and continuing education.

## Courses

### Occupational and Environmental Health Courses

#### **OEH:4240 Global Environmental Health 3 s.h.**

Environmental health comprised of aspects of human health determined by interactions with physical, chemical, biological, and social factors in global environment; worldview and survey; focus on issues most relevant today; sustainability; air, water, and soil pollution and remediation; occupational health; injury prevention; food safety and security; risk assessment; environmental health policy.

#### **OEH:4260 Global Water and Health 3 s.h.**

Overview of global water and health; microbial and toxicant identification, water-related adverse health effects, risk assessment, approaches to reduce water-related disease, distal water-related influences (e.g., global warming), and historic cases. Same as GHS:4260.

#### **OEH:4310 Occupational Ergonomics: Principles 3 s.h.**

Fundamentals of ergonomics in context of occupational safety and health practice; topics include work-related musculoskeletal disorders (MSDs), physical risk factors for MSDs, basic occupational biomechanics, office ergonomics and sedentary work, work organization, and task design; emphasis on exposure assessment, with particular attention to methods used commonly in the field; laboratory exercises are used to reinforce key concepts, and students work in teams on an applied project with an area employer.

- OEH:4510 Injury and Violence Prevention** 3 s.h.  
Theory, research, and practice of injury control; unintentional and intentional injuries; local, national, international injury issues. Same as CPH:4230, EPID:4510.
- OEH:4530 Global Road Safety** 3 s.h.  
Road safety problem, data sources, research methods used in field, and how intervention and prevention programs are developed and evaluated; lecture, hands-on approaches. Same as CPH:4220, GHS:4530.
- OEH:4540 Statistics for Experimenters** 3 s.h.  
Application of statistical techniques to evaluate data derived from experimental samples designs; use of spreadsheets, statistical software; design and analysis of experiments; regression analysis; model building; practical applications. Same as CEE:4187.
- OEH:4920 Solid and Hazardous Wastes** 3 s.h.  
Sources, characteristics, collection, disposal of solid and hazardous wastes; environmental impacts of hazardous waste management; resource recovery systems. Requirements: for OEH:4920—OEH:4240. Same as CEE:4158.
- OEH:5010 Occupational and Environmental Health Seminar** 0-1 s.h.  
Contemporary topics in occupational health, agricultural and comparative medicine, environmental health.
- OEH:5110 Research Data Management Seminar** 1 s.h.  
Overview of major issues in quantitative data management; topics include computer file and directory organization, data documentation and lab notebook best practices, data organization and structure, data description and annotation, data versioning, data sharing and publication, licensing, ownership, preservation of access, reuse, and citation; for students in science, technology, engineering and mathematics (STEM) disciplines. Same as CEE:5110.
- OEH:5410 Occupational Safety** 3 s.h.  
Principles and practices of occupational safety; applications in industrial and other occupational settings; interactions with other disciplines.
- OEH:5620 Occupational Health** 3 s.h.  
Introduction to occupational health and safety; for graduate students in agricultural health and safety, environmental health, ergonomics, industrial hygiene, injury prevention, occupational epidemiology, and occupational medicine.
- OEH:6110 Rural Health and Agricultural Medicine** 3 s.h.  
Clinical orientation of specific health problems of rural residents, agricultural workers; rural health care delivery, socioeconomic issues in agriculture and their effects on health and safety of the agricultural population; occupational health problems, environmental health hazards in rural areas.
- OEH:6120 Current Topics in Agriculture and Rural Health** 0-1 s.h.  
Issues that affect the health of agricultural populations, such as agro-terrorism, antibiotic resistance, genetically modified organisms; current scientific literature.
- OEH:6420 Methods in Exposure Science** 3 s.h.  
Principles, with emphasis on recognition of chemical health hazards, physical health hazards at work. Corequisites: OEH:5620, if not taken as a prerequisite.
- OEH:6431 Assessing Noise Hazards** 1 s.h.  
Scientific methods to measure noise, assess human noise exposure, and implement technology to control noise exposure.
- OEH:6432 Assessing Nonionizing Radiation Hazards** 1 s.h.  
Scientific methods to measure nonionizing, assess human nonionizing exposure, and implement technology to control nonionizing exposure.
- OEH:6433 Assessing Ionizing Radiation Hazards** 1 s.h.  
Scientific methods to measure ionizing radiation, assess human ionizing radiation exposure, and implement technology to control ionizing radiation exposure.
- OEH:6440 Control of Occupational Hazards** 3 s.h.  
Physical science concepts applied to control of occupational hazards ranging from dusts to mists to vapors; strategies, management issues, personal protective equipment, implementation skills; in-depth instruction on local exhaust ventilation system design.
- OEH:6450 Aerosol Technology** 3 s.h.  
Particle statistics and physics of aerosols, including inertia, diffusion, nucleation, evaporation, condensation, optics, electrical properties; relationship to fields such as agriculture, nanotechnology, environmental and occupational health, atmospheric chemistry, drug delivery.
- OEH:6460 Quantitative Exposure Assessment: Study Design and Evaluation** 3 s.h.  
Principles of designing occupational and environmental exposure assessment studies, analyzing exposure data, and conducting exposure-response evaluations. Prerequisites: OEH:4540.
- OEH:6510 Environmental and Occupational Epidemiology** 3 s.h.  
Overview of methods to interpret and perform environmental and occupational epidemiologic studies with focus on exposure assessment; valuable insights into identifying regional, national, global environmental, and occupational health-related issues. Prerequisites: EPID:4400. Same as EPID:6200.
- OEH:6520 Injury Epidemiology** 3 s.h.  
How epidemiology can be applied to injury prevention and control: epidemiology literature, specific methodological problems involved in the epidemiology of injuries, critical evaluation of research articles. Offered spring semesters of odd years. Prerequisites: EPID:4400. Same as EPID:6510.
- OEH:6710 Human Toxicology and Risk Assessment** 3 s.h.  
Sources, routes of absorption, effects of environmental toxicants affecting man; pathophysiology of toxicant actions, including those of air and water pollutants, metals, pesticides, solvents, food toxicants, chemicals. Requirements: college chemistry and biology.
- OEH:6720 Advanced Toxicology** 4 s.h.  
Hepatic metabolism and toxification mechanisms, pulmonary and immunotoxicology, nervous system poisons and their mechanisms of action, general and molecular concepts of chemical carcinogenesis. Prerequisites: OEH:6710 or (PHAR:6501 and PHAR:6502 and PHAR:6503).
- OEH:7000 Thesis/Dissertation** arr.
- OEH:7010 Problems in Occupational and Environmental Health** arr.  
Didactic material in occupational and environmental health; may include tutorial, seminar, faculty-directed independent work (e.g., literature search, project, short research project).

**OEH:7020 Independent Study in Occupational and Environmental Health** **arr.**

In-depth pursuit of an area in occupational and environmental health requiring substantial creativity and independence.

**OEH:7040 Preceptorship in Occupational and Environmental Health** **arr.**

Work experience using knowledge and skills acquired in the classroom; arranged in conjunction with departmental or collegiate activities or with governmental agencies or private industry.

**OEH:7050 Occupational and Environmental Health Internship** **0,3 s.h.**

Comprehensive and integrated application of knowledge acquired in a workplace setting; structured approach to demonstrate skills and knowledge obtained through a workplace experience. Corequisites: OEH:5620 or OEH:4240, if not taken as a prerequisite.

**OEH:7060 Research Design in Occupational and Environmental Health** **3 s.h.**

Development of a research grant proposal based on student's independent research aims and hypotheses, preparation of accompanying documents for a grant proposal submission, and development of a comprehensive dissemination plan that articulates how academic and lay audiences will be reached with research findings.

**OEH:7070 Interpreting Occupational and Environmental Health Research** **3 s.h.**

Systematic evaluation of methodological strengths and weaknesses of published research studies in occupational and environmental health. Prerequisites: (OEH:5620 or OEH:4240) and (BIOS:4120 or OEH:4540) and EPID:4400.

# Occupational and Environmental Health, M.S.

An M.S. degree in occupational and environmental health is offered with optional subprograms in:

- agricultural safety and health
- industrial hygiene

## Requirements

The Master of Science in occupational and environmental health requires 38-43 s.h. of graduate credit. The degree program is offered with three options—the M.S. in occupational and environmental health (38 s.h.) without a subprogram, the M.S. with an agricultural safety and health subprogram (42 s.h.), or the M.S. with an industrial hygiene subprogram (43 s.h.).

## M.S. Without Subprogram

The Master of Science with a major in occupational and environmental health without a subprogram requires a minimum of 38 s.h. and includes the following coursework.

### Core Courses

Code	Title	Hours
All of these (13 s.h.):		
OEH:4240	Global Environmental Health	3
OEH:5010	Occupational and Environmental Health Seminar	1
OEH:5620	Occupational Health	3
CPH:6100	Essentials of Public Health	2
CPH:7270	Principles of Scholarly Integrity: Public Health	1
EPID:4400	Epidemiology I: Principles	3
One of these:		
OEH:4540	Statistics for Experimenters	3
BIOS:4120	Introduction to Biostatistics	3
At least 6 s.h. from these:		
OEH:4260	Global Water and Health	3
OEH:4310	Occupational Ergonomics: Principles	3
OEH:4510	Injury and Violence Prevention	3
OEH:5410	Occupational Safety	3
OEH:6110	Rural Health and Agricultural Medicine	3
OEH:6510	Environmental and Occupational Epidemiology	3
OEH:6710	Human Toxicology and Risk Assessment	3

### Electives

Credit earned in elective coursework and the thesis completes the 38 s.h. required for the degree. Students work with their advisor to select courses appropriate for their professional goals.

## Thesis

A thesis is required. Students may earn a maximum of 6 s.h. for the thesis.

Code	Title	Hours
OEH:7000	Thesis/Dissertation	arr.

## M.S. with Agricultural Safety and Health Subprogram

The program prepares students for careers in education, health care, insurance, and agribusiness as specialists in agricultural safety and health.

The Master of Science with a major in occupational and environmental health with an agricultural safety and health subprogram requires a minimum of 42 s.h. and includes the following coursework.

### Core Courses

Code	Title	Hours
All of these (26 s.h.):		
OEH:4240	Global Environmental Health	3
OEH:5010	Occupational and Environmental Health Seminar	1
OEH:5410	Occupational Safety	3
OEH:5620	Occupational Health	3
OEH:6110	Rural Health and Agricultural Medicine	3
OEH:6120	Current Topics in Agriculture and Rural Health (taken three times for 1 s.h. each)	3

OEH:6510	Environmental and Occupational Epidemiology	3
OEH:6520	Injury Epidemiology	3
OEH:6720	Advanced Toxicology	4
CPH:4200	Agriculture, Food Systems, and Sustainability	3

### Approved Elective Courses From Other Departments

Courses not on this list may be used as elective credit with advisor approval.

Code	Title	Hours
CBH:4105	Introduction to Health Promotion and Disease Prevention	3
CBH:5235	Community-Based Participatory Research	3
CBH:5305	Evaluation: Approaches and Applications	3
CBH:6220	Health Communication Campaigns	3
EPID:5600	Introduction to Epidemiology Data Management and Analysis	3
EPID:6400	Epidemiology II: Advanced Methods	4
ISE:3400	Human Factors	3

### Thesis

A thesis is required. Students may earn a maximum of 4 s.h. for the thesis.

Code	Title	Hours
OEH:7000	Thesis/Dissertation	arr.

### M.S. with Industrial Hygiene Subprogram

The program prepares students for careers in industrial hygiene as well as the broad field of occupational and environmental health. Career opportunities are available in health and safety departments of industries; in consulting firms; in academic institutions; and in local, state, and federal public health agencies.

Students choose either the thesis (research option) or nonthesis (internship option). Those that select the thesis option conduct a research project and write a thesis. Those that select the nonthesis option complete an internship.

The Master of Science with a major in occupational and environmental health with an industrial hygiene subprogram requires a minimum of 43 s.h. and includes the following coursework.

### Required Courses

Code	Title	Hours
All of these (22 s.h.):		
OEH:4540	Statistics for Experimenters	3
OEH:5010	Occupational and Environmental Health Seminar	1

### Thesis or Nonthesis Option

#### Thesis (Research Option)

##### Research Project and Thesis

Completion of a research project and thesis is required. A maximum of 6 s.h. is allowed for thesis credit in OEH:7000.

Code	Title	Hours
OEH:7000	Thesis/Dissertation	arr.

#### Electives

Thesis option students complete additional elective coursework to earn at least 43 s.h. required for the major. Students work with their advisor to select courses most appropriate for their professional goals.

#### Nonthesis (Internship Option)

##### Internship and Internship Report

Completion of an internship and an internship report is required. A maximum of 3 s.h. is allowed for internship credit in OEH:7050. Students are required to complete a minimum 150-hour internship.

Code	Title	Hours
OEH:7050	Occupational and Environmental Health Internship	0,3

### Electives

Nonthesis option students complete additional elective coursework to earn at least 43 s.h. required for the major. Students work with their advisor to select courses most appropriate for their professional goals.

### Combined Programs

## M.S./M.S. in Urban and Regional Planning

The combined Master of Science in occupational and environmental health/Master of Science in urban and regional planning program requires 65 s.h. of graduate credit. For information about the graduate program in urban and regional planning, see the M.S. in urban and regional planning [p. 1677] (Graduate College) in the Catalog.

Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the combined degree program.

### Admission

Applicants must apply through the Schools of Public Health Application Service (SOPHAS); they also must apply for admission to the Graduate College through the University of Iowa Office of Admissions. For detailed application information and admission requirements, visit the How to Apply to Occupational and Environmental Health web page.

The occupational and environmental health faculty takes several factors into consideration when evaluating applications for admission, including grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests. Students with deficiencies in one area may be admitted if all other components of their application are very strong.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET).

M.S. applicants must hold a bachelor's degree and have a cumulative g.p.a. of at least 3.00. Undergraduate preparation for applicants should include coursework in mathematics, biology, chemistry, and either physical sciences or engineering, depending on the applicant's chosen specialty area.

Students may enter in the fall. May 1 is the final application deadline.

### Financial Support

Most students receive financial support through traineeships, graduate research assistantships, and teaching assistantships.

Students accepted to programs with a focus on occupational health and safety, including agricultural safety and health, ergonomics, industrial hygiene, and occupational injury

prevention, may receive traineeships and financial support in the form of fully paid tuition and a monthly stipend. These traineeships are offered through the Heartland Center for Occupational Health and Safety, and are only available for U.S. citizens and U.S. permanent residents.

Students with a focus on environmental health, global health, or environmental toxicology are generally funded by graduate research assistantships or teaching assistantships.

### Career Advancement

The program prepares students for professional and academic careers in environmental and occupational health. Graduates will be qualified for a career in a range of private, public, and academic positions; consulting firms; state and federal occupational and environmental agencies; chemical and consumer products areas; pharmaceutical industries; and universities.

### Academic Plans

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# Occupational and Environmental Health, Ph.D.

A Ph.D. degree in occupational and environmental health (OEH) is an advanced research degree that emphasizes depth of knowledge and original research skills. The degree is designed to develop leaders in environmental and occupational health research and practice.

Students work with their faculty advisor to design a specialized curriculum of coursework and research projects in the following areas:

- agricultural safety and health
- environmental health
- environmental toxicology
- ergonomics
- industrial hygiene
- occupational epidemiology
- occupational injury prevention

## Requirements

The Doctor of Philosophy program in occupational and environmental health requires 72 s.h. of graduate credit. All students must complete a dissertation.

The Doctor of Philosophy with a major in occupational and environmental health requires the following work.

## Requirements

The graduate Certificate in Translational and Clinical Investigation requires 17 s.h. of graduate credit and may be completed in one year. Certificate requirements include didactic coursework, clinical research preceptorships, and clinical research seminar participation.

The Department of Epidemiology [p. 1987] and the Institute for Clinical and Translational Science (ICTS) offer the certificate for clinicians who seek advanced training in clinical methodology and applied patient-oriented research skills. The certificate program is open to individuals who hold a doctoral-level degree in a clinical discipline (e.g., M.D., D.O., D.D.S., Ph.D., Pharm.D., D.V.M.), are practicing academic clinicians, and are admitted as graduate students to the College of Public Health or are enrolled in a basic or health science doctoral program at the University of Iowa. Other admission requirements are similar to those for the M.S. program in epidemiology.

The Certificate in Translational and Clinical Investigation requires the following work.

**Website:** <https://uc.uiowa.edu>

University College (UC) is home to a wide range of programs for University of Iowa students and precollege students. An overview of the many programs that are housed in University College is provided below.

## Undergraduate Degrees

Two online degree programs, the Bachelor of Applied Studies (B.A.S.) [p. 2028] and the Bachelor of Liberal Studies (B.L.S.) [p. 2031], are administered through University College. Both programs enable students to complete a bachelor's degree through Distance and Online Education [p. 2050]. The B.A.S., designed for graduates of community college technical programs, provides alternatives to traditional academic majors, permitting students to plan their own emphasis areas in consultation with their advisors. The B.L.S. is an interdisciplinary undergraduate degree program without a traditional academic major; students work with their advisors to plan study programs that meet their individual objectives.

## Undergraduate Certificates, Training, and Coursework

The college offers undergraduate Certificates in Clinical and Translational Science [p. 2044], Leadership Studies [p. 2057], Nonprofit Leadership and Philanthropy [p. 2068], Sustainability [p. 2092], and Urban Studies [p. 2105]. University College also is home to many undergraduate research opportunities in the science, technology, engineering, and mathematics (STEM) fields as well as in microbiology and medical scientist training.

An affiliated program, Lifetime Leisure Skills [p. 2062]—offers a broad range of sports and fitness activities, while the Reserve Officer Training Corps programs, Aerospace Studies (Air Force ROTC) [p. 2025] and Military Science (Army ROTC) [p. 2065] prepare undergraduate students for commissions as officers. In addition, there are major college-level programs such as the University of Iowa Honors Program [p. 2099], Study Abroad, [p. 2072] and Career Center Programs [p. 2041].

Students from the University of Iowa, Iowa State University, and the University of Northern Iowa may take courses at Iowa Lakeside Laboratory [p. 2054], and Summer Research Experiences for Undergraduates [p. 2091] develops research skills in students led by UI faculty members.

University College offers courses in several K-12 programs as well: the Belin-Blank Center for Gifted Education [p. 2039], the Center for Diversity and Enrichment [p. 2043], the Secondary Student Training Program [p. 2071], and University of Iowa Upward Bound [p. 2104].

## Student Success and Outreach

**Associate Dean:** Andrew Beckett

Many University College programs serve the entire undergraduate population (particularly first-year students) and are designed to smooth entering students' transition to college life. Students begin their connection to the University College when they take their first online course, CSI:1600 Success at Iowa, at around the same time they attend Orientation. When they arrive on campus, they experience campus life for the first time with the On Iowa! program.

Other programs that promote success include Excelling@Iowa, Hawkeye Talent Initiative, Tutor Iowa, and the Academic Resource Center (ARC). These direct service programs support students when they need support in their college career.

# Aerospace Studies (Air Force ROTC)

## Director

- Lt Col Matthew E. Youmans

**Undergraduate minor:** aerospace studies

**Website:** <https://veterans.uiowa.edu/air-force-rotc>

The Aerospace Studies Program administers the Air Force Reserve Officer Training Corps (AFROTC) at the University of Iowa. AFROTC prepares highly qualified undergraduate students for commissions as officers in the United States Air Force.

While AFROTC is structured primarily for students pursuing active-duty Air Force commissions, any undergraduate or graduate student may take aerospace studies courses for academic credit, with the exception of the leadership laboratories. The amount of credit that may be applied toward a degree varies from college to college at the University of Iowa. The College of Liberal Arts and Sciences, for example, accepts a maximum of 20 s.h. of aerospace studies credit. Additionally, any undergraduate student may apply the courses toward the minor in aerospace studies.

In order to receive a commission, AFROTC cadets must satisfactorily complete all University of Iowa degree requirements as well as courses specified by the U.S. Air Force.

## Undergraduate and Graduate Programs

AFROTC offers programs lasting two, three, or four years. Joining early gives students the opportunity to try AFROTC without obligation. It also can give them an advantage in the scholarship selection process.

The AFROTC program's three main components are the general military course (GMC), the professional officer course (POC), and the Field Training (FT) program.

### General Military Course

The general military course (GMC) consists of one AFROTC course (1 s.h.) and a leadership laboratory taken each semester for two years. Any student who meets AFROTC qualifications and is in good academic standing is eligible to participate in the GMC. Students normally apply for the GMC up to the time they earn 60 s.h. Students who have earned more than 60 s.h. may enroll in the GMC if they are willing to extend their academic plan by a semester or more.

### Professional Officer Course

The professional officer course (POC) consists of one AFROTC course (3 s.h.) and a leadership laboratory taken each semester for two years. Students accepted into the POC make a commitment to serve a minimum of four years as U.S. Air Force officers. To enter the POC, students must be selected to attend and must successfully complete field training. Students generally take the POC during their last 60 s.h.

### Field Training

All POC applicants must successfully complete Field Training (FT) at a U.S. Air Force base. Selection to attend FT is competitive; if selected to attend, students experience

an intensive, two-week program generally completed the summer after the sophomore year. It provides a first-hand look at the active duty Air Force and develops military leadership and discipline. Students participate in junior officer education, marksmanship, hand-to-hand combat training, physical fitness training, and expeditionary skills training in a simulated environment. After completing FT, cadets are ready to return to school and assume leadership positions in the AFROTC program.

## Activities

Students have the option to compete for acceptance to a variety of optional AFROTC summer training programs. If selected, a student may return to Field Training as a cadet training assistant (CTA), travel to another country for a cultural immersion program, or compete for other Air Force immersion programs as available. The Air Force provides transportation, meals, lodging, and a daily expense allowance for all summer programs.

The AFROTC cadet corps also sponsors community service projects, intramural athletics, and social events, including formal and informal dinners.

## Educational Delay

Cadets may request an educational delay to postpone entry to active duty until after completion of an advanced degree or professional training program. Selection for an educational delay is highly competitive.

## Financial Aid

Merit scholarships are available on a competitive basis for two and three years of study. They provide varying awards for tuition and fees, a stipend for books, and a monthly tax-free subsistence allowance. Applicants are selected based on objective and subjective factors. Students should apply to the director of the Aerospace Studies Program.

Nonscholarship cadets in the professional officer course receive some financial assistance. Junior-level cadets receive a \$450 tax-free subsistence allowance per month and senior-level cadets receive a \$500 tax-free subsistence allowance per month.

All uniforms and required AFROTC textbooks are furnished free of charge.

### Aerospace Studies Courses

**AERO:1100 Air Force Heritage and Values I** **1 s.h.**

Introduction to the United States Air Force and Air Force Reserve Officer Training Corps (AFROTC); featured topics include structure of the U.S. Air Force, the Air Force's capabilities, career opportunities, benefits, Air Force installations, core values, leadership, teambuilding, and communication skills. Requirements: first-year or sophomore standing.

**AERO:1119 Crosstown Air Force Mentoring 0 s.h.**  
Mentoring opportunity from an Air Force Officer as needed to provide guidance on the Air Force way of life; for crosstown enrolled Air Force ROTC students. Requirements: crosstown enrollment as AFROTC cadet.

**AERO:1150 AFROTC Leadership Laboratory (LLAB) AS 100-FA 1 s.h.**  
A progression of experiences designed to develop leadership ability; military customs and courtesies, drill and ceremonies, military professional development, the life and work of a junior officer; leadership skills in a practical, supervised military lab setting. Offered fall semesters. Corequisites: AERO:1100. Requirements: first-year or sophomore standing.

**AERO:1159 Crosstown Air Force Lab 0 s.h.**  
A progression of experiences designed to develop leadership ability; military customs and courtesies, drill and ceremonies, and military professional development. Requirements: crosstown enrollment as AFROTC cadet.

**AERO:1200 Air Force Heritage and Values II 1 s.h.**  
Introduction to the United States Air Force (USAF) and Air Force Reserve Officer Training Corps (AFROTC); featured topics include evolution of the U.S. Air Force/Air Force history, principles of war/tenets of air power, what the Air Force brings to the joint fight, Department of the Air Force, and Air Force major commands; leadership concepts including ethical decision making, communication, and professional speaking opportunities. Requirements: first-year or sophomore standing.

**AERO:1250 AFROTC Leadership Laboratory (LLAB) AS 100-SP 1 s.h.**

# Bachelor of Applied Studies

## Associate Dean

- Anne W. Zalenski

## Program Director

- Dawn Freerks

**Undergraduate major:** B.A.S.

**Website:** <https://basbls.uc.uiowa.edu/degrees/bas>

The Bachelor of Applied Studies (B.A.S.) is designed for graduates of community colleges who wish to complete a bachelor's degree by distance education. The degree may be completed completely online or through a combination of on-site and online coursework. Students may earn credit toward the degree with a selection of several types of courses, including semester-based online courses, on-site courses at off-campus locations throughout Iowa, and regular session on-campus courses.

The B.A.S. is a general undergraduate degree without a traditional academic major. Students can design an individual program or select from four optional emphasis areas: creative writing, human relations, justice studies, and political science. B.A.S. students may complete multiple emphasis areas and earn undergraduate certificates offered by the University of Iowa. They may not earn minors or enroll in a second college at the University of Iowa while completing the B.A.S. degree.

Working with their academic advisors, B.A.S. students may plan programs designed to advance their careers, begin new careers, or prepare for graduate or professional study. Students who have specific career goals or advanced degree programs in mind should determine what educational background they will need in order to achieve their goals, and they should include appropriate coursework in their B.A.S. programs.

The B.A.S. is awarded by University College [p. 2023] and is administered by Distance and Online Education [p. 2050].

## Programs

## Undergraduate Program of Study Major

- Bachelor of Applied Studies [p. 2029]

# Bachelor of Applied Studies, B.A.S.

## Requirements

The Bachelor of Applied Studies requires a minimum of 120 s.h. and is intended to be completed entirely by distance education. Students must maintain a cumulative g.p.a. of 2.00 or higher in all coursework attempted, all coursework taken at the University of Iowa, and all upper-level coursework.

After admission to the University of Iowa, one of the following residence requirements must be met—at least 90 s.h. completed at the University of Iowa, or 45 of the final 60 s.h. completed at the University of Iowa, or the final 30 s.h. completed at the University of Iowa.

Students must earn at least 60 s.h. of the minimum 120 s.h. required for the degree at four-year colleges, including 45 s.h. in upper-level coursework. University of Iowa upper-level courses are numbered from 3000 to 4999. Some courses numbered below 3000 may be considered upper level for the B.A.S.; for details, see B.A.S. Upper-level Coursework on the Bachelor of Applied Studies website.

B.A.S. majors who earn the creative writing emphasis may not earn the Certificate in Writing.

Students also must complete the following core requirements and a set of distribution areas; see B.A.S. Core Requirements and Distribution Areas on the Bachelor of Applied Studies website for more information.

## Core Requirements

- Rhetoric coursework equivalent to composition II and speech
- Quantitative or formal reasoning—3 s.h.
- Social sciences—3 s.h.
- Values, society, and diversity—3 s.h.
- Business/management—6 s.h.

## Distribution Areas

Students must complete 12 s.h. in three of the following five distribution areas (total of 36 s.h.). In each distribution area, 6 of the required 12 s.h. must be earned in upper-level courses.

- Communication and arts (e.g., journalism, communication studies, creative writing, art, music)
- Humanities (e.g., literature, history, philosophy, religion)
- Natural sciences and mathematics (e.g., mathematics, biology, statistics, computer science)
- Professional fields (e.g., business, education, nursing, social work, aging and longevity studies)
- Social sciences (e.g., sociology, psychology, economics, political science, anthropology)

All University College policies regarding grading, course drops, withdrawals, academic standards, and so forth apply to B.A.S. students. For more information, see Taking University College Courses on the University College website.

## Optional Emphasis Area

Students may include an emphasis area in their B.A.S. program.

## Creative Writing Emphasis Area

The creative writing emphasis area requires 18 s.h. It provides students with an understanding of the multiple facets of written communication. The emphasis area requires the following coursework.

# Bachelor of Liberal Studies, B.L.S.

## Requirements

The Bachelor of Liberal Studies (B.L.S.) requires a minimum of 120 s.h. of credit. Students must maintain a g.p.a. of at least 2.00 in all coursework for the degree, all University of Iowa coursework, and all coursework for the B.L.S. track.

After admission to the University of Iowa, one of the following residence requirements must be met—at least 90 s.h. completed at the University of Iowa, or 45 of the final 60 s.h. completed at the University of Iowa, or the final 30 s.h. completed at the University of Iowa.

Students must earn at least 60 s.h. of the minimum 120 s.h. required for the degree at four-year colleges, including 30 s.h. in upper-level coursework. University of Iowa upper-level courses are numbered from 3000 to 4999.

B.L.S. students must complete a required set of common core courses and a B.L.S. track, as part of the total number of semester hours required for the degree. Students select at least one track from six options: expression in writing and arts; family, community, and social support; global studies; health and human studies; justice and ethics; and organizational studies. Students may complete more than one track.

All University College policies regarding grading, course drops, withdrawals, academic standards, and so forth apply to B.L.S. students. For more information, see the For Students section on the University College website.

The following coursework is required for all B.L.S. students.

## B.L.S. Common Core

Common core courses develop fundamental skills in writing, critical thinking, information literacy, and leadership and give students the opportunity to explore ideas from multiple perspectives.

Some courses in the common core are part of the College of Liberal Arts and Sciences (CLAS) General Education Program Two, as indicated below. Students should contact the B.L.S. advisor for information about additional courses that will fulfill their common core requirements.

## Rhetoric

Rhetoric courses help students develop speaking, writing, listening, and critical reading skills. Courses approved for the Rhetoric area of the CLAS General Education Program satisfy the B.L.S. Rhetoric requirement.

Code	Title	Hours
RHET:1030	Rhetoric	4-5

Students who have transfer credit in composition, speech, and argumentation may instead be held to one of the following.

Code	Title	Hours
RHET:1040	Writing and Reading	3
RHET:1060	Speaking and Reading	3

Students should contact a B.L.S. advisor about which rhetoric course they may need to fulfill the rhetoric requirement.

See Rhetoric courses offered by distance education on the MyUI website.

## Interpretation of Literature

This area, which focuses on the major genres of literature, improves students' abilities to read and analyze a variety of texts. Students must complete one approved course (3 s.h.) in this area. They may use any 3 s.h. course approved for the Interpretation of Literature area of the CLAS General Education Program Two.

See Interpretation of Literature courses offered by distance education on the MyUI website.

## Natural Sciences

Natural sciences courses explore the scope and major concepts of a scientific discipline. Students must complete one approved course (3 s.h.) in this area. They may use any 3 s.h. course approved for the Natural Sciences area of the CLAS General Education Program Two.

See Natural Sciences courses offered by distance education on the MyUI website.

## Global Perspectives

Global perspectives courses encourage students to understand issues from an international perspective. Students must complete one approved course (3 s.h.) in this area. They may use any 3 s.h. course approved for the International and Global Issues area of the CLAS General Education Program Two.

See International and Global Issues courses offered by distance education on the MyUI website.

# Belin-Blank Center for Gifted Education

## Director

- Susan G. Assouline

**Website:** <https://belinblank.education.uiowa.edu>

The Connie Belin & Jacqueline N. Blank International Center for Gifted Education and Talent Development is dedicated to serving the needs of the gifted community at local, national, and international levels. It offers programs for preservice and inservice educators, including the State of Iowa Talented and Gifted Endorsement. Its online and on-campus courses about the nature and needs of gifted learners, as well as about ways to facilitate talent development, support the professional development of educators worldwide.

The center is home to the Assessment and Counseling Clinic and the Acceleration Institute.

## Precollege Program Offerings

The Belin-Blank Center offers a wide variety of programs for precollege students.

## Belin-Blank Exceptional Student Talent Search

The Belin-Blank Exceptional Student Talent Search (BESTS) (grades 4-9) helps determine talented students' academic abilities and needs.

## Invent Iowa

As one of the state's original science, technology, engineering, and math (STEM) programs, Invent Iowa (grades K-12) is a comprehensive statewide program developed to support educators in promoting the invention process. Since 1999, the Invent Iowa program has been a part of the Belin-Blank Center.

## Junior Science and Humanities Symposium

The Junior Science and Humanities Symposium (grades 9-12) engages students in original research and experimentation in the STEM fields (science, technology, engineering, and math). Students present the results of their research to a panel of judges and an audience of their peers at the Iowa Regional Junior Science and Humanities Symposium. The top two presenters are invited to present at the national symposium.

## Scholastic Art & Writing Awards

The Belin-Blank Center is proud to serve as the Iowa and Midwest region at-large affiliate for the Scholastic Art & Writing Awards (grades 7-12), which recognizes achievement in the literary and visual arts. The Scholastic Art & Writing Awards program is the nation's longest-running, largest, and most prestigious recognition program for creative teens. Over the past 90 years, the Awards have recognized and encouraged artists and writers such as Sylvia Plath, Andy Warhol, Truman Capote, Robert Redford, Tom Otterness, Zac Posen, among countless others.

## Weekend Enrichment Program

The Weekend Enrichment program (grades 2-8) consists of half-day enrichment opportunities for elementary and junior high students that take place on the University of Iowa campus. Classes in STEM, arts, and the humanities cultivate students' interest and enliven their curiosity.

## Summer Programs

The Belin-Blank Center also offers the following summer programs, many of which are residential programs held on the University of Iowa campus during the summer. Students in each program participate in cultural and recreational activities and have access to the University's libraries, computer facilities, and study areas. For residential programs, housing and meals are provided at the University's residence halls. Junior Scholars Academy students do not stay on campus.

## Blank Summer Institute

The Blank Summer Institute for the Arts & Sciences (BSI) is a one-week program that provides an intensive, advanced educational experience designed to enhance exceptionally talented students' intellectual and social growth. The BSI plan of study complements the regular school curriculum. Students are nominated for one of eight courses.

To be eligible for BSI, students must be Iowa residents, must be completing grade 7 or 8, and must be nominated by their schools. Students selected for BSI receive a scholarship to cover part of the institute's cost.

## Junior Scholars Academy

The Junior Scholars Academy (JSA), formerly known as Blast and the Junior Scholars Institute, hosts students (grades 2-8) with a deep curiosity, a love of learning, or a great deal of talent in a particular area. It is a summer program designed specifically for bright elementary and middle school students who want to thoroughly explore a topic while having fun with other kids who share their enthusiasm for learning. Students choose one class to focus on all day, for a full week.

## Perry Research Scholars Institute

Students completing grade 9 or 10 may apply for the Perry Research Scholars Institute (PRSI), a two-week residential summer academic program. PRSI students experience first-hand the wide variety of research that takes place at a research intensive university. Students earn 1 s.h. of academic credit. Visit the PRSI website to learn more about the program, including eligibility and application.

## Secondary Student Training Program

Students completing grade 10 or 11 may apply for the Secondary Student Training Program (SSTP), a five and one-half-week residential summer research program. SSTP students conduct research in university research groups under the guidance of a faculty mentor. Students earn 3 s.h. of academic credit. Visit the SSTP website to learn more about the program, including eligibility and application. See the Secondary Student Training Program [p. 2071] (University College) in the Catalog.

## Summer Art or Writing Residency

The Summer Art Residency or Summer Writing Residency offers a three-week residential program for students completing grade 9, 10, or 11. The two programs immerse students in the creative environments of the University of Iowa's world-class faculty in art or writing. Out of

class opportunities include evening tours, lectures, and events that are designed to stretch the developing artist or writer. Students earn 2 s.h. of academic credit. For more information about the center and its programs, contact the Belin-Blank Center or visit its website.

## College Early Entrance Program

### Bucksbaum Early Entrance Academy

The Bucksbaum Early Entrance Academy (grades 10-11) gives high-achieving students the opportunity to enroll at the University of Iowa before they finish high school. The academy provides top students with high-level curriculum and research opportunities while supporting them through the transition from high school to the university. To enter the program, students must have completed grade 10 or the equivalent. The program is open to high-ability students worldwide.

## Courses

### Belin-Blank Center for Gifted Education Courses

#### **BBC:1000 Bucksbaum Academy Second-Year Seminar** **1 s.h.**

Unites self-efficacy skills attained in first-year seminar experience with exploration of how to foster more fulfilling and productive lives; understanding and development of high potential; for Bucksbaum Academy second-year students and early-entrance program supported by the Belin-Blank Center.

#### **BBC:1001 Summer Art Residency** **2 s.h.**

Partnership between Belin-Blank Center and the UI School of Art and Art History; designed for talented high school artists from across the country; taught by faculty, staff, and graduate students from the School of Art and Art History and special visiting artists.

#### **BBC:1002 Summer Writing Residency** **2 s.h.**

Partnership between Belin-Blank Center and the UI undergraduate creative writing program; designed for talented high school writers from across the country; taught by faculty, staff, and graduate students from the English department, Iowa Writers' Workshop, and special visiting authors.

#### **BBC:1003 Perry Research Scholars Institute** **1 s.h.**

Perry Research Scholars Institute is an introductory-level, research-preparatory program that grants behind-the-scenes access to ways and places to discover new knowledge on many different topics—spend days with a backstage pass to cutting-edge facilities and spaces at a major research institution, hear from University of Iowa faculty researchers and their teams on how the research process works, the many different ways that research can look, and even the ways one can pursue a research career. Requirements: acceptance to Perry Research Scholars Institute.

# Career Center Programs

## Director

- Angi McKie

**Website:** <https://careers.uiowa.edu/>

The University of Iowa Marvin A. and Rose Lee Pomerantz Career Center administers the University's Career Center Programs. Students may use the Pomerantz Career Center's services at any time during their academic careers. The center encourages entering first-year and transfer students to visit after they arrive on campus and to make use of all of the center's services throughout their study at Iowa.

The center offers tailored professional career advising to students who are deciding on majors that connect with career interests, résumé and cover letter help, job and internship strategies, ways to gain hands-on experience, interview strategies, preparing for graduate school, and other career-related topics. Students also can drop in daily for assistance from career peer advisors. Workshops and programs are presented to students across campus on career and professional development-related topics each semester.

Academic courses in career-related topics, such as career exploration and job search skills, are available each semester for academic credit ranging from 1-3 s.h. per course. See "Professional Development Courses" below for more information. Other courses are offered through the Leadership Studies Program [p. 2057].

The center hosts several career fairs and events each fall and spring, offering students the opportunity to talk with and learn about prospective employers.

The Pomerantz Career Center facilitates job and internship interviewing with a wide range of employers: regional, national, and international; profit and nonprofit; state and federal government. Employers conduct on-campus interviews at specific times during the year, and many post immediate openings year-round for internships and for full-time positions. On-campus recruiting and job, internship, and student employment postings are available online; visit Handshake on the Pomerantz Career Center website.

The center helps students find internships in Iowa, the Midwest, nationwide, and sometimes in other countries. For discipline-related internships (all require course registration), see Courses [p. 2041] in this section of the Catalog.

For more information about the center's services and facilities, contact the Pomerantz Career Center.

## Professional Development Courses

Professional development courses give students the opportunity to engage in practical, hands-on, skills-based instruction relevant to careers and leadership development. The topics and curricula for the following courses incorporate input from employers, who were surveyed about their experiences, real-world examples, guidance, and the skills they most often seek when hiring new graduates.

- CCP:3106 Career Computing Skills** 2 s.h.  
Students learn to use a variety of software to complete projects that will be relevant in advancing their careers (i.e., improving résumés, creating job search documents, utilizing various tools for meetings, developing professional presentations); email etiquette and efficiency; effective file storage.
- CCP:3107 Social Media for Your Job Search** 1 s.h.  
Effective use of social media for networking as part of preparing for a job search; efficient identification and utilization of online tools (e.g., LinkedIn, Twitter); building a professional online presence; creating a plan for utilizing social networks for an entry-level job search.
- CCP:3169 Internship in Graduate Studies** 0 s.h.  
Recognition of practical work experience and internships. Requirements: admission to Graduate College.
- CCP:3203 Investment Wise: Personal Investment Basics** 2 s.h.  
Basic understanding of general principles of personal investing; topics may include compounding, stocks, bonds, mutual funds, 401K/403B, IRAs, diversification, and asset allocation.

# Center for Diversity and Enrichment

## Director

- Tabitha N. Wiggins

**Website:** <https://diversity.uiowa.edu/division/center-diversity-and-enrichment-cde>

The Center for Diversity and Enrichment offers the Iowa First Nations summer program for high school students and the Iowa Edge program for students entering the University of Iowa.

## Precollege Program of Study

### Iowa First Nations

The Iowa First Nations program enables high school students to explore the educational opportunities offered on the University of Iowa campus and by the higher education field. Iowa First Nations students live on campus for a week (Monday through Friday), spending five nights in one of the University's residence halls. They go on structured field trips to campus departments, participate in hands-on classroom experiences, and take part in activities on campus and in the community.

## Undergraduate Program

### The Iowa Edge

The Iowa Edge program is a retention program that supports incoming students as they make their transition to the University of Iowa. The program is held on Sunday through Wednesday, the week before fall semester classes begin. Iowa Edge students move into the residence halls early, learn about campus resources, become familiar with the campus setting, engage in academic sessions with faculty, explore identity, and build community with other students. Current UI students serve as Iowa Edge peer leaders, facilitating the program.

## Courses

## Center for Diversity and Enrichment Courses

**CDE:0023 Iowa First Nations** **0 s.h.**

**CDE:2013 Iowa Edge Peer Leader Training** **1 s.h.**

Preparation for role of Iowa Edge Peer Leader; working with African American, Alaskan Native, American Indian, Asian American, Pacific Islander, Latino/a, and first generation college students; development of leadership, group facilitation, presentation, and peer mentoring skills.

# Clinical and Translational Science

## Coordinator

- Lori Adams (Biology), Vincent G. Rodgers (Physics and Astronomy)

**Undergraduate certificate:** clinical and translational science

**Website:** <https://icts.uiowa.edu/workforce-development/undergraduate-certificate-clinical-and-translational-science>

Translational science focuses on applying biomedical discoveries to health care. It requires team-based interdisciplinary approaches to move research-generated discoveries into clinical trials and to facilitate the adoption of best practices in clinical and community settings. Investigators in translational science understand principles involved in foundational research and how such research relates to epidemiology, behavioral medicine, and patient-oriented research.

Opportunities for training in translational science are available through graduate and professional study in medicine, public health, nursing, dentistry, pharmacy, and other allied health professions, including biostatistics, behavioral medicine, clinical pharmacology, and epidemiology.

The certificate program in clinical and translational science provides undergraduates with opportunities to connect their research activities to translational science and to begin training in the discipline.

The Certificate in Clinical and Translational Science is presented by the Institute for Clinical and Translational Science and Iowa Biosciences Academy; it is administered by University College.

### Undergraduate Program of Study Certificate

- Certificate in Clinical and Translational Science [p. 2045]

# Clinical and Translational Science, Certificate

## Requirements

The undergraduate Certificate in Clinical and Translational Science requires 16 s.h. of credit. Students must maintain a g.p.a. of at least 3.00 in the certificate's core courses. Work for the certificate includes core courses and electives. Students must complete all coursework for the certificate within three years of entering the program.

The Certificate in Clinical and Translational Science requires the following coursework.

## Core Courses

Code	Title	Hours
All of these (10 s.h.):		
EPID:4400	Epidemiology I: Principles	3
STAT:3510/ IGPI:3510	Biostatistics (or an equivalent course)	3
URES:3001	Introduction to Translational Research (must take EPID:4400 before or at the same time as this course)	2
URES:3002	Practicum in Clinical and Translational Science (capstone course; must take URES:3001 before this course)	2

## Electives

Students must earn a total of 6 s.h. in courses chosen from the following lists.

## Creative Writing

Code	Title	Hours
CNW:3664	Writing About Science	3

## Life Sciences

## Admission

Admission to the certificate program is selective. Applicants must fulfill the following requirements by the end of the semester in which they apply:

- have a cumulative g.p.a. of at least 3.00;
- have earned a minimum of 45 s.h. of college-level credit;
- have been engaged in mentored scientific research at the University of Iowa;
- have completed one of these: BIOL:1411 Foundations of Biology or BIOL:1141 Human Biology: Health Professions; and
- have completed one of these: MATH:1380 Calculus and Matrix Algebra for Business or MATH:1460 Calculus for the Biological Sciences or MATH:1550 Engineering Mathematics I: Single Variable Calculus or MATH:1850 Calculus I.

## Application

Interested students should apply on the certificate program's student application system. Applications are accepted on a rolling basis and are reviewed by the Certificate in Clinical and Translational Science Steering Committee. Students will receive an email after an admissions decision has been made. Consult the Undergraduate Certificate in Clinical and Translational Science website for more information.

Applications should include the following:

- a description of the student's undergraduate research (maximum of 1,000 words), including the approximate number of hours per week the student spends conducting the research and the name and email address of the student's research mentor;
- a personal statement outlining the student's professional and career goals;
- a copy of the student's grade report from MyUI; and
- a letter of recommendation from the student's research mentor.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# College Success Initiatives

## Coordinator

- Lisa Ingram

College Success Initiatives (CSI) courses are designed to support new first year and transfer students in their transition to the University of Iowa. In addition, CSI courses enrich students' experiences, develop their academic skills, and prepare them for college-level learning.

College Success Initiatives courses are administered by the associate provost for undergraduate education through the Academic Advising Center and University College.

## Courses

### College Success Initiatives Courses

#### CSI:1020 Academic Seminar I 3 s.h.

Development of knowledge and skills essential for academic success at college level; reading, writing, and communication skills; focus on reading comprehension, class discussion, and development of writing process; various narratives including published collections of essays and peers' texts; writing process and techniques, and components that bring each piece together. Requirements: IowaLink participant.

#### CSI:1021 Academic Seminar II 3 s.h.

Continued development of knowledge and skills necessary for academic success; reading, writing, and communication skills; experimentation with ethnographic research methods, exploration of cultures and subcultures; writing about findings in various experimental forms, using as a model, short ethnographic essays, excerpts from a graphic novel; focus on reading comprehension strategies, class discussion, and development of writing process. Requirements: IowaLink participant. Recommendations: CSI:1020.

#### CSI:1050 The Iowa Edge 1 s.h.

Preparation for academic success; students engage and participate in a series of interactive presentations, discussions, and activities; introduction to campus resources; connect with support staff; opportunities to question faculty from various departments; students build community with other participants, take part in team-building activities, and learn leadership skills that will serve them throughout their college careers; for first-year students accepted to the Iowa Edge program. Requirements: offer and acceptance to the Iowa Edge program.

#### CSI:1100 College Transition Seminar 1 s.h.

College culture, University of Iowa resources, refinement of study skills, test taking, identification of personal values, self-motivation, goal setting; taught in small sections with emphasis on classroom discussion. Requirements: entering first-year student.

#### CSI:1150 College Transition Workshop 1 s.h.

Preparation for affiliated lecture course; practical context to apply, evaluate, and refine study skills strategies explored in CSI:1100; expand study strategies, enhance grasp of affiliated course material, and apply study skills to future coursework. Corequisites: CSI:1100. Requirements: concurrent enrollment in a CIC affiliated lecture course.

#### CSI:1200 First-Year Seminar 1 s.h.

Introduction to the intellectual life of the University; opportunity to work closely with a faculty member or senior administrator; active participation that eases the transition to college-level learning.

#### CSI:1210 Peer Led Undergraduate Study (PLUS) 0 s.h.

Peer guided and facilitated academic support focusing on quantitative problem-solving skills; students discuss course material, address multiple course concepts, and develop tools and skills for effective study habits. Corequisites: CHEM:1070 and MATH:1005.

#### CSI:1213 Special Topics I 0-6 s.h.

Special topics offered through University College.

#### CSI:1214 Special Topics II 0-6 s.h.

Special topics offered through University College.

#### CSI:1215 Exploring Liberal Arts 2 s.h.

Introduction to the benefits of exposure to opportunities made available through higher education, particularly in liberal arts/humanities fields; focus on literacies practiced in a liberal arts curriculum—reading, writing, speaking, and listening; students gain a basic understanding of how their development in these practices support their self-efficacy in academic success, obtaining employment, being a productive citizen, and living a fulfilling life.

#### CSI:1217 Singing, Reflecting, and Writing in a Choir 2 s.h.

Students explore musical, social, and civic learning opportunities through group singing—practicing solfège, improvising, reading traditional music notation, developing rhythmic competencies (e.g., performing a steady beat, understanding meter, practicing vocal techniques)—and writing reflectively and critically on choral singing in prisons.

#### CSI:1250 Introduction to Law Study and Legal Careers 1 s.h.

Introduction to legal education and careers; exploration of role of law in society, nature of legal education, careers in law, and current legal issues; opportunity for students to begin reflecting on their own interest in this field.

#### CSI:1270 Strategies for Veteran Success 2 s.h.

Promotion of academic success, improve retention of student veterans, and assist in cultivating a systematic approach to career planning and decision making; primary focus on available resources, identification of individual goals and strengths, development and application of study skills and time management strategies, and problem solving related to personal issues or barriers that could impede student transition and academic performance; for student veterans and service members in academic transition from active duty military or guard/reserve status to the University of Iowa. Requirements: veteran status.

#### CSI:1280 Steps to Success for TRIO: Step I 1 s.h.

Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; first in a series of courses.

#### CSI:1281 Steps to Success for TRIO: Step I 1 s.h.

Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; second in a series of courses.

#### CSI:1290 Steps to Success for TRIO: Step II 1 s.h.

Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; third in a series of courses.

- CSI:1291 Steps to Success for TRIO: Step II** 1 s.h.  
Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; fourth in a series of courses.
- CSI:1380 Steps to Success for TRIO: Step III** 1 s.h.  
Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; fifth in a series of courses.
- CSI:1381 Steps to Success for TRIO: Step III** 1 s.h.  
Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; sixth in a series of courses.
- CSI:1390 Steps to Success for TRIO: Step IV** 1 s.h.  
Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; seventh in a series of courses.
- CSI:1391 Steps to Success for TRIO: Step IV** 1 s.h.  
Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; eighth in a series of courses.
- CSI:1400 Explore Iowa: Your Passport to the University and Beyond** 2 s.h.  
Attendance and discussion at eight events of student's choice, selected from the University and Iowa City's rich event offerings.
- CSI:1410 Life Design** 2 s.h.  
Students discover what they are innately drawn to do through stories, lectures, assigned readings, guest speakers, and reflective writing; integration of worldview and professional life; practical skills and exercises for investigating different career paths; cultivating mentors; relationship between ambition, drive, and success; role of happiness in achieving excellence and success.
- CSI:1420 Life Design II: A Better World** 2 s.h.  
Once you start unraveling who you are, the next matter becomes what world do you want to live in? Readings, structured experiments, and written reflections provide generalizable knowledge about the science of empathy, passion, and perseverance; students apply these insights to efforts "bigger than themselves" and a deliberate path to become agents of social and environmental change.
- CSI:1450 Explore Iowa Colloquium** 3 s.h.  
Opportunities for peer mentors involved in CSI:1400; activities include short readings and media screenings related to innovative and best practices in learning and teaching; emphasis on multimodal writing online for peers; informal presentations and reflections; may include work with Passport Projects students, collaboration on development of guidelines and handouts for best practices in writing, and supplemental writing reflections.
- CSI:1460 Athletic Transition Seminar** 1 s.h.  
Overview of the Hawkeye Life Program for new student athletes; foundational pillars for all student athletes at the UI; application of skills in leadership, community engagement, academic success, career development, health and well-being, diversity and inclusion through exploration and application of these pillars; students further examine their academic, personal, and career goals.
- CSI:1470 The Hawkeye Life Experience** 1 s.h.  
Experiential seminar for student athletes; students select events that focus on leadership, community engagement, academic success, career development, health and well-being, and diversity and inclusion from the Hawkeye Life Program; students post written reflections of their experiences online and reflect on their experiences during seminar-style class discussions.
- CSI:1490 Flip the Script** 1 s.h.  
Sexual assault resistance education designed specifically for university women; theory, research evidence, and best practices for helping women resist acquaintance sexual assault; consists of four core units in which information is provided and skills are taught and practiced with the goal of being able to assess risk from acquaintances, overcome emotional barriers in acknowledging danger, and engage in effective verbal and physical self-defense.
- CSI:1500 College Success Seminar** 1 s.h.  
Skills, habits, and mindsets essential for college success: goal setting, motivation, resiliency, time management, preparing for exams, working with instructors, and using campus resources including academic advisors, the Pomerantz Career Center, and University Counseling Service; emphasis on class participation and completion of assignments related to course topics. Requirements: selected students with first-year standing in the College of Liberal Arts and Sciences.
- CSI:1550 Strategies for Academic Success** 1 s.h.  
Designed for second-year students; focus on academic performance; topics include organization, goal setting, motivation, time management, study skills, test preparation, and campus resources; requires class participation and completion of assignments related to course topics. Requirements: second-year standing in the College of Liberal Arts and Sciences and no prior credit earned for CSI:1500.
- CSI:1600 Success at Iowa** 0-2 s.h.  
Online course designed to help students transition successfully to the University of Iowa; required of all new undergraduate first-year and transfer students.
- CSI:1650 College Success for International Students** 1 s.h.  
Skills and resources to help international students achieve academic success; reflection on academic habits and experiences; exploration of study skills and strategies; cultural expectations in U.S. academic settings including academic integrity; culture shock and immigration issues that can impact international students at the UI; development of techniques for time management and goal setting; techniques to stay motivated and manage stress; overcoming barriers to student success; discussions and assignments emphasize self-reflection on class topics including time management, study skills, and cultural identity. Same as CLAS:1650, ESL:1650.
- CSI:2020 Learning Assistants Training** 0,3 s.h.  
Enhancement of skills that lead to success in facilitating collaborative learning; helping skills, knowledge, and peer support to promote deeper reflection, learning, and application of content; use of collaborative activities and discussions to highlight concepts and skills, and individual reflection assignments to promote metacognition; led by UI Academic Support and Retention; for learning assistants in first semester of role.

**CSI:2021 First Gen Hawks Seminar 1 s.h.**

Opportunity to be part of a class planned specifically for First Gen Hawks; students connect with the UI in a meaningful way through one of three learning track areas—civic engagement and leadership, on-campus student employment, or undergraduate research; classes focus on one of the experiential track areas and skill development for collegiate learning; course format includes small class size with lots of classroom discussion; assignments emphasize self-reflection and track areas to equip students with the information and skills they need to thrive at the University of Iowa. Requirements: participation in First Gen Hawks program.

**CSI:2030 Learning Assistant Advanced Practicum 0,2 s.h.**

Opportunity to continue to develop skills in facilitating collaborative learning environments; application of pedagogy concepts to learning assistant experience; students facilitate activities in assigned lecture courses and reflect on their experience in advanced practicum sessions; topics include helping skills, metacognition, study strategies, diversity, equity, inclusion, and motivation in learning environments; exploration of problem solving and personal growth. Prerequisites: CSI:2020. Requirements: 3.00 UI cumulative g.p.a., and grade of B or higher in the course being served as returning learning assistant.

**CSI:2100 The Transfer Transition 1 s.h.**

Adjustment to university life and academics; strategies for academic success including study and test-taking skills, time management, utilization of campus resources for success in courses; planning a major and learning about Career Center services; exposure to university culture; opportunities to reflect on adjustment to the University. Requirements: entering transfer student standing.

**CSI:2210 Iowa Criminal Justice Policy and Reform 3 s.h.**

Introduction to contemporary discussions of policy and reform across all stages of criminal justice system including policing, pretrial detention, sentencing, incarceration, and reentry; current practices and policies; development of applied skills in policy analysis and communication; course material extends beyond policies for crime reduction and considers policies geared towards other outcomes (i.e., reducing inequalities and racial disparities in the criminal justice system); exploration of criminal justice policies through an Iowa lens at state and local levels. Same as CRIM:2210.

**CSI:2600 UNI Regents Online Course Exchange 1-4 s.h.**

University of Northern Iowa Online Course Sharing course; offered by the University of Northern Iowa (UNI) to University of Iowa students as part of an Iowa Board of Regents online course sharing project between the University of Iowa (SUI), Iowa State University (ISU), and the University of Northern Iowa (UNI).

**CSI:2610 ISU Regents Online Course Exchange 1-4 s.h.**

Iowa State University Online Course Sharing Course; offered by Iowa State University (ISU) to University of Iowa students as part of an Iowa Board of Regents online course sharing project between the University of Iowa (SUI), Iowa State University (ISU), and the University of Northern Iowa (UNI).

**CSI:3400 Criminology Mentoring Program 1 s.h.**

Career search through self-exploration, research, and discussion in area of criminology; preparation for criminology capstone and/or internship program; creation of an individual development plan; individual meetings with instructor at beginning and end of semester; bimonthly meetings to discuss aspects of criminology from a practical perspective; identification of student interests and potential career paths.

# Distance and Online Education

## Associate Dean

- Anne W. Zalenski

**Website:** <https://distance.uiowa.edu/>

Distance and Online Education (DOE) increases access to the services and resources at the University of Iowa to students and other constituents across the state. In partnership with the University's colleges and departments, DOE provides high-quality credit coursework, degrees, and certificate programs to traditional and nontraditional learners. Using a variety of locations, schedules, and technologies, DOE helps provide a University of Iowa learning environment beyond the physical borders of the Iowa City campus. In addition, many on-campus students enjoy the flexibility that online coursework affords them. Courses offered through University College are taught by University of Iowa faculty and staff members.

## Programs of Study Online or on Location in Iowa

There are over 30 undergraduate, graduate, and professional degrees and certificates available either online or on location in Iowa. DOE consistently offers over 600 online or on location courses during the academic year.

For additional information on a particular program, see the program finder on the DOE website.

## Resource Centers

Distance and Online Education partners with resource centers across the state of Iowa. The primary goal of the centers is to increase access to high-quality undergraduate and graduate educational opportunities to students in the region where they live. These opportunities are delivered in a variety of formats including online and on location. Community partnerships also have been created through the centers which further benefit Iowans.

### Western Iowa Regents Resource Center

**Director:** Steve Warnstadt

**Website:** <https://wirrc.org>

Western Iowa Regents Resource Center (WIRRC) works with community colleges in their service areas to provide access to quality education to students in western Iowa. Offices are located in Council Bluffs, Sioux City, and Sheldon. Coursework and degree programs are provided by the three state universities.

### Iowa Lakeside Laboratory and Regents Resource Center

**Executive Director:** Mary P. Skopec

**Website:** <https://iowalakesidelab.org>

This center is located near Milford, Iowa, on scenic West Okoboji Lake on Little Miller's Bay. Iowa Lakeside Laboratory is a field station run cooperatively by the University of Iowa, Iowa State University, and the University of Northern Iowa, and administered by the University of Iowa. The laboratory offers summer courses and research opportunities for

undergraduate and graduate students. Courses focus on the ecology, taxonomy, and conservation of northern plains animals, plants, microorganisms, and ecosystems.

## Des Moines Programs

**Contact:** Anne W. Zalenski

**Website:** <https://desmoines.uiowa.edu>

Social work programs, graduate degrees, and certificates are offered at the John and Mary Pappajohn Education Center (JMPEC), located in downtown Des Moines, Iowa. Close to many corporate businesses and government offices, JMPEC is an ideal location for a variety of students who want to further their education.

# Hawkeye Talent Initiative

## Coordinator

- Mirra L. Anson

**Website:** <https://careers.uiowa.edu/students/hawkeye-talent-initiative>

The Hawkeye Talent Initiative is a program that seeks to expand access to higher education at the University of Iowa. It provides talented low- and moderate-income students assistance in the achievement of academic success through academic coaching, peer mentoring, and student employment options. Students participate in activities that enhance their college experience inside and outside the classroom.

Entrance to the program is based on high school grade-point average, standardized test scores, and family income.

# Intercollegiate Athletic Participation

## Director

- Elizabeth A. Tovar

**Website:** <https://academics.hawkeyesports.com/>

Students who are members of University of Iowa intercollegiate athletics teams may register for CSI:1460 Athletic Transition Seminar and CSI:1470 The Hawkeye Life Experience.

First year student-athletes who enroll in CSI:1460 Athletic Transition Seminar receive 1 s.h. of graded credit. The course provides new student-athletes with an overview of the Hawkeye Life Student Development Program through the athletic department, and helps with their transition to college. Through the exploration and application of leadership, community engagement, academic success, health and well-being, career development, and diversity and inclusion, students are able to apply concepts learned in class to assist with their academic, personal, and career goals.

Student-athletes who are sophomore level and above may enroll in CSI:1470 The Hawkeye Life Experience and receive 1 s.h. of graded credit. The course is an experiential seminar for student-athletes. Students select events that focus on leadership, community engagement, academic success, career development, health and well-being, and diversity and inclusion. The course may be repeated for up to 4 s.h. of graded credit.

Registration for CSI:1460 Athletic Transition Seminar and CSI:1470 The Hawkeye Life Experience requires permission from Student-Athlete Academic Services. Members of University of Iowa sport clubs are not eligible to enroll in CSI:1460 or CSI:1470.

# Iowa Biosciences Academy

## Director

- Lori Adams (Biology)

**Faculty:** <https://iba.biology.uiowa.edu/people>

**Website:** <https://iba.biology.uiowa.edu>

Iowa Biosciences Academy (IBA) is a competitive undergraduate research and academic enrichment program funded by the National Institutes of Health (NIH). The program identifies academically talented underrepresented junior and senior college students who aspire to research careers and gives them first-rate training that facilitates entry into doctoral programs in biomedical, behavioral, and biophysical sciences.

Students have opportunities to work in research laboratories with faculty mentors during the course of their undergraduate careers. The program's faculty represents a broad range of disciplines in the basic and biomedical sciences. IBA students also benefit from specialized coursework, career counseling, and academic advising for biomedical and bioscience careers.

## Undergraduate Program

Students selected for the Iowa Biosciences Academy must maintain good standing in academics and research. Good academic standing requires a g.p.a. of at least 3.00 and is evaluated at the end of each semester. Good research standing is determined by each student's research mentor. Students work with their mentors throughout the academic year and summer.

Each semester, IBA students enroll in IBA:1041 IBA Student Development Seminar (1 s.h.), which is a professional development course designed to help them navigate their laboratory work, mentor/mentee relationships, apply to graduate school, and distill scientific research. They also enroll in IBA:3992 IBA Research in Biomedical Science (0 s.h.) to denote research done in a laboratory.

Students may choose to remain on campus for the eight-week summer session. They earn pay for laboratory work with their research mentors and may participate in IBA events.

## Faculty

Faculty members from the University's broad range of basic and biomedical science disciplines serve as teachers and mentors to IBA students. They represent many departments, including anatomy and cell biology, biochemistry and molecular biology, biology, biomedical engineering, chemistry, health and human physiology, microbiology and immunology, molecular physiology and biophysics, neuroscience, nursing, physics, and psychological and brain sciences.

## Admission

## Application Process

Applications are accepted from current University of Iowa undergraduate students majoring in the sciences as well as students transferring to the University of Iowa. Students interested in research and graduate school are encouraged to apply. Those who are accepted into the program and maintain

good academic standing earn pay for their laboratory work during the summer and academic year.

## Admission Requirements

Applicants must:

- be a junior or senior college student;
- have a strong interest in pursuing a research career;
- have a qualifying academic major;
- be in good academic standing;
- submit an Iowa Biosciences Academy (IBA) application, including short essays; and
- submit one letter of recommendation from a science/math instructor or research mentor.

Admission requires an interview. Admission decisions are generally made in March, July, and October. For more information, including an online application form, see the Iowa Biosciences Academy website.

## Courses

## Iowa Biosciences Academy Courses

**IBA:1041 IBA Student Development Seminar** **1 s.h.**

Academic and professional development; presentations by faculty researchers, admissions representatives, or students in graduate bioscience programs; discussions about succeeding at the University; talks by professional educators on topics such as effective study skills.

**IBA:3992 IBA Research in Biomedical Science** **0 s.h.**

Registration in a section taught by student's research mentor. Requirements: enrollment in IBA.

# Iowa Lakeside Laboratory

## Director

- Mary P. Skopec (Geographical and Sustainability Sciences)

## Iowa State University participating faculty

- Lori Biederman (Ecology, Evolution, and Organismal Biology), James Colbert (Ecology, Evolution, and Organismal Biology), Mary Harris (Natural Resource Ecology Management), Elizabeth Swanner (Geological and Atmospheric Sciences)

## University of Iowa participating faculty

- John F. Doershuk (Anthropology), Andrew A. Forbes (Biology), Marc A. Linderman (Geographical and Sustainability Sciences), Silvia Secchi (Geographical and Sustainability Sciences), Adam Skibbe (University College)

## University of Northern Iowa participating faculty

- Laura Jackson (Biology), Mark Meyers (Biology), Patrick Pease (Geography/Social Science and History Education), Daryl D. Smith (Biology)

**Website:** <https://iowalakesidelab.org/>

Iowa Lakeside Laboratory is a field station run cooperatively by the University of Iowa, Iowa State University, and the University of Northern Iowa. Students at all three institutions, as well as visiting students, nationally and internationally, may take Iowa Lakeside Laboratory courses for credit through their home institution.

Iowa Lakeside Laboratory was established in 1909 for the conservation and study of the rich flora and fauna of northwest Iowa, especially the numerous lakes, wetlands, and prairies of the Iowa Great Lakes region. The campus is located on approximately 140 acres of restored prairie, wetland, and gallery forest along the west shore of West Okoboji Lake. Teaching and research facilities include eight laboratory buildings, a library, and a lecture hall. Living accommodations include cottages, motel-style units, and a large mess hall. All students are encouraged to stay at Lakeside while they are taking courses to derive full advantage of its educational, professional, and social life.

## Mission

Lakeside's mission is to provide undergraduate and graduate students an opportunity for hands-on experience in a variety of natural and human environments through its field-oriented courses, and to provide research facilities and support for graduate students and faculty members working on research projects in northwestern Iowa.

## Summer Session

Each summer Iowa Lakeside Laboratory offers students a unique educational experience—small, inquiry-based, full-immersion, field-oriented courses in the natural sciences (archaeology, botany, ecology, hydrology, soils, zoology) and related areas, such as the health sciences. Courses are taught at the sophomore/junior level and the senior/graduate level. Enrollment usually is limited to 10 or fewer students per course. Most courses meet all day Monday through Friday, last four weeks, and offer 1 s.h. of credit for each week (40 clock hours) in class. One- and two-week courses also are available, including courses designed especially for teachers.

Not all courses are offered every year; visit the Course Catalog on the Iowa Lakeside Laboratory website or consult summer course offerings at the University of Iowa or the other Regent institutions to learn which courses will be offered during a particular summer session. Students should check with their advisors to determine whether specific courses count toward requirements for their majors or minors or toward other requirements.

## Research

Research projects by undergraduates, graduate students, and faculty members can be completed either on the Iowa Lakeside Laboratory campus or at many nearby natural areas. Undergraduate and graduate students are strongly encouraged to work on independent projects at the laboratory, and graduate students are welcome to use Lakeside as a base for their thesis and dissertation research. Laboratory space and other facilities are available for long-term or short-term research projects.

## Registration

Students may enroll in Iowa Lakeside Laboratory courses by submitting an Iowa Lakeside Laboratory registration and housing form to the Iowa Lakeside Laboratory administrative office. Information about current courses, registration, and housing is available on the Iowa Lakeside Laboratory website.

Registration usually opens in early January. Enrollment is limited, so students should register early. When they register, they must apply for housing or indicate that they plan to live off campus.

## Financial Support

Financial support is available for undergraduate and graduate students. The Friends of Lakeside Lab organization provides a merit scholarship that is equivalent to the cost of room and board. Additional financial support may be available from Iowa Lakeside Laboratory and from other sources. Consult the Office of Student Financial Aid for information about support, including work-study and loan programs.

## Courses

### Iowa Lakeside Laboratory Courses

**IALL:1010 Earth, Air, and Sky** **1-4 s.h.**  
Essentials of earth science, including astronomy, meteorology, geology, and paleontology; includes laboratory and fieldwork.

**IALL:1030 Natural History Workshop** **1-2 s.h.**  
A specific aspect of the upper Midwest's natural history, or techniques for studying natural history; amphibians and reptiles, birds and birding, nature photography, mushrooms and other fungi, Iowa's trees and forests, fish biology, prairies, common algae, common insects, aquatic plants, life in rivers, life in lakes, mosses and liverworts, natural history of Iowa Great Lakes region, field archaeology, scuba diving, astronomy, nature sketching; five-day, nontechnical introductions.

**IALL:1040 Field Archaeology** **3-4 s.h.**  
Nature of cultural and environmental evidence in archaeology, how such evidence is used to model past human behavior and land use; emphasis on Iowa prehistory; basic reconnaissance surveying, excavation techniques.

- IAL:1045 Illustrating Nature: Photography** 1-2 s.h.  
Beginning/intermediate technique and composition in color photography of natural areas, their plants and animals.
- IAL:3034 Topics in Ecology and Sustainability** 1-4 s.h.  
Scientific introduction at intermediate level to ecology and evolution of important groups of organisms: algae to vertebrates, different ecological phenomena (e.g., fire and climate change), varying landforms, different ecosystems (e.g., prairies and aquatic systems); emphasis on sustainability with introduction to concepts, issues, and practices; ability to communicate environmental information through a variety of means. Requirements: one general biology course.
- IAL:3101 Science Teaching Methods** 1-3 s.h.  
Development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology, geology, and environmental courses; exercises built around common organisms and ecosystems in Iowa; animal biology, plant biology, fungi and lichens, aquatic ecology, prairie ecology, wetland ecology, limnology, animal behavior, insect ecology, biology of invertebrates, noninvasive use of living organisms, Project WET; field trips.
- IAL:3103 Aquatic Ecology** 4 s.h.  
Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals. Requirements: ecology, chemistry, and physics courses.
- IAL:3104 Nature Based, Early Childhood Teaching Methods Using "The Project Approach"** 3-4 s.h.  
Examination of the value of young children's direct experiences in nature through inquiry-based learning; "The Project Approach" builds on children's natural curiosity and enables them to interact, question, connect, problem solve, communicate, and reflect; students follow steps for implementing a nature-based project within their own classroom setting as they insure the needs of diverse learners are met for both social and academic learning; designed for early childhood teachers.
- IAL:3109 Ecology and Systematics of Algae** 2,4 s.h.  
Ecology, morphological structure, phylogeny, and taxonomy of freshwater algae based on field material collected; emphasis on genus-level identifications, biodiversity, ecology; habitat visits to lakes, fens, streams, rivers; algal ecology.
- IAL:3113 Undergraduate Independent Study** 1-4 s.h.  
Requirements: junior or senior standing.
- IAL:3114 Field Mycology** 2 s.h.  
Identification and classification of common fungi; techniques for identification, preservation, and culture practiced with members of various fungi groups.
- IAL:3117 Ecology and Systematics of Diatoms** 2,4 s.h.  
Field and laboratory study of freshwater diatoms; techniques in collection, preparation, and identification of diatom samples; study of environmental factors affecting growth, distribution, taxonomic characters; project design and execution, including construction of reference and voucher collections; data organization and analysis.
- IAL:3122 Prairie Ecology** 4 s.h.  
Basic patterns, underlying physical and biotic causes of regional and local distributions of North American prairie plants and animals; field and laboratory analysis and projects. Requirements: familiarity with basic principles of biology and ecology.
- IAL:3123 Prairie Ecology I** 2 s.h.  
Recognition of Iowa prairie plants and understanding the systems in which they exist; emphasis on identification of tallgrass prairie flora by sight recognition, family, genus, species, and common names. Requirements: basic familiarity with biology and ecology.
- IAL:3125 Prairie Ecology II** 2 s.h.  
Hands-on learning experiences demonstrating dynamic, human-influenced (anthropogenic) systems which have impacted prairie ecosystems for the past 10,000 years or more; emphasis on identification of tallgrass prairie flora by sight recognition, family, genus, species, and common names. Requirements: general familiarity with biology and ecology.
- IAL:3126 Ornithology** 2-4 s.h.  
Biology, ecology, and behavior of birds; emphasis on field studies of local avifauna; group projects with focus on techniques of population analysis and methodology for population studies.
- IAL:3131 Ecology** 4 s.h.  
Introduction to the principles of ecology at the population, community, ecosystem levels; field studies of local lakes, wetlands, and prairies used to examine factors that control distributions, interactions, and roles of plants and animals in native ecosystems. Requirements: two semesters of introductory biology.
- IAL:3141 Environmental Policy** 3 s.h.  
Theory and practice of environmental policies, including the study of U.S. federal environmental policies with direct and indirect bearings on water issues; focus on policy history, implementation, and effectiveness; how policies interact with each other, how local stakeholders perceive their pros and cons, and linkages between local implementation efforts and regional and large-scale impacts.
- IAL:3162 Restoration Ecology** 2 s.h.  
Ecological principles for restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations; emphasis on prairie restoration and wetland vegetation. Requirements: ecology course.
- IAL:3164 Animal Behavior** 2 s.h.  
Examination of ecological and evolutionary theories of animal behavior through field studies of animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care. Requirements: two biology courses.
- IAL:3175 Soil Formation and Landscape Relationships** 2-4 s.h.  
Relationships between soil formation, geomorphology, environment; soil description, classification, geography, mapping, interpretation for land use.
- IAL:3176 Glacial Geomorphology** 2,4 s.h.  
Field-based introduction to glacial environments and processes including the origin of sediments, landforms, and landscapes produced in glacial and associated environments; aeolian (wind) processes, river and lacustrine systems, and mechanisms and chronologies of climate change.

**IAL:3200 Introduction to Research and Inquiry 1-3 s.h.**

How data transforms to information and ultimately knowledge through scientific investigations; examinations and applications include steps formulating the scientific method using 21st-century data, conditions, and related challenges; deliverables include a thoroughly documented scientific experiment beginning with research questions and hypotheses, recommended methods, and concluding with anticipated results.

**IAL:5213 Graduate Independent Study 1-4 s.h.****IAL:5217 Ecology and Systematics of Diatoms 2,4 s.h.**

# Leadership Studies

## Codirectors

**Undergraduate certificate:** leadership studies

**Website:** <https://careers.uiowa.edu/students/leadership-certificate>

Leadership studies is a multidisciplinary academic field that draws upon theories and applications from a wide variety of related disciplines, such as the social sciences (e.g., psychology, sociology, political science, and anthropology) and the humanities (e.g., philosophy and history), as well as professional fields, including management and education. The Leadership Studies Program examines ethical issues, principles, theories, and styles of leadership; the dynamics of interactions between leaders, followers, and group members; leaders' impact on organizations and communities; and leadership skills such as goal setting, communicating effectively, creating a vision, and empowering others.

The Leadership Studies Program offers the undergraduate Certificate in Leadership Studies as well as the Career Leadership Academy, a two-course sequence designed to help undergraduate students develop leadership and employment skills. The program also offers professional development courses.

## Certificate in Leadership Studies

The Certificate in Leadership Studies is an interdisciplinary program coordinated by the Pomerantz Career Center and supported by the Tippie College of Business, the College of Education, the College of Liberal Arts and Sciences, and the Office of Leadership, Service, and Civic Engagement.

## Career Leadership Academy

The Career Leadership Academy is a two-semester sequence of courses designed to help undergraduate students develop vital skills for leadership and career development: communication, interpersonal, and presentation skills and the ability to work well with others. This highly interactive program consists of weekly seminars, activities, and events. Participants also engage in career exploration opportunities, professional networking, and leadership development experiences.

LS:3002	Career Leadership Academy Part 2: Leadership in Action	3

For more information, see Career Leadership Academy on the Pomerantz Career Center website.

## Professional Development

Professional development courses provide students with opportunities to engage in practical, hands-on, skills-based instruction relevant to careers and leadership development. The topics and curricula for the following courses incorporate input from employers, who were surveyed about their experiences, real-world examples, guidance, and which skills they most often seek when hiring new graduates.

## Programs

### Undergraduate Program of Study Certificate

- Certificate in Leadership Studies [p. 2059]

## Courses

### Leadership Studies Courses

#### LS:1009 Mock Trial 2 s.h.

Opportunity to learn legal analysis and argumentation, public performance; participation in University of Iowa Mock Trial Club; mock trial role preparation, tournament competition, and staging an annual club tournament.

#### LS:1014 Learning Assistants Training 0,3 s.h.

Enhancement of skills that lead to success in facilitating collaborative learning; helping skills, knowledge, and peer support to promote deeper reflection, learning, and application of content; use of collaborative activities and discussions to highlight concepts and skills, and individual reflection assignments to promote metacognition; led by UI Academic Support and Retention; for learning assistants in first semester of role.

#### LS:1015 Learning Assistant Advanced Practicum 0,2 s.h.

Opportunity to continue to develop skills in facilitating collaborative learning environments; application of pedagogy concepts to learning assistant experience; students facilitate activities in assigned lecture courses and reflect on their experience in advanced practicum sessions; topics include helping skills, metacognition, study strategies, diversity, equity, inclusion, and motivation in learning environments; exploration of problem solving and personal growth. Prerequisites: LS:1014. Requirements: 3.00 UI cumulative g.p.a., and grade of B or higher in the course being served as returning learning assistant.

#### LS:1017 Orientation and Transition Leader Training 0-3 s.h.

Preparation for a leadership role in the Office of Orientation Services.

#### LS:1018 Issues in College Residence Halls I 0-1 s.h.

Development of knowledge and skills required for work as a resident assistant; creating community, handling crises and emergencies; leadership.

#### LS:1020 Introduction to Leadership 3 s.h.

Overview of leadership theory and skills for effective leadership; historical perspective, development of a personal philosophy of leadership, self-assessments, leadership models; study of groups, culture, and communities; application of experiential learning settings; community service project; geared toward emerging student leaders.

#### LS:1021 Current Issues and Leadership in Fraternity and Sorority Life 3 s.h.

Current issues facing leaders (alcohol and hazing education, conflict management, lasting impact of organizations on members); lifetime membership and values-based decision making; for leaders of fraternity and sorority community.

**LS:1022 President's Leadership Class 3 s.h.**

Class activities, events, and interactive discussions with the University of Iowa president on topics including leadership theories, current UI issues, how a university president makes decisions, and students' philosophy on leadership; students work on a comprehensive project reflecting their leadership. Requirements: sophomore standing and application.

**LS:1024 Hawkeye Service Breaks arr.**

Introduction to theoretical approaches to service learning and shared experiential learning; concepts of intersectionality of varied social and community issues, reflection and reciprocity, active citizenship and community building, practical implementation of skills from student's academic disciplines, leadership development; includes overnight service immersion experience during spring break in a designated team location where students complete approximately 24 total hours of direct service with nonprofit partners and participate in critical reflection; emphasis on stretch and serve components of the IOWA Challenge.

**LS:1025 Leadership for Social Justice 3 s.h.**

Social justice as a process and a goal; students build a brave community that empowers all members when faced with social justice related dilemmas; skills that bring about positive social change on campus, within local communities, and on global scale; for students who are committed to study and practice of social justice in their personal and professional lives and student organization leaders directly advised or supported by UI cultural and resource centers—Afro-American Cultural Center (AACC), Asian Pacific American Cultural Center (APACC), Latino Native American Cultural Center (LNACC), and the Pride Alliance Center.

**LS:2002 Career Leadership Academy Part 1: Leadership in Practice 3 s.h.**

How to become a successful leader; opportunity to increase understanding of self, others, and the skills sought by employers; work and lead effectively in teams; creation of a group presentation focused on community needs; career components of résumé writing, LinkedIn profile development, and networking; first in a two-course series.

**LS:2013 Strengths-Based Leadership 1 s.h.**

Examination and evaluation of personal unique talents, be more engaged, and gain better understanding of leadership from a "Strengths" perspective; how to maximize strengths to stand out from the crowd; how society encourages people to be well-rounded (according to Gallup Organization's Strengths research) and how this pursuit of many goals can actually result in mediocrity.

**LS:2020 Women in Leadership 3 s.h.**

Overview of relevant history, theory, and practice of women in effective leadership; women leaders from historical to modern times; focus on exploring obstacles and challenges faced by women in leadership and how people of all genders can work to overcome these barriers.

**LS:2024 Hawkeye Service Breaks Leadership 0,2 s.h.**

Focus on techniques for planning trip logistics, education on social issues, and facilitation of critical reflection; development in theoretical approaches to service learning specifically connected to service immersion leadership; varied concepts including intersectionality of varied social and community issues, reflection and reciprocity, active citizenship and community building, practical implementation of skills from student's academic disciplines, leadership development, and other related areas. Requirements: LS:1024, and application and acceptance to leadership position.

**LS:3002 Career Leadership Academy Part 2: Leadership in Action 3 s.h.**

Leadership development and career readiness; application of strengths, building effective teams, motivation, and delegation skills to a service-learning project designed by the class through engagement with a community partner; explore interviewing, personal branding, job searching, professional etiquette, salary negotiation, and transitioning successfully into the workplace; second in a two-course series. Prerequisites: LS:2002.

**LS:3003 Culturally Intelligent Leadership 1 s.h.**

Knowledge and skills for leadership in an increasingly diverse and global workplace; highly interactive and relational experience; students gain a greater understanding of their leadership in various environments and learn how to develop tools for establishing and maintaining interpersonal relationships for professional success.

**LS:3004 Perspectives on Leadership: Principles and Practices 3 s.h.**

Broad foundation of leadership knowledge representing diverse approaches to studying and practicing leadership; core course for students pursuing the leadership certificate. Requirements: sophomore or higher standing.

**LS:3009 Global Leadership Initiative in Xicotepec 0-2 s.h.**

Culture, history, and values of Mexico; leadership skills and work on civil and humanitarian projects; reflection of learning and experiences; spring break week in Xicotepec, Mexico. Requirements: participation in Career Leadership Academy and concurrent enrollment in ABRD:3352.

**LS:3011 Leadership Certificate Capstone 0,2 s.h.**

Registration of practical work experience (internship or career position) with leadership components, or meaningful and educational cocurricular experience in on-campus leadership position (i.e., student organization leader, student government leader, residence assistant, student orientation advisor, peer educator, fraternity/sorority leader) with active leadership roles and responsibilities (i.e., executive leadership position, initiating and organizing a major event); application of leadership models and theories to practical experiences; for students completing the leadership certificate. Prerequisites: LS:3004. Requirements: an additional 6 s.h. of approved leadership coursework and meet with instructor prior to enrollment.

**LS:3012 Leadership Theory to Practice 3 s.h.**

How the world is changing at an accelerating rate; leadership effectiveness and demand of a high-level ability to work with others and respond to change; foundational concepts of major theories and behaviors of leadership models; practical challenges of leadership analyzed through use of experiential projects, discussion, presentations, exercises; development of self-awareness through use of behavioral instruments, group exercises, individual reflection; major approaches to leadership, authentic leadership, team leadership, gender issues in leadership, emotional intelligence, virtual leadership.

# Leadership Studies, Certificate

## Requirements

The undergraduate Certificate in Leadership Studies requires 20 s.h. of credit. Students must maintain a g.p.a. of at least 2.00 in work for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

Students must declare their intent to earn the certificate to a leadership studies advisor in the Pomerantz Career Center; see Leadership Studies Certificate on the center's website for information on how to enter the certificate program.

The certificate program provides a structure for involvement and commitment to leadership. It introduces students to leadership concepts and offers them hands-on leadership experiences they will need in order to begin the lifelong development of these skills. Certificate students complete two interdisciplinary core courses (6 s.h.), area electives (12 s.h.), and an experiential learning course (2 s.h.). A course may not be used to satisfy more than one certificate requirement. Students also have the opportunity to complete the certificate online.

The Certificate in Leadership Studies requires the following coursework.

## Interdisciplinary Core Courses

All certificate students are required to complete two interdisciplinary core courses. In order to enroll in either course, they must have earned a minimum of 30 s.h. of credit and must be in good academic standing as defined by the College of Liberal Arts and Sciences (cumulative g.p.a. of at least 2.00).

Code	Title	Hours
LS:3004	Perspectives on Leadership: Principles and Practices	3
LS:3012	Leadership Theory to Practice	3

Perspectives on Leadership: Principles and Practices (LS:3004) provides students with a broad foundation of leadership knowledge. It introduces diverse approaches to studying and practicing leadership and gives students a structure for organizing knowledge and skills from other leadership courses and experiences. The course features presentations by guest instructors from across the University, offering students an interdisciplinary perspective on leadership.

With the world changing at an accelerating rate, Leadership Theory to Practice (LS:3012) examines leadership effectiveness and the demand of a high-level ability to work with others and respond to change. Foundational concepts of major theories and behaviors of leadership models are covered; and practical challenges of leadership are analyzed.

Certificate students must complete LS:3004 and LS:3012 before they may enroll in the required experiential learning course.

## Area Electives

Area electives are drawn from four developmental areas central to effective leadership: self and group leadership, communication, cultural competence, and ethics and integrity. Students must complete 3 s.h. from each of these areas (total of 12 s.h.).

## Experiential Learning

Certificate students must earn 2 s.h. in a course focused on experiential or hands-on learning. An experiential learning course may take different forms, such as a service learning experience, an internship, or an on-campus leadership practicum. To satisfy the experiential learning requirement, they must complete one of these options: LS:1024, or LS:3002, or ABRD:3352 and LS:3009, or LS:3011.

Before they enroll in the hands-on course, students must have completed at least 12 s.h. of work toward the certificate, including the core courses LS:3004 Perspectives on Leadership: Principles and Practices and LS:3012 Leadership Theory to Practice, so that they have a solid foundation of knowledge to apply to the experience.

## Service Learning Courses

Service learning courses incorporate community engagement with academic coursework. They allow students to gain hands-on experience along with a deeper understanding of course content while responding to real community needs.

Students may satisfy the certificate's experiential learning requirement by earning a minimum of 2 s.h. in service learning courses from the following.

Code	Title	Hours

**Internship or On-Campus Leadership Practicum**

Students may register for the following course earning a minimum of 2 s.h. in order to receive certificate credit for the internship or on-campus leadership practicum. They must complete all course assignments in order to fulfill the experiential learning requirement. Students who want to count LS:3011 toward the Tippie RISE requirement must register for an internship; registering with an on-campus leadership practicum will not satisfy Tippie RISE.

Code	Title	Hours
LS:3011	Leadership Certificate Capstone	2

Internships consist of preapproved, supervised on-the-job learning; they may be paid or unpaid.

To meet the certificate's experiential learning requirement, an internship must consist of professional experience that relates to a student's major field of study or career interest area and allows the student to build on the academic coursework already completed in the certificate program. At least 80 percent of a student's internship duties must be professional-level work, and a student must receive continuous supervision by a professional (not a student) in the internship field. The internship must last a minimum of 15 weeks in fall or spring semester or six weeks in the summer and requires 150 hours of work.

Internships that fulfill the certificate's experiential learning requirement must be approved in advance by one of the certificate program's advisors, and the internship site supervisor must agree to the terms of the internship and must complete the required form before the internship may be approved. Students may work with staff at the Pomerantz Career Center to find an approved internship opportunity, or they may secure their own internship.

For more information about internships, see Internships on the Pomerantz Career Center website.

Students who wish to fulfill the experiential learning requirement with an on-campus leadership practicum must engage in a formal, approved experience that is meaningful, educational, and cocurricular. It requires a student to take initiative and pursue active leadership roles and responsibilities. Examples include positions as student organization leaders, student government leaders, University Housing resident assistants, student orientation advisors, peer educators, and fraternity and sorority leaders. Practicums may be paid or unpaid.

To meet the certificate's experiential learning requirement, a practicum must last a minimum of 15 weeks in fall or spring semester or six weeks in the summer and requires 150 hours of work.

Practicums that fulfill the certificate's experiential learning requirement must be approved in advance by one of the certificate program's advisors. Students must submit a list of

goals and assignments and/or duties they will complete during the practicum in order to demonstrate that the practicum provides substantive work assignments and opportunities to build on the academic coursework they have completed in the certificate program.

Each student also must identify a practicum mentor and demonstrate that the mentor is willing to guide and evaluate the student's work and development of leadership skills, and intends to participate in reviewing the student's goal-setting assignment and the final review of the student's performance.

**Academic Plans****Sample Plan of Study**

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# Lifetime Leisure Skills

## Director

- Steve J. Campbell

**Website:** <https://recserv.uiowa.edu/lifetime-leisure-skills>

Lifetime Leisure Skills (LLS) courses are designed to engage students in fun and healthy recreational activities that can be continued beyond college and throughout their lives. Courses range from outdoor recreation activities such as rock climbing, canoeing, kayaking, backpacking, biking, and camping to indoor activities that include tae kwon do, kickboxing, Brazilian jiu-jitsu, salsa dancing, and ballroom dancing. LLS courses are appropriate for students at all skill levels.

Lifetime Leisure Skills courses are open to University of Iowa undergraduate and graduate students. Undergraduate students in the College of Liberal Arts and Sciences may count credit earned in Lifetime Leisure Skills courses toward the total number of semester hours required for their degree. Students should consult their academic advisor.

While the majority of courses are on campus or in the Iowa City area, several off-campus courses are held in locations that include Grand Canyon National Park, Canyonlands National Park, Arches National Park, Zion National Park, Big Bend National Park, Voyageurs National Park, Grand Staircase-Escalante National Monument, Glen Canyon National Recreation Area, Effigy Mounds National Monument, Loess Hills State Forest, Yellow River State Forest, Maquoketa Caves State Park, Devil's Lake State Park, Pictured Rocks County Park, and the Upper Iowa River.

# Military Science (Army ROTC)

## Director

- Kevin A. Salge

**Undergraduate minor:** military science

**Website:** <https://veterans.uiowa.edu/army-rotc>

The Military Science Program is synonymous with the Iowa Army Reserve Officers' Training Corps (ROTC). It gives students who wish to serve on active or reserve status in the U.S. Army the opportunity to earn commissions as Army officers. It also administers merit scholarships from the United States government to qualified students.

Although the Military Science Program does not offer degrees, students can earn a minor in military science. ROTC courses provide education in the military's role and instruction in leadership and management. The program's courses are an essential part of the University of Iowa ROTC program.

Military science courses are open to all students. Course credit that counts toward graduation varies by college. Students in the College of Liberal Arts and Sciences may count up to 20 s.h. earned in military science courses toward graduation.

## Undergraduate and Graduate Programs

### Basic Course

The ROTC Basic Course is designed primarily for first- and second-year students. It provides the fundamentals of leadership and management and introduces the roles of the military as influenced by national and foreign policy. Students incur no obligation to the military for participation in the Basic Course.

The following four courses satisfy the Basic Course requirement.

Code	Title	Hours
MILS:1010	Leadership and Personal Development MSL101	1
MILS:1020	Introduction to Tactical Leadership MSL102	1
MILS:2010	Innovative Team Leadership MSL201	2
MILS:2020	Foundations of Tactical Leadership MSL202	2

Students can take Basic Course requirements over a one- or two-year period or during Basic Camp, held at Fort Knox, Kentucky. Students with prior military training normally are exempt from the Basic Course and Basic Camp requirements.

Basic Camp takes place in the summer, typically between a cadet's first and second years. Similar to basic training, Basic Camp trains cadets on many basic soldier skills ensuring cadets across the country have the same foundation knowledge to be successful with the remainder of their Army ROTC training.

### Advanced Course

The ROTC Advanced Course is for cadets who wish to pursue a commission as a lieutenant in the U.S. Army upon graduation. It is open to both undergraduate and graduate students. Most

cadets in the Advanced Course incur an obligation to the Army that can be satisfied in the Active Army, Army Reserve, or Army National Guard.

To enter the Advanced Course, students must satisfy the Basic Course requirement, earn at least 54 s.h., and have a cumulative g.p.a. of at least 2.00. In order to become U.S. Army officers, cadets must complete the Advanced Camp, held at Fort Knox, Kentucky. Cadets normally attend Advanced Camp during the summer between their third and fourth years.

The following courses are the academic requirements for completion of the Advanced Course.

Code	Title	Hours
MILS:3010	Adaptive Tactical Leadership MSL301	3
MILS:3020	Leadership in Changing Environments MSL302	3
MILS:4010	Developing Adaptive Leaders MSL401	3
MILS:4020	Leadership in a Complex World MSL402	3

### Additional Coursework

Cadets whose aim is a commission must satisfy a Professional Military Education (PME) requirement. They must complete at least one course in military history from the following list. Cadets may use other courses to meet the additional coursework requirement, with the military science professor's approval.

Code	Title	Hours
HIST:1261	American History to 1877	3
HIST:1262	American History 1877-Present	3
HIST:3271	American Revolutionary Period	3
HIST:4499	First World War	3-4

### Scholarship Opportunities

The Military Science Program offers two-, three-, and four-year ROTC scholarships for students who enter the ROTC program. These scholarships pay full tuition at the University of Iowa, an allotment for books and supplies each semester, mandatory educational fees, and a tax-free monthly stipend during the academic year. The tax-free monthly stipend is provided to non-scholarship cadets who enter a contractual agreement with ROTC to serve in the Army. Additional financial assistance may be provided through scholarships.

# Nonprofit Leadership and Philanthropy

## Codirectors

- Deborah Dunkhase (Management and Entrepreneurship),  
Jenifer A. Vick (Journalism and Mass Communication)

**Undergraduate certificate:** nonprofit leadership and philanthropy

**Website:** <https://uc.uiowa.edu/certificate-nonprofit-leadership-and-philanthropy>

Nonprofit organizations play vital roles in our communities and contribute to our quality of life. These organizations have unique management, funding, and finance issues that require specialized training. The Certificate in Nonprofit Leadership and Philanthropy meets the needs of students who have a desire to prepare for a career in a nonprofit role or to impact the nonprofit sector through volunteering on a board, committee, or project.

The certificate provides students with the knowledge, skills, and mindset to participate effectively in the growing world of nonprofits. It gives students the tools to do good in the world, choosing a career in the nonprofit sector or by making a difference through volunteerism.

Core courses cover essentials in nonprofit leadership, fundraising, communication strategies, and nonprofit ethics and governance. The program provides a balance of academic principles and real-world experience, as well as a fundamental understanding of how nonprofit organizations participate in building communities. Courses are offered on campus and online, which allows distance and online students the opportunity to earn the certificate.

The Certificate in Nonprofit Leadership and Philanthropy is administered by the School of Journalism and Mass Communication [p. 742] (College of Liberal Arts and Sciences) and the Department of Management and Entrepreneurship [p. 1228] (Tippie College of Business). It is awarded by University College.

## Precollege Program

Students who are currently in grades 10-11 may apply to the Secondary Student Training Program (SSTP), a multi-week residential summer research program at the University of Iowa. SSTP students conduct original research under the guidance of a faculty mentor. They also produce a research brief and an academic poster as a part of the program.

Students who participate in the program pay a SSTP fee that covers room, board, all materials, and admission to all regularly scheduled activities. They also pay University of Iowa tuition for 3 s.h. of required credit. Students and their families are responsible for their transportation to and from SSTP and for incidental expenses, such as souvenirs and snacks. Students are considered for financial aid after they are selected for the program.

The Secondary Student Training Program is administered by the Belin-Blank International Center for Gifted Education and Talent Development. For more information, contact the Belin-Blank Center.

The University of Iowa sponsors a wide variety of study abroad programs in approximately 50 countries throughout the world. Students may choose from summer, fall, or spring semester, academic year, spring break, and winter session programs that complement and extend the University's academic programs across the curriculum.

Study Abroad offers programs to appeal to a broad range of majors and interests. Major Advising Pages (MAPs) are created to help students better understand how study abroad can fit into their programs of study. The program search engine, Search UI Study Abroad Programs, allows students to browse information about study abroad programs and supplements materials available in the Study Abroad resource room.

Students also can participate in study abroad programs sponsored by other accredited U.S. and foreign institutions. They should obtain advance approval of all transfer credit by completing a Study Abroad Credit Approval Form.

Additionally, Study Abroad offers some virtual global courses that take place entirely online but are internationally focused and make connections in host countries around the world.

Information on University of Iowa study abroad programs is available from Study Abroad.

## Facilities

Study Abroad is located in the International Programs suite in the University Capitol Centre (UCC). Students can visit the resource room weekdays and can choose to meet with a peer student assistant, who has study abroad experience, to learn more about study abroad options and processes.

**INTL:3517 Women's Empowerment in the Dominican Republic****arr.**

While progress on women's empowerment in the Dominican Republic has been achieved, greater efforts are needed for further elimination of gender-related violence, discrimination, and other inequalities; exploration of the many services provided to women in two cities, Santo Domingo and Boca Chica; understanding and addressing issues around women's empowerment, dealing with cross-culture issues, working with marginalized and at-risk young women; engagement with the most respected nonprofit and government organizations serving women in the Dominican Republic; exploration of geographic and sociocultural context. Requirements: minimum 2.50 g.p.a. and good academic and disciplinary standing.

**INTL:3525 SIT Virtual Global Courses****arr.**

School for International Training (SIT) online courses involve a dynamic learning environment centered around a global theme or a specific language, with an optional immersive course taught abroad; SIT courses are developed around a framework of critical global issues—challenges that transcend borders to touch every human on the planet; SIT programs are interdisciplinary and appropriate for a variety of majors, and provide an opportunity to grapple with the complexities of today's most pressing issues in specific cultural and geographical contexts, or comparatively across several countries. Requirements: 2.50 g.p.a. or higher, sophomore or higher standing, good academic and disciplinary standing, and any course-specific requirements set by SIT.

**INTL:3535 Travel Writing from Home****arr.**

Students explore the purpose and possibility of travel writing and develop their own personal "armchair travelogue" writing skills; classic examples of travel writing; virtual explorations of sites in and around Athens, Greece. Requirements: 2.75 g.p.a. or higher and good academic and disciplinary standing.

**INTL:3536 Virtual International Medicine****arr.**

Opportunity to interact virtually with medical staff and patients at hospitals and other health centers in host country; clinical anatomy and pathophysiological aspects of relevant diseases; virtual visitations of patients in various health care settings; how to take patient histories, observe health care professionals, and provide daily reports to peers and course director/instructors regarding patient interactions. Requirements: 3.25 g.p.a., and good academic and disciplinary standing.

**INTL:3537 Virtual International Business in Italy****arr.**

Unique look at current regional business and culture in Northern Italy; exploration of financial implications of pandemics, as well as culture and education in Northern Italy; interactive experience involving live lectures, networking with partners in Italy, and hands-on elements. Requirements: good academic and disciplinary standing, minimum 2.75 UI and cumulative g.p.a., sophomore or higher standing, minimum of 30 s.h. completed prior to program, and completion of FIN:3000 or approval of program director.

**INTL:3538 Virtual International Business and Consulting Project****arr.**

International business in the Asia Pacific Region; introduction to basic concepts of international business and rise of globalization; issues confronting enterprises in the Asia-Pacific region; virtual business briefings from companies in each country; students apply what they have learned in a virtual consulting project with a company in Australia, New Zealand, Singapore, or Hong Kong. Requirements: 2.75 UI and cumulative g.p.a., MKTG:3000 or consent of program director, and good academic and disciplinary standing.

**INTL:3539 Virtual Brazilian Carnival: Music and Dance****arr.**

Exposure to all dynamic aspects of carnival parades in Rio de Janeiro through literature, videos, drumming, zoom presentations by experts in Brazil, and practice of samba; dance, music, historical and social contexts, production, critical theories of performance, religious backgrounds, theater making; current and centuries-old traditions; students interact, explore, critique, practice, and share their experiences as online visitors to this world-famous city. Requirements: minimum 2.50 g.p.a. and good academic and disciplinary standing.

**INTL:3542 Introduction to Global Business: Asia Pacific****arr.**

Virtual study abroad experience; exploration of four different locations in Asia Pacific—Singapore, Hong Kong, New Zealand, and Australia; lectures by professors in each of the four locations, briefings from leading businesses in the region, and cultural activities. Requirements: 2.75 UI and cumulative g.p.a., and good academic and disciplinary standing. Recommendations: completion of ECON:1100.

**INTL:4515 USAC Global Virtual Internship****arr.**

Exploration of future career interests by working online with businesses and organizations based at locations around the world; includes an online course component to learn how culture is reflected in workplace and develop skills necessary for success in the global workforce; virtual internships arranged with local companies, nongovernmental organizations (NGOs), and governmental organizations based abroad; administered by the University Studies Abroad Consortium (USAC) of which the University of Iowa is a member. Requirements: minimum 2.50 g.p.a. and good academic and disciplinary standing.

**INTL:4525 SIT Virtual Global Internship****arr.**

Distance learning that centers around a theme and includes an online internship with a community organization, research or medical organization, business, government agency, or nongovernmental organization (NGO) based outside of the United States; students gain valuable experience and enhance their skills in a professional environment related to core program themes; students are responsible for making optimal use of resources available at the organization and being proactive in engaging with experts to achieve internship objectives. Requirements: minimum 2.50 g.p.a. and good academic and disciplinary standing.

**INTL:4530 CEA Virtual Internships Abroad Program****arr.**

Placement with an organization or company based abroad while working remotely from student's home base in the United States; individualized placements based on student's interests and proposed career field; students complete an online seminar independently and through check-ins at their virtual internship placement. Requirements: minimum 2.50 g.p.a. and good academic standing.

**INTL:4535 TEAN Global Remote Internship arr.**

Real-world, international work experience in a variety of fields without travelling; four- or eight-week individual or group internship; students work on a project from start to finish for a company located in Australia or Asia and participate in an online seminar course; students learn about unique challenges and flexibility that being part of a remote team provides, as well as cultural information about the location where organization is based. Requirements: minimum 2.50 g.p.a. and good academic and disciplinary standing.

**INTL:4540 IES Virtual Global Internships arr.**

Exploration of future career interests working online with businesses and organizations based in locations around the world; virtual internships arranged by the University of Iowa's partner provider, International Education for Students (IES), with local companies, nonprofit governmental organizations (NGOs), and governmental organizations based abroad; virtual internships include an online course component to learn how culture is reflected in the workplace and develop skills necessary for success in the global workforce. Requirements: 2.50 g.p.a., sophomore or higher standing at time of application, and good academic and disciplinary standing.

# Summer Research Experiences for Undergraduates

## Director

- Robert F. Kirby

**Website:** <https://icru.research.uiowa.edu/summer-research-programs-iowa>

The University of Iowa hosts a variety of summer research experiences that bring undergraduates from other institutions to campus to enhance their understanding of research in a variety of disciplines. Acceptance into these programs is based on a competitive application system.

Participants develop research skills under the mentorship of University of Iowa faculty members. They also become part of a research community with access to programming, workshops, and professional development. These programs highlight career opportunities and provide guidance on applying to graduate and professional schools.

Programs last 8-10 weeks and include a competitive stipend. Housing, food, and travel expenses are commonly covered by the programs. Applicants should refer to individual programs for additional information on timelines, research areas, and compensation.

**Undergraduate certificate:** sustainability

**Website:** <https://sustainability.uiowa.edu/academics/certificate-sustainability>

For decades, world leaders have defined sustainability as the implementation of policies, processes, and practices that meet the needs of the present without compromising the ability of future generations to meet their own needs. Working toward sustainability requires an understanding of human and environmental systems and the complex interactions between them. Students who understand the concept of sustainability can make a positive difference in the world.

The Certificate in Sustainability provides students with the knowledge and skills they need to contribute to the development of sustainable outcomes through interdisciplinary coursework in areas such as society and culture, economics, the environment, energy, public health, and public policy. The program helps students become effective leaders and agents of change for sustainability in a wide range of vocations, such as academic researcher, teacher, environmental specialist, sustainability coordinator, corporate officer, policy analyst, grassroots advocate, or government official.

The Certificate in Sustainability is administered by University College.

## Programs

## Undergraduate Program of Study Certificate

- Certificate in Sustainability [p. 2093]

# Sustainability, Certificate

## Requirements

The undergraduate Certificate in Sustainability requires 24 s.h. of credit. Students must maintain a g.p.a. of at least 2.00 in work for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

Work for the certificate includes four introductory core courses, three courses from preapproved breadth area electives, and one project/integrative systems course. Students may be able to count certificate courses toward requirements for other majors, minors, or other certificates. They may count a maximum of three courses in a single department or program toward the certificate. A maximum of 6 s.h. of approved transfer credit may be counted toward the certificate. Certificate courses may not be taken pass/nonpass. A course may be used to satisfy only one certificate requirement.

Individuals must declare their intent to earn the certificate; see the Certificate in Sustainability website for details.

Sustainability embraces many disciplines, methodologies, and institutional practices. Certificate students must have knowledge of the interdisciplinary nature of the field, which is represented by the program's breadth electives: dynamics of natural systems; dynamics of human systems; and communication, ethics, and interpretation. They also must have experience with analyzing real-life problems in and outside of the classroom and in working collaboratively to solve such problems.

The Certificate in Sustainability requires the following coursework.

## Introductory Core

Code	Title	Hours
Both of these:		
GEOG:1070	Contemporary Environmental Issues	3

# Undergraduate Research Experiences

## Director

- Robert F. Kirby

Undergraduate Research Experiences includes areas of study that serve to enhance science, research, and laboratory experiences for undergraduate students: Research Experience for Undergraduates in Microbiology and the Summer Undergraduate MSTP Research Program.

## Research Experience for Undergraduates in Microbiology

**Website:** <https://medicine.uiowa.edu/microbiology/education/summer-research-experience-undergraduates-reu-microbiology>

The Department of Microbiology and Immunology offers URES:4130 Research Experience for Undergraduates in Microbiology, a 10-week summer program for qualified undergraduate students who are studying microbiology or other biological sciences and are interested in pursuing careers in science. Participants conduct research on a project they select, under the direct supervision of a faculty member.

Each participant receives a stipend and an allowance for incidental expenses. The program also pays for travel expenses and provides housing.

Applicants must be U.S. citizens or permanent residents who are enrolled in a university, college, or community college, and have at least one semester of undergraduate study remaining toward a bachelor's degree in the biological sciences. Application materials must include a completed online application, transcript, and two letters of recommendation. Application deadline is mid-February for the following summer.

Visit the program's website or contact the Department of Microbiology and Immunology (Carver College of Medicine) for more information.

## Summer Undergraduate MSTP Research Program

**Website:** <https://medicine.uiowa.edu/mstp/sumr>

The Summer Undergraduate MSTP Research Program is an intensive 8-week experience for undergraduates interested in becoming physician scientists. Participants gain experience in research laboratories and exposure to clinical medicine and medically relevant research in preparation for careers in academic medicine.

Students conduct research in any one of a variety of research areas, including the biomedical sciences, public health, and biomedical engineering. In addition, students shadow physician scientists in clinical settings, participate in career development seminars, and attend a weekly seminar series focusing on the intersection of science and medicine.

Participants receive a stipend and are reimbursed for most of their travel expenses. The program provides lodging on campus in University housing.

Applicants must be U.S. citizens or permanent residents who will have completed their sophomore or junior year in

a bachelor's degree program in the biological or physical sciences by the summer of entry. Applicants should submit an application (available on the program's website), an official college transcript, a curriculum vitae, and two letters of recommendation. Application deadline is mid-January for the following summer.

Contact the Medical Scientist Training Program (Carver College of Medicine) for more information.

## Courses

### Undergraduate Research Experiences Courses

#### **URES:1000 First-Year Seminar** 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities); research focus allows students to actively discover new information with guidance from instructor, pursue research in small groups, learn the "how to" of a field, and share their findings; no prior research knowledge or experience required. Requirements: first- or second-semester standing.

#### **URES:2100 Louis Stokes Alliances for Minority Participation STEM Scholars** 1 s.h.

Preparation for success in transferring into a STEM major at UI; exposure to undergraduate research opportunities; develop skills of scientific inquiry and communication; presentation of products; connect with current transfer students, active research faculty, campus support services, and program staff members. Requirements: application and acceptance to UI LSAMP program.

#### **URES:2200 Discover Research** 1 s.h.

Introduction to research at the University of Iowa; exploration of life as a researcher through a mixture of lecture, faculty and student guest speakers, and virtual lab tours; process of finding and contacting potential research mentors, interviewing for research positions, and making the most out of a research experience; for first-year undergraduates.

#### **URES:3001 Introduction to Translational Research** 0-3 s.h.

Array of scientific studies translated into clinical solutions, creative ideas balanced with practical strategies for implementation at bedside, and expansive number of career opportunities becoming available in translational sciences; opportunity to learn how translational research is conceived and developed; interpreting student research in a translational paradigm; survey of translational biomedicine research program covering the scope of interdisciplinary teams and breadth of T1 to T4 research applications. Requirements: enrollment in clinical and translational science certificate program, and engagement in mentored research activity. Recommendations: successful completion of EPID:4400 highly recommended.

#### **URES:3002 Practicum in Clinical and Translational Science** 0-3 s.h.

How research experience translates into clinical practice; translational impact of independent research; summary of research accomplishments; outline of a translational paper that is mutually acceptable to student, preceptor, and faculty; submission of paper and completion of poster presentation describing research project and translational application of research. Prerequisites: URES:3001. Requirements: enrollment in clinical and translational science certificate program.

**URES:3100 Iowa Center for Research by Undergraduates Research Ambassador 0-1 s.h.**

Promotion of undergraduate research from all disciplines within campus community; hosting various on-campus events, leading workshops, presentations at student organization meetings and in-class; leadership and public speaking; regular meetings with ICRU staff.

**URES:3500 Skill Development for Undergraduate Researchers 1-2 s.h.**

Introduction to research across disciplines, research communication (i.e., poster preparation, research presentation), curriculum vitae and résumé development, letters of recommendation, institutional structure, and more; focus on soft skill development for undergraduates currently involved in mentored research and creative scholarship.

**URES:3992 Undergraduate Research and Creative Projects 0 s.h.**

Independent research or pursuit of a creative project under mentorship of a faculty supervisor.

**URES:3993 Undergraduate Research and Creative Projects 1-4 s.h.**

Independent research or pursuit of a creative project under mentorship of a faculty supervisor.

**URES:3994 Undergraduate Research and Creative Projects 1-4 s.h.**

Independent research or pursuit of a creative project under mentorship of a faculty supervisor.

**URES:3995 ICRU Research Fellow 0 s.h.**

Recognition of undergraduates involved in scholarly efforts of UI faculty and research staff; work on specific research and/or creative projects under selected mentors; funded annually by the Iowa Center for Research by Undergraduates (ICRU) through a competitive application process. Requirements: selection as ICRU Fellow.

**URES:3996 Research Fellow 0 s.h.**

Involvement in scholarly efforts of UI faculty and research staff; students work on specific research and/or creative projects under selected mentors; funded by various strategic initiatives through competitive application processes. Requirements: selection by department or faculty mentor.

**URES:4110 Computational Bioengineering Summer Research Experience for Undergraduates 0 s.h.**

Immersive research experience focused on fundamental concepts of computational bioengineering and application of concepts to solve challenging biomedical problems; work on mentored research projects and showcase research at a University-wide presentation opportunity.

**URES:4120 Research Experience for Undergraduates: Computing for Health and Well-Being 0 s.h.**

Research experience in using computer science methods to study and solve current problems in health, well-being, and health care systems; work on mentored research projects and showcase research at a UI presentation opportunity.

**URES:4130 Research Experience for Undergraduates in Microbiology 0 s.h.****URES:4140 Research Experiences for Undergraduates in Evolutionary Biology 0 s.h.**

Intensive hands-on experience in a research lab; students create digital exhibits in collaboration with the UI Museum of Natural History and present their research at a University-wide poster presentation.

**URES:4150 Undergraduate Medical Scientist Training Program Research 0 s.h.****URES:4160 Research Experiences for Undergraduates in Geospatial Approaches to Watershed Science 0 s.h.**

Intensive hands-on experience in research for students in environmental fields.

**URES:4170 Research Experience for Undergraduates in Nanoscience and Nanotechnology 0 s.h.****URES:4220 University of Iowa Premed Student Summer Research Internship 0 s.h.**

Immersive medical research experience with focus on gathering, analyzing, and interpreting health data; writing a manuscript for publication.

**URES:4240 Fostering Undergraduate Talent: Uniting Research and Education (FUTURE) in Biomedicine 0 s.h.**

Mentored research experience to create new discoveries in biomedicine; preparation to pursue careers in science and clinical practice; translation of current knowledge into new educational materials; discussions, conferences, workshops, training sessions, lectures; university-wide presentation opportunity and a FUTURE in biomedicine symposium.

**URES:4900 Topics in Engagement 1 s.h.**

Exploration of topics in undergraduate research, academic, social, and community engagement; small discussion class; topics selected by instructor.

# University Libraries

## Director

- John P. Culshaw

**Website:** <https://www.lib.uiowa.edu/instruction/>

University Libraries offers these courses intended for undergraduates: ULIB:1001 Library Research in Context, ULIB:2001 Being Responsible Online: From Facebook to Academic Research, ULIB:2022 Special Topics in Library Research, and ULIB:3011 Global Research: Strategies and Skills.

Library Research in Context (ULIB:1001) is an activity-based course that helps students integrate information skills and concepts into their academic tool kit, enabling them to develop habits of critical inquiry and to accomplish course goals. The course uses active learning to introduce students to the basic research process and helps them formulate research questions and evaluate information. It also touches on the social and ethical contexts of information. Subject-specialist librarians teach the course using in-class activities, assignments, and class discussions. Most sections of the course are offered online.

Being Responsible Online: From Facebook to Academic Research (ULIB:2001) introduces students to ethical issues that surround online information, especially in the context of social media. Discussion topics include issues of privacy, security, free versus fee-based information, censorship, one's digital footprint, and academic integrity.

Special Topics in Library Research (ULIB:2022) meets the varying needs of students. The course may address a current or timely topic, focus on a particular content area not currently addressed by course offerings from the University Libraries, or serve as a pilot/trial offering for a course prior to becoming part of the permanent course offerings.

Global Research: Strategies and Skills (ULIB:3011) teaches skills for gathering and using information that are required for international jobs, for upper-level international studies coursework, and for individual international research. Students develop a familiarity with a variety of research and popular materials (such as government information or human rights resources); become experts in at least one academic research database (such as journal, newspaper, or statistical databases); and enhance their critical thinking skills. The class features small group activities, short student presentations, and an individual research consultation with the instructor.

## Courses

### University Libraries Courses

#### **ULIB:1001 Library Research in Context** 1 s.h.

Academic research, effective use of the library and its resources, basic research methods, process of scholarly communication; content may be keyed to a discipline-specific course; students apply concepts and processes to their research projects; transferable skills.

#### **ULIB:2001 Being Responsible Online: From Facebook to Academic Research** 1 s.h.

Introduction to ethical issues surrounding online information; using information as researchers or creating information on a social networking site; issues of privacy, reliability, and intellectual property; skills to navigate online information responsibly and knowledgeably.

#### **ULIB:2022 Special Topics in Library Research** 1 s.h.

Activity-based course that explores specialized content, selected research areas, or current/emerging issues in the context of information literacy and library resources; designed for sophomores and juniors; introduces students to the basic research process, helps them to develop critical thinking skills and evaluate information; topics may vary by semester.

#### **ULIB:3011 Global Research: Strategies and Skills** 1 s.h.

Skill development in international research; academic projects; work with research librarian; activity-based introduction to article, statistical, and governmental databases; research and popular materials; information discovery process (tools and search strategies); enhancement of critical thinking skills. Same as GHS:3011, IS:3011.

#### **ULIB:3022 Advanced Special Topics in Library Research** 1 s.h.

Activity-based exploration of specialized content, selected research areas, or current/emerging issues in context of information literacy and library resources; introduction to basic research process, development of critical thinking skills, and evaluation of information; topics vary.

#### **ULIB:6313 Studio Summer Fellowship** 1 s.h.

Investigation of and reflection on digital scholarly collaboration, production, and promotion. Same as GRAD:6313.

# University of Iowa Honors Program

## Director

- Shaun P. Vecera

**Website:** <https://honors.uiowa.edu/>

The University of Iowa Honors Program is an open and welcoming community, and staff members help students tailor the honors experience to their particular circumstances and goals. The program's general objective is to enrich the undergraduate experience by cultivating intellectual curiosity and practical skill through challenging coursework, creative engagement, and experiential learning to nurture a deeper understanding of one's discipline and self.

What is especially unique about Honors at Iowa? It gives students the space and opportunities to make connections and develop self-authorship through self-discovery. For example, because honors classes are usually smaller than non-honors sections, honors students have the opportunity to form closer connections with their professors on campus. Such working relationships can change careers and lives through mutual discovery. Iowa honors students also make lasting connections and learn from each other through the unique pre-fall semester workshop, HONR:1100 Honors Primetime, their honors first-year seminars, and through the honors residential community in the Honors House at Daum Hall.

The UI Honors Program is also unique in the strong emphasis it puts on experiential learning (learning by doing), which comprises half the program's curricular requirements. Experiential learning takes the form of undergraduate research, study abroad, internships, teaching practica, being an honors ambassador or an Honors Writing Fellow (or both), and other opportunities. Learning by doing, besides being the most effective way of acquiring knowledge, also helps with self-discovery.

In general, students who are serious about their education and making a meaningful contribution to the world with their particular capabilities and gifts can be assured that the University of Iowa Honors Program will help them in their journey.

## Unique Honors Academic Activities

### Honors Outreach Ambassadors

Ambassadors earn academic credit for acquiring and then sharing knowledge of honors opportunities by organizing events around campus and meeting with prospective students and their families.

### Honors Writing Fellows

Fellows are trained and paid to assist in undergraduate courses by mentoring a dozen students each semester on major writing assignments.

### The Iowa Policy Research Organization

This organization selects honors students each year to earn academic credit by learning how to conduct policy analysis and then writing policy papers for Iowa communities and the Iowa Legislature.

## Study Abroad and Internships

These opportunities with a reflective component or embedded project enable students to earn honors academic credit for their experience.

Learn more about honors activities and Experiential Learning on the honors program website.

## Cocurricular Programs

Honors at Iowa offers students a rich variety of activities outside the classroom. Many honors students find cocurricular programming a good way to meet people, get involved, and learn more about themselves and the world around them. Some of the programs are volunteer-based, some offer pay, and some award honors credit. These opportunities provide peak educational experiences, especially extensive and intensive interactions with faculty mentors and other honors students.

- Honors newsletters, which are written by honors student editors, inform readers on and beyond the campus about honors at the University of Iowa.
- Honors student staff earn pay by staffing the UI Honors Program reception area and other duties as assigned.
- Honors Peer Mentors earn pay by mentoring honors students.
- The Iowa City Foreign Relations Council (ICFRC) hosts luncheon dialogues on current international issues. Past speakers include award-winning journalists, Nobel Peace Prize laureates, seasoned diplomats, prominent politicians, and policy analysts. Listening to and talking with these expert speakers allow honors students to become better informed about world affairs.
- The Presidential Scholars Program (PSP) engages recipients of the Presidential Fellowship in shared classes, opportunities for prestigious fellowships, and unique programming. Presidential Fellows participate in events with faculty and key administrators, scholarship and fellowship mentoring programs, and volunteer projects.

To learn more, visit Opportunities on the honors program website.

## Programs

### Undergraduate Program of Study University Honors

Honors at Iowa helps students tailor opportunities to different educational needs and goals. Honors students may take honors courses each semester that they are enrolled at the University. Honors courses are generally small and interactive. They connect students with distinguished professors and offer new topics each semester. Honors courses also are part of the GE CLAS Core curriculum and do not add requirements for graduation.

Students are encouraged to begin honors work early. In HONR:1100 Honors Primetime, entering students earn 1 s.h. of honors credit by taking a short course the week before fall classes begin. Students who enter the honors program directly from high school take HONR:1300 Honors First-Year Seminar with selected professors on current topics, earning 1 s.h. in the fall semester. Honors students may fulfill GE CLAS Core requirements by completing honors sections such

as RHET:1030 Rhetoric, ENGL:1200 The Interpretation of Literature, and CHEM:1110 Principles of Chemistry I.

Upper-level students may take honors courses in their majors or pursue individual instruction with faculty members through honors courses such as HONR:3994 Honors Research Practicum. Students also may earn honors credit for a non-honors course by developing an honors contract with the course instructor; the student and instructor negotiate a unique project for the course and develop the honors contract around the project.

Additional academic opportunities include honors advanced seminars, honors independent studies, and honors practica in teaching and service.

Students learn about honors opportunities in weekly emails from the UI Honors Program. Honors professional staff members and honors peer mentors offer guidance in personal meetings and group presentations. In addition, the honors staff helps students design individualized curricula for their special interests. To learn more, visit Honors Requirements and Forms on the program's website.

## Joining the Honors Program

Students may apply to the University of Iowa Honors Program as entering first-year, entering transfer, or current University of Iowa students. Current students are encouraged to apply prior to earning 60 s.h. in coursework. Those who join the UI Honors Program must attend an honors orientation.

To remain in the honors program and to graduate with University Honors, students must maintain a University of Iowa cumulative g.p.a. of at least 3.33 and complete the honors program curricular requirements; see "University Honors Curriculum" below. For more information about joining the University of Iowa Honors Program, see Joining the Program on the program's website.

## Graduation with University Honors

Students who graduate with University Honors through the UI Honors Program are recognized at commencement. University honors is noted on a student's diploma and transcript. UI Honors Program students completing any undergraduate degree program may graduate with University Honors.

## University Honors Curriculum

Students earning bachelor's degrees at the University of Iowa complete honors coursework and experiential learning in order to graduate with University Honors. Students are not required to complete all honors coursework requirements before they begin experiential learning.

## Honors Coursework

Students complete 12 s.h. of honors coursework during their first four full semesters in the program. Students may count a maximum of one honors contract course toward the coursework requirement; under preapproved circumstances, they may count up to 6 s.h. of honors contract course credit.

The following honors coursework must be completed.

- An honors first-year seminar during the first semester at the University of Iowa (for students who enter the UI Honors Program directly from high school). Students who must take a specific first-year seminar required by their major or living learning community may substitute another honors class for the honors first-year seminar requirement.

- An honors course or an honors contract course during the first full semester in the program.
- Additional honors coursework to total at least 12 s.h. within the first four full semesters in the program.

## Experiential Learning

Students complete 12 s.h. of honors credit in approved experiential learning activities. Students may satisfy the requirement with one or a few of the options below.

- Honors in the major (this option fulfills the entire 12 s.h. experiential learning requirement)
- Research
- Study abroad
- Internships
- Teaching assistantships/learning assistantships
- Honors Writing Fellows
- Iowa Policy Research Organization
- Experiential honors coursework
- Service learning

See more information about these experiential learning opportunities and others by visiting Experiential Learning on the Honors at Iowa website.

## Facilities

### Blank Honors Center

Honors at Iowa has its home in the Blank Honors Center (BHC), a facility that helps foster community among honors students. The Blank Honors Center is located near the center of the University's main campus, next to residence halls and classroom buildings. It offers social areas, quiet study areas, wireless internet access, computer stations, and classrooms for students. The center also houses the honors staff and has rooms for meetings, events, presentations, and conversation.

### Honors Residential Community

Honors housing is available for first-year honors students in Daum Hall, which is connected by a skywalk to the Blank Honors Center.

Students must apply to live in the honors residential community. See Housing on the University Housing and Dining website for information about how to apply. Visit Honors House on the UI Honors Program website to learn more about the honors housing community.

## Financial Support

Honors at Iowa offers its own scholarships to current honors students selected from academic programs throughout the University. Honors scholarships are available to incoming first-year honors students as well as current honors students. Applications are reviewed annually.

In addition, visit Scholarships and Awards on the UI Honors Program website.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and

should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Precollege Program of Study

The University of Iowa TRIO Upward Bound Project is a federally funded college preparatory program for income qualified and/or first-generation college students who are motivated to pursue a college degree. The program serves eligible high school students from three southeastern Iowa community high schools: Columbus Community High School, Muscatine High School, and West Liberty High School.

Students participate during the academic year in weekly after school programming at their local high school. They participate in science, technology, engineering, and math (STEM) related educational opportunities, American College Testing (ACT) preparation, community service, cultural programs, field trips, and college visits.

During the summer, students attend a six-week residential program on the University of Iowa campus from mid-June through July. Participants take mathematics, science, language arts, and world language courses to prepare them for classes they will take at their local high school in the fall. In addition, students take STEM workshops to expose them to a broader range of career opportunities and an ACT preparation course to ready them for college admissions exams.

Upward Bound Bridge students (those who will enter college in the fall) enroll in a University of Iowa course during the six-week summer session. Bridge students participate in an on-campus job shadow and take a college transition seminar.

Upward Bound provides services to students during high school through enrollment in postsecondary education. All services received are at no cost to students.

Other postsecondary institutions in Iowa and across the nation sponsor Upward Bound programs. High school students who do not attend schools served by the University of Iowa program should ask their counselors whether an Upward Bound program serves their area.

For more information, contact the TRIO Upward Bound Project.

## Admission

- Participants must reside in the target area and attend a target school.
- Students must be in grades 9 through 11.
- Family income must meet U.S. Department of Education low-income guidelines.
- Students are potential first-generation college students.

**Undergraduate certificate:** urban studies

**Faculty:** <https://sppa.uiowa.edu/faculty-staff>

**Website:** <https://sppa.uiowa.edu/future-students/undergraduate/certificate>

The Certificate in Urban Studies is for undergraduate students at the University of Iowa who seek to understand and impact urban issues through a planning perspective. Students learn urban policy and planning concepts and skills that enhance their ability to succeed in their chosen field. Urban policy planning principles, theories, applications, and methods are essential for students who seek to improve the quality and sustainability of the built and natural environments, and to promote equity and justice.

Certificate students will have an understanding of enduring and emerging urban issues and will be prepared to apply policy and planning concepts to making communities more resilient, inclusive, and prosperous. The Certificate in Urban Studies is awarded by University College.

## Programs

## Undergraduate Program of Study Certificate

- Certificate in Urban Studies [p. 2106]

# Urban Studies, Certificate

The Certificate in Urban Studies is highly relevant to students interested in addressing emerging and persistent issues of the 21st century—social justice, climate change, environmental conservation, sustainable development, mobility and access, public health, and economic prosperity—each of which has local, urban, and regional dimensions.

## Requirements

The undergraduate Certificate in Urban Studies requires 18 s.h. of courses taken at the University of Iowa. Students must earn a g.p.a. of at least 3.00 in certificate coursework. Coursework for the certificate may not be taken pass/nonpass. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

Students may be able to count no more than 9 s.h. earned in certificate courses toward requirements for other undergraduate majors, minors, or certificates.

Students begin certificate work with URP:3001/GEOG:3920 Planning Livable Cities, which provides an introduction to urban studies, policy, and planning. In addition, students choose 15 s.h. in approved electives.

The Certificate in Urban Studies requires the following coursework.

## Core Course

Code	Title	Hours
This course:		
URP:3001/ GEOG:3920	Planning Livable Cities	3

## Elective Courses

Code	Title	Hours
15 s.h. from these:

URP:4297	Financing Economic Development for Poverty Alleviation	3
URP:4752	Eight Generation Planning: Envisioning Regenerative Cities	3

## Admission

## Declaring the Certificate

To enter the certificate program, students must:

- first complete URP:3001/GEOG:3920 Planning Livable Cities with a grade of B or higher, and
- have completed 30 s.h. at the University of Iowa with a cumulative g.p.a. of at least 3.00.

Students may then declare the certificate in MyUI.

Students interested in pursuing the Certificate in Urban Studies must meet with the certificate advisor, be briefed on the certificate's expectations for performance, and complete a plan of study that must be approved by the certificate advisor.

Some University Calendar dates may change; see Calendars and Deadlines on the Office of the Registrar website for the most up-to-date academic calendar.

## Individual College Calendars

Some University of Iowa colleges have academic year schedules that vary from the one listed above. Contact the individual colleges or visit their websites; use the A-Z Search or the Directory Search on the University of Iowa home page.

# Campus Visits

Each year the University of Iowa is the destination for visitors with wide-ranging interests. Prospective and new students and their parents, new faculty and staff members, fans of intercollegiate athletics, University of Iowa Health Care patients, audiences for the visual and performing arts, museum visitors, and conference and continuing education participants are among those drawn to the campus.

## Prospective and New Students

Prospective and new students should contact the Admission Visitors Center if they are interested in a campus visit. The Admission Visitors Center hosts a variety of programs for future students and their families, including large group events and individual visits tailored to specific interests. It is best to visit the campus on weekdays when classes are in session and when other University offices are open. See Visit Campus on the Office of Admissions website or call 319-335-1566 to arrange for a campus visit.

## Attractions, Campus Maps, Parking

The University of Iowa website has links to campus maps, walking tours, how to arrange visits to varied attractions, and where to park on campus. For additional information about the University, use the A-Z Search on the University of Iowa home page.

# Iowa Administrative Code

The Code of Iowa contains information about admission and residency rules common to Iowa's three state universities—the University of Iowa, Iowa State University, and the University of Northern Iowa. It also provides supplemental information about application to the University of Iowa. Visit Iowa Code on the Iowa Legislature website to search and read the Iowa Administrative Code.
