- a These majors include a BA in anthropology, a BS in anthropology, a BA in economics, a BS in economics, a BA in geography, a BS in geography, a BA in history, a BA in political science, a BS in political science, a BA in psychology, a BS in psychology, a BA in sociology, or a BS in sociology.
- b GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- c This requirement may be met by a course required for the second degree.
- d Complete the College of Education verification of 10 hour field experience form available on the Office of Student Services web page.
- e Choose a course that will satisfy the Teacher Education Program math requirement.
- f Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- g Please see the College of Education website for detailed application instructions and deadlines. Admission is selective and a priority deadline exists.
- h Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.
- i As a requirement for completion of an approved Teacher Education Program for initial teaching licensure, the state of Iowa requires a passing score on this exam. The assessment is required before recommendation for licensure or certification to any state.

# World Language Education, B.A.

## Requirements

The Bachelor of Arts with a major in world language education requires a minimum of 120 s.h., including a minimum of 48 s.h. in world language professional education courses and 30-36 s.h. in world language education content courses. Students must maintain a g.p.a. of at least 2.70 in professional education course requirements. They also must complete the GE CLAS Core [p. 20]. The major requires admission to the Teacher Education Program (TEP). Application information can be obtained through the Office of Student Services.

Students must earn one of these majors at the University of Iowa in order to earn the B.A. in world language education: a B.A. in Asian languages and literature [p. 165] with a Chinese or Japanese subprogram, a B.A. in French [p. 501], a B.A. in German [p. 584], a B.A. in Italian [p. 505], a B.A. in Russian [p. 171], a B.A. in Spanish [p. 1072], or a B.A. in classical languages [p. 257] with a Latin language emphasis; both degrees may be earned at the same time. Separate application to each degree program is required. Graduates who have earned one of these degrees at another institution and wish to earn the B.A. in world language education should consult the Department of Teaching and Learning; additional coursework may be required.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Additional subject area endorsements can be completed in any 5-12 licensure program. Secondary teacher preparation programs in world language also offer a program that leads to licensure as a subject matter specialist in grades K-8. For more information and an advisor, contact the Department of Teaching and Learning.

For initial licensure, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special site programs provide experience in districts with diverse populations and students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline for student planning to student teach the following fall semester is November 15 and April 15 for the following spring semester.

The B.A. with a major in world language education requires the following work.

## Professional Education Course Requirements

Students complete at least 48 s.h. from the following.

### Foundation Courses

Foundation courses may be completed before or after admission to the major.

Code	Title	Hours
All of these:		
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
PSQF:1075	Educational Psychology and Measurement	3

## Additional Licensure Courses

Code	Title	Hours
All of these:		
EDTL:3002	Teaching and Learning Technologies	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas	1
EDTL:4406	World Language Practicum I	3
EDTL:4407	World Language Practicum II	3
EDTL:4410	Teaching K-12 Second Language Learners	3
EDTL:4416	Learning to Teach Second Languages I	3
EDTL:4417	Learning to Teach Second Languages II	3
EPLS:4180	Human Relations for the Classroom Teacher	3

## Student Teaching

Transfer students should consult their advisor since they must complete certain courses before they student teach.

Code	Title	Hours
All of these:		
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6
Optional course:		
EDTL:4089	Special Subject Area Student Teaching	3-6

## Mathematics Course

Students complete a college-level math course. Most students complete this course as a part of their GE CLAS Core [p. 20] requirement in Quantitative or Formal Reasoning. For questions about how the math course can be applied to the licensure requirement, see Academic Advising on the College of Education website.

Code	Title	Hours
One of these:		
CS:1110	Introduction to Computer Science	3
CS:1210	Computer Science I: Fundamentals	4
STAT:1010	Statistics and Society	3

STAT:1020/ PSQF:1020	Elementary Statistics and Inference	3
STAT:1030	Statistics for Business	4
Any mathematics course (prefix MATH), except MATH:0100, MATH:1005, or MATH:1210		

## World Language Education Content Courses

Students complete 30-36 s.h. in an approved College of Liberal Arts and Sciences world language major.

### Academic Plans

#### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

#### World Language Education, B.A.

Course	Title	Hours
<b>Academic Career</b>		
<b>Any Semester</b>		
Admission to the Teacher Education Program, College of Education, is by competitive application. For information about application requirements, process, and deadlines, please see the College of Education's website.		
Students must maintain a GPA of at least 2.70 in professional education course requirements.		
Students must earn another major at the University of Iowa in order to earn the BA in world language education. Both degrees may be earned at the same time. <sup>a</sup>		
Prerequisites for admission into the Teacher Education Program for world language education include 12 s.h. of coursework in the language of the second degree.		
Graduates who have earned one of these degrees at another institution and wish to earn the BA in world language education should consult the Department of Teaching and Learning; additional coursework may be required.

<b>Total Hours</b>	<b>130-136</b>
--------------------	----------------

- a These majors include a BA in Asian languages and literature with a Chinese or Japanese subprogram, a BA in French, a BA in German, a BA in Italian, a BA in Russian, a BA in Spanish, or a BA in classical languages with a Latin language emphasis.
- b Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- c GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- d Complete the College of Education verification of 10 hour field experience form available on the Office of Student Services web page.
- e Choose a course that will satisfy the Teacher Education Program math requirement.
- f Please see the College of Education website for detailed application instructions and deadlines. Admission is selective and a priority deadline exists.
- g Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- h Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.
- j As a requirement for completion of an approved Teacher Education Program for initial teaching licensure, the state of Iowa requires a passing score on this exam. The assessment is required before recommendation for licensure or certification to any state.

## Science Studies, B.S.

Science studies provides preparation in more than one discipline of science; a consideration of science from a philosophical, historical, and sociological perspective; an introduction to applied science (technology); and an education sequence.

Program planning in science studies requires the cooperation and involvement of a variety of University departments and colleges. Most of the program's requirements are drawn from courses offered by these varied academic units.

### Learning Outcomes

Students who major in science studies gain:

- knowledge in two or more areas of science;
- a specified proficiency in mathematics as a tool of science (with more mathematics study required for the physical science emphases than for the biological ones);
- a view of science from a historical, philosophical, and cultural perspective; and
- experience with the application of scientific knowledge.

### Research

Each faculty member in science studies is responsible for one or more areas of research. Major interests include studies of effective teaching and learning, science through writing, philosophy and sociology of science, individualized learning, social issues in science and technology, curriculum planning and development, professional development, intellectual development related to teaching and learning science, studies of effective use of hands-on activities, and evaluation and assessment of science instruction and programs.

### Programs and Projects

A wide range of funded programs provides ample opportunity for students to be involved in innovative development and research in science studies.

Science studies faculty members collaborate on a number of international research projects in many countries. Activities include faculty exchanges and cross-national studies.

International students enrich the opportunities for graduate studies in science studies. New international collaborative efforts are under way each year.

### Requirements

The Bachelor of Science with a major in science studies (awarded by the College of Liberal Arts and Sciences) requires a minimum of 120 s.h., including at least 48 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

The major in science studies is interdisciplinary. It is intended for students interested in education; it is not intended to prepare students for advanced study in one area of science. When graduates of the science studies program elect to pursue graduate study in a specific area of science, they often must complete additional coursework in that discipline after they are admitted to the Graduate College.

The science studies curriculum includes courses offered by science departments in the College of Liberal Arts and

Sciences, science applications courses, and courses in the history, philosophy, and sociology of science.

The major offers five emphasis areas: all-science, biology, chemistry, earth science, and physics. The all-science emphasis area is open only to students who will earn teacher licensure and would like equal preparation in biology, chemistry, earth science, and physics. Students who choose the all-science emphasis area do not choose a secondary emphasis area. They must complete all requirements for teacher licensure in order to graduate in the all-science emphasis area.

Students who do not choose the all-science emphasis area may elect whether or not to earn teacher licensure. They choose a primary and a secondary emphasis area from biology, chemistry, earth science, and physics, acquiring depth in the primary emphasis area equivalent to six semesters of sequential study and preparation in the secondary area equivalent to four semesters of sequential study.

All science studies students must complete the requirements for their emphasis area(s) plus the broad field science block. Those who wish to earn teacher licensure also must complete the College of Education's Teacher Education Program (TEP), including the 47 s.h. professional education sequence; see "Teacher Licensure" below.

### Special Rules

The Science Studies Program may involve many faculty advisors and more than one college or department. Consequently, the following special rules apply to science studies students.

- At least 10 s.h. of graded credit in science must be earned at the University of Iowa.
- No credit from the CLEP Natural Science General Examination may be applied toward the major in science studies.
- Courses for the major may not be taken pass/nonpass. Grades from all courses applied toward the science studies major are used in computing a student's grade-point average in the major, both at the University of Iowa and overall.

Since mathematics forms an integral part of so many aspects of modern science, all-science emphasis area education students are urged to complete appropriate advanced courses in both pure and applied mathematics (including statistics and computer science) so that they may be qualified to do graduate work and quantitative research later.

The B.S. with a major in science studies requires the following coursework.

### All-Science Emphasis Area

Students who choose the all-science emphasis area do not choose a secondary emphasis area. They complete a minimum of 48 s.h. for the major, including at least 36 s.h. in the following coursework (at least 9 s.h. in each of the four science disciplines—biology, chemistry, earth science, and physics), and 12 s.h. in the broad field science block. They also must complete all requirements for teacher licensure (see "Teacher Licensure" below).

## Biology

Code	Title	Hours
At least 9 s.h. from these:		
BIOL:1411	Foundations of Biology	4
BIOL:1412	Diversity of Form and Function	4
BIOL:2211	Genes, Genomes, and the Human Condition	3
BIOL:2673	Ecology	3
BIOL:3172	Evolution	4
HHP:3500	Human Physiology	3

## Chemistry

Code	Title	Hours
At least 9 s.h. from these:		
CHEM:1110	Principles of Chemistry I	4
CHEM:1120	Principles of Chemistry II	4
CHEM:2021	Fundamentals of Chemical Measurements	3
CHEM:2210	Organic Chemistry I	3
CHEM:2220	Organic Chemistry II	3

## Earth Science

Code	Title	Hours
At least 9 s.h. from these:		
EES:1030	Introduction to Earth Science	3-4
EES:1040	Evolution and the History of Life	3-4
EES:1050	Introduction to Geology	4
EES:1080	Introduction to Environmental Science	3-4
EES:3000	Geologic Training Assignment	1-3
EES:3070	Marine Ecosystems and Conservation	3

## Physics

At least 9 s.h. chosen as follows.

Code	Title	Hours
At least one of these:		
ASTR:1070	Stars, Galaxies, and the Universe	3-4
PHYS:1200	Physics of Everyday Experience	3
No more than one of these:		
PHYS:1511	College Physics I	4
PHYS:1611	Introductory Physics I	4
PHYS:1701	Physics I	4
No more than one of these:		
PHYS:1512	College Physics II	4
PHYS:1612	Introductory Physics II	3-4
PHYS:1702	Physics II	4

## Broad Field Science Block

Students complete 12 s.h. from the following.

Code	Title	Hours
This course:		
SIED:4135	The Nature of Science	4
At least two of these:		
SIED:4102	Societal and Educational Applications of Earth Science and Environmental	4
SIED:4103	Societal and Educational Applications of Biological Sciences	4
SIED:4105	Societal and Educational Applications of Physical Sciences	4
SIED:4106	Societal and Educational Applications of Chemical Concepts	4

## Biology Emphasis Area

Students who choose biology as their primary emphasis area complete a minimum of 50 s.h. for the major, including 24-25 s.h. in the following biology coursework plus at least 15 s.h. in a secondary emphasis area (chemistry, earth science, or physics) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

Code	Title	Hours
All of these:		
BIOL:1411- BIOL:1412	Foundations of Biology - Diversity of Form and Function	8
BIOL:2512	Fundamental Genetics	4
One of these:		
BIOL:2374	Biogeography	3
BIOL:2673	Ecology	3
One of these:		
BIOL:1370	Understanding Evolution	3
BIOL:3172	Evolution	4
One of these:		
BIOL:3343	Animal Physiology	3
HHP:3500	Human Physiology	3
One of these:		
BIOC:3110	Biochemistry	3
BIOL:2723	Cell Biology	3
BIOL:3233	Introduction to Developmental Biology	3
BIOL:3363	Plant Developmental Biology	3
And all of these:		
Coursework in a secondary emphasis area (chemistry, earth science, or physics)		15
Coursework listed under "Broad Field Science Block" below		12

## Broad Field Science Block

Students complete 12 s.h. from the following.

Code	Title	Hours
This course:		
SIED:4135	The Nature of Science	4
At least two of these:		

SIED:4102	Societal and Educational Applications of Earth Science and Environmental	4
SIED:4103	Societal and Educational Applications of Biological Sciences	4
SIED:4105	Societal and Educational Applications of Physical Sciences	4
SIED:4106	Societal and Educational Applications of Chemical Concepts	4

## Chemistry Emphasis Area

Students who choose chemistry as their primary emphasis area complete a minimum of 50 s.h. for the major, including 23 s.h. in the following chemistry coursework plus at least 15 s.h. in a secondary emphasis area (biology, earth science, or physics) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

Code	Title	Hours
All of these:		
CHEM:1110 & CHEM:1120	Principles of Chemistry I-II	8
CHEM:2210	Organic Chemistry I	3
CHEM:2220	Organic Chemistry II	3
CHEM:2410	Organic Chemistry Laboratory	3
CHEM:3250	Inorganic Chemistry (spring)	3
One of these:		
BIOC:3110	Biochemistry	3
CHEM:3110	Analytical Chemistry I	3
CHEM:4431	Physical Chemistry I	3
And all of these:		
Coursework in a secondary emphasis area (biology, earth science, or physics)		15
Coursework listed under "Broad Field Science Block" below		12

## Broad Field Science Block

Students complete 12 s.h. from the following.

Code	Title	Hours
This course:		
SIED:4135	The Nature of Science	4
At least two of these:		
SIED:4102	Societal and Educational Applications of Earth Science and Environmental	4
SIED:4103	Societal and Educational Applications of Biological Sciences	4
SIED:4105	Societal and Educational Applications of Physical Sciences	4
SIED:4106	Societal and Educational Applications of Chemical Concepts	4

## Earth Science Emphasis Area

Students who choose earth science as their primary emphasis area complete a minimum of 48 s.h. for the major, including at least 21 s.h. in the following earth science coursework plus at least 15 s.h. in a secondary emphasis area (biology, chemistry, or physics) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

Code	Title	Hours
Both of these:		
EES:1040	Evolution and the History of Life	4
EES:1080	Introduction to Environmental Science	4
One of these:		
EES:1030	Introduction to Earth Science	3-4
EES:1050	Introduction to Geology	4
One of these:		
EES:2831	Geologic Field Methods	3
EES:3000	Geologic Training Assignment	1-3
EES:3300	Sedimentary Geology	4
EES:3840	Structural Geology	4
One of these:		
EES:3020	Earth Surface Processes	3
EES:3210	Principles of Paleontology	3
EES:3360	Soil Genesis and Geomorphology	3
One of these:		
EES:1290	Energy and the Environment	3
GEOG:1050	Foundations of GIS	4
GEOG:4010	Field Methods in Physical Geography	3
One of these:		
EES:3070	Marine Ecosystems and Conservation	3
EES:3080	Introduction to Oceanography	2
And all of these:		
Coursework in a secondary emphasis area (biology, chemistry, or physics)		15
Coursework listed under "Broad Field Science Block" below		12
<b>Broad Field Science Block</b>		
Students complete 12 s.h. from the following.		
This course:		
SIED:4135	The Nature of Science	4
At least two of these:		
SIED:4102	Societal and Educational Applications of Earth Science and Environmental	4
SIED:4103	Societal and Educational Applications of Biological Sciences	4

SIED:4105	Societal and Educational Applications of Physical Sciences	4
SIED:4106	Societal and Educational Applications of Chemical Concepts	4

## Physics Emphasis Area

Students who choose physics as their primary emphasis area complete a minimum of 47 s.h. for the major, including at least 20 s.h. in the following physics coursework plus at least 15 s.h. in a secondary emphasis area (biology, chemistry, or earth science) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

Code	Title	Hours
One of these sequences:		
PHYS:1511- PHYS:1512	College Physics I-II (if physics is a secondary emphasis area)	8
PHYS:1611- PHYS:1612	Introductory Physics I-II	8
PHYS:1701- PHYS:1702	Physics I-II	8
One of these:		
PHYS:2703	Physics III	4
PHYS:3710	Intermediate Mechanics	3
One of these:		
ASTR:1070	Stars, Galaxies, and the Universe (if physics is a secondary emphasis area)	3-4
ASTR:1080	Exploration of the Solar System (if physics is a secondary emphasis area)	3-4
ASTR:1771	Introductory Astronomy I: Basic Astrophysics and Planetary Astronomy	4
One of these:		
PHYS:3811	Electricity and Magnetism I	3
PHYS:3850	Electronics	4
This course:		
PHYS:1200	Physics of Everyday Experience	3
And all of these:		
Coursework in a secondary emphasis area (biology, chemistry, or earth science)		15
Coursework listed under "Broad Field Science Block" below		12

## Broad Field Science Block

Students complete 12 s.h. from the following.

Code	Title	Hours
This course:		
SIED:4135	The Nature of Science	4
At least two of these:		
SIED:4102	Societal and Educational Applications of Earth Science and Environmental	4

SIED:4103	Societal and Educational Applications of Biological Sciences	4
SIED:4105	Societal and Educational Applications of Physical Sciences	4
SIED:4106	Societal and Educational Applications of Chemical Concepts	4

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Teacher Education Program Application and Admission on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Honors

### Honors in the Major

The science studies program offers outstanding students the opportunity to graduate with honors in the major. Honors students must maintain a cumulative University of Iowa g.p.a. of at least 3.33 and fulfill other requirements; contact the Science Education program for more information about graduating with honors in the science studies major.

### University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the science studies major.

## Career Advancement

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

### Four-Year Graduation Plan

The Four-Year Graduation Plan is not available to students majoring in science studies.

### Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Science Studies, B.S.

- Biology Emphasis [p. 1434]
- Chemistry Emphasis [p. 1435]
- Earth Science Emphasis [p. 1435]
- Physics Emphasis [p. 1436]

### Biology Emphasis

Course	Title	Hours
<b>Academic Career</b>		
<b>Any Semester</b>		

Students will choose a secondary emphasis area from chemistry, earth science, or physics.

Hours		0
<b>First Year</b>		
<b>Fall</b>		
CHEM:1070 or CHEM:1110	General Chemistry I <sup>a</sup> or Principles of Chemistry I	4
RHET:1030 or ENGL:1200	Rhetoric or The Interpretation of Literature	3 - 4
GE CLAS Core: World Languages First Level Proficiency or elective course <sup>b</sup>		4 - 5
Elective course <sup>c</sup>		3
CSI:1600	Success at Iowa	2
<b>Hours</b>		<b>16-18</b>

<b>Spring</b>		
CHEM:1120	Principles of Chemistry II	4
BIOL:1411	Foundations of Biology <sup>d</sup>	4
GE CLAS Core: World Languages Second Level Proficiency or elective course <sup>b</sup>		4 - 5
GE CLAS Core: Diversity and Inclusion <sup>e</sup>		3

SIED:4103	Societal and Educational Applications of Biological Sciences <sup>f</sup>	4
GE CLAS Core: World Languages Fourth Level Proficiency or elective course <sup>b</sup>		4 - 5
Major: secondary emphasis area course <sup>g</sup>		3 - 4
<b>Hours</b>		<b>15-17</b>

<b>Third Year</b>		
<b>Fall</b>		
BIOL:3172 or BIOL:1370	Evolution or Understanding Evolution	3
BIOL:3343 or HHP:3500	Animal Physiology or Human Physiology	3

GE CLAS Core: Literary, Visual, and Performing Arts <sup>e</sup>		3
GE CLAS Core: Social Sciences <sup>e</sup>		3
SIED:4105 or SIED:4106 or SIED:4102	Societal and Educational Applications of Physical Sciences <sup>f</sup> or Societal and Educational Applications of Chemical Concepts or Societal and Educational Applications of Earth Science and Environmental	4
<b>Hours</b>		<b>16</b>

<b>Spring</b>		
BIOL:2673 or BIOL:2374	Ecology or Biogeography	3
GE CLAS Core: Values and Culture <sup>e</sup>		3
GE CLAS Core: Historical Perspectives <sup>e</sup>		3
Major: secondary emphasis area course <sup>g</sup>		3 - 4
Elective course <sup>c</sup>		3
<b>Hours</b>		<b>15-16</b>

<b>Fourth Year</b>		
<b>Fall</b>		
Major: approved biology or biochemistry course <sup>h</sup>		3
SIED:4135	The Nature of Science	4
Major: secondary emphasis area course <sup>g</sup>		3 - 4
Elective course <sup>c</sup>		3
Elective course <sup>c</sup>		3
<b>Hours</b>		<b>16-17</b>

<b>Spring</b>		
GE CLAS Core: International and Global Issues <sup>e</sup>		3
Major: secondary emphasis area course <sup>g</sup>		3 - 4
Major: secondary emphasis area course (if needed) <sup>g</sup>		3 - 4
Elective course <sup>c</sup>		3
Elective course (if needed) <sup>c</sup>		2 - 3
Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall) <sup>i</sup>		
<b>Hours</b>		<b>14-17</b>
<b>Total Hours</b>		<b>124-136</b>

a Enrollment in chemistry courses requires completion of a placement exam.

b Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.

c Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.

d Fulfills a major requirement and may fulfill a GE requirement.

e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.

f Students must take two of the applications courses SIED:4102, SIED:4103, SIED:4105, or SIED:4106.

g Students must complete 15 semester hours in their secondary emphasis area.

h Choose from BIOC:3110, BIOL:2723, BIOL:3233, or BIOL:3363. Some courses are offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Teaching and Learning, M.A.

## Art Education

The Master of Arts in teaching and learning with an art education subprogram requires a minimum of 38 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program prepares highly qualified teachers of art for elementary and secondary schools and community colleges. Its strong academic emphasis helps teachers who are creative artists to become highly literate in the history and language of art.

The M.A. in teaching and learning with an art education subprogram requires the following coursework.

## Requirements

Code	Title	Hours
One of these options:		
	Studio art courses (12 s.h.) and art history courses (6 s.h.)	18
	Art history courses (12 s.h.) and studio art courses (6 s.h.)	18
And these:		
EDTL:6267	Seminar: Current Issues in Art Education	3-4
	Additional coursework (consult advisor)	12
	Studio or written thesis course (consult advisor)	5

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have completed the equivalent of the minimum coursework in art required for a University of Iowa B.A. or B.F.A. in art and must have a license/certificate to teach art. Applications must include a representative portfolio of the applicant's work, consisting of eight digital reproductions of artwork and one example of written work, which may be a paper previously written for a course or an original paper.

## Developmental Reading

The Master of Arts in teaching and learning with a developmental reading subprogram requires a minimum of 35 s.h. of graduate credit with thesis and a minimum of 33 s.h. of graduate credit without thesis. Students must maintain a program g.p.a. of at least 3.00.

The program prepares graduate students for positions as reading specialists in kindergarten and grades 1-12. The required coursework develops the skills, knowledge, and competencies needed for K-12 literacy support positions, including literacy instructional coaching positions, curriculum directors of literacy, and literacy interventionists. The program also builds a background in reading/literacy for students who want to specialize further in the area and eventually plan to teach and/or conduct research at a college or university.

Successful completion of this program, combined with three years of successful teaching experience that includes teaching

reading as a significant part of the responsibility, qualifies a student for certification as a reading specialist.

The M.A. in teaching and learning with a developmental reading subprogram requires the following coursework.

## Required Courses

Code	Title	Hours
All of these:		
EDTL:4171	Diversity and Exceptionalities in Literacy Instruction	3
EDTL:4394	Secondary Reading Instruction	3
EDTL:6164	Early Literacy Development and Instruction	3
EDTL:6165	Reading and Writing Across Intermediate Grades	3
EDTL:6167	Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms	3
EDTL:6171	Advanced Reading Clinic Techniques	3
EDTL:6172	Advanced Reading Clinic Practicum	3
EDTL:7008	Seminar: Research and Current Issues (literacy)	3
PSQF:4740	Issues in K-12 Assessment	3
One of these:		
EDTL:5085	Generation Innovation: Technology Integration in 21st-Century K-12 Schools	3
PSQF:4750	Learning Environments: Design, Context, and Activity	3
PSQF:6200	Educational Psychology	3
PSQF:6208	Digital Media and Learning	3
One of these:		
EDTL:7165	Reading Clinic: Supervision	3
EPLS:6383	Supervision and Evaluation	3

## Thesis

A thesis is required for the thesis option.

Code	Title	Hours
EDTL:6393	Master's Thesis	2

## Electives

Students, in consultation with their advisors, may select any remaining semester hours as electives from areas such as curriculum, supervision, language arts, testing and evaluation, linguistics, or speech pathology.

## Comprehensive Examination

Comprehensive examinations are typically composed of two components. In consultation with an advisor, students select from a menu of options that best meets their professional goals. Options might include writing a paper for publication, designing a professional development workshop, a review of literature focused on one aspect of their studies, and writing/submitting a grant to fund a project at their school.

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00; hold an early childhood, elementary, or secondary school teaching certificate; and show evidence of completing two years of successful teaching experience.

### English Education

The Master of Arts in teaching and learning with an English education subprogram requires a minimum of 30 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program is intended for experienced teachers of English. It provides opportunities for professional development and preparation for department chairs, supervisors of English, and curriculum specialists for secondary schools.

M.A. students specialize in English education and in one or two other areas. The other area(s) may include reading, writing, curriculum, adolescent literature, or a literary area. Students and their advisors plan the program of study together. The only required course is ECTL:6315 M.A. Seminar: English Education.

## Comprehensive Examinations

Comprehensive examinations are developed in consultation with a student's advisor. Students ask three faculty members to serve on their committee. Faculty members may include professors outside of the College of Education. One of these faculty members, usually a student's advisor, serves as chair of the committee.

## Admission

Applicants must meet the admission requirements of the Graduate College. They should have taken extensive coursework in English and should have taught English for at least two years. Application should be made to the College of Education.

### Mathematics Education

The Master of Arts in teaching and learning with a mathematics education subprogram requires a minimum of 32 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program provides students with advanced specialization in mathematics and education as a better foundation for K-12 teaching.

## Required Courses

M.A. students take a minimum of 9 s.h. of coursework in mathematics approved by their advisor. They also take a minimum of four courses in mathematics education, which must include ECTL:5535 Current Issues in Mathematics Education and three courses chosen in consultation with their advisor.

Students choose a cognate area, usually enrolling in three or more courses in the area. Suggested areas include educational psychology, educational statistics and measurement, history or philosophy of education, pure or applied mathematics, instructional design and technology, counselor education, curriculum, administration, and special

education. Courses are chosen in consultation with a faculty member from their cognate area.

Students also complete a sufficient number of electives in mathematics and education, chosen with the approval of their advisor, to complete 32 s.h. of credit.

## Comprehensive Examination

Students take three two-hour comprehensive exams: one in mathematics education, the second in mathematics, and the third in their cognate area.

## Admission

Applicants must meet the admission requirements of the Graduate College. Except in unusual cases, they should hold a professional license/certificate to teach school mathematics.

### Multilingual Education

The Master of Arts in teaching and learning with a multilingual education subprogram requires a minimum of 33-36 s.h. of graduate credit. Students take at least 15 s.h. in second language education coursework, 9 s.h. in graduate language or linguistics, and 9 s.h. in the cognate area. They must earn 9 s.h. in courses numbered 5000 or above. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program. Candidacy for the master's degree is reevaluated annually. Students must maintain a program g.p.a. of at least 3.00.

The program is designed for students who would like to pursue a multilingual education specialization in teaching (kindergarten through college) or in related fields (e.g., language laboratory directors, instructional materials designers, or evaluation specialists). It also offers enrichment in multilingual language pedagogical knowledge for practicing teachers. Students may design programs with a special focus.

The M.A. in teaching and learning with a multilingual education subprogram requires the following work, including these suggested courses.

Code	Title	Hours
All of these:		
EDTL:6400	Fundamentals of Second Language Assessment	3
EDTL:6483	Multilingual Education and Applied Linguistics	3
EDTL:6497	Principles of Course Design for Second Language Instruction	3
At least 6 s.h. from these:		
EDTL:6402	Second Language Program Management	3
EDTL:6403	Language Policy and Planning	3
EDTL:6409	Cultural Curriculum	3
EDTL:6480	Issues in Foreign Language Education	3
EDTL:6484	Reading in a Second Language	3

### Target Language

In consultation with their advisor, students select at least 9 s.h. of graduate language courses in their area of interest

### Cognate Area

Students complete at least 9 s.h. of coursework chosen in consultation with their advisor

## Master's Examination

Students take a written exam during the semester in which they plan to graduate. The exam covers second language education and the two study areas selected by a student. It is written by the graduate committee, which consists of at least three faculty members, two of whom must be from world language education. The candidate and the advisor discuss and formalize the exam's content and process eight months before the exam.

## Admission

Applicants must meet the admission requirements of the Graduate College. They must be proficient in English and in another language and must have earned at least 20 s.h. in undergraduate, upper-division world language coursework. Applicants should submit a statement of purpose explaining their graduate study goals. A g.p.a. of at least 3.00 in undergraduate coursework and some experience living, working, and/or studying in the culture of the applicant's chosen target language are preferred. International applicants whose first language is not English must score at least 81 (internet-based) on the Test of English as a Foreign Language (TOEFL) with a speaking score of 26 and a writing score of 25.

## Social Studies Education

The Master of Arts in teaching and learning with a social studies education subprogram requires 38 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program provides an opportunity for interdisciplinary work in education, history, social science, or related areas for classroom teachers, high school department chairs, supervisors, and others interested in advancing their competence in history and the social sciences and greater proficiency in teaching and supervision.

## Requirements

Students create a course of study in consultation with their advisor that aligns with their interests related to social studies education and/or their profession. Students distribute the program's required 38 s.h. among three concentration fields in history or a social science (or related area), social studies and global education, and general education. At least 9 s.h. must be earned in history or a social science and in general education courses numbered 3000 or above. Students also must earn at least 9 s.h. in courses numbered 6000 or above offered through the social studies education program or a related area of education.

## Thesis Option

Students who choose the thesis option complete a research or investigative problem. If the thesis is research or investigation in history, social science, or a related area, the thesis director is a member of the appropriate department. If the thesis is an investigative problem in social studies education, the thesis director is a College of Education faculty member.

## Comprehensive Examination

Candidates select one faculty member from each concentration area to serve as a committee member responsible for creating and reviewing a question for the written exam. Committee members are selected in consultation with a candidate's advisor. The required comprehensive examination consists of three two-hour written exams, one on each of the three concentration fields.

## Admission

Applicants must meet the admission requirements of the Graduate College. They should have a bachelor's degree in education, history, or one of the social sciences from an accredited institution; a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 3.00 in history and/or social science courses; and two letters of recommendation. Evidence of writing ability in a completed major paper or essay also is required. Typically, applicants are expected to hold a secondary teaching license/certificate.

## Special Education

The Master of Arts in teaching and learning with a special education subprogram requires a minimum of 32 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program prepares individuals to deliver appropriate levels of service to students with disabilities at the elementary and secondary levels, in either public or private settings. Applicants with a master's degree and special education certification may request admission in order to obtain an additional area of special education licensure/certification (i.e., professional improvement). Students typically receive licensure/certification in at least one area upon completing the program. Contact the Department of Teaching and Learning for specific program requirements.

Special education programs are offered in K-8 and 5-12 Instructional Strategist I: Mild/Moderate, and K-12 Instructional Strategist II: BD/LD. These programs are designed to prepare graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. All teacher licensure/certification programs are approved by the Iowa Department of Education.

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00 and/or at least 3.00 on a minimum of 12 s.h. of graduate coursework. A combined verbal and quantitative score of at least 300 on the Graduate Record Exam (GRE) General Test is preferred. Applicants seeking initial teacher licensure must have at least 10 hours of documented experience in K-12 schools. Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL).

Application materials must include a completed Graduate College application form; copies of official transcripts for all college coursework; an official report of Graduate Record Exam (GRE) General Test scores; three current letters of recommendation; and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.

## Teaching, Leadership, and Cultural Competency

The Master of Arts in teaching and learning with a teaching, leadership, and cultural competency subprogram requires a minimum of 33 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program is offered completely online. The program addresses identified needs within the profession: English Language Learner (ELL) instruction, cultural competency in the classroom, evidenced-based frameworks for technology integration, educational leadership, and teacher leader/instructional coaching best practices.

Students take a 24 s.h. core, including courses in instructional leadership, cultural competency and diversity, assessment, technology, and curriculum; and 9 s.h. of specialized coursework. Iowa teachers can apply their course credits toward their ongoing learning requirements for maintaining licensure. The program requirements also are aligned with the National Board for Professional Teaching Standards (NBPTS) certification process. Additionally, elective tracks are aligned with Iowa added endorsements in talented and gifted (TAG); science, technology, engineering, and math (STEM); and English as a second language (ESL).

The M.A. in teaching and learning with a teaching, leadership, and cultural competency subprogram requires the following coursework.

Code	Title	Hours
All of these:		
EDTL:5090	Diversity and Identity in K-12 Schools	3
EDTL:5095	Issues in U.S. Schools	3
EDTL:6483	Multilingual Education and Applied Linguistics	3
EPLS:5090	Instructional Coaching for Teaching Excellence	3
PSQF:4740	Issues in K-12 Assessment	3
PSQF:4750	Learning Environments: Design, Context, and Activity	3
EDTL:5099	Conducting School-Based Action Research	3
Specialization courses (consult advisor)		9
One of these:		
EDTL:5085	Generation Innovation: Technology Integration in 21st-Century K-12 Schools	3
PSQF:4760	Participatory Learning and Media: Creating, Remixing, Making, and Education	3

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor's degree, a g.p.a. of at least 3.00 in undergraduate coursework, a teaching license, or relevant significant teaching experience in K-12 education. Applicants are asked to supply two letters of recommendation from individuals familiar with their work in schools or in an educational program. International applicants whose first language is not English must score at least 81

(internet-based) on the Test of English as a Foreign Language (TOEFL).

# Teaching and Learning, M.A.T.

## Art Education

The Master of Arts in Teaching in teaching and learning with an art education subprogram requires a minimum of 58 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program is designed primarily for graduates of baccalaureate degree programs in art who would like to become teachers but have no previous coursework in education. It features advanced work in art along with the courses required for certification. Additional art coursework may be advised to render a student's degree equivalent to one from the University of Iowa and to fulfill licensure requirements. Successful completion of the program enables students to receive a credential to teach art in grades K-12.

The M.A.T. in teaching and learning with an art education subprogram requires the following work.

Code	Title	Hours
All of these:		
EDTL:3002	Teaching and Learning Technologies	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas	1
EDTL:3143	Methods of Elementary Art and Field Experiences	3
EDTL:3204	Art Education Studio and Field Components	3
EDTL:3205	Methods of Secondary Art and Field Experience	3
EDTL:3290	Introduction and Practicum: Art	3
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4192	Special Area Student Teaching	6
EDTL:4900	Foundations of Special Education	3
EDTL:5222	Creativity, Imagination, Play, and Human Development Through the Arts (must be taken during student's first semester in the college)	3
EDTL:6267	Seminar: Current Issues in Art Education	4
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3

Graduate-level coursework in art studio or art history or a related area (consult advisor)

6

### Total Hours

58

The coursework in art studio or art history or a related field may contribute to licensure requirements. Other art licensure requirements may be taken prior to or in addition to the courses listed above. To be considered for a teaching assistant (TA) position, students must take EDTL:7380 Practicum in College Teaching for 1 s.h. after their first semester in the program and after completion of EPLS:3000 Foundations of Education, EPLS:4180 Human Relations for the Classroom Teacher, and PSQF:6200 Educational Psychology, and a course in creativity, imagination, and play: human development through art.

## Comprehensive Examination

Students complete comprehensive examinations before their student teaching semester. The comprehensive examination involves a reflective project supervised by art education faculty. The project encompasses issues explored throughout the course of study and can involve inquiry through studio work or practice. For deadlines, checklist, and instructions, see Graduate Exams on the Office of Student Services website.

## TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an M.A.T. in teaching and learning with the art education subprogram.

## Admission

Applicants must meet the admission requirements of the Graduate College. They should have completed a baccalaureate degree program in art, equivalent to that which is offered through the College of Liberal Arts and Sciences at the University of Iowa, with an undergraduate g.p.a. of at least 3.00. Candidates also must meet all Teacher Education Program (TEP) application requirements. Since the M.A.T. is a credentialing program, candidates must not have qualified previously for a credential.

## English Education

The Master of Arts in Teaching in teaching and learning with an English education subprogram requires a minimum of 45 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program is designed for students who have an undergraduate degree in English and few or no professional education courses. Successful completion of the program enables students to receive a credential to teach English in secondary schools.

The M.A.T. in teaching and learning with an English education subprogram requires the following work.

## English

Code	Title	Hours
All of these:		
EDTL:3382	Language and Learning	3
EDTL:3393	Reading and Teaching Adolescent Literature	3
EDTL:4355	Approaches to Teaching Writing	3
EDTL:6315	M.A. Seminar: English Education	arr.

Students may take the following English courses as part of the M.A.T. program or as part of their undergraduate program:

A course in Shakespeare

Three courses in American literature

A course in British literature

A course in nonfiction or creative writing, in addition to EDTL:4355

## Education

Code	Title	Hours
All of these:		
EDTL:3002	Teaching and Learning Technologies (must be taken during student's first semester in the college)	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	arr.
EDTL:4092	Observation and Laboratory Practice in the Secondary School	arr.
EDTL:4314	Introduction and Practicum: Secondary English (must be completed before enrollment in EDTL:4315 and EDTL:4394)	3
EDTL:4315	Learning to Teach Secondary English/Language Arts and Field Experience	3
EDTL:4394	Secondary Reading Instruction	3
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3

## Comprehensive Examination

The comprehensive examination involves a series of reflective projects supervised by English education faculty. The projects encompass issues explored throughout the course of study and involve integration of theory and practice.

## TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an M.A.T. in teaching and learning (English education).

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have been granted a B.A. in English or the equivalent, with an undergraduate g.p.a. of at least 3.00. They also must meet all Teacher Education Program (TEP) application requirements. Since the M.A.T. is a credentialing program, candidates must not have qualified previously for a credential. Applicants are expected to have no more than 6 s.h. of coursework in professional education courses before admission.

## Mathematics Education

The Master of Arts in Teaching in teaching and learning with a mathematics education subprogram requires a minimum of 48 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program is designed primarily for students who decide they would like to become teachers and have already completed a B.S. or B.A. in mathematics. It features advanced work in mathematics along with the courses required for certification. It is a means by which students can obtain both a master's degree and certification. It is assumed that students have completed a baccalaureate degree in mathematics equivalent to one that would be completed at the University of Iowa, but has no previous coursework in education. More coursework may be advised if there are mathematics courses a student has not taken as part of the undergraduate mathematics baccalaureate degree program to render the student's degree equivalent to one from the University of Iowa.

The M.A.T. in teaching and learning with a mathematics education subprogram requires the following work.

## Education

Code	Title	Hours
The first three courses should be taken during the first semester of registration:		
EDTL:3002	Teaching and Learning Technologies	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas	1
All of these:		
EDTL:3532	Introduction and Practicum: Mathematics	3
EDTL:3534	Methods: Middle School Mathematics	3
EDTL:4535	Methods: High School Mathematics	3

EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3
One additional graduate-level mathematics education course in consultation with an advisor		
The following courses are taken concurrently and constitute the student teaching semester:		
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6

## Graduate Mathematics Requirements

Code	Title	Hours
At least one of these:		
MATH:4050	Introduction to Discrete Mathematics	3
MATH:4060	Discrete Mathematical Models	3
MATH:4120	History of Mathematics	3

## Comprehensive Examination

The comprehensive exam includes a required two-part exam in mathematics and mathematics education. At the discretion of the examining committee, this exam may consist of two parts and is both written and oral. The mathematics and mathematics education comprehensive examinations will not duplicate course examinations, but will assess both mathematics education and the mathematics specialization area chosen by a student.

## Admission

Applicants must meet the admission requirements of the Graduate College. They also must meet all Teacher Education Program (TEP) application requirements. Candidates should have completed a baccalaureate degree program in mathematics equivalent to that which is offered through the College of Liberal Arts and Sciences at the University of Iowa. An undergraduate g.p.a. of at least 3.00 is required for admission and must be maintained throughout the enrollment period.

## Combined Program

### B.A. in Mathematics/M.A.T.

The College of Liberal Arts and Sciences and the College of Education offer students the opportunity to earn their Bachelor of Arts in mathematics/Master of Arts in Teaching degree in education with a mathematics education subprogram in as little as five years.

The Combined B.A./M.A.T. (4+1) program is a seamless process whereby students can progress from undergraduate to graduate status. The usual period of study for both the Bachelor of Arts and the Master of Arts in Teaching degree

is six years. Through careful planning, many of the courses required for the M.A.T. program can be taken during the undergraduate years, creating an opportunity to focus the fifth year of study on the comprehensive and student teaching requirements. Visit B.A./M.A.T. Mathematics Education on the College of Education website.

## Admission

Students are eligible to apply to the 4+1 program during their sophomore or junior year if they have a cumulative g.p.a. of at least 3.25 or if they meet special considerations. Application materials must include a completed application to the Teacher Education Program (TEP), two recommendations from University of Iowa faculty, a career plan describing how this program will enhance the student's scholarly and or career goals, and an unofficial transcript of student's prior work.

Students who submit completed applications will be notified within 30 days if they have been accepted into the program. The program accepts a limited number of students each year on a competitive basis. Once accepted into the program, a student meets with an advisor to select an advisory committee to plan a course of study.

During the sixth semester, a student in the program who has completed 80 s.h. of undergraduate work and maintained a 3.00 minimum g.p.a. must apply to the Graduate College. Application to the Graduate College must include a completed Graduate College application form, a letter of application/statement of purpose, one additional letter of recommendation from a faculty member in the mathematics major, Graduate Record Exam (GRE) General Test scores (however, the GRE requirement has been suspended for the 2021-22 admissions cycle), and Test of English as a Foreign Language (TOEFL) test scores for international students.

Students are granted undergraduate/graduate credit for coursework during the seventh semester; they begin paying graduate tuition during the eighth semester until completion of the program. The baccalaureate degree must be conferred at the end of the eighth semester or in the program's fourth year.

## Science Education

The Master of Arts in Teaching in teaching and learning with a science education subprogram requires a minimum of 48 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program is designed primarily for graduates of bachelor's degree programs in science who decide that they would like to become teachers. It features advanced work in science along with the courses required for certification, enabling students to earn a master's degree and teaching certification at the same time. It is assumed that students have completed considerable coursework in science (at least 56 s.h.) as undergraduates, but no previous coursework in education. Students' science coursework should be equivalent to that required by the University of Iowa Science Education program.

The M.A.T. in teaching and learning with a science education subprogram requires the following work.

## Professional Education Foundation Sequence

Code	Title	Hours
All of these:		
EDTL:3002	Teaching and Learning Technologies (must be taken during student's first semester in the college)	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)	1
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
One of these:		
PSQF:1075	Educational Psychology and Measurement	3
PSQF:6200	Educational Psychology	3
Science education courses taken in the following sequence:		
EDTL:4751	Science Methods I: Early Learners with Field Experience	3
EDTL:4752	Science Methods II: Junior High with Field Experience	3
These two taken concurrently:		
EDTL:4753	Science Methods III: High School with Field Experience	3
EDTL:4779	Secondary School Science Practicum	2
These three taken concurrently:		
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6

## Electives

A minimum of one graduate course in biology, chemistry, earth science, or physics is required. Students who have satisfied portions of the required science coursework listed above must take additional science coursework to meet the minimum requirement of 48 s.h.

## Comprehensive Examination

Students complete comprehensive examinations before their student teaching semester. Two written comprehensive exams, one in science education and one in a science specialization area, are required. Students may not duplicate course examinations in these areas.

## TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an M.A.T. in teaching and learning (science education).

### Admission

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor's degree with a major or the equivalent in one of the sciences. A g.p.a. of at least 3.00 is required for admission and must be maintained throughout the program. Applicants must meet all Teacher Education Program (TEP) application requirements.

## Combined Program

### B.A./M.A.T.

College of Liberal Arts and Sciences students who want to teach science and are working toward a Bachelor of Arts degree with a major in biology, chemistry, environmental sciences, or physics may apply to the combined Bachelor of Arts/Master of Arts in Teaching with a science education subprogram offered by the College of Liberal Arts and Sciences and the College of Education. The combined program enables students to earn a B.A. and an M.A.T. in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 18 s.h. of qualifying credit toward both degrees.

B.A. students are admitted to the combined program before their fourth year. They may begin taking education courses during their third year, but they may not earn graduate credit for them until their fourth and fifth years, after they have been admitted to the combined program. Students take 30 s.h. of coursework during the fifth year and must complete all remaining requirements for both degrees that year.

### Science Specialization (Broad Field Science Block)

The following courses are required for the undergraduate degree in science studies at the University of Iowa. They need not be repeated by M.A.T. candidates who need one or more advanced courses in their major science area, or by students from other interdisciplinary science discipline programs that prepare teachers for grades 6-9.

Code	Title	Hours
This course:		
SIED:4135	The Nature of Science	4
Two of these (unless completed during undergraduate study):		
SIED:4102	Societal and Educational Applications of Earth Science and Environmental	4
SIED:4103	Societal and Educational Applications of Biological Sciences	4
SIED:4105	Societal and Educational Applications of Physical Sciences	4

SIED:4106	Societal and Educational Applications of Chemical Concepts	4
-----------	--	---

Education courses required for the combined program are listed under "Combined Program" above. Requirements for the B.A. degree are listed under the B.A. in biology [p. 187], B.A. in chemistry [p. 218], B.A. in environmental sciences [p. 467], and B.A. in physics [p. 905] (College of Liberal Arts and Sciences) in the Catalog.

## Social Studies Education

The Master of Arts in Teaching in teaching and learning with a social studies subprogram requires at least 47 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program provides an opportunity for interdisciplinary work in education, history, social science, or related areas. It is for students who have a bachelor's degree in history or a social science (or considerable coursework in one of the areas) and who wish to obtain a teaching license/certificate while earning the M.A.T. degree. Students must apply to both the Graduate College and the College of Education.

## Requirements

Students should have completed considerable work in the social sciences and/or history as undergraduates. Students in the College of Education's Teacher Education Program (TEP) for secondary education in social studies may not apply credit they have earned as undergraduates in required licensure courses to the 38 s.h. required for the M.A.T., even though the credit counts toward state teaching licensure.

Students who completed EDTL:4811 Introduction and Practicum: Secondary Social Studies and/or EDTL:4870 Methods: Secondary Social Studies as undergraduate or postbaccalaureate students at the University of Iowa are required to retake these courses during the M.A.T. program and before student teaching. Required teaching licensure coursework completed at other colleges or universities is reviewed on a case-by-case basis.

Students who were accepted to the undergraduate TEP before they received a baccalaureate degree must complete a college-level math course.

For licensure, students must complete 30 s.h. in a history or social science area; the 30 s.h. may include previous undergraduate and/or graduate-level coursework. Required professional education coursework not completed as part of the baccalaureate degree must be completed for licensure.

Students also must complete 15 s.h. in an additional history or social science licensure area; previous undergraduate coursework may apply.

Of the total semester hours required for the M.A.T., students must earn at least 8 s.h. in courses numbered 6000 or above in social studies education and a minimum of 9 s.h. of graduate coursework in history or a social science area. Students should take at least one course taught by the instructor who will serve on the examining committee in the history or social science area.

Students must complete all of the following professional education courses, unless they completed some of them as part of their bachelor's degree. In such cases, the semester-hour requirement is reduced accordingly, but it never is below 47 s.h. All students must take the coursework required for

meeting all Iowa Department of Education requirements for teacher licensure/certification.

## Professional Education Courses

Code	Title	Hours
All of these:		
EDTL:3002	Teaching and Learning Technologies (must be taken during student's first semester in the college)	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)	1
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6
EDTL:4811	Introduction and Practicum: Secondary Social Studies	3
EDTL:4870	Methods: Secondary Social Studies	3
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3

## Comprehensive Examination

Candidates select one faculty member from each concentration area to serve as a committee member responsible for creating and reviewing a question for the written exam. Committee members are selected in consultation with a candidate's advisor. The required comprehensive examination consists of three two-hour written exams, one on each of the three concentration fields.

## TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an M.A.T. in teaching and learning (social studies education).

## Admission

Applicants must meet the admission requirements of the Graduate College. They should have a bachelor's degree in education, history, or one of the social sciences from an accredited institution; a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 3.00 in history and/or social science courses;

and two letters of recommendation. Evidence of writing ability in a completed major paper or essay also is required.

## World Language Education

The Master of Arts in Teaching in teaching and learning with a world language education subprogram requires a minimum of 54 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program is designed for superior liberal arts and sciences graduates who have had few or no professional education courses. Successful completion of the program leads to elementary and/or secondary teacher licensure. The M.A.T. is available in Chinese, French, German, Japanese, Latin, and Spanish.

Students must take 24 s.h. of post-secondary coursework in their language of licensure to obtain their teaching license. This work can be taken prior to entry into this program as part of an undergraduate degree program.

The M.A.T. in teaching and learning with a world language education subprogram requires the following work. Students also must complete at least 9 s.h. in graduate coursework either in the language department corresponding to their language of licensure or in world language teaching.

## Professional Education

Code	Title	Hours
All of these:		
EDTL:3002	Teaching and Learning Technologies (must be taken during student's first semester in the college)	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)	1,3
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3

## World Language Teaching

Students complete these courses (at least 28 s.h.).

Code	Title	Hours
All of these:		
EDTL:4406	World Language Practicum I	3
EDTL:4407	World Language Practicum II	3
EDTL:4416	Learning to Teach Second Languages I	3
EDTL:4417	Learning to Teach Second Languages II	3
EDTL:6483	Multilingual Education and Applied Linguistics	3

The following courses are taken concurrently and constitute the student teaching semester:

EDTL:4087	Seminar: Curriculum and Student Teaching	1, 3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6

## K-12 Licensure

The K-12 licensure option requires the following course.

Code	Title	Hours
EDTL:4089	Special Subject Area Student Teaching	1-4

## Comprehensive Examination

A comprehensive examination is required. The examination reflects a candidate's depth and breadth of knowledge in world language education, including but not limited to theory and practice as well as knowledge of and proficiency in the target language and/or literature of the candidate's choice. The candidate and the advisor discuss the exam's content and format eight months before the exam.

## TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an M.A.T. in teaching and learning (world language education).

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have been granted a bachelor's degree with a major or a strong concentration in a second language and must have an undergraduate g.p.a. of at least 3.00. They also must meet all Teacher Education Program (TEP) application requirements.

## ESL Endorsement

An ESL endorsement enables an individual to teach English as a Second Language in K-12 in the state of Iowa. Because teaching endorsements are additional areas of expertise added to a teaching license, applicants must be current students in a Teacher Education Program (TEP) or licensed in-service teachers.

## Admission

Applicants to the ESL endorsement program must submit a one-page essay explaining why they wish to teach ESL and a transcript of all university-level coursework, along with the English as a Second Language Added Endorsement Program K-12 application. Applicants whose first language is not English must provide evidence of a minimum score of 26 (internet-based) on the speaking section of the Test of English as a Foreign Language (TOEFL) and have completed one of the following.

<b>Code</b>	<b>Title</b>	<b>Hours</b>
	Four semesters of commonly taught languages such as French, German, Hebrew, Italian, Portuguese, Russian, or Spanish; or a proficiency level of Intermediate Low on the ACTFL Guidelines	
	Three semesters of less commonly taught languages such as Arabic, Chinese, or Japanese; or a proficiency level of Novice High on the ACTFL Guidelines	
LING:3001	Introduction to Linguistics (with a grade of B or higher)	3

Applicants are admitted to the ESL endorsement program twice a year; application deadlines are October 1 and March 1.

# Teaching and Learning, M.S.

## Science Education

The Master of Science in teaching and learning with a science education subprogram requires a minimum of 38 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program is designed for teachers and supervisors (K-college) and professionals in related fields, such as medical education, college teaching, museum program management, and outreach programs. It is intended to provide experience in understanding teaching and learning and the research processes required to advance the field. Students complete coursework in four areas: science education, education, research, and science. Their individual programs of study are approved by the science education faculty.

The M.S. in teaching and learning with a science education subprogram requires the following coursework.

## Required Courses

Code	Title	Hours
All of these:		
EDTL:6757	Learning in the Science Classroom (no substitute for this course)	3
EDTL:6759	Advanced Pedagogy (no substitute for this course)	3
EDTL:7755	Independent Study in Science Education Research (taken two times for 3 s.h. each)	6
Two science content courses chosen in consultation with advisor		6
A minimum of 12 s.h. chosen from these:		
EDTL:6758	Writing in the Science Classroom	3
PSQF:4143	Introduction to Statistical Methods	3
PSQF:6200	Educational Psychology	3
PSQF:6220	Quantitative Educational Research Methodologies	3
PSQF:6275	Constructivism and Design of Instruction	3
RCE:7338	Essentials of Qualitative Inquiry	3
One additional qualitative or quantitative research methods course chosen in consultation with advisor		
May include one of these:		
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

## Thesis

Students must complete a thesis, for which they earn 2-4 s.h. of credit.

Code	Title	Hours
EDTL:6393	Master's Thesis	2-4

## Final Examination

A final oral examination is administered on campus in which candidates defend their thesis. This examination includes a critical inquiry into the purposes, methods, and results of the thesis research investigation.

The final examination is conducted by a committee of no fewer than three members of the graduate faculty. In some cases, the committee must include a member from outside science education; consult the department.

## Admission

Applicants must meet the admission requirements of the Graduate College. They should hold an undergraduate major in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis. The department recommends that applicants have teaching licensure/certification unless they are preparing for careers in allied health, museums, or community colleges.

## STEM Education

The Master of Science in teaching and learning with a STEM education subprogram requires 36 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program focuses on science, technology, engineering, and mathematics (STEM) education. The program includes coursework that may be used toward the K-12 STEM specialist endorsement. Degree requirements include online coursework to fit the schedule of a practicing teacher. The STEM education subprogram is not a licensure program.

The M.S. in teaching and learning with a STEM education subprogram requires the following coursework.

## Required Courses

### STEM Pedagogy Courses

Code	Title	Hours
All of these:		
EDTL:6563	STEM Through Mathematical Modeling	3
EDTL:6761	STEM Research and Leadership Seminar	3
EDTL:6762	STEM Experiential Learning	3
EDTL:6764	STEM Extracurricular Experience and Capstone	6

### College of Education Course

Code	Title	Hours
This course:		
EDTL:5095	Issues in U.S. Schools	3

### Science/Mathematics Courses

Code	Title	Hours
Two of these:		
EDTL:4565	Mathematics in Management and Social Sciences	3
EDTL:4768	Computer Science Methods	3

EDTL:6766	Physical Science Topics in STEM Education	3
EDTL:6767	Systems Thinking in Biology and Integrated STEM Education	3
This course:		
EDTL:6765	STEM Independent Research (taken two times for 3 s.h. each)	6

## Electives

Students select two elective courses (at least 6 s.h.) chosen in consultation with their advisor.

## K-12 STEM Specialist Endorsement

The University of Iowa does not offer a state-approved program for the K-12 STEM Specialist endorsement. In addition to the master's degree, teachers must have met the requirements for a standard Iowa teaching license with endorsement in mathematics, science, engineering, industrial technology, or agriculture. They must demonstrate completion of 12 s.h. of science and 12 s.h. of math content coursework (including computer science), which may include content coursework completed as part of this subprogram as well as other college-level courses. In addition, they must have completed 3 s.h. of engineering or technological design coursework not included in this subprogram; ENGR:1100 Introduction to Engineering Problem Solving and ENGR:1300 Introduction to Engineering Computing may be options for the requirement. Once the courses are completed, teachers may apply to the Board of Educational Examiners for transcript analysis and to add the endorsement. Students interested in pursuing the K-12 STEM Specialist Endorsement should notify their advisor upon admission to the program.

## Admission

Applicants must meet the admission requirements of the Graduate College. These include:

- a bachelor's degree from a regionally accredited American college or university or an equivalent degree from another country as determined by the Office of Graduate Admissions with an undergraduate major in a given science or math area (or combination of science areas), science education, math education, or in elementary education with a science or math emphasis;
- a minimum g.p.a. of 3.00 or the international equivalent as determined by the Office of Graduate Admissions; and
- international applicants whose first language is not English must score at least 81 (internet-based) with a minimum score of 600 on the Test of English as a Foreign Language (TOEFL) or a minimum International English Language Testing System (IELTS) score of 7.0 (with no subscore lower than 6.0).

Teaching licensure/certification is recommended for the M.S. degree and required if the candidate seeks the K-12 STEM specialist endorsement from the Board of Educational Examiners (BOEE).

# Teaching and Learning, Ph.D.

## Ph.D. Required Research Courses

Students admitted to doctoral programs must complete the program's research requirements.

## Required Core Courses

All Ph.D. students in the Department of Teaching and Learning must complete one or both of the following core courses, depending upon program requirements.

Code	Title	Hours
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

## Cognate Areas

The following list of cognates offered by program areas in the department is not exhaustive; students may select cognates from this list, or they may customize their own cognate areas in consultation with their advisors.

## Multilingual Education

Code	Title	Hours
This course:		
EDTL:6483	Multilingual Education and Applied Linguistics	3
Two of these, chosen in consultation with faculty:		
EDTL:6400	Fundamentals of Second Language Assessment	3
EDTL:6402	Second Language Program Management	3
EDTL:6403	Language Policy and Planning	3
EDTL:6409	Cultural Curriculum	3
EDTL:6480	Issues in Foreign Language Education	3
EDTL:6484	Reading in a Second Language	3
EDTL:6497	Principles of Course Design for Second Language Instruction	3

## Gifted Education

### Administrative Strand

Code	Title	Hours
Two of these, chosen in consultation with faculty:		
EPLS:4110	Administration and Policy in Gifted Education	2
EPLS:4111	Evaluation of Gifted Programs	1
EPLS:4113	Staff Development for Gifted Programs	1

## Programming Strand

Code	Title	Hours
Both of these:		
EDTL:4066	Curriculum Concepts in Gifted Education	3
EDTL:4199	Program Models in Gifted Education	3

## Psychology Strand

Code	Title	Hours
Two of these, chosen in consultation with faculty:		
RCE:4120	Psychology of Giftedness	3
RCE:4121	Identification of Students for Gifted Programs	3
RCE:4137	Introduction to Educating Gifted Students	3
RCE:5226	Assessment of Giftedness	3
RCE:5237	Seminar in Gifted Education	3

## Literacy, Culture, and Language Education

Code	Title	Hours
Both of these:		
EDTL:7008	Seminar: Research and Current Issues (topic chosen in consultation with advisor)	arr.
EDTL:7015	Ph.D. Seminar in Language, Literacy, and Culture (topic chosen in consultation with advisor)	arr.

## Mathematics Education

Code	Title	Hours
Both of these:		
EDTL:5535	Current Issues in Mathematics Education	1-3
EDTL:7535	Seminar: Research in Mathematics Education	arr.
Two of these:		
EDTL:6531	Technology in School Mathematics	2-3
EDTL:6534	Foundations of Mathematics Education	2-3
EDTL:6536	Teaching of Geometry	2-3
EDTL:6539	Teaching of Algebra	2-3

## Science Education

Code	Title	Hours
All of these:		
EDTL:6757	Learning in the Science Classroom	2-3
EDTL:6759	Advanced Pedagogy	3

## Special Education

Code	Title	Hours
All of these:		
EDTL:7945	Current Issues and Trends in Learning Disabilities	3

EDTL:7948	Contemporary Research in Behavioral Disorders	3
EDTL:7953	Seminar: Single Subject Design Research	3

## Literacy, Culture, and Language Education

The Doctor of Philosophy in teaching and learning with a literacy, culture, and language education (LCLE) subprogram requires a minimum of 73 s.h. of graduate credit. All students must maintain a program g.p.a. of at least 3.00. Students may be able to use some coursework completed for their master's degree toward the Ph.D.; most courses for the Ph.D. should be numbered 5000 or above.

This interdisciplinary program brings together scholarly traditions and contemporary theory in multilingual education and applied linguistics, literacy and cultural studies, and social studies education. The program provides students with the necessary content area knowledge and research skills for independent research, program administration, and varied leadership positions in LCLE education. In consultation with their advisor, students create a program of study that fits their interests and professional aspirations.

The Ph.D. in teaching and learning with a literacy, culture, and language education subprogram requires the following coursework.

### Required Courses

Code	Title	Hours
This course:		
EDTL:6015	Ph.D. Seminar: Literacy, Culture, and Language Education	3
One of these:		
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

### Disciplinary and Interdisciplinary Foundations

Students choose a disciplinary area in literacy education, multilingual education, or social studies education for their three foundational courses. They then select one or both of the other areas for their interdisciplinary foundation coursework.

Code	Title	Hours
All of these:		
At least three courses in a chosen area of concentration		9
At least two courses in other areas of concentration		6

### Research Methods

Code	Title	Hours
Both of these:		
EDTL:7070	Qualitative Research Methods in Teaching and Learning	3

EDTL:7405	Research Methods in Literacy, Culture, and Language Education	3
-----------	---	---

One of these:

PSQF:6242	Selected Applications of Statistics	3
PSQF:6243	Intermediate Statistical Methods (for students who utilize quantitative methods in their dissertation)	3

And:

Two additional advanced research methods courses in quantitative, qualitative, or mixed methods in consultation with their advisor	6
--	---

### Electives

Students choose 27 s.h. of elective coursework in consultation with their advisor. Courses may be taken in any department and can be partially or completely unified as a cognate area of study.

### Comprehensive Examination

Upon completion of their coursework, students take their comprehensive exam. This is an opportunity for students to show a comprehensive understanding of the scholarship in the field. Successful completion of the exam identifies candidates who are ready for dissertation work.

### Dissertation

After students pass their comprehensive exam, they consult with their advisor to choose a dissertation committee with at least five faculty members who approve the dissertation proposal. After a successful defense of their dissertation, students conduct dissertation research in the following course.

Code	Title	Hours
EDTL:7493	Ph.D. Thesis	10

### Admission

Applicants must meet the admission requirements of the Graduate College. They must have earned a bachelor's degree with an undergraduate g.p.a. of at least 3.00 on a 4.00 scale and earned a master's degree or have completed significant graduate coursework. It is recommended applicants have at least two years of teaching experience in a related field within or outside of the United States.

Application materials should include a statement of purpose, official transcripts from all institutions attended, a sample of academic writing, three current letters of recommendation, and the official report of Graduate Record Exam (GRE) General Test scores (however, the GRE requirement has been suspended for the 2021-22 admissions cycle). International applicants whose first language is not English, and do not meet the waiver requirements, must submit their Test of English as a Foreign Language (TOEFL) scores.

## Mathematics Education

The Doctor of Philosophy in teaching and learning with a mathematics education subprogram requires a minimum of 80-90 s.h. of graduate credit. Students must have a program g.p.a. of at least 3.00 or higher in all graduate work in mathematics, all University of Iowa graduate work in

mathematics, all graduate work, and all University of Iowa graduate work.

The program prepares supervisors, teacher education personnel, community college personnel, and researchers in mathematics education. It is administered by the College of Education. Students must update graduate coursework completed more than 10 years before admission to the program.

The Ph.D. program in teaching and learning with a mathematics education subprogram requires the following coursework.

## Required Courses

Students must complete EALL:5150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative coursework, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed under Ph.D. Research Requirements on the College of Education website.

## Core Course

Code	Title	Hours
One of these:		
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

In addition, students must complete an approved cognate area; see "Additional Requirements" below.

Students must complete a minimum of 24 s.h. of graduate work in the Departments of Computer Science, Mathematics, and Statistics and Actuarial Science, as approved by their advisor. Electives are encouraged in the pure mathematics and applied mathematics sequences.

Students who completed their mathematics requirement at another institution must complete at least 6 s.h. of additional coursework in mathematics at the University of Iowa, chosen with advisor approval. They also must complete at least six courses in mathematics education, including EDTL:5535 Current Issues in Mathematics Education and EDTL:7535 Seminar: Research in Mathematics Education.

## Additional Requirements

Students concentrate in two additional comprehensive examination areas in either the mathematical sciences or education. A minimum of three courses usually are required for a comprehensive examination area, but candidates should consult with faculty members in the areas selected to determine which courses they should take in order to adequately prepare for the examinations.

Students must complete a total of at least 36 s.h. in College of Education courses; this includes the coursework listed above. They must complete an approved cognate area; a partial list of potential cognate areas is available from the mathematics education program.

## Comprehensive Examination

Students take three written comprehensive examinations, one in mathematics education and two in other fields of education

or mathematics; an oral examination follows the written examinations.

## Dissertation

Candidates complete a dissertation on a research problem in mathematics education. A prospectus of the proposed research must be presented to the dissertation committee before candidates undertake the study. Upon completion of the dissertation, candidates defend the dissertation in an oral examination. Students must earn dissertation credit in the following course.

Code	Title	Hours
EDTL:7493	Ph.D. Thesis	10

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate major in mathematics or the equivalent, a current teaching license/certificate, and at least two years of teaching experience are strongly preferred. A faculty review committee makes admission decisions.

## Science Education

The Doctor of Philosophy in teaching and learning with a science education subprogram requires a minimum of 85 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program is designed for individuals who aspire to positions as college and university science educators; major supervisors in national, state, and local systems; teachers in small liberal arts colleges; instructors of general education science courses at major universities; research directors in science education; and professionals in medical and/or allied health education.

The Ph.D. in teaching and learning with a science education subprogram requires the following coursework.

## Required Courses

Students in science education complete a minimum of 15 s.h. in qualitative and quantitative coursework, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed under Ph.D. Research Requirements on the College of Education website. Course selections must be consistent with other requirements for the degree.

## Core Courses

All doctoral students in science education complete one or both of the following core courses. Students may not substitute other courses for these.

Code	Title	Hours
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

In addition, all doctoral students in the Department of Teaching and Learning complete an approved cognate area; see "Cognate Areas" under Ph.D. Required Research Courses [p. 1451] in this section of the Catalog.

## Science Education

Code	Title	Hours
All of these (15 s.h.):		
EDTL:6757	Learning in the Science Classroom	3
EDTL:6758	Writing in the Science Classroom	3
EDTL:6759	Advanced Pedagogy	3
Graduate-level science education courses chosen in consultation with advisor		6

## Education

Code	Title	Hours
Three courses chosen in consultation with advisor		9

## Research in Science Education

Code	Title	Hours
Both of these (21 s.h.):		
EDTL:7750	Seminar: Science Education (taken three times for 1 s.h. each)	3
EDTL:7755	Independent Study in Science Education Research (taken six times for 3 s.h. each)	18

## Science Area

Students complete a family of courses (total of 12 s.h.) in a major science area.

## Dissertation

Code	Title	Hours
This course:		
EDTL:7493	Ph.D. Thesis	10

## Admission

Applicants must meet the admission requirements of the Graduate College. They should have completed a bachelor's degree in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis; have a cumulative g.p.a. of at least 3.00 on undergraduate and graduate work; and have a combined score of at least 300 on the verbal and quantitative portions of the Graduate Record Exam (GRE) General Test (however, the GRE requirement has been suspended for the 2021-22 admissions cycle). Applicants must submit three letters of recommendation, a statement of purpose describing their reasons for pursuing graduate work and their goals for graduate study, and an example of their academic writing.

## Special Education

The Doctor of Philosophy in teaching and learning with a special education subprogram requires a minimum of 90 s.h. of graduate credit. Students must maintain a program g.p.a. of at least 3.00.

The program prepares students for teaching and research positions in higher education, and for curriculum, supervisory, and research positions in state and local education agencies. The program permits students to study and practice

extensively in their special education interest area and in an interest area outside of special education.

The Ph.D. curriculum includes an emphasis on research skills, all facets of special education, an approved cognate area, and at least one specialization area.

## Quantitative Research Requirements

Code	Title	Hours
Both of these:		
PSQF:4143	Introduction to Statistical Methods	3
PSQF:6243	Intermediate Statistical Methods	3
Two of these:		
EPLS:6206	Research Process and Design	3
PSQF:6220	Quantitative Educational Research Methodologies	3
PSQF:6244	Correlation and Regression	4
PSQF:6246	Design of Experiments	4
PSQF:6247	Nonparametric Statistical Methods	3
PSQF:6249	Factor Analysis and Structural Equation Models	3
PSQF:6252	Introduction to Multivariate Statistical Methods	3

## Qualitative Research Requirements

Code	Title	Hours
This course:		
EDTL:7953	Seminar: Single Subject Design Research	3
One of these:		
EDTL:7410	Mixed Methods Research	3
EPLS:7373	Qualitative Research Design and Methods	3

## Core Course

Code	Title	Hours
One of these:		
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

## Proseminar Courses

Code	Title	Hours
Both of these:		
EDTL:7943	Proseminar: Issues, Trends, and Research in Special Education	3
EDTL:7944	Proseminar: Issues, Trends, and Research in Special Education II	3

## Seminar Requirements

Code	Title	Hours
Both of these:		
EDTL:7945	Current Issues and Trends in Learning Disabilities	3
EDTL:7948	Contemporary Research in Behavioral Disorders	3

## Practicum Requirement

Code	Title	Hours
This course:		
EDTL:7380	Practicum in College Teaching (taken twice for 3 s.h. each)	6

## Cognate

Students complete a cognate or specialty area for at least 9 s.h. in consultation with their advisor.

## Competencies

Students work with their advisor to ensure they meet two core competencies: one in teaching and one in supervision.

## Comprehensive Examination

Students complete a three-part comprehensive examination that includes a qualifying exam I, a qualifying exam II, and a major area paper.

## Dissertation

Students complete a doctoral dissertation for at least 10 s.h.

Code	Title	Hours
This course:		
EDTL:7493	Ph.D. Thesis	arr.

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have a master's degree or equivalent in special education; those without an M.A. thesis must have completed an equivalent project. Applicants should have a graduate g.p.a. of at least 3.50 and a combined verbal and quantitative score of at least 300 on the Graduate Record Exam (GRE) General Test. Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants should have at least one year of full-time teaching experience with exceptional children; several years are preferred.

Application materials must include a completed Graduate College application form, copies of official transcripts for all college coursework, an official report of Graduate Record Exam (GRE) General Test scores, three current letters of recommendation, and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.

# UI REACH

## Director

- William Loyd Jr.

**Faculty:** <https://education.uiowa.edu/directories>

**Website:** <https://education.uiowa.edu/services/reach>

## Program of Study

UI REACH (Realizing Educational and Career Hopes) is a transition certificate program for college students with disabilities, such as autism, intellectual disabilities, and learning disabilities. The program prepares young adults to become empowered and self-directed individuals who are included in communities that embrace people of all abilities. This is accomplished by cultivating individualized supports and opportunities that promote advocacy and success in everyday life.

The UI REACH experience integrates academic skill building, career development, campus involvement, and transition planning to create a dynamic collegiate experience. A few of the program offerings include:

- integrated, Big Ten University experience with on-campus residence hall living;
- person-centered planning to customize each student's college experience according to their interests and abilities;
- weekly advising with professional staff;
- specialized core curriculum and electives delivered by College of Education instructors;
- inclusive academic learning opportunities including traditional classes for credit or audit;
- employment preparation and career development;
- community-based internships and employment opportunities with local businesses;
- access to over 500 student organizations and numerous inclusive campus activities;
- on-call emergency 24-hour support;
- scholarships and other financial aid options;
- a four-year certificate with second- and third-year certificate options; and
- events around the country to reconnect for current students, alumni, and families.

For more information, visit UI REACH on the College of Education website.

## Courses

### UI REACH Courses

**REA:0010 Social Skills I** **2 s.h.**  
Basic interpersonal skills needed to succeed in academic, social, and employment environments; structured learning process for gaining discrete social skills necessary to initiate and maintain conversations in a variety of settings; awareness of feelings and cues in conversation to respond appropriately and have successful reciprocal interactions; lectures, modeling, role play, and practice in the community.

**REA:0020 Computers and Technology I** **2 s.h.**  
Training in computer literacy and practical skills for computer use in everyday life; computer parts and functions, the Windows operating system, computer applications; use of the personal computer to improve personal, academic and workplace productivity; group discussion, demonstrations, and multimedia experience support diverse learning styles.

**REA:0021 Computers and Technology II** **2 s.h.**  
Builds on REA:0020; fundamental computer competencies and strategies to simplify everyday life and enhance workplace performance; opportunity to improve practical skills for the workplace, communication with others, and daily life; tools for improving personal organization and communication and for meeting academic, entertainment, and workplace needs; group discussion, demonstration, independent exploration, and a multimedia experience support diverse learning styles.

**REA:0022 Assistive Technology Applications** **1 s.h.**  
How to access and employ current assistive technology applications to support lifelong learning, academic skill building, vocational experiences, and independent community living; how functional assistive technology and adaptive tools can maximize personal achievement and independence for individuals of varied abilities; students explore and operate assistive technology tools including, but not limited to, text readers, voice-to-text, cognitive aids, and navigation.

**REA:0030 Health and Wellness I - Exploration** **2 s.h.**  
Importance of health and wellness, personal relationships, sexuality and making healthy choices; overview of health and wellness topics college students face—nutrition, substance use, risky behaviors, personal relationships, sexual health, mental health.

**REA:0031 Health and Wellness II - Healthy Lifestyles** **2 s.h.**  
Health and wellness personalized for students; help in assessing individual health and wellness decisions and behaviors to improve current and long-term health and wellness; small group discussion, individual assessments, real-life exploration, interactions with health educators, one-on-one student support; second in a series.

**REA:0040 Personal Finance and Math I** **2 s.h.**  
Understanding of numbers, operations, and managing personal finances; computation strategies, problem-solving strategies, skills for good consumers; opportunity to practice math skills in the community and the workplace; first in a series.

**REA:0041 Personal Finance and Math II** **2 s.h.**  
Skills and knowledge needed for managing personal finances; banking, budgeting, insurance, how to be a good consumer; students plan for their financial future by studying paycheck information, actual income, and tax responsibility; research on independent living costs; second in a series.

**REA:0050 Lifetime Reading and Writing** **2 s.h.**  
Enhancement of leisure reading; library visit to discover interesting genres, activities to review books, discussion of components (e.g., plot, characters); techniques of good readers; writing tools for success in daily living; writing forms including short organizational forms (e.g., to-do lists, grocery lists), family correspondence, business letters; observation and demonstration of writing techniques; use of writing as a form of self-expression, organization, and communication with others.

- REA:0062 Social Skills II** 2 s.h.  
Continuation of REA:0010; more advanced relationship skills that require self-regulation; self-awareness; applying skills for communicating under stress; structured learning process including repetitive practice and modeling as key components.
- REA:0070 Life Skills I - Transitions** 2 s.h.  
Components of successful independent and community living; personal safety issues, effective communication skills for interacting with peers and college personnel, how to access broad community resources for living, work, and leisure; students develop a plan for personal daily routines; classroom activities, practical experiences on campus and in the community.
- REA:0072 Life Skills II - On Your Own** 2 s.h.  
Goal setting and planning for independent living after college; how to use daily living skills from college in students' planned home communities; skills required for finding and managing a home or apartment, using community resources and agencies, and meeting basic needs; how to be interdependent and independent in the community.
- REA:0073 Life Skills III - Transition Planning** 2 s.h.  
Work on transition plan during spring semester of final year—goal setting and planning for independent living after college; how to use daily living skills from college in students' planned home communities; using community resources and agencies; meeting basic needs; how to be interdependent and independent in student's home community; identification of transition team members; plan and lead transition meeting.
- REA:0074 Household Management II** 2-4 s.h.  
Continuation of REA:0075; preparation for independent apartment living; experiential training, assessment to determine support needs; apartment living, personal care, value shopping and budgeting, preparing meals, successful community living.
- REA:0075 Household Management I** 3 s.h.  
Independent living skills introduced in the life skills and health and wellness courses; hands-on experience in room care, clothing care, food/kitchen safety, meal planning and nutrition, food preparation, simple recipes, grocery shopping, event planning.
- REA:0076 Community Leisure and Advocacy** 1 s.h.  
Utilizing community resources while promoting self-advocacy and leadership; student support for transitioning from a university setting to community living; exploration of community resources related to recreation, entertainment, and independent living using multiple media sources for information gathering; field trips to investigate local resources; research related resources within students' home communities. Requirements: enrollment in UI REACH program.
- REA:0078 Historical Documentary Making** 2 s.h.  
History of disabilities (learning and physical disabilities); ground work for making a historical documentary; desktop documentary software used by student teams to produce documentaries on history of disability rights movement. Requirements: enrollment in UI REACH program.
- REA:0079 Service Learning** 2 s.h.  
Classroom-based learning combined with community service; available resources and ways to better a community; assessment of community needs, research volunteer organizations, service-learning opportunities within the community.
- REA:0090 Current Events** 1-2 s.h.  
Forum to increase knowledge and ability to comment on current events; voting and political process, civic responsibilities in the local and federal elections process, how students can participate; use of various forms of media (i.e., print, broadcast, internet) to develop critical thinking skills related to awareness of current events and their impact; personal safety issues; effective communication skills for interacting with peers and college personnel.
- REA:0100 Career Exploration** 4 s.h.  
Opportunity to explore, enhance, or broaden work interests, skills, and potential career opportunities; interest inventories, review of vocational experiences, interactive employer presentations, informational interviews, job site experiences; focus on self-assessment of one's individual vocational strengths.
- REA:0101 Job Search Strategies** 2 s.h.  
Fundamental tools and techniques for getting a job; students create a résumé, including references and updated work history; interview techniques, information gathering, thank-you letters, work-related vocabulary, appropriate behaviors and attitudes for a successful job search; role playing, demonstrations, real-world practice.
- REA:0103 Job Search Strategies II** 1 s.h.  
Continuation of REA:0101; update résumés, references, and cover pages; appropriate behaviors and attitudes for successful job search; seek and apply for jobs with assistance from instructor.
- REA:0110 Entrepreneurism** 1 s.h.  
Characteristics, advantages, and disadvantages of self-employment; basic aspects of forming a business; marketing; acquiring start-up funding and other resources; financial obligations and monitoring of funds required for a successful business; writing a business plan.
- REA:0200 Business Support Seminar** 1 s.h.  
Aspects of careers in business support; office procedures, word processing skills, oral and written communication, records management, business terminology.
- REA:0202 Education Career Seminar** 1 s.h.  
Aspects of careers in education; additional training typically required for careers in education, child/student needs, lesson planning.
- REA:0203 Health Services Seminar** 1 s.h.  
Aspects of careers in health services; office procedures and equipment, customer service skills, terminology used in health care environments.
- REA:0204 Hospitality Seminar** 1 s.h.  
Aspects of careers in hospitality; customer service skills, phone and counter etiquette, vocabulary used in the hospitality industry.
- REA:0205 Human Services Seminar** 1 s.h.  
Aspects of careers in human services; types of human services environments, interpersonal relationships and boundaries, paperwork requirements, terminology commonly used in human services environments.
- REA:0207 Marketing/Sales Seminar** 1 s.h.  
Aspects of careers in marketing and sales; customer service skills, use of retail equipment, marketing techniques and the importance of product appearance, pricing and advertising, vocabulary used in a retail sales environment.

- REA:0208 Parks and Natural Resources Seminar** 1 s.h.  
Aspects of careers in parks and natural resources management; operation and maintenance of equipment, safety procedures, customer service skills, typical vocabulary for positions involving care and management of shrubs, trees, flowers, and turf.
- REA:0209 Skilled Trades Seminar** 1 s.h.  
Aspects of careers in the skilled trades; occupational skill standards in specific skilled trades, apprenticeships or advanced training required, safety in the workplace, vocabulary typical for specific skilled-trade work environments.
- REA:0210 Information/Technology Seminar** 1 s.h.  
Aspects of careers in information technology; occupational skill requirements and standards, knowledge of typical equipment employees must operate, safety in the workplace, typical vocabulary for information technology work environments.
- REA:0211 Culinary Arts Seminar** 1 s.h.  
Different types of careers in the food industry; workplace skills and tasks; continuing training and education options; equipment and food safety; basic preparation steps, food presentation, place settings; field trips. Requirements: enrollment in UI REACH program.
- REA:0213 Recreation Seminar** 1 s.h.  
Aspects of careers in recreation, training and education requirements, tasks at work, and job prospects.
- REA:0215 Advanced Customer Service** 1 s.h.  
Builds on previously learned customer service concepts with application to a wide range of careers; communication techniques through various modes, technology used in customer service, guest speakers, skill development, managing difficult customer situations, and other essential customer service skills.
- REA:0220 Digital Citizenship** 2 s.h.  
Making informed choices regarding media and technology in a digital age; exploration of media balance and well-being, online communication and relationships, privacy and security, and the impact of a digital footprint; responsible decision making and communication methods in an online world. Prerequisites: REA:0020.
- REA:0250 Academics and Life Skills Exploration I** 1-3 s.h.  
Expand basic academic and/or life skills with discovery, experiential learning, progress monitoring, and self-reflection; focus on strengthening foundational skills in practical academics and life skills; first of a two-part series.
- REA:0251 Academics and Life Skills Exploration II** 0-2 s.h.  
Builds on basic academic and/or life skills explored in REA:0250; UI REACH instructors and university faculty work together to enhance learning opportunities while providing explicit, interactive learning opportunities; progress monitoring, reflection, and focus on maintenance of basic academic and life skills; second of a two-part series.
- REA:0252 Academics and Life Skills Enrichment I** 1-3 s.h.  
Broaden and diversify academic and student life experiences; address specific interest areas of students; focus on communication, relationships, academics, and independent life; individualize, extend, and provide depth to student's current level of knowledge and skills.
- REA:0300 Internship I - Prep** arr.  
Introduction to functional skills, job expectations, environments of the workplace; students venture out into the community and see first-hand what a specific career or job entails; role of the influencer; small groups, job shadowing, tryouts—depending on individual needs and abilities; create a résumé; summer job searching skills; preparation for Internship II—applications, interviews, contacting employers.
- REA:0301 Internship II** arr.  
Internship experience leading to increased independence in the workplace (e.g., more independent operation of equipment, socialization, workplace safety, problem solving, conflict management); opportunity to acquire additional workplace skills in the student's career emphasis area; employers and mentors guide students in fulfilling their job responsibilities; students maintain a journal and discuss their experience with their advisor or instructor; second of three consecutive internships.
- REA:0302 Internship III** arr.  
Internship experience with opportunities to develop more advanced skills for independent communication, problem solving, and workplace performance in the student's career emphasis area; employers and mentors observe the student in the workplace; students maintain a journal and discuss their experience with their advisor or instructor; third of three consecutive internships.
- REA:0303 Internship IV** arr.  
Individualized community work experiences with periodic classroom seminars; building independent work skills, such as researching bus routes and emailing weekly journals; students, instructors, and employers evaluate student's work performance.
- REA:0304 Internship V** arr.  
Continuation of REA:0303; community work experiences with periodic classroom seminars; emphasis on work skills in student's career area of choice; soft skills needed to be an independent worker.
- REA:0305 Advanced Internship** arr.  
Development of advanced workplace skills in time management, communication, problem solving, and performance; one or more internships individualized to meet needs for further workplace soft skill development; observation in workplace by instructors, employers and mentors; journaling and discussion of experience with UI REACH staff; tracking time via method that works for individual needs; internship experiences and classroom seminars; emphasis on work skills in any career area and soft skills needed to be an independent worker. Requirements: UI REACH fourth-year enrollment.
- REA:0325 Computer and Technology Literacy I** 2 s.h.  
Self-paced course to improve personal, academic, and career computer literacy and skills; online learning modules and computer-based programs to increase computer skills; email and internet searching, online learning options, online banking and purchasing, Microsoft Office programs, and online career resources.
- REA:0326 Computer and Technology Literacy II** 2 s.h.  
Self-paced course builds on skills learned in REA:0325; extends and provides depth to student's current level of skill; coursework focuses on enhancing personal, academic, and career computer literacy; group discussion, demonstration, independent exploration, and practice to further develop computer skills; email, online career resources, Google Drive, social networking, and budgeting.

**REA:0501 Special Topics****arr.**

Topics include leisure resources, current events, science, family life, consumerism, community involvement, self-determination, self-advocacy, leadership, assistive technology, mentoring; course assignments, instruction, and student assessment in classroom and/or community settings; may be required or elective course.

# College of Engineering

## Dean

- Harriet Nembhard

## Associate Dean, Academic Programs

- Nicole M. Grosland

## Interim Associate Dean, Graduate Programs and Research

- H.S. Udaykumar

**Undergraduate degree:** B.S.E.

**Undergraduate certificates:** naval science and technology; technological entrepreneurship

**Graduate degrees:** M.S.; Ph.D.

**Graduate certificate:** sustainable water development

**Website:** <https://engineering.uiowa.edu/>

Engineers play an important role in modern society. They design and develop new and improved materials, products, and processes ranging from nanoparticles to antibiotics to major bridges and dams. Engineers are in demand across a broad spectrum of industry, spanning traditional fields such as mechanical and electrical engineering to the emerging fields of artificial intelligence and medicine. Engineers not only satisfy society's demand for improved performance, reliability, and safety of products, they also supply solutions for unforeseen societal consequences that may arise as the result of new technologies.

The College of Engineering has six academic departments: the Roy J. Carver Department of Biomedical Engineering [p. 1473] and the Departments of Chemical and Biochemical Engineering [p. 1486], Civil and Environmental Engineering [p. 1500], Electrical and Computer Engineering [p. 1527], Industrial and Systems Engineering [p. 1546], and Mechanical Engineering [p. 1562].

Moreover, research and educational activities of the college are supported by four research centers and institutes: the Center for Bioinformatics and Computational Biology, the Iowa Institute for Biomedical Imaging, IIHR—Hydroscience & Engineering, and the Iowa Technology Institute.

## Programs

### Undergraduate Programs of Study

The College of Engineering offers the Bachelor of Science in Engineering [p. 1466] (B.S.E.) with majors in biomedical [p. 1473], chemical [p. 1486], civil [p. 1500], electrical [p. 1527], computer science and engineering [p. 1527], environmental [p. 1511], industrial [p. 1546], and mechanical [p. 1562] engineering. For information about each B.S.E. major, see the Catalog's College of Engineering department sections.

The college also offers combined undergraduate degree programs with the College of Liberal Arts and Sciences and the Tippie College of Business; a dual degree with the University of Northern Iowa; a combined B.S.E./master's degree program in each engineering discipline; and combined

B.S.E./master's degrees with the Department of Computer Science, the Department of Occupational and Environmental Health, and the School of Planning and Public Affairs (also see the graduate Certificate in Transportation Studies [p. 1688] in the Graduate College). For additional information, see "Combined and Dual Degrees" in the Bachelor of Science in Engineering, B.S.E. [p. 1468] section of the Catalog.

In addition, the College of Engineering offers an undergraduate Certificate in Naval Science and Technology [p. 1580], and partners with the Tippie College of Business to offer a Certificate in Technological Entrepreneurship [p. 1585] for undergraduate engineering students.

### Graduate Programs of Study

The College of Engineering offers graduate degree programs, the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in biomedical engineering [p. 1473], chemical and biochemical engineering [p. 1486], civil and environmental engineering [p. 1500], electrical and computer engineering [p. 1527], industrial and systems engineering [p. 1546], and mechanical engineering [p. 1562]. See the College of Engineering Graduate Studies website for an overview, and the departmental sections in the Catalog for information about specific areas of research and study, admission and degree requirements, and financial support for the graduate programs. The College of Engineering also offers the graduate Certificate in Sustainable Water Development [p. 1581].

In addition, the college administers the M.S. in engineering and information technology [p. 1471]. However, the program is currently being revised and applications are not being accepted at this time. Inquiries can be directed to the College of Engineering.

### High School Program of Study

#### FIRST: FTC

For Inspiration and Recognition of Science and Technology (FIRST) gives students the opportunity for real-world application of science, technology, engineering, and math (STEM) concepts. Students participate in an atmosphere that encourages team building, entrepreneurship, and sportsmanship. FIRST Tech Challenge (FTC) allows teams of students to be responsible for designing, building, and programming robots to compete in an alliance format against other teams. Teams are required to develop strategy and build robots based on sound engineering principles. Students learn about working in a team environment, effective communication skills, the ability to fail and succeed at the same time, and competing fairly while being supportive of their competition.

## Facilities and Resources

### College of Engineering Facilities

#### Seamans Center for the Engineering Arts and Sciences

The Seamans Center for the Engineering Arts and Sciences is home to the College of Engineering. In addition to faculty offices, classrooms, conference rooms, instructional laboratories, and faculty offices, the Seamans Center houses the Lichtenberger Engineering Library, the Hanson Center for Technical Communication, a machine shop, electronic shop, student work spaces, computational facilities, and research laboratories. A number of classrooms and open

spaces located throughout the building were designed to readily accommodate collaborative work.

## Engineering Student Services

The professional staff of Engineering Student Services administer student services for the College of Engineering, including advising, tutoring, student records, and global engineering. It also is the administrative home of Engineering Career Services and the Hanson Center for Technical Communication.

## Engineering Career Services

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development. Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. They are committed partners with the Pomerantz Career Center and facilitate on-campus interviewing and administration of the University's online recruiting system, Handshake.

## Hanson Center for Communication

The Hanson Center for Communication is an endowed program that works closely with engineering faculty to create, manage, and grade writing assignments across the curriculum. In addition, the Hanson Center for Communication is home to an innovative writing center that conducts hundreds of one-on-one and team tutoring sessions each year. The center's director and assistant director supervise professional writing consultants and peer tutors.

Writing consultants are University of Iowa graduate and doctoral students. They grade hundreds of lab reports, topical papers, and technical essays each semester. Using course-specific rubrics created by the director, they provide individualized feedback throughout the writing process. Peer tutors are undergraduate engineers who have shown exceptional promise as communicators. In addressing global concerns (organization, clarity, and relevant analysis), they help their fellow students transform rough drafts into persuasive, logical documents.

## Global Engineering

Many of today's top employers are seeking engineering graduates with global experiences and competencies who can effectively interact with colleagues and customers around the world. Successful engineers are able to communicate across cultures, work on diverse teams, and productively deal with issues and conflicts arising from difference.

University of Iowa engineering students have a variety of opportunities to study, pursue internships, or conduct research abroad. Students can enroll in credit-bearing courses in English to fulfill engineering or general education requirements or earn credits toward a minor in another discipline or world language. In addition to completing coursework abroad, engineering students can pursue experiential opportunities abroad, including global internships, conducting independent research in other countries, and volunteering. The College of Engineering and International Programs support these endeavors by offering students a variety of scholarships and financial aid.

## Engineering Computer Services

Engineering Computer Services (ECS) provides information technology administration for curricular, administrative, and research computing at the College of Engineering. The college has three drop-in computer labs with 225 high-end Linux and Windows computer workstations with graphics processing unit (GPU) support, a 24-seat computer classroom, a 45-seat machine learning and virtual reality-capable computer classroom, and a 400-seat virtual computer lab with GPU support that students can access from the internet. Numerous public domain and commercial engineering applications support the full range of engineering classes. Software is regularly upgraded, and hardware is refreshed at least every four years. The college's computer labs are open 24 hours a day, every day of the year.

## Engineering Electronics Shop

The Engineering Electronics Shop (EES) is a full-service electronics facility that supports sales and service for the College of Engineering, the University, and the surrounding area. EES provides design, construction, repair, calibration, and preventive maintenance services for teaching and research laboratories. EES maintains more than 10,000 parts in stock, including electronic components, computer and office supplies, and lockers for rent. The shop has laser cutting/etching equipment, 3D printers, and a poster-plotting service.

## Engineering Machine Shop

The Engineering Machine Shop (EMS) is a full-service, light manufacturing facility that supports curricular, research, and operational needs of the College of Engineering and the University. EMS provides professional design and fabrication services and gives students, staff, and faculty controlled access to a student shop that contains a variety of manufacturing equipment. The shop has a high resolution 3D scanner, commercial 3D printers, a waterjet, a full wood shop, welding, and multi-axis CNC machines.

## Lichtenberger Engineering Library

The Lichtenberger Engineering Library is a branch of the University of Iowa Main Library and is a center of engineering college activity. Its collections include more than 140,000 volumes and electronic full-text access to over 5,000 engineering and scientific journals. It offers electronic access to primary engineering and scientific indexes and abstracts, and full-text access to standards and U.S. patents. The library also maintains a substantial collection of publications from major engineering societies and a collection of national and international standards.

Tools also are available for check out to students and faculty in order to allow for more hands-on projects and use in class assignments. Example tools include screwdrivers, scales, and light meters. The library provides 35 computer workstations with specialized software packages and a significant amount of study space for students. Study spaces allow for individual as well as group study. The library features individual study carrels, group tables, lounge chairs, a collaborative work station, and movable whiteboards. Library personnel are available to assist with specialized engineering-related reference and informational questions. Personnel also provide course- and topic-specific instructional programs to further critical thinking and lifelong learning skills.

## NEXUS

NEXUS is an art and engineering program. NEXUS promotes collaboration efforts between the College of Engineering and the art community by getting people and ideas together. The goal is to involve students in science, technology, engineering, arts, and mathematics (STEAM) projects throughout the University and the surrounding community. The program helps participants to think outside the box.

## College of Engineering Research Centers

### Center for Bioinformatics and Computational Biology

The Center for Bioinformatics and Computational Biology (CBCB) is a multidisciplinary research center dedicated to applying high performance networking and computing to basic life science and applied biomedical research. With faculty and students representing more than 20 traditional disciplines, the CBCB has contributed to the understanding of inherited human diseases, including blinding eye disease, cancer, deafness, diabetes, autism, schizophrenia, hypertension, obesity, and heart disease. For almost 20 years, the CBCB has been at the cutting edge of high throughput molecular discovery and interpretation in transcriptomics, genomics, and proteomics. At the confluence of these efforts lies the current wavefront of personalized genomic medicine, in which the CBCB plays a central role in partnership with labs, centers, and institutes across the University's Carver College of Medicine and basic science programs across campus. The CBCB also has been a center for industry start-ups and partnerships with numerous commercial enterprises. The center is jointly sponsored by the College of Engineering and the Carver College of Medicine.

### Iowa Institute for Biomedical Imaging

The Iowa Institute for Biomedical Imaging (IIBI) conducts research in the following areas: medical imaging (CT, MR, OCT, PET, SPECT, ultrasound, multimodality imaging), medical image analysis and computer-aided diagnosis; cardiovascular image analysis (angiography-intravascular ultrasound data fusion, MR image analysis of congenital heart disease, coronary CT image analysis, early detection of cardiovascular disease); pulmonary image analysis (CT and MR image analysis of the lung); cell image analysis (cell tracking, shape analysis); virtual surgery planning (augmented reality for surgical planning), cancer-related assessment of tumor progression/regression, staging, general machine learning; and disease/treatment outcome prediction. The institute is sponsored by the College of Engineering and the Carver College of Medicine.

### IIHR—Hydroscience & Engineering

IIHR—Hydroscience & Engineering is a world-renowned center with more than 100 years of education, research, and public service focusing on hydraulic engineering and fluid mechanics. Based in the C. Maxwell Stanley Hydraulics Laboratory, a five-story red brick building on the banks of the Iowa River, IIHR is a unit of the College of Engineering. IIHR students, faculty members, research engineers and scientists, and staff work together to understand and manage one of the world's greatest resources—water. Students from around the world benefit from IIHR's comprehensive multidisciplinary approach, which includes basic fluid mechanics, laboratory experimentation, and computational approaches.

IIHR research activities include fluid dynamics (turbulent flows, vortex dynamics, ship hydrodynamics, biological fluid flow, atmospheric boundary layer, experimental and computational fluid dynamics); environmental hydraulics (river mechanics, hydraulic structures, fish passage, sediment management, heat disposal in water bodies and power productions, bioremediation of groundwater, computational hydraulics, water-quality monitoring); water and air resources (air pollution, hydroclimatology, hydrogeology, hydrology, hydrometeorology, remote sensing, water resources and basin-scale processes); environmental engineering and science (PCBs in the air and water, innovative ways of removing contaminants from the soil and water, ultra-fine particles of pollutants in the atmosphere, bioremediation strategies for persistent groundwater contaminants); and water sustainability (development of sound strategies and technological solutions to meet the challenges facing society's growing need for water resources). In 2009, the Iowa Flood Center was founded at IIHR as the only academic center devoted solely to flood-related research and education.

The University of Iowa's Water Sustainability Initiative (WSI) brought new interdisciplinary expertise to the institute in 2013 when WSI faculty members (based in the Colleges of Liberal Arts and Sciences, Engineering, and Public Health) affiliated with IIHR. The Iowa Geological Survey joined IIHR in 2014, bringing new expertise in Iowa's subsurface resources, groundwater modeling, innovative geophysical skills, and more.

Students gain hands-on experience through close cooperation with faculty and staff on research projects funded by industry, government, and other organizations.

### Iowa Technology Institute

The Iowa Technology Institute (ITI) conducts basic and applied research. The mission is to cultivate collaboration across disciplines, invent advanced technologies, and conduct trailblazing research in design, simulation, and experimentation that enables a safer and more productive future. ITI provides a unique environment for research and development for faculty, graduate and undergraduate students, research fellows, and professional scientists. ITI spans more than 20 laboratories and centers, led by the Operator Performance Laboratory, the Virtual Soldier Research Program, and the Atmospheric and Environmental Research Lab.

Research at ITI focuses on advanced manufacturing and materials, human modeling and simulation, aerospace technology, biotechnology, environment and energy, and systems and sensors. Scientists conduct experiments in flight testing, human performance, robotics, biomedical and biochemical research, machine learning, smart sensors, remote sensing, renewable energy, and modeling of environmental change.

ITI has a satellite office in Orlando, Florida, and has major contracts with the U.S. military and industry partners.

## Courses

The engineering course requirements for engineering majors are outlined in the respective Catalog sections. Each undergraduate program builds upon a core program (see the Bachelor of Science in Engineering [p. 1466] in the Catalog). Not all engineering core courses listed below are required for each engineering major. Core program courses are intended for College of Engineering students.

Undergraduate students in other disciplines who wish to register for core engineering courses should contact Engineering Student Services.

- Core Engineering Courses [p. 1463]
- Engineering and Information Technology Courses [p. 1464]

## Core Engineering Courses

### **ENGR:0000 Engineering Internship** 0 s.h.

For engineering students completing a semester-long internship experience while working 35-40 hours a week at a professional company.

### **ENGR:0001 Engineering Co-op** 0 s.h.

Multiple-semester cooperative education experience for students working 35-40 hours a week at a professional company.

### **ENGR:0002 Engineering Half-Time Internship** 0 s.h.

For engineering majors participating in the Cooperative Education and Internship Program and averaging 15-20 hours per week on assignment.

### **ENGR:0004 Engineering Academic Internship** arr.

Academic credit for engineering majors participating in the Cooperative Education and Internship Program. Requirements: for international students—F-1 or J-1 visa, engineering undergraduate standing, full-time internship offer letter in hand (at least 40 hours/week and one semester in length), internship approved by International Student and Scholar Services for F-1 Curricular Practical Training (CPT) or J-1 Academic Training (AT), concurrent registration in approved 3 s.h. distance education or evening course, and preapproval of internship by Engineering Career Services; non-international students may be eligible on case-by-case basis.

### **ENGR:0006 Engineering Global Internship/Co-op** 0 s.h.

For engineering majors participating in the Cooperative Education and Internship Program working on a global assignment.

### **ENGR:1000 Engineering Success for First-Year Students** 1 s.h.

Introduction to engineering student life; electronic resources; keys to and skills for success; coping with adversity; selecting a major; advising; curriculum choices and career objectives; ethics; communication; internships and co-ops; job search skills.

### **ENGR:1029 First-Year Seminar** arr.

Introduction to engineering fields of study; work closely with a faculty member or senior administrator; participation that eases the transition to college-level learning; cutting-edge research taking place in the College of Engineering.

### **ENGR:1100 Introduction to Engineering Problem Solving** 3 s.h.

Development and demonstration of specific problem solving skills; directed project or case study involving actual engineering problems and their solutions.

### **ENGR:1300 Introduction to Engineering Computing** 3 s.h.

Engineering problem solving using computers; introduction to digital computations, problem formulation using a procedural high-level language; structured, top-down program design methodology; debugging and testing; introduction to use of software libraries; examples from numerical analysis and contemporary applications in engineering. Corequisites: MATH:1550.

### **ENGR:1550 FIRST Tech Challenge - Introduction to Engineering Problem Solving** 3 s.h.

Introduction to engineering problem solving and design; projects introduce students to common elements of engineering problem solving and design (e.g., application of organizing principles to describe engineered systems, economic analysis upon which to base decisions, technical presentation and analysis of data), and provides an opportunity for students to apply common elements of problem solving in the solution of engineering problems in context of a structured problem solving and design process. Taught in high schools by state certified teachers.

### **ENGR:2110 Statics** 2-3 s.h.

Vector algebra, forces, couples, moments, resultants of force couple systems; friction, equilibrium analysis of particles and finite bodies, centroids; applications. Prerequisites: MATH:1550. Corequisites: MATH:1560 and PHYS:1611.

### **ENGR:2120 Electrical Circuits** 3 s.h.

Kirchhoff's laws and network theorems; analysis of DC circuits; first order transient response; sinusoidal steady-state analysis; elementary principles of circuit design; SPICE analysis of DC, AC, and transient circuits. Corequisites: MATH:2560.

### **ENGR:2130 Thermodynamics** 3 s.h.

Basic elements of classical thermodynamics including first and second laws, properties of pure materials, ideal gas law, reversibility and irreversibility, and Carnot cycle; control volume analysis of closed simple systems and open systems at steady state; engineering applications, including cycles. Prerequisites: PHYS:1611 and CHEM:1110. Corequisites: MATH:1560.

### **ENGR:2510 Fluid Mechanics** 4 s.h.

Fluid properties; hydrostatics; transfer of mass, momentum, and energy in control-volume and differential forms; dimensional analysis and similitude; laminar and turbulent flow in conduits; flow past bluff bodies and airfoils; engineering applications; experimental laboratories, computer simulation projects. Prerequisites: MATH:2560 and ENGR:2710. Corequisites: ENGR:2130.

### **ENGR:2710 Dynamics** 3 s.h.

Vector calculus, Newton's laws, 3D motion of particles and multiparticle systems, 2D motion of rigid bodies applications. Prerequisites: ENGR:2110 and MATH:1550.

### **ENGR:2720 Materials Science** 3 s.h.

Concepts and examples of selection and applications of materials used by engineers; mechanical, electrical, and thermal properties that govern a material's suitability for particular applications; lectures supplemented by laboratory experiments. Prerequisites: CHEM:1110. Corequisites: MATH:1550.

### **ENGR:2730 Computers in Engineering** 2-3 s.h.

Advanced programming; good software engineering techniques including pseudocode and documentation dynamic data structures, recursive programming, procedural and object-oriented computing, inheritance, and standard template library; C++. Prerequisites: ENGR:1300.

### **ENGR:2750 Mechanics of Deformable Bodies** 3 s.h.

Elementary theory of deformable bodies, stress, strain; axial, transverse, bending, torsion, combined and buckling loads; deflection of beam. Prerequisites: ENGR:2110. Corequisites: MATH:2560.

**ENGR:2995 Introduction to Artificial Intelligence and Machine Learning in Engineering** 3 s.h.

Introduction to artificial intelligence (AI), machine learning, data science, and data driven problem solving across all engineering disciplines; topics include supervised and unsupervised learning, clustering, heuristics, feature selection, ethics of AI—fairness and privacy issues, and performance evaluation; first in a series. Prerequisites: ENGR:1300. Corequisites: MATH:2550. Requirements: practical knowledge of programming, rudimentary understanding of probability concepts, and sophomore standing.

**ENGR:4000 Engineering Honors Seminar** 1 s.h.

Completion of an approved project under the supervision of a faculty member. Requirements: engineering honors and junior or higher standing.

**ENGR:4001 Leadership Seminar: Mediocrity is Not an Option** 1 s.h.

Skills needed to gain competitive edge in professional world with understanding that mediocrity is not an option; importance of developing a career plan, power of networking, significance of soft skills, value of mentoring; participation in series of discussions and activities; deeper insight of strengths and weaknesses, how to enhance skills that employers desire, and become effective leaders in workplace; presentation by retired chief operating officer of a leading aerospace company.

**ENGR:4003 Women in Science and Engineering Leadership Seminar** 1 s.h.

WiSE peer mentors develop practical mentoring and leadership skills while participating in a one-on-one relationship with a first-year UI student in a STEM major; peer mentors meet monthly with mentees, submit meeting reflection/evaluations, and attend three educational or social events hosted by WiSE or another University entity during the semester.

**ENGR:4005 Developing Cultural Intelligence for STEM Leadership** 1 s.h.

How cultural values impact technological innovation; knowledge and strategies to develop skills for leadership in the global marketplace; activities include the Cultural Intelligence (CQ) assessment and mapping of cultural values and case studies for innovation; students use CQ dimensions to develop a plan to deepen CQ skills; exploration of culturally intelligent collaboration and problem solving in science, technology, engineering, and mathematics (STEM) fields; how to represent these skills in professional settings. Requirements: upper-level undergraduate or graduate standing.

**ENGR:4010 Engineering Grand Challenges Program Fellow** 0 s.h.

The Engineering Grand Challenges Program is designed to prepare tomorrow's engineering leaders to solve the grand challenges facing society during the next century; through completion of components of the program, students have the opportunity to engage in research relating to their selected grand challenge, explore interdisciplinary coursework, gain an international perspective, engage in entrepreneurship, and give back to the community through service learning; for students who have been accepted as a fellow into the Engineering Grand Challenges Program and are working on completion of the program requirements. Requirements: acceptance to the Engineering Grand Challenges Program.

**ENGR:4011 Engineering Grand Challenges Program Scholar** 0 s.h.

The Engineering Grand Challenges Program is designed to prepare tomorrow's engineering leaders to solve the grand challenges facing society during the next century; through completion of components of the program, students have the opportunity to engage in research relating to their selected grand challenge, explore interdisciplinary coursework, gain an international perspective, engage in entrepreneurship, and give back to the community through service learning; for students who have been accepted as a scholar to the Engineering Grand Challenges Program and are working on completion of the program requirements. Requirements: acceptance to the Engineering Grand Challenges Program.

**ENGR:4012 Engineering Grand Challenges Program Final** 0 s.h.

The Engineering Grand Challenges Program is designed to prepare tomorrow's engineering leaders to solve the grand challenges facing society during the next century; through completion of components of the program, students have the opportunity to engage in research relating to their selected grand challenge, explore interdisciplinary coursework, gain an international perspective, engage in entrepreneurship, and give back to the community through service learning; for students who have been accepted to the Engineering Grand Challenges Program and are in the final semester of completing the program requirements. Requirements: acceptance to the Engineering Grand Challenges Program.

**ENGR:7270 Engineering Ethics** 1 s.h.

Introduction to practical issues associated with being a responsible scientist; topics in responsible conduct of research in engineering and the sciences using case studies, presentations, and discussions with visiting speakers; conforms to mandates set by the Office of the Vice President for Research and the Graduate College to train graduate students and postdoctoral scholars/fellows in responsible conduct of research. Requirements: first-year graduate standing in College of Engineering.

**ENGR:7604 Engineering Ethics for Post Docs** 0 s.h.

Introduction to practical issues associated with being a responsible scientist; topics in responsible conduct of research in engineering and the sciences using case studies, presentations, and discussions with visiting speakers; conforms to mandates set by the Office of the Vice President for Research and the Graduate College to train graduate students and postdoctoral scholars/fellows in responsible conduct of research. Requirements: new postdoctoral research scholar/fellow in College of Engineering.

## Engineering and Information Technology Courses

**EIT:5120 Modern Automation and Control** 3 s.h.

Study of sensor, motors, control, process automation, and internet of things (IoT).

**EIT:5135 Modern Information Systems** 3 s.h.

Introduction to enterprise information systems; RESTful service model, cloud service models, data storage models, big data considerations, network basics, security and privacy considerations; blockchain technology and its applications.

- EIT:5150 Applied Artificial Intelligence** 3 s.h.  
Artificial Intelligence (AI), search and logic, data science and analysis, advanced machine learning and deep learning, digital manufacturing and design, signal processing and fault diagnosis, AI robotics and computer vision, and applications in engineering.
- EIT:5155 Cyber-Physical Systems** 3 s.h.  
Introduction to modern "smart" systems providing intelligent monitoring, control, and coordination of societal, environmental, and business infrastructure; layered architecture for, relevant applications of, and projects involving conceptual design of cyber-physical systems.
- EIT:5211 Machine Learning and Scientific Computing in Engineering** 3 s.h.  
Numerical methods in scientific computing; root problems and optimization; linear algebraic equations; eigenvalue problems; numerical differentiation and integration; interpolation and curve fitting; initial value and boundary value problems; machine learning in regression, classification, and clustering problems; Python programming and scikit-learn packages.
- EIT:5216 Manufacturing Process and Modeling** 3 s.h.  
Fundamental science, modeling, and simulation technologies in materials processing; essential knowledge in automation and control of manufacturing systems; material removal processes, forming, microfabrication, and nontraditional material processes; finite element modeling/simulation of material processes; automation and control of manufacturing systems and processes.
- EIT:5220 Advanced Control Engineering** 3 s.h.  
State-space representation of linear systems, equilibrium points, linearization, controllability, observability, stability, state feedback control, linear observer design, and separation principle.
- EIT:5224 Mechanical Design and Realization** 3 s.h.  
Solid modeling, assemblies, drawings, geometric dimensioning and tolerancing, and basic engineering design process; use of analysis tools (e.g., Finite Element Analysis), fatigue and durability, optimization software.
- EIT:5240 Kinematics of Modern Robotics** 3 s.h.  
Robotics motion, configuration space, and path planning.
- EIT:5298 Mechanical Component Durability and Integrity Analysis** 3 s.h.  
System and component design, stress analysis, static failure, fatigue, fracture mechanics, vibration, materials science, and product life cycle.
- EIT:5351 Cybersecurity** 3 s.h.  
Taxonomy of security threats and attacks; chain-of-trust principle; authentication, access control, and security domains; perimeter security and defense in depth; cryptographic protocols; key management and distribution; security assessment, internet of things (IoT) security and privacy issues.
- EIT:5352 Modern Database Systems** 3 s.h.  
Introduction to contemporary database architectures: relational, key-value, document store, and graph-based; relative strengths and weaknesses of database architectures; enterprise scalability issues; data aggregation and visualization; project work involving use of modern database systems (e.g., MySQL, Redis, MongoDB, Neo4j).
- EIT:5353 Big Data and Machine Learning** 3 s.h.  
Storage, management, and analysis of very large data sets; distributed file systems and object stores; MapReduce framework for processing large data sets; machine learning techniques; classification and clustering; pattern recognition; projects involving big data and machine learning frameworks (e.g., Apache Hadoop).
- EIT:5380 Software Engineering Methods, Tools, and Frameworks** 3 s.h.  
Modern agile software development practices for cloud and web-based applications using state-of-the-art software engineering languages, tools, and technologies; software as a service (SaaS) architecture; software testing; introduction to enterprise application development frameworks; team-based project.
- EIT:5381 Enterprise Software Engineering** 3 s.h.  
Modern DevOps practices and toolchains for enterprise information systems; scalable architecture; cloud services (e.g., SaaS, PaaS, IaaS); load balancing/autoscaling; identity management and security; performance monitoring and tuning; continuous integration and hot deployment.
- EIT:5382 Human-Computer Interaction Design and User Experience** 3 s.h.  
Principles and guidelines for design and evaluation of human-computer interactions (HCI); design methodologies (e.g., participatory design, low- and high-fidelity prototyping); user interface technologies (e.g., input and output devices, interaction styles); quantitative and qualitative evaluation of user interfaces (e.g., expert reviews, usability testing).

# Bachelor of Science in Engineering

**Undergraduate major:** B.S.E.

**Website:** <https://engineering.uiowa.edu/>

The Bachelor of Science in Engineering (B.S.E.) degrees in biomedical, chemical, civil, electrical, industrial, and mechanical engineering are accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET). The two new programs—environmental engineering, and computer science and engineering—underwent their initial accreditation review in 2020 and the results are pending. The environmental engineering program was reviewed by the EAC, while the computer science and engineering program was reviewed by the EAC and the Computing Accreditation Commission (CAC) of ABET.

Each program has its own set of articulated educational objectives, while all programs are designed to ensure that graduates possess the following at the time of graduation:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors;
- an ability to communicate effectively with a range of audiences;
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions; and
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Computer science and engineering majors will be able to do each of the following as they relate directly to computing:

- analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions;
- design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline;
- communicate effectively in a variety of professional contexts;
- recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles;
- function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline; and

- apply computer science theory and software development fundamentals to produce computing-based solutions.

Each program emphasizes a broad understanding of fundamental principles common to all engineering disciplines and provides students with the opportunity to specialize in a selected engineering discipline. All programs build on the University's research strengths. Program flexibility is provided by a curriculum in which each student develops engineering competency within a particular academic program and complements it with a tailored thematic option in support of chosen career objectives—for example, engineering practice, project management, research, and development.

This section of the Catalog provides information about requirements that all B.S.E. students must fulfill, regardless of their engineering major, as well as admission information.

Engineering students may earn more than one B.S.E. degree. They also may combine undergraduate degree programs to earn a B.S.E. and a degree in the College of Liberal Arts and Sciences or the Tippie College of Business, or a combined B.S.E./M.S. in urban and regional planning, or a combined B.S.E./M.S. in engineering; see "Combined and Dual Degrees" in the Bachelor of Science in Engineering, B.S.E. [p. 1468] section of the Catalog.

## Undergraduate Majors, Minors and Certificates

### Majors

The College of Engineering has six departments and offers eight undergraduate B.S.E. majors. View the B.S.E. majors under each of the College of Engineering departments in the Catalog.

### Minors

The College of Engineering does not offer a minor. Engineering students may earn minors in a number of programs offered by other undergraduate colleges at the University of Iowa. For descriptions of minors and their requirements, view Find Your Program on the General Catalog website and select undergraduate minors.

### Certificates

The College of Engineering offers two undergraduate certificate programs. Engineering students also may earn certificates offered by colleges across the University. The College of Engineering partners with the Tippie College of Business to offer the Certificate in Technological Entrepreneurship [p. 1585], which is tailored specifically for engineering students who intend to start and operate their own business or who would like to understand and learn about managing innovation in business environments. The college also offers the Certificate in Naval Science and Technology [p. 1580]. Other certificates of particular interest to engineering students include the Certificate in International Business [p. 1219] and the Certificate in Sustainability [p. 2093]. For descriptions of certificates and their requirements, view Find Your Program on the General Catalog website and select undergraduate certificates.

## Cooperative Education and Internship Program

The Cooperative Education and Internship Program offers students the opportunity to explore engineering careers and develop engineering skills through periods of professional

practice while they are still students. Supervised professional engineering-related experiences in business, industry, education, or government expose students to the challenges and opportunities of an engineer. Students with co-op and/or internship experience are sought by employers and usually receive higher starting salaries upon graduation.

The program structure focuses on goal setting at the beginning, analysis and reflection at the midpoint, and evaluation and feedback near the end. Experiences range from ten-week summer internships to multi-term co-ops. Qualified students may choose to alternate periods of on-campus study with full-time work experience, or they may elect to work half-time while taking at least 6 s.h. of coursework. Students may apply to the program following their first year. Academic record and class status are considered in acceptance decisions. For further details, see Engineering Career Services on the College of Engineering website.

## Engineering Grand Challenges Scholars Program

The Engineering Grand Challenges Scholars Program (GCSP) is designed to prepare students to develop innovative engineering solutions to the 14 Grand Challenges facing society in this century, as identified by the National Academy of Engineering (NAE). There are two tiers of participation in the Engineering Grand Challenges Scholars Program at the University of Iowa—fellows and scholars. Students are required to complete several components related to one of the 14 grand challenges prior to graduation:

- Research experience—project or independent research related to one of the 14 grand challenges.
- Interdisciplinary curriculum—preparing engineering students to work at the overlap with public policy, business, law, ethics, and human behavior, as well as medicine and the sciences.
- Entrepreneurship—preparing students to translate invention to innovation and to develop market ventures that scale to global solutions in the public interest.
- Global dimension—developing students' global perspective necessary to address challenges that are inherently global as well as to lead innovation in a global economy.
- Service learning—developing and deepening students' social consciousness and their motivation to bring their technical expertise to bear on societal problems.

The University of Iowa's Engineering Grand Challenge Scholars Program was the seventh in the United States and the first in the Big Ten to be approved by the national committee. More details about the program and requirements can be found on the College of Engineering Grand Challenges Scholars Program web page.

## Programs

### Undergraduate Program of Study

#### Major

- Bachelor of Science in Engineering [p. 1468]

## Policies

Students can view academic policies on the College of Engineering website.

## Admission

First-year students are eligible for direct admission into the College of Engineering if they meet the Iowa Board of Regents score of at least 265 on the Regent Admission Index (RAI), have a cumulative high school g.p.a. of at least 3.33, and meet the high school course requirements.

Engineering high school course requirements include four years of English/language arts; four years of mathematics, including one year of precalculus or equivalent; two years of a single world language; three years of natural science, preferably with at least one year of chemistry and at least one year of physics; and two years of social studies. Grades of A or B in all high school math and science courses are highly recommended.

Incoming students who do not meet the world language requirement may be admitted on conditional status for a maximum of four semesters in order to complete two semesters of an introductory college-level world language.

Students who are unsure whether to pursue a degree in engineering or a degree in liberal arts and sciences are strongly encouraged to begin in engineering if they meet the admission requirements.

Students who fall short of the engineering admission requirements may enroll in the College of Liberal Arts and Sciences and be designated as Engineering Interest students. They may apply to transfer into the College of Engineering for the following semester once they have successfully completed a calculus course (preferably MATH:1550 Engineering Mathematics I: Single Variable Calculus), and either CHEM:1110 Principles of Chemistry I or PHYS:1611 Introductory Physics I with grades of A or B.

More information about admission and the College of Engineering is available on the college's website.

## Transfer Applicants

Transfer applicants must have completed the same high school unit requirements as entering first-year students and must submit an official high school transcript as well as a transcript of college work undertaken at other institutions. To transfer to the College of Engineering, students must have demonstrated success in math, science, and engineering courses, ideally earning all As and Bs with no grade lower than a C in these foundation subjects. Transfer students must have completed MATH:1850 Calculus I, and either CHEM:1110 Principles of Chemistry I or PHYS:1611 Introductory Physics I (the first semester of chemistry designed for majors or the first semester of calculus-based physics) or their equivalents. Overall grade-point average also is considered in transfer applications.

Information about admission requirements for transfer students is available on the college's website.

# Bachelor of Science in Engineering, B.S.E.

## Requirements

The Bachelor of Science in Engineering (B.S.E.) requires a minimum of 128 s.h. of credit. Students must be enrolled in the UI College of Engineering for the last 30 s.h. of work toward the degree, or 45 of the last 60 s.h., or a total of 90 s.h. They must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

Engineering students earn the B.S.E. degree in one of eight undergraduate programs of study (majors): biomedical engineering, chemical engineering, civil engineering, computer science and engineering, electrical engineering, environmental engineering, industrial engineering, or mechanical engineering. Each program's curriculum is divided into four major components: the common core, engineering topics, a focus area, and the General Education Component (GEC).

## Core Requirements

The College of Engineering offers a common curriculum for all students in the eight engineering disciplines, thereby allowing students to change programs during the first semesters without a loss in course credit.

The core includes RHET:1030 Rhetoric, a first-year course in writing, speaking, and critical reading; ENGR:1100 Introduction to Engineering Problem Solving and ENGR:1300 Introduction to Engineering Computing, which cover a breadth of topics from engineering as a profession to team design projects to engineering computations and computer programming; and a series of mathematics, basic science, and fundamental engineering courses.

The fundamental engineering courses use the underlying principles learned in the mathematics and the basic sciences to understand and predict the behavior of idealized models of real components or systems encountered in engineering. Students should complete the core requirements according to the following plan.

## First Semester

Code	Title	Hours
All of these:		
ENGR:1000	Engineering Success for First-Year Students (all majors)	1
ENGR:1100	Introduction to Engineering Problem Solving (all majors)	3
CHEM:1110	Principles of Chemistry I (all majors)	4
MATH:1550	Engineering Mathematics I: Single Variable Calculus (all majors)	4
RHET:1030	Rhetoric (all majors)	4

## Second Semester

Code	Title	Hours
All of these:		
ENGR:1300	Introduction to Engineering Computing (all majors)	3
CHEM:1120	Principles of Chemistry II (biomedical, chemical, and environmental majors)	4
MATH:1560	Engineering Mathematics II: Multivariable Calculus (all majors)	4
MATH:2550	Engineering Mathematics III: Matrix Algebra (all majors)	2
PHYS:1611	Introductory Physics I (all majors)	4

## Required Program Courses and Focus Area

The curriculum for each B.S.E. major is described in each program's departmental Catalog section; see biomedical engineering [p. 1473], chemical and biochemical engineering [p. 1486], civil and environmental engineering [p. 1500], electrical and computer engineering [p. 1527], industrial and systems engineering [p. 1546], or mechanical engineering [p. 1562].

Each program has a number of focus areas that are designed to help students achieve exposure to and depth of study in an area that is complimentary to their major. The focus areas enable students to gain technical skills consistent with their career goals. Moreover, these electives may contribute to earning a minor and/or certificate.

## General Education Component

The general education component promotes understanding of and appreciation for arts, community, culture, and learning through coursework. Students are required to complete 15 sh. of the general education component as outlined below:

- Engineering Be Creative: 3 s.h.
- Diversity and Inclusion: 3 s.h.
- Approved subjects: 9 s.h. (industrial engineering students are required to complete PSY:1001 Elementary Psychology)

Credit may be earned by examination; consult the College of Engineering.

Students who enter the College of Engineering with a B.A. or B.S. degree are considered to have satisfied the general education component requirement.

Students who enroll in a combined degree program in the College of Engineering and in the College of Liberal Arts and Sciences or in the Tippie College of Business are considered to have satisfied the College of Engineering's general education requirement once they have completed all requirements for the liberal arts and sciences degree or the business degree.

## Combined and Dual Degrees

### B.S.E. and Undergraduate Degrees

#### B.S.E./B.B.A.

The College of Engineering and the Tippie College of Business offer a combined degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Science in Engineering (B.S.E.) from the College of Engineering.

Students in the combined program must complete all requirements for both degrees, including all general education requirements. They must enroll in appropriate mathematics and engineering courses early in their course of study in order to complete the program in a timely way. Because courses in natural sciences, mathematics, humanities, and social sciences count toward the B.B.A. and the B.S.E., students may count a single course toward both degrees.

Students usually meet the degree requirements of both colleges in about five years; the time required depends on a student's choice of major study areas. Students should consult their advisors about whether the second-grade-only option is available to them. They are assigned two advisors, one in the Tippie College of Business Undergraduate Program Office and the other in their College of Engineering major department.

To enter the combined degree program, students must have approval from both colleges and must be admitted to both colleges. Interested students should contact the Student Development Center. For information about the B.B.A., including requirements for the degree, see the Bachelor of Business Administration, B.B.A. [p. 1155] (Tippie College of Business) in the Catalog.

#### B.S.E./Liberal Arts and Sciences Degree

Students may earn two University of Iowa bachelor's degrees in a combined program in the College of Engineering and the College of Liberal Arts and Sciences. Successful candidates are awarded a B.S.E. (Bachelor of Science in Engineering) by the College of Engineering and a B.A. (Bachelor of Arts), B.S. (Bachelor of Science), B.F.A. (Bachelor of Fine Arts), or B.M. (Bachelor of Music) by the College of Liberal Arts and Sciences.

Students in combined degree programs must complete all requirements for both degrees, including the College of Liberal Arts and Sciences GE CLAS Core [p. 20] and the College of Engineering general education component.

Students in the combined program usually are able to meet the degree requirements of both colleges in about five academic years. The exact length of time necessary to complete the program is determined by the major areas of study selected in each college. Students who enter the combined degree program are assigned two faculty advisors, one in their major department in the College of Engineering and the other in their major department in the College of Liberal Arts and Sciences.

To enter the combined degree program, students must be admitted to both the College of Engineering and the College of Liberal Arts and Sciences and must have College of Engineering approval to enter the combined degree program.

Combined degree program applicants must meet the high school course or unit requirements for admission to each of the two colleges.

It is crucial that students enroll in the proper mathematics and engineering courses early in their course of study to expedite the completion of the program. The specific engineering courses taken by each student vary according to one's engineering major. Since courses in natural sciences, mathematics, humanities, and social sciences are accepted for credit by both colleges, students may be able to count a particular course toward both degrees.

Contact the Student Development Center for information about specific requirements. To learn about liberal arts and sciences majors, visit College of Liberal Arts and Sciences [p. 17] in the Catalog and select majors of interest in the departments.

#### B.S./B.S.E. Dual Degree with Northern Iowa

The 3+2 dual degree program leads to a B.S. in applied physics from the University of Northern Iowa (UNI) and a B.S.E. from the University of Iowa. It requires approximately three years of study at UNI followed by approximately two years of study at Iowa. There is no guarantee that students can complete the 3+2 degree in five years.

Students interested in the program are guaranteed admission to the University of Iowa portion of the program if they have a g.p.a. of at least 3.00 (B average) in all coursework and in the chemistry, mathematics, and physics courses required by the University of Northern Iowa physics department.

During the first three years of the program, students complete at least 90 s.h. of coursework at the University of Northern Iowa. They must successfully complete courses in each of the following areas: chemistry, mathematics through differential equations, physics to satisfy the applied physics major requirements, and courses to satisfy the general education requirements. Credit for courses passed with a grade of C or higher is transferred to the University of Iowa as credit for equivalent coursework.

At the University of Iowa, students complete the B.S.E. requirements that were current at the time of their admission to the UI College of Engineering. Coursework completed at the University of Iowa is transferred to the University of Northern Iowa and applied toward the requirements for that institution's B.S. in applied physics.

When transferring to Iowa from UNI, students must submit applications for admission, housing, and financial aid to the University of Iowa by the University's established deadlines.

### B.S.E. and Graduate Degrees

#### B.S.E./M.S. Programs in Engineering

Engineering students may be eligible to enroll in one of the College of Engineering's combined B.S.E./M.S. programs, which allow students to begin working toward a master's degree in engineering while they are completing their bachelor's degree. The combined programs, which are offered by each of the college's departments, permit students to count certain courses toward both degrees, completing both programs in less time than they would need to complete them separately. See "Combined Programs" in each department's B.S.E. sections of the Catalog.

## **B.S.E. in Biomedical Engineering (Biomechanics and Biomaterials Track)/M.S. in Occupational and Environmental Health (Industrial Hygiene Subprogram)**

B.S.E. students majoring in biomedical engineering in the biomechanics and biomaterials track who are interested in earning a Master of Science in occupational and environmental health with an industrial hygiene subprogram may apply to the combined B.S.E./M.S. program offered by the College of Engineering and the College of Public Health. The combined program permits students to count a limited amount of credit toward the requirements of both degrees, enabling them to begin the study of public health before they complete the bachelor's degree. See the M.S. in Occupational and Environmental Health—Undergrad to Grad information on the Department of Occupational and Environmental Health (College of Public Health) website.

## **B.S.E. in Civil Engineering/M.S. in Urban and Regional Planning**

The College of Engineering and the School of Planning and Public Affairs offer the combined Bachelor of Science in Engineering in civil engineering/Master of Science in urban and regional planning. The program, which is completed in five years, is designed for students who wish to pursue a public or private sector career in planning, a field that encompasses the development of alternatives to improve the quality of life in cities and regions.

For additional information on the B.S.E. in civil engineering [p. 1509], see that section of the Catalog. For more information about the graduate degree, see the M.S. in urban and regional planning [p. 1677] (Graduate College) in the Catalog. Contact Engineering Student Services for information about applying to the combined program.

## **B.S.E. in Computer Science and Engineering/M.C.S.**

The College of Engineering and the Department of Computer Science (College of Liberal Arts and Sciences) offer a combined B.S.E. in computer science and engineering/Master of Computer Science for computer science and engineering undergraduate students.

The combined degree program allows students to count a limited amount of credit toward both degrees. For more information, see the Master of Computer Science, M.C.S. [p. 333] in the Catalog.

## **Honors**

### **Honors in Engineering**

Outstanding undergraduate students who demonstrate exceptional accomplishment through research, directed independent study, teaching internships, or other approved nondegree enrichment activities may graduate with honors in engineering. They must maintain a University of Iowa g.p.a. of at least 3.33, complete an honors project with a faculty member, and participate in a college-wide honors seminar with faculty members and other honors students. Successful completion of the honors requirements leads to a B.S.E. with

honors, which is noted on the student's transcript. See the College of Engineering Honors Program web page for details.

## **University of Iowa Honors Program**

In addition to honors in engineering, undergraduate students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

## **Career Advancement**

Engineering is a well-respected profession that is used as a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

# Engineering and Information Technology, M.S.

The rapid expansion of computer, information, and advanced manufacturing technology throughout all segments of business and industry is creating challenges for companies that seek to keep pace with the latest technological and engineering advancements. The M.S. in engineering and information technology program is intended to provide a rigorous, yet broadly accessible platform for practicing B.S.-level engineers and bachelor's degree graduates from other related disciplines to obtain advanced training in contemporary engineering and information technology areas.

Rather than focusing in one area, the M.S. program provides a breadth of exposure to areas that are key to the design, implementation, and manufacturing of complex, smart systems. This exposure includes coursework in software engineering, networking, cloud computing, machine learning, robotics, advanced manufacturing, testing/quality assurance, and associated legal, regulatory, environmental, and ethical issues.

The M.S. in engineering and information technology is administered by the College of Engineering.

## Requirements

*The M.S. in engineering and information technology program is currently being revised. Applications are not being accepted at this time.*

The Master of Science program in engineering and information technology requires 30 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00. Students are allowed up to 6 s.h. of approved transfer credit.

All courses are taught at the John Deere Davenport Works in Davenport, Iowa. Students work with an academic advisor to formulate a plan of study. The degree requires 12 s.h. of core courses and 18 s.h. in a subprogram—information technology or mechanical engineering.

The M.S. with a major in engineering and information technology requires the following coursework.

## Core Courses

Students should consult their advisor for appropriate course selection.

Code	Title	Hours
All of these:		
EIT:5120	Modern Automation and Control	3
EIT:5135	Modern Information Systems	3
EIT:5150	Applied Artificial Intelligence	3
EIT:5155	Cyber-Physical Systems	3

## Specialization Areas

Students choose one of the two subprograms below.

## Information Technology

Code	Title	Hours
All of these:		
EIT:5351	Cybersecurity	3
EIT:5352	Modern Database Systems	3
EIT:5353	Big Data and Machine Learning	3
EIT:5380	Software Engineering Methods, Tools, and Frameworks	3
EIT:5381	Enterprise Software Engineering	3
EIT:5382	Human-Computer Interaction Design and User Experience	3

## Mechanical Engineering

Code	Title	Hours
All of these:		
EIT:5211	Machine Learning and Scientific Computing in Engineering	3
EIT:5216	Manufacturing Process and Modeling	3
EIT:5220	Advanced Control Engineering	3
EIT:5224	Mechanical Design and Realization	3
EIT:5240	Kinematics of Modern Robotics	3
EIT:5298	Mechanical Component Durability and Integrity Analysis	3

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must have a bachelor's degree in engineering, computer science, or a related field and an undergraduate g.p.a. of at least 3.00. Those whose g.p.a. is slightly below 3.00 may be considered for admission. No Graduate Record Examination (GRE) General Test scores are required.

Those whose first or official language is not English must score as follows on the Test of English as a Foreign Language (TOEFL): a score of 550 or higher on the paper-based (PBT) version or a score of 81 or higher on the internet-based (iBT) version.

## Career Advancement

The M.S. degree will assist those who need to learn more about the career areas in which they currently work. Practicing engineers whose expertise is outside of the computing and information technology area may need to gain additional knowledge in areas such as software engineering, networking, databases, and computer security. Likewise, engineers with expertise in traditional computer-related areas may need to broaden their skill set to include an understanding of the internet of things (IoT),

machine learning, and other smart-system technologies and methodologies.

# Roy J. Carver Department of Biomedical Engineering

## Chair

- Joseph M. Reinhardt

**Undergraduate major:** biomedical engineering (B.S.E.)

**Graduate degrees:** M.S. in biomedical engineering; Ph.D. in biomedical engineering

**Faculty:** <https://bme.engineering.uiowa.edu/people>

**Website:** <https://bme.engineering.uiowa.edu/>

The past half century has seen tremendous growth of technological activity in biology and medicine. As engineers increasingly have become involved with projects in the life and health sciences, biomedical engineering has emerged to bridge the gap between these sciences and engineering.

The Roy J. Carver Department of Biomedical Engineering fosters interdisciplinary activities across departments and colleges and maintains strong ties with the Carver College of Medicine and the Colleges of Dentistry, Nursing, and Public Health. The department strives to provide a well-rounded and superior engineering education that attracts outstanding students at both the undergraduate and graduate levels; to conduct high-quality research that enables faculty members and students to keep pace with and initiate new developments; and to serve government, industry, and institutions worldwide by making the department's facilities and faculty expertise accessible.

Department faculty members have teaching and research expertise in areas related to cardiovascular and fluid biomechanics, musculoskeletal biomechanics, biomaterials and tissue engineering, bioinstrumentation, biosystems, biomedical imaging, biological signal analysis, bioinformatics and computational biology, respiratory and pulmonary engineering, and other allied fields. Several faculty members have joint appointments with the Carver College of Medicine, the College of Dentistry, or the College of Public Health. Biomedical engineering undergraduates and graduate students collaborate with faculty members and their colleagues on research problems in the life and health sciences.

## Facilities

### Undergraduate Teaching Laboratories

Seven dedicated undergraduate teaching laboratories are associated with the required and elective courses in biomedical engineering: the Bioimaging and Bioinformatics Laboratory; the Biomechanics and Biomaterials Laboratory; the Carver Biomechanics and Mechanobiology Laboratory; the Carver Cellular Engineering Laboratory; the Carver Medical Device Design Laboratory; the Senior Design Laboratory; and the Systems, Instrumentation, and Data Acquisition Laboratory.

#### Bioimaging and Bioinformatics Laboratory

The Bioimaging and Bioinformatics Laboratory provides computer and experimental equipment to allow students to become familiar with biomedical imaging hardware and software for biomedical image analysis. The laboratory has four lab benches with computers for teamwork, two desktop ultrasound machines, and two desktop magnetic resonance imaging devices. In addition, the lab has 12 sets of in-house-built optics laboratory kits that use light sources and semitranslucent objects to simulate basic x-ray physics. Students are introduced to concepts such as image magnification as it relates to source-object distance (SOD)/ source-image distance (SID), depth-dependent magnification, ideal point source versus parallel beam source effects, and projection image formation with lack of depth information artifacts. An instructor workstation and computer projector are available for presentations and software demonstrations. The lab is used primarily for the core course BME:2210 Bioimaging and Bioinformatics, the elective course BME:5210 Medical Imaging Physics, and for senior design projects.

#### Biomechanics and Biomaterials Laboratory

The Biomechanics and Biomaterials Laboratory is equipped to perform experiments relating to the cardiovascular and human musculoskeletal systems as well as the various properties of biomaterials. The laboratory houses a table-top material testing machine; two cone-and-plate viscometers; compact stress-strain devices for characterizing cardiovascular tissues; goniometers; human structures biomechanical modeling sets and associated sensors; digital still, video, and motion-capture cameras for kinematic analysis; a ski binding tester; a drop tower for impact testing; digital calipers; various skeletal/bone models; an assortment of hand tools; and dissecting tools. The lab is used for the course BME:2500 Biomaterials and Biomechanics, elective courses in cardiovascular and musculoskeletal biomechanics, and senior design projects.

#### Carver Biomechanics and Mechanobiology Laboratory

The Carver Biomechanics and Mechanobiology Laboratory (CBML) is a shared resource in the Roy J. Carver Department of Biomedical Engineering with a mission to enhance teaching, training, and research in the field of biomechanics and mechanobiology. Biomechanics and mechanobiology involve the study of how cells, fluids, tissues, and organs respond to physical forces. The lab contributes to the understanding of

cardiovascular disease, cancer metastasis, wound healing, medical device function, and stem cell therapies.

The lab houses a planar biaxial stress-strain test apparatus, a pulse duplicator apparatus for characterizing blood flow through mechanical and tissue heart valves, a micron-resolution particle image velocimetry (micro-PIV) system for quantifying flow and particle dynamics at the microscale, a stent crimper for characterizing vascular stent designs, a multimode plate reader for quantifying cell activity and extracellular matrix (ECM) remodeling, a lyophilizer for quantifying elastin and collagen content in soft tissue samples, a micromanipulator for performing micropipette aspiration studies, and a controlled microscope room for imaging live cells over long durations. The lab is used for courses in cardiovascular biomechanics and cellular engineering, other elective courses, and senior design projects.

### **Carver Cellular Engineering Laboratory**

This laboratory trains students in cell culture and biochemical analysis techniques as a foundation for future work in quantitative cell-based studies. Students learn basic cell culture techniques, protein and nucleic acid analysis, as well as techniques for studying the effects of engineered materials on cellular systems.

Major equipment in the lab includes laminar flow hoods, cell culture incubators, centrifuges, spectrophotometers, an ultracold freezer, protein and nucleic acid electrophoresis equipment, thermal cyclers, microscopes, an automated microplate reader, and various support apparatus used in cell-based studies. This teaching lab is used for the courses, BME:2400 Cell Biology for Engineers and BME:5421 Cell Material Interactions.

### **Carver Medical Device Design Laboratory**

The Carver Medical Device Design Laboratory provides a space for students to gather to collaborate on the design of medical implants, fixtures for testing such implants, and software for modeling, analyzing, and optimizing the function of these devices. Space and equipment are provided for progressing from a back-of-the-napkin sketch to a finalized computer-aided design (CAD) model and through multiple iterations of physical prototypes.

A variety of tools and equipment are available such as a micro 24 laser system, a benchtop milling machine, a bandsaw and lathe, a soldering station, an expanded plasma cleaner, a micro pulse arc welder, and five computer workstations. The lab was established to serve students with an interest in medical device design and in required and elective courses in the areas of biomaterials, biomechanics (cardiovascular and musculoskeletal), and the senior design sequence.

### **Senior Design Laboratory**

The Senior Design Laboratory provides a collaborative atmosphere for student groups as they create working prototypes. It has computer workstations, project workspace, and storage space for the development of senior design projects. In addition, a variety of tools and equipment are available in the lab, including electronics measurement devices, soldering tools, Dremel tools, miscellaneous sample medical equipment, and other resources for students. It is used by students taking BME:4910 Biomedical Engineering Senior Design I and BME:4920 Biomedical Engineering Senior Design II.

### **Systems, Instrumentation, and Data Acquisition Laboratory**

The Systems, Instrumentation, and Data Acquisition Laboratory is equipped to measure biomedical variables of clinical and physiological interest, to design and build electronic instrumentation, and to conduct modeling experiments in physiology. The lab is designed to give practice in designing and building electronic circuits to measure, acquire, and analyze signals; and acquire and analyze images. It is used for the elective courses, BME:2200 Systems, Instrumentation, and Data Acquisition and BME:4710 Medical Device Design Studio, for biomeasurements and biological systems analysis, and senior design projects.

### **Research Facilities and Laboratories**

#### **Bioinformatics and Computational Biology Laboratory**

The Bioinformatics and Computational Biology Center is wired for high-speed networking (100-megabit and gigabit ethernet, hardwired and wireless). It includes two dedicated Linux clusters, 126 computing systems, 178 CPUs, more than 20 terabytes of RAM, and 250 terabytes of disk space. Computer resources include a dedicated experimental, reconfigurable computer cluster of 18 Linux systems (36 CPUs) connected with a dedicated, switched, copper Gigabit Ethernet intranet and a second dedicated computer server cluster of 16 Linux systems (32 CPUs) connected with a dedicated, switched, fiber-optic Gigabit Ethernet intranet. An additional 78 computers are used as compute servers, web servers, database servers, file servers, workstations, laptops, and for other developmental and experimental needs.

#### **Biomechanics of Soft Tissues Laboratory**

The Biomechanics of Soft Tissues Laboratory (BioMOST) houses ViVITRO Pulse duplicating left-heart simulating flow loop system, mechanical extension testers, durability testers for accelerated testing of valves, flow loop with programmable pump, resistors and compliance chambers, optical micrometer, a furnace for nitinol shape memory alloy stent fabrication, and the Vascular Simulations Replicator (a portable realistic angio-suite friendly blood flow simulator). The lab also houses high-end image and data processing workstations.

#### **Carver Laboratory for Regenerative Engineering and Translational Science**

The Carver Laboratory for Regenerative Engineering and Translational Science is a state-of-the-art multi-investigator wet laboratory devoted to cell and tissue-based research. The laboratory is a transformational space that enables the biomedical engineering faculty and students (graduate and undergraduate research assistants) to interact with one another by bringing together investigators with similar yet varying fields of study, all with an emphasis on cellular and tissue engineering. The laboratory has a direct impact on training graduate students and contributes to numerous research projects across campus. The laboratory has been designed to be responsive to current and future needs; to encourage interaction among engineers, scientists, and physicians from various disciplines; to help recruit and retain

qualified faculty and students; and to facilitate partnerships and development.

The laboratory is equipped with major equipment to synthesize and characterize biomaterials, including a chemical fume hood, rotary evaporator, freeze-dryer, rheometer, and several light-based curing systems. To enable growth, maintenance, and characterization of mammalian cells, the lab also houses biosafety cabinets, incubators, a transfection system, automated cell counter, low-volume spectrophotometer, microplate reader, thermal cyclers, quantitative polymerase chain reaction (PCR) instruments, electrophoresis units, and a gel imaging system. The dedicated microscope room includes an atomic force microscope and several fluorescent microscopes, which are equipped with confocal and live cell imaging capabilities.

## **Collaborative Computational Laboratory**

The Collaborative Computational Laboratory is a shared research computing resource. Research focus areas include computational fluid dynamics, medical image analysis, magnetic resonance imaging, machine learning, and artificial intelligence. Desktop computers, compute servers, and access to the campus research data storage and high performance computing cluster are available through the lab.

## **Computational Biomolecular Engineering Laboratory**

The Computational Biomolecular Engineering Laboratory, located in the Bowen Science Building, is a collaboration between the Roy J. Carver Department of Biomedical Engineering and the Department of Biochemistry and Molecular Biology. It includes eight workstations used to simulate biomolecular phenotypes in the context of understanding the genetics of hearing loss, rare renal diseases, and vision loss. Heavy use is made of the University of Iowa Argon compute cluster, including dedicated availability of 30 compute nodes, 50 Nvidia graphics processing units (GPUs), and 100 terabytes of backed-up storage. The lab distributes a high performance physics-based molecular simulation code called Force Field X (FFX) that is being used to produce a family of protein structures for genes associated with hearing loss, available in the Deafness Variation Database. The software also is being used to predict how pharmaceuticals crystalize (i.e., into drug tablets) and to understand their thermodynamic properties (e.g., solubility).

## **Large Scale Digital Cell Analysis Laboratory**

The Large Scale Digital Cell Analysis System (LSDCAS) is an automated microscopy system designed to perform non-perturbing live cell imaging. LSDCAS has been used in studies designed to determine mechanisms of cell death following treatment with anti-cancer therapies. Current studies involve the adaptation of the LSDCAS technology toward the development of automatic single-cell analysis techniques to be used in drug discovery. LSDCAS consists of two computer-controlled inverted Hoffman modulation contrast microscopes outfitted with environmental control chambers, motorized stages, shutters, focusing systems, and high-resolution digital camera systems.

LSDCAS is housed in a dedicated microscopy room that provides the dark environment necessary for systems that operate around the clock automatically recording cell growth and other phenomena. LSDCAS data is stored and analyzed

using a data center consisting of an 8 processor Linux server with 16 gigabytes of RAM, a 30 terabyte hardware RAID storage system, and a 30 terabyte robotic tape backup system. Web application software and many other programs provide robust analysis capabilities for the large variety of data produced by the system. The LSDCAS code base contains over one hundred thousand lines of program code developed over the past two decades to provide automatic single cell analysis capabilities of general interest in cell biology. In addition, the lab has equipment and technologies generally used in cell and molecular biology, including protein and nucleic acid gel electrophoresis analysis systems, real-time reverse transcription polymerase chain reaction (RT-PCR) systems, cell culture incubators, a laminar flow cell culture biosafety cabinet, a chemical fume hood, -80°C freezer, other refrigerators and freezers, an ice machine, water purification system, autoclave, and many other tools, reagents, and devices.

## **Orthopedic Biomechanics Laboratory**

The Orthopedic Biomechanics Laboratory occupies 20 rooms on the ground floor of Westlawn. It is configured primarily for macroscopic-level physical testing of musculoskeletal constructs (e.g., bones, articular joints, orthopedic implants) and for corresponding computational modeling. The physical testing area includes a multipurpose wet lab, a multipurpose dry lab, a surgical preparation room, a mechanical testing room, a machine shop, and a specimen storage area. The computational modeling area is arranged around eight separate workstation seats in two adjoining partially partitioned areas. Adjacent to these core operational areas are offices for faculty, research staff, students, and fellows; a secretarial/reception area; a conference room; and a library.

## **Regenerative Engineering Laboratory**

The Regenerative Engineering Laboratory inhabits over 1,000 square feet of the Pappajohn Biomedical Discovery Building. The lab is fully equipped to support research at the interface of materials, engineering, and cell biology. The Biosafety Level 2 (BSL-2) cell culture room in the lab has two Panasonic cell culture incubators, two Thermo Scientific biological safety cabinets, a fluorescent microscope, 37°C bead bath, and centrifuges. A separate four-color fluorescence microscope also is available. The fully automated Leica DMI6000 captures four-color fluorescence images at up to 63x magnification. A built-in z-motor and post-acquisition analysis software allows for the capture and analysis of three-dimensional z-stacks.

The chemistry part of the lab is equipped for biodegradable particle synthesis and analysis. In addition to a fume hood, sink, and laboratory counters, the lab has an analytical grade Mettler Toledo XS64 balance, water bath sonicator, homogenizer, syringe pumps, and a LabConco -86°C Cascade Lyophilizer. To support long term storage of the reagents required for the molecular biology and chemistry portions of the lab, a variety of cold storage options are available including 4°C, -20°C, -80°C, and -130°C.

## **Spine Biomechanics Research Laboratory**

The Spine Biomechanics Research Laboratory is equipped for interdisciplinary research. The lab's MTS Bionix servohydraulic testing equipment (with extended columns) permits application of uniaxial tension or compression together with axial torsion under displacement or load control. The lab also has a fully automated three-dimensional motion measuring system. These devices are used to test mechanical

properties of biomechanical joints and tissues, and for biomechanical evaluation of the performance of surgical treatment modalities. Other equipment includes digital cameras, surgical tools, and sensors (i.e., linear variable differential transformers, six-degrees-of-freedom load cell, pressure transducers, digital inclinometers).

A biaxial biomechanical culture system is available for application of controlled compression and/or shear forces onto the intervertebral disc during culture in order to investigate the disc's biological responses to mechanical loads. This culture system is used in conjunction with an incubator in which cells and tissues can be cultured. Basic equipment for histology and immunohistochemical analyses includes a microtome, ovens, a microscope, and glassware for chemical processes.

## Courses

### Biomedical Engineering Courses

For current and planned course offerings, visit MyUI on the University of Iowa website.

These advanced courses are offered infrequently depending on the research focus of currently enrolled graduate students: BME:6110 Mechanics of Cells and Cellular Systems, BME:6415 Advanced Biomechanics and Modeling of Soft Tissues, and BME:6610 Spine Mechanics.

**BME:0000 Biomedical Engineering Internship/Co-op** 0 s.h.  
Biomedical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

**BME:1010 First-Year Forum** 1 s.h.  
Presentations by faculty, graduate students, collaborators from the Carver College of Medicine, and Colleges of Dentistry and Law; may include visits to laboratories and industries.

**BME:2010 Professional Seminar: Biomedical Engineering** 1 s.h.  
Professional aspects of biomedical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Requirements: sophomore or higher standing.

**BME:2200 Systems, Instrumentation, and Data Acquisition** 4 s.h.  
Introduction to engineering art and science of modeling, acquisition, and analysis of data collected from living systems; modeling of physiological and biological systems; concepts of analog circuit design, with emphasis on circuits for collecting data for biomedical applications using operational amplifiers, active filters, conversion, and interface to microcomputers; patient safety; clinical circuits; analysis of data using time domain and Fourier domain techniques and models; time domain sampling, and Nyquist sampling theorem. Prerequisites: ENGR:2120. Corequisites: HHP:3500, and BIOS:4120 or STAT:3510.

**BME:2210 Bioimaging and Bioinformatics** 4 s.h.  
Introduction to bioinformatics and biomedical imaging; computer algorithms, machine learning, databases and SQL, the web and web servers, ethics, computer security, genome technology, public warehouses of biological data; medical imaging hardware and software for acquisition and analysis of medical images, especially those collected from X-ray, CT, MR, and ultrasound systems; medical imaging system physics, including interaction of energy with tissue, concepts of image spatial and temporal resolution; applications of filtering, enhancement, and image processing for analysis of medical images. Prerequisites: ENGR:1300 and BIOL:1411. Corequisites: BIOS:4120 or STAT:3510.

**BME:2400 Cell Biology for Engineers** 3 s.h.  
Introduction to fundamental concepts in quantitative cell biology from an engineering perspective. Prerequisites: BIOL:1411. Corequisites: BIOS:4120 or STAT:3510.

**BME:2500 Biomaterials and Biomechanics** 4 s.h.  
Introduction to mechanics and materials in biological systems; principles of mechanics (stress, strain, motion, fluid flow) presented and used to characterize behavior of biological entities (tendon/ligament, bone and cartilage, blood, blood vessels, heart); principles of material science; role of biomaterials (metals, polymers, ceramics) in medical devices. Prerequisites: ENGR:2110. Corequisites: HHP:3500, and BIOS:4120 or STAT:3510.

**BME:2710 Engineering Drawing, Design, and Solid Modeling** 3 s.h.  
Introduction to methods and principles used by engineers to define and describe geometry and topology of engineered components; use of Parametric Technology's Creo Pro (formerly ProEngineer) 3D computer-aided design software; emphasis on elements of design; basic commands used in parametric design to develop spatial visualization skills and the ability to create and understand 3D solid parametric design for assembly and 3D drawing documentation; creation of 3D assemblies and detailed drawings from art of design to part utilization of solid modeling techniques.

**BME:3010 Leadership and Resourcefulness** 1 s.h.  
Development of leadership skills and resourcefulness for real-world professional work and life. Requirements: completion of BME:1010 and two semesters of BME:2010.

**BME:3710 Medical Device Design: The Fundamentals** 3 s.h.  
Introduction to medical device design process; project-based; development of prototyping and fabrication skills needed for engineering design projects, safety, communication, and teamwork; focus on physical rehabilitation science and assistive technologies; preparation for senior design course sequence. Prerequisites: BME:2500 and BME:2710. Corequisites: BME:4010. Requirements: junior standing.

**BME:3998 Individual Investigations: Biomedical Engineering** arr.  
Individual projects for biomedical engineering undergraduate students, such as laboratory study, engineering design projects, analysis and simulation of an engineering system, computer software development, research.

**BME:4010 Biomedical Engineering Design Seminar** 1 s.h.  
Students develop an awareness of design with emphasis on biomedical applications; principles and tools of user-centered design; basics of intellectual property (IP); skills for use in senior design and beyond. Requirements: junior standing.

- BME:4310 Computational Biochemistry** 3 s.h.  
Introduction to biomolecular modeling and computer simulation techniques; biomolecular structure and molecular driving forces; principles of structural optimization and conformational sampling; applications to biomolecular phenotypes; scripting and molecular visualization in PyMol, setting up and running molecular dynamics simulations using VMD and NAMD, performing refinement of X-ray diffraction data sets using Phenix, and executing Poisson-Boltzmann electrostatic calculations using APBS. Prerequisites: (MATH:1560 or MATH:1860) and CHEM:1120. Recommendations: BIOC:3110 or BIOC:3120. Same as BIOC:4310.
- BME:4314 Introduction to Synthetic Biology in the Lab** 4 s.h.  
Introduction to theory and practice of large-scale design goals of synthetic biology in which various types of DNA instructions, known from decades of research and discovery on specific biological systems, are taken out of context and used to execute various novel tasks designed to solve real-world problems; basic laboratory instruction in standardized construction techniques for stringing together off-the-shelf DNA components that are then introduced into organisms capable of executing the instructional set; controlled experiments to investigate the degree of variability exhibited by engineered genetic constructs. Prerequisites: BIOL:1411. Same as BIOL:4314.
- BME:4710 Medical Device Design Studio** 3 s.h.  
Intermediate medical device design geared towards electro-mechanical design and techniques; builds on foundational knowledge acquired in BME:3710 and BME:2200; focus on advanced prototyping skills including solid modeling, proper electrical component selection, integrating electrical components into hardware design, and testing electro-mechanical device against industry standards. Prerequisites: BME:2200 and BME:2500 and BME:2710 and BME:3710.
- BME:4910 Biomedical Engineering Senior Design I** 4 s.h.  
Individual or group work on a creative design project involving current problems in biomedical engineering; interdisciplinary projects involving biomedical engineering and health sciences faculty members; first semester of a year-long senior capstone design project. Prerequisites: (BIOS:4120 or STAT:3510) and BME:4010. Requirements: senior standing.
- BME:4920 Biomedical Engineering Senior Design II** 4 s.h.  
Second semester of a year-long senior capstone design project begun in BME:4910. Prerequisites: BME:4910.
- BME:5010 Seminar in Biomedical Engineering** 0 s.h.  
Presentation of recent advances in biomedical engineering. Requirements: graduate standing.
- BME:5101 Biomaterials and Implant Design** 3 s.h.  
Introduction to material and mechanical considerations underlying a broad range of medical implants; emphasis on understanding factors involved in orthopedic device design; major classes of biomaterials; considerations that underlie implant design, use, failure; contemporary areas of biomaterials and implant development. Prerequisites: ENGR:2750 and BME:2500.
- BME:5200 Biomedical Signal Processing** 3 s.h.  
Application of signal processing methods (e.g., Fourier, Laplace, z-transforms) to biomedical problems, such as analysis of cardiac signals, circadian rhythm, the breathing cycle; computer simulation lab. Same as IGPI:5212.
- BME:5210 Medical Imaging Physics** 3 s.h.  
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210. Same as ECE:5470, IGPI:5206.
- BME:5251 Advanced Biosystems** 3 s.h.  
Biological systems unique to systems analysis; operation under nonequilibrium conditions; tools for systems analysis developed from models of systems at equilibrium (i.e., mechanical systems); fundamental difference between biological and mechanical systems that impact systems analysis; expand knowledge of linear systems and begin work with nonlinear systems; various modeling and analysis approaches useful in biomedical and biomedical engineering research. Prerequisites: BME:2200. Same as IGPI:5251.
- BME:5320 Bioinformatics Techniques** 3 s.h.  
Informatics tools and techniques applied to modern problems in biomedicine and basic life sciences; common tools, experience applying tools in contemporary problem settings; genomics and genetics, how to sequence a genome, transcription and expression, SNPs, Perl, BioPerl, Perl modules, Ensembl API, BLAST/BLAT, NCBI, UCSC, Ensembl Genome browsers, linkage, association, disease gene identification. Prerequisites: BIOL:1411 and (ENGR:2730 or CS:2110 or CS:5110). Same as ECE:5210, IGPI:5321.
- BME:5330 Computational Genomics** 3 s.h.  
Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: (BIOS:4120 or STAT:3510) and (CS:5110 or ENGR:1300). Recommendations: completion of BME:5320. Same as BIOL:5320, ECE:5220, GENE:5173, IGPI:5330.
- BME:5340 Contemporary Topics in Biomedical Engineering** 3 s.h.  
New and emerging areas of biomedical engineering and related fields; specific content varies.
- BME:5421 Cell Material Interactions** 3 s.h.  
Current thought and techniques in the engineering and assessment of biomaterials. Prerequisites: BME:2400.
- BME:5430 Biotransport** 3 s.h.  
Energy, mass, and momentum transport in living systems; processes essential for understanding how physiological systems function from molecular level through scale of tissues and organs; fluid mechanics and physiological flows, mass transport, biochemical kinetics and reactions, bioheat transfer; conservation laws; various biological applications. Prerequisites: BME:2500.
- BME:5435 Systems Biology for Biomedical Engineering** 3 s.h.  
Although systems biology is comprised of both experimental and computational aspects, focus is on computational aspects; introduction to deterministic models of biochemical reaction networks; development and application of mathematical models of reaction networks using systems of nonlinear ordinary differential equations; numerical techniques employed to study system stability and perform simulations in realistic biological contexts. Prerequisites: BME:2400 and BME:2200.

**BME:5441 Numerical and Statistical Methods for Bioengineering 3 s.h.**

Mathematics and computation as indispensable tools needed to model and explain complex phenomena relevant to biomedical engineering problems; introduction to concepts from linear algebra, differential equations, probability and statistics, nonlinear model regression, optimization, numerical integration, and other numerical methods, all using Matlab. Prerequisites: MATH:2560 and MATH:2550.

**BME:5445 Stem Cells in Regenerative Engineering 3 s.h.**

Discovery and history of stem cells, how they are defined and grouped, and various techniques for their isolation, creation, culture, and characterization; focus on current state of stem cells in medical research and treatment of human disease, as well as future outlook of their use; particular emphasis placed on practical knowledge that students may find useful as they pursue careers in cellular and tissue engineering. Prerequisites: BME:2400 or BIOL:2723.

**BME:5451 Research Methods in Cellular Engineering 3 s.h.**

Statistical approaches and principles of assays routinely used in cell engineering; design of experiments and statistical approaches commonly used to analyze biological data including t-tests and one- and two-way ANOVAs, taking into consideration the constraints of cellular engineering research; students design, execute, and analyze data collected from actual experiments; review of recently published literature and analysis of public data sets to understand how each assay and test contributes to understanding of cellular phenotype. Prerequisites: BIOL:1411 and (STAT:3510 or BIOS:4120).

**BME:5510 Cardiovascular Biomechanics 3 s.h.**

Mechanics—forces and motion—at the heart of the cardiovascular system; fluid and solid mechanics inherent to the motion of the heart, valves, arteries, and veins, and how they facilitate the flow of blood; how to use mechanics to understand and diagnose the severity of cardiovascular disease states and to design implants and devices. Prerequisites: BME:2500.

**BME:5520 Cardiovascular Fluid Mechanics 3 s.h.**

Anatomy and physiology of the human circulatory system, pressure-flow relationship in arteries, elastic properties of the arterial wall, steady and pulsatile flow dynamics, flow dynamics of human heart valves, flow dynamics past valve prostheses, fluid mechanical measurements in circulation, relationship between fluid mechanics and diseases in human circulation. Prerequisites: BME:2500 and BME:5510.

**BME:5530 Design of Circulatory Implants and Artificial Organs 3 s.h.**

Exploration of current innovations and new technologies; examination of various devices currently on the market from a standpoint of design variables and objectives (i.e., stents, heart valves, dialyzers, VADs, artificial organs); biomedical engineers' vital role in design and improvement of these implants. Prerequisites: BME:2500 and BME:5510.

**BME:5540 Quantitative Studies of Respiratory and Cardiovascular Systems 3 s.h.**

Quantitative physiological aspects of respiratory and cardiovascular systems; classical models of these systems are considered including lumped element models, branching tree structures, and distributed parameter models to predict wave propagation in compliant walled tubes filled with compressible or incompressible fluids; development of extensive computer models to simulate the behavior of these systems in frequency- and time-domains, under various conditions of health and disease. Prerequisites: BME:2200 and HHP:3500.

**BME:5550 Cardiovascular Tissue Mechanics 3 s.h.**

Solid mechanics principles applied to understand behavior of tissues in the cardiovascular system; mechanical properties of ventricles, valves, and blood vessels, their normal function, how they are affected by disease states; solid mechanics of tissue-prosthesis interactions. Prerequisites: ENGR:2750 and BME:2500 and BME:5510.

**BME:5610 Musculoskeletal Biomechanics 3 s.h.**

Principles of solid mechanics applied to analytical, experimental investigation of biological systems; emphasis on applications in kinesiology of human musculoskeletal system. Prerequisites: BME:2500 and ENGR:2750.

**BME:5620 Introduction to Applied Biomedical Finite Element Modeling 3 s.h.**

Introduction to finite element modeling as applied to biomechanics-related applications. Prerequisites: ENGR:2750 and BME:2500.

**BME:5630 Kinetics of Musculoskeletal Systems 3 s.h.**

Principles of kinematics; kinetics applied to analytical and experimental investigation of musculoskeletal systems; mathematical foundations for kinematic and kinetic analyses; examples of mathematical modeling of human movements. Prerequisites: ENGR:2710.

**BME:5640 Ergonomics of Occupational Injuries 3 s.h.**

Epidemiology, surveillance systems, ergonomics, biomechanics, physiology, psychology, legal aspects, and cost control. Prerequisites: BME:2500. Corequisites: ENGR:2750.

**BME:5715 Advanced Medical Device Design Studio 3 s.h.**

Continuation of BME:3710 and BME:4710; biomedical engineering project based; focus on advanced prototyping and manufacturing techniques of mechanical and electromechanical medical devices; implementation of design controls and testing to medical industry standards for quality and safety; development of project management skills and communication within a team; final course in medical device design sequence. Prerequisites: BME:2200 and BME:2500 and BME:2710 and BME:3710 and BME:4710.

**BME:5720 Optimization of Structural Systems 3 s.h.**

Advanced topics; optimization of structural topology, shape, and material; finite dimensional dynamic response optimization, sensitivity analysis, distributed parameter systems; projects. Same as CEE:5236.

**BME:5998 Individual Investigations: Biomedical Engineering arr.**

Individual projects for biomedical engineering graduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

**BME:5999 Research: Biomedical Engineering M.S. Thesis** **arr.**

Experimental and/or analytical investigation of an approved topic for partial fulfillment of the requirements for the M.S. with thesis in biomedical engineering. Requirements: graduate standing.

**BME:6110 Mechanics of Cells and Cellular Systems** **3 s.h.**

Mechanics of cells; focus on cellular mechanical properties, responses to mechanical stimuli, cellular forces and measurement, and computational tools; cellular environment considered with implication to disease pathologies and medical device design considerations.

**BME:6225 Communicating Science** **3 s.h.**

Writing and speaking about biomedical engineering and science research; key principles of writing with clarity and cohesion; practice applying these principles on a piece of research writing students are currently working on; review of best practices for presenting research to peers and at conferences; students share their work with peers through writing and presentations.

**BME:6415 Advanced Biomechanics and Modeling of Soft Tissues** **3 s.h.**

Application of continuum mechanics and modeling to study of biological tissues and biomaterials.

**BME:6610 Spine Mechanics** **3 s.h.**

Biomechanics applied to mechanics of the human spine; clinical aspects; state-of-the-art in spine research; basic engineering principles for biomechanical analysis. Prerequisites: BME:5610.

**BME:6630 Human Response to Vibration** **3 s.h.**

Exploration of the human body, a complex mechanism exposed to mechanical shock and vibration from many sources, under many conditions; interactions and applicable exposure standards, effects of whole-body and hand-arm vibration. Requirements: graduate standing in College of Engineering or College of Public Health.

**BME:7999 Research: Biomedical Engineering Ph.D. Dissertation** **arr.**

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. with thesis in biomedical engineering.

# Biomedical Engineering, B.S.E.

## Educational Objectives

The department provides undergraduate students with a contemporary education in a multidisciplinary field of engineering. Its objective is to produce graduates who:

- advance the biomedical field through the responsible analysis and design of devices, systems, processes, and policies that improve human health;
- pursue a wide range of career options, including those in industry, academia, and medicine; and
- collaborate on multidisciplinary teams and become leaders in their chosen field.

## Requirements

The Bachelor of Science in Engineering requires a minimum of 128 s.h. of credit. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

The major in biomedical engineering builds on the foundation provided by the B.S.E. core requirements, preparing students for the challenges and opportunities associated with careers in the profession.

The program has been designed carefully to enable students to satisfy the entrance requirements of the Graduate [p. 1586] College. Students whose choice of electives includes a three-course sequence in organic chemistry, an additional biology course, and a biochemistry course may satisfy entrance requirements of the Carver College of Medicine [p. 1715], the College of Dentistry [p. 1263], or the allied health sciences.

All engineering students complete the B.S.E. core requirements for the Bachelor of Science in Engineering [p. 1468].

Biomedical engineering students must choose one of four preapproved focus areas—bioimaging, bioinformatics, biomechanics and biomaterials, or cellular engineering. Each focus area may be designated pre-medicine by taking the necessary focus area electives. Each approved focus area has a group of four required courses and a list of suggested electives.

## Focus Areas

### Bioimaging Focus Area

Bioimaging represents the acquisition, processing, and visualization of structural or functional images of living systems. Medical imaging and image processing are integral to the extraction of anatomical and biological information from the systems level down to the molecular level with the goal of clinically seeking to reveal, diagnose, or examine diseases, as well as to the study of normal anatomy and physiology.

### Bioinformatics Focus Area

Bioinformatics is an interdisciplinary field that develops methods and software tools for modeling and understanding biological data and systems that are typically represented by large amounts of data. Bioinformatics is a combination of

computer science, statistics, informatics, and engineering to analyze and interpret biological and genomic data. It is used for the identification of candidate genes to better understand the genetic basis of disease, unique adaptations, and differences between populations.

### Biomechanics and Biomaterials Focus Area

Biomechanics is the study of structure and function. It is the application of principles from classical mechanics to problems in biological systems. This focus area emphasizes cardiovascular and/or musculoskeletal biomechanics. The study of biomaterials plays an important role in the design of implants and surgical instrumentation for both cardiovascular and musculoskeletal applications.

### Cellular Engineering Focus Area

Cellular engineering involves the application of engineering principles to problems in cellular and molecular biology, particularly as they relate to human health. The goal of this focus area is to equip students with the quantitative tools necessary to understand, manipulate, and control cellular and subcellular processes for a range of biomedical applications, including those related to stem cells, tissue engineering, and regenerative medicine.

For details about focus areas and their requirements, visit biomedical engineering Focus Areas on the department's website.

## Combined Programs

### B.S.E./M.S. in Biomedical Engineering

The College of Engineering offers a combined Bachelor of Science in Engineering/Master of Science for biomedical engineering undergraduate students who intend to earn a M.S. in biomedical engineering. Students admitted to this program are allowed to apply three engineering courses (9 s.h.) towards both the B.S.E. and M.S. degree requirements, take an additional 3 s.h. of graduate coursework before completing their B.S.E., and attend and participate in the departmental graduate seminar. Students may begin to work on their coursework or master's thesis starting as early as the summer following the junior year of undergraduate studies.

Students applying to the B.S.E./M.S. program in biomedical engineering must meet the following criteria at the time of application:

- a minimum of 80 s.h. completed towards their B.S.E. degree,
- a cumulative g.p.a. of 3.50 or higher, and
- identification of a thesis or project mentor.

### B.S.E./M.S. in Electrical and Computer Engineering

B.S.E. students majoring in biomedical engineering who are interested in earning a Master of Science in electrical and computer engineering may apply to the combined B.S.E./M.S. program offered by the College of Engineering. The combined program permits students to count a limited amount of credit toward the requirements of both degrees. See the M.S. in electrical and computer engineering [p. 1543] in the Catalog.

## B.S.E. (Biomechanics and Biomaterials Track)/M.S. in Occupational and Environmental Health (Industrial Hygiene Subprogram)

B.S.E. students majoring in biomedical engineering in the biomechanics and biomaterials track who are interested in earning a Master of Science in occupational and environmental health with an industrial hygiene subprogram may apply to the combined B.S.E./M.S. program offered by the College of Engineering and the College of Public Health. The combined program permits students to count a limited amount of credit toward the requirements of both degrees, enabling them to begin the study of public health before they complete the bachelor's degree. See the M.S. in Occupational and Environmental Health—Undergrad to Grad information on the Department of Occupational and Environmental Health (College of Public Health) website.

### Career Advancement

B.S.E. graduates with a major in biomedical engineering may pursue career opportunities in biomedical industries, such as design and development of biomedical instrumentation, diagnostic aids, life support systems, prosthetic and orthotic devices, and man-machine systems; or they may pursue traditional career opportunities in industry, such as those rooted in mechanical or electrical engineering disciplines. Other career options are available in government (Food and Drug Administration, Environmental Protection Agency, National Institutes of Health, Veterans Affairs). Some biomedical engineering graduates elect to continue formal education in engineering, medicine, or law. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

### Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Biomedical Engineering, B.S.E.

Elective: focus area course <sup>k</sup>		3
Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall) <sup>m</sup>		
<b>Hours</b>		<b>16</b>
<b>Total Hours</b>		<b>134</b>

- a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.
- b Enrollment in chemistry courses requires completion of a placement exam.
- c Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.
- d Enrollment in math courses requires completion of a placement exam.
- e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- f Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- g Students in the bioimaging or bioinformatics focus areas can choose to take either ENGR:2130 or ENGR:2995; students in the biomechanics and biomaterials or cellular engineering focus areas are required to take ENGR:2130.
- h BIOS:4120 typically is offered in fall, spring, and summer sessions; STAT:3510 typically is offered in fall and spring sessions. Check MyUI for course availability since offerings are subject to change.
- i Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI. See the College of Engineering General Education Component website for more information.
- j Students select a course from the GE CLAS Core Diversity and Inclusion area.

k Each focus area consists of four required courses and seven electives. All required courses and at least two focus area elective courses must be 3 s.h. technical courses (i.e., an engineering science or design course). Students choose focus area elective courses from approved lists; at least two focus area elective courses must be from the engineering topics list. See the Roy J. Carver Department of Biomedical Engineering website or consult an advisor for more information.

l A full list of approved course subjects can be found on the College of Engineering General Education Component website.

m Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Biomedical Engineering, M.S.

Graduate study in biomedical engineering prepares students to use contemporary methods at an advanced level during a professional career in engineering design, development, and research.

Each student's course of study is based on individual background, career objectives, and sound academic practice. An individual program for each student may be developed from courses offered by the Roy J. Carver Department of Biomedical Engineering and other departments, especially mechanical engineering, electrical engineering, physiology, mathematics, and biological sciences. Students who want a more general program may combine emphases, while those who want some specialization in a particular field can achieve their goals through the combination of departmental courses and appropriate electives from other departments in the College of Engineering and the University.

## Requirements

The Master of Science program in biomedical engineering requires a minimum of 30 s.h. of graduate credit, with or without thesis. Students who choose the nonthesis program must earn at least 6 s.h. of credit in courses numbered 5000 or above. Those who choose the thesis program may count no more than 6 s.h. of thesis research and writing credit toward the degree. Students must maintain a cumulative g.p.a. of at least 2.75 in all work for the degree. The M.S. may be a terminal degree or a step toward the Ph.D.

A tentative plan of study for each student is determined through consultation with an advisor. An M.S. committee of at least three graduate faculty members, including at least two on the biomedical engineering faculty, is appointed by the dean of the Graduate College. A student's plan of study is reviewed by the committee before the student has completed 18 s.h. of coursework. The plan of study then is submitted for review to the department chair. All students must successfully complete the final examination administered by their committee.

All M.S. students (thesis or nonthesis) must successfully complete the Graduate Core Courses as part of their graduate curriculum. Students are expected to complete them during their first year of study. Additionally, students are required to complete 18 s.h. of graduate-level coursework in the College of Engineering over the course of their studies. B.S.E./M.S. fast track students may include courses taken during year four and/or year five.

## Graduate Core Courses

Code	Title	Hours
ENGR:7270	Engineering Ethics	1
HHP:3500	Human Physiology	3
ME:5113	Mathematical Methods in Engineering (or equivalent graduate mathematics course; approval of academic advisor required before registering)	3

Depending upon a student's performance in Graduate Core Courses and the nature of their research project, the student's

examining committee may specify additional coursework to be completed to satisfy the Graduate Core Courses requirement.

Graduate Core Courses may be substituted by other equivalent courses at the discretion of the student's examining committee. Equivalent coursework taken as part of a student's undergraduate or graduate studies prior to starting the M.S. program at the University of Iowa may satisfy one or more of the Graduate Core Courses requirements. Students who wish to request a substitution or a waiver of HHP:3500 Human Physiology must submit a core course substitution or waiver form. Forms may be obtained from the graduate program coordinator.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants who have earned a baccalaureate or postbaccalaureate degree in engineering or in the mathematical or physical sciences with a g.p.a. of at least 3.00 are eligible to be considered for admission to the Master of Science program.

Reference letters, research interests, previous graduate grade-point average, and other factors may be considered in admission decisions.

## Financial Support

Research assistant positions are available on a variety of research projects, and a limited number of teaching assistant positions may be available. Selection of recipients is usually based on scholastic achievement and research interest. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on a student's potential contribution to the teaching and research goals of the department. Students who fulfill their research assistant responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new awards.

## Career Advancement

Biomedical engineers with M.S. degrees can pursue career opportunities in the health care industry in the fields of biomedical devices, diagnostic equipment, and software. Graduates have started careers in research, design, development, sales, and entrepreneurship, and advance to administrative and leadership positions in their organizations. Graduates also have careers with health care providers such as in hospitals, or used their biomedical engineering expertise to advance careers in medicine and law. Faculty mentors assigned to graduate students aid in their professional development. Students are exposed to opportunities through seminar speakers who have relevant expertise that are invited to campus.

The Graduate College offers numerous career advancement opportunities and professional development programs for graduate students. Ongoing program offerings, news, and announcements can be found under Grad Success Center on the Graduate College website.

# Biomedical Engineering, Ph.D.

Graduate study in biomedical engineering prepares students to use contemporary methods at an advanced level during a professional career in engineering design, development, and research.

Each student's course of study is based on individual background, career objectives, and sound academic practice. An individual program for each student may be developed from courses offered by the Roy J. Carver Department of Biomedical Engineering and other departments, particularly mechanical engineering, electrical engineering, physiology, mathematics, and biological sciences. Faculty members in the department have teaching and research expertise in cardiovascular and fluid biomechanics, musculoskeletal biomechanics, biomaterials and tissue engineering, bioinstrumentation, biosystems, biomedical imaging, biological signal analysis, bioinformatics and computational biology, and other allied fields.

Ph.D. programs may center on any one of the previously described areas through the choice of appropriate coursework and research topic.

## Requirements

The Doctor of Philosophy program in biomedical engineering requires a minimum of 72 s.h. of graduate work, including acceptable transfer credit. At least 42 s.h. must be earned in formal coursework taken after the B.S.E. is awarded, and at least 12 s.h. must be earned for research and the thesis. Students who enter with an M.S. may count a maximum of 33 s.h. of approved transfer credit toward the Ph.D., but they must earn 39 s.h. of graduate credit at the University of Iowa, including at least 12 s.h. for research and the thesis. Based on a student's research progress, examination results, or other measures, the graduate committee may require additional formal coursework to strengthen perceived areas of weakness.

All Ph.D. students must successfully complete the Graduate Core Courses as part of their graduate curriculum. Students are expected to complete them during their first year of study. Additionally, students must complete 18 s.h. of graduate-level coursework in the College of Engineering over the course of their studies. Medical scientist training program students are required to complete 12 s.h. of graduate-level coursework in the College of Engineering.

## Graduate Core Courses

Code	Title	Hours
ENGR:7270	Engineering Ethics	1
HHP:3500	Human Physiology	3
ME:5113	Mathematical Methods in Engineering (or equivalent graduate mathematics course; approval of academic advisor required before registering)	3

Depending upon a student's performance in Graduate Core Courses and the nature of their research project, the student's examining committee may specify additional coursework

to be completed to satisfy the Graduate Core Courses requirement.

Graduate Core Courses may be substituted by other equivalent courses at the discretion of the student's examining committee. Equivalent coursework taken as part of a student's undergraduate or graduate studies prior to starting the biomedical engineering graduate program at the University of Iowa may satisfy one or more of the Graduate Core Courses requirements. Students who wish to request a substitution or a waiver of HHP:3500 Human Physiology must submit a core course substitution or waiver form. Forms may be obtained from the graduate program coordinator.

Admission to the Ph.D. program is conditional until students successfully complete a qualifying examination. The biomedical engineering faculty administers the exam and decides whether a student's performance on it is adequate for admission to the Ph.D. program.

Admission to Ph.D. candidacy requires a g.p.a. of at least 3.00 on all graduate work at the University of Iowa. Upon completion of the coursework specified in the plan of study and with the required grade-point average and the advisor's recommendation, students are admitted to the comprehensive examination by their committee.

Having satisfactorily completed these examinations, students usually have only to complete and defend their dissertation at the final examination. Requirements for the Ph.D. generally can be completed in about three years beyond the master's degree.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biomedical engineering in a combined degree program offered by the Carver College of Medicine and the College of Engineering. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Reference letters, research interests, previous graduate grade-point average, and other factors may be considered in admission decisions.

Admission to the Doctor of Philosophy in biomedical engineering is conditional until students successfully complete a qualifying examination.

## Financial Support

Research assistant positions are available on a variety of research projects, and a limited number of teaching assistant positions may be available. Selection of recipients is usually based on scholastic achievement and research interest. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on a student's potential contribution to the teaching and research goals of the department. Students who fulfill their research assistant

responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new awards.

Graduates have started careers in research, design, development, sales, and entrepreneurship, and advance to administrative and leadership positions in their organizations. Graduates also have careers with health care providers such as in hospitals, or used their biomedical engineering expertise to advance careers in medicine and law. Graduates also have careers in academia or at research institutions where they advance understanding of human health. Faculty mentors assigned to graduate students aid in their professional development. Students are exposed to opportunities through seminar speakers who have relevant expertise that are invited to campus.

The Graduate College offers numerous career advancement opportunities and professional development programs for graduate students. Ongoing program offerings, news, and announcements can be found under Grad Success Center on the Graduate College website.

# Chemical and Biochemical Engineering

## Chair

- C. Allan Guymon

**Undergraduate major:** chemical engineering (B.S.E.)

**Graduate degrees:** M.S. in chemical and biochemical engineering; Ph.D. in chemical and biochemical engineering

**Faculty:** <https://cbe.engineering.uiowa.edu/people>

**Website:** <https://cbe.engineering.uiowa.edu/>

Chemical and biochemical engineers combine engineering principles with knowledge of mathematics and specific sciences—chemistry, the biological sciences, and physics—to develop and operate processes that convert raw materials into products that benefit society. For example, biochemical engineers might develop and operate processes to convert switchgrass into biofuels or to mass produce an antibiotic.

Chemical and biochemical engineers engage in a wide variety of activities that benefit the global community. Fuel cells, solar energy, and biorenewable fuels (e.g., biodiesel or ethanol) fall within the realm of chemical engineering.

Chemical engineering distinguishes itself from other engineering professions with its reliance on chemical reactions and physicochemical transformations to produce a wide variety of important materials and products. Biochemical engineers are involved in a wide variety of industrial biocatalytic, fermentation, and cell culture processes that generate products ranging from the high fructose corn syrup in soft drinks to recombinant human insulin.

As part of their training, chemical and biochemical engineers learn ethical design and a respect for the larger issues in any design, such as community health, employee safety, and the global implications of the design. The University of Iowa's curriculum emphasizes chemical process safety and environmentally conscious chemical engineering design.

## Programs

### Undergraduate Program of Study

#### Major

- Major in Chemical Engineering (Bachelor of Science in Engineering) [p. 1492]

### Graduate Programs of Study

#### Majors

- Master of Science in Chemical and Biochemical Engineering [p. 1496]
- Doctor of Philosophy in Chemical and Biochemical Engineering [p. 1498]

## Facilities

### Undergraduate Core

#### Materials Science Laboratory

The Materials Science Laboratory is equipped with optical microscopes and facilities for metallographic preparation. Mechanical tensile testing instruments, heat treatment and

sintering furnaces, and hardness testing machines also are available. Teaching aids include metallography specimen kits and crystallography packages.

### Required Undergraduate Laboratories

#### Chemical Engineering Laboratory

The Chemical Engineering Laboratory provides instruction for undergraduate students in CBE:3150 Thermodynamics/Transport Laboratory and CBE:3155 Chemical Reaction Engineering/Separations Laboratory. It is equipped for experimentation in thermodynamics, fluid flow, heat transfer, mass transfer, chemical reaction engineering, and separations. The lab includes pilot plant equipment, such as a distillation column, wiped film evaporator, shell-and-tube heat exchanger, jacketed kettle, and agitated extractor. Other equipment includes a concentric tube heat exchanger, reciprocating plate extractor, membrane gas separator, fluid friction apparatus, and heat conduction apparatus. Analytical equipment includes gas chromatographs, UV-visible spectrophotometers, polarimeters, and refractometers.

The lab is continuously updated to reflect advances at the forefront of chemical engineering technology. Additionally, a wide array of small equipment is available to support laboratory projects and demonstrations in chemical engineering courses and for use by students performing independent investigations.

#### Chemical Process Safety Laboratory

The Chemical Process Safety Laboratory is an integral part of CBE:3125 Chemical Process Safety. It is equipped with two MiniFlash automatic flash point testers (closed cap), an advanced reactive system screening tool (ARSST), a minimum ignition energy (MIE) apparatus, a flammability chamber, a modified Hartmann tube, a Hartmann bomb, a liquid conductivity apparatus, a powder changeability apparatus, a powder volume resistivity apparatus, a Van de Graaff generator, two high impedance electrometers, a field meter, a Faraday cage, and relief sizing software. This equipment is used in a series of experiments to demonstrate the principles of flammability, reactivity, explosions, relief valve sizing, and electrostatics relevant to industry.

#### Biochemical Engineering Laboratory

The Biochemical Engineering Laboratory is an integral part of CBE:3205 Introduction to Biochemical Engineering. It is equipped with two controlled New Brunswick BioFlo/CelliGen 115 bioreactors, three New Brunswick C76 Water Bath Shakers, a UV-visible spectrometer, a Thermo Scientific NanoDrop 3300 fluorospectrometer, and a YSI 2700 Select Biochemistry Analyzer. This equipment is used to study the growth and metabolism of microorganisms and recombinant protein production.

#### Process Control Laboratory

The Process Control Laboratory is a modern, computer-based instructional laboratory that is integral to CBE:4105 Process Dynamics and Control in Design. The lab consists of computer control of a shell-and-tube heat exchanger and a level-and-flow control process rig with state-of-the-art industrial control interfaces.

The Computer Control Laboratory offers an ensemble of learning experiences with the same equipment. Additional laboratories provide instruction in the use of process

simulators that provide analogies and better insight into the control process. Topics include determination of the gain and time constants for single-capacitance systems; determination of gain, time constant, and damping factor of second-order processes; determination of open-loop and closed-loop response to step-and-ramp changes in input for single-capacitance and multicapacitance processes; approximations of multicapacitance systems as first- and second-order processes with dead time; analysis of instrumentation characteristics and transfer functions; tuning and optimization of feedback control parameters (P, PI, PID); system identification through frequency response methods; and determination of system stability.

Experimental arrangements in the lab are simple enough in design to be easily understood, yet complicated enough to help students appreciate system characteristics inherent in industrial processes (e.g., large time lags, error in parameter estimation).

## Graduate Facilities and Laboratories

The department offers a wide variety of facilities to support and develop research activities.

### Air Pollution Computational, Field, and Laboratory Studies

The department maintains extensive facilities for computational, field, and laboratory studies of air pollution, carbon cycle gases, aerosols, and nanoparticles at the Center for Global and Regional Environmental Research (CGRER). The center occupies 5,000 square feet of lab and office space on the fourth floor of the Iowa Advanced Technology Laboratories.

CGRER houses one R2 ImmersaDesk Portable Large Scale Visualization System and is linked on campus to two more R2 ImmersaDesk units.

The center's computer laboratory for environmental and spatial data analysis provides numerous Windows and UNIX workstations, sophisticated software packages, and workstations and a file server necessary to run intensive visualization programs. The network backbone is University supported with high-speed wireless throughout. A variety of digital environmental databases and an extensive library of documentation and related references are available. There are 4 Beowulf Linux clusters on site and Linux clusters of 4, 16, 18, and 20 nodes for large computations and data assimilation. CGRER retains 15 TB of redundant storage and 50 TB of total storage; local storage space is scalable and expandable. A variety of software packages and programming languages are available for data analysis and display, including ArcInfo, ArcView, NCAR Graphics, MATLAB, S-PLUS, and Vis5D, as well as geographical information software. The Esri software suite is part of a University-wide site license.

Laboratory and field equipment includes aerosol samplers, including scanning mobility particle sizers for aerosols from 3 nanometer to 1 micron with time resolution to 30 seconds; aerosol particle sizers for aerodynamic measurements of in situ particles with time resolution to 1 second; and varied condensation particle counters for measuring total particle counts. Several hygroscopic tandem differential mobility analyzers are used, as well as varied aerosol generation devices and unique aerosol inlets for relative humidity (RH) and temperature modification and control. Cloud droplet number can be measured in the lab or in the field using

a Droplet Measurement Technologies cloud condensation nuclei detector. Advanced computer control of instruments is available through LabVIEW.

Selected instruments are field deployable in a custom air-conditioned trailer. Through collaboration with the IHR—Hydroscience & Engineering, access to micrometeorology sensors, 1D and 2D elastic and Raman lidar, and gas sensors is available, including multichannel ammonia monitors.

## Biochemical Engineering

Biochemical engineering laboratories provide facilities for preparation of biological media and cultivation of organisms as well as for separation and analysis of biomolecules. This equipment includes biological incubators and floor incubator shakers, agitated and airlift bioreactors, light microscopes, autoclaves, Vi-Cell cell counter, thermocycler for polymerase chain reaction (PCR) amplification of DNA, high- and low-speed centrifuges, UV-Vis spectrophotometers, a lyophilizer, biological safety cabinets, and an anaerobic glove box. Phase-contrast and epifluorescence microscopes, gel electrophoresis systems, gas chromatography units with flame ionization and electron capture detectors, and several high performance liquid chromatography systems with refractive index and photodiode array detectors are available for characterization of microorganisms and constituent biomolecules.

Through collaborative research agreements, graduate students also have access to specialized facilities for electron microscopy, large-scale fermentation, protein structure, recombinant DNA research, and tissue culture/hybridoma; the Flow Cytometry Facility; and the High Resolution Mass Spectrometry Facility.

## Biomedical Engineering

The biomedical engineering laboratories house particle technology equipment including microemulsion equipment for drug encapsulation, sonicators, benchtop scale spray dryers, laser diffraction particle sizer, zetapotentiometer; DNA preparation equipment, gel electrophoresis apparatus; interfacial stress rheometer, surface tensiometer, UV-Vis/fluorescent plate reader, high performance liquid chromatograph, luminometer, lyophilizer, custom-built simulated cough machine, microscopes, incubators, wet chemistry equipment, rotary shakers, incubated plate shakers, autoclave, centrifuges, and laboratory computers. Cell culture and bacterial culture facilities are housed adjacent to the laboratories.

Graduate students also have access to core research facilities including the Central Microscopy Research Facility, Flow Cytometry Facility, Iowa Institute of Human Genetics, Electron Spin Resonance Facility, Nuclear Magnetic Resonance Facility, High Resolution Mass Spectrometry Facility, and the Center for Gene Therapy.

## Computer Facilities

The departmental computer facilities contain a variety of graphics workstations, printers, and microcomputers. The department is supported by the college's Engineering Technology Center, which maintains a large network of high performance UNIX and Windows XP workstations along with extensive commercial and public domain software. The department also has access to the University's central research facility in high-speed vector computation. This facility has SGI Power Challenge mini-supercomputers and provides nodes for external links for access to supercomputers.

## Fundamentals and Applications of Photopolymerization

The Photopolymerization Center was established to advance fundamental understanding of the kinetics and mechanisms of photopolymerizations. To this end, the center provides unique opportunities for collaborations by industrial and academic investigators to explore photopolymerization processes and develop novel applications based on photopolymerizations.

The center provides equipment and instrumentation for the characterization of photopolymerization systems on the molecular, microscopic, and macroscopic levels. Center researchers pursue understanding of fundamental photophysical and photochemical processes involved in the photoinitiation reaction, characterization of high-speed propagation and termination kinetics that lead to the polymer structure, and evaluation of material properties through the course of the photopolymerization reaction. Both radical and cationic photopolymerizations are studied with state-of-the-art experimental techniques to elucidate the complex chemical and physical mechanisms that control the initiation, propagation, and termination of the active centers.

### Courses

## Chemical and Biochemical Engineering Courses

### **CBE:0000 Chemical Engineering Internship/Co-op 0 s.h.**

Chemical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

### **CBE:1000 CBE Departmental Seminar 1 s.h.**

Introduction to the profession and the department; presentations by guest speakers, visits to laboratories and industries.

### **CBE:1180 First-Year Seminar 1 s.h.**

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

### **CBE:2030 Energy and Society 3 s.h.**

History of energy development and use throughout the world; how energy has affected the development of human societies; societal impact of engineering advances; current state of energy consumption worldwide, including distribution of energy sources, global variations in consumption, advantages and disadvantages of current energy sources; role of fossil fuel consumption in global climate change, potential scenarios for the future of energy.

### **CBE:2040 Environment, Energy, and Climate Change 3 s.h.**

Traditional concerns (e.g., pollution and conservation of energy resources) with clear, scientific explanations; Earth's dynamic processes and response to natural and human-induced stresses; link between energy and climate; reasons why we need to support reducing emissions and build a clean and sustainable environment.

### **CBE:2050 Severe and Unusual Weather 3 s.h.**

Basic weather concepts behind severe weather phenomena and essential safety information; how weather events cause billions of dollars in damage and thousands of casualties; winter storms can impact half of the nation, paralyzing the transportation network with icy roads and wind driven snow; tornadoes can strike within minutes tearing apart homes; hurricanes can destroy entire communities with strong winds, heavy rain, and deadly storm surge; how understanding severe weather and knowing what to do before, during, and after an event can significantly reduce injury, deaths, and property damage. Same as CEE:2050.

### **CBE:2105 Process Calculations 3 s.h.**

Fundamental principles of chemical process analysis, including material and energy balances for single-unit and multiple-unit processes, analysis of reactive and nonreactive systems, introduction to equations of state, thermodynamics of multiphase systems. Prerequisites: MATH:1550.

### **CBE:2110 Computational Tools for Chemical Engineers 2 s.h.**

Numerical methods for solving systems of linear and nonlinear equations, nonlinear regression, multivariable calculus, and ordinary differential equations using chemical engineering examples. Prerequisites: MATH:1550. Corequisites: MATH:1560.

### **CBE:3000 Professional Seminar: Chemical Engineering 1 s.h.**

Professional aspects of chemical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Prerequisites: CBE:2105. Requirements: sophomore standing.

### **CBE:3020 Applied Statistics for Chemical and Natural Resources Engineering 3 s.h.**

Statistical and computational (Python programming) analysis of weather and climate data, univariate and multivariate statistics, hypothesis testing, statistical forecasting, forecast verification, time-series analysis, trend analysis, and principal component analysis.

### **CBE:3105 Chemical Engineering Thermodynamics 3 s.h.**

Applications of thermodynamic principles to chemical and physical processes; prediction of material properties; phase and chemical equilibria applied to mixtures and reacting systems. Prerequisites: ENGR:2130. Corequisites: CBE:2105.

### **CBE:3109 Fluid Flow 2 s.h.**

Fundamentals of fluid flow, including fluid statics, fluid rheology, laminar and turbulent flow in pipes, external flow, flow through packed beds, fluidized beds, pumps and compressors, boundary layer theory, potential flow, dimensional analysis, and Navier Stokes Equations. Corequisites: CBE:2105.

### **CBE:3113 Heat and Mass Transfer 3 s.h.**

Fundamentals of heat and mass transfer including heat exchanger design; conductive, convective, and radiative heat transfer; mechanisms of diffusional and convective mass transfer. Prerequisites: MATH:2560 and CBE:2105. Recommendations: CBE:3109.

### **CBE:3117 Separations 3 s.h.**

Solution of industrial problems including design of distillation, extraction, absorption, adsorption, drying, membrane processes, and mechanical separations. Prerequisites: CBE:2105 and CBE:3105. Corequisites: CBE:3113.

**CBE:3120 Chemical Reaction Engineering 3 s.h.**

Application of chemical reaction kinetics to design of chemical reactors: batch reactors, mixed flow reactors, plug flow reactors; reversible and irreversible single reactions; parallel, series, and mixed reactions; temperature and pressure effects on reactor design; heterogeneous catalysis; transport in porous catalysts. Prerequisites: MATH:2560. Corequisites: CBE:3105. Recommendations: CBE:3113.

**CBE:3125 Chemical Process Safety 3 s.h.**

Application of transport phenomena, thermodynamics, chemical kinetics to study of safety, health, loss prevention; government regulations, toxicology/industrial hygiene, relief sizing, runaway reactions, toxic release and dispersion models, source models, fires and explosions, risk assessment, hazard identification, case studies and accident investigation, incorporation of safety into design; laboratory experiments. Prerequisites: CBE:3105 and CBE:3109. Corequisites: CBE:3113.

**CBE:3150 Thermodynamics/Transport Laboratory 3 s.h.**

Error analysis, propagation of errors, experimental design, data collection techniques, report writing, oral presentations, laboratory safety; laboratory investigations of thermodynamics, fluid flow, heat transfer, fluid rheology. Prerequisites: CBE:3105 and CBE:3113. Recommendations: statistics course.

**CBE:3155 Chemical Reaction Engineering/Separations Laboratory 3 s.h.**

Experimental design, data collection techniques, report writing, oral presentations; laboratory investigations of chemical reaction engineering and separations; experiments with plug flow and batch reactors, distillation, evaporation, membrane separation. Prerequisites: CBE:3117. Corequisites: CBE:3120. Recommendations: STAT:2020.

**CBE:3205 Introduction to Biochemical Engineering 3 s.h.**

Biochemistry, cellular biology, recombinant DNA and hybridoma technologies; emphasis on engineering aspects of biotechnology, including enzyme kinetics, cell growth kinetics, transport phenomena in bioreactors, bioreactor design, bioseparations, formulation and sterilization of growth media, commercial applications of biotechnology. Prerequisites: CBE:2105. Corequisites: CBE:3109. Recommendations: CBE:3120.

**CBE:3415 Statistical and Computational Analysis of Weather and Climate Data 3 s.h.**

Statistical and computational (Python programming) analysis of weather and climate data, univariate and multivariate statistics, hypothesis testing, statistical forecasting, forecast verification, time-series analysis, principal component analysis, trend analysis, and cluster analysis. Requirements: senior or graduate standing.

**CBE:3998 Individual Investigations: Chemical Engineering arr.**

Individual projects for chemical engineering undergraduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

**CBE:4105 Process Dynamics and Control in Design 3 s.h.**

Theory and application of process dynamics to the design of chemical process control systems; mathematical models of unit operations, transfer functions, feedback and feed-forward control, stability, instrumentation, digital control systems; computer methods, including simulation and commercial software use; laboratory focus on process analysis and design. Prerequisites: MATH:2560 and CBE:2105 and CBE:3109. Corequisites: CBE:3120.

**CBE:4109 Chemical Engineering Process Design I 2 s.h.**

Engineering economics of process evaluation, including time value of money and bases for cost estimation; preliminary design of chemical process plants using computer-aided engineering. Prerequisites: CBE:3109 and CBE:3113 and CBE:3117. Corequisites: CBE:3120 and CBE:3125.

**CBE:4110 Chemical Engineering Process Design II 3 s.h.**

Capstone chemical engineering course; design and optimization of chemical process plants; application of process calculations, thermodynamics, kinetics, process synthesis, energy efficiency in separations, heat-exchanger network synthesis, physical property estimation, safety, computer-aided design, unit operations theory, process control, and economics. Prerequisites: CBE:4109. Recommendations: CBE:4105 and CBE:3205.

**CBE:4125 Advanced Chemical Process Safety 3 s.h.**

Chemical process safety including qualitative and quantitative hazard analysis, risk and consequence analysis, human factors and operator error, incident investigation, management of change procedures, interlocks and safety instrumented systems, layer of protection analysis, dust hazard analysis, and process safety management; project based on laboratory experiments. Prerequisites: CBE:3125.

**CBE:4156 Scanning Electron Microscopy and X-Ray Microanalysis arr.**

Microscopy methods for research; all aspects of research, from sample preparation to imaging to data analysis; when to use a particular microscopy procedure; theory, operation, and application of scanning electron microscopy, scanning probe microscopy, laser scanning microscopy, X-ray microanalysis. Requirements: a physical science course. Same as ACB:4156, EES:4156.

**CBE:4195 Senior Enriching Activities Seminar 0 s.h.**

Aspects of chemical engineering education, including multidisciplinary team skills, understanding the impact of engineering practice locally and globally. Corequisites: CBE:4110. Requirements: completion of enriching activity.

**CBE:4410 Sustainable Systems 3 s.h.**

New and emerging concepts in sustainable systems design and assessment. Same as CEE:4107.

**CBE:4420 Environmental Chemistry 3 s.h.**

Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisites: CHEM:1120. Same as CEE:4150.

**CBE:4459 Air Pollution Control Technology 3 s.h.**

Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Same as CEE:4159, IGPI:4159.

**CBE:5000 Seminar in Chemical and Biochemical Engineering 1 s.h.**

Presentation and discussion of recent advances and research in chemical and biochemical engineering by guest lecturers, faculty, students. Requirements: graduate standing.

- CBE:5100 Graduate Professional Development Seminar** 1 s.h.  
Seminar participants work with a faculty member to select and attend eight hours of approved seminars and professional development trainings at the University of Iowa; final meeting of participants is held to share notable seminars; typical seminar series include College of Engineering lectures, departmental and research center graduate seminars, the CBE professional seminar series, offerings of the Center for Teaching and Learning. Requirements: CBE masters standing.
- CBE:5104 Introduction to Literature Review and Technical Writing** 3 s.h.  
Review of technical literature, how to contribute to it; produce and present orally a peer-reviewed-journal-quality review article; brainstorming, group writing, research ethics, plagiarism. Recommendations: nonthesis track graduate standing.
- CBE:5105 Introduction to Literature Review and Proposal Writing** 3 s.h.  
Tools for reviewing literature, skills for critical reading of publications, training in successful proposal writing; experience drafting a proposal that can be used as a starting point for the Ph.D. comprehensive.
- CBE:5110 Intermediate Thermodynamics** 3 s.h.  
Fundamental principles of thermodynamics as applied to phase equilibrium; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Requirements: CBE:3105 or ME:3040 or graduate standing. Same as ME:5210.
- CBE:5115 Transport Phenomena I** 3 s.h.  
Unified treatment of momentum, mass, energy transport in chemical engineering problems; use of vector and tensor notations in expressing equations of continuity, motion, energy.
- CBE:5120 Data Science in Chemical and Engineering Systems** 3 s.h.  
Theory and application of numerical methods and data driven algorithms towards understanding chemical processes; scientific computing in Python programming language; numerical solutions to differential equations; nonlinear and constrained optimization; data preprocessing and visualization; dimensionality reduction and clustering; supervised machine learning.
- CBE:5140 Mathematical Methods in Engineering** 3 s.h.  
Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: MATH:2550 and MATH:2560. Same as CEE:5513, ME:5113.
- CBE:5199 Contemporary Topics: Chemical and Biochemical Engineering** arr.  
Research techniques for graduate students in chemical and biochemical engineering.
- CBE:5210 Bioseparations** 3 s.h.  
Unit operations used to isolate and purify biologically derived chemicals, including flocculation, filtration, centrifugation, extraction, adsorption, chromatography, precipitation, crystallization, electrophoresis and cell disruption for intracellular product recovery.
- CBE:5300 Drug Delivery Devices** 3 s.h.  
Why drug delivery devices are needed and how they are regulated; review of several clinical device categories (inhalation, transdermal, implantable) and preclinical technologies on the horizon.
- CBE:5310 Polymer Science and Technology** 3 s.h.  
Uses and properties of industrially important polymeric materials; polymer chemistry, polymer structure, characterization, and polymer processing. Prerequisites: CHEM:2210 or CHEM:2230.
- CBE:5315 Polymer Chemistry** 3 s.h.  
Monomer reactivity and polymerization reactions; step, radical, ionic, and ring-opening polymerizations. Prerequisites: CHEM:2220.
- CBE:5390 Photopolymerization Topics** 0,2 s.h.  
Seminars presented by faculty members, research assistants, students.
- CBE:5405 Green Chemical and Energy Technologies** 3 s.h.  
Strategies for pollution prevention for chemical processes studied at macroscale (industrial sector), mesoscale (unit operations), and microscale (molecular level); case studies. Prerequisites: CBE:2105.
- CBE:5410 Electrochemical Engineering** 3 s.h.  
Fundamentals of electrochemical engineering; various applications; focus on processes and systems that transform chemical energy into electrical energy (e.g., batteries, fuel cells) and vice versa (e.g., electrolyzers, oxygen generators for medical applications); electrochemical engineering in an increasingly important role in energy, chemical, environmental, and biomedical sectors.
- CBE:5412 Atmospheric Modeling** 3 s.h.  
Model equations and approaches for atmospheric dynamics and chemistry; numerical methods for radiative, chemical, and aerosol rates; parameterization of subgrid-scale processes; model evaluation and inverse modeling.
- CBE:5415 Satellite Image Processing and Remote Sensing of Atmosphere** 3 s.h.  
Introduction to principles of atmospheric radiation and techniques for satellite image processing; hands-on experience with data calibration, image registration and enhancement, noise filtering and (supervised and unsupervised) multi-spectral classification of satellite imageries; various satellite sensors used for monitoring of different atmospheric processes and constituents. Same as IGPI:5415.
- CBE:5417 Physical Meteorology and Atmospheric Radiative Transfer** 3 s.h.  
Physical processes for weather and climate including radiative transfer, cloud and precipitation formation, and atmospheric electricity; theory of scattering by atmospheric particles (e.g., clouds, aerosols, molecules), atmospheric radiative transfer equations, and numerical techniques and tools to solve these equations. Requirements: senior or graduate standing. Same as IGPI:5417.
- CBE:5425 Atmospheric Chemistry and Physics** 3 s.h.  
Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources, and removal processes. Corequisites: CBE:3120. Same as CEE:5115.

**CBE:5740 Engineering Principles of Drug Delivery 3 s.h.**

Fundamental concepts in drug delivery from an engineering perspective: delivery mechanisms; materials and formulations for drug delivery; drug modifications (prodrugs, PEGylation); engineering principles of controlled release and targeted delivery (nanoparticles, microparticles, polymer and lipid based systems); quantitative understanding of drug transport; significance of biodistributions and pharmacokinetic models; toxicity issues; immune responses.

**CBE:5875 Perspectives in Biocatalysis 1-3 s.h.**

Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BIOC:5875, CEE:5875, CHEM:5875, MICR:5875, PHAR:5875.

**CBE:5998 Individual Investigations: Chemical and Biochemical Engineering arr.**

Individual projects for chemical and biochemical engineering graduate students; may include laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

**CBE:5999 M.S. Thesis Research: Chemical and Biochemical Engineering arr.**

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in chemical and biochemical engineering. Requirements: graduate standing.

**CBE:6145 Diffusive Transport 3 s.h.**

Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies; analytical and numerical solution techniques; inverse heat conduction; multiphase and multicomponent systems. Prerequisites: ME:5145. Same as ME:6245.

**CBE:6415 Advanced Satellite and Remote Sensing of Atmosphere 3 s.h.**

Cloud masking and retrieval of cloud properties from satellites, aerosol detection and retrievals, Earth radiation energy budget, land and/or ocean remote sensing, microwave remote sensing, wind retrieval, multi-sensor intercomparison and validation, optimization and inversion theory; hands-on projects.

**CBE:6435 Advanced Atmospheric Radiative Transfer 3 s.h.**

Theory of scattering by atmospheric particles (e.g., clouds, aerosols, molecules), atmospheric radiative transfer equations, and techniques to solve these equations for solar and terrestrial radiation; numerical experiments with Mie scattering, T-matrix calculation, and radiative transfer models.

**CBE:7999 Research: Chemical and Biochemical Engineering Ph.D. Dissertation arr.**

Experimental and/or analytical investigation of an approved topic for Ph.D. in chemical and biochemical engineering.

# Chemical Engineering, B.S.E.

## Educational Objectives

The chemical engineering program produces graduates with a strong foundation of scientific and technical knowledge who are equipped with problem-solving, teamwork, and communication skills that will serve them throughout their careers consistent with the following educational objectives. Within a few years following graduation, graduates will:

- attain careers as practicing chemical engineers in fields such as biotechnology, chemicals, computation, energy, environmental engineering, food processing, microelectronics, pharmaceuticals, or polymers/advanced materials;
- pursue advanced studies in disciplines such as business, chemical engineering, dentistry, environmental engineering, law, medicine, or pharmaceuticals; or
- assume professional leadership roles.

The following methods and strategies are used in the chemical engineering undergraduate program to achieve these program educational objectives:

- foster a unique and personalized undergraduate experience by leveraging the advantages of a small college atmosphere within a comprehensive liberal arts and research university;
- provide a diverse, inclusive, and equitable environment for all students;
- enrich the undergraduate experience through cultural diversity, international opportunities, and/or experiential learning;
- provide a solid foundation and understanding of the fundamental principles of mathematics, science, and engineering;
- provide students with experience in learning and applying tools, and analyzing and interpreting data, to solve theoretical and open-ended chemical engineering problems;
- provide students with opportunities to participate in collaborative teams;
- develop students' written and oral communication skills to a wide range of audiences;
- provide students with opportunities to design and conduct chemical engineering experiments and to design systems, components, and chemical processes to meet specific needs and constraints;
- provide a contemporary grounding in ethical and professional responsibility, including global, economic, environmental, safety, and societal impacts of engineering decisions; and
- instill the desire and the understanding of the need for lifelong learning.

## Requirements

The Bachelor of Science in Engineering requires a minimum of 128 s.h. of credit. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

Seminars do not count toward the 128 s.h. required for the degree.

The major in chemical engineering provides a broad education at the leading edge of technology. It emphasizes fundamental concepts, problem solving, laboratory techniques, and communication skills. The biological sciences join physics, chemistry, and mathematics as foundation disciplines for chemical engineering.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric; ENGR:1100 Introduction to Engineering Problem Solving and ENGR:1300 Introduction to Engineering Computing; and courses in chemistry, physics, engineering mathematics and fundamentals, and the general education component. For information about the B.S.E. requirements, see Bachelor of Science in Engineering, B.S.E. [p. 1468] in the Catalog.

The sophomore, junior, and senior years emphasize chemical engineering courses such as process calculations, fluid flow, chemical engineering thermodynamics, heat and mass transfer, separations, chemical reaction engineering, chemical process safety, chemical engineering laboratories, biochemical engineering, process dynamics and control, and process design. Experience in instrumentation, analysis, and design is obtained through an integrated laboratory program. Routine use is made of computer-based data analysis, simulation, and design.

Students are required to participate in at least one enriching activity, which may include a research experience, a cooperative education or internship experience, study abroad, completion of the Certificate in Technological Entrepreneurship [p. 1585], or other approved experiences.

Chemical engineering students may gain depth of knowledge related to a career path through their selection of science, engineering, and general education electives. Several preapproved focus areas may help students define potential careers.

Students must select focus area courses according to guidelines established by the Department of Chemical and Biochemical Engineering. See "Focus Area" below.

## Focus Area

The focus area enables students to gain depth of knowledge in a career path. Students meet with their chemical engineering academic advisor to discuss career options and develop a plan for choosing electives based on their career interests. The department offers preapproved focus areas in biochemical engineering; business; chemical process engineering; computation, data science, and machine learning; energy and environment; entrepreneurship; oil and gas engineering; pharmaceuticals; polymers; pre-medicine; and sustainability.

Students may prefer to develop an individualized focus area, which is subject to approval by the department's curriculum committee. See Chemical Engineering Curriculum on the Department of Chemical and Biochemical Engineering website for detailed descriptions of preapproved focus areas, guidelines for tailored focus areas, and typical four-year study plans based on focus areas.

## Biochemical Engineering

This focus area allows students to choose from a selection of courses that combines concepts of biology, biochemistry, and engineering. Biochemical engineers combine knowledge of these three areas to manufacture products of biological

nature, including fermentation products and pharmaceuticals. Students often go on to work in the biotechnology and pharmaceutical industries as production leaders or researchers.

## Business

This focus area consists of eight core courses from the Tippie College of Business. Students gain foundational business knowledge on topics including finance, economics, accounting, marketing, law, and management. Past students have applied their integrated business and technical knowledge to many different settings ranging from manufacturing plants to consulting and to corporate offices.

## Chemical Process Engineering

Process engineering is the design, optimization, and operation of systems that transform raw materials into valuable products. Process engineers are involved with products, including foods and beverages, electronic materials, metals, plastics, fuels, building materials, and pharmaceuticals. Since chemical process engineering spans many aspects of engineering, business, applied math, and science, students can choose 12 s.h. of electives from a broad selection of 3000-level engineering, math, and science courses. This focus area provides ample room for customization and opportunities to tailor to individualized interests.

Students who do not declare a specific focus area are automatically placed in chemical process engineering.

## Computation, Data Science, and Machine Learning

This focus area is for students who intend to blend advanced computation and programming with their chemical engineering degree. This area is customizable based on student interest areas, and can accommodate introductory training in cyber-physical systems, remote sensing, advanced simulation, supply chain management, in silico chemistry and biology, bioinformatics, software design, next-generation controls, machine learning, and artificial intelligence.

## Energy and Environment

Students who are passionate about the environment should consider this focus area. Courses prepare students to solve environmental challenges and to revolutionize energy systems. Topics include air pollution, climate change, clean and renewable energy, environmental regulations, and sustainable systems.

## Entrepreneurship

This focus area allows students to focus on the process of succeeding in the world of startups, innovation, business ownership, and new products. The area is well suited for students who intend to start and operate their own business. It also serves students interested in gaining a better understanding of managing innovation in an existing business environment. The wide range of electives permits students to tailor business courses best suited to their individual interests.

## Oil and Gas Engineering

Meant for students interested in pursuing careers in oil and gas engineering, this focus area explores foundational elements of chemistry, geology, petrochemical refining, and environmental science. The course plan offers several recommendations put in place by experienced advisors with petrochemical backgrounds. Often viewed as the

birth of chemical engineering, the petroleum industry provides a host of challenging and lucrative opportunities for chemical engineers. This path provides a unique and focused introduction to the field.

## Pharmaceuticals

Chemical and biochemical engineering is central to the design, formulation, and manufacturing of pharmaceutical products. Students who are passionate about medical applications can align their chemical engineering skills toward a career in pharmaceuticals by choosing this focus area. The curriculum features biology, drug delivery, and the mechanisms and chemistry of drug interactions. Course options span many departments besides chemical and biochemical engineering, including biomedical engineering, biochemistry and molecular biology, pharmacy, and pharmacology.

## Polymers

This focus area enables students to study the development of chemical compounds by polymerization, including combining small molecules into engineered networks to produce valuable plastics and other advanced materials. The program is well suited for students who intend to use their knowledge to design new materials; it also serves students interested in gaining a better understanding of the links between molecular scale structure and macroscopic scale properties.

## Pre-Medicine

Concepts of chemical engineering are naturally applicable to the processes in living organisms. This focus area enables students to apply these concepts to gain a deeper understanding of the atoms and molecules that comprise living organisms, and the pathways through which they operate. This program is for students who intend to use their knowledge to gain acceptance to post-graduate education in the medical field.

## Safety and Health

This focus area prepares students to (1) prevent incidents and accidents in chemical and pharmaceutical manufacturing, particularly those resulting from the unintentional release of hazardous materials and energy into the environment; and (2) provide a safe and healthy workplace by preventing injuries and hazards in the workplace environment.

## Sustainability

This focus area covers the most important and current topics in environmental science, societal impacts, energy usage, and natural systems. Courses prepare students to understand and discuss these topics as they relate to chemical engineering.

## Combined Programs

### B.S.E./M.S. in Chemical and Biochemical Engineering

The College of Engineering offers a combined Bachelor of Science in Engineering/Master of Science for chemical engineering undergraduate students who intend to earn a M.S. in chemical and biochemical engineering. B.S.E./M.S. students may count 12 s.h. of coursework (typically advanced chemistry sequences and electives) toward both degrees. Once students complete the requirements for the bachelor's

degree, they are granted the B.S.E., and they typically complete the M.S. one year later.

To be admitted to the degree program, students must have a cumulative g.p.a. of at least 3.25, and submit a letter of application and statement of purpose to the chair of the Department of Chemical and Biochemical Engineering. Visit U2G Programs on the department's website to learn more.

## B.S.E./M.S. in Civil and Environmental Engineering

Bachelor of Science in Engineering students majoring in chemical engineering who are interested in earning a Master of Science in civil and environmental engineering may apply to the combined B.S.E./M.S. program offered by the College of Engineering. The combined program enables undergraduate students to begin work on the M.S. degree while completing their B.S.E. degree. Students admitted to the program may count 9 s.h. of coursework toward both the B.S.E. and the M.S. degree requirements. They also may count an additional 3 s.h. toward the M.S. degree requirements before they have been awarded the B.S.E. degree. For more information, see the M.S. in civil and environmental engineering [p. 1513] in the Catalog.

### Career Advancement

Chemical and biochemical engineers work in a wide range of industries, including petroleum and specialty chemical production, polymer and plastic production, food processing, energy, microelectronics production, pharmaceutical production, biochemical processing, and environmental compliance. Potential jobs include production, process development, plant design and construction, and fundamental research. Many experienced chemical and biochemical engineers move through management ranks to high-level administrative positions. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE).

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

### Academic Plans

#### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and

should be discussed with an academic advisor. For additional sample plans, see MyUI.

Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall) <sup>r</sup>

<b>Hours</b>		<b>15</b>
<b>Total Hours</b>		<b>134</b>

- a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.
- b Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.
- c Enrollment in math courses requires completion of a placement exam.
- d Enrollment in chemistry courses requires completion of a placement exam.
- e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- f Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

- g Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI; see the College of Engineering General Education Component website for more information. Some focus areas may suggest or require specific courses to fulfill the Be Creative requirement; see the chemical and biochemical engineering website or consult an advisor for more information.
- h CHEM:2210 typically is offered in fall, spring, and summer sessions. CHEM:2230 typically is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- i Students select a course from the GE CLAS Core Diversity and Inclusion area.
- j CBE:3020 typically is offered in spring semesters only. STAT:2020 typically is offered in fall, spring, and summer sessions. STAT:3510 typically is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.
- k CHEM:2220 typically is offered in fall, spring, and summer sessions. CHEM:2240 typically is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- l CHEM:2410 typically is offered in fall, spring, and summer sessions. CHEM:2420 typically is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- m Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- n A full list of approved course subjects can be found on the College of Engineering General Education Component website. Some focus areas may suggest or require specific courses to fulfill the General Education Component. See the chemical and biochemical engineering website or consult an advisor for more information.
- o Students choose one of many preexisting focus areas or work with an advisor to develop a custom focus area. Some focus areas may suggest or require specific courses to fulfill the General Education Component, advanced chemistry, or advanced science courses. See the chemical and biochemical engineering website or consult an advisor for more information.
- p The advanced chemistry course must have a course subject of CHEM or BIOC. Some focus areas may suggest or require specific courses to fulfill the advanced chemistry requirement. See the chemical and biochemical engineering website or consult an advisor for more information.
- q The advanced science course may be fulfilled with science-based courses offered in the College of Engineering or in science departments outside of the College of Engineering. Some focus areas may suggest or require specific courses to fulfill the advanced science requirement. See the chemical and biochemical engineering website or consult an advisor for more information.
- r Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Chemical and Biochemical Engineering, M.S.

The Department of Chemical and Biochemical Engineering provides a stimulating academic community where students engage in a highly personalized learning and research environment. The Master of Science program provides students with opportunities to obtain specialized knowledge and expertise through advanced coursework in chemical engineering and related disciplines, to engage in interdisciplinary research opportunities (thesis option), and to impact their communities through service learning. The department emphasizes research, since most opportunities for graduates are in research and development.

Faculty within the department have focused research projects in biological and pharmaceutical systems, clean energy and catalysis, air quality and climate, polymeric and advanced materials, quantum chemical simulation, and remote sensing; see Graduate Program on the Department of Chemical and Biochemical Engineering website.

## Requirements

The Master of Science program in chemical and biochemical engineering requires a minimum of 30 s.h. in approved graduate courses with or without thesis, plus 3-5 s.h. of required seminars (nonthesis and Undergrad to Grad students complete 3 s.h.; thesis students complete 3-5 s.h.). Students who pursue the thesis option may earn up to 6 s.h. in CBE:5999 M.S. Thesis Research: Chemical and Biochemical Engineering. All students must maintain a cumulative g.p.a. of at least 3.00.

Students who receive assistantships, fellowships, or other awarded financial support are expected to pursue an advanced degree with thesis.

The M.S. with a major in chemical and biochemical engineering requires the following coursework.

All students select one course in each of the areas below. They must earn a cumulative g.p.a. higher than 3.25 in those courses. Students earn the remainder of credit for the degree in elective courses and research.

## Transport Phenomena

Code	Title	Hours
One of these:		
CBE:5115	Transport Phenomena I	3
Alternate courses approved on a case-by-case basis, and may include:		
BME:5430	Biotransport	3
ME:5143	Computational Fluid and Thermal Engineering	3

Another course with consent of advisor

## Chemical Thermodynamics

Code	Title	Hours
One of these:		
CBE:5110	Intermediate Thermodynamics	3

Alternate courses approved on a case-by-case basis, and may include:

A 5000-level thermal physics course  
Another course with consent of advisor

## Chemical Reaction Kinetics

Code	Title	Hours
One of these plus corresponding undergraduate chemical reaction engineering:		
CBE:3205	Introduction to Biochemical Engineering	3
CBE:5315	Polymer Chemistry	3
CBE:5425	Atmospheric Chemistry and Physics	3

## Technical Communication

Code	Title	Hours
One of these:		
CBE:5104	Introduction to Literature Review and Technical Writing (nonthesis students)	3
CBE:5105	Introduction to Literature Review and Proposal Writing (thesis students)	3

## Data Science

Code	Title	Hours
This course:		
CBE:5120	Data Science in Chemical and Engineering Systems	3

## Additional Requirements

All thesis students must take ENGR:7270 Engineering Ethics (1 s.h.) during their first semester and CBE:5000 Seminar in Chemical and Biochemical Engineering (1 s.h.) each semester in residence. Nonthesis students must take CBE:5100 Graduate Professional Development Seminar (1 s.h.) in each of their final two semesters in the program.

Students in the nonthesis program may petition for entry into the thesis program or the Ph.D. program by requesting a change of status through the Graduate College. The request is reviewed by the Graduate Admissions Committee. If approved by the committee, the request is forwarded to the chemical and biochemical engineering faculty for final approval. Students then are assigned to research advisors as though they are newly admitted graduate students. For a detailed description of program requirements, see Graduate Program on the Department of Chemical and Biochemical Engineering website.

All students must pass a final examination.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must provide the following:

- Completed application form.
- Unofficial transcript(s). If admitted, official transcripts are required before enrollment. For international students, all academic records should bear the original stamp or seal of the institution and the signature of a school official. Documents not in English must be accompanied by a

complete, literal, English translation, certified by the issuing institution.

- Official Graduate Record Examination (GRE) General Test scores (verbal and quantitative) from Educational Testing Services (the University's institutional code is 6681) or International English Language Testing System (IELTS).
- Statement of purpose.
- Three letters of recommendation.
- Test of English as a Foreign Language (TOEFL) scores for applicants whose first language is not English.

Applicants should have a B.S. degree in chemical engineering or a related discipline with satisfactory grades from a recognized college or university in the United States and a cumulative g.p.a. of at least 3.00 on a 4.00 scale. Graduates of non-U.S. universities may be accepted, depending on evaluation of their records. Applicants who do not meet these requirements may be granted conditional admission by the Graduate Admissions Committee.

Graduate courses in chemical and biochemical engineering are designed for students who have an undergraduate background in chemical engineering. Exceptional students from other areas also may apply for admission. If admitted, they may be required to take specific undergraduate courses to prepare them for graduate coursework.

## Financial Support

Full financial support is available to admitted M.S. thesis students in the form of teaching assistantships, research assistantships, and fellowships. The department provides up to two years of support for all full-time M.S. thesis students who are making normal progress toward the degree, exhibit satisfactory performance in all duties, and maintain appropriate professional conduct. Students admitted to the nonthesis M.S. or Undergrad to Grad (U2G) programs are not guaranteed department financial support.

## Career Advancement

Chemical and biochemical engineers work in a wide range of industries, including petroleum and specialty chemical production, polymer and plastic production, food processing, energy, microelectronics production, pharmaceutical production, biochemical processing, and environmental compliance. Potential jobs include production, process development, plant design and construction, and fundamental research. The engineering profession also is a foundation for a variety of careers in medicine, law, government, and consulting. Many experienced chemical and biochemical engineers move through management ranks to high-level administrative positions. Faculty mentors assigned to graduate students aid in their professional development. Students are exposed to opportunities through seminar speakers who have relevant expertise and are invited to campus.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development. Engineering Career Services also offers individual advising and class presentations on résumé and

cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

The Graduate College offers numerous career advancement opportunities and professional development programs for graduate students. For ongoing program offerings, news, and announcements, see Grad Success Center on the Graduate College website.

# Chemical and Biochemical Engineering, Ph.D.

The Department of Chemical and Biochemical Engineering provides a stimulating academic community where students engage in a highly personalized learning and research environment. The Doctor of Philosophy program provides students with opportunities to obtain specialized knowledge and expertise through advanced coursework in chemical engineering and related disciplines, to engage in interdisciplinary research opportunities, and to impact their communities through service learning. The department emphasizes research, since most opportunities for graduates are in research and development.

Faculty within the department have focused research projects in biological and pharmaceutical systems, clean energy and catalysis, air quality and climate, polymeric and advanced materials, quantum chemical simulation, and remote sensing; see Graduate Program on the Department of Chemical and Biochemical Engineering website.

## Requirements

The Doctor of Philosophy program in chemical and biochemical engineering requires a minimum of 72 s.h. of graduate credit. However, the degree is granted primarily on the basis of achievement rather than on the accumulation of semester hours. Students typically are expected to have completed three academic years in residence, or two years if they already hold a recognized master's degree. Students must maintain a cumulative g.p.a. of at least 3.25.

All students must complete a core curriculum, which consists of one course in transport phenomena, chemical thermodynamics, chemical reaction kinetics, technical communication, and data science plus five additional courses (total of 30 s.h.).

The Ph.D. with a major in chemical and biochemical engineering requires the following coursework.

## Transport Phenomena

Code	Title	Hours
One of these:		
CBE:5115	Transport Phenomena I	3
Alternate courses approved on a case-by-case basis, and may include:		
BME:5430	Biotransport	3
ME:5143	Computational Fluid and Thermal Engineering	3

Other courses with consent of advisor

## Chemical Thermodynamics

Code	Title	Hours
One of these:		
CBE:5110	Intermediate Thermodynamics	3

Alternate courses approved on a case-by-case basis, and may include:

A 5000-level thermal physics course

Other courses with consent of advisor

## Chemical Reaction Kinetics

Code	Title	Hours
One of these:		
CBE:3205	Introduction to Biochemical Engineering	3
CBE:5315	Polymer Chemistry	3
CBE:5425	Atmospheric Chemistry and Physics	3

## Technical Communication

Code	Title	Hours
This course:		
CBE:5105	Introduction to Literature Review and Proposal Writing	3

## Data Science

Code	Title	Hours
This course:		
CBE:5120	Data Science in Chemical and Engineering Systems	3

## Additional Requirements

All students are required to take ENGR:7270 Engineering Ethics (1 s.h.) during their first semester and CBE:5000 Seminar in Chemical and Biochemical Engineering every semester in residence. Students earn the remainder of credit for the degree in elective courses and research.

Students are required to satisfy a qualifying requirement with a minimum g.p.a. of at least 3.50 in the four core courses and pass a comprehensive examination before they can become candidates for degree. The comprehensive examination is the presentation and defense of the candidate's research proposal. These examinations are arranged by members of the examining committee and may be repeated at the committee's discretion. Comprehensive examination policies are published in the Manual of Rules and Regulations on the Graduate College website. A final examination, which is a defense of the thesis, completes the doctoral program.

For a detailed description of program requirements, see Graduate Program on the Department of Chemical and Biochemical Engineering website.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in chemical and biochemical engineering in a combined degree program offered by the College of Engineering and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must provide the following:

- Completed application form.
- Unofficial transcript(s). If admitted, official transcripts will be required before enrollment. For international students, all academic records should bear the original stamp or seal of the institution and the signature of a school official. Documents not in English must be accompanied by a complete, literal, English translation, certified by the issuing institution.
- Official Graduate Record Examination (GRE) General Test scores (verbal and quantitative) from Educational Testing Services (the University's institutional code is 6681) or International English Language Testing System (IELTS).
- Statement of purpose.
- Three letters of recommendation.
- Test of English as a Foreign Language (TOEFL) scores for applicants whose first language is not English.

Applicants should have a B.S. degree in chemical engineering or a related discipline with satisfactory grades from a recognized college or university in the United States and a cumulative g.p.a. of at least 3.00 on a 4.00 scale. Graduates of non-U.S. universities may be accepted, depending on evaluation of their records. Applicants who do not meet these requirements may be granted conditional admission by the Graduate Admissions Committee.

Graduate courses in chemical and biochemical engineering are designed for students who have an undergraduate background in chemical engineering. Exceptional students from other areas also may apply for admission. If admitted, they may be required to take specific undergraduate courses to prepare them for graduate coursework.

## Financial Support

Full financial support is available to admitted Ph.D. students in the form of teaching assistantships, research assistantships, and fellowships. The department provides up to five years of support for all full-time Ph.D. students that are making normal progress toward the degree, exhibit satisfactory performance in all duties, and maintain appropriate professional conduct.

## Career Advancement

The Ph.D. program is designed to equip students with the skills to pursue a career in industry, academia, or government. Faculty mentors assigned to graduate students aid in their professional development. Students are exposed to opportunities through seminar speakers who have relevant expertise and are invited to campus.

The Graduate College offers numerous career advancement opportunities and professional development programs for graduate students. For ongoing program offerings, news, and announcements, see Grad Success Center on the Graduate College website.

# Civil and Environmental Engineering

## Chair

- A. Allen Bradley Jr.

**Undergraduate majors:** civil engineering (B.S.E.); environmental engineering (B.S.E.)

**Graduate degrees:** M.S. in civil and environmental engineering; Ph.D. in civil and environmental engineering

**Faculty:** <https://cee.engineering.uiowa.edu/people>

**Website:** <https://cee.engineering.uiowa.edu/>

Civil and environmental engineering is one of the three largest fields of engineering. It traditionally has been concerned with infrastructure facilities that are both large in scale and essential to modern life. Civil and environmental engineering projects include transportation systems and their components, such as bridges, highways, public transit systems, railways, harbors, airports, and seaports; large-scale structures and office buildings that provide enclosed working and living space; environmental and hydraulic systems that provide clean water and air, including filtration plants and distribution systems for municipal and industrial water supplies, wastewater treatment plants, dams, levees, and irrigation systems.

Growth areas of civil and environmental engineering include water sustainability, infrastructure development, construction management, computer-aided design, hazardous waste management, and engineered environmental systems. In the future, civil and environmental engineers will be called upon to design structures for earth, prevent erosion and sedimentation of rivers, predict effects of global climate change on the environment, provide modern and efficient transportation systems, and ensure the quality of our air, surface waters, and groundwaters.

In planning and design, civil and environmental engineers work with other engineers, architects, landscape architects, planners, economists, financiers, sociologists, lawyers, and other specialists as members of the design team. Some civil and environmental engineers work in engineering offices; others may be called upon to construct or supervise outdoor projects they have designed. These field assignments, many of which are in remote and fascinating parts of the world, are particularly appealing to many civil and environmental engineers. There also is significant potential for entrepreneurial work by civil and environmental engineers as they start their own companies.

In addition to the degree programs offered by the Department of Civil and Environmental Engineering, the department also participates in two Graduate College programs: Applied Mathematical and Computational Sciences [p. 1597], an interdisciplinary doctoral program; and Transportation Studies [p. 1687], a graduate certificate program.

## Certificates

### Sustainable Water Development

The graduate Certificate in Sustainable Water Development trains science, technology, engineering, and mathematics (STEM) students to address future challenges of water scarcity and variability while also meeting the food and energy demands of Earth's growing population. The Department of Civil and Environmental Engineering administers the

certificate program; see the Certificate in Sustainable Water Development [p. 1582] in the Catalog.

### Related Certificate: Transportation Studies

The Transportation Studies Program offers the graduate Certificate in Transportation Studies. The program focuses on the varied and complex problems of transportation and on interdisciplinary approaches to addressing them. The Departments of Civil and Environmental Engineering, Industrial and Systems Engineering, Mechanical Engineering (College of Engineering), and Economics (Tippie College of Business); and the School of Planning and Public Affairs (Graduate College) participate in the program.

The certificate is coordinated by the School of Planning and Public Affairs. See the Certificate in Transportation Studies [p. 1688] in the Catalog.

## Programs

### Undergraduate Programs of Study

#### Majors

- Major in Civil Engineering (Bachelor of Science in Engineering) [p. 1509]
- Major in Environmental Engineering (Bachelor of Science in Engineering) [p. 1511]

### Graduate Programs of Study

#### Majors

- Master of Science in Civil and Environmental Engineering [p. 1513]
- Doctor of Philosophy in Civil and Environmental Engineering [p. 1518]

## Facilities

### Undergraduate Teaching Laboratories

#### Environmental Engineering Teaching Laboratory

Located at the Water Plant, this laboratory is designed to provide undergraduate students hands-on experience in water laboratory testing and analysis. It serves several program-required and elective courses with a laboratory component.

#### Fluids Laboratories

The fluid laboratories comprise a trio of rooms. The Fluids Fundamentals Lab includes recently built equipment and ones that have been around for decades. The Advanced Measurements Lab includes some of the larger experimental devices, such as a wind tunnel and a towing tank. The third laboratory, the Fluids Workshop, is a space in which students can perform their experiments.

#### Hydraulics Laboratory

The Hydraulics Laboratory experimental facilities include flumes and pipe systems to perform experiments on open-channel and closed-conduit flows. Instruments are available

for measuring various flow quantities such as discharge, pressure, velocity, and temperature.

## Iowa Technology Institute

The Iowa Technology Institute contains 17 work stations, all connected to the engineering computer network, that allow students to access AutoCAD, Pro/ENGINEER, and a full complement of structural, hydraulic, transportation, and environmental software to support work on engineering design projects.

## Soils Laboratory

The teaching laboratory contains state-of-the-art equipment to provide hands-on experience to students and allows them to sharpen their skills on soil properties and characterization, soil stability, soil strength, consolidation/compaction for highway embankments, and foundations of structures. The teaching lab is an air-conditioned, temperature-controlled laboratory with an extensive number of different types of equipment. It is used twelve times throughout the year to perform four teaching sessions to groups of junior-level students.

## Structures, Mechanics, and Materials Laboratory

The Structures, Mechanics, and Materials Laboratory is a teaching lab where students conduct experiments to quantify the physical and mechanical properties of construction materials. Equipment is available to test metals, aggregates, concrete, and asphalt.

## Graduate Laboratories

### Structures, Mechanics, and Materials

Facilities for computations, materials testing, geotechnical experiments, and small-scale structural testing are available for research and teaching. Faculty, staff, and students in structures, mechanics, and materials (SMM) have access to the computing resources of the Engineering Technology Center and the Iowa Technology Institute (ITI). Both centers continuously update their computing facilities to maintain pace with the rapidly changing field.

A wide range of experimental facilities are available for testing structural materials such as Portland cement concrete, asphalt, metals, timber, and composites. These facilities include several loading frames (purely uniaxial, purely torsional, and axial-torsional) that are available with computer-based control and data collection systems. Facilities for creep testing, triaxial soil testing, and high-cycle fatigue testing also are available. The laboratories have a variety of ovens and other facilities for preparation and treatment of test specimens.

Four well-equipped physical testing laboratories are dedicated to SMM teaching and research: the Civil Materials Laboratory, Soil Mechanics Laboratory, Plasticity Laboratory, and the Asphalt Laboratory. The Civil Materials Laboratory currently has a small-scale single-degree-of-freedom shaker table. Faculty, staff, and students have access through ITI to a six-degree-of-freedom man-rated shaker table with 4,000-pound payload and a 12-camera Vicon motion-capture system.

## Transportation Engineering

The department's Asphalt Laboratory is equipped with a set of Superpave testing equipment and asphalt mixture performance testing equipment which can measure dynamic modulus and flow number of asphalt mixtures. The lab has a

Hamburg Wheel Tracking Device for measuring the moisture sensitivity of asphalt mixtures; asphalt foaming equipment for mix design of cold in-place recycled asphalt using foamed asphalt; and equipment for Marshall mix design, indirect tensile strength test, and volumetric analysis of asphalt mixtures. The Asphalt Laboratory is one of the department's group of laboratories for testing the strength behavior of other materials.

## Water and the Environment

The teaching and research functions of the department are closely connected to the research activities of IIHR—Hydroscience & Engineering. The institute houses some of the most modern research facilities in the world, including a 100-meter towing tank, a wave basin facility for ship hydrodynamics research, several flumes, an array of field instrumentation for hydrologic experiments, extensive laboratory space for hydraulic modeling, state-of-the-art instrumentation for flow measurements and visualization, and comprehensive computational facilities.

Research related to ecohydraulics and the environment takes place at the Lucille A. Carver Mississippi Riverside Environmental Research Station. IIHR—Hydroscience & Engineering operates the 250-square-foot facility, which is located on the Mississippi River near Muscatine, Iowa. The station provides engineers and biological scientists with an ideal facility in which to examine the multifaceted ecohydraulic processes of the upper Mississippi. It is equipped with water quality laboratories, research boats, and a seminar room.

The Environmental Engineering and Science Laboratories provide state-of-the-art facilities, equipment, and expertise to support both undergraduate and graduate-level instruction and research. The labs support research in contaminant fate and transport in various media (air, water, soil, plants, and microbes), drinking water disinfection and distribution, wastewater treatment, geochemical-contaminant interactions, bioremediation, and phytoremediation. They also provide resources for analytical chemistry, electrochemistry, molecular biology, microscopy, computer modeling, and simulated environments on the bench- and pilot-scale levels.

The Environmental Engineering and Science Laboratories are affiliated with the University's Center for Health Effects of Environmental Contamination, Center for Global and Regional Environmental Research, and the Environmental Health Sciences Research Center, an affiliate of the National Institute of Environmental Health Sciences (NIEHS).

## Courses

### Civil and Environmental Engineering Courses

#### CEE:0000 Civil Engineering Internship/Co-op 0 s.h.

Civil engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record card. Requirements: admission to the Cooperative Education Program.

**CEE:1010 Introduction to Careers in Environmental Engineering 0 s.h.**

Past, present, and future roles of environmental engineers in society; introduction to the discipline's historical roots and early visionary leaders in sanitation engineering and public health; growth during the environmental movement, and current role of environmental engineers in modern society as stewards for clean air, water, and energy; range of career opportunities available to environmental engineering majors, particularly in the emerging role of ambassadors for sustainable development.

**CEE:1030 Introduction to Earth Science 3-4 s.h.**

Relationships between plate tectonics, geologic time, and the rock cycle with volcanoes and igneous, sedimentary, metamorphic rocks; fossils; radioactive isotopes; landscape evolution; mountain building; natural resources; their impacts on civilization. GE: Natural Sciences with Lab; Natural Sciences without Lab. Same as EES:1030.

**CEE:1031 Introduction to Earth Science Laboratory 1 s.h.**

Laboratory component of EES:1030. Requirements: completion of 3 s.h. in EES:1030 or CEE:1030. GE: Natural Sciences Lab only. Same as EES:1031.

**CEE:2010 Civil and Environmental Engineering Professional Practice and Ethics 1 s.h.**

Practical issues associated with civil engineering practice; topics may include safety and OSHA regulations, engineering specifications/building codes, contracts, liability, and ethics; role that a professional engineering license plays in the student's career and professional/ethical obligations that come with it; history of civil engineering and development of civil practice in the United States.

**CEE:2015 Civil Engineering Tools 2 s.h.**

Tools and methods used in civil engineering career: AutoCAD, programming, project estimating, heavy equipment productivity estimation, and earthwork estimation.

**CEE:2050 Severe and Unusual Weather 3 s.h.**

Basic weather concepts behind severe weather phenomena and essential safety information; how weather events cause billions of dollars in damage and thousands of casualties; winter storms can impact half of the nation, paralyzing the transportation network with icy roads and wind driven snow; tornadoes can strike within minutes tearing apart homes; hurricanes can destroy entire communities with strong winds, heavy rain, and deadly storm surge; how understanding severe weather and knowing what to do before, during, and after an event can significantly reduce injury, deaths, and property damage. Same as CBE:2050.

**CEE:2240 Digital Drafting with AutoCAD 3 s.h.**

Basic principles of 2D and 3D computer-aided drafting; use of AutoCAD software to draw plans, elevations, and sections for objects and interior spaces. Prerequisites: CERM:2010 or SCLP:2810 or TDSN:2210 or MTLs:2910. Same as TDSN:2240.

**CEE:3001 Leadership Skills for Engineers 1 s.h.**

Survey of leadership ideas and principles as applied to situations commonly encountered in civil engineering practice, especially as they relate to challenges that beginning engineers face; speakers in selected engineering professions provide context and examples; exercises on leadership principles. Requirements: junior standing in civil and environmental engineering.

**CEE:3002 Technical Communication in Civil and Environmental Engineering 1 s.h.**

Development of communication skills through writing and oral presentations; impact of engineering solutions in a global, economic, environmental, and societal context; writings and presentations on current or historical engineering solutions; exposure to professionals with significant experiences to share in these areas. Requirements: junior standing.

**CEE:3003 Project Management Skills 1 s.h.**

Review and extension of civil and environmental engineering project management skills in preparation for capstone senior design course; project scheduling, cost estimating, contract types, construction phasing; review for Fundamentals of Engineering Exam (FE) and practice tests in four subdisciplinary areas. Requirements: senior standing.

**CEE:3142 Quality Control 3 s.h.**

Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisites: STAT:2020 or BAIS:9100 or (STAT:3100 and STAT:3101 and STAT:3200). Same as ISE:3600, STAT:3620.

**CEE:3155 Principles of Environmental Engineering 4 s.h.**

Water supply and treatment processes; wastewater treatment processes; processes for air pollution control, groundwater remediation; solid and hazardous waste management. Prerequisites: CHEM:1110.

**CEE:3328 Fluvial Geomorphology 3 s.h.**

Hydrologic principles, stream channel processes, and fluvial geomorphology within drainage basin systems; spatial and temporal variations in water distribution, analysis of hydrological data, flow mechanisms, sediment transport, forecasting procedures, hydrograph construction, modeling. Requirements: EES:3020 or another 3000-level geology or hydraulics course. Same as EES:3380.

**CEE:3371 Principles of Hydraulics and Hydrology 3 s.h.**

Hydraulics of pressure conduits and open channels, dimensional analysis, flow measurements, hydraulic machinery, laboratory. Prerequisites: ENGR:2510.

**CEE:3430 Water Treatment 4 s.h.**

Physical, chemical, and biological processes and operations to remove and treat chemical and pathogenic pollutants and protect human and environmental health; relevant to drinking water, municipal wastewater, water reuse, stormwater, industrial process water, agricultural wastewater; modern technologies and appropriate designs for the developing world; theory and applications; hands-on laboratory. Prerequisites: CEE:3155 and ENGR:2510.

**CEE:3530 Geomechanics 4 s.h.**

Identification and classification of earth materials; hydraulic and mechanical properties of soils; soil improvement; laboratory testing. Prerequisites: ENGR:2750.

**CEE:3533 Principles of Structural Engineering 4 s.h.**

Fundamental principles of structural analysis applied to statically determinate and indeterminate structures, continuous beams, trusses, and frames; external and internal equilibrium, compatibility of deformation, influence lines, virtual work; parallel use of classical and matrix formulation; slope deflection, flexibility and stiffness methods; use of computers. Prerequisites: ENGR:2750.

- CEE:3586 Civil Engineering Materials** 3 s.h.  
Structure, strength and failure, durability, deformation, practice, and processing for primary construction materials systems, including steel, aluminum, concrete, asphalt, fiber-reinforced composites, masonry, timber. Prerequisites: ENGR:2750.
- CEE:3763 Principles of Transportation Engineering** 3 s.h.  
History of transportation modes, new transport technologies, traffic operations and control, economic evaluation of transport alternatives, transportation planning, roadway design and construction, route location, preventive maintenance strategies. Requirements: sophomore standing.
- CEE:3783 Surveying and Remote Sensing** 3 s.h.  
Engineering surveying measurements, methods, computations. Prerequisites: ENGR:1100.
- CEE:3790 Resilient Infrastructure and Emergency Response** 3 s.h.  
Concepts of resilient cities with specific emphasis on role of infrastructure and built environment; risk analysis, hazard mitigation and emergency response to various threats; resiliency through good design.
- CEE:3996 Civil and Environmental Engineering: Engineering Project** 1 s.h.  
Support for student learning associated with an engineering project; students work as a team to design and fabricate a product; student projects are often associated with a contest or competitions (e.g., steel bridge, concrete canoe).
- CEE:3997 Engineering Service Project** 1-3 s.h.  
Provides support of student learning associated with a variety of international engineering service projects facilitated by the Department of Civil and Environmental Engineering; service projects are usually designed and built as part of an Engineers Without Borders USA and/or a Bridges to Prosperity (Continental Crossings) approved program; active involvement by students in these organizations required.
- CEE:3998 Individual Investigations: Civil Engineering** arr.  
Individual projects for civil engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.
- CEE:4097 Topics in Teaching and Learning** 1 s.h.  
Overview of Iowa's hydroclimate; emphasis on discharge, rainfall, and temperature; how to address basic research questions related to Iowa's climate and extreme events; hands-on exercises.
- CEE:4102 Groundwater** 3 s.h.  
Groundwater quality and quantity; Darcy's Law, 2D flow equation, unsaturated zone, contaminant transport, redox reactions, drinking water quality, bioremediation; laboratories in permeameter testing, porous media grain size analysis, pump testing, monitoring well installation.
- CEE:4104 Groundwater Modeling** 3 s.h.  
Groundwater flow and contaminant transport modeling; numerical methods, applications of groundwater modeling to water supply, groundwater resources evaluation, remediation design using software; GMS (MODFLOW, MODPATH, and MT3D). Prerequisites: MATH:1860 and (EES:4630 or CEE:4103). Same as EES:4660.
- CEE:4107 Sustainable Systems** 3 s.h.  
New and emerging concepts in sustainable systems design and assessment. Same as CBE:4410.
- CEE:4118 Statistical Methods in Water and the Environment** 3 s.h.  
Basic methods required for data analysis and interpretation of processes related to water and the environment; emphasis on formulating questions, choosing appropriate statistical tools for a given problem, drawing appropriate conclusions from analyses; concepts related to statistical inference and common probabilistic models, linear regression, non-parametric statistics; how to perform these analyses using R programming language; introduction to statistical methods through use of hands-on analyses with real data. Prerequisites: STAT:2020 and MATH:2560.
- CEE:4119 Hydrology** 3 s.h.  
Overview of fundamental processes in water cycle, including precipitation, evaporation, infiltration, and runoff; quantitative approaches for predicting streamflow and design discharges; applications to flood hazard assessment and stormwater management. Prerequisites: ENGR:2510.
- CEE:4135 Structural Modeling and Health Monitoring** 3 s.h.  
Measurements, structural modeling, structural analysis, stiffness method, trusses and frames, structural testing, modal analysis. Prerequisites: CEE:3533 and ENGR:2750.
- CEE:4146 Multiscale Hydrology: Introduction to Multiscale Hydrologic Phenomena** 3 s.h.  
Hydrologic principles over the last century developed from experimentation at laboratory and small plot scales; major scientific and engineering challenges, including links between statistical fluctuations that data exhibits; physical, chemical, and biological principles through appropriate mathematical theories, numerical models, and field observations; coupled hydrologic processes at larger scales using newly built on abstraction; observations used in hydrologic engineering at larger scales for several decades and missing a coherent theory that ties them together. Prerequisites: MATH:6600 and ENGR:2510. Requirements: three semesters of calculus and college physics, an introductory hydrology course, and a probability and statistics course.
- CEE:4150 Environmental Chemistry** 3 s.h.  
Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisites: CHEM:1120. Same as CBE:4420.
- CEE:4157 Environmental Engineering Design** 3 s.h.  
Application of physical, chemical, and biological operations and processes to the design of water and wastewater treatment systems; applications in solid and hazardous waste treatment. Prerequisites: CEE:3155.
- CEE:4158 Solid and Hazardous Wastes** 3 s.h.  
Sources, characteristics, collection, disposal of solid and hazardous wastes; environmental impacts of hazardous waste management; resource recovery systems. Requirements: for OEH:4920—OEH:4240. Same as OEH:4920.
- CEE:4159 Air Pollution Control Technology** 3 s.h.  
Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Same as CBE:4459, IGPI:4159.

- CEE:4160 Introduction to Bridge Engineering** 3 s.h.  
 Bridge engineering and design; history of the bridge; factors that affect bridge design; bridges according to use (e.g., road, rail, pedestrian and bicycle) and type (e.g., suspension, cable stay, truss); how sustainability concepts may impact bridge design; substantial design exercise. Prerequisites: CEE:3533.
- CEE:4162 Structural Systems for Buildings** 3 s.h.  
 Detailed analysis and design of gravity and lateral force resisting systems for buildings; roof, floor, and bearing wall gravity systems; steel braced frames, steel and concrete moment frames, and masonry and timber shear walls lateral systems; introduction to tall building structures. Prerequisites: CEE:3533.
- CEE:4164 Design of Wood Structures** 3 s.h.  
 Framing layout and analysis of wood frame structures for gravity and lateral loads; design of structural members for bending, axial load, and shear, including joists, beams, columns, engineered lumber, bearing walls, shear walls, and diaphragms; introduction to connection design. Prerequisites: CEE:3533.
- CEE:4176 Transportation Research Methods and Analysis** 3 s.h.  
 Methods for measuring current and future transportation demand based on changes in population, preferences, built environment, and changing policy objectives; survey design and analysis; basics of travel demand modeling. Same as URP:4262.
- CEE:4180 Fundamentals of Atmospheric Science** 3 s.h.  
 Review of fundamental principles in atmospheric sciences needed for study of interdisciplinary topics involving the Earth's atmosphere; understanding weather and climate processes to address problems in engineering; hydrometeorology of rainfall and its measurement by remote sensing; impact of climate anomalies and climate change on water resources; exchange of water, energy, and chemicals at the land-atmosphere boundary; forecasting of atmospheric chemistry and air quality. Prerequisites: ENGR:2510.
- CEE:4187 Statistics for Experimenters** 3 s.h.  
 Application of statistical techniques to evaluate data derived from experimental samples designs; use of spreadsheets, statistical software; design and analysis of experiments; regression analysis; model building; practical applications. Same as OEH:4540.
- CEE:4317 Remote Sensing** 3 s.h.  
 Fundamentals of electromagnetic waves, atmospheric radiative transfer, passive remote sensing, weather radar, hydrologic application of remote sensing.
- CEE:4370 Open Channel Flow and Sediment Transport** 3 s.h.  
 In-depth analysis of governing flow equations; steady uniform flow in channels of different resistance and cross section; flow control sections; specific energy considerations; analysis and computation of gradually varied profiles and spatially varied flow effected by lateral outflow and inflow; unsteady flow; flood routing. Prerequisites: CEE:3371.
- CEE:4371 Water Resources Engineering** 3 s.h.  
 Planning and economics of varied water resources projects; stochastic basis for design; flood damage mitigation, reservoirs, river morphology, economic analysis of water projects, urban water requirements, water supply, hydroelectric power systems, river navigation; contemporary civil-engineering problems and issues associated with water infrastructure development. Corequisites: CEE:3371.
- CEE:4374 Water Resource Design** 3 s.h.  
 Prerequisites to storm water management systems design, including design flows and rates; analysis and design of storm sewers, detention basins, street and highway drainage facilities, culverts, dams, spillways, measures for energy dissipation; review of wastewater transfer systems and design. Prerequisites: CEE:3371.
- CEE:4385 International Perspectives in Water Sciences and Management** 3 s.h.  
 Internationalization and water, with focus on a country or a world region; intensive, in-depth exposure to complex issues that affect planning and execution of water projects in large-scale watersheds.
- CEE:4506 Design of Concrete Structures** 3 s.h.  
 Fundamental analysis and design of reinforced concrete members and structures, flexure, shear, bond, continuity, beams, one-way slab system; columns. Prerequisites: CEE:3533.
- CEE:4511 Scientific Computing and Machine Learning** 3 s.h.  
 Numerical methods in scientific computing; root problems and optimization; linear algebraic equations; eigenvalue problems; numerical differentiation and integration; interpolation and curve-fitting; initial value and boundary value problems; machine learning in regression, classification, and clustering problems; Python programming and packages. Prerequisites: MATH:2560. Same as ME:4111.
- CEE:4512 Engineering Design Optimization** 3 s.h.  
 Engineering design projects involving modeling, formulation, and analysis using optimization concepts and principles; linear and nonlinear models, optimality conditions, numerical methods. Prerequisites: ENGR:2110 and MATH:2550. Requirements: junior standing. Same as ME:4112.
- CEE:4515 Computer-Aided Engineering** 3 s.h.  
 Computational engineering modeling and simulation, geometric modeling, grid generation, finite-element and finite-volume methods, uncertainty analysis, optimization, engineering applications. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as ME:4110.
- CEE:4532 Fundamentals of Vibrations** 3 s.h.  
 Vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, and arbitrary excitation; modal analysis; applications. Prerequisites: ENGR:2750. Same as ME:4153.
- CEE:4533 Finite Element I** 3 s.h.  
 One- and two-dimensional boundary value problems; heat flow, fluid flow, torsion of bars; trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisites: ENGR:2750. Same as IGPI:4115.
- CEE:4535 Design of Steel Structures** 3 s.h.  
 Concepts and procedures in steel design; LRFD (load and resistance factor design) methodology for beams/columns; analysis and design of indeterminate structures. Prerequisites: CEE:3533.
- CEE:4539 Foundations of Structures** 3 s.h.  
 Application of soil mechanics to analysis of structural foundations; slope stability analysis; bearing capacity and settlement of shallow and deep foundations; retaining structures, braced cuts, reinforced earth structures; usage of computational models; subsurface exploration methods. Prerequisites: CEE:3530.

- CEE:4560 Pavement Engineering** **3 s.h.**  
Fundamental design principles; characterization and testing of asphalt and concrete paving materials; stresses and strain development within pavement structure; basic principles of mechanistic-empirical pavement design procedures. Prerequisites: CEE:3763.
- CEE:4730 Transportation Infrastructure Construction and Management** **3 s.h.**  
Analytical methods for developing transportation infrastructure construction and management systems; e-construction, transportation infrastructure condition evaluation, performance modeling, maintenance and rehabilitation optimization, asset management, development of transportation infrastructure construction and management system; application of information technology and mobile computing to solving transportation infrastructure construction and management problems. Prerequisites: CEE:3763.
- CEE:4762 Design of Transportation Systems** **3 s.h.**  
Overview of different modes within transportation systems; concepts of sustainability and livability in transportation system design; derivation of standards for geometric design of highways; roundabout design; cross-sectional and longitudinal geometric design of highways. Prerequisites: CEE:3763.
- CEE:4763 Traffic Engineering** **3 s.h.**  
Design of traffic control devices; evaluation and analysis of intersections and transportation networks using appropriate computer software. Prerequisites: CEE:3763.
- CEE:4850 Project Design and Management in Civil Engineering** **3 s.h.**  
Design of civil engineering systems, individual and team design projects oriented toward the solution of local problems, project management, construction management, contracts, budgeting, bidding. Corequisites: CEE:3003. Requirements: final semester.
- CEE:5083 Introduction to Comp Flow in Pipes and Channels** **3 s.h.**  
General review of numerical methods in hydraulics (finite-difference, finite-element, and method of characteristics); stability and accuracy of numerical schemes; steady free surface flows; flow transients in pipelines and channels. Prerequisites: ME:5160.
- CEE:5091 Graduate Seminar: Structure, Mechanics, Materials** **0 s.h.**  
Presentation and discussions of recent advances and research in structures, mechanics, and materials engineering by guest lecturers, faculty, students. Requirements: senior or graduate standing.
- CEE:5095 Career Paths in Sustainable Water Development** **0 s.h.**  
Introduction to different career paths in the food, energy, and water (FEW) sector; speakers from a variety of different careers—including researchers, professors, entrepreneurs, consultants, and civic, professional, and global engineers—discuss their own career paths as well as current opportunities in their fields; students prepare individual development plans that identify their preferred career (i.e., training) path, a plan of study (i.e., path coursework), mentors, and their preferred research area. Requirements: graduate standing in sustainable water development program.
- CEE:5096 Water, Energy, and Food Nexus Seminar** **0 s.h.**  
Invited presentations on research, policy, economics, and social drivers of water, energy, and food in the 21st century.
- CEE:5097 Coaching Seminar on Communicating Water Science** **0 s.h.**  
Presentation of student research on water, energy, and food in the 21st century; students receive live, immediate feedback from their peers and faculty coaches on best practices to improve their oral communication skills.
- CEE:5098 Graduate Seminar in Structures, Materials, Mechanics, and Transportation** **0 s.h.**  
Presentation and discussion of recent advances and research in structures, mechanics, materials, and transportation engineering by guest lecturers, faculty, and students. Requirements: graduate standing.
- CEE:5100 Cultural Competence for Sustainable Water Development Engineers** **0 s.h.**  
Skills needed to be culturally responsive to a wide range of communities in which sustainable water development engineering students interact with during their professional careers; series of three workshops; focus on how to identify cultural strengths that support development in underserved, resource-constrained communities; how to engage, build trust, and bridge differences with diverse stakeholders; how to conduct culturally sensitive interviews; how to communicate effectively across culture; preparation for Capstone Community Engagement project. Requirements: graduate standing in sustainable water development program.
- CEE:5110 Research Data Management Seminar** **1 s.h.**  
Overview of major issues in quantitative data management; topics include computer file and directory organization, data documentation and lab notebook best practices, data organization and structure, data description and annotation, data versioning, data sharing and publication, licensing, ownership, preservation of access, reuse, and citation; for students in science, technology, engineering and mathematics (STEM) disciplines. Same as OEH:5110.
- CEE:5115 Atmospheric Chemistry and Physics** **3 s.h.**  
Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources, and removal processes. Corequisites: CBE:3120. Same as CBE:5425.
- CEE:5137 Composite Materials** **3 s.h.**  
Mechanical behavior of composite materials and their engineering applications; composite constituents (fibers, particles, matrices) and their properties and behavior; macromechanical behavior of composite laminae; micromechanical predictions of composite overall properties; classical lamination theory; composite beams and plates. Prerequisites: ENGR:2750. Same as ME:5167.
- CEE:5156 Physical and Chemical Environmental Processes** **3 s.h.**  
Theory of physical and chemical operations and processes in water and wastewater treatment, including fundamental aspects of process dynamics; lectures, laboratory. Prerequisites: CEE:4150. Corequisites: CEE:3155.
- CEE:5179 Continuum Mechanics** **arr.**  
Mechanics of continuous media; kinematics of deformation, concepts of stress and strain; conservation laws of mass, momentum and energy; constitutive theories; boundary and initial value problems. Prerequisites: ENGR:2750 or ENGR:2510. Same as ME:5179.

**CEE:5225 Communicating Data Through Stories 3 s.h.**

How to communicate science effectively and responsively with multiple audiences from peers and professors to potential employers, policymakers, and the lay public; focus on speaking about science clearly and vividly in ways that can engage varied audiences, especially those outside the student's own field; connecting and finding common ground with an audience, defining goals, identifying main points, speaking without jargon, explaining meaning and context, using storytelling techniques and multimedia elements. Same as GRAD:5225.

**CEE:5236 Optimization of Structural Systems 3 s.h.**

Advanced topics; optimization of structural topology, shape, and material; finite dimensional dynamic response optimization, sensitivity analysis, distributed parameter systems; projects. Same as BME:5720.

**CEE:5310 Informatics for Sustainable Systems 3 s.h.**

Introduction to fundamental and advanced environmental informatics concepts and procedures including automated data collection, data management, data transformations, and processing to support modeling and analysis; scientific visualization of environmental data to support management of food, energy, and water (FEW) resources; sustainability in FEW systems. Same as IGPI:5311.

**CEE:5350 Watershed Hydrology and Ecosystem Processes 3 s.h.**

Introduction to hydrologic and ecosystem processes within a watershed; description of water, energy, and nutrient cycling in watersheds; focus on hydrologic and water-quality issues in agricultural Midwest; watershed modeling techniques, ecosystem goods and services, and selected case studies in watershed and ecosystem management problems. Requirements: graduate standing.

**CEE:5369 Intermediate Mechanics of Fluids 3 s.h.**

Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisites: ENGR:2510. Same as ME:5160.

**CEE:5372 Experimental Methods in Fluid Mechanics and Heat Transfer 3 s.h.**

Hands-on experience in methodology of conducting experiments in fluid mechanics and heat transfer from design to data acquisition and processing; essential theoretical elements, experimental methodologies, data acquisition systems, uncertainty analysis; wide variety of instruments for fundamental and applied experimentation; work in small groups; design, implement, test, and report an experiment in area of interest. Same as ME:5162.

**CEE:5380 Fluid Flows in Environmental Systems 3 s.h.**

Introduction to environmental fluid flows and transport processes with focus on application and developing a language of environmental fluid mechanics; topics include physical and mathematical description of conservation and transport laws, statistical techniques for analyzing environmental flow data, scaling and similarity, stratification, turbulent flux measurement and modeling, environmental boundary conditions; application to surface waters and the planetary boundary layer; applied project involving collection and analysis of environmental flow data.

**CEE:5390 PCBs in the Environment 3 s.h.**

Polychlorinated biphenyls (PCBs) as potent carcinogens and linked to metabolic syndrome, autism, learning disabilities, hearing loss, and neurological disorders; how these compounds become to be such ubiquitous environmental pollutants; what the impact of their presence is; how sites are remediated and exposures reduced; in-depth examination through literature review, laboratory experiments, computational modeling, final written reports, and presentations. Recommendations: laboratory experience.

**CEE:5410 Politics and Economics of the Food, Energy, Water Nexus 3 s.h.**

Focus on the relationships between food, energy, and water resources; current and future political and economic frameworks that shape the food, energy, and water nexus.

**CEE:5440 Foundations of Environmental Chemistry and Microbiology 3 s.h.**

Investigation of chemical and biological processes at the food-energy-water nexus; example topic areas include biogeochemical cycling of nutrients, biomass conversion, resource recovery from wastewater, removing pollutants from drinking water sources, water reuse, engineered natural treatment systems, pollutant transformation and control, treatment of process waters. Requirements: undergraduate senior standing or graduate standing.

**CEE:5460 Water Quality and Flow 3 s.h.**

Laboratory and field experiments to promote student learning of flow-dependent movement and associated environmental transformation of surface water and groundwater pollutants; exploration of water quality and flow fundamentals needed to design and numerically model treatment reactors for small-community wastewater, urban storm water, and agricultural runoff; emphasis on engineered solutions that couple water quality and flow considerations as potential mitigations for adverse effects on natural water cycle caused by floods and other natural and human-influenced phenomena.

**CEE:5513 Mathematical Methods in Engineering 3 s.h.**

Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: MATH:2550 and MATH:2560. Same as CBE:5140, ME:5113.

**CEE:5540 Intermediate Mechanics of Deformable Bodies 3 s.h.**

Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: ENGR:2750. Same as ME:5150.

**CEE:5549 Fracture Mechanics 3 s.h.**

Three-dimensional stress states, definition and criteria for failure, nominal and local yield phenomena, linear elastic and elastic plastic fracture mechanics, plane stress and plane strain fracture toughness, J-Integral, crack opening displacement, environmental assisted cracking, fatigue crack growth, fail safe, and damage tolerant design. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as ME:5159.

**CEE:5678 Application Simulation to Transportation 3 s.h.**

Transportation system management and traffic engineering; application of real-time simulation and visualization. Prerequisites: CEE:3763 or CEE:4763. Same as URP:5678.

- CEE:5875 Perspectives in Biocatalysis** 1-3 s.h.  
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BIOC:5875, CBE:5875, CHEM:5875, MICR:5875, PHAR:5875.
- CEE:5990 Structural Engineering Practicum A** 2 s.h.  
Students select a design project and develop two or more alternative design concepts in consultation with a three-member advisory committee consisting of at least one faculty member and one design professional; entire design process documented in a written report. Prerequisites: CEE:3136 and CEE:4535.
- CEE:5991 Structural Engineering Practicum B** 1 s.h.  
Detailed design development of one of the concepts developed in CEE:5990; students perform detailed design calculations using applicable structural analysis and design software, produce professional quality structural plans including connection details, and defend design to a three-member advisory committee. Prerequisites: CEE:5990.
- CEE:5993 Community-Centered Problem Solving and Design** 3 s.h.  
Analysis, evaluation, and modeling of food-energy-water systems (FEWS) development challenges faced by resource-constrained communities in developed and developing countries; design and development of appropriate solutions to address disparities in FEWS and anticipate social, economic, political, technological, human health, and environmental impacts of these interventions; communication with a diverse suite of stakeholders using modern forms of media intended for public engagement and dissemination of research impacts; demonstration of cultural responsiveness consistent with social and economic realities of resource-limited communities.
- CEE:5998 Individual Investigations: Civil and Environmental Engineering** arr.  
Individual projects for civil and environmental engineering graduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.
- CEE:5999 Research: Civil and Environmental Engineering M.S. Thesis** arr.  
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the M.S. with thesis in civil and environmental engineering. Requirements: graduate standing.
- CEE:6223 Environmental Boundary Layers** 4 s.h.  
Fundamentals of environmental boundary layer dynamics and thermodynamics of natural and engineered systems; atmospheric boundary layers and aquatic surface layer dynamics; land-atmosphere interaction, air-water exchange, and turbulent transport in aquatic ecosystems; turbulence, surface energy balance, spectral analysis, similarity theory; flow over homogeneous and heterogeneous surfaces, thermal stratification effects, measurement, simulation of turbulent and surface fluxes; applications to environmental modeling, urban meteorology, ecosystem dynamics, renewable energy; recent and current research topics. Prerequisites: ENGR:2510.
- CEE:6225 Communicating Science** 3 s.h.  
Writing and speaking about environmental engineering and science research; key principles of writing with clarity and cohesion, and practice applying these principles on a piece of research writing that students are currently working on; review best practices for presenting research to peers and at conferences; students are required to share their work with peers through writing and presentations. Recommendations: graduate standing in earth and environmental sciences; M.S. students must be thesis option.
- CEE:6253 Environmental Organic Chemistry** 3 s.h.  
Environmental factors that govern processes that determine fate of organic chemicals in natural and engineered systems; knowledge of chemical fate applied toward quantitatively assessing environmental behavior of organic chemicals; holistic view on physical-chemical properties of organic compounds, including aspects of gas-solid partitioning, bioaccumulation, and transformations in the atmosphere.
- CEE:6255 Environmental Biotechnology and Bioremediation** 3 s.h.  
Concepts in molecular microbial ecology and bioremediation; microbial diversity and genetics, evolution of biodegradation pathways, application of quantitative PCR, high-throughput amplicon and metagenomic and transcriptomic sequencing, proteomics, stable isotopes; bioremediation research and practice. Prerequisites: CEE:5154.
- CEE:6299 Advanced Topics in Water and the Environment** 1-3 s.h.  
Advanced topics or areas of study not formally offered in other civil and environmental courses; topics include environmental engineering and science, hydraulics, hydrology, water resources, and sustainable water development.
- CEE:6310 Analytical Methods in Mechanical Systems** 3 s.h.  
Vector and function spaces; functionals and operators in Hilbert spaces; calculus of variations and functional analysis with application to mechanics; Ritz and Galerkin methods. Prerequisites: ME:5113. Same as ME:6214.
- CEE:6376 Viscous Flow** 3 s.h.  
Equations of viscous flow; classical analytical and numerical solutions; flow regimes and approximations; laminar boundary layers—equations, solution methods, applications; stability theory and transition; incompressible turbulent flow—mean-flow and Reynolds-stress equations, modeling, turbulent boundary layers and free shear flows. Requirements: for ME:6260—ME:5160; for CEE:6376—CEE:5369. Same as ME:6260.
- CEE:6520 Watershed Sedimentation** 3 s.h.  
Exploration of rich and complex field of sediment transport, geomorphology, and contaminant transport; associated physical, chemical, and biological processes with associated mathematical modeling; investigation of current topics not covered elsewhere, including physical processes affecting stability/mobility, transport, and fate of soil/sediments; lack of general understanding in development of fine-scale sedimentary structure in different systems, particularly contamination and contamination release; suspension effects on turbulent flows. Prerequisites: CEE:4370.
- CEE:6532 Finite Element II** 3 s.h.  
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as IGPI:6216, ME:6215.

**CEE:7250 Advanced Fracture Mechanics 3 s.h.**

Fracture of modern engineering materials; linear-elastic fracture; computational methods; functionally graded materials; elastic-plastic fracture; multiscale fracture and fatigue crack initiation. Prerequisites: ME:5113 and (ME:5159 or CEE:4533). Same as ME:7250.

**CEE:7549 Multiscale Modeling 3 s.h.**

Computational modeling of engineering materials ranging from molecular to continuum scales, molecular dynamics and Monte Carlo methods, nanoscale continuum modeling, scale-coupling methods. Prerequisites: ME:5143 or CEE:4533. Same as ME:6255.

**CEE:7999 Research: Civil and Environmental Engineering Ph.D. Dissertation arr.**

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the Ph.D. in civil and environmental engineering.

# Civil Engineering, B.S.E.

## Educational Objectives

Within a few years of graduation, graduates of the Bachelor of Science in Engineering (B.S.E.) program in civil engineering will:

- be productive and contributing members of the civil engineering profession as practitioners, entrepreneurs, researchers, or teachers;
- be engaged in learning, understanding, and applying new ideas as the field develops;
- pursue advanced studies, if qualified and interested; and
- promote the safety, health, and welfare of the public and the environment through professional practice and civic leadership.

## Requirements

The Bachelor of Science in Engineering with a major in civil engineering requires a minimum of 132 s.h. of credit. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric; ENGR:1100 Introduction to Engineering Problem Solving and ENGR:1300 Introduction to Engineering Computing; and courses in chemistry, engineering mathematics and fundamentals, and physics.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, a focus area, and the General Education Component. For information about the curriculum stems, see the Bachelor of Science in Engineering, B.S.E. [p. 1468] in the Catalog.

Students must select focus area courses according to guidelines established by the Department of Civil and Environmental Engineering. See "Focus Areas" below.

## Focus Areas

Civil engineering students may choose from several standard focus areas developed by the department or create an individual focus area tailored to their interests.

Standard focus areas are offered in the broad field of civil and environmental engineering practice and in the four technical areas: environmental engineering; hydraulics and water resources; structures, mechanics, and materials; and transportation engineering. Other areas of focus include pre-architecture and urban and regional planning. For a list of standard focus area options and guidelines for tailored focus areas in civil engineering, see Elective Focus Areas on the Department of Civil and Environmental Engineering website.

## Combined Programs

### B.S.E./M.S. in Civil and Environmental Engineering

The College of Engineering offers the combined Bachelor of Science in Engineering/Master of Science program for civil engineering undergraduate students who intend to earn

a M.S. in civil and environmental engineering. B.S.E./M.S. students may attend the departmental graduate seminar and work on a master's thesis or research project while they are still undergraduates. They may count a limited amount of coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the degree program, students must have completed at least 80 s.h. and have a cumulative g.p.a. of at least 3.25. They must submit an application form to the Department of Civil and Environmental Engineering, along with a letter stating their proposed area of specialization and the name of a department faculty member willing to be their primary M.S. advisor. Graduate Record Examination (GRE) General Test scores are not required for the degree program.

Applications are due by May 15.

### B.S.E./M.S. in Urban and Regional Planning

The College of Engineering and the School of Planning and Public Affairs offer the combined Bachelor of Science in Engineering/Master of Science program in urban and regional planning. The program, which is completed in five years, is designed for students who wish to pursue a public or private sector career in planning, a field that encompasses the development of alternatives to improve the quality of life in cities and regions.

Graduates are technically oriented professionals who have a clear understanding of policy development and implementation, which they apply to civil and industrial engineering problems. They fill positions such as public works director, transportation engineer, and public utilities staff member.

Each student in the combined program has two advisors, one in civil engineering and one in planning and public affairs. Students enroll in the College of Engineering for their first four years in the program and in the Graduate College for their fifth year. They follow the standard curriculum of their B.S.E. program during the first two years and begin adding courses from the planning and public affairs program during the third year. Successful students receive a B.S.E. at the end of the fourth year and an M.S. in urban and regional planning at the end of the fifth year.

Students in the combined program must maintain a cumulative g.p.a. of at least 3.00 in order to graduate with an M.S. in urban and regional planning.

For more information, see the M.S. in urban and regional planning [p. 1677] (Graduate College) in the Catalog. Contact Engineering Student Services for information about applying to the combined program.

## Career Advancement

When it comes to building the nation's infrastructure or protecting the natural environment, civil environmental engineers are at the forefront. They not only design roads, bridges, and structures, provide clean drinking water, and protect people from natural hazards like flooding or earthquakes, they also engage with the public to create a more sustainable future. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

# Environmental Engineering, B.S.E.

## Educational Objectives

Within a few years of graduation, graduates of the Bachelor of Science in Engineering (B.S.E.) program in environmental engineering will:

- be productive and contributing members of the environmental engineering profession as practitioners, entrepreneurs, researchers or teachers;
- be engaged in learning, understanding, and applying new ideas as the field develops;
- pursue advanced studies, if qualified and interested; and
- promote the safety, health, and welfare of the public and the environment through professional practice and civic leadership.

## Requirements

The Bachelor of Science in Engineering with a major in environmental engineering requires a minimum of 133 s.h. of credit. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric; ENGR:1100 Introduction to Engineering Problem Solving and ENGR:1300 Introduction to Engineering Computing; and courses in chemistry, engineering mathematics and fundamentals, and physics.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, a focus area, and the General Education Component. For information about the curriculum stems, see the Bachelor of Science in Engineering, B.S.E. [p. 1468] in the Catalog.

Students must select focus area courses according to guidelines established by the Department of Civil and Environmental Engineering. See "Focus Areas" below.

## Focus Areas

Environmental engineering students may choose from a standard focus area developed by the department or create an individual focus area tailored to their interests.

For a description of the standard focus area options and guidelines for tailored focus areas in environmental engineering, see Elective Focus Areas on the Department of Civil and Environmental Engineering website.

## Combined Programs

### B.S.E./M.S. in Civil and Environmental Engineering

The College of Engineering offers a Bachelor of Science in Engineering/Master of Science program for environmental engineering undergraduate students who intend to earn a M.S. in civil and environmental engineering. B.S.E./M.S. students may attend the departmental graduate seminar and work on a master's thesis or research project while they are

still undergraduates. They may count a limited amount of coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the degree program, students must have completed at least 80 s.h. and have a cumulative g.p.a. of at least 3.25. They must submit an application form to the Department of Civil and Environmental Engineering, along with a letter stating their proposed area of specialization and the name of a department faculty member willing to be their primary M.S. advisor. Graduate Record Examination (GRE) General Test scores are not required for the fast-track degree program.

Applications are due by May 15.

## Career Advancement

Environmental engineers apply engineering principles to design systems that control pollution and protect public health. Environmental engineers restore air, soil, and water quality at contaminated sites, and develop systems that convert waste into clean energy. Environmental engineering addresses the complex food, energy, and water issues of the 21st century. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall)

---

**Hours** **15**

---

**Total Hours** **130**

a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.

b Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.

c Enrollment in math courses requires completion of a placement exam.

d Enrollment in chemistry courses requires completion of a placement exam.

e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.

f Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

g Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI. See the College of Engineering General Education Component website for more information.

h Students select a course from the GE CLAS Core Diversity and Inclusion area.

i Students select a focus area to achieve exposure and depth of study in an area of interest. Each focus area requires at least 15 s.h. of coursework. Some focus areas may require additional courses that may be taken for General Education Component credit. See the civil and environmental engineering website or consult an advisor for more information.

j A full list of approved course subjects can be found on the College of Engineering General Education Component website. Some focus areas may require specific courses that may be taken for General Education Component credit.

k Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Civil and Environmental Engineering, M.S.

Graduate study in civil and environmental engineering prepares students for professional careers and further study. The principal concentration areas are environmental engineering and environmental science; hydraulics, hydrology, and water resources; structures, mechanics, and materials; sustainable water development; and transportation.

## Research and Study Areas

### Structures, Mechanics, and Materials

The structures, mechanics, and materials curriculum is designed for students who wish to gain knowledge and skill in the mechanics of solids and structures that they can apply to civil infrastructure systems and other fields. The program concentrates on developing appropriate methodologies for tackling broad, complex issues related to civil infrastructure systems, and on educating engineers in the implementation and application of methodologies to actual engineering projects. Faculty members have expertise in structural engineering, design optimization, solid mechanics, and computational methods.

### Transportation Engineering

The transportation engineering curriculum is geared toward students interested in developing specialized knowledge and skills applicable to the diverse set of issues associated with transportation. Faculty members have expertise in traffic engineering, infrastructure management systems, pavement engineering, advanced construction materials, dynamic load and pavement simulation, optimal design, winter highway maintenance, real-time simulation, human factors, intelligent sensors, nondestructive testing, transportation planning, and travel demand modeling.

### Water and the Environment

The water and the environment graduate program focuses on both fundamental and applied aspects of environmental systems and processes across a range of scales. The water and the environment program offers unique opportunities for students to actively participate in the research, analysis, and design aspects of real-world problems. There are three areas of specialization—environmental engineering and science; hydraulics, hydrology, and water resources; and sustainable water development.

The environmental engineering and science curriculum provides a comprehensive base of coursework and research in the areas of air and water quality management; environmental chemistry and microbiology; natural systems modeling; and processes for water supply, pollution control, and solid and hazardous waste management.

The hydraulics, hydrology, and water resources curriculum is associated with IIHR—Hydroscience & Engineering, a world-renowned research institute, where senior staff members of the institute are professors in the program. IIHR offers unique curriculum opportunities in laboratory and field-scale experimentation, and in mathematical modeling with IIHR's high-speed computer facilities.

The sustainable water development curriculum is focused on training interdisciplinary professional engineers, researchers, educators, and those who are ready to meet

the water resource challenges of communities most in need. Community service and professional development experiences complement innovative research at the food, energy, and water nexus.

Across all specialization areas within water and the environment, interdisciplinary research and study are conducted with programs including the Center for Global and Regional Environmental Research, the Center for Health Effects of Environmental Contamination, the Iowa Superfund Research Program, the Hazardous Substances Research Center, and the Center for Biocatalysis and Bioprocessing; the Departments of Chemical and Biochemical Engineering (College of Engineering), Earth and Environmental Sciences, Geographical and Sustainability Sciences (College of Liberal Arts and Sciences), Microbiology and Immunology (Carver College of Medicine), and Occupational and Environmental Health (College of Public Health); and the School of Planning and Public Affairs (Graduate College). Other areas of interdisciplinary focus include groundwater contamination, biotechnology, global climate change, and hazardous substances.

## Requirements

The Master of Science program in civil and environmental engineering requires a minimum of 30 s.h. of graduate credit for thesis students; 31 s.h. for nonthesis students. The program enables students to concentrate in one or more areas of their choice. Students must maintain a cumulative g.p.a. of at least 2.75.

The thesis option requires a minimum of 25 s.h. (eight courses) with the remaining 5 s.h. obtained in CEE:5999 Research: Civil and Environmental Engineering M.S. Thesis.

With the approval of their advisor, students develop a study plan that satisfies the requirements of their chosen curriculum. Students must pass an oral examination and, in some program options, a written examination.

Consult the department's Graduate Program Resources web page for more detailed information about the M.S. program in civil and environmental engineering.

## Core Courses

All students must successfully complete the civil and environmental graduate core courses for their area of focus. Students are expected to complete these courses during their first year of study.

## Elective Courses

Students choose elective courses from any academic area that strengthens their knowledge of water and the environment and provides needed research topic training. Individual Investigations: Civil and Environmental Engineering (CEE:5998) is not considered a suitable elective.

## Seminars

All full-time students are required to register for and participate in a seminar in their respective program of study; this includes CEE:5096 Water, Energy, and Food Nexus Seminar for areas that fall under the water and the environment curriculum (environmental engineering, environmental science, hydraulics, sustainable water development, and water resources), or CEE:5098 Graduate Seminar in Structures, Materials, Mechanics, and Transportation for students in structures, mechanics

and materials or transportation engineering. Depending on the program of study, there may be additional seminar requirements. For more detailed information visit the department's Graduate Program Resources web page.

## Ethics Course

Students must enroll in ENGR:7270 Engineering Ethics.

## Thesis

Students may earn up to 5 s.h. of research credit in CEE:5999 Research: Civil and Environmental Engineering M.S. Thesis. A total of 3 s.h. may be taken on a graded basis at the discretion of the advisor. Consult the department's Graduate Program Resources web page for more detailed information about the program.

## Combined Programs

### M.S. (Sustainable Water Development Subprogram)/M.S. in Urban and Regional Planning

The Department of Civil and Environmental Engineering and the School of Planning and Public Affairs collaborate to offer a combined Master of Science in civil and environmental engineering with a sustainable water development subprogram/Master of Science in urban and regional planning.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, see the M.S. in urban and regional planning [p. 1677] (Graduate College) in the Catalog.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Each of the program's curricula is flexible; students may be admitted from all disciplines of engineering as well as from the mathematical and basic sciences.

Applicants should have a cumulative undergraduate g.p.a. of at least 3.00. Those with grade-point averages slightly lower should contact the department.

Applicants should have a combined verbal and quantitative score of at least 301 on the Graduate Record Examination (GRE) General Test. Lower scores are considered with other evidence of academic promise (recommendation letters, grade-point average). GRE General Test scores also are used in financial aid decisions. Beginning with fall 2022 applicants, GRE scores will no longer be required. Currently the requirement may be waived on a case-by-case basis.

## Financial Support

A significant number of research assistantships are available on a variety of research projects, and a limited number of teaching assistantships may be available. Selection of recipients usually is based on scholastic achievement and research interest.

## Career Advancement

Current and projected demand for M.S. graduates is excellent. Graduates are placed in advanced technical positions in industry, consulting firms, or government, or they may continue their graduate study. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

## Academic Plans

### Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# Civil and Environmental Engineering, Ph.D.

Graduate study in civil and environmental engineering prepares students for professional careers and further study. The principal concentration areas are environmental engineering and environmental science; hydraulics, hydrology, and water resources; structures, mechanics, and materials; sustainable water development; and transportation.

## Research and Study Areas

### Structures, Mechanics, and Materials

The structures, mechanics, and materials curriculum is designed for students who wish to gain knowledge and skill in the mechanics of solids and structures that they can apply to civil infrastructure systems and other fields. The program concentrates on developing appropriate methodologies for tackling broad, complex issues related to civil infrastructure systems, and on educating engineers in the implementation and application of methodologies to actual engineering projects. Faculty members have expertise in structural engineering, design optimization, solid mechanics, and computational methods.

### Transportation Engineering

The transportation engineering curriculum is geared toward students interested in developing specialized knowledge and skills applicable to the diverse set of issues associated with transportation. Faculty members have expertise in traffic engineering, infrastructure management systems, pavement engineering, advanced construction materials, dynamic load and pavement simulation, optimal design, winter highway maintenance, real-time simulation, human factors, intelligent sensors, nondestructive testing, transportation planning, and travel demand modeling.

### Water and the Environment

The water and the environment graduate program focuses on both fundamental and applied aspects of environmental systems and processes across a range of scales. The water and the environment program offers unique opportunities for students to actively participate in the research, analysis, and design aspects of real-world problems. There are three areas of specialization—environmental engineering and science; hydraulics, hydrology, and water resources; and sustainable water development.

The environmental engineering and science curriculum provides a comprehensive base of coursework and research in the areas of air and water quality management; environmental chemistry and microbiology; natural systems modeling; and processes for water supply, pollution control, and solid and hazardous waste management.

The hydraulics, hydrology, and water resources curriculum is associated with IIHR—Hydrosience & Engineering, a world-renowned research institute, where senior staff members of the institute are professors in the program. IIHR offers unique curriculum opportunities in laboratory and field-scale experimentation, and in mathematical modeling with IIHR's high-speed computer facilities.

The sustainable water development curriculum is focused on training interdisciplinary professional engineers, researchers, educators, and those who are ready to meet

the water resource challenges of communities most in need. Community service and professional development experiences complement innovative research at the food, energy, and water nexus.

Across all specialization areas within water and the environment, interdisciplinary research and study are conducted with programs including the Center for Global and Regional Environmental Research, the Center for Health Effects of Environmental Contamination, the Iowa Superfund Research Program, the Hazardous Substances Research Center, and the Center for Biocatalysis and Bioprocessing; the Departments of Chemical and Biochemical Engineering (College of Engineering), Earth and Environmental Sciences, Geographical and Sustainability Sciences (College of Liberal Arts and Sciences), Microbiology and Immunology (Carver College of Medicine), and Occupational and Environmental Health (College of Public Health); and the School of Planning and Public Affairs (Graduate College). Other areas of interdisciplinary focus include groundwater contamination, biotechnology, global climate change, and hazardous substances.

## Requirements

The Doctor of Philosophy program in civil and environmental engineering requires a minimum of 72 s.h. of graduate coursework, including at least 43 s.h. in formal coursework. Students may count a maximum of 29 s.h. in CEE:7999 Research: Civil and Environmental Engineering Ph.D. Dissertation toward the degree. Students must maintain a cumulative g.p.a. of at least 3.00. The doctoral degree is granted primarily on the basis of achievement rather than on a prescribed course of study.

Students may count up to 24 s.h. from the M.S. in civil and environmental engineering or from another qualified graduate program toward the Ph.D. with departmental approval.

All students usually need at least three years of full-time graduate study to complete the degree. They must pass a qualifying examination and must pass a written and oral comprehensive examination before they may be formally admitted to Ph.D. candidacy; the comprehensive examination usually is taken after all required coursework has been completed. Students devote one year to the preparation of a dissertation that contributes to knowledge in the field; they must defend their dissertation successfully in a final examination.

## Core Courses

Students must successfully complete the appropriate civil and environmental graduate core courses for their area of focus. They are expected to complete core courses during their first year of study.

## Elective Courses

Students should choose elective courses from any academic area that strengthens their knowledge of water and the environment and provides needed research topic training. Independent study, such as CEE:5998 Individual Investigations: Civil and Environmental Engineering, is not considered a suitable elective.

## Seminars

All full-time students are required to register for and participate in seminars in their respective program of study; this includes CEE:5096 Water, Energy, and Food

Nexus Seminar for areas that fall under the water and the environment curriculum (environmental engineering, environmental science, hydraulics, sustainable water development, and water resources) or CEE:5098 Graduate Seminar in Structures, Materials, Mechanics, and Transportation for students in structures, mechanics and materials or transportation engineering. Depending on the program of study, there may be additional seminar requirements. For more detailed information, visit the department's Graduate Program Resources web page.

## Ethics Course

Students must enroll in ENGR:7270 Engineering Ethics.

## Dissertation

Students must complete a dissertation and may apply up to 29 s.h. in CEE:7999 Research: Civil and Environmental Engineering Ph.D. Dissertation toward the degree. A total of 6 s.h. may be taken on a graded basis at the discretion of the advisor. Consult the department's Graduate Program Resources web page for more detailed information about different program of study areas.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Each of the program's curricula is flexible; students may be admitted from all disciplines of engineering as well as from the mathematical and basic sciences.

Applicants should have a graduate g.p.a. of at least 3.00. Those with grade-point averages slightly lower should contact the department.

Applicants should have a combined verbal and quantitative score of at least 301 on the Graduate Record Examination (GRE) General Test. Lower scores are considered with other evidence of academic promise (recommendation letters, grade-point average). GRE General Test scores also are used in financial aid decisions. Beginning with fall 2022 applicants, GRE scores will no longer be required. Currently the requirement may be waived on a case-by-case basis.

## Financial Support

A significant number of research assistantships are available on a variety of research projects, and a limited number of teaching assistantships may be available. Selection of recipients usually is based on scholastic achievement and research interest.

## Career Advancement

Graduates are placed in advanced technical positions in industry, consulting firms, or government.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter

preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

## Academic Plans

### Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

### Civil and Environmental Engineering, Ph.D.

- Environmental Engineering Subprogram [p. 1519]
- Environmental Science Subprogram [p. 1520]
- Hydraulics Subprogram [p. 1521]
- Structures, Mechanics and Materials Subprogram [p. 1522]
- Sustainable Water Development Subprogram [p. 1523]
- Transportation Subprogram [p. 1524]
- Water Resources Subprogram [p. 1525]

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Typically completed by the end of the first year. Refer to the CEE website and the Graduate College Manual of Rules and Regulations for details.

c Must be completed during first semester.

d Required every semester.

e Work with academic advisor to determine graduate elective coursework and sequence. See General Catalog and CEE website for specifics.

f Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

g Oral exam typically completed by the end of the second year after passing the Qualifying Exam; written dissertation prospectus must be submitted to the committee two weeks before exam.

h Enrollment during four semesters is required.

i Total of 29 s.h. from CEE:7999 is required. May take up to 6 s.h. for a letter grade; all other credits must be taken on S/U basis.

j Technical communication requirement; approved courses include RHET:7500, RHET:7930, RHET:7940. Other courses may be considered and should be submitted to the CEE Director of Graduate Studies for approval.

k Oral dissertation defense.

<b>Fourth Year</b>		
<b>Fall</b>		
CEE:5098	Graduate Seminar in Structures, Materials, Mechanics, and Transportation <sup>d</sup>	0
CEE:7999	Research: Civil and Environmental Engineering Ph.D. Dissertation <sup>g</sup>	2
<b>Hours</b>		<b>2</b>
<b>Spring</b>		
CEE:5098	Graduate Seminar in Structures, Materials, Mechanics, and Transportation <sup>d</sup>	0
Final Exam <sup>i</sup>		0
<b>Hours</b>		<b>0</b>
<b>Total Hours</b>		<b>72</b>

- a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- b Typically completed by the end of first year; refer to department website and Graduate Handbook for specifics.
- c Must be completed during first semester.
- d Required every semester.
- e Work with academic advisor to determine elective graduate coursework and sequence. See General Catalog and department website for specifics.
- f Oral exam to be completed within one year of passing the Qualifying Exam, typically by the end of second year; a written prospectus is submitted to the committee two weeks before oral exam.
- g Minimum of 29 s.h. required. Up to 6 s.h. for a letter grade; all other credits must be taken on S/U basis.
- h Technical communication requirement; approved courses include RHET:7500, RHET:7930, RHET:7940. Other courses may be considered and should be submitted to the CEE Director of Graduate Studies for approval.
- i Dissertation defense.

## Water Resources Subprogram

Course	Title	Hours
<b>Academic Career</b>		
<b>Any Semester</b>		
72 s.h. of graduate level coursework must be completed; up to 24 s.h. of graduate transfer credits allowed upon approval. More information is included in the General Catalog and on department website.

<b>Total Hours</b>		<b>72</b>

- a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- b Typically completed by the end of the first year. Refer to the CEE website and the Graduate College Manual of Rules and Regulations for details.
- c Must be completed during first semester.
- d Required every semester.
- e Work with academic advisor to determine graduate elective coursework and sequence. See General Catalog and CEE website for specifics.
- f Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- g Oral exam typically completed by the end of the second year after passing the Qualifying Exam; written dissertation prospectus must be submitted to the committee two weeks before exam.
- h Enrollment during four semesters is required.
- i Total of 29 s.h. from CEE:7999 is required. May take up to 6 s.h. for a letter grade; all other credits must be taken on S/U basis.
- j Technical communication requirement; approved courses include RHET:7500, RHET:7930, RHET:7940. Other courses may be considered and should be submitted to the CEE Director of Graduate Studies for approval.
- k Oral dissertation defense.

# Electrical and Computer Engineering

## Chair

- Er-Wei Bai

**Undergraduate majors:** computer science and engineering (B.S.E.); electrical engineering (B.S.E.)

**Graduate degrees:** M.S. in electrical and computer engineering; Ph.D. in electrical and computer engineering

**Faculty:** <https://ece.engineering.uiowa.edu/people>

**Website:** <https://ece.engineering.uiowa.edu/>

Electrical engineers and computer engineers make vital contributions to nearly all facets of modern society through their work in areas such as the internet of things (IoT), artificial intelligence, deep learning, computer systems, software applications, medical imaging, robotics, wireless communications, and fiber optics. From smart technologies to high-definition television, cellular telephones, and computer networks, the contributions of electrical and computer engineers are constantly reinventing the world.

Many benefits that have sprung from electrical and computer engineering technology now are taken for granted—noninvasive imaging of the brain and other internal organs, astonishing views of the solar system's outer planets, and wireless telecommunications. Electrical and computer engineers also play crucial roles in major emerging technologies, such as driverless vehicles, smart cities, and human genomics.

As the United States strives to retain or enlarge its share of national and international markets, electrical and computer engineers will play a more important role in fostering innovation, increasing productivity, and creating intelligent systems to improve the quality of life for residents.

Electrical and computer engineers work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, television, and power industries, and many graduates pursue entrepreneurial ventures.

## Programs

### Undergraduate Programs of Study

#### Majors

- Major in Computer Science and Engineering (Bachelor of Science in Engineering) [p. 1534]
- Major in Electrical Engineering (Bachelor of Science in Engineering) [p. 1538]

### Graduate Programs of Study

#### Majors

- Master of Science in Electrical and Computer Engineering [p. 1543]
- Doctor of Philosophy in Electrical and Computer Engineering [p. 1545]

## Research and Study Areas

### Augmented Reality and Multimodal Sensing

The department is actively involved in research to advance augmented reality and virtual reality systems, particularly regarding their underlying multimodal imaging and sensing techniques. Work in this area relies on mathematics, instrumentation, software engineering, computer vision, and computer graphics to design and engineer novel methodologies and systems for sensing, virtually replicating, understanding, and then augmenting the world around us. This is an interdisciplinary research area that encompasses fields such as: 3D/4D surface imaging and measurement, 3D/4D data compression and communication, real-time computer vision, computer-aided surgeries, machine learning, computer graphics, human-computer interaction, multimedia on mobile devices, and computer-aided design. In addition to advancing the basic science within those fields, departmental researchers are pursuing various applications of their work via collaborations with the Carver College of Medicine [p. 1715], the Public Digital Arts faculty cluster, the Iowa Informatics Initiative, the Iowa Institute for Biomedical Imaging, and the Iowa Technology Institute.

### Bioinformatics and Computational Biology

The Center for Bioinformatics and Computational Biology (CBCB) is a multidisciplinary research enterprise that encompasses numerous laboratories and collaborates with many graduate programs on campus. Students may earn the Certificate in Informatics [p. 1646] (Graduate College), to augment their Ph.D. training in disciplines ranging from molecular biology to biochemistry to computer science to engineering.

The Coordinated Laboratory for Computational Genomics, a CBCB affiliate, engages in a broad range of research activities that complement the Human Genome Project. Members of the laboratory develop new hardware and software techniques for analysis and annotation of genomic sequence, its transcription and translation, and the proteome. Other efforts are aimed at systematic capture and curation of phenotypic information acquired from massive databases of clinical information derived from collaborations with the Carver College of Medicine. The goal of these projects is to elucidate the mechanisms of human disease and develop promising new methods for cures and treatments.

The laboratory's facilities include more than 200 workstations, three Linux clusters, and access to the National Science Foundation (NSF) TeraGrid and other high performance computing facilities. Projects in the laboratory frequently involve cutting-edge genomic and proteomic instruments such as the Roche 454 next-generation sequencing platform and several high-throughput gene expression (microarray) measurement platforms.

### Computer Systems

High performance computing research involves development of collaborative and parallel computing environments and associated software tools, and use of these facilities and tools in varied application domains, including image processing and computational biology. Current work in networking focuses on protocols and layer-integration schemes that

support high performance wireless networking, and on control and coordination of mobile ad hoc networks. Current research facilities in these areas include several large cluster computers and an experimental asynchronous transfer mode (ATM) network.

Departmental facilities that support this work include Linux and Windows workstations and server nodes that provide college-wide networked computer services. Advanced computing facilities also are available at national supercomputing centers and federal laboratories.

## Control Systems and Systems Theory

Control systems and systems theory use feedback to improve the predictability and efficiency of engineered systems ranging from electronic amplifiers to vehicle guidance systems, manufacturing processes, communication channels, and the internet. Work in control systems and systems theory draws heavily on results from mathematics, physics, and computer science to model the systems that are to be controlled and to implement feedback controllers.

Current research emphasizes optimal, adaptive, digital, robust, and stochastic control and the control of discrete event dynamical systems. Recent work has concerned the estimation, identification, and robust control of linear and nonlinear dynamical systems; set membership identification, control over wireless communication channels; coordinated fault tolerant control of unmanned vehicles; use of control theory to analyze distributed computing, communications, and manufacturing systems; interplay between communications and control; design of fast digital controllers using subband coding; and multirate control systems.

Research in control systems and systems theory is supported by extensive computing resources and collaborations with local industry, the National Advanced Driving Simulator (NADS), the Iowa Technology Institute, and the Carver College of Medicine [p. 1715].

## Nanoscale Electronics and Spintronics

Nanotechnology is the branch of technology that deals with dimensions that are 10,000 times smaller than the width of the hair. Nanoscience and nanotechnology involve the ability to see and to control individual atoms and molecules. Utilizing the nanofabrication and nanoimaging facilities available on campus, nanoscale transistors, optical circuits, biosensors, and solar cells are being developed. Departmental researchers are pursuing experimental, theoretical, and large-scale computational approaches.

## Optoelectronics

Research in this area is carried out primarily in the new Iowa Center for Research, Exploration, and Advanced Technology in Engineering and Sciences (Iowa CREATES) at the Iowa Advanced Technology Laboratories, a well-equipped, modern facility two blocks from the Seamans Center for the Engineering Arts and Sciences. Current research topics are optical and electronic properties of semiconductors, semiconductor devices, electro-optics, nonlinear optics, nonlinear wave propagation in plasmas, nanotechnology, and medical devices. This research is at the interface of optical

engineering, materials engineering, quantum physics, and electromagnetics.

Much work is done in collaboration with other University of Iowa departments, including the Departments of Physics and Astronomy, and Chemistry (College of Liberal Arts and Sciences), and the Departments of Internal Medicine and Neurosurgery (Carver College of Medicine). Facilities include two molecular beam epitaxy reactors (in physics and astronomy), a microfabrication laboratory with nanometer resolution capabilities, electrical characterization capability to 22 GHz, several Ti-sapphire lasers, a mid-infrared optical parametric oscillator, and plasma equipment for nonlinear wave plasma interaction studies.

Examples of current projects are the design and fabrication of diode lasers and light-emitting diodes based on the bandgap engineering of antimony and arsenic-based III-V compound semiconductors, phase control of laser arrays, development of an all-optical power equalizer, characterization of quantum well devices, nonlinear waveguide devices, development of a noncontact method to measure transport properties, plasma and optical soliton excitation and propagation, development of cellular probes, gas sensors, and a laser scalpel for medical research.

## Signal and Image Processing

Research in image processing and basic and applied signal processing is supported by a digital signal processing laboratory and an image analysis laboratory. Collaborative research with faculty in the Departments of Radiology, Neurology, Psychiatry, Internal Medicine, Ophthalmology and Visual Sciences, Radiation Oncology (Carver College of Medicine), and the Roy J. Carver Department of Biomedical Engineering is directed at quantitative analysis of medical images.

In the area of signal processing, current projects include analysis and design of efficient adaptive algorithms for signal processing, efficient coding and transmission of speech, speech processing aids for the hearing impaired, robust equalization of uncertain channels, application of neural networks to communications systems, multirate signal processing, and subband coding and channel equalization.

Image processing and analysis projects include development of novel methods for image segmentation, image registration, computer-aided detection and diagnosis, early identification of disease patterns from medical image data, computer-aided surgical planning, virtual and augmented reality medical image visualization, building anatomic atlases, and a broad range of translational medicine projects focusing on research and clinical applications of the novel methods. The areas of interest span all scales, from molecules to cells to small animals to humans, and cover a broad range of organ systems and targeted diseases. The spectrum of medical imaging modalities used for research and applications in image processing and analysis is equally broad, encompassing all existing modalities, including X-ray, CT, MR, PET, SPECT, and OCT.

The Medical Image Analysis Labs consist of several specialized facilities for digital image processing. They are equipped with state-of-the-art devices for data storage, transfer, visualization, and analysis. High-capacity data storage devoted to image processing research offers more than 35 TB of online hard disk space. An augmented reality medical image visualization lab serves as a high performance collaborative resource for the Iowa Institute for Biomedical Imaging. The institute makes additional resources available to

image processing research, including small and large animal as well as human research scanning facilities, and provides a backbone for interdisciplinary medical image analysis research to electrical and computer engineering graduate students and faculty.

## Wireless Communication Systems

The department is engaged in research using wireless sensor networks (WSNs), which consist of spatially distributed autonomous devices that use sensors to cooperatively monitor physical or environmental conditions such as temperature, sound, vibration, pressure, motion, and pollutants at different locations. WSNs are used for environment and habitat monitoring, health care applications, home automation, and traffic control. Current research includes the application of WSNs, traditional telemetry, and commercial cellular communication infrastructure for geosciences data collection (e.g., rainfall, water quality, soil moisture).

Another important research interest involving distributed sensor networks is the distributed control of power systems, especially requirements of the next-generation electric grid with smart metering and distributed generation using small-scale wind and solar generators. Research on WSNs also includes the design of cooperative communication techniques for energy efficient WSNs and issues of localization, network organization, and control.

Research activities in communication systems focus on design and analysis of receivers for digital wireless communications, especially the development of effective and practical receivers for multiple-user wireless cellular systems in multipath channels. Topics of research include the design, analysis, and experimental demonstration of large-scale distributed multiple-input multiple-output (MIMO) arrays for communication sensing and electronic warfare; precision interference cancellation techniques using feedback control; and synchronization and channel estimation for massive MIMO Base Stations.

## Facilities

### Undergraduate Core

Electrical and computer engineering provides core instruction for the college in electrical circuits, electronics, instrumentation, and computers. A key part of this core teaching responsibility lies in providing students with an early opportunity to use engineering laboratory instrumentation.

### Undergraduate Laboratories

The department's undergraduate laboratories include facilities for the study of the internet of things (IoT), electrical and electronic circuits, wireless communication, power and sustainable energy, signals and systems, embedded systems, measurement automation, communication systems, control systems, image processing, robotics, and optics. The laboratories are equipped with modern equipment, including digital oscilloscopes, computer-controlled virtual instrumentation, and software and hardware for embedded-systems development.

### Graduate Facilities and Laboratories

The department has laboratories intended primarily for graduate research in the areas of virtual and augmented

reality, deep learning, big data, bioinformatics, image processing, software engineering, electro-optics, control systems, medical imaging and image analysis, large-scale intelligent systems, and wireless communication. Linux, Macintosh, and Windows workstations and server nodes provide college-wide networked computing support. Through cooperative arrangements, advanced computing facilities at national supercomputing centers, federal laboratories, and other universities are available for graduate research.

## Courses

### Electrical and Computer Engineering Courses

#### **ECE:0000 Electrical Engineering Internship/Co-op 0 s.h.**

Electrical engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

#### **ECE:1000 First-Year Seminar 1 s.h.**

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

#### **ECE:2400 Linear Systems I 3 s.h.**

Introduction to continuous and discrete time signals and systems with emphasis on Fourier analysis; examples of signals and systems; notion of state and finite state machines; causality; linearity and time invariance; periodicity; Fourier transforms; frequency response; convolution; IIR and FIR filters, continuous and discrete Fourier transforms; sampling and reconstruction; stability. Prerequisites: ENGR:2120 and MATH:2560.

#### **ECE:2410 Principles of Electronic Instrumentation 4 s.h.**

Principles of analog signal amplification, signal conditioning, filtering; operational amplifier circuit analysis and design; principles of operation of diodes, bipolar transistors, field effect transistors; discrete transistor amplifier analysis and design; laboratory included. Prerequisites: ENGR:2120 and PHYS:1612 and MATH:2560.

#### **ECE:3000 Electrical and Computer Engineering Professional Seminar 1 s.h.**

Professional aspects of electrical and computer engineering, and computer science, presented through lectures and discussions by guest speakers, field trips, and panel discussions. Requirements: junior standing.

#### **ECE:3320 Introduction to Digital Design 3 s.h.**

Modern design and analysis of digital switching circuits; combinational logic; sequential circuits and system controllers; interfacing and busing techniques; design methodologies using medium- and large-scale integrated circuits; lab arranged. Requirements: sophomore standing.

#### **ECE:3330 Introduction to Software Design 3 s.h.**

Design of software for engineering systems; algorithm design and structured programming; data structures; introduction to object-oriented programming in JAVA; applications to engineering problems; lab arranged. Prerequisites: ENGR:2730. Same as IGPI:3330.

- ECE:3350 Computer Architecture and Organization** 3 s.h.  
Basic concepts; computer evolution, register transfer level design, simulation techniques, instruction sets (CISC and RISC), assembly language programming, ALU design, arithmetic algorithms and realization of arithmetic functions, hardwired and microprogrammed control, memory hierarchies, virtual memory, cache memory, interrupts and DMA, input/output; introduction to high performance techniques, pipelining, multiprocessing; introduction to hardware description languages (Verilog, VHDL); students design and simulate a simple processor. Prerequisites: ENGR:2730 and ECE:3320.
- ECE:3360 Embedded Systems** 3 s.h.  
Microprocessors and microcontrollers as components in engineering systems; embedded system design processes; microcontroller/microprocessor architecture; interrupts and traps; memory and device interfacing; low-level and high-level software design for embedded systems; examples of embedded system architecture and design; fundamentals of operating systems; tasks and processes; context switching and scheduling; memory and file management, interprocess communication; device drivers. Prerequisites: ENGR:2730 and ECE:3320. Corequisites: ECE:2410.
- ECE:3400 Linear Systems II** 3 s.h.  
Builds on concepts from ECE:2400 towards application in digital signal processing; lab exercises, hands-on term project; review of key linear systems concepts; MATLAB basics, tools, and functions for digital signal processing; discrete time systems, difference equations in digital signal processing; Fourier analysis of discrete time signals; transient, steady-state, and frequency response of discrete time, linear time-invariant (LTI) systems; Z-transform analysis; sampling theorem and aliasing; power spectral density and periodograms; recording and processing of sound and music; finite impulse response (FIR) and infinite impulse response (IIR) filters; designing and using filters in MATLAB. Prerequisites: ECE:2400.
- ECE:3410 Electronic Circuits** 4 s.h.  
Design and analysis of FET and BJT amplifiers; low, midrange, high-frequency analysis; difference amplifiers; feedback amplifiers; SPICE simulation; power amplifiers; digital logic families. Prerequisites: ECE:2410 and ECE:2400.
- ECE:3500 Communication Systems** 3 s.h.  
Introduction to analog and digital communications, with an emphasis on modulation and noise analysis; Fourier analysis, probability theory, random variable and processes, AM, FM, pulse-coded modulation, binary digital modulation, SNR analysis of AM and FM, BER analysis of digital modulation schemes. Prerequisites: ECE:2400.
- ECE:3540 Communication Networks** 3 s.h.  
Communication networks, layered network architectures, applications, network programming interfaces (e.g., sockets), transport, congestion, routing, data link protocols, local area networks, emerging high-speed networks, multimedia networks, network security, internet protocol; technology examples. Prerequisites: ENGR:2730. Corequisites: STAT:2020.
- ECE:3600 Control Systems** 3 s.h.  
Fundamental concepts of linear feedback control, mathematical modeling, transfer functions, system response, feedback effects, stability, root-locus and frequency response analysis and design, compensation, lab arranged. Prerequisites: ECE:2400.
- ECE:3700 Electromagnetic Theory** 3 s.h.  
Electric and magnetic forces, Maxwell's equations, wave propagation; applications, including radiation, transmission lines, circuit theory. Prerequisites: MATH:3550 and PHYS:1612.
- ECE:3720 Semiconductor Devices** 3 s.h.  
Fundamentals of semiconductor physics and devices; principles of the p-n junction diode, bipolar transistor, field effect transistor. Prerequisites: ECE:3410 and PHYS:1612.
- ECE:3998 Individual Investigations: Electrical Engineering** arr.  
Individual projects for electrical engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.
- ECE:4480 Knowledge Discovery** 3 s.h.  
Knowledge discovery process including data reduction, cleansing, and transformation; advanced modeling techniques from classification, prediction, clustering, and association; evaluation and integration. Same as BAIS:4480.
- ECE:4720 Introductory Optics** 3 s.h.  
Wave motion and superposition, electromagnetic theory, photons, propagation of light, geometrical and physical optics, interference, diffraction, polarization, and Fourier optics; optical components, devices, and systems. Prerequisites: (PHYS:1512 or PHYS:2703 or PHYS:1612) and (MATH:1560 or MATH:1860). Same as PHYS:4720.
- ECE:4728 Introductory Solid State Physics** 3 s.h.  
Phenomena associated with solid state; classification of solids and crystal structures, electronic and vibrational properties in solids; thermal, optical, magnetic, dielectric properties of solids. Prerequisites: PHYS:3741. Same as PHYS:4728.
- ECE:4880 Principles of Electrical and Computer Engineering Design** 3 s.h.  
Design problems requiring integration of subject matter from other required electrical and computer engineering courses. Prerequisites: ECE:2410 and ENGR:2730. Requirements: senior standing.
- ECE:4890 Senior Electrical and Computer Engineering Design** 3 s.h.  
Individual or team project; demonstration of completed project and formal engineering report. Prerequisites: ECE:4880. Requirements: completion of three required subprogram courses.
- ECE:5000 Graduate Seminar: Electrical and Computer Engineering** 0 s.h.  
Presentation and discussion of recent advances and research in electrical and computer engineering by guest lecturers, faculty, students. Requirements: graduate standing.
- ECE:5210 Bioinformatics Techniques** 3 s.h.  
Informatics tools and techniques applied to modern problems in biomedicine and basic life sciences; common tools, experience applying tools in contemporary problem settings; genomics and genetics, how to sequence a genome, transcription and expression, SNPs, Perl, BioPerl, Perl modules, Ensembl API, BLAST/BLAT, NCBI, UCSC, Ensembl Genome browsers, linkage, association, disease gene identification. Prerequisites: BIOL:1411 and (ENGR:2730 or CS:2110 or CS:5110). Same as BME:5320, IGPI:5321.

- ECE:5220 Computational Genomics** 3 s.h.  
Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: (BIOS:4120 or STAT:3510) and (CS:5110 or ENGR:1300). Recommendations: completion of BME:5320. Same as BIOL:5320, BME:5330, GENE:5173, IGPI:5330.
- ECE:5300 Switching Theory** 3 s.h.  
Switching algebras; combinational circuits—hazards, minimization, multiple-output networks; sequential circuits—critical races, essential hazards, fundamental-mode, pulse-mode, synchronous circuits-state assignment, state reduction; input-output experiments. Prerequisites: ECE:3320.
- ECE:5320 High Performance Computer Architecture** 3 s.h.  
Problems involved in designing and analyzing current machine architectures using hardware description language (HDL) simulation and analysis, hierarchical memory design, pipeline processing, vector machines, numerical applications, multiprocessor architectures and parallel algorithm design techniques; evaluation methods to determine relationship between computer design and design goals. Prerequisites: ECE:3350 or CS:3620. Same as CS:5610.
- ECE:5330 Graph Algorithms and Combinatorial Optimization** 3 s.h.  
Combinatorial optimization problems; time complexity; graph theory and algorithms; combinatorial optimization algorithms; complexity theory and NP-completeness; approximation algorithms; greedy algorithms and matroids. Prerequisites: ECE:3330. Same as IGPI:5331.
- ECE:5380 Testing Digital Logic Circuits** 3 s.h.  
Logic models for faults; fault detection in combinational and sequential circuits; fault-diagnosis; design for testability; random testing, compressed data testing, built-in testing. Prerequisites: ECE:3320.
- ECE:5410 Advanced Circuit Techniques** 3 s.h.  
Advanced circuit techniques and principles; analog circuit design including amplifiers, oscillators, multipliers, modulators, phase-locked loops, active filters, switching power supplies, analog to digital and digital to analog converters; lab activities include circuit simulation, design, printed circuit board (PCB) layout and fabrication, assembly, and testing. Prerequisites: ECE:3410.
- ECE:5420 Power Electronics** 3 s.h.  
Fundamental concepts and design techniques of power electronics circuits; switching power pole and various switch-mode DC to DC power conversion topologies; feedback control of switch-mode DC to DC power supplies; diode rectification of AC utility power and Power Factor Control (PFC) circuits; electromagnetic concepts and design of high-frequency inductors and transformers; electrically isolated switch-mode DC power supply topologies and soft-switching DC-DC converters and inverters; techniques for synthesis of DC and low-frequency AC sinusoidal voltages. Prerequisites: PHYS:1611 and ENGR:2120 and MATH:2560. Requirements: junior standing.
- ECE:5430 Electric Drive Systems** 3 s.h.  
Basic characteristics of DC and AC electric motors and their associated power electronics interfaces; applications of electric machines and drives that are essential for wind turbines, electric and hybrid-electric; emphasis on vehicles; electric machines in context of overall drives and associated applications; space-vector theory used to analyze electric machines and drives; DC motor/generator characteristics and control; AC single phase and three-phase motor characteristics and feedback control, including AC synchronous and induction motors. Prerequisites: ENGR:2120 and PHYS:1611 and MATH:2560. Requirements: junior standing.
- ECE:5450 Machine Learning** 3 s.h.  
Fundamentals of machine learning theory including regression, classification, neural networks, clustering, and principal component analysis; engineering applications. Prerequisites: ECE:2400 or BME:2200. Same as IGPI:5450.
- ECE:5455 Detection and Estimation** 3 s.h.  
Basic strategies to cope with noise in measurements with three objectives at core of most machine learning tasks—hypothesis testing (where one must choose between various hypotheses), parameter estimation (where multiple parameters whose values define how a system will behave must be estimated from noisy measurements), and filtering (where a noisy music signal must be cleaned up); topics include probability and statistics, random variables and signals, hypothesis testing, parameter estimation, discrete- and continuous-time random processes, and optimal filtering; assignments, written exams, and projects. Prerequisites: STAT:2020 and ECE:2400.
- ECE:5460 Digital Signal Processing** 3 s.h.  
Theory, techniques used in representing discrete-time signals; system concepts in frequency and sampling domains; FIR and IIR digital filter theory, design and realization techniques; theory, application of discrete Fourier transforms/FFT. Prerequisites: ECE:3400. Same as IGPI:5460.
- ECE:5470 Medical Imaging Physics** 3 s.h.  
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210. Same as BME:5210, IGPI:5206.
- ECE:5480 Digital Image Processing** 3 s.h.  
Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image pre-processing, edge detection, filtering; image segmentation. Prerequisites: ECE:2400 or BME:2200. Same as IGPI:5480.

**ECE:5490 Multi-Dimensional Image Analysis Tools and Techniques 3 s.h.**

Broad exposure to common tools of medical imaging analysis in commercial, clinical, and research settings, including algorithm development (using C++ and ITK), rapid prototyping (SimpleITK, nipy, ipython notebook), statistical analysis (R), machine learning (scikit-learn, keras/tensorflow) and reproducible science tools (python, git, bash); special emphasis on big data challenges associated with volume, velocity, and veracity; real-world settings for problems include image-guided robotic surgery, dose treatment planning, and image analysis. Prerequisites: ECE:5480 and (ECE:3330 or CS:2820).

**ECE:5500 Digital Communications 3 s.h.**

Random processes, source coding, digital transmission at baseband, optimum receiver design for Gaussian noise, error probability and power spectrum analysis, signal design for bandwidth limited channels, digital carrier modulation, bandwidth/energy/error probability tradeoffs, coding for error detection and correction. Prerequisites: STAT:2020 and ECE:3500.

**ECE:5520 Introduction to Information and Coding Theories 3 s.h.**

Quantitative measure of information; source encoding; error detecting codes; block and convolutional codes, design of hardware and software implementations; Viterbi decoding. Prerequisites: ECE:3500 and STAT:2020.

**ECE:5530 Wireless Sensor Networks 3 s.h.**

Wireless sensor networks overview; antennas, radio propagation models; WSN power and energy considerations, engineering issues, batteries, networks layers, stacks; medium access control (MAC); spread spectrum, FHSS, CDMA; infrastructure establishment; WSN routing; localization; synchronization; sensors; RFID; WSN case studies; lab. Prerequisites: STAT:2020 and ECE:3500. Requirements: senior standing.

**ECE:5550 Internet of Things 3 s.h.**

Internet of things (IoT) describes the evolution of the internet to intelligent devices, sensors, actuators, controllers, and other types of internet-enabled components; soon, IoT-based applications will enable seminal advances in a wide range of areas including health and lifestyle, transportation, smart cities, environment, energy, agriculture, and industry; topics include IoT logical and physical structure, IoT-enabled internet services, IoT devices/platforms/endpoints, IoT application domains, IoT security and privacy issues, and IoT data analytic; case studies and projects focused on design and implementation of a working IoT application. Prerequisites: ENGR:2730. Requirements: background in computer networks or embedded systems.

**ECE:5600 Control Theory 3 s.h.**

State space approach; controllability, observability, canonical forms, Luenberger observers, feedback control via pole placement, stability, minimal realization and optimal control. Prerequisites: ECE:3600.

**ECE:5620 Electric Power Systems 3 s.h.**

Overview of electric power systems; single phase and three-phase representations of electric power signals and electromagnetic concepts; AC transmission lines and underground cables, power flow in a power system network, AC power transformers, High Voltage DC (HVDC) power transmission, electric power distribution, synchronous generators, voltage regulation and stability, power system transients and dynamic stability, control of interconnected power systems, transmission line faults, transient over-voltages and surge protection. Prerequisites: PHYS:1611 and ENGR:2120 and MATH:2560. Requirements: junior standing.

**ECE:5630 Sustainable Energy Conversion 3 s.h.**

Overview of sustainable energy conversion technologies; thermal energy conversion; Carnot and Rankine cycles; solar resource and raw energy availability, PV solar cell characteristics, solar panel construction, Maximum Power Point (MPP) tracking and utility grid interface; wind energy conversion resource and available energy, wind turbine configurations, electrical power interface electronics; ocean energy conversion tidal and wave resources and conversion technologies; tidal basin containment conversion and tidal current turbine systems. Prerequisites: ENGR:2120 and PHYS:1611 and MATH:2560. Requirements: junior standing.

**ECE:5640 Computer-Based Control Systems 3 s.h.**

Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisites: ECE:5600. Same as IGPI:5641.

**ECE:5700 Advanced Electromagnetic Theory 3 s.h.**

Time varying fields; plane wave propagation, reflection, refraction; waves in anisotropic media transmission lines, impedance matching, Smith chart; metallic and dielectric wave guides; resonators; antennas, antenna arrays. Prerequisites: ECE:3700.

**ECE:5720 Solid State Physical Electronics 3 s.h.**

Advanced topics in semiconductor physics and devices; elementary concepts in quantum and statistical mechanics, diodes, bipolar transistor, field-effect transistor. Prerequisites: ECE:3720.

**ECE:5780 Optical Signal Processing 3 s.h.**

Linear systems description of optical propagation; diffraction and angular plane wave spectrum; lenses as Fourier transformers, lens configurations as generalized optical processors; lasers, coherence, spatial frequency analysis; holography; convolvers, correlators, matched filters; synthetic aperture radar; optical computing. Requirements: for ECE:5780—ECE:3700; for PHYS:4820—PHYS:3812. Same as PHYS:4820.

**ECE:5790 Electro Optics 3 s.h.**

Wave equation solutions; optical birefringence; finite beam propagation in free space, dielectric waveguides and fibers; optical resonators; nonlinear phenomena; electro-optic, acousto-optic modulation; optical detection, noise; application to communication systems. Requirements: for ECE:5790—ECE:3700; for PHYS:4726—PHYS:3812. Same as PHYS:4726.

**ECE:5800 Fundamentals of Software Engineering 3 s.h.**

Problem analysis, requirements definition, specification, design, implementation, testing/maintenance, integration, project management; human factors; management, technical communication; design methodologies; software validation, verification; group project experience. Prerequisites: CS:2820 or ECE:3330. Same as CS:5800.

**ECE:5810 Formal Methods in Software Engineering****3 s.h.**

Models, methods, and their application in all phases of software engineering process; specification methods; verification of consistency, completeness of specifications; verification using tools. Prerequisites: ECE:3330 or CS:2820. Recommendations: CS:4350. Same as CS:5810.

**ECE:5820 Software Engineering Languages and Tools****3 s.h.**

Modern agile software development practices for cloud and web-based applications, using state-of-the-art software engineering languages, tools, and technologies; agile software development practices, software-as-a-service (SAAS), and the Ruby on Rails Development Framework. Prerequisites: ECE:3330 or CS:2820. Same as CS:5820.

**ECE:5830 Software Engineering Project****3 s.h.**

Team software development project using concepts and methodologies learned in earlier software engineering classes; practical aspects of large-scale software development. Prerequisites: ECE:5820. Same as CS:5830.

**ECE:5995 Contemporary Topics in Electrical and Computer Engineering****arr.**

New topics or areas of study not offered in other electrical and computer engineering courses; based on faculty/student interest; not available for individual study.

**ECE:5998 Individual Investigations: Electrical and Computer Engineering****arr.**

Individual projects for electrical and computer engineering graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

**ECE:5999 Research: Electrical and Computer Engineering M.S. Thesis****arr.**

Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for M.S. degree with thesis in electrical and computer engineering. Requirements: graduate standing.

**ECE:7470 Image Analysis and Understanding****3 s.h.**

Mathematical foundations and practical techniques of digital image analysis and understanding; image segmentation (from edges and regions), object description (from boundaries, regions, scale, scale insensitive descriptions, 3D shape, texture) pattern recognition (statistical and syntactic methods, cluster analysis), image understanding (knowledge representation, control strategies, matching, context, semantics), image analysis and understanding systems; lab arranged. Prerequisites: ECE:5480. Same as IGPI:7470.

**ECE:7480 Advanced Digital Image Processing****3 s.h.**

Advanced local operators (scale-space imaging, advanced edge detection, line and corner detection), image morphology (binary/gray scale operators, morphological segmentation and watershed), digital topology and geometry (binary/fuzzy digital topology, distance functions, skeletonization), color spaces, wavelets and multi-resolution processing (Haar transform, multi-resolution expansions, wavelet transforms in one or two dimensions, fast wavelet transform, wavelet packets), image registration (intensity correlation, mutual information, and landmark-based deformable registration methods). Prerequisites: ECE:5460 and ECE:5480. Same as IGPI:7480.

**ECE:7720 Semiconductor Physics****3 s.h.**

Electronic, optical, and materials properties of semiconductors. Prerequisites: PHYS:4728 and PHYS:5742. Same as PHYS:7720.

**ECE:7930 Seminar: Plasma Physics****arr.**

Current research. Same as PHYS:7930.

**ECE:7999 Research: Electrical and Computer Engineering Ph.D. Thesis****arr.**

Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for Ph.D. in electrical and computer engineering.

# Computer Science and Engineering, B.S.E.

The Bachelor of Science in Engineering (B.S.E.) program in computer science and engineering combines the technical content of a computer science degree and a computer engineering degree in a single degree program. The program curriculum is jointly taught by faculty from the Department of Electrical and Computer Engineering and the Department of Computer Science (College of Liberal Arts and Sciences). The program provides students with a strong theoretical and conceptual understanding of the principles underlying computer software and hardware along with the engineering analysis, design, and multidisciplinary teamwork skills needed to develop large and complex systems containing both software and hardware components.

The computer science and engineering program encompasses the technical rigor of a Bachelor of Science program in computer science and a Bachelor of Science program in computer engineering. Graduates gain the foundational knowledge provided by a computer science education together with the critical thinking, problem-solving, and system design skills at the heart of a computer engineering curriculum.

## Educational Objectives

Graduates of the computer science and engineering program will:

- exhibit leadership and vision in contributing to the computing-related technical and policy decisions of industry, government, and research enterprises;
- demonstrate computing skills and problem-solving abilities that permit them to contribute in a variety of technical, business, and academic careers;
- thrive in diverse, global, and multidisciplinary environments;
- possess the ability to communicate effectively and participate collaboratively in interactions with other computing and engineering professionals; and
- understand the importance of participating in lifelong learning activities that enhance their professional and personal development.

## Requirements

The Bachelor of Science in Engineering with a major in computer science and engineering (CSE) requires a minimum of 129 s.h. of credit. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

The major provides technical depth and breadth as well as flexibility and the opportunity for students to customize their programs according to their own goals and interests. Students choose one of several focus areas according to the type of job or research they plan to pursue; see "Focus Area Courses" below. Students also have the opportunity to work with their academic advisor to build a focus area plan that adheres to their goals and interests.

Students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric, ENGR:1100 Introduction to Engineering Problem Solving, ENGR:1300 Introduction

to Engineering Computing, and courses in chemistry, engineering mathematics and fundamentals, and physics.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, a focus area, and the General Education Component (GEC). For information about the curriculum stems, see the Bachelor of Science in Engineering, B.S.E. [p. 1468] in the Catalog.

CSE students must complete core courses; math, science, and communication courses; required computer science and engineering program courses; a constrained program elective course; approved focus area courses; General Education Component (GEC) courses; and a two-semester capstone design sequence.

The B.S.E. with a major in computer science and engineering requires the following coursework.

## Core Computing Courses

Code	Title	Hours
All of these:		
CS:1210	Computer Science I: Fundamentals	4
ENGR:1300	Introduction to Engineering Computing	3
ENGR:2730	Computers in Engineering	3

## Core Engineering Courses

Code	Title	Hours
All of these:		
ENGR:1000	Engineering Success for First-Year Students	1
ENGR:1100	Introduction to Engineering Problem Solving	3
ENGR:2120	Electrical Circuits	3

## Math, Science, and Communication Courses

Code	Title	Hours
All of these:		
CHEM:1110	Principles of Chemistry I	4
PHYS:1611	Introductory Physics I	4
PHYS:1612	Introductory Physics II	4
MATH:1550	Engineering Mathematics I: Single Variable Calculus	4
MATH:1560	Engineering Mathematics II: Multivariable Calculus	4
MATH:2550	Engineering Mathematics III: Matrix Algebra	2
MATH:2560	Engineering Mathematics IV: Differential Equations	3
RHET:1030	Rhetoric	4
STAT:2020	Probability and Statistics for the Engineering and Physical Sciences	3

## Required Program Courses

Code	Title	Hours
All of these:		
ECE:2400	Linear Systems I	3

ECE:2410	Principles of Electronic Instrumentation	4
ECE:3000	Electrical and Computer Engineering Professional Seminar	1
ECE:3320	Introduction to Digital Design	3
ECE:3330	Introduction to Software Design	3
ECE:3350	Computer Architecture and Organization	3
ECE:3360	Embedded Systems	3
ECE:3540	Communication Networks	3
CS:2210	Discrete Structures	3
CS:2230	Computer Science II: Data Structures	4
CS:3330	Algorithms	3
CS:3620	Operating Systems	3
CS:3820	Programming Language Concepts	3

## Theory Elective

Code	Title	Hours
One of these:		
ECE:5330	Graph Algorithms and Combinatorial Optimization	3
ECE:5450	Machine Learning	3
ECE:5520	Introduction to Information and Coding Theories	3
ECE:5810	Formal Methods in Software Engineering	3
ECE:5995	Contemporary Topics in Electrical and Computer Engineering (when topic is cryptography)	3
CS:4330	Theory of Computation	3
CS:4350	Logic in Computer Science	3
CS:4720	Optimization Techniques	3
CS:5340	Limits of Computation	3
CS:5360	Randomized Algorithms	3
CS:5370	Computational Geometry	3
CS:5430	Machine Learning	3
CS:5620	Distributed Systems and Algorithms	3
CS:5850	Programming Language Foundations	3
CS:5860	Lambda Calculus and Applications	3

## Focus Area Courses

Students select a focus area to personalize their curriculum and to prepare them for certain jobs or research study they intend to seek. A number of areas are available, such as bioinformatics, business, medical imaging, embedded systems, and software engineering. Students also may work with their academic advisor to create a customized plan tailored to their goals and interests.

Students complete six focus area elective courses (17 s.h.), which they select according to guidelines established by the department. For a complete list of focus areas and course

selection guidelines, see Focus Areas on the Department of Electrical and Computer Engineering website.

Students who choose their focus area and General Education Component (GEC) carefully may be able to earn the Certificate in Sustainability [p. 2093], the Certificate in Technological Entrepreneurship [p. 1585], or one of several undergraduate minors offered by the University by taking minimal additional coursework beyond that required for the computer science and engineering major.

## General Education Component

Students are required to take at least 15 s.h. of General Education Component (GEC) courses; see General Education Component on the College of Engineering website.

The requirements are:

### Engineering Be Creative

Students complete 3 s.h. A full list of approved courses can be found on the College of Engineering GEC Options: Be Creative Course List web page.

### Diversity and Inclusion

Students complete 3 s.h. They must complete 3 s.h. of coursework from the GE CLAS Core Diversity and Inclusion area.

### Approved Course Subjects

Students complete 9 s.h. See the College of Engineering GEC Options: Approved Course Subjects web page.

## Capstone Design Courses

In their senior year, students complete a two-semester capstone design sequence culminating in the development and implementation of a significant, original project. The capstone design experience emphasizes teamwork, professionalism, open-ended problem solving, and the ability to work within real-world constraints and engineering standards.

Code	Title	Hours
Both of these:		
ECE:4880	Principles of Electrical and Computer Engineering Design	3
ECE:4890	Senior Electrical and Computer Engineering Design	3

## Double Major in Computer Science and Engineering/ Electrical Engineering

Students may earn a double major in computer science and engineering (CSE) and electrical engineering (EE). They must satisfy all requirements of the electrical track of the EE major and all requirements of the CSE major.

## Combined Programs

### B.S.E./M.S. in Electrical and Computer Engineering

The College of Engineering offers a Bachelor of Science in Engineering/Master of Science for computer science and engineering undergraduate students who intend to earn a M.S. in electrical and computer engineering. B.S.E./M.S. students may take up to 12 s.h. of graduate-level coursework and do thesis-level research while they are still undergraduates. They may count 9 s.h. of graduate coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the Department of Electrical and Computer Engineering. For more information, see Joint B.S./M.S. Degree on the Department of Electrical and Computer Engineering website.

### B.S.E./M.C.S.

The College of Engineering and the Department of Computer Science (College of Liberal Arts and Sciences) offer a combined Bachelor of Science in Engineering/Master of Computer Science for computer science and engineering undergraduate students.

The combined degree program allows students to count a limited amount of credit toward both degrees. For more information, see the Master of Computer Science, M.C.S. [p. 333] in the Catalog.

## Career Advancement

Students who earn a major in computer science and engineering work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, television, and power industries, and many graduates pursue entrepreneurial ventures.

The major also prepares students for further study in many areas demanding computational and engineering skill sets.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and

should be discussed with an academic advisor. For additional sample plans, see MyUI.

<b>Hours</b>		<b>15</b>
<b>Total Hours</b>		<b>129</b>

- a Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.
- b Enrollment in math courses requires completion of a placement exam.
- c Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.
- d Enrollment in chemistry courses requires completion of a placement exam.
- e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- f Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI. See the College of Engineering General Education Component website for more information.
- g Students select a course from the GE CLAS Core Diversity and Inclusion area.
- h A full list of approved course subjects can be found on the College of Engineering General Education Component website.
- i Focus area courses total 17 s.h. and must include 6 s.h. of elective ECE courses, including at least 3 s.h. numbered 5000 or higher; and 6 s.h. of approved CS courses, including at least 3 s.h. numbered 4000 or higher. See the electrical and computer engineering website or consult an advisor for more information.
- j Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- k See General Catalog for list of approved courses.
- l Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Electrical Engineering, B.S.E.

Electrical engineers develop technologies and systems for a wide variety of applications ranging from telecommunications to medical imaging. They play a central role in the design and implementation of any technology that is powered by electricity as well as the generation and distribution of electric power. Topics covered in the electrical engineering curriculum include: design of electronic circuits, communication systems, control systems, and semiconductor devices. Students may opt to specialize in any of these areas as well as others that include electrical power generation and distribution, medical image processing, computer systems, or design of micro- and nano-scale optical and electronic devices.

## Educational Objectives

Graduates of the electrical engineering program will:

- exhibit leadership and vision in contributing to the technical and policy decisions of industry, government, and research enterprises;
- demonstrate problem-solving abilities that permit them to contribute in a variety of technical, business, and academic careers;
- thrive in diverse, global, and multidisciplinary environments;
- possess the ability to communicate effectively and participate collaboratively in interactions with engineers and other professionals; and
- understand the importance of participating in lifelong learning activities that enhance their professional and personal development.

## Requirements

The Bachelor of Science in Engineering (B.S.E.) with a major in electrical engineering requires a minimum of 128 s.h. of credit. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

The major provides technical depth and breadth as well as flexibility and the opportunity for students to customize their programs according to their own goals. Students choose one of several focus areas according to the type of job or research they plan to pursue. More than 20 focus areas are available; see "Focus Area Courses" below. Students also have the opportunity to work with their academic advisor to build a focus area plan that adheres to their goals and objectives.

Students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric; ENGR:1100 Introduction to Engineering Problem Solving and ENGR:1300 Introduction to Engineering Computing; and courses in chemistry, engineering mathematics and fundamentals, and physics. Students also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, a focus area, and the General Education Component (GEC). For information about the curriculum stems, see the Bachelor of Science in Engineering [p. 1468] in the Catalog.

The curriculum is built on a common core of electrical and computer engineering courses taken by all students. Beginning in their sophomore year, students select either

the electrical or computer curricular track and begin taking more specialized courses. The electrical track is intended to provide a broad background in electrical engineering concepts and practice that prepares students for graduate study or electrical engineering careers in a wide range of industries and organizations. The computer track provides focus and depth for students preparing for graduate study, or a career in computer hardware or software engineering. Students begin taking track and focus area elective courses in their third year.

Students must complete core courses; math, science, and communication courses; required electrical engineering program courses; electrical or computer track courses; one depth elective; one breadth elective; approved focus area courses; General Education Component (GEC) courses; and a two-semester capstone design sequence.

The B.S.E. with a major in electrical engineering requires the following coursework.

## Core Engineering Courses

Code	Title	Hours
All of these:		
ENGR:1000	Engineering Success for First-Year Students	1
ENGR:1100	Introduction to Engineering Problem Solving	3
ENGR:1300	Introduction to Engineering Computing	3
ENGR:2120	Electrical Circuits	3
ENGR:2730	Computers in Engineering	3

## Math, Science, and Communication Courses

Code	Title	Hours
All of these:		
CHEM:1110	Principles of Chemistry I	4
PHYS:1611	Introductory Physics I	4
PHYS:1612	Introductory Physics II	4
MATH:1550	Engineering Mathematics I: Single Variable Calculus	4
MATH:1560	Engineering Mathematics II: Multivariable Calculus	4
MATH:2550	Engineering Mathematics III: Matrix Algebra	2
MATH:2560	Engineering Mathematics IV: Differential Equations	3
MATH:3550	Engineering Mathematics V: Vector Calculus	3
RHET:1030	Rhetoric	4
STAT:2020	Probability and Statistics for the Engineering and Physical Sciences	3

## Required Program Courses

Code	Title	Hours
All of these:		
ECE:2400	Linear Systems I	3
ECE:2410	Principles of Electronic Instrumentation	4

ECE:3000	Electrical and Computer Engineering Professional Seminar	1
ECE:3320	Introduction to Digital Design	3
ECE:3360	Embedded Systems	3
ECE:3700	Electromagnetic Theory	3

## Track Courses

### Electrical Track Courses

Students in the electrical track complete the following track courses.

Code	Title	Hours
All of these:		
ECE:3400	Linear Systems II	3
ECE:3410	Electronic Circuits	4
ECE:3500	Communication Systems	3
ECE:3600	Control Systems	3
ECE:3720	Semiconductor Devices	3
PHYS:2704	Physics IV (without lab)	3

### Computer Track Courses

Students in the computer track complete the following track courses and one 3 s.h. ECE elective.

Code	Title	Hours
All of these:		
ECE:3330	Introduction to Software Design	3
ECE:3350	Computer Architecture and Organization	3
CS:2210	Discrete Structures	3
CS:2230	Computer Science II: Data Structures	4
CS:3330	Algorithms	3

### Track Breadth and Depth Electives

Students complete one track breadth elective and one track depth elective.

Students in the computer track must choose their track breadth elective from the list of required electrical track courses above. Students in the electrical track must choose their track breadth elective from the list of required computer track courses. Students in either track may instead use ECE:3540 Communication Networks as their track breadth elective.

The track depth elective must be an advanced course, normally numbered 4000 or above, in a subject area within a student's track.

### Focus Area Courses

Students select a focus area to personalize their curriculum and to prepare them for the jobs or research they intend to pursue. More than 20 focus areas are available, including bioinformatics, business, communication systems, medical imaging, nanotechnology, power systems, and software engineering; see Focus Areas on the Department of Electrical and Computer Engineering website. Students also may work

with their academic advisor to create a customized plan tailored to their goals and objectives.

Students complete focus area courses in addition to their track breadth and track depth courses, which they choose according to guidelines established by the department. Students in the computer track complete seven focus area courses (20 s.h.) while students in the electrical track complete six focus area courses (17 s.h.).

Students who choose their track, focus area, and General Education Component (GEC) carefully may be able to earn the Certificate in Sustainability [p. 2093], the Certificate in Technological Entrepreneurship [p. 1585], or one of several undergraduate minors offered by the University without taking any courses beyond those required for the electrical engineering major. Students selecting the computer track also satisfy the requirements for a minor in computer science. Students who take an additional advanced math course meet the requirements for a minor in mathematics.

### General Education Component

Students are required to take at least 15 s.h. of General Education Component (GEC) courses; see General Education Component on the College of Engineering website.

The requirements are:

#### Engineering Be Creative

Students complete 3 s.h. A full list of approved courses can be found on the College of Engineering GEC Options: Be Creative Course List web page.

#### Diversity and Inclusion

Students complete 3 s.h. They must complete 3 s.h. of coursework from the GE CLAS Core Diversity and Inclusion area.

#### Approved Course Subjects

Students complete 9 s.h. See the College of Engineering GEC Options: Approved Course Subjects web page.

### Capstone Design Courses

In their senior year, students complete a two-semester capstone design sequence culminating in the development and implementation of a significant, original project. The capstone design experience emphasizes teamwork, professionalism, open-ended problem solving, and the ability to work within real-world constraints and engineering standards.

Code	Title	Hours
Both of these:		
ECE:4880	Principles of Electrical and Computer Engineering Design	3
ECE:4890	Senior Electrical and Computer Engineering Design	3

### Double Major in Electrical Engineering/Computer Science and Engineering

Students may earn a double major in electrical engineering (EE) and computer science and engineering (CSE). They must

satisfy all requirements of the electrical track of the EE major and all requirements of the CSE major.

## Combined Programs

### B.S.E./M.S. in Electrical and Computer Engineering

The College of Engineering offers a Bachelor of Science in Engineering/Master of Science for electrical engineering undergraduate students who intend to earn a M.S. in electrical and computer engineering. B.S.E./M.S. students may take up to 12 s.h. of graduate-level coursework and do thesis-level research while they are still undergraduates. They may count 9 s.h. of graduate coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the Department of Electrical and Computer Engineering. For more information, see Joint B.S./M.S. Degree Program (U2G) on the Department of Electrical and Computer Engineering website.

## Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). Electrical engineers find employment everywhere smart technology is employed. They consistently rank among the most sought after and highest-paid technology professionals. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Electrical engineers work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, television, and power industries.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

## Academic Plans

### Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# Electrical and Computer Engineering, M.S.

The Department of Electrical and Computer Engineering stimulates excellence in scholarship and research through close contact with the faculty and programs tailored to fit students' individual needs.

Students select an advisor and, with the advisor, plan an individual program bounded only by the broad guidelines of the Graduate College and the program. The department maintains close interdisciplinary ties with other University of Iowa departments, especially with the Departments of Physics and Astronomy, and Computer Science (College of Liberal Arts and Sciences); the Departments of Industrial and Systems Engineering, and Mechanical Engineering, the Roy J. Carver Department of Biomedical Engineering (College of Engineering); and the Carver College of Medicine. Principal areas of graduate study include medical image analysis, signal and image processing, control systems and systems theory, wireless communications, waves and materials, computer systems, and computational genomics. View principal areas of study under Research and Study Areas [p. 1527] in the Electrical and Computer Engineering section of the Catalog.

## Requirements

The Master of Science program in electrical and computer engineering requires 30 s.h. of graduate credit with or without thesis. Either option may precede Ph.D. study. M.S. students must maintain a cumulative g.p.a. of at least 3.00.

Thesis students must complete at least 12 s.h. from an approved list of electrical and computer engineering courses and 6 s.h. in ECE:5999 Research: Electrical and Computer Engineering M.S. Thesis. Nonthesis students must complete at least 18 s.h. from an approved list of electrical and computer engineering courses; they may count no more than 3 s.h. of independent study toward the degree. For a list of approved courses, see the Electrical and Computer Engineering Graduate Manual. Courses required for the B.S.E. in electrical engineering do not count toward the M.S. requirements.

Students who plan to satisfy thesis requirements must successfully complete a final examination, which is conducted by a committee of at least three faculty members. The final examination consists of an oral defense of the thesis.

## Software Engineering Subprogram

A software engineering subprogram is available to both thesis and nonthesis students. Both thesis and nonthesis options require a minimum of 30 s.h. of graduate credit. All rules for additional credit and the M.S. final examination are the same as for the M.S. without the subprogram. Successful completion of the subprogram results in a degree designation that specifies the software engineering subprogram on a student's transcript.

The software engineering subprogram requires the following coursework.

Code	Title	Hours
ECE:5320	High Performance Computer Architecture	3
ECE:5330	Graph Algorithms and Combinatorial Optimization	3
ECE:5800	Fundamentals of Software Engineering	3
ECE:5810	Formal Methods in Software Engineering	3
ECE:5820	Software Engineering Languages and Tools	3
ECE:5830	Software Engineering Project	3

In addition to the courses listed above, thesis students complete another 3 s.h. of approved coursework and 6 s.h. in ECE:5999 Research: Electrical and Computer Engineering M.S. Thesis; nonthesis students complete another 9 s.h. of approved coursework. Students who complete one or more required courses as an undergraduate can substitute courses from the list of approved ECE courses; see the list of approved courses in the Electrical and Computer Engineering Graduate Manual.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must have a g.p.a. of at least 3.00 on all electrical and computer engineering, mathematics, and physics coursework. Those with a g.p.a. between 2.75 and 3.00 in electrical and computer engineering, mathematics, and physics coursework may be admitted on probation, if warranted by other aspects of their academic records.

Students with baccalaureate degrees in related areas (e.g., physics, mathematics, and computer science) may be admitted on conditional status. They may be required to complete additional coursework, without earning graduate credit, before being granted regular status.

Each application is reviewed individually. Extenuating circumstances may permit deviations from the usual standards.

## Financial Support

A number of fellowships, traineeships, assistantships, scholarships, and industrial grants are available to graduate students who qualify. These are awarded on a competitive basis.

## Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Electrical engineers find employment everywhere smart technology is employed. They consistently rank among the most sought after and highest-paid technology professionals. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach,

and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

# Electrical and Computer Engineering, Ph.D.

The Department of Electrical and Computer Engineering stimulates excellence in scholarship and research through close contact with the faculty and programs tailored to fit students' individual needs.

Students select an advisor and, with the advisor, plan an individual program bounded only by the broad guidelines of the Graduate College and the program. The department maintains close interdisciplinary ties with other University of Iowa departments, especially with the Departments of Physics and Astronomy, and Computer Science (College of Liberal Arts and Sciences); the Departments of Industrial and Systems Engineering, and Mechanical Engineering, and the Roy J. Carver Department of Biomedical Engineering (College of Engineering); and the Carver College of Medicine. Principal areas of graduate study include medical image analysis, signal and image processing, control systems and systems theory, wireless communications, waves and materials, computer systems, and computational genomics. View principal areas of study under Research and Study Areas [p. 1527] in the Electrical and Computer Engineering section of the Catalog.

## Requirements

The Doctor of Philosophy program in electrical and computer engineering requires a minimum of 72 s.h. of graduate credit. At least 45 s.h. must be earned in formal coursework (not in thesis work or other independent study), including 30 s.h. from an approved list of electrical and computer engineering courses. For the list of approved courses, see the Electrical and Computer Engineering Graduate Manual. Each Ph.D. student's study plan must be approved by the student's advisor and by the graduate committee. Students must maintain a cumulative g.p.a. of 3.25 or higher in all graduate coursework.

Acceptance to the Ph.D. program requires successful completion of the Ph.D. qualifying process. The qualifying process consists of two parts—an examination and a course breadth requirement. The half-day written exam is given once a year, late in the spring semester. It covers two subjects chosen by a student from a list of nine. Students normally are expected to take the qualifying examination within the first 30 s.h. of their graduate studies. A cumulative g.p.a. of at least 3.25 is required for admittance to the exam. Students who fail the examination may retake it only once the next time it is offered.

To complete the breadth requirement, students must take two courses associated with the same list of nine subjects that the examination is drawn from and complete the courses with grades of at least A-minus. The breadth courses must not duplicate the subjects chosen for the examination and must be completed within the fourth semester of graduate study.

Ph.D. students take a qualifying examination and a comprehensive examination. Then they must successfully complete a research program that includes a minimum of 18 s.h. of Ph.D. research and culminates in the preparation of a thesis. Finally, the candidate must present a successful oral defense of the thesis.

Following successful completion of the qualifying examination and invitation to the Ph.D. program, a student must complete

the two-part comprehensive examination. The first part is a written research proposal that includes a thorough literature survey providing the motivation and background for the proposal. The second part is an oral examination.

Students must pass the qualifying examination before they may take the comprehensive exam, and they must complete the comprehensive exam no later than three calendar years after passing the qualifying exam. Students who fail to meet this deadline must retake the qualifying exam. The qualifying exam and the comprehensive exam may not be taken in the same semester.

The final requirement for completion of the Ph.D. program is the preparation and successful defense of the thesis. This must be completed no sooner than six months but no longer than three years after completion of the comprehensive examination.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must have a g.p.a. of at least 3.25 on all electrical and computer engineering, mathematics, and physics coursework.

Each application is reviewed individually. Extenuating circumstances may permit deviations from the usual standards.

## Financial Support

A number of fellowships, traineeships, assistantships, scholarships, and industrial grants are available to graduate students who qualify. These are awarded on a competitive basis.

## Career Advancement

Engineering is a well-respected profession that is used as a foundation for a variety of careers in industry, medicine, law, government, and consulting. Graduates consistently rank among the most sought after and highest-paid technology professionals.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

# Industrial and Systems Engineering

## Chair

- Geb W. Thomas

**Undergraduate major:** industrial engineering (B.S.E.)

**Graduate degrees:** M.S. in industrial engineering; Ph.D. in industrial engineering

**Faculty:** <https://ise.engineering.uiowa.edu/people>

**Website:** <https://ise.engineering.uiowa.edu>

The Department of Industrial and Systems Engineering offers undergraduate and graduate degrees and research programs in industrial and systems engineering.

Industrial and systems engineering encompasses analysis, design, and implementation of systems through optimal use of resources—human, material, energy, information, and financial. Systems may range from small units to extremely large operations. The industrial engineer must be skilled in mathematics, physical sciences, management, and human relations; and understands and designs solutions for the complexities of manufacturing, computer systems, economics, optimization, human behavior, and systems analysis and design.

## Programs

### Undergraduate Program of Study

#### Major

- Major in Industrial Engineering (Bachelor of Science in Engineering) [p. 1552]

### Graduate Programs of Study

#### Majors

- Master of Science in Industrial Engineering [p. 1556]
- Doctor of Philosophy in Industrial Engineering [p. 1559]

## Facilities

The following facilities and laboratories are used by undergraduate and graduate students. For information about laboratories affiliated with core courses coordinated by other College of Engineering departments, see those departmental Catalog sections.

### Additive Manufacturing-Integrated Product Realization Laboratory (AMPRL)

Researchers at AMPRL focus on studying how material forming processes that occur in nature can be utilized to enable next-generation additive manufacturing (AM) technologies. Current research includes the design and development of next-generation AM technologies, AM process modeling and optimization, and the advancement of novel applications of new AM technologies. The lab applies its technological developments in a diverse array of fields, including tissue engineering, sensing, energy harvesting, and robotics. The lab is furnished with state-of-the-art material preparation, processing, and characterization equipment, as well as

several custom 3D printers invented and developed by the group.

### Design for Manufacturing Laboratory

The Design for Manufacturing Laboratory provides students with experience in computer-aided design and computer-aided manufacturing (CAD/CAM) systems. It is equipped with 4-axis computer numerical control (CNC) mills (Haas and Tormach), CNC router (Techno-CNC), CNC metal lathe (Haas and Techno-CNC), drill press, plastic injection molder, thermoforming machine, band saw, disc sander, bench grinder, polishing wheel, hand drill, sandblasting cabinet, press, foot shear, and welding station. The lab has the latest software technology, including Pro/ENGINEER and Rhinoceros.

### Graphical Representation of Knowledge Lab (GROK)

The GROK Lab develops technologies to help scientists and doctors improve their understanding and control of complex systems such as robots, distributed sensor networks, and augmented-reality systems. The lab designs and builds software, electronic circuits, and mechanical devices that create or modify complex systems and that extend scientists' understanding of how to make these systems perform their intended tasks better.

The lab has a variety of software development platforms and manufacturing tools, including computer numerical control (CNC) machines and supplies for casting and molding, as well as a suite of equipment for circuit design, testing, and assembly. The GROK lab has developed technologies used by NASA to control robots exploring South America and Mars. Its most recent projects have focused on using distributed wireless sensor networks to monitor factory-related health hazards and on developing surgical simulators to better train orthopedic surgeons.

### Information and Cognitive Systems Research Group

Research in the Information and Cognitive Systems Engineering Research Group focuses on design and analysis of cognitive work and information systems in real-world domains. Current emphasis is on cognitive work in health care systems.

The research group conducts studies in usability testing, process mapping, cognitive walkthroughs, dynamic systems simulation, and interface design, prototyping, and evaluation. The research facility houses state-of-the-art qualitative field data collection equipment and data analysis tools, programming tools for dynamic systems simulations, and design, prototyping, and usability testing hardware and software tools for interface and display design. The facility also employs data modeling tools and diagramming tools.

### Intelligent Systems Laboratory

The Intelligent Systems Laboratory conducts research in data science and computational intelligence leading to applications in manufacturing, energy, service industry, and health care. The current project focuses on smart manufacturing, digital industry, cloud and edge modeling, service manufacturing, and autonomous systems. Many of the intelligent manufacturing concepts pursued globally have originated in the laboratory. The pioneering research has been marked with publication of the textbook *Intelligent*

*Manufacturing Systems* (Prentice Hall) and the Journal of Intelligent Manufacturing.

## Laboratory for IoT-Enabled Data Analytics and System Informatics

The lab utilizes high performance computing workstations to model uncertainty quantifications and complex variable relationships. The aim is to develop engineering-guided statistical techniques to facilitate the interpretability, real-time monitoring, root cause analysis of complex systems. The lab focuses on developing and applying data analytics tools to various promising areas including advanced manufacturing systems, driver simulation and monitoring systems, and water and hydrology modeling systems. The research in the group requires algorithm development, hardware design, theoretic analysis, and simulation and emulation.

## National Advanced Driving Simulator Laboratory (NADS)

The NADS laboratory is home to the nation's first and largest public simulator of its kind in the world. For the last 25 years, the University of Iowa has conducted advanced research and development in support of saving lives, improving quality of life, advancing technology, and improving efficiency and productivity of the automotive and supporting industries. Most importantly, NADS serves as a place where students can learn firsthand about how innovation occurs in science and engineering.

From drug research to automated vehicles, NADS is dedicated to engaging in a broad, holistic approach. Faculty, staff, and students at NADS collaborate with nearly all UI colleges in their automotive safety research. Human factors research at NADS is funded by government agencies and industry leaders for the public and private sectors. NADS supports undergraduate, graduate, and doctoral students in driving research studies. Many of these studies include the use of the NADS miniSim™, a portable, high performance driving simulator based on NADS state-of-the-art driving simulation technology developed through decades of research. In-house workstations and computers equipped with software such as MATLAB, Visual Studio, R, and SAS are available to students with approved access to the facility.

Automated vehicle technology is revolutionizing transportation and mobility unlike any other technology of the past several decades. Vehicles, and their underlying technologies, are changing at a rapid pace. Many of the advanced driver assistance technologies and vehicle safety systems have been in research and development programs at the UI. The UI specializes in driver performance and behavior and how to optimally design the user interface of such systems. As vehicles become increasingly automated, the College of Engineering is leading a number of advanced research projects in automated and connected vehicles, funded by government and industry. Together with industry partners, the automated vehicles division is being built with a broad range of capabilities. These vehicles will be used to collect data for research programs funded through industry and government contracts.

## Operator Performance Laboratory (OPL)

The OPL is a flight test organization at the UI. The lab specializes in civilian and military flight testing and assessment of technologies in operational contexts, such

as flight in degraded visual environments (DVE) and GPS-denied environments. Quantification of data link and sensor performance for manned and unmanned aircraft in such operational context is an area of focus. OPL develops, tests, and evaluates helmet-mounted displays (HMDs), synthetic vision systems (SVS), live virtual constructive (LVC) training systems, physiological-based workload measurement systems, pilot spatial orientation enhancement systems, and embedded flight simulation capabilities.

Unmanned aircraft operations include test flights supporting commercial unmanned aircraft systems (UAS) autonomy, 5th- and 6th-generation manned-unmanned teaming (MUMT) concepts and the extension of LVC toward MUMT. The OPL team developed the Cognitive Assessment Tool Set (CATS), which is able to accurately quantify human cognitive workload using a flight-approved sensor package. CATS has been used in many flight tests as the data collection and analysis tool for pilot behavior in real-world flight environments. OPL pioneered the development and testing of LVC technology that blends ground-based battlespace simulations with airborne testbeds equipped with radar and weapons simulators that can employ simulated ordnance for effect in distributed simulation environments. This capability has been demonstrated many times, including at the Interservice/Industry Training Simulation Education Conference (I/ITSEC). In 2004, the OPL team developed and tested a synthetic vision system that was subsequently commercialized by Dynon Avionics under the brand name Skyview. This system has sold over 10,000 units and is flying in thousands of aircraft.

OPL has performed many flight test projects on its fleet of aircraft, exceeding a total 2,400 flight hours of developmental test and evaluation (DT&E) and operational test and evaluation (OT&E) data collection. OPL has 10 instrumented research aircraft. These include two L-29 fighter jet trainers, two MI-2 twin-turbine helicopters, one A-36 Bonanza, one Cessna 172, three TBM 3M UAS (62lbs), and one Vapor 55 (55 lbs). The OPL L-29's are the only tactical jet research aircraft that are equipped with the F-35 helmet-mounted display (HMD). The OPL MI-2 is a one-of-a-kind sensor platform with a conformal HMD using full-color symbology showing threats and obstacles acquired by its suite of onboard sensors. Each OPL aircraft also is a flight simulator. Additionally, the OPL has a Boeing 737-800 full flight deck simulator, an unmanned aerial vehicle (UAV) Ground Control Station (GCS) simulator, a fast jet simulator, and deployable command and control (C2) bus as well as a C2 high mobility multipurpose wheeled vehicle (HMMWV) for use as a forward command node in rugged terrain. OPL has an extensive telemetry infrastructure that is deployable. OPL's flight support system also is deployable using mobile tool control, spares, jigs, and jacks, among other means.

## Visual Intelligence Laboratory

The Visual Intelligence Laboratory is a research group at the Iowa Technology Institute. The lab conducts fundamental research to bridge the state-of-the-art computational geometry, vision, and machine learning technologies to real-world industrial applications such as computational human factor, autonomous driving, image-guided radiotherapy, medical image analysis, computational design and fabrication, and so on. The lab is interested in discovering new mathematical theories and algorithms allowing the description, comparison, and algebraic (de)composition of shapes and visual features. Such mathematical understanding of shapes enables computers to see and understand the world, and thus become smarter assistants to humans.

The Visual Intelligence Laboratory has a variety of imaging devices to obtain 2D/3D geometric information for various objects. The lab's imaging capacity includes the Studio360, a state-of-the-art imaging facility comprised of over 100 digital single-lens reflex (DSLR) cameras mounted on a 20-foot diameter geodesic dome. The Studio360 can capture time-synced photos/videos of dynamic objects (e.g., a person performing a motion) from multiple perspectives and reconstruct 3D models of the objects. The lab also owns a high performance computing server, with eight NVIDIA GeForce 1080 Ti GPUs and two Intel Xeon E5 CPUs (total 48 threads), designated for massive-scale image/geometry processing and deep learning.

The lab has established a broad academic research partnership with a variety of entities across campus, including the National Advanced Driving Simulator (NADS), the Iowa Neuroscience Institute (INI), and University of Iowa Hospitals & Clinics (UIHC). In addition, the lab has been involved in a number of research projects sponsored by government and industry partners, including the U.S. Department of Transportation, the U.S. Department of Defense, Hyundai Motors, and many others.

## Courses

### Industrial and Systems Engineering Courses

- ISE:0000 Industrial Engineering Internship/Co-op** 0 s.h.  
Industrial engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.
- ISE:1000 First-Year Seminar** 0-1 s.h.  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
- ISE:2000 Industrial Engineering Sophomore Seminar** 0 s.h.  
Curriculum and profession; ethics and professionalism in classroom and workplace. Requirements: sophomore or transfer standing in engineering.
- ISE:2360 Design for Manufacturing** 3 s.h.  
Fundamentals of design, engineering graphics, and manufacturing processing; computer graphics using Pro/ENGINEER for CAD and CAM; typical industrial processes, including casting, welding, machining, forming; laboratory exercises and projects. Corequisites: ENGR:2720.
- ISE:2500 Engineering Economy** 3 s.h.  
Basic concepts of engineering economy: time value of money, cash flow equivalence, depreciation, tax considerations, continuous cash flows, cost accounting overview; main analysis techniques—present worth, uniform annual cost, rate of return, benefit/cost ratio, replacement and break-even analysis. Corequisites: STAT:2020.
- ISE:3000 Professional Seminar: Industrial Engineering** 0 s.h.  
Professional aspects of industrial engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Requirements: junior standing.
- ISE:3149 Information Visualization** 3 s.h.  
Instruments for reasoning about quantitative information; analyzing and communicating statistical information; main typologies of data graphics (data-maps, time-series, space-time narrative, relational diagrams, graphs and methods for dimensionality reduction); language for discussing data visualizations combined with knowledge of human perception of visual objects; how to visualize information effectively by using statistical methods, knowledge of human perception, and basics of data graphics. Prerequisites: STAT:2020.
- ISE:3300 Manufacturing Systems** 3 s.h.  
Manufacturing and logistics systems, supply chain management, MRP/ERP systems, lean manufacturing, concurrent engineering, value stream mapping and six sigma. Offered spring semesters. Prerequisites: ISE:2360 and ISE:3700.
- ISE:3350 Process Engineering** 3 s.h.  
Methodologies, algorithms, and tools for processing modeling, analysis, and reengineering; modeling issues in product and component design, product and process modularity, quality, reliability, and agility. Prerequisites: ISE:3700.
- ISE:3400 Human Factors** 3 s.h.  
Design of human-machine systems; development of optimum work environments by applying principles of behavioral science and basic knowledge of human capacities and limits. Offered fall semesters. Prerequisites: PSY:1001.
- ISE:3450 Ergonomics** 3 s.h.  
Ergonomic design of jobs and products in an industrial and consumer market setting; principles of good design, examples of poor design; consequences of poor job and product design; principles of work sampling, usability studies, performance rating, sizing and planning of workstations, hand tool design, ergonomic design in transportation; related group project.
- ISE:3500 Information Systems Design** 3 s.h.  
Structure and design of computer-based information systems; concepts of information systems, decision making; computer hardware, software, data structures; methods for determining system requirements; designing, implementing, evaluating, managing information systems; applied projects. Prerequisites: ENGR:1300.
- ISE:3600 Quality Control** 3 s.h.  
Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisites: STAT:2020 or BAIS:9100 or (STAT:3100 and STAT:3101 and STAT:3200). Same as CEE:3142, STAT:3620.
- ISE:3610 Stochastic Modeling** 3 s.h.  
Fundamental probabilistic models and applications of industrial engineering; overview of probability and distributions, stochastic processes and Markov chains, queuing theory, inventory theory, decision theory under uncertainty, and elements of risk management. Prerequisites: STAT:2020. Corequisites: ISE:3700.
- ISE:3660 Data Analytics with R** 3 s.h.  
Basics of data analytics and data mining; how to implement a variety of popular data mining methods in R to tackle business and engineering problems; focus on process of turning raw data into intelligent decisions and algorithms commonly used to build predictive models and find relevant patterns in data. Prerequisites: STAT:2020.

- ISE:3700 Operations Research** 3 s.h.  
Operations research models and applications; emphasis on deterministic model (linear programming, duality). Offered fall semesters. Prerequisites: MATH:2550. Corequisites: STAT:2020.
- ISE:3750 Digital Systems Simulation** 3 s.h.  
Simulation modeling and analysis; emphasis on construction of models, interpretation of modeling results; input and output analysis; hands-on usage of ARENA simulation software, manufacturing, health care, and service. Offered spring semesters. Prerequisites: ISE:3610 and ISE:3700.
- ISE:3760 Applied Linear Regression** 3 s.h.  
Regression analysis with focus on applications; model formulation, checking, selection; interpretation and presentation of analysis results; simple and multiple linear regression; logistic regression; ANOVA; hands-on data analysis with computer software. Prerequisites: STAT:2020 or STAT:2010 or STAT:3120. Same as IGPI:3200, STAT:3200.
- ISE:3998 Individual Investigations: Industrial Engineering** arr.  
Independent projects in industrial engineering for undergraduate students, including laboratory study, an engineering design project, analysis and simulation of an engineering system, computer software development, CAD/CAM applications, or research.
- ISE:4113 Control of Mechanical Engineering Systems** 3 s.h.  
How to model simple engineering systems, apply time and frequency domain analysis techniques, and design control systems; application of these techniques using MATLAB; writing differential equations describing engineering systems and determine time domain response to a wide range of inputs; use of state-variable equations to model engineering systems and determine their time response to a wide range of inputs; describe advantages of feedback control; analyze performance of control systems; determine stability of control systems using Root-Locus, Bode, and Nyquist methods; design feedback control systems using frequency domain and state-variable methods. Prerequisites: MATH:2550 and MATH:2560 and ENGR:2710. Same as ME:4113.
- ISE:4116 Manufacturing Processes Simulations and Automation** 3 s.h.  
Material processing, metal cutting theories, forming, micro/nano fabrication, programmable logic controller, computer numerical controllers, discrete control system, DC and AC servo motors, Command generation. Prerequisites: ME:2300. Same as ME:4116.
- ISE:4172 Big Data Analytics** 3 s.h.  
Principles of data mining and machine learning in context of big data; basic data mining principles and methods—pattern discovery, clustering, ordering, analysis of different types of data (sets and sequences); machine learning topics including supervised and unsupervised learning, tuning model complexity, dimensionality reduction, nonparametric methods, comparing and combining algorithms; applications of these methods; development of analytical techniques to cope with challenging and real "big data" problems; introduction to MapReduce, Hadoop, and GPU computing tools (Cuda and OpenCL). Prerequisites: STAT:2020 or BAIS:9100. Requirements: basic programming skills in C, C++, Java, or Python; knowledge of Matlab, Octave, or R; and knowledge of a word processor. Recommendations: ISE:3760 and CS:4400 and CS:3330 and MATH:2550.
- ISE:4175 Safety Engineering** 3 s.h.  
Systems safety principles and methods, occupational safety, product safety and liability, accident investigation and prevention methods and analysis, hazard analysis, and standards and regulations.
- ISE:4550 Wind Power Management** 3 s.h.  
Principles of wind power production, wind turbine design, wind park location and design, turbine and wind park control, predictive modeling, integration of wind power with a grid.
- ISE:4600 Industrial Engineering Design Project** 1-4 s.h.  
Projects involving product and related operational system design in an industrial or service organization; associated entrepreneurial or intrapreneurial planning. Corequisites: ISE:2500 and ISE:3300 and ISE:3350 and ISE:3400 and ISE:3450 and ISE:3500 and ISE:3600 and ISE:3750, if not taken as prerequisites. Requirements: completion of all ISE coursework.
- ISE:4620 Design of Experiments for Quality Improvement** 3 s.h.  
Development of skills necessary to efficiently and effectively design and analyze experiments for quality improvement; topics include experiment planning, design, and statistical analysis of the results; experimentation is beneficial in all phases of industrial processes including new product design, process development, and manufacturing process improvement; students develop successful experiments that can lead to reduced development lead time, enhanced process performance, and improved product quality. Prerequisites: STAT:2020. Requirements: junior (third year) standing.
- ISE:4900 Introduction to Six Sigma** 3 s.h.  
Six Sigma techniques for the DMAIC cycle (Define, Measure, Analyze, Improve, Control); what is needed for data collection (process inputs and outputs, measurement tools), conduct analysis (hypothesis testing, process capability studies), and conduct process improvement studies (design of experiments, response surface methodology); overview of Six Sigma, process and project management skills; application of the DMAIC model to a real-life improvement projection (a "learn-by-doing" approach). Prerequisites: ISE:3600.
- ISE:5000 Graduate Seminar: Industrial Engineering** 1 s.h.  
Recent advances and research in industrial engineering presented by guest lecturers, faculty, students. Requirements: graduate standing.
- ISE:5420 Automated Vehicle Systems** 3 s.h.  
Overview of vehicle technologies (HAV) and advanced driver assistance systems (ADAS) including a historical perspective, testing, policy and regulation, algorithm design, and human factors. Recommendations: ISE:3400.
- ISE:5520 Renewable Energy** 3 s.h.  
Introduction to different sources of renewable energy generation including wind, solar, fuel cells, and bioenergy; design of energy solutions for different stand-alone applications (i.e., factories, data centers, hospitals) and system-wide solutions powering transportation systems, cities, or states; application-specific topics such as energy storage, control of energy generators, operations and maintenance, performance optimization, equipment health monitoring, predictive engineering, and integration of renewable energy with a grid.

- ISE:5620 Design of Experiments** 3 s.h.  
Principles and methods of statistical design of experiments for product and process improvement; students develop skills necessary for planning, analysis, and optimization of experimental data, which can be applied across various fields of research including engineering, medicine, and the physical sciences. Prerequisites: STAT:2020.
- ISE:5650 Mechatronics Engineering for Smart Device Design** 3 s.h.  
Introduction to basic mechatronics system components and design principles using mechatronics to meet functionality requirements of products, processes, and systems; lab-oriented assignments and team-based projects presented with innovative case studies in diverse application domains; labs require students to use a micro-controller kit to finish hardware development assignments; for students who plan to have a career in areas such as product development, robotics, design and manufacturing automation, technology management and innovations. Prerequisites: ENGR:2120 and (ISE:2360 or ENGR:2760).
- ISE:5730 Digital Industry** 3 s.h.  
Modeling methodologies, analysis, and optimization of digital enterprise models; autonomous building of models from data stores; introduction to different application-as-a-service models embedded in edge, fog, and cloud architectures and solutions; science of process modeling and analysis illustrated with case studies. Prerequisites: ISE:3700.
- ISE:5860 Health Informatics** 3 s.h.  
Technological tools that support health care administration, management, and decision making. Same as HMP:5370, IGPI:5200, MED:5300, SLIS:5900.
- ISE:5995 Contemporary Topics in Industrial Engineering** arr.  
New topics or areas of study not offered in other industrial engineering courses; topics based on faculty/student interest.
- ISE:5998 Individual Investigations: Industrial Engineering** arr.  
Individual projects for industrial engineering graduate students: laboratory study, engineering design, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.
- ISE:5999 Research: Industrial Engineering M.S. Thesis** arr.  
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in industrial engineering. Requirements: graduate standing.
- ISE:6211 Human Factors in Healthcare Systems** 3 s.h.  
Solving human factors problems in health care work systems; cognitive systems engineering, interface design, health care productivity, patient safety; specific research including decision making, information transfer, and communication; discrete event and dynamic systems simulation modeling; human computer interaction; health information technology/ systems; usability; business models of organizational, technical, and social elements of health care systems.
- ISE:6220 Cognitive Engineering** 3 s.h.  
Cognitive engineering principles; decision making and judgment; distributed cognition; cognitive work; human system interaction; cognitive work analysis; situated action and ecological models; mental models and representation; cognitive engineering methods and applications.
- ISE:6300 Innovation Science and Studies** 3 s.h.  
Innovative typology and sources, classical innovation models, measuring innovation, innovation discovery from data, evolutionary computation in innovation, innovation life cycle.
- ISE:6350 Computational Intelligence** 3 s.h.  
Concepts, models, algorithms, and tools for development of intelligent systems; data mining, expert systems, neural networks for engineering, medical and systems applications. Prerequisites: ISE:3700. Same as NURS:6900.
- ISE:6380 Deep Learning** 3 s.h.  
Basic principles of deep neural networks for various engineering applications; skill sets to design and implement deep learning algorithm for engineering applications; essential topics of deep learning for its practical use and exploring diverse methods and architectures for different types of applications.
- ISE:6410 Research Methods in Human Factors Engineering** 3 s.h.  
Logic and methods for research and for analysis and evaluation of complex human-machine systems; advanced techniques for enhancement of human interaction with advanced information technology; emphasis on cognitive task analysis techniques for innovative design, understanding of how technology affects safety, performance, user acceptance.
- ISE:6420 Human/Computer Interaction** 3 s.h.  
Development of projects using human factors principles in the design of computer interfaces.
- ISE:6450 Human Factors in Aviation** 3 s.h.  
Measuring, modeling, and optimizing human visual performance; display design for optimal legibility, research in visibility, legibility, conspicuity, and camouflage; visibility model development.
- ISE:6460 The Design of Virtual Environments** 3 s.h.  
Development of techniques for designing and creating three-dimensional representations of information for simulation, scientific visualization, and engineering; emphasis on human factors issues, software.
- ISE:6480 Unmanned Aircraft Systems** 3 s.h.  
Applications and research in unmanned aircraft systems (UAS) with focus on engineering aspects; new era of aviation and how UAS are fast emerging as a disruptive technology in aviation; applications ranging from film production, photography, precision agriculture, remote sensing, and infrastructure inspections to military applications; problem space of UAS from a variety of angles including engineering controls design, data links, UAS types, human factors, regulatory aspects.
- ISE:6600 Linear Programming** 3 s.h.  
Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Requirements: calculus and linear algebra. Same as BAIS:6600, IGPI:6600.
- ISE:6650 Human Analytics and Behavioral Operations** 3 s.h.  
Introduction to several quantitative applications related to determining workforce size, skills-sets, and multifunctionality in service and manufacturing systems, based on measurable quality and productivity performance at the intersection of human factors engineering and production planning; modeling and solving problems in a context of speed and accuracy trade-off; models include learning, forgetting, teamwork, fatigue, procrastination, and individual difference measures.

**ISE:6750 Stochastic Optimization 3 s.h.**

General tools and approaches used in decision making under uncertainties; modeling of uncertainties and risk, changes that uncertainties bring to the decision process, difficulties of incorporating uncertainties into optimization models, common techniques for solving stochastic problems.

**ISE:6760 Pattern Recognition for Financial Data 3 s.h.**

Modeling and harvesting useful information and patterns for financial data; topics include basic concepts of financial data, financial data visualization, modeling and forecasting of financial time series, seasonal models, volatility models, value at risk, principal component analysis, and factor models.

**ISE:6780 Financial Engineering and Optimization 3 s.h.**

Quantitative methods of modeling various financial instruments (i.e., stocks, options, futures) and tools for measurement and control of risks inherent to financial markets; fundamentals of interest rates; options and futures contract valuation, including weather and energy derivatives; risk management and portfolio optimization; emphasis on modeling and solution techniques based on optimization and simulation approaches traditional to industrial engineering and operations research. Recommendations: basic knowledge of probability and statistics, numerical methods, and optimization.

**ISE:6790 Advanced Data Analytics and Informatics 3 s.h.**

Advanced analytics techniques (i.e., linear mixed effects model, Gaussian process model, Bayesian analytics); team project on selected data analytics topics from Kaggle using real industrial data for performance demonstration; emphasis on understanding methodology and technology applications; application of each analytics technique on various industrial data context. Recommendations: STAT:4540 or MBA:8150; working knowledge of important discrete and continuous distributions, joint distributions, linear regression, random process, hypotheses testing, and analysis of variance; and programming capability in any language ( e.g., Matlab, R, Python).

**ISE:6810 Advanced Topics on Additive Manufacturing 3 s.h.**

Review of critical challenges facing 3D printing; emphasis on techniques and practical experience in developing novel additive manufacturing processes and applications; topics include 3D content creation and preparation, CAD systems for additive manufacturing, additive manufacturing processes, fabrication speed and improvements, rapid tooling and indirect processes.

**ISE:7995 Advanced Topics: Industrial Engineering arr.**

Discussion of current literature in industrial engineering.

**ISE:7998 Special Topics in Industrial Engineering arr.****ISE:7999 Research: Industrial Engineering Ph.D. Dissertation arr.**

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. in industrial engineering.

# Industrial Engineering, B.S.E.

The Department of Industrial and Systems Engineering offers a host of options for each engineering student. From the undergraduate engineering degree, a dual Undergrad to Grad (U2G) degree, focus areas, and extracurricular activities, there are many options available to explore and develop professional skills. The industrial and systems engineering (ISE) undergraduate program emphasizes a broad education in engineering fundamentals and the opportunity for in-depth learning in a focus area.

## Focus Areas and Specialized Opportunities

As part of the mission to help students be engineers and something more, the Department of Industrial and Systems Engineering offers elective focus area options so that students can pursue specialized interests, such as big data analytics, design and manufacturing, computer and information systems, entrepreneurship, human factors, and management in order to complement their undergraduate degree in industrial engineering.

## Student Organizations

Student organizations can have an enormous impact on an undergraduate student's career. The College of Engineering is home to a number of student organizations and clubs. Popular organizations for industrial and systems engineering students include the Institute of Industrial and Systems Engineers and the Human Factors and Ergonomics Society.

## Undergraduate Resources

Resources are available to students to pursue research, access professional services available in the college and across the University, and participate in or view sports and arts events on campus and around town.

## Scholarships

A variety of scholarships and funding opportunities are available to industrial and systems engineering students.

## Accreditation

The undergraduate program in industrial engineering is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET).

## Educational Objectives

The following educational objectives of the program are defined in conjunction with the accreditation process.

Within a few years of graduation, industrial engineering graduates will:

- continue learning,
- lead and inspire others, and
- engage in the community and society.

## Requirements

The Bachelor of Science in Engineering requires a minimum of 128 s.h. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

The major in industrial engineering requires a strong foundation of courses in engineering science, mathematics, design, manufacturing, social science, and humanities. Advanced work includes specialty courses in human factors and ergonomics, management, information systems, manufacturing, quality control, and operations research. Design is an integral part of the undergraduate program; all students complete a comprehensive design experience.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric, ENGR:1100 Introduction to Engineering Problem Solving, ENGR:1300 Introduction to Engineering Computing, and courses in chemistry, engineering mathematics and fundamentals, and physics.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, a focus area, and the general education component. For information about the curriculum, see the Bachelor of Science in Engineering [p. 1468] in the Catalog.

Students must select focus area elective courses specific to the Department of Industrial and Systems Engineering.

## Focus Areas

The industrial engineering program offers a variety of focus area options, including big data analytics, computer and information systems, design and manufacturing, entrepreneurship, human factors and ergonomics, management, and an option to tailor a focus area to an individual student's interests. For a list of standard industrial engineering focus area options and guidelines for tailored focus areas, see undergraduate EFAs and Specialized Opportunities on the Department of Industrial and Systems Engineering website.

## Big Data Analytics

Big data analytics is the process of examining big data in an effort to uncover hidden patterns, unknown correlations, and other useful information. Ninety-five percent of the data in the world today has been created in the last two years alone. This data comes from everywhere: sensors used to gather climate information, posts to social media sites, digital pictures and videos, purchase transaction records, and cell phone GPS signals to name a few.

## Computer and Information Systems

Industrial engineers have a natural role to play in this field by using quantitative system analysis, manufacturing system knowledge, and human factors skills to help design and refine computer systems that are becoming ever more complex. The field offers substantial opportunities for technical skill development, travel, and interaction with a diverse range of professionals.

## Design and Manufacturing

Many graduates find careers in manufacturing industries that include the use of computer-aided design and manufacturing, virtual and physical prototyping, 3D design, design and

simulation of manufacturing processes, and manufacturing systems. They find employment in diverse industries, including the supplier manufacturing industry (e.g., John Deere, Caterpillar, Rockwell Collins, Raytheon, Boeing), health care (e.g., Johnson & Johnson, Zimmer), software, and the information industry (e.g., Pro/Engineer, CATIA, SolidWorks, AutoCAD).

## Entrepreneurship

Entrepreneurship allows engineering students to explore venture capital, marketability of products, and technology transfer. They gain exposure to understanding sound business practice, acquire team-building skills in both small and large companies, understand the entrepreneurial approach to acquiring and managing resources, learn how to create a business plan, and obtain valuable contacts and networking opportunities with businesses and industries.

## Human Factors and Ergonomics

The human factors and ergonomics focus area represents an increasingly important engineering specialty. The dramatic increase in netcentric computer technology makes system performance increasingly dependent on the match between system characteristics and human capabilities. Graduates find employment in diverse industries that include health care (e.g., GE, Medtronic, Guidant), original equipment manufacturer (OEM) and supplier manufacturing industry (e.g., Rockwell Collins, Boeing, Deere, Caterpillar), computer systems (e.g., Microsoft, Intel, IBM), the government (e.g., NHTSA, NTSB, NASA, the Department of Defense), and consulting (e.g., Accenture, Battelle). Human factors considers cognitive characteristics, and ergonomics considers physical characteristics. This focus area provides advanced education in psychology, systems, statistics, and biomechanics.

## Management

Industrial engineers are often assigned managerial tasks, project management, and financial assessments as they relate to project budgets, cost calculations, and optimization criteria. This focus area prepares students for a career in business management.

## Tailored

Students work with their advisor to tailor a program that is specific to their individual needs.

## Combined Programs

### B.S.E./M.S. in Industrial Engineering

The College of Engineering offers a combined Bachelor of Science in Engineering/Master of Science program for industrial engineering undergraduate students who intend to earn a M.S. in industrial engineering.

Undergraduate students at the University of Iowa who have completed more than 80 s.h. and have a g.p.a. higher than 3.25 may apply for admission to the Undergrad to Grad (U2G) program designed to accelerate the attainment of an M.S. in industrial engineering degree. Students typically complete their M.S. degree within one year of their B.S.E. degree.

Students meet with their academic advisor, complete a plan, and submit an application for the M.S. program of study to the Graduate College. Graduate Record Examination (GRE) General Test scores are not required for University of Iowa

students. Students continue to follow the industrial and systems engineering curriculum as planned with their advisor.

Students may take up to 15 s.h. of graduate coursework and count 12 s.h. toward both degrees, attend the program's graduate seminar, and optionally work with a faculty member on a master's thesis project while they are still undergraduates.

Interested students should consult the Department of Industrial and Systems Engineering.

## Career Advancement

Industrial and systems engineers have many opportunities for employment and service in industrial, government, research, and public service organizations. Employment opportunities are among the most varied in the engineering field. Industrial and systems engineers hold positions as advisors to management or may participate directly in management decisions. Representative job titles include industrial engineer, manufacturing engineer, systems analyst, quality specialist, operations research analyst, internal consultant, human factors specialist, supervisor, and manager. Industrial and systems engineers are employed by manufacturing and energy firms, wind turbine manufacturers, government agencies, and service organizations such as airlines, banks, hospitals, health care groups, and consulting companies.

People are often surprised to learn the impact and breadth of the industrial engineering profession, which is one of the three largest areas of engineering employment, according to the Bureau of Labor Statistics. Yet, less than five percent of all engineers are trained specifically for this specialty, according to the American Society of Engineering Educators. It is one of the more gender diverse engineering degrees: 31.3 percent of industrial engineering degrees are awarded to women, compared to 21.7 percent of all engineering degrees.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation and negotiation. In addition to equipping students with the tools they need to navigate their internship, co-op, or full-time job search, Engineering Career Services also develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers in meaningful ways, including an engineering career fair each semester and other programming related to career development.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

ISE:4600	Industrial Engineering Design Project <sup>b</sup>	4
Elective: focus area systems course <sup>i</sup>		3
Required or elective: focus area math/science course <sup>i</sup>		3
Required or elective: focus area course <sup>i</sup>		3
Elective: focus area course <sup>i</sup>		3
ISE:3000	Professional Seminar: Industrial Engineering <sup>h</sup>	0

Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall)<sup>l</sup>

**Hours 16**

**Total Hours 129-130**

- a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.
- b Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.
- c Enrollment in math courses requires completion of a placement exam.
- d Enrollment in chemistry courses requires completion of a placement exam.
- e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- f Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI. See the College of Engineering General Education Component website for more information.
- g Students choose four engineering fundamentals courses from the following: ENGR:2110, ENGR:2120, ENGR:2130, ENGR:2710, ENGR:2720, ENGR:2730, ENGR:2750, ENGR:2995. Note that ENGR:2730 is a required course in some focus areas; students pursuing these focus areas should select another fundamentals course. See the industrial and systems engineering website or consult an advisor for more information.
- h Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- i Students select one of several existing focus areas or work with a faculty member to individually design their own focus area. Focus areas require at least 24 s.h. of coursework, including one systems course and one math or science course in a different area or at a more advanced level than those required in the regular curriculum. Focus areas include some required courses and some elective courses. See the industrial and systems engineering website or consult an advisor for more information.
- j Students select a course from the GE CLAS Core Diversity and Inclusion area.

- k A full list of approved course subjects can be found on the College of Engineering General Education Component website.
- l Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Industrial Engineering, M.S.

## Research and Study

The M.S. in industrial engineering program supports two major paths: one focusing on courses and one on research and a thesis. The first path is intended primarily for students who wish to advance their technical knowledge and move toward a career in industry. The second path also is a good choice for students interested in industry, but it is targeted more toward developing independent research skills and writing, and it also can support future graduate work.

Both paths expect some diversity of technical skills in three major areas which include systems, human factors, and analytics. The systems area emphasizes the design, construction, and analysis of complex systems with interdependent parts that include people and machines. The human factors area emphasizes the interaction of people with systems, and includes the study and analysis of people's cognitive and physical limitations. The analytics area emphasizes the application of mathematical formula, including statistical approaches, as well as algorithmic and computational approaches to deriving knowledge from data. Each area is supported by several faculty members and many faculty members support multiple areas; see Facilities [p. 1546] in the Department of Industrial and Systems Engineering section of the Catalog to learn more about each research lab and its activities.

## Requirements

The Master of Science program in industrial engineering requires a minimum of 30 s.h. of graduate credit. Students must maintain a cumulative g.p.a. higher than 3.25 to earn the degree. Students must enroll in ENGR:7270 Engineering Ethics once and in ISE:5000 Graduate Seminar: Industrial Engineering every semester. Credit in these two courses does not count toward the 30 s.h. required to meet major requirements.

## Breadth Requirement

All students must successfully complete at least one approved graduate-level course in each of three focus areas—analytics, human factors, and systems. Those with relevant academic background in these areas may be excused from this requirement by the director of graduate studies.

For more detailed information about program requirements and focus area courses, see the Graduate Student Handbook on the Department of Industrial and Systems Engineering website.

## Analytics

Code	Title	Hours
One of these:		
ISE:3610	Stochastic Modeling	3
ISE:3660	Data Analytics with R	3
ISE:3700	Operations Research	3
ISE:4172	Big Data Analytics	3
ISE:6300	Innovation Science and Studies	3
ISE:6380	Deep Learning	3

ISE:6760	Pattern Recognition for Financial Data	3
ISE:6780	Financial Engineering and Optimization	3

## Human Factors

Code	Title	Hours
One of these:		
ISE:3400	Human Factors	3
ISE:3450	Ergonomics	3
ISE:4175	Safety Engineering	3
ISE:5420	Automated Vehicle Systems	3
ISE:6211	Human Factors in Healthcare Systems	3
ISE:6220	Cognitive Engineering	3
ISE:6410	Research Methods in Human Factors Engineering	3
ISE:6420	Human/Computer Interaction	3
ISE:6460	The Design of Virtual Environments	3
ISE:6480	Unmanned Aircraft Systems	3

## Systems

Code	Title	Hours
One of these:		
ISE:3300	Manufacturing Systems	3
ISE:3350	Process Engineering	3
ISE:3500	Information Systems Design	3
ISE:3600	Quality Control	3
ISE:3750	Digital Systems Simulation	3
ISE:4620	Design of Experiments for Quality Improvement	3
ISE:4900	Introduction to Six Sigma	3
ISE:5620	Design of Experiments	3
ISE:5650	Mechatronics Engineering for Smart Device Design	3
ISE:6350	Computational Intelligence	3
ISE:6810	Advanced Topics on Additive Manufacturing	3

## Master of Science Degree Without Thesis

The M.S. in industrial engineering without thesis requires at least 21 s.h. in Department of Industrial and Systems Engineering courses (prefix ISE), including at least 12 s.h. of graduate-level courses at the 5000 level or above. Courses offered by other College of Engineering departments or courses from other colleges may be selected with consent of the academic advisor.

## Master of Science with Thesis

Nonthesis students may petition for entry into the M.S. thesis program or the Ph.D. program by requesting a change of status through the department. Typically, students make this request at the invitation of a faculty member who is ready to serve as a student's research advisor. The request is then reviewed by the Graduate Admissions Committee. The committee forwards approved requests to the department

chair, who may authorize a change of status petition from the department to the Graduate College.

Students are encouraged to write their thesis as a publishable journal article and submit the article for publication. The thesis option consists of a minimum of 21 s.h. of coursework and up to 9 s.h. of research. Students pursuing the thesis option are permitted to enroll in ISE:5999 Research: Industrial Engineering M.S. Thesis. Up to 9 s.h. in the thesis course may count toward the graduate-level course requirement. In addition, students must submit the Final Examination: Advanced Degree form, complete a Report of Thesis Approval, and submit a copy of their thesis to the Graduate College by following the published guidelines and deadlines.

## Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations on the Graduate College website.

Admission to the graduate program is competitive and based on an applicant's previous coursework, research, and industrial experience. The general admission standards are intended to maintain the quality of the graduate program and to ensure sufficient preparation required for timely degree completion. Specific admission standards may be waived by the Graduate Admissions Committee when other evidence of competence is compelling. These standards are minimum standards, and meeting these standards does not ensure admission to the program; admitted students typically exceed these standards.

Applicants are expected to have a minimum cumulative g.p.a. of 3.00 on a 4.00 scale, and have earned a B.S.E. in industrial engineering degree or in a related science or engineering discipline. Applicants are required to submit the results of their Graduate Record Examination (GRE) General Test. The GRE Advanced Examination in Engineering is not required for admission to the program; however, these scores should be forwarded to the department if that examination is taken. The minimum GRE General Test requirement is a combined quantitative reasoning and analytical writing score of 300. There is no specified minimum requirement for the verbal reasoning portion of the test.

International applicants whose first language is not English are required to submit the results of their Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), or Duolingo English Test (DET). Applicants who have completed a post-secondary degree at an English-speaking institution may request a waiver of this requirement. A minimum TOEFL score of 100, a minimum IELTS score of 7, or a minimum DET score of 105 is required for admission.

Applicants must arrange to have three letters of recommendation sent to the department online through the Office of Admissions website. The letters should be completed by persons who are well acquainted with the applicant and the ability of the applicant to undertake graduate work in industrial or systems engineering.

While the department considers applications at any time, first consideration is given to students who have their application materials, including their application, transcripts, GRE scores, TOEFL scores, and the required letters of recommendation, completed by the admission priority deadline as found on the Graduate Admissions website. The director of graduate admissions is responsible for overseeing the graduate

recruiting activities and the admissions procedures in the department. The director serves as the point of initial contact between prospective graduate students and the department, and maintains a record of each qualified applicant in the departmental office. The director, in consultation with the Graduate Admissions Committee and the department chair, screens applicants and ultimately determines which applicants are extended offers of admission.

## Applicants with Degrees not in Industrial or Systems Engineering

The department encourages students with degrees in other scientific disciplines, such as in computer science, mathematics, physics, or other engineering disciplines, to apply for admission. Some students may have already completed M.S. degrees; however, these students are expected to attain a proficiency in specified core areas of industrial and systems engineering equivalent to entering graduate students who hold a B.S.E. degree in industrial engineering. The background of each student admitted to the program with a degree other than in industrial or systems engineering is reviewed by the faculty members. These proficiencies are intended to ensure that each admitted graduate student is able to fully participate in all industrial and systems engineering discipline areas at some level, even while advanced courses in certain areas may not be immediately accessible to all graduate students. The director of graduate studies specifies in writing any remedial courses that are required of a student.

## Degree Program Selection

Unless otherwise specified, graduate students in the Department of Industrial and Systems Engineering are enrolled in the M.S. nonthesis program. If a student and faculty member have jointly agreed a student may pursue the M.S. with thesis option, the student may be admitted into the thesis track.

## Financial Support

Many graduate students who are actively engaged in research receive financial support through a combination of research and teaching assistantships and fellowships. Decisions about research assistantships are made by the individual faculty members and the department. Support is available on a semester or academic year basis. Stipends are approximately \$20,000 (half-time or 20 hours per week) for an academic year of graduate study. Other levels of support are possible. If an award is made, nonresident students usually qualify for tuition at the resident rate, at approximately \$10,000 per academic year. Normally stipends are not immediately awarded to international applicants, but after admission and enrollment, an application can be made. Preference for graduate student support is given to Ph.D. students.

Students should direct questions about availability of financial support to faculty members in their primary area of study. Awards and reappointments are highly competitive and are based upon a student's academic record, prior performance, the ability to serve, and upon an assessment of the student's potential contribution to the research and teaching goals of the program.

For more information about departmental scholarships and funding opportunities, see Graduate Scholarships on the Department of Industrial and Systems Engineering website.

## Career Advancement

Industrial and systems engineers have many opportunities for employment and service in industrial, government, research, and public service organizations such as airlines, banks, hospitals, health care groups, and consulting companies. Employment opportunities are among the most varied in the engineering field. Industrial and systems engineers hold positions as advisors to management or may participate directly in management decisions. Representative job titles include industrial engineer, manufacturing engineer, systems analyst, quality specialist, operations research analyst, internal consultant, human factors specialist, supervisor, and manager.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation and negotiation. In addition to equipping students with the tools they need to navigate their internship, co-op, or full-time job search, Engineering Career Services also develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers in meaningful ways, including an engineering career fair each semester and other programming related to career development.

# Industrial Engineering, Ph.D.

## Research and Study

The Ph.D. in industrial engineering program is intended for students who wish to prepare themselves for a career creating and cultivating new knowledge. In addition to a broad selection of technical research courses, the program emphasizes original research under the close supervision of a faculty member. Students develop an individualized research project that typically includes the design and analysis of experimental or theoretical work or the invention of new processes, techniques, or devices, which ultimately leads to original publications in the academic literature. The training is appropriate for people seeking a career in academia or in research and development in industry.

The coursework requires some diversity of technical skills in three major areas which include systems, human factors, and analytics. The systems area emphasizes the design, construction, and analysis of complex systems with interdependent parts that include people and machines. The human factors area emphasizes the interaction of people with systems, and includes the study and analysis of people's cognitive and physical limitations. The analytics area emphasizes the application of mathematical formula, including statistical approaches, as well as algorithmic and computational approaches to deriving knowledge from data. Each area is supported by several faculty members, and many faculty members support multiple areas; see Facilities [p. 1546] in the Department of Industrial and Systems Engineering section of the Catalog to learn more about each research lab and its activities.

## Requirements

The Doctor of Philosophy program in industrial engineering requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.50 to earn the degree. At least 36 s.h. must be taken in Department of Industrial and Systems Engineering courses (prefix ISE), including at least 24 s.h. in graduate-level courses numbered ISE:5000 and above. Students must enroll in ENGR:7270 Engineering Ethics once and in ISE:5000 Graduate Seminar: Industrial Engineering every semester. Credit in those two courses may be applied toward the 72 s.h. of required coursework.

Students must successfully complete coursework in each of three focus areas: see "Breath Requirement" below. The academic advisor and/or examining committee may decide a student must complete other requirements such as additional coursework or the acquisition of specific skills. The actual amount of coursework required is determined with the advice and consent of the academic advisor. Students who earned an M.S. at the University of Iowa may have satisfied this requirement. There is no world language requirement in the program.

Students are typically expected to have completed three academic years of residence at the UI, or two years if they already hold a recognized M.S. degree. For students who earned their M.S. degree at the UI, no more than 36 s.h. from the M.S. degree may be counted toward the Ph.D. degree. For students who earned their M.S. from another institution, a maximum of 30 s.h. may be transferred toward the doctoral

program. The director of graduate studies reviews the transcripts of new students to determine which requirements have been met from previous coursework.

Excellence in research is the principal requirement for the degree. It is expected that the Ph.D. dissertation research project represents an original and significant contribution to the body of knowledge in the field. At least one accepted research article in a peer-reviewed journal as first author with the research advisor as a co-author, in addition to presentation of the research in a departmental seminar, are requirements. Submission of three, first-authored papers and at least one research presentation at a national conference is typical. In addition, students must fulfill the qualifying requirement, pass the comprehensive examination, submit the Final Examination: Advanced Degree form, complete a Report of Thesis Approval, and submit a copy of their thesis to the Graduate College by following the published guidelines and deadlines.

## Breadth Requirement

Students must successfully complete at least 6 s.h. in approved courses numbered 5000 or above offered by the Department of Industrial and Systems Engineering in each of the three focus areas—analytics, human factors, and systems. Students with relevant academic background in these areas may be excused from the breadth requirement with approval of the director of graduate studies. Approved courses are listed below.

### Analytics

Code	Title	Hours
Two of these:		
ISE:6300	Innovation Science and Studies	3
ISE:6380	Deep Learning	3
ISE:6760	Pattern Recognition for Financial Data	3
ISE:6780	Financial Engineering and Optimization	3

Two of these:		
ISE:5620	Design of Experiments	3
ISE:5650	Mechatronics Engineering for Smart Device Design	3
ISE:6350	Computational Intelligence	3

ISE:6810	Advanced Topics on Additive Manufacturing	3
----------	---	---

## Qualifying Exam

Students interested in pursuing a Ph.D. are initially admitted as M.S. nonthesis students until they have completed the qualifying examination. This is typically achieved within their first three semesters if beginning the program without an M.S. degree, or within the first two semesters if beginning the program with an M.S. degree. Once the exam is passed, students are formally admitted to the Ph.D. program. The purpose of this qualifier is to determine a student's proficiency in research and scholarship.

## Comprehensive Examination

The general rules for the administration of the Ph.D. comprehensive examination are contained in the policies and procedures of the Graduate College. The tradition in the department is for the comprehensive examination to consist of a written and oral component. Students write and submit a comprehensive examination document, usually called the dissertation research proposal, to each member of the examination committee two weeks before the examination date. During the examination, students make a roughly 30-minute presentation on the content of the research proposal. Committee members may ask questions regarding the proposal before, during, or after the oral presentation. Having satisfactorily completed the comprehensive examination, students are accepted as a candidate for the Ph.D. degree.

## Final Examination (Dissertation Defense)

Each student must defend the completed dissertation in the final examination, which is conducted by the examining committee.

## En Passant Option

Students admitted to the Ph.D. program may elect to earn their M.S. degree through the *en passant* option, with the permission of their Ph.D. committee. This option allows students to write an English-language manuscript as the first author and submit it to a peer-reviewed research journal in lieu of writing the M.S. thesis. With this option, students, in conjunction with their academic advisor, author a paper that serves as the foundation for the Ph.D. research. The decision to select this option must be made before the qualifying examination. The committee may determine, based on the published or submitted scholarship to peer-reviewed journals, that the presentation of a separate research thesis is not necessary. In this case, up to 9 s.h. in ISE:5999 Research: Industrial Engineering M.S. Thesis may be counted towards the nonthesis option. Students choosing the *en passant* option generally receive an M.S. degree without the thesis designation.

For more detailed information about program requirements, see the Graduate Student Handbook or Graduate Program on the Department of Industrial and Systems Engineering website.

## Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate

College policies, see the Manual of Rules and Regulations on the Graduate College website.

Admission to the graduate program is competitive and based on an applicant's previous coursework, research, and industrial experience. The general admission standards are intended to maintain the quality of the graduate program and to ensure sufficient preparation required for timely degree completion. Specific admission standards may be waived by the Graduate Admissions Committee when other evidence of competence is compelling. These standards are minimum standards, and meeting these standards does not ensure admission to the program; admitted students typically exceed these standards.

Applicants are expected to have a minimum cumulative g.p.a. of at least 3.00 on a 4.00 scale, and have earned a B.S.E. in industrial engineering degree or in a related science or engineering discipline. Applicants are required to submit the results of the Graduate Record Examination (GRE) General Test. The GRE Advanced Examination in Engineering is not required for admission to the program; however, these scores should be forwarded if the department if that examination is taken. The minimum GRE General Test requirement is a combined quantitative reasoning and analytic writing score of 300. There is no specified minimum requirement for the verbal reasoning portion of the test.

International applicants whose first language is not English are required to submit the results of their Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), or Duolingo English Test (DET).

Applicants who have completed a post-secondary degree at an English-speaking institution may request a waiver of this requirement. A minimum TOEFL score of 100, a minimum IELTS score of 7, or a minimum DET score of 105 is required for admission.

Applicants must arrange to have three letters of recommendation sent to the department online through the Office of Admissions website. The letters should be completed by persons who are well acquainted with the applicant and the ability of the applicant to undertake graduate work in industrial or systems engineering.

While the department considers applications at any time, first consideration is given to students who have their application materials, including their application, transcripts, GRE scores, TOEFL scores, and the required letters of recommendation, completed by the admission priority deadline as found on the Graduate Admissions website. The director of graduate admissions is responsible for overseeing the graduate recruiting activities and the admissions procedures in the department. The director serves as the point of initial contact between prospective graduate students and the department, and maintains a record of each qualified applicant in the departmental office. The director, in consultation with the Graduate Admissions Committee and the department chair, screens applicants and ultimately determines which applicants are extended offers of admission.

## Applicants with Degrees not in Industrial or Systems Engineering

The department encourages students with degrees in other scientific disciplines, such as in computer science, mathematics, physics, or other engineering disciplines, to apply for admission. Some students may have already completed M.S. degrees; however, these students are

expected to attain a proficiency in specified core areas of industrial and systems engineering equivalent to entering graduate students who hold a B.S.E. degree in industrial engineering. The background of each student admitted to the program with a degree other than in industrial or systems engineering is reviewed by the faculty members. These proficiencies are intended to ensure that each admitted graduate student is able to fully participate in all industrial and systems engineering discipline areas at some level, even while advanced courses in certain areas may not be immediately accessible to all graduate students.

## Financial Support

Many graduate students who are actively engaged in research receive financial support through a combination of research and teaching assistantships and fellowships. Decisions about research assistantships are made by the individual faculty members and decisions about teaching assistantships are made by the department. Support is available on a semester or academic year basis. Stipends are approximately \$20,000 (half-time or 20 hours per week) for an academic year of graduate study. Other levels of support are also possible. If an award is made, nonresident students usually qualify for tuition at the resident rate, at approximately \$10,000 per academic year. Normally stipends are not immediately awarded to international applicants, but after admission and enrollment, an application can be made. Preference for graduate student support is given to Ph.D. students.

Students should direct questions about availability of financial support to faculty members in their primary area of study. Awards and reappointments are highly competitive and are based upon a student's academic record, prior performance, the ability to serve, and upon an assessment of the student's potential contribution to the research and teaching goals of the program.

For more information about departmental scholarships and funding opportunities, see Graduate Scholarships on the Department of Industrial and Systems Engineering website.

## Career Advancement

Industrial and systems engineers have many opportunities for employment and service in industrial, government, research, and public service organizations. Employment opportunities are among the most varied in the engineering field. Industrial and systems engineers are employed by manufacturing and energy firms, government agencies, and service organizations such as airlines, banks, hospitals, health care groups, and consulting companies.

The Ph.D. is a gateway toward careers of learning and creation. Employers typically hire people with doctorates to run laboratories, create research directions, and supervise other engineers at the boundaries of knowledge. Ph.D.-level researchers generally enjoy great freedom and tailored work environments as they explore and learn to help create new visions of tomorrow. A Ph.D. opens up academic, research, and entrepreneurial possibilities limited only by one's drive and creativity. Positions are often found through announcements in trade journals, international conferences, and specialized job-posting services. Students often work with faculty to identify and apply for appropriate positions. It is rare that students do not find an appropriate position before completing their thesis.

# Mechanical Engineering

## Chair

- Ching-Long Lin

**Undergraduate major:** mechanical engineering (B.S.E.)

**Graduate degrees:** M.S. in mechanical engineering; Ph.D. in mechanical engineering

**Faculty:** <https://me.engineering.uiowa.edu/people>

**Website:** <https://me.engineering.uiowa.edu>

The Department of Mechanical Engineering offers distinct undergraduate and graduate degrees and research programs in mechanical engineering. It also is the administrative home of the undergraduate Certificate in Naval Science and Technology [p. 1580].

Mechanical engineering is broadly concerned with energy, manufacturing, and design of machines. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of a wide variety of devices, machines, and systems—including complex human-machine systems—for energy conversion, biofuel production, environmental control, materials processing, transportation, materials handling, and other purposes. Major subspecialties of mechanical engineering include thermal-fluids engineering and mechanical systems engineering.

Thermal-fluid phenomena occur in many engineering systems and devices such as aircraft; automobiles; off-road vehicles; ships; gas turbines; heat exchangers; material processes; heating, ventilating, air-conditioning, and refrigerating systems; hydraulic and wind turbines; airbag inflators; fuel cells; biofuel processes; environmental control devices; and biomedical systems.

Machines and mechanical systems are the foundations of human technology. Mechanical systems are found in mechanical engineering systems and devices such as manufacturing equipment, medical equipment, ground vehicles, heavy equipment, farm equipment, aircraft, ships, home appliances, packaging machinery, wind turbine blades and gearboxes, robots, and biomedical systems.

Mechanical engineers find a wide variety of career opportunities in industry, government, and education. Mechanical engineers form an integral part of most industries, including aerospace firms, energy companies, automobile manufacturers, health care providers, food- and metal-processing industries, petroleum refineries, electronic and computer manufacturers, heavy construction and agricultural vehicle manufacturers, wind turbine manufacturers, thermal comfort equipment firms, farm equipment firms, and consulting companies.

## Certificates

### Naval Science and Technology

The Department of Mechanical Engineering offers the undergraduate certificate program in Naval Science and Technology; see the Certificate in Naval Science and Technology [p. 1580] in the Catalog.

### Related Certificate: Transportation Studies

The Transportation Studies Program offers the Certificate in Transportation Studies. The program focuses on the varied and complex problems of transportation and on

interdisciplinary approaches to addressing them. The Departments of Civil and Environmental Engineering, Industrial and Systems Engineering, Mechanical Engineering (College of Engineering), Economics (Tippie College of Business), and the School of Planning and Public Affairs (Graduate College) participate in the program.

The certificate is coordinated by the School of Planning and Public Affairs; see the Certificate in Transportation Studies [p. 1688] in the Catalog.

## Programs

### Undergraduate Program of Study

#### Major

- Major in Mechanical Engineering (Bachelor of Science in Engineering) [p. 1570]

### Graduate Programs of Study

#### Majors

- Master of Science in Mechanical Engineering [p. 1573]
- Doctor of Philosophy in Mechanical Engineering [p. 1576]

## Facilities

### Undergraduate Instruction

#### Departmental Instructional Facilities

The Department of Mechanical Engineering maintains five laboratories for undergraduate student learning, which consist of the Advanced Manufacturing Laboratory; the Control, Automation, and Robotics Laboratory; the Engineering Manufacturing Laboratory; the Ralph and Barbara Stephens Experimental Engineering Laboratory; and two design project laboratories developed to facilitate collaboration on senior design projects and communication with project sponsors.

#### Advanced Manufacturing Laboratory

The Advanced Manufacturing (AM) Laboratory supports the elective mechanical engineering undergraduate course ME:4116 Manufacturing Processes Simulations and Automation. The laboratory includes a variety of machine tools and instruments for students to practice nontraditional material processes and controls. Facilities and instrumentation include a three-axis CNC laser cutter (Bodor laser), an ultrasonic metal seam welder (Branson), an ultrasonic metal spot welder (Branson), and a 25 programmable logic controller (Divelbiss). The facility uses the latest software technology, such as Abaqus, MATLAB, and EZ Ladder.

#### Control, Automation, and Robotics Laboratory

The Control, Automation, and Robotics (CAR) Laboratory is located in the Seamans Center for the Engineering Arts and Sciences and is managed by the Department of Mechanical Engineering. It provides students with experience in advanced control, robotics, and autonomous systems. The lab is equipped with one industrial 6-axis robotic arm, two Kuka mobile robots (KMR iiwa and KMP) with collaborative robotic arms, a desktop computer, two Roboception cameras, one co-act and one suction grippers, and four Quanser rotary servo base units. The facility has the latest software technology, such as LabVIEW and KUKA.Sim. The Quanser units are

used in the laboratory assignments in ME:3600 Control of Mechanical Engineering Systems, while the robotic systems are used in ME:4140 Modern Robotics and Automation. In fall 2019, two control laboratories were developed based on two Quanser base units. The control laboratories were developed and tested in CAR and set up to accommodate a large class size. Later, two additional base units and three accessory modules were purchased to expand the control laboratories. In addition, the robotics systems are used in ME:4111 Scientific Computing and Machine Learning and ME:4150 Artificial Intelligence in Engineering to assist the instruction of relevant course materials. The CAR laboratory also is used by students who have permission to work in the lab on honors and research projects.

### **Design Project Laboratories**

The department also maintains two design project laboratories to support student teamwork on capstone design projects: the Design Lab and the MEDP/PEDE room. The Design Lab supports students taking the ME:4086 Mechanical Engineering Design Project and ME:4186 Enhanced Design Experience sequence in the Program for Enhanced Design Experience (PEDE) and Virtual International Project Teams (VIPT), whereas the MEDP/PEDE room is occupied by students completing the single-semester ME:4086 Mechanical Engineering Design Project (MEDP) course, as well as for PEDE and VIPT students. The Design Lab contains four workstations with large monitors for collaborative design and analysis activities, as well as table and chairs for group discussions. An integrated teleconferencing room is enclosed with glass windows so students can communicate with project sponsors. The teleconferencing room contains a 4K LED smart TV connected to a desktop computer, as well as a video camera, microphone and speaker, and a speaker phone for video conferencing and phone calls. The MEDP/PEDE room contains six computer workstations with four large computer monitors and two large TV monitors. There are four additional tables without workstations, two mobile white boards, and sofa and mobile chairs for project design and collaborative activities.

### **Engineering Manufacturing Laboratory**

The Engineering Manufacturing Laboratory is located in the Seamans Center for the Engineering Arts and Sciences. The laboratory provides students with experience in advanced CAD/CAM systems. It is managed by the Department of Mechanical Engineering and the Department of Industrial and Systems Engineering. The lab is equipped with three-axis CNC mills (Haas and Tormach), CNC router (Techno-CNC), CNC lathe (Haas), drill press, plastic injection molder, thermoforming machine, band saw, disc sander, bench grinder, polishing wheel, hand drill, sandblasting cabinet, a press, and a three-in-one shear/break/roll machine. The facility has the latest software technology, such as Creo Parametric and Rhinoceros 4.0. The machinery is used in laboratory assignments in ME:2300 Manufacturing Processes. The room is extensively used near the end of each semester for the course project. It also is used by students who have permission to work in the lab on their honors and research projects.

### **Ralph and Barbara Stephens Experimental Engineering Laboratory**

The Ralph and Barbara Stephens Experimental Engineering Laboratory supports required mechanical engineering undergraduate courses ME:3351 Engineering Instrumentation and ME:4080 Experimental Engineering.

## **Collegiate Instructional Facilities**

### **Fluid Mechanics Laboratories**

The College of Engineering and IIHR—Hydroscience & Engineering have a long history of excellence in fluid mechanics education dating back to the 1920s, when IIHR developed the fluids laboratory as a hands-on learning environment for fluids-related disciplines within the College of Engineering. The long success of the institute's education program is due in large part to a new curriculum emphasizing scientific principles rather than merely practice in manipulating equipment.

IIHR is now modernized, expanded, and was relocated to the laboratory facilities, which were distributed throughout IIHR research facilities at the south end of the campus to the new Seamans Center Annex, where it occupies a 3,300 square foot laboratory suite. The laboratory suite comprises three distinct, but connected laboratory spaces. The Fluids Fundamentals Laboratory houses experiments that directly support formal laboratory instruction in College of Engineering courses. Through the lab-development project, existing experimental facilities were modernized, refurbished, installed, and additional experiments were developed. The laboratory has a large, reconfigurable open space in which different experiments and furnishings can be set up to support a variety of instructional activities.

The Fluids Workshop is the venue through which students can advance to independent and inquiry-driven, course-related, and extracurricular projects. The lab also supports the activities of College of Engineering student organizations. Advanced measurement instrumentation, computational hardware, and resources for developing experiments are available to students in the lab. Tables around the perimeter of the room contain additional PCs and Linux workstations for numerical computations, data analysis, and visualization.

The Advanced Measurements Laboratory houses major facilities supporting both instructional and inquiry-driven student activities. It contains three facilities that have been upgraded and relocated through this project: the vertical wind tunnel, the visualization water channel, and a towing tank whose functionality has been expanded to also serve as an open channel flume. The laboratory, which is also designed to facilitate the safe use of laser-based instrumentation, is located behind the two front laboratories and is accessible from both rooms.

The fluids laboratories support formal laboratory activities for several courses, including ENGR:2510 Fluid Mechanics taken by students in the biomedical, civil and environmental, and mechanical engineering departments; CEE:3371 Principles of Hydraulics and Hydrology; CEE:5380 Fluid Flows in Environmental Systems; ME:4125 Biomimetic Fluid Dynamics; and ME:4176 Experimental Naval Hydrodynamics.

Additionally, it has been used as a resource in many other courses, including BME:4920 Biomedical Engineering Senior Design II, ECE:4890 Senior Electrical and Computer Engineering Design, ME:4080 Experimental Engineering, ME:4086 Mechanical Engineering Design Project, ME:4098 Individual Investigations: Mechanical Engineering, and ME:4186 Enhanced Design Experience.

## **Graduate Facilities**

### **Fluid Mechanics**

The program in fluid mechanics is conducted in close collaboration with IIHR—Hydroscience & Engineering. The

equipment available to graduate students includes several wind tunnels and hydraulic flumes, an environmental flow facility, towing tank, two special low-temperature flow facilities for investigation of ice phenomena, hot-wire and laser anemometer systems, particle-image velocimetry systems, and computer-based data acquisition systems. Facilities available in the department include a flow visualization and imaging system with charge-coupled devices (CCD) camera and a low-speed wind tunnel. IHR and College of Engineering shops provide the necessary support. In addition to using in-house workstations and computers, the department's faculty members and students make extensive use of supercomputers at national centers.

## Mechanical Systems

Computer-based simulation research activities in the mechanical systems area are carried out mainly in the Iowa Technology Institute. It maintains a variety of high performance computer systems in support of its technology research and development efforts. General computing services are supported by a number of Linux and Windows applications servers connected to centralized file servers. Computer-aided design/computer-aided engineering (CAD/CAE), software development, virtual prototyping, and virtual environment development applications are hosted on numerous high performance workstations. Standard desktop, multimedia, and office productivity applications are hosted on a network of more than 40 workstations.

## Thermal Sciences

Facilities for research in the thermal sciences and systems consist of a low-pressure combustion chamber, a high-pressure continuous flow combustion chamber, high-pressure chamber for atomization study, test rig for heat transfer to near supercritical fluids, diffusion flame test rig, enclosed laminar flame test rig, air atomization spray apparatus, test stands for melting and solidification studies, various optical measurement systems, and two fuel cell test rigs. Laser-based diagnostics (e.g., laser-induced fluorescence, imaging, and laser Doppler anemometry) are available for solidification, turbulent flow, heat transfer, and combustion studies. Flow visualization and imaging by CCD camera are available for the study of complex fluid motion and heat convection, and combustion flows.

## Courses

### Mechanical Engineering Courses

**ME:0000 Mechanical Engineering Internship/Co-op** 0 s.h.  
Mechanical engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to the Cooperative Education Program.

**ME:1000 First-Year Seminar** 0-1 s.h.  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**ME:2020 Mechanical Engineering Sophomore Seminar** 0 s.h.  
Introduction to the mechanical engineering profession and curriculum; ethics and professionalism in classroom and workplace; mentorship program and professional societies; visits to laboratories and local companies. Requirements: sophomore or transfer standing.

**ME:2200 Introduction to Mechanical Engineering Design** 2 s.h.  
Solid modeling, assemblies, drawings, and Geometric Dimensioning and Tolerancing (GD&T); basic engineering design process; introduction to engineering standards, product liability, and ethics. Prerequisites: ENGR:1100.

**ME:2300 Manufacturing Processes** 3 s.h.  
Fundamentals of design, engineering graphics, and manufacturing processing; computer graphics using Pro/ENGINEER for CAD and CAM; typical industrial processes including casting, welding, machining, and forming; laboratory exercises and projects. Corequisites: ENGR:2720 and (ME:2200 or BME:2710).

**ME:3040 Thermodynamics II** 3 s.h.  
Power and refrigeration cycles; mixtures of gases, psychrometric mixtures; availability; thermodynamics of combustion and chemical equilibrium. Prerequisites: ENGR:2130.

**ME:3045 Heat Transfer** 3 s.h.  
Principles of heat transfer by conduction, convection, radiation; analytical and numerical methods of solution; applications to engineering problems. Prerequisites: MATH:3550 and ENGR:2510 and ENGR:1300.

**ME:3052 Mechanical Systems** 4 s.h.  
Topics in mechanical behavior and failure of materials; materials selection in design; stress and deflection analysis; static failure theories; fatigue and durability in design; fracture, statistical, and reliability considerations; introduction to finite element analysis using commercial software packages; standards, product liability, engineering ethics. Prerequisites: ENGR:2750. Corequisites: ENGR:2720 and ME:2300 and STAT:2020.

**ME:3091 Professional Seminar: Mechanical Engineering** 0 s.h.  
Professional aspects of mechanical engineering: presentations, student/faculty interaction, professional society involvement, panel discussions, plant trip. Requirements: junior standing.

**ME:3351 Engineering Instrumentation** 2 s.h.  
Basic elements of measuring circuits (bridges, voltage dividers, shunts, transformers); laboratory instrumentation (oscilloscopes, multimeters, power supplies, signal generators); amplifiers; frequency response principles; sensors; data acquisition, signal processing, filtering using Labview. Prerequisites: PHYS:1612 and ENGR:2120.

**ME:3600 Control of Mechanical Engineering Systems** 3 s.h.  
Introduction to fundamental control theory and robot manipulators. Prerequisites: MATH:2560 and ENGR:2710.

- ME:4024 Product Design and Realization** 3 s.h.  
Design principles and methods to develop 3D part models and assemblies; emphasis on use of mechanical engineering design principles and functional requirements through the complete design process using PTC Creo Parametric; for students with a basic knowledge of computer-aided design (CAD). Prerequisites: ENGR:2760 or ME:2200. Corequisites: ENGR:2750.
- ME:4048 Energy Systems Design** 4 s.h.  
Principles and design of energy conversion systems, including solar, wind, and geothermal power systems; design of thermal-fluid system components, modeling and simulation of systems, optimization techniques; design projects. Prerequisites: ME:3045.
- ME:4055 Mechanical Systems Design** 3 s.h.  
Kinematics of mechanisms, dynamics and vibration of machines, cam and gear, machine elements, computer-aided analysis of machines. Prerequisites: ENGR:2710 and ME:3052.
- ME:4080 Experimental Engineering** 4 s.h.  
Principles of physical measurements; standards calibration, estimation of error; static and dynamic performance of measuring systems; laboratory experience, experiment planning, report writing. Prerequisites: ME:3351. Corequisites: ME:3045 and ME:3052.
- ME:4086 Mechanical Engineering Design Project** 3 s.h.  
Application of mechanical, thermal, fluid systems design; student or team design projects initiated at various levels in the design process and carried through to higher levels; emphasis on synthesis, written and oral communication. Corequisites: ME:4048 or ME:4055.
- ME:4098 Individual Investigations: Mechanical Engineering** arr.  
Individual projects for mechanical engineering undergraduate students; laboratory study; engineering design project; analysis, synthesis, simulation of an engineering system; computer software development, research.
- ME:4110 Computer-Aided Engineering** 3 s.h.  
Computational engineering modeling and simulation, geometric modeling, grid generation, finite-element and finite-volume methods, uncertainty analysis, optimization, engineering applications. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as CEE:4515.
- ME:4111 Scientific Computing and Machine Learning** 3 s.h.  
Numerical methods in scientific computing; root problems and optimization; linear algebraic equations; eigenvalue problems; numerical differentiation and integration; interpolation and curve-fitting; initial value and boundary value problems; machine learning in regression, classification, and clustering problems; Python programming and packages. Prerequisites: MATH:2560. Same as CEE:4511.
- ME:4112 Engineering Design Optimization** 3 s.h.  
Engineering design projects involving modeling, formulation, and analysis using optimization concepts and principles; linear and nonlinear models, optimality conditions, numerical methods. Prerequisites: ENGR:2110 and MATH:2550. Requirements: junior standing. Same as CEE:4512.
- ME:4113 Control of Mechanical Engineering Systems** 3 s.h.  
How to model simple engineering systems, apply time and frequency domain analysis techniques, and design control systems; application of these techniques using MATLAB; writing differential equations describing engineering systems and determine time domain response to a wide range of inputs; use of state-variable equations to model engineering systems and determine their time response to a wide range of inputs; describe advantages of feedback control; analyze performance of control systems; determine stability of control systems using Root-Locus, Bode, and Nyquist methods; design feedback control systems using frequency domain and state-variable methods. Prerequisites: MATH:2550 and MATH:2560 and ENGR:2710. Same as ISE:4113.
- ME:4116 Manufacturing Processes Simulations and Automation** 3 s.h.  
Material processing, metal cutting theories, forming, micro/nano fabrication, programmable logic controller, computer numerical controllers, discrete control system, DC and AC servo motors, Command generation. Prerequisites: ME:2300. Same as ISE:4116.
- ME:4117 Finite Element Analysis** 3 s.h.  
Trusses and frames; Rayleigh-Ritz methods; 2D and 3D elasticity problems; heat transfer, thermo-mechanical coupling; transient problems; use of commercial software for applications in analysis and design of mechanical engineering systems. Prerequisites: ENGR:2750.
- ME:4120 Advanced Linear Control Systems** 3 s.h.  
Overview of system modelling and classical control design tools and methods, and bridges those with state-space approach for analysis and control of linear systems in the time domain; topics include linearization, root locus, Bode diagrams, Nyquist criteria, robustness margins, lead-lag compensators, observability and controllability, state-space realizations, internal stability and input-output stability, pole-placement, observers and reduced order observers, separation principle, performance limitations, linear quadratic regulator and its guaranteed margins, and optimal estimation. Prerequisites: ME:3600 or (MATH:2550 and MATH:2560 and ENGR:2710).
- ME:4125 Biomimetic Fluid Dynamics** 3 s.h.  
Study and development of engineered systems that mimic the structure and function of biological systems; overview of the fluid dynamic principles that govern locomotion by swimming or flapping flight; equations of motion, fundamentals of aerodynamics; analytical models of force generation for swimming and flight; parameters governing effective locomotion; experimental and numerical studies to understand the present state of the art, challenges, and important questions. Prerequisites: ENGR:2510.
- ME:4140 Modern Robotics and Automation** 3 s.h.  
Introduction to basics of robotics and automation; mechanical design development and manufacturing of smart and automated devices, components, and systems; principles of robotic motion and kinematics; introduction to process automation through system requirement identification, equipment integration, sensors, actuation, and logical control; fundamentals of design, analysis, and manufacturing to meet functionality requirements of products, devices, and systems using the principles of mechatronics to develop smart and automated products. Prerequisites: ENGR:2710.

- ME:4145 Industrial Internet of Things (IIoT) 3 s.h.**  
Introduction to process automation through system requirement identification, equipment integration, sensors, actuation, and logical control; fundamentals of design, analysis, and manufacturing to meet functionality requirements of products, devices, and systems using principles of mechatronics to develop smart and automated products; integration of advanced networking and monitoring into device control and automaton. Corequisites: ME:3351.
- ME:4150 Artificial Intelligence in Engineering 3 s.h.**  
Artificial intelligence, computational intelligence, data science and engineering, machine intelligence, digital manufacturing and design, intelligent machining, fault diagnosis, autonomy, robotics; applications in mechanical engineering. Prerequisites: ME:4111.
- ME:4153 Fundamentals of Vibrations 3 s.h.**  
Vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, and arbitrary excitation; modal analysis; applications. Prerequisites: ENGR:2750. Same as CEE:4532.
- ME:4160 Engines and Power Plants 3 s.h.**  
Fundamental principles of thermodynamics applied to areas of particular interest in mechanical engineering; power plants and refrigeration cycles, internal combustion engine cycles, gas mixtures and combustion, mixing processes and pollutant formation, and hybrid power systems. Prerequisites: ENGR:2130.
- ME:4175 Computational Naval Hydrodynamics 3 s.h.**  
Simulations based on relevant vessels and propellers will be used to introduce the use of computational fluid dynamics for the analysis of surface and underwater marine craft performance, while also introducing naval hydrodynamics concepts related to resistance, propulsion, maneuvering, and seakeeping; an educational version of the naval hydrodynamics code REX will be freely distributed and used in the class. Prerequisites: ENGR:2510.
- ME:4176 Experimental Naval Hydrodynamics 3 s.h.**  
Introduction to experimental methods for measurement of propeller thrust performance and resistance of surface vessels and underwater marine craft; present and expand on fundamental concepts related to fluid mechanics, measurement methods, and uncertainty analysis in a context that focuses on naval science and technology challenges; students work with models of relevant vessels and propellers in a dedicated towing tank facility. Prerequisites: ENGR:2510.
- ME:4186 Enhanced Design Experience 2-3 s.h.**  
Experience working in teams on industry-sponsored design and product development projects scheduled for production; emphasis on practical experience with the complete design process, from conceptualization through prototyping, evaluation, testing, and production; written and oral communication. Prerequisites: ME:4086.
- ME:4200 Modern Engineering Materials for Mechanical Design 3 s.h.**  
Overview of design approaches for different engineering materials (i.e., metals, polymers, ceramics); topics include manufacturing processes, smart and advanced functionalities for applications in emerging engineering fields, theoretical models describing mechanical behavior, failure mechanisms, and design criteria; introduction to composite materials; computer lab activities focus on finite element method (FEM) simulations of materials with different mechanical properties. Prerequisites: ME:3052.
- ME:5113 Mathematical Methods in Engineering 3 s.h.**  
Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: MATH:2550 and MATH:2560. Same as CBE:5140, CEE:5513.
- ME:5114 Nonlinear Control in Robotic Systems 3 s.h.**  
Nonlinear analysis and control systems theory; focus on Lyapunov-based analysis methods and associated design techniques; introduction to definitions of stability for autonomous and nonautonomous systems leading to a Lyapunov framework, and based on the developed Lyapunov-based analysis tools, basic and advanced design tools for contemporary engineering problems are presented, including state-of-the-art techniques. Prerequisites: ME:3600 or ME:4120 or CBE:4105 or ECE:3600.
- ME:5115 Cooperative Autonomous Systems 3 s.h.**  
How to enable ground, marine, and aerial robotic platforms to perform cooperative tasks autonomously in complex real-world environments; theoretical topics include numerical approximation, optimal control, nonlinear analysis and control, game theory, and graph theory; project-based activities in a laboratory environment; focus on design and implementation of motion planning, tracking, collision avoidance, and cooperative control algorithms for autonomous vehicles. Prerequisites: ME:3600 or ME:4120 or ME:4113 or CBE:4105 or ECE:3600.
- ME:5120 Vehicle System Dynamics 3 s.h.**  
Introduction to principles and basic procedures used in analysis of vehicle system dynamics and design; topics include tire mechanics, longitudinal and cornering tire force characteristics, steady-state and transient vehicle cornering responses, vehicle stability control, ride comfort, suspension design, off-road vehicle mobility, tire-soil interaction, and vehicle performance evaluations. Prerequisites: ENGR:2710.
- ME:5143 Computational Fluid and Thermal Engineering 3 s.h.**  
Governing equations of fluid flow and heat transfer; basic numerical techniques for solution of the governing equations; estimation of accuracy and stability of the approximations; boundary conditions; grid generation; applications to flows and heat transfer in engineering systems; familiarity with software for analysis and design of thermo-fluids systems. Prerequisites: ME:3045.
- ME:5145 Intermediate Heat Transfer 3 s.h.**  
Steady and unsteady conduction; forced and natural convection; surface and gaseous radiation; condensation and evaporation; analytical and numerical methods and applications. Prerequisites: ME:3045.
- ME:5146 Modeling of Materials Processing 3 s.h.**  
Manufacturing processes for metals, polymers, semiconductors; processing by casting, solidification, crystal growth, polymer molding and extrusion, welding, heat treating, application of optical (laser) and electromagnetic energy; processes that use momentum, heat, mass transfer principles; measurement and instrumentation for materials processing; current topics in materials processing. Corequisites: ME:3045.
- ME:5149 Propulsion Engineering 3 s.h.**  
Opportunity to develop basic understanding and knowledge of rocket and airbreathing propulsion systems; relevant terminology and analysis techniques, parameteric cycle analysis for ideal engines, off-design analysis methods, problem-solving methodology. Prerequisites: ENGR:2130. Requirements: graduate standing.

- ME:5150 Intermediate Mechanics of Deformable Bodies** 3 s.h.  
Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: ENGR:2750. Same as CEE:5540.
- ME:5154 Intermediate Kinematics and Dynamics** 3 s.h.  
Kinematic and dynamic analysis of mechanical systems; computational kinematics, Lagrangian dynamics, principle of virtual work in dynamics, constrained dynamics, spatial dynamics. Prerequisites: ENGR:2710.
- ME:5159 Fracture Mechanics** 3 s.h.  
Three-dimensional stress states, definition and criteria for failure, nominal and local yield phenomena, linear elastic and elastic plastic fracture mechanics, plane stress and plane strain fracture toughness, J-Integral, crack opening displacement, environmental assisted cracking, fatigue crack growth, fail safe, and damage tolerant design. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as CEE:5549.
- ME:5160 Intermediate Mechanics of Fluids** 3 s.h.  
Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisites: ENGR:2510. Same as CEE:5369.
- ME:5162 Experimental Methods in Fluid Mechanics and Heat Transfer** 3 s.h.  
Hands-on experience in methodology of conducting experiments in fluid mechanics and heat transfer from design to data acquisition and processing; essential theoretical elements, experimental methodologies, data acquisition systems, uncertainty analysis; wide variety of instruments for fundamental and applied experimentation; work in small groups; design, implement, test, and report an experiment in area of interest. Same as CEE:5372.
- ME:5167 Composite Materials** 3 s.h.  
Mechanical behavior of composite materials and their engineering applications; composite constituents (fibers, particles, matrices) and their properties and behavior; macromechanical behavior of composite laminae; micromechanical predictions of composite overall properties; classical lamination theory; composite beams and plates. Prerequisites: ENGR:2750. Same as CEE:5137.
- ME:5179 Continuum Mechanics** arr.  
Mechanics of continuous media; kinematics of deformation, concepts of stress and strain; conservation laws of mass, momentum and energy; constitutive theories; boundary and initial value problems. Prerequisites: ENGR:2750 or ENGR:2510. Same as CEE:5179.
- ME:5195 Contemporary Topics in Mechanical Engineering** arr.  
New topics in fluid and thermal sciences and mechanical systems not covered in other courses; topic and coverage determined by student/faculty interest. Requirements: junior standing.
- ME:5210 Intermediate Thermodynamics** 3 s.h.  
Fundamental principles of thermodynamics as applied to phase equilibrium; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Requirements: CBE:3105 or ME:3040 or graduate standing. Same as CBE:5110.
- ME:6191 Graduate Seminar: Mechanical Engineering** 1 s.h.  
Presentation and discussion of recent advances and research in mechanical engineering by guest lecturers, faculty, students.
- ME:6198 Individual Investigations: Mechanical Engineering** arr.  
Individual project in mechanical engineering, for department graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.
- ME:6199 Research: Mechanical Engineering M.S. Thesis** arr.  
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in mechanical engineering.
- ME:6214 Analytical Methods in Mechanical Systems** 3 s.h.  
Vector and function spaces; functionals and operators in Hilbert spaces; calculus of variations and functional analysis with application to mechanics; Ritz and Galerkin methods. Prerequisites: ME:5113. Same as CEE:6310.
- ME:6215 Finite Element II** 3 s.h.  
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as CEE:6532, IGPI:6216.
- ME:6216 Laser Materials Processing** 3 s.h.  
Proficient engineering background involved in laser processing and manufacturing; fundamentals and operation principles for various types of laser systems, laser optics, principles of laser-matter interactions, laser-induced thermal and thermo-mechanical effects; emerging areas of laser applications (e.g., microscale and nanoscale laser processing, ultrafast laser processing) and related energy transport analyses; video demonstrations. Prerequisites: ME:3045 and MATH:3550.
- ME:6217 Advanced Modeling and Simulation for Manufacturing** 3 s.h.  
How materials often behave in a complicated manner involving deeply coupled effects among stress/strain, temperature, and microstructure during a manufacturing process; modeling and prediction of material processes based on a metallo-thermomechanical coupled analysis; focus on heat transfer modeling in material processes, fundamental mechanics aspects required for material processing analysis, and microstructural evolution modeling in material processes. Prerequisites: CEE:4533 and ME:3045.
- ME:6240 Probabilistic Inference and Estimation for Mechanical Systems** 3 s.h.  
Theory and application of common techniques for probabilistic inference and estimation including types of estimators; Bayesian, Kalman, and Particle filtering; various motion and measurement models; and algorithms for simultaneous localization and mapping (SLAM). Prerequisites: ME:4120. Requirements: some level of exposure to probability and statistics, linear algebra, and 3D rigid body dynamics.
- ME:6245 Diffusive Transport** 3 s.h.  
Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies; analytical and numerical solution techniques; inverse heat conduction; multiphase and multicomponent systems. Prerequisites: ME:5145. Same as CBE:6145.

- ME:6247 Contact Mechanics** 3 s.h.  
 Varied aspects of contact mechanics and engineering applications, including stationary contacts, sliding, rolling, impact, and fretting fatigue; emphasis on theoretical basis of solutions of contact mechanics problems; mathematical methods of solving contact problems using Green's function method; complex potentials and integral transform methods. Prerequisites: ME:5113 and ME:5150.
- ME:6255 Multiscale Modeling** 3 s.h.  
 Computational modeling of engineering materials ranging from molecular to continuum scales, molecular dynamics and Monte Carlo methods, nanoscale continuum modeling, scale-coupling methods. Prerequisites: ME:5143 or CEE:4533. Same as CEE:7549.
- ME:6260 Viscous Flow** 3 s.h.  
 Equations of viscous flow; classical analytical and numerical solutions; flow regimes and approximations; laminar boundary layers—equations, solution methods, applications; stability theory and transition; incompressible turbulent flow—mean-flow and Reynolds-stress equations, modeling, turbulent boundary layers and free shear flows. Requirements: for ME:6260—ME:5160; for CEE:6376—CEE:5369. Same as CEE:6376.
- ME:6261 Multibody System Dynamics** 3 s.h.  
 Introduction to principles of analytical and computational dynamics for rigid and flexible multibody systems; spatial kinematics and dynamics of rigid body systems, numerical solution procedures for multibody dynamics analysis, and flexible multibody dynamics. Prerequisites: ME:5154.
- ME:6262 Inviscid Flow** 3 s.h.  
 Derivation of governing equations for fluid flow; general theorems for motion of inviscid, incompressible flows; solution techniques for two- and three-dimensional irrotational flows; forces and moments acting on immersed bodies; vortex kinematics and dynamics; steady and unsteady aerodynamic theory. Prerequisites: ME:5160.
- ME:6263 Compressible Flow** arr.  
 Compressible flow behavior; 1D unsteady flow and appropriate use of x-t diagrams; 2D flows and use of the method of characteristics; Burgers' Equation and its properties.
- ME:6275 Advanced Heat Transfer** 3 s.h.  
 Conservation laws, forced and natural convection; surface and gaseous radiation; analytical and numerical methods; applications. Prerequisites: ME:5145.
- ME:6278 Nonlinear Elasticity** 3 s.h.  
 Nonlinear elasticity theory; modern applications in biomechanics; vectors and tensors, constitutive theory of elastic material, some exact solutions of boundary value problems, inverse deformation relations, stability of elastic material, theories of tissue adaptive response. Prerequisites: ME:5150. Requirements: elementary linear elasticity.
- ME:6300 Control of Networked Autonomous Systems** 3 s.h.  
 Introduction to state-of-the-art research in networked autonomous robotic systems; graph theory based network models, decentralized control, multi-agent cooperation, and mobile sensor networks. Corequisites: ME:5115 or ME:5114.
- ME:6320 Fluid-Structure Interactions** 3 s.h.  
 Foundations of fluid-structure interactions (FSI) with focus on hydro-electric responses of flexible structures in dense fluids; structural dynamics and fluid dynamics are too often characterized as distinct disciplines and this dichotomous mindset fails to recognize the important effects that dynamics fluid loads exert upon structural vibrations and vice-versa; students are equipped with knowledge to approach modern FSI problems; foundations of theoretical FSI, experimental methods, and computational approaches. Prerequisites: (ME:5160 or ME:4125) and (ME:4153 or ME:5154).
- ME:7248 Combustion Theory** 3 s.h.  
 Laminar flame theory; turbulent combustion; spray combustion; thermal ignition; pollutant formation, oxidation; combustion diagnostics. Prerequisites: ME:5145 and ME:5160.
- ME:7250 Advanced Fracture Mechanics** 3 s.h.  
 Fracture of modern engineering materials; linear-elastic fracture; computational methods; functionally graded materials; elastic-plastic fracture; multiscale fracture and fatigue crack initiation. Prerequisites: ME:5113 and (ME:5159 or CEE:4533). Same as CEE:7250.
- ME:7256 Computational Solid Mechanics** 3 s.h.  
 Advanced computational methods for nonlinear and dynamic analysis of solids, structures; new space- and time-discretization methods for problems, including highly nonlinearities, large deformation, contact/impact conditions. Prerequisites: ME:5113 and CEE:4533.
- ME:7257 Probabilistic Mechanics and Reliability** 3 s.h.  
 Stochastic and reliability analysis of mechanical systems; computational methods for structural reliability; random eigenvalue problem; random field and stochastic finite element methods. Prerequisites: CEE:4533 and ME:5113.
- ME:7266 Interfacial Flows and Transport Processes** 3 s.h.  
 Physics of fluid interfaces and numerical techniques to simulate interface dynamics; interfacial flow coupled with thermal-fluid transport, from molecular interactions to continuum approximations; development of computer code segments to track and represent interface-flow interactions. Prerequisites: ME:5145 and ME:5160.
- ME:7267 Multiphase Flow and Transport** 3 s.h.  
 Thermodynamic and mechanical aspects of interfacial phenomena and phase transitions; nucleation, phase-change, species transport, particulate flows, liquid-vapor systems, solidification, porous media. Prerequisites: ME:5145 and ME:5160.
- ME:7268 Turbulent Flows** 3 s.h.  
 Origin; need for modeling, averages, Reynolds equations, statistical description; experimental methods and analysis; turbulence modeling; free shear layers and boundary layers; complex shearflows; development of computational strategies; recent literature on theory and applications, chaos phenomena. Prerequisites: ME:5160.
- ME:7269 Computational Fluid Dynamics and Heat Transfer** 3 s.h.  
 Development of numerical and algebraic approximations for elliptic, parabolic, hyperbolic partial differential equations; finite-volume, spectral, pseudo-spectral, Galerkin techniques; stability of numerical methods; CFL condition; stiff problems; adaptive grid generation and boundary-fitted coordinates; numerical solutions for one- and two-dimensional compressible and incompressible fluid flow and heat transfer problems. Prerequisites: ME:4111 and ME:5160.

**ME:7299 Research: Mechanical Engineering Ph.D.  
Dissertation**

**arr.**

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. in mechanical engineering.

# Mechanical Engineering, B.S.E.

## Educational Objectives

Within a few years of graduation, graduates of the mechanical engineering program will:

- have successful careers in engineering and beyond and will have assumed professional roles of increasing responsibility and impact;
- have acquired new knowledge and expertise through professional development opportunities or advanced education; and
- be engaged in workplace, professional, or civic communities.

Graduates of the Department in Mechanical Engineering B.S.E. program will be prepared to effectively contribute as engineers in a diverse and multidisciplinary work environment. They will have an ability to:

- identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
- apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare as well as global, cultural, social, environmental, and economic factors;
- communicate effectively with a range of audiences;
- recognize ethical and professional responsibilities in engineering situations and make informed judgments which consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
- function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
- develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions; and
- acquire and apply new knowledge as needed, using appropriate learning strategies.

## Requirements

The Bachelor of Science in Engineering requires a minimum of 128 s.h. of credit. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

The major in mechanical engineering lays a foundation in the basic disciplines of mathematics, physics, and chemistry and in the engineering sciences of statics, dynamics, thermodynamics, mechanics of deformable bodies, mechanics of fluids and transfer processes, materials science, and electrical sciences. An understanding of these sciences enables mechanical engineers to design parts of systems and understand whole systems, plan the production and use of energy, plan and operate industrial manufacturing facilities, and design automatic control systems for machines and other mechanical systems.

Mechanical engineering students develop an awareness of social and humanistic issues relating to business, environment, government, history, language, religion, and

international relations. They also acquire an appreciation of professional and ethical responsibilities.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric, ENGR:1100 Introduction to Engineering Problem Solving, ENGR:1300 Introduction to Engineering Computing, and courses in chemistry, engineering mathematics and fundamentals, and physics.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, a focus area, and the General Education Component (GEC). For information about the curriculum stems, see the Bachelor of Science in Engineering, B.S.E. [p. 1468] in the Catalog.

Upper-level students work on team projects in a senior capstone design course, ME:4086 Mechanical Engineering Design Project. Some students may arrange to participate in established research projects.

Students must select focus area elective courses according to guidelines established by the Department of Mechanical Engineering. See "Focus Area" below.

## Focus Area

The mechanical engineering program offers a variety of focus area options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests.

Mechanical engineering students can select a focus area from the following.

- Energy and Environment
- Manufacturing
- Mechanical Engineering Design
- Robotics and Autonomous Systems
- Tailored

For a list of standard mechanical engineering focus area options and guidelines for tailored focus areas, see the undergraduate Mechanical Engineering Program page on the Department of Mechanical Engineering website.

## Combined Programs

### B.S.E./M.S. in Mechanical Engineering

A Bachelor of Science/Master of Science combined degree program is available for qualified University of Iowa undergraduate students. This allows students to complete a M.S. degree in two or three semesters after completion of their B.S.E. degree. Those in the combined degree program receive a B.S.E. degree when all requirements have been completed, and then become M.S. students in the Department of Mechanical Engineering (ME).

The Undergrad to Grad (U2G) combined degree program is primarily intended for students interested in pursuing the M.S. nonthesis degree option. However, the M.S. degree thesis option can be pursued in instances where students have been conducting research under the supervision of a ME faculty member since, at least, the summer following their junior year, and a ME faculty member is willing to advise them and serve as committee chair for their final exam.

Interested students should discuss the combined degree program with their advisor during their third year. Applications should be submitted during the second semester of their third year and before the start of their fourth year (two-semester blended model); see the U2G Program on the Department of Mechanical Engineering website. However, single-semester admits are allowed and must adhere to the application deadlines and other program requirements.

Accepted students are expected to have a minimum University of Iowa cumulative g.p.a. of at least of 3.25, and maintain this grade-point average throughout their time in the program. Undergraduate students whose UI cumulative grade-point average falls below this minimum are removed from the combined program.

Students may contact any ME faculty member to inquire about participation in the U2G combined degree program, research opportunities, and financial support.

## Program Benefits

Students may apply up to 12 s.h. of graduate-level coursework toward both their B.S.E. and M.S. degrees. However, credit may not be applied to courses taken prior to admission to the combined degree program. Mechanical engineering courses eligible for graduate credit are numbered ME:4100 or above, except for ME:4186 Enhanced Design Experience. The courses selected must fulfill M.S. coursework requirements and be applicable to B.S.E. electives.

Students who select the thesis option can begin work on their M.S. thesis research with a faculty advisor during their fourth year of undergraduate studies.

Graduate Record Examination (GRE) General Test scores are not required for admission to the combined degree program. Students are assessed undergraduate tuition and fees until their B.S.E. degree has been conferred; then, students are assessed graduate tuition and fees, and they may be eligible for graduate assistantships.

## Financial Support

Departmental funding preference is given to Ph.D. students. Students can discuss financial support possibilities with their advisor.

## Career Advancement

Engineering is a well-respected profession that is used as a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors consistently claim several of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter

preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

**Total Hours 131**

- a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.
- b Enrollment in chemistry courses requires completion of a placement exam.
- c Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.
- d Enrollment in math courses requires completion of a placement exam.
- e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- f Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI. See the College of Engineering General Education Component website for more information.
- g Students select a course from the GE CLAS Core Diversity and Inclusion area.
- h Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

- i ME:2300 typically is offered in fall and spring sessions; STAT:2020 typically is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.
- j Students select one of the preapproved standard focus areas or design a tailored focus area. Focus areas require at least 21 s.h. of coursework. See the mechanical engineering website or consult an advisor for more information.
- k A full list of approved course subjects can be found on the College of Engineering General Education Component website.
- l Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Mechanical Engineering, M.S.

## Research

The mechanical engineering graduate program in the College of Engineering emphasizes in-depth learning and research. In collaboration with faculty across campus, the faculty are currently researching a diverse range of topics within the field. For more information, see the Department of Mechanical Engineering website.

## Design and Uncertainty Quantification

The Design and Uncertainty Quantification focus area is concerned with design optimization of complex mechanical systems in the presence of uncertainty. The focus area emphasizes developments of sound theoretical foundation, novel computational methods and algorithms, and modern software tools aimed at creating state-of-the-art engineering design of automotive, aerospace, naval, nuclear, and biomedical systems. Current areas of excellence include artificial muscles and smart materials design, ship hydrodynamics, design sensitivity analysis, uncertainty quantification, and reliability-based design optimization.

## Fluid Dynamics

The Fluid Dynamics focus area covers a wide variety of topics with flow of liquids and gases as the common denominator. The graduate program in fluid dynamics emphasizes fundamental principles and applications, and the numerical and experimental techniques used to obtain and analyze fluid flows. Areas of concentration include computational fluid dynamics, experimental fluid dynamics, medical flows, naval hydrodynamics, biologically inspired air and underwater vehicles, multiphase flows, cavitation and ventilation, and fluid-structure interaction and turbulence, among others.

## Heat Transfer and Combustion

The Heat Transfer and Combustion focus area applies to real-world systems in manufacturing and materials processing, propulsion, energy production, and other areas. The graduate program emphasizes fundamental principles and techniques required for experimental and theoretical research. Current areas of research include solidification of materials, metal casting, 3D printing, laser-materials interaction, power plants and propulsion devices such as automobile and aircraft engines, energy conservation and production, energy storage, complex reactive materials, and machine learning in computational modeling and simulation.

## Manufacturing and Materials

The Manufacturing and Materials focus area involves fundamental materials processing science, technological advancement in manufacturing applications, and development of new manufacturing processes and new material functions. Current and emerging thrust areas include solidification, metal casting, laser materials processing, micro- and nanofabrication, joining, ultrasonic welding, machining, microstructure evolution, manufacturing process modeling and simulation, artificial muscles, artificial camouflage, smart materials, and material characterizations. These research activities are well supported by federal and state agencies and the manufacturing industry.

## Robotics, Controls, and Autonomous Systems

Robotics, Controls, and Autonomous Systems (RCAS) are concerned with the modeling, analysis, design, and control of dynamic systems. The graduate program in RCAS emphasizes fundamental principles and techniques of robotics, control theory, and artificial intelligence. Areas of concentration include computational intelligence, dynamic autonomous systems, cyber-physical systems, and networked robotic systems with potential applications in self-driving cars; medical and assistive robots for surgery and rehabilitation; industrial co-robots for human-robot collaboration; and uncrewed aerial, ground, and underwater vehicles.

## Solid Mechanics and Multibody Dynamics

Solid Mechanics and Multibody Dynamics are concerned with the behavior of solid materials and flexible bodies, especially their deformation, motion, and stress responses under the action of applied loads. The graduate program in solid mechanics and multibody dynamics emphasizes the theoretical foundations and problem-solving techniques for engineering applications. Current research focuses of the faculty include multiscale mechanics of materials, biomechanics, vehicle dynamics, computational mechanics, multibody dynamics, and optimization.

## Requirements

The Master of Science program in mechanical engineering requires a minimum of 30 s.h. of coursework and research, including a minimum of 12 s.h. in mechanical engineering courses (prefix ME) numbered 5000 or above. Students must maintain a cumulative g.p.a. of at least 3.00 in graduate work used to satisfy their requirements to earn the degree. The course plan should be approved by their advisor prior to registration each semester. All students choose either a thesis or nonthesis program.

The requirements for the M.S. may be completed within one calendar year. However, students with assistantship duties or other constraints may take up to two calendar years to complete their degree. Students must complete ENGR:7270 Engineering Ethics during their first fall semester in the program. They must register for ME:6191 Graduate Seminar: Mechanical Engineering each fall and spring semester until successful completion of their final examination or thesis defense; credit in these courses does not substitute for regular coursework or research credit hours. For students who select the thesis option, normally 6 s.h., and no more than 9 s.h. of credit for thesis research is counted toward degree requirements in ME:6199 Research: Mechanical Engineering M.S. Thesis.

Thesis students must be successful in their final examination. The exam is administered by a student's committee, which consists of at least three faculty members, including at least one with a primary appointment in the Department of Mechanical Engineering. The nonthesis option does not include a final exam.

## Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate

College policies, see the Manual of Rules and Regulations on the Graduate College website.

Applicants who have earned a baccalaureate or master's degree in engineering curriculum or in the mathematical or physical sciences are eligible to be considered for admission to graduate study in mechanical engineering. To be considered for regular admission, applicants must have a g.p.a. of at least 3.00 on a 4.00 scale in all previous college-level work.

## Minimum Requirements for Admission

### Graduate Record Examination (GRE) General Test Requirements

Quantitative Reasoning: 80th percentile or above (score=159).

Verbal Reasoning: 60th percentile or above (score=152).

Analytical Writing: 50th percentile or above (score=4.0).

### International Student Requirements

Requirements include a minimum TOEFL score of 550 or higher on the paper-based test (PBT) or a score of 81 or higher on the internet-based test (iBT). Newly admitted graduate students who present TOEFL scores below 600 on the PBT or below 100 on the iBT are required to complete an English Proficiency Evaluation on campus before their first registration for classes.

Alternatively, an International English Language Testing System (IELTS) score of 7 or Duolingo English Test (DET) score of at least 105 is required. IELTS and DET test takers, regardless of score, are required to take an on-campus English Proficiency Evaluation.

There is no conditional admission for graduate students whose TOEFL scores are below 550 on the PBT, below 81 on the iBT, or below 6.5 on the IELTS.

Applicants with lower grade-point averages and/or GRE or TOEFL test scores may be considered for conditional admission under exceptional circumstances. Those admitted conditionally must achieve regular standing within one semester (excluding summer sessions) after admission by attaining a g.p.a. of at least 3.00 on their first 9 s.h. at the University of Iowa. The Graduate College cancels registration for the subsequent semester for students who have not submitted their GRE and/or TOEFL scores by the end of the first semester after admission.

Some of the requirements may be waived in select cases when other components of the application are particularly outstanding. Satisfaction of the requirements does not guarantee admission.

## Applying for Admission

Refer to the Graduate Admissions website for information about applying for graduate studies.

### Graduate Application Deadlines

Applications for fall: January 15 (application deadline), March 1 (admission decision).

Applications for spring: September 1 (application deadline), October 1 (admission decision).

All requirements must be fulfilled by the respective deadline dates. Applicants who apply after a deadline date must be

sponsored by a mechanical engineering faculty member for a deadline waiver.

## Financial Support

Financial support is available to M.S. students, primarily through graduate assistantships in teaching or research from the Department of Mechanical Engineering, IIHR—Hydrosience and Engineering, the National Advanced Driving Simulator, and the University of Iowa Technology Institute. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on a student's potential contribution to the teaching and research goals of the department. Students who fulfill their assistantship responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new assistantship awards. Decisions about research and teaching assistantships are made by individual faculty members. Students should direct questions about availability of financial support to faculty members in their primary area of study.

Students with assistantship appointments of one-quarter-time or more must register for a minimum of 9 s.h. during fall and spring semesters until they have completed 30 s.h. of coursework and research beyond the baccalaureate degree.

## Career Advancement

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

The graduate program in solid mechanics and multibody dynamics emphasizes the theoretical foundations and problem-solving techniques for engineering applications. Current research focuses of the faculty include multiscale mechanics of materials, biomechanics, vehicle dynamics, computational mechanics, multibody dynamics, and optimization.

## Requirements

The Doctor of Philosophy program in mechanical engineering requires 72 s.h. of graduate credit, including a minimum of 42 s.h. in mechanical engineering courses (prefix ME) with at least 12 s.h. selected from courses numbered ME:6000 or above. Students also must complete a minimum of 12 s.h. in thesis research in ME:7299 Research: Mechanical Engineering Ph.D. Dissertation. A maximum of 30 credits of transfer credit may be applied toward the degree and coursework requirements. Students must maintain a cumulative g.p.a. higher than 3.25 to earn the degree.

To be formally admitted to the Ph.D. program, students must pass the qualifying examination. Information regarding the details of the qualifying exam procedure can be obtained from the Department of Mechanical Engineering website.

Students must complete ENGR:7270 Engineering Ethics during their first fall semester of enrollment. They must register for ME:6191 Graduate Seminar: Mechanical Engineering each fall and spring semester until successful completion of their final examination or thesis defense; credit in these courses does not substitute for regular coursework or research credit hours. They must have their course plan approved by their advisor prior to registration each semester.

## Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations on the Graduate College website.

## Minimum Requirements for Admission

### Graduate Record Examination (GRE) General Test Requirements

Quantitative Reasoning: 80th percentile or above (score=159).

Verbal Reasoning: 60th percentile or above (score=152).

Analytical Writing: 50th percentile or above (score=4.0).

### International Student Requirements

Requirements include a minimum TOEFL score of 550 or higher on the paper-based test (PBT) or a score of 81 or higher on the internet-based test (iBT). Newly admitted graduate students who present TOEFL scores below 600 on the PBT or below 100 on the iBT are required to complete an English Proficiency Evaluation on campus before their first registration for classes.

Alternatively, an International English Language Testing System (IELTS) score of 7 or Duolingo English Test (DET) score of at least 105 is required. IELTS and DET test takers, regardless of score, are required to take an on-campus English Proficiency Evaluation.

There is no conditional admission for graduate students whose TOEFL scores are below 550 on the PBT, below 81 on the iBT, or below 6.5 on the IELTS.

Applicants with lower grade-point averages and/or GRE or TOEFL test scores may be considered for conditional admission under exceptional circumstances. Those admitted conditionally must achieve regular standing within one semester (excluding summer sessions) after admission by attaining a g.p.a. of at least 3.00 on their first 9 s.h. at the University of Iowa. The Graduate College cancels registration for the subsequent semester for students who have not submitted their GRE and/or TOEFL scores by the end of the first semester after admission.

Some of the requirements may be waived in select cases when other components of the application are particularly outstanding. Satisfaction of the requirements does not guarantee admission.

### Other Requirements

Students must have earned a minimum g.p.a. of at least 3.00 on a 4.00 scale, submit three letters of recommendation, unofficial transcripts (with official transcripts submitted if accepted), and a statement of purpose.

### Applying for Admission

Refer to the Graduate Admissions website for information about applying for graduate studies.

### Graduate Application Deadlines

Applications for fall: January 15 (application deadline), March 1 (admission decision).

Applications for spring: September 1 (application deadline), October 1 (admission decision).

All requirements must be fulfilled by the respective deadline dates. Applicants who apply after a deadline date must be sponsored by a mechanical engineering faculty member for a deadline waiver.

## Financial Support

Financial support is available to Ph.D. students, primarily through graduate assistantships in teaching or research from the Department of Mechanical Engineering, IIHR—Hydroscience and Engineering, the National Advanced Driving Simulator, and the University of Iowa Technology Institute. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on a student's potential contribution to the teaching and research goals of the department. Students who fulfill their assistantship responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new assistantship awards.

Students with assistantship appointments of one-quarter-time or more must register for a minimum of 9 s.h. during fall and spring semesters until they have completed 72 s.h. of coursework and research beyond the baccalaureate degree. Once they meet these minimums, students must register for a graduate seminar each semester until they have successfully completed their final examination or thesis defense. All registrations should accurately reflect the amount and type of work undertaken, the use of University facilities, and the amount of consultation with the faculty.

## Career Advancement

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Final Exam <sup>l</sup>		
<b>Hours</b>		<b>10</b>
<b>Total Hours</b>		<b>81</b>

- A minimum of 42 s.h. (not including thesis research) must be from courses taken beyond the B.S. degree. Of these a minimum of 12 s.h. must be from Mechanical Engineering courses numbered 6000 or higher. Students may also select Mechanical Engineering courses numbered 4100 or higher except for ME:4186 which is not eligible for graduate credit.
- Students may design their program around a particular research and study area; see General Catalog and ME website for specifics. Work with faculty advisor to determine appropriate graduate level coursework and sequence.
- Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- Complete two qualifying exam courses during first two semesters in the program; must take ME:5113 plus one graduate level course in a focus area with a grade of A- or higher in each. Focus area courses are chosen in consultation with the faculty advisor from a specified list. More information is found in the General Catalog and on department website.
- Credit for this course does not substitute for regular coursework or research credit hours.
- Must be completed during first semester.
- Attendance required every fall and spring semester until degree completion.
- Work with academic advisor to determine elective graduate coursework and sequence.
- Submit dissertation prospectus to the exam committee not later than two weeks before the comprehensive exam.
- Oral exam to be completed after passing the qualifying exam and upon completion of coursework in the specified area of study no later than 28 months after entering the doctoral program. The exam will focus on the dissertation prospectus and related areas.
- Complete a minimum 12 s.h. of credit in thesis research.
- Dissertation defense.

# Naval Science and Technology

## Chair, Department of Mechanical Engineering

- Ching-Long Lin

**Undergraduate certificate:** naval science and technology  
**Website:** <https://me.engineering.uiowa.edu/undergraduate/certificate-naval-st>

Naval science and technology has a tremendous impact upon defense, world commerce, and energy production. The U.S. Navy is expanding its fleet to the largest size in nearly 20 years. Approximately 90 percent of world trade is carried by sea. The number of offshore solar, wind, and wave energy installations continues to increase.

The underlying science and technology challenges demand a workforce with a strong foundation in the engineering sciences related to fluid flow, computational and experimental methods, autonomous systems, and control. The Certificate in Naval Science and Technology introduces students to the principles of naval hydrodynamics, including propulsion, resistance, maneuvering, and seakeeping, as well as the fundamentals of autonomous systems, including control systems, robotics, and artificial intelligence.

Students who complete the certificate will work in a unique learning community where they will have an opportunity to contribute to projects of interest to the Navy and its supporting industry, and learn about potential career paths.

The Certificate in Naval Science and Technology is administered by the Department of Mechanical Engineering [p. 1562].

## Learning Objectives

The Certificate in Naval Science and Technology is built on eight learning objectives. The first six learning objectives are focused on providing students with strong technical and leadership skills and an understanding of marine systems enabling them to work effectively in naval science and technology and other technology-intensive fields. Specifically, students will achieve the following:

- Demonstrate a foundation in the fundamentals of fluid mechanics and naval hydrodynamics.
- Use advanced numerical methods and/or measurement techniques to solve fluid-flow problems and design systems involving naval hydrodynamics.
- Demonstrate a foundation in the fundamentals of control theory and artificial intelligence, including optimal control, tracking, planning, machine learning, and reinforcement learning.
- Use simulators and experiments to evaluate, simulate, and design autonomous naval systems.
- Develop potential for continued growth and leadership in a complex and multidisciplinary technical environment.
- Demonstrate organization and communication skills needed to manage open-ended projects.

The final two learning objectives focus on understanding the challenges faced by the Navy and helping students to identify related career paths:

- Recognize and address current science and technology challenges faced by the Navy.
- Be able to make decisions about career paths in the Navy, its contractors, and supporting industry.

## Programs

### Undergraduate Program of Study Certificate

- Certificate in Naval Science and Technology [p. 1580]

# Naval Science and Technology, Certificate

## Requirements

The undergraduate Certificate in Naval Science and Technology requires 18 s.h. of credit. Students must maintain a g.p.a. of at least 2.00 in work for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

All of the certificate courses have prerequisites; students must complete all of a course's prerequisites before they may register for the course. Prerequisites do not count toward the 18 s.h. required for the certificate. Prerequisites for certificate courses are listed on the Certificate in Naval Science and Technology web page.

Mechanical engineering students may use the certificate as a tailored engineering focus area by adding an additional eligible course. In addition, mechanical engineering students may earn the Certificate in Naval Science and Technology while they complete the design elective focus area for their major. College of Engineering students earning the certificate are advised by the Department of Mechanical Engineering.

The Certificate in Naval Science and Technology requires the following coursework.

## Naval Hydrodynamics Courses

In certain circumstances, if it is not possible for students to complete two of these courses, they may request permission to take ME:5143 Computational Fluid and Thermal Engineering instead of ME:4175 Computational Naval Hydrodynamics.

Code	Title	Hours
At least two of these:		
ME:4125	Biomimetic Fluid Dynamics	3
ME:4175	Computational Naval Hydrodynamics	3
ME:4176	Experimental Naval Hydrodynamics	3

## Autonomous Systems and Machine Learning Courses

Code	Title	Hours
At least two of these:		
ME:4111/CEE:4511	Scientific Computing and Machine Learning	3
ME:5114	Nonlinear Control in Robotic Systems	3
ME:5115	Cooperative Autonomous Systems	3

## Capstone Course

Students must complete either a capstone design project on an approved naval science and technology topic or an independent investigation involving research or testing of a system related to naval hydrodynamics. If a student

chooses, both courses may be completed for credit toward the certificate.

Code	Title	Hours
One or both of these:		
ME:4098	Individual Investigations: Mechanical Engineering (students must register for at least 3 s.h.)	arr.
ME:4186	Enhanced Design Experience (subject to approval of application for capstone design path; ME:4086 is a prerequisite course)	3

## Electives

Students select the remainder of the 18 s.h. required for the certificate from the following.

Code	Title	Hours
ME:4116/ISE:4116	Manufacturing Processes Simulations and Automation	3
ME:4120	Advanced Linear Control Systems	3
ME:4140	Modern Robotics and Automation	3
ME:4150	Artificial Intelligence in Engineering	3
ME:4200	Modern Engineering Materials for Mechanical Design	3
ME:5143	Computational Fluid and Thermal Engineering	3
ME:5160/CEE:5369	Intermediate Mechanics of Fluids	3

# Sustainable Water Development

## Chair, Department of Civil and Environmental Engineering

- A. Allen Bradley Jr.

**Graduate certificate:** sustainable water development

**Website:** <https://cee.engineering.uiowa.edu/graduate-program/sustainable-water-development-graduate-certificate>

The Certificate in Sustainable Water Development trains science, technology, engineering, and mathematics (STEM) graduate students to address future challenges of water scarcity and variability while also meeting the food and energy demands of Earth's growing population. The certificate leverages a unique learning environment focused on water sustainability that extends beyond any one discipline, department, or college.

The Certificate in Sustainable Water Development is administered by the Department of Civil and Environmental Engineering [p. 1500].

## Programs

### Graduate Program of Study Certificate

- Certificate in Sustainable Water Development [p. 1582]

# Sustainable Water Development, Graduate Certificate

## Requirements

The graduate Certificate in Sustainable Water Development requires 15 s.h. of credit, including at least 9 s.h. earned at the University of Iowa. The 5000-level courses required for the certificate must be taken at the University of Iowa. Students must maintain a g.p.a. of at least 2.50 in work for the certificate. The certificate is open to graduate students currently enrolled at the University of Iowa who are completing a degree program.

The Certificate in Sustainable Water Development requires the following coursework.

## Required Courses

Code	Title	Hours
All of these:		
CEE:5096	Water, Energy, and Food Nexus Seminar (taken for two semesters)	0
CEE:5350	Watershed Hydrology and Ecosystem Processes	3
CEE:5410	Politics and Economics of the Food, Energy, Water Nexus	3
CEE:5993	Community-Centered Problem Solving and Design	3

## Electives

Students take two elective courses selected from the following list. For more information about approved certificate electives, contact the Sustainable Water Development Program coordinator.

Code	Title	Hours
Two of these for at least 6 s.h.:		
CEE:4102	Groundwater	3
CEE:4104/EES:4660	Groundwater Modeling	3
CEE:4107/CBE:4410	Sustainable Systems	3
CEE:4118	Statistical Methods in Water and the Environment	3
CEE:4146	Multiscale Hydrology: Introduction to Multiscale Hydrologic Phenomena	3
CEE:4158/OEH:4920	Solid and Hazardous Wastes	3
CEE:4187/OEH:4540	Statistics for Experimenters	3
CEE:4370	Open Channel Flow and Sediment Transport	3
CEE:4385	International Perspectives in Water Sciences and Management	3
CEE:5156	Physical and Chemical Environmental Processes	3

CEE:6223	Environmental Boundary Layers	4
CEE:6253	Environmental Organic Chemistry	3
CEE:6255	Environmental Biotechnology and Bioremediation	3
ABRD:3445	India Winterim	arr.
ACCT:4300	Accounting Ethics and Law	3
ANTH:3110/ GHS:3110/ NAIS:3110	Colonialism and Indigenous Health Equity	3
BIOL:3663	Plant Response to the Environment	3
CBE:5140/ CEE:5513/ME:5113	Mathematical Methods in Engineering	3
CBE:5405	Green Chemical and Energy Technologies	3
CBE:5415/IGPI:5415	Satellite Image Processing and Remote Sensing of Atmosphere	3
CBE:5425/CEE:5115	Atmospheric Chemistry and Physics	3
CBH:5305	Evaluation: Approaches and Applications	3
CBH:6205	Designing and Implementing Interventions	3
CHEM:4760	Radiochemistry: Energy, Medicine, and the Environment	3
CHEM:4873	Atmospheric and Environmental Chemistry	3
CPH:3500/ GHS:3500	Global Public Health	3
ECE:5630	Sustainable Energy Conversion	3
ECON:3345	Global Economics and Business	3
ECON:3625/ URP:3135	Environmental and Natural Resource Economics	3
ECON:3800	Law and Economics	3
ECON:4090	Natural Resource Economics	3
ECON:4140	Labor Economics	3
EES:3390	Integrated Watershed Analysis	3
GEOG:3070/ GHS:3070	Hungry Planet: Global Geographies of Food	3
GEOG:3780/ GHS:3780/ HIST:3240	U.S. Energy Policy in Global Context	3
GEOG:4020	Field Methods: Mapping and Mobile Computing	3
GEOG:4150/ GHS:4150/ IGPI:4150	Health and Environment: GIS Applications	3
GEOG:4500/ IGPI:4500	Applications in Environmental Remote Sensing	4
GEOG:4520/ IGPI:4520	GIS for Environmental Studies: Applications	3
GEOG:4570	Spatial Analysis and Location Models	3

GEOG:4580/ IGPI:4581	Introduction to Geographic Databases	3
GEOG:4650	Simulation in Environmental Geography	3
GEOG:4750/ URP:4750	Environmental Impact Analysis	3
GHS:4600	Global Health and Human Rights	2-3
LAW:8433	Environmental Law	2-3
LAW:8622	International Environmental Law	3
LAW:8992	Water Law	arr.
MATH:4740/ CS:4740/IGPI:4740/ STAT:4740	Large Data Analysis	3
ME:4048	Energy Systems Design	4
OEH:4240	Global Environmental Health	3
OEH:4260/ GHS:4260	Global Water and Health	3
OEH:5620	Occupational Health	3
OEH:6460	Quantitative Exposure Assessment: Study Design and Evaluation	3
OEH:6710	Human Toxicology and Risk Assessment	3
PHYS:5811	Classical Electrodynamics I	3
PHYS:5812	Classical Electrodynamics II	3
URP:6205/ PBAF:6205	Economics for Policy Analysis	1,3
URP:6225/ PBAF:6225	Applied GIS for Planning and Policy Making	1,3
URP:6227	Spatial Analysis in Planning and Policy Making	3
URP:6233/ PBAF:6233	Public Finance and Budgeting	3
URP:6242	Planning and City Administration	1
URP:6253/ PBAF:6253	Designing Sustainable and Healthy Cities	1-3
URP:6256/ PBAF:6256	Environmental Policy	3
URP:6257/ PBAF:6257	Environmental Management	3
URP:6258/ PBAF:6258	Systems and Scenario Thinking	3
URP:6273/ PBAF:6273	Community Development Through Creative Placemaking	3
URP:6295/ PBAF:6295	Economic Development Policy	3

- provide a statement of purpose of 500 words or less about their core research and training program, and why the certificate program will benefit their training and goals for career placement; and
- provide a letter of endorsement from their advisor.

Admission to the certificate program is competitive. Applications are accepted on a rolling basis and are reviewed by the Sustainable Water Development Program; applications can be submitted online along with pertinent materials. Students receive an email after an admission decision has been made.

## Admission

Students must:

- be in a relevant science, technology, engineering, or mathematics (STEM) field;
- submit their University of Iowa transcript;
- have a graduate g.p.a. higher than 3.00 if in doctoral program or a g.p.a. higher than 2.75 if in master's program;
- submit their résumé or curriculum vitae;

# Technological Entrepreneurship

**Undergraduate certificate:** technological entrepreneurship

**Website:** <https://engineering.uiowa.edu/current-students/advising-and-academic-information/majors-minors-and-certificates/technological>

The College of Engineering partners with the John Pappajohn Entrepreneurial Center in the Tippie College of Business to offer the Certificate in Technological Entrepreneurship.

The program is intended for students who would like to develop an understanding of how to manage innovation in business environments as well as those who plan to start and operate their own businesses.

Students who complete the certificate program are able to:

- gain exposure to understanding sound business thinking;
- employ a more innovative and creative mindset in problem solving;
- learn how to create a business plan as skillfully as solving difficult engineering equations;
- understand the entrepreneurial approach to acquiring and managing resources;
- acquire team-building skills critical in both small and large companies;
- get insights in how to bridge engineering and business problems; and
- obtain valuable contacts and network opportunities with successful, thriving businesses and industries.

The Certificate in Technological Entrepreneurship is administered by the College of Engineering [p. 1460].

## Programs

### Undergraduate Program of Study Certificate

- Certificate in Technological Entrepreneurship [p. 1585]

# Technological Entrepreneurship, Certificate

## Requirements

The undergraduate Certificate in Technological Entrepreneurship requires a minimum of 18 s.h. of credit. Students must complete at least 12 s.h. of the 18 s.h. required for the certificate at the University of Iowa or in approved study abroad courses. They must maintain a g.p.a. of at least 2.00 in work toward the certificate.

The certificate program is open to Bachelor of Science in Engineering students who have earned at least 45 s.h. of credit toward the B.S.E. and have a University of Iowa g.p.a. of at least 2.75. Students must be granted the B.S.E. and complete all certificate requirements in order to receive the certificate.

Students must declare their intention to pursue the certificate on MyUI and must apply for admission; visit the Technological Entrepreneurship Certificate web page for more information.

Certificate students study how the entrepreneurial process relates to technology-based businesses. The program is intended for students who would like to develop an understanding of how to manage innovation in business environments as well as those who plan to start and operate their own businesses.

The Certificate in Technological Entrepreneurship requires the following coursework.

## Foundation Course

Code	Title	Hours
This course:		
ISE:2500	Engineering Economy	3

## Entrepreneurship Core

Code	Title	Hours
Both of these:		
ENTR:2000	Entrepreneurship and Innovation	3
ENTR:3100	Entrepreneurial Finance	3

## Entrepreneurship Course in the Major

Code	Title	Hours
One of these, depending on a student's engineering major:		
BME:4910	Biomedical Engineering Senior Design I (biomedical engineering majors)	4
CBE:4109	Chemical Engineering Process Design I (chemical engineering majors)	2
CEE:4850	Project Design and Management in Civil Engineering (civil engineering majors)	3

ECE:4890	Senior Electrical and Computer Engineering Design (electrical engineering majors)	3
ISE:4600	Industrial Engineering Design Project (industrial engineering majors)	4
ME:4086	Mechanical Engineering Design Project (mechanical engineering majors)	3

## Entrepreneurship Electives

Students customize their programs with their choice of electives. They must earn sufficient elective credit to complete the 18 s.h. required for the certificate.

Code	Title	Hours
BME:4920	Biomedical Engineering Senior Design II	4
ENTR:3200	Entrepreneurial Marketing	3
ENTR:3400	Strategic Management of Technology and Innovation	3
ENTR:3500	Social Entrepreneurship	3
ENTR:3595	Nonprofit Organizational Effectiveness I	3
ENTR:3600	E-Commerce Strategies for Entrepreneurs	3
ENTR:4000	Topics in Entrepreneurship	3
ENTR:4200	Entrepreneurship: Business Consulting	3
ENTR:4300	Entrepreneurship: Advanced Business Planning	3
ENTR:4400	Managing the Growth Business	3
ENTR:4450	Professional Sports Management	3
ENTR:4460	Entrepreneurship and Global Trade	3
ENTR:4510	Arts Leadership Seminar	3
ENTR:4900	Academic Internship	1-9
Any entrepreneurship course (prefix ENTR), with certificate advisor's approval		

# Graduate College

## Dean

- Amanda H. Thein

## Associate Deans

- Michelle L. Campo, Steven M. Varga

## Assistant Deans

- Heidi Arbisi-Kelm, Jennifer Teitle

**Website:** <https://grad.uiowa.edu>

The University of Iowa has been a leading center of advanced study for more than a century. Presently, the Graduate College accounts for nearly one-fifth of the University's total enrollment. This high ratio reflects the breadth of the University's graduate programs and resources, the strength of a graduate faculty with a long tradition of personal and professional concern for students, and the opportunities afforded graduate students for involvement, recognition, and support.

The Graduate College is responsible for the review and approval of proposals for new graduate programs and for the periodic survey and evaluation of existing programs. Through its administration of scholarship, fellowship, and research assistantship funds, the college encourages research and strengthening of departments. Additionally, the college works with the other colleges and departments of the University to formulate policies concerning selection, supervision, and support of graduate students.

The faculty of the Graduate College is made up of all University tenure-track faculty members at the ranks of assistant professor, associate professor, and professor. A 17-member Graduate Council, elected from and by the graduate faculty and the Graduate Student Senate, is the executive committee of the graduate faculty and is advisory to the dean of the Graduate College.

## Manual of Rules and Regulations

The current edition of the Manual of Rules and Regulations is available on the college's website.

## Office of Graduate Diversity, Equity, and Inclusion

The Office of Graduate Diversity, Equity, and Inclusion is dedicated to providing academic assistance to graduate students from underrepresented populations across graduate programs; to helping build a sustainable practice of inclusion that nourishes and attracts underrepresented graduate students campuswide; and to helping build community through individual and group activities focused on successful academic progress.

## Graduate Student Success

The Graduate College takes a holistic approach to graduate student and postdoctoral scholar preparation. Whether a student's goal is a career in academe, industry, government or elsewhere, professional development can expand one's options and make a student more marketable to employers. The Graduate Student Success Office can help graduate students in the realms of:

- communication
- research and publication
- diversity
- funding
- teaching
- leadership
- careers
- wellness

## Research Resources

Many of the University's diverse research activities are centrally administered by the Office of the Vice President for Research, which has a cooperative relationship with the Graduate College.

## Graduate Student Senate

The Graduate Student Senate is the University graduate student body representative organization. Representatives are elected annually from each University department that has a graduate degree program. The senate's primary purpose is to serve the interests of the graduate student body in matters affecting its welfare. The senate advises the dean of the Graduate College on matters pertaining to the college.

## Programs

## Degrees Offered

The Graduate College confers the Master of Arts (M.A.), Master of Science (M.S.), Master of Accountancy (M.Ac.), Master of Arts in Teaching (M.A.T.), Master of Computer Science (M.C.S.), Master of Fine Arts (M.F.A.), Master of Health Administration (M.H.A.), Master of Public Affairs (M.P.Aff.), Master of Public Health (M.P.H.), Specialist in Education (Ed.S.), Master of Science in Nursing (M.S.N.), Master of Social Work (M.S.W.), Doctor of Philosophy (Ph.D.), Doctor of Education (Ed.D.), Doctor of Musical Arts (D.M.A.), Doctor of Nursing Practice (D.N.P.), Doctor of Physical Therapy (D.P.T.), and Doctor of Audiology (Au.D.) degrees.

The college currently confers degrees in the following major fields.

Accounting: M.Ac.<sup>2</sup>  
 Actuarial Science: M.S.<sup>2</sup>  
 African American World Studies: M.A.<sup>1</sup>  
 American Studies: M.A.<sup>1</sup>, Ph.D.  
 Anatomy and Cell Biology: M.S.<sup>3</sup>, Ph.D.<sup>3</sup> (see Biomedical Science)  
 Anthropology: M.A.<sup>1</sup>, Ph.D.  
 Applied Mathematical and Computational Sciences: Ph.D.  
 Art: M.A.<sup>1</sup>, M.F.A.  
 Art History: M.A.<sup>1</sup>, Ph.D.  
 Asian Civilizations: M.A.<sup>1</sup>  
 Astronomy: M.S.<sup>1</sup>  
 Athletic Training: M.S.<sup>1</sup>  
 Biochemistry: M.S., Ph.D.  
 Biology: M.S.<sup>3</sup>, Ph.D.<sup>3</sup> (see Integrated Biology)  
 Biomedical Engineering: M.S.<sup>1</sup>, Ph.D.  
 Biomedical Science: M.S.<sup>1</sup>, Ph.D.  
 Biostatistics: M.S.<sup>1</sup>, Ph.D.  
 Book Arts: M.F.A.  
 Business Administration: M.A.<sup>1</sup>, Ph.D.  
 Business Analytics: M.S.  
 Chemical and Biochemical Engineering: M.S.<sup>1</sup>, Ph.D.  
 Chemistry: M.S.<sup>1</sup>, Ph.D.

Civil and Environmental Engineering: M.S.<sup>1</sup>, Ph.D.  
 Classics: M.A.<sup>1</sup>, Ph.D.  
 Clinical Investigation: M.S.<sup>1</sup>  
 Communication Studies: M.A.<sup>1</sup>, Ph.D.  
 Community and Behavioral Health: M.S.<sup>3</sup>, Ph.D.  
 Computer Science: M.S.<sup>1</sup>, M.C.S.<sup>2</sup>, Ph.D.  
 Dance: M.F.A.  
 Dental Public Health: M.S.  
 Economics: M.A.<sup>1</sup>, Ph.D.  
 Education: M.A.<sup>1</sup>, M.A.T.<sup>2</sup>, Ed.S.<sup>2</sup>, Ph.D.  
 Educational Policy and Leadership Studies: M.A.<sup>1</sup>, Ed.D.<sup>2</sup>, Ed.S.<sup>2</sup>, Ph.D.  
 Electrical and Computer Engineering: M.S.<sup>1</sup>, Ph.D.  
 Elementary Education: M.A., Ph.D.  
 Engineering and Information Science, M.S.<sup>2</sup>  
 English: M.A.<sup>1</sup>, M.F.A., Ph.D.  
 Epidemiology: M.S.<sup>1</sup>, Ph.D.  
 Exercise Science: M.S.<sup>3</sup>, Ph.D.<sup>3</sup>  
 Film and Video Production: M.A.<sup>1</sup>, M.F.A.  
 Film Studies: M.A.<sup>1</sup>, Ph.D.  
 Finance: M.S.<sup>1</sup>  
 Free Radical and Radiation Biology: M.S.<sup>3</sup>, Ph.D.<sup>3</sup> (see Biomedical Science)  
 French and Francophone World Studies: M.A.<sup>1</sup>, Ph.D.  
 Genetics: Ph.D.  
 Geography: M.A.<sup>1</sup>, Ph.D.  
 Geoscience: M.S.<sup>1</sup>, Ph.D.  
 German: M.A.<sup>1</sup>, Ph.D.<sup>3</sup>  
 Greek: M.A.<sup>1</sup>  
 Health and Human Physiology: M.S.<sup>1</sup>, Ph.D.  
 Health and Sport Studies: M.A.<sup>3</sup>, Ph.D.<sup>3</sup>  
 Health Management and Policy: M.H.A.<sup>2</sup>, Ph.D.<sup>3</sup>  
 Health Policy, M.S.  
 Health Services and Policy: Ph.D.  
 History: M.A.<sup>1</sup>, Ph.D.  
 Human Toxicology: M.S., Ph.D.  
 Immunology: Ph.D.  
 Industrial Engineering: M.S.<sup>1</sup>, Ph.D.  
 Informatics: M.S.<sup>1</sup>, Ph.D.  
 Integrated Biology: M.S.<sup>1</sup>, Ph.D.

<sup>2</sup> Nonthesis degree

<sup>3</sup> Student entry suspended

## Interdisciplinary Degree Programs

The Graduate College participates in a number of University of Iowa interdisciplinary degree programs. Detailed information about the following master's and doctoral degree programs is provided later in these Graduate College sections of the Catalog: Applied Mathematical and Computational Sciences [p. 1597], Genetics [p. 1625], Human Toxicology [p. 1628], Immunology [p. 1631], Informatics [p. 1635], Molecular Medicine [p. 1660], Neuroscience [p. 1662], and Translational Biomedicine [p. 1683].

In addition to the degree programs listed above, the graduate faculty has authorized the awarding of interdisciplinary master's and doctoral degrees. Students seeking approval for interdisciplinary master's and doctoral programs must previously have been admitted to and enrolled in a departmental program in the Graduate College. See sections X.A. and XII.D. in the Manual of Rules and Regulations on the college's website.

### Combined Programs

## Combined Programs Offered Through the Graduate College

Various combined programs have been developed whereby students work simultaneously toward two degrees. Consult the appropriate Catalog sections for more information.

Established combined graduate programs include, but may not be limited to:

### **B.S. in Biochemistry/Ph.D. in Biochemistry**

The combined B.S. in biochemistry/Ph.D. program in biochemistry enables Bachelor of Science students majoring in biochemistry to begin work toward the Ph.D. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.S. and Ph.D. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Carver College of Medicine; see the Department of Biochemistry and Molecular Biology [p. 1732] in the Catalog.

### **B.A. in Biology/M.P.H. (Epidemiology Subprogram) or M.S. in Epidemiology**

The combined B.A. in biology/M.P.H. with an epidemiology subprogram and the combined B.A. in biology/M.S. in epidemiology enable Bachelor of Arts students majoring in biology to begin work toward the M.P.H. or M.S. while completing the bachelor's degree. Students admitted to either program may count 12 s.h. of credit toward both the B.A. and the M.P.H. or M.S. degree requirements; they also may maximize their selection of upper-level classes for advanced training in epidemiology. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Public Health; see the B.A. in biology [p. 187]; Master of Public Health, M.P.H. [p. 1956] (epidemiology subprogram); and M.S. in epidemiology [p. 1994] in the Catalog.

### **B.A. in Biology, Chemistry, Environmental Sciences, Physics/ M.A.T. (Science Education Subprogram)**

The combined B.A./M.A.T. program with a science education subprogram enables Bachelor of Arts students majoring in biology, chemistry, environmental sciences, or physics to begin work toward the M.A.T. while completing the bachelor's degree. Students admitted to the program may count 18 s.h. of credit toward both the B.A. and M.A.T. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Education; see Biology [p. 182], Chemistry [p. 213], Environmental Sciences [p. 465], or Physics and Astronomy [p. 899] and the Master of Arts in Teaching, M.A.T. [p. 1444] (science education subprogram) in the Catalog.

### **B.A. or B.S. in Computer Science/M.C.S.**

The combined B.A. or B.S. in computer science/M.C.S. program enables undergraduate students majoring in computer science to begin work toward the M.C.S. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of coursework, typically advanced technical courses and electives, toward both the bachelor's and the M.C.S. degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Computer Science [p. 305] in the Catalog.

### **B.A. or B.S. in Environmental Policy and Planning/M.S. in Urban and Regional Planning**

The combined B.A. or B.S. in environmental policy and planning/M.S. in urban and regional planning enables

undergraduate students majoring in environmental policy and planning to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.A. or B.S. and M.S. degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Environmental Policy and Planning [p. 452] and the M.S. in urban and regional planning [p. 1677] in the Catalog.

### **B.A. in Geography (Geographic Information Science Track) or B.S. in Geography/M.S. in Informatics (Geoinformatics Subprogram)**

The combined B.A. in geography with a geographic information science track or B.S. in geography/M.S. in informatics with a geoinformatics subprogram enables undergraduate students majoring in geography to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.A. or B.S. and M.S. degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Geographical and Sustainability Sciences [p. 545] and the M.S. in informatics [p. 1642] (geoinformatics subprogram) in the Catalog.

### **B.A. in German/M.A. in German**

The combined B.A./M.A. program in German enables undergraduate students majoring in German to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.A. and M.A. degree requirements. They also have the opportunity for early entrance into advanced courses in German. Offered by the Graduate College and the College of Liberal Arts and Sciences; see German [p. 579] in the Catalog.

### **B.A. in Linguistics/M.A. in Linguistics (TESL Subprogram)**

The combined B.A./M.A. program in linguistics with a TESL (Teaching English as a Second Language) subprogram enables students majoring in linguistics to begin work toward the M.A. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of advanced coursework toward both the B.A. and M.A. degree requirements and may take selected graduate-level courses before they have been awarded the B.A. degree. They also may gain experience teaching ESL at the college level early in their graduate careers. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Linguistics [p. 771] in the Catalog.

### **B.A. in Mathematics/M.A.T. (Mathematics Education Subprogram)**

The combined B.A./M.A.T. program with a mathematics education subprogram enables Bachelor of Arts students majoring in mathematics to begin work toward the M.A.T. while completing the bachelor's degree. Students admitted to the program may count 18 s.h. of credit toward both the B.A. and M.A.T. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Education; see the B.A. in mathematics [p. 806] and the Master of Arts in Teaching, M.A.T. [p. 1442] (mathematics education subprogram) in the Catalog.

## **B.S. in Microbiology/Ph.D. in Microbiology**

The combined B.S. in microbiology/Ph.D. in microbiology enables undergraduate students majoring in microbiology to begin work toward the Ph.D. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.S. and Ph.D. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Carver College of Medicine; see the B.S. in microbiology [p. 1777] and the Ph.D. in microbiology [p. 1784] in the Catalog.

## **B.A. in Psychology/M.P.H. (Community and Behavioral Health Subprogram)**

The combined B.A. in psychology/M.P.H. program with a community and behavioral health subprogram enables Bachelor of Arts students majoring in psychology to begin work toward the M.P.H. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.A. and M.P.H. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Public Health; see the B.A. in psychology [p. 956] and the Master of Public Health, M.P.H. [p. 1956] (community and behavioral health subprogram) in the Catalog.

## **B.S. in Statistics/M.P.H. (Biostatistics Subprogram)**

The combined B.S. in statistics/M.P.H. program with a biostatistics subprogram enables Bachelor of Science students majoring in statistics to begin work toward the M.P.H. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.S. and M.P.H. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Public Health; see B.S. in statistics [p. 1097] and the Master of Public Health, M.P.H. [p. 1956] (biostatistics subprogram) in the Catalog.

## **B.S. in Statistics/M.S. in Statistics**

The combined B.S./M.S. program in statistics enables undergraduate students majoring in statistics to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.S. and M.S. degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Statistics and Actuarial Science [p. 1091] in the Catalog.

## **B.S. in Therapeutic Recreation/M.S. in Health and Human Physiology (Child Life Subprogram)**

The combined B.S. in therapeutic recreation/M.S. in health and human physiology with a child life subprogram enables undergraduate students majoring in therapeutic recreation to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count a limited number of credit toward both the B.S. and M.S. degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Health and Human Physiology [p. 612] in the Catalog.

## **B.A. or B.S./M.S. in Business Analytics (Career Subprogram)**

The combined B.A. or B.S./M.S. in business analytics with a career subprogram allows the following undergraduate students majoring in actuarial science (B.S.); applied physics (B.S.); biology (B.A. or B.S.); chemistry (B.A. or B.S.); computer science (B.A. or B.S.); criminology, law and justice (B.A. or B.S.); data science (B.S.); economics (B.A. or B.S.); English (B.A.); English and creative writing (B.A.); enterprise leadership (B.A.); ethics and public policy (B.A.); history (B.A.); informatics (B.A. or B.S.); interdepartmental studies (B.A.); journalism and mass communication (B.A.); linguistics (B.A.); mathematics (B.A. or B.S.); physics (B.A. or B.S.); political science (B.A. or B.S.); psychology (B.A. or B.S.); sociology (B.A. or B.S.); and statistics (B.S.) to begin work toward the M.S. in business analytics while completing their undergraduate degree. This provides students with the opportunity to complete both degrees in less time than it would take them to complete the degrees separately. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Tippie College of Business; see the M.S. in business analytics (career) [p. 1171] in the Catalog.

## **B.A. or B.S./M.S. in Finance**

The combined B.A. or B.S./M.S. in finance allows the following undergraduate students majoring in actuarial science (B.S.); applied physics (B.S.); biology (B.A. or B.S.); chemistry (B.A. or B.S.); computer science (B.A. or B.S.); criminology, law and justice (B.A. or B.S.); data science (B.S.); English (B.A.); English and creative writing (B.A.); enterprise leadership (B.A.); ethics and public policy (B.A.); history (B.A.); informatics (B.A. or B.S.); interdepartmental studies (B.A.); journalism and mass communication (B.A.); linguistics (B.A.); mathematics (B.A. or B.S.); physics (B.A. or B.S.); political science (B.A. or B.S.); psychology (B.A. or B.S.); sociology (B.A. or B.S.); and statistics (B.S.) to begin work toward the M.S. in finance while completing their undergraduate degree. This provides students with the opportunity to complete both degrees in less time than it would take them to complete the degrees separately. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Tippie College of Business; see the M.S. in finance [p. 1214] in the Catalog.

## **Bachelor's and Public Health Graduate Degrees**

The College of Public Health and various undergraduate programs have developed combined programs in which students pursue the bachelor's degree, either a B.A. or a B.S., and a public health graduate degree, M.A., M.P.H. or M.S., in five years instead of six. Offered by all undergraduate colleges, the Graduate College, and the College of Public Health; see College of Public Health [p. 1937] in the Catalog.

## **B.B.A./M.S. in Business Analytics (Career Subprogram)**

The combined B.B.A./M.S. in business analytics with a career subprogram enables undergraduate students majoring in accounting, business administration, economics, finance, management, business analytics and information systems, and marketing to begin work on the M.S. while completing the Bachelor of Business Administration degree. Students can complete both degrees in less time than it would take them to complete them separately; see the M.S. in business analytics (career) [p. 1171] in the Catalog.

## **B.B.A./M.S. in Finance**

The combined B.B.A./M.S. program in finance allows undergraduate students majoring in business administration to begin work toward the M.S. while completing the Bachelor of Business Administration degree. The program provides students with the opportunity to complete both degrees in five years instead of six. Offered by the Graduate College and the Tippie College of Business; see the M.S. in finance [p. 1214] in the Catalog.

## **B.S.E. in Biomedical Engineering/M.S. in Biomedical Engineering**

The combined B.S.E./M.S. program in biomedical engineering enables undergraduate students majoring in biomedical engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.S.E. and M.S. degree requirements. They also may attend and participate in the departmental graduate seminar and work on a master's thesis or research project before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see the Roy J. Carver Department of Biomedical Engineering [p. 1473] in the Catalog.

## **B.S.E. in Biomedical Engineering/M.S. in Occupational and Environmental Health (Industrial Hygiene Subprogram)**

The combined B.S.E. in biomedical engineering/M.S. in occupational and environmental health with an industrial hygiene subprogram enables undergraduate students majoring in biomedical engineering to begin work toward the M.S. in occupational and environmental health while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.S.E. and M.S. degree requirements. Offered by the Graduate College, the College of Engineering, and the College of Public Health; see the B.S.E. in biomedical engineering [p. 1480] and the M.S. in occupational and environmental health [p. 2014] (industrial hygiene subprogram) in the Catalog.

## **B.S.E. in Chemical Engineering/M.S. in Chemical and Biochemical Engineering**

The combined B.S.E. in chemical engineering/M.S. in chemical and biochemical engineering enables undergraduate students majoring in chemical engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of coursework, typically advanced chemistry sequences and electives, toward both the B.S.E. and M.S. degree requirements. Offered by the Graduate College and the College of Engineering; see Chemical and Biochemical Engineering [p. 1486] in the Catalog.

## **B.S.E. in Chemical Engineering/M.S. in Civil and Environmental Engineering**

The combined B.S.E. in chemical engineering/M.S. in civil and environmental engineering enables undergraduate students majoring in chemical engineering to begin work toward the M.S. in civil and environmental engineering while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of coursework toward both the B.S.E. and M.S.

degree requirements. Offered by the Graduate College and the College of Engineering; see the B.S.E. in chemical and biochemical engineering [p. 1492] and the M.S. in civil and environmental engineering [p. 1513] in the Catalog.

## **B.S.E. in Civil Engineering/M.S. in Civil and Environmental Engineering**

The combined B.S.E. in civil engineering/M.S. in civil and environmental engineering enables undergraduate students majoring in civil engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.S.E. and M.S. degree requirements. They also may attend and participate in the departmental graduate seminar and work on a master's thesis or research project before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Civil and Environmental Engineering [p. 1500] in the Catalog.

## **B.S.E. in Civil Engineering/M.S. in Urban and Regional Planning**

The combined B.S.E. in civil engineering/M.S. in urban and regional planning enables undergraduate students majoring in civil engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.S.E. and M.S. degree requirements. They also may attend and participate in the departmental graduate seminar and work on a master's thesis or research project before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see the B.S.E. in civil and environmental engineering [p. 1509] and the M.S. in urban and regional planning [p. 1677] in the Catalog.

## **B.S.E. in Electrical Engineering/M.S. in Electrical and Computer Engineering**

The combined B.S.E. in electrical engineering/M.S. in electrical and computer engineering enables undergraduate students majoring in electrical engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 9 s.h. toward both the B.S.E. and M.S. degree requirements. They also may count an additional 3 s.h. toward the M.S. degree requirements and engage in thesis-level research before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Electrical and Computer Engineering [p. 1527] in the Catalog.

## **B.S.E. in Industrial Engineering/M.S. in Industrial Engineering**

The combined B.S.E./M.S. program in industrial engineering enables undergraduate students majoring in industrial engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 6 s.h. toward both the B.S.E. and M.S. degree requirements. They also may count an additional 6 s.h. toward the M.S. degree requirements, attend one of the department's graduate seminars, and work on master's thesis research before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Industrial and Systems Engineering [p. 1546] in the Catalog.

## **B.S.E. in Mechanical Engineering/M.S. in Mechanical Engineering**

The combined B.S.E./M.S. program in mechanical engineering enables undergraduates majoring in mechanical engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 6 s.h. toward both the B.S.E. and M.S. degree requirements. They also may count an additional 6 s.h. toward the M.S. degree requirements, attend a graduate seminar, and participate in master's thesis research before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Mechanical Engineering [p. 1562] in the Catalog.

## **B.S.E. in Mechanical Engineering/M.S. in Civil and Environmental Engineering**

The combined B.S.E. in mechanical engineering/M.S. in civil and environmental engineering enables undergraduate students majoring in mechanical engineering to begin work toward the M.S. in civil and environmental engineering while completing the bachelor's degree. Students admitted to the program may count 9 s.h. of coursework toward both the B.S.E. and M.S. degree requirements. They also may count an additional 3 s.h. toward the M.S. degree requirements before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see the B.S.E. in mechanical engineering [p. 1570] and the M.S. in civil and environmental engineering [p. 1513] in the Catalog.

## **Au.D./Ph.D. in Speech and Hearing Science**

The combined Au.D./Ph.D. program in speech and hearing science is designed for students who would like to practice audiology and hold a faculty position at a university. Students admitted to the program work concurrently toward the Doctor of Audiology and the Doctor of Philosophy; they may count 30 s.h. toward the requirements of both degrees. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Communication Sciences and Disorders [p. 271] in the Catalog.

## **Graduate Degrees/Certificates in Business Fundamentals, Finance, Leadership, Marketing**

Students can pursue a professional Certificate in Business Fundamentals, Finance, Leadership, or Marketing concurrently with their graduate degree. With graduate program approval, students may count up to 9 s.h. from a professional certificate toward their graduate degree. With approval from the professional certificate program, students may count up to 3 s.h. from any graduate degree program toward their certificate. Offered by the Graduate College and Graduate Management Programs (Tippie College of Business), see the professional Certificates in Business Fundamentals [p. 1255], Finance [p. 1256], Leadership [p. 1258], or Marketing [p. 1259] in the Catalog.

## **J.D./Graduate Degrees**

The College of Law and several Graduate College programs and schools have developed combined programs in which students pursue the Juris Doctor (J.D.) degree and a graduate degree concurrently. Offered by the Graduate College and the College of Law; see the Manual of Rules and Regulations

of the Graduate College on the college's website and Juris Doctor, J.D. [p. 1707] in the Catalog.

## **M.A. in Library and Information Science/Certificate in Book Studies/Book Arts and Technologies**

The combined M.A. in library and information science and Certificate in Book Studies/Book Arts and Technologies prepares students for careers in special collections librarianship. Students admitted to the program receive training in the management of varied types of special collections, such as rare books, manuscripts, archives, graphics, music, and ephemera. Offered by the Graduate College; see the M.A. in library and information science [p. 1654] and the Certificate in Book Studies/Book Arts and Technologies [p. 1619] in the Catalog.

## **M.A. in Library and Information Science/M.F.A. in Book Arts**

The combined M.A. in library and information science/M.F.A. in book arts allows graduate students with strong interests in the physical book to acquire training in the book arts, book history, and material book studies. The earned expertise in the production and legacy of the book as a physical artifact combined with expertise in library and information science can be an asset for those focused on careers in special collections libraries and archives. Students in the combined program earn both degrees by completing fewer semester hours than if each degree was completed separately. Offered by the Graduate College; see the M.A. in library and information science [p. 1654] and the M.F.A. in book arts [p. 1617] in the Catalog.

## **M.D./Ph.D. (Medical Scientist Training Program)**

The combined Doctor of Medicine/Doctor of Philosophy program prepares students for careers in academic medicine, with emphasis on basic and clinical research. Offered by the Graduate College and the Carver College of Medicine; see Medical Scientist Training Program [p. 1772] in the Catalog.

## **Certificates**

The Graduate College also participates with other University of Iowa colleges in offering the following graduate certificates.

### **Adult Gerontology Acute Care Nurse Practitioner**

The Certificate in Adult Gerontology Acute Care Nurse Practitioner is a program for post-master's Advanced Practice Registered Nurse degree students who would like to pursue a second specialty. See the Certificate in Adult Gerontology Acute Care Nurse Practitioner [p. 1905] in the Catalog.

### **Adult Gerontology Primary Care Nurse Practitioner**

The Certificate in Adult Gerontology Primary Care Nurse Practitioner is a program for post-master's Advanced Practice Registered Nurse degree students who would like to pursue a second specialty. See the Certificate in Adult Gerontology Primary Care Nurse Practitioner [p. 1906] in the Catalog.

## African American Studies

The Certificate in African American Studies is a program that increases intellectual knowledge and understanding of African American culture and experience. See the Certificate in African American Studies [p. 43] in the Catalog.

## Aging and Longevity Studies

The Aging and Longevity Studies Program is a multidisciplinary certificate program administered by the College of Liberal Arts and Sciences in cooperation with other University of Iowa colleges. The program is designed to complement graduate degree programs or to serve as a stand-alone nondegree program for students with academic, professional, research, or service career interests in aging. See the Certificate in Aging and Longevity Studies [p. 49] in the Catalog.

## Agricultural Safety and Health

The Certificate in Agricultural Safety and Health is a postbaccalaureate program for practicing health care professionals serving rural areas and for health professions students who intend to practice in rural areas. The program is designed to help rural health professionals address safety and health issues in farm settings. See the Certificate in Agricultural Safety and Health [p. 1969] in the Catalog.

## Applied Behavior Analysis

The Certificate in Applied Behavior Analysis develops skills in behavioral intervention and intensive instruction. The course sequence contributes to eligibility for certification as a board-certified behavior analyst (BCBA). See the Certificate in Applied Behavior Analysis [p. 1317].

## Biostatistics

The Certificate in Biostatistics is open to students in University of Iowa graduate degree programs outside biostatistics and to individuals admitted to the Graduate College as nondegree students. The certificate program enables students to add a formal biostatistics emphasis to their degree programs. Students who complete the certificate in conjunction with a graduate degree may count a maximum of 6 s.h. of certificate credit toward their graduate degree. See the Certificate in Biostatistics [p. 1979] in the Catalog.

## Book Studies/Book Arts and Technologies

The Certificate in Book Studies/Book Arts and Technologies is designed to be completed in one year. The program is open to students who are enrolled in a graduate degree program at the University of Iowa as well as to students enrolled in the Graduate College with nondegree status. See the Certificate in Book Studies/Book Arts and Technologies [p. 1619] in the Catalog.

## Business Analytics

The Certificate in Business Analytics is open to students in University of Iowa graduate degree programs and to individuals admitted to the Graduate College as nondegree students. The certificate program is designed for working professionals and addresses a growing need to manage and analyze the rapidly increasing amount of data that is available to support business decision making. See the Certificate in Business Analytics [p. 1177] in the Catalog.

## Cognitive Science of Language

The Certificate in Cognitive Science of Language is designed to complement doctoral study. The certificate program is open to University of Iowa Ph.D. students in linguistics, neuroscience, psychology, and speech and hearing science. Ph.D. students in other disciplines may petition to be permitted to earn the certificate. Students must complete a formal application to enter the certificate program; they should contact the program's coordinator before they apply. See the Certificate in Cognitive Science of Language [p. 1621] in the Catalog.

## College Teaching

The Certificate in College Teaching complements discipline-oriented graduate programs and prepares students for careers in postsecondary education. The program is open to graduate students working toward a Ph.D. or other terminal graduate degree. See the Certificate in College Teaching [p. 1624] in the Catalog.

## Emerging Infectious Disease Epidemiology

The Certificate in Emerging Infectious Disease Epidemiology is a postbaccalaureate program designed to meet the training needs in emerging infectious disease of international public health professionals as well as University of Iowa graduate students. Applicants to the program must hold a bachelor's degree. See the Certificate in Emerging Infectious Disease Epidemiology [p. 1986] in the Catalog.

## Family Nurse Practitioner

The Certificate in Family Nurse Practitioner is a program for post-master's Advanced Practice Registered Nurse degree students who would like to pursue a second specialty. See the Certificate in Family Nurse Practitioner [p. 1907] in the Catalog.

## Gender, Women's, and Sexuality Studies

The Certificate in Gender, Women's, and Sexuality Studies is open to students enrolled in graduate degree programs. See the Certificate in Gender, Women's, and Sexuality Studies [p. 544] in the Catalog.

## Global Health Studies

The Certificate in Global Health Studies is open to graduate and professional students, except for those in the College of Pharmacy who have earned the Pharm.D. degree—they are awarded the undergraduate certificate. Students must maintain a g.p.a. of at least 3.00 in work for certificate. See the Certificate in Global Health Studies [p. 611] in the Catalog.

## Health Systems

The Certificate in Health Systems is built on the foundational courses from the Doctor of Nursing Practice (D.N.P.) with a health systems subprogram. The certificate is available to post-master's degree students seeking additional preparation in the area of health systems/administration. See the Certificate in Health Systems [p. 1908] in the Catalog.

## Healthcare Management

The Certificate in Healthcare Management provides foundational business and leadership skills to physicians, nurses, and other clinicians, and managers. See the Certificate in Healthcare Management [p. 2009] in the Catalog.

## Informatics

The Certificate in Informatics requires a variable amount of graduate credit, depending on the student's choice of subprogram. The certificate program is designed for students enrolled in University of Iowa graduate degree programs who wish to study informatics as a complement to their degree program and for nondegree students who are interested in increasing their knowledge of informatics. See the Certificate in Informatics [p. 1646] in the Catalog.

## Institutional Research and Effectiveness

The Certificate in Institutional Research and Effectiveness (IRE) is offered with hybrid and conventional courses. The certificate program prepares professionals to use data for institutional decision making, reporting, and accountability in higher education and K-12 contexts. This certificate amends and complements students' competence in other areas (business affairs, information technology, student affairs, development, among other areas) to prepare them with the skills and capabilities to use data for educational improvement, accountability, quality, and equity. See the Certificate in Institutional Research and Effectiveness [p. 1361] in the Catalog.

## K-12 Equity and Inclusion

The Certificate in K-12 Equity and Inclusion is offered with hybrid and conventional courses. The certificate program offers educational professionals or nondegree-seeking students currently working in K-12 schools, districts, and area education agencies expertise in equity and inclusion to better support the needs and interests of a diversifying K-12 student population. See the Certificate in K-12 Equity and Inclusion [p. 1363] in the Catalog.

## Literary Translation

The Certificate in Literary Translation includes coursework in translation practice and techniques. Translation workshops and coursework in translation theory also are central to the certificate program as they are essential to the training of literary translators. See the Certificate in Literary Translation [p. 789] in the Catalog.

## Native American and Indigenous Studies

The Native American and Indigenous Studies Program offers an interdisciplinary certificate program focusing on the histories, cultures, languages, arts, religious traditions, political and social organizations, economies, geographies, literatures, and contemporary legal and political concerns of Native Americans of the United States as well as other Indigenous peoples of the Western Hemisphere. See the Certificate in Native American and Indigenous Studies [p. 882] in the Catalog.

## Online Teaching

The Certificate in Online Teaching is designed to prepare students for the realities of online teaching and to help them expand their career options. The certificate is open to students in University of Iowa graduate degree programs and to individuals admitted to the Graduate College as nondegree students. See the Certificate in Online Teaching [p. 1365] in the Catalog.

## Pediatric Nurse Practitioner—Acute Care

The Certificate in Pediatric Nurse Practitioner—Acute Care is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty. See the Certificate in Pediatric Nurse Practitioner—Acute Care [p. 1909] in the Catalog.

## Pediatric Nurse Practitioner—Primary Care

The Certificate in Pediatric Nurse Practitioner—Primary Care is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty. See the Certificate in Pediatric Nurse Practitioner—Primary Care [p. 1910] in the Catalog.

## Psychiatric/Mental Health Nurse Practitioner

The Certificate in Psychiatric/Mental Health Nurse Practitioner is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty. See the Certificate in Psychiatric/Mental Health Nurse Practitioner [p. 1911] in the Catalog.

## Public Digital Humanities

The Certificate in Public Digital Humanities is open to all University of Iowa graduate students in good academic standing. Students take a theory and practice course, and select elective coursework to suit their disciplinary or technical needs. See the Certificate in Public Digital Humanities [p. 1682] in the Catalog.

## Public Health

The Certificate in Public Health is designed to improve public health practice and public health workforce capacity in Iowa and the upper Midwest. It is intended primarily for individuals in public health practice, those in the workforce, and those interested in strengthening their knowledge and skills in basic public health competencies. See the Certificate in Public Health [p. 1967] in the Catalog.

## Sacred Music

The Certificate in Sacred Music is an interdisciplinary program with courses in sacred music, choral conducting and literature, keyboard, voice, religion, and art and art history. The program is open to students enrolled in a graduate degree program and to nondegree students who have been admitted to the Graduate College and who have consent of the certificate's faculty advisor. See the Certificate in Sacred Music [p. 876] in the Catalog.

## Special Collections Librarianship

The Certificate in Special Collections Librarianship includes coursework that introduces students to the core theories supporting the collection and management of rare books, archival records, and manuscript collections. See the Certificate in Special Collections Librarianship [p. 1659] in the Catalog.

## Sustainable Water Development

The Certificate in Sustainable Water Development trains science, technology, engineering, and mathematics (STEM) graduate students to address future challenges of water scarcity and variability while also meeting the food and energy demands of Earth's growing population. See the Certificate in Sustainable Water Development [p. 1581] in the Catalog.

## Translational and Clinical Investigation

The Certificate in Translational and Clinical Investigation is designed for clinicians who seek advanced training in clinical methodology and applied patient-oriented research skills. Students in the certificate program must be practicing academic clinicians who have completed doctoral training. See the Certificate in Translational and Clinical Investigation [p. 2021] in the Catalog.

## Transportation Studies

The Certificate in Transportation Studies includes a choice of coursework in traffic engineering, transportation and land use planning, design of transportation systems, transportation demand analysis, transportation policy and planning, as well as other transportation areas. Students may earn the certificate in conjunction with an M.S. or Ph.D. in civil and environmental engineering or with an M.S. in urban and regional planning.

Individuals working toward degrees in other transportation-related disciplines are encouraged to apply to the Transportation Studies Program. Depending on a student's background, additional coursework in statistics, computer programming, simulation, mathematics, and operations research may be required for the certificate. Credit earned in these courses may not be applicable to the student's degree program. See the Certificate in Transportation Studies [p. 1688] in the Catalog.

## Financial Support

Approximately half of the University's graduate students receive some form of University-administered financial assistance. For eligibility requirements and application procedures, see "Section VII. Graduate Appointments" in the Manual of Rules and Regulations on the college's website. The following are the primary sources of assistance. For a more complete description of funding available to graduate students, see the Graduate College website.

## Teaching and Research Assistantships

Teaching and research assistantships are available in most departments. Assistantship stipends are awarded for half-time academic-year appointments and half-time fiscal-year appointments; assistants also are eligible for tuition

scholarships. Assistants (one-quarter-time or more) pay resident tuition rates for fee purposes.

## Iowa Arts Fellowships

Iowa Arts Fellowships are for University of Iowa graduate students entering M.F.A. programs. Typical stipends are for the academic year, with all tuition and a percentage of mandatory fees paid, plus a health insurance allowance, for one year (the remaining years of support must be provided by the appointing program). There are no departmental service obligations while holding the first-year fellowship.

## Iowa Performance Fellowships

Iowa Performance Fellowships are for first-year D.M.A. candidates in a performance area of music. Recipients are nominated by the School of Music. Awards include academic-year fellowships, summer fellowships, and tuition and a percentage of mandatory fees paid (fellow is responsible for the remainder of fees). The School of Music provides a one-quarter-time research assistantship in years two and three.

## Graduate College Iowa Recruitment Fellowships

Iowa Recruitment Fellowships program enhances departmental recruitment packages by offering the most accomplished new doctoral students a stipend supplement for up to five years and fellowship support for up to four summer terms. Tuition scholarships are to be paid during the academic years (fall, spring) by the appointing unit, while the Graduate College provides up to 2 s.h. of tuition and benefits for the summer terms. Recipients are nominated by their department.

## Graduate College Summer Fellowships

Graduate College Summer Fellowships are for advanced doctoral students who have completed their comprehensive exams, are working to complete their dissertations, and do not otherwise have funding for the summer session. Awards provide a summer stipend and provide up to 2 s.h. of tuition. Awardees must enroll for the six-week, eight-week, or twelve-week summer session. Students enrolled in the four-week summer session are not eligible to receive the fellowship.

## T. Anne Cleary International Research Fellowships

The T. Anne Cleary International Research Fellowships are for doctoral students who have completed all predissertation requirements, including the comprehensive examination, and who will use the fellowship for dissertation research outside North America. The awards may vary and are meant to supplement other research funds. Doctoral students in any discipline may apply. Past recipients of the Cleary fellowship and Doctor of Musical Arts students who choose the D.M.A. essay option are not eligible.

## Ballard and Seashore Dissertation-Year Fellowships

Ballard and Seashore Dissertation Fellowships are one semester fellowships for doctoral candidates who have completed all doctoral degree requirements except their dissertation. Recipients are nominated by their departments.

Fellowships provide monetary amounts for the semester plus tuition and a percentage of mandatory fees paid for up to 2 s.h. and a health insurance allowance.

## Post-Comprehensive Research Awards

The Post-Comprehensive Research Awards program provides an opportunity for advanced doctoral students to benefit from protected and supported time to pursue their scholarly research activities. The award is intended to recognize students with distinguished academic achievement during their early graduate training. These achievements should be evident from a combination of outstanding academic performance in coursework, as well as early scholarly research activities. Students who have held teaching assistantships in the previous two semesters will have priority. Awardees will receive a stipend. The Graduate College also supports up to 2 s.h. of tuition, a percentage of the mandatory fees, and a health insurance allowance. Recipients are nominated by their department

## Scholarships

Scholarships provide up to full tuition.

## Graduate Student Travel Awards

Graduate student travel awards provide reimbursement for travel by students who present research and scholarship results to professional conferences. Awards are competitive across disciplines and vary. Funds are administered by the Graduate Student Senate and the Graduate College.

## Other Sources

For other sources of financial support, contact the Office of Student Financial Aid.

Many departments offer additional support through traineeships, part-time employment in research, or part-time teaching appointments. The Office of the Vice President for Research maintains a library of information on public and private agencies that provide funds for research and graduate study. Much material has been collected concerning awards for overseas study.

## Courses

Most Graduate College courses are offered by the college's programs and schools. They are listed and described in the corresponding Catalog sections.

The college also offers the following nondepartmental courses.

## Graduate College Courses

**GRAD:0006 SROP Scholars Program** 0 s.h.

**GRAD:5225 Communicating Data Through Stories** 3 s.h.  
How to communicate science effectively and responsively with multiple audiences from peers and professors to potential employers, policymakers, and the lay public; focus on speaking about science clearly and vividly in ways that can engage varied audiences, especially those outside the student's own field; connecting and finding common ground with an audience, defining goals, identifying main points, speaking without jargon, explaining meaning and context, using storytelling techniques and multimedia elements. Same as CEE:5225.

**GRAD:5800 Writing for National Fellowships** arr.

Process of writing applications for nationally competitive fellowship opportunities; completion of a fellowship application portfolio for a specific fellowship opportunity.

**GRAD:6000 Ph.D. Postcomprehensive Registration** 1 s.h.

**GRAD:6001 Master's Final Registration** 1 s.h.  
Requirements: master's degree candidate.

**GRAD:6002 Doctoral Continuous Registration** 1 s.h.  
Requirements: doctoral degree candidate who has passed comprehensive examinations.

**GRAD:6003 Doctoral Final Registration** 1 s.h.  
Requirements: doctoral degree candidate in final session of enrollment.

**GRAD:6217 Seminar in College Teaching** 1-3 s.h.  
Preparation for college teaching; for graduate students planning to teach. Same as PSQF:6217.

**GRAD:6300 Writing for Learned Journals** 1-4 s.h.  
Seminar that supports graduate students in bringing written work to publishable form; analysis of target journals' audiences, interests, and citation politics; submission and the publication process; response to reader reports and criticism; best writing and research practices; discussion of knowledge cultures and discourses in disciplines and the contemporary academy. Same as AMST:6300, GWSS:6300, RHET:6330.

**GRAD:6313 Studio Summer Fellowship** 1 s.h.  
Investigation of and reflection on digital scholarly collaboration, production, and promotion. Same as ULIB:6313.

**GRAD:6500 Digital Humanities Independent Study** arr.  
Independent study for students working toward their public digital humanities certificate.

**GRAD:6510 Introduction to Programming** 1 s.h.  
How computer programming has quickly become a valuable skill across a diverse range of professions and academic disciplines; programming impacts on an increasingly large segment of professional activity—from analyzing text, visualizing data, creating maps, or developing web applications; knowledge of how to read and write code as a valuable literacy in modern mediated life; introduction to computer programming; students write simple programs of their own design (e.g., automate repetitive tasks, perform calculations on data, accept and process user input).

**GRAD:6520 Data Visualization Basics** 1 s.h.  
Hands-on introduction to basics of data visualization—working with data, analyzing and designing clear and functional visualizations, and developing simple data visualizations in Excel and Python or R; basic static plots (e.g., scatterplots, histograms, line graphs); brief introduction to geographic maps and network graphs.

**GRAD:6521 Scholarly Communication and Journal Publishing** 1 s.h.  
Process of publishing a scholarly journal; several scholarly journals are published locally through Iowa Research Online (IRO); for graduate students interested in academic journal publishing as well as scholarly communication more broadly.

**GRAD:6530 Open Source Web Mapping for Beginners****1 s.h.**

Maps are high-impact visual representations that can make complex ideas more comprehensible and enhance persuasive power of academic arguments; wide range of open source data and scripting libraries that are increasingly available to scholars who wish to present their data in interactive online maps; introduction to basic workflows and scripting for open web mapping with JavaScript, HTML, and CSS.

**GRAD:6540 Careers Beyond Academia****1 s.h.**

Preparation to search for and apply to a variety of careers outside of academia that allow students to use their digital scholarship and digital skills training; opportunities and challenges faced when transitioning to careers adjacent to and beyond academic environments in which students have become familiar with in their graduate training.

**GRAD:6550 Design Fundamentals in Digital Scholarship****1 s.h.**

Exploration of the role of design in communication while empowering students to grow more comfortable verbalizing the visual; students more accurately describe design elements, produce basic promotional assets, and assess legibility, navigability, and accessibility.

**GRAD:6590 Digital Humanities Capstone****arr.**

Application and practice of classroom experience to a specific project under guidance from a faculty member and project team leader. Prerequisites: CLAS:7290 or SLIS:7290. Requirements: admission to public digital humanities certificate program, an approved certificate plan of study on file, completion of 12 s.h. of approved coursework, and good standing in all required certificate coursework. Same as SLIS:6590.

**GRAD:6800 CIC Scholar****arr.****GRAD:6801 Regents Exchange Program****arr.****GRAD:6997 Graduate/Professional Transfer****arr.****GRAD:6998 Undergraduate Transfer****arr.****GRAD:6999 Resident/Fellow/Post-Doctoral****0 s.h.****GRAD:7280 Obermann Center for Advanced Studies Special Topics Seminars****1-3 s.h.**

Active participation and engagement in a major program, such as the annual Humanities Symposium; readings on interdisciplinary histories, contexts, and theoretical perspectives that frame featured events; work of artists, scholars, and researchers participating in the program. Requirements: admission to Graduate College.

**GRAD:7285 Obermann Center Professional Development Seminar****1 s.h.**

Active participation and engagement in a series of classes dedicated to connecting public engagement, research, and teaching; readings and media viewings that frame course topics; production of a short film, marketing materials, grant, and syllabi relevant to public engagement project. Requirements: admission to Graduate College and completion of Obermann Graduate Institute on Engagement and the Academy.

**GRAD:7385 Teaching and Learning in Higher Education****3 s.h.**

Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as ECTL:7385, EPLS:7385, PSQF:7385, RCE:7385.

**GRAD:7400 Practicum in College Teaching****arr.**

Supervised college teaching experience; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations. Requirements: admission to the graduate certificate in college teaching program.

**GRAD:7601 Postdoctoral Research Scholar****0 s.h.**

Requirements: postdoctoral standing.

**GRAD:7602 Postdoctoral Research Fellow****0 s.h.**

Requirements: postdoctoral standing.

# Applied Mathematical and Computational Sciences

## Chair

- Laurent O. Jay (Mathematics)

**Graduate degree:** Ph.D. in applied mathematical and computational sciences

**Faculty:** <https://amcs.uiowa.edu/faculty-research>

**Website:** <https://amcs.uiowa.edu/>

Applied mathematical scientists formulate scientific concepts and problems in mathematical terms; solve the resulting mathematical problems using analytical and computational methods; and discuss, interpret, and evaluate the solutions. They explore areas of mathematical application and develop mathematical theories in new areas.

## Programs

### Graduate Program of Study

#### Major

- Doctor of Philosophy in Applied Mathematical and Computational Sciences [p. 1598]

## Courses

### Applied Mathematical and Computational Sciences Courses

**AMCS:5900 Seminar: Applied Mathematical and Computational Sciences** **arr.**

Current research by faculty, students, guests.

**AMCS:7990 Reading and Research** **arr.**

# Applied Mathematical and Computational Sciences, Ph.D.

## Requirements

The Doctor of Philosophy program in applied mathematical and computational sciences (AMCS) requires a minimum of 72 s.h. of graduate credit. The Ph.D. program is autonomous, broadly based, and interdisciplinary. It is designed to help students achieve a command of theoretical and applied mathematics and obtain basic knowledge in another area (engineering, medicine, or one of the behavioral, biological, physical, or social sciences).

The program is flexible; students can concentrate on applied mathematics, such as differential equations and numerical analysis, or on other applicable techniques in mathematics. Scientific computing is an important part of applied mathematics, so it is often a part of student training and dissertation research.

Prospective students should have a desire to apply a mathematical science (mathematics or statistics) to relevant problems in another area.

## Course of Study

Faculty members help each student plan a course of study that is consistent with the student's background, interests, and goals.

These individual programs are designed to help students develop expertise in methods of applied mathematics and build a good foundation in related topics of theoretical mathematics. The individual programs also provide sufficient knowledge in an outside area to enable students to use mathematical techniques in that area.

Students can arrange their study plans to earn a master's degree from another department after they complete part of their plan. Students find suitable thesis problems and supervisors with the help of the faculty.

## Required Courses

Students must successfully complete these three core course sequences in the first two years of graduate study.

Code	Title	Hours
All of these:		
MATH:5200 & MATH:5210	Introduction to Analysis I-II	8
MATH:5600 & MATH:5700	Nonlinear Dynamics with Numerical Methods - Introduction to Partial Differential Equations	8
MATH:5800 & MATH:5810	Numerical Analysis: Nonlinear Equations and Approximation Theory - Numerical Analysis: Differential Equations and Linear Algebra	8

## Outside Area Courses

Students must take and pass Ph.D.-level courses in areas in which mathematics is applied: one preparation course in the first two years and then two advanced courses outside of mathematics at the 6000-level or above.

## Advanced Mathematics Course Requirement

In order to establish a solid foundation in mathematics, students must successfully pass two more courses numbered MATH:5000 to MATH:5999 and complete at least 12 s.h. of graduate mathematics courses numbered MATH:6000 to MATH:7799, with the exception of seminar courses. The courses should be chosen to obtain mathematical breadth and must be approved by the AMCS chair.

## Comprehensive Examination

Students complete a comprehensive examination that covers their outside research area within three-and-a-half years after beginning graduate study. The examination is typically based on the outside area courses and/or directed readings.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. To be prepared for graduate-level coursework in mathematics and an additional area, applicants should have a bachelor's or master's degree with a strong mathematics component and some background in the additional area.

Applications for fall admission are due on January 15. For application forms and more information about the academic program, contact the chair of the Applied Mathematical and Computational Sciences Program.

## Financial Support

Financial support is provided to every student admitted. Fellowships and research and teaching assistantships are available to qualified applicants and fellowship support is available during summer sessions.

## Career Advancement

Career opportunities for applied mathematicians include positions in colleges, universities, governmental laboratories, business, industry, and consulting firms.

# Biomedical Science

## Director

- Prabhat Goswami

**Graduate degrees:** M.S. in biomedical science; Ph.D. in biomedical science

**Website:** <https://medicine.uiowa.edu/biomed/>

The Biomedical Science Program offers over 300 faculty laboratories under the diversity of a large umbrella program. Students conduct groundbreaking research on a campus that ranks among the top public institutions in the country in research activity, federal funding, graduate education, and core facility support. Ph.D. students benefit from the extensive scope of the program and the support of a cohesive academic campus.

Students select from one of seven subprograms:

- cancer biology [p. 1602]
- cell and developmental biology [p. 1604]
- experimental pathology [p. 1605]
- free radical and radiation biology [p. 1607]
- molecular medicine [p. 1609]
- molecular physiology and biophysics [p. 1611]
- pharmacology [p. 1612]

Successful completion culminates with a Ph.D. in biomedical science and affiliation with a respective subprogram. Three closely related Ph.D. programs—genetics, human toxicology, and neuroscience—complete the complement of biomedical programs on campus. Visit the Biomedical Science Program website for more information.

## Programs

### Graduate Programs of Study

#### Majors

- Master of Science in Biomedical Science [p. 1601]
- Doctor of Philosophy in Biomedical Science [p. 1602]

## Admission

The Biomedical Science Program is sufficiently flexible to accommodate students with a relatively wide range of backgrounds. Students with a bachelor's degree in any of the biological, biochemical, engineering, or physical sciences who have a strong desire to pursue a research-oriented career are encouraged to apply. Students must have:

- a bachelor's degree from a regionally accredited American college or university or an equivalent degree from another country as determined by the Office of Admissions; and
- a minimum g.p.a. of 3.00 or higher or the equivalent from another country as determined by the Office of Admissions.

## Facilities

Biomedical science researchers benefit from state-of-the-art core research facilities and research support facilities. Much of the research is interdisciplinary, with collaborations coordinated through major research centers, institutes, and programs.

## Financial Support

Students receive stipend and tuition support. Continued support beyond the first year is guaranteed, provided that satisfactory progress toward degree completion is accomplished. Sources of support include departmental funds, training grants, research grants, and individual fellowships.

## Career Advancement

The Biomedical Science Program prepares students for successful careers as researchers, educators, and future leaders in the international biomedical workforce.

## Courses

- Biomedical Science Courses [p. 1599]
- Cancer Biology Courses [p. 1599]

## Biomedical Science Courses

### **BMED:5207 Principles of Molecular and Cellular Biology**

**3 s.h.**

Structure of DNA, RNA, and Protein; DNA replication, genetic and epigenetic regulation; RNA production and processing; protein production and post-translation modification; cellular membranes and trafficking; cytoskeleton and regulation of cell junctions and migration; signal transduction and regulation of cell cycle and apoptosis; didactic lectures and group discussion of primary research publications.

### **BMED:5208 Topics in Principles of Molecular and Cellular Biology**

**1 s.h.**

Research literature discussion that parallels subjects discussed in BMED:5207. Corequisites: BMED:5207.

### **BMED:7270 Scholarly Integrity/Responsible Conduct of Research I**

**0 s.h.**

Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects). Requirements: successful completion of CITI online training (greater than 80 percent score for each module) and enrollment in Graduate College degree-seeking program. Recommendations: minimum first-year graduate standing (Ph.D., M.S./M.A.), and involvement in mentored research activities (extramurally or intramurally funded).

**BMED:7271 Scholarly Integrity/Responsible Conduct of Research II** **0 s.h.**

Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects). Requirements: successful completion of CITI online training (greater than 80 percent score for each module) and enrollment in Graduate College degree-seeking program. Recommendations: minimum of first-year graduate standing (Ph.D., M.S./M.A.) and involvement in mentored research activities (extramurally or intramurally funded).

**BMED:7604 Scholarly Integrity/Responsible Conduct of Research I** **0 s.h.**

Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects); meets responsible conduct of research training obligation for postdocs and faculty holding a NIH K award. Requirements: successful completion of CITI online training (greater than 80 percent score for each module).

**BMED:7605 Scholarly Integrity/Responsible Conduct of Research II** **0 s.h.**

Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects); meets responsible conduct of research training obligation for postdocs and faculty holding an NIH K award. Requirements: successful completion of CITI online training (greater than 80 percent score for each module).

**BMED:7777 Biomedical Science Seminar** **1 s.h.**

Research presentations.

**BMED:7888 Biomedical Science Research** **arr.**

Research experience in biomedical science graduate program faculty member's lab.

**Cancer Biology Courses****CBIO:3310 Practical Data Science and Bioinformatics** **3 s.h.**

Understanding how to access large biological data sets and use them to answer biological questions is an important skill for researchers; immersive introduction to computational handling of data; how to access and analyze publicly available data; critically evaluate data quality and analysis in context of measuring gene expression; basic coding in R/RStudio, plotting and data display, fitting and regression, statistical inference, statistical models, downloading and data wrangling; basic introduction to machine learning (clustering); for students with no computational background. Prerequisites: BIOL:1411 with a minimum grade of C- and BIOL:1412 with a minimum grade of C-. Requirements: college algebra. Recommendations: BIOC:3110, or BIOC:3120 and BIOC:3130, or other upper-level life sciences courses. Same as BIOC:3310, MMED:3310.

**CBIO:5000 Experimental Methodologies** **2 s.h.**

Practical experience in common laboratory methods including polymerase chain reaction (PCR), western blotting, immunostaining, cell culture, and bioinformatics. Requirements: admission to cancer biology graduate program.

**CBIO:5500 Topics in Cancer Biology** **1 s.h.**

Discussion and presentation of new scientific literature in cancer biology fields; how to evaluate and critically interpret scientific literature, data, and conclusions; journal club format. Requirements: admission to cancer biology graduate program.

**CBIO:6000 Seminar: Cancer Research** **1 s.h.**

Attendance at seminar presentations of cutting-edge science in the field of cancer biology; presentations by experts in the field and trainees. Requirements: admission to cancer biology graduate program.

**CBIO:6500 Research in Cancer Biology** **arr.**

Research experience through research rotations and conduction of dissertation research in cancer research laboratories. Requirements: admission to cancer biology graduate program.

**CBIO:7000 Clinical Connections** **1 s.h.**

Shadowing experiences arranged with clinicians who are treating cancer patients at University of Iowa Hospitals & Clinics. Requirements: admission to cancer biology graduate program.

**CBIO:7500 Crafting a Scientific Proposal** **1 s.h.**

Training in areas of scientific writing and development of a scientific proposal; students develop a proposal related to, but not identical to, the proposal for the comprehensive exam. Requirements: admission to cancer biology program.

## **Biomedical Science, M.S.**

There is no direct admission to the M.S. program in biomedical science. Students interested in biomedical science are considered for Ph.D. admission only. Visit the Ph.D. in biomedical science [p. 1602] in this section of the Catalog for information about the Ph.D. degree program.

## Biomedical Science, Ph.D.

The Biomedical Science Program (BSP) optimizes students' mobility and their ability to explore several graduate programs during their first academic year before affiliating with a specific BSP subprogram—cancer biology, cell and developmental biology, experimental pathology, free radical and radiation biology, molecular medicine, molecular physiology and biophysics, or pharmacology.

Students thrive in a collaborative environment in which they explore subprograms by performing three research rotations in the laboratories of any of the biomedical science faculty, regardless of their departmental or program affiliation. Biomedical science students are advised regarding course selections, research rotations, and registration by a designated faculty academic advisor. Students can tailor their choice of electives based on their interests.

Following completion of the first year, it is expected that students will be able to select a research laboratory and subprogram affiliation. The specific subprogram students choose for thesis training determines their curriculum for subsequent years.

### Core Curriculum

#### First Year, Fall

Code	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:5208	Topics in Principles of Molecular and Cellular Biology	1
BMED:7777	Biomedical Science Seminar	1
BMED:7888	Biomedical Science Research	arr.
PCOL:5204	Basic Biostatistics and Experimental Design	1

Elective course(s)

#### First Year, Spring

Code	Title	Hours
BMED:7777	Biomedical Science Seminar	1
BMED:7888	Biomedical Science Research	arr.
MMED:6260	Methods for Molecular and Translational Medicine	1
PATH:5270/ IGPI:5270/ MMED:5270	Pathogenesis of Major Human Diseases	3

Elective course(s)

### Admission

Applicants must have a baccalaureate degree from a regionally accredited U.S. college or university, or an equivalent degree from another country as determined by the Office of Admissions. They also must have an undergraduate g.p.a. of at least 3.00. Applicants must meet the admission requirements of the Graduate College.

Appropriate preparation includes a one year, college-level course in biology, chemistry (inorganic and organic), and mathematics through calculus.

### Cancer Biology

The Doctor of Philosophy in biomedical science with a cancer biology subprogram requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree.

Students enter the molecular medicine subprogram through the Biomedical Science Program (BSP). The BSP is designed to provide students maximum flexibility during the first year of graduate studies to take a course of study compatible with several programs while completing research rotations. At the end of the first year, students choose a subprogram affiliation. The cancer biology subprogram provides training in many areas of research—cell biology, genetics, immunology, and cell metabolism, among others—that are necessary to understand the complexities of cancer etiology and treatment.

The subprogram does not offer a master's degree. Cancer biology is affiliated with the Holden Comprehensive Cancer Center, which was founded in 1980 and has been designed as a National Cancer Institute NCI-Designated Cancer Center since 2000.

The curriculum is a sequence of required and elective courses that provides students with advanced knowledge in current concepts related to molecular, cellular, and genetic processes that contribute to the development and treatment of cancer. It also provides specialized training in experimental methodology used to study cancer in a laboratory setting. Cancer biology prepares students for a variety of career paths in academic, clinical, and industry environments that deal with the study and/or treatment of cancer.

Students gain clinical exposure by shadowing oncologists. They are expected to have a solid background in chemistry, mathematics, and the biological sciences. They should have completed undergraduate coursework in introductory biology and chemistry, biochemistry, genetics, organic chemistry, physical chemistry, and calculus; and previous coursework in cancer biology is desirable. Deficiencies in a particular area, as determined by the Graduate Studies Committee, can be remedied by completion of appropriate courses.

Selection of a Ph.D. mentor (thesis advisor) is normally finalized near the end of the spring semester of a student's first year of study. The deadline for selection is determined by the Biomedical Science Program.

Students are required to complete the core courses listed below prior to their comprehensive examination. Students who wish to take the comprehensive examination should first make arrangements in consultation with their mentor, the program director, and the Student Advisory Committee. The exam is typically completed during the second summer of study.

The Ph.D. in biomedical science with a cancer biology subprogram requires the following coursework.

### Typical Curriculum

#### First Year, Fall

Code	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:5208	Topics in Principles of Molecular and Cellular Biology	1

## Additional Requirements

### Laboratory Rotations

In order to gain more widespread experience in cancer biology research and to aid in selecting a laboratory home and thesis project, students perform three laboratory rotations prior to selection of a thesis advisor. Laboratory rotations are normally carried out in research laboratories of the cancer biology faculty. A rotation can be completed with a faculty member

outside the cancer biology program with permission of the program director.

Three rotations, 12 weeks in length, begin in the fall semester of the first year. The goal of the rotations is to gain a comprehensive view of the mentor's research program, to gain exposure to experimental methods used in the mentor's lab, and to learn about the mentoring styles of faculty members.

### Teaching

The cancer biology program does not require teaching. Students with an interest in teaching experience are encouraged to discuss their career plans with their mentor and/or the program director.

### Publication Requirements

Students are required to have a minimum of one first-author publication in a peer-reviewed journal prior to graduation. The article must be formally accepted and be in-press status or published prior to graduation. A co-first-authored, peer-reviewed publication will count toward this requirement.

### Comprehensive Examination

Students are eligible to take the comprehensive examination when they are in good academic standing as defined by the Graduate College—the student has completed all program core courses with a grade of at least B or have a non-letter grade of pass.

### Written Examination

The comprehensive exam is on-topic, meaning the subject should be a student's current research being conducted in the mentor's lab. Students normally take the comprehensive exam during the second spring or summer of their enrollment in the program. They submit a written exam, if that is acceptable to the comprehensive examination committee, and then prepare for an oral examination.

### Oral Examination

The purpose of the oral examination is to determine whether the student's written submission adequately represents the student's knowledge. A student may be queried on issues beyond the scope of the written proposal to allow the committee to determine the student's general depth of knowledge.

### Final Examination

The thesis committee is selected by each student after the successful completion of the comprehensive examination. Students are eligible for their oral thesis defense after completing 72 s.h. of coursework, publication of at least one primary author manuscript or be in-press status, and with consent of the thesis committee. The procedures are the same as for the comprehensive examination.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biomedical science (cancer biology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist

Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

## Cell and Developmental Biology

The Doctor of Philosophy in biomedical science with a cell and developmental biology subprogram requires 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree. They gain admission to graduate training laboratories in the Department of Anatomy and Cell Biology, Interdisciplinary Graduate Programs, or through direct admission into a specific laboratory.

The Ph.D. in biomedical science with a cell and developmental biology subprogram requires the following coursework.

### Core Cell and Developmental Biology Curriculum

Code	Title	Hours
All of these:		
BMED:5207	Principles of Molecular and Cellular Biology	3

PCOL:6209/ MPB:6209/ NSCI:6209	Steroid Receptor Signaling	1
PHAR:5521	High Throughput Screening for Pharmaceutical and Biomedical Sciences	1

## Additional Requirements

### Laboratory Rotations

The faculty advisor, along with the biomedical sciences program director, assists students in the process of selecting their initial laboratory rotation during the first year. The first of three 10-week rotations begins the first week of the fall semester. Students may choose any biomedical science program faculty member laboratory for the remaining two laboratory rotations, depending upon availability of positions and mutual interest of students and host faculty. Students have the option of joining the cell and developmental biology subprogram after their three rotations.

### Teaching

Students are required to complete a teaching requirement (3 s.h.). They may teach in a combination of 1 or 2 s.h. courses, or one 3 s.h. course. Teaching requirements must be met prior to the final thesis defense and graduation. Most students meet the requirement in the third year after completion of the comprehensive exam. A student must earn a satisfactory report from the course director in order to receive credit for the teaching requirement.

### Publication Requirements

It is expected that a student will have contributed as an author to at least one research publication. The publication must demonstrate primary authorship and be at the accepted phase of the publication process. The number of publications and their quality, content, and impact is established by the thesis committee.

## Seminar Presentations

Students present their thesis research annually in the cell and developmental biology seminar series in a 30-minute presentation. Evaluation critique by faculty and students is provided.

## Comprehensive Examination

The comprehensive examination must be taken before the fall semester of a student's third year.

## Written Examination

A written proposal follows the form of a standard National Institutes of Health (NIH) R01 research grant and covers the area of the research proposed for the student's anticipated thesis dissertation. One aim area should be completely of the student's own design, with no input from the thesis advisor.

## Oral Examination

The oral examination of the student's research proposal lasts approximately two to three hours. The exam begins with a brief student presentation on the proposed research project. Questions during the examination may come from the proposal, the thesis research, or other general areas of cell and developmental biology.

## Thesis Defense

The five-member thesis committee serves as an advisory body for the preparation of the thesis. The candidate and the committee should meet yearly; however, the candidate, the thesis advisor, or the committee can request a meeting at any time. In the subultimate committee meeting, committee members review the material that is expected to be incorporated into the thesis. The final draft of the thesis is due to the committee two weeks before the final examination. The final examination takes the form of a seminar presented to the program, with questions, comments, and discussion following. After the seminar, the candidate meets with the committee for the final thesis defense.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biomedical science (cell and developmental biology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

### Experimental Pathology

The Doctor of Philosophy in biomedical science with an experimental pathology subprogram requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree. The subprogram provides students with advanced knowledge of disease pathogenesis at the genetic, molecular, cellular, and systems levels. It also teaches cutting edge research skills enabling graduates to investigate the basis of disease and lay the foundation for novel and improved therapies.

The curriculum is a sequence of required and elective courses with the goal of providing students a foundation in current cellular and molecular biology, in-depth knowledge of disease

pathogenesis, and specialty content in the area of their thesis work.

Students who enter the experimental pathology subprogram are directly admitted. They choose a laboratory and mentor upon entering the program and begin work immediately on a thesis project. The subprogram is open to Medical Scientist Training Program students.

The Ph.D. in biomedical science with an experimental pathology subprogram requires the following coursework.

## Core Experimental Pathology Curriculum

Code	Title	Hours
All of these:		
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:5208	Topics in Principles of Molecular and Cellular Biology	1

Elective		3

## Electives

The following are possible elective choices. Electives are determined by the area of thesis research.

Code	Title	Hours
FRRB:7001/ PATH:7001	Molecular and Cellular Biology of Cancer	3
GENE:6150	Genetic Analysis of Biological Systems	3
GENE:7191	Human Molecular Genetics	3
IMMU:6201/ MICR:6201	Graduate Immunology	3
MICR:6247/ IMMU:6247	Graduate Immunology and Human Disease	4
MICR:6267	Graduate Viruses and Human Disease	4
MMED:6215	Transcription and Multifunctional Regulation by RNA	1
MMED:6220/ ACB:6220/ MPB:6220	Mechanisms of Cellular Organization	3
MMED:6225/ ACB:6225/ MPB:6225/ PCOL:6225	Growth Factor Receptor Signaling	1
MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions	1
MMED:8115	Molecular Physiology	4
NSCI:5653/ BIOL:5653/ PSY:5203	Fundamental Neurobiology I	3
NSCI:7235/ NEUR:7235	Neurobiology of Disease	3

## Additional Requirements

### Laboratory Rotations

Rotations are not required as students entering the experimental pathology subprogram are directly admitted.

### Teaching

The experimental pathology subprogram does not have a teaching requirement. However, there are opportunities to teach if students desire this experience.

### Publication Requirements

Students must have one first-author, peer-reviewed paper published or in press, as well as a co-authored, peer-reviewed paper or review article published or in press prior to being allowed to schedule their dissertation defense.

### Comprehensive Examination

The comprehensive examination is generally taken in the spring semester of the second year of study. Students with advanced standing (medical scientist training program students or those with an M.S. degree) may choose to take the examination in the fall semester of their second year.

The comprehensive examination is off-topic. The focus of the proposal is in the field of a student's research. To determine the topic, each of the five comprehensive exam committee members choose a recent high-profile paper in the area of the student's research interests, but not directly related to the dissertation project. After examining the papers, the student chooses one and makes it the subject of the comprehensive exam.

The student then prepares and submits a two-page, single-spaced abstract to the committee. The abstract should include the background/rationale, the significance of the question being asked, and an outline of the specific aims. Upon approval of the abstract, the student is given permission to prepare a full proposal based on the NIH R21 format. Specifically, the proposal should be seven single-spaced pages and must include significance, innovation, rationale, and experimental approach. The proposal is then defended orally in front of the entire committee.

### Final Examination

The dissertation committee consists of the mentor and four additional faculty. Students are required to select and meet with their committee by the end of the first fall semester of their second year, and at least yearly thereafter.

Upon meeting all requirements, students may then defend their dissertation/final exam. Two weeks prior to the defense, students must provide the entire committee with a completed draft of their dissertation. On the day of the defense, students present a public seminar of their dissertation work. This is then followed by defense of the dissertation before the entire dissertation committee. A final version of the dissertation is prepared based on suggested edits provided by the committee. After final approval by the research advisor and committee, the dissertation is submitted to the Graduate College.

For more information, see the Experimental Pathology Ph.D. Graduate Program on the Department of Pathology website.

## Free Radical and Radiation Biology

The Doctor of Philosophy in biomedical science with a free radical and radiation biology subprogram is interdisciplinary and requires 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree. The possibility exists for a major emphasis in radiation biology or redox biology with a focus on cancer or degenerative diseases associated with aging. Although students with diverse academic backgrounds may enter the program, each student should have a science background which includes at least two years of chemistry, including organic chemistry; one year of physics; two years of biology; and mathematics, including at least one semester of calculus.

The Ph.D. in biomedical science with a free radical and radiation biology subprogram requires the following coursework.

### Core Free Radical and Radiation Biology Curriculum

Code	Title	Hours
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
FRRB:5000	Radiation Biology	4
FRRB:5005	Rigor and Reproducibility in Redox Biology	1

PSQF:6217/ GRAD:6217	Seminar in College Teaching	1-3

## Additional Requirements

### Laboratory Rotations

Graduate students rotate through at least three free radical and radiation biology different laboratories during their first academic year with primary and secondary faculty.

### Seminar and Journal Clubs

Students must enroll in one seminar for credit once a year for three years as well as a thesis defense seminar. Students should not register for the seminar during their first academic year.

Students enrolled for research credit are required to submit a research report to their advisor on the last day of class each semester. The report is evaluated and graded by the advisor. The report, written in a form that is appropriate for a peer-reviewed publication, should define the goals, aims, and objectives for the specific semester, and describe the progress

made by the student toward completion of the research objectives.

Topics in Free Radical Biology and Medicine (FRRB:6006) and Topics in Radiation and Cancer Biology (FRRB:6008) must be taken at least two times.

## Publication Requirements

Students must submit at least one first-author manuscript or be ready to submit to a peer-reviewed journal prior to the thesis defense. All Ph.D. students are expected to have peer-reviewed publications prior to graduation and these publications should include first authorship.

## Grant Writing Opportunities

National Institutes of Health (NIH) research grant proposals (i.e., F30, F31) and/or equivalent grant submissions are encouraged based on a student's work. The free radical and radiation biology program will provide resources and critiques of the application prior to submission. Students should review the instructions provided in the NIH publication, PHS-398, available from the National Institutes of Health website.

## Comprehensive Examination

Students who have successfully completed four semesters since enrollment must take their comprehensive exam no later than February of their third year in the program. Students need to maintain full-time status (minimum of 9 s.h. per semester) prior to their comprehensive examination. The comprehensive examination includes both a written and an oral presentation on the topic of the student's dissertation research. The written proposal needs to be organized following the National Institutes of Health guidelines for an R01 application. Students are encouraged to consult with their mentors and members of their Ph.D. advisory/examination committee as they develop their research hypothesis and specific aims; this should be limited to one page. Once the hypothesis and aims page has been approved by the committee, the mentor and committee members will not have any input into the development and writing of the rest of the proposal. If appropriate, students are allowed a second attempt at the comprehensive examination. A second attempt needs to be completed no later than August of the same year as the first attempt of the comprehensive examination.

The written proposal is limited to 14 pages, which includes an abstract (half-page summary, as a separate page); the hypothesis and aims (one page), body of proposal (12 pages), and references not included in the page count. A title page (not included in the page count) with only administrative information, such as the title of proposal, name of the student, date of examination, and other such information is encouraged. The proposal should be prepared as single-spaced text, in 11-point Arial font.

## Final Examination

The final examination is a defense of the thesis and explanation of the scientific principles involved, given in a public seminar and closed door oral exam, with committee members. The student's research must be summarized in the format required by the Graduate College.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biomedical science (free radical and radiation

biology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

## Molecular Medicine

The Doctor of Philosophy in biomedical science with a molecular medicine subprogram provides interdisciplinary training in the concepts and methodologies fundamental to the investigation of biological processes and molecular mechanisms that relate to human disease. The Ph.D. requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree.

Students enter the molecular medicine subprogram through the Biomedical Science Program (BSP). The BSP is designed to provide students maximum flexibility during the first year of graduate studies to take a course of study compatible with several programs while completing research rotations. At the end of the first year, students choose a subprogram affiliation.

The curriculum is a sequence of required and elective courses, which provides students with broad exposure to areas including molecular biology, cell biology, biochemistry, and integrative sciences. It ensures a comprehensive exposure to conceptual and experimental aspects of molecular and cellular biology and of translational studies. Sufficient flexibility is provided so that students can adapt the program to permit specialization in their own area of interest. Faculty members are involved in a variety of research projects involving molecular and cellular biology and molecular medicine.

The Ph.D. in biomedical science with a molecular medicine subprogram requires the following coursework.

## Typical Curriculum

### First Year

See the Overview [p. 1602] at the beginning of the Ph.D. in biomedical science section of the Catalog for a typical first-year schedule.

### Second Year

Students select coursework from the following three track areas: metabolic disorders, cardiovascular biology, and molecular and cellular medicine (general).

Code	Title	Hours
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
MMED:6280	Critical Thinking in Molecular Medicine	1
MMED:7290	Seminars in Molecular Medicine	1
Electives		1-3

Students select coursework from the following three track areas: metabolic disorders, cardiovascular biology, and molecular and cellular medicine (general).

## Metabolic Disorders

Code	Title	Hours
MMED:6230	Pathogenesis of Metabolic and Cardiovascular Disorders	3
MMED:6280	Critical Thinking in Molecular Medicine	1
MMED:7310	Translational Medicine Education Rounds (taken fall and spring semesters)	1

MMED:6225/ ACB:6225/ MPB:6225	Growth Factor Receptor Signaling	1
MMED:6226/ ACB:6226/ MPB:6226	Cell Cycle Control	1
MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions (elective, 1s.h. maximum)	1
Elective		1

## Additional Requirements

### Laboratory Rotations

To ensure that students obtain early involvement in laboratory research, they are required to register for research credits and complete three laboratory rotations during their first year of graduate study. In general, these rotations are in laboratories of three different molecular medicine faculty members. In some cases, if approved by the molecular medicine program,

students may be allowed to complete two of their rotations in the same laboratory.

### Teaching

Students are required to complete a teaching requirement (3 s.h.). They may teach in a combination of 1 or 2 s.h. courses, or one 3 s.h. course. This teaching requirement must be met prior to the final dissertation defense and graduation. It is recommended that teaching occur in the third year following completion of the comprehensive examination.

### Publication Requirements

Students are required to have a minimum of one first-author publication in a peer-reviewed journal. The article must be formally accepted and be in-press status or be published prior to graduation. A co-first-authored, peer-reviewed publication will count toward this requirement.

### External Fellowship Application Requirement

Students are required to submit a fellowship to an external funding agency (i.e., National Institutes of Health, American Heart Association) within one year of completing their comprehensive examination or by a date that is mutually agreed upon by the student, the dissertation advisor, and the molecular medicine program.

### Comprehensive Examination

Students are expected to complete the comprehensive examination, both written and oral components, before the beginning of their third year. The preliminary specific aims document can be submitted to the comprehensive examination committee any time after approval of the dissertation plan, but must be submitted before April 1. The committee evaluation of the specific aims will be returned to the student within one week. A rejected specific aims must be revised and resubmitted within three weeks. The committee then has one week to evaluate the resubmitted specific aims. The specific aims must be accepted by a majority vote of the committee before a student can proceed with development of a full proposal. Only two rounds of submission are allowed.

Following acceptance of the specific aims, a student must submit the written proposal within six weeks. The committee has two weeks to review the written document. The oral presentation to defend the written proposal should be scheduled as soon after the two weeks as possible or at the convenience of the committee. It is expected that all examinations will be completed by July 15, in advance of the end of the student's second year.

The detailed Molecular Medicine Graduate Student Guidelines is located under Program Information on the Molecular Medicine Program website.

### Final Examination

The five-member thesis committee serves as an advisory body for preparation of the thesis. It is expected that a student meet with the committee annually, although the candidate, thesis advisor, or the committee can request a meeting at any time. The final examination takes the form of a seminar presented to the program followed by a final thesis defense with committee members. The student is required to present a complete copy of the thesis to the thesis committee members at least two weeks prior to the final defense date.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biomedical science (molecular medicine subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

### Molecular Physiology and Biophysics

The Doctor of Philosophy in biomedical science with a molecular physiology and biophysics subprogram offers opportunities for training and research. The degree requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree.

Students enter the molecular physiology and biophysics subprogram through the Biomedical Science Program (BSP). The BSP is designed to provide students maximum flexibility during the first year of graduate studies to take a course of study compatible with several programs while completing research rotations. At the end of the first year, students choose a subprogram affiliation.

Students join an active group of faculty members and advanced students at a time of expanding interdisciplinary biomedical research at the University of Iowa. Faculty in the Department of Molecular Physiology and Biophysics have a strong research focus on the cellular, molecular, and physical mechanisms of physiological processes.

The Ph.D. in biomedical science with a molecular physiology and biophysics subprogram requires the following coursework.

## Typical Curriculum

### First Year, Fall

Code	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:5208	Topics in Principles of Molecular and Cellular Biology	1
BMED:7777	Biomedical Science Seminar	1
BMED:7888	Biomedical Science Research	arr.
PCOL:5204	Basic Biostatistics and Experimental Design	1

Elective course(s)

### First Year, Spring

Code	Title	Hours
BMED:7777	Biomedical Science Seminar	1
BMED:7888	Biomedical Science Research	arr.
MMED:6260	Methods for Molecular and Translational Medicine	1

PATH:5270/ IGPI:5270/ MMED:5270	Pathogenesis of Major Human Diseases	3
Elective course(s)		

### Second Year, Fall

Code	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
MPB:5153	Graduate Physiology	4
MPB:6302	Research Physiology and Biophysics	6

### Second Year, Spring

Code	Title	Hours
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
MPB:6225/ ACB:6225/ MMED:6225/ PCOL:6225	Growth Factor Receptor Signaling (elective)	1
MPB:6302	Research Physiology and Biophysics	2
MMED:6215	Transcription and Multifunctional Regulation by RNA (elective)	1
MMED:6226/ ACB:6226/ MPB:6226	Cell Cycle Control (elective)	1
MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions (elective)	1

## Elective Coursework Options

Any elective preapproved by the director of graduate studies can be used to meet the elective requirement. A total of 9 s.h. of elective coursework is required.

The most common elective options are the following.

Code	Title	Hours
MPB:6220/ ACB:6220/ MMED:6220	Mechanisms of Cellular Organization	3
GENE:6150	Genetic Analysis of Biological Systems	3
IGPI:5270/ MMED:5270/ PATH:5270	Pathogenesis of Major Human Diseases	3
NSCI:5653/ BIOL:5653/ PSY:5203	Fundamental Neurobiology I	3

## Additional Requirements

### Plan of Study

In consultation with the director of graduate studies, each newly admitted student formulates a plan of study to be completed before the comprehensive examination. This plan should include projected dates for completion of the

comprehensive examination as well as provision for removal of deficiencies. Before completing the comprehensive exams, the normal course load is 15 s.h. each semester.

## Required Courses

It is the intention of the department to have a curriculum that allows coursework to be mostly completed within the first year, though in some instances additional coursework in subsequent years is required. The core curriculum represents a minimum of required classes; although with advice of the director of graduate studies and thesis advisor, some students may benefit from completing additional coursework.

Requests for waiver of required courses or change of course registration must be approved by the director of graduate studies after consultation with the faculty and the chair of the department.

## Evaluation of Progress

Students must meet progress requirements of the Department of Molecular Physiology and Biophysics and the Graduate College. To meet departmental requirements, students must earn a grade of B or higher in MPB:5153 Graduate Physiology and BMED:5207 Principles of Molecular and Cellular Biology (B-minus or lower constitutes a non-passing grade), a grade of satisfactory (S) for BMED:7270 Scholarly Integrity/Responsible Conduct of Research I, and a g.p.a. of at least 3.00 in all elective coursework (a grade below B, but above D-minus, is permissible for individual electives, so long as the grade-point average of all combined electives taken during the graduate program remains higher than 3.00).

All core curriculum courses receiving a letter grade must be satisfactorily completed prior to taking the comprehensive exam. According to Graduate College regulations, students cannot take a comprehensive exam in a semester in which they are on academic probation.

## Comprehensive Examination

Students admitted directly to the doctoral program are required to complete the comprehensive examination by June 30 of the second year in the program.

## Workshop

All postcomprehensive students are required to present a workshop on the progress of their thesis research once per year. Students should consult with the workshop coordinator to arrange presentation dates. Precomprehensive students also are encouraged to present workshops, though it is not required. Students have an option to present a full or half workshop (typically 45 or 20 minutes, respectively).

## Teaching

Experience in teaching is an important part of a student's academic training. To attain adequate teaching proficiency, students receive teaching assignments after successful completion of the comprehensive exam and in subsequent years as warranted. Individual assignments depend on the teaching needs of the department. Examples of teaching assignments include running review sessions in a graduate physiology course, formal lectures, participating in small group conferences, assisting in computer simulations, or bench mentoring of summer students. These teaching assignments are made by the director of graduate studies in consultation with appropriate course directors. Thesis advisors with specific suggestions concerning teaching assignments that would be particularly beneficial to the individual

circumstances of a particular student are encouraged to share them with the director of graduate studies for consideration. However, final discretion for approval lies with the director of graduate studies who must preapprove all assignments.

## Research Publication

It is expected that thesis research will result in findings that are of sufficient quality and completeness to warrant publication in good quality peer-reviewed journals. At least one first-author peer-reviewed research paper should be accepted for publication prior to the Ph.D. thesis defense. The published paper or a letter from an editor indicating acceptance should be provided to the director of graduate studies before scheduling a final exam date. In certain cases, a first-author research manuscript might be written, but not yet accepted by a journal at the time a final Ph.D. thesis exam is scheduled. In this case, the first-author requirement may be satisfied if trainees submit their manuscript to the preprint server for biology, bioRxiv.

## Thesis Defense and Presentation

Students complete a thesis defense with their committee. Once this test is completed they must schedule a public thesis presentation.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biomedical science (molecular physiology and biophysics subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

## Pharmacology

The Doctor of Philosophy in biomedical science with a pharmacology subprogram requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree.

Qualified students who are interested in earning the Doctor of Medicine along with the Ph.D. may apply to the Medical Scientist Training Program [p. 1772] in a combined M.D./Ph.D. program. Students have the opportunity to tailor their curriculum with courses that enhance their educational goals. They take a combination of graduate courses that include seminar courses.

The Ph.D. in biomedical science with a pharmacology subprogram requires the following coursework.

## Core Pharmacology Curriculum

Code	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0

PCOL:5130	Fundamentals of Pharmacology	3
PCOL:5204	Basic Biostatistics and Experimental Design	1
PCOL:6203	Pharmacology for Graduate Students	6
PCOL:6210	Receptors and Cell Signaling	3
PCOL:6250	Advanced Problem Solving in Pharmacological Sciences	1
MPB:5153	Graduate Physiology	4

## Typical Curriculum

### First Year, Fall

Code	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:5208	Topics in Principles of Molecular and Cellular Biology	1
BMED:7777	Biomedical Science Seminar	1
BMED:7888	Biomedical Science Research	arr.
PCOL:5204	Basic Biostatistics and Experimental Design	1
MPB:5153	Graduate Physiology	4

### First Year, Spring

Code	Title	Hours
BMED:5208	Topics in Principles of Molecular and Cellular Biology	1
BMED:7777	Biomedical Science Seminar	1
BMED:7888	Biomedical Science Research	arr.
PCOL:5130	Fundamentals of Pharmacology	3
PCOL:6210	Receptors and Cell Signaling	3
PCOL:6250	Advanced Problem Solving in Pharmacological Sciences	1

### Second Year, Fall

Code	Title	Hours
BMED:7270	Scholarly Integrity/Responsible Conduct of Research I	0
PCOL:6015	Topics in Pharmacology and Neuroscience	1
PCOL:6080	Pharmacology Seminar	1
PCOL:6090	Graduate Research in Pharmacology	arr.
PCOL:6203	Pharmacology for Graduate Students	6

### Second Year, Spring

Code	Title	Hours
BMED:7271	Scholarly Integrity/Responsible Conduct of Research II	0
PCOL:6015	Topics in Pharmacology and Neuroscience	1

PCOL:6080	Pharmacology Seminar	1
PCOL:6090	Graduate Research in Pharmacology	arr.

## Additional Requirements

### Laboratory Rotations

Newly admitted students complete three 12-week laboratory rotations by the end of the second semester.

### Seminar and Journal Clubs

During the first two semesters, all registered students enroll in BMED:5208 Topics in Principles of Molecular and Cellular Biology and BMED:7777 Biomedical Science Seminar. In subsequent semesters, students enroll in PCOL:6015 Topics in Pharmacology and Neuroscience and PCOL:6080 Pharmacology Seminar.

### Comprehensive Examination

The comprehensive examination process normally begins during the fourth semester and is completed during the fifth semester in the program. The exam consists of writing and defending a research proposal in an area not directly related to work being conducted by the student or in the laboratory of the student's mentor(s). During the oral defense, the Comprehensive Exam Committee may pose questions related to the written proposal and also may ask questions to determine whether the student has broad knowledge in the pharmacological sciences.

### Publication

A first-authored manuscript derived from a student's thesis research must be accepted for publication before the Ph.D. degree is granted.

### Final Examination

The final oral examination is a defense of the thesis and is conducted by the Thesis Committee, typically immediately after a thesis seminar.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biomedical science (pharmacology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

# Center for the Book

## Director

- Matthew P. Brown (English)

## Director, Graduate Studies

- Julia A. Leonard (Interdisciplinary Programs)

**Graduate degree:** M.F.A. in book arts

**Graduate certificate:** book studies/book arts and technologies

**Faculty:** <https://book.grad.uiowa.edu/faculty-and-staff/instructors>

**Website:** <https://book.grad.uiowa.edu>

The University of Iowa Center for the Book represents a community of faculty, staff, students, and local book specialists with interests in all facets of book production, distribution, and use. Some members of the center actively research the history and circulation of the book, examining the role of books in cultural and historical processes. They also look at how changes in book production affect the way books are viewed as artifacts. Specialists in book arts and technologies study the history and technique of book crafts, including letterpress printing, typography, calligraphy, papermaking, and bookbinding. Others engage in the conservation or production of books, including artists' books and literary fine press publications.

The center offers classes; sponsors lectures, seminars, and workshops; and encourages the exchange of ideas among individuals with interests in the book. A wide range of perspectives on the book as an aesthetic, cultural, and historical artifact is provided by associated faculty, staff, and graduate students in the Schools of Art and Art History, and Library and Information Science; the Departments of History and English; the University of Iowa Libraries; the Creative Writing Program (Iowa Writers' Workshop); and other areas. This interdisciplinary membership and the center's facilities combine to provide an exceptional environment for studying the history of the book, its evolution, and its future.

Graduate students may earn a master's degree or a graduate certificate through the Center for the Book. Undergraduate students may add dimension to their majors in English, art, journalism, history, and other disciplines by taking Center for the Book courses in book arts and book studies. They also may include an emphasis on book arts or on cultural and historical aspects of the book in the interdepartmental studies major.

## Programs

### Graduate Programs of Study

#### Major

- Master of Fine Arts in Book Arts [p. 1617]

#### Certificate

- Certificate in Book Studies/Book Arts and Technologies [p. 1619]

## Courses

### Center for the Book Courses

#### **UICB:2100 Creative Writing for Book Arts** 3 s.h.

Creative writing in context of book arts; text and image, typography, visual sequence, graphic narrative; zines, chapbooks, broadsides, and artist's books.

#### **UICB:2110 Introduction to Book Arts** 3 s.h.

Topics related to artist books, hand bookbinding, letterpress printing, papermaking, and lettering arts. GE: Engineering Be Creative. Same as BKAT:2110.

#### **UICB:2600 Graphic Design II** 3 s.h.

Fundamentals of typography as a core element in visual communication; introduction to historical typographic practices as well as modern modes of designing with type. Prerequisites: ARTS:1510 and ARTS:1520. Corequisites: DSGN:2500. Same as DSGN:2600.

#### **UICB:2900 Book Design for Publishing** 3 s.h.

Introduction to the major aspects of book design, including typography, layout, standard industry software, discussion of trends in the field. Same as ARTS:2900, ENGL:2900, WRIT:2900.

#### **UICB:3140 Literature and the Book** 3 s.h.

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Varies by semester. Same as ENGL:3140.

#### **UICB:3142 Topics in Book History** 3 s.h.

Authorship, publishing, and so forth within specific historical and cultural contexts. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Varies by semester. Same as ENGL:3142.

#### **UICB:3280 Elements of Book Art** 3 s.h.

Overview of book art process and techniques for nonmajors; introduction to traditional bookbinding skills, nontraditional book structures, and content development for artist books. GE: Engineering Be Creative. Same as BKAT:3280.

#### **UICB:3380 Letterpress** 3 s.h.

Introduction to letterpress printing; metal type, relief printing, page layout, and basic typography; basic use of Vandercook Proof Press; experimentation with diverse letterpress techniques. GE: Engineering Be Creative. Same as BKAT:3380.

#### **UICB:3900 Special Project for Undergraduates** arr.

Independent study.

#### **UICB:3980 American Print Culture** 3 s.h.

Exploration of a wide range of imagery printed and published in the United States during 19th century (1776-1900); fine art original prints, popular imagery in periodicals and illustrated books, scholarly literature, history of evolving technologies, variety of printed work; shifting reputation of printed art and its makers. Same as ARTH:3980.

#### **UICB:4100 Paperworks** 3 s.h.

Conceptual and methodological approaches to 2D and 3D paper works; creation of works that couple unique properties of paper-pulp medium with personal visual ideas and clarity of intent; contemporary issues in paper pulp, medium's relationship to larger art and craft contexts. GE: Engineering Be Creative. Same as BKAT:4100.

- UICB:4150 Introduction to Book Studies** 3 s.h.  
Theory and practice of book studies; meanings of word and image in the book format; comparative study of other media, applied study of the codex as physical artifact. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Varies by semester. Same as ENGL:4150, SLIS:4150.
- UICB:4205 Bookbinding I: Materials and Techniques** 3 s.h.  
Hands-on introduction to materials and techniques commonly used in bookbinding. Same as BKAT:4205.
- UICB:4210 Boxes and Enclosures** 3 s.h.  
Hands-on techniques for a variety of book enclosures; appropriateness, aesthetic issues concerning box design; Japanese wraparound case, drop-spine box, hinged and lidded boxes, slipcase; technical skill development. Prerequisites: UICB:4205. Same as BKAT:4210.
- UICB:4270 Bookbinding II** 3 s.h.  
Builds on skills acquired in UICB:4205; projects to complete six bindings based on historical and contemporary models; sewing styles, board attachments, endband types; nonadhesive and case-bound structures, varied materials and binding styles, their effects on structure, aesthetic considerations, further development of solid binding skills; historical development of particular binding practices. Prerequisites: UICB:4205. Same as BKAT:4270.
- UICB:4280 Artists' Books** 3 s.h.  
Exploration of the book as a form for artistic expression; emphasis on conceptual development; relationship between content, form, and structure; how a book's structure and design can enhance and integrate part of the work's meaning. Prerequisites: UICB:4205 or BKAT:4205. Same as BKAT:4280.
- UICB:4290 Historical Book Structures** 3 s.h.  
Historical development of book structures examined through surviving examples, construction of historical models. Prerequisites: UICB:4205.
- UICB:4300 Letterpress I** 3 s.h.  
Mechanics of letterpress printing, typography, and design as applied to hand set metal type and edition printing; printing on a Vandercook proof press; introduction to photopolymer plates and methods of illustration related to edition printing, historical aspects of printing technology, typesetting, type classification; role of letterpress in modern private press and contemporary artist books. Same as ARTS:4300.
- UICB:4340 Digital Design for Artists' Books** 3 s.h.  
Introduction to concepts, techniques, and technologies used to design and produce artists' books with personal computers and graphic design software. GE: Engineering Be Creative. Same as ARTS:4340.
- UICB:4380 Letterpress II** 3 s.h.  
Builds on skills acquired in UICB:4300; students produce an editioned letterpress printed chapbook or artist book, a poster for a public event, and an image built from metal type; exploration of hand-set metal, digital typesetting, printing from photopolymer plates, and pressure printing; press mechanics and operation; publication philosophies, manuscript acquisition, and topics specific to literary fine press and artist books; historical and contemporary context for literary fine press publications and artist book work. Prerequisites: UICB:4300. Same as ARTS:4380.
- UICB:4390 Book and Publication Design** 3 s.h.  
Students plan, design, and produce a book using Adobe Creative Suite; page layout software, typography, page layout and design, book formatting, handling of image files, preparation of materials for print and other contemporary book media; history of book design, book design in contemporary publishing; visit to University of Iowa Libraries Special Collections. Prerequisites: DSGN:2600 or UICB:4300. Same as ARTS:4390.
- UICB:4400 History of Western Letterforms** 3 s.h.  
History of Western letterforms, with focus on tools, materials, techniques; the major hands, their place in history, their influence on modern times; creation of letterforms using appropriate tools; hands-on approach with emphasis on understanding rather than mastery. Same as ARTS:4400.
- UICB:4405 Introduction to Calligraphy Intensive** 3 s.h.  
Intensive, basic broad pen calligraphy; Roman capitals, lowercase Roman and italic lettering.
- UICB:4415 Calligraphy I: Foundational Hands** 3 s.h.  
Intensive, basic broad pen calligraphy; Roman capitals, lowercase Roman and italic lettering. GE: Engineering Be Creative. Same as ARTS:4415.
- UICB:4420 Calligraphy I: Blackletter Hands** 3 s.h.  
Explores some of the many calligraphic forms known collectively as blackletter hands (medieval introduction to calligraphy); study of various hands from the heavily vertical Textura to the floridly expressive Gothic Cursive, and the distinctive connotations these unique letterform carry; emphasis on exploring the creative process while refining calligraphic skills and understanding the historical and social connections this hand has with other disciplines.
- UICB:4490 Advanced Studies in Letter Arts** 3 s.h.  
Special topics and advanced projects in calligraphy and letter arts. Prerequisites: UICB:4400 or UICB:4415 or UICB:4420. Same as ARTS:4490.
- UICB:4910 The Book in the Middle Ages** 3 s.h.  
Relation of text, decoration, function, creators, and audience in different genres of medieval manuscript books 400-1500 A.D. Same as HIST:4910, SLIS:4910.
- UICB:4920 The Transition from Manuscript to Print** 3 s.h.  
History of the book and communication in Europe 1400-1800; production, distribution, and use of texts in cultural context. Same as HIST:4920, SLIS:4920.
- UICB:4930 Topics in Material Analysis** 3 s.h.  
Analysis and description of physical book artifacts and their component parts (parchment, paper, bookbinding) and allied specialties (the lettering arts, printing and illustration techniques); reading, writing, presentations. Same as HIST:4430.
- UICB:5110 Islamic and Asian Papermaking** 3 s.h.  
History, technique, and aesthetics of traditional Islamic and Asian hand papermaking. Same as BKAT:5110.
- UICB:5130 European Papermaking History and Technique** 3 s.h.  
History and technique of traditional European hand papermaking and related aesthetics; students gain confidence in pursuing independent production of handmade papers or undertaking related research in their own particular areas of interest; fiber preparation, sheet forming, and drying/finishing methods; concurrent readings and discussions of related history and aesthetics; special projects selected by student with instructor approval. Same as BKAT:5120.

- UICB:5140 Contemporary Papermaking** 3 s.h.  
Contemporary papermaking studio practice and conceptual considerations; focus on nontraditional techniques and cross-disciplinary use of paper fibers and handmade paper; handmade paper as a form of artistic expression. Prerequisites: UICB:4100 or BKAT:4100 or UICB:5110 or BKAT:5110 or UICB:5130 or BKAT:5120. Same as BKAT:5140.
- UICB:5160 Studies in Papermaking** arr.  
Topics in the history and technique of papermaking. Prerequisites: UICB:4100 or UICB:5110 or UICB:5130.
- UICB:5170 Advanced Papermaking Production** 3 s.h.  
Independent Western- or Japanese-style projects undertaken at UICB Research and Production Paper Facility at Oakdale Campus under faculty guidance; plan, implement, and evaluate professional scale production runs using full-scale equipment. Prerequisites: UICB:5110 or UICB:5130 or BKAT:5110 or BKAT:5120. Same as BKAT:5170.
- UICB:5180 Advanced Projects in Paper** 1-3 s.h.  
Advanced independent projects undertaken in a classroom setting; collaborative group discussions to plan, implement, troubleshoot, and evaluate student projects. Prerequisites: UICB:5110 or UICB:5130 or BKAT:5110 or BKAT:5120. Same as BKAT:5180.
- UICB:5210 Bookbinding III** 3 s.h.  
Bookbinding structures based on historical and contemporary models; differences in various binding practices, how these differences affect function, why the styles developed; experience choosing appropriate structures for particular uses; emphasis on fine tuning skills and techniques required for advanced binding practices; sewn endbands, rounding and backing, sewing on varied supports, board attachments, and covering methods. Prerequisites: (UICB:4205 or BKAT:4205) and (UICB:4270 or BKAT:4270). Requirements: for UICB:5210—UICB:4205 and UICB:4270; for BKAT:5210—BKAT:4205 or BKAT:4270 or UICB:4205 or UICB:4270. Same as BKAT:5210.
- UICB:5220 Book Conservation** 3 s.h.  
Practical methods, materials assessment, conservation history and evolution. Prerequisites: UICB:4270. Same as SLIS:5535.
- UICB:5260 Studies in Bookbinding** 3 s.h.  
Topics related to hand bookbinding. Same as BKAT:5260.
- UICB:5280 Bookbinding IV** 3 s.h.  
Advanced studies in bookbinding; fine binding styles, leather paring and tooling, advanced finishing techniques, refining skills; continued look at differences in regional binding practices, how these differences affect function, and why particular styles developed. Prerequisites: UICB:5210.
- UICB:5330 Letterpress III: Imagemaking** arr.  
Advanced work in alternative and innovative letterpress technologies as they apply to imagemaking processes for fine press printing; topics include pressure printing, photopolymer from nondigital negatives, explorations of type-high surfaces, monoprints on the Vandercook, and applying hand work to editioned prints; students complete a series of print exercises for each process, a small printed book sketch, and a longer format editioned artist book. Prerequisites: UICB:4380. Same as ARTS:5330.
- UICB:5340 Letterpress III: The Handprinted Book** 3 s.h.  
Advanced work in fine press book design; exploration of problems in hand-printing books, choice of manuscript, editing, design, typesetting, proofreading, printing and binding; histories of printing and of the book, emphasis on 20th- and 21st-century book design and literature; issues of book design and production related to letterpress printing. Prerequisites: UICB:4380. Same as ARTS:5340.
- UICB:5370 Studies in Printing** 1-3 s.h.  
Development of individual book projects and production of one substantial project or several smaller ones; focus on acquiring or creating a text and/or other content; project development; range of print techniques available in letterpress printing; issues involved in producing editioned artist books or fine press work; opportunity to expand on existing printing; classroom setting used to augment work sessions with in-progress critiques, readings, and visits to special collections.
- UICB:5380 Letterpress IV: Advanced Projects** 3 s.h.  
Development and/or production of one substantial project; focus on acquiring or creating a text and/or other content; project development; range of print techniques available in letterpress printing; issues involved in producing editioned artist books or fine press work; opportunity to expand existing printing; classroom setting augments work sessions with in-progress critiques, readings, and visits to special collections. Prerequisites: UICB:5330 or UICB:5340.
- UICB:5520 Studies in Book History and Technologies** 0-3 s.h.  
Topics related to production, distribution, and consumption of books through history and into the future. Same as SLIS:5520.
- UICB:5530 Topics in Preservation** 3 s.h.  
Care, conservation, and preservation of cultural heritage artifacts; readings, discussion, hands-on sessions. Same as SLIS:5530.
- UICB:5540 Topics in Book Arts** 1-3 s.h.  
Focus on particular techniques and concepts in the book arts and related fields.
- UICB:5550 Special Project for Graduate Students** arr.  
Independent study.
- UICB:5600 Reading Culture: History and Research in Print and Digital Media** 3 s.h.  
Cultural nature of reading practices in historic and contemporary contexts; print and digital culture; reading communities; examples of recent scholarship; use of primary resources; seminar. Same as SLIS:5600.
- UICB:6100 Book Studies Proseminar** 1-3 s.h.
- UICB:6370 Topics in Book Studies** 3 s.h.  
Topics relevant to book studies and special collections. Same as SLIS:6370.
- UICB:6510 Book Art Seminar: History, Practice, and Critique** 3 s.h.  
Art-historical introduction to book arts (printing, bookbinding, papermaking and paperworks, artist bookwork, lettering arts, literary fine press and fine press artist books); influences and origins, contemporary practice, critical considerations; locating field through lenses of fine art, craft, and book history; weekly readings, observational analyses, hands-on exercises; archival research in the University of Iowa Libraries Special Collections; final research, analytical, and/or critical project.
- UICB:6520 Graduate Book Arts Workshop** 3 s.h.  
Development of artwork and studio practice; readings and research in contemporary theory and practice; analysis of visual language; integration of creative activities and critical thinking in student's own art practice and analysis of contemporary work in book arts; group and individual critiques, studio assignments, presentations, discussions.
- UICB:6540 M.F.A. Thesis Hours** arr.

## Book Arts, M.F.A.

The M.F.A. degree focuses on book arts as a hands-on practice, as a creative medium, and as a historical and cultural phenomenon. Its principal objectives are to provide aesthetic and scholarly contexts for the making of creative work and for the study of book history, arts, and technologies. It also offers a structured program in book-related disciplines for graduate students interested in studio arts, in librarianship, and in literary and cultural history.

### Requirements

The Master of Fine Arts program in book arts requires a minimum of 60 s.h. of graduate credit, including a thesis. Students complete core courses and work with a faculty advisor to design an individualized curriculum spanning several studio practice disciplines: artist book work, bookbinding, lettering arts, digital book work, papermaking, or letterpress printing. The degree culminates with the successful completion of a thesis.

The M.F.A. requires the following coursework.

### Studio Requirements

Courses from the areas below should be selected in consultation with an advisor.

#### Required Core Electives

Code	Title	Hours
Three of these (9 s.h.):		
UICB:4205/ BKAT:4205	Bookbinding I: Materials and Techniques	3
UICB:4300/ ARTS:4300	Letterpress I	3
UICB:4400/ ARTS:4400	History of Western Letterforms	3
UICB:4415/ ARTS:4415	Calligraphy I: Foundational Hands	3
UICB:5110/ BKAT:5110	Islamic and Asian Papermaking	3
UICB:5130/ BKAT:5120	European Papermaking History and Technique	3

#### Graduate Book Arts Workshop

Code	Title	Hours
UICB:6520	Graduate Book Arts Workshop (must be taken three times for a total of 9 s.h.)	9

#### Book Art Seminar

Code	Title	Hours
This course:		
UICB:6510	Book Art Seminar: History, Practice, and Critique	3

#### Studio Practice Electives

Code	Title	Hours
Studio practice courses		15

## Scholarly Inquiry Requirement

Code	Title	Hours
Two of the following, or students may request to use related courses approved by the head of the scholarly inquiry area (6 s.h.):		
UICB:3140/ ENGL:3140	Literature and the Book	3
UICB:3142/ ENGL:3142	Topics in Book History	3
UICB:3980/ ARTH:3980	American Print Culture	3
UICB:4150/ ENGL:4150/ SLIS:4150	Introduction to Book Studies	3
UICB:4910/ HIST:4910/ SLIS:4910	The Book in the Middle Ages	3
UICB:4920/ HIST:4920/ SLIS:4920	The Transition from Manuscript to Print	3
UICB:5600/ SLIS:5600	Reading Culture: History and Research in Print and Digital Media	3
UICB:6100	Book Studies Proseminar	3

## Material Analysis Requirement

Code	Title	Hours
This course:		
UICB:4930/ HIST:4430	Topics in Material Analysis	3

## Additional Electives

Code	Title	Hours
Elective courses (may include 0-6 s.h. of thesis credit; see below)		15

## Thesis

Code	Title	Hours
Can be taken for a maximum of 6 s.h.:		
UICB:6540	M.F.A. Thesis Hours	arr.

## Combined Programs

### M.F.A./M.A. in Library and Information Science

The Center for the Book and the School of Library and Information Science offer a combined Master of Fine Arts in book arts/Master of Arts in library and information science. The combined degree program allows students with strong interests in the book arts, book history, and material book studies to also gain expertise in library and information science. The degrees provide book artists and librarians with credentials reflecting a depth of skills and knowledge that have been used to secure positions in special collections libraries and archives. Students in the combined program earn both degrees by completing fewer semester hours than if each degree was completed separately.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more

information, see the M.A. in library and information science [p. 1654] in the Catalog.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. Visit Admissions on the Center for the Book website for more information.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

### Book Arts, M.F.A.

- Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- Choose three courses for a total of 9 s.h. from UICB:4205, UICB:4300, UICB:4400, UICB:4415, UICB:5110, UICB:5130
- Complete a total of 15 s.h. of Studio Practice Elective courses. Work with academic advisor to determine appropriate graduate course and sequence; see General Catalog and department website for specifics.
- Complete a total of 6 s.h. of Scholarly Inquiry courses. Work with academic advisor to determine two appropriate graduate courses and sequence from a select list OR related coursework approved by the head of the scholarly inquiry area: see General Catalog and department website for specifics.
- Choose two courses for a total of 6 s.h. from UICB:3140, UICB:3142, UICB:3980, UICB:4150, UICB:4910, UICB:4920, UICB:5600, UICB:6100
- Must be taken three times for a total of 9 s.h.
- Complete a total of 15 s.h. of Additional Elective courses. Work with academic advisor to determine appropriate graduate coursework and sequence; see General Catalog and department website for specifics. Up to 6 s.h. allowed for thesis credit.
- Hours may be required for this Additional Elective if fewer than 6 s.h. of thesis credits are completed.
- Maximum of 6 s.h. of thesis credit allowed.

# Book Studies/Book Arts and Technologies, Graduate Certificate

## Requirements

The graduate Certificate in Book Studies/Book Arts and Technologies requires 18 s.h. of graduate credit and is designed to be completed in one year. The program is open to students who are enrolled in a graduate degree program at the University of Iowa as well as to students enrolled in the Graduate College with nondegree status.

The program requires the following coursework. Students should consult their advisor concerning course choices.

Code	Title	Hours
A studio practice course		3
A scholarly inquiry course		3
Electives		12
<b>Total Hours</b>		<b>18</b>

## Certificate and Degree Opportunities

Separate application to each program is required.

### Certificate/M.A. in Library and Information Science

The Center for the Book and the School of Library and Information Science enable students to earn the Certificate in Book Studies/Book Arts and Technologies and a M.A. in library and information science [p. 1654]. Admission deadline is February 1 for the following fall.

The programs offer multiple pathways into professional engagement with artifacts, such as rare and artist books, available in archives and libraries. Students select courses that enable them to gain skills and knowledge in areas of service such as conservation, cataloging, instruction, and outreach. Completion of the two programs requires 51 s.h. of credit. Students must take at least 27 s.h. of library and information science courses and 15 s.h. of book arts, studies, and technologies courses. The remaining 9 s.h. may be taken in either School of Library and Information Science (prefix SLIS) or Center for the Book (prefix UICB) courses or from another unit, with approval of the School of Library and Information Science.

### Certificate/M.F.A. in Art

The Center for the Book and the School of Art and Art History enable students to earn the Certificate in Book Studies/Book Arts and Technologies and a M.F.A. in art [p. 145]. Students may wish to earn the M.F.A. in a studio art area (printmaking, drawing and painting, design, etc.) in combination with the 18 s.h. certificate. If accepted to both programs, students are advised and matriculate through both programs independently. Most, if not all, of the 18 s.h. of elective coursework required for the M.F.A. may be applied toward the Center for the Book certificate. It is possible for a student to earn both credentials in the same amount of time required to earn the M.F.A.

Admissions advisors in both areas of study assist interested students in discerning whether the Center for the Book M.F.A. in book arts or the School of Art and Art History M.F.A. in art and the certificate option is most appropriate to a student's background and career goals. In large part, this is determined by the degree to which books and book arts are central to the applicant's chosen path.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. Visit Admissions on the Center for the Book website for more information.

# Cognitive Science of Language

## Chair, Psychological and Brain Sciences

- Mark S. Blumberg

## Coordinator, Cognitive Science of Language

- Robert M. McMurray (Psychological and Brain Sciences)

**Graduate certificate:** cognitive science of language

**Faculty:** <https://cogscilang.grad.uiowa.edu/people>

**Website:** <https://cogscilang.grad.uiowa.edu>

The scientific study of language is larger than any one field, due in part to the broad diversity in forms and uses of language. The Cognitive Science of Language Program uses an interdisciplinary approach to the study of language, helping to prepare language scientists who are conversant in multiple domains.

## Programs

## Graduate Program of Study Certificate

- Certificate in Cognitive Science of Language [p. 1621]

# Cognitive Science of Language, Graduate Certificate

## Requirements

The graduate Certificate in Cognitive Science of Language requires a minimum of 12-15 s.h. of graduate credit. Designed to complement doctoral study, the certificate program is open to University of Iowa Ph.D. students in linguistics, neuroscience, psychology, and speech and hearing science. Ph.D. students in other disciplines may petition to be permitted to earn the certificate. Students must complete a formal application to enter the certificate program; they should contact the program's coordinator before they apply.

The certificate program ensures that students have training in interdisciplinary approaches to the study of language along with a strong theoretical grounding in their Ph.D. discipline. Certificate students work with their Ph.D. advisor and the certificate program's coordinator to develop an individual plan of study that complements their degree program and career interests. In order to be granted the Certificate in Cognitive Science of Language, students must complete all of the requirements of their Ph.D. program as well as all of the certificate requirements.

Certificate students must participate in the cognitive science of language proseminar, a two-semester (6 s.h.) survey course on the five major disciplines within the language sciences—psychology, formal linguistics, neuroscience, communication disorders, and computational approaches. They also must complete three courses on cognitive science or language outside their field of study. Students can choose from the approved courses in the lists below, or they can petition the program for other courses. Students may enroll in the proseminar and three additional courses before or concurrently with other courses in their programs.

Students must include a faculty member from the Cognitive Sciences of Language Program on their Ph.D. comprehensive and dissertation exam committees.

The Certificate in Cognitive Science of Language requires the following coursework.

Code	Title	Hours
	Proseminar	6
	Disciplinary Courses	6-9
<b>Total Hours</b>		<b>12-15</b>

## Proseminar

Code	Title	Hours
Both of these:		
PSY:6101/ CSD:6101/ LING:6101	Cognitive Science of Language Proseminar I	3
PSY:6102/ CSD:6102/ LING:6102	Cognitive Science of Language Proseminar II	3

## Disciplinary Courses

Students take a total of three courses chosen from the following lists (6-9 s.h.).

### Communication Sciences and Disorders

Code	Title	Hours
CSD:3116/ LING:3116	Basic Neuroscience for Speech and Hearing	3
CSD:3118/ LING:3118	Language Acquisition	1-3
CSD:4145	Developmental Language Disorders	3
CSD:5146	Neurogenic Disorders of Language	3
CSD:5206	Language Disorders: Birth to Five Years	3
CSD:5222	Gross Anatomy of Speech/Voice Production	2
CSD:5233	Aphasia	2
CSD:5256	Anatomy and Physiology of Hearing	3-4
CSD:5282	Phonological Development and Disorders	2
CSD:6230	Psychoacoustics	2-3
CSD:6538	Seminar: Hearing Science	1

### Linguistics

Code	Title	Hours
LING:3030	Child Language-Linguistic Perspectives	3
LING:4090	Practical Phonetics	3
LING:5010/ SLA:5010	Introduction to Syntax (requires a corequisite course which does not count toward the certificate)	3
LING:5020/ SLA:5020	Introduction to Phonology	3
LING:6050	Language Universals Linguistic Typology	3
LING:6080/ SLA:6452	Topics in Second Language Acquisition	3
LING:7090/ SLA:7404	Seminar: Problems in Linguistics	2-3

### Psychological and Brain Sciences

Code	Title	Hours
PSY:3670/ LING:3670	Language Processes	3
PSY:7430	Seminar: Cognitive Development	0-3
PSY:7610	Seminar: Cognitive Psychology	2-3

### Second Language Acquisition

Code	Title	Hours
SLA:6901/ ASIA:6901/ FREN:6901/ JPNS:6901/ SPAN:6901	Second Language Acquisition Research and Theory	3

## Spanish and Portuguese

<b>Code</b>	<b>Title</b>	<b>Hours</b>
SPAN:4100/ SLA:4301	Introduction to Spanish Phonology	3
SPAN:4150/ SLA:4300	Introduction to Spanish Syntax	3
SPAN:6110/ SLA:6303	Spanish Phonology	3
SPAN:6120/ SLA:6304	Spanish Syntax	3
SPAN:6150/ SLA:6301	Topics in Spanish Language Acquisition	3

# College Teaching

## Director

- Mitchell J. Kelly (Psychological and Quantitative Foundations)

**Graduate certificate:** college teaching

**Website:** <https://education.uiowa.edu/services/office-graduate-teaching-excellence-ogte/graduate-certificate-college-teaching>

The certificate program in college teaching provides coursework and supervised experiences that prepare graduate students for careers in postsecondary education.

The Certificate in College Teaching is administered by the Graduate College.

## Programs

## Graduate Program of Study

### Certificate

- Certificate in College Teaching [p. 1624]

# College Teaching, Graduate Certificate

## Requirements

The graduate Certificate in College Teaching requires a minimum of 12 s.h. of graduate credit. Previous teaching experience does not count toward certificate requirements. The certificate program is open to all University of Iowa students enrolled in a Ph.D. or other terminal degree program.

Students apply to the certificate program on the Office of Graduate Teaching Excellence (OGTE) website, under Graduate Certificate in College Teaching.

The Certificate in College Teaching requires the following coursework. Courses selected from the categories below can be completed in any order at any time.

### Category 1

Category 1 coursework provides an overview of basic instructional issues and methods in college teaching. The work requires students to engage in discipline-specific thinking as they consider their own teaching situations.

Students choose two courses (minimum of 6 s.h. required) from the following.

Code	Title	Hours
Students must take at least one of these:		
EPID:7200	Teaching in Epidemiology	3
GRAD:7385/ EDTL:7385/ EPLS:7385/ PSQF:7385/ RCE:7385	Teaching and Learning in Higher Education	3
GRAD:6217/ PSQF:6217	Seminar in College Teaching	3
PSQF:6205	Design of Instruction	3
RHET:5352	Seminar: Topics in Teaching and Professional Development	3
SOC:7010	Teaching Sociology	3
Students may take one of these:		
PSQF:6211	Universal Design and Accessibility for Online Instruction	3
PSQF:6215	Online Instruction: Design and Facilitation	3
PSQF:6216	Tools and Utilities for Online Teaching	3
RHET:7940	Public Speaking for Academics	3

### Category 2

Category 2 requires students to complete practicum courses under the guidance of two different professors. Prior or current experience as a teaching assistant does not count toward this requirement.

Students enroll in one of the following courses twice, with each enrollment supervised by a different faculty member. Students earn a total of 3 s.h. for the two enrollments. They can enroll in two practicums with two different professors

in the same semester or they can complete practicum experiences in separate semesters.

Code	Title	Hours
EDTL:7380	Practicum in College Teaching	1-3
EPLS:7380	Practicum in College Teaching	1-3
GRAD:7400	Practicum in College Teaching (faculty member must be outside the College of Education)	1-3
PSQF:7380	Practicum in College Teaching	1-3
RCE:7380	Internship in Teaching	1-3

### Category 3

For Category 3, students develop a full portfolio that demonstrates their skills and competencies in teaching, research, and service. The portfolio requires sample syllabi, a statement of teaching philosophy, samples of assignments and student work, and reflective essays on critical issues in teaching in higher education. The portfolio artifacts are reviewed and evaluated by the course instructor.

Category 3 requires the following course.

Code	Title	Hours
EALL:7475	Ph.D. ePortfolio in College Teaching	3

# Genetics

## Chair

- Daniel F. Eberl (Biology)

**Graduate degree:** Ph.D. in genetics

**Faculty:** <https://genetics.grad.uiowa.edu/people/faculty>

**Website:** <https://genetics.grad.uiowa.edu>

Prospective doctoral students in genetics should have a strong undergraduate background in science, including courses in general genetics, organic chemistry, biochemistry and molecular biology, introductory physics, and mathematics, as well as a strong commitment to genetic research and teaching. Students are able to make up deficiencies in a particular area during their first year of graduate study.

## Programs

## Graduate Program of Study

### Major

- Doctor of Philosophy in Genetics [p. 1626]

## Courses

## Genetics Courses

### **GENE:4213 Bioinformatics** 2,4 s.h.

Overview of bioinformatics topics, including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BIOC:3120 or MICR:3170 or BIOL:2512 or BIOC:3110. Recommendations: grade of B+ or higher in BIOL:2512 or BIOC:3120, or graduate standing. Same as BIOL:4213, IGPI:4213.

### **GENE:5173 Computational Genomics** 3 s.h.

Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: (BIOS:4120 or STAT:3510) and (CS:5110 or ENGR:1300). Recommendations: completion of BME:5320. Same as BIOL:5320, BME:5330, ECE:5220, IGPI:5330.

### **GENE:6150 Genetic Analysis of Biological Systems** 3 s.h.

Genetic techniques and approaches for analysis of biological processes; comparison of strengths, weaknesses of a variety of experimental systems.

### **GENE:6200 Special Topics in Genetics** 1 s.h.

Current research in a selected field of genetics; different topic each year. Companion to a genetics seminar series. Same as ACB:6200.

### **GENE:6210 Seminars in Genetics** 1 s.h.

Attendance at weekly forum and presentation of research data to foster oral communication, presentation skills, and collaboration.

### **GENE:6234 Basic Biostatistical Methods with Genetics Applications** 1 s.h.

Introduction to terminology, fundamental concepts, and methods of biostatistics as applied to genetic research; genetic investigation examples used to illustrate statistical approaches.

### **GENE:6280 Directed Study in Genetics** arr.

### **GENE:7191 Human Molecular Genetics** 3 s.h.

Molecular genetic approaches to human disease; the human genome project, linkage analysis, candidate gene screening, special features of inbred populations, triplet repeat expansions, mitochondrial genetics, genetics of complex traits. Requirements: fundamental genetics and molecular biology.

### **GENE:7301 Graduate Research in Genetics** arr.

# Genetics, Ph.D.

## Requirements

The Doctor of Philosophy program in genetics requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of 3.00. The program is designed to promote collaborative investigation and intellectual interaction among students and faculty participants affiliated with several different departments.

Students who enroll in the Ph.D. program are encouraged to obtain a broad background in genetics, including molecular, population, and human genetics. Within this context, course requirements are flexible enough to permit students to tailor their formal coursework to their individual needs. All students are required to do some teaching as part of their development as future scientists and faculty members.

Students have the option to declare a Ph.D. emphasis in computational genetics.

All students enrolled in the program are required to take the following courses.

Code	Title	Hours
All of these:		
GENE:6150	Genetic Analysis of Biological Systems	3
GENE:6200	Special Topics in Genetics (seminar)	1
GENE:6210	Seminars in Genetics	1
GENE:6234	Basic Biostatistical Methods with Genetics Applications	1
BMED:5207	Principles of Molecular and Cellular Biology	3
One of these:		
GENE:7191	Human Molecular Genetics	3
BIOL:3172	Evolution	4
BIOL:3713	Molecular Genetics	4
BIOL:4333	Genes and Development	3
All of these:		
BMED:7270	Scholarly Integrity/Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/Responsible Conduct of Research II	0
Elective coursework in molecular and microbial genetics, cell and development genetics, human genetics, or computational genetics		8
Seminar courses approved by the program		5

Even more important than formal coursework is the opportunity to do significant research in genetics. Research interests of the participating faculty include virtually all areas of genetics, ranging from bacteriophage genetics to human medical genetics. In each area of genetics, there is a group of faculty members who have closely related interests.

The University is strong in several related disciplines, including microbial physiology, enzymology, virology, protein biochemistry and molecular biology, computational genetics, and developmental and cell biology, all of which contribute significantly to the overall training program.

In addition to completing research and coursework, students must pass a comprehensive examination, usually at the end of their second year in the program.

## Associated Courses

Credit earned in the following courses may be counted toward the Ph.D. in genetics. Not all courses are offered every year.

Code	Title	Hours
GENE:4213	Bioinformatics	4
GENE:5173	Computational Genomics	3
BIOC:3310	Practical Data Science and Bioinformatics	3
BIOC:4310	Computational Biochemistry	3
BIOC:5243	Biophysical Chemistry I, Module I	1
BIOS:6720	Statistical Machine Learning for Biomedical and Public Health Data	3
BIOS:7330	Advanced Biostatistical Computing	3
BME:5320	Bioinformatics Techniques	3
CS:5430	Machine Learning	3
EPID:5241	Statistical Methods in Epidemiology	4
EPID:6250	Genetics and Epidemiology	3
FRRB:7001	Molecular and Cellular Biology of Cancer	3
IGPI:6480	Knowledge Discovery	3
MICR:6268	Biology and Pathogenesis of Viruses	2
MMED:6220	Mechanisms of Cellular Organization	3
MMED:6226	Cell Cycle Control	1
MMED:6227	Cell Fate Decisions	1
NSCI:7235	Neurobiology of Disease	3
PCOL:6225	Growth Factor Receptor Signaling	1
STAT:4580	Data Visualization and Data Technologies	3

## Ph.D. and Dental Scientist Training Program

Ph.D. students in genetics who have earned a D.D.S. degree may be candidates for advanced training programs in dentistry. For information, contact the College of Dentistry.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in genetics in a combined degree program offered by the Carver College of Medicine and the Graduate College. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

## Admission

Prospective students should have a strong undergraduate science background and a strong commitment to research in genetics. Previous coursework should include general genetics, biochemistry, organic chemistry, and introductory physics and mathematics. However, deficiencies can be rectified during the first year as a graduate student.

Students who want to apply online should view the Interdisciplinary Graduate Program in Genetics website. For additional information, see the program website.

Students generally begin graduate work in the fall semester.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

All students receive a financial stipend of \$31,000 plus tuition for the 2021-22 academic year. Financial support comes from training grants, research assistantships, teaching assistantships, scholarships, individual research grants, or other departmental or college funds. All students are required to teach as part of their development as future scientists and faculty members.

See Financial Assistance on the Interdisciplinary Graduate Program in Genetics website and Finances on the Graduate Admissions website for more information.

# Human Toxicology

## Director

- Peter S. Thorne (Occupational and Environmental Health/  
Civil and Environmental Engineering)

## Director, Graduate Studies

- Gabriele Ludewig (Occupational and Environmental Health)

**Graduate degrees:** M.S. in human toxicology; Ph.D. in human toxicology

**Faculty:** <https://toxicology.grad.uiowa.edu/faculty>

**Website:** <https://toxicology.grad.uiowa.edu>

Toxicology is the study of how biological, chemical, physical, and radiological agents affect living organisms and the ecosystem, and how to prevent or lessen the adverse effects of those agents. The Human Toxicology Program prepares toxicologists to identify and assess environmental exposures, identify mechanisms by which toxicants affect homeostasis or induce disease, identify interventions to prevent adverse effects, and estimate acceptable levels of exposure to protect public health.

The program is interdisciplinary, involving the Graduate College, the College of Public Health, the Carver College of Medicine, and the Colleges of Engineering, Liberal Arts and Sciences, and Pharmacy.

The Graduate College supports the Human Toxicology Program. Students receive support from the Iowa Superfund Research Program, the Environmental Health Sciences Research Center, and other faculty research grants.

## Programs

## Graduate Programs of Study

### Majors

- Master of Science in Human Toxicology [p. 1629]
- Doctor of Philosophy in Human Toxicology [p. 1630]

## Facilities

Training is conducted primarily in laboratories and teaching facilities of the departments and colleges of Human Toxicology Program faculty members. These are among the best-equipped laboratories on campus. Together with the University's central research facilities, they provide access to the most up-to-date research equipment and expertise.

## Courses

## Human Toxicology Courses

**TOX:7171 Special Problems in Toxicology** arr.  
Didactic material that may include tutorial, seminar, or faculty-directed research work; or a special topic.

**TOX:7173 Professional Development in Toxicology** arr.  
Presentations and discussion on professional development topics including toxicology research methods and analysis, grant writing, proposal development, oral presentation skills, networking, and creating a portfolio framework that can be used after graduation.

**TOX:7180 Toxicology Research Seminar** 0-1 s.h.  
Contemporary research topics.

**TOX:7201 Toxicology Research** arr.  
Research that constitutes part of the thesis.

**TOX:7300 Thesis/Dissertation** arr.  
Thesis or dissertation research; seminar preparation.

# Human Toxicology, M.S.

## Requirements

The Master of Science program in human toxicology requires a minimum of 39 s.h. of graduate credit and a thesis. Students must maintain a cumulative g.p.a. of at least 3.00.

The program is designed for students who wish to pursue a master's degree as a second degree or through part-time study, particularly those who perform toxicologists' functions in their jobs and who need additional training.

Entering students should have backgrounds in the biological, engineering, and physical sciences and should have completed courses in introductory chemistry and biology, and organic chemistry.

After entering the program, students work with their mentor to choose an advisory committee, which meets at least once a semester to help them explore their research interests. The committee also provides consultation on coursework and research activities and serves as the committee for the final examination (thesis defense).

The Human Toxicology Program is flexible. Students work with their advisory committees to plan a course of study tailored to their individual interests and goals within the field of toxicology.

M.S. students with a major in human toxicology must successfully complete the following coursework as part of their course of study.

Code	Title	Hours
One of these:		
OEH:6710	Human Toxicology and Risk Assessment	3
PHAR:6501	Principles and Mechanisms of Chemical Toxicology	3
And all of these:		
TOX:7173	Professional Development in Toxicology	arr.
TOX:7180	Toxicology Research Seminar (enrollment is required each semester)	0-1
BMED:7270	Scholarly Integrity/Responsible Conduct of Research I	0
OEH:6720	Advanced Toxicology	4

Upon successful completion of all requirements, including the thesis and its oral defense, students are awarded the Master of Science degree.

## Admission

Prospective students may apply to the program via a centralized application system; see Admission Information on the Human Toxicology Program website.

Completed applications should be submitted by January 1; applications submitted after that date are reviewed as they are received and are considered for any remaining openings.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

# Human Toxicology, Ph.D.

## Requirements

The Doctor of Philosophy program in human toxicology requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00.

The program is designed for students with backgrounds in the biological, engineering, and physical sciences. Entering students should have solid training in science, including courses in introductory chemistry and biology, and organic chemistry; knowledge of biochemistry and molecular biology also is useful. Students may remedy deficiencies by taking appropriate courses during their first year of graduate study.

Students begin the program with three two-month rotations in the laboratories of participating faculty members, in order to identify a mentor. After the first year, the mentor assumes financial responsibility for the student. With advice from the mentor, each student chooses an advisory committee, which meets at least once a semester to help the student explore the student's research interests. The committee also provides consultation on coursework and research activities and serves as the committee for the comprehensive examination and the final examination (dissertation defense).

The Human Toxicology Program is flexible. Students work with their advisory committees to plan a course of study tailored to their individual interests and goals within the field of toxicology.

Ph.D. students in human toxicology must successfully complete the following coursework as part of their course of study.

Code	Title	Hours
One of these:		
OEH:6710	Human Toxicology and Risk Assessment	3
PHAR:6501	Principles and Mechanisms of Chemical Toxicology	3
And all of these:		
TOX:7173	Professional Development in Toxicology	arr.
TOX:7180	Toxicology Research Seminar (enrollment is required each semester)	0-1
BMED:7270	Scholarly Integrity/Responsible Conduct of Research I (must be completed within first two years of graduate study)	0
OEH:6720	Advanced Toxicology	4

After successfully completing the comprehensive examination, usually at the end of the second year of graduate study, the student advances to Ph.D. candidacy. Students devote all of their time to dissertation research and writing. Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded the Doctor of Philosophy degree.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Ph.D. and the Doctor of Medicine in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

## Admission

Prospective students may apply to the program via a centralized application system; see Admission Information on the Human Toxicology Program website.

Completed applications are encouraged to be submitted by December 1, but applications after that date are given full consideration. Applications submitted after March 1 are reviewed when received and are considered for any remaining openings.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

Doctoral students in human toxicology receive stipends and tuition support from University of Iowa sources, including internal fellowships and graduate research assistantships, and from non-University sources, such as training grants from the National Institutes of Health (NIH).

# Immunology

## Director

- Kevin L. Legge (Microbiology and Immunology/Pathology)

**Graduate degree:** Ph.D. in immunology

**Faculty:** <https://immuno.grad.uiowa.edu/people/faculty>

**Website:** <https://immuno.grad.uiowa.edu/>

The Immunology Program provides interdisciplinary training in the concepts and methodologies of basic and applied immunology. Faculty members are involved in a variety of research projects dealing with the immune system at all levels—structural, functional, cellular, biochemical, and molecular. Students take coursework in immunology and related disciplines and are directly involved in laboratory research throughout their study.

## Programs

### Graduate Program of Study

#### Major

- Doctor of Philosophy in Immunology [p. 1632]

## Facilities

Training is conducted in laboratories and teaching facilities of the Carver College of Medicine Stead Family Department of Pediatrics and the Departments of Internal Medicine, Otolaryngology—Head and Neck Surgery, Pathology, Microbiology and Immunology, Pharmacology, and Urology; and the College of Public Health Department of Epidemiology. Faculty laboratories and central research core facilities provide students with access to state-of-the-art research equipment.

## Courses

### Immunology Courses

**IMMU:2040 Summer Undergraduate IDGP**

**Research**

**0 s.h.**

**IMMU:6201 Graduate Immunology**

**3 s.h.**

Ontogeny, activation, and function of T lymphocytes and B lymphocytes; innate immune effector mechanisms; major histocompatibility complex; antigen presentation; thymocyte positive and negative selection; signaling of T lymphocytes, B lymphocytes; emphasis on experimental methods for analysis of these processes. Prerequisites: MICR:3147. Requirements: for IMMU:6201—college biology, general chemistry, and introductory immunology courses; for MICR:6201—courses in college biology, genetics, general chemistry, and introductory immunology. Recommendations: for IMMU:6201—courses in biochemistry and genetics; for MICR:6201—biochemistry course. Same as MICR:6201.

**IMMU:6211 Immunology Seminar**

**1 s.h.**

Requirements: immunology graduate standing.

**IMMU:6231 Research in Immunology**

**arr.**

Laboratory research. Requirements: immunology graduate standing.

**IMMU:6241 Writing a Scientific Proposal**

**2 s.h.**

How to write a scientific proposal. Prerequisites: IMMU:6201. Requirements: enrollment in immunology graduate program.

**IMMU:6247 Graduate Immunology and Human Disease**

**4 s.h.**

Important principles and key concepts in immunology with a focus on the involvement of the immune system in disease pathogenesis; overview of innate and adaptive immune systems and their functions at cellular and molecular levels; learning enhanced by case-based, small-group discussion and writing exercises. Same as MICR:6247.

**IMMU:7221 Advanced Topics in Immunology**

**3 s.h.**

In-depth analysis of selected areas. Prerequisites: IMMU:6201 or MICR:6201. Same as MICR:7207.

# Immunology, Ph.D.

## Requirements

The Doctor of Philosophy in immunology requires 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree. The program provides interdisciplinary training in the concepts and methodologies of basic and applied immunology.

They complete coursework in immunology and related disciplines, and are directly involved in laboratory research throughout their study. Immunology graduate courses are offered not only to teach students the current concepts and paradigms within the field, but to emphasize the scientific approaches and methods used to attain this understanding.

The Ph.D. with a major in immunology requires the following coursework.

## Core Curriculum

Code	Title	Hours
IMMU:6201/ MICR:6201	Graduate Immunology	3
IMMU:6211	Immunology Seminar	1
IMMU:6247/ MICR:6247	Graduate Immunology and Human Disease	4
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
PCOL:5204	Basic Biostatistics and Experimental Design	1
Elective		3

## Typical Curriculum

### First Year, Fall

Code	Title	Hours
IMMU:6211	Immunology Seminar	1
IMMU:6247/ MICR:6247	Graduate Immunology and Human Disease	4
BMED:5207	Principles of Molecular and Cellular Biology	3
PCOL:5204	Basic Biostatistics and Experimental Design	1

### First Year, Spring

Code	Title	Hours
IMMU:6201/ MICR:6201	Graduate Immunology	3
IMMU:6211	Immunology Seminar	1
Elective (optional)		1-3

### Second Year, Fall

Code	Title	Hours
IMMU:6211	Immunology Seminar	1
IMMU:6241	Writing a Scientific Proposal	2

IMMU:7221/ MICR:7207	Advanced Topics in Immunology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
Elective (optional)		1-3

## Second Year, Spring

Code	Title	Hours
IMMU:6211	Immunology Seminar	1
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
Elective (optional)		1-3

## Electives

The following are possible elective choices.

Code	Title	Hours
ACB:5218/ BIOL:5218/ MICR:5218	Microscopy for Biomedical Research	3
BIOC:7251	Introduction to Protein Structures	1
BIOC:7252	Enzymes, Carbohydrates, Nucleic Acids, and Bioenergetics	1
BIOC:7253	Metabolism I	1
BIOC:7254	Cellular Biochemistry	1
BIOC:7255	Metabolism II	1
BIOC:7256	Molecular Biology	1
BIOS:4120	Introduction to Biostatistics	3
MICR:6240	Graduate Eukaryotic Pathogens and Human Disease	2
MICR:6259	Graduate Bacteria and Human Disease	3
MICR:6260	Graduate Bacterial Physiology and Cell Biology	2
MICR:6267	Graduate Viruses and Human Disease	4
MICR:6268	Biology and Pathogenesis of Viruses	2
MICR:6270	Graduate Microbial Genetics	2
MMED:3310/ BIOC:3310/ CBIO:3310	Practical Data Science and Bioinformatics	3
MMED:6220/ ACB:6220/ MPB:6220	Mechanisms of Cellular Organization	3
MMED:6225/ ACB:6225/ MPB:6225/ PCOL:6225	Growth Factor Receptor Signaling	1
MMED:6226/ ACB:6226/ MPB:6226	Cell Cycle Control	1
MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions	1

PATH:5270/ IGPI:5270/ MMED:5270	Pathogenesis of Major Human Diseases	3
PCOL:6207	Ion Channel Pharmacology	1
PCOL:6208	G Proteins and G Protein- Coupled Receptors	1
PCOL:6209/ MPB:6209/ NSCI:6209	Steroid Receptor Signaling	1

## Additional Requirements

### Laboratory Rotations

Prior to selecting a laboratory for dissertation work, students are expected to perform three laboratory rotations, with each rotation lasting approximately 12 weeks in duration. During the first semester, students should become acquainted with the research interests of the faculty members in the immunology program. This learning process is facilitated by faculty presentations in IMMU:6211 Immunology Seminar during the fall semester. Students also are encouraged to meet with specific faculty to discuss their research programs. This enables students to make an informed decision about their laboratory rotations, with the guidance and approval of their advisor and the graduate studies committee.

At the latest, students should begin their first rotation within the first week of graduate study. Medical Science Training Program (MSTP) students and students with M.S. degrees that included a research-based dissertation may be excused from one rotation. Students having difficulty choosing a laboratory for dissertation work may perform a fourth rotation.

The rotations are graded either satisfactory or unsatisfactory. This grade is based upon a number of criteria including attendance and work habits. When not in classes or seminars, students are expected to spend the remaining portion of the day in the laboratory. Without a strong commitment to the rotation project, it is difficult to fulfill the purpose and aims of the rotation. A satisfactory grade is required in each of the laboratory rotations. If a satisfactory grade is not received in one of the rotations, an additional rotation is assigned. Failure to receive a satisfactory grade in the extra rotation results in the student being placed on academic probation. Following each rotation, an evaluation is given to each student by the faculty member and submitted to the graduate studies committee.

### Teaching

Students complete a teaching requirement lasting one semester. A variety of courses are available in several departments, and the program leadership place students in courses based upon interest, expertise, and scheduling.

### Publication Requirements

It is expected that the dissertation project be of sufficient breadth, depth, and novelty to result in first-author research publications in high quality peer-reviewed journals. A minimum of one peer-reviewed paper must be published or in press prior to the completion of the Ph.D. degree. In addition, a second publication, in which the student is a coauthor on a peer-reviewed article, a review, or book chapter must be published or in press prior to the completion of the degree. Students are not permitted to schedule a dissertation defense until it has been demonstrated that both of these requirements have been met.

## Comprehensive Examination

The comprehensive examination is generally taken in the spring semester of the second year of study. MSTP students or students entering the program with a M.S. degree may choose to take the examination in the fall semester of their second year.

Students taking the comprehensive examination prepare a single abstract of an original research proposal. The examination committee determines if the abstract topic is appropriate as nonoverlapping, and if the abstract is scientifically sound to potentially serve as the basis for a defensible research proposal. After the abstract is accepted, students are given four weeks to complete and submit the written comprehensive examination proposal. The oral defense is scheduled 10-14 days after the exam is submitted, depending on availability of the committee members. The comprehensive exam is written in the form of a NIH-style pilot grant proposal based on the abstract and instructions from the comprehensive examination. A detailed student handbook is available on the Immunology Program website.

## Final Examination

The five members of the thesis committee serve as an advisory body for preparation of the thesis. The committee meets with each student to review the material that they expect to be incorporated into the thesis. Although meetings with the committee should be yearly, the candidate, thesis advisor, or the committee can request a meeting at any time. A final draft of the thesis must be given to all members of the committee two weeks before the final examination.

The final examination takes the form of a seminar presented to the program. This presentation is announced according to Graduate College policy. Questions, comments, and discussion follow. After the seminar, the candidate meets with the committee for the final thesis defense. In some cases revisions may be required. The degree is not awarded until the thesis is signed.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in immunology in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

## Admission

For information regarding admission and application procedures, visit the Immunology Graduate Program website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

Tuition and fees are paid for, and students receive a competitive stipend as well as health and dental benefits. Continued support beyond the first year is guaranteed, provided that progress toward degree completion of requirements is satisfactory. Sources of support include

departmental funds, training and research grants, and individual fellowships.

# Informatics

## Chair

- Juan Pablo Hourcade (Computer Science/Nursing)

**Graduate degrees:** M.S. in informatics; Ph.D. in informatics

**Graduate certificate:** informatics

**Faculty:** <https://cs.uiowa.edu/people>

**Website:** <https://informatics.grad.uiowa.edu/>

The Interdisciplinary Graduate Program in Informatics (IGPI) was proposed in 2006, largely motivated by the increasing amount of research at the intersection of computational disciplines and the humanities, arts, and the natural, biological, health, and social sciences. The proposal to establish the program emphasized the rapid changes brought about by information technology and how they in turn changed approaches across a wide variety of disciplines. Among these changes were the ability to ask different types of questions and analyze information at scales not previously possible.

The program aimed to fill a gap in training for practitioners and researchers who could provide a bridge between computing and other disciplines. IGPI graduates would receive training in core computational and statistical topics and combine it with coursework in a cognate area.

Changes in computing and how it affects society and scholarship make informatics even more relevant today than it was in 2006. One of the key changes has been in the increasing ubiquity of computer devices that facilitate communication and information access. These trends clearly point toward a near future where most people will be able to communicate with most other people around the world, as well as access any information, anytime, anywhere. The main barriers are likely to be political instead of technological. These changes mean that computers are directly affecting the way most people perceive the world, remember information, pay attention, communicate, learn, and make decisions.

This ubiquity means that it is becoming increasingly difficult to exercise one's basic rights and fulfill basic needs without using interactive technologies. People use computers to vote, to stay informed, and to express and share opinions. In addition, people use computers to ride public transportation, get money from banks, and pay for groceries. Hence, there are increased responsibilities in the design of computing systems, as well as the need to study their impact on society.

One final trend that is germane to informatics is the increasing availability and low cost of digital storage and processing, together with the wide availability and use of sensors, digital instruments, and other forms of capturing digital data. The result has been a tremendous growth in the amount of data available to scientists, businesses, and government. These changes have brought about the need for novel analysis techniques, for researchers and practitioners who can understand the data and these techniques, as well as the need to design these systems so they can enable new discoveries and insights while safeguarding privacy.

This world, where computers are playing a vital role not only in academic disciplines, but in society at large, calls for practitioners and researchers who can understand computing and also interface with other fields. IGPI was developed to fill this gap. The program is interdisciplinary, involving the Graduate College, the Carver College of Medicine, the Tippie College of Business, and the Colleges of Dentistry, Engineering, Liberal Arts and Sciences, Nursing,

Pharmacy, and Public Health. Students may pursue a Master of Science degree in informatics (with one of three cognates in geoinformatics, health informatics, or human-computer interaction) or a Ph.D. in informatics. University of Iowa graduate students in other programs may elect to earn a Certificate in Informatics in addition to their main program of study. All three programs complete the same core courses, with flexible electives which allow students to focus on the subarea of greatest interest to them.

Geoinformatics provides methods and technologies needed to measure, store, analyze, manage, and visualize information about phenomena occurring on or near the earth's surface. It is an increasingly essential technology for understanding and managing the complex world.

Health informatics uses contemporary information technologies to improve the storage, organization, retrieval, and evaluation of health information in order to support clinical, clinical research, and public health applications.

The human-computer interaction cognate is intended for students interested in designing useful and usable technologies. The cognate's courses provide an interdisciplinary foundation including psychology, sociology, and engineering.

## Programs

### Graduate Programs of Study

#### Majors

- Master of Science in Informatics [p. 1642]
- Doctor of Philosophy in Informatics [p. 1644]

#### Certificate

- Certificate in Informatics [p. 1646]

## Courses

### Informatics Courses

#### IGPI:3010 Geographic Information Systems and Science 3 s.h.

Solid foundation and introduction to GIS and digital map making; what GIS is and how GIS can contribute to research, careers, and everyday life; fundamentals that underlie GIS, including methods for GIS data collection and georeferencing, spatial modeling, spatial data analysis, and visualization; GIS trends including mobile GIS and the Web. Same as GEOG:3010.

#### IGPI:3011 Identifying and Developing a Global Health Project 3 s.h.

Review of major components of global health related research process; preparation for a local or international project which addresses a global health issue in a systematic way. Same as GHS:3010.

#### IGPI:3050 Geospatial Programming 3 s.h.

Introduction to geospatial programming with Python; programming basics, data structures, and algorithms; spatial data models and structures; vector-based and raster-based geoprocessing; automating GIS tasks and models; spatial libraries (e.g., ArcPy, GeoPandas, GDAL, PySAL). Prerequisites: GEOG:1050. Same as GEOG:3050.

- IGPI:3100 Introduction to Mathematical Statistics I** **3 s.h.**  
Descriptive statistics, probability, conditional probability, discrete and continuous univariate and multivariate distributions, sampling distributions. Prerequisites: MATH:1860 or MATH:1560. Same as STAT:3100.
- IGPI:3101 Introduction to Mathematical Statistics II** **3 s.h.**  
Point and interval estimation, testing statistical hypotheses, simple regression, nonparametric methods. Prerequisites: STAT:3100. Same as STAT:3101.
- IGPI:3120 Probability and Statistics** **4 s.h.**  
Models, discrete and continuous random variables and their distributions, estimation of parameters, testing statistical hypotheses. Prerequisites: MATH:1560 or MATH:1860. Same as STAT:3120.
- IGPI:3200 Applied Linear Regression** **3 s.h.**  
Regression analysis with focus on applications; model formulation, checking, selection; interpretation and presentation of analysis results; simple and multiple linear regression; logistic regression; ANOVA; hands-on data analysis with computer software. Prerequisites: STAT:2020 or STAT:2010 or STAT:3120. Same as ISE:3760, STAT:3200.
- IGPI:3314 Genomics** **3 s.h.**  
Major areas of genomics, including DNA and protein sequence analysis, structural diversity of whole genomes, microarray applications, proteomics; computer workshop experience in applying bioinformatics tools. Prerequisites: BIOL:2211 or BIOL:2512 or BIOC:3120 or BIOC:3110. Same as BIOL:3314.
- IGPI:3330 Introduction to Software Design** **3 s.h.**  
Design of software for engineering systems; algorithm design and structured programming; data structures; introduction to object-oriented programming in JAVA; applications to engineering problems; lab arranged. Prerequisites: ENGR:2730. Same as ECE:3330.
- IGPI:3500 Introduction to Environmental Remote Sensing** **3 s.h.**  
Basic concepts and principles of remote sensing; sources of data; georegistration; digital processing and classification of remotely sensed images for extraction of environmental information; linkage of remote sensing techniques with GIS analysis. Same as GEOG:3500.
- IGPI:3510 Biostatistics** **3 s.h.**  
Statistical concepts and methods for the biological sciences; descriptive statistics, elementary probability, sampling distributions, confidence intervals, parametric and nonparametric methods, one-way ANOVA, correlation and regression, categorical data. Requirements: MATH:0100 or MATH:1005 or ALEKS score of 30 or higher. Same as STAT:3510.
- IGPI:3520 GIS for Environmental Studies** **3 s.h.**  
Students learn new, more advanced techniques for the representation and study of human and natural systems using geographic information systems (GIS); application of this new knowledge to environmental management and problem solving. Prerequisites: GEOG:1050. Same as GEOG:3520.
- IGPI:3540 Geographic Visualization** **3 s.h.**  
Concepts and techniques that underlie cartographic representation, interaction, and geovisualization; map symbolization and visual variables; spatiotemporal visualization, multivariate mapping, interactive cartography, animation, geovisual analytics, 3D visualization, virtual and augmented reality. Prerequisites: GEOG:1050. Same as GEOG:3540.
- IGPI:4100 Mathematical Statistics I** **3 s.h.**  
Probability, conditional probability, random variables, distribution and density functions, joint and conditional distributions, various families of discrete and continuous distributions, mgf technique for sums, convergence in distribution, convergence in probability, central limit theorem. Prerequisites: MATH:2850 and MATH:2700. Same as STAT:4100.
- IGPI:4101 Mathematical Statistics II** **3 s.h.**  
Transformations, order statistics, point estimation, sufficient statistics, Rao-Blackwell Theorem, delta method, confidence intervals, likelihood ratio tests, applications. Prerequisites: STAT:4100. Same as STAT:4101.
- IGPI:4115 Finite Element I** **3 s.h.**  
One- and two-dimensional boundary value problems; heat flow, fluid flow, torsion of bars; trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisites: ENGR:2750. Same as CEE:4533.
- IGPI:4150 Health and Environment: GIS Applications** **3 s.h.**  
Introduction to how geographic information systems (GIS) and spatial statistics are used in the study of patterns of health and disease in space and time. Same as GEOG:4150, GHS:4150.
- IGPI:4159 Air Pollution Control Technology** **3 s.h.**  
Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Same as CBE:4459, CEE:4159.
- IGPI:4200 Statistical Methods and Computing** **3 s.h.**  
Methods of data description and analysis using SAS; descriptive statistics, graphical presentation, estimation, hypothesis testing, sample size, power; emphasis on learning statistical methods and concepts through hands-on experience with real data. Recommendations: graduate standing in non-statistics or less quantitative major. Same as STAT:4200.
- IGPI:4213 Bioinformatics** **2,4 s.h.**  
Overview of bioinformatics topics, including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BIOC:3120 or MICR:3170 or BIOL:2512 or BIOC:3110. Recommendations: grade of B+ or higher in BIOL:2512 or BIOC:3120, or graduate standing. Same as BIOL:4213, GENE:4213.
- IGPI:4373 Molecular Evolution: Genes, Genomes, and Organisms** **3 s.h.**  
Theory underlying phylogenetic analysis with application of these methods to molecular data sets; analysis of multigene data, organellar, and nuclear genome sequences to reconstruct the history of cells. Prerequisites: BIOL:3172 with a minimum grade of C-. Same as BIOL:4373.
- IGPI:4500 Applications in Environmental Remote Sensing** **4 s.h.**  
Theory and practice of remote sensing and digital image processing; practical applications to human-environment interactions. Recommendations: GEOG:3500 or EES:3110 or ENVS:3110. Same as GEOG:4500.

**IGPI:4520 GIS for Environmental Studies:****Applications****3 s.h.**

Project-driven course to advance student knowledge of geographic information systems (GIS); application of GIS to environmental change analysis, environmental assessment, hazard/risk analysis, and environmental decision making. Prerequisites: GEOG:3520. Same as GEOG:4520.

**IGPI:4522 Bayesian Statistics****3 s.h.**

Bayesian statistical analysis, with focus on applications; Bayesian and frequentist methods compared; Bayesian model specification, choice of priors, computational methods; hands-on Bayesian data analysis using appropriate software; interpretation and presentation of analysis results. Prerequisites: STAT:3200 and (STAT:3101 or STAT:4101 or STAT:3120). Same as PSQF:4520, STAT:4520.

**IGPI:4540 Statistical Learning****3 s.h.**

Introduction to supervised and unsupervised statistical learning, with a focus on regression, classification, and clustering; methods will be applied to real data using appropriate software; supervised learning topics include linear and nonlinear (e.g., logistic) regression, linear discriminant analysis, cross-validation, bootstrapping, model selection, and regularization methods (e.g., ridge and lasso); generalized additive and spline models, tree-based methods, random forests and boosting, and support-vector machines; unsupervised learning topics include principal components and clustering. Requirements: an introductory statistics course and a regression course. Recommendations: prior exposure to programming and/or software, such as R, SAS, and Matlab. Same as STAT:4540.

**IGPI:4580 Data Visualization and Data Technologies****3 s.h.**

Introduction to common techniques for visualizing univariate and multivariate data, data summaries, and modeling results; how to create and interpret these visualizations and assess effectiveness of different visualizations based on an understanding of human perception and statistical thinking; data technologies for obtaining and preparing data for visualization and further analysis; students learn how to present results in written reports and use version control to manage their work. Requirements: an introductory statistics course and a regression course. Recommendations: prior exposure to basic use of statistical programming software (e.g., R or SAS) as obtained from a regression course strongly recommended. Same as STAT:4580.

**IGPI:4581 Introduction to Geographic Databases****3 s.h.**

Introduction to basic building blocks of spatial database design, spatial data models, structures, relationships, queries (SQL), indexing, and geoprocessing; design and construction of various types of spatial databases, including relational and big data approaches such as ArcGIS geodatabase, PostGIS/PostgreSQL, and MongoDB. Prerequisites: GEOG:1050. Same as GEOG:4580.

**IGPI:4740 Large Data Analysis****3 s.h.**

Current areas that deal with problem of big data; techniques from computer science, mathematics, statistics; high performance and parallel computing, matrix techniques, cluster analysis, visualization; variety of applications including Google PageRank, seismology, Netflix-type problems, weather forecasting; fusion of data with simulation; projects. Prerequisites: (CS:1210 with a minimum grade of C- or ENGR:2730 with a minimum grade of C-) and (MATH:3800 or CS:3700) and (STAT:3200 or ISE:3760 or IGPI:3200). Same as CS:4740, MATH:4740, STAT:4740.

**IGPI:5001 Introductory Methodology****3-4 s.h.**

Introduction to quantitative techniques in political science; set theory, probability distributions, estimation, testing; emphasis on acquiring mathematical skills for more advanced quantitative work in political science. Requirements: M.A. or Ph.D. standing in political science. Same as POLI:5001.

**IGPI:5010 Research for Master's Thesis****arr.**

Requirements: admission to M.S. program.

**IGPI:5015 Independent Study****arr.****IGPI:5043 Special Libraries****3 s.h.**

Management, organizational structures, collections, and client services in special libraries; site visits to a variety of special libraries and information centers; projects that apply theoretical principles. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite. Same as SLIS:5043.

**IGPI:5055 Geospatial Programming****3 s.h.**

Introduction to geospatial programming with Python; programming basics, data structures, and algorithms; spatial data models and structures; vector- and raster-based geoprocessing; automating GIS tasks and models; spatial libraries (e.g., ArcPy, GeoPandas, GDAL, PySAL). Same as GEOG:5055.

**IGPI:5110 Introduction to Informatics****3 s.h.**

Fundamentals of computer science: algorithms, complexity, relational databases, systems concepts, programming in Python. Same as CS:5110.

**IGPI:5120 Regression Modeling and ANOVA in the Health Sciences****3 s.h.**

Continuation of BIOS:4120; correlation, simple and multiple linear regression, confounding, interactions, model selection, single and multiple factor ANOVA (analysis of variance) models, contrasts, multiple comparisons, nested and block designs, and an introduction to mixed models; designed for non-biostatistics majors. Offered spring semesters and summer sessions. Prerequisites: BIOS:4120. Same as BIOS:5120, STAT:5610.

**IGPI:5130 Applied Categorical Data Analysis****3 s.h.**

Analysis of proportions, risk measures, and measures of association; Mantel-Haenszel method; logistic regression for binary responses and for matched data; logistic regression for multi-category responses; analysis of count data (Poisson regression and negative binomial regression); analysis of clustered data (generalized estimating equations and generalized linear mixed effects model); special topics include the application of propensity score methods; designed for non-biostatistics majors. Offered fall semesters. Prerequisites: BIOS:5120. Same as BIOS:5130.

**IGPI:5199 Applied Statistics I****4 s.h.**

Descriptive statistics, basic inferential methods (confidence intervals, chi-square tests); linear models (regression and ANOVA models—specification and assumptions, fitting, diagnostics, selection, testing, interpretation); nonlinear models, logistic regression. Prerequisites: STAT:3101. Corequisites: STAT:4100 or STAT:5100. Requirements: facility with matrix algebra. Same as STAT:5200.

**IGPI:5200 Health Informatics****3 s.h.**

Technological tools that support health care administration, management, and decision making. Same as HMP:5370, ISE:5860, MED:5300, SLIS:5900.

- IGPI:5203 User Education: Multimedia** 3 s.h.  
Development of multimedia projects for educational use in libraries; students develop a portfolio of projects using multimedia technology; applications of multimedia for teaching and learning; exploration and evaluation of platforms for delivering multimedia in educational environments. Same as SLIS:5200.
- IGPI:5206 Medical Imaging Physics** 3 s.h.  
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210. Same as BME:5210, ECE:5470.
- IGPI:5211 Genes, Genomes, and the Human Condition Graduate Lecture** 3 s.h.  
Organization, expression, and evolution of genes in context of genomes; focus on human genome; distribution and transmission of variation in human population. Recommendations: BIOL:1411 highly recommended. Same as BIOL:5211.
- IGPI:5212 Biomedical Signal Processing** 3 s.h.  
Application of signal processing methods (e.g., Fourier, Laplace, z-transforms) to biomedical problems, such as analysis of cardiac signals, circadian rhythm, the breathing cycle; computer simulation lab. Same as BME:5200.
- IGPI:5220 Principles of Public Health Informatics** 3 s.h.  
Systematic applications of information science, computer science, and technology to public health practice, research, and learning; methods of disease surveillance, data collection, analysis, and reporting with health informatics. Offered fall semesters. Same as EPID:5200.
- IGPI:5251 Advanced Biosystems** 3 s.h.  
Biological systems unique to systems analysis; operation under nonequilibrium conditions; tools for systems analysis developed from models of systems at equilibrium (i.e., mechanical systems); fundamental difference between biological and mechanical systems that impact systems analysis; expand knowledge of linear systems and begin work with nonlinear systems; various modeling and analysis approaches useful in biomedical and biomedical engineering research. Prerequisites: BME:2200. Same as BME:5251.
- IGPI:5270 Pathogenesis of Major Human Diseases** 3 s.h.  
Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Offered spring semesters of even years. Same as MMED:5270, PATH:5270.
- IGPI:5310 Research Data Management** 3 s.h.  
Introduction to data management techniques and problems encountered in gathering and processing data from biomedical investigations; introduction to SAS, techniques taught in SAS; designed for non-biostatistics majors. Offered fall and spring semesters. Recommendations: prior programming experience with C, C++, Python, Java, or other. Same as BIOS:5310, STAT:5810.
- IGPI:5311 Informatics for Sustainable Systems** 3 s.h.  
Introduction to fundamental and advanced environmental informatics concepts and procedures including automated data collection, data management, data transformations, and processing to support modeling and analysis; scientific visualization of environmental data to support management of food, energy, and water (FEW) resources; sustainability in FEW systems. Same as CEE:5310.
- IGPI:5321 Bioinformatics Techniques** 3 s.h.  
Informatics tools and techniques applied to modern problems in biomedicine and basic life sciences; common tools, experience applying tools in contemporary problem settings; genomics and genetics, how to sequence a genome, transcription and expression, SNPs, Perl, BioPerl, Perl modules, Ensembl API, BLAST/BLAT, NCBI, UCSC, Ensembl Genome browsers, linkage, association, disease gene identification. Prerequisites: BIOL:1411 and (ENGR:2730 or CS:2110 or CS:5110). Same as BME:5320, ECE:5210.
- IGPI:5330 Computational Genomics** 3 s.h.  
Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: (BIOS:4120 or STAT:3510) and (CS:5110 or ENGR:1300). Recommendations: completion of BME:5320. Same as BIOL:5320, BME:5330, ECE:5220, GENE:5173.
- IGPI:5331 Graph Algorithms and Combinatorial Optimization** 3 s.h.  
Combinatorial optimization problems; time complexity; graph theory and algorithms; combinatorial optimization algorithms; complexity theory and NP-completeness; approximation algorithms; greedy algorithms and matroids. Prerequisites: ECE:3330. Same as ECE:5330.
- IGPI:5400 Computing in Statistics** 3 s.h.  
R; database management; graphical techniques; importing graphics into word-processing documents (e.g., LaTeX); creating reports in LaTeX; SAS; simulation methods (Monte Carlo studies, bootstrap, etc.). Prerequisites: CS:1210 and STAT:3200 and (STAT:3120 or STAT:3101 or STAT:4101). Corequisites: STAT:5100 and STAT:5200 if not already completed. Same as STAT:5400.
- IGPI:5415 Satellite Image Processing and Remote Sensing of Atmosphere** 3 s.h.  
Introduction to principles of atmospheric radiation and techniques for satellite image processing; hands-on experience with data calibration, image registration and enhancement, noise filtering and (supervised and unsupervised) multi-spectral classification of satellite imageries; various satellite sensors used for monitoring of different atmospheric processes and constituents. Same as CBE:5415.
- IGPI:5417 Physical Meteorology and Atmospheric Radiative Transfer** 3 s.h.  
Physical processes for weather and climate including radiative transfer, cloud and precipitation formation, and atmospheric electricity; theory of scattering by atmospheric particles (e.g., clouds, aerosols, molecules), atmospheric radiative transfer equations, and numerical techniques and tools to solve these equations. Requirements: senior or graduate standing. Same as CBE:5417.

- IGPI:5436 Electronic Structure and Informatics in Chemistry** 3 s.h.  
Basic principles of molecular electronic structure theory; molecular structure and reactivity; molecular orbital theory; density functional theory; introduction to informatics and data science; how calculations can be used to enhance experimental research projects. Recommendations: CHEM:4432. Same as CHEM:5436.
- IGPI:5450 Machine Learning** 3 s.h.  
Fundamentals of machine learning theory including regression, classification, neural networks, clustering, and principal component analysis; engineering applications. Prerequisites: ECE:2400 or BME:2200. Same as ECE:5450.
- IGPI:5460 Digital Signal Processing** 3 s.h.  
Theory, techniques used in representing discrete-time signals; system concepts in frequency and sampling domains; FIR and IIR digital filter theory, design and realization techniques; theory, application of discrete Fourier transforms/FFT. Prerequisites: ECE:3400. Same as ECE:5460.
- IGPI:5480 Digital Image Processing** 3 s.h.  
Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image pre-processing, edge detection, filtering; image segmentation. Prerequisites: ECE:2400 or BME:2200. Same as ECE:5480.
- IGPI:5510 Biostatistical Computing** 2 s.h.  
Introduction to computer programming using SAS and R statistical software packages; programming language syntax, constructs, procedures, and techniques for data management, data analysis, and statistical programming commonly encountered in biostatistics; designed for first-year biostatistics majors. Offered fall semesters. Corequisites: BIOS:5710. Same as BIOS:5510.
- IGPI:5540 Geographic Visualization** 3 s.h.  
Concepts and techniques that underlie cartographic representation, interaction, and geovisualization; map symbolization and visual variables; user-centered design, map use and usability engineering; web mapping, spatiotemporal visualization, multivariate mapping, interactive cartography, animation, geovisual analytics, 3D visualization, virtual and augmented reality. Same as GEOG:5540.
- IGPI:5641 Computer-Based Control Systems** 3 s.h.  
Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisites: ECE:5600. Same as ECE:5640.
- IGPI:5710 Biostatistical Methods I** 4 s.h.  
Probability distributions, moments, estimation, parametric and nonparametric inference for one-sample and two-sample problems, analysis of frequency data; emphasis on use of computers; designed for first-year biostatistics majors. Offered fall semesters. Requirements: two semesters of calculus. Same as BIOS:5710.
- IGPI:5720 Biostatistical Methods II** 4 s.h.  
Continuation of BIOS:5710; multi-factor ANOVA (analysis of variance), multiple comparisons, orthogonal contrasts, linear regression and correlation, regression diagnostics and remedial measures, model selection, and mixed models; designed for first-year biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5710. Requirements: one semester of linear algebra. Same as BIOS:5720.
- IGPI:5730 Biostatistical Methods in Categorical Data** 3 s.h.  
Estimation of proportions, rates, risks, relative risks, and odds ratios; Mantel-Haenszel method; logistic regression (including ordinal logistic regression and multi-category nominal logistic regression); Poisson regression and negative binomial regression; methods for correlated or clustered data (conditional logistic regression, generalized estimating equations, and mixed effects models); special topics include an introduction to generalized linear models and likelihood-based inferential techniques in this framework; designed for first-year biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5510 and BIOS:5710. Corequisites: BIOS:5720. Same as BIOS:5730.
- IGPI:6100 Database Management** 3 s.h.  
Principles and practices of database design and management; discussion and practice of database application lifecycle, data modeling, relational database design, SQL queries, reports, and other interfaces to database data and documentation; individual and group projects. Prerequisites: SLIS:5020. Same as SLIS:6100.
- IGPI:6120 Natural Language Processing** 3 s.h.  
Tools and techniques for computational processing of text including lexical analysis, part-of-speech tagging, named entity recognition, relationship extraction, topic detection and tracking, sentiment analysis, and question answering; example corpora and applications drawn from multiple disciplines including biomedicine, digital humanities, and social science. Prerequisites: SLIS:5020. Same as SLIS:6120.
- IGPI:6140 Digital Environments** 3 s.h.  
Methods and models for building digital libraries; organization with metadata; standards such as those for object identifiers, open access, building cross-linkages between collections; automatic harvesting of content. Prerequisites: SLIS:5020. Same as SLIS:6140.
- IGPI:6155 Information Visualization** 3 s.h.  
Introduction to theories, techniques, and examples of information visualizations for different presentations of data. Prerequisites: SLIS:5020. Same as SLIS:6155.
- IGPI:6210 Applied Survival Analysis** 3 s.h.  
Nonparametric, parametric, and semi-parametric methods for time-to-event data; types of censoring; Kaplan-Meier estimation; Cox proportional hazards models, including methods for assessing adequacy of the proportional hazards assumption; time varying covariates; sample size calculations for comparison of two or more groups; focus on analysis of real data sets and examples using statistical software. Offered spring semesters. Prerequisites: BIOS:5120 or BIOS:5720. Same as BIOS:6210.
- IGPI:6216 Finite Element II** 3 s.h.  
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as CEE:6532, ME:6215.
- IGPI:6310 Introductory Longitudinal Data Analysis** 3 s.h.  
Introduction to statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; focus on applications and computer software methods for ANOVA based methods, hierarchical linear models, linear mixed models, correlated regression models, generalized estimating equations, and generalized linear mixed models. Offered fall semesters. Prerequisites: BIOS:5120 or STAT:3200. Same as BIOS:6310, STAT:6550.

- IGPI:6380 Analysis of Scholarly Domains** 3 s.h.  
Information transfer in academic disciplines; scientific method, other means of knowledge construction, and resulting literatures; reference tools used to control literature for a variety of audiences; emphasis on humanities, social sciences, or sciences. Same as SLIS:6380.
- IGPI:6420 Advanced Database Management and Big Data** 3 s.h.  
Advanced database management topics; basics of semi-structured data and web services; how to retrieve real-world big data sets from web services; use of SQL and PL/SQL to analyze data in relational databases; big data related topics (e.g., Hadoop, Hive). Same as BAIS:6420.
- IGPI:6480 Knowledge Discovery** 3 s.h.  
Knowledge discovery process including data reduction, cleansing, and transformation; advanced modeling techniques from classification, prediction, clustering, and association; evaluation and integration. Same as BAIS:6480.
- IGPI:6490 Information Policy and Ethics** 3 s.h.  
Ethical and legal issues as they relate to information policy development and interpretation; application of information policies to address problems in information organizations. Same as SLIS:6490.
- IGPI:6501 Seminar in Spatial Analysis and Modeling** 1-3 s.h.  
Research themes in spatial analysis, GIScience, simulation, remote sensing. Same as GEOG:6500.
- IGPI:6510 Readings in Informatics** arr.  
Topics not covered in other courses; individual study.
- IGPI:6515 Independent Study** arr.
- IGPI:6520 Research for Dissertation** arr.  
Requirements: Ph.D. candidacy.
- IGPI:6530 Environmental and Spatial Statistics** 3 s.h.  
Geostatistics kriging, variogram estimation, trend estimation, sampling design, extensions to river networks and the globe, lattice data analysis, analysis of spatial point patterns. Prerequisites: STAT:4101 and STAT:3200. Same as STAT:6530.
- IGPI:6600 Linear Programming** 3 s.h.  
Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Requirements: calculus and linear algebra. Same as BAIS:6600, ISE:6600.
- IGPI:6610 Statistical Methods in Clinical Trials** 3 s.h.  
Survey of statistical methods commonly used in clinical trials; primary focus on methodologic perspective for the design, conduct, analysis, and interpretation of all phases of clinical trials; logistical and operational aspects of conducting multisite clinical trials; designed for biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5720. Requirements: familiarity with SAS and R programming. Same as BIOS:6610.
- IGPI:6650 Causal Inference** 3 s.h.  
Concepts of causal inference, counterfactuals, confounding, causal graphs, internal/external validity, and heterogeneity of treatment effect; methods include propensity score matching (i.e., optimal pair, multiple control and full matching; near-exact, fine-balance, risk set matching) and stratification; covariate balance checks; sensitivity analysis; inverse probability of treatment weighted estimation; doubly robust estimators; mediation analysis; marginal structural models. Prerequisites: BIOS:5720 and BIOS:5730 and ((STAT:4101 and STAT:4101) or (STAT:5100 and STAT:5101)). Same as BIOS:6650.
- IGPI:6700 Discrete Optimization** 3 s.h.  
Introduction to modeling and solving discrete optimization problems; integer programming, network flows, dynamic programming. Prerequisites: BAIS:6600. Same as BAIS:6700.
- IGPI:7000 Business Analytics Topics** 3 s.h.  
Same as BAIS:7000.
- IGPI:7210 Survival Data Analysis** 3 s.h.  
Types of censoring and truncation; survival function estimation; parametric inference using exponential, Weibull, and accelerated failure time models; nonparametric tests; sample size calculation; Cox regression with stratification and time-dependent covariates; regression diagnostics; competing risks; topics may include analysis of correlated survival data and/or recurrent events; designed for biostatistics and statistics majors. Offered fall semesters of odd years. Prerequisites: BIOS:5720 and ((STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101)). Same as BIOS:7210, STAT:7570.
- IGPI:7310 Longitudinal Data Analysis** 3 s.h.  
Statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; includes ANOVA based methods, hierarchical linear models, linear mixed models, error structures, generalized estimating equations, and generalized linear mixed models; may include Bayesian approaches; designed for biostatistics and statistics majors. Offered spring semesters of odd years. Prerequisites: (BIOS:5720 and STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101). Same as BIOS:7310.
- IGPI:7400 Computer Intensive Statistics** 3 s.h.  
Computer arithmetic, random variate generation, numerical optimization, numerical linear algebra, smoothing techniques, bootstrap methods, cross-validation, MCMC, EM and related algorithms; other topics per student/instructor interests. Prerequisites: (BIOS:5710 or STAT:5200) and STAT:3101. Requirements: proficiency in Fortran or C or C++ or Java. Same as STAT:7400.
- IGPI:7470 Image Analysis and Understanding** 3 s.h.  
Mathematical foundations and practical techniques of digital image analysis and understanding; image segmentation (from edges and regions), object description (from boundaries, regions, scale, scale insensitive descriptions, 3D shape, texture) pattern recognition (statistical and syntactic methods, cluster analysis), image understanding (knowledge representation, control strategies, matching, context, semantics), image analysis and understanding systems; lab arranged. Prerequisites: ECE:5480. Same as ECE:7470.

**IGPI:7480 Advanced Digital Image Processing 3 s.h.**

Advanced local operators (scale-space imaging, advanced edge detection, line and corner detection), image morphology (binary/gray scale operators, morphological segmentation and watershed), digital topology and geometry (binary/fuzzy digital topology, distance functions, skeletonization), color spaces, wavelets and multi-resolution processing (Haar transform, multi-resolution expansions, wavelet transforms in one or two dimensions, fast wavelet transform, wavelet packets), image registration (intensity correlation, mutual information, and landmark-based deformable registration methods). Prerequisites: ECE:5460 and ECE:5480. Same as ECE:7480.

**IGPI:7600 Advanced Biostatistics Seminar 0-3 s.h.**

Current topics; supervised experience in reading and interpreting biostatistical literature. Same as BIOS:7600.

# Informatics, M.S.

## Requirements

The Master of Science program in informatics requires a total of 31 s.h. of graduate credit, including 19 s.h. of core courses and 12 s.h. of coursework in a chosen subprogram/area: geoinformatics, health informatics, or human-computer interaction. Students must maintain a program g.p.a. of at least 3.00.

The non-research, course-based program is for students who wish to enhance their careers with advanced knowledge of informatics. Students must also complete the requirements for the degree as described in the Manual of Rules and Regulations, Section X, on the Graduate College website.

The M.S. with a major in informatics requires the following coursework.

## Core Courses

All students complete the following core courses.

### Programming

Code	Title	Hours
This course:		
CS:5110/IGPI:5110	Introduction to Informatics	3
One of these:		
CS:3210	Programming Languages and Tools	3
CS:3980	Topics in Computer Science I	3
GEOG:5055/ IGPI:5055	Geospatial Programming (required for geoinformatics cognate)	3

### Statistics

Code	Title	Hours
One of these:		
BIOS:4120	Introduction to Biostatistics (required for health informatics cognate)	3
STAT:4143/ PSQF:4143	Introduction to Statistical Methods	3

### Data Science

Code	Title	Hours
One of these:		
BAIS:4480/ ECE:4480	Knowledge Discovery	3
STAT:4540/ IGPI:4540	Statistical Learning	3
An approved course (consult advisor)		

### Databases

Code	Title	Hours
One of these:		
CS:4400	Database Systems	3
GEOG:4580/ IGPI:4581	Introduction to Geographic Databases (required for geoinformatics cognate)	3

### Human Factors

Code	Title	Hours
One of these:		
CS:4500	Research Methods in Human-Computer Interaction	3
CS:4510	Human-Computer Interaction for Computer Science	3
GEOG:5540/ IGPI:5540	Geographic Visualization (required for geoinformatics cognate)	3

### Ethics

Code	Title	Hours
This course:		
CS:5980	Topics in Computer Science III	1

### Subprograms/Area

Students choose one of two subprograms or the human-computer interaction area and complete the requirements.

#### Geoinformatics Subprogram

Code	Title	Hours
Four of these:		
GEOG:3010/ IGPI:3010	Geographic Information Systems and Science	3
GEOG:3500/ IGPI:3500	Introduction to Environmental Remote Sensing	3
GEOG:3520/ IGPI:3520	GIS for Environmental Studies	3
GEOG:3570	Light Detection and Ranging (LiDAR): Principles and Applications	3
GEOG:4150/ GHS:4150/ IGPI:4150	Health and Environment: GIS Applications	3

#### Health Informatics Subprogram

Code	Title	Hours
Four of these:		
BIOC:3310/ CBIO:3310/ MMED:3310	Practical Data Science and Bioinformatics (recommended for students with a biology background)	3
BIOS:5120/ IGPI:5120/ STAT:5610	Regression Modeling and ANOVA in the Health Sciences	3
BME:5320/ ECE:5210/IGPI:5321	Bioinformatics Techniques (recommended for students with a biology background)	3
CS:4470	Health Data Analytics	3
EPID:4400	Epidemiology I: Principles	3
IGPI:5220/ EPID:5200	Principles of Public Health Informatics	3

## Human-Computer Interaction Area

Code	Title	Hours
Three of these:		
PSQF:6243/ STAT:6513	Intermediate Statistical Methods	3
PSY:3060	Sensation and Perception	3
An approved elective (consult director)		
One of these:		
CS:4500	Research Methods in Human-Computer Interaction (if not taken to satisfy Human Factors requirement)	3
CS:4510	Human-Computer Interaction for Computer Science (if not taken to satisfy Human Factors requirement and if have not taken CS:2520)	3
ISE:6211	Human Factors in Healthcare Systems	3
ISE:6220	Cognitive Engineering	3

For more information about the Master of Science requirements, see the Interdisciplinary Graduate Program in Informatics website.

### Combined Programs

## M.S. (Health Informatics Subprogram)/Pharm.D.

The purpose of the combined program is to provide an opportunity for professional students in the College of Pharmacy to receive formal training in health informatics in addition to training in pharmacotherapy and health care. Students completing the degree program receive an M.S. in informatics with the health informatics subprogram (without thesis) from the Graduate College and a Pharm.D. from the College of Pharmacy. Students develop special expertise in information technology, including management of electronic health records, health information exchange standards, electronic prescribing, medication management, decision support, and other competencies.

The combined program requires a total of 34 s.h. beyond the bachelor's degree. Courses that can be used to count toward both programs include 19 s.h. of core courses, 6 s.h. of courses from the health informatics cognate, and 9 s.h. from the Pharm.D. curriculum selected from the following.

Code	Title	Hours
PHAR:8250	Applications of Pharmacy Practice I	1
PHAR:8255	Discovery II: Design and Methods	arr.
PHAR:8265	Applications of Pharmacy Practice II	1
PHAR:8374	Applications of Pharmacy Practice III	1
PHAR:8375	Advanced Topics in Health Services	2
PHAR:8378	Pharmacy Law and Ethics	2

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. It is recommended that students apply to the Graduate College for admission to the M.S. program before entering the spring semester of their first year in the pharmacy program. For more information, see Doctor of Pharmacy, Pharm.D. [p. 1925] in the College of Pharmacy section of the Catalog.

### Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They also must meet the admission requirements of the informatics subprogram they want to enter; see Ph.D. and M.S. Admission on the program's website.

# Informatics, Ph.D.

## Requirements

The Doctor of Philosophy program in informatics requires at least 72 s.h. of graduate credit. A total of 19 s.h. of core courses are required plus an additional 12 s.h. of courses approved by a student's committee. The remaining 41 s.h. may be completed with additional coursework or through reading or research hours. Students must maintain a program g.p.a. of at least 3.00.

It requires completion of coursework, satisfactory performance on the qualifying exam, comprehensive exam, and the proposal, plus the production and formal defense of a dissertation describing original research results.

Students select an advisor from among the program faculty. On the rare occasion when students choose a Ph.D. advisor who is outside the program, a co-advisor from the program faculty must be designated.

The Ph.D. with a major in informatics requires the following coursework.

## Core Courses

Students complete a total of 19 s.h. in core coursework. The student's advisor and the rest of the student's committee consisting of at least two other faculty select remaining courses (12 s.h. minimum) for a total of at least 31 s.h. of coursework.

## Programming

Code	Title	Hours
This course:		
CS:5110/IGPI:5110	Introduction to Informatics	3
One of these:		
CS:3210	Programming Languages and Tools	3
CS:3980	Topics in Computer Science I	3
GEOG:5055/ IGPI:5055	Geospatial Programming	3

## Statistics

Code	Title	Hours
One of these:		
BIOS:4120	Introduction to Biostatistics	3
STAT:4143/ PSQF:4143	Introduction to Statistical Methods	3

## Data Science

Code	Title	Hours
One of these:		
BAIS:4480/ ECE:4480	Knowledge Discovery	3
STAT:4540/ IGPI:4540	Statistical Learning	3

An additional course (consult advisor)

## Databases

Code	Title	Hours
One of these:		
CS:4400	Database Systems	3
GEOG:4580/ IGPI:4581	Introduction to Geographic Databases	3

## Human Factors

Code	Title	Hours
One of these:		
CS:4500	Research Methods in Human-Computer Interaction	3
CS:4510	Human-Computer Interaction for Computer Science	3
GEOG:5540/ IGPI:5540	Geographic Visualization	3

## Ethics

Code	Title	Hours
This course:		
CS:5980	Topics in Computer Science III	1

## Elective Core Coursework

Code	Title	Hours
Coursework selected in consultation with advisor and committee		12

## Electives

The remaining 41 s.h. may be completed with additional coursework or through reading or research hours.

## Comprehensive Examination

Ph.D. students must pass a comprehensive examination at or near completion of their coursework requirements. Students prepare a 20-30 page survey/discussion (along the lines of the introduction and literature review from an eventual thesis) for distribution to their faculty committee, followed at least two weeks later by a 20-40 minute oral presentation, and a question/answer session.

Students may request that the M.S. degree be granted at the time of the comprehensive exam. The M.S. degree without thesis is awarded upon successful completion of the comprehensive exam but may, at the examination committee's discretion, be awarded even if students do not pass the exam. Students also may choose to complete the thesis requirements and be awarded an M.S. with thesis degree.

## Dissertation

Students complete dissertation coursework in consultation with their advisor.

Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded the Doctor of Philosophy degree.

For more information about the Doctor of Philosophy requirements, see the Interdisciplinary Graduate Program in Informatics website.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in informatics in a combined degree program offered by the Carver College of Medicine and the Graduate College. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

### Admission

Students applying to the Ph.D. program do not need a master's degree prior to admission. Students who hold a master's degree upon entering the Ph.D. program may apply to use transfer credit from their master's degree courses toward their Ph.D. program requirements.

Students applying to the Ph.D. program who are not selected for admission are automatically considered for admission to the M.S. program if they do not already hold a master's degree.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They also must meet the admission requirements of the informatics program; see Ph.D. and M.S. Admission on the program's website.

### Career Advancement

The program emphasizes preparation for research, teaching, and scholarly endeavor in academic settings or private, industrial, or governmental laboratories.

# Informatics, Graduate Certificate

## Requirements

The graduate Certificate in Informatics requires 19 s.h. of graduate credit. Students must earn a g.p.a. of at least 3.00 in certificate coursework. The certificate program is designed for students enrolled in University of Iowa graduate degree programs who wish to study informatics as a complement to their degree program and for nondegree students who are interested in increasing their knowledge of informatics.

The Certificate in Informatics requires the following coursework.

## Required Courses

### Programming

Code	Title	Hours
This course:		
CS:5110/IGPI:5110	Introduction to Informatics	3
One of these:		
CS:3210	Programming Languages and Tools	3
CS:3980	Topics in Computer Science I	3
GEOG:5055/ IGPI:5055	Geospatial Programming	3

### Statistics

Code	Title	Hours
One of these:		
BIOS:4120	Introduction to Biostatistics	3
STAT:4143/ PSQF:4143	Introduction to Statistical Methods	3

### Data Science

Code	Title	Hours
One of these:		
BAIS:4480/ ECE:4480	Knowledge Discovery	3
STAT:4540/ IGPI:4540	Statistical Learning	3
An approved course (consult advisor)		3

### Databases

Code	Title	Hours
One of these:		
CS:4400	Database Systems	3
GEOG:4580/ IGPI:4581	Introduction to Geographic Databases	3

### Human Factors

Code	Title	Hours
One of these:		
CS:4500	Research Methods in Human-Computer Interaction	3

CS:4510	Human-Computer Interaction for Computer Science	3
GEOG:5540/ IGPI:5540	Geographic Visualization	3

## Ethics

Code	Title	Hours
This course:		
CS:5980	Topics in Computer Science III	1

For more information about certificate requirements, see the Interdisciplinary Graduate Program in Informatics website.

## Admission

Certificate program applicants may be degree or nondegree graduate students. Applicants who are enrolled in a University of Iowa graduate degree program must be in good academic standing in their program.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

# International Writing Program

## Director

- Christopher Merrill

**Faculty:** <https://iwp.uiowa.edu/about-iwp/iwp-staff>

**Website:** <https://iwp.uiowa.edu>

The International Writing Program (IWP) conducts a unique fall residency program for established writers from outside the United States, and a summer writing program for American and international high school students. During spring semester, IWP may offer courses related to the program's general mission, including collaborative distance learning courses for writing students overseas.

## Residency Program

Each fall the International Writing Program assembles a community of poets, fiction writers, essayists, playwrights, and journalists for a 10-week residency on campus. Participants range from emerging talents to writers who are among their countries' leading literary figures and writers of world stature. For most, their time in the program is their first, or their first extended, stay in the United States.

At the University of Iowa, they live and interact with each other while working on writing and translation projects and participating in public events. Throughout their residency, they present their work in IWP:3191 International Literature Today and IWP:5205 International Translation Workshop, and participate as guests in many other courses on campus. They also meet with the public through readings, panel discussions, a film series, and other presentations.

Since 1967 over 1,500 writers from over 150 countries have participated in the program.

International Writing Program participants are supported by the U.S. Department of State, through bilateral agreements with many countries, by grants from cultural institutions and governments abroad, and by private funds. The program does not provide grants for writers.

For more information, contact the International Writing Program, or visit its website.

## Summer Programs Between the Lines

Between the Lines is a creative writing and cultural exchange summer program for American and international high school students. Students explore creative writing and world literature in a multilingual, multicultural environment, attend writing workshops, and participate in a literature seminar and a series of master classes.

Between the Lines offers two sessions for participants who are 15-18 years old:

- Between the Lines: Peace and the Writing Experience brings together young writers from the U.S. and select countries along the historic Silk Road land route for a two-week creative writing residency. The program is supported by the Bureau of Education and Cultural Affairs at the U.S. Department of State.
- Between the Lines: Identity and Belonging is sponsored through grant funds provided by the Doris Duke

Foundation for the Islamic Art (DDFIA) Building Bridges Program. The two-week session, free for all participants, brings together Americans who are Muslims and Americans who are non-Muslims. Those who are first- or second-generation immigrants, from refugee communities, low-income households, or marginalized positions are particularly encouraged to apply.

International students are nominated for Peace and the Writing Experience by embassies in their home countries. American students may apply directly to IWP for both sessions; candidates must complete an online application, submit samples of their creative work, a statement of purpose, and respond to two writing prompts. Contact *Between the Lines* for more information.

## Summer Institute

The Summer Institute is a summer program that brings together U.S., Indian, and Pakistani college-age students (18-22 years old) for two weeks in July to focus on creative writing and the power of narrative. Summer Institute attendees take part in master classes in the craft of writing and the history and culture of South Asia, in collaborative workshops, and in activities designed to forge a community of writers. The program, funded by a grant from the U.S. Embassy in Islamabad, Pakistan, is free for selected participants.

Students from the three countries apply online. Contact the Summer Institute for more information.

## Courses

### International Writing Program Courses

#### **IWP:1009 Undergraduate Internship** **arr.**

Professional experience for students interested in arts management and international literature. Requirements: undergraduate standing, minimum of 36 s.h. of coursework, and consultation with IWP director.

#### **IWP:1102 On Campus Independent Study** **arr.**

Independent study arranged in collaboration with instructor.

#### **IWP:3191 International Literature Today** **1,3 s.h.**

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature. Same as ENGL:3595, WLLC:3191.

#### **IWP:3201 Writing and Publishing for the Literary Web** **arr.**

Technical aspects of web publishing, including step-by-step instruction on using content management systems (Drupal and Wordpress); specific stylistic and editorial protocols associated with contributing to literary websites; utilize and navigate a content management system; create a contributor portfolio of online work, including media items, reviews, interviews, and blog posts.

#### **IWP:3210 Comparative Arts** **3 s.h.**

Cultural and aesthetic issues arising from side-by-side investigation of several art forms, including literature, cinema, painting, music, opera, architecture; periods, schools, styles, and their theories. Taught in English. Same as ASIA:3210, FREN:3210, SPAN:3211, WLLC:3210.

**IWP:5205 International Translation Workshop 1,3 s.h.**

International writers pair with University of Iowa translators to write new works of poetry and fiction in English; second-language fluency not required for international writers.

**IWP:5230 Writing Across Genres: A Workshop arr.**

Writing across genres; exploration of modes and voices different from chosen genres (i.e., poets may test the waters of playwriting, nonfiction writers of translation, translators of fiction); rotations by guest faculty; workshop includes students from Writing University M.F.A. programs and International Writing Program residents.

**IWP:6635 Crossing Borders Seminar 2-3 s.h.**

Taught in English. Same as AFAM:6635, ANTH:6635, COMM:6635, ENGL:6635, FREN:6142, GEOG:6635, GRMN:6635, HIST:6135, POLI:6635, SPAN:6904.

**IWP:7460 Translation Workshop 3 s.h.**

Requirements: at least one foreign language. Same as TRNS:7460.

# Library and Information Science

## Director

- Lindsay K. Mattock

**Graduate degree:** M.A. in library and information science

**Graduate certificate:** special collections librarianship

**Faculty:** <https://slis.uiowa.edu/faculty-and-staff>

**Website:** <https://slis.uiowa.edu/>

Today's age is defined by the intersection of information, technology, and human creativity. In this context, library and information science is dedicated to understanding the nature of information, the interaction between information and communication technologies, the relationship between information and knowledge, the cognitive and affective aspects of knowledge acquisition, and the interface between people and information. It offers new knowledge, technological benefits, and professional expertise for every dimension of human affairs.

Library and information professionals take on many challenges in serving the needs of their constituencies—children and teachers, members of academic communities, employees of profit and nonprofit organizations, and the public at large—constituencies that range from information poor to information rich. They work in the contexts of issues such as information and communication technology, public and private information policy, managerial policy, and regional, national, and international economics.

The School of Library and Information Science prepares professionals to meet these diverse challenges. It offers a graduate-level program of preparation for careers in all types of libraries and information centers, providing students with a strong, well-rounded education in an environment that supports individuals from all segments of a multicultural, multiethnic, and multilingual society. Its curriculum reflects the profession's immediate and long-range needs and prepares students to be leaders in a changing field.

By promoting excellence in research, the school contributes to the base of theoretical and practical knowledge in library and information science and helps develop an understanding of how to meet the varied and changing information needs of individuals and society. It also provides public service through continuing education programs, selective consulting services for library and information centers, and participation in professional organizations. The school strongly encourages its students, faculty members, and alumni to shape the future of the profession by filling key roles in organizations involved in all aspects of the information cycle.

Undergraduate students who want to pursue a degree in library and information science may choose to participate in the combined degree program which allows them to complete their baccalaureate and graduate degrees in five years. See Combined Programs [p. 1656] in the M.A. in library and information science section of the Catalog.

Graduate students working toward the M.A. degree in library and information science may elect to pursue a combined Juris Doctor (J.D.) degree program in collaboration with the College of Law or an M.F.A. in book arts offered by the Center for the Book. See Combined Programs [p. 1656] in the M.A. in library and information science section of the Catalog.

Students interested in school librarianship may earn teaching licensure through the College of Education; see "School Teacher Librarian" under Requirements [p. 1654] in the M.A. in library and information science section of the Catalog.

Library and information science M.A. students may earn the Certificate in Book Studies/Book Arts and Technologies [p. 1619] or the Certificate in Special Collections Librarianship [p. 1659]. In addition, they may earn the Certificate in Informatics [p. 1646] and choose a subprogram in bioinformatics and computational biology, geoinformatics, health informatics, or information science. In addition, other graduate students may earn the Certificate in Special Collections Librarianship.

## Related Certificate

### Public Digital Humanities

The Certificate in Public Digital Humanities is especially for students with humanities backgrounds who want to gain expertise and credentials to work more intensively with technology. The program brings students together with varied academic backgrounds to learn how to communicate, sort out the roles required for fully functioning teams, and understand the unique contributions made by individuals across disciplines. Students learn to appreciate the diversity of humanities research methods while identifying core digital activities that underlie research projects. For more information, see the Certificate in Public Digital Humanities [p. 1682].

## Student Organizations and Activities

All M.A. students in the school are automatically members of LISSO, the Library and Information Science Student Organization, which also serves as the student chapter of the American Library Association. LISSO sponsors various activities, such as speaker series, workshops, brown bag lunches, and social events. Participation in LISSO events provides students with significant opportunities for professional and extracurricular growth. Students also are encouraged to join other state and national professional organizations.

B Sides is a student-run project from the School of Library and Information Science. The journal and podcast aim to provide an interactive and accessible space where library and information science students, faculty, alumni, and community professionals can dialog about all aspects of the profession, study, research, and practice of library and information science and related fields.

## Honor Society

The Beta Beta Theta Chapter of Beta Phi Mu, the international honor society for library and information science, is located at the University of Iowa. Each year new members are chosen from the top 25 percent of the preceding year's graduating class. To be eligible for membership, graduates must achieve a g.p.a. of at least 3.75, demonstrate professional promise, and be recommended by the faculty.

## Programs

### Graduate Programs of Study

#### Major

- Master of Arts in Library and Information Science [p. 1654]

#### Certificate

- Certificate in Special Collections Librarianship [p. 1659]

## Facilities

The School of Library and Information Science (SLIS) is housed in the south wing of the University's Main Library, in a setting that promotes community among students, faculty, and staff and provides easy access to resources of the University of Iowa Libraries. Facilities are provided for the varied instructional and research activities of the school.

The school includes classrooms dedicated for use by SLIS faculty and students. These rooms include a wired workstation technology classroom with Windows and Macintosh computers fully equipped for videoconferencing, and seminar classrooms with videoconferencing systems and large high-definition screens.

### Gunther Commons

Gunther Commons, a state-of-the-art collaboratory equipped with workstations, is the school's combined student center and technology lab. Individuals and teams of students gather in the collaboratory to work on course assignments and to gain experience with specialized software that supports the latest teaching technologies. Students have access to Windows and Macintosh computers, with gigabit access to the campus network and wireless service throughout the Main Library.

### University of Iowa Libraries

All of the resources of the University of Iowa Libraries are available to the school's students and faculty. The system contains more than four million volumes in the Main Library and six departmental libraries.

The web-based catalog provides access to books and periodicals, electronic indexes, and full-text databases held by University Libraries. In addition, InfoHawk+ provides online resource access to selected internet and CD-ROM resources arranged by subject and academic discipline. Wireless internet access is available in the Main Library.

The school benefits with proximity to the Learning Commons. It encompasses the majority of public space on the first floor of the Main Library. The Learning Commons is a technology-infused, comfortable and flexible learning space, and an academic and information help center.

The third floor of the Main Library houses the map collection, Special Collections, and University Archives, including the Iowa Women's Archives.

### Other Libraries

Students have access to a variety of libraries through field trips, practicum experience, and personal use: the State Historical Society of Iowa library in Iowa City; the Iowa City, Coralville, and Cedar Rapids public and school libraries; the Augustana, Coe, Cornell, Mount Mercy, and Grinnell College

libraries; and the Herbert Hoover Presidential Library and Museum in West Branch.

### Other Resources

The second floor of the University Capitol Centre (UCC) houses the instructional services and campus services departments of the University's Information Technology Services. It provides instructional and research computing facilities and services for the University community. All University students, staff, and faculty may use the center's computers for University-related research, thesis preparation, and class work. Instructional Technology Centers provide campuswide access to the University's academic computing resources and the internet.

## Courses

### Library and Information Science Courses

#### **SLIS:4150 Introduction to Book Studies 3 s.h.**

Theory and practice of book studies; meanings of word and image in the book format; comparative study of other media, applied study of the codex as physical artifact. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Varies by semester. Same as ENGL:4150, UICB:4150.

#### **SLIS:4910 The Book in the Middle Ages 3 s.h.**

Relation of text, decoration, function, creators, and audience in different genres of medieval manuscript books 400-1500 A.D. Same as HIST:4910, UICB:4910.

#### **SLIS:4920 The Transition from Manuscript to Print 3 s.h.**

History of the book and communication in Europe 1400-1800; production, distribution, and use of texts in cultural context. Same as HIST:4920, UICB:4920.

#### **SLIS:5010 Cultural Foundations 1-3 s.h.**

Role of libraries and information agencies in society; major issues including information policy, professional ethics, literacy, diversity, technology, and pedagogy. Requirements: admission to library and information science.

#### **SLIS:5020 Computing Foundations 3 s.h.**

Review of technology, technology history, and theories of technology in context of cultural heritage institutions and work in information centers. Requirements: admission to library and information science.

#### **SLIS:5030 Conceptual Foundations 3 s.h.**

Theory, principles, and standards in organization of information; function of catalogs, indexes, bibliographic networks; introduction to metadata descriptions, name and title access, subject analysis, controlled vocabularies, classification systems. Requirements: admission to library and information science.

#### **SLIS:5041 College and University Libraries 3 s.h.**

Objectives, organization, unique functions, and services of academic libraries; educational environment in which academic libraries function; examination of issues and problems affecting academic libraries. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite.

- SLIS:5042 Public Libraries** 3 s.h.  
Historical development of public libraries; current issues in public library management and policy making, including intellectual freedom; readers advisory service and genres of popular materials for adults. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite.
- SLIS:5043 Special Libraries** 3 s.h.  
Management, organizational structures, collections, and client services in special libraries; site visits to a variety of special libraries and information centers; projects that apply theoretical principles. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite. Same as IGPI:5043.
- SLIS:5044 School Library Media Administration** 3 s.h.  
Design of K-12 library programs including major functions of teaching and learning, information access, and leadership and program administration. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite.
- SLIS:5200 User Education: Multimedia** 3 s.h.  
Development of multimedia projects for educational use in libraries; students develop a portfolio of projects using multimedia technology; applications of multimedia for teaching and learning; exploration and evaluation of platforms for delivering multimedia in educational environments. Same as IGPI:5203.
- SLIS:5220 Resources for Children** 3 s.h.  
Evaluation and use of books, magazines, electronic media, and other sources of information and recreation in relation to youth development.
- SLIS:5230 Resources for Young Adults** 3 s.h.  
Topics related to populations served by youth services departments (e.g., societal issues, informational needs); seminar.
- SLIS:5240 Resources for Adults** 3 s.h.  
Role of public libraries in meeting adults' informational and recreational needs; popular culture materials, reader's advisory services, lifelong learning.
- SLIS:5520 Studies in Book History and Technologies** 0-3 s.h.  
Topics related to production, distribution, and consumption of books through history and into the future. Same as UICB:5520.
- SLIS:5530 Topics in Preservation** 3 s.h.  
Care, conservation, and preservation of cultural heritage artifacts; readings, discussion, hands-on sessions. Same as UICB:5530.
- SLIS:5535 Book Conservation** 3 s.h.  
Practical methods, materials assessment, conservation history and evolution. Prerequisites: UICB:4270. Same as UICB:5220.
- SLIS:5600 Reading Culture: History and Research in Print and Digital Media** 3 s.h.  
Cultural nature of reading practices in historic and contemporary contexts; print and digital culture; reading communities; examples of recent scholarship; use of primary resources; seminar. Same as UICB:5600.
- SLIS:5630 Introduction to Special Collections Librarianship** 3 s.h.  
Introduction to history of collecting in special collections and key areas of praxis (e.g., appraisal, arrangement and description, preservation, reference and access, outreach).
- SLIS:5700 Cultural Heritage** 3 s.h.  
Increased use of digital technologies in collection, organization, dissemination, and use of heritage resources that generate intellectual, social, technological, legal, and ethical challenges to—and opportunities for—the heritage practice; exploration of challenges and opportunities, as well as their impact on the heritage profession; students become familiar with key heritage-related concepts and topics, apply them to a concrete project, and write a report of their findings.
- SLIS:5900 Health Informatics** 3 s.h.  
Technological tools that support health care administration, management, and decision making. Same as HMP:5370, IGPI:5200, ISE:5860, MED:5300.
- SLIS:5950 Health Information and Communication** 3 s.h.  
Fundamentals of medical librarianship, including how to engage with consumers and practitioners in need of health information; overview of health information resources and seeking skills; how to interact with users in need of health information; basic skills requisite to medical librarianship; community engagement, understanding health literacy, interacting with diverse user populations, and ethical considerations central to health information.
- SLIS:6020 Literacy and Learning** 3 s.h.  
Learning and literacy theory relevant to work in information services; how librarians can help people process information and use it to form understanding and create new knowledge. Prerequisites: SLIS:5010.
- SLIS:6100 Database Management** 3 s.h.  
Principles and practices of database design and management; discussion and practice of database application lifecycle, data modeling, relational database design, SQL queries, reports, and other interfaces to database data and documentation; individual and group projects. Prerequisites: SLIS:5020. Same as IGPI:6100.
- SLIS:6110 Evidence-Based Practice in Library and Information Science** 3 s.h.  
Structured approach to improved libraries through decision making that supports collection, interpretation, and evaluation of data; assessment of the effectiveness of library programs and services.
- SLIS:6115 Information and Inquiry** 3 s.h.  
Expert skills in seeking and evaluating information that responds to patron needs, supplemented by trajectory of and contemporary practices for library reference work, including tools that support library users' inquiries and information seeking.
- SLIS:6120 Natural Language Processing** 3 s.h.  
Tools and techniques for computational processing of text including lexical analysis, part-of-speech tagging, named entity recognition, relationship extraction, topic detection and tracking, sentiment analysis, and question answering; example corpora and applications drawn from multiple disciplines including biomedicine, digital humanities, and social science. Prerequisites: SLIS:5020. Same as IGPI:6120.
- SLIS:6130 Community Engagement** 3 s.h.  
Ways in which information professionals in libraries and other settings learn about, collaborate with, and provide services and outreach to community members; introduction and overview of community engagement theory and practice; service learning or community-based research projects. Prerequisites: SLIS:5010.

- SLIS:6140 Digital Environments** 3 s.h.  
Methods and models for building digital libraries; organization with metadata; standards such as those for object identifiers, open access, building cross-linkages between collections; automatic harvesting of content. Prerequisites: SLIS:5020. Same as IGPI:6140.
- SLIS:6145 Digital Preservation and Stewardship** 3 s.h.  
Introduction to concepts and theories related to preservation and continued stewardship of born-digital and digitized materials; taught from an archival perspective; focus on current methods of collection, maintenance, and access for digital collections in libraries, archives, and museums.
- SLIS:6150 Information Behavior** 3 s.h.  
Understanding how information users approach their information needs; concepts for understanding information use; analysis of user communities.
- SLIS:6155 Information Visualization** 3 s.h.  
Introduction to theories, techniques, and examples of information visualizations for different presentations of data. Prerequisites: SLIS:5020. Same as IGPI:6155.
- SLIS:6170 Management, Teams, and Leadership** 3 s.h.  
Survey of management issues common to all information environments: understanding organizations, decision making, hiring and personnel, grant writing, and marketing.
- SLIS:6250 Beginning Cataloging and Classification** 3 s.h.  
Systems for describing materials and information in catalogs and organizing them for effective retrieval in libraries, museums, and other information centers; Anglo-American Cataloging Rules (AACR2) and Resource Description and Access (RDA) descriptive principles, Dewey Decimal Classification and Library of Congress Classification, Sears List of Subject Headings and Library of Congress Subject Headings, cataloging networks and services. Prerequisites: SLIS:5030. Corequisites: SLIS:5030, if not taken as a prerequisite.
- SLIS:6255 Beginning Rare Books Cataloging** 3 s.h.  
Concepts and application of descriptive cataloging of rare materials (books); rare books and how their special features shape cataloging; format includes lecture and discussion, in-class and hands-on (if available) cataloging of rare books, and possible visits to the UI Center for the Book, the John Martin Rare Book Room, and UI Libraries Special Collections; students gain confidence and critical skills to start cataloging rare, special, and unusual books encountered in the workplace.
- SLIS:6330 Collection Development** 3 s.h.  
Collecting as a core library activity; various types of media collected from traditional print media to new digital media; how collections are structured and managed to provide for selection, organization, and access. Prerequisites: SLIS:5010 and SLIS:5030.
- SLIS:6335 Metadata Theories and Applications** 3 s.h.  
Principles of describing materials in both traditional and digital contexts; standards for writing and implementing metadata. Prerequisites: SLIS:5020 and SLIS:5030. Corequisites: SLIS:5030, if not taken as a prerequisite. Requirements: admission to library and information science program.
- SLIS:6345 Stewardship of Information and Collections** 3 s.h.  
Principles for creating, building, and maintaining digital and print collections in libraries and other information organizations. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite. Requirements: admission to library and information science program.
- SLIS:6350 Archives: Theory and Practice** 3 s.h.  
Exploration of the history of archival thought and conceptualizations of "the archives"—how archives are formed, methods by which records are selected and described, and ways in which archival records are used to construct histories; students explore how value is assigned to records through archival appraisal, how archivists prepare collections for access, and how these materials are represented in archival finding aids and other discovery tools; practice-based assignments provide opportunities for students to engage with local archival collections. Prerequisites: SLIS:5010 and SLIS:5030.
- SLIS:6355 Public Services for Special Collections and Archives** 3 s.h.  
Focused examination of core services in special collections and archives including reference, instruction, and outreach; reading room services and policies; research strategies and tools for answering reference questions; best practices for in-person and virtual teaching with primary sources; community outreach, events, exhibitions, and social media. Prerequisites: SLIS:5630 or SLIS:6350. Corequisites: SLIS:5630 or SLIS:6350, if not taken as a prerequisite.
- SLIS:6370 Topics in Book Studies** 3 s.h.  
Topics relevant to book studies and special collections. Same as UICB:6370.
- SLIS:6380 Analysis of Scholarly Domains** 3 s.h.  
Information transfer in academic disciplines; scientific method, other means of knowledge construction, and resulting literatures; reference tools used to control literature for a variety of audiences; emphasis on humanities, social sciences, or sciences. Same as IGPI:6380.
- SLIS:6411 Topics in Library and Information Science** 1-3 s.h.  
Current topics in the field of library and information science.
- SLIS:6490 Information Policy and Ethics** 3 s.h.  
Ethical and legal issues as they relate to information policy development and interpretation; application of information policies to address problems in information organizations. Same as IGPI:6490.
- SLIS:6520 Practicum in Libraries and Information Centers** 3 s.h.  
Supervised field experience in selected libraries and information centers; emphasis on application of theory to practice; at least 120 hours of fieldwork. Requirements: 15 s.h. of SLIS coursework.
- SLIS:6521 Distance and Online Education: Practicum in Library and Information Centers** 3 s.h.  
Supervised field experience in selected libraries and information centers; emphasis on application of theory to practice; at least 120 hours of fieldwork. Prerequisites: SLIS:5010 and SLIS:5020 and SLIS:5030 and (SLIS:6110 or SLIS:6170) and SLIS:6115. Requirements: minimum of 15 s.h. of SLIS coursework.
- SLIS:6530 School Library Media Practicum** 3 s.h.  
Supervised field experience in library media centers at elementary and secondary school levels; emphasis on application of theory to practice; at least 40 hours of fieldwork; seminar meetings. Prerequisites: SLIS:5044.
- SLIS:6570 Independent Study** 1-3 s.h.  
Formal contract between student and faculty member. Requirements: formal proposal.

**SLIS:6571 Distance and Online Education: Independent Study 1-3 s.h.**

Formal contract between student and faculty member; opportunity to pursue in-depth research in a particular area of interest that does not duplicate an existing course in the curriculum; students meet with faculty member to design a plan of study and submit a bibliography and description of the final project. Requirements: formal proposal.

**SLIS:6580 Thesis 0-6 s.h.**

Prerequisites: SLIS:5010 and SLIS:5020 and SLIS:5030 and SLIS:6110 and SLIS:6170.

**SLIS:6590 Digital Humanities Capstone arr.**

Application and practice of classroom experience to a specific project under guidance from a faculty member and project team leader. Prerequisites: CLAS:7290 or SLIS:7290. Requirements: admission to public digital humanities certificate program, an approved certificate plan of study on file, completion of 12 s.h. of approved coursework, and good standing in all required certificate coursework. Same as GRAD:6590.

**SLIS:7290 Digital Humanities Theory and Practice 3 s.h.**

Overview of theories and use of technology to preserve, deploy, visualize, map, and analyze concepts; discussions with practicing digital public scholars; assignments consist of a digital portfolio tailored to student research; introductory course in public digital humanities certificate. Same as CLAS:7290.

# Library and Information Science, M.A.

Students who pursue the master's degree in library and information science gain an understanding of the foundations of the library and information profession, including the history of the field, ethical and philosophical concerns, the information cycle, principles and procedures for dealing with a variety of information carriers, and the theory and practice of strategic management. They examine future trends, with emphasis on cutting-edge technological concerns. Students study the discipline's research base, gaining heightened awareness of the synergism between library and information science and other disciplines, as well as the close relationship between research and practice. Finally, students become knowledgeable about the factors that underlie users' information needs and appropriate strategies to assist them.

The University of Iowa offers students the option of completing their degree either on campus or online through a video conferencing system. The School of Library and Information Science combines web-based education with on-campus instruction and collaboration that allows distance students to participate real-time with their campus classmates. Both full- and part-time enrollment options are available for on-campus or virtual coursework. For more information about the online program, see Online M.A. in LIS on the School of Library and Information Science website.

## Requirements

The Master of Arts in library and information science requires 36 s.h. of graduate credit. Students must earn a grade of B or higher in all courses for the major. They may repeat a course to remedy a lower grade; see the SLIS Handbook on the School of Library and Information Science website for further details. A thesis option is available for students who seek additional research experience.

Students may apply a maximum of 12 s.h. of graduate transfer credit in library and information science or related areas toward the degree, subject to applicable rules and approval of the transfer credit committee. Approval is determined by the course's content, currency, and applicability to a student's program.

The program may be completed on campus or in a synchronous distance mode, and is designed to be completed in two years with enrollment of 9 s.h. during the fall and spring semesters. The School of Library and Information Science strongly recommends that students not register for more than 12 s.h. during fall and spring semesters and 8 s.h. during summer sessions. The program also may be completed through part-time study.

The curriculum includes two levels of coursework. Core courses consist of five required courses that provide a solid grounding for all successive coursework. Students select elective coursework consisting of seven courses for 21 s.h. or a combined electives course total of 21 s.h. based on their areas of interest. This two-level arrangement allows students to concentrate in an area that most closely matches their professional goals.

The Master of Arts in library and information science has held continuous accreditation from the American Library Association since 1971.

The M.A. with a major in library and information science requires the following coursework.

Code	Title	Hours
Core Courses		15
Electives		21
<b>Total Hours</b>		<b>36</b>

## Core Courses

Code	Title	Hours
All of these:		
SLIS:5010	Cultural Foundations (taken in student's first semester)	3
SLIS:5020	Computing Foundations (taken in student's first semester)	3
SLIS:5030	Conceptual Foundations	3
SLIS:6115	Information and Inquiry	3
One of these:		
SLIS:6110	Evidence-Based Practice in Library and Information Science	3
SLIS:6170	Management, Teams, and Leadership	3

## Electives

Code	Title	Hours
With their advisor's guidance, students select seven courses for 21 s.h. or a combined course total of 21 s.h. from these:		
SLIS:4150	Introduction to Book Studies	3
SLIS:4910	The Book in the Middle Ages	3
SLIS:4920	The Transition from Manuscript to Print	3
SLIS:5041	College and University Libraries	3
SLIS:5042	Public Libraries	3
SLIS:5043	Special Libraries	3
SLIS:5044	School Library Media Administration	3
SLIS:5200	User Education: Multimedia	3
SLIS:5220	Resources for Children	3
SLIS:5230	Resources for Young Adults	3
SLIS:5240	Resources for Adults	3
SLIS:5520	Studies in Book History and Technologies	0-3
SLIS:5530	Topics in Preservation	3
SLIS:5535	Book Conservation	3
SLIS:5600	Reading Culture: History and Research in Print and Digital Media	3
SLIS:5700	Cultural Heritage	3
SLIS:5900	Health Informatics	3
SLIS:5950	Health Information and Communication	3
SLIS:6020	Literacy and Learning	3
SLIS:6100	Database Management	3
SLIS:6110	Evidence-Based Practice in Library and Information Science	3

SLIS:6120	Natural Language Processing	3
SLIS:6130	Community Engagement	3
SLIS:6140	Digital Environments	3
SLIS:6145	Digital Preservation and Stewardship	3
SLIS:6150	Information Behavior	3
SLIS:6155	Information Visualization	3
SLIS:6170	Management, Teams, and Leadership	3
SLIS:6250	Beginning Cataloging and Classification	3
SLIS:6255	Beginning Rare Books Cataloging	3
SLIS:6330	Collection Development	3
SLIS:6335	Metadata Theories and Applications	3
SLIS:6345	Stewardship of Information and Collections	3
SLIS:6350	Archives: Theory and Practice	3
SLIS:6370	Topics in Book Studies	3
SLIS:6380	Analysis of Scholarly Domains	3
SLIS:6411	Topics in Library and Information Science	1-3
SLIS:6490	Information Policy and Ethics	3
SLIS:6520	Practicum in Libraries and Information Centers	3
SLIS:6530	School Library Media Practicum	3
SLIS:6570	Independent Study	1-3
SLIS:6580	Thesis	0-6
SLIS:6590	Digital Humanities Capstone	3
SLIS:7290	Digital Humanities Theory and Practice	3

## Specializations

Students' programs often are designed around particular career goals. Examples of possible general specializations are listed below. Information also is available regarding Specialized Focus Areas on the School of Library and Information Science website.

### Public Libraries

Public libraries provide informational, educational, and recreational materials and a wide range of services for a diverse clientele. Although public libraries receive the bulk of their funding from local taxes, they also may be organized on a regional or statewide cooperative basis. The variety of uses, services, materials, and organizational structures of public libraries makes this a challenging area of librarianship. Public librarians need to develop skills in analyzing the communities they serve, designing comprehensive marketing plans to meet their needs, implementing the plans in a cost-effective way, and evaluating the success of their efforts.

### Academic Libraries

The academic library, whether in a community college, a four-year college, or a university, provides information services in support of the parent institution's teaching, research, and public service missions. These services include instruction in

the use of the library and its resources. Management skills and subject or language competence often are required. Since librarians in this setting usually are considered academic faculty members, a second master's or other advanced degree is desirable.

## Special Libraries and Information Centers

Special libraries serve corporations, private companies, government agencies, technical and academic institutions, museums, medical facilities, and information management consulting firms. They are organized to anticipate and quickly respond to the specific information needs of their users. Special librarians are information resource experts who collect, analyze, evaluate, package, and disseminate information to facilitate accurate decision making. Knowledge of information technology and the ability to design services suitable to the parent organization are professional necessities. In addition, substantial subject expertise may be required.

## School Teacher Librarian

School teacher librarians provide instruction to students in accessing, evaluating, and using information; collaborate with teachers on the use of resources in instruction; provide leadership in the use of instructional and information technologies; offer reading guidance; provide reference service; and manage the library media center.

The University of Iowa offers a state-approved program leading to endorsement as school teacher librarian K-12. In order to fulfill state requirements for this endorsement, students must hold or be eligible for a teaching license and must complete a designated sequence of courses that leads both to certification and to the M.A. degree.

Licensed teachers employed in Iowa schools may enroll in a distance education program that leads to an M.A. in library and information science and endorsement for school librarianship. Contact the School of Library and Information Science for details.

Students who are interested in school libraries but lack a valid Iowa teaching license may earn licensure as a school teacher librarian by completing 30 s.h. in the College of Education. The Master of Arts in library and information science with teacher licensure requires 66 s.h. of credit. Students must apply and be admitted to both programs.

## Certificate Opportunities

### Book Studies/Book Arts and Technologies

Students can earn the Certificate in Book Studies/Book Arts and Technologies offered by the Center for the Book (Graduate College). The certificate prepares them for careers in special collections librarianship while training them in the production and legacy of the book as a physical artifact. For more information, see Combined Programs [p. 1656] in this section of the Catalog.

### Informatics

M.A. students have the opportunity to earn the Certificate in Informatics. Specialty areas include bioinformatics and computational biology, geoinformatics, health informatics, and information science. For more information, see the Certificate in Informatics [p. 1646] in the Catalog.

## Public Digital Humanities

Students also may apply to earn the Certificate in Public Digital Humanities. The program requires 12 s.h. of graduate credit and offers credentials to students who plan to incorporate digital technology into their future research, training, or careers. For more information, see the Certificate in Public Digital Humanities [p. 1682] in the Catalog

## Certificate Program Application

Separate application to each certificate program is required. For more information, see degrees and certificates on the School of Library and Information Science website.

### Combined Programs

## Undergraduate Degree/M.A.

Students working on an undergraduate degree program in the Tippie College of Business or the Colleges of Education, Engineering, Liberal Arts and Sciences, and Public Health who are interested in earning a master's degree in library and information science without thesis may apply to a combined undergraduate degree/M.A. in library and information science program. The Undergrad to Grad (U2G) program enables students to begin work on the M.A. degree as they complete their baccalaureate degree and complete both degrees in five years. Students admitted to the program may count 12 s.h. toward both their undergraduate degree and the M.A. degree.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, visit Undergrad to Grad (U2G) on the Graduate College website.

## M.A./J.D.

The School of Library and Information Science and the College of Law offer a combined Master of Arts/Juris Doctor program. Students in the combined program may apply a limited amount of credit toward both degrees thereby completing the combined program with fewer semester hours than if each degree was completed separately. Students enroll in law courses their first year and begin taking School of Library and Information Science courses in their second year.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information about the J.D., see Juris Doctor, J.D. [p. 1707] (College of Law) in the Catalog.

Elective courses also are available for students who wish to specialize in law librarianship but who do not want to pursue the J.D. degree.

## M.A./M.F.A. in Book Arts

The School of Library and Information Science and the Center for the Book offer a combined Master of Arts/Master of Fine Arts in book arts. The combined program allows students with strong interest in the physical book to acquire training in the book arts, book history, and material book studies. The earned expertise in the production and legacy of the book as a physical artifact combined with expertise in library and information science can be an asset for those focused on careers in special collections libraries and archives.

Students in the combined program earn both degrees by completing fewer semester hours than if each degree was

completed separately. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, see the M.F.A. in book arts [p. 1617] in the Catalog.

Students interested in a librarianship career with a more general interest in the physical book should consider the book studies, book arts and technologies/library and information science (BLIS) certificate program; see "Certificate Opportunities" under Requirements [p. 1654] in this section of the Catalog.

## M.A./Certificate in Book Studies/Book Arts and Technologies

The Center for the Book and the School of Library and Information Science (SLIS) collaborate to offer the book studies/book arts and technologies/library and information science (BLIS) program. The combined program enables students to earn an M.A. in library and information science and a Certificate in Book Studies/Book Arts and Technologies. It requires admission to the School of Library and Information Science M.A. program and the Center for the Book certificate program.

The M.A./Certificate in Book Studies/Book Arts and Technologies offers multiple pathways into professional engagement with artifacts available in archives and libraries, such as rare and artist books. Students select courses that enable them to gain skills and knowledge in areas of service such as conservation, cataloging, instruction, and outreach. The combined program requires 51 s.h. of coursework. Students take 27 s.h. of SLIS courses; 15 s.h. of book arts, studies, and technologies courses; and the remaining 9 s.h. may be taken in either SLIS or Center for the Book coursework, or from another unit with approval from the SLIS advisor.

Admission deadline is February 1 for fall entry. For more information, see the Certificate in Book Studies/Book Arts and Technologies [p. 1619] in the Catalog.

### Admission

Applicants begin the admission process by submitting an online graduate application through the Office of Admissions. Applicants then receive a HawkID and can upload the remaining application documents through MyUI. Transcripts of all academic work, a written statement of purpose and goals, a résumé or curricula vitae, and three letters of recommendation are required. Applicants to the teacher librarian program are asked to include a copy of their current teaching certificate. The admission committee considers each applicant's letters of recommendation, statement of purpose, résumé or curricula vitae, and other appropriate criteria, as well as an applicant's grade-point average. Applicants for admission to the M.A. program should have a g.p.a. of at least 3.00 on a 4.00 scale. Graduate Record Examination (GRE) General Test scores are not required. Admission is competitive.

Applicants whose first language is not English must score at least 81 (internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants with TOEFL scores below 100 on the internet-based test are required by the University to take an English Proficiency Test if admitted to the program. In place of TOEFL, the school also accepts International English Testing System (IELTS) scores of 7.0 or higher, with no

subscore below 6.0. Applicants who submit IELTS scores are required to take an on-campus English proficiency evaluation.

Completed applications should be received by February 1 for priority consideration for fall admission. Decisions of the admissions committee are announced approximately six weeks after the application deadline. Late applications are considered if places are still available. Financial aid often is not available for late applicants. Admitted students are assigned a faculty advisor for program planning during their first semester.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

The School of Library and Information Science (SLIS) typically offers limited partial-tuition scholarships and graduate assistantships. To be considered for scholarships or assistantships, applicants must meet the M.A. program's grade-point average requirement for admission; see Admission [p. 1656] in this section of the Catalog. At the discretion of the admissions committee, limited graduate assistantships may be offered to incoming students based on academic merit and prior experience. In addition, available assistantships in SLIS and in other programs and departments throughout the University are advertised as they become available; students should apply for specific assistantships.

To learn more about available opportunities, view the SLIS website for information on departmental scholarships. Part-time employment usually is available in the University of Iowa Libraries or other campus units.

Applications for student loans, work-study eligibility, or other financial assistance should be submitted directly to the University's Office of Student Financial Aid.

## Career Advancement

Library and information science graduates have many options for employment. Alumni hold positions in public, school, special, and academic libraries as well as other information settings. They serve in varied roles, such as information consultant, database manager, library administrator, webmaster, network coordinator, cataloger, children's librarian, school library media specialist, and archivist.

The school shares announcements of national and international job opportunities through an electronic mailing list. In addition, the Library and Information Science Student Organization (LISSO) sponsors talks by speakers versed in areas of librarianship as well as workshops on résumé writing, social media networking, and interviewing. Internships and other opportunities provide students with hands-on experience that may enhance their job prospects.

For recent information on library and information science placement, see the Library Research Service (LRS) website and the annual Placement and Salaries 2020 report on the Library Journal website.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and

should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Library and Information Science, M.A.

Course	Title	Hours
<b>Academic Career</b>		
<b>Any Semester</b>		
36 s.h. of graduate level coursework must be completed; up to 12 s.h. of graduate transfer credits allowed upon approval. More information is included in the General Catalog and on department website. <sup>a</sup>		
Students must earn grade B or higher in all courses for the major.		
Students may design their program around particular career goals such as Public Librarianship, Information Processes, Medical Librarianship, Youth Services, Archives and Media, and Academic Librarianship by working with their advisor to determine coursework and sequence.		
Students may pursue select degrees, certificates or a certification simultaneously in less time than would be required to complete the programs of study independently. <sup>b</sup>		
<b>Hours</b>		<b>0</b>
<b>First Year</b>		
<b>Fall</b>

SLIS elective <sup>e</sup>		3
SLIS elective <sup>e</sup>		3
SLIS elective <sup>e</sup>		3
Exam: Career Development Portfolio		
<b>Hours</b>		<b>9</b>
<b>Total Hours</b>		<b>36</b>

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Students can complete a combined degree with the SLIS MA and either a Juris Doctor or the Book Arts MFA, or may consider the SLIS MA with the Book Studies/Book Arts and Technologies CER, Informatics CER, or Public Digital Humanities CER. The SLIS MA may also be combined with the School Library Media CERT.

c Course should be taken during the first semester of the program.

- d SLIS core course
- e Students must complete 7 courses (21 s.h.) of SLIS elective graduate coursework in an area of professional specialization. Work with an academic advisor to determine coursework and sequence. Additional information can be found in the General Catalog and the department website.
- f Course should be taken in the second semester of the program.
- g Course can be taken in year 1 or 2 based on individual schedule.

# Special Collections Librarianship, Graduate Certificate

## Requirements

The graduate Certificate in Special Collections Librarianship requires 15 s.h. of coursework. Students must maintain a g.p.a. of at least 3.00 in work for the certificate.

The certificate program includes 12 s.h. of required coursework that introduces students to the core theories supporting the collection and management of rare books, archival records, and manuscript collections. One elective course allows students to further specialize and focus on archival work, rare books, or digital curation and preservation, and prepares students for the diverse range of careers in libraries, archives, special collections, and manuscript repositories.

The certificate program is designed to meet the guidelines for a graduate program in archival studies by the Society of American Archivists (SAA). The certificate may be earned by any student currently enrolled in the M.A. in library and information science [p. 1654] degree program and the Certificate in Book Studies/Book Arts and Technologies [p. 1619] program, as well as in other graduate programs of study. The Certificate in Special Collections Librarianship is awarded by the Graduate College.

The Certificate in Special Collections Librarianship requires the following coursework.

## Required Courses

Code	Title	Hours
All of these:		
SLIS:5600	Reading Culture: History and Research in Print and Digital Media	3
SLIS:5630	Introduction to Special Collections Librarianship	3
SLIS:6350	Archives: Theory and Practice	3
One of these:		
SLIS:5530	Topics in Preservation	3
SLIS:5535	Book Conservation	3
SLIS:6145	Digital Preservation and Stewardship	3

## Elective

Code	Title	Hours
One of these:		
SLIS:5535	Book Conservation	3
SLIS:5700	Cultural Heritage	3
SLIS:6255	Beginning Rare Books Cataloging	3
SLIS:6355	Public Services for Special Collections and Archives	3
SLIS:6520	Practicum in Libraries and Information Centers	3

MUSM:3200	Collection Care and Management	3
MUSM:4200	Museum Object Preservation	3
UICB:4920	The Transition from Manuscript to Print	3

For more information, see the School of Library and Information Science website.

# Molecular Medicine

## Director

- Matthew J. Potthoff (Neuroscience and Pharmacology)

**Faculty:** <https://medicine.uiowa.edu/mcb/faculty>

**Website:** <https://medicine.uiowa.edu/mcb/>

The Molecular Medicine Program provides interdisciplinary training in the concepts and methodologies fundamental to the investigation of biological processes and molecular mechanisms that relate to human disease.

The program provides the curriculum for the molecular medicine subprogram for the Doctor of Philosophy in biomedical science. It is a sequence of required and elective coursework, which provides students with broad exposure to areas, including molecular biology, cell biology, biochemistry, and integrative sciences. The curriculum ensures comprehensive exposure to conceptual and experimental aspects of molecular and cellular biology and of translational studies. Sufficient flexibility is provided so that students can adapt the program to allow specialization in their own area of interest. See the Ph.D. in biomedical science [p. 1602] (molecular medicine subprogram) in the Graduate College section of the Catalog.

Faculty members are involved in a variety of research projects involving molecular and cellular biology and molecular medicine.

## Programs

### Graduate Program of Study

#### Major

- Doctor of Philosophy in Molecular and Cellular Biology

Students interested in doctoral studies in molecular medicine should apply under the umbrella program in Biomedical Science [p. 1599] (select molecular medicine subprogram). Direct application to the Ph.D. in molecular and cellular biology is not currently being considered.

## Facilities

Training is conducted primarily in laboratories and teaching facilities of the Carver College of Medicine Stead Family Department of Pediatrics and the Departments of Anatomy and Cell Biology, Biochemistry and Molecular Biology, Internal Medicine, Microbiology and Immunology, Molecular Physiology and Biophysics, Neurology, Obstetrics and Gynecology, Ophthalmology and Visual Sciences, Otolaryngology—Head and Neck Surgery, Pathology, Pharmacology, Psychiatry, Radiation Oncology, and Surgery; and the College of Liberal Arts and Sciences Departments of Biology and Chemistry. Faculty laboratories and central research facilities available to students provide access to the most up-to-date research equipment.

## Courses

### Molecular Medicine Courses

#### **MMED:3310 Practical Data Science and Bioinformatics**

**3 s.h.**

Understanding how to access large biological data sets and use them to answer biological questions is an important skill for researchers; immersive introduction to computational handling of data; how to access and analyze publicly available data; critically evaluate data quality and analysis in context of measuring gene expression; basic coding in R/RStudio, plotting and data display, fitting and regression, statistical inference, statistical models, downloading and data wrangling; basic introduction to machine learning (clustering); for students with no computational background. Prerequisites: BIOL:1411 with a minimum grade of C- and BIOL:1412 with a minimum grade of C-. Requirements: college algebra. Recommendations: BIOC:3110, or BIOC:3120 and BIOC:3130, or other upper-level life sciences courses. Same as BIOC:3310, CBIO:3310.

#### **MMED:5270 Pathogenesis of Major Human Diseases**

**3 s.h.**

Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Offered spring semesters of even years. Same as IGPI:5270, PATH:5270.

#### **MMED:6215 Transcription and Multifunctional Regulation by RNA**

**1 s.h.**

Principles and techniques for investigating mechanisms of controlling eukaryotic gene expression; basic genome organization, chromatin structure, transcription, RNA processing, translation; cloning methods, use of electronic sequence databases, footprinting, chromatin immunoprecipitation, in vivo and in vitro transcription assays, DNA microarray analysis, information retrieval. Prerequisites: BMED:5207.

#### **MMED:6220 Mechanisms of Cellular Organization**

**3 s.h.**

Current understanding of basic cell biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BIOC:3130. Same as ACB:6220, MPB:6220.

#### **MMED:6225 Growth Factor Receptor Signaling**

**1 s.h.**

Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Same as ACB:6225, MPB:6225, PCOL:6225.

#### **MMED:6226 Cell Cycle Control**

**1 s.h.**

Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Same as ACB:6226, MPB:6226.

#### **MMED:6227 Cell Fate Decisions**

**1 s.h.**

Cellular fate decisions including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Same as ACB:6227, MPB:6227.

**MMED:6230 Pathogenesis of Metabolic and Cardiovascular Disorders** **3 s.h.**

Students focus on metabolic and cardiovascular diseases—the leading cause of morbidity and mortality in the United States; introduction to major subclasses of metabolic and cardiovascular diseases, definition of pathogenesis and clinical features of diseases, and exploration of methodologies used to study diseases; course format includes lecture, critical examination of literature, and demonstration of experimental models.

**MMED:6250 Mechanisms of Parasitism Journal Club** **1 s.h.**

Reviews of recent publications in molecular parasitology research and thesis research by training grant or journal club students. Same as MICR:6250.

**MMED:6260 Methods for Molecular and Translational Medicine** **1 s.h.**

Basic and advanced scientific techniques used to integrate biological questions in molecular and translational medicine; particularly useful for comprehensive exam preparation.

**MMED:6270 Pathogenesis of Cardiovascular Disorders** **3 s.h.**

Students focus on cardiovascular diseases—the leading cause of morbidity and mortality in the United States; introduction to major subclasses of cardiovascular diseases, definition of pathogenesis and clinical features of diseases, and exploration of methodologies used to study diseases; format includes lecture, critical examination of literature, and demonstration of experimental models.

**MMED:6280 Critical Thinking in Molecular Medicine** **1 s.h.**

Opportunity to work closely with participating faculty to gain skill in critical reading of research literature and facility in presenting material to an audience. Requirements: advanced graduate standing.

**MMED:7290 Seminars in Molecular Medicine** **1 s.h.**

Research findings in molecular biology. Requirements: molecular and cellular biology graduate standing.

**MMED:7305 Molecular Medicine Research** **arr.**

Requirements: molecular and cellular biology graduate standing.

**MMED:7310 Translational Medicine Education Rounds** **1 s.h.**

Students obtain clinical insights into their area of specialty in biomedical research through selection of a clinical mentor to complement the expertise of their research mentor; clinical mentors provide students with case studies, clinical scenarios, and physician shadowing opportunities which may allow students to gain new perspectives and insight into applications of biomedical research. Requirements: enrollment in Molecular Medicine Program, completion of rotations, and selection of a research mentor.

**MMED:8115 Molecular Physiology** **4 s.h.**

Principles of human physiology, organ systems, cell function. Offered fall semesters.

# Neuroscience

## Chair

- Daniel T. Tranel (Neurology/Psychological and Brain Sciences)

**Graduate degree:** Ph.D. in neuroscience

**Faculty:** <https://neuroscience.grad.uiowa.edu/faculty/directory>

**Website:** <https://neuroscience.grad.uiowa.edu>

The Neuroscience Program provides an interdisciplinary and interdepartmental approach to graduate education and research training in the structure, function, and development of the nervous system and its role in cognition and behavior. Students obtain training at all levels of the nervous system, from cellular/molecular to the behavioral/cognitive.

## Programs

### Graduate Program of Study

#### Major

- Doctor of Philosophy in Neuroscience [p. 1663]

## Facilities

Training is conducted primarily in the laboratories and teaching facilities of the Carver College of Medicine graduate Departments of Anatomy and Cell Biology, Biochemistry and Molecular Biology, Internal Medicine, Molecular Physiology and Biophysics, Neurology, Pharmacology, and Psychiatry; the College of Liberal Arts and Sciences Departments of Biology, Communication Sciences and Disorders, Health and Human Physiology, and Psychological and Brain Sciences; and the Neuroscience Program.

Students use faculty laboratories and central research facilities for ultrastructural analysis; histochemistry and immunocytochemistry; electrophysiology; fluorescence-activated cell sorting; cellular and subcellular biochemistry; cell, tissue, and organ culture; operant and classical conditioning; molecular biology; behavioral genetics; neural substrates of complex behavior; brain-behavior relationships in humans; neuropsychology; and functional neuroimaging (PET, fMRI).

## Courses

### Neuroscience Courses

#### **NSCI:4353 Neurophysiology: Cells and Systems** 3-4 s.h.

Physiological properties of nerve cells, nervous systems; axonal conduction, synaptic transmission, sensory transduction, integrative processes, higher functions. Prerequisites: (BIOL:2753 or BIOL:3253) and (MATH:1460 or MATH:1380 or MATH:1550 or MATH:1850) and ((PHYS:1511 and PHYS:1512) or (PHYS:1611 and PHYS:1612)). Same as BIOL:4353.

#### **NSCI:5212 Foundations in Behavioral and Cognitive Neuroscience** 4 s.h.

Concepts, methods, and findings in behavioral and cognitive neurosciences. Prerequisites: BIOL:3253. Same as PSY:5212.

#### **NSCI:5365 Seminar: Neuropsychology and Neuroscience** arr.

Clinical neuropsychology and cognitive neuroscience: cutting-edge research from scientific journals, case presentations in clinical neuropsychology, and current research. Same as NEUR:5365, PSY:5365.

#### **NSCI:5653 Fundamental Neurobiology I** 3 s.h.

Neurobiology from molecular/cellular to systems levels, including cell biology of the neuron; membrane electrophysiology; synaptic transmission and plasticity, functional neuroanatomy, sensory, motor and autonomic systems; emotion, memory, sleep, language, attention and cognition, neuronal development; focus on systems and developmental neurobiology; first in a two-semester sequence. Same as BIOL:5653, PSY:5203.

#### **NSCI:5658 Fundamental Neurobiology I Discussion** 1 s.h.

Discussion of selected papers, including classics from neurobiology literature; coordinated with BIOL:5653 lecture material. Same as BIOL:5658, PSY:5204.

#### **NSCI:6050 Advanced Quantitative Training for Neuroscience** 4 s.h.

Review of statistical inference, type-I errors, statistical power, measurement reliability issues in context of between-/within-subjects t-tests, ANOVAs, correlations, and regressions with attention to causality and generalizability; multiple linear regression, model building, model testing, confounding/mediation, interactions; mixed models with nested/crossed, fixed/random factors, and repeated measure designs. Offered spring semesters. Prerequisites: PSY:5050.

#### **NSCI:6209 Steroid Receptor Signaling** 1 s.h.

Structure-function relationship and genomic and nongenomic actions of the steroid hormone receptor family; basis for actions of novel new ligands on these receptors. Offered spring semesters of even years. Same as MPB:6209, PCOL:6209.

#### **NSCI:6265 Neuroscience Seminar** 0-1 s.h.

Research presentations. Same as ACB:6265, BIOL:6265, MPB:6265, PSY:6265.

#### **NSCI:7235 Neurobiology of Disease** 3 s.h.

Broad, thematic understanding of disease mechanisms in neurobiological disorders. Same as NEUR:7235.

#### **NSCI:7301 Directed Study in Neuroscience** arr.

#### **NSCI:7305 Neuroscience Research** arr.

Requirements: neuroscience graduate standing.

# Neuroscience, Ph.D.

For information about predoctoral training opportunities in neuroscience, contact the Neuroscience Program or visit its website.

## Requirements

The Doctor of Philosophy program in neuroscience requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of 3.00. The program's curriculum is designed around three tracks: molecular/cellular, developmental/systems, and cognitive/behavioral. Following broad-based instruction in a core curriculum, students specialize in one of the tracks.

Within a framework of core, track-specific, and elective courses, students pursue a program of study individually designed according to their undergraduate training and graduate research goals. After enrolling in the Neuroscience Program, entering students consult with the advisory committee regarding their level of preparation for the program's required courses.

The Student Advisory Committee meets with all first- and second-year graduate students once each semester, helping students explore their research interests and select faculty mentors for the required laboratory rotations. Each student is expected to complete three rotations in faculty laboratories before selecting a thesis advisor. Rotations ordinarily last 12 weeks but may last from 8 to 16 weeks. Under special circumstances, two rotations may be in the same laboratory, an arrangement that permits a student to learn a variety of techniques and approaches before settling down to work on the dissertation project. Students usually choose a dissertation lab at the end of their first year.

## Background Requirements

Students are expected to demonstrate competency, through prerequisites or coursework, in each of four fields: biochemistry, general physiology, cell biology, and statistics. These requirements ordinarily should be fulfilled by the end of the first year of graduate study. Waivers of background course requirements may be requested by students who have taken equivalent courses before entering the Neuroscience Program.

## Neuroscience Core

The following courses form the core of the neuroscience graduate curriculum.

Code	Title	Hours
NSCI:5653	Fundamental Neurobiology I	3
NSCI:7235	Neurobiology of Disease	3
ACB:6252	Functional Neuroanatomy	arr.
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
PSY:6370	Principles of Neuropsychology	3
One statistics course		3-4

In addition, students register for the following two courses each semester:

NSCI:6265	Neuroscience Seminar	0-1
NSCI:7305	Neuroscience Research	arr.

## Electives

Elective requirements may be met by completing 8 s.h. from a list of courses offered by the Departments of Anatomy and Cell Biology, Biology, Molecular Physiology and Biophysics, Pharmacology, Psychological and Brain Sciences, and other departments as appropriate. With permission of the Student Advisory Committee, students may satisfy the elective requirement wholly or in part by registration in the following course.

Code	Title	Hours
NSCI:5212	Foundations in Behavioral and Cognitive Neuroscience	4
NSCI:5365	Seminar: Neuropsychology and Neuroscience	arr.
NSCI:7301	Directed Study in Neuroscience	arr.
BIOL:3343	Animal Physiology	3
BIOL:3383	Introduction to Systems Biology	3
BIOL:4213	Bioinformatics	2,4
BME:5320	Bioinformatics Techniques	3
BMED:5207	Principles of Molecular and Cellular Biology	3
CSD:5234	Acquired Cognitive- Communication Disorders	arr.
CSD:6230	Psychoacoustics	2-3
GENE:6200	Special Topics in Genetics	1
HHP:6300	Motor Control Seminar	1
MATH:5750	Mathematical Biology I	4
MICR:5218	Microscopy for Biomedical Research	arr.
MMED:6220	Mechanisms of Cellular Organization	3
MMED:6226	Cell Cycle Control	1
MMED:6227	Cell Fate Decisions	1
PATH:5260	Translational Histopathology	3
PCOL:5135	Principles of Pharmacology	1
PCOL:5137	Neurotransmitters	1
PCOL:6207	Ion Channel Pharmacology	1
PCOL:6225	Growth Factor Receptor Signaling	1
PSY:3320	Abnormal Psychology	3
PSY:5070	Programming for Psychologists	3
PSY:5080	Foundations in Cognitive Neuroscience	4
PSY:5610	Proseminar in Cognition and Perception	3
PSY:6440	Developmental Cognitive Neuroscience	3
PSY:7150	Current Topics in Psychology	3
PSY:7210	Seminar: Advanced Topics in Behavioral and Cognitive Neuroscience	3
RHET:7500	Science Communication in the Digital Age	2-3

STAT:6300	Probability and Stochastic Processes I	3
-----------	--	---

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in neuroscience in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

All students receive a financial stipend of \$31,000 plus tuition for the 2021-22 academic year. Financial support comes from training grants, research assistantships, teaching assistantships, scholarships, individual research grants, or other departmental or college funds. All students are required to teach as part of their development as future scientists and faculty members.

The Neuroscience Program is committed to supporting its graduate students for their entire training period. Students normally are supported in the first year by the program. After that, support is expected to come from a student's primary research mentor. Occasionally, advanced students are supported through teaching assistantships.

See Financial Assistance on the Interdisciplinary Graduate Program in Neuroscience website and Finances on the Graduate Admissions website for more information.

### NIH Training Grant

The Neuroscience Program is supported by a training grant from the National Institutes of Health (NIH). The grant provides stipend and tuition support for a select group of first- and second-year graduate students.

# Planning and Public Affairs

## Director

- Lucie Laurian

**Graduate degrees:** M.P.Aff.; M.S. in urban and regional planning

**Faculty:** <https://sppa.uiowa.edu/faculty-staff>

**Website:** <https://sppa.uiowa.edu/>

Planning and public affairs encompasses the development and implementation of public policies that improve the quality of life in cities, regions, states, and nations as well as protects the environment and sustains the earth. Concentration areas for the M.S. in urban and regional planning include economic development, geographic information systems (GIS), land use and environmental planning, housing and community development, and transportation. Focus is on analytical urban planning, public policy, and sustainability. Concentration areas for the Master of Public Affairs include public and nonprofit management, and public policy.

The School of Planning and Public Affairs is a campus leader in community engagement and hosts the Iowa Initiative for Sustainable Communities (IISC) through which students from disciplines across campus provide key answers to important sustainability questions for communities in Iowa.

## Related Certificate

### Transportation Studies

The Transportation Studies Program offers the Certificate in Transportation Studies. The program focuses on the varied and complex problems of transportation and on interdisciplinary approaches to addressing them. The Departments of Civil and Environmental Engineering, Industrial and Systems Engineering, Mechanical Engineering (College of Engineering), Economics (Tippie College of Business), and the School of Planning and Public Affairs (Graduate College) participate in the program.

The certificate is coordinated by the School of Planning and Public Affairs. See the Certificate in Transportation Studies [p. 1688] (Graduate College) in the Catalog.

## Programs

### Graduate Programs of Study

#### Majors

- Master of Public Affairs [p. 1673]
- Master of Science in Urban and Regional Planning [p. 1677]

## Courses

### Planning and Public Affairs Courses

- Urban and Regional Planning Courses [p. 1665]
- Public Affairs Courses [p. 1669]

### Urban and Regional Planning Courses

#### URP:1030 Climate Leadership and Justice 3 s.h.

Preparation for engaged students to lead on climate change in their communities; understanding climate change causes and impacts, consideration of intergenerational justice and equity in climate adaptation and mitigation; application of best practices in climate policies and planning; supporting community and business resilience and capacity building.

#### URP:2013 Introduction to Sustainability arr.

Introduction to sustainability knowledge, skills, and habits as a means to shape one's vision of a sustainable citizen; emphasis on basic skills of literacy, applied math, and finding information; traditional sustainability knowledge areas related to society, economy, and environment; intersecting themes (e.g., informed consumerism, eco-economics, and livable environments). Same as BUS:2013, GEOG:2013, SUST:2013.

#### URP:2020 Environment and Society: Sustainability, Policy, and Politics 3 s.h.

How society balances its needs against those of the natural environment when addressing modern challenges like climate change, conservation, and energy crises; exploration of sustainability through the lens of U.S. environmental policy and politics; application of fundamental theories of public policy to answer questions—when do environmental problems become policy problems; what economic, social, and political forces shape environmental policy decisions; and what are the consequences of environmental policies for individuals and organizations?

#### URP:2056 The Splendor of Cities 3 s.h.

Evolution of city structure in response to social, cultural, political, and economic forces; cities through time and across continents; varied resource materials including video, novels, and texts.

#### URP:3001 Planning Livable Cities 3 s.h.

Development of livable cities in the United States; economic, physical, environmental, and political forces that shape their growth; impact of planning, how it shapes the future of cities. Same as GEOG:3920.

#### URP:3134 Regional and Urban Economics 3 s.h.

Theory of location and regional development; central place theory; why cities exist and trade with one another; models of land use patterns, rents; empirical tests of models; policy applications. Prerequisites: ECON:1100. Same as ECON:3640.

#### URP:3135 Environmental and Natural Resource Economics 3 s.h.

Environmental and resource use problems; efficient mechanisms and other policies for environmental protection, management of common property resources. Prerequisites: ECON:1100 and ECON:1200. Same as ECON:3625.

#### URP:3217 Negotiation and Conflict Resolution 3 s.h.

Strategies of successful negotiation across a wide range of conflict situations; keys to success in peacefully resolving conflicts; personal, professional, legal, and political negotiations; apologizing; mediation as alternative to litigation; analysis of conflict characteristics to determine optimal negotiation strategies; development of negotiation interpersonal skills; practice negotiating under real world scenarios. Prerequisites: RHET:1030 or RHET:1040 or RHET:1060. Same as PBAF:3217, RHET:3009.

- URP:3350 Transportation Economics** 3 s.h.  
Overview of transportation markets—intercity, rural, urban; transportation modes—rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Recommendations: ECON:1100 and ECON:1200. Same as ECON:3750, GEOG:3940.
- URP:4170 Megacities Seminar** 1-3 s.h.  
Global historical, political, economic, urban, and cultural aspects of megacity development; planning methods to address contemporary and emerging issues; critical analysis of peer-reviewed literature and computational simulations; topics include urban sprawl, poverty and inequality, economies, food scarcity, population growth, governance models, environmental and health concerns, sustainability.
- URP:4225 Applied GIS for Planning and Policy Making** 3 s.h.  
Analysis of Census of Population and Housing data using GIS software; data and analytical needs of urban planners; coverage of GIS topics to plan functions of GIS and spatial analysis, varied GIS software in a planning organization; structure of the census.
- URP:4243 The Land Development Process** 3 s.h.  
How land is developed; analysis of site suitability, preparation of subdivision plan, site plan review, development approval process, infrastructure and site preparation, negotiating local development politics; field trips.
- URP:4245 Growth Management** 3 s.h.  
Causes and consequences of urban sprawl, shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges.
- URP:4253 Designing Sustainable and Healthy Cities** 1-3 s.h.  
Principles and practical elements of urban design for sustainable and healthy cities; general urban design background for policy makers and planners; impacts of urban design for environmental sustainability, community health, and well-being; physical, mental, social, and environmental health as affected by urban form, air and water quality, green spaces, and climate change impacts.
- URP:4256 Environmental Policy** 3 s.h.  
Environmental policy formation and politics; comparative international perspective on the United States' experience.
- URP:4260 Transportation Policy and Planning** 3 s.h.  
Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues.
- URP:4262 Transportation Research Methods and Analysis** 3 s.h.  
Methods for measuring current and future transportation demand based on changes in population, preferences, built environment, and changing policy objectives; survey design and analysis; basics of travel demand modeling. Same as CEE:4176.
- URP:4265 Planning Sustainable Transportation** 3 s.h.  
Theories and methods of exerting public control over passenger and freight transportation; social and environmental regulation; effects of changing finance, regulation, and pricing policies including privatization, tolls, and impact fees.
- URP:4266 Transportation and Land Use Planning** 3 s.h.  
Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, and travel behavior modeling; current policies that influence travel behavior and urban form.
- URP:4271 Housing Policy** 3 s.h.  
Recent housing policy initiatives at federal, state, and local levels.
- URP:4273 Community Development Through Creative Placemaking** 3 s.h.  
Examination of practices, ideas, and techniques for community development in small to large communities; particular focus on creative placemaking, in which planners and the public strategically shape the physical and social character of a neighborhood, town, city, or region around arts and cultural activities; application of this approach to a specific community project; for students in the arts, humanities, social sciences, and planning and public affairs.
- URP:4280 Planning for Disaster Mitigation and Recovery** 2-3 s.h.  
Types of disasters that communities face; what role planners play, what role should they play; importance of hazard mitigation and planning for post-disaster recovery; where planners' unique skills play the most significant roles in aiding a community to redesign a safer future.
- URP:4295 Economic Development Policy** 3 s.h.  
Analysis of policies and programs at national, regional, state, and local levels that address problems of economic growth, development, decline.
- URP:4297 Financing Economic Development for Poverty Alleviation** 3 s.h.  
How public policies in general, and planning practices in particular, have an impact on an individual's likelihood of becoming poor, remaining poor, and getting out of poverty; how land use, housing, transportation, and economic development policies affect distribution and accessibility of jobs, education, housing, and public services.
- URP:4750 Environmental Impact Analysis** 3 s.h.  
In-depth exposure to the history and evolution of the U.S. Environmental Impact Assessment (EIA) process; discussion of major court cases; ecological, economic, and political aspects of current environmental controversies; exposure to real-world scenarios that are crucial to understanding the EIA process in action; field trips to six or seven environmental control facilities in Iowa City and neighboring areas. Prerequisites: GEOG:1070. Same as GEOG:4750.
- URP:4752 Eight Generation Planning: Envisioning Regenerative Cities** 3 s.h.  
Star Trek tells us that Captain Kirk will be born in Iowa in 2228, what should cities look like in that year? Students envision and design great regenerative cities in the age of Anthropocene—the period we are in which features substantial human influence on climate and the environment; exploration of contemporary philosophies and urban strategies for sustainability, resilience, post-scarcity abundance, human well-being, social inclusiveness, and justice in an era of rapid changes in society, technology, climate, and environment.

**URP:4760 Sustainable Urban Development: The Hong Kong Experience** 3 s.h.

Today about 52 percent of the world's population lives in urban areas; by 2050 almost 70 percent will be living in cities and towns; how the shape, size, and form of urban areas and how people live in them have significant impact on the environment; students explore theories and practices pertaining to sustainable urban development and learn about urban environmental issues around the world and significant socioeconomic problems arising from current patterns of urban development that are, on the whole, not sustainable; introduction to many innovative approaches for making cities more sustainable.

**URP:5678 Application Simulation to Transportation** 3 s.h.

Transportation system management and traffic engineering; application of real-time simulation and visualization. Prerequisites: CEE:3763 or CEE:4763. Same as CEE:5678.

**URP:5800 Environmental Economics and Policy** 3 s.h.

Reasons why markets fail in environmental realm (e.g., externalities, common pool resources, club goods, public goods); ecosystem services and techniques used for their valuation; revealed and stated preferences; cost-benefit analysis and role in policy-making process; tools to address environmental market failures, particularly command and control, taxes and subsidies, and mitigation markets; focus on air pollution, climate change, and water-related policies. Same as GEOG:5800, PBAF:5800.

**URP:6200 Analytic Methods I** 1-3 s.h.

Data science, statistics, quantitative reasoning, study design and analysis for planning and policy; applied quantitative and qualitative research, surveys, public participation; data sharing and data management for reproducibility and accessibility. Same as PBAF:6200.

**URP:6201 Analytic Methods II** 3 s.h.

Integration of methods with the planning process; application of multiple regression, population estimation and projection, survey methods, time series analysis, industrial growth and change; presentation of results to decision makers and the public. Prerequisites: URP:6200. Same as PBAF:6201.

**URP:6202 Land Use Planning: Law and Practice** 4 s.h.

Legal, social foundations of land use planning; comprehensive planning, zoning and subdivision review; legal aspects of land use, environmental planning; ordinance drafting; staff report writing; citizen participation.

**URP:6203 The Making of Cities: History and Theories of Planning** 3 s.h.

Histories and dynamics of urban change in Western cities as a reflection of social, cultural, economic, and environmental forces; alternative city planning philosophies, perspectives, and ethics relevant to planners and policy makers; special attention to how urban planning intersects with racism and social justice, as well as climate change and sustainability.

**URP:6205 Economics for Policy Analysis** 1,3 s.h.

Principles of economics, concepts and techniques of microeconomic analysis, market failures, role of government in the economy, tax policy, income inequality, and program evaluation. Same as PBAF:6205.

**URP:6208 Program Seminar** 1 s.h.

Planning, administrative, and policy processes; roles of planners, public policy analysts, and administrators; professional ethics and standards. Same as PBAF:6208.

**URP:6209 Field Problems in Planning I** 3 s.h.

Experience working on a two-semester project involving a current planning issue, usually for a client. Requirements: urban and regional planning graduate standing.

**URP:6210 Field Problems in Planning II** 3 s.h.

Continuation of URP:6209. Prerequisites: URP:6209. Requirements: urban and regional planning graduate standing.

**URP:6211 Community Outreach Practicum** 1-3 s.h.

Application of planning skills to community work by nonprofit organizations in local area; urban planners contributing to their communities; community outreach.

**URP:6225 Applied GIS for Planning and Policy Making** 1,3 s.h.

Analysis of U.S. Census data using GIS software; data and analytical needs for urban planning and public policy making; coverage of GIS topics including spatial analysis of social science and environmental problems, site selection; graphical display of results, including online maps; development of models in GIS. Same as PBAF:6225.

**URP:6227 Spatial Analysis in Planning and Policy Making** 3 s.h.

Databases, GIS, planning support systems; spatial model building and use of spatial statistics; applications to substantive problems in transportation, environment, housing, economic development. Recommendations: completion of an introductory GIS course.

**URP:6229 Practicum** 1-5 s.h.

Full-time internship of at least five months with a planning-related organization. Requirements: urban and regional planning graduate standing.

**URP:6233 Public Finance and Budgeting** 3 s.h.

Local budgeting process and revenue instruments available for local governments to finance their infrastructure; local budgeting process, mechanics of property tax and other revenue sources, connection between taxation and land use, economic development, growth management, and transportation; issues regarding financing K-12 public schools. Prerequisites: URP:6205 or PBAF:6205. Same as PBAF:6233.

**URP:6240 Public Management** 3 s.h.

Public management in a democratic society; balancing of administrative and democratic values and interests; examination of institutional, political, organizational, and ethical context of public management and policy making; students acquire important management, leadership, and decision making skills, as well as reflect on their values and behaviors with regard to administration and public service, particularly in a diverse and changing society; service in public sector contrasted with service in private and nonprofit sectors. Same as PBAF:6240.

**URP:6242 Planning and City Administration** 1 s.h.

Relationship of planners and other local government personnel; how planning fits into city management; city management view of local political process, provision of city services, finance and budgeting, human resources, intergovernmental relations, how meetings are run, dealing with the public.

**URP:6243 The Land Development Process** 3 s.h.

How land is developed; analysis of site suitability, preparation of subdivision plan, site plan review, development approval process, infrastructure and site preparation, negotiating local development politics; field trips. Prerequisites: URP:6202.

- URP:6245 Growth Management** 3 s.h.  
Causes and consequences of urban sprawl, shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges. Same as PBAF:6245.
- URP:6249 Sustainability Seminar** 1 s.h.  
Focus of increasing interest for planning students and practicing planners; involves environmental effects, economy, social justice; discussion and investigation of sustainability practice applied to local and regional efforts of public and private entities; greater awareness and understanding of the effectiveness and resource requirements of local activities addressing sustainability; presentations by the instructor, local tours, guest lectures.
- URP:6253 Designing Sustainable and Healthy Cities** 1-3 s.h.  
Principles and practical elements of urban design for sustainable and healthy cities; general urban design background for policy makers and planners; impacts of urban design for environmental sustainability and for community health and well-being; physical, mental, social, and environmental health as they are affected by urban form, air and water quality, green spaces and climate change impacts. Same as PBAF:6253.
- URP:6256 Environmental Policy** 3 s.h.  
Environmental policy formation and politics; comparative international perspective on the United States' experience. Same as PBAF:6256.
- URP:6257 Environmental Management** 3 s.h.  
Environmental best management practices for sustainable management of natural resources; open space and habitat protection, prairie and wetland restoration, water supplies management, natural hazard mitigation, farmland protection. Same as PBAF:6257.
- URP:6258 Systems and Scenario Thinking** 3 s.h.  
Quantitative and qualitative methods for complex dynamic systems; participatory modeling; systems thinking, integrated assessment, and scenario planning; decision making, policy development, and evaluation; nonlinear dynamics of cities, materials, energy, and human-environment relationships; numerical modeling; historical and contemporary roles of human activities in the Earth system. Same as PBAF:6258.
- URP:6260 Transportation Policy and Planning** 3 s.h.  
Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues. Same as PBAF:6260.
- URP:6265 Planning Sustainable Transportation** 3 s.h.  
Theories and methods of exerting public control over passenger and freight transportation; social and environmental regulation; effects of changing finance, regulation, and pricing policies, including privatization, tolls, impact fees. Same as GEOG:6264, PBAF:6265.
- URP:6266 Transportation and Land Use Planning** 3 s.h.  
Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, travel behavior modeling; current policies that influence travel behavior and urban form. Same as PBAF:6266.
- URP:6268 Freight Transportation Planning** 3-4 s.h.  
Freight transportation planning in the United States; surface modes, primarily trucking and rail, as well as trade-offs in bulk movements by inland waterways and pipelines; comparison with recent developments in policy, planning, and practice for surface transportation in other developed economies (e.g., Europe).
- URP:6271 Housing Policy** 3 s.h.  
Recent housing policy initiatives at federal, state, and local levels. Same as PBAF:6271.
- URP:6273 Community Development Through Creative Placemaking** 3 s.h.  
Examination of practices, ideas, and techniques for community development in small to large communities; particular focus on creative placemaking, in which planners and the public strategically shape the physical and social character of a neighborhood, town, city, or region around arts and cultural activities; students and faculty apply this approach to a specific community project; for students in the arts, humanities, social sciences, and planning and public affairs. Same as PBAF:6273.
- URP:6277 Affordable Housing Finance** 3 s.h.  
Financing development or rehabilitation of affordable housing; low-income housing tax credits, the housing finance system and current regulatory issues, mortgage discrimination, improving financing for rental housing.
- URP:6278 Nonprofit Organizational Effectiveness I** 3 s.h.  
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as HMP:6360, MGMT:9150, PBAF:6278, RELS:6070, SPST:6010, SSW:6247.
- URP:6279 Nonprofit Organizational Effectiveness II** 3 s.h.  
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: for HMP:6365—HMP:6360 or MGMT:9150. Same as HMP:6365, MGMT:9160, PBAF:6279, RELS:6075, SPST:6020, SSW:6248.
- URP:6280 Planning for Disaster Mitigation and Recovery** 2-3 s.h.  
Types of disasters that communities face; what role planners play, what role should they play; importance of hazard mitigation and planning for post-disaster recovery; where planners' unique skills play the most significant roles in aiding a community to redesign a safer future. Same as PBAF:6280.
- URP:6282 Grant Writing** 1-2 s.h.  
Same as PBAF:6282, SSW:6282.
- URP:6290 Economic Impact Assessment** 3 s.h.  
Economic impact and growth analysis, including economic base, income expenditure, input-output analysis; use of economic impact analysis in a cost-benefit context; industrial location and mobility theory with statistics applications. Prerequisites: URP:6205.
- URP:6295 Economic Development Policy** 3 s.h.  
Business and industrial locations, theories of regional growth and development, tools for regional economic analysis, economic impacts of COVID-19, development strategies in increasingly knowledge-driven and globalizing regional economies, economic development finance and policy, and economic development planning process. Same as PBAF:6295.

**URP:6297 Financing Economic Development for Poverty Alleviation** 3 s.h.

How public policies in general, and planning practices in particular, have an impact on an individual's likelihood of becoming poor, remaining poor, and getting out of poverty; how land use, housing, transportation, and economic development policies affect distribution and accessibility of jobs, education, housing, and public services. Same as PBAF:6297.

**URP:6305 Readings** arr.**URP:6315 Independent Study in Planning** 1-6 s.h.

Research and analysis of a special planning problem; opportunity to apply knowledge in area of specialization.

**URP:6320 Introduction to Graphic Communications** 2 s.h.

Visual communication techniques through use of print and digital media; how to graphically convey concepts and information to a variety of audiences; basic design principles to build a foundation in graphic communication; relationships between various software packages; advantages and shortcomings of various digital tools; development of professional graphic media that is beautiful and effective.

**URP:6325 Thesis: Urban and Regional Planning** arr.**URP:6330 Developing Graphic Content** 1 s.h.

Skills necessary to develop graphic content utilized by professionals in the field of urban and regional planning; students learn to use programs such as SketchUp, LayOut, Google Earth, and Lumion; produce maps, diagrams, experiential perspectives, renderings, and other visuals; and convey a variety of ideas pertaining to the urban environment.

**URP:6335 Internship** 2 s.h.

Work in a planning or related agency or nonprofit organization.

**URP:6340 Public Policy Analysis** 3 s.h.

Rationales and goals of public policy; major steps, key methods, and tools in policy analysis; professional delivery of policy recommendations. Same as PBAF:6340.

**URP:6400 Sustainable Development: The Kerala Experience** 3 s.h.

Exploration of student interests in social entrepreneurship, global health, microfinance, cultural production, environmental sustainability, or other development issues in India; varied disciplinary perspectives (i.e., public health, business, social work, geography, art); student work with Indian NGOs employing a diverse variety of techniques to address social problems such as child labor, health care for the poor, illiteracy, and disability services. Winter session. Same as PBAF:6400.

**Public Affairs Courses****PBAF:1030 Climate Leadership and Justice** 3 s.h.

Preparation for engaged students to lead on climate change in their communities; understanding climate change causes and impacts, consideration of intergenerational justice and equity in climate adaptation and mitigation; application of best practices in climate policies and planning; supporting community and business resilience and capacity building. Same as URP:1030.

**PBAF:2020 Environment and Society: Sustainability, Policy, and Politics** 3 s.h.

How society balances its needs against those of the natural environment when addressing modern challenges like climate change, conservation, and energy crises; exploration of sustainability through the lens of U.S. environmental policy and politics; application of fundamental theories of public policy to answer questions—when do environmental problems become policy problems; what economic, social, and political forces shape environmental policy decisions; and what are the consequences of environmental policies for individuals and organizations? GE: Social Sciences. Same as URP:2020.

**PBAF:2056 The Splendor of Cities** 3 s.h.

Evolution of city structure in response to social, cultural, political, and economic forces; cities through time and across continents; varied resource materials including video, novels, and texts. Same as URP:2056.

**PBAF:3117 Bureaucratic Politics and Public Administration** 3 s.h.

Examination of bureaucracy from political, theoretical, and practical perspectives; what we mean by "bureaucracy" and how it developed over time; political control of bureaucracy; how bureaucracy performs its tasks, including behavior of bureaucrats; role of nonprofit service delivery in modern bureaucracy; how bureaucracy affects American policy and politics. Same as POLI:3117.

**PBAF:3217 Negotiation and Conflict Resolution** 3 s.h.

Strategies of successful negotiation across a wide range of conflict situations; keys to success in peacefully resolving conflicts; personal, professional, legal, and political negotiations; apologizing; mediation as alternative to litigation; analysis of conflict characteristics to determine optimal negotiation strategies; development of negotiation interpersonal skills; practice negotiating under real world scenarios. Prerequisites: RHET:1030 or RHET:1040 or RHET:1060. Same as RHET:3009, URP:3217.

**PBAF:3560 Public Policy and Persuasion** 3 s.h.

Students build their skill set in policy analysis, formation, and communication through a social justice lens; engagement in service learning projects in one Iowa community, where work done directly impacts that community's ability to make changes; development of effective writing and oral presentation styles that can be adapted to different audiences; focus on homelessness policy using social policy and social justice concepts to explore work of policy makers who have "right-sized" existing systems to serve communities in crisis and propose solutions to systemic problems that disadvantage marginalized populations. Prerequisites: RHET:1030 or RHET:1040 or RHET:1060. Same as POLI:3560, RHET:3560, SJUS:3560.

**PBAF:3570 Poverty Policy** 3 s.h.

How poverty is regulated and addressed in the United States, and by federal, state, and local governments; particular focus on programs including Temporary Assistance for Needy Families (TANF), Section 8 housing, Medicaid, and Medicare; how these systems have changed over time; current models and innovations that have emerged in practice.

**PBAF:3580 Native American Public Policy** 3 s.h.

Exploration of ways that Native nations govern themselves, including the relationship between these sovereign entities and the U.S. government; topics include Indian Child Welfare Act, membership and enrollment, income and taxation, crime and justice; how these systems have changed over time; current practices and innovations that have emerged within different tribes.

**PBAF:4205 Economics for Policy Analysis 1-3 s.h.**

Principles of economics, concepts and techniques of microeconomic analysis, market failures, role of government in the economy, tax policy, income inequality, and program evaluation.

**PBAF:4233 Public Finance and Budgeting 3 s.h.**

Local budgeting process and revenue instruments available for local governments to finance their infrastructure; local budgeting process, mechanics of property tax and other revenue sources, connection between taxation and land use, economic development, growth management, and transportation; issues regarding financing K-12 public schools.

**PBAF:4239 Organizational Dynamics and Leadership 3 s.h.**

Examination of organizational theories and their applications including organizational structures, cultures, and behavioral characteristics as well as issues on management, ethics, and communication; role of a leader in public and nonprofit organizations involves organizing, controlling, planning, and motivating others for their excellent performance; use of articles, cases, and discussions to appreciate the effects of organization dynamics and leadership on organizational performance; students develop and hone their personal leadership philosophies.

**PBAF:4340 Public Policy Analysis 3 s.h.**

Rationales and goals of public policy; major steps, key methods, and tools in policy analysis; professional delivery of policy recommendations.

**PBAF:5111 American Public Policy 3 s.h.**

Introduction to study of public policy in the United States; development of analytical skills necessary to better understand and explain contemporary policy debates and public policy decision making that takes place at the local, state, and national levels in the United States; topics include a mix of theoretical approaches and substantive policy areas to better understand how policy is made, manipulated, and maintained; examination of demands and supports, institutional, and environmental variables that drive American public policy. Same as POLI:5111.

**PBAF:5117 Bureaucratic Politics and Public Administration 3 s.h.**

Examination of bureaucracy from political, theoretical, and practical perspectives; what we mean by "bureaucracy" and how it developed over time; political control of bureaucracy; how bureaucracy performs its tasks, including behavior of bureaucrats; role of nonprofit service delivery in modern bureaucracy; how bureaucracy affects American policy and politics. Same as POLI:5117.

**PBAF:5120 Public Policy Process 3 s.h.**

Theoretical and practical approaches to policy formation, adoption, implementation, and analysis; builds on theories of organizations, institutions, and interest group dynamics; important substantive policy areas (e.g., environmental, energy, housing, fiscal, infrastructure) that strengthen understanding of contemporary policies; application of theoretical and analytical tools to actual policy domains.

**PBAF:5200 American State Politics 3 s.h.**

Approaches to analysis of political behavior in American state governments; emphasis on cultures, parties, actors, processes, issues. Same as POLI:5200.

**PBAF:5800 Environmental Economics and Policy 3 s.h.**

Reasons why markets fail in environmental realm (e.g., externalities, common pool resources, club goods, public goods); ecosystem services and techniques used for their valuation; revealed and stated preferences; cost-benefit analysis and role in policy-making process; tools to address environmental market failures, particularly command and control, taxes and subsidies, and mitigation markets; focus on air pollution, climate change, and water-related policies. Same as GEOG:5800, URP:5800.

**PBAF:6200 Analytic Methods I 1-3 s.h.**

Data science, statistics, quantitative reasoning, study design and analysis for planning and policy; applied quantitative and qualitative research, surveys, public participation; data sharing and data management for reproducibility and accessibility. Same as URP:6200.

**PBAF:6201 Analytic Methods II 3 s.h.**

Integration of methods with the planning process; application of multiple regression, population estimation and projection, survey methods, time series analysis, industrial growth and change; presentation of results to decision makers and the public. Prerequisites: URP:6200. Same as URP:6201.

**PBAF:6205 Economics for Policy Analysis 1,3 s.h.**

Principles of economics, concepts and techniques of microeconomic analysis, market failures, role of government in the economy, tax policy, income inequality, and program evaluation. Same as URP:6205.

**PBAF:6208 Program Seminar 1 s.h.**

Planning, administrative, and policy processes; roles of planners, public policy analysts, and administrators; professional ethics and standards. Same as URP:6208.

**PBAF:6210 Public Affairs Capstone 3 s.h.**

Students work on a community, state, federal, or nonprofit-based project with focus on research and development of policy proposals and management action steps. Requirements: M.P.Aff. graduate standing.

**PBAF:6225 Applied GIS for Planning and Policy Making 1,3 s.h.**

Analysis of U.S. Census data using GIS software; data and analytical needs for urban planning and public policy making; coverage of GIS topics including spatial analysis of social science and environmental problems, site selection; graphical display of results, including online maps; development of models in GIS. Same as URP:6225.

**PBAF:6233 Public Finance and Budgeting 3 s.h.**

Local budgeting process and revenue instruments available for local governments to finance their infrastructure; local budgeting process, mechanics of property tax and other revenue sources, connection between taxation and land use, economic development, growth management, and transportation; issues regarding financing K-12 public schools. Prerequisites: URP:6205 or PBAF:6205. Same as URP:6233.

**PBAF:6238 Public Human Resource Management 3 s.h.**

Fundamental human resource management principles; application to a variety of human resource issues in public and nonprofit organizations including recruitment, employee development and evaluation, compensation and benefits, diversity, performance management systems, health/safety systems, and employee relations.

- PBAF:6239 Organizational Dynamics and Leadership** 3 s.h.  
Examination of organizational theories and their applications including organizational structures, cultures, and behavioral characteristics as well as issues on management, ethics, and communication; role of a leader in public and nonprofit organizations involves organizing, controlling, planning, and motivating others for their excellent performance; use of articles, cases, and discussions to appreciate the effects of organization dynamics and leadership on organizational performance; students develop and hone their personal leadership philosophies.
- PBAF:6240 Public Management** 3 s.h.  
Public management in a democratic society; balancing of administrative and democratic values and interests; examination of institutional, political, organizational, and ethical context of public management and policy making; students acquire important management, leadership, and decision making skills, as well as reflect on their values and behaviors with regard to administration and public service, particularly in a diverse and changing society; service in public sector contrasted with service in private and nonprofit sectors. Same as URP:6240.
- PBAF:6241 Strategic Management of Public and Nonprofit Organizations** 3 s.h.  
Application of well-known concepts of strategic planning and management to public and nonprofit organizations; topics include environmental assessment, mission identification, strategic issue identification, strategy formulation, strategic budgeting, strategic management and human relations, information technology and strategic management, performance measurement, strategic communication, strategic management and collaboration, strategic management and politics.
- PBAF:6245 Growth Management** 3 s.h.  
Causes and consequences of urban sprawl, shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges. Same as URP:6245.
- PBAF:6253 Designing Sustainable and Healthy Cities** 1-3 s.h.  
Principles and practical elements of urban design for sustainable and healthy cities; general urban design background for policy makers and planners; impacts of urban design for environmental sustainability and for community health and well-being; physical, mental, social, and environmental health as they are affected by urban form, air and water quality, green spaces and climate change impacts. Same as URP:6253.
- PBAF:6256 Environmental Policy** 3 s.h.  
Environmental policy formation and politics; comparative international perspective on the United States' experience. Same as URP:6256.
- PBAF:6257 Environmental Management** 3 s.h.  
Environmental best management practices for sustainable management of natural resources; open space and habitat protection, prairie and wetland restoration, water supplies management, natural hazard mitigation, farmland protection. Same as URP:6257.
- PBAF:6258 Systems and Scenario Thinking** 3 s.h.  
Quantitative and qualitative methods for complex dynamic systems; participatory modeling; systems thinking, integrated assessment, and scenario planning; decision making, policy development, and evaluation; nonlinear dynamics of cities, materials, energy, and human-environment relationships; numerical modeling; historical and contemporary roles of human activities in the Earth system. Same as URP:6258.
- PBAF:6260 Transportation Policy and Planning** 3 s.h.  
Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues. Same as URP:6260.
- PBAF:6265 Planning Sustainable Transportation** 3 s.h.  
Theories and methods of exerting public control over passenger and freight transportation; social and environmental regulation; effects of changing finance, regulation, and pricing policies, including privatization, tolls, impact fees. Same as GEOG:6264, URP:6265.
- PBAF:6266 Transportation and Land Use Planning** 3 s.h.  
Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, travel behavior modeling; current policies that influence travel behavior and urban form. Same as URP:6266.
- PBAF:6271 Housing Policy** 3 s.h.  
Recent housing policy initiatives at federal, state, and local levels. Same as URP:6271.
- PBAF:6273 Community Development Through Creative Placemaking** 3 s.h.  
Examination of practices, ideas, and techniques for community development in small to large communities; particular focus on creative placemaking, in which planners and the public strategically shape the physical and social character of a neighborhood, town, city, or region around arts and cultural activities; students and faculty apply this approach to a specific community project; for students in the arts, humanities, social sciences, and planning and public affairs. Same as URP:6273.
- PBAF:6278 Nonprofit Organizational Effectiveness I** 3 s.h.  
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as HMP:6360, MGMT:9150, RELS:6070, SPST:6010, SSW:6247, URP:6278.
- PBAF:6279 Nonprofit Organizational Effectiveness II** 3 s.h.  
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: for HMP:6365—HMP:6360 or MGMT:9150. Same as HMP:6365, MGMT:9160, RELS:6075, SPST:6020, SSW:6248, URP:6279.
- PBAF:6280 Planning for Disaster Mitigation and Recovery** 2-3 s.h.  
Types of disasters that communities face; what role planners play, what role should they play; importance of hazard mitigation and planning for post-disaster recovery; where planners' unique skills play the most significant roles in aiding a community to redesign a safer future. Same as URP:6280.
- PBAF:6282 Grant Writing** 1-2 s.h.  
Same as SSW:6282, URP:6282.

**PBAF:6295 Economic Development Policy 3 s.h.**

Business and industrial locations, theories of regional growth and development, tools for regional economic analysis, economic impacts of COVID-19, development strategies in increasingly knowledge-driven and globalizing regional economies, economic development finance and policy, and economic development planning process. Same as URP:6295.

**PBAF:6297 Financing Economic Development for Poverty Alleviation 3 s.h.**

How public policies in general, and planning practices in particular, have an impact on an individual's likelihood of becoming poor, remaining poor, and getting out of poverty; how land use, housing, transportation, and economic development policies affect distribution and accessibility of jobs, education, housing, and public services. Same as URP:6297.

**PBAF:6335 Internship 3 s.h.**

Internship; 240 hours of public affairs work with a public or nonprofit organization.

**PBAF:6340 Public Policy Analysis 3 s.h.**

Rationales and goals of public policy; major steps, key methods, and tools in policy analysis; professional delivery of policy recommendations. Same as URP:6340.

**PBAF:6400 Sustainable Development: The Kerala Experience 3 s.h.**

Exploration of student interests in social entrepreneurship, global health, microfinance, cultural production, environmental sustainability, or other development issues in India; varied disciplinary perspectives (i.e., public health, business, social work, geography, art); student work with Indian NGOs employing a diverse variety of techniques to address social problems such as child labor, health care for the poor, illiteracy, and disability services. Winter session. Same as URP:6400.

# Master of Public Affairs, M.P.Aff.

One of the enduring grand challenges is how we collectively, creatively, and democratically respond to key challenges facing our communities, nation, and the world. Among these challenges are environmental change, including an increased incidence and intensity of disasters such as flooding, sea level rise, and wildfires attributable to climate change; health care; an aging population; addiction; inadequate infrastructure; inequality; unaffordable housing; racism; transportation; immigration; economic development; and public safety.

In response, the Master of Public Affairs program trains future leaders to systematically and creatively address these and other challenges in the coming years. With its interdisciplinary public affairs infrastructure—representing colleges, departments, and centers across campus—the University of Iowa is a leader in public affairs locally and nationally. The program educates public affairs leaders who will creatively and knowledgeably address society's most critical issues and contribute to addressing the grand challenges of the 21st century.

## Requirements

The graduate Master of Public Affairs (M.P.Aff.) requires a minimum of 42 s.h. of credit. Students must earn a grade of B-minus or higher in all core and concentration area courses and must maintain an overall program g.p.a. of at least 3.00.

The required curriculum includes eight core courses, an internship, electives (including those taken within a concentration area), a one-semester capstone project, and an internship. Courses are offered by the School of Planning and Public Affairs (Graduate College), the Departments of Management and Entrepreneurship (Tippie College of Business), Civil and Environmental Engineering (College of Engineering), Educational Policy and Leadership Studies (College of Education), Geographical and Sustainability Sciences, Political Science, Sociology and Criminology, the M.A. in strategic communication program in the School of Journalism and Mass Communication (College of Liberal Arts and Sciences), the College of Public Health, and the Larned A. Waterman Iowa Nonprofit Resource Center (College of Law).

The Master of Public Affairs requires the following work.

## Core Courses

Code	Title	Hours
All of these:		
PBAF:5111	American Public Policy	3
PBAF:5117	Bureaucratic Politics and Public Administration	3
PBAF:6200	Analytic Methods I	3
PBAF:6205	Economics for Policy Analysis	3
PBAF:6208	Program Seminar	1
PBAF:6225	Applied GIS for Planning and Policy Making	1
PBAF:6233	Public Finance and Budgeting	3
PBAF:6240	Public Management	3

## Concentration Area

Students complete a total of 16 s.h. in consultation with their advisor, with at least 9 s.h. of these in coursework taken in the public and nonprofit management or public policy concentration area, and 7 s.h. in coursework taken from any of the two concentration areas or other courses as deemed appropriate. Students further develop in their concentration area by applying the concepts and skills gained in core coursework.

Students in the public policy concentration complete one of the required courses as well as an additional 6 s.h. within the public policy concentration.

## Public and Nonprofit Management Concentration

### Nonprofit Management

Code	Title	Hours
LAW:8753	Nonprofit Organizations: Structure, Governance, and Strategy	3
LAW:8755	Nonprofit Organizations: Advocacy, Collaboration, and Fundraising	3
MGMT:3500	Nonprofit Organizational Effectiveness I	3
MGMT:3600	Nonprofit Organizational Effectiveness II	3
MGMT:4600	Nonprofit Ethics and Governance	3

### Public Management

Code	Title	Hours
PBAF:6238	Public Human Resource Management	3
PBAF:6239	Organizational Dynamics and Leadership	3
PBAF:6241	Strategic Management of Public and Nonprofit Organizations	3
URP:6282	Grant Writing	2

### Strategic Communication

Code	Title	Hours
PBAF:3560	Public Policy and Persuasion	3
JMC:5200	Topics in Strategic Communication	3
JMC:5240	Digital Strategic Communication	3
JMC:5270	Leadership Communication	3
JMC:5300	Foundations of Strategic Communication	3

## Public Policy Concentration

### Required Courses

Code	Title	Hours
One of these:		
PBAF:6201	Analytic Methods II	3
PBAF:6340	Public Policy Analysis	3

## Criminal Justice

Code	Title	Hours
CRIM:3416	Race, Crime, and Justice	3
CRIM:3417	Community Corrections	3
CRIM:3600	Crime and Public Policy	3
CRIM:3425	Women, Crime, and Justice	3

## Economic Development Policy

Code	Title	Hours
URP:6295	Economic Development Policy	3
URP:6297	Financing Economic Development for Poverty Alleviation	3

## Educational Policy

Code	Title	Hours
EPLS:6222	Introduction to Educational Policy	3
EPLS:6225	Higher Education Policy	3
EPLS:6228	K-12 Education Finance and Policy	3

## Environmental Policy

Code	Title	Hours
URP:5800	Environmental Economics and Policy	3
URP:6256	Environmental Policy	3
URP:6257	Environmental Management	3
URP:6258	Systems and Scenario Thinking	3
CEE:3790	Resilient Infrastructure and Emergency Response	3
CEE:5410	Politics and Economics of the Food, Energy, Water Nexus	3
LAW:8433	Environmental Law	3
LAW:8622	International Environmental Law	3
POLI:3518	Water Wars: Conflict and Cooperation	3

## Health Policy

Code	Title	Hours
URP:6253	Designing Sustainable and Healthy Cities	1-3
HMP:5610	Health Policy	3
HMP:5650	Health Policy Analysis	3
HMP:6710	Federalism and Health Policy	3

## Housing and Community Development Policy

Code	Title	Hours
URP:6271	Housing Policy	3
URP:6273	Community Development Through Creative Placemaking	3

## Methods

Code	Title	Hours
PBAF:6201	Analytic Methods II	3
PBAF:6340	Public Policy Analysis	3

## Politics of Public Policy Making

Code	Title	Hours
PBAF:5120	Public Policy Process	3
PBAF:5200	American State Politics	3
JMC:5248	Strategic Political Communication	3
POLI:3102	The U.S. Congress	3
POLI:3104	Immigration Politics	3
POLI:3118	Interest Groups	3
POLI:3123	State Politics in Iowa	3
POLI:3203	Campaigns, Elections, and Voting Behavior	3
POLI:3204	Public Opinion	3
POLI:3519	Politics of Aging	3

## Sustainable Development

Code	Title	Hours
URP:5800	Environmental Economics and Policy	3
CEE:4107	Sustainable Systems	3
CEE:5410	Politics and Economics of the Food, Energy, Water Nexus	3
GEOG:3420	Sustainable and Green Building Concepts	3
GEOG:4750	Environmental Impact Analysis	3
GEOG:4770	Environmental Justice	3

## Transportation Policy

Code	Title	Hours
URP:6260	Transportation Policy and Planning	3
URP:6265	Planning Sustainable Transportation	3
URP:6266	Transportation and Land Use Planning	3

## Capstone Course

Students take the public affairs capstone course, typically in their final semester. They work on a community, state, federal, or nonprofit project in which they focus their efforts on an analysis of a contemporary public policy problem, research, development of policy proposals, and recommended action steps. This is done in tandem with the University's Iowa Initiative for Sustainable Communities (IISC), that for ten years has been providing public consultation to communities in Iowa.

Code	Title	Hours
This course:		
PBAF:6210	Public Affairs Capstone	3

## Internship Course

Students are required to complete an approved internship with a public agency or a nonprofit organization. They engage

in 240 hours of internship work under the supervision of a public affairs professional.

Code	Title	Hours
This course:		
PBAF:6335	Internship	3

## Final Examination

An oral and written exam constitute the final examination. If the oral exam is passed, then the written exam does not need to be taken.

### Combined Programs

## Undergraduate Degree/M.P.Aff.

Students working on an undergraduate degree program in the Tippie College of Business or the Colleges of Education, Engineering, Liberal Arts and Sciences, and Public Health who are interested in earning the Master of Public Affairs degree may apply to a combined undergraduate degree/M.P.Aff graduate degree program. The Undergraduate to Graduate (U2G) program enables students to begin work on the M.P.Aff. degree as they complete their baccalaureate degree. Combined degree programs enable students to earn both degrees in less time than it would take to earn the two degrees separately.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, visit Undergrad to Grad (U2G) on the Graduate College website.

### Admission

Admission requires an undergraduate degree and fulfillment of the minimum requirements of the Graduate College.

The deadline for funding consideration is January 15 for fall admission. Funding for those who submit materials after these dates is considered only as funding permits. Applications for admission are accepted until July 15; April 15 for international students. For spring admission, applications are accepted until December 1.

To apply, follow the directions on the Graduate Admissions website. Applicants can apply online and upload all supporting materials. International students without a U.S. degree or whose first language is not English must submit official Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), or Duolingo English Test (DET) scores before admission and then funding decisions can be made. All students requesting funding also must complete and upload the Funding Application/Award Form.

### Financial Support

Students receive financial support from the program primarily from teaching or research assistantships and from contract or grant-funded assistantships. Assistantships typically require 13-20 hours of work per week under the direction of a faculty member and are accompanied by a tuition scholarship.

Students initiate applications for financial support, and awards are made on the basis of merit, experience, and interests.

Assistantships may be renewed for a total of up to four semesters.

Fellowships are offered to new students and awarded as a flat sum of money. There is no work requirement for a fellowship.

Students applying for financial support are encouraged to submit application materials and requests for support by January 15 for fall enrollment and November 1 for spring enrollment. Students who apply after January 15 (fall or spring) are considered as remaining funds permit.

### Career Advancement

Graduates land positions in professional policy analytical and/or managerial service in the public and nonprofit sectors. The degree builds knowledge and skills in a mix of topics that includes policy, economics, statistics, research, and management and prepares students for professions that influence public policy through analysis, application, or management. They have a number of career choices available, many of which lead to executive positions in federal, state, and local governments, or in nonprofit agencies.

Example positions in the local, state, federal, nonprofit, and private sectors include:

- Local: government specialist leading to a city manager, community health director, or public housing manager
- State: program manager for a state housing authority or a policy analyst/program manager for a variety of state agencies
- Federal: presidential management fellow, or starting as a GS-9 position in the federal government in a variety of federal agencies
- Nonprofit: program director leading to a nonprofit organization director
- Public, private, and nonprofit: public and government relations specialist, lobbyist, or elected official

The School of Planning and Public Affairs provides career assistance efforts for both internship and post-graduation job seekers. It offers job information access and one-on-one advising support from the school's career services coordinator.

### Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- b Students complete a total of 16 s.h. in consultation with their advisor, with at least 9 s.h. of these in coursework taken in the public and nonprofit management or public policy concentration area, and 7 s.h. in coursework taken from any of the two concentration areas or other courses as deemed appropriate. Students in the public policy concentration complete one of the required courses as well as an additional 6 s.h. within the public policy concentration.
- c Work with faculty advisor to complete an approved internship with a public agency or nonprofit organization; 240 hours of internship work required under the supervision of a public affairs professional.
- d Typically taken in final semester.
- e Consists of both oral and written components.

# Urban and Regional Planning, M.S.

The M.S. in urban and regional planning is a two-year degree program fully accredited by the Planning Accreditation Board. It is built on the premise that planners must be educated in methods of policy analysis and that there is a common body of knowledge, represented in the core curriculum, that provides a solid foundation for all specializations in the field.

A wide range of educational backgrounds provide good preparation for graduate study in urban and regional planning. Students with undergraduate majors such as environmental policy and planning, architecture, anthropology, public policy, geographic information science, business administration, economics, engineering, communication studies, finance, geography, education, marketing, political science, sociology, history, journalism, and English currently study in the school. With an increasingly diverse student body and a low student-faculty ratio, the School of Planning and Public Affairs is committed to creating an environment that is inclusive and welcoming of all students. Approximately 26 full-time students and some part-time students are enrolled, and about 26 percent are international students.

The common core of courses and the design of the facilities allow students to get to know each other quickly. Students interact closely with faculty members in the classroom, in informal conversation, and while working on research projects. Students and faculty also collaborate in the second year capstone courses, URP:6209 Field Problems in Planning I and URP:6210 Field Problems in Planning II, to prepare plans and reports for communities throughout Iowa. This work is supported by the University's Iowa Initiative for Sustainable Communities, which was created by the School of Planning and Public Affairs.

Graduate students working toward a master's degree in urban and regional planning may elect to pursue one of the combined degree programs offered by the school in collaboration with the College of Engineering, the College of Law, the College of Public Health, the Department of Geographical and Sustainability Sciences, and the School of Social Work.

## Requirements

The Master of Science program in urban and regional planning requires 50 s.h. of graduate credit. The 50 s.h. required to complete the degree must include a minimum of 38 s.h. in the School of Planning and Public Affairs. Students must earn a grade of B-minus or higher in all core and concentration area courses and must maintain an overall program g.p.a. of at least 3.00.

The graduate curriculum is based on the philosophy that planners must develop the theoretical and analytic skills that will permit them to analyze social problems and evaluate public policies. Planners also must cultivate professional skills such as report writing, oral presentation, computer use, and team management in order to work effectively in various organizational and political environments.

Work for the master's degree includes core courses, an area of concentration, electives, and capstone courses. A final examination is required. A thesis is not required, although

students may petition to write one. Students are encouraged to complete an approved internship or practicum.

The M.S. with a major in urban and regional planning requires the following work.

## Core Curriculum

The core curriculum helps students develop an understanding of the institutions—social, economic, political, administrative, and legal systems—that provide the context for policy analysis and that constrain public choices. It also promotes development of the ability to identify social goals and normative criteria for evaluating public policies, as well as the analytic skills to perform such investigations.

The core requires a total of 24 s.h., including an advanced economic methods course (3 s.h.). The advanced economics methods course usually is taken during the first three semesters. Early core courses are drawn primarily from traditional disciplines, particularly economics and statistics, and include an introduction to land use planning and to theories and practice of planning. As students proceed through the curriculum, increasing emphasis is placed on the development of critical judgment and insight, achieved through the application of theory and methods to realistic planning problems and case studies.

The core curriculum includes the following courses; students may request a waiver of selected core courses on the basis of previous coursework.

Code	Title	Hours
All of these:		
URP:6200	Analytic Methods I	3
URP:6201	Analytic Methods II	3
URP:6202	Land Use Planning: Law and Practice	4
URP:6203	The Making of Cities: History and Theories of Planning	3
URP:6205	Economics for Policy Analysis	3
URP:6208	Program Seminar	1
URP:6225	Applied GIS for Planning and Policy Making	1
URP:6258	Systems and Scenario Thinking	3
<b>Advanced Economic Methods</b>		
And this course:		
URP:6233	Public Finance and Budgeting	3

## Concentration Area

Beginning in the second semester, students choose a concentration area and develop it by applying the concepts and skills developed in the core. Currently, the school's faculty and course offerings support five concentration areas: transportation planning, housing and community development, economic development, land use and environmental planning, and geographic information systems.

Students complete at least 9 s.h. of courses in their concentration area and 11 s.h. in additional elective coursework. Courses offered by other University departments and programs may supplement those offered by the School of Planning and Public Affairs.

Students may combine two concentration areas. Examples of combined areas are environmental and economic development planning, and transportation and community development planning. Students also may design other concentration areas, subject to faculty approval. For example, they may specialize in health services planning with appropriate coursework in the Department of Health Management and Policy or Occupational and Environmental Health, or in human services planning with courses in the School of Social Work.

## Capstone Courses

Students complete the following two capstone courses, usually during the third and fourth semesters. Students who complete a practicum are exempt from this requirement.

Code	Title	Hours
URP:6209	Field Problems in Planning I	3
URP:6210	Field Problems in Planning II	3

## Internship

Students are encouraged to complete an internship in a planning agency or related organization. To earn 2 s.h. of credit for the internship, students must submit a brief paper summarizing and evaluating their experience. Internships usually are paid staff positions and are completed during the summer between the first and second years or during the academic year.

Code	Title	Hours
This course:		
URP:6335	Internship	2

## Practicum

An extended internship, consisting of at least five months of full-time employment in a planning-related organization, may qualify as a practicum. A practicum generally takes place during summer after the first year and into the fall semester of the second year. It carries 5 s.h. of credit and substitutes for the internship and the capstone courses.

Code	Title	Hours
This course:		
URP:6229	Practicum	1-5

## Thesis

A thesis is not required, although students may petition to write one. Students may register for up to 6 s.h. of thesis credit. In addition, they may take up to 8 s.h. of readings to develop a thesis topic and prepare a literature review.

Code	Title	Hours
This course:		
URP:6325	Thesis: Urban and Regional Planning	arr.

## Final Exam

A final exam is required for all students. An oral and written examination constitutes the final exam for students who do not write a thesis. If the oral examination is passed, then the written examination does not need to be taken.

## Combined Programs

The School of Planning and Public Affairs participates in several combined degree programs, in which students work toward an M.S. in urban and regional planning at the same time they work toward another degree. Combined degree programs enable students to earn both degrees in less time than it would take to earn the two degrees separately.

### Undergraduate Degree/M.S.

Students working on an undergraduate degree program in the Tippie College of Business or the Colleges of Education, Engineering, Liberal Arts and Sciences, and Public Health who are interested in earning the M.S. in urban and regional planning may apply to a combined undergraduate degree/M.S. graduate degree program. The Undergraduate to Graduate (U2G) program enables students to begin work on the M.S. degree as they complete their baccalaureate degree. Combined degree programs enable students to earn both degrees in less time than it would take to earn the two degrees separately.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, visit Undergrad to Grad (U2G) on the Graduate College website.

### Graduate Degrees/M.S.

See "Two Master's Degrees" under Master's Degrees in the Manual of Rules and Regulations on the Graduate College website for information on earning concurrent master's degrees. The following combined degree programs are available.

- B.A. or B.S. in environmental policy and planning/M.S.; see Environmental Policy and Planning [p. 452] (College of Liberal Arts and Sciences) in the Catalog.
- B.S.E. in civil engineering/M.S.; see the Bachelor of Science in Engineering [p. 1468] and the B.S.E. in civil engineering [p. 1509] (College of Engineering) in the Catalog.
- J.D./M.S.; see Juris Doctor, J.D. [p. 1707] (College of Law) in the Catalog.
- M.S. in civil and environmental engineering with a sustainable water development subprogram/M.S.; see the M.S. in civil and environmental engineering [p. 1513] (College of Engineering) in the Catalog.
- M.S. in occupational and environmental health/M.S.; see the M.S. in occupational and environmental health [p. 2014] (College of Public Health) in the Catalog.
- M.S.W./M.S.; see the Master of Social Work, M.S.W. [p. 1021] (College of Liberal Arts and Sciences) in the Catalog.

Requirements for each combined degree program can vary. The minimum requirements for the urban and regional planning part of any combined degree include completion of at least 35 s.h. in School of Planning and Public Affairs courses (prefix URP), the core and capstone courses, 9 s.h. of a concentration, and the master's degree final examination. In the case of two master's degrees, all programs require at least 60 s.h. of credit.

Students who wish to enter a combined degree program must apply to the two degree programs separately; they must be admitted to both programs before they may be admitted to

the combined program. Contact the admissions coordinator at the School of Planning and Public Affairs for more information about combined degree programs.

## Admission

Admission to the School of Planning and Public Affairs requires an undergraduate degree and fulfillment of the minimum requirements of the Graduate College. For fall admission, prospective students should submit complete materials to Graduate Admissions by January 15 if funding is requested. Funding for those who submit materials after these dates is considered only as funding permits. Applications for admission are accepted until July 15; April 15 for international students. For spring admission, the deadline is November 1 if funding is requested. Applications are accepted until December 1.

To apply, follow the directions on the Graduate Admissions website. Applicants can apply online and upload all supporting materials. International students without a U.S. degree or whose first language is not English must submit official Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), or Duolingo English Test (DET) scores before admission and then funding decisions can be made. All students requesting funding also must complete and upload the Funding Application/Award Form.

## Financial Support

Students in the School of Planning and Public Affairs receive financial support from the program primarily from teaching or research assistantships and from contract or grant-funded assistantships. Assistantships typically require 13-20 hours of work per week under the direction of a faculty member and are accompanied by a tuition scholarship.

Students initiate applications for financial support, and awards are made on the basis of merit, experience, and interests. Assistantships may be renewed for a total of up to four semesters.

Fellowships are offered to new students and are awarded as a flat sum of money. There is no work requirement for a fellowship.

Students applying for financial support are encouraged to submit application materials and requests for support by January 15. Students who apply after that date are considered only as remaining funds permit.

## Career Advancement

Today's planners find themselves in demand for such diverse jobs as sustainability coordinator and planner, environmental analyst/planner, land use planner, transportation planner, community development planner, zoning coordinator, water resources planner, community organizer, economic development planner, recycling coordinator, planning director, neighborhood planner, state legislative analyst, planning consultant, and nonprofit project manager or director.

Recent graduates have taken positions with city, metropolitan, and regional planning agencies; state and federal government; nonprofit organizations; and private consulting firms. They work in all geographic regions of the United States and in countries around the world.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- b Students must complete at least 9 s.h. in one of the following concentration areas: Transportation Planning, Housing and Community Development, Economic Development, Land Use and Environmental Planning, or Geographic Information Systems. Work with faculty advisor to determine appropriate coursework and sequence.
- c Complete at least 11 s.h. of electives. Work with faculty advisor to determine appropriate coursework and sequence.
- d Typically done during the summer semester; credit can be taken during the summer, fall or spring. To earn 2 s.h. of credit for the internship, submit a brief paper summarizing and evaluating the experience.
- e Capstone coursework; grade of B- or better required.
- f If oral exam not passed, must pass written exam.

# Public Digital Humanities

## Student Advisor

- Thomas Keegan (English)

**Graduate certificate:** public digital humanities

**Faculty:** <https://www.lib.uiowa.edu/studio/people/>

**Website:** <https://www.lib.uiowa.edu/studio/pdh-certificate/>

The Certificate in Public Digital Humanities welcomes students with no prior training in the digital humanities. The certificate program offers credentials to graduate students who plan to incorporate digital technology into their future research, teaching, or careers. Students learn interdisciplinary ways of conceiving of their own and other's digital work, while exploring digital tools that underlie many humanistic and social scientific research projects. Students also learn important skills such as how to manage an original project, collaborate with digital humanities scholars and practitioners across different departments, programs, units, and centers, participate in teams, and communicate technical information to a nonspecialist audience.

The certificate provides crucial training and education for the 21st-century humanist interested in the intersection between technology and research.

The Certificate in Public Digital Humanities is administered by the Graduate [p. 1586] College.

## Programs

## Graduate Program of Study Certificate

- Certificate in Public Digital Humanities [p. 1682]

# Public Digital Humanities, Graduate Certificate

## Requirements

The graduate Certificate in Public Digital Humanities requires 12 s.h. of coursework. Students must maintain a g.p.a. of at least 3.00 in work for the certificate.

The Certificate in Public Digital Humanities requires the following coursework.

## Required Course

Code	Title	Hours
This course:		
CLAS:7290/ SLIS:7290	Digital Humanities Theory and Practice	3

## Electives

Students choose elective coursework to suit their disciplinary or technical needs. Since electives are updated every semester, students can view a full list of available elective courses as well as access an elective course petition form; visit Public Digital Humanities Certificate on the University of Iowa Libraries website.

Code	Title	Hours
6 s.h. from these:		
AFAM:6500/ AMST:6500	Critical Readings in Cultural Studies: Stuart Hall's Legacy and Influences	3
AMST:3600/ AFAM:3600	Digitizing Blackness	3
AMST:5000	Interdisciplinary Research in American Studies	3
ARTH:3000	Digital Approaches to the Study of Art	3
CINE:4620	Topics in Film Form, Style, and Theory (when topic is film adaptation)	3
CLSL:6014	Later Empire (when topic is digital text analysis)	arr.
COMM:6336	Seminar in Rhetorical Theory (when topic is critical approaches to digital culture)	1-4
DANC:3890/ DIGA:3890/ INTM:3890/ THTR:3890	Producing and Directing Digital Video	3
EDTL:4210/ MUSM:4210	Museum Without Walls: Museum, Art Education, and Community Engagement in the Digital Age	3
ENGL:3182	Digital Cultures and Literacies	3
ENGL:6080	New Media Poetics	3
GEOG:3540/ IGPI:3540	Geographic Visualization	3

GEOG:4150/ GHS:4150/ IGPI:4150	Health and Environment: GIS Applications	3
GRAD:6510	Introduction to Programming	1
GRAD:6521	Scholarly Communication and Journal Publishing	1
GRAD:6530	Open Source Web Mapping for Beginners	1
GWSS:3050	Topics in Gender, Women's, and Sexuality Studies (when topic is race, gender, and sexuality in the digital humanities)	1,3
HIST:6002	Introduction to Graduate Studies in History: Historiography and Methods (when topic is digital related)	3
IGPI:4580/ STAT:4580	Data Visualization and Data Technologies	3
JMC:3122	Digital and Gaming Culture	3
JMC:3425	Personal Branding and Building a Niche	3-4
JMC:3640	Information and Data Visualization	3-4
JMC:6333	Seminar in Media Communication (when topic is critical media studies or digital cultures or global digital media)	3
RHET:7500	Science Communication in the Digital Age	2-3
SLIS:6100/ IGPI:6100	Database Management	3
SLIS:6120/ IGPI:6120	Natural Language Processing	3
SLIS:6140/ IGPI:6140	Digital Environments	3
SLIS:6145	Digital Preservation and Stewardship	3
SLIS:6155/ IGPI:6155	Information Visualization	3
SLIS:6350	Archives: Theory and Practice	3
SLIS:6411	Topics in Library and Information Science (when topic is designing "dataviz")	1-3
UICB:4340/ ARTS:4340	Digital Design for Artists' Books	3

## Capstone Course

Students should complete all certificate coursework before they enroll in the capstone course.

Code	Title	Hours
This course:		
GRAD:6590/ SLIS:6590	Digital Humanities Capstone	3

View Public Digital Humanities Certificate on the University of Iowa Libraries website for more information.

# Translational Biomedicine

## Executive Associate Dean

- Patricia L. Winokur

## Education Directors

- Donna A. Santillan (Obstetrics and Gynecology), Marin L. Schweizer (Epidemiology/Internal Medicine)

**Graduate degree:** M.S. in translational biomedicine

**Website:** <https://icts.uiowa.edu/>

The Translational Biomedicine Program offers training in translational biomedicine, biostatistics, ethics, and in various elective areas while providing time to conduct mentored research under the direction of an interdisciplinary team. It is specifically tailored to clinicians in medicine, nursing, pharmacy, dentistry, and psychology, as well as to Ph.D. researchers conducting translational research in the biomedical sciences.

## Related Programs

### Certificate

The Department of Epidemiology and the Institute for Clinical and Translational Science offer the graduate certificate program in translational and clinical investigation; see the Certificate in Translational and Clinical Investigation [p. 2021] (College of Public Health) in the Catalog.

### Master of Science

The Department of Epidemiology (College of Public Health) offers an M.S. in clinical investigation [p. 1991] which may be a good alternative to the Translational Biomedicine Program.

## Programs

## Graduate Program of Study

### Major

- Master of Science in Translational Biomedicine [p. 1684]

## Facilities

Training is conducted mainly in the laboratories and teaching facilities of the Carver College of Medicine and the College of Public Health. The University's Institute for Clinical and Translational Science is available for research training. The program also is linked with the Carver College of Medicine's graduate training program in clinical research.

## Courses

## Translational Biomedicine Courses

**TBM:5000 Translational Biomedical Research** arr.  
Student research guided by mentor.

**TBM:5001 Introduction to Translational Biomedicine** 3 s.h.

Basis for clinical and translational research; introduction to principles of experimental design for patient- and population-oriented research; approaches available to clinical and translational investigators (e.g., statistics, questionnaires, ethics, imaging, information technology); infrastructure that supports clinical and translational investigators at the University of Iowa and nationally; for early-career clinicians/scientists and established investigators. Requirements: enrollment in translational biomedicine M.S. program.

**TBM:5002 Critical Thinking and Communication: Study Design and Commercialization** 1 s.h.

Various study design methodologies and process of commercialization; presentations of current projects. Requirements: candidacy for M.S. in translational biomedicine.

**TBM:5003 Critical Thinking and Communication: Scientific Writing and Presentation Strategies** 1 s.h.

Grant development and journal writing process; development of effective scientific presentations.

**TBM:5004 Critical Thinking and Communication: Career Development and the Funding Process** 1 s.h.

Introduction to a variety of career development awards and their requirements; opportunity to work on personal career development grant applications.

**TBM:5005 Critical Thinking and Communication: Leadership, Team Science, and Community Engagement** 1 s.h.

Leadership skills for managing and developing a research team; leading and organizing a team; managing and sharing resources with other faculty and fellows; finding, hiring, and keeping good people; leading productive meetings; delegation strategies, resources and tools for quality community engagement; information on applying and teaching leadership skills to mentees.

# Translational Biomedicine, M.S.

The goals of the M.S. program in translational biomedicine are to:

- promote interaction and collaboration among researchers across the translational research spectrum;
- enrich understanding of T1 research (laboratory), T2 research (application to evidence-based practice), T3 research (implementation and dissemination), and T4 research (population studies and policy development) for basic and clinical scientists to expand the relevance of their work in these areas; and
- develop skills in ethical decision making, scientific leadership, team building, networking, and research program management.

## Requirements

The Master of Science program in translational biomedicine (TBM) requires a minimum of 34 s.h. of graduate credit plus a final project. Students must maintain a cumulative graduate g.p.a. of at least 3.00 in all UI coursework. The plan of study for students in the two-year program is tailored to their scientific goals and interests.

The program is designed to teach members of scientific teams how to move biomedical discoveries into clinical applications and beyond. It is tailored for individuals who have completed doctoral-level training in one area of biomedicine and wish to apply their expertise to the translational research spectrum. The program admits individuals who hold medical or graduate degrees (e.g., M.D., D.O., D.D.S., D.N.P., Ph.D., Pharm.D., D.V.M., or the equivalent) and are employed by the University of Iowa at the faculty ranks of associate professor, assistant professor, instructor/associate, fellow physician, or postdoctoral scholar/fellow.

The M.S. with a major in translational biomedicine requires the following coursework.

## Core Courses

Code	Title	Hours
All of these:		
TBM:5000	Translational Biomedical Research	9
TBM:5001	Introduction to Translational Biomedicine	3
TBM:5002	Critical Thinking and Communication: Study Design and Commercialization	1
TBM:5003	Critical Thinking and Communication: Scientific Writing and Presentation Strategies	1
TBM:5004	Critical Thinking and Communication: Career Development and the Funding Process	1

TBM:5005	Critical Thinking and Communication: Leadership, Team Science, and Community Engagement	1
BIOS:4120	Introduction to Biostatistics	3
BIOS:5120	Regression Modeling and ANOVA in the Health Sciences	3-4
or EPID:5241	Statistical Methods in Epidemiology	
EPID:4400	Epidemiology I: Principles	3
EPID:6950	Clinical Research Ethics	2
<b>Total Hours</b>		<b>27-28</b>

## Electives

Students must earn a minimum of 6 s.h. in graduate-level elective coursework pertinent to their educational goals. Electives may be selected from the lists below, or students may obtain approval for other courses with program administration approval.

### Biostatistics

Code	Title	Hours
BIOS:5130	Applied Categorical Data Analysis	3
BIOS:5310	Research Data Management	3
BIOS:6210	Applied Survival Analysis	3
BIOS:6310	Introductory Longitudinal Data Analysis	3
BIOS:7600	Advanced Biostatistics Seminar	0-3

### Device Development

Code	Title	Hours
BME:5101	Biomaterials and Implant Design	3
BME:5530	Design of Circulatory Implants and Artificial Organs	3
BME:5640	Ergonomics of Occupational Injuries	3

### Drug Discovery

Code	Title	Hours
BME:5330	Computational Genomics	3
PCOL:4130	Drug Mechanisms and Actions	3
PCOL:5135	Principles of Pharmacology	1
PCOL:5136	Pharmacogenetics and Pharmacogenomics	1
PCOL:6203	Pharmacology for Graduate Students	6
PCOL:6250	Advanced Problem Solving in Pharmacological Sciences	1
PHAR:5512	Drug Discovery and Mechanisms	3

### Epidemiology

Code	Title	Hours
EPID:5214	Meta-Analysis of Epidemiologic Studies	3

EPID:5241	Statistical Methods in Epidemiology	4
EPID:5500	Introduction to Clinical Epidemiology	3
EPID:5560	Introduction to Molecular Epidemiology	3
EPID:5610	Intermediate Epidemiology Data Analysis with SAS and R	3
EPID:6400	Epidemiology II: Advanced Methods	4
EPID:6900	Design of Intervention and Clinical Trials	3

## Genetics

Code	Title	Hours
ACB:6200	Special Topics in Genetics	1
BIOL:3713	Molecular Genetics	4
BIOL:3373	Human Population Genetics and Variation	3
BIOL:5412	Fundamental Genetics - Graduate Lecture	3
GENE:5173	Computational Genomics	3
GENE:6150	Genetic Analysis of Biological Systems	3
GENE:7191	Human Molecular Genetics	3
MMED:6215	Transcription and Multifunctional Regulation by RNA	1
MMED:6250	Mechanisms of Parasitism Journal Club	1
PCOL:5136	Pharmacogenetics and Pharmacogenomics	1

## Informatics

Code	Title	Hours
BIOL:4213	Bioinformatics	2,4
BIOL:4386	Introduction to Scientific Computing for Biologists	3
CS:5110	Introduction to Informatics	3
IGPI:3314	Genomics	3

## Innovation

Code	Title	Hours
ENTR:2000	Entrepreneurship and Innovation	3
ENTR:9400	Evaluating Innovation Opportunities	2-3
LAW:9717	Iowa Medical Innovation Group Seminar	arr.
MED:8073	Biomedical Innovation	1
NURS:6553	Seminar on Innovations	4

## Neuroscience

Code	Title	Hours
BIOL:2753	Introduction to Neurobiology	3
NSCI:5212	Foundations in Behavioral and Cognitive Neuroscience	4
NSCI:5653	Fundamental Neurobiology I	3

PSY:6370	Principles of Neuropsychology	3
----------	-------------------------------	---

## Final Project

In addition to completion of the 34 s.h. in required coursework, scholars must submit a final project. The project may be in one of the following formats.

- A complete grant application for a K01, K08, K23, K08, R01, R03, R21, a U.S. Department of Veterans Affairs career development award, or the equivalent. The R03 completed as part of the required grant writing course may not be submitted as the final project.
- An original research manuscript that is of acceptable quality for a peer-reviewed biomedical journal (the paper can be ready for submission, under review, or already published). The manuscript must contain the following components: a structured abstract; an introductory section that adequately frames the research question addressed; and a methodology section that sufficiently describes the following elements (study design, study sample, data collection strategies and sources, data elements, and data analysis), results of the study, and a discussion including a description of the relationship of the current findings to prior relevant research and/or policy implications of the findings and methodological limitations.

## Admission

The Translational Biomedicine Program welcomes applicants who have diverse educational and scientific backgrounds and varied research interests. Applicants must have a strong interest and background in a health science profession and knowledge of basic sciences and medicine.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Translational biomedicine applicants must:

- have a doctoral-level degree in a biomedical discipline (e.g., M.D., D.O., D.D.S., D.N.P., Ph.D., Pharm.D., D.V.M., or the equivalent);
- be employed by the University of Iowa as an associate professor, assistant professor, instructor/associate, a fellow physician, or a postdoctoral scholar/fellow;
- be engaged in scientific research with a University of Iowa mentor who has funding from a peer-reviewed source (e.g. National Institutes of Health, National Science Foundation, and so forth);
- hold a bachelor's degree from a regionally accredited American college or university or an equivalent degree from an international institution, as determined by the University of Iowa Office of Admissions; and
- have a g.p.a. of at least 3.00 or the international equivalent, as determined by the University of Iowa Office of Admissions.

Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL), a score of at least 7.0 with no subscore lower than 6.0 on the International English Language Testing System (IELTS), or a score of at least 105 on the Duolingo English Test (DET).

Applicants must submit a curriculum vitae, a statement of research interest and career goals, and three letters of recommendation. One letter must be from the applicant's UI

research mentor; the program recommends that the second be a letter of support from the applicant's department chair.

Students and their mentors must guarantee sufficient time for coursework and research. The program does not require a specific percent effort, but successful candidates would likely devote 50-75 percent of their time to a combination of coursework and research.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

TBM:5005	Critical Thinking and Communication: Leadership, Team Science, and Community Engagement	1
Elective course <sup>c</sup>		3
<b>Hours</b>		<b>7</b>
<b>Total Hours</b>		<b>33-35</b>

- Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- Complete one of the following formats: a complete grant application (K23, K08, K01, R01, R03, R21, or VA career award) or an original research manuscript (>2500 words) of published or in-publishable quality for a peer-reviewed journal. Additional requirements apply.
- Elective coursework pertinent to educational goals and background may be selected from specific lists in Biostatistics, Device Development, Drug Discovery, Epidemiology, Genetics, Informatics, Innovation, and Neuroscience. Program administration approval required for other courses.

# Transportation Studies

## Director, School of Planning and Public Affairs

- Lucie Laurian

## Coordinator, Transportation Studies

- Steven Spears (Planning and Public Affairs)

**Graduate certificate:** transportation studies

**Faculty:** <https://sppa.uiowa.edu/faculty-staff>

**Website:** <https://sppa.uiowa.edu/>

Transportation is vital to modern society. The United States, like other nations, faces many critical transportation problems and issues. The highway system is reaching an advanced stage of its life cycle, transportation finance is unsustainable, public transit operating deficits are growing, the quality of transportation available to many citizens is unacceptably low, serious inequities exist between transportation modes, and extensive changes are called for in traditional transportation institutions. New approaches to financing the nation's road system are badly needed.

Transportation engineers and planners draw on a number of skills to respond to the challenges they face. They must analyze and forecast the movement of people and goods within and between cities; identify effective and efficient means for providing desired transportation services; price these services properly; and evaluate the impact that transportation changes have on land use, environmental quality, economic activity, the local or regional economy, and various subgroups within society.

No single academic discipline can supply all of the theories, principles, or methods needed to address the varied and complex problems in transportation. Recognizing this, the Department of Civil and Environmental Engineering [p. 1500] and the School of Planning and Public Affairs [p. 1665] participate in the interdisciplinary Transportation Studies Program, through which students in the participating units can earn the Certificate in Transportation Studies along with their graduate degrees.

The Departments of Industrial and Systems Engineering [p. 1546] and Mechanical Engineering [p. 1562] also participate in the transportation certificate program, offering courses in human factors and safety issues in transportation. The Certificate in Transportation Studies is coordinated by the School of Planning and Public Affairs [p. 1665].

## Programs

### Graduate Program of Study

#### Certificate

- Certificate in Transportation Studies [p. 1688]

# Transportation Studies, Graduate Certificate

## Requirements

The graduate Certificate in Transportation Studies requires 15 s.h. of graduate credit. Students must earn a cumulative g.p.a. of at least 3.00 in certificate coursework, including no grade below B-minus. They may earn the certificate in conjunction with a M.S. or Ph.D. in civil and environmental engineering or with a M.S. in urban and regional planning.

Individuals working toward degrees in other transportation-related disciplines are encouraged to apply to the Transportation Studies Program. Depending on a student's background, additional coursework in statistics, computer programming, simulation, mathematics, and operations research may be required for the certificate. Credit earned in these courses may not be applicable to a student's degree program.

Students enrolled in the certificate program may wish to participate in faculty-led transportation research which may explore topics such as system planning, traffic operations and engineering, spatial data systems and analysis, simulation applications, and policy issues.

## Certificate/M.S. or Ph.D. in Civil and Environmental Engineering

Students working toward a Master of Science or a Doctor of Philosophy in civil and environmental engineering may earn the Certificate in Transportation Studies by completing a total of 15 s.h. from the courses listed below. Not all courses are offered every semester; view MyUI to determine when specific courses are offered.

### Fall

Code	Title	Hours
Students must take at least two of these fall semester courses:		
CEE:4762	Design of Transportation Systems	3
CEE:4763	Traffic Engineering	3
CEE:5678	Application Simulation to Transportation	3
URP:6266	Transportation and Land Use Planning	3

### Spring

Code	Title	Hours
Students must take all of these spring semester courses:		
CEE:4160	Introduction to Bridge Engineering	3
CEE:4176	Transportation Research Methods and Analysis	3
URP:6260	Transportation Policy and Planning	3

Engineering students may apply to the certificate program through the Graduate College and the Department of Civil and Environmental Engineering. See Civil and Environmental

Engineering [p. 1500] (College of Engineering) in the Catalog for information about graduate study and degree requirements in that department.

## Certificate/M.S. in Urban and Regional Planning

Students working toward a Master of Science in urban and regional planning may earn the Certificate in Transportation Studies by completing a total of 15 s.h. from the courses listed below. Not all courses are offered every semester; view MyUI to determine when specific courses are offered.

### Fall

Code	Title	Hours
URP:6265	Planning Sustainable Transportation	3
URP:6266	Transportation and Land Use Planning	3
URP:6290	Economic Impact Assessment	3

### Spring

Code	Title	Hours
URP:4262	Transportation Research Methods and Analysis	3
URP:6233	Public Finance and Budgeting	3
URP:6260	Transportation Policy and Planning	3
CPH:4220	Global Road Safety	3

Master of Science in urban and regional planning students may apply to the certificate program through the Graduate College and the School of Planning and Public Affairs. See Planning and Public Affairs [p. 1665] (Graduate College) in the Catalog for information about graduate study and degree requirements in the school.

# College of Law

## Dean

- Kevin K. Washburn

## Associate Deans

- Carin N. Crain, Ann Laquer Estin, Thomas P. Gallanis, Emily A. Hughes, Adrien K. Wing

## Assistant Deans

- Collins B. Byrd, Jill De Young, Gordon S. Tribbey

## Director, Law Library

- Carissa J. Vogel

**Undergraduate certificate:** human rights

**Professional degrees:** J.D.; LL.M.; M.S.L.; S.J.D.

**Faculty:** <https://law.uiowa.edu/faculty-and-scholarship/meet-our-faculty>

**Website:** <https://law.uiowa.edu>

The University of Iowa College of Law is the oldest law school west of the Mississippi River. Founded in 1865 as the Iowa Law School, the college is a charter member of the American Association of Law Schools and an American Bar Association-approved law school.

One of 11 colleges at the University of Iowa, the College of Law is part of Iowa City's unique cultural community. Students, faculty, and staff work together in a friendly, relaxed, and productive environment that puts students' needs first.

A longstanding commitment to inclusion and diversity is a source of pride for the College of Law, which was one of the first schools in the nation to grant a law degree to a woman (1873) and to an African American (1879). Diversity is central to the college's educational philosophy and to its core mission of preparing culturally proficient graduates who are capable of intellectual inquiry, critical and reflective thinking, and engagement.

Iowa's challenging law school curriculum carefully balances substantive courses, perspective offerings, examination of ethical values and professionalism, and experiential programs, including a highly active in-house legal clinic. The college's low student-faculty ratio and the faculty's open-door policy ensure that students have opportunities for interaction and collaboration with their law professors.

The college's writing program—one of the strongest among law schools nationwide—is integral to all students' academic experience. During both semesters of their first year, students take a small-section course in legal analysis, writing, and research. During the second and third years, they complete four additional writing units. Among opportunities for completing the writing requirement is work on one of the law school's four student-run scholarly journals: *Iowa Law Review*; *Journal of Corporation Law*; *Journal of Gender, Race & Justice*; and *Transnational Law & Contemporary Problems*.

## Programs

### Undergraduate Program of Study

- Certificate in Human Rights (under University of Iowa Center for Human Rights [p. 1713])

## Professional Programs of Study

- Juris Doctor [p. 1707]
- Master of Laws [p. 1710]
- Master of Studies in Law [p. 1711]
- Doctor of Juridical Science [p. 1712]

## Facilities

### Facilities and Resources

#### Boyd Law Building

The Willard L. Boyd Law Building exemplifies Iowa's continuing commitment to legal education and the legal profession. The building's large, circular structure reflects the special character of the Iowa law school and allows the college to operate in a physical environment in which every square foot of space is designed to promote the college's academic and professional programs.

Among the building's facilities are classrooms, the Levitt Auditorium, the Law Library, faculty and administrative offices, offices for the college's cocurricular programs, meeting rooms, and a bookstore. The first floor features the new Lauridsen Family Law Commons, a renovation project completed in 2016. This space provides ample areas for studying, including two conference rooms, two seminar rooms, and the Court Café. The third floor of the Boyd Law Building is where the college's clinical law programs are located. This suite functions as a teaching law firm, offering ease of access, usability, and visibility.

#### Law Library

The centerpiece of the Boyd Law Building is the University of Iowa Law Library. The Law Library has one of the most comprehensive collections of legal materials in the country, containing more than 1.4 million separately cataloged titles. A particular strength of the library is its collection of U.S. legal materials. The Law Library also holds an exceptionally strong collection of materials in foreign, comparative, and international law, including a print collection comprising more than 280,000 volumes and over 1,500 serials and subscriptions.

### Research Centers and Programs

Participation in research centers and outreach programs is an important part of the College of Law's service to professional and civic communities.

#### Iowa Innovation, Business & Law Center

The Iowa Innovation, Business & Law Center is an interdisciplinary teaching and research venture that brings together faculty members who teach and study problems of business, technology, innovation, regulation, and legal policy from diverse perspectives. The center's purpose is twofold: first, it offers an innovative curriculum and outstanding legal training in areas pertaining to government regulation of entrepreneurship, innovation, and management of resources; second, it encourages creative individual and collaborative interdisciplinary research in these areas.

#### Labor Center

The University of Iowa Labor Center provides educational programs and research support to Iowa's working people and

their organizations. Since 1951, the Labor Center has acted as a bridge between the University and Iowa's labor community.

## Larned A. Waterman Iowa Nonprofit Resource Center

The Larned A. Waterman Iowa Nonprofit Resource Center offers information and assistance from across the University of Iowa to help Iowa's charitable nonprofit organizations become more effective in building their communities.

## Law, Health Policy & Disability Center

The Law, Health Policy & Disability Center is a leader in law, technology, education, and research focused on improving the quality of life for persons living with disabilities. Based at the University of Iowa College of Law, the center concentrates on public policy and its impact on persons with disabilities, emphasizing employment, self-determination, and self-sufficiency.

## National Health Law and Policy Resource Center

The National Health Law and Policy Resource Center, founded in 1981, promotes laws and public policies that foster and facilitate accessible, affordable, and quality health services and related services for all Americans, particularly members of vulnerable and disadvantaged populations. The center provides a nonpartisan forum for informed dialogue between academics, practitioners, and public policy makers based on the best available data and information about important health law and policy issues.

## University of Iowa Center for Human Rights

The University of Iowa Center for Human Rights was founded in 1999 as an outgrowth of the University's year-long commemoration celebrating the 50th anniversary of the Universal Declaration of Human Rights. Based in the College of Law, the center engages in human rights teaching, scholarship, and public engagement.

## Courses

- Law Courses [p. 1690]
- Law Study Abroad Courses [p. 1705]

The following courses are those offered by the College of Law during the past four academic years and those scheduled to be offered during the coming academic year. See the Guide to Courses under Courses and Curriculum on the College of Law website for a list of College of Law courses defined by Interpretation 509-1 of the American Bar Association Standards for the Approval of Law Schools.

## Law Courses

### LAW:4800 Undergraduate Clinical Law Internship Program 3,5 s.h.

Students learn about the law school experience and legal careers through intensive training in a range of lawyering skills and collaboration with teams of law students on actual client matters; students enrolled in CELP work with law students representing a nonprofit or other entity using nonlitigation means to advance social or economic justice; students enrolled in the Federal Criminal Defense Clinic work as investigators with law students representing indigent criminal defendants in the Northern District of Iowa; involves weekly seminars and team supervision, biweekly undergraduate supervision meetings.

### LAW:8006 Civil Procedure 4 s.h.

Procedure before trial; commencement of a suit; subject matter jurisdiction; jurisdiction over the person and venue; pleadings, motion practice, including summary judgment, simple joinder of parties and claims in determining scope and size of the lawsuit; pretrial discovery procedures, the trial, claim and issue preclusion.

### LAW:8010 Constitutional Law I 3 s.h.

Constitutional allocation of governmental powers; doctrine of judicial review and nature of judicial function in constitutional cases; relationships among several branches of national government; the federal system, including powers delegated to national government, powers reserved to states, and intergovernmental immunities; role of judicial process in structuring limits within which society operates; institutional development of legal system, relationship among institutions within the system.

### LAW:8017 Contracts 4 s.h.

Law that governs the otherwise unregulated sector of the economy and concerns the making and enforcement of promises, usually as part of a bargain; basics-formation of agreements, consideration, invalidating causes, parol evidence and interpretation, conditions, remedies; roles of promises and promissory exchanges in a modern economy; limitations the law places on freedom of contract.

### LAW:8022 Criminal Law 3 s.h.

Basic understanding of substantive criminal law; underlying premises of and justifications for criminal law; emphasis on general doctrines that dictate the minimum elements necessary to impose criminal liability, essential requirements of culpable conduct (an *actus reus*, or guilty act), blameworthy mental state (a *mens rea* or guilty mind); rape, homicide, causation, attempt, conspiracy, accomplice liability; various defenses to criminality, such as self-defense, duress, intoxication, insanity, diminished capacity.

### LAW:8026 Introduction to Law and Legal Reasoning 1 s.h.

Basic concepts and intellectual skills necessary for understanding the first-year curriculum.

### LAW:8032 Legal Analysis Writing and Research I 2 s.h.

Structured development of effective skills in legal analysis, writing, and research; first of a two-semester sequence.

### LAW:8033 Legal Analysis Writing and Research II 3 s.h.

Structured development of effective skills in legal analysis, writing, and research; second of a two-semester sequence. Prerequisites: LAW:8032.

**LAW:8037 Property****4 s.h.**

Concept of private property as one of the legal system's basic foundations; historical development of Anglo-American property law examined in conjunction with changing currents of economic, social, and political thought; emphasis on understanding decision making by courts in the common-law tradition, and its interplay with legislative enactments intended to change the common law; fundamental notions relating to the origins of property rights; relationship of possession and ownership, with emphasis on capacity of property law to recognize a wide range of interest configurations; impetus for promoting ease and reliability in conveyance of property interests, commercially and gratuitously; function of public recording in providing stability to transfers of interest in land; role of adverse possession and prescriptive use in recognizing expectations based on long-standing property relationships; responsiveness of property law to social change as illustrated by modern reforms in landlord-tenant act.

**LAW:8046 Torts****4 s.h.**

Development of tort principles; civil responsibility for harms to tangible personal and property interests; roles of legislatures, judges, juries; intentional harms, negligence, and strict liability considered from perspectives of jurisprudence, economics, and moral philosophy.

**LAW:8105 Administrative Law****3 s.h.**

Formal and informal procedures, processes, and functions of state and federal administrative agencies; legislative, executive, and judicial control of their actions; nature and definition of administrative agencies; permissible delegation of authority to administrative agencies; scope of agency authority; agencies' right to obtain information from members of the public; citizens' right to obtain information in agencies' possession; definition and types of administrative rules; rule-making procedure; agency discretion to make law by rule or adjudication; right to a trial-type hearing before an agency; parties' specific rights in an administrative hearing, including notice, open or closed hearing, right to counsel, evidence, nature and exclusivity of the record; agency decision-making process, including role of hearing officers, separation of functions and bias of decision makers, nature of opinion required; judicial review of administrative action, including reviewability of agency action, primary jurisdiction of agencies, exhaustion of administrative remedies, standing, scope of judicial review, mechanics of judicial review.

**LAW:8112 Advanced Civil Procedure****arr.**

Complex civil litigation; advanced civil procedure topics not taught in first year; essential aspects of civil procedure (e.g., personal and subject matter jurisdiction); joinder devices (intervention, necessary parties, interpleader, consolidation), discovery and confidentiality orders, appellate jurisdiction, mechanisms to structure the trial (e.g., bifurcation of issues); class. Prerequisites: LAW:8006.

**LAW:8121 Advanced Legal Research Methods in Specialized Subjects****1 s.h.**

Legal research methods in specific legal practice and research areas; specific topic rotates each year (litigation and ADR legal research, business and tax legal research, federal legislative history legal research, legal history research); students work with real-world examples to improve research skills related to a particular legal subject.

**LAW:8123 Advanced Legal Research****2 s.h.**

Builds on LAW:8032 and LAW:8033; in-depth exploration of American legal resources; current print and electronic resources that help students develop better, more efficient search techniques and select the most effective formats for their research; opportunity to review the basic sources of legal information, use varied techniques to access legal information, develop personal strategies for managing information; advanced training in LEXIS, WESTLAW, the internet; nonlegal information sources important to the legal community.

**LAW:8125 State Legal Research****1 s.h.**

Legal resources available for a particular state; exploration of current print and electronic resources, particularly low-cost electronic resources such as FastCase and the internet are explored for purposes of developing better, more efficient search techniques; selection of the most effective formats for research; sources of legal information; techniques for accessing legal information.

**LAW:8133 American Governance: Theory and Practice****2-3 s.h.**

Tracing the evolution of our constitutional system by examining specific events in American history; particular emphasis will be given to the role of Congress and its relationship with the Executive Branch and court system. Requirements: open only to students educated outside the United States.

**LAW:8146 Antitrust Law****3 s.h.**

Laws dealing with restraints of trade, monopolization and mergers; history of these laws and their development in the courts; current doctrine and its underlying legal and economic theories; analytical tools of trade: sufficiency of economic efficiency as the measure of justice.

**LAW:8153 Applied Evidence****2 s.h.**

Opportunities to apply the rules of evidence; use of mock case problems presenting evidentiary issues that attorneys in real practice would address by filing motions in limine; students are enabled to more fully comprehend the reasoning and rationale behind the rules, and appreciate the intricacies of applying the rules to a set of facts; focus on pretrial evidentiary litigation and specific rules of evidence. Prerequisites: LAW:8460.

**LAW:8158 Arbitration Principles and Practice****2-3 s.h.**

Introduction to law of arbitration and essential skills and procedures involved in its practice; role of arbitration in modern conflict resolution in various settings in which it is used; conceptual framework and explanatory theories for analysis of issues frequently encountered in arbitration; statutory and contractual grounds for arbitration (e.g., labor relations, employment, consumer and commercial transactions); development of skills and understanding of procedure through use of problems and exercises simulating common arbitration scenarios in which students participate as lawyers, arbitrators, and parties.

- LAW:8186 Bankruptcy** 3 s.h.  
Students study the rights of individuals and entities under the federal bankruptcy laws from the perspective of both debtors and creditors; there are three types of bankruptcy proceedings—liquidation bankruptcy for consumers and businesses (Chapter 7), consumer reorganization, known as "wage earner's plans" (Chapter 13), and business reorganization (Chapter 11); students survey foundational topics relevant to all these forms of bankruptcy—in general, equal weight given to both consumer and business bankruptcies; attention given to some of the intricacies of business reorganizations towards the end of the course.
- LAW:8189 Banking Law** 2 s.h.  
Overview of various bank and nonbank financial institutions (including national banks and state banks) and federal regulation of these institutions; examination of goals and policies behind bank and nonbank financial institution regulations to determine whether these goals and policies are achieved by the regulations; attention given to recent developments in regulation of bank and nonbank financial institutions.
- LAW:8194 Basic Federal Income Taxation** 3-4 s.h.  
Operation, policies, principles of federal income tax, including gross income, deductions, property dispositions, tax accounting, assignment of income among family members, time value of money, leveraging.
- LAW:8198 Building the State** 2 s.h.  
Examination of state building and deconstruction; taxing, spending, fiscal citizenship, theories about state building; topics may include statelessness, legibility and state building, utopian tax regimes, revolutionary tax systems (French, U.S.A., Confederate States of America, potential Scottish state), voluntary taxation and non-state "tax" regimes (ISIS, organized crime).
- LAW:8216 Civil Procedure in Pre-Trial Theory and Practice** arr.  
The law of pleadings and other pretrial matters presented in LAW:8006; hypothetical case developed from interview to pleading to early pretrial stages; experience drafting relevant pleadings and motions. Prerequisites: LAW:8006.
- LAW:8218 Civil Rights Law** 3 s.h.  
Civil rights law; constitutional litigation brought under Section 1983 to enforce the 4th, 8th, and 14th Amendments, specifically exploring prisoners' rights, police abuse, and substantive Due Process claims; examination of Reconstruction Era civil rights statutes (Sections 1981 and 1982) and modern federal statutes prohibiting discrimination such as Title VII and the Americans with Disabilities Act (ADA); cutting-edge civil rights issues such as affirmative action, sexual harassment, and racial identity; interpretive and strategic challenges that arise in civil rights litigation.
- LAW:8224 Client Counseling** 1-2 s.h.  
Immersion in practice skills fundamental to any attorney-client relationship—interviewing and counseling; exploration of critical unseen factors which impact interviewing and counseling (e.g., self-awareness, cultural competence, bias, beliefs about the role of the lawyer in an attorney-client relationship); introduction and critique of three models of representation including traditional or regnant lawyering, client-centered lawyering, and rebellious or democratic lawyering.
- LAW:8237 Comparative Corporate Governance** 2 s.h.  
Today's global economy has resulted in a proliferation of multi-national corporations, where frequently the parent corporation is governed by the law of one country, and one or more subsidiaries are governed by the laws of other countries; comparative assessment of advantages and disadvantages to incorporating in a particular country; focus on corporations considering mergers, acquisitions, or joint ventures with corporations outside of their own jurisdiction; and consideration of reasons why a corporation might form a subsidiary under the law of another jurisdiction.
- LAW:8241 Comparative Constitutional Law** 2-3 s.h.  
Comparative focus on the United States Constitution with particular emphasis on the Constitution of France and the freedom of expression in areas such as libel law, hate speech, and more; suitably tailored writing component to help students master course material while also improving their own expressive abilities.
- LAW:8245 Comparative Equality** arr.  
Affirmative action or "positive discrimination" for examining/ comparing inequality and inclusion in the countries of France, Brazil, Canada, India, South Africa, and the United States; historical context in which affirmative action or positive discrimination programs have been implemented for certain groups within Brazil, Canada, India, South Africa, and the United States as arguments in favor of and against such programs in those countries; lessons learned from these countries applied to France to answer the question, "is France in need of affirmative action?"
- LAW:8263 Comparative Law** 2-3 s.h.  
Comparative study of origins, development, and principal features of the world's main legal systems; common and civil law traditions; historical development of the main legal systems, their sources, ideologies, techniques; subjects important to international legal practice (e.g., international judicial assistance, application of foreign law in American courts; in-depth study of modern legal systems of the United States, Britain, France, Germany, Japan, Russia; introduction to other legal traditions, including preliterate tribal law, traditional Chinese and Islamic law.
- LAW:8265 English Law and Literature** 2 s.h.  
Exploration of relationships between English law and English literature at historical, practical, imaginative, and theoretical levels; students read novels, short stories, plays, poems, and nonfiction works—the earliest piece written by Geoffrey Chaucer in 1387 and most recent piece written by a barrister working in London in 2018; selections intended to provide a diverse cross-section of English literary writings that engage with and are shaped by English law.
- LAW:8266 English and European Legal History** 2 s.h.  
Introduction to English and European legal history; exploration of historical anthropology of law, and, in particular, how written law evolved from custom; development of a single European legal order (medieval England); law of marriage, sexual relations, property and women's rights in comparative perspective; continental and English law.
- LAW:8272 Conflict of Laws** 2-3 s.h.  
Examination of legal problems created when a transaction or relationship has associations with more than one state or nation; students examine questions of judicial jurisdiction (which state's or nation's courts should hear a case?), choice of law (which state's or nation's laws should determine the outcome of a case?), and enforcement of judgments (when will a state or nation enforce the judicial judgments of a different state or nation?).

- LAW:8280 Constitutional Law II** 3 s.h.  
Limits on governmental power imposed by the national constitution for protection of individuals; protection of life, liberty, and property by due process and equal protection; freedom of expression and association; religious freedom and the guarantee against establishment of religion; 1st and 14th Amendments.
- LAW:8288 Consumer Finance Law** 2 s.h.  
Consumer spending drives the economy; system of consumer finance—the way in which consumers consumption is financed; focus on empirical state of household finances, psychology and sociology of consumer finance, business of consumer finance, and regulation and political economy of consumer finance.
- LAW:8301 Copyrights** 3-4 s.h.  
Federal law of copyrights, primarily the Copyright Act of 1976; emphasis on copyright protections affecting new technologies, such as videotape, computer hardware and software, electronic data transfer, cable television rebroadcast; ability of legal concepts to keep pace with technological developments. Recommendations: LAW:8643.
- LAW:8303 Corporate Compliance Overview** 2-3 s.h.  
Areas of corporate and regulatory law that impose requirements on corporations including financial services institutions and health care provider organizations; importance of corporate compliance for these organizations and an overview of relevant regulatory authorities and their underlying theories and rationales; pertinent government regulations, guidance documents, and enforcement initiatives forming the framework for corporate compliance; focus on the process of compliance which should be established internally, regardless of the relevant regulatory authority involved; evolving role of compliance and the chief compliance officer. Corequisites: LAW:8331.
- LAW:8307 Corporate Finance** 1-3 s.h.  
Introduction to fundamental principles of corporate finance, including financial statement analysis, valuation of corporate securities and of businesses, capital structure decisions, portfolio theory, and efficient capital markets hypothesis; focus on financial and accounting aspects of corporate decisions than with any particular body of law. Prerequisites: LAW:8331.
- LAW:8309 Principles of Corporate Finance** 1 s.h.  
Fundamental concepts of corporate finance and accounting as accepted by the courts and applied in matters relating to securities regulation and disputes arising from mergers and acquisitions: cash versus accrual accounting; how to read and interpret schedules and disclosures contained in a company's balance sheet, income statement, and statement of cash flows; how to interpret and apply various financial ratios derived from a company's financial statements; how to understand, calculate, and apply net present value principles to evaluate investment opportunities; how to calculate equity values using the CapM equation.
- LAW:8318 Corporate Governance and Control** 1-4 s.h.  
Principal issues in creation of appropriate governance and control systems for large publicly held corporations; questions of corporate structure, shareholder voting rights, duties of directors, derivative suits, indemnification and transfers of control viewed from perspective of Delaware's statutory and common law. Recommendations: LAW:8331.
- LAW:8322 Corporate Taxation** arr.  
Influence of tax considerations on the structure of corporate transaction, from a merger to a restructuring to a securities offering; examination of primary Internal Revenue Code provisions that affect corporations and their shareholders; corporate formations, dividends, redemptions, liquidations, taxable asset and stock acquisitions, tax-free reorganizations; analysis of statutory and regulatory materials; tax reform proposals. Prerequisites: LAW:8194. Corequisites: LAW:8331.
- LAW:8329 Comparative Criminal Procedure** 2 s.h.  
Study abroad program.
- LAW:8331 Business Associations** 3-4 s.h.  
Structure, characteristics of both large publicly and closely held corporations; distribution of powers among management, directors, shareholders; fiduciary duties that limit those powers; enforcement of such duties by shareholder suits; may include basic principles of agency, partnership, and limited partnership law.
- LAW:8342 Topics in Criminal Law Practice** 1-3 s.h.  
Substantive and procedural aspects of criminal law not covered in regular College of Law criminal law and criminal procedure courses; students divided into teams (prosecutors and defense attorneys); hands-on exercises designed to reflect substantive criminal law and procedure discussion; jury selection, jury instructions, pretrial motions, client and witness interviews, depositions, investigation; ethical considerations for prosecutors and defense attorneys, including prosecutorial discretion in charging decisions and conflicts of interest. Prerequisites: LAW:8022.
- LAW:8348 Criminal Procedure: Adjudication** 3-4 s.h.  
Adjudicatory phases of the criminal justice system: indictments and the charging process, preliminary hearings, applications for release on bail and pretrial detention, processes of discovery, guilty pleas, jury selection, conduct of criminal trials, sentencing proceedings and post-trial motions, appellate review, collateral remedies; focus on constitutional rights, specifically the Fifth, Sixth, Eighth, and Fourteenth Amendments; statutory provisions, rules of criminal procedure.
- LAW:8350 Criminal Procedure: Investigation** 3-4 s.h.  
Guarantees and rights of the Fourth, Fifth, and Sixth Amendments to the U.S. Constitution against police and prosecutorial practices designed to investigate and prove criminal cases; protection against unreasonable searches and seizures, guarantee against extraction of involuntary confessions, privilege against self-incrimination constraints upon securing confessions (i.e., *Miranda* doctrine), due process protection against unreasonably suggestive identification procedures, right to counsel, protection against inculpatory admissions and identification practices; exclusionary rules and remedies that enforce constitutional guarantees.
- LAW:8362 Critical Race Theory** arr.  
Race relations and racial discrimination in America from perspectives of the Critical Race Theory movement (CRT); affirmative action, hate speech, queer theory, voting rights, postmodernism, liberalism, Asian-critical theory, Latin-critical theory, federal Indian law, critical white studies; critical race feminism—essentialism, motherhood, lawbreaking, employment law, sexual harassment, global issues.

- LAW:8373 Secured Transactions** **3 s.h.**  
 Article 9 of the Uniform Commercial Code; establishment and perfection of security interests pursuant to credit sales contracts; problems focusing on the interface between Article 9 and federal bankruptcy law, Article 9 and real property security; priority disputes among collateral claimants; rules related to default and rights after default; emphasis on developing an understanding of and facility with a code-based statutory scheme.
- LAW:8374 Debt Transactions** **4 s.h.**  
 Examination of laws and practices of modern lending; procedures for collection of unsecured debts including enforcement of judgments, exemptions, prejudgment remedies, fraudulent conveyances, and statutory liens; examination of secured transactions that involve both real property (mortgages) and personal property (security interests governed by Article 9 of the Uniform Commercial Code); equal weight given to consumer and commercial transactions.
- LAW:8375 Iowa Debt Collection Law** **1 s.h.**  
 Examination of legal procedures for judicial enforcement of unsecured debts; complements secured transactions coverage of consensual liens in personal property (security interests) and Iowa real estate finance law coverage of consensual liens in real estate (mortgages). Requirements: no prior enrollment in LAW:8374.
- LAW:8376 Iowa Real Estate Finance Law** **1 s.h.**  
 Examination of performance and enforcement of payment obligations secured by interests in real property (i.e., mortgages, land contracts); complements secured transactions coverage of consensual liens in personal property (security interests) and Iowa debt collection law coverage of legal procedures for judicial enforcement of unsecured debts. Requirements: no prior enrollment in LAW:8374.
- LAW:8380 Entrepreneurship Law and Ethics** **3 s.h.**  
 Concepts underlying the role of lawyers in entrepreneurial decision making and professional legal contexts; students gain a perspective of the life cycle of a startup financing deal, exposure to types of problems that arise over the course of a deal that jeopardizes its successful completion, and an opportunity to identify and reflect on ethical considerations that face modern transactional lawyers in the entrepreneurial world.
- LAW:8399 Election Law** **3 s.h.**  
 The Supreme Court has long declared that the right to vote is fundamental, because it is preservative of all other rights; the right to vote in theory and practice, with focus on its relationship to racial and economic justice; what has been done and what should be done to move us closer to the ideal of political equality; proper role of unelected judges in our democracy; history of the right to vote, "one person, one vote" principle, Voting Rights Act, partisan gerrymandering, voter identification, voter registration, political parties, and campaign finance.
- LAW:8415 Employment Discrimination** **2-3 s.h.**  
 Legal prohibitions against discrimination in employment on the basis of race, sex, national origin, age; focus on Title VII of the Civil Rights Act of 1964; procedural and remedial problems, elementary issues of proof.
- LAW:8421 Employment Law** **3 s.h.**  
 Legal rights of employers and employees in private workplaces that do not have unions—which is more than 90 percent of work settings; hiring, minimum wage, independent contractors, termination, workplace privacy, employment-related intellectual property issues, covenants not to compete, occupational safety and health, and unemployment eligibility set into a context of historical origins, new developments, and contemporary trends.
- LAW:8423 ERISA: The Basics** **2 s.h.**  
 Fundamental requirements, plans and programs covered by the Employee Retirement Income Security Act of 1974 (ERISA) as amended; for students who are interested in employee benefit plans and roles of the Internal Revenue Service (IRS), U.S. Department of Labor, U.S. Government Accountability Office, and Pension Benefit Guaranty Corporation in the regulation of ERISA.
- LAW:8428 British Legal System** **1-2 s.h.**  
 Taught in London Law Consortium.
- LAW:8433 Environmental Law** **2-3 s.h.**  
 Role of the legal system in addressing problems of environmental disruption, with special emphasis on air, water, hazardous waste pollution.
- LAW:8444 Estate Planning** **2-3 s.h.**  
 Introduction to will drafting, use of powers of attorney, and advance directives—topics frequently taught in courses on trusts and estates; taxes that can be imposed on the transfer of money or other property by gift (gift tax), at death (estate tax), and by certain generation skipping transfers (generation-skipping tax); interrelationship of these taxes with each other and with the income tax. Prerequisites: LAW:8194. Recommendations: LAW:8981.
- LAW:8452 European Union Law** **2-3 s.h.**  
 Law of the European Union; EU legal and institutional structure; role of the European Court of Justice in elaborating constitutional and administrative law for the EU on the basis of treaties and legislation; principle of free movement; progress of European integration.
- LAW:8456 Survey of Iowa Law** **3 s.h.**  
 Survey of Iowa law; Iowa constitutional law, torts, criminal law, and other subjects; students gain an appreciation of unique aspects of Iowa law as well as exposure to common areas of law that attorneys practicing in Iowa are likely to encounter; may involve guest lectures from practitioners, judges, elected officials, or other visitors.
- LAW:8460 Evidence** **3 s.h.**  
 Rules of evidence developed in common-law courts and under statutes; judicial notice; examination of witnesses; privilege and competence; remote and prejudicial evidence; hearsay; burden of proof and presumptions; roles of judge and jury.
- LAW:8467 Family Law** **3-4 s.h.**  
 Creation, dissolution of marriage and parent-child relationships; lawyer's practical approach to family law problems combined with a broader view of how the law might treat those problems in light of findings from social and behavioral sciences.

- LAW:8481 Federal Courts** 3-4 s.h.  
 Role of the federal courts in our federal system of government; the federal courts' original and appellate jurisdiction; Supreme Court review of state courts' judgments; Congress' power to strip the federal courts of jurisdiction; development of federal common law; federal writ of habeas corpus; abstention doctrines; state sovereign immunity; federal remedies against state and local action; and Congress' power to create non-Article III adjudicative tribunals. Prerequisites: LAW:8006 and LAW:8010.
- LAW:8497 Federal Criminal Practice** 2 s.h.  
 Introduction to each step in the criminal process together with instruction in advocacy skills required for the effective practice of law; complete chronology of a typical federal criminal case, from grand jury investigation through post-trial motions; importance of strategic thinking. Prerequisites: LAW:8350.
- LAW:8498 Federal Sentencing Advocacy** 1 s.h.  
 Examination of federal sentencing scheme and procedures; application to a mock criminal case from which students draft a sentencing memoranda and present mock oral sentencing arguments to instructor; effective written and oral advocacy in federal sentencing proceedings.
- LAW:8504 Corporate Crimes** 1-3 s.h.  
 Introduction to corporate criminal law; black letter doctrines of corporate liability and sentencing; Department of Justice policies and practices that shape the course of corporate prosecutions; criminal statutes that are of frequent concern for corporations, including those that address false claims, securities fraud, bribery, and mail and wire fraud; developments occurring in this evolving area of law.
- LAW:8513 Foreign Comparative and International Legal Research** 1-2 s.h.  
 Treaty research, locating and identifying documents from international organizations and tribunals, legal research in selected jurisdictions outside the United States; variety of print and electronic sources; research methods in foreign and international law.
- LAW:8527 The Constitution and U.S. Foreign Relations** arr.  
 Introduction to law of foreign relations in the United States; impact of constitutional distribution of powers on conduct of U.S. foreign relations; influence of separation of powers doctrines on conduct of foreign relations, status of international law in U.S. legal system, role of courts in adjudicating issues affecting foreign relations, and controversy over distribution of war powers between President and Congress.
- LAW:8558 Genetics and the Law** 3 s.h.  
 Introduction to legal issues raised by genetic and genomic technologies; genetic privacy, uses and abuses of genetic testing, prenatal diagnosis, mandatory screening, genetic discrimination, regulation of genetic research, DNA banking, research on stored tissue samples, ownership of genetic material and information, and provision of genetic services including informed consent, disclosure, and duties to family members at risk for genetic disease.
- LAW:8562 Health Law** 2-3 s.h.  
 Major areas of concern in health law; tension between quality, access, costs; may include malpractice, quality control, health care financing, access (insurance, Medicare, and Medicaid), licensing, bioethics (end-of-life decisions, informed consent, surrogacy, organ transplantation).
- LAW:8563 Global Health Law** 3 s.h.  
 Examination of legal, economic, social, ethical, and political aspects of global health; emergence of global health law commencing with acknowledgment of the human right to the highest attainable standard of health; establishment of the World Health Organization; use of international treaties and other understandings to address cross-border disease threats, including bilateral and multilateral assistance to low-income countries; increasing adoption by countries, including the United States, of a standard core of public health laws.
- LAW:8570 Human Rights in the World Community** 1-3 s.h.  
 Introduction to established and developing legal rules, procedures, and enforcement mechanisms that govern protection of international human rights; liberal western and developing world notions of human rights, recent examples of human rights controversies worldwide; international human rights of women.
- LAW:8575 Seminar: Approaches to Human Rights** 3 s.h.  
 Engagement with historical events, philosophical narratives, legal cases, institutional reports, lived experiences, and theoretical works to study origins, functions, and history of the discourse on human rights; application of a systems thinking framework to events involving treatment of women, Indigenous peoples, disabled persons, racial and ethnic groups, and other disempowered social groups across cultures and throughout history; examination of writings that attempted to explain key historical events and ideas relevant to human rights. Same as RELS:6710.
- LAW:8577 Immigration Law and Policy** 1-3 s.h.  
 Legal, historical, social, philosophical, and policy foundations of immigration control; modern debate over immigration; criteria and procedures that govern admission of non-U.S. citizens to the United States for permanent residence and temporary visits; deportation criteria and processes; national security and civil liberties implications of immigration policy; refugees and political asylum; undocumented migrants; acquisition, loss, and significance of U.S. citizenship; focus on U.S. law with introduction to perspectives from comparative and international law; experience analyzing varied fact problems that require strategic decision making and interpretation of complex statutory provisions.
- LAW:8584 Insurance Law** 1-3 s.h.  
 State regulation of insurance, adverse selection and moral hazard, risk classification and rate regulation, and insurance contracts; emphasis on life, long-term care, and disability insurance; may include health insurance, reinsurance, and other types of insurance; focus on social and economic underpinnings of insurance.
- LAW:8593 Federal Indian Law** arr.  
 Specialized body of law allocating power and authority in Indian country that has grown up around native American peoples and their reservations; sovereignty, jurisdiction, federal Indian policy, tribal self-government.

**LAW:8594 Interest-Based Negotiation for Lawyers** 2-3 s.h.

Theory and practice of an approach to negotiation, known as interest-based or problem-solving negotiation; focus of this negotiation model is not on positions of disputants, but interests that underlie these positions; interest-based negotiators attempt to generate options that satisfy, at least minimally, interest of all parties and can lead agreements from which all parties realize some gains; emphasis on acquisition and enhancement of skills necessary to apply this negotiation approach; in-class exercises. Requirements: no prior enrollment in LAW:8720.

**LAW:8599 International and Comparative Inequality Law** 3 s.h.

**LAW:8600 International Business Transactions** 1-3 s.h.  
Legal and practical issues in international trade and investment; typical private transactions, such as the sale of goods (documentary sales transaction, INCOTERMS, letters of credit, agency, distribution), transfer of technology (franchising, licensing), and direct investment across national borders; how private international sales, investment, and licensing transactions are structured to permit private businesses to minimize and plan for the risks associated with conducting business on a global scale.

**LAW:8615 International Commercial Arbitration** arr.  
Formation and enforcement of agreements to enter arbitration in order to settle international business disputes; process of arbitrating an international business dispute; recognition and enforcement of arbitral awards.

**LAW:8618 International and Comparative Family Law** 1-3 s.h.

Introduction to family law system in England; issues of international legal practice in family cases; international legal instruments for protection of children, including U.N. Convention on the Rights of the Child, Hague Convention on the Civil Aspects of International Child Abduction, and Hague Convention on Intercountry Adoption. Corequisites: LAW:8467.

**LAW:8622 International Environmental Law** 3 s.h.

Laws and institutions developed by the international community to deal with international environmental problems, including those of the atmosphere (acid rain, ozone depletion, radioactive fallout, climate change), hydrosphere (land-based sea pollution, sea-based vessel pollution, transboundary groundwater diversion), lithosphere (hazardous waste disposal, toxic pollutants, decertification), biosphere (driftnet fishing, endangered elephants, loss of tropical rainforests).

**LAW:8627 International Securities Regulation** 1 s.h.

In today's securities markets, cross-border transactions have become very common, and activities in one country frequently impact securities markets and regulation in other countries; to understand global issues with which securities regulators around the world have been tackling, topics include global securities markets, extraterritorial application of U.S. securities regulation, enforcement against cross-border market misconduct, and international organization and cooperative framework. Recommendations: securities regulation recommended, but not essential.

**LAW:8629 Taxation of International Business Transactions** 3 s.h.

Introduction to U.S. aspects of international taxation and international tax policy issues; how the United States taxes foreign persons on income they derive from U.S. sources; taxation of U.S. persons on their worldwide income; United States bilateral tax treaty network, under which many of the statutory rules regarding the taxation of foreigners are modified or supplanted; solving problems that illustrate the operation of the Code and regulations. Prerequisites: LAW:8194. Corequisites: LAW:8331.

**LAW:8631 International Trade Law: Basic Norms and Regulations** 3 s.h.

Basic norms and legal framework of international trade as expressed in the GATT/WTO regime and U.S. trade laws; issues raised by regional trade blocs such as NAFTA; controversies such as the economic and philosophical justifications for, and objections to, free trade from a variety of perspectives.

**LAW:8643 Introduction to Intellectual Property** 1,3-4 s.h.

Introduction to some of the most important intellectual property rules; goals and theories underlying these rules; common ways in which ideas may be protected—from basic form of protection (secrecy and trade secrecy) to exclusive rights granted over inventions (patents) and creative works (copyright), and concluding with rights related to market-based identities (trade and service marks); brief exploration of ways in which debates over intellectual property rights have permeated modern culture.

**LAW:8645 Introduction to Quantitative and Computational Legal Reasoning** 3 s.h.

Basic principles of probability, statistics, and computational reasoning (including elementary programming) for law students; emphasis on mathematically modest intuition, practical skills, and legal applications; introductory level, no mathematical background beyond high school algebra is assumed. Requirements: no substantial preexisting computer programming or statistical background.

**LAW:8649 Foundations of International Law** 1-3 s.h.

Introduction to fundamentals of international law; focus on aspects of international law that concern interests in the United States; survey of sources, methodology, and major doctrines of international law within framework of understanding diverse jurisprudential approaches; international law's relationship to U.S. domestic law and institutions; procedural aspects of international law involving international institutions, including the International Court of Justice; foundation course for students interested in international trade, business, family law, human rights, environmental law, and an interest in European Union law.

**LAW:8653 Juries and Jury Selection** 1-2 s.h.

The law and art regarding juries and jury selection; legal issues arising in jury selection and trial advocacy in context of jury selection; legal issues (challenges to representation of jury venires, changes of venue due to pretrial publicity, challenges for cause to prospective jurors, Batson challenges to exercise of peremptory strikes, anonymous juries, sequestered juries, attorney errors and juror misconduct during jury selection); trial advocacy (drafting and use of jury questionnaires, role and effectiveness of jury consultants, viewing jury selection as part of entire process, effective voir dire techniques, strategy in making for cause challenges, exercising peremptory strikes).

**LAW:8658 Jurisprudence****2-3 s.h.**

Exploration of questions central to jurisprudence by looking at positions that have been adopted by legal positivist, natural law theory, and sociological models of jurisprudence (i.e., is there more to legal argument than the strategic battle for a favorable judicial ruling? How would one have to conceive of legal reasoning if one were a judge? Are there right answers to legal questions? Do they presuppose a necessary connection between law and morality? Is any exchange of pros and cons merely a spectacle created in order to hide from the dumbfounded public that legal reasoning does not really matter?); comparative dimension provided in readings with background in civil law.

**LAW:8666 Law and Development****2-3 s.h.**

Origin of development law and institutions that were created in order to advance it, including the World Bank and International Monetary Fund.

**LAW:8670 Labor Law****3-4 s.h.**

How national labor law regulates labor relations in the private sector; law relating to unionized employees and firms; right of employees to organize into unions; limits of concerted activities by employees; scope and provisions of collective bargaining; enforcement of the collective bargaining agreement; rights of individual employees in collective units and in labor organizations; lawyer's role in dealing with judicial, administrative, and arbitral tribunals involved in enforcing labor law; lawyer's role in complex interrelationships between policy, statute, judicial, and administrative decisions.

**LAW:8671 Worker Rights on the Front Lines: Workplace Experiences with ADA, FMLA, and Workers' Compensation****1 s.h.**

Development of a detailed understanding of two federal statutes, Family and Medical Leave Act (FMLA) and Americans with Disabilities Act (ADA), and one state statute, Iowa Workers' Compensation.

**LAW:8677 Accounting, Tax, and Business Considerations for Lawyers****1-3 s.h.**

Accounting, tax, and business considerations for lawyers and why these are important considerations for lawyers; changes occurring in today's business models; discussions on choosing a legal structure for a business; financial statements basics, detailed example of a financial statement, and discussion on accounting basics expanded; advanced topics in accounting to allow some background on these topics.

**LAW:8680 Law and Economics****arr.**

Introduction to economics analysis of law; how economic reasoning is used to explain and predict the effects of legal rules; fundamental areas of American law (e.g., property, contracts, torts, criminal law); use of economic efficiency as a normative criterion for evaluating legal rules; efficiency compared to various moral concepts to evaluate such rules.

**LAW:8683 Law and Economics of Money and Banking****3 s.h.**

Money as a legal institution, legal structure and powers of the Federal Reserve System, multiple deposit creation, and the money supply process; tools and goals of monetary policy, and theory of interest rates; legal structure of banking industry including dual banking system, regulation by the Office of the Comptroller of the Currency of national banks under the National Bank Act (with special emphasis on capital regulation), deposit insurance and the Federal Deposit Insurance Corporation, and regulation of bank holding companies by the Federal Reserve.

**LAW:8698 Law in the Muslim World****2-3 s.h.**

International and comparative law issues relevant to countries in the Muslim world; legal cultures, institutions, rules, actors, processes of several jurisdictions including Afghanistan, Saudi Arabia, Iran, Iraq, Algeria, Nigeria, Palestine, Pakistan; Islamic sharia law as practiced in Sunni and Shiite countries; the role of church versus state, fundamentalism versus secularism, as manifested in the legal system; tension between communitarianism and individualism in modern constitutionalism; intertwining of customary and religious legal practices; first, second, and third generations of human rights; international law on issues such as terrorism, self-determination; women's rights, including polygamy, divorce, child custody, inheritance. Requirements: junior or senior standing.

**LAW:8709 Introduction to French Law****1-3 s.h.**

Introduction to laws of France, characteristic features, and role of main institutions; civil law, contracts, tort, family law, commercial law, criminal law, labor law; visits to a French law school, Paris Court, and Ecole of Magistrature National (ENM), the National Judge School in Bordeaux. Summer abroad program.

**LAW:8712 Legislation****2-3 s.h.**

Issues related to legislation and legislative process; introduction to legislation, legislative process, legislative advocacy, statutory interpretation, and statutory drafting; students gain an understanding of the role of lawyers in legislative process and formation of public policy.

**LAW:8720 Mediation: Theory and Practice****2-4 s.h.**

Essential characteristics; comparison of mediation with litigation and other alternative dispute resolution processes; stages of mediation; confidentiality; enforceability of agreement; ethical problems, particularly lawyer-mediator; student role playing; short writing assignments.

**LAW:8726 Mergers and Acquisitions****3 s.h.**

Significant legal and financial aspects of business combination transactions; transaction documents (e.g., stock purchase agreements, asset purchase agreements, merger agreements); valuation of companies and pricing of deals; legal and financial considerations affecting the structuring of deals; tender offers and their regulation under the Williams Act, tender offer rules; fiduciary duties of target board, including Revlon duties and the Unocal standard; anti-takeover devices (e.g., poison pills and staggered boards, deal protection devices, freezeout transactions); state anti-takeover statutes. Prerequisites: LAW:8331.

**LAW:8742 Negotiations****1-3 s.h.**

Nature and theory of negotiations, diverse rhetorics (including the rhetoric of legal argument) relevant to conduct of negotiations, conflict between ethics and effectiveness; readings from game theory, social psychology, anthropology, rhetoric and ethics.

**LAW:8753 Nonprofit Organizations: Structure, Governance, and Strategy** **3 s.h.**

Focused examination of internal operations of nonprofit organizations; introduction to historical conditions that generated an incredible expansion of diverse and complex organizations that make up the nonprofit sector in the U.S., as well as a multitude of contemporary, real-world obstacles and opportunities leaders and managers navigate within their organizations; topics include issues of accountability, board governance, budgeting, financial management, leadership, strategic planning, taxation, and more; what is a nonprofit organization and what makes a nonprofit organization effective; development of valuable skills necessary to improve the performance of nonprofit organizations.

**LAW:8755 Nonprofit Organizations: Advocacy, Collaboration, and Fundraising** **3 s.h.**

Broad overview of the role nonprofit organizations play in building and enhancing communities; focused examination of the external operations of these organizations; students explore numerous threads that connect nonprofit organizations to outside individuals and entities and are presented with a multitude of contemporary, real-world obstacles and opportunities that leaders and managers navigate outside their organizations; topics focus on issues of advocacy, government relations, fundraising, leadership, marketing, partnerships, public relations, volunteerism, and more.

**LAW:8763 Patent Law** **2-4 s.h.**

All aspects of U.S. patent law; patent claims, adequacy of disclosure, statutory subject matter, validity, inequitable conduct, infringement, remedies, varied specialized doctrines; focus on recent pronouncements from the Court of Appeals for the Federal Circuit. Recommendations: LAW:8643.

**LAW:8765 Licensing** **1 s.h.**

Licensing covers a broad range of business arrangements among commercial stakeholders; much of licensing law practice falls into the transactional category including matters pertaining to online commerce, music, intellectual property, research and development, joint ventures, distribution, OEM, manufacturing, services, and other agreements; contractual arrangements that are shaped by scope and nature of underlying assets and rights; limiting doctrines in business practices that are relevant to a transactional attorney.

**LAW:8766 Remedies in Patent Law** **1 s.h.**

Continuation of LAW:8763; in-depth coverage of issues relating to remedies for patent infringement; specific topics may include International Trade Commission (ITC) proceedings, apportionment, lost profits, reasonable royalties, enhanced damages, attorneys' fees, design patent damages, patent marking, standard-essential patents, FRAND agreements, and comparative remedies law. Prerequisites: LAW:8763.

**LAW:8770 Payment Law** **1-3 s.h.**

Law that governs methods by which businesses and consumers typically pay for goods and services in modern economy; legal rules applicable to traditional paper-based payment system, including negotiable instruments (checks and notes) and bank collection of checks; modern payment methods (credit cards, debit cards, wire transfers); focus on Articles 3, 4, and 4A of the Uniform Commercial Code and related federal law and regulations.

**LAW:8789 Private Companies** **3 s.h.**

Successful business lawyers are expected to advise clients about the business entity most suitable for their needs and then customize it to fit specific requirements of their business strategy; general focus on one entity—the corporation—and a brief introduction to agency law and general partnerships; a wide number of popular business entities receive little to no coverage and this gap is filled with an introduction to structure and substance of private company forms including limited partnership, limited liability partnership (LLP), and limited liability company (LLC). Prerequisites: LAW:8331.

**LAW:8791 Professional Responsibility** **2-3 s.h.**

Public and private professional responsibility of lawyers; organization of the profession; its economics, ethics, and sociology.

**LAW:8796 Property II** **3 s.h.**

Continuation of LAW:8037; limits on landowner's use of property by private agreements, judicial actions, public regulations; problem areas (servitudes, nuisance, eminent domain); constitutional limits on government activities adversely affecting private property, community planning, zoning, other forms of local land use control; discrimination related to land development, housing; effectiveness of private ordering, judicial decisions, legislative enactments, administrative processes for resolving conflicts over use of land resources; relationships between law and other disciplines in forging solutions to land use issues; law as instrument for achieving societal objectives regarding land use.

**LAW:8798 Real Estate Transactions** **3 s.h.**

Examination of acquisition, financing, and development of real estate; topics include listing agreements, purchase agreements, conveyancing, real estate finance and security instruments, foreclosure, mechanics' liens, and forms of real estate development, including homeowners/condominium associations and other kinds of common interest communities.

**LAW:8819 Judicial Remedies** **3 s.h.**

The law of remedies is the working tool kit for civil litigators, offering various ways to redress a given wrong; remedies to be examined include compensatory damages, injunctive orders, restitution, declaratory judgment, contempt, garnishment, asset tracing, punitive damages, and methods to preserve assets before judgment; cases are drawn from diverse substantive fields, including tort, contract, intellectual property, civil rights, administrative, antitrust, attorneys' fees, and constitutional law.

**LAW:8856 Securities Regulation** **arr.**

Examination of law regulating the issuance and sale of securities (i.e., stocks, bonds, other investment vehicles) in the United States; topics include initial public offerings (IPOs), regulation of stock exchanges, private placements of stock, securities fraud litigation, and insider trading law; relevant statutes are the Securities Act of 1933 and the Securities Exchange Act of 1934. Corequisites: LAW:8331.

**LAW:8877 Sex-Based Discrimination** **2-3 s.h.**

Survey of sex-based discrimination and legal responses in the United States and worldwide; American context—constitutional guarantees and various statutory guarantees, including Title VII of the Civil Rights Act of 1964 and Title IX of the Education Amendments of 1972; global context—examination of various regions of the world, emphasis on France, South Africa, and countries with majority Muslim populations; issues involving customary law, affirmative action/quotas, and constitutional reform.

- LAW:8879 Sports Law** 2-3 s.h.  
Various legal issues relating to the structure and operation of amateur and professional sports industries; topics include labor law and collective bargaining in professional sports, history and status of collective bargaining efforts by college athletes, antitrust law as applied to professional and intercollegiate sports, the NCAA enforcement process, Title IX as applied to intercollegiate sports, the NCAA principle of amateurism and legal challenges, representation of professional athletes and negotiation of sports contracts.
- LAW:8880 Baseball Salary Arbitration** 1-3 s.h.  
Major league baseball salary arbitration process that sports agents, attorneys, and team executives participate in, presided over by panels of lawyer arbitrators; students develop written and oral advocacy skills while participating in mock salary arbitration hearings; three students are chosen to represent the UI College of Law at the Tulane University Law School International Baseball Arbitration Competition in mid-January.
- LAW:8891 State and Local Taxation** 2-3 s.h.  
Limitations on state taxing powers under the United States Constitution, including Commerce, Due Process, and Privileges and Immunities Clauses; subnational jurisdictions, particularly states with an emphasis on sales tax and corporate income taxes, gross receipts taxes, and excise taxes; issues relating to e-commerce.
- LAW:8929 Taxation of Partnerships** 2-3 s.h.  
Introduction to federal tax treatment of partnerships and limited liability companies, the most common business entities in use in the United States today; classification of entities as partnerships for federal tax purposes; formation of partnership and subsequent contributions to partnership capital; flow-through tax treatment of partnership operations; tax-sensitive allocations of items of partnership income, deduction, credit and loss; partnership distributions and related tax-sheltering strategies, liquidation or sale of partnership interests; death or retirement of partners, tax treatment of partnerships compared with S corporations. Prerequisites: LAW:8194.
- LAW:8933 Tax Practice and Procedure** 2-3 s.h.  
Issues relating to proper tax liability of a taxpayer, not necessarily how the IRS collects taxes and administers tax laws; judicial deference to agency guidance; procedural issues related to examination and filing of returns and payment of taxes; attorney-client and other privilege matters; ethical issues related to tax practice; IRS investigatory powers; IRS assessment and collection procedures; assignment of problems and discussion of current issues in tax policy. Corequisites: LAW:8194.
- LAW:8936 Estate and Gift Tax** 1-3 s.h.  
Justification for wealth taxation, effectiveness of current law, and alternative methods of wealth taxation; two key wealth transfer taxes—estate tax and gift tax; emphasis on identification of tax base and taxpaying unit; may include income tax effects which flow from an individual's death, income taxation of grantor trusts, and related income tax issues. Corequisites: LAW:8194.
- LAW:8937 Cybercrime and Security** 3 s.h.  
Global reach of the internet, low cost of online activity, and relative anonymity of users has contributed to a wide escalation in cybercrime and in cybersecurity concerns; fast-evolving subject areas with discussion of current developments and events.
- LAW:8938 Technology in Law Practice** 2 s.h.  
Introduction to selected technologies that affect modern law practice including cloud computing, document preparation tools and techniques, e-discovery tools and issues, practice management, professional responsibility concerns, legal project management, courtroom technology, and legal research analytics.
- LAW:8954 Trademarks and Unfair Competition Law** 3 s.h.  
Law of unfair competition with primary emphasis on trademarks; subjects include policies underlying unfair competition law, creation and establishment of trademark and trademark-like rights, enforcement of those rights, non-trademark concepts of false advertising, rights in one's persona, and the intersection of the First Amendment and trademark law; practical aspects of trademarks including mechanics of the federal registration process; for students who have an interest in trademark and unfair competition law, both specifically and as part of a broader business law practice.
- LAW:8981 Trusts and Estates I** 1-4 s.h.  
Law of succession and trusts; topics include policy basis of inheritance and the changing character of intergenerational wealth transfer; intestate succession; the requirements for executing and revoking wills; the rise of will substitutes; spousal protection against disinheritance; the creation, modification, and termination of trusts; the particular rules applicable to charitable trusts; the fiduciary duties of trustees; the nature of a beneficiary's interest in trust, the range of the trustee's discretion, and the rights of a beneficiary's creditors; recurring construction problems and pitfalls in drafting.
- LAW:8987 Veterans Benefits Law** 2-3 s.h.  
Theory of veterans' benefits law and introduction to skills necessary to represent veteran clients at every stage of the U.S. Department of Veterans Affairs (VA) adjudication process; how many veterans struggle to navigate the complex VA benefits system without assistance of counsel; law that governs administration and adjudication of these benefits; fundamental law of VA claims adjudication process; dispute resolution and federal agency litigation practice; what is required to effectively represent veterans in their appeals for much needed benefits.
- LAW:8992 Water Law** arr.  
Legal schemes for securing and using water rights in surface water and groundwater for private and public uses in the United States; riparian and prior appropriation doctrines of water allocation, groundwater management regimes, federal water management and regulation, and interstate and transboundary allocation devices; evolving role of science, economics, and policy in water allocation law; does not address issues of water quality, which are covered in environmental law.
- LAW:9010 Appellate Advocacy I** 1 s.h.  
Experience based on an assigned fictitious case: writing an appellate brief asserting the client's position, and arguing the case before a panel of students, faculty, community attorneys. Prerequisites: LAW:8032 and LAW:8033.
- LAW:9011 Client-Centered Public Defense Advocacy** 1-3 s.h.  
Introduction to core elements of court-appointed representation in criminal courts.

**LAW:9021 Van Oosterhout Baskerville Moot Court Competition 1 s.h.**

Single-elimination tournament culminating in the final four advocates arguing before a panel of judges; advocates write a portion of the brief, argue for and against the issue they briefed. Prerequisites: LAW:9010.

**LAW:9028 Jessup Moot Court Competition Team 1-2 s.h.**

Participation as team member in Jessup International Moot Court Competition; preparation of memorials in fall, travel to February regional rounds; travel to international competition in Washington, D.C., for top two teams. Prerequisites: LAW:9010.

**LAW:9033 National Moot Court Competition Team 1 s.h.**

Participation by third-year students as law school's representatives in the National Moot Court Competition. Requirements: placement as one of four finalists in LAW:9021.

**LAW:9034 National Moot Court Tutorial 2 s.h.**

For students participating in the National Moot Court competition; provides a problem and a substantial record, which provide basis for appellate brief and oral argument competition; integrates teaching of substantive law with development of oral and written advocacy skills in preparation and application for the national competition.

**LAW:9037 Advanced Moot Court Competition Team 1 s.h.**

Advanced Moot court team; members are top advocates from previous year's Van Oosterhout/Baskerville competition. Fall of third year.

**LAW:9038 Jessup International Moot Court Competition 1 s.h.**

Participation by second-year students in intramural regional- and national-level moot court competition in international law; intensive criticism in appellate brief writing and oral argument. Prerequisites: LAW:9010.

**LAW:9041 Vis International Moot Court 1-3 s.h.**

Participation for up to four students in the Vis International Moot Court, an annual international moot competition concerning international commercial arbitration under the Vienna Convention on the International Sale of Goods (CISG); under close supervision of instructor, students prepare two briefs, one for the claimant and one for the respondent, are mooted repeatedly by instructor and practicing attorneys (often alumni of the competition), and then participate in multiple rounds of moot court competition in the United States and, ultimately, either Hong Kong or Vienna. Recommendations: one course in international arbitration or international business transactions.

**LAW:9046 Moot Court Board 1-3 s.h.**

Experience as member of the Moot Court Board administering the Appellate Advocacy Program, researching appellate cases used in the program, judging appellate arguments. Requirements: membership based on performance in LAW:9010.

**LAW:9051 Advanced Arbitration Advocacy Competition Team 1-2 s.h.**

Students represent the College of Law at the ABA Regional/ National Arbitration Competitions held in fall of second or third year; team members prepare to argue both sides of a dispute in front of a panel of arbitrators at the competition; topics include a review of basic presentation skills, essential elements of arbitrating a dispute, and proper decorum in front of the panel as well as in-depth practice and analysis of the national case problem assigned; students spend time crafting legal arguments, practicing the effective use of exhibits and arbitration booklets, engaging in opening statements, direct examination of witnesses, cross examination, and closing arguments.

**LAW:9060 Trial Advocacy 1-2 s.h.**

Opportunities to develop and refine skills used in preparation and trial of civil and criminal cases; students are "on their feet" during most class sessions, practicing the arts of voir dire, opening statement, direct and cross examination, introduction of exhibits, use of expert testimony, and closing argument; the course culminates with a full-scale trial, from filing of pretrial motions to rendering of a jury verdict conducted by student co-counsel; students receive extensive criticism on the effectiveness of their classroom and final performances, and all class sessions are frequently recorded for review and critiqued by instructors and fellow students. Prerequisites: LAW:8460.

**LAW:9061 Advanced Trial Advocacy - Stephenson Competition 1-2 s.h.**

Review and expansion of topics presented in the initial trial advocacy course; preparation and application of these principles in the Stephenson trials; introduction to additional advanced problems such as the evidentiary issues raised in the trial problem. Corequisites: LAW:9060.

**LAW:9062 Trial Advocacy Board 1-2 s.h.**

Administration of Trial Advocacy Program and Stephenson Competition; research and writing in connection with trial problems and readings used in program; critique of performances of trial problems. Prerequisites: LAW:8460 and LAW:9060.

**LAW:9066 Stephenson Trial Advocacy Team arr.**

Student participation as College of Law representatives in Stephenson Trial Advocacy Competition. Prerequisites: LAW:9061.

**LAW:9115 Law Review 1-2 s.h.**

Performance of substantive tasks to produce a first-rate scholarly journal; writing a substantial note; comprehensive legal research experience; analysis of complex legal issues with enhanced critical-reasoning skills and command of the legal standard, The Bluebook citation system; selection of students that transfer to UI College of Law after their first year and rising second-year students is based on the Write-On Competition.

**LAW:9118 Student Journal Editor - Law Review arr.**

Experience on the *Iowa Law Review* editorial staff: managing production, overseeing business operations, administering student writing program, selecting and editing articles for publication, supervising student research and writing. Eligibility based on previous writing for the journal. Prerequisites: LAW:9115.

**LAW:9124 Journal of Corporation Law 1-2 s.h.**

Experience editing articles and writing commentaries for *The Journal of Corporation Law*, a student-operated scholarly publication that examines subjects of current importance to businesses and the bar.

**LAW:9127 Student Journal Editor - Journal of Corporate Law** arr.

Experience on *The Journal of Corporation Law* editorial staff: managing production, overseeing business operations, administering student writing program, selecting and editing articles for publication, supervising student research and writing. Eligibility based on previous writing for the journal. Prerequisites: LAW:9124.

**LAW:9142 Transnational Law and Contemporary Problems Journal** 1-2 s.h.

Experience researching and writing on issues in international and comparative law for the journal *Transnational Law & Contemporary Problems*. Requirements: second- or third-year law standing.

**LAW:9145 Student Journal Editor - TLCP Journal** arr.

Experience researching, writing, and editing on issues in international and comparative law for the journal *Transnational Law & Contemporary Problems*. Requirements: second- or third-year law standing.

**LAW:9163 Journal of Gender, Race and Justice** 1-2 s.h.

Academic year experience on *The Journal of Gender, Race & Justice*: writing two journal pieces, including a recent development and a note or a comment, and performing office duties. Requirements: second- or third-year law standing.

**LAW:9166 Student Journal Editor - Gender, Race and Justice** arr.

Experience on *The Journal of Gender, Race & Justice* editorial staff: managing student writing program, overseeing business operations and production, selecting symposium topic and participants, selecting and editing all publications pieces; eligibility based on writing and editing experience.

**LAW:9302 Clinical Law Program: Internship** arr.

Experience working directly with faculty members on cases and in-house program; full participation in interviewing, fact investigation, negotiation, courtroom proceedings.

**LAW:9303 Advanced Clinical Law Internship** arr.

Continued representation of a specific client or matter; or continued representation of clients in the practice group in which students worked their first semester, but with more ownership and greater independence; opportunity to serve as mentors to new clinical law internship students. Prerequisites: LAW:9302.

**LAW:9320 Field Placement: District of Columbia Program** arr.

Students work closely with attorneys and enroll in a weekly seminar with other externs in the Washington, DC, area; through seminar and field work, students examine the role of attorneys in the nation's capital, witness the function of administrative agencies and the process of federal lawmaking, and engage in self-evaluation and reflection on field work.

**LAW:9322 Field Placement: Judicial** arr.

Close work with a federal district court judge or state appellate judge conducting research and drafting a wide variety of legal memoranda, orders, and opinions; assist in hearings and perform other duties generally associated with a judicial clerkship; weekly meetings with a faculty supervisor to discuss student's work in chambers; participation in biweekly classroom discussions.

**LAW:9324 New York Pro Bono Scholars Program** arr.

Students spend 12 weeks working full time in a pro bono placement while also completing an academic component at their law school; students are permitted to take the New York bar examination in February of their final year of study before they graduate; after successful completion of the program and any other graduation requirements, students are admitted to practice as soon as practicable after they receive their J.D. degree (typically in June).

**LAW:9331 Field Placement: General** arr.

Students earn credit working closely with attorneys in a wide range of placements; field placements designed so that students are directly involved in activities characteristically performed by attorneys in a real-world setting; some placements routinely offered and arranged by the law school, others by students and approved by faculty; some placements are local and students take them along with their other classes; other placements are full-time, located across the country and around the world; in addition to fieldwork, students are enrolled in a seminar with other externs.

**LAW:9335 Summer Legal Placement** 1-3 s.h.

Externship opportunities for direct involvement in activities characteristically performed by attorneys (e.g., research and writing, document drafting, client interviewing and counseling, fact investigation, negotiations, court appearances); in-depth exposure to as many facets of the actual practice of law as practicable in each externship.

**LAW:9346 British Legal Methods Clinical Program** 3 s.h.

British Law externship; placement in London law office under guidance of barrister or solicitor; seminar and enrollment in course on English legal system taught by faculty of King's College, University of London.

**LAW:9413 Health and Elder Law Practicum** 1-6 s.h.

Opportunity to participate in research involving current health and elder law and policy issues, in collaboration with public health agencies, legislators, professional organizations, and advocacy organizations.

**LAW:9423 Tutorial** arr.

Different types of pedagogical techniques.

**LAW:9429 Intellectual Property Advocacy** 1-4 s.h.

Integrates teaching of substantive intellectual property law with development of oral and written advocacy skills in intellectual property field; builds on earlier learning in preparation for practice of law.

**LAW:9444 Tutorial for Foreign-Trained Lawyers** 1 s.h.

Introduction to the legal system and legal educational system of the United States; particular emphasis on those aspects of the U.S. system that present a strong contrast with other countries' legal systems, whether from civil or common law traditions; for foreign-trained law students (LL.M., J.D., or S.J.D.) who have not earned a U.S.-based J.D. or U.S.-based LL.M. degree that includes an introduction to U.S. law and legal system.

**LAW:9445 Foreign-Trained Lawyer Orientation** 1-2 s.h.

Orientation for foreign-trained student to U.S. legal system; introduction to U.S. patterns of legal argumentation, main institutional structures of U.S. legal system, and other distinctive aspects and/or fundamental principles of U.S. law; material drawn from basic areas of law (e.g., constitutional law, civil and criminal procedure, contracts, torts, property).

- LAW:9455 Medical Tutorial for Law Students** arr. Participation on medical and/or surgical rounds under supervision of attending physician; didactic sessions on legal, medical, and ethical issues arising from the clinical experience, and issues such as peer review, credentialing, quality assurance, cost containment, AIDS, reproductive technology; recent developments in medical technologies. Cosponsored by Carver College of Medicine. Prerequisites: LAW:8562.
- LAW:9460 S.J.D. Tutorial** 5 s.h. Thesis work under supervision of Doctor of Juridical Science (S.J.D.) committees; dissertation committee chairs conduct an irregular series of meetings to learn about and discuss issues common to research and writing of each thesis involved; students develop full thesis proposals and draft individual chapters; forum provided for workshopping student work and development of students' abilities to discuss and critique legal scholarship; for all S.J.D. students during their two semesters of residency at the College of Law.
- LAW:9473 Writing Tutorial** arr. Writing project on a subject or topical area specified by the supervising faculty member; group meetings; writing tutorial.
- LAW:9481 Supplementary Writing** arr. Supplemental writing project that is related to a student's course, but goes beyond the requirements for the course, and is supervised by the faculty member who teaches the course.
- LAW:9486 Directed Research and Writing** arr. Research and writing project unrelated to any substantive course, supervised by a faculty member.
- LAW:9490 Independent Research Project** arr. Work under faculty supervision; research.
- LAW:9491 Independent Research and Writing** arr. Independent research and writing under thesis advisor/committee chair. Requirements: S.J.D. enrollment.
- LAW:9503 Advanced Immigration Law and Policy** arr. Examination of issues arising out of contemporary problems of immigration law and policy; topics vary, may include critical analysis of initiatives for national, state, and local immigration reform; traditional class-based component, experiential component, advanced legal research component, and rigorous writing requirement. Requirements: LAW:8577 or legal clinic experience.
- LAW:9509 Advanced Problems in International Environmental Law** arr. Research and writing seminar exploring selected topics that may be encountered in practice; topics vary.
- LAW:9510 Climate Change Law and Policy** 3 s.h. Introduction to law and policy related to climate change; seminar readings provide an overview of laws and policies that seek to mitigate climate change and adapt to its effects; fundamentals of climate science including scientific knowledge regarding impacts of climate change and obstacles to effective communication about climate science; various private and public responses to climate change at local, state, federal, and international levels; exploration of different trends in climate change litigation.
- LAW:9518 Advanced Topics in Corporate Law** arr. Wide range of topics; theory of the firm, fiduciary duties, corporate counseling issues, history of corporate law, and so forth. Requirements: one law or business course in corporate law.
- LAW:9528 Advanced Topics in International Law** arr. Contemporary problems of public international law and policy; issues arising from armed conflict, use of force, pacific settlement of disputes; human rights law and policy (individual civil, political, economic, social, and cultural rights; group rights such as self-determination, development, environment, peace); trade and development; environmental law and policy (e.g., climate change, species extinction, pollution).
- LAW:9532 Agricultural Law** arr. Agricultural law as a complex and highly integrated field with a number of unique characteristics; examination of the field's defining laws and controversies; focus on current issues of significance including environmental regulation of agriculture, financing and economic viability of small- and medium-scale operations, discrimination against minority and female farmers, labor protections for farm workers, animal welfare, food safety, and biotechnology; students critically engage with course materials and develop well-rounded arguments for and against specific policies and legal positions.
- LAW:9545 Tax Policy** 2-4 s.h. Tools to evaluate existing and proposed changes to state and federal tax systems; evaluation of tax systems through numerous perspectives whether economic, philosophical, or comparative, depending on student interest; specific attention to tax policy proposals that command popular and congressional attention; students write a policy paper that evaluates a current tax policy proposal. Requirements: prior or concurrent enrollment in any tax course.
- LAW:9550 Capitalism** arr. Economic and moral aspects of capitalism as a system for organizing a society's economic activity; major topics including the beginnings of capitalist theory in Smith, Marxist critiques of capitalism in 19th century, capitalism and its critics in the Gilded Age and Progressive Era, the Great Depression and Keynesianism, modern defenses and criticisms of capitalism in Hayek, Habermas, Friedman, Rawls, and others.
- LAW:9554 Compliance, Ethics, and Risk Management** arr. Public and private organizations—including corporations, nonprofits, universities, and government agencies—are responsible for ensuring that their personnel comply with legal and regulatory requirements; organizations must find mechanisms to develop strategies and cultures of compliance; students develop an understanding of the field of organizational compliance and issues that compliance professionals are responsible for overseeing, establish a strong foundation in behavioral and traditional legal ethics, and develop persuasive arguments regarding strengths and weaknesses of compliance efforts undertaken by organizations. Corequisites: LAW:8331.
- LAW:9558 Corporate Boards Seminar** 2 s.h. Simulation of seven meetings of a board of directors of a hypothetical company; students act as board members facing a discrete issue of corporate governance and take turns acting as chair of the board or as general counsel, leading the board of directors through a discussion of the issues; focus on the normal functioning of United States publicly listed companies, as well as on the duties of directors in times of crisis or significant change to the corporation.

**LAW:9559 Corporate Ethics**

Examination of ethical issues that businesses and their attorneys confront in multiple contexts; particular emphasis on analyzing the meaning of ethical behavior, approaches to ethical decision making, issues of sustainability, development of social enterprise business models, and attorney's role in counseling corporate clients on ethical issues. Prerequisites: LAW:8331.

arr.

**LAW:9582 Deals**

Economic structure of complex commercial transactions as memorialized in agreements including bank credit facilities, indentures, underwriting agreements, other documents governing equity financings and financings involving convertible or preferred securities, venture capital agreements, securitization documents, business combination agreements, joint venture and shareholders agreements, limited liability company operating agreements, project finance documents; commercial agreements and how sophisticated parties order their private relationships to achieve efficient results. Prerequisites: LAW:8331.

arr.

**LAW:9591 Family Law in the World Community**

Family law from a global perspective; treatment of family law problems in varied legal systems; application of international treaties and conventions to issues such as child custody, adoption and foster care, education and child labor, juvenile crime and punishment, child trafficking and exploitation, migrant and refugee children, child soldiers.

arr.

**LAW:9631 Higher Education and the Law**

Introduction to the most pressing legal issues facing colleges and universities today: free speech on campus; academic freedom and tenure; diversity; student discipline; student privacy, safety, and well-being; Title IX; and intercollegiate athletics; a major goal is to consider the policy questions associated with institutional responses to these legal issues.

arr.

**LAW:9635 Happiness and the Law**

Happiness, law, and public policy; lawyer and client relationship; how to be a happy lawyer; pedagogical mix of Socratic discussion of readings and experiential components through which students experiment with mindfulness techniques and constructing an actionable and personal career-life plan that takes into account themes explored; additional experiential exercises.

3 s.h.

**LAW:9639 History of Regulation of Smoking and Tobacco**

Regulation of smoking and tobacco use; history, beginning with 19th and early 20th centuries; state statutes and case law; OSHA, EPA, and FDA regulations; class action litigation, involvement of law firms in formulating tobacco company strategies, use of medical studies, economic history of the tobacco industry.

arr.

**LAW:9656 Topics in 19th-Century American Legal History**

Exploration of selected focus topics, may include developments in the law of the home and the law of the workplace (free labor, worker immigration, apprenticeship, indentured labor, slavery); women's legal history; land issues and various Homestead Acts; Blackstone in America; Reconstruction of the Constitution after the Civil War; The National Archives—which houses American legal historical documents—displays the phrase, "What is past is prologue;" legal history that explains how we got to the legal present and to understand what is the law, you have to know how something got to be the law.

arr.

**LAW:9681 Elder Law**

With the aging population, elder law has become one of the fastest growing areas of law practice; examination of legal, policy, and planning issues related to aging in America; topics include planning for incapacity, guardianship, end-of-life planning (advance medical directives), social security, Medicare and Medicaid, planning for catastrophic illness and long-term care, elder abuse and neglect; exploration of ethical issues dealing with elderly and adult children of elderly.

arr.

**LAW:9701 International Criminal Law**

Available legal responses to ISIS; topics include the law of genocide, war crimes (including gender crimes), crimes against humanity, terrorism, human trafficking, money laundering, the International Criminal Court, and alternatives to prosecution including national truth commissions; strengths and weaknesses of international criminal law as a response to mass atrocity; practical considerations that limit and permit the effective functioning of this burgeoning legal experiment.

arr.

**LAW:9708 International and Comparative Labor and Employment Law**

Survey of labor and employment laws and norms developed and promulgated by the International Labor Organization (ILO), the European Union, free trade agreements, and corporate codes; comparative focus on laws of the United States, Germany, and China—three leading world economies with vastly different labor and employment law systems; how to make informed questions, including to local counsel, when cross-border, employment-related legal issues are encountered; why countries have different systems of labor and employment protection despite the fact that they all try to solve similar problems; how the United States is, or is not, unique.

2-3 s.h.

**LAW:9717 Iowa Medical Innovation Group Seminar**

Interdisciplinary seminar intended to simulate the experience of product development, including potential business and legal issues; over the course of a year a team of students, with at least one law student on each team, will originate an idea for a medical device, design it and produce figures or a prototype, design a business model for marketing it, and evaluate legal issues and prepare draft legal documents; law students will analyze and counsel team members on intellectual property and business law issues and prepare draft contracts, licensing agreements, and materials for procuring intellectual property rights.

arr.

**LAW:9723 Seminar on Islamic Law and Government**

Islamic legal and political legacy from formative period until modern time; critical analysis of logic and context of development; development of jurisprudential, legal, and political literature; overview of theories and practices of governance in Islam beginning with Caliphate system and ending with modern nation-state models. Same as RELS:6723.

3 s.h.

**LAW:9739 Topics in the Philosophy of Law**

Opportunity to explore certain questions in law and philosophy at greater depth; topics vary, ranging from foundational questions to issues with strong practical implications for public policy; readings specifically selected to fit topic area.

arr.

- LAW:9761 Law and the Trump Presidency** arr. 3 s.h.  
 Legal issues raised by the Trump administration that have drawn unusual public attention, ranging from matters related to immigration law, national security law, constitutional law, criminal law, campaign finance law, tax law, and administrative law, among other fields; oftentimes, issues raised lack clear legal answers or even relevant case; students study a selection of these novel issues as determined by current events and participant interest; includes substantial research and writing component; students lead a class discussion around their chosen research topic.
- LAW:9804 Legislative Redistricting Seminar** 3 s.h.  
 Examination of redistricting—the process of drawing lines for legislative elections in the United States; issues of the Census; vote dilution; one person, one vote; the Voting Right Act; partisan and racial gerrymandering; special purpose districts; theories of democracy inevitably play a significant role in discussions, and political science often informs evidence at the heart of disputes about election law.
- LAW:9811 Law of War, Peace, and Military Affairs** arr. 3 s.h.  
 How does the law seek to restrain use of force in armed conflict? When may sovereign states lawfully take up arms? Once war begins, what methods may states and soldiers employ? How does and should the law of war deal with non-state actors, notably terrorists and private military contractors? Must the world reassess its answers to these questions in light of geostrategic developments since 9/11? When and why is a soldier's obedience to illegal orders an acceptable excuse? Is the Nuclear Non-Proliferation Treaty a success or failure?
- LAW:9820 The Law of Low-Wage Workers** 3 s.h.  
 Exploration of how traditional labor and employment law might be insufficient to properly protect low-wage workers; focus on alternative representational institutions (e.g., worker centers) and the special role that federal, state, and local law enforcement agencies and attorneys general play in this area; special concerns of particular groups of low-wage workers (e.g., agriculture, meatpacking, the "gig" economy, households/domestic work); may include immigrant and prison labor.
- LAW:9826 LL.M. Seminar** arr. 3 s.h.  
 Basic research and analytical methodologies for the international and comparative law fields; workshop approach to project proposals, drafts.
- LAW:9829 Media Law** 3 s.h.  
 Overview of law that applies to mass media, citizen media, and social media; how law has attempted to define "the Media," and how it has distinguished between distribution platforms in treatment of media rights and obligations; American press and notions of press freedom at time of founding; tracking evolution of law governing injuries inflicted by speakers beginning with common-law treatment of libel and slander to constitutionalization of those torts; examination of law that applies to various journalistic tools; problems of jurisdiction and choice of law posed by online news; examining market influence on content; comparing American system with other countries approaches to media law.
- LAW:9830 Housing Law and Policy** 3 s.h.  
 Examination of how housing laws and policies in this country have fallen short of realizing the Housing Act's lofty ideal; exploration of challenges and tradeoffs inherent in developing effective legal solutions to the housing crisis through class discussions and exercises, research papers, and moderated presentations by housing professionals—from community organizers to legal aid lawyers to real estate developers and public officials.
- LAW:9834 Transportation Law and Policy** 3-4 s.h.  
 Transportation plays an outsized and understudied role in day-to-day life, economy, and society; law plays a similarly vital and underappreciated role in determining transportation policy; introduction to the law and policy of transportation.
- LAW:9849 Nonprofit and Philanthropic Organizations** arr. 3-4 s.h.  
 Issues in law and policy relating to philanthropic and nonprofit institutions; creation, role, nature, and history of nonprofit entities; tax exemption, tax treatment (including property and donor tax issues); political and legislative activities; roles of members, directors, officers; problems of external regulation, accreditation, ethics; special issues for religious organizations, community foundations, private foundations, universities; development of philanthropic and nonprofit activity in foreign jurisdictions.
- LAW:9860 Inside-Out: Social Justice Issues and Critical Theory** 2-4 s.h.  
 Use of Inside-Out model; law students (outside students) co-learn with incarcerated students (inside students) at the Iowa Medical and Classification Center (IMCC), also known as Oakdale, a medium security state prison and the site for the University of Iowa Liberal Arts Beyond Bars (UI LABB) program; analysis and discussion of current social justice issues through a critical legal theory lens (i.e., critical race theory, feminist legal theory, LatCrit, ClassCrits, queer theory, critical disability theory).
- LAW:9861 Current Social Justice Issues and Critical Theory Perspectives** 2-4 s.h.  
 Use of critical theories as a tool to examine current social justice issues; creation of a learning environment that adheres to the values of critical legal theories—which is non-hierarchical, values expression in all forms from a broad range of authors/creators, and disrupts traditional understanding of the classroom.
- LAW:9863 Patent Prosecution Seminar** 3-4 s.h.  
 Drafting seminar on patent application preparation and prosecution; student drafting exercises and presentations on advanced patent law topics; administrative rules and procedures governing practice before the U.S. Patent and Trademark Office; for students who plan to practice patent law. Prerequisites: LAW:8643.
- LAW:9871 Privacy Law and Technology** 3-4 s.h.  
 We have become, wittingly or not, compulsive data makers; every day we shed reams of personal information that those who have an interest in empowering, monetizing, manipulating, or suppressing us are eager to acquire; this dynamic is redrawing the line between what it means for information to be private/public, personal/commercial, ours/theirs; privacy law and technology serves an interdisciplinary introduction to technologies, laws, and policies that shape how that information is collected, who has access to it, and what it can reveal about us; class sessions alternate between focusing on legal frameworks and the technologies they implicate.

**LAW:9874 Principles of Contract Drafting 3 s.h.**

Principles of drafting business contracts; focus on structure of contracts, how to draft each of the parts of a business contract, and how to translate the needs of the business into clear and understandable contractual language; examination of typical business contracts (e.g., nondisclosure agreements, letters of intent, purchase agreements, and other types of agreements); students complete drafting exercises and a series of larger contract drafting projects.

**LAW:9882 Public Health Law arr.**

Introduction to scope, function, and history of governmental activities and programs encompassed by public health regimes (primarily in the United States); legal and constitutional powers and duties of states to create prerequisites for health of population as a whole; limitations on exercise of that power to restrict individuals interests (inter alia) in liberty, autonomy, privacy, and property; tensions and conflicts that arise when collective action on behalf of public/common good constrains what the state deems to be acceptable risks triggered by actions of private individuals.

**LAW:9883 Health Disparities and the Law 3-4 s.h.**

Examination of relationship between race, racism, health disparities, and law; use of readings, video clips, and class discussions to trace history of racism in health care and development of scientific racism; how race became incorporated into our systems of law and governance; how race can lead to disparities in exposure to health hazards and diagnosis and treatment of illness.

**LAW:9886 Reconstruction and the Constitution arr.**

After the Civil War, during Reconstruction, Congress enacted the 13th, 14th, and 15th Amendments that changed the constitutional course of the nation and took place during the period of most progressive reform in U.S. history; students address: How do these amendments fit together? Where did the language of these amendments come from? How did these relate to the Dred Scott case? How did this constitutional change occur? What was necessary for this reform to come about? What was necessary legally? What was necessary in terms of social context for this progressive reform to occur? How do these amendments relate to the Bill of Rights and the 17th Amendment for women's suffrage? Prerequisites: LAW:8010.

**LAW:9912 Selected Issues in Family Law arr.**

In-depth look at an issue or set of issues in family law; relevant cases, statutes, scholarship; class visits or on-the-job observations with community members who play roles in the family law process being examined.

**LAW:9936 Selected Topics in Immigration Law arr.**

Issues arising out of contemporary problems of immigration law and practice; topics may include immigration enforcement policy, draft immigration legislation, initiating representation, bond hearings, suppression/other motions practice, defensive asylum/related claims, appellate practice, "know your rights" counseling, establishing powers of attorney/other forms of legally binding substitute decision making pertaining to family members/property/other assets, identifying and working with local resources/community organizations that can assist with or reinforce goals of individual client representation; may involve guest speakers/field trips to local nonprofits/government agencies. Recommendations: no specialized knowledge of immigration law is presupposed and no prior immigration law courses required.

**LAW:9941 State Constitutional Law arr.**

Power of state courts to independently interpret state constitutional provisions that are identical or similar to the federal counterparts; various approaches taken by state courts with respect to this issue; in-depth analysis of cases where a state court has departed from the federal interpretation. Prerequisites: LAW:8280.

**LAW:9950 S.J.D. Continuous Enrollment 1 s.h.**

Intended for S.J.D. students working on their dissertation with no mandatory classes left to take; continuous registration is a College of Law policy and students should register for continuous registration only if they are not going to register for any other tuition and fee-assessing courses. Requirements: S.J.D. enrollment, completion of required coursework, and promotion to candidacy.

**LAW:9959 Supreme Court Seminar arr.**

Supreme Court practice, procedure, jurisdiction; the art of opinion writing; in-depth analysis of cases on the court's pending docket; writing briefs, conducting research, conferencing cases, assigning and preparing opinions, and persuading colleagues; preparation of an opinion.

**LAW:9960 Crime and Punishment in American History 3 s.h.**

As reasons behind punishment shifted, so did its methods change; sometimes these developments occurred amidst great public debate and scrutiny; at other times, they proceeded almost without notice; students are challenged to think critically about the relationship between laws on crime and punishment on one hand, and American society, politics, and culture on the other (What did it mean to be "criminal" at various points in American history? How have criminal laws both reflected and shaped their times? And what does this history mean for modern crime control and its reform?).

**LAW:9989 Litigation for Decarceration 2-3 s.h.**

Analysis and discussion of recent criminal-legal reforms aimed at reducing the number of individuals who are imprisoned in the federal system.

**LAW:9990 Wrongful Convictions and the American Criminal Justice System arr.**

Over 300 innocent persons in the United States have been exonerated through DNA evidence after being convicted of crimes they did not commit since 1989; how wrongful convictions occur, how they are remedied, how future injustices can be prevented; introduction to criminal appeals and postconviction proceedings; examination of cases of wrongful convictions; common factors that contribute to conviction of innocent; challenges of proving innocence under statutory and constitutional law; how the system can be reformed to prevent wrongful convictions.

## Law Study Abroad Courses

**LWAB:8230 France Summer Program: Paris and Arcachon arr.**

Intensive coursework in France taught by professors from Iowa and France; program begins in Paris where students visit courts and a law school with speakers including prominent judges and lawyers; students then travel to Arcachon for remainder of stay. Five-week courses in May and June.

**LWAB:8250 Law Study Abroad at Peking University School of Transnational Law arr.**

Exchange study program at Peking University of Transnational Law in China.

**LWAB:8360 Law Study Abroad at KoGuan Law School of Shanghai Jiao Tong University** **arr.**

Exchange student study abroad program at KoGuan Law School of Shanghai Jiao Tong University.

**LWAB:8825 London Law Program** **2-3 s.h.**

London Law Program is open to second- and third-year law students who spend ten days taking classes in the heart of London; students visit parliament, the UK supreme court, the Inns of Court, and attend a symposium at Oxford University as part of their coursework; each course offered includes a strong comparative dimension. Winter session.

**LWAB:9215 Law Study Abroad at Beijing Normal University** **arr.**

Exchange Student study abroad program at Beijing Normal University, Beijing, China.

**LWAB:9223 Law Study Abroad at Catolica University** **arr.**

Exchange student study at the University of Católica in Lisbon, Portugal.

**LWAB:9226 Law Study Abroad at Radboud University Nijmegen** **arr.**

Exchange student study at Radboud University in Nijmegen, Netherlands.

**LWAB:9230 Law Study Abroad at Ewha Womens University** **arr.**

Exchange student study at Ewha Womens University in Seoul, South Korea.

**LWAB:9234 Law Study Abroad at Korea University** **arr.**

Exchange student study at Korea University in Seoul, South Korea.

**LWAB:9238 Law Study Abroad at National University Ireland** **arr.**

Exchange student study at National University Ireland, Galway, Ireland.

**LWAB:9242 Law Study Abroad at Pontifica Comillas University** **arr.**

Exchange student study at Pontifica Comillas University, Madrid, Spain.

**LWAB:9244 Law Study Abroad at the University of Vienna** **arr.**

Exchange student study abroad program at the University of Vienna, Austria.

**LWAB:9246 Law Study Abroad at the University of Pristina** **arr.**

Exchange student study at the University of Pristina, Kosovo.

**LWAB:9300 Law Study Abroad at Zhejiang University Guanghau Law School** **arr.**

Students enroll in classes linked to Zhejiang University's LL.M. programs and earn up to 15 credits, choosing from a variety of courses taught in English; students with adequate fluency also can take law courses taught in Chinese; exchange program is for one semester, and students can make arrangements with Zhejiang University for an additional semester to complete an LL.M.

**LWAB:9301 Law Study Abroad at University of Zagreb** **arr.**

Exchange student study abroad at University of Zagreb in Croatia.

## Juris Doctor, J.D.

The Juris Doctor (J.D.) is a professional degree awarded by the College of Law. The University of Iowa College of Law is approved by the Council of the Section of Legal Education and Admissions to the Bar of the American Bar Association.

The first year of the J.D. program offers the personal connection and attention students need to develop a strong intellectual foundation for legal thinking and writing. The College of Law has one of the lowest student-faculty ratios of any law school. Professors have an open-door policy, and they serve as models for the kind of highly collaborative, rigorously professional behavior that prepares students to serve as counselor to their clients. Students get intensive, individualized instruction from legal writing faculty; the College of Law is one of the few law schools in the nation with a full-time faculty dedicated solely to a student's growth as a legal writer.

In the second and third years, students focus on the areas of law that most interest them, drawing from a rich menu of mainstream, specialized, and clinical courses. A wide array of opportunities provides experiential learning: moot court competitions, the field placement and the clinical law programs that allow students to take the lead with real clients, or allowing students to write for one of the four student-run scholarly journals. The Field Placement program, in particular, provides a wide range of placements for students still in law school. Students have worked in U.S. District Courts, legal aid centers, federal public defenders' offices, and nongovernmental organizations (NGOs) around the world. Students also may add distinction to their résumés by participating in study abroad or exchange programs.

Details about applications and admission to the program are available on the College of Law website.

### Cocurricular and Extracurricular Programs

Students enrich their course of study by participating in the college's cocurricular and extracurricular programs which include Moot Court, the Trial Advocacy Program, and four student-produced journals.

#### Moot Court

In the Moot Court appellate advocacy programs, students draft appellate briefs, build expertise with citation form, develop research skills, and strengthen their persuasive abilities through oral arguments.

#### Trial Advocacy

The Trial Advocacy Program is a student-run, faculty-supervised program in which students develop and refine skills used to prepare and try civil and criminal cases. The heart of the program is LAW:9060 Trial Advocacy, a course taught by law school faculty, federal and state judges, and experienced trial attorneys. Students are on their feet during most class sessions, practicing the arts of jury selection, opening statement, direct and cross examination, introduction of exhibits, use of expert testimony, and closing argument. The course culminates with a full-scale trial—from the filing of pretrial motions to the rendering of a jury verdict—conducted by student co-counsel before a visiting judge and a jury of laypersons.

The Stephenson Competition is named after Judge Roy L. Stephenson, a U.S. District Court and Eighth Circuit Court of Appeals judge and a 1940 graduate of the College of Law. Students who demonstrate superior ability in advocacy skills during the trial advocacy courses participate in a series of mock trials judged by local members of the bench and bar. Individuals selected from the competition represent the University of Iowa in the national trial competition.

### Iowa Law Review

Since its inception in 1915, the *Iowa Law Review* has served as a scholarly legal journal, noting and analyzing developments in the law and suggesting future paths for the law to follow. Students have managed the review since 1935, editing and publishing articles by professors and students. To learn more, visit the Iowa Law Review website.

### Journal of Corporation Law

The *Journal of Corporation Law* is the nation's oldest and most cited student-published legal periodical specializing in corporate law. The journal's scope includes antitrust, intellectual property, labor law, securities, taxation, employment discrimination, insurance, products liability, and regulated industries, as well as traditional corporate topics. Selected articles submitted by practitioners and academics are published in each of four annual issues. See the Journal of Corporation Law website.

### Journal of Gender, Race & Justice

The *Journal of Gender, Race & Justice* pushes the boundaries of legal scholarship and theory in its focus on social justice issues. The journal hosts a symposium at the College of Law every third year, bringing together nationally renowned legal scholars and practitioners to discuss the relationships among the law and race, gender, sex, sexual identity, economic class, ability, and other identity characteristics. The journal publishes an annual volume of legal works that includes symposium papers, papers from conferences outside the college, and articles written by Iowa law students. To learn more, visit the Journal of Gender, Race & Justice website.

### Transnational Law & Contemporary Problems

*Transnational Law & Contemporary Problems* addresses issues and problems that transcend traditional political boundaries, that are of interest to the international and comparative law community, and that are not commonly found in other journals and reviews. One issue takes the form of a symposium addressing specific topics; this issue has a guest editor who is a legal scholar noted for work on the symposium topic. The second issue is submission based. Every other year the journal organizes and sponsors a symposium on a contemporary international issue; past topics include climate change, the European Union's sovereign debt crisis, and war crimes. For more information, visit the Transnational Law & Contemporary Problems website.

## Requirements

The Juris Doctor (J.D.) requires a minimum of 88 s.h. to earn the degree. To be eligible for a J.D. degree, students must meet the credit hour requirements, meet the length of study requirements, achieve a cumulative g.p.a. of at least 2.1, take and complete all required courses, satisfy the writing requirements, and satisfy the experiential course requirement.

## First-Year Curriculum

The first-year curriculum emphasizes development of analytical skills, a sense of the role of legal institutions in society, and essential writing skills. Each course in the first-year curriculum shares these emphases and conveys substantive knowledge about a particular area of the law.

First-year students take the following courses.

### First Year, Fall

Code	Title	Hours
LAW:8017	Contracts	4
LAW:8026	Introduction to Law and Legal Reasoning	1
LAW:8032	Legal Analysis Writing and Research I	2
LAW:8037	Property	4
LAW:8046	Torts	4

### First Year, Spring

Code	Title	Hours
LAW:8006	Civil Procedure	4
LAW:8010	Constitutional Law I	3
LAW:8022	Criminal Law	3
LAW:8033	Legal Analysis Writing and Research II	3
Elective		3

The two-semester sequence LAW:8032 and LAW:8033, Legal Analysis Writing and Research (LAWR), is designed to equip students with effective skills in legal analysis, writing and oral communication (oral advocacy), and research.

## Second- and Third-Year Curriculum

Second- and third-year courses cover the range of specialties within the legal profession, allowing students to explore and follow their professional interests in a particular career specialization, to write for one of the school's four student-run scholarly journals, to pursue combined degrees in law-related graduate programs, or to simply obtain the widest possible exposure to the legal landscape.

All second- and third-year students must complete the following work.

Code	Title	Hours
LAW:8280	Constitutional Law II	3
LAW:8791	Professional Responsibility	3
Experiential course requirement		
Four writing units beyond the writing requirements of the first year		

## Combined Programs

### J.D./Graduate Degrees

Some students want to explore areas beyond the law, whether it is to maximize their skill sets for future careers, gain in-depth knowledge in a second subject matter, or simply to broaden their minds. Combined degree programs allow students to pursue two degrees simultaneously, taking advantage of synergies between degree requirements while gaining significant exposure to a second area of study. Juris

Doctor students may pursue combined degree programs with most graduate and professional programs at the University of Iowa. Students may earn a J.D. degree and another graduate or professional degree in a shorter amount of time than if the two degrees were pursued independently.

### Admissions Qualification

To pursue a combined degree, students must apply to and be accepted separately into the J.D. program and another graduate or professional program. Students typically seek admission to the second degree-granting program after matriculation at the College of Law by applying to the graduate program of interest during their first year of law school. In some cases it is possible to apply to both programs simultaneously. Students who have already begun graduate work at the University of Iowa may apply to the College of Law. Once students have been accepted into the J.D. program and another graduate or professional program, they must obtain the permission of the associate dean for student affairs or the dean of the College of Law to be classified as a combined degree candidate. Prospective students interested in a combined degree program should contact the admissions offices of both programs to discuss the proposed program of study.

Students who wish to pursue a combined degree program and obtain admission into one college but not the other may enter the college in which they were admitted. However, they are not granted combined degree status. Likewise, combined degree students who terminate work toward one of the degree programs may typically continue to work toward the other degree.

### Admissions Procedures

Prospective combined degree students must submit separate applications to the College of Law and the graduate program of interest. They must take the Law School Admission Test (LSAT) and comply with all College of Law admissions requirements. Students also must meet the admission requirements of the other graduate program by taking tests such as the Graduate Record Examination (GRE) General Test or the Graduate Management Admission Test (GMAT). Prospective students should inform the Admissions Offices of both programs that they are applying to a combined degree program to confirm the admissions requirements for the other program.

Students interested in a combined degree program at the beginning of their legal studies should indicate they are seeking a combined degree on their application. Students who are admitted to both colleges will receive separate letters of admission from those colleges as well as an official notification of being admitted to the combined degree program from the Office of Admissions.

Admission information for the Juris Doctor (J.D.) is available on the College of Law Admissions page. For information about other graduate programs of interest, visit Academics on the University of Iowa home page.

### Shared Credit Policies

Students enrolled in a combined degree program must satisfy the semester hours and course requirements that all students must satisfy for each degree separately. However, they have the option of using credit for some courses toward both degrees. These courses are typically electives in each discipline. For example, students enrolled in a combined J.D./M.P.H. program may be able to count the family law and

introduction to U.S. health care system courses toward the graduation requirements of both the J.D. and M.P.H. degrees.

The amount of shared credit that may be applied toward both programs of study varies by program. Generally, combined degree program students may apply up to 12 s.h. earned in their second program of study toward the J.D. provided that the courses satisfy the College of Law policy on non-law courses. The J.D./M.P.H. degree permits up to 12 s.h. of specific College of Law courses to count toward M.P.H. graduation requirements. Some degree programs allow students to count up to 6 s.h. of College of Law courses toward a non-law degree. Details on the Graduate College policy may be found in the Manual of Rules and Regulations on the Graduate College website. Prospective students should check with their graduate or professional program of interest to determine the law semester hours that count for both programs as well as other rules or restrictions concerning counting of courses toward both degrees with the College of Law.

Additional details about College of Law graduation requirements and other policies may be found in the College of Law Student Handbook. Students considering a combined degree program should be aware that the first-year program in the College of Law consists of required courses and they typically may not take courses outside the College of Law.

### **Student Tuition Assessment Policy**

Students in a J.D. and a graduate/professional degree combined program are assessed tuition at the College of Law rate if the tuition in the other college is lower than in the College of Law, except for any semester or summer session in which they are not enrolled in any law courses and none of the semester hours being earned in other colleges are applied toward their J.D. degree. All combined degree students pursuing a J.D. degree are assessed at least six semesters of law school tuition.

# Master of Laws, LL.M.

The Master of Laws (LL.M.) is designed for two types of students, either the legal practice or the research track.

## Legal Practice Track

For foreign-trained jurists who seek a comparative introduction to, and specific training in, aspects of United States law and legal institutions, and a path to state bar admission. Students benefit from the College of Law's legal analysis, writing, and research course, and core courses including contracts, property, torts, and professional responsibility. An extended orientation provides an introduction to United States law.

## Research Track

For foreign-trained jurists or graduates of J.D. programs in the United States who wish to deepen their understanding of law and are interested in research. The program encourages close collaboration with renowned experts in comparative law; anti-competition law; law and economics; law and society; international law, including the law pertaining to international business transactions and/or human rights; and business and innovation.

The LL.M. program admits fewer applicants so that students receive substantial attention from the faculty. Admission is competitive. All applicants must present evidence of high academic potential and strong recommendations, especially from law professors who supervised their work in classes or seminars.

## Requirements

The Master of Laws program requires that students successfully complete a minimum of 24 s.h. of credit, as approved by their faculty advisor. Coursework is selected from the College of Law's general course offerings and from LL.M.-specific courses.

## Required Courses

Code	Title	Hours
All of these:		
LAW:8026	Introduction to Law and Legal Reasoning	1
Two faculty-supervised writing units		1-4
Two first-year courses, including at least one of these:		
LAW:8017	Contracts	4
LAW:8037	Property	4
LAW:8046	Torts	4
May include one of these:		
LAW:8006	Civil Procedure	4
LAW:8010	Constitutional Law I	3
LAW:8022	Criminal Law	3

## Legal Practice Track

This track is open to foreign-trained lawyers who do not have a J.D. earned in the United States. Students enroll in the LL.M. orientation to the U.S. legal system course in two parts; a course in professional legal writing; a course in professional responsibility; and at least two basic bar exam courses, such as contracts, torts, or constitutional law. This track is designed

to qualify students to take the bar exam in states that allow graduates of LL.M. programs to complete the bar exam.

## Research Track

This track is open to both foreign-trained students and students who hold a J.D. degree earned in the United States. LL.M. students without a J.D. degree must take the LL.M. orientation to the U.S. legal system course in August before the start of the fall semester. Students take the LL.M. seminar, a research and writing course in which they write a research paper on a topic chosen with the approval of their advisor. This track is especially suitable for those seeking to enter into an academic career or one that primarily involves policy formulation or research.

Students who earned a J.D. in the United States and international students who have been trained in another common-law jurisdiction, whose English competence is sufficiently high, and who choose the research track are required to undertake a more ambitious research project intended to lead to the production of a publishable paper. Others suitably qualified also may attempt the longer research paper with their advisor's approval.

With the exception of the LL.M. orientation course and the LL.M. seminar, courses are taken with other J.D. students from law course offerings, especially offerings on U.S., international, and comparative law. This method of instruction ensures a very effective comparative experience through broad contact with U.S. law students and professors, and U.S.-trained students similarly benefit from close contact with foreign-trained lawyers.

# Master of Studies in Law, M.S.L.

Application materials are reviewed by the M.S.L. Faculty Oversight Committee.

The Master of Studies in Law (M.S.L.) degree is primarily intended to educate students and professionals in other fields who do not wish to practice law but who need to recognize and respond effectively to legal issues arising in their work. Individuals who have completed their B.A. or B.S. degree may choose to better position themselves in the job market. Others may be on an established career path but seek to increase their skill set and enhance mobility and promotion opportunities.

The M.S.L. program provides professionals with an overview of the legal system as a whole, as well as an introduction to some of the legal issues that they are likely to confront in their fields. Students take existing courses in the College of Law alongside J.D. students.

The degree may be completed in as little as one year of full-time study or in not more than four years of part-time study. The M.S.L. program does not qualify graduates to practice law.

## Requirements

The Master of Studies in Law program requires 30 s.h. of credit. With law school approval, M.S.L. students may take up to 9 s.h. in related coursework from other colleges across campus. Students complete common requirements and customize their curriculum based on interest. Students also may choose to pursue a specialty track such as the law and public policy track or the business and innovation track.

## Common Requirements

All students must take the following.

Code	Title	Hours
Both of these:		
LAW:8026	Introduction to Law and Legal Reasoning	1
One or more College of Law writing seminars, independent studies, or tutorials		2
Two first-year courses required of J.D. students, including at least one of these:		
LAW:8017	Contracts	4
LAW:8037	Property	4
LAW:8046	Torts	4

## Admission

Applicants must submit an application for admission; a short statement detailing their reasons for pursuing the M.S.L. degree; a current résumé; official transcripts from all institutions students have attended; two letters of recommendation; and an official ACT, SAT, Graduate Record Examination (GRE) General Test, Graduate Management Admission Test (GMAT), or Law School Admission Test (LSAT) score.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) or the Duolingo English Test (DET).

# Doctor of Juridical Science, S.J.D.

The Doctor of Juridical Science (S.J.D.) program is intended for students who wish to conduct original and advanced legal research in law under faculty supervision. S.J.D. students are expected to write a dissertation.

## Requirements

The Doctor of Juridical Science program includes five requirements for earning the S.J.D. degree.

### Year of Residency

Doctor of Juridical Science students must spend at least one academic year (two semesters) in residence in the S.J.D. program at the College of Law.

Students must complete 18 s.h. of credit during their first year of residency; students who have not earned an LL.M. degree complete 24 s.h. They must enroll in the S.J.D. tutorial (5 s.h. each semester; 10 s.h. total) to conduct research and writing under the supervision of their S.J.D. dissertation committee. The work in the S.J.D. tutorial focuses on formulating a detailed dissertation proposal, beginning research for and writing of portions of the dissertation, and completing one or more chapters.

Students are expected to write a dissertation of publishable quality making a significant and original contribution to legal scholarship. The dissertation should be a book-length manuscript or a series of related articles of equivalent intellectual ambition and scope.

The balance of the required 18 s.h. will be earned through research and writing related to a student's dissertation, supervised by the student's S.J.D. chair. However, at the discretion of a student's S.J.D. committee, some of the semester hours may be allocated to courses or seminars that the committee feels a student needs to strengthen the ability to write a successful dissertation.

### Admission to S.J.D. Candidacy

Admission to candidacy is a formal step that must be achieved before a student has the right to continue in the S.J.D. program to complete a dissertation and is determined by the student's committee on the basis of the work done during the student's year of residency in the program.

As part of the assessment process, the S.J.D. committee holds an oral examination toward the end of a student's year of residency that focuses on the work the candidate has completed on the dissertation, the candidate's general knowledge and understanding in relation to the subject matter of the dissertation, and the candidate's further plans for completion of the dissertation. If the committee is not able to admit the student to S.J.D. candidacy at the conclusion of the first year of residency, the committee may give an extension of up to one calendar year if it finds a sufficient basis to believe that the student likely will be able to satisfy the necessary standard within that time.

## Presentation of Dissertation Work

Each student is required to make at least one substantive presentation of dissertation work at a meeting of the S.J.D. tutorial to a specially constituted group of faculty, or in a public meeting, as arranged with the student's S.J.D. committee.

## Completion of the Dissertation

Students admitted to S.J.D. candidacy continue to enroll in 1 s.h. of dissertation credit, which provides access to University resources, including the Law Library. However, students admitted to S.J.D. candidacy are free to complete their dissertation wherever they wish. In any event, they must continue to coordinate with their committee and continue to register each fall and spring semester as an S.J.D. candidate in the college.

## Oral Defense of the Dissertation

Before a student's S.J.D. committee decides whether to approve the student's completed dissertation, the student must successfully defend the dissertation in an oral defense led by the committee. A student must complete the dissertation and have it approved by the committee within five calendar years from the date of admission to S.J.D. candidacy.

## Admission

To be admitted to the S.J.D. program, students typically first complete the LL.M. degree at the University of Iowa or a similar masters-level degree at another law school, either in the United States or at an English language law school with academic standards equivalent to those of highly ranked United States LL.M. programs. In appropriate circumstances, the admissions committee will consider applications from excellent students without an English language master's-level degree who wish to proceed directly to work on their S.J.D. degree. All applicants must show strong evidence of scholarly research and writing abilities.

For more information, visit the S.J.D. application process web page.

# University of Iowa Center for Human Rights

## Director, Center for Human Rights

- Adrien K. Wing

## Director, Human Rights Certificate Program

- Brian R. Farrell

**Undergraduate certificate:** human rights

**Website:** <https://uichr.uiowa.edu/>

Human rights purport that all people deserve to live life with dignity; that human beings are owed the protection of these rights simply because they are human. Universal human rights apply to all equally and without discrimination. They encompass civil and political rights; economic, social, and cultural rights; and apply to both individuals and groups. The rights set forth in human rights doctrines, such as the Universal Declaration of Human Rights, are interrelated, interdependent, and indivisible.

The curriculum for the Certificate in Human Rights introduces students to human rights theory and practice by providing students with the opportunity to understand human rights law, history, and philosophy; explore specific, pressing human rights topics in-depth from interdisciplinary perspectives; identify solutions to global challenges; learn how to translate human rights theory into effective advocacy; and strengthen one's ability to communicate successfully with academic and nonacademic audiences.

The Certificate in Human Rights is administered and awarded by the College of Law [p. 1689].

## Programs

### Undergraduate Program of Study Certificate

- Certificate in Human Rights [p. 1714]

## Courses

### University of Iowa Center for Human Rights Courses

#### **HRTS:2115 Introduction to Human Rights** 3 s.h.

Analysis and evaluation of the international human rights program; relationship between human rights and international law. Same as IS:2115.

#### **HRTS:3905 Topics in Human Rights** 1-3 s.h.

Examination of emerging human rights issues from an interdisciplinary and international perspective. Same as IS:3905.

#### **HRTS:3906 Global Crises and Human Rights** 3 s.h.

Exploration of human rights in context of global challenges; multidisciplinary; topics may include military conflict, nuclear war, human trafficking, environmental disasters, and other international human rights crises.

#### **HRTS:3910 Human Rights Advocacy** 3 s.h.

Theoretical foundations and critical issues for international human rights advocacy and international humanitarian movements. Same as IS:3910.

#### **HRTS:3920 Seminar in Human Rights Praxis: Supervised Internship** 3 s.h.

Supervised internship in human rights praxis; focus on field-based advocacy and human rights frameworks.

# Human Rights, Certificate

## Requirements

The undergraduate Certificate in Human Rights requires 18 s.h. of credit. The certificate program is open to current University of Iowa undergraduate students and to all individuals who hold a bachelor's degree and are not enrolled in a UI graduate or professional degree program. Students must maintain a g.p.a. of at least 2.00 in certificate coursework. They may count a maximum of 6 s.h. of transfer credit toward the certificate with approval from the certificate program's faculty advisory group.

Individuals must declare their intent to earn the certificate. See the Certificate in Human Rights website for details.

The Certificate in Human Rights requires the following coursework.

## Foundations in Human Rights

Code	Title	Hours
All of these:		
HRTS:2115/IS:2115	Introduction to Human Rights	3
HIST:4101	History of Human Rights	3
PHIL:3430	Philosophy of Human Rights	3

## Contemporary Global Issues in Human Rights

Code	Title	Hours
6 s.h. from these:		
HRTS:3905/IS:3905	Topics in Human Rights (repeatable if topics are different)	1-3
HRTS:3906	Global Crises and Human Rights (repeatable if topics are different)	3

## Human Rights in Practice

Code	Title	Hours
One of these:		
HRTS:3910/IS:3910	Human Rights Advocacy	3
HRTS:3920	Seminar in Human Rights Praxis: Supervised Internship	3

## Career Advancement

The Certificate in Human Rights benefits students interested in careers in government, social services, the nonprofit sector, business, and education, as well as those pursuing law school or other professional or graduate degrees.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# Human Rights, Certificate

Course	Title	Hours
<b>Academic Career</b>		
<b>Any Semester</b>		
Holders of Iowa baccalaureate degrees may return to complete the requirements for a certificate.		
Holders of baccalaureate degrees from other institutions who are not enrolled in a UI graduate or professional program may apply for admission to the College of Liberal Arts and are awarded the certificate on completion of the requirements.

**Undergraduate majors:** medical laboratory science (B.S.); nuclear medical technology (B.S.); radiation sciences (B.S.)

**Undergraduate certificate:** EMT paramedic program

**Professional degrees:** M.C.A.; M.C.N.; M.D.; M.P.A.S.

**Graduate degrees:** M.A.; M.M.E.; M.S.; D.P.T.; Ph.D.

**Website:** <https://medicine.uiowa.edu/>

The Roy J. and Lucille A. Carver College of Medicine is an integral part of the University of Iowa. It contributes to the education of thousands of University students, is home to ground-breaking research in a wide array of disciplines, and provides a statewide health care resource.

The Carver College of Medicine is the only college in Iowa that offers a curriculum leading to the Doctor of Medicine. It also offers a Bachelor of Science in medical laboratory science, nuclear medicine technology, and radiation sciences (see "Undergraduate Programs of Study" under Programs [p. 1716] in this section of the Catalog). It offers Master of Science and Doctor of Philosophy degrees in several disciplines, the Master in Medical Education, and the Doctor of Physical Therapy (see "Graduate Programs of Study" under Programs [p. 1716] in this section of the Catalog). In addition, the Carver College of Medicine offers professional degrees: the Doctor of Medicine, the Master of Clinical Anatomy, the Master of Clinical Nutrition, the Master of Physician Assistant Studies (see "Professional Programs of Study" under Programs [p. 1716] in this section of the Catalog).

Doctor of Medicine and other health sciences students have a number of opportunities to gain experience in medical clinics, community hospitals, and a major academic medical center. M.D. graduates may pursue further training in the specialties of family medicine, internal medicine, surgery, and pediatrics at one of 13 University of Iowa-affiliated residency programs in six Iowa cities. The college also participates in the education of students in the Colleges of Dentistry, Nursing, Pharmacy, and Public Health and in the life sciences and health-related programs of the College of Liberal Arts and Sciences, the College of Engineering, and the Graduate College.

Health professionals from throughout the Midwest take part in the college's year-round continuing medical education programming, updating their knowledge and skills through refresher courses, clinics, and conferences. The college also offers a variety of services that support Iowa physicians and community hospitals.

In addition to providing education and resources for physicians and other health care organizations, the college addresses broad public issues of distribution and organization of health care services. Its faculty members advise and serve on national, state, and regional health planning councils, health boards, and various health agencies.

Accredited by the Liaison Committee on Medical Education of the American Medical Association and the Association of American Medical Colleges, the Carver College of Medicine meets the requirements of all state licensing boards. Its M.D. diploma admits the holder to all privileges granted to graduates of all medical colleges before such boards. All other professional programs administered by the college are accredited by their respective accrediting bodies.

## Doctor of Medicine (M.D.)

The Doctor of Medicine is a four-year program that prepares students to practice primary care medicine and to pursue further education and training in specialized areas of medicine. For a description of the M.D. curriculum and information about admission to the program, financial support, and academic rules and procedures, see Doctor of Medicine [p. 1751] in the Catalog.

## Programs

### Undergraduate Programs of Study

The Carver College of Medicine offers a Bachelor of Science with majors in medical laboratory science, nuclear medicine technology, and radiation sciences. The medical laboratory science major is offered through a partnership with Allen College, in Waterloo, Iowa. See Medical Laboratory Science [p. 1769], Nuclear Medicine Technology [p. 1792], and Radiation Sciences [p. 1834] in the Catalog. In addition, the college offers an undergraduate certificate; see the EMT Paramedic Program [p. 1719] in this section of the Catalog.

### Graduate Programs of Study

The Carver College of Medicine offers graduate programs leading to the M.S. in athletic training (see the Department of Orthopedics and Rehabilitation [p. 1802]), the M.S. and Ph.D. in biochemistry (see the Department of Biochemistry and Molecular Biology [p. 1732]), the M.S. and Ph.D. in microbiology (see the Department of Microbiology and Immunology [p. 1774]), the M.S. in pathology (see the Department of Pathology [p. 1809]), the Doctor of Physical Therapy and the Ph.D. in physical rehabilitation science (see the Department of Physical Therapy and Rehabilitation Science [p. 1812]), and the Master in Medical Education (see the Medical Education Program [p. 1765]). Departmental participation and teaching leads to the Graduate College's M.S. and Ph.D. in biomedical science [p. 1599] with cell and developmental biology, free radical and radiation biology, molecular physiology and biophysics, and pharmacology subprograms.

The college also offers a combined M.D./Ph.D. degree through the Medical Scientist Training Program [p. 1772]; see Combined Programs [p. 1755] in the Doctor of Medicine section of the Catalog.

Many of the college's faculty members participate in the Graduate College's interdisciplinary programs in genetics [p. 1625], immunology [p. 1631], molecular medicine [p. 1660], and neuroscience [p. 1662].

### Professional Programs of Study

The Carver College of Medicine offers the Doctor of Medicine [p. 1752] degree, the Master of Clinical Nutrition [p. 1749] (M.C.N.), the Master of Physician Assistant Studies [p. 1824] (M.P.A.S.), and the Master of Clinical Anatomy [p. 1728] (M.C.A.).

## Undergraduate Rules and Procedures

Undergraduate study in the Carver College of Medicine is guided by the following academic rules and procedures.

### Health Insurance, Immunizations

All health professions students are required to provide proof of health insurance coverage annually. Contact the University Benefits Office or visit its website.

All health sciences students must show proof of health examinations and screenings annually. For more information, contact Student Health and see Student Requirements and Forms on its website.

### Application for Degree

Students who want to be considered for graduation must submit a Degree Application with the Office of the Registrar through MyUI before the deadline for the session in which the degree is to be conferred. Students who have fulfilled the requirements for a minor or a certificate must indicate this on the degree application form filed through MyUI so that completion of the requirements for the minor or certificate can be verified and noted on their transcript.

### Academic Recognition

The University of Iowa and the Carver College of Medicine recognize academic achievement every fall and spring semester.

### Graduation with Distinction

Graduating students may be recognized for their scholastic achievement upon recommendation by their academic program and with the dean's approval. Graduation with distinction, high distinction, or highest distinction is determined by both the cumulative and the University of Iowa grade-point average. Highest distinction requires a g.p.a. of 3.85 or higher; high distinction requires a g.p.a. of 3.75 to 3.84; and distinction requires a g.p.a. of 3.65 to 3.74.

To graduate with distinction, students must have completed a minimum of 60 s.h. of graded coursework at the University of Iowa. Both S (satisfactory) and A-F (letter) grades are included in the total semester hour total. However, S grades are not calculated into the grade-point average. Radiologic technology certificate course grades are not included in the grade-point average and are not considered graded coursework.

Students graduating with distinction have a notation added to their transcript and diploma. To be recognized for distinction, students must have completed 45 of their final 60 s.h. and earned the required grade-point average before their final semester of graduation.

### Dean's List

Undergraduate students who achieve a g.p.a. of 3.50 or higher on 12 s.h. or more of University of Iowa graded coursework during a given semester or summer session and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean's List for that semester. Students may qualify for the Dean's List with fewer than 12 s.h. of graded credit if deemed appropriate by the college.

### President's List

University of Iowa undergraduate students who achieve a g.p.a. of 4.00 on 12 s.h. or more of University of Iowa graded coursework and who have no semester hours of I (incomplete) or O (no grade reported) for two consecutive semesters (excluding summer sessions) are recognized by inclusion on the President's List.

### Financial Support

Students are eligible to apply for undergraduate financial aid. Scholarships, grants, loans, and part-time job placement are administered by the University's Office of Student Financial Aid. Part-time work in related areas is sometimes available.

## Registration, Credit, Grading

### Registration

Information about tuition and fees, registration, and deadlines is available from the Office of the Registrar. Students who add or drop a course after registration or who register late are assessed a fee. Each course dropped after the deadline results in a W (withdrawn) on the transcript (see Changes in Registration below). Students are not allowed to register for full-semester courses after the second week of the semester or the first week of the summer session. Students must register for off-cycle courses before the first day of the course.

The maximum permitted registration for fall and spring semesters is 18 s.h. per semester. The maximum registration for summer session varies: 4 s.h. for the four-week session; 9 s.h. for the eight-week session; 9 s.h. for the six- and eight-week sessions combined; 12 s.h. for the four-week session and the eight-week session; and 12 s.h. for the four-, six-, eight-, and twelve-week sessions combined. Students may register for a maximum of 16 s.h. of fall semester or spring semester coursework during early registration. Students must obtain permission from the head of the division to register for more than the maximum semester hours allowed.

### Changes in Registration

Students may change their registration on MyUI. After the start of the semester, students should view Changes in Registration for information on how to change their schedule of courses and the permissions that are required.

Courses may be added with the approval of the advisor at any time during the first one-fifth of the course. They may be dropped at any time during the first two-thirds of the course. Approval is required from the dean of the Carver College of Medicine for all other changes in registration and is granted only in extraordinary circumstances. Students are assigned a mark of W (withdrawn) for any course dropped after the first one-fifth of the course. Students whose drop of one or more courses results in a registration of 0 s.h. for the semester must follow the procedure for withdrawal from the University instead of the add/drop procedure.

Students who have registered for courses offered for variable or arranged credit may change the number of semester hours with the signatures of the instructor, the advisor, and the head of the division at any time before the end of the first two-thirds of the course.

Other changes in registration (such as to audit for zero credit) may be made only during the first one-fifth of the course.

It is the student's responsibility to obtain the required permissions and to understand any consequences that may happen by processing the drop. Information regarding permissions and consequences will be posted on MyUI, but the student should contact their advisor with any questions. See Drop or Withdraw Tuition Responsibility on the Office of the Registrar website.

The Course Deadlines look-up provides course specific deadlines. The cut-off time for obtaining any permissions on deadline days is 4:30 p.m. Students have until 11:59 p.m. to process a drop in MyUI if they have obtained all required permissions by 4:30 p.m.

### Withdrawal of Registration

Removing all courses from a schedule (even if only registered for one course) is considered a withdrawal of registration.

Students may withdraw their registration without academic penalty at any time before the end of the first four-fifths of the course, but no credit is subsequently given. Later withdrawal results in automatic assignment of an F. Students who withdraw are not reinstated after the deadline for that session.

It is the student's responsibility to obtain the required permissions and to understand any consequences that may happen by processing the withdrawal. Information regarding permissions and consequences will be posted on MyUI, but the student should contact their advisor with any questions. See Drop or Withdraw Tuition Responsibility on the Office of the Registrar website.

### Auditing Courses

Students may register to audit a course with approval of the appropriate program director and course instructor. In addition to obtaining these signatures, students must register for zero credit in the course to be audited. The mark of AUS (audit successful) is assigned if a student's attendance and performance are satisfactory; if they are unsatisfactory, the mark of AUU (audit unsuccessful) is assigned. Courses completed with a mark of AUS do not meet any college requirement and carry no credit toward graduation. Auditing may not be used as a second-grade-only option.

### Courses Offered by Other University of Iowa Colleges

Students who enroll in courses offered by other University of Iowa colleges are governed by those colleges' rules in matters regarding the courses. See Cross-College Enrollment and Records Policy on the College of Liberal Arts and Sciences website.

### In-Residence Requirement

The in-residence requirement may be met by earning the final consecutive 30 s.h. in residence at the University of Iowa, or 45 of the last 60 s.h. in residence, or an overall total of 90 s.h. in residence.

Nonresident instruction includes coursework and correspondence study at other colleges, universities, and institutions. Undergraduate coursework in other University of Iowa colleges counts toward in-residence requirements.

Because the Carver College of Medicine partners with Allen College for the medical laboratory science major, students are not held to the University of Iowa in-residence requirement.

### Duplication and Regression

Duplication occurs when students take the same course more than once or when they take a course that duplicates the content of a course they already have completed satisfactorily. Regression occurs when students take a course that is less advanced or at a lower level than one in the same subject that they already have completed satisfactorily. Duplication and regression are assessed by the registrar. Semester hours earned by duplication or regression do not count toward graduation.

### Minimum Grade Requirement

Students must earn a g.p.a. of at least 2.00 each semester in all college work attempted, all work undertaken at the University of Iowa, and all graded work attempted after admission to the Carver College of Medicine. Students enrolled in a program that uses the pass/fail/honors grading

system must pass all courses required to complete the program.

Students must earn a C or higher in professional specialty (modality) courses.

## Grading Procedures

Grading procedures vary from program to program. Students should consult individual program policy statements for information.

## Pass/Nonpass

Students have the option of taking elective courses pass/nonpass (P/N) with the permission of the course instructor and/or the department offering the course. Students may register for the P/N grading option from the first day of classes until the last day for undergraduates to add a course; see Academic Calendar on the Office of the Registrar website.

To register for a P/N course, the student must print the Grading Option Change Form, have it signed by the course instructor and the academic advisor, and submit the completed form to the UI Service Center before the published deadline.

Semester hours graded P/N are not used in computing a student's grade-point average. Semester hours graded P count toward graduation; those graded N do not. The college accepts a maximum of 15 s.h. of University of Iowa credit graded P toward the bachelor's degree, and it accepts a maximum of 30 s.h. of credit graded P and/or S from all sources (UI and transfer credit) toward the bachelor's degree. Students must be in good academic standing to be eligible for the pass/nonpass option.

## Satisfactory/Fail or Satisfactory/Unsatisfactory

A number of courses only use satisfactory/fail (S/F) or satisfactory/unsatisfactory (S/U) grading. All students registered for these courses receive a grade of S, F, or U. Students do not need special forms or permission in order to register for S/F or S/U courses.

Semester hours graded S or U are not used in computing a student's grade-point average, but semester hours graded F are used in grade-point average computation. Semester hours graded S count toward graduation; semester hours graded F or U do not.

Students may use coursework graded S to fulfill General Education Program requirements and/or the requirements of their major, a minor, or a certificate. The college accepts a maximum of 15 s.h. of University of Iowa credit graded S toward the bachelor's degree, and it accepts a maximum of 30 s.h. of credit graded P and/or S from all sources (UI and transfer credit) toward the bachelor's degree.

## Second-Grade-Only Option

Repeating courses for the second-grade-only option is allowed in extraordinary circumstances. To repeat a course for the second-grade-only option, students must obtain the permission of the course instructor, the program director, and the dean before the end of the first one-fifth of the course. Both grades remain on the permanent record, but only the second one is used to calculate grade-point average and credit earned. Students using the second-grade-only option for courses that are not part of their major must follow the procedure for the college that offers the course.

Since clinical skills development is impacted by course sequence and many courses are prerequisites to others, it may not be possible to repeat a course. If course sequencing will have an impact on program progression, the decision will be made by the program faculty and/or the promotions committee.

On the permanent record, the second-grade-only option appears as a pound symbol (#), showing that the first grade has been replaced by the second grade in grade-point average calculations, and that only the hours from the second registration have been counted as hours earned.

Students must request the second-grade-only option before the last day of class in order for the second grade to appear on the next grade report. The request also may be made after the close of the semester. The second-grade-only option cannot be applied to coursework for which a student has already been awarded a UI degree.

## Incomplete

A grade of I (incomplete) may be reported if the reasons for inability to finish the course satisfactorily are acceptable to the program director and the course instructor. There also must be evidence that the coursework will be finished within a reasonable length of time, usually by the end of the next academic session. Incompletes not removed by the deadline for submission of final grades for the next session result in the assignment of a grade of F. A student must work with the instructor so that an incomplete grade may be rectified by official action.

## Reports to Students

Instructors notify any student whose work falls below the minimum acceptable level once the problem is recognized. Grades are reported on a student's transcript, following University protocol. No formal midterm reports are given.

## Degrees and Minors

### Two Bachelor's Degrees

Students who want to earn two bachelor's degrees, each from a different college, must communicate the request to their academic advisor, who will then contact the University's Office of Admissions. Interested students must complete the degree requirements for both majors, including the residency requirements.

### Second Bachelor's Degree

Students who already hold a bachelor's degree and wish to earn an additional bachelor's degree must complete at least 30 s.h. consecutively in the Carver College of Medicine and must meet college and program degree requirements. Individuals interested in earning a second bachelor's degree must apply for admission to the degree program at the University's Office of Admissions.

### Minors

Students graduating from the Carver College of Medicine may earn a minor or minors in any degree-granting department or program in the college outside of their major department or in another college of the University by meeting that department's requirements for the minor.

## Academic Progress, Probation, Dismissal

Students are expected to maintain satisfactory academic and professional standards and to demonstrate reasonable progress toward the Bachelor of Science. Students who fail to maintain satisfactory academic progress or professional standards of behavior as determined by their program may be placed on probation or dismissed from the program. Probation serves as a warning that students will not graduate unless their academic performance and/or professional behavior improves.

Students on probation are restored to good standing by the program director upon evidence that the problem has been corrected. Such action is usually taken at the end of a semester or session. Entering students may be admitted on probation if they fail to meet the minimum stated standards for admission.

Continued unsatisfactory scholarship or unprofessional behavior may result in dismissal from a program. Students dismissed from a program must reapply for admission through the regular, established program admissions process, following review by a faculty committee, at least four months before the requested date of readmission.

Radiation sciences RT to B.S. online students placed on probation or dismissed from a program are notified by email; copies are saved in their files. An academic probation notation is placed on the transcript.

Radiation sciences RT to B.S. students on academic probation are restored to good standing after they successfully complete a total of 9 s.h. either in one semester or cumulatively. Their University of Iowa cumulative and semester grade-point averages must be equal to or exceed 2.00. Students on academic probation who fail to meet the grade-point average requirement in the designated time frame for restoration to good standing are subject to dismissal.

Students are expected to attend classes regularly. Students who miss classes or examinations because of illness are expected to present evidence that they have been ill. Any other absences must be approved in advance by the course instructor.

Any offense against good order committed by a student in a classroom, clinical setting, or laboratory may be dealt with by the instructor or referred to the program director. The instructor reports in writing any disciplinary action taken against a student to the program director. Repeated or exceptional instances are reported to the dean.

## Academic Misconduct Plagiarism and Cheating

All cases of plagiarism and cheating in the Carver College of Medicine are reported to the dean with a statement of relevant facts. The program director and the instructor may submit recommendations for appropriate disciplinary action.

The individual instructor may reduce the student's grade, including assignment of the grade of F in the course. A report of this action is sent to the student, the program director, and the dean.

The dean, or a faculty committee appointed by the dean, may impose the following or other penalties, as the offense warrants: disciplinary probation, requirement of additional hours for the degree, suspension from the program for a

period of time, or recommendation of expulsion from the program.

## Appeals Procedure

Students who want to appeal a decision should appeal in writing to the dean within two weeks after the date of receipt of the decision in writing.

## EMT Paramedic Program

### Emergency Medical Technology (EMT) Paramedic Program

**Website:** <https://uihc.org/paramedic-education-program>

This nationally accredited 1,160-hour full-time program leads to national and Iowa certification as a paramedic. The full-time program which begins each spring, consists of 16 weeks of intensive classroom training at University of Iowa Hospitals & Clinics, four to five days a week. A part-time program which begins in the fall semester meets every third weekday for two semesters and is based on a fire service work schedule. A second segment consists of 280 hours of supervised clinical experience in a hospital setting. The third segment is a minimum of 360 hours of a supervised paramedic field internship with a paramedic-level ambulance service. Field internships are available at a number of approved sites in Iowa.

Students obtain credentials in advanced cardiovascular life support, advanced medical life support, geriatric education for EMS, pediatric advanced life support, pediatric education for prehospital professionals, and prehospital trauma life support.

The program is conducted twice each year, beginning in January and August.

## Goals

The goal of the University of Iowa Hospitals & Clinics Emergency Medical Services Learning Resources Center (EMSLRC) paramedic program is to prepare competent entry-level paramedics in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.

## Curriculum

The program adheres to the National Emergency Medical Services Education Standards as defined by the National Highway Traffic Safety Administration (NHTSA). Students who successfully complete the program are eligible for the National Registry paramedic examination.

All students enroll in the courses EMTP:3101 Emergency Medical Technician - Paramedic I and EMTP:3102 Emergency Medical Technician - Paramedic II.

## Accreditation

The University of Iowa Hospitals & Clinics EMSLRC Paramedic Program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon the recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP).

## Facilities

The Carver College of Medicine consists of twelve buildings containing 1.6 million square feet of space with one building (College of Medicine Administration Building) dedicated to

administrative departments only. The other eleven buildings house research activities which include research centers, programs and institutes, as well as the Core Research Facilities which are a collection of centralized laboratories dedicated to developing and providing state-of-the-art research resources to facilitate biomedical research. They are available on a fee-for-service basis to the entire health sciences community along with outside entities.

The Medical Education Research Facility houses medical education space and research laboratories, including the Holden Comprehensive Cancer Center and the Institute for Vision Research. It also contains the college's four learning communities. The communities group students who are at different stages in their medical education, encouraging peer-to-peer learning and emphasizing leadership and community service. Each learning community features small-group rooms, study and social spaces, computer workstations, a kitchen area, and staff offices. The Medical Education Research Facility also houses the Performance-Based Assessment Program, which evaluates students' clinical and communication skills by reviewing simulated physician-patient encounters recorded in mock patient examination suites.

Students acquire clinical skills experience at the University of Iowa Hospitals & Clinics, the VA Iowa City Health Care, and in affiliated hospitals and ambulatory care centers throughout Iowa. University of Iowa Hospitals & Clinics serves as a tertiary care center for Iowa and portions of adjoining states. Many patients are referred to University of Iowa Hospitals & Clinics for care and treatment not available in their home communities.

Eckstein Medical Research Building is the home of the Iowa Institute of Human Genetics Genomics Division, Viral Vector Core Facility, Flow Cytometry Facility, and the Biomedical Research Store.

The five basic science departments are housed in the Bowen Science Building and include the Departments of Anatomy and Cell Biology, Biochemistry and Molecular Biology, Microbiology and Immunology, Molecular Physiology and Biophysics, and Pharmacology.

The Medical Education Building houses research and educational space for the Department of Physical Therapy and Rehabilitation Science. It also houses research space for the Department of Psychiatry and is the home of the Office of Consultation and Research in Medical Education (OCRME). OCRME is staffed by education specialists from a range of disciplines who serve the faculty, staff, and administrators in all Carver College of Medicine programs. The office provides educational consultation, initiates and cooperates in educational research endeavors, and conducts faculty development activities.

There are teaching laboratories located in the Medical Education Building, the Bowen Science Building, and the Medical Research Facility.

Other buildings that house a wide range of College of Medicine departments, administration, and research activities are the Carver Biomedical Research Building, Westlawn, Medical Laboratories, the Medical Research Facility, the Medical Research Center, and the Multi-Tenant Facility.

The newest building, completed in 2014, is the Pappajohn Biomedical Discovery Building. The Iowa Neuroscience Institute is located on the first and second floors of the building. Third and fourth floors house the Fraternal Order of Eagles Diabetes Research Center and the Abboud

Cardiovascular Research Center, on the fifth floor is the Auditory Research Group, and on the sixth floor is the Lung Biology and Cystic Fibrosis Research Center. The Iowa Institute for Biomedical Imaging is on the lower basement levels housing the 7 Tesla MRI scanner (one of few such devices in the U.S.), 3T along with several smaller devices, and a 3D visualization lab. All researchers in this building are chosen by the Pappajohn Biomedical Institute in which scientists from across the University collaborate to explore high-risk/high-yield scientific questions in the life sciences with the goal of advancing treatments for a wide array of human diseases.

## Interdisciplinary Programs and Centers

The college's interdisciplinary programs and centers draw strength from college faculty members and the facilities available to them, without regard to departmental units or to the distinction between graduate and postgraduate training. For more information, contact the vice dean for research.

The following centers are subdivisions of the Carver College of Medicine.

### Alzheimer's Disease Research Center

The Alzheimer's Disease Research Center studies Alzheimer's disease and related neurological conditions from the viewpoint of neuroanatomy, neuroimaging, neuropsychology, and neurochemistry. The center's purposes are to improve the diagnosis and treatment of these conditions, to disseminate information on new research to the public, and to contribute to a better understanding of the neural basis of cognition.

### Carver Genetic Testing Laboratory

The John and Marcia Carver Nonprofit Genetic Testing Laboratory provides genetic testing for rare eye diseases, especially diseases so rare that commercial tests are unavailable for them. The laboratory's test results provide information to patients and their families while keeping the tests affordable.

### Holden Comprehensive Cancer Center

The Holden Comprehensive Cancer Center (HCCC) coordinates the efforts of University of Iowa faculty and staff in research, education, and clinical programs related to all aspects of cancer. The HCCC is recognized by the National Cancer Institute as an NCI-designated cancer center and has comprehensive status, a designation that recognizes the depth and breadth of interdisciplinary cancer research activity taking place at the University of Iowa.

### UI Heart and Vascular Center

The UI Heart and Vascular Center coordinates research and training programs related to cardiovascular diseases. It encompasses several programs: Program Project Grant on Integrative Neurobiology of Cardiovascular Function, Program Project Grant on Cerebral Blood Vessels, Program Project Grant on Oxidative Mechanisms in Vascular Disease, Program Project Grant on Genetic and Signaling Mechanisms in the Central Regulation of Blood Pressure, Program Project Grant on Airway Physiology and Pathophysiology in a Porcine CF Model, Program Project Grant on Gene Therapy for Cystic Fibrosis Lung Disease, a Leducq Foundation Consortium grant, and a Cystic Fibrosis Foundation research and development program. It also coordinates several training programs and a program of other interdisciplinary research supported by

a number of individual project grants. The center occupies two floors of cardiovascular research laboratories and administrative offices in the Medical Research Center.

## Courses

- Carver College of Medicine Courses [p. 1721]
- EMT-Paramedic Program Courses [p. 1724]
- Orthoptics Teaching Program Course [p. 1724]

Most Carver College of Medicine courses are offered by the college's departments and programs. They are listed and described in the corresponding General Catalog sections. The college also offers the following nondepartmental courses.

## Carver College of Medicine Courses

### **MED:1100 Introduction to Health Care Professions** 3 s.h.

Introduction to current U.S. health care system and changes that are likely in the near future; information about distinct health care professions grouped by discipline (e.g., nursing, pharmacy, public health), and less traditional career pathways in health care fields; how health care professionals across disciplines coordinate to deliver better health care; instruction by prominent health care faculty at the University of Iowa; for students considering a career in the health care field.

### **MED:3740 End-of-Life Care for Adults and Families** 3 s.h.

End-of-life issues in care of adults, older adults, and their families. Same as ASP:3740, NURS:3740, PHAR:3740.

### **MED:5300 Health Informatics** 3 s.h.

Technological tools that support health care administration, management, and decision making. Same as HMP:5370, IGPI:5200, ISE:5860, SLIS:5900.

### **MED:5416 Foundations in Healthcare Ethics** 3 s.h.

Major ethical traditions, ideas, and frameworks that have shaped contemporary approaches to healthcare ethics in morally pluralistic Western cultures; topics include four prominent frameworks in healthcare ethics—virtue based, principle based, circumstance based, and consequence based—that emphasize four aspects of ethical decision making—agent, action, context, and outcome.

### **MED:8001 Medical Elective** arr.

### **MED:8003 Clinical Clerkships** arr.

### **MED:8005 Medical Student Research Fellowships** 0 s.h.

### **MED:8010 Introduction to Medical Education at Iowa** 0 s.h.

Introduction to first-year fall courses; advanced concepts in anatomy, biochemistry, cell biology, and clinical reasoning skills; for M.D. students.

### **MED:8021 Community Health Outreach I** 0-1 s.h.

Presentations and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

### **MED:8022 Community Health Outreach II** 1-2 s.h.

Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

### **MED:8023 Community Health Outreach III** 1-2 s.h.

Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

### **MED:8028 Introduction to U.S. Health Care System** 1 s.h.

Structure, function, and finance of U.S. health care system; access, cost, quality, finance mechanisms, reform process.

### **MED:8029 Disruptive Forces in Medicine** 1 s.h.

Exploration of the pathogenesis of COVID-19 and its impact on medicine at University of Iowa Hospitals & Clinics; students gain perspective and knowledge about the virus, its impact on medical practice, and future consequences; mechanisms of COVID-19 pathogenesis; racial and social inequities highlighted by the pandemic; insight into clinical challenges (i.e., telemedicine); best practices for patient education and clinician safety in different fields. Requirements: M.D. enrollment.

### **MED:8031 Reproductive and Gynecological Health Seminar** 1 s.h.

Education on reproductive and gynecological health topics, service opportunities, and mentorship. Requirements: M.D. standing.

### **MED:8033 Clinical Skills for Responding to Sexual Violence** 1 s.h.

Training that focuses specifically on epidemiology, screening, clinical presentation, initial evaluation, and medical management of sexual violence and interpersonal violence victimization; opportunity to apply preclinical and/or concurrent coursework to true-to-reality, clinically relevant, and medically complex health problems with sexual violence as the underlying cause; development of communication and clinical skills necessary to address sexual and interpersonal violence in a clinical setting. Requirements: M.D. standing or physician assistant standing or enrollment in degree-seeking graduate or health professional program.

### **MED:8070 The Examined Life: Writing and Medicine** 1 s.h.

Literature, essays, poetry; discussion of participants' writing; students prepare portfolios of their own writing.

### **MED:8071 Career Life Planning** 1 s.h.

Students' individual interests, values, and decision-making processes important in selecting a specialty, engaging in the match process, and integrating oneself into the medical profession; personal career development, culture and climate in which physicians work and learn.

### **MED:8073 Biomedical Innovation** 1 s.h.

Introduction to all phases of medical device/technology development; development of knowledge of entire medical innovation process through didactic sessions, faculty, interactions, and interdisciplinary collaboration; interdisciplinary approach; research and development of a novel medical device, therapy, or model of care. Requirements: M.D. enrollment.

### **MED:8074 Research Skills Seminar** 1 s.h.

Seminar series designed to bridge gap from undergraduate and medical student experiences to research during residency and beyond; topics include identification of projects and mentors, leadership, collaboration, translation, evidence-based medicine, project development, statistical analysis, presentation, publication, and career progression.

**MED:8076 Bioethics and Humanities Seminar 1 s.h.**

Broad range of topics in bioethics and medical humanities, including philosophical principles, clinical ethics, research ethics, medical professionalism, narrative ethics, and historical and cultural aspects of medicine. Requirements: enrollment in Carver College of Medicine humanities distinction track.

**MED:8077 Personal-Professional Compass 1 s.h.**

Provides help for medical students to understand, articulate, and integrate personal and professional values and goals while making their way through medical school; promote student growth as humanistic professionals through written reflections on personal experience, readings from medicine and the humanities, and discussions with peers and mentors; preparation to write an authentic and compelling personal statement for residency applications. Requirements: M.D. enrollment.

**MED:8081 Global Health Issues I 1 s.h.**

Core issues in the current field of global health, including history of global health, health and development, social determinants of health, measuring health and disease, disparities in the American health care system, poverty and health, gender issues and reproductive health, child health, immigrant and migrant health issues, and introduction of major players in global health. Requirements: M.D. enrollment.

**MED:8082 Global Health Issues II 1 s.h.**

Core issues in the current field of global health, including health care as a human right, why the Third World is the Third World, communicable disease issues, outbreaks and pandemics, noncommunicable issues, malnutrition and obesity, cultural context of health care, violence as a health issue, and emergency response and transition to development. Prerequisites: MED:8081. Requirements: M.D. enrollment.

**MED:8083 Global Cross-Cultural Elective arr.**

Cross-cultural medical program with focus on health care problems of a domestic or international community; individually arranged.

**MED:8084 Global Health Seminar 1 s.h.**

Presentations by faculty members, University special guests, and alumni on their current work in global medicine/global health; implementation of global health concepts. Requirements: M.D. enrollment.

**MED:8121 Clinical and Professional Skills I 3 s.h.**

Introduction to concepts of clinical reasoning, communication, physical examination, and evidence-based clinical practice; principles of biomedical ethics; early clinical interactions and placement of classroom experiences into context of patient care through the Early Clinical Experiences (ECE) program; interaction with students from other health sciences colleges to explore the interprofessional approach to caring for patients. Requirements: M.D. enrollment.

**MED:8122 Medicine and Society I 3 s.h.**

Delivery of individual disease prevention/health promotion services; introduction to social determinants of health; influence and impact of culture and community on health care; community resources; application of health and risk assessment to individual patients and self. Requirements: M.D. enrollment.

**MED:8123 Foundations of Cellular Life 5 s.h.**

Genetics, embryology, molecular biology, biochemistry, cell biology and histology; molecular events required for cellular life; how cells grow and interact to form basic tissues of human body; necessary framework to explore six mechanisms of health and disease. Requirements: M.D. enrollment.

**MED:8124 Mechanisms of Health and Disease I 8 s.h.**

Normal and healthy processes within and among mechanisms of oxygenation, metabolism, and genetics/development; first in a series on multisystem mechanisms of health and disease. Requirements: M.D. enrollment.

**MED:8131 Clinical and Professional Skills II 4 s.h.**

Interpersonal skills, lifelong learning, interviewing skills, physical examination skills, ethical issues in patient care, and basic approach to patients in terms of prevention, treatment, and follow-up care. Second in a sequence during preclinical semesters of medical school and continuing as an integrated strand throughout curriculum. Requirements: M.D. enrollment.

**MED:8132 Medicine and Society II 4 s.h.**

Knowledge and skills related to health promotion and disease prevention from a medicine and society perspective, including impact of behavior, environment, culture, and socioeconomic; identification of major public health problems associated with mechanisms of health and disease. Second in a sequence during preclinical semesters of medical school and continuing as an integrated strand throughout curriculum. Requirements: M.D. enrollment.

**MED:8133 Mechanisms of Health and Disease II 7 s.h.**

Normal and healthy processes within and among mechanisms of Immunology/Inflammation, locomotion/integument, and neuropsychiatry; second in a series on mechanisms of health and disease. Requirements: M.D. enrollment.

**MED:8134 Mechanisms of Health and Disease III 11 s.h.**

Abnormalities or disruptions leading to disease within and among mechanisms of oxygenation, metabolism, and genetics/development; third in a series on multisystem mechanisms of health and disease. Requirements: M.D. enrollment.

**MED:8199 First-Year Special Study arr.**

First-year special study. Requirements: M.D. enrollment.

**MED:8221 Clinical and Professional Skills III 4 s.h.**

Advanced clinical reasoning skills through focused patient encounters and interactions with special patient populations; emphasis on integration and use of concepts for cost conscious, patient-centered, interdisciplinary care. Requirements: M.D. enrollment.

**MED:8222 Medicine and Society III 4 s.h.**

Health services organization and delivery; emphasis on community dimensions of medical practice and patient safety. Requirements: M.D. enrollment.

**MED:8223 Mechanisms of Health and Disease IV 10 s.h.**

Abnormalities or disruptions leading to disease within and among mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry; fourth in a series on multisystem mechanisms of health and disease. Requirements: M.D. enrollment.

- MED:8224 Mechanisms of Health and Disease Keystone** 7 s.h.  
Transition between classroom instruction in mechanisms of health and disease and clinical practice; foundational information from mechanisms of health and disease sequence approached from perspective of what is commonly encountered in clinics; application of information to making diagnostic and management decisions of common important clinical problems. Requirements: M.D. enrollment.
- MED:8299 Second-Year Special Study** arr.  
Second-year special study. Requirements: M.D. enrollment.
- MED:8301 Community-Based Primary Care** arr.  
Introduction; clinical activities, work with community agencies and resources, didactic and conferences. Requirements: M.D. enrollment.
- MED:8320 Transition to Clerkships** 1-2 s.h.  
Two weeks of skills training prior to start of core clinical clerkships. Requirements: M.D. or M.P.A.S. enrollment.
- MED:8401 Medicine, Literature, and Writing** arr.  
Insights, freedom, joy, responsibilities, and challenges of a life in medicine; reading, discussion, individual creative writing.
- MED:8403 Teaching Skills for Medical Students** 4 s.h.  
Practical teaching techniques; opportunity for students to develop teaching skills before they become medical residents.
- MED:8404 Advanced Teaching Skills for Medical Students** 2 s.h.  
Opportunity to expand knowledge and experience in medical education; investigation of medical education in students' specialty of interest through literature research and interaction with faculty; primary focus is to design and successfully complete a faculty approved project. Prerequisites: MED:8403. Requirements: fourth-year M.D. enrollment.
- MED:8405 Leadership for Future Physicians** 2 s.h.  
Formal training in multiple aspects of leadership; offers future leaders in health science specialties an earlier opportunity to consider leadership abilities and perspectives; for fourth-year medical, physician assistant, nursing, pharmacy, public health, and dental students. Requirements: health science enrollment.
- MED:8410 Quality Improvement and Patient Safety** 2 s.h.  
Students work with faculty and staff involved in quality improvement and patient safety (QI/PS) at University of Iowa Hospitals & Clinics (UIHC); readings, didactic sessions, and hands-on activities to advance knowledge and practice of QI/PS in health care; activities include review of ongoing QI/PS projects at UIHC, application of QI/PS methodologies to project development and analysis, individual and team-based simulations, interdisciplinary collaboration and communication, participating in conferences related to QI/PS, and reflecting on these experiences with peers. Same as NURS:3728.
- MED:8411 Foundational Science and Drug Therapy** 2 s.h.  
Advanced medical students partner with advanced pharmacy students and work together to devise evidence-based treatments for patients suffering from common illnesses; foundational science concepts from each student's respective discipline—including mechanisms of health and disease and principles of pharmacokinetics and pharmacodynamics—are used to design and explain proposed treatments; two weeks, case-based.
- MED:8412 Improvisation: A Life Skill** 4 s.h.  
Drawing from interpersonal communication techniques, experiences that help students communicate more empathically with their patients, patients' families, and other health care team members in order to create a safe and trusting exchange.
- MED:8413 Oaths and Ethics** 4 s.h.  
History and purpose of medical oaths; medical oaths compared with professional codes; content of medical oaths in terms of ethical principles and virtues; review of ethical values communicated in ethics-related seminars at University of Iowa Hospitals & Clinics; students write a medical oath that crystallizes their own most important professional commitments.
- MED:8414 Health Policy Advocacy Des Moines** 4 s.h.  
Health policy advocacy experience in Des Moines while Iowa Legislature is in session; students choose an area of interest in health policy advocacy and work with senior legislators, policy advisors, state health department representatives, or advocates of various professional organizations involved in advocacy efforts for health policy; students receive prior approval regarding which health policy issue they want to work on and which individual or professional organization they plan to work with during their onsite experience. Requirements: M.D. enrollment.
- MED:8415 Financial Management for Rising Interns** 2 s.h.  
Foundational concepts of personal financial management; topics include personal budgeting, educational loan management, investing, risk management and mitigation, medical practice investment, taxation, and additional relevant areas of interest for rising resident physicians. Requirements: M.D. enrollment.
- MED:8416 Foundations in Healthcare Ethics** 3 s.h.  
Major ethical traditions, ideas, and frameworks that have shaped contemporary approaches to healthcare ethics in morally pluralistic Western cultures; topics include four prominent frameworks in healthcare ethics—virtue based, principle based, circumstance based, and consequence based—that emphasize four aspects of ethical decision making—agent, action, context, and outcome.
- MED:8470 Self-Directed Learning in Advanced Clinical Topics** 0 s.h.  
Online learning modules on advanced clinical topics; for students in M.D. program.
- MED:8480 Global Health Clerkship** arr.  
Cross-cultural medical program at an international site; focus on health care problems of a specific community; individual educational objectives set in advance.
- MED:8499 Individually Arranged Medicine Elective** arr.  
Individually arranged elective through the Office of Student Affairs and Curriculum.
- MED:9701 Instructional Design and Technology** 3 s.h.  
Skills and techniques necessary for analysis, design, development, implementation, and evaluation of effective instruction.
- MED:9702 Clinical Teaching in Medical Education** 3 s.h.  
Principles and methods for teaching individuals and small groups in outpatient and inpatient settings. Prerequisites: MED:9701 or PSQF:6205. Recommendations: educational psychology course.
- MED:9703 Educational Research and Evaluation** 3 s.h.  
Research design and program evaluation; approaches relevant to medical education.

**MED:9711 Teaching Methods in Medical Education 3 s.h.**

Principles and methods for teaching in large and small classrooms. Recommendations: educational psychology course.

**MED:9712 Introduction to Educational Measurement in Medical Education 3 s.h.**

Classical test theory; overview of medical education assessment methods; practical information for designing and critiquing assessments.

**MED:9713 Assessment in Medical Education 3 s.h.**

Medical education assessment methods; research methods and literature that support current practices; research project. Prerequisites: MED:9712.

**MED:9714 Current Issues in Medical Education 3 s.h.**

Selected issues, policies, and research.

**MED:9720 Portfolio Project 3 s.h.**

Production of individual student portfolios used to integrate knowledge across courses; capstone activity.

**MED:9721 Study in Faculty Development 3 s.h.**

Academic credit for approved project or other assigned activities for students in the Teaching Scholars program.

**MED:9722 Independent Study arr.****MED:9724 Leadership in Medicine 3 s.h.**

Introduction to basic leadership and management theories pertaining to a health care setting; focus on the history of leadership development, various components of leadership, and how these components can be used to be a successful leader/administrator. Requirements: Master in Medical Education degree program enrollment.

**MED:9725 Simulation in Medical Education 3 s.h.**

Appropriate use of various types of simulation in medical education; how to design, deliver, and debrief a simulation activity; literature supporting use of simulation in medical education. Requirements: Master in Medical Education degree program enrollment.

**MED:9726 Curriculum Development in Medical Education 3 s.h.**

Curriculum development using knowledge and experience gained from MED:9701, MED:9702, and MED:9711; identification of an area/topic for creation of curriculum; conduction of a needs assessment to identify topics and/or components of curriculum; creation of plan with curriculum goals, learning objectives, methods for evaluation; development of preliminary planning and aspects of implementation and evaluation phases of the model.

**MED:9727 Teaching and Assessing Communication Skills in Medical Education 3 s.h.**

Explores broad issues related to both teaching and assessing clinician-patient communication skills in medical education; review literature on best practices in clinician-patient communication and on teaching and/or assessing skills among medical learners; explore observation and feedback as key technique in addressing communication skills through observation of peers and learners; video recording of interactions with patients.

## Hospital Certificate Programs of Study

The following courses are conducted by University of Iowa Hospitals & Clinics staff.

## EMT-Paramedic Program Courses

**EMTP:3101 Emergency Medical Technician - Paramedic I 0 s.h.**

Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Requirements: certification as an emergency medical technician-basic.

**EMTP:3102 Emergency Medical Technician - Paramedic II 0 s.h.**

Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Requirements: admission to emergency medical technician paramedic program.

**EMTP:3103 Emergency Medical Technician - Paramedic III 0 s.h.**

Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Requirements: admission to emergency medical technology paramedic program.

## Orthoptics Teaching Program Course

**OTP:4902 Orthoptics Program 0 s.h.**

Clinical science of binocular vision, ocular motility, and related eye disorders; practical, theoretical training in the Department of Ophthalmology and Visual Sciences two-year program; written, oral and practical national board examinations required at completion. Requirements: bachelor's degree with specific class recommendations.

# Anatomy and Cell Biology

## Chair

- John F. Engelhardt

**Professional degree:** M.C.A.

**Faculty:** <https://medicine.uiowa.edu/acb/profile>

**Website:** <https://medicine.uiowa.edu/acb/>

The Department of Anatomy and Cell Biology performs three major functions. It teaches human anatomy to students preparing for careers in the health care professions; provides advanced courses, teaching experience, and research training to graduate students preparing for careers in academic research and related scientific fields; and conducts original research on the biological basis of cellular functions and human disease processes.

## Preclinical Study

The department contributes to the preclinical education of health care professionals by providing major courses in gross anatomy, cell biology, histology, and neuroscience.

## Graduate Study

The department offers the cell and developmental biology subprogram for the Ph.D. in biomedical science. It also participates in the Carver College of Medicine's Medical Scientist Training Program [p. 1772] and the Graduate College's Molecular Medicine [p. 1660], Immunology [p. 1631], Genetics [p. 1625], and Neuroscience [p. 1662] Programs. On occasion, students are directly admitted to a Department of Anatomy and Cell Biology laboratory by arrangement with the laboratory director.

## Professional Study

The Department of Anatomy and Cell Biology offers a professional degree, the Master of Clinical Anatomy (M.C.A.).

## Programs

### Graduate Programs of Study

#### Majors

- Master of Science in Anatomy and Cell Biology
- Doctor of Philosophy in Anatomy and Cell Biology

Students interested in doctoral studies in cell and developmental biology should apply under the umbrella program in Biomedical Science [p. 1599] (select cell and developmental biology subprogram). Direct applications to the M.S. and Ph.D. in anatomy and cell biology are not currently being considered.

### Professional Program of Study

#### Major

- Master of Clinical Anatomy [p. 1728]

## Facilities

The department occupies more than 35,000 square feet in the Bowen Science Building on the University of Iowa health sciences campus. The building houses modern teaching facilities and well-equipped research laboratories.

The most modern instrumentation is available, including facilities and equipment for digital microscopic imaging, confocal microscopy, molecular biological techniques, tissue culture, and protein chemistry. Other specialized equipment (e.g., electron microscopes, mass spectrophotometers) is available in other facilities. Through collaborative programs with the Holden Comprehensive Cancer Center and the Abboud Cardiovascular Research Center, faculty and students also have access to outstanding research facilities throughout the University's health sciences campus.

## Courses

### Anatomy and Cell Biology Courses

#### **ACB:3110 Principles of Human Anatomy** **3 s.h.**

Gross and microscopic human anatomy; systemic approach to regional anatomy with emphasis on clinical relevance; optional tutorial sessions. Offered fall semesters. Requirements: pharmacy, pre-nursing, or associated medical sciences major.

#### **ACB:3122 Independent Study in Anatomy and Cell Biology** **arr.**

Projects arranged with department faculty members.

#### **ACB:4156 Scanning Electron Microscopy and X-Ray Microanalysis** **arr.**

Microscopy methods for research; all aspects of research, from sample preparation to imaging to data analysis; when to use a particular microscopy procedure; theory, operation, and application of scanning electron microscopy, scanning probe microscopy, laser scanning microscopy, X-ray microanalysis. Requirements: a physical science course. Same as CBE:4156, EES:4156.

#### **ACB:5108 Human Anatomy** **5 s.h.**

Regional dissection, lectures, demonstrations; areas important to physical therapists, particularly the upper and lower extremities. Offered fall semesters. Requirements: physical therapy and rehabilitation science enrollment.

#### **ACB:5203 Gross Human Anatomy for Graduate Students** **5 s.h.**

Regional dissection, lectures, demonstrations, tutorials, discussions, seminars; clinically relevant areas of anatomical radiology, surface anatomy with clinical correlations. Requirements: enrollment in Master of Clinical Anatomy program.

#### **ACB:5206 Graduate Research in Cell and Developmental Biology** **arr.**

Individual laboratory research training in anatomical sciences.

#### **ACB:5210 General Histology Online** **3 s.h.**

Histology of all tissues of human body starting with basic tissues and working through systems of the body; linked in sequence to ACB:5203 so that students learn about related content at the same time in anatomy and histology; recorded lectures, online modules, and extensive use of Virtual Microscope. Requirements: enrollment in Master of Clinical Anatomy program.

- ACB:5218 Microscopy for Biomedical Research** arr. **1 s.h.**  
Basic microscopy methods for research including optics, preparation, and analysis of biomedical specimens; light, fluorescence, confocal, transmitting electron, scanning electron, atomic force microscopes, elemental analysis; immunochemistry and stereology techniques; individualized laboratory instruction. Prerequisites: BIOL:2723. Same as BIOL:5218, MICR:5218.
- ACB:5224 Graduate Seminar in Cell and Developmental Biology** **0-1 s.h.**  
Current research, literature. Requirements: cell and developmental biology graduate standing.
- ACB:6000 Human Anatomy for Advanced Practice** **3 s.h.**  
Integrated study of interrelationships between anatomic structure and physiological function in health and disease at various points in the lifespan; mechanisms governing and supporting cellular, organ, and system function; internal milieu; relationship of study to clinical assessment of functional integrity of individual organ systems utilizing pertinent objective and subjective data; implications of pathophysiology for anesthesia and implications of anesthesia for pathophysiology; foundation for clinical practicums and courses in nurse anesthesia. Requirements: completion of an undergraduate human anatomy and physiology course and admission to anesthesia nursing program. Same as NURS:6000.
- ACB:6200 Special Topics in Genetics** **1 s.h.**  
Current research in a selected field of genetics; different topic each year. Companion to a genetics seminar series. Same as GENE:6200.
- ACB:6220 Mechanisms of Cellular Organization** **3 s.h.**  
Current understanding of basic cell biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BIOC:3130. Same as MMED:6220, MPB:6220.
- ACB:6225 Growth Factor Receptor Signaling** **1 s.h.**  
Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Same as MMED:6225, MPB:6225, PCOL:6225.
- ACB:6226 Cell Cycle Control** **1 s.h.**  
Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Same as MMED:6226, MPB:6226.
- ACB:6227 Cell Fate Decisions** **1 s.h.**  
Cellular fate decisions including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Same as MMED:6227, MPB:6227.
- ACB:6237 Critical Thinking in Biochemistry and Molecular Biology** **1 s.h.**  
How nucleic acids, proteins, lipids, and carbohydrates interact to influence the function of cells and tissues; how molecules drive signaling pathways and cellular processes essential for biological functions; based on research publications.
- ACB:6238 Critical Thinking in Genetics** **1 s.h.**  
Current topics in molecular and classical genetics; emphasis on genetic underpinnings of disease; based on primary research publications.
- ACB:6239 Critical Thinking in Cell Biology** **1 s.h.**  
Understanding subcellular organization and intercellular communication; emphasis on critical thinking and primary research publications.
- ACB:6248 Critical Thinking in Development** **1 s.h.**  
Current topics in molecular basis of vertebrate development; based on primary research publications.
- ACB:6249 Critical Thinking in Cellular Physiology** **1 s.h.**  
Control of physiological systems at the cellular level; emphasis on regulation by molecular signaling pathways; literature based.
- ACB:6250 Critical Thinking in Scientific Writing and Presentations** **1 s.h.**  
Scientific grant writing, particularly specific aims development, and oral presentations. Requirements: second-year standing in cell and developmental biology graduate program.
- ACB:6252 Functional Neuroanatomy** arr. **1 s.h.**  
Basic principles of neuroanatomy and neurophysiology; emphasis on human central nervous system; laboratory emphasis on anatomical study of spinal cord and brain. Offered spring semesters. Requirements: physical therapy and rehabilitation science enrollment or graduate standing. Same as PTRS:6253.
- ACB:6265 Neuroscience Seminar** **0-1 s.h.**  
Research presentations. Same as BIOL:6265, MPB:6265, NSCI:6265, PSY:6265.
- ACB:7001 Teaching and Learning in the Anatomical Sciences** **2 s.h.**  
Strategies involved in anatomical sciences education including interactive lecturing, dissection, peer teaching/learning, plastination, virtual microscopy, simulation, case presentation, and assessment techniques; recorded lectures and online modules. Requirements: enrollment in Master of Clinical Anatomy program.
- ACB:7002 Seminar in Anatomical Sciences** **1 s.h.**  
Opportunity to discuss peer-reviewed anatomical, clinical, and education research articles as related to issues of teaching in anatomical sciences; student- and/or faculty-led presentations prompt further discussion of various in-depth studies that focus on bringing current information into the classroom. Requirements: enrollment in Master of Clinical Anatomy program.
- ACB:7010 Anatomy Through Imaging** **2 s.h.**  
Exploration of anatomy through basic imaging techniques; online modules and in-class activities; focus on identification of normal structures through application of anatomical concepts. Requirements: enrollment in Master of Clinical Anatomy program.
- ACB:7020 Human Embryology Online** **2 s.h.**  
Major events of embryologic development in humans; more of a morphologic focus than a molecular focus, including important molecular concepts of development; backstory of adult human anatomy and how various birth defects occur. Offered spring semesters. Prerequisites: ACB:5203 or ACB:8101 or ACB:5108. Requirements: enrollment in Master of Clinical Anatomy program.

**ACB:7227 Anatomic Study for Teaching 2-3 s.h.**

Experience completing a detailed dissection of a region of the human body; opportunity to create models depicting anatomical concepts. Requirements: enrollment in Master of Clinical Anatomy program.

**ACB:7400 Practicum in College Teaching for Master of Clinical Anatomy 1-4 s.h.**

Supervised college teaching experience; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations. Recommendations: enrollment in Master of Clinical Anatomy program.

**ACB:8101 Medical Gross Human Anatomy 5 s.h.**

Complete dissection of the body with regional emphasis stressing relationships to the living system; clinically relevant areas of radiologic imaging, surface anatomy, embryology, and clinical correlations; anatomical knowledge through lectures, small group work, independent activities. Offered fall semesters. Requirements: M.D. or M.P.A.S. enrollment.

**ACB:8120 Human Gross Anatomy for Dental Students 6 s.h.**

Exploration of gross anatomy of human body including thorax, abdomen, and upper limb; extensive focus on head, neck, and neuroanatomy; regional and systemic approaches; course sequence and assessment blended with general histology for dental students; cadaveric dissections closely follow lecture sequence; emphasis on correlations to dental practice. Offered spring semesters. Requirements: D.D.S. enrollment.

**ACB:8121 General Histology for Dental Students 4 s.h.**

Microscopic study of cells, fundamental tissues, and organ systems; emphasis on tooth-related structures. Offered spring semesters. Requirements: D.D.S. enrollment or anatomy and cell biology graduate standing.

**ACB:8401 Advanced Human Anatomy arr.**

Regional dissection of the body with emphasis on systems relevant to student's specialty interests; discussion, reading, clinically relevant imaging, embryology. Offered spring semesters. Requirements: fourth-year M.D. enrollment or graduate standing.

**ACB:8402 Teaching Elective in Regional Anatomy 2,4 s.h.**

Students expand knowledge and experience in medical education; investigation of educational pedagogy in a laboratory setting coupled with self-directed learning of anatomical content relevant to professional development; preparation, design, and implementation of four teaching interactions with year one medical, dental, and physician assistant (M1/D1/PA1) students; designing a classroom exercise (e.g., interactive lecture, learning activity, computer-based study module) that helps bridge the basic science content with clinical procedure. Requirements: M.D. standing and enrollment in teaching distinction track.

**ACB:8405 Advanced Clinical Neuroanatomy 2 s.h.**

Focused training in interpretation of cross-sectional neuroanatomy at a level far exceeding what is currently taught in preclinical curriculum; builds on prior training in diagnostic neuroimaging of the human brain during first and second phases of the medical curriculum, producing postgraduate year one (PGY-1) level of readiness interpreting structural brain images; core knowledge and skills of neurological examination applied within context of clinical problems. Requirements: M.D. enrollment.

**ACB:8498 Special Study On Campus arr.**

Anatomy research on campus; individually arranged. Requirements: M.D. enrollment.

# Master of Clinical Anatomy, M.C.A.

The mission of the professional degree program, Master of Clinical Anatomy (M.C.A.), is to provide clinically relevant content knowledge coupled with experiential learning activities for developing skills in teaching, education research, and enhancing advancement to professional health care programs. Graduates will be able to:

- demonstrate knowledge of the anatomical sciences (neuroanatomy, gross anatomy, and histology) at a level necessary for instruction within a professional program;
- design and deliver effective instructional activities appropriate for a cadaveric dissection course;
- design and deliver effective instructional activities appropriate for individual, small group, large group, and laboratory settings;
- evaluate the effectiveness of educational instruction using both formative and summative methods; and
- practice effective methods of self-reflection on the nature, quality, and impact of instructional activities for learning.

## Requirements

The Master of Clinical Anatomy (M.C.A.) program requires a minimum of 32 s.h. of work that is distributed between required (25 s.h.) and elective (7 s.h.) coursework. Students must maintain a g.p.a. of at least 3.25. The program is designed so that students can complete the requirements in a year and a half, and provides clinically relevant content coupled with experiential learning activities to develop skills in teaching and educational research. A portion of the curriculum is offered online to complement classroom and laboratory learning.

Students with a degree in a specific biological science (e.g., genetics) for which no formal coursework in basic gross anatomy has been completed may be required to take a prerequisite undergraduate anatomy course.

The Master of Clinical Anatomy requires the following coursework.

## Required Courses

Code	Title	Hours
ACB:5203	Gross Human Anatomy for Graduate Students	5
ACB:5206	Graduate Research in Cell and Developmental Biology	2
ACB:5210	General Histology Online	3
ACB:6252	Functional Neuroanatomy	4
ACB:7001	Teaching and Learning in the Anatomical Sciences	2
ACB:7002	Seminar in Anatomical Sciences (taken twice for 1 s.h. each)	2
ACB:7020	Human Embryology Online	2
ACB:7227	Anatomic Study for Teaching	3
ACB:7400	Practicum in College Teaching for Master of Clinical Anatomy	2

## Electives

Students select at least 7 s.h. in elective coursework.

Code	Title	Hours
ACB:5206	Graduate Research in Cell and Developmental Biology (may earn 1-3 s.h. in addition to required course above)	1-3
ACB:7010	Anatomy Through Imaging	2
ACB:7020	Human Embryology Online	2
ACB:7400	Practicum in College Teaching for Master of Clinical Anatomy (may earn 1-2 s.h. in addition to required course above)	1-2
ACB:8401	Advanced Human Anatomy	4
ACB:8402	Teaching Elective in Regional Anatomy	2
GRAD:7385	Teaching and Learning in Higher Education	3
MED:8403	Teaching Skills for Medical Students	4
PSQF:6205	Design of Instruction	3
Other coursework with M.C.A. program approval		1-3

## Comprehensive Exam

Students successfully complete a comprehensive examination during the fall semester of their second year.

## Research/Education Project

Students successfully present their research/education project during the fall semester of their second year.

## Admission

Applicants must:

- have a B.A. or B.S. degree with a strong science background;
- have a g.p.a. of at least 3.00;
- have an external performance exam from the last five years, such as MCAT (minimum score of 500 or pre-2015 exam scores greater than 27) or Graduate Record Examination (GRE) General Test (score above the 50th percentile with verbal score of at least 150 and math score of at least 150);
- submit a Test of English as a Foreign Language (TOEFL) score (only the iBT—Internet-Based Test is accepted with a total score of 93 and a speaking score of 26) and the test must have been taken within the last two years, or submit a current acceptable score from the International English Language Testing System (IELTS) if an international applicant and if English is not student's first language;
- provide three letters of reference/support;
- submit a personal statement; and
- be available for an interview with the M.C.A. faculty.

Application deadline is May 31.

For detailed application instructions and forms, visit the Department of Anatomy and Cell Biology.

## Career Advancement

Graduates are prepared for a variety of anatomical sciences education settings that include advanced professional study, faculty/lectureship positions in medicine, and allied health care fields at community colleges. Some will want to continue their studies within a health care profession, others may want to prepare for college-level teaching, and others may want to pursue a career in anatomical sciences.

# Anesthesia

## Chair

- Cynthia Wong

**Faculty:** <https://medicine.uiowa.edu/anesthesia/profile>

**Website:** <https://medicine.uiowa.edu/anesthesia/>

Since its inception, the Department of Anesthesia at the University of Iowa has educated more than 400 anesthesiologists, and at least 18 former residents have served as heads of departments of anesthesiology at American medical colleges.

The department has been, and continues to be, well-represented on editorial boards of major anesthesia journals. It provides refresher course lectures for the annual meeting of the American Society of Anesthesiologists, has physician-researchers who are recognized by the National Institutes of Health as independently funded principal investigators, provides many board examiners for the oral exams of the American Board of Anesthesiology, and has earned high national ranking because of these and other objective accomplishments.

The department coordinates the Anesthesia Nursing Program, a collaboration between the Carver College of Medicine and the College of Nursing. The program, which is open to nurses who hold a bachelor's degree, prepares nurse anesthetists to serve rural hospitals in Iowa and nationwide. The curriculum provides intensive training in didactic and clinical anesthesia and includes diverse clinical experience as well as classroom instruction, seminars, and clinical case conferences. For more information, see the Doctor of Nursing Practice [p. 1889] (College of Nursing) section of the Catalog.

## M.D. Training

The Department of Anesthesia introduces second-year medical students to anesthesia as a specialty; helps third-year students develop concepts and technical skills related to resuscitation, airway management, and care of the unconscious patient; and offers fourth-year students intensive study in the specialty. It offers the following courses for medical students. For course descriptions and prerequisite information, see Courses [p. 1730] in this section of the Catalog.

Code	Title	Hours
ANES:8301	Clinical Anesthesia	2
ANES:8401	Clinical Anesthesia Senior	arr.
ANES:8402	Surgical and Neurosciences Intensive Care	arr.
ANES:8403	Chronic Pain Management	2
ANES:8495	Intensive Care Off Campus	arr.
ANES:8497	Research in Anesthesia	arr.
ANES:8498	Anesthesia On Campus	arr.
ANES:8499	Anesthesia Off Campus	arr.

## Residency

### Postgraduate and Residency Program

The department's postgraduate and residency program involves diverse clinical experiences, seminars and teaching

conferences, and ongoing research activities that help postgraduate students and residents develop the knowledge and skills required of an anesthesia specialist.

## Courses

### Anesthesia Courses

#### **ANES:6004 Scientific Principles for Anesthesia Practice**

**4 s.h.**

Applicable chemical and physical properties of molecules important in anesthesia; technological principles and equipment used to safely deliver those molecules to patients and monitor patients during anesthesia; topics include basic chemical and physical calculations, properties of substances in solution, measurement, behavior of gases and other fluids, effects of heat transfer, and the specific chemistry of inhaled and intravenous anesthetics and adjuvant drugs. Corequisites: NURS:6006. Same as NURS:6004.

#### **ANES:6006 Pharmacology of Anesthesia Practice**

**3 s.h.**

Builds on content from foundational graduate pharmacology course; focus on safe prescribing, administration, and management of medications used to provide general, regional, or local anesthesia and analgesia for all patient populations across lifespan undergoing varied surgical, obstetrical, or other procedures in any health care setting. Prerequisites: PCOL:6204 with a minimum grade of B-. Requirements: enrollment in anesthesia nursing program. Same as NURS:6006.

#### **ANES:6007 Basic Principles of Anesthesia Practice**

**5 s.h.**

Overview and integration of anesthetic agents and techniques; patient assessment, preoperative airway evaluation, anesthetic planning, principles of fluid management, and arterial blood gas interpretation; principles of general and regional anesthesia and techniques as they pertain to each surgical specialty; Occupational, Safety and Health Administration (OSHA), The Joint Commission (TJC), and institutional regulations and requirements pertinent to anesthesia practice. Prerequisites: NURS:6004 with a minimum grade of B- and NURS:6006 with a minimum grade of B-. Same as NURS:6007.

#### **ANES:6010 Advanced Principles of Anesthesia Practice I**

**4 s.h.**

Special needs and intraoperative anesthetic management of complex patient populations and those with advanced pathologic states; anesthetic techniques for specific surgical subspecialties including pediatrics, obstetrics, neurosurgery, cardiac, vascular, thoracic, transplant, trauma, EENT, dental, and aesthetic or reconstructive procedures; pertinent pathophysiology and anesthetic monitoring and management techniques; clinical case conferences provide opportunities to discuss perianesthetic complications and challenges. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as NURS:6010.

#### **ANES:6012 Advanced Principles of Anesthesia Practice II**

**1 s.h.**

Acute and chronic pain treatment modalities for all patients presenting for a variety of medical or surgical procedures across the lifespan. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as NURS:6012.

- ANES:6050 Introductory Clinical Anesthesia** 2 s.h.  
Initial mentorship in clinical anesthesia; development of basic clinical skills needed for a career as nurse anesthetist; application and integration of theoretical knowledge in clinical setting. Prerequisites: NURS:6004 and NURS:6006. Corequisites: NURS:6007. Same as NURS:6050.
- ANES:6051 Clinical Anesthesia I** 2 s.h.  
Mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialties including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6050 or ANES:6050. Corequisites: NURS:6010. Same as NURS:6051.
- ANES:6052 Clinical Anesthesia II** 2 s.h.  
Additional mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialties including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6051 or ANES:6051. Same as NURS:6052.
- ANES:6053 Advanced Clinical Anesthesia** 2 s.h.  
Mentored clinical anesthesia at selected sites; development of advanced clinical skills and critical thinking by providing anesthesia for all surgical specialties and invasive diagnostic procedures in all anesthetizing locations; providing anesthesia for all patients in all settings, including on call emergency surgeries. Prerequisites: NURS:6052. Same as NURS:6053.
- ANES:6054 Obstetrical Anesthesia** 2 s.h.  
Experience delivering analgesia and anesthesia for parturients during labor and delivery process. Prerequisites: NURS:6052. Same as NURS:6054.
- ANES:6055 Rural Anesthesia** 2 s.h.  
Opportunity to develop experience providing anesthesia and associated health care services at UI-affiliated clinical sites in rural settings. Prerequisites: NURS:6052. Same as NURS:6055.
- ANES:8007 Medical Student Fellowships in Anesthesia (Externships)** 0 s.h.  
Anesthesia call team clinical experience. Requirements: M.D. standing in anesthesia externship.
- ANES:8301 Clinical Anesthesia** 2 s.h.  
Clinical instruction in perioperative care of the surgical patient; preoperative evaluation, consideration of coexisting medical problems, intraoperative care, postoperative management; basic airway management; introduction to clinical management of acute and chronic pain; case conferences, simulator training.
- ANES:8401 Clinical Anesthesia Senior** arr.  
Advanced clinical experience in anesthesia management of surgical patients with coexisting medical problems; clinical experience in various forms of anesthesia; general, regional (spinal, epidural, peripheral nerve block) anesthesia; practical experience in airway management; mask ventilation, endotracheal intubation, LMA placement, other alternative airway techniques; medical management of surgical patient under anesthesia; pharmacology, cardiovascular and pulmonary physiology; case conferences.
- ANES:8402 Surgical and Neurosciences Intensive Care** arr.  
Evaluation and treatment of critically ill neurological and post-surgical patients; evaluation of pulmonary function, ventilator management, monitoring and management of hemodynamics, fluid balance, acid-based problems, acute kidney injury, acute neurological events, and advanced monitoring techniques.
- ANES:8403 Chronic Pain Management** 2 s.h.  
How to interview and assess patients with pain, work with a multidisciplinary team to determine the type of pain and/or diagnosis, and develop a multimodal treatment plan; readings, classroom discussions, and experiential activities.
- ANES:8495 Intensive Care Off Campus** arr.  
Evaluation and treatment of seriously ill patients in an intensive care unit (other than University of Iowa Hospitals and Clinics); artificial ventilation, evaluation of pulmonary function, monitoring of cardiovascular status, fluid balance and acid base problems, advance monitoring techniques. Prerequisites: ANES:8401. Requirements: 4 s.h. of ANES:8401.
- ANES:8497 Research in Anesthesia** arr.  
Medical research, clinical or laboratory projects; individual study.
- ANES:8498 Anesthesia On Campus** arr.  
Well defined research project relating to anesthesia; arranged by student with departmental approval.
- ANES:8499 Anesthesia Off Campus** arr.  
Knowledge development in anesthesia work and monitor use; ability to identify respiratory, cardiovascular, and neurologic effects of anesthetic agents; skill in airway management; basic skills in general, spinal, epidural, and peripheral nerve block anesthesia.

# Biochemistry and Molecular Biology

## Interim Chair

- Kris A. DeMali

**Undergraduate major:** biochemistry (B.A., B.S.)

**Graduate degrees:** M.S. in biochemistry; Ph.D. in biochemistry

**Website:** <https://medicine.uiowa.edu/biochemistry-molecular-biology/>

Biochemistry is the study of basic chemical processes that occur in and govern all living systems. Nearly all areas of the life sciences engage in biochemical research.

The Department of Biochemistry and Molecular Biology offers undergraduate and graduate degrees, and determines the curricula for those programs. Undergraduate students majoring in biochemistry receive their degrees (Bachelor of Arts or Bachelor of Science) from the College of Liberal Arts and Sciences, and their studies are governed by that college's undergraduate academic policies. The Master of Science and the Doctor of Philosophy degrees are awarded by the Graduate College.

## Faculty and Research

The department's faculty members supervise research in biochemistry; molecular, cellular, developmental, computational, and structural biology; and model system genetics. Their work is supported by grants from the National Institutes of Health (NIH), the National Science Foundation (NSF), the American Heart Association, the American Cancer Society, the Muscular Dystrophy Association (MDA), and other sources. To learn more about the department's faculty members and areas of research, visit the Department of Biochemistry and Molecular Biology website.

## Programs

### Undergraduate Programs of Study

#### Majors

- Major in Biochemistry (Bachelor of Arts) [p. 1735]
- Major in Biochemistry (Bachelor of Science) [p. 1738]

### Graduate Programs of Study

#### Majors

- Master of Science in Biochemistry [p. 1741]
- Doctor of Philosophy in Biochemistry [p. 1742]

## Facilities

The Department of Biochemistry and Molecular Biology occupies 36,700 square feet on the fourth floor of the Bowen Science Building, 3,500 square feet on the third floor of the Medical Education Research Facility, 2,000 square feet in the Eckstein Medical Research Building, and 1,450 square feet on the fourth floor of the Pappajohn Biomedical Discovery Building in the Fraternal Order of Eagles Diabetes Research Center on the University's health sciences campus. It has

a number of well-equipped research laboratories and other departmental facilities, including the Biochemistry Stores, the Mattill Biochemistry Reading Room, and the Heath Conference Room.

The department makes available a number of shared instruments, including an Applied PhotoPhysics stopped flow spectrometer SX20; a Jasco spectropolarimeter, model J815; a Horiba fluorlog-3 spectrofluorometer; and a Beckman Coulter ultra XLI analytical centrifuge.

Faculty, staff, and students in the department have access to a variety of shared Carver College of Medicine resources, including the Protein Crystallography Facility, the Iowa Institute of Human Genetics Genomics Division (DNA Facility), the Nuclear Magnetic Resonance Facility, the Proteomics Facility, the Flow Cytometry Facility, the Viral Vector Core Facility, the Small Animal Imaging Core Facility, and the Genome Editing Facility. The University also supports resources such as the Central Microscopy Research Facilities and the High Throughput Screening Facility.

## Courses

### Biochemistry and Molecular Biology Courses

#### **BIOC:3110 Biochemistry**

**3 s.h.**

One-semester survey of basic concepts in modern biochemistry and molecular biology; emphasis on application of biochemical concepts to human metabolism; appropriate for students who plan to pursue a career in health care or want an overview of biochemistry as a discipline. Requirements: one year each of college-level biology and chemistry. Recommendations: one semester of organic chemistry.

#### **BIOC:3120 Biochemistry and Molecular Biology I**

**3 s.h.**

Physical and chemical foundations of biochemistry, structure of biological molecules, catalysis, transport, and oxidative reactions in biology; first course of two-semester sequence that concludes with BIOC:3130. Requirements: two semesters of general chemistry and one of organic chemistry. Recommendations: BIOL:1411, BIOL:1412, and an additional organic chemistry course.

#### **BIOC:3130 Biochemistry and Molecular Biology II**

**3 s.h.**

Molecular principles of photosynthesis and biosignaling; metabolism of lipids, amino acids, and nucleic acids; DNA replication, transcription, and protein translation; team-taught, didactic lecture style; second of a two-semester comprehensive biochemistry sequence. Prerequisites: BIOC:3120 with a minimum grade of C-.

#### **BIOC:3140 Experimental Biochemistry**

**2 s.h.**

Use of modern instruments and techniques to fractionate, identify, and characterize constituents of biochemical systems. Prerequisites: BIOC:3120 with a minimum grade of C. Requirements: two semesters of general chemistry and one semester of organic chemistry.

**BIOC:3150 Development of Senior Research Project****2 s.h.**

Preparation for biochemistry majors pursuing a senior research project in BIOC:4999; communicating technical information through writing and speaking; presenting scientific journal articles and writing experimental protocols; developing detailed proposal for one-year senior research project. Prerequisites: BIOC:3120 or BIOC:3140 or BIOC:3130. Requirements: biochemistry major, and junior or senior standing.

**BIOC:3310 Practical Data Science and Bioinformatics****3 s.h.**

Understanding how to access large biological data sets and use them to answer biological questions is an important skill for researchers; immersive introduction to computational handling of data; how to access and analyze publicly available data; critically evaluate data quality and analysis in context of measuring gene expression; basic coding in R/RStudio, plotting and data display, fitting and regression, statistical inference, statistical models, downloading and data wrangling; basic introduction to machine learning (clustering); for students with no computational background. Prerequisites: BIOL:1411 with a minimum grade of C- and BIOL:1412 with a minimum grade of C-. Requirements: college algebra. Recommendations: BIOC:3110, or BIOC:3120 and BIOC:3130, or other upper-level life sciences courses. Same as CBIO:3310, MMED:3310.

**BIOC:3800 Biochemistry Teaching Practicum****arr.**

Training for qualified junior or senior undergraduates majoring in biochemistry or a related field to contribute to undergraduate courses; interns may hold review sessions, offer regular office hours, draft questions for homework or exams, assist in proctoring exams, assist students in a laboratory setting, and help with course implementation; guidance from the faculty director and instructors in each course; interns are expected to work approximately three hours per week for each semester hour of credit earned. Requirements: completion of a course covering the same or equivalent material with a grade of B or higher, and must arrange for a short interview with the appropriate course director prior to registration.

**BIOC:3993 Undergraduate Biochemistry Research****arr.**

Preparation for BIOC:4999; directed research with a biochemistry faculty member; experience in an active biochemistry research lab, learning and performing experiments relevant to current projects in that lab, including exposure to scientific literature; arranged in advance by student and biochemistry faculty member.

**BIOC:4241 Biophysical Chemistry I****3 s.h.**

Principles and experimental approaches used to study structure and function of biological macromolecules; protein structure, stability, and dynamics; macromolecular interactions; common biophysical methods. Prerequisites: BIOC:3120 with a minimum grade of C- and BIOC:3130 with a minimum grade of C-. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.

**BIOC:4242 Biophysical Chemistry II****3 s.h.**

Principles and experimental approaches used to study structure and function of biological macromolecules; ligand binding and enzyme catalysis; X-ray crystallography; NMR spectroscopy. Prerequisites: BIOC:3120 with a minimum grade of C- and BIOC:3130 with a minimum grade of C-. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.

**BIOC:4310 Computational Biochemistry****3 s.h.**

Introduction to biomolecular modeling and computer simulation techniques; biomolecular structure and molecular driving forces; principles of structural optimization and conformational sampling; applications to biomolecular phenotypes; scripting and molecular visualization in PyMol, setting up and running molecular dynamics simulations using VMD and NAMD, performing refinement of X-ray diffraction data sets using Phenix, and executing Poisson-Boltzmann electrostatic calculations using APBS. Prerequisites: (MATH:1560 or MATH:1860) and CHEM:1120. Recommendations: BIOC:3110 or BIOC:3120. Same as BME:4310.

**BIOC:4999 Advanced Undergraduate Biochemistry Research****arr.**

Advanced directed research with a biochemistry faculty member; work on an individualized research project relevant to research goals of that lab; learning related scientific literature and presentation of research results; arranged in advance by student and biochemistry faculty member and taken after completion of core biochemistry curriculum. Prerequisites: BIOC:3120 with a minimum grade of B- and BIOC:3130 with a minimum grade of B- and BIOC:3140 with a minimum grade of B- and BIOC:3150 with a minimum grade of B-. Requirements: BIOC:3993 or URES:3994 or HONR:3994 or prior research experience or lab practicum.

**BIOC:5215 Directed Readings for Graduate Students****arr.**

Directed readings with course content arranged with professor.

**BIOC:5241 Biophysical Chemistry I****3 s.h.**

Principles and experimental approaches used to study structure and function of biological macromolecules; protein structure, stability, and dynamics; macromolecular interactions; common biophysical methods. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.

**BIOC:5242 Biophysical Chemistry II****3 s.h.**

Principles and experimental approaches used to study structure and function of biological macromolecules; ligand binding and enzyme catalysis; X-ray crystallography; NMR spectroscopy. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.

**BIOC:5243 Biophysical Chemistry I, Module I****1 s.h.**

Overview of principles of protein structure, stability, folding, and dynamics; brief treatment of structural biology approaches to help students become critical users of models derived from X-ray crystallography and NMR; taken alone or as part of BIOC:5241. Requirements: introductory course in biochemistry.

**BIOC:5244 Biophysical Chemistry II, Module I****1 s.h.**

Enzymes as unparalleled catalysts that represent a unique class of drug targets; focus on organic chemistry of enzyme catalyzed reactions and enzyme inhibition by small molecules from a medicinal chemistry perspective; chemical and enzyme kinetics, sources of catalytic power, chemical mechanisms used in enzyme catalysis, role of coenzymes; strategies in enzyme inhibition, drug resistance, drug synergism, reversible enzyme inhibitors, transition state analogs, slow tight binding inhibitors, irreversible inhibition; taken alone or as part of BIOC:5242. Requirements: introductory course in biochemistry. Same as PHAR:5542.

**BIOC:5245 Biophysical Chemistry I, Module II 1 s.h.**

In-depth examination of statistical thermodynamics and molecular forces in biological systems as related to protein structure, stability, and folding; nucleic acid structure and stability; taken alone or as part of BIOC:5241. Requirements: introductory course in biochemistry.

**BIOC:5246 Biophysical Chemistry II, Module II 1 s.h.**

Utilization of X-ray crystallography and NMR spectroscopy in determining atomic resolution biomolecular structures; crystal geometry, X-ray diffraction, the phase problem, data collection, structure solving and refinement; basic principles of NMR spectroscopy including magnetic properties of nuclei, chemical shift, resonance assignments, determination of NOEs, scalar couplings, RDCs, and simulated annealing approaches to structure determination; for students interested in structural biology; taken alone or as part of BIOC:5242. Requirements: introductory course in biochemistry.

**BIOC:5247 Biophysical Chemistry I, Module III 1 s.h.**

In-depth examination of protein-protein interactions and protein-nucleic acid interactions; implications in biological motility, transcription, and replication; taken alone or as part of BIOC:5241. Requirements: introductory course in biochemistry.

**BIOC:5248 Biophysical Chemistry II, Module III 1 s.h.**

Methods for studying biomolecular dynamics, structure of large biomolecules and biomolecular complexes; measurement and analysis of NMR parameters for characterization of dynamics including T1, T2, hetNOE, CPMG-RD, and RDCs; introduction to computational approaches (e.g., molecular dynamics); NMR methods for studying large biomolecular systems and survey of other approaches including cryoEM and SAX; for students interested in structural biology; taken alone or as part of BIOC:5242. Requirements: one year of biochemistry. Recommendations: basic knowledge of spectroscopy and some previous exposure to NMR from basic chemistry courses.

**BIOC:5261 Research Techniques 1-6 s.h.**

Laboratory rotation for first-year graduate students in biochemistry.

**BIOC:5282 Seminar 0-2 s.h.**

How to evaluate reports of scientific investigations critically; techniques for presenting scientific information.

**BIOC:5875 Perspectives in Biocatalysis 1-3 s.h.**

Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as CBE:5875, CEE:5875, CHEM:5875, MICR:5875, PHAR:5875.

**BIOC:7251 Introduction to Protein Structures 1 s.h.**

Basics of protein structures and amino acids; module covers chapters 1-5 of Lehninger's *Principles of Biochemistry*. Recommendations: first-year graduate standing in biosciences or physical sciences.

**BIOC:7252 Enzymes, Carbohydrates, Nucleic Acids, and Bioenergetics 1 s.h.**

Basics of enzyme kinetics and enzyme mechanisms, carbohydrates, nucleic acids, and bioenergetics; module covers chapters 6, 7, 8, and 13 of Lehninger's *Principles of Biochemistry*. Recommendations: first-year graduate standing in biosciences or physical sciences.

**BIOC:7253 Metabolism I 1 s.h.**

Basics of carbohydrate metabolism (glycolysis, gluconeogenesis, the pentose phosphate pathway), hormonal regulation of carbohydrate metabolism, the citric acid cycle, amino acid catabolism, oxidative phosphorylation; assignment of an advanced topic related to material, typically a recent research paper, extending inquiry beyond that presented in class and presented orally at end of five-week module. Requirements: undergraduate biochemistry course or background in enzyme function.

**BIOC:7254 Cellular Biochemistry 1 s.h.**

Carbohydrate biosynthesis in plants and bacteria, lipid structure/function, biological membranes and transport, signaling, and protein turnover; can be taken alone or as part of BIOC:3130; for graduate students who wish to refresh or advance their knowledge of cellular biochemistry. Recommendations: first-year graduate standing in biosciences or physical sciences.

**BIOC:7255 Metabolism II 1 s.h.**

Fatty acid metabolism, lipid biosynthesis, synthesis of nitrogen containing compounds (amino acids, nucleotides) and principles of hormonal regulation of metabolic pathways; can be taken alone or as part of BIOC:3130; for graduate students who wish to refresh or advance their knowledge of metabolism. Recommendations: first-year graduate standing in biosciences or physical sciences.

**BIOC:7256 Molecular Biology 1 s.h.**

Chromosomal organization, DNA replication, gene expression, RNA processing, and translation; can be taken alone or as part of BIOC:3130; for graduate students who wish to refresh or advance their knowledge of the central dogma of molecular biology. Recommendations: first-year graduate standing in biosciences or physical sciences.

**BIOC:7292 Research Biochemistry arr.**

Thesis research.

**BIOC:8101 Biochemistry for Dental Students 3 s.h.**

Biochemical concepts and application to clinical problems. Requirements: CHEM:2210 and D.D.S. enrollment. Recommendations: CHEM:2220.

## Biochemistry, B.A.

To maximize student flexibility, the curriculum for the B.A. with a major in biochemistry is identical to the B.S. degree in the first two years of study.

### Requirements

The Bachelor of Arts with a major in biochemistry requires a minimum of 120 s.h., including 58 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

The biochemistry major for the Bachelor of Arts degree provides a rigorous education in biochemical concepts and practice in the laboratory while giving students flexibility to specialize in additional disciplines or to obtain clinical volunteer experience. The B.A. program is intended for most students majoring in biochemistry, including those with pre-medicine, pre-pharmacy, pre-dental, and other pre-health professions interests. It also is appropriate for students earning more than one major.

Qualified students may graduate with honors in the biochemistry major; see "Honors in the Major" under Honors [p. 1735] in this section of the Catalog.

The B.A. with a major in biochemistry requires the following coursework.

Code	Title	Hours
Common Requirements		49
Additional Requirements		9
<b>Total Hours</b>		<b>58</b>

### Common Requirements

Students complete the following during their first three years.

Code	Title	Hours
BIOC:3120 & BIOC:3130	Biochemistry and Molecular Biology I-II	6
BIOC:3140	Experimental Biochemistry	2
BIOL:1411- BIOL:1412	Foundations of Biology - Diversity of Form and Function	8
CHEM:1110 & CHEM:1120	Principles of Chemistry I-II	8
CHEM:2210 or CHEM:2230	Organic Chemistry I or Organic Chemistry I for Majors	3
CHEM:2220 or CHEM:2240	Organic Chemistry II or Organic Chemistry II for Majors	3
CHEM:2410 or CHEM:2420	Organic Chemistry Laboratory or Organic Chemistry Laboratory for Majors	3
MATH:1850 & MATH:1860	Calculus I-II	8
PHYS:1511 or PHYS:1611	College Physics I or Introductory Physics I	4
PHYS:1512 or PHYS:1612	College Physics II or Introductory Physics II	4

If students take PHYS:1612 Introductory Physics II, they must take the course with the lab component.

## Additional Requirements

In addition to the common requirements listed above, students must complete the following.

Code	Title	Hours
One of these:		
BIOC:4241	Biophysical Chemistry I	3
BIOC:4242	Biophysical Chemistry II	3
CHEM:4430	Principles of Physical Chemistry	3
CHEM:4431	Physical Chemistry I	3
CHEM:4432	Physical Chemistry II	3
And:		
Advanced science electives, approved by biochemistry and molecular biology advisor		6

Students intending to earn advanced degrees in the biological or health sciences are advised to earn at least 4 s.h. in BIOC:3993 Undergraduate Biochemistry Research or BIOC:4999 Advanced Undergraduate Biochemistry Research. There are no prerequisites for BIOC:3993. The course involves experience in an active biochemistry research lab, which must be arranged ahead of time with a supervising faculty member. Students may make arrangements directly with the faculty member, or they may request assistance from an undergraduate advisor. Credit earned in BIOC:3993 does not count toward the major, but it does count toward the minimum of 120 s.h. required to graduate.

Before students register for BIOC:4999 Advanced Undergraduate Biochemistry Research, they must have completed BIOC:3120 Biochemistry and Molecular Biology I, BIOC:3130 Biochemistry and Molecular Biology II, BIOC:3140 Experimental Biochemistry, and BIOC:3150 Development of Senior Research Project, with a grade of B-minus or higher in each course. Students also are required to have prior research experience, such as in BIOC:3993 Undergraduate Biochemistry Research, URES:3994 Undergraduate Research and Creative Projects, or HONR:3994 Honors Research Practicum, and permission of the instructor.

### Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Teacher Education Program Application and Admission on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

### Honors

### Honors in the Major

Students have the opportunity to graduate with honors in the major. They must maintain a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.33 in work for the major. They must earn 6 s.h. in BIOC:4999 Advanced Undergraduate Biochemistry Research and present their research results in a honors thesis written in the form of a

journal article and in an oral report given at a special open departmental seminar.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the biochemistry major.

### Career Advancement

Biochemistry graduates with bachelor's degrees often work as research assistants in industry, government, education, or health services; teach in secondary schools; or go on to advanced study in medicine, dentistry, or other areas. The program offers solid preparation for careers in medicine, biology, chemistry, dentistry, research, or related sciences. About one-third of biochemistry majors go on to study medicine; others enter graduate programs or professional degree programs.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

### Academic Plans

#### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

**Before the third semester begins:** CHEM:1110 Principles of Chemistry I, CHEM:1120 Principles of Chemistry II, MATH:1850 Calculus I, and MATH:1860 Calculus II.

**Before the fifth semester begins:** BIOL:1411 Foundations of Biology, BIOL:1412 Diversity of Form and Function, CHEM:2210 Organic Chemistry I or CHEM:2230 Organic Chemistry I for Majors, CHEM:2220 Organic Chemistry II or CHEM:2240 Organic Chemistry II for Majors, and CHEM:2410 Organic Chemistry Laboratory or CHEM:2420 Organic Chemistry Laboratory for Majors.

**Before the seventh semester begins:** PHYS:1611 Introductory Physics I or PHYS:1511 College Physics I, PHYS:1612 Introductory Physics II or PHYS:1512 College Physics II, BIOC:3120 Biochemistry and Molecular Biology I, BIOC:3130 Biochemistry and Molecular Biology II, BIOC:3140 Experimental Biochemistry, a science elective, and at least 90 s.h. earned toward the degree.

**Before the eighth semester begins:** CHEM:4430 Principles of Physical Chemistry or CHEM:4431 Physical Chemistry I or CHEM:4432 Physical Chemistry II or BIOC:4241 Biophysical Chemistry I or BIOC:4242 Biophysical Chemistry II, and a science elective.

**During the eighth semester:** enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

### Biochemistry, B.A.

- a Enrollment in chemistry courses requires completion of a placement exam.
- b Fulfills a major requirement and may fulfill a GE requirement.
- c Enrollment in math courses requires completion of a placement exam.
- d Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- f Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- g Students are required to complete 6 s.h. in advanced science electives approved by biochemistry advisor.

h Students intending to earn advanced degrees in the biological or health sciences are advised to earn at least 4 s.h. in BIOC:3993 or BIOC:4999.

i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Biochemistry, B.S.

To maximize student flexibility, the curriculum for the B.S. with a major in biochemistry is identical to the B.A. degree in the first two years of study.

## Requirements

The Bachelor of Science with a major in biochemistry requires a minimum of 120 s.h., including 70 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

All students majoring in biochemistry are initially placed in the Bachelor of Arts degree program. Students in good academic standing can switch to the Bachelor of Science degree program after completing one semester of organic chemistry (CHEM:2230 Organic Chemistry I for Majors or CHEM:2210 Organic Chemistry I). Students who wish to change their degree program to the Bachelor of Science should do so by filling out a change of degree form at the College of Liberal Arts and Sciences Office of Academic Programs and Student Development.

The biochemistry major for the Bachelor of Science degree is intended primarily for students planning careers in research. The B.S. program prepares students to pursue graduate degrees, such as an M.S., Ph.D., or a combined M.D./Ph.D. program, or to work as research technicians. The B.S. program requires 12-14 s.h. more credit in science and laboratory electives than the B.A. program does.

Qualified students may graduate with honors in the biochemistry major; see "Honors in the Major" under Honors [p. 1739] in this section of the Catalog.

The B.S. with a major in biochemistry requires the following coursework.

Code	Title	Hours
Common Requirements		49
Additional Requirements		21
<b>Total Hours</b>		<b>70</b>

## Common Requirements

Students complete the following during their first three years.

Code	Title	Hours
BIOC:3120 & BIOC:3130	Biochemistry and Molecular Biology I-II	6
BIOC:3140	Experimental Biochemistry	2
BIOL:1411- BIOL:1412	Foundations of Biology - Diversity of Form and Function	8
CHEM:1110 & CHEM:1120	Principles of Chemistry I-II	8
CHEM:2210 or CHEM:2230	Organic Chemistry I Organic Chemistry I for Majors	3
CHEM:2220 or CHEM:2240	Organic Chemistry II Organic Chemistry II for Majors	3
CHEM:2410 or CHEM:2420	Organic Chemistry Laboratory Organic Chemistry Laboratory for Majors	3

MATH:1850 & MATH:1860	Calculus I-II	8
PHYS:1511 or PHYS:1611	College Physics I Introductory Physics I	4
PHYS:1512 or PHYS:1612	College Physics II Introductory Physics II	4

If students take PHYS:1612 Introductory Physics II, they must take the course with the lab component.

## Additional Requirements

In addition to the common requirements listed above, students must complete the following.

Code	Title	Hours
Two of these:		
BIOC:4241	Biophysical Chemistry I	3
BIOC:4242	Biophysical Chemistry II	3
CHEM:4430	Principles of Physical Chemistry	3
CHEM:4431	Physical Chemistry I	3
CHEM:4432	Physical Chemistry II	3
One of these options:		
BIOC:4999	Advanced Undergraduate Biochemistry Research	6
Advanced laboratory courses		6
And:		
Advanced science electives, approved by biochemistry and molecular biology advisor		9

Students are encouraged to begin research by taking BIOC:3993 Undergraduate Biochemistry Research, which has no prerequisites. The course involves experience in an active biochemistry research lab, which must be arranged ahead of time with a supervising faculty member. Students may make arrangements directly with the faculty member, or they may request assistance from an undergraduate advisor. Credit earned in BIOC:3993 does not count toward the major, but it does count toward the minimum of 120 s.h. required to graduate.

Before students register for BIOC:4999 Advanced Undergraduate Biochemistry Research, they must have completed BIOC:3120 Biochemistry and Molecular Biology I, BIOC:3130 Biochemistry and Molecular Biology II, BIOC:3140 Experimental Biochemistry, and BIOC:3150 Development of Senior Research Project, with a grade of B-minus or higher in each course. Students also are required to have prior research experience, such as in BIOC:3993 Undergraduate Biochemistry Research, URES:3994 Undergraduate Research and Creative Projects, or HONR:3994 Honors Research Practicum, and permission of the instructor. Students can only count 6 s.h. in BIOC:4999 toward their requirements for the degree.

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Teacher Education Program Application and Admission on the College of Education website for details on requirements and

deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Combined Programs

### B.S./Ph.D. in Biochemistry

The combined Bachelor of Science/Doctor of Philosophy in biochemistry program permits students to transition into the Ph.D. program during their senior year and to count 12 s.h. of credit toward both the B.S. and Ph.D. requirements. The combined program provides a research-intensive experience and shortens the training time for students interested in pursuing independent biochemistry research careers. Students in the program receive financial support during the second half of their senior year and throughout their Ph.D. study.

Students must be pursuing a Bachelor of Science with a major in biochemistry, and by the beginning of their senior year they must:

- have 108 s.h. of undergraduate credit;
- have a minimum g.p.a. of 3.50;
- have completed four semesters of research experience (summer research counts as one semester); and
- have completed BIOC:3120 Biochemistry and Molecular Biology I, BIOC:3130 Biochemistry and Molecular Biology II, and BIOC:3140 Experimental Biochemistry.

Students interested in the combined program should speak with their academic advisor and the biochemistry and molecular biology honors advisor during their first year or at the beginning of their sophomore year. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, contact the Department of Biochemistry and Molecular Biology.

## Honors

### Honors in the Major

Students have the opportunity to graduate with honors in the major. They must maintain a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.33 in work for the major. They must earn 6 s.h. in BIOC:4999 Advanced Undergraduate Biochemistry Research and present their research results in a honors thesis written in the form of a journal article and in an oral report given at a special open departmental seminar.

### University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the biochemistry major.

## Career Advancement

Biochemistry graduates with bachelor's degrees often work as research assistants in industry, government, education, or health services; teach in secondary schools; or go on to advanced study in medicine, dentistry, or other areas. The

program offers solid preparation for careers in medicine, biology, chemistry, dentistry, research, or related sciences. About one-third of biochemistry majors go on to study medicine; others enter graduate programs or professional degree programs.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

**Before the third semester begins:** CHEM:1110 Principles of Chemistry I, CHEM:1120 Principles of Chemistry II, MATH:1850 Calculus I, and MATH:1860 Calculus II.

**Before the fifth semester begins:** BIOL:1411 Foundations of Biology, BIOL:1412 Diversity of Form and Function, CHEM:2210 Organic Chemistry I or CHEM:2230 Organic Chemistry I for Majors, CHEM:2220 Organic Chemistry II or CHEM:2240 Organic Chemistry II for Majors, and CHEM:2410 Organic Chemistry Laboratory or CHEM:2420 Organic Chemistry Laboratory for Majors.

**Before the seventh semester begins:** PHYS:1611 Introductory Physics I or PHYS:1511 College Physics I, PHYS:1612 Introductory Physics II or PHYS:1512 College Physics II, BIOC:3150 Development of Senior Research Project, one semester of BIOC:3993 Undergraduate Biochemistry Research for students planning to take BIOC:4999 Advanced Undergraduate Biochemistry Research, BIOC:3120 Biochemistry and Molecular Biology I, BIOC:3130 Biochemistry and Molecular Biology II, BIOC:3140 Experimental Biochemistry, two science electives, and at least 90 s.h. earned toward the degree.

**Before the eighth semester begins:** CHEM:4431 Physical Chemistry I or CHEM:4432 Physical Chemistry II or BIOC:4241 Biophysical Chemistry I or BIOC:4242 Biophysical Chemistry II, a science elective, and at least 3 s.h. of BIOC:4999 Advanced Undergraduate Biochemistry Research.

**During the eighth semester:** enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

### Biochemistry, B.S.

## Biochemistry, M.S.

Students admitted to graduate study in biochemistry usually pursue the Doctor of Philosophy.

### Requirements

The Master of Science program in biochemistry requires a minimum of 30 s.h. of graduate credit, thesis research, and a thesis. See Ph.D. in biochemistry [p. 1742] for information about the graduate curriculum.

### Admission

Most graduate students in biochemistry work toward a Doctor of Philosophy. Applicants who wish to earn a master's degree must contact the Department of Biochemistry and Molecular Biology before they apply.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

# Biochemistry, Ph.D.

## Requirements

The Doctor of Philosophy in biochemistry requires a minimum of 72 s.h. of graduate credit (34 s.h. of coursework and 38 s.h. of research). Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree. Qualified students interested in earning the Doctor of Medicine along with the Ph.D. may apply to the Medical Scientist Training Program [p. 1772], which offers a combined M.D./Ph.D. program.

Students have the opportunity to tailor their curriculum with courses that enhance their educational goals. They take a combination of graduate-level courses that include a first-year laboratory research rotation course, and seminar courses.

The Ph.D. with a major in biochemistry requires the following coursework.

## Core Curriculum

Code	Title	Hours
BIOC:5261	Research Techniques (first-year laboratory rotation)	1-6
BIOC:5282	Seminar	0-2
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
Biophysical chemistry coursework (typically students take 6 s.h.)		3-6
Four molecular medicine courses		6-8
Additional courses offered by the Department of Biochemistry and Molecular Biology and other departments, as appropriate for each student		

## Typical Curriculum

### First Year, Fall

Code	Title	Hours
BIOC:5241	Biophysical Chemistry I	3
BIOC:5261	Research Techniques	4
BIOC:5282	Seminar (discussion section 1)	2
BMED:5207	Principles of Molecular and Cellular Biology	3

### First Year, Spring

Code	Title	Hours
BIOC:5242	Biophysical Chemistry II	3
BIOC:5261	Research Techniques	4
BIOC:5282	Seminar (discussion section 1)	2
MMED:6226/ ACB:6226/ MPB:6226	Cell Cycle Control	1
MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions	1

## Second Year, Fall

Code	Title	Hours
BIOC:5282	Seminar (discussion section 2)	1
BIOC:7292	Research Biochemistry	arr.
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
Electives		

## Second Year, Spring

Code	Title	Hours
BIOC:7292	Research Biochemistry	arr.
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
Electives		

## Examples of Elective Coursework

Code	Title	Hours
BIOC:3310/ CBIO:3310/ MMED:3310	Practical Data Science and Bioinformatics	3
BME:2210	Bioimaging and Bioinformatics	4
BME:4310/ BIOC:4310	Computational Biochemistry	3
BMED:5207	Principles of Molecular and Cellular Biology	3
MMED:6220/ ACB:6220/ MPB:6220	Mechanisms of Cellular Organization	3
MMED:6225/ ACB:6225/ MPB:6225/ PCOL:6225	Growth Factor Receptor Signaling	1
PCOL:5204	Basic Biostatistics and Experimental Design	1
PCOL:6210	Receptors and Cell Signaling	3

## Additional Requirements

### Laboratory Rotations

Students rotate through at least three different laboratories during their first academic year; they enroll in BIOC:5261 Research Techniques. The laboratory rotations are approximately ten weeks each. At the conclusion of each rotation, a student meets with an advisory committee of three faculty members. A student is required to present the research and training completed during that rotation. The advisory committee writes a short evaluation of the student's performance and assigns a grade for the laboratory work. The evaluation and grade becomes part of the student's departmental record.

### Teaching

Students participate in the formal teaching programs of the department for at least one semester. First-year students as well as students who are within a year of receiving their Ph.D. degree are usually not asked to teach. Teaching may take a variety of forms, including tutoring, leading discussions

and laboratory groups, correcting examinations, preparing teaching materials, and lecturing.

## Thesis Research Proposal

During the fall semester of the second year, students in collaboration with their thesis advisor prepare a detailed thesis proposal that describes the proposed research to be conducted for the dissertation as part of BIOC:5282 Seminar.

## Comprehensive Examination

The comprehensive examination has two parts: a written proposal and an oral defense of the proposal. The examination must be taken before June 30 of the second year.

## Written Report of Comprehensive Examination

Students receive their topic by March 1 and their written examination is submitted to their committee by April 22. The written proposal should have a cover page followed by no more than 20 pages. For more information, a detailed guide is located in the Department of Biochemistry and Molecular Biology Graduate Student Manual.

## Oral Presentation of Comprehensive Examination

Questions during the oral examination may come from the examination proposal, the Ph.D. thesis proposal, or other general areas of biochemistry and molecular biology. To pass the oral comprehensive examination, students must perform satisfactorily both in defense of the examination proposal and in answering general biochemistry and molecular biology questions that are germane to the proposal or that are important for a full understanding of the proposed experiments and their interpretation.

## The Fifth-Semester Seminar

After successful completion of the comprehensive examination, usually the fall semester of the third year (the fifth semester), students update and revise the written Ph.D. thesis proposal prepared during the fall semester of the second year (prior to the comprehensive examination), and present a seminar on the thesis research to the department at one of the weekly biochemistry workshops.

## The Fourth-Year Workshop

In the fourth year, during fall or spring, students are asked to present at one of the Department of Biochemistry and Molecular Biology's weekly workshops. The presentation is based on their research.

## The Fifth-Year Retreat

The Department of Biochemistry and Molecular Biology holds a yearly retreat where students and faculty present their current research. Students in their fifth year may be asked to give an oral presentation at the retreat.

## Final Examination

The five member Ph.D. thesis committee serves as an advisory body for preparation of the thesis. This committee meets with students to review the material that is expected to be incorporated in the thesis. Although meetings of the candidates with the committee should be yearly, the candidates, thesis advisor, or the committee can request a meeting at any time. A final draft of the thesis must be given to all members of the committee two weeks before the

final examination. The final examination takes the form of a seminar presented to the department. This presentation is announced according to Graduate College policy. Questions, comments, and discussion then follow. After the seminar, candidates meet with their committee for the final thesis defense. The Ph.D. degree is not awarded until the thesis is signed. In some cases, revisions may be required.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biochemistry in a combined degree program offered by the Department Biochemistry and Molecular Biology and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

## Admission

Applicants must have a baccalaureate degree from a regionally accredited U.S. college or university, or an equivalent degree from another country as determined by the Office of Admissions. Those who apply must have an undergraduate g.p.a. of at least 3.00. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Appropriate preparation includes one-year, college-level courses in organic and physical chemistry, biology, physics, and mathematics through calculus. Students are expected to have had one or more introductory courses in biochemistry.

## Financial Support

Students admitted to the Ph.D. program in biochemistry routinely receive a stipend and tuition support.

## Career Advancement

Graduates have secured a variety of career positions, including in academic institutions and the government, and as scientists, physicians, lecturers, and science educators. Some go on to pursue postdoctoral or additional training, and others land jobs in business and industry.

# Cardiothoracic Surgery

## Interim Chair

- Kalpaj Parekh

## Interim Director, Perfusion Technology

- Shahna L. Helmick

**Undergraduate certificate:** perfusion technology

**Website:** <https://medicine.uiowa.edu/surgery/divisions/cardiothoracic-surgery/>

The University of Iowa cardiothoracic surgery program is the third oldest program of its kind in the United States. Since its establishment in 1948 as a division within the Department of Surgery, the program has advanced from providing operative interventions for patients with diseases of the chest to performing a broad range of the most current and innovative surgical procedures.

Cardiothoracic surgery's facilities are located at University of Iowa Hospitals & Clinics. Each year cardiothoracic surgeons at the hospitals perform more than 500 adult and pediatric heart surgeries, including coronary bypasses, transplants, and placement of mechanical cardiac assist devices; minimally invasive procedures such as mitral valve replacement and epicardial lead placement; and more than 600 general thoracic surgeries with emphasis on esophageal and lung diseases. Preparations are under way for providing coronary artery bypass grafting using robotics.

The Perfusion Technology Program is a 20-month program of study. For more information about the Perfusion Technology Program, visit the Perfusion Technology Program website.

## Programs

### Undergraduate Program of Study Certificate

- Certificate in Perfusion Technology [p. 1746]

## Residency

Iowa's cardiothoracic surgery residency program was established in 1948 and is fully accredited by the Accreditation Council for Graduate Medical Education (ACGME). It is the only cardiothoracic surgery training program in Iowa. One resident is accepted into the two-year program each year. Cardiothoracic surgery was approved by the ACGME to start a six-year integrated thoracic residency. Medical students begin the program after they graduate from medical school. A new resident enters the program each year.

## Facilities

Cardiothoracic surgery has specialty laboratories in gastric motility, analytical chemistry, transplantation, tissue culture, surgical bacteriology, shock, and cardiac bypass. These facilities permit study of experimental procedures such as heart valve replacement in large animals and heterotopic heart transplantation in mice and rats.

## Courses

- Cardiothoracic Surgery Courses [p. 1744]
- Perfusion Technology Courses [p. 1744]

### Cardiothoracic Surgery Courses

#### CTS:8401 Advanced Inpatient Subinternship in Cardiothoracic Surgery arr.

Participation in diagnosis, preoperative, operative, and postoperative care of thoracic and cardiac patients; attendance at division conferences; students assume responsibility and act as an intern; may concentrate interest in cardiac surgery or thoracic surgery; diagnosis and management of patients on an inpatient service under close supervision by an upper-level resident/fellow and faculty member.

#### CTS:8497 Research in Cardiothoracic Surgery arr.

Work on a short- or long-term research project arranged with instructor; may involve clinical material or laboratory; students organize and complete a project, finishing with a publishable manuscript.

#### CTS:8498 Cardiothoracic Surgery On Campus arr.

Clinical clerkship individually arranged by student with department approval.

#### CTS:8499 Cardiothoracic Surgery Off Campus 4 s.h.

Individually arranged by student with approval of department to rotate outside of University of Iowa Hospitals & Clinics. Requirements: M.D. enrollment.

### Perfusion Technology Courses

#### PERF:4161 Instrumentation in Perfusion Technology 3 s.h.

Electrical circuitry, filters, pressure transducers, thermistors, cardiac output computers, fluid dynamics, intra-aortic balloon pumps, blood gas analyzers. Requirements: Perfusion Technology Program enrollment.

#### PERF:4162 Pathophysiology of Perfusion Technology 5 s.h.

Hemostasis, acid base physiology, gas transfer, heart anatomy, heart embryology, congenital cardiac defects. Requirements: Perfusion Technology Program enrollment.

#### PERF:4163 Clinical Experience I 2 s.h.

Perfusion in operating room: patient workup, observation, and reporting on extracorporeal setup, surgical procedure. Requirements: Perfusion Technology Program enrollment.

#### PERF:4164 Clinical Experience II 3 s.h.

Continuation of PERF:4163; setup of extracorporeal circuit; ancillary duties of perfusionist. Requirements: Perfusion Technology Program enrollment.

#### PERF:4165 Clinical Experience III 12 s.h.

Continuation of PERF:4164; management of cardiopulmonary bypass system. Requirements: Perfusion Technology Program enrollment.

#### PERF:4166 Clinical Experience IV 12 s.h.

Continuation of PERF:4165; emphasis on supply maintenance, perfusion department management. Requirements: Perfusion Technology Program enrollment.

#### PERF:4167 Perfusion Seminar 1 s.h.

Ethics in perfusion. Requirements: Perfusion Technology Program enrollment.

**PERF:4168 Research in Perfusion 1 s.h.**

From topic selection to manuscript. Requirements: Perfusion Technology Program enrollment.

**PERF:4169 Clinical Experience V 12 s.h.**

Continuation of PERF:4166. Requirements: Perfusion Technology Program enrollment.

**PERF:4170 Principle and Practice of Perfusion Technology 6 s.h.**

Hypothermia, hemodilution, left heart bypass, dialysis, ultrafiltration, membrane and bubbler oxygenation. Requirements: Perfusion Technology Program enrollment.

**PERF:4171 Devices in Perfusion Technology 3 s.h.**

Components of extracorporeal circuit; in vitro laboratory evaluation of components. Requirements: Perfusion Technology Program enrollment.

# Perfusion Technology, Certificate

## Requirements

The undergraduate Certificate in Perfusion Technology requires 73 s.h. of credit. Students must maintain a g.p.a. of at least 2.00 in work for the certificate. The certificate is a 20-month program that spans over five semesters. The program is accredited by the Commission on Accreditation of Allied Health Education Programs upon the recommendation of the Accreditation Committee for Perfusion Education (AC-PE). Students are awarded the certificate upon successful completion of the program making them eligible to take the American Board of Cardiovascular Perfusion certification exam.

Three to five students are accepted annually and begin the program the fall semester. During the first two semesters of the program, students pursue a core curriculum that provides a solid scientific base while the second year (three semesters) is reserved for the completion of an independent research project, clinical training in the operation of the heart-lung machine, and learning ancillary procedures such as blood salvaging, circulatory support, and artificial hearts.

The Certificate in Perfusion Technology requires the following work.

Code	Title	Hours
PERF:4161	Instrumentation in Perfusion Technology	3
PERF:4162	Pathophysiology of Perfusion Technology	5
PERF:4163	Clinical Experience I	2
PERF:4164	Clinical Experience II	3
PERF:4165	Clinical Experience III	12
PERF:4166	Clinical Experience IV	12
PERF:4167	Perfusion Seminar (taken five times for 1 s.h. each)	5
PERF:4168	Research in Perfusion (taken four times for 1 s.h. each)	4
PERF:4169	Clinical Experience V	12
PERF:4170	Principle and Practice of Perfusion Technology	6
PERF:4171	Devices in Perfusion Technology	3
PATH:8133	Introduction to Human Pathology for Graduate Students	3
PCOL:4130	Drug Mechanisms and Actions	3
<b>Total Hours</b>		<b>73</b>

## Prerequisites

The following coursework is required before admission to the certificate program.

- Baccalaureate degree
- Chemistry, including biochemistry or organic chemistry (9 s.h.)
- Human anatomy and physiology (7 s.h.)

- Physics (4 s.h.)
- Precalculus (5 s.h.) or calculus
- Statistics (3 s.h.)

## Admissions

Admission to the program is based on the decision of the Admissions Committee. Decisions are based upon a combination of grade-point average, references, an essay, and interview scores.

For information about application materials, see Admissions on the Perfusion Technology Program website.

Applications must be submitted by November 1.

# Dermatology

## Chair

- Janet A. Fairley

**Faculty:** <https://medicine.uiowa.edu/dermatology/profile>

**Website:** <https://medicine.uiowa.edu/dermatology/>

The Department of Dermatology instructs M.D. students and trains dermatology residents in the care of patients with skin diseases. It also provides researchers with an opportunity to develop their skills in dermatology.

## M.D. Training

The Department of Dermatology rotation is one of seven selective courses offered to third- and fourth-year medical students. Students spend two weeks in the clinic and attend approximately 10 one-hour lectures. They see a good cross-section of patients, including those receiving primary or tertiary care at University of Iowa Hospitals & Clinics and Iowa River Landing as well as a large number of patients referred from Student Health. Additional patients also are seen at the nearby VA Iowa City Health Care.

Varied electives are open to fourth-year M.D. students, including further clinical experience, dermatologic research, and special studies.

## Courses

### Dermatology Courses

**DERM:8301 Clinical Dermatology** **2 s.h.**

Basic dermatology; lectures, independent study, clinical experience. Requirements: third-year M.D. enrollment.

**DERM:8401 Dermatology Elective** **arr.**

Advanced clinical experience, dermatologic surgery, special assignments. Requirements: fourth-year M.D. enrollment.

**DERM:8497 Research in Dermatology** **arr.**

General principles of medical research; clinical or laboratory projects; individual study.

**DERM:8498 Dermatology On Campus** **arr.**

Clinical clerkship; individually arranged by student with departmental approval.

**DERM:8499 Dermatology Off Campus** **arr.**

Arranged by student with departmental approval.

# Dietary

## Executive Associate Dean

- Patricia L. Winokur

**Graduate degree:** M.C.N.

**Website:** <https://uihealthcare.org/education/university-iowa-master-clinical-nutrition-program>

The dietary program is committed to patient care through dietitian service, research, and education.

Graduate-level courses for the Master of Clinical Nutrition degree are administered by the Carver College of Medicine and the College of Public Health.

## Programs

### Graduate Program of Study

#### Major

- Master of Clinical Nutrition [p. 1749]

## Courses

### Dietary Courses

#### **DIET:9101 Advanced Medical Nutrition Therapy I 3 s.h.**

Nutritional impact on health and disease as it relates to physiology and biochemistry with an emphasis on medical nutrition therapy and the relationship to various disease states. Requirements: enrollment in Master of Clinical Nutrition program.

#### **DIET:9102 Advanced Medical Nutrition Therapy II 3 s.h.**

Continuation of DIET:9101; review of the nutritional impact on health and disease as it relates to physiology and biochemistry with an emphasis on medical nutrition therapy and the relationship to various disease states. Requirements: enrollment in Master of Clinical Nutrition program.

#### **DIET:9200 Nutrition Assessment 3 s.h.**

Study of nutrition assessment methods including dietary intake, anthropometric and biochemical measures, as well as nutrition focused physical examination; utilization of nutrition care process including nutrition assessment, diagnosis, interventions, monitoring, and evaluation with individuals, groups, or populations. Requirements: enrollment in Master of Clinical Nutrition program.

#### **DIET:9203 Clinical Dietetics 1 s.h.**

Nutritional aspects of health and disease, with emphasis on medical nutrition therapy; human nutrition in the clinical state as it relates to physiology and biochemistry.

#### **DIET:9300 Critical Care and Nutrition Support 3 s.h.**

Advanced enteral and parenteral nutrition in an acute care setting; indications, calculations, potential complications, and ethical consideration of nutrition support. Requirements: enrollment in Master of Clinical Nutrition program.

#### **DIET:9400 Pediatric Nutrition 3 s.h.**

Examination of physiological, biochemical, and nutritional aspects of disease processes relevant to infants and children up to 18 years of age; emphasis on evidence-based medical nutrition therapy for a variety of disease states. Requirements: enrollment in Master of Clinical Nutrition program.

#### **DIET:9501 Supervised Experiential Learning I 3 s.h.**

Supervised hands-on training at the bedside in inpatient units, and in outpatient clinics, communities, and food service management; completion of coursework specific to Registered Dietitian and Nutritionist (RDN) training while learning in field (e.g., ServSafe certification, diet meals, event planning, professional issues and trends). Requirements: enrollment in Master of Clinical Nutrition program.

#### **DIET:9502 Supervised Experiential Learning II 3 s.h.**

Supervised hands-on training at the bedside in inpatient units, and in outpatient clinics, communities, and food service management; completion of coursework specific to Registered Dietitian and Nutritionist (RDN) training while learning in field (e.g., legislative and regulatory issues, research seminar, clinical rounds, Commission on Dietetic Registration portfolio development, RDN licensure and credentialing). Requirements: enrollment in Master of Clinical Nutrition program.

#### **DIET:9600 Management in Foods and Nutrition 3 s.h.**

Application of the principles of health care management as it pertains to food and nutrition including budgeting, cost control, and financial analysis; clinical coding and billing; quality and performance improvement measures; human resource management; and operating plan development. Requirements: enrollment in Master of Clinical Nutrition program.

# Master of Clinical Nutrition, M.C.N.

The Master of Clinical Nutrition program inspires and educates students to be leaders in clinical nutrition through innovative and interprofessional graduate education as a Registered Dietitian Nutritionist (RDN).

The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND).

## Requirements

The graduate Master of Clinical Nutrition (M.C.N.) requires 36 s.h. of credit. Students must maintain a cumulative g.p.a. of at least 2.50 in major coursework. The degree requires no thesis.

The M.C.N. is a 20-month program of study. After successful completion of the program, students earn the degree and receive a verification statement that provides eligibility to take the Commission on Dietetic Registration (CDR) entry-level registration examination for dietitians.

The Master of Clinical Nutrition requires the following work.

## First Year, Fall

Code	Title	Hours
DIET:9101	Advanced Medical Nutrition Therapy I	3
DIET:9200	Nutrition Assessment	3
EPID:6360	Nutrition Intervention in Clinical Trials Research	2
EPID:6370	Nutrition Intervention in Research Lab	3

## First Year, Spring

Code	Title	Hours
DIET:9102	Advanced Medical Nutrition Therapy II	3
EPID:6330	Global Nutrition Policy	2
EPID:6350	Nutritional Epidemiology	2
HHP:6310	Advanced Sport and Exercise Nutrition	3

## First Year, Summer

Code	Title	Hours
DIET:9300	Critical Care and Nutrition Support	3

## Second Year, Fall

Code	Title	Hours
DIET:9400	Pediatric Nutrition	3
DIET:9501	Supervised Experiential Learning I	3

## Second Year, Spring

Code	Title	Hours
DIET:9502	Supervised Experiential Learning II	3

DIET:9600 Management in Foods and Nutrition

3

## Supervised Experiential Learning

All supervised experiential learning occurs on campus at University of Iowa Hospitals & Clinics, with the exception of community nutrition which occurs in the greater Iowa City community. The rotation schedule is developed according to the following guidelines.

- Clinical dietetics (disordered eating, oncology, cardiology, critical care, pediatrics, and outpatient counseling): 18 weeks.
- Food service management (clinical management, food service, production, business and finance, patient services, and event planning): 11 weeks.
- Community nutrition: 6 weeks.

## Admission

Applicants to the M.C.N. program must either have completed a Didactic Program in Dietetics (DPD) or meet the course requirements listed below:

- have a baccalaureate degree from a regionally accredited institution in the United States;
- have a minimum cumulative g.p.a. of at least 3.00 on a 4.00 scale;
- have a cumulative science g.p.a. of at least 3.20 or a science g.p.a. of at least 3.20 on the most recently completed 40 s.h. of biological and chemical science coursework;
- submit Graduate Record Examination (GRE) General Test scores to the University of Iowa from Educational Testing Services (ETS) and have a minimum test score at the 25th percentile or higher on each section (verbal, quantitative, and analytical writing) taken within the last 10 years;
- have health care or food service work experience in the field;
- submit three recommendation letters (two from a collegiate academic reference and one from a health care or food service experience supervisor); and
- meet education requirements (see below).

Applicants whose first language is not English must submit official test scores to verify English proficiency. They can do this by submitting official test scores for the Test of English as a Foreign Language (TOEFL) taken within the last two years. In order to review an application, official TOEFL scores must be received from Educational Testing Service. Only the iBT (internet-based test) is accepted. A minimum total score of 93 and a speaking score of 26 is necessary for entry into the program.

## Education Requirements

### Biological Sciences Coursework

- A complete introductory course sequence in biology (animal or human) or general zoology.
- An animal, exercise, or human physiology course.
- At least three additional upper-level biology or zoology courses. Examples of upper-level courses include cell biology, genetics, immunology, microbiology, molecular biology, pharmacology, anatomy, embryology, endocrinology, histology, or neuroscience.

## Chemical Sciences Coursework

- A complete introductory course sequence in inorganic chemistry.
- At least one semester of organic chemistry.
- Introductory or general biochemistry coursework.

## Statistical Sciences Coursework

- A general statistics or biostatistics course.

## Professional Coursework

- At least one nutrition course such as introductory nutrition, lifespan nutrition, advanced nutrition, or medical nutrition therapy.
- At least one foods course such as foods class and lab, food science, or food chemistry.

## Recency of Education Requirements

Additional courses in dietetic or a related area are required to update a degree which was completed five or more years prior to the current application deadline. The number of required credits is outlined below:

- 5-10 years (3 s.h. of medical nutrition therapy or clinical nutrition).
- 10 or more years (3 s.h. of medical nutrition therapy, 3 s.h. of physiology, 3 s.h. of biochemistry).

## Application Process

Application should be made through the Master of Clinical Nutrition program. All materials for the application, including official Graduate Record Examination (GRE) scores, three recommendations, and college transcripts, must be received by June 1.

Official GRE scores, as well as Test of English as a Foreign Language (TOEFL) scores, should be sent to the University of Iowa using GRE Code 6681.

The University of Iowa online application for admission requires a nonrefundable application fee of \$60 for U.S. applicants and \$100 for international applicants.

## Financial Support

The estimated tuition and expenses for the program are listed on the University of Iowa Health Care website; visit the Master of Clinical Nutrition Program Tuition and Expenses web page.

Students should contact the Office of Student Financial Aid for information concerning monetary assistance.

## Career Development

The Master of Clinical Nutrition program prepares students to be competent as a registered dietitian nutritionist (RDN).

According to the Occupational Outlook Handbook released by the U.S. Department of Labor Statistics, the employment of registered dietitians and nutritionists is projected to grow eight percent from 2019 to 2029, at a faster rate than the average for all occupations.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

# Doctor of Medicine

**Professional degree:** M.D.

**Website:** <https://medicine.uiowa.edu/md/>

The Doctor of Medicine is a professional degree awarded by the Carver College of Medicine. The college is accredited by the Liaison Committee on Medical Education of the American Medical Association and the Association of American Medical Colleges and meets the requirements of all state licensing boards. Its M.D. diploma admits the holder to all privileges granted to graduates of all medical colleges before such boards.

## Programs

### Professional Program of Study

#### Major

- Doctor of Medicine [p. 1752]

## Academics Rules and Procedures

### Student Promotion

The Carver College of Medicine has established promotion policies and procedures to ensure that each of its graduates has adequate skills, knowledge, judgment, ethical standards, and personal integrity to assume the responsibilities of a medical doctor. The student promotions committee, made up of seven faculty members and two students, performs these duties with the cooperation, advice, and judgment of course directors, faculty members, students, and administrators.

The committee recommends specific actions to be taken when a student's skills, knowledge, judgment, or ethical behavior is in any way considered consistently marginal or unsatisfactory. Possible recommendations include dismissal of the student from the college, suspension for a specified period of time, requiring the student to repeat all or any part of the curriculum on academic probation, and allowing the student to continue on academic probation with a full or partial course load. The committee's recommendations are forwarded for action to the executive dean of the Carver College of Medicine.

Specific information about student promotion policies and procedures is available from the Office of Student Affairs and Curriculum and is online in the Student Handbook.

### Leaves of Absence, Withdrawal, Reinstatement

The Carver College of Medicine has established policies regarding leaves of absence, dropping courses, withdrawal from the college, and reinstatement to the college. Information about each of these policies is available on the college's Office of Student Affairs and Curriculum website and is published annually in the Student Handbook.

### Disputes and Complaints

Student complaints concerning actions of faculty members or departments are pursued first through mechanisms established in the Carver College of Medicine. These procedures allow the greatest flexibility for all concerned in resolving a conflict. They are intended for situations such as grading disputes, alleged academic dishonesty, alleged

dishonesty during a clinical rotation, alleged unethical or unprofessional conduct, and perceived discrimination or harassment.

Complaints regarding sexual harassment are handled confidentially in accordance with University policy and procedures; see the University's Sexual Harassment Policies.

For information about the established informal mechanisms, contact the Office of Student Affairs and Curriculum or see the Student Handbook.

# Doctor of Medicine, M.D.

## Requirements

The Doctor of Medicine is a four-year program that prepares students to practice primary care medicine and to pursue further education and training in specialized areas of medicine. The program admits 152 new students each year.

The M.D. curriculum is built on a triple-helix model whose three strands extend through all four years of medical school: the clinical and professional skills strand, the mechanisms of health and disease strand, and the medicine and society strand.

Clinical experiences begin during the first few weeks of medical school, and clinical clerkships start after just three semesters of preclinical instruction. By the end of the fifth semester, students have completed all of their core requirements and have the remaining three semesters to tailor their educational experience in preparation for their selected specialty.

Students complete in-depth clinical coursework and serve clinical clerkships primarily at University of Iowa Hospitals & Clinics, the VA Iowa City Health Care, and the Des Moines Area Medical Education Consortium. Students also may have opportunities to gain experience in private medical offices and community hospitals.

The M.D. program is a full-time, four-year program; thus, students are required to pay a minimum of eight semesters of full-time tuition. At the conclusion of medical school, students will match into a residency program and complete their training in a chosen specialty.

## Requirements for Students Completing Phase II Core, 2021 Calendar Year

### Preclinical Curriculum (Phase I)

The first three semesters of the M.D. program present an integrated core of sciences basic to the study of medicine. They also introduce students to the foundations of clinical practice.

Coursework includes human anatomy, foundations of cellular life, clinical and professional skills (a three-course series), medicine and society (a three-course series), and mechanisms of health and disease (a five-course series). Each of these courses is described below.

Some elective courses are available to students during the first and second years, normally for 1 or 2 s.h. of credit. Topics include areas not specifically covered in the regular curriculum and areas related to medical practice and the role of the physician. Courses vary from year to year, but typical subject areas are global health issues, U.S. health care systems, and community health outreach.

The M.D. program's preclinical curriculum requires the following coursework.

### First Semester

ACB:8101 Medical Gross Human Anatomy: complete dissection of the body with regional emphasis stressing relationships to the living system; clinically relevant areas of radiologic imaging, surface anatomy, embryology, and clinical

correlations; anatomical knowledge through lectures, small group work, and independent activities.

MED:8121 Clinical and Professional Skills I: introduction to concepts of clinical reasoning, communication, physical examination, and evidence-based clinical practice; principles of biomedical ethics; early clinical interactions and placement of classroom experiences into the context of patient care through the Early Clinical Experiences (ECE) program; interactions with students from other health sciences colleges to explore the interprofessional approach to caring for patients.

MED:8122 Medicine and Society I: delivery of individual disease prevention/health promotion services; introduction to social determinants of health; influence and impact of culture and community on health care; community resources; students apply health and risk assessment to individual patients and to themselves.

MED:8123 Foundations of Cellular Life: genetics, embryology, molecular biology, biochemistry, cell biology and histology; molecular events required for cellular life; how cells grow and interact to form basic tissues of the human body; framework necessary for exploring the mechanisms of health and disease.

MED:8124 Mechanisms of Health and Disease I: normal and healthy processes within and among mechanisms of oxygenation, metabolism, and genetics/development.

### Second Semester

MED:8131 Clinical and Professional Skills II: reinforcement of clinical reasoning concepts introduced in MED:8121 and introduction of additional concepts; application of concepts through interactions with standardized patients and through clinical visits; varied experiences help students gain a deeper appreciation for issues in biomedical ethics; strengths and barriers involved in providing comprehensive interdisciplinary patient care.

MED:8132 Medicine and Society II: knowledge and skills related to health promotion and disease prevention from a medicine and society perspective, including impact of behavior, environment, culture, and socioeconomic; identification of major public health problems associated with mechanisms of health and disease; focus on public health and epidemiology, with attention to screening, global health, and environmental hazards.

MED:8133 Mechanisms of Health and Disease II: normal and healthy processes within and among mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

MED:8134 Mechanisms of Health and Disease III: abnormalities or disruptions leading to disease within and among mechanisms of oxygenation, metabolism, and genetics/development.

### Third Semester

MED:8221 Clinical and Professional Skills III: advanced clinical reasoning skills gained through focused patient encounters and interactions with special patient populations; emphasis on students' ability to integrate and use concepts from the M.D. curricular strands that are required for cost-conscious, patient-centered, interdisciplinary care.

MED:8222 Medicine and Society III: health services organization and delivery, with emphasis on community dimensions of medical practice and patient safety.

MED:8223 Mechanisms of Health and Disease IV: abnormalities or disruptions leading to disease within and among mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

MED:8224 Mechanisms of Health and Disease Keystone: transition from classroom instruction in MED:8124, MED:8133, MED:8134, and MED:8223 to clinical practice; foundational information from those courses approached from the perspective of common clinic encounters; diagnostic and management decisions about common important clinical problems using the foundational knowledge gained from those courses.

## Clinical Curriculum (Phase II and III)

Students complete one week of skills training in MED:8320 Transition to Clerkships prior to the start of clinical clerkships. The two-and-a-half year clinical component of the medical curriculum is comprised of supervised hands-on clinical training at the bedside on in-patient units, in outpatient clinics, and in communities throughout the state. In contrast to the preclinical semesters, the clinical years vary according to a student's individual needs. This period of training begins in January of the second year with 44 weeks of core clerkships (Phase II). Students then enter various pathways where they complete a minimum of 10 weeks of selectives, four weeks of emergency or critical medicine, one four-week subinternship, and 32 weeks of advanced electives (Phase III).

After completing the core clerkships, students must successfully complete Step 1 of the United States Medical Licensing Examination (USMLE) before they may be promoted to the pathways component of the curriculum. Students take Step 2 of the USMLE during their fourth year of the M.D. program, and must pass the exam in order to graduate.

Primary venues for clinical training of medical students include University of Iowa Hospitals & Clinics, the Iowa City VA Health Care System, and the Des Moines Area Medical Education Consortium. Students also participate in the family practice preceptorship and the community-based primary care clerkship, which are off-campus rotations. Other courses also may be assigned to off-campus sites.

The M.D. program's clinical curriculum requires the following clerkships and selectives.

### Generalist Core (Phase II)

M.D. students complete the generalist core during the fourth and fifth semesters. It consists of the following 42-44 weeks of clerkships.

Code	Title	Hours
<b>Ambulatory Practice Module</b>		
FAM:8302	Family and Community Medicine (6 weeks)	6
IM:8302	Outpatient Internal Medicine (4 weeks)	4
<b>Internal Medicine/Pediatrics Block</b>		
IM:8301	Inpatient Internal Medicine (6 weeks)	6
PEDS:8301	Clinical Pediatrics (6 weeks)	6
<b>Obstetrics and Gynecology/Surgery Block</b>		
OBG:8301	Clinical Obstetrics and Gynecology (6 weeks)	6
SURG:8301	Clinical Surgery (6 weeks)	6
<b>Neurology/Psychiatry Block</b>		

NEUR:8301	Clinical Neurology (4 weeks)	4
PSYC:8301	Clinical Psychiatry (4 weeks)	4

### Selectives

M.D. students complete 10 weeks of selectives chosen from the following.

Code	Title	Hours
ANES:8301	Clinical Anesthesia (2 weeks)	2
DERM:8301	Clinical Dermatology (2 weeks)	2
OPHT:8301	Clinical Ophthalmology (2 weeks)	2
ORTH:8301	Clinical Orthopedics (2 weeks)	2
OTO:8301	Clinical Otolaryngology (2 weeks)	2
RAD:8301	Clinical Radiology (2 weeks)	2
URO:8301	Clinical Urology (2 weeks)	2

### Advanced Required Clerkships (Phase III)

M.D. students complete the following required clerkships and other work during the three advanced clinical-year semesters. In addition to the clerkships, students complete training modules in advanced clinical topics that include MED:8470 Self-Directed Learning in Advanced Clinical Topics. They also are required to complete the Advanced Objective Structured Clinical Examination (OSCE), administered by the college in a student's final semester.

Code	Title	Hours
Critical care medicine (4 weeks)		
Advanced inpatient subinternship (4 weeks)		
Advanced electives (total of 32 weeks)		

## Requirements for Students Completing Phase II Core, Spring 2022

### Preclinical Curriculum (Phase I)

The first three semesters of the M.D. program present an integrated core of sciences basic to the study of medicine. They also introduce students to the foundations of clinical practice.

Coursework includes human anatomy, foundations of cellular life, clinical and professional skills (a three-course series), medicine and society (a three-course series), and mechanisms of health and disease (a five-course series). Each of these courses is described below.

Some elective courses are available to students during the first and second years, normally for 1 or 2 s.h. of credit. Topics include areas not specifically covered in the regular curriculum and areas related to medical practice and the role of the physician. Courses vary from year to year, but typical subject areas are global health issues, U.S. health care systems, and community health outreach.

The M.D. program's preclinical curriculum requires the following coursework.

### First Semester

ACB:8101 Medical Gross Human Anatomy: complete dissection of the body with regional emphasis stressing

relationships to the living system; clinically relevant areas of radiologic imaging, surface anatomy, embryology, and clinical correlations; anatomical knowledge through lectures, small group work, and independent activities.

MED:8121 Clinical and Professional Skills I: introduction to concepts of clinical reasoning, communication, physical examination, and evidence-based clinical practice; principles of biomedical ethics; early clinical interactions and placement of classroom experiences into the context of patient care through the Early Clinical Experiences (ECE) program; interactions with students from other health sciences colleges to explore the interprofessional approach to caring for patients.

MED:8122 Medicine and Society I: delivery of individual disease prevention/health promotion services; introduction to social determinants of health; influence and impact of culture and community on health care; community resources; students apply health and risk assessment to individual patients and to themselves.

MED:8123 Foundations of Cellular Life: genetics, embryology, molecular biology, biochemistry, cell biology and histology; molecular events required for cellular life; how cells grow and interact to form basic tissues of the human body; framework necessary for exploring the mechanisms of health and disease.

MED:8124 Mechanisms of Health and Disease I: normal and healthy processes within and among mechanisms of oxygenation, metabolism, and genetics/development.

## Second Semester

MED:8131 Clinical and Professional Skills II: reinforcement of clinical reasoning concepts introduced in MED:8121 and introduction of additional concepts; application of concepts through interactions with standardized patients and through clinical visits; varied experiences help students gain a deeper appreciation for issues in biomedical ethics; strengths and barriers involved in providing comprehensive interdisciplinary patient care.

MED:8132 Medicine and Society II: knowledge and skills related to health promotion and disease prevention from a medicine and society perspective, including impact of behavior, environment, culture, and socioeconomic; identification of major public health problems associated with mechanisms of health and disease; focus on public health and epidemiology, with attention to screening, global health, and environmental hazards.

MED:8133 Mechanisms of Health and Disease II : normal and healthy processes within and among mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

MED:8134 Mechanisms of Health and Disease III: abnormalities or disruptions leading to disease within and among mechanisms of oxygenation, metabolism, and genetics/development.

## Third Semester

MED:8221 Clinical and Professional Skills III: advanced clinical reasoning skills gained through focused patient encounters and interactions with special patient populations; emphasis on students' ability to integrate and use concepts from the M.D. curricular strands that are required for cost-conscious, patient-centered, interdisciplinary care.

MED:8222 Medicine and Society III: health services organization and delivery, with emphasis on community dimensions of medical practice and patient safety.

MED:8223 Mechanisms of Health and Disease IV: abnormalities or disruptions leading to disease within and among mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

MED:8224 Mechanisms of Health and Disease Keystone: transition from classroom instruction in MED:8124, MED:8133, MED:8134, and MED:8223 to clinical practice; foundational information from those courses approached from the perspective of common clinic encounters; diagnostic and management decisions about common important clinical problems using the foundational knowledge gained from those courses.

## Clinical Curriculum (Phase II and III)

Students complete one week of skills training in MED:8320 Transition to Clerkships prior to the start of clinical clerkships. The two-and-a-half year clinical component of the medical curriculum is comprised of supervised hands-on clinical training at the bedside on in-patient units, in outpatient clinics, and in communities throughout the state. In contrast to the preclinical semesters, the clinical years vary according to a student's individual needs. This period of training begins in January of the second year with 44 weeks of core clerkships (Phase II). Students then enter various pathways where they complete a minimum of 10 weeks of selectives, four weeks of critical medicine, one four-week subinternship, and 32 weeks of advanced electives (Phase III).

After completing the core clerkships, students must successfully complete Step 1 of the United States Medical Licensing Examination (USMLE) before they may be promoted to the pathways component of the curriculum. Students take Step 2 of the USMLE during their fourth year of the M.D. program, and must pass both Step 2 exams in order to graduate.

Primary venues for clinical training of medical students include University of Iowa Hospitals & Clinics, the VA Iowa City Health Care, and the Des Moines Area Medical Education Consortium. Students also participate in the family and community medicine clerkship, which is an off-campus rotation. Other courses also may be assigned to off-campus sites.

The M.D. program's clinical curriculum requires the following clerkships and selectives.

## Generalist Core (Phase II)

M.D. students complete the generalist core during the fourth and fifth semesters. It consists of the following 42-44 weeks of clerkships.

Code	Title	Hours
<b>Internal Medicine Block</b>		
IM:8310	Internal Medicine (10 weeks)	10
<b>Family Medicine/Pediatrics Block</b>		
FAM:8302	Family and Community Medicine (6 weeks)	6
PEDS:8301	Clinical Pediatrics (6 weeks)	6
<b>Obstetrics and Gynecology/Surgery Block</b>		
OBG:8301	Clinical Obstetrics and Gynecology (6 weeks)	6
SURG:8301	Clinical Surgery (6 weeks)	6

**Neurology/Psychiatry/Emergency Medicine Block**

EM:8301	Core Emergency Medicine (2 weeks)	2
NEUR:8301	Clinical Neurology (4 weeks)	4
PSYC:8301	Clinical Psychiatry (4 weeks)	4

**Selectives**

M.D. students complete 10 weeks of selectives chosen from the following.

Code	Title	Hours
ANES:8301	Clinical Anesthesia (2 weeks)	2
DERM:8301	Clinical Dermatology (2 weeks)	2
OPHT:8301	Clinical Ophthalmology (2 weeks)	2
ORTH:8301	Clinical Orthopedics (2 weeks)	2
OTO:8301	Clinical Otolaryngology (2 weeks)	2
RAD:8301	Clinical Radiology (2 weeks)	2
URO:8301	Clinical Urology (2 weeks)	2

**Advanced Required Clerkships (Phase III)**

M.D. students complete the following required clerkships and other work during the three advanced clinical-year semesters. In addition to the clerkships, students complete training modules in advanced clinical topics that include MED:8470 Self-Directed Learning in Advanced Clinical Topics. They also are required to complete the Advanced Objective Structured Clinical Examination (OSCE), administered by the college in a student's final semester.

Code	Title	Hours
	Critical care medicine (4 weeks)	
	Advanced inpatient subinternship (4 weeks)	
	Advanced electives (total of 32 weeks)	

**Combined Programs**

Students must be admitted to both of the individual degree programs before they may be admitted to a combined degree program. Those interested in the combined programs must make arrangements with the appropriate departments and with the Carver College of Medicine associate dean for student affairs and curriculum.

**M.D./J.D.**

The Carver College of Medicine and the College of Law offer the combined Doctor of Medicine/Juris Doctor program; see Juris Doctor, J.D. [p. 1707] in the Catalog.

**M.D./M.B.A. (Professional Program)**

The College of Medicine collaborates with the Tippie College of Business to offer the combined Doctor of Medicine/Professional Master of Business Administration Program. For more information about the M.B.A., see the M.B.A. Professional Program in the Master of Business Administration, M.B.A. [p. 1251] section of the Catalog.

**M.D./M.P.H.**

The College of Medicine collaborates with the College of Public Health to offer the combined Doctor of Medicine/Master of Public Health program; see the Master of Public Health, M.P.H. [p. 1956] in the Catalog.

**M.D./Ph.D. (Medical Scientist Training Program)**

The Carver College of Medicine offers a combined M.D./Ph.D. program for students who are interested in a career that combines clinical and academic medicine with basic and clinical research; see the Medical Scientist Training Program [p. 1772] in the Catalog.

**Admission**

The Carver College of Medicine participates in the American Medical College Application Service (AMCAS), a nonprofit centralized application processing service for applicants to U.S. medical schools. AMCAS applications are available for completion in May of the year preceding the beginning of the class for which application is being made. Prospective students are urged to apply as early as possible. The deadline for AMCAS submission is November 1.

Secondary applications are forwarded to applicants whose AMCAS applications pass a review conducted by the college.

Admitted applicants must have an official transcript from each college they have attended sent to the University's Office of Admissions.

**Technical Standards for Admission and Retention**

The College of Medicine seeks candidates who will be able to best serve the needs of society and strives to graduate skilled and effective physicians. To achieve this goal, the following principles and technical standards will be applied to candidates for admission and continuing students. Review the current Technical Standards on the Carver College of Medicine Admissions website.

**Admission Requirements**

Applicants for admission to the Carver College of Medicine must have a bachelor's degree, or they must be enrolled in a bachelor's degree program with the expectation of receiving their degree before enrolling in the Carver College of Medicine. Applicants should refer to the Carver College of Medicine Admissions website for current admission requirements.

All students who enter the Carver College of Medicine are required to comply with the pre-entrance and annual health screening program developed by the University of Iowa Student Health in cooperation with University of Iowa Hospitals & Clinics; see Student Requirements and Forms on the Student Health website.

All registered Carver College of Medicine students are required to maintain health insurance (or an equivalent care plan) that satisfies minimum standards of coverage. Insurance coverage must be maintained continuously throughout each year of attendance at the University.

## Financial Support

The Carver College of Medicine's philosophy is that no student should be denied a medical education due to a lack of financial resources. The college's financial services staff actively seeks sources of aid so that every student interested in a medical education will be able to finance that education.

Financial assistance is provided by the Carver College of Medicine primarily on the basis of demonstrated financial need. Although a limited number of collegiate or institutional grants are available for the most economically disadvantaged students, most aid is in the form of loans. Examples of federal loan programs are the Federal Direct Unsubsidized Stafford/Ford Student Loan, the Federal Direct Grad PLUS loan, and the Primary Care Loan (PCL). Students also may qualify for collegiate loans or private loans to supplement their financial aid package.

In addition, the college supports scholarship and loan programs through permanent endowments and/or contributions from alumni and friends of the Carver College of Medicine. These funds are administered by the college's financial services staff and are awarded as a part of a student's total financial aid package. Funds to support short-term emergency loans are available for students with immediate financial need.

A small number of Dean's Scholarships are awarded by the college's admissions office to highly qualified candidates on the basis of their academic excellence, leadership abilities, and their potential to enrich the college. Dean's Scholarships are included in the recipient's overall financial aid package. About 15 percent of students enrolled in each class receive some level of Dean's Scholarship.

The Carver College of Medicine has a fully integrated Financial Literacy Program, CCOMmon Cents, which provides medical students the knowledge, tools, and resources to better understand the financial aid process, to manage their student loans more effectively, to make better informed decisions, and to encourage students to minimize their educational debt whenever possible. This program also strives to help students reach their personal financial goals while pursuing their medical education.

To learn more about financial aid, contact the Carver College of Medicine Financial Services office.

## Career Advancement

An interest in science, the healing arts, helping people, and medical research can lead to a great number of satisfying careers. For information about career options in health care, review the Road to Becoming a Physician on the College of Medicine website and the Occupational Outlook Handbook on the United States Department of Labor Bureau of Labor Statistics website.

# Emergency Medicine

## Chair

- Andrew Nugent

**Faculty:** <https://medicine.uiowa.edu/emergencymedicine/profile>

**Website:** <https://medicine.uiowa.edu/emergencymedicine/>

The Department of Emergency Medicine prepares new physicians to recognize and treat a variety of urgent and emergent conditions. The program fosters basic science and clinical research relevant to emergency medicine and is dedicated to the education and training of Emergency Medical Services (EMS) personnel through the Emergency Medical Services Learning Resources Center (EMSLRC).

## Research

Research in the department is built on four research pillars: clinical, injury prevention, medical education, and health systems. Faculty members, graduate students, emergency medicine residents, medical students, and undergraduates are involved in research in a variety of projects and programs. Specific research interests include:

- rural regionalization and telemedicine;
- quality of care, efficiency, and cost effectiveness of interhospital transport;
- prevention, diagnosis, and care of traumatic brain injury;
- off-road injury prevention;
- highway motor vehicle crash scene analysis;
- safe driving advocacy;
- simulation in medical education;
- improving access and quality of emergency care;
- decision-making processes for optimal drug selection in the emergency department;
- addiction medicine and harm reduction;
- toxicology;
- global health care access;
- interpersonal violence; and
- early risk stratification and prophylaxis in critical illness.

## Patient Care

The Department of Emergency Medicine at University of Iowa Hospitals & Clinics and University of Iowa Stead Family Children's Hospital provides care for the most critically ill adults and children in a patient- and family-centered atmosphere. The department handles emergency cases in Iowa and from surrounding states.

## Resources

The Emergency Department, located on the first floor of Roy J. Carver Pavilion, is a Level I Adult and Pediatric Trauma Center. It serves as a referral center for communities across Iowa.

## M.D. Training

Elective rotations for Doctor of Medicine students are available at University of Iowa Hospitals & Clinics and at several other sites throughout Iowa, including St. Luke's Hospital, Cedar Rapids; Great River Health, Burlington; MercyOne Waterloo Medical Center, Waterloo; Broadlawns Medical Center, Des Moines; UnityPoint Health, Des Moines;

and Genesis Health Group, Davenport. Students also may arrange an off-service elective independently with established residency programs throughout the United States.

The program offers an annual introductory month to emergency medicine; advanced life support; Wilderness Medicine, a rotation that includes scenario and didactic training in wilderness medicinal skills with travel to areas such as Colorado; and a two- or four-week toxicology elective.

## Residency

The emergency medicine faculty directs the Emergency Medicine Residency, Iowa's only emergency medicine residency. The residency is a three-year program that prepares residents for careers in diverse areas of emergency medicine, from rural practice to academics. The program emphasizes critical care training and rotations in a wide variety of specialties. Part of the clinical component is spent at St. Luke's Hospital, Cedar Rapids.

## Courses

### Emergency Medicine Courses

#### **EM:8301 Core Emergency Medicine** **2 s.h.**

Participation in direct patient care as part of a care team during emergency medicine clinical shifts; opportunity to perform supervised bedside procedures and call consults. Requirements: M.D. enrollment.

#### **EM:8401 Advanced Life Support** **4 s.h.**

Experience managing acute threats to life—including trauma, respiratory failure, poisoning, sepsis, stupor/coma, and acute myocardial infarction (MI)—using Advanced Cardiovascular Life Support (ACLS) and Pediatric Advanced Life Support (PALS) courses and clinical manikin work with EMS staff. Requirements: completion of M.D. core clerkship year.

#### **EM:8402 Emergency Medicine UIHC** **arr.**

Preceptorship with residents and faculty; emphasis on principles of acute medicine; clinical shifts, case conferences, simulations, exams.

#### **EM:8403 Wilderness Medicine** **4 s.h.**

Didactic and scenario training in physiology, diagnosis, and emergency treatment of heat- and cold-related illnesses, high altitude disorders, wilderness trauma, envenomations, and immersion injuries. Taught in wilderness areas. Requirements: completion of M.D. third year.

#### **EM:8404 Emergency Medicine: St. Luke's, Cedar Rapids** **4 s.h.**

Preceptorship with full-time emergency department physicians; clinical shifts, case conferences, simulations, exams.

#### **EM:8405 Rural Emergency Medicine at Burlington, Iowa** **4 s.h.**

In-depth clinical experience in a busy rural hospital emergency department under supervision of residency-trained emergency physicians; lectures, skill labs, projects.

#### **EM:8406 Emergency Medicine Des Moines** **4 s.h.**

Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Broadlawns Hospital, Des Moines.

#### **EM:8407 Emergency Medicine Waterloo** **4 s.h.**

Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Covenant Medical Center, Waterloo.

**EM:8409 Introduction to Advanced Life Support 2 s.h.**

Intensive program providing basic training in life support skills, experience in procedures common to inpatient hospital environment, and practice with simulated critical care scenarios; lectures, small group discussions, procedure labs, high-fidelity simulations, and self-directed online learning; students become certified in Advanced Cardiac Life Support (ACLS).

**EM:8410 Medical Toxicology Sioux City 2,4 s.h.**

Clerkship at the Iowa Poison Control Center; intense introduction to breadth and depth of medical toxicology; students work independently and concentrate on many different areas and interests; work with a multidisciplinary team of nurses, pharmacists, and physicians; activities may include reviewing and presenting active poisoned patient cases during daily rounds and opportunities to see toxicology patients at bedside; preparation and short presentation in any area of medical toxicology. Requirements: M.D. enrollment.

**EM:8411 Medical Toxicology UIHC 2,4 s.h.**

In-depth introduction to medical toxicology; how to recognize and treat various toxidromes and the most common toxicologic exposures; initial management steps for life-threatening toxicologic exposures; focus on basics of pathophysiology and pharmacology to understand how drugs affect patients, and critical assessment of laboratory and other data obtained on the poisoned patient.

**EM:8412 Emergency Medicine Unity Point Des Moines 4 s.h.**

Clinical shifts in emergency department and emergency medicine related didactics; advanced cardiovascular life support (ACLS), airway management, calling a consult/communication, chest pain, toxicology, trauma, sepsis, ultrasound, febrile infant, headache, and psychobehavioral disorders.

**EM:8413 Emergency Medicine Genesis Davenport 4 s.h.**

Clinical shifts in emergency department and emergency medicine related didactics; advanced cardiovascular life support (ACLS), airway management, calling a consult/communication, chest pain, toxicology, trauma, sepsis, ultrasound, febrile infant, headache, and psychobehavioral disorders.

**EM:8497 Research in Emergency Medicine arr.**

Medical research, clinical or laboratory projects; individual study.

**EM:8498 Emergency Medicine On Campus arr.**

Clinical research experience with a mentor in the Emergency Treatment Center and the Department of Emergency Medicine; principles of design, methodology, basic statistics.

**EM:8499 Emergency Medicine Off Campus arr.**

Preceptorship with residents and faculty; emphasis on principles of acute medicine; Liaison Committee on Medical Education (LCME) accredited off-campus site. Requirements: completion of M.D. third year and approval from UIHC Emergency Medicine clerkship director.

# Family Medicine

## Chair

- Jeffrey D. Quinlan

**Faculty:** <https://medicine.uiowa.edu/familymedicine/people/>

**Website:** <https://medicine.uiowa.edu/familymedicine/>

The Department of Family Medicine is nationally recognized for excellence in patient care, teaching, and research. The department is dedicated to providing primary care for the citizens of Iowa, educating medical students, training resident physicians, providing continuing education, and creating new knowledge to improve primary care and health care delivery systems.

## M.D. Training

The Department of Family Medicine trains primary care physicians. The department offers coursework that is included throughout the four-year M.D. program. Twenty-one elective senior rotations give students opportunities for exposure to various Iowa communities through work in affiliated hospitals or connected facilities, in the department's model office on the University of Iowa campus, and in preceptorships with selected family physicians throughout the state. Students also have the opportunity for independent study during the fourth year.

## Residency

### Family Medicine Residency

The Department of Family Medicine directs a three-year residency program whose graduates are eligible for certification by the American Board of Family Medicine. The residency program trains physicians to provide continuous and comprehensive medical care to patients and their families. Residents are educated in all areas of family medicine—adult medicine, maternal and child health, behavioral science, surgical specialties, and community medicine. Training emphasizes the value of wellness and preventive medicine as well as curative medicine.

The program is organized as a progressive educational experience. It consists of formal teaching and clinical experiences on assigned rotations, structured conferences, and patient care in the Family Medicine Clinic. As residents develop clinical skills, medical judgment, and competence, their patient responsibilities increase. Some patients at the Family Medicine Clinic are assigned to residents, who provide medical care under faculty supervision. Residents are responsible for their patients for the duration of the residency program.

Residents also learn the principles of practice management, including organizational and administrative decision making, patient record and bookkeeping procedures, and chart auditing methodologies.

Residents are expected to take responsibility for their learning environment, to avail themselves of the department's diverse resources, and to collaborate with the faculty in order to have the best possible learning experience.

## Family Medicine-Psychiatry Residency

The Department of Family Medicine and the Department of Psychiatry cosponsor the combined Family Medicine-Psychiatry Residency program. The program's residents acquire broad-based training in both disciplines, including focused training in geriatrics and geriatric psychiatry, substance and alcohol abuse, diagnosis and treatment of depression, delirium, eating disorders, panic disorders, and neurotic and somatizing behavior. Graduates are eligible for certification by the American Board of Family Medicine and the American Board of Psychiatry and Neurology.

## Facilities

The Department of Family Medicine is located on the University of Iowa health sciences campus. Faculty offices are close to the Family Medicine Clinic, where patients are seen by appointment. The department also has community-based clinics in southeast Iowa City, Coralville, Muscatine, North Liberty, and Riverside, Iowa.

## Courses

### Family Medicine Courses

**FAM:8005 Medical Education Community Orientation** **0 s.h.**

Experience in a local health care delivery system away from the University setting, between first and second year of M.D. program.

**FAM:8301 Preceptorship in Family Medicine** **arr.**

One-on-one experience with a practicing physician; exposure to illnesses, conditions often seen in primary care; realistic background for evaluation of family medicine as a career alternative.

**FAM:8302 Family and Community Medicine** **6 s.h.**

One-on-one experience with a practicing physician; exposure to illnesses and conditions often seen in primary care; realistic background for evaluation of family medicine as a career alternative; clinical activities, work with community agencies and resources; didactic and conferences.

**FAM:8401 Advanced Inpatient Subinternship in Family Medicine, University of Iowa** **arr.**

Inpatient aspects of family medicine's key components; experience on the family medicine inpatient service.

**FAM:8402 University of Iowa Family Medicine Clerkship** **2,4 s.h.**

Work with family practice residents and staff in day-to-day delivery of primary medical care at Family Practice Center; experience in the Family Stress Clinic observing family-centered counseling; nursing home visits, work with departmental social worker and sports medicine specialist.

**FAM:8403 Advanced Preceptorship in Family Medicine** **2,4 s.h.**

Experience in community practice of family medicine.

**FAM:8405 Geriatrics Elective** **arr.**

Experience in monitoring and evaluating health and functional status of patients age 65 and older in the UI Geriatric Assessment Clinic and community settings.

**FAM:8406 Advanced Inpatient Subinternship in Family Medicine, Cedar Rapids 4 s.h.**

Experience as a junior resident in all areas of inpatient family medicine, including maternity care, child and adolescent health, adult medicine.

**FAM:8407 Clerkship in Family Medicine, Cedar Rapids 4 s.h.**

Experience as a junior resident in all areas of family medicine, including maternity care, child and adolescent health, adult medicine.

**FAM:8408 Family Medicine Clerkship, Broadlawns Hospital, Des Moines Family Health Center 4 s.h.**

Clinical experience in inpatient and outpatient care.

**FAM:8409 Advanced Inpatient Subinternship in Family Medicine, Iowa Lutheran 4 s.h.**

Patient-oriented interactive experience in an inpatient family practice environment. Requirements: fourth-year M.D. enrollment.

**FAM:8410 Family Medicine, Iowa Lutheran arr.**

Requirements: fourth-year M.D. enrollment.

**FAM:8411 Family Medicine Clerkship, Davenport 4 s.h.**

Assignment to problems commonly seen in family practice office; supervision by residents and faculty for history and physical evaluation and diagnostic workups and treatment of each specific problem; exposure to acutely ill patients in services of medicine, surgery, obstetrics, pediatrics.

**FAM:8412 Advanced Inpatient Subinternship in Family Medicine, Davenport 4 s.h.**

Experience in inpatient family medicine; assessing and managing hospitalized patients, evaluating and treating patients in the emergency room, participating in call coverage with family medicine residents.

**FAM:8413 Family Medicine Geriatrics, Davenport 4 s.h.**

Geriatric, palliative, and end-of-life care issues; assessment of competency in evaluation and management of patients; interdisciplinary nature of geriatric and palliative care.

**FAM:8415 Advanced Inpatient Subinternship in Family Medicine, Sioux City 4 s.h.**

Experience as a junior resident in all areas of family medicine. Requirements: fourth-year M.D. enrollment.

**FAM:8416 Family Medicine Clerkship, Sioux City 2,4 s.h.**

Methods common in family practice medicine; participation in care of patients seen by family practice physicians and residents.

**FAM:8417 Advanced Inpatient Subinternship in Family Medicine, Waterloo 4 s.h.**

Experience working as a member of family practice inpatient team at Allen Memorial Hospital and Covenant Medical Center, following patients from admission through discharge.

**FAM:8418 Family Medicine Clerkship, Waterloo 4 s.h.**

Rotation at the Northeast Iowa Family Practice Center; work with patients from outpatient care through hospitalization; basic concepts of family practice, team concept in medical care.

**FAM:8419 River Crossing Family Medicine Clerkship 2,4 s.h.**

Experience providing patient care in a rural setting; continuity of care for patients of all ages. Requirements: fourth-year M.D. enrollment.

**FAM:8420 Family Medicine, Mason City 2,4 s.h.**

Work with family physicians on staff at Mercy or other affiliated community hospitals; management of all patients admitted by the family physicians, participation in care rendered by consultants; primary care experience in family practice office.

**FAM:8421 Primary Care Sports Medicine 4 s.h.**

Comprehensive, diverse, and educational experience in the field of sports medicine; clinical competence to diagnose and manage medical illnesses and injuries related to sports and exercise in varied patients, recreational and organized athletes, and teams. Requirements: M.D. enrollment.

**FAM:8422 Family Medicine/Psychiatry Elective 2,4 s.h.**

Integration of mental and physical health care across outpatient family medicine and outpatient psychiatry arenas. Requirements: M.D. enrollment.

**FAM:8423 Family Medicine, Ames Student Health 4 s.h.**

Primary care of late adolescent and young adult patients in a student health center setting; students work with family medicine and mental health providers to address health care needs of this population.

**FAM:8424 Family Caregiving Transitions arr.**

Students enhance clinical learning from caregiving experiences and increase empathy and patient communication skills; students also enhance personal understanding of, and growth through, caregiving responsibilities in periods of family health transitions.

**FAM:8425 Advanced Inpatient Subinternship in Rural Family Medicine, Algona 4 s.h.**

Rural hospital-based subinternship; students provide family medicine service alongside board-certified family physician faculty, performing all admissions on weekdays, rounding on hospitalized patients each day, and call responsibilities including deliveries and ER coverage.

**FAM:8426 Disease Registry Management 4 s.h.**

Use of electronic medical record-based disease registries to investigate care, identify areas for improvement, and optimize management of chronic disease at individual and/or population level.

**FAM:8427 Maternity Care 4 s.h.**

Experience in triaging of pregnant patients; students provide usual intrapartum and postpartum care, manage common intrapartum and postpartum complications, and provide care to newborn infants, healthy and ill. Requirements: M.D. enrollment.

**FAM:8450 Continuity of Care - Family Medicine 4 s.h.**

Longitudinal continuity of care experience for fourth-year M.D. students in an outpatient family medicine setting.

**FAM:8496 Independent Studies arr.**

Work with departmental researcher on investigation in family medicine, community medicine, health care delivery, health maintenance, and other areas.

**FAM:8497 Research in Family Medicine arr.**

Medical research, clinical or laboratory projects; individual study.

**FAM:8498 Family Medicine On Campus arr.**

Clinical clerkship; individually arranged by student with departmental approval.

**FAM:8499 Family Medicine Off Campus arr.**

Clerkships; may include community hospitals.

# Free Radical and Radiation Biology

## Director

- Douglas R. Spitz (Radiation Oncology/Pathology)

**Faculty:** <https://frrbp.medicine.uiowa.edu/faculty-and-staff>

**Website:** <https://frrbp.medicine.uiowa.edu/>

The Free Radical and Radiation Biology Program provides in-depth training and research experience in the physical, chemical, and biological effects of radiation. It also focuses on the metabolic production of free radicals and their role in biology and medicine.

Free radicals are of interest to researchers and clinicians due to their role in a variety of diseases and pathological states, including degenerative diseases of aging and cancer. Manipulation of free radical reactions and redox biology holds great promise for the future development of new therapies for a variety of human diseases. The Free Radical and Radiation Biology Program stresses the importance of these areas of research to basic science, translational research, and public health.

## Undergraduate Education

Three courses offered by the Free Radical and Radiation Biology Program are open to University of Iowa undergraduate students: FRRB:3130 Radiation Safety and Radiobiology; FRRB:4000 Special Topics: Advanced Undergraduates; and with instructor approval, FRRB:5000 Radiation Biology. Students looking for an overview of the biological effects of radiation, including the role of free radicals, will find FRRB:5000 especially appropriate.

## Graduate Education

See Carver College of Medicine [p. 1715] and Graduate [p. 1586] College in the Catalog for general information about study in medicine and graduate study at the University.

## Postgraduate Training

Postdoctoral training is available by arrangement with the program's director and individual faculty members. Contact the Free Radical and Radiation Biology Program.

## Programs

### Graduate Programs of Study

#### Majors

- Master of Science in Free Radical and Radiation Biology
- Doctor of Philosophy in Free Radical and Radiation Biology

Students interested in doctoral studies in free radical and radiation biology should apply under the umbrella program in Biomedical Science [p. 1599] (select free radical and radiation biology subprogram). Direct applications to the M.S. and Ph.D. in free radical and radiation biology are not currently being considered.

## Facilities

The Free Radical and Radiation Biology Program is the home of the Radiation and Free Radical Research Core Lab (RFRRRC).

The lab operates radiation sources including an Xstrahl Small Animal Radiation Research Platform (SARRP) and a 5,000-Curie Cs-137 irradiator (Ionizing Radiation Services). Students and staff have access to additional core lab support through RFRRRC, with services and expertise related to analytical chemistry (Electron Paramagnetic Resonance services) and redox biology, biochemistry (Antioxidant Enzyme Services), and linear accelerators in the Department of Radiation Oncology.

The program has a number of radiation detectors and counters, including liquid scintillation counters. It also has ultraviolet/visible spectrophotometers; various types of equipment for densitometry, chromatography, and electrophoresis; modern tissue culture facilities; Seahorse metabolic profiling instruments; molecular biology equipment, including thermal cyclers; an automatic cell counter and particle sizer; tissue culture facilities; Typhoon phosphorimager; high performance liquid chromatography (HPLC); electron spin resonance spectrometers; and nitric oxide analyzers. Visit Research Core on the program's website to learn more.

## Courses

### Free Radical and Radiation Biology Courses

**FRRB:3110 Medical Physics I** **1-3 s.h.**

Introduction to radiation used in clinical setting; fundamental physical units, measurements, principles, atomic structure and types of radiation; X-ray generating equipment, X-ray production, and its interaction with matter. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program, and maxillofacial or radiation oncology resident. Same as RSTH:3110.

**FRRB:3130 Radiation Safety and Radiobiology** **2 s.h.**

Instruction on safe operation of radiation producing equipment and handling of radioactive materials; origin and/or derivation of certain formulae and techniques useful in radiation protection programs; regulatory agencies, regulations, and regulatory guides pertinent to student's field; emphasis on applied aspects of radiation protection; characteristics and biological effects of ionizing radiations, properties and uses of radioisotopes, medical applications, and biological basis for protection procedures. Requirements: enrollment in radiation sciences or nuclear medicine technology program. Same as RSP:3130.

**FRRB:3215 Medical Physics II** **0-3 s.h.**

Treatment units used in external radiation therapy; beam calculations, isodose distributions, brachytherapy, quality assurance and quality management, protection and safety. Prerequisites: RSTH:3110. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program. Same as RSTH:3215.

**FRRB:4000 Special Topics: Advanced Undergraduates** **arr.**

Readings and/or laboratory experience. Offered fall semesters.

**FRRB:5000 Radiation Biology 4 s.h.**

Comprehensive study of molecular and biological effects of ionizing radiations with emphasis on biomedical therapeutic applications; mammalian radiobiology, contribution of metabolism to radiation effects, and therapeutic applications of radiation in cancer therapy. Offered spring semesters of odd years. Prerequisites: CHEM:2210 and BIOC:3120. Requirements: college-level physics.

**FRRB:5001 Research: Special Topics arr.****FRRB:5005 Rigor and Reproducibility in Redox Biology 1 s.h.**

Experiments in redox biology are prone to artifact due to unwanted or unknown oxidations, misunderstanding of how laboratory tools work, assumptions by the investigator that do not hold, and more; faculty and students discuss common experimental approaches used in research in the field—their strengths, weakness, and current best approaches to avoid artifacts—and best approaches to present data to stand the test of time and are easily understood by readers.

**FRRB:6000 Seminar: Free Radical and Radiation Biology 1 s.h.**

Seminar presentations of cutting edge science in the field of free radical and radiation biology, given by experts in the field as well as trainees.

**FRRB:6004 Research: Free Radical and Radiation Biology arr.**

Representation of intensive laboratory-based studies in the field of free radical and radiation biology, determined by mutual agreement between faculty members sponsoring the research and consultation with graduate student.

**FRRB:6006 Topics in Free Radical Biology and Medicine 1 s.h.**

Discussion and presentation of new literature reports in the field of free radical biology and medicine in journal club format.

**FRRB:6008 Topics in Radiation and Cancer Biology 1 s.h.**

Emerging concepts in the biological effects of radiation and cancer biology; current topics in journal club format.

**FRRB:7000 Redox Biology and Medicine 4 s.h.**

Chemistry of free radicals, related oxidants, and antioxidants; antioxidant (redox) enzymes—their structure, biochemical function, regulation, and function in redox biology; targets of oxidants—lipids, proteins, DNA; redox biology of health (infants to healthy aging) and disease (cancer, cardiovascular disease, diabetes, neurodegenerative diseases). Offered spring semesters of even years. Prerequisites: BIOC:3120 or CHEM:2210.

**FRRB:7001 Molecular and Cellular Biology of Cancer 3 s.h.**

Fundamental aspects of oncology at cellular and molecular levels; mechanisms of cancer initiation and progression, oncogene action, DNA damage and repair, carcinogenesis by radiation, chemicals, viruses; tumor immunology, anticancer therapies. Offered spring semesters. Requirements: strong basic science background. Same as PATH:7001.

# Internal Medicine

## Chair

- Evan Dale Abel

**Faculty:** <https://medicine.uiowa.edu/internalmedicine/people/people>

**Website:** <https://medicine.uiowa.edu/internalmedicine/>

Internal medicine is concerned with the diagnosis, prevention, and treatment of diseases of adults. The Department of Internal Medicine's educational, patient care, and research activities cover all facets of the discipline, including general internal medicine and primary care as well as the specialized areas of allergy and immunology, cardiology, clinical pharmacology, endocrinology and metabolism, gastroenterology and hepatology, hematology, oncology, blood and marrow transplant, infectious diseases, nephrology, pulmonary, critical care, occupational medicine, and rheumatology.

The department is committed to the complete spectrum of medical education, from didactic and clinical education of M.D. students to resident and fellowship training.

View on YouTube

## M.D. Training

Department of Internal Medicine faculty members bear a major share of teaching medical and physician assistant students in the preclinical curriculum. During the first year, faculty members participate in MED:8121 Clinical and Professional Skills I and MED:8131 Clinical and Professional Skills II, as well as MED:8122 Medicine and Society I and MED:8132 Medicine and Society II. They also participate in teaching MED:8124 Mechanisms of Health and Disease I, MED:8133 Mechanisms of Health and Disease II, and MED:8134 Mechanisms of Health and Disease III. Departmental faculty members are key contributors in the third semester, instructing MED:8221 Clinical and Professional Skills III, MED:8222 Medicine and Society III, MED:8223 Mechanisms of Health and Disease IV, and keystone courses.

During the core clinical clerkship year, the department's faculty members instruct students for six weeks in IM:8301 Inpatient Internal Medicine and for four weeks in IM:8302 Outpatient Internal Medicine at University of Iowa Hospitals & Clinics, Iowa River Landing, and the VA Iowa City Health Care, or in hospitals of the Des Moines Area Medical Education Consortium. Students actively participate as members of an inpatient ward team and/or specialty consult services in IM:8301, and in IM:8302 they participate in the evaluation and management of patients at outpatient internal medicine clinics.

During their advanced clerkship students may select a clinical experience to fit their own career goals from courses offered in general medicine, subspecialties, intensive care, and a subinternship program IM:8401 Advanced Inpatient Subinternship in Internal Medicine.

## Residency

The department offers a three-year residency training program in internal medicine. In addition, most of the department's specialty divisions offer two- and three-year clinical and research fellowships, in which fellows develop special knowledge and skills relevant to their specialties.

Fellows who hold doctoral degrees may be accepted to programs whose major focus is laboratory research.

## Facilities

Teaching in the Department of Internal Medicine takes place in the medical services and laboratories of University of Iowa Hospitals & Clinics, Iowa River Landing, and the VA Iowa City Health Care, and in Des Moines at the VA Central Iowa Health Care and Iowa Methodist Medical Center.

## Courses

### Internal Medicine Courses

- IM:8301 Inpatient Internal Medicine** **arr.**  
Development of knowledge, diagnostic and management skills vital to care of hospitalized patients; clinical responsibilities, educational conferences, independent study.
- IM:8302 Outpatient Internal Medicine** **3-4 s.h.**  
Development of knowledge, diagnostic and management skills in the outpatient clinical setting; clinical activities, discussion of problems, independent study.
- IM:8310 Internal Medicine** **10 s.h.**  
Development of knowledge, diagnostic, and management skills of vital signs in outpatient and inpatient clinical settings; clinical responsibilities, discussion of problems, educational conferences, independent study. Requirements: M.D. enrollment.
- IM:8401 Advanced Inpatient Subinternship in Internal Medicine** **4 s.h.**  
Student responsibility for evaluating, treating, and following patients admitted to inpatient general medicine services. Requirements: fourth-year M.D. enrollment.
- IM:8410 Clinical Allergy Immunology** **arr.**  
Pathogenesis, diagnosis, and management of asthma and allergic and immunologic diseases; conducting and interpreting relevant specialized clinical and laboratory tests; emphasis on outpatients; formal and informal teaching sessions.
- IM:8412 Clinical Cardiology** **arr.**  
Development of breadth and depth in diagnostic and therapeutic problems encountered in clinical cardiology; participation in evaluation and decisions regarding patients seen sometimes in the cardiovascular clinic, inpatient cardiology wards, and electrophysiology service.
- IM:8413 Noninvasive Cardiovascular Assessment: EKG Interpretation and Experiences in Ultrasound** **2 s.h.**  
Develop and further the confidence to read basic EKG patterns and rhythms critical to the primary care physician; these are the same objectives and methods as are stressed within the EKG portion of the transitions to clinical clerkships course; students are expected to refamiliarize themselves with this ICD material before beginning the course; students will learn by reading actual EKG's on their own with facilitation of learning by direct instructor feedback of their interpretation. Requirements: M.D. enrollment.
- IM:8414 Clinical Endocrinology** **arr.**  
New patient evaluation, inpatient referral; returning patients in diabetes, endocrine clinics; complete patient evaluations, charts; participation in clinical conferences.

- IM:8416 Clinical Gastroenterology** arr.  
Work in consultation service at University Hospitals & Clinics or Iowa City VA Health Care System; assistance in diagnostic procedures for patients examined as part of consultation service; participation in patient follow-up through weekly return clinic.
- IM:8418 Hematology Oncology** arr.  
Diagnostic skills in hematology and oncology.
- IM:8422 Clinical Infectious Disease** arr.  
Diagnosis, treatment, follow-up, study of patients with infectious diseases, under staff guidance; techniques of diagnostic microbiology; participation in conferences, teaching activities.
- IM:8424 Medical Intensive Care Unit** arr.
- IM:8426 Pulmonary Disease** arr.  
Breadth, depth in diagnostic, therapeutic problems encountered in clinical pulmonary disease; evaluation of outpatients and inpatients under staff supervision; interpretation of special studies carried out in pulmonary function laboratory, fiberoptic bronchoscopy and brush biopsy of lung; exposure to diagnosis and management of acute respiratory failure in intensive care units at University of Iowa Hospitals & Clinics, and Iowa City VA Health Care System.
- IM:8428 Nephrology** arr.  
Evaluation of patients from University of Iowa Hospitals & Clinics inpatient service, Iowa City VA Health Care System and clinics; emphasis on early kidney disease and all varieties of hypertension.
- IM:8434 Clinical Rheumatology** arr.  
Clinical features of rheumatic diseases, their differential diagnosis, and principles of management; patients from arthritis clinic, inpatient consultation service of University of Iowa Hospitals & Clinics, and Iowa City VA Health Care System.
- IM:8435 Palliative Care** 2,4 s.h.  
Requirements: M.D. enrollment.
- IM:8437 Multidisciplinary Cancer Care** 2 s.h.  
Basic concepts of cancer care; role of multidisciplinary team in care of cancer patients; development of attitudes, knowledge, and skills useful for entering a specialty that encounters patients with cancer. Requirements: M.D. enrollment.
- IM:8449 Editorial Writing for Medical Students** 4 s.h.  
Students understand and practice the skill of writing opinion editorials aimed at improving the public's understanding of health and health care; how to effectively engage a broad, non-medical audience through writing with the goal of producing an opinion editorial piece that could be submitted for publication to a local or national newspaper.
- IM:8450 Continuity of Care in Outpatient Internal Medicine** 4 s.h.  
Experience with longitudinal continuity of care for patients in the outpatient setting; clinical and didactic exposure to broad spectrum of general internal medicine problems. Requirements: fourth-year M.D. enrollment.
- IM:8451 Advanced Inpatient Subinternship in Internal Medicine, Des Moines** arr.  
Four-week rotation at Des Moines Medical Education Consortium; experience as a subintern in general internal medicine and the ICU. Requirements: fourth-year M.D. enrollment.
- IM:8452 Subinternship in Internal Medicine at VAMC, Des Moines** arr.  
Rotation at the Veterans Affairs Central Iowa Health Care System; subinternship on general internal medicine ward. Requirements: fourth-year M.D. enrollment.
- IM:8453 Critical Care Rotation, IMMC, ICU, DM** 4 s.h.  
Subinternship on medical critical care team, with daily rounds, teaching. Requirements: fourth-year M.D. enrollment.
- IM:8454 General Medicine Consult Service, IMMC** arr.  
Principles of consultative medicine provided by general internists to non-internal medicine patients; how to assess perioperative risk for patients evaluated before surgery.
- IM:8455 Public Health Medicine** arr.  
Participation in ongoing projects related to public health issues of acute disease; training and career opportunities in public health practice.
- IM:8456 Clinical Cardiology Coronary Care Experience, Iowa Methodist, Des Moines** arr.
- IM:8457 Clinical Nephrology, Iowa Methodist, Des Moines** 2,4 s.h.  
Exposure to common nephrology problems, including acute renal failure, chronic renal failure, acid-base disorders, common electrolyte disorders.
- IM:8495 Internal Medicine ICU Off Campus** arr.  
Experience as subintern in the ICU/MICU; daily rounds and teaching with medical critical care staff.
- IM:8497 Research in Internal Medicine** arr.  
Medical research, clinical or laboratory projects; individual study.
- IM:8498 Internal Medicine On Campus** arr.
- IM:8499 Internal Medicine Off Campus** arr.

# Medical Education Program

## Executive Associate Dean

- Patricia L. Winokur

**Graduate degree:** M.M.E.

**Graduate certificate:** medical education

**Faculty:** <https://medicine.uiowa.edu/ocrme/about/faculty-staff>

**Website:** <https://medicine.uiowa.edu/ocrme/program-goals>

The purpose of the Medical Education Program is to develop a community of academic medical faculty with formal training in education who will create and sustain a culture of educational excellence within the Carver College of Medicine, University of Iowa Hospitals & Clinics, the University of Iowa, and in the medical education community. The program consists of the Master in Medical Education (M.M.E.) degree and the Certificate in Medical Education.

The program is coordinated through the Office of Consultation and Research in Medical Education (OCRME). Courses are taught by OCRME faculty, who also advise students in the program.

## Programs

### Graduate Programs of Study

#### Major

- Master in Medical Education [p. 1766]

#### Certificate

- Certificate in Medical Education [p. 1768]

# Master in Medical Education, M.M.E.

## Learning Outcomes

The Master in Medical Education program gives health care education faculty members the opportunity to specialize in theory and practice of curriculum design, effective teaching, assessment, and other aspects of medical education. Graduates of the program will be able to:

- design evidence-based education programs and materials with appropriate scope, sequence, and focus for intended learners;
- deliver effective instruction to individuals and small or large groups in classroom, laboratory, or clinical settings;
- evaluate the effectiveness of educational instruction, using formative and summative methods;
- understand basic principles of educational measurement and be able to apply them to medical education;
- use assessments to promote learning and to assess learning progress and status;
- understand basic principles of, and be able to interpret and use, educational research;
- apply the fundamental theories, designs, and methods of program evaluation to the medical education environment;
- identify current issues in medical education and resources available for monitoring developments in the field;
- develop skills in reflection on past experience, including skills of self-awareness, self-analysis, and self-evaluation, that results in the ability to generate a new perspective or plan of action; and
- identify the evolving role of technology in medical education and research.

## Requirements

The Master in Medical Education requires a minimum of 30 s.h. of graduate credit. The program is designed to prepare medical faculty members to educate health professionals. It is intended for Carver College of Medicine faculty members and professional staff as well as for University of Iowa resident physicians and fellows.

The M.M.E. may be completed in as few as two years or as many as five. Students may begin the program in fall semester, spring semester, or summer session. Some of the required courses are offered online, and required on-campus courses have evening meeting times.

The curriculum includes 24 s.h. of required courses and 6-9 s.h. of electives. Students must register for at least one course each academic year in order to maintain satisfactory progress toward the degree. The program's faculty provides substantial student advising and consultation.

During their first semester, students file a plan of study. Each student's plan must include a description of the student's goals, intended graduation date, and a list of courses the student plans to take each semester. The study plan must incorporate all of the courses required for the degree and must include any requests for transfer credit. The plan must be approved by the director of the M.M.E. program and by the student's advisor. Subsequent revisions of the plan must have the advisor's approval.

The Master in Medical Education requires the following coursework.

Code	Title	Hours
MED:9701	Instructional Design and Technology	3
MED:9702	Clinical Teaching in Medical Education	3
MED:9703	Educational Research and Evaluation	3
MED:9711	Teaching Methods in Medical Education	3
MED:9712	Introduction to Educational Measurement in Medical Education	3
MED:9713	Assessment in Medical Education	3
MED:9714	Current Issues in Medical Education	3
MED:9720	Portfolio Project	3
Electives		6-9
<b>Total Hours</b>		<b>30-33</b>

Students who are not involved with clinical teaching may substitute another course for MED:9702 Clinical Teaching in Medical Education.

Students must have completed at least 18 s.h. before enrolling in MED:9720 Portfolio Project. In the portfolio, students integrate the materials they have developed over the course of the program into a document. Three faculty members review the project and evaluate the student's participation in the program.

Electives require approval of the student's advisor. They may include courses in the M.M.E. program as well as those offered by relevant departments and programs (e.g., College of Education, Tippie College of Business). Students should check with their advisors to determine which courses are graduate level.

## Admission

Applicants should hold an M.D. degree and must have performed satisfactorily on the Medical College Admission Test (MCAT). Basic sciences applicants without an M.D. must hold an equivalent degree and must have performed satisfactorily on an admission test equivalent to the MCAT.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET).

Application materials must include an official transcript showing medical coursework and medical degree, or equivalent for basic sciences applicants (current and former University of Iowa students do not need to request a UI transcript or transcripts previously submitted to the University); a letter of reference from the applicant's department chair and one additional letter of reference; and a 300-500 word essay describing the applicant's interest in medical education and in the Master in Medical Education program.

To apply to the M.M.E. program, see Applications and Admissions on the Office of Consultation and Research in

Medical Education (OCRME) website. Application materials should be submitted to the Office of Admissions.

Application deadlines are:

- July 15 for fall semester entry
- November 15 for spring semester entry
- April 15 for summer session entry

# Medical Education, Graduate Certificate

## Requirements

The graduate certificate program is designed to help health care education faculty members, professional staff, residents, and fellows in the Carver College of Medicine and University Hospitals & Clinics find new ways to enhance their scholarship and skills in teaching, curriculum design, and education assessment. The Certificate in Medical Education program involves the same courses as the Master in Medical Education (M.M.E.); however, it only requires a minimum of 12 s.h. of graduate credit. Individuals who complete the certificate and then decide to earn the master's degree may count their certificate coursework toward the M.M.E. degree.

The Certificate in Medical Education requires the following coursework.

## Methods

Code	Title	Hours
One of these:		
MED:9701	Instructional Design and Technology	3
MED:9702	Clinical Teaching in Medical Education	3
MED:9711	Teaching Methods in Medical Education	3

## Research and Measurement

Code	Title	Hours
One of these:		
MED:9703	Educational Research and Evaluation	3
MED:9712	Introduction to Educational Measurement in Medical Education	3

## Additional Courses

Code	Title	Hours
Students choose from M.M.E. requirements		6

## Admission

Applicants should hold an M.D. degree and must have performed satisfactorily on the Medical College Admission Test (MCAT). Basic sciences applicants without an M.D. must hold an equivalent degree and must have performed satisfactorily on an admission test equivalent to the MCAT.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET).

Application materials must include an official transcript showing medical coursework and medical degree, or equivalent for basic sciences applicants (current and former University of Iowa students do not need to request

a UI transcript or transcripts previously submitted to the University); a letter of reference from the applicant's department chair and one additional letter of reference; and a 300-500 word essay describing the applicant's interest in medical education and in the Certificate in Medical Education program.

To apply to the certificate program, see Applying as a Nondegree Graduate Student on the University of Iowa Office of Admissions website. Application materials should be submitted to the Office of Admissions.

Application deadlines are:

- July 15 for fall semester entry
- November 15 for spring semester entry
- April 15 for summer session entry

# Medical Laboratory Science

## Coordinator

- Gabriella Young

**Undergraduate major:** medical laboratory science (B.S.)

**Website:** <https://medicine.uiowa.edu/pathology/education/medical-laboratory-science-program-mlsp>

Medical laboratory scientists and medical technologists perform the laboratory tests that provide health care practitioners with information vital for accurate diagnosis, proper treatment of disease, and assistance in monitoring the treatment of the disease. They are in demand in hospital, private, reference, and government laboratories; clinics; physicians' offices; and industrial, pharmaceutical, biological, veterinary, and environmental research laboratories. Medical laboratory scientists and medical technologists are highly skilled health team professionals who use complex procedures and instruments in their analysis. They possess a specialized set of knowledge and skills acquired through completion of a formal twelve-month program of academic and clinical study in laboratory medicine.

## Programs

### Undergraduate Program of Study

#### Major

- Major in Medical Laboratory Science (Bachelor of Science) [p. 1770]

# Medical Laboratory Science, B.S.

The Carver College of Medicine partners with Allen College in Waterloo, Iowa, to offer the major in medical laboratory science. The program is fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences. All graduates are eligible for national certification examinations in medical laboratory science.

Undergraduate study in medical laboratory science is guided by the academic rules and procedures [p. 1716] outlined in the Carver College of Medicine section of the Catalog. Because the Carver College of Medicine partners with Allen College for the medical laboratory science major, students are not held to the University of Iowa in-residence requirement.

## Expenses

Students are responsible for buying textbooks and paying tuition and student fees. The Medical Laboratory Science Program provides laboratory coats for professional program students.

## Requirements

The Bachelor of Science with a major in medical laboratory science requires a minimum of 124 s.h., including 84 s.h. of preparatory study and 40 s.h. in the professional (clinical) program, which consists of 11 months of didactic and practical instruction and clinical rotations. Students must maintain a cumulative g.p.a. of at least 2.70 in all courses for the major and in all University of Iowa courses. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

Bachelor of Science students who have completed all preparatory study (years one through three) begin the fourth-year professional program in late May with online didactic lectures. They attend several days of laboratory skills instruction on the Allen College campus, and in mid-November they begin a series of clinical rotations in the laboratories of University of Iowa Hospitals & Clinics and the VA Iowa City Health Care. The first series ends at the end of the calendar year. January through early April involve more online courses and student laboratory skills. The last series of clinical rotations begin in mid-April and the professional program concludes with exams in preparation for national certification. Students who successfully complete the 11-month professional program graduate with a Bachelor of Science in medical laboratory science from the University of Iowa and a Bachelor of Health Science from Allen College.

Professional program requirements are taken through Allen College. To learn more about the professional program, visit Medical Laboratory Science (MLS) on the Allen College website.

As part of their preparatory study, students must complete specific courses that are prerequisites for admission to the major.

## Preparatory Study: Prerequisites for Admission to the Major

Students must complete the following coursework before they may be admitted to the major in medical laboratory

science. Students must earn a grade of C-minus or higher in all prerequisite courses.

Code	Title	Hours
All of these:		
BIOL:1411- BIOL:1412	Foundations of Biology - Diversity of Form and Function	8
CHEM:1110 & CHEM:1120	Principles of Chemistry I-II	8
CHEM:2210	Organic Chemistry I	3
MICR:2157- MICR:2158	General Microbiology - General Microbiology Laboratory	5
PSY:1001	Elementary Psychology	3
RHET:1030	Rhetoric	4-5
SOC:1010	Introduction to Sociology	3-4
One of these options:		
HHP:1100 & HHP:1110	Human Anatomy - Human Anatomy Laboratory (both courses)	4
HHP:1150	Human Anatomy Lecture with Lab	4
HHP:1300 & HHP:1310	Fundamentals of Human Physiology - Human Physiology Laboratory (both courses)	4
HHP:1350	Fundamentals of Human Physiology with Laboratory	4
HHP:3115	Anatomy for Human Physiology with Lab	5
HHP:3550	Human Physiology with Laboratory	5
One of these:		
BIOC:3110	Biochemistry	3
CHEM:2220	Organic Chemistry II	3
One of these:		
MATH:1005	College Algebra	4
MATH:1020	Elementary Functions	4
MATH:1440	Mathematics for the Biological Sciences	4
One of these:		
STAT:1020/ PSQF:1020	Elementary Statistics and Inference	3
STAT:3510/ IGPI:3510	Biostatistics	3

## Fourth Year: Professional Program

Students must successfully complete the professional program requirements through Allen College in order to graduate with the B.S. degree in medical laboratory science.

## Admission

Admission to the medical laboratory science professional program (fourth year) is competitive; enrollment may be limited. The top 16 qualified students are admitted. Students must apply to Allen College. Most students apply during fall of their third year and begin the professional program in late May immediately after their third year.

Before beginning the professional program, students must complete all prerequisites, including the College of Liberal Arts and Sciences GE CLAS Core [p. 20] requirements, and must earn at least 84 s.h. of college credit. They satisfy the English and public speaking prerequisite requirements by fulfilling the GE CLAS Core Rhetoric requirement. Applicants must have a cumulative g.p.a. of at least 2.70 both overall and in science coursework. They must satisfy any English as a Second Language (ESL) requirements specified by the University of Iowa before beginning the professional program.

The priority application deadline is Nov. 1. Applications are reviewed after Nov. 1.

Students should consult with a Medical Laboratory Science Program advisor as early as possible to plan preclinical studies that meet all requirements.

## Career Advancement

The demand for medical laboratory scientists is much greater than the number of people qualified to fill the positions, so graduates have numerous employment opportunities nationwide. They consistently find employment before or very soon after graduation.

Opportunities for advancement include positions such as lab manager, computer specialist, technical specialist, or sales/instrument representative. An advanced degree in basic sciences, medicine, hospital administration, or business can expand earning potential.

Graduates often enjoy diverse work environments, including labs in hospitals, research institutions, public health facilities, forensic units, pharmaceutical companies, or working in the armed forces. They have an impact in the field as integral members of health care teams, providing information essential for the treatment and prevention of disease.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

# Medical Scientist Training Program

## Director

- Steven Lentz (Internal Medicine)

## Administrative Director

- Linda M. Varvel

**Faculty:** <https://medicine.uiowa.edu/mstp/faculty>

**Website:** <https://medicine.uiowa.edu/mstp/>

The Iowa Medical Scientist Training Program (MSTP) prepares trainees for careers in academic medicine, with emphasis on basic and clinical research.

## Combined Degree

### M.D./Ph.D.

The combined Doctor of Medicine/Doctor of Philosophy program normally requires seven to eight years of continuous study. It provides an effective and efficient means to integrate graduate and clinical training, combining the scientific approach with clinical medicine.

Students register for MSTP:8515 Medical Scientist Training Program Topics every semester. The course focuses on a variety of topics relevant to training as a physician-scientist.

During the first three semesters of the program, trainees take coursework in the basic sciences fundamental to the study of medicine and complete experiences that introduce mechanisms of health and disease, and principles of clinical practice; see Doctor of Medicine [p. 1751] in the Catalog. This early training provides broad exposure to the language and organizing concepts that form the foundation for a career as a physician scientist. Trainees also begin the research component of the graduate phase of the program during this time, through summer laboratory MSTP:8511 Medical Scientist Training Program Research rotations, enrollment in MSTP:8513 Analyzing and Presenting Medical Research, research presentations by MSTP faculty and students, and a student-sponsored seminar series. Trainees participate in Conversations in Research, in which MSTP faculty members discuss their research and career interests, and they attend MSTP Grand Rounds, a forum for patient-based discussions that emphasizes how science and medicine intersect.

During the fourth semester, all trainees take Step 1 of the United States Medical Licensing Examination and enroll in core clinical clerkships, in which they gain broad exposure to the spectrum of human disease and experience direct patient care before they enter the graduate phase of training.

At the beginning of the third year, trainees select a Ph.D. thesis mentor and enroll in a graduate department or interdisciplinary graduate program to begin their scientific training. In the spring semester of the third year, students enroll in MSTP:8514 Grant Writing Basics: A Focus on Predoctoral Applications. This course builds critical thinking and writing skills associated with applications for individual predoctoral training fellowships.

The focus of the graduate years of study is engagement in academic and research experiences that promote the trainees' development into independent investigators. Clinical contact is maintained during this phase of training through participation in seminar programs, MSTP Grand Rounds,

and MSTP:8512 Medical Scientist Training Program Clinical Connections, a course that provides the opportunity for mentored clinical experiences.

Upon completing the Ph.D. dissertation, trainees return to the Carver College of Medicine's M.D. curriculum to complete the clinical clerkship requirements for the M.D./Ph.D. combined program. During this phase, trainees bring a sophistication in the scientific approach to problem solving that they apply to human disease. They renew and develop clinical skills acquired in their early training and reinforce their understanding of the scientific basis of disease through continued participation in MSTP Grand Rounds. Upon completion of the clinical curriculum, trainees are awarded the M.D. and Ph.D. degrees.

Most graduates of the program elect to enter residency programs in clinical medicine and embark on careers as medical school faculty members in clinical disciplines with opportunities for basic and applied research. Other graduates accept academic appointments in basic science departments and spend a major part of their professional activity in biomedical research and teaching.

## Admission

Applicants must meet requirements for admission to the M.D. program in the Carver College of Medicine; see Admission [p. 1755] in the Doctor of Medicine section of the Catalog. They also must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants should have completed requirements for a bachelor's degree at an accredited academic institution. In addition to outstanding academic credentials, including strength in biological, physical, and mathematical sciences, they must demonstrate aptitude for and commitment to scientific research through productive research experience during their undergraduate years or after. Admission normally is made for entry to the first year of the program, but applicants already enrolled in the Carver College of Medicine may request admission with advanced standing.

## Application

The Carver College of Medicine participates in the American Medical College Application Service (AMCAS). Program applicants should select M.D./Ph.D. Program-Type on their AMCAS application and instruct AMCAS to forward their credentials to the Carver College of Medicine (IA131). Applications should be submitted as early as possible to allow careful review by the admissions committees of the Medical Scientist Training Program and the Carver College of Medicine.

All candidates must take the Medical College Admission Test (MCAT), according to Carver College of Medicine requirements. The Graduate Record Exam (GRE) General Test is not required for admission.

Application to the Graduate College is not required before acceptance to the MSTP. Trainees admitted to the program receive assistance with Graduate College enrollment.

## Financial Support

Trainees receive stipend and full tuition support from a National Institutes of Health MSTP training grant to the University of Iowa, supplemented by other institutional and individual awards. Students in the graduate phase of training receive support from their graduate departments or interdisciplinary programs and their research advisors.

The program office also helps selected trainees apply for competitive national awards for outstanding academic and research achievement.

## Courses

### Medical Scientist Training Program Courses

**MSTP:8511 Medical Scientist Training Program Research** arr.

Research experience. Requirements: Medical Scientist Training Program enrollment.

**MSTP:8512 Medical Scientist Training Program Clinical Connections** arr.

Experience with physician-scientist preceptor in medical interviewing, physical examination, patient presentation through direct patient interaction. Requirements: Medical Scientist Training Program graduate phase enrollment.

**MSTP:8513 Analyzing and Presenting Medical Research** 1 s.h.

How to read, interpret, and present medical and scientific literature; students read and present representative papers from scientific and medical literature.

**MSTP:8514 Grant Writing Basics: A Focus on Predoctoral Applications** 1 s.h.

Introduction to practical and conceptual aspects of grant-writing process, with the goal of completing an NIH F30-like grant; encourages critical thinking about significance, innovation, and experimental design; relate critical information and study design in concise and clear language; practical concepts of grant writing such as specific aims, experimental design, and the grant review process; trainees will present their research ideas, establishing opportunities to give and receive scientific criticism. Requirements: Medical Scientist Training Program enrollment.

**MSTP:8515 Medical Scientist Training Program Topics** 1 s.h.

Workshops and speakers; focus on a variety of topics including wellness, research presentations, professional development, and on-going faculty research partnerships. Requirements: Medical Scientist Training Program enrollment.

# Microbiology and Immunology

## Chair

- Li Wu

## Director, Undergraduate Studies

- Richard J. Roller

## Director, Graduate Studies

- Timothy L. Yahr

**Undergraduate major:** microbiology (B.S.)

**Undergraduate minor:** microbiology

**Graduate degrees:** M.S. in microbiology; Ph.D. in microbiology

**Faculty:** <https://medicine.uiowa.edu/microbiology/people-0>

**Website:** <https://medicine.uiowa.edu/microbiology/>

Study in the Department of Microbiology and Immunology is dedicated to the branch of biological sciences that investigates the smallest living things: microbes that include bacteria, archaea, fungi, algae, protozoa, and viruses. It is coupled with immunology that includes the study of the protective responses of higher organisms to disease-causing microbes and cancers, and mistakes in immune function. Microbiology and immunology often interact in humans at the microbiome, those microbes that live with humans on their skin and mucosal surfaces, and yet must be restricted from causing diseases by the immune system.

Microbiology and immunology are at the forefront of the modern biological revolution. Microbes are experimental subjects of choice for examining genetic and biological phenomena because of their small size, rapid growth rate, relative simplicity, and variety of characteristics that allow them to cause many kinds of infections and alter normal body functions. Immunology often makes use of microbes and cancer cells to study the critical and complex human responses to eliminate microbes and cancers. A significant portion of contemporary biochemical research employs microbiological and immunological methods.

Current research is making theoretical and practical advances concerning microbes that infect animals, including humans, and the immune response to those microbes; the use of comparative genomics, gene expression profiling, and recombinant DNA methods to analyze biological processes and generate valuable products, such as antibiotics and antibodies; genetics and regulation of metabolic processes; and the genetics and regulation of the immune response, including characterization of mechanisms used by microbes to signal one another and characterization of interactions between different types of immune cells and their targets.

The Department of Microbiology and Immunology offers an undergraduate major and a minor, and graduate majors leading to an M.S. and a Ph.D., and determines the curricula for those programs. Undergraduates majoring in microbiology receive their degrees (Bachelor of Science) from the College of Liberal Arts and Sciences and are governed by that college's undergraduate academic policies. The graduate degrees are awarded by the Graduate College.

## Programs

### Undergraduate Programs of Study

#### Major

- Major in Microbiology (Bachelor of Science) [p. 1777]

#### Minor

- Minor in Microbiology [p. 1782]

### Graduate Programs of Study

#### Majors

- Master of Science in Microbiology [p. 1783]
- Doctor of Philosophy in Microbiology [p. 1784]

## Facilities

The Department of Microbiology and Immunology is situated on the University of Iowa health sciences campus, where it shares the Bowen Science Building with the Departments of Anatomy and Cell Biology, Biochemistry and Molecular Biology, Molecular Physiology and Biophysics, and Neuroscience and Pharmacology. Laboratory space and modern equipment are available for teaching and research.

## Courses

### Microbiology and Immunology Courses

#### **MICR:2157 General Microbiology** **3 s.h.**

Principles of bacterial and viral diversity, structure, genetics, physiology, and metabolism in contexts of molecular biology, immunology, infectious disease, and environmental microbiology. Prerequisites: BIOL:1411 and CHEM:1110.

#### **MICR:2158 General Microbiology Laboratory** **2 s.h.**

Practice of basic techniques commonly used today for study of easy-to-grow microorganisms; variety of individual and group lab activities that challenge students to apply observations about bacteria and viruses. Corequisites: MICR:2157, if not taken as a prerequisite.

#### **MICR:3147 Immunology and Human Disease** **3 s.h.**

Important principles and key concepts in immunology with a focus on the involvement of the immune system in disease pathogenesis; overview of innate and adaptive immune systems and their functions at cellular and molecular levels. Prerequisites: BIOL:1411 with a minimum grade of C and BIOL:1412 with a minimum grade of C.

#### **MICR:3150 Eukaryotic Pathogens and Human Disease** **2 s.h.**

Foundational understanding of the lifecycle, epidemiology, pathogenesis, diagnosis, and treatment of major eukaryotic pathogens/parasites that cause human disease. Prerequisites: MICR:2157 with a minimum grade of C. Recommendations: genetics, biochemistry, and immunology.

- MICR:3159 Bacteria and Human Disease** 3 s.h.  
Infection and replication strategies of bacteria with an emphasis on human disease; for students interested in microbiology or other biological sciences, epidemiology, and/or health-related occupations. Prerequisites: MICR:2157 with a minimum grade of C.
- MICR:3160 Bacterial Physiology and Cell Biology** 2 s.h.  
Bacterial physiology and cell biology with reference to model organisms and adaptations to extreme environments; topics include energy metabolism, growth, cell structure, macromolecular assembly, cell division, microbial development, and microbial interactions; lectures augmented with readings from primary literature to give students a strong foundation in prokaryotic biology and approaches used in modern microbiology research. Prerequisites: (BIOC:3110 or BIOC:3120) and MICR:2157 with a minimum grade of C.
- MICR:3164 Microbiology and Human Health** 4 s.h.  
Microbiology for nursing, pharmacy, and pre-health professions. Prerequisites: BIOL:1411 or BIOL:1140 or BIOL:1141.
- MICR:3165 Bacteria and Human Disease Laboratory and Discussion** 3 s.h.  
Use of bacterial genetics and molecular biology techniques and methodologies to study bacteria which cause human disease; development of skills in data analysis and presentation, reading scientific literature, and writing scientific abstracts; for students interested in microbiology or other biological sciences, epidemiology, and/or health-related occupations. Prerequisites: MICR:2157 with a minimum grade of C and MICR:2158 with a minimum grade of C. Corequisites: MICR:3159 or MICR:3170, if not taken as a prerequisite.
- MICR:3168 Viruses and Human Disease** 3 s.h.  
Infection and replication strategies of viruses with an emphasis on human disease; for microbiology majors as well as students interested in pre-medicine, biological sciences, epidemiology, and/or other health-related occupations. Prerequisites: BIOL:1412 with a minimum grade of C or MICR:2157 with a minimum grade of C. Recommendations: basic understanding of molecular biology and immunology.
- MICR:3170 Microbial Genetics** 2 s.h.  
Genetics of bacteria and bacteriophages including classical, molecular, and genome-wide approaches. Prerequisites: BIOL:2512 with a minimum grade of C or MICR:2157 with a minimum grade of C.
- MICR:3177 Virology Discussion** 1 s.h.  
Students read and discuss papers from virology literature that address current issues in virology. Prerequisites: MICR:2157 with a minimum grade of C. Corequisites: MICR:3168 (if not taken as a prerequisite).
- MICR:3178 Virology Laboratory** 2 s.h.  
Practical approaches to studying viruses; basic techniques in virology including virus detection, virus growth measurement, and virus genetics; introduction to bioinformatic analysis of virus genomes and infections. Prerequisites: MICR:2157 with a minimum grade of C and MICR:2158 with a minimum grade of C. Corequisites: MICR:3168 (if not taken as a prerequisite).
- MICR:4161 Undergraduate Research in Microbiology** arr.  
Experimental research under faculty supervision. Prerequisites: BIOL:1411.
- MICR:4163 Seminar: Microbiology** 2 s.h.  
Current topics in microbiology, immunology, and virology. Prerequisites: 2 of the following are required: MICR:3147 with a minimum grade of C, MICR:3159 with a minimum grade of C, MICR:3160 with a minimum grade of C, MICR:3168 with a minimum grade of C, MICR:3170 with a minimum grade of C. Requirements: senior standing.
- MICR:4171 Honors Undergraduate Research in Microbiology** arr.  
Experimental research under faculty supervision. Prerequisites: BIOL:1411. Requirements: microbiology major, junior or senior standing, 3.33 overall g.p.a., and 3.33 g.p.a. in microbiology courses.
- MICR:4175 Topics in Parasitism** 1 s.h.  
Molecular and immunologic mechanisms by which bacteria, viruses, and protozoa cause human diseases; based on manuscript readings and/or student presentations. Requirements: junior or higher standing in microbiology or related discipline, and current or prior research in a microbiology and immunology laboratory.
- MICR:5218 Microscopy for Biomedical Research** arr.  
Basic microscopy methods for research including optics, preparation, and analysis of biomedical specimens; light, fluorescence, confocal, transmitting electron, scanning electron, atomic force microscopes, elemental analysis; immunochemistry and stereology techniques; individualized laboratory instruction. Prerequisites: BIOL:2723. Same as ACB:5218, BIOL:5218.
- MICR:5264 Directed Study in Microbiology** arr.  
Advanced-level experimental research or teaching under faculty supervision.
- MICR:5875 Perspectives in Biocatalysis** 1-3 s.h.  
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BIOC:5875, CBE:5875, CEE:5875, CHEM:5875, PHAR:5875.
- MICR:6201 Graduate Immunology** 3 s.h.  
Ontogeny, activation, and function of T lymphocytes and B lymphocytes; innate immune effector mechanisms; major histocompatibility complex; antigen presentation; thymocyte positive and negative selection; signaling of T lymphocytes, B lymphocytes; emphasis on experimental methods for analysis of these processes. Prerequisites: MICR:3147. Requirements: for IMMU:6201—college biology, general chemistry, and introductory immunology courses; for MICR:6201—courses in college biology, genetics, general chemistry, and introductory immunology. Recommendations: for IMMU:6201—courses in biochemistry and genetics; for MICR:6201—biochemistry course. Same as IMMU:6201.
- MICR:6240 Graduate Eukaryotic Pathogens and Human Disease** 2 s.h.  
Foundational understanding of the lifecycle, epidemiology, pathogenesis, diagnosis, and treatment of major eukaryotic pathogens/parasites that cause human disease. Recommendations: genetics, biochemistry, and immunology.

**MICR:6247 Graduate Immunology and Human Disease 4 s.h.**

Important principles and key concepts in immunology with a focus on the involvement of the immune system in disease pathogenesis; overview of innate and adaptive immune systems and their functions at cellular and molecular levels; learning enhanced by case-based, small-group discussion and writing exercises. Same as IMMU:6247.

**MICR:6250 Mechanisms of Parasitism Journal Club 1 s.h.**

Reviews of recent publications in molecular parasitology research and thesis research by training grant or journal club students. Same as MMED:6250.

**MICR:6255 Graduate Experimental Approaches to Molecular Microbiology 2 s.h.**

Exposure to common experimental approaches through examination of primary literature and facilitated discussions on application of those approaches to advance scientific inquiry. Requirements: microbiology graduate standing.

**MICR:6259 Graduate Bacteria and Human Disease 3 s.h.**

Infection and replication strategies of bacteria with an emphasis on human disease; discussion focuses on experimental approaches used to study mechanisms of disease.

**MICR:6260 Graduate Bacterial Physiology and Cell Biology 2 s.h.**

Bacterial physiology and cell biology with reference to model organisms and adaptations to extreme environments; topics include energy metabolism, growth, cell structure, macromolecular assembly, cell division, microbial development, and microbial interactions; lectures augmented with readings from primary literature to give students a strong foundation in prokaryotic biology and approaches used in modern microbiology research.

**MICR:6265 Introduction to Grant Writing 2 s.h.**

How to think and write like scientists and become familiar with the elements of a research proposal; writing a grant proposal modeled on a National Institutes of Health Exploratory/Developmental Research Grant Award (NIH R21); students critique proposals written by other students; faculty read proposals and provide constructive criticism; lectures describe elements of a grant proposal and strategies for effective writing. Requirements: enrollment in microbiology graduate program, or enrollment in a graduate program training in a microbiology and immunology department laboratory, or enrollment in a biological science graduate program and not working in a microbiology and immunology department laboratory for thesis project.

**MICR:6267 Graduate Viruses and Human Disease 4 s.h.**

Infection and replication strategies of viruses with an emphasis on human disease; discussion focuses on topics and techniques used in primary literature and development of specific aims for a mini-proposal.

**MICR:6268 Biology and Pathogenesis of Viruses 2 s.h.**

Molecular biology of animal DNA and RNA viruses, viral immunology and pathogenesis, and interaction of these viruses with eucaryotic cells; mechanisms of viral latency, persistence, cellular transformation, oncogenesis; virology literature. Prerequisites: MICR:3168 or MICR:6267.

**MICR:6269 Graduate Virology Discussion 1 s.h.**

Discussion of primary virology literature from a range of topics, may include techniques used for studying viruses, viral entry and replication, evasion of immune responses by viruses, vaccines, and viral pathogenesis; short presentations; development of specific aims for a mock grant proposal on a virology-related topic. Recommendations: completion of a virology course.

**MICR:6270 Graduate Microbial Genetics 2 s.h.**

Genetics of bacteria and bacteriophages including classical, molecular, and genome-wide approaches.

**MICR:7207 Advanced Topics in Immunology 3 s.h.**

In-depth analysis of selected areas. Prerequisites: IMMU:6201 or MICR:6201. Same as IMMU:7221.

**MICR:7261 Graduate Research in Microbiology arr.**

Requirements: microbiology graduate standing.

**MICR:7263 Graduate Student Research Seminar 1 s.h.**

Presentation of thesis work in progress. Requirements: microbiology graduate standing.

**MICR:7265 Topics in Virology Literature 1 s.h.**

Papers of current interest in primary virology literature.

**MICR:8230 Dental Microbiology 3 s.h.**

Medical microbiology: bacteriology, immunology, pathogenic bacteriology, virology, mycology, parasitology. Requirements: D.D.S. enrollment.

## Microbiology, B.S.

Microbiology is an excellent major for undergraduate students who want a good general education with emphasis on an important and interesting branch of biological sciences.

### Requirements

The Bachelor of Science with a major in microbiology requires a minimum of 120 s.h., including 63-64 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

Students must complete at least 12 s.h. of the required 21-28 s.h. in Department of Microbiology and Immunology courses at the University of Iowa.

The major in microbiology can be pursued on either a pre-medicine or a scholar track.

Students in the pre-medicine track complete admission requirements for the Carver College of Medicine and for most colleges of medicine as an integral part of the completion of their major requirements. This track is recommended for pre-medical, pre-dental, and pre-pharmacy students.

Students in the scholar track pursue a curriculum with streamlined organic chemistry and physics requirements and expanded microbiology and immunology courses, including advanced laboratory and global health studies coursework. The scholar track is recommended for students interested in pursuing graduate training or in developing a career as a microbiologist.

Students may shift from one track to the other during their program of study.

The B.S. with a major in microbiology in the pre-medicine or the scholar track requires the following coursework.

Code	Title	Hours
	Microbiology and Immunology Courses	18
	Supporting Coursework	28-29
	Pre-Medicine or Scholar Track Coursework	17
<b>Total Hours</b>		<b>63-64</b>

### Microbiology and Immunology Courses

Pre-medicine and scholar track students earn 18 s.h. in Department of Microbiology and Immunology courses, as follows.

Code	Title	Hours
Both of these:		
MICR:2157	General Microbiology (with a grade of C or higher)	3
MICR:2158	General Microbiology Laboratory (with a grade of C or higher)	2
Additional microbiology and immunology courses (prefix MICR), with at least 13 s.h. in courses numbered MICR:3147 or above, excluding MICR:3164; students select from the following:		
MICR:3147	Immunology and Human Disease	3

MICR:3150	Eukaryotic Pathogens and Human Disease	2
MICR:3159	Bacteria and Human Disease	3
MICR:3160	Bacterial Physiology and Cell Biology	2
MICR:3165	Bacteria and Human Disease Laboratory and Discussion	3
MICR:3168	Viruses and Human Disease	3
MICR:3170	Microbial Genetics	2
MICR:3177	Virology Discussion	1
MICR:3178	Virology Laboratory	2
MICR:4161	Undergraduate Research in Microbiology	arr.
MICR:4171	Honors Undergraduate Research in Microbiology	arr.
MICR:5218	Microscopy for Biomedical Research	arr.
MICR:5264	Directed Study in Microbiology	arr.

Students must earn a grade of C or higher in BIOL:1411 Foundations of Biology, or in MICR:2157 General Microbiology and MICR:2158 General Microbiology Laboratory, in order to take more advanced Department of Microbiology and Immunology courses.

A maximum of 4 s.h. earned in MICR:4161 Undergraduate Research in Microbiology may be counted toward the major. However, honors students must complete 23 s.h. of microbiology and immunology courses (prefix MICR) for the major and may count 6 s.h. earned in MICR:4171 Honors Undergraduate Research in Microbiology; see Honors [p. 1778] in this section of the Catalog.

### Supporting Coursework

Pre-medicine and scholar track students must complete the supporting coursework listed below. These courses may not be taken pass/nonpass.

Code	Title	Hours
All of these:		
BIOL:1411- BIOL:1412	Foundations of Biology - Diversity of Form and Function	8
CHEM:1110 & CHEM:1120	Principles of Chemistry I-II	8
CHEM:2210	Organic Chemistry I	3
BIOC:3120 & BIOC:3130	Biochemistry and Molecular Biology I-II	6
One of these:		
BIOS:4120	Introduction to Biostatistics	3
MATH:1460	Calculus for the Biological Sciences	4
MATH:1550	Engineering Mathematics I: Single Variable Calculus	4
MATH:1850	Calculus I	4
STAT:3510/ IGPI:3510	Biostatistics	3
In addition, the following course may be recommended for some students:		
CNW:2680	The Art and Craft of Creative Nonfiction	3

## Pre-Medicine Track

Pre-medicine track students must complete at least 17 s.h. from the following. These courses may not be taken pass/nonpass.

Code	Title	Hours
Both of these:		
CHEM:2220	Organic Chemistry II	3
CHEM:2410	Organic Chemistry Laboratory	3
One of these sequences:		
PHYS:1511- PHYS:1512	College Physics I-II	8
PHYS:1611- PHYS:1612	Introductory Physics I-II	8
3 s.h. from these:		
BIOC:3310/ CBIO:3310/ MMED:3310	Practical Data Science and Bioinformatics	3
BIOL:2723	Cell Biology	3
BIOL:3314/ IGPI:3314	Genomics	3
BIOL:3626	Cell Biology Laboratory	4
BIOL:4213	Bioinformatics	2,4
CPH:2230	Finding Patient Zero: The Exploration of Infectious Disease Transmission and Pandemic Threats	3
GHS:2000/ ANTH:2103	Introduction to Global Health Studies	3
GHS:2320/ ANTH:2320	Origins of Human Infectious Disease	3
	Additional microbiology and immunology course (prefix MICR) numbered MICR:3147 or above, excluding MICR:3164	3

## Scholar Track

Scholar track students must complete at least 17 s.h. from the following. These courses may not be taken pass/nonpass.

Code	Title	Hours
This course:		
PHYS:1400	Basic Physics	4
One of these:		
GHS:2000/ ANTH:2103	Introduction to Global Health Studies	3
GHS:2320/ ANTH:2320	Origins of Human Infectious Disease	3

Scholar track students must earn at least 7 s.h. of advanced coursework chosen from the following.

Code	Title	Hours
BIOC:3310/ CBIO:3310/ MMED:3310	Practical Data Science and Bioinformatics	3
BIOL:3314/ IGPI:3314	Genomics	3
BIOL:3626	Cell Biology Laboratory	4
BIOL:4213/ GENE:4213/ IGPI:4213	Bioinformatics	2,4

Additional microbiology and immunology courses (prefix MICR) numbered MICR:3147 or above, excluding MICR:3164

May include one of these:

BIOL:2723	Cell Biology	3
CPH:2230	Finding Patient Zero: The Exploration of Infectious Disease Transmission and Pandemic Threats	3
GHS:2000/ ANTH:2103	Introduction to Global Health Studies (if not taken as a course option above)	3
GHS:2320/ ANTH:2320	Origins of Human Infectious Disease (if not taken as a course option above)	3

Scholar track students must take at least one microbiology and immunology advanced laboratory or research course from the following.

Code	Title	Hours
MICR:3165	Bacteria and Human Disease Laboratory and Discussion	3
MICR:3178	Virology Laboratory	2
MICR:4161	Undergraduate Research in Microbiology	arr.
MICR:4171	Honors Undergraduate Research in Microbiology	arr.

## Combined Programs

### B.S./Ph.D. in Microbiology

Students majoring in microbiology who are interested in earning a doctoral degree may apply to the combined Bachelor of Science/Doctor of Philosophy in microbiology program. The combined program permits students to count 12 s.h. of credit toward both the B.S. and Ph.D. degree requirements before they have been granted the B.S. degree.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, contact the Department of Microbiology and Immunology.

## Honors

### Honors in the Major

Students majoring in microbiology (either track) have the opportunity to graduate with honors in the major. They must maintain a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.33 in work for the major. To graduate with honors in the microbiology major, students must complete 23 s.h. of coursework in microbiology, including 6 s.h. in MICR:4171 Honors Undergraduate Research in Microbiology, which introduces them to experimental research. At the end of their research, they must successfully present written and oral reports.

### University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the

University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the microbiology major.

## Career Advancement

Graduates find employment opportunities in government, hospitals, public health laboratories, research laboratories, and industrial laboratories (food, dairy, chemical, pharmaceutical, and biotechnology companies). Those who pursue advanced degrees have more advanced career opportunities in these same areas, with greater responsibilities and higher salaries, as well as in college and university teaching.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

**Before the third semester begins:** BIOL:1411 Foundations of Biology, CHEM:1110 Principles of Chemistry I, CHEM:1120 Principles of Chemistry II, and an approved calculus or biostatistics course.

**Before the fifth semester begins:** BIOL:1412 Diversity of Form and Function, CHEM:2210 Organic Chemistry I, MICR:2157 General Microbiology, and MICR:2158 General Microbiology Laboratory.

**Before the seventh semester begins:** seven more courses in the major and at least 90 s.h. earned toward the degree.

**Before the eighth semester begins:** another 10-12 s.h. of coursework.

**During the eighth semester:** enrollment in all remaining coursework in the major, all remaining required GE CLAS Core courses, and a sufficient number of semester hours to graduate.

### Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# Microbiology, Minor

## Requirements

The undergraduate minor in microbiology requires a minimum of 15 s.h. in Department of Microbiology and Immunology courses (prefix MICR), including 12 s.h. in courses considered advanced for the minor taken at the University of Iowa. Courses numbered MICR:3147 Immunology and Human Disease and above are considered advanced for the minor, excluding MICR:3164 Microbiology and Human Health. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

Students may count a maximum of 2 s.h. earned in MICR:4161 Undergraduate Research in Microbiology or MICR:4171 Honors Undergraduate Research in Microbiology toward the minor. They also may count MICR:5218 Microscopy for Biomedical Research toward the minor.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

<b>Hours</b>		<b>3</b>
<b>Third Year</b>		
<b>Fall</b>		
Minor: advanced microbiology course (prefix MICR) <sup>f</sup>		3
<b>Hours</b>		<b>3</b>

### Spring

Minor: advanced microbiology course (prefix MICR) <sup>f</sup>	3
<b>Hours</b>	<b>3</b>

### Fourth Year

#### Fall

Minor: advanced microbiology course (prefix MICR) <sup>f</sup>	3
<b>Hours</b>	<b>3</b>

**Total Hours** **25**

- a Prerequisite for BIOL:1411, which is a prerequisite for all advanced microbiology courses.
- b Enrollment in chemistry courses requires completion of a placement exam.
- c Prerequisite for all advanced microbiology courses.
- d Prerequisite with a grade of C or higher for most advanced microbiology courses.
- e Prerequisite with a grade of C or higher for advanced microbiology laboratory courses.
- f Courses numbered MICR:3147 and above are considered advanced for the minor, excluding MICR:3164.

# Microbiology, M.S.

## Requirements

The Master of Science program in microbiology requires a minimum of 30 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 2.80 to earn the degree. They are required to earn a minimum of 12 s.h. in microbiology courses chosen from three of the department's five subdisciplines. They may substitute a course they have already taken (at the University of Iowa or elsewhere) for a course requirement, with the M.S. advisory committee's approval.

Additional course requirements depend on students' interests and the advice of the thesis committee. Students must write a thesis based on their own research and defend it satisfactorily in an oral examination. No more than 9 s.h. of credit for thesis research may be counted toward the 30 s.h. required for the degree.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They should have a cumulative g.p.a. of at least 3.00 and must have completed courses in biology, chemistry (inorganic and organic), mathematics including calculus, and physics. Those admitted with deficiencies must complete the relevant course work during their first year of graduate study. Admission is determined through a review and formal vote by the faculty.

Preference is given to students applying to the Ph.D. program.

# Microbiology, Ph.D.

Graduate study in microbiology is designed to help students become highly qualified in microbiology research and teaching. Ph.D. students develop expertise in research in a specific area of microbiology and/or immunology.

Faculty members have strengths in bacterial genetics and physiology, molecular virology, pathogenic bacteriology and virology, and immunology. Areas of research include bioinformatics, cellular microbiology, molecular virology and immunology, bacterial biochemistry and physiology, bioremediation, bacterial and viral pathogenesis, and molecular parasitology. Working in the laboratory of their Ph.D. advisor, students learn to define and experimentally investigate scientific questions and to conduct original research in preparation for positions in academia, government, and industry.

## Requirements

The Doctor of Philosophy in microbiology requires a minimum of 72 s.h. of graduate credit, including at least 12 s.h. of graded coursework. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree. Qualified students interested in earning the Doctor of Medicine along with the Ph.D. may apply to the Medical Scientist Training Program [p. 1772], which offers a combined M.D./Ph.D. program.

Students have the opportunity to tailor their curriculum with courses that enhance their educational goals. They take a combination of graduate-level courses that include seminar courses.

The Ph.D. with a major in microbiology requires the following coursework.

## Core Curriculum

Code	Title	Hours
MICR:6255	Graduate Experimental Approaches to Molecular Microbiology	2
MICR:6265	Introduction to Grant Writing	2
MICR:7263	Graduate Student Research Seminar	1
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0

Additional courses offered by the Department of Microbiology and Immunology and other departments, as appropriate for each student

## Typical Two-Year Curriculum

### First Three Semesters

Students enroll for 12 s.h. in the first three semesters and select courses from the following.

### First Year, Fall

Code	Title	Hours
MICR:6247/ IMMU:6247	Graduate Immunology and Human Disease	4

MICR:6267	Graduate Viruses and Human Disease	4
MICR:6270	Graduate Microbial Genetics	2

### First Year, Spring

Code	Title	Hours
MICR:6201/ IMMU:6201	Graduate Immunology	3
MICR:6240	Graduate Eukaryotic Pathogens and Human Disease	2
MICR:6259	Graduate Bacteria and Human Disease	3
MICR:6260	Graduate Bacterial Physiology and Cell Biology	2
MICR:6268	Biology and Pathogenesis of Viruses	2
MICR:7265	Topics in Virology Literature	1

## Examples of Elective Coursework

Code	Title	Hours
BIOL:4213/ GENE:4213/ IGPI:4213	Bioinformatics	2,4
BIOL:5320/ BME:5330/ ECE:5220/ GENE:5173/ IGPI:5330	Computational Genomics	3
BMED:5207	Principles of Molecular and Cellular Biology	3
MMED:6220/ ACB:6220/ MPB:6220	Mechanisms of Cellular Organization	3

## Additional Requirements

### Laboratory Rotations

Graduate students rotate through two to three different laboratories during their first academic year. The laboratory rotations are approximately ten weeks each. At the conclusion of each rotation, a student meets with the rotation mentor for an exit interview and an evaluation of the student's performance. This evaluation becomes part of the student's departmental record. The student also is required to present the research completed during the rotation in the graduate seminar course.

### Teaching

Graduate students participate in the formal teaching activities of the department for at least two semesters. First-year students as well as students who are within a year of receiving the Ph.D. degree typically are not asked to teach. Teaching may take a variety of forms, including tutoring, leading discussions and laboratory groups, correcting examinations, preparing teaching materials, and lecturing.

### Comprehensive Examination

The comprehensive examination is designed to measure a student's ability to write and defend a research proposal. The format of this proposal follows guidelines for research proposals outlined by major external funding agencies (i.e., National Institutes of Health (NIH), National Science

Foundation (NSF), and U.S. Department of Agriculture (USDA). Guidance, in the design of these proposals, is provided by the director of graduate studies and the student's comprehensive examination committee.

### Written Examination

During the spring semester of the second year, a student prepares a detailed research proposal. The topic of the research proposal is determined in collaboration with the comprehensive examination committee. A detailed guide can be found in the Graduate Program in Microbiology Graduate Student Handbook on the Department of Microbiology and Immunology website.

### Oral Examination

Questions during the oral examination may come from the examination proposal, coursework, or other general areas of microbiology. In order to pass the comprehensive examination, a student must satisfactorily defend the written research proposal and answer questions of general microbiology that are germane to the proposal or that are important for a full understanding of the proposed experiments and their interpretation.

### Final Examination

The five-member Ph.D. thesis committee serves as an advisory body for preparation of the thesis. This committee meets with the student to review the material that is expected to be incorporated in the thesis. Although meetings of the candidate with the committee should be yearly, the candidate, thesis advisor, or the committee can request a meeting at any time. A final draft of the thesis must be given to all members of the committee two weeks before the final examination. The final examination takes the form of a seminar presented to the department. This presentation is announced according to the Graduate College policy. Questions, comments, and discussion will follow. After the seminar, the candidate meets with the committee for the final thesis defense. The Ph.D. degree is not awarded until the thesis is signed by the committee members and the department chair. In some cases, revisions may be required.

## Combined Programs

### Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in microbiology in a combined degree program offered by the Department of Microbiology and Immunology and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1772] (Carver College of Medicine) in the Catalog.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They should have a cumulative g.p.a. of at least 3.00 and have completed courses in biology, chemistry (inorganic and organic), mathematics including calculus, and physics. Those admitted with deficiencies in certain areas may be required to complete the relevant course work during their first year of graduate study. Admission is determined through a review and formal vote by the faculty.

## Financial Support

Graduate student tuition, benefits, and a stipend are fully supported during Ph.D. training, which typically spans five years.

## Career Advancement

Graduates typically pursue research or teaching positions.

# Molecular Physiology and Biophysics

## Chair

- Kevin P. Campbell

## Executive Associate Chair

- W. Scott Moye-Rowley

**Faculty:** <https://medicine.uiowa.edu/physiology/profile>

**Website:** <https://medicine.uiowa.edu/physiology/>

The Department of Molecular Physiology and Biophysics participates in interdisciplinary graduate programs, including the Medical Scientist Training Program [p. 1772], a combined M.D./Ph.D. program offered by the Graduate College and the Carver College of Medicine, and it provides instruction in molecular physiology and biophysics for M.D., D.D.S., and other health professions students. The department also conducts a co-op exchange, a vigorous training program that gives undergraduate students the opportunity to develop as independent researchers in preparation for graduate studies.

The department's principal research areas include cell biology, genetics, endocrinology, neuroscience, and membrane physiology and biophysics. The unifying theme is the understanding of signal transduction mechanisms involved in regulating function at the cellular and molecular levels.

## Research

Faculty research interests in the Department of Molecular Physiology and Biophysics encompass molecular and cellular endocrinology, cellular and developmental neurophysiology, and membrane structure and function. Within these, there are multiple areas of interest, including hormone receptors, reproductive endocrinology, signal transduction, regulation of gene expression, synaptic transmission, neuronal differentiation, membrane ion channels, regulation of excitability, and cardiovascular electrophysiology and regulation. Experimental models currently being investigated include rodents, yeast, *Drosophila*, and cultured cell lines from a variety of species.

## Programs

### Graduate Programs of Study

#### Majors

- Master of Science in Molecular Physiology and Biophysics
- Doctor of Philosophy in Molecular Physiology and Biophysics

Students interested in doctoral studies in molecular physiology and biophysics should apply under the umbrella program in Biomedical Science [p. 1599] (select molecular physiology and biophysics subprogram). Direct applications to the M.S. and Ph.D. in molecular physiology and biophysics are not currently being considered.

## Facilities

Two floors of the Bowen Science Building are devoted to research and teaching in the Department of Molecular Physiology and Biophysics. Department faculty members also occupy laboratory facilities in the Medical Education Research

Facility, Pappajohn Biomedical Discovery Building, and the Carver Biomedical Research Building. In addition to specialized equipment in faculty research laboratories, the department provides equipment for fluorescence microscopy, isotope analysis, cell culture, and molecular biology. It also has access to the University network and the multimedia education facilities. Additional resources are available at the Hardin Library for the Health Sciences.

## Courses

### Molecular Physiology and Biophysics Courses

- MPB:4199 Research, Independent Study** **arr.**  
Recommendations: closed to molecular physiology and biophysics graduate students.
- MPB:5153 Graduate Physiology** **4 s.h.**  
Principles of human physiology, organ systems, cell function. Offered fall semesters. Requirements: grades of C- or higher in BIOL:1411 and CHEM:2210 and CHEM:2220, and graduate standing.
- MPB:5200 Medical Physiology Online** **5 s.h.**  
Fundamental principles of cellular membranes, muscle, sensory organs, motor neurological systems, autonomic nervous systems, cardiovascular, pulmonary, renal, gastrointestinal, endocrine, and reproductive systems; interdependence of organ systems to maintain a normal physiological state using clinical correlates as applied to humans; basic physiological principles that establish a solid foundation for future pathophysiological and pharmacological concepts. Recommendations: medical, dental, physician assistant, nurse anesthesia, physical therapy, or graduate standing.
- MPB:5201 Advanced Physiology Online** **3 s.h.**  
Examination of cellular and organ systems of medical physiology; fundamental principles of cellular membranes including muscle, sensory organs, motor neurological systems, autonomic nervous system, cardiovascular, pulmonary, renal, gastrointestinal, endocrine, and reproductive physiology; emphasis on interdependence of organ systems to maintain a normal physiological state (homeostasis) using clinical correlates as applied to humans; basic physiological principles that establish a solid foundation for future pathophysiological and pharmacological concepts.
- MPB:5241 Neuromuscular Diseases: Case-Based Seminar** **1 s.h.**
- MPB:6209 Steroid Receptor Signaling** **1 s.h.**  
Structure-function relationship and genomic and nongenomic actions of the steroid hormone receptor family; basis for actions of novel new ligands on these receptors. Offered spring semesters of even years. Same as NSCI:6209, PCOL:6209.
- MPB:6220 Mechanisms of Cellular Organization** **3 s.h.**  
Current understanding of basic cell biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BIOC:3130. Same as ACB:6220, MMED:6220.

**MPB:6225 Growth Factor Receptor Signaling 1 s.h.**

Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Same as ACB:6225, MMED:6225, PCOL:6225.

**MPB:6226 Cell Cycle Control 1 s.h.**

Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Same as ACB:6226, MMED:6226.

**MPB:6227 Cell Fate Decisions 1 s.h.**

Cellular fate decisions including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Same as ACB:6227, MMED:6227.

**MPB:6265 Neuroscience Seminar 0-1 s.h.**

Research presentations. Same as ACB:6265, BIOL:6265, NSCI:6265, PSY:6265.

**MPB:6302 Research Physiology and Biophysics arr.**

Requirements: molecular physiology and biophysics graduate standing.

**MPB:7402 Thesis arr.**

Requirements: molecular physiology and biophysics Ph.D. candidacy.

**MPB:8115 Human Physiology for Dental Students 4 s.h.**

Principles of human physiology, organ systems, cell function. Offered fall semesters. Requirements: grades of C- or higher in BIOL:1411, CHEM:2210, and CHEM:2220; and D.D.S. enrollment.

# Neurology

## Chair

- George B. Richerson

**Faculty:** <https://medicine.uiowa.edu/neurology/profile>

**Website:** <https://medicine.uiowa.edu/neurology/>

Neurology is the branch of medical science concerned with diagnosis and management of disorders of the brain, spinal cord, peripheral nervous system, and muscle.

The Department of Neurology's hallmark is its history of carefully integrating patient care, scientific investigation, and the education of medical, postdoctoral, and graduate students. The department also offers research opportunities in various fields of neuroscience including neuropsychology, neuroimaging, and neuroanatomy to Ph.D. students in neuroscience and psychology.

## Research

The faculty's investigative interests center on cognitive neuroscience, degenerative diseases, cerebrovascular disease, neurogenetics, neuromuscular diseases, electrophysiological correlates of central and peripheral nervous system disease, growth factors in the nervous system, control and regulation of autonomic functions, neuro-ophthalmology, movement disorders, epilepsy, and pain management. For more information see the Department of Neurology website.

## M.D. Training

The department provides clinical and clinical research training to second-, third-, and fourth-year M.D. students.

## Residency

The Department of Neurology offers an active, four-year approved residency program that qualifies physician trainees for board certification in neurology. Experience in clinical electrophysiology, pediatric neurology, psychiatry, and neuropathology is part of this training.

## Courses

### Neurology Courses

**NEUR:5365 Seminar: Neuropsychology and Neuroscience** arr.

Clinical neuropsychology and cognitive neuroscience: cutting-edge research from scientific journals, case presentations in clinical neuropsychology, and current research. Same as NSCI:5365, PSY:5365.

**NEUR:7235 Neurobiology of Disease** 3 s.h.

Broad, thematic understanding of disease mechanisms in neurobiological disorders. Same as NSCI:7235.

**NEUR:7238 Introduction to Neuropsychological Assessment** arr.

Standard neuropsychological and behavioral assessment procedures; selection, administration, and scoring of neuropsychological tests under staff supervision; involvement in case presentation.

**NEUR:7239 Advanced Neuropsychological Assessment** arr.

Continuation of NEUR:7238; preparation of integrated reports on collected data; case presentations.

**NEUR:8301 Clinical Neurology** 2,4 s.h.

Experience in clinical neurology through ward work and case-based conferences linked to required reading; focus on neurologic examination, diagnosis of neurologic problems.

**NEUR:8401 Advanced Inpatient Neurology** 2,4 s.h.

Experience and management of patients with seizure disorders, headache, cerebrovascular diseases; conferences, clinical rounds; two weeks on each inpatient service for a total of four weeks. Prerequisites: NEUR:8301.

**NEUR:8402 Advanced Outpatient Neurology** 2,4 s.h.

Experience in evaluation, management of patients with various neurologic diseases; four weeks in clinic patient care. Prerequisites: NEUR:8301.

**NEUR:8404 Advanced Inpatient Subinternship in Neurology** 4 s.h.

Care of patients with acute and serious neurological diseases, management of patients with varied cerebrovascular diseases; treatment of acute brain disease, comorbid medical diseases, medical and neurological complications that occur among patients with stroke; clinical assessments of patients, writing orders and clinical notes, contribution to rounds; close communication with patients, families, and colleagues; assignment to evening calls for emergency visits and consultations.

**NEUR:8497 Research in Neurology** arr.

Medical research, clinical or laboratory projects; individual study.

**NEUR:8498 Neurology On Campus** arr.

**NEUR:8499 Neurology Off Campus** arr.

# Neuroscience and Pharmacology

## Chair

- Edwin "Ted" G. Abel

**Faculty:** <https://medicine.uiowa.edu/neuroscience-and-pharmacology/people>

**Website:** <https://medicine.uiowa.edu/neuroscience-and-pharmacology/>

The Department of Neuroscience and Pharmacology provides professional training for health science students and participates with other departments in educational and research activities such as the Medical Scientist Training Program [p. 1772], the Physician Scientist Training Pathway, the Molecular Medicine Program [p. 1660], the Neuroscience Program [p. 1662], the Holden Comprehensive Cancer Center, the Abboud Cardiovascular Research Center, and the UI Fraternal Order of Eagles Diabetes Research Center.

The department was a pioneer in offering pharmacology to undergraduate students with little or no science background. Currently, undergraduates can enroll in PCOL:2220 Drug Use and Abuse. This course emphasizes the mechanisms of drug action and give students a background for rational decisions concerning use of drugs.

Department of Neuroscience and Pharmacology graduate study includes both didactic and research experience. Students interested in doctoral studies should apply under the umbrella program in Biomedical Science [p. 1599] (pharmacology subprogram). Qualified students may pursue the combined M.D./Ph.D. in the University's Medical Scientist Training Program.

Pre- and postdoctoral students pursue research training in all areas of neuroscience and pharmacology in the department in preparation for career opportunities in academia, government, and industry.

## Programs

### Graduate Programs of Study

#### Majors

- Master of Science in Pharmacology
- Doctor of Philosophy in Pharmacology

Students interested in doctoral studies in pharmacology should apply under the umbrella program in Biomedical Science [p. 1599] (select pharmacology subprogram). Direct applications to the M.S. and Ph.D. in pharmacology are not currently being considered.

## Courses

### Neuroscience and Pharmacology Courses

#### PCOL:2220 Drug Use and Abuse 3 s.h.

Principles of drug action, toxicity, sedatives, stimulants, hallucinogens, narcotics, over-the-counter agents, antibiotics, and oral contraceptives. Offered spring semesters. Requirements: closed to students enrolled in the Pharm.D. program. GE: Natural Sciences without Lab.

#### PCOL:3101 Pharmacology I: A Drug's Fantastic Journey 2-3 s.h.

Introduction to basic pharmacological principles by following a drug's journey from its site of administration to its site of elimination; common mechanisms by which drugs affect the body and mechanisms underlying drug actions on two primary body systems—nervous and cardiovascular; structured learning environment bolstered by highly interactive application sessions where students apply course material via collaborative work on problem sets/activities; for students interested in medicine, pharmacy, research, and industry. Prerequisites: (CBE:3205 or BIOL:1411) and CHEM:1110. Recommendations: additional higher-level biology and chemistry courses helpful.

#### PCOL:3102 Pharmacology II: Mechanisms of Drug Action 3 s.h.

Expansion of basic pharmacological concepts and further exploration of how they are applied to define a drug's actions on the body; students continue their exploration of the body by discussing various disorders including neuropsychiatric and immune disorders, cancer, diabetes, and microbial infections in conjunction with current treatments; structured learning environment bolstered by highly interactive discussion sessions where students learn to apply course material via collaborative work on problem sets/activities; for students interested in medicine, pharmacy, research, and industry. Prerequisites: PCOL:3101. Recommendations: additional higher-level courses in biology and chemistry helpful.

#### PCOL:4130 Drug Mechanisms and Actions 3 s.h.

Introduction to principles of pharmacology, pharmacologic actions of drugs. Offered spring semesters. Requirements: undergraduate biochemistry and physiology courses.

#### PCOL:4199 Undergraduate Research in Neuroscience and Pharmacology arr.

Experimental research under faculty supervision in department laboratories.

#### PCOL:5130 Fundamentals of Pharmacology 3 s.h.

Basic pharmacological principles underlying drug absorption, distribution, and metabolism; how these processes determine drug dosing; drug receptor interactions and their quantitation; impact of genetic variation on the actions and metabolism of drugs; mechanisms of neurotransmission focusing on synthesis, release, actions, and degradation; central nervous system (CNS) pathways for major neurotransmitters; disease states involving various abnormal neurotransmitter function. Offered spring semesters.

#### PCOL:5135 Principles of Pharmacology 1 s.h.

Basic pharmacological principles underlying drug absorption, drug distribution throughout the body, drug metabolism, and drug elimination; how these processes determine drug dosing and the means by which dosing parameters are characterized; drug receptor interactions and their quantitation. Offered spring semesters.

- PCOL:5136 Pharmacogenetics and Pharmacogenomics** 1 s.h.  
Impact of genetic variation on the actions and metabolism of drugs; database search techniques to identify variants. Offered spring semesters. Prerequisites: PCOL:5135. Recommendations: undergraduate or graduate biochemistry and/or genetics.
- PCOL:5137 Neurotransmitters** 1 s.h.  
Mechanisms of neurotransmission focusing on mechanisms of synthesis, regulation of release, mechanisms of action, means of degradation, and CNS pathways for major neurotransmitters; disease states involving various neurotransmitter systems. Offered spring semesters.
- PCOL:5204 Basic Biostatistics and Experimental Design** 1 s.h.  
Overview of theory of experimental design and data analysis in biological sciences; types of analyses available for common types of data generated in biomedical sciences; review of statistical methods used in published studies; cursory coverage of mathematical computations involved in various analytical tests. Offered fall semesters.
- PCOL:6015 Topics in Pharmacology and Neuroscience** 1 s.h.  
Recent advances in pharmacology, neuropharmacology, developmental neurobiology, neuroendocrinology, and related neurosciences.
- PCOL:6020 Topics in Pharmacogenomics** 1 s.h.  
Recent advances in pharmacogenomics, pharmacogenetics, and related genetic fields. Offered fall semesters.
- PCOL:6025 Topics in Cell Signaling and Cancer** 1 s.h.  
Recent advances in cell signaling mechanisms, mechanisms of cancer, cancer biology, and related sciences. Offered spring semesters.
- PCOL:6030 Topics in Cardiovascular Pharmacology** 1 s.h.  
Recent advances in cardiovascular pharmacology, metabolic pharmacology, and related sciences. Offered spring semesters.
- PCOL:6080 Pharmacology Seminar** 1 s.h.
- PCOL:6090 Graduate Research in Pharmacology** arr.
- PCOL:6099 Special Topics in Pharmacology** arr.
- PCOL:6203 Pharmacology for Graduate Students** 6 s.h.  
Pharmacology of all major drugs in use today; discussion of basic principles underlying drug actions and disposition; physiology, biochemistry, and pathophysiology of specific organ systems; how various drugs impact these systems; how drugs are used to treat disorders of each system; major adverse effects of drugs and how those occur; differences among drugs within each drug group. Offered fall semesters. Prerequisites: BIOC:5243 and MPB:5153.
- PCOL:6204 Pharmacology for Health Sciences: Nurse Anesthetist** 5 s.h.  
Pharmacology of all major drugs in use today; discussion of basic principles underlying drug actions and disposition; physiology, biochemistry, and pathophysiology of specific organ systems; how various drugs impact these systems; how drugs are used to treat disorders of each system; major adverse effects of drugs and how those occur; differences among drugs within each drug group. Offered fall semesters. Prerequisites: ACB:6000 or NURS:6000. Requirements: enrollment in Anesthesia Nursing Program.
- PCOL:6207 Ion Channel Pharmacology** 1 s.h.  
Heuristic, semiquantitative approach to concepts in ion channel physiology and pharmacology; up-to-date physical principles, classification, and structure/function relationships for major voltage-gated ion channels that facilitate application of abstract concepts to physiological, pharmacological, and general biological problems. Offered spring semesters.
- PCOL:6208 G Proteins and G Protein-Coupled Receptors** 1 s.h.  
Structure and function of small molecular weight and G proteins; heteromeric G proteins and G protein-coupled receptors. Offered spring semesters of even years. Prerequisites: BIOC:5243. Recommendations: MMED:6225.
- PCOL:6209 Steroid Receptor Signaling** 1 s.h.  
Structure-function relationship and genomic and nongenomic actions of the steroid hormone receptor family; basis for actions of novel new ligands on these receptors. Offered spring semesters of even years. Same as MPB:6209, NSCI:6209.
- PCOL:6210 Receptors and Cell Signaling** 3 s.h.  
Mechanisms of signaling by growth factors, cytokines and related molecules; principles of ion channel physiology and pharmacology; structure-function relationships of small molecular weight and heteromeric G proteins; G protein-coupled receptors; genomic and nongenomic actions of intracellular receptors; basis for actions of novel new ligands on intracellular receptors. Offered spring semesters.
- PCOL:6225 Growth Factor Receptor Signaling** 1 s.h.  
Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Same as ACB:6225, MMED:6225, MPB:6225.
- PCOL:6250 Advanced Problem Solving in Pharmacological Sciences** 1 s.h.  
Discussion of methodologies, strategies, and approaches commonly used to solve pharmacological sciences problems; use of interpersonal problem-solving skills to develop experimental study plans for solving contemporary scientific problems in pharmacology. Offered fall and spring semesters.

# Neurosurgery

## Chair

- Matthew A. Howard

**Faculty:** <https://medicine.uiowa.edu/neurosurgery/profile/>

**Website:** <https://medicine.uiowa.edu/neurosurgery/>

The Department of Neurosurgery provides an experience oriented toward patient care and basic research concerning diseases and physiology of the nervous system. Students develop awareness of neurosurgery's role in treating head and spine trauma, vascular disorders, brain and spinal cord tumors, pain and peripheral nerve abnormalities, degenerative spine pathology, and surgical treatment of epilepsy and movement disorders.

Clinical courses are designed around patient-centered discussions interwoven with operating room experiences. Lectures and conferences are scheduled on specific topics.

## Faculty

Neurosurgery faculty strengths are centered in physiology of spinal cord trauma, epilepsy, auditory brain function and pain, primary brain tumor genetics, central nervous system tissue culture, spinal column biomechanics, and movement disorders. The department has expertise in clinical management across the spectrum of central nervous system diseases.

## M.D. Training

The department provides third- and fourth-year M.D. students with access to special expertise in selected topics of investigation regarding the central nervous system and to a clinical course through special arrangements with the faculty.

## Facilities

Multiple, fully equipped laboratory space is available to support scientific research of the central nervous system. Faculty and technical assistance is available in all laboratories.

## Courses

Neurosurgery courses are open only to M.D. and qualified associated health sciences students.

## Neurosurgery Courses

**NSG:8401 Advanced Inpatient Subinternship in Neurosurgery** 4 s.h.

Advanced clinical clerkship in neurological surgery; emphasis on diagnosis and operative management of surgical neurological disease.

**NSG:8497 Research in Neurological Surgery** arr.

Laboratory investigation of spinal cord injury, spinal column biomechanics and instrumentation, electrophysiology of pain, epilepsy and hearing, molecular genetics and physiology of brain tumors.

**NSG:8498 Neurosurgery On Campus** arr.

Clinical clerkship; individually arranged by student with departmental approval.

**NSG:8499 Neurosurgery Off Campus** arr.

Arranged by student with department approval.

# Nuclear Medicine Technology

## Director

- Anthony W. Knight

## Director, Medical

- Yusuf Menda

## Director, Technical

- Daniel Petersen

**Undergraduate major:** nuclear medicine technology (B.S.)

**Website:** <https://medicine.uiowa.edu/radsci/programs/nuclear-medicine-technology>

Nuclear medicine technologists are professionals in a medical specialty that uses radioactive tracers for diagnostic, therapeutic, and research purposes. Technologists generally are employed in hospitals and clinics. They work hand-in-hand with nuclear medicine physicians, health physicists, radiopharmacists, and radiochemists as an integral part of a highly trained specialty team.

In addition to using sophisticated detectors and computers to trace the movement and localization of radioactive tracers in the human body, nuclear medicine technologists have responsibilities that include radiation safety, quality control testing, radiopharmaceutical preparation and administration, and general patient care.

The Nuclear Medicine Technology Program is fully accredited by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT). Nuclear medicine technology is one of two undergraduate majors in the field of medical imaging offered by the Carver College of Medicine. Students interested in radiologic technology, computed tomography, magnetic resonance imaging, cardiovascular interventional radiology, diagnostic medical sonography, or radiation therapy may complete the major in radiation sciences; see Radiation Sciences [p. 1834] in the Catalog.

The Carver College of Medicine is located on the University of Iowa health sciences campus, which includes University of Iowa Hospitals & Clinics, one of the nation's largest university-owned teaching hospitals. For information about the college's academic programs and resources, see Carver College of Medicine [p. 1715] in the Catalog.

## Programs

### Undergraduate Program of Study

#### Major

- Major in Nuclear Medicine Technology (Bachelor of Science) [p. 1794]

## Courses

### Nuclear Medicine Technology Courses

#### **RSNM:3120 Fundamentals of Nuclear Medicine and PET** 3 s.h.

Introduction to medical specialty of nuclear medicine and molecular imaging; basic theories of radiation protection, radiation physics and nuclear medicine instrumentation, radiopharmacy, nuclear medicine and positron emission tomography (PET) clinical procedures, professional standards of nuclear medicine technologist. Requirements: Nuclear Medicine Technology Program enrollment.

#### **RSNM:3121 Nuclear Medicine Technology Clinical Internship I** 3 s.h.

Hands-on clinical experience working with patients and performing routine nuclear medicine diagnostic imaging procedures under direct supervision of qualified clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.

#### **RSNM:3131 Radiopharmaceuticals** 3 s.h.

Introduction to radiopharmaceuticals; emphasis on physical, chemical, and biologic properties and their clinical use; fundamental aspects of radiopharmaceuticals including characteristics, preparation, quality control, and clinical use. Requirements: Nuclear Medicine Technology Program enrollment.

#### **RSNM:3220 Nuclear Medicine and PET Clinical Procedures** 3 s.h.

Proper execution of nuclear medicine and PET procedures from a technical point of view; published protocols and procedures specific to the University of Iowa Hospitals & Clinics; routine set up, common errors, artifact identification, computer processing protocols, and patient care concerns identified for each procedure; review of human anatomy, physiology, and pathology germane to understanding and proper execution of nuclear medicine procedures. Requirements: Nuclear Medicine Technology Program enrollment.

#### **RSNM:3221 Nuclear Medicine Technology Clinical Internship II** 3 s.h.

Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.

#### **RSNM:3231 Nuclear Medicine Instrumentation** 3 s.h.

Instruments used in medical imaging to generate and detect ionizing radiation (i.e., SPECT/CT and PET/CT scanners, dose calibrators, well counters, survey meters); focus on instrument quality control testing. Requirements: Nuclear Medicine Technology Program enrollment.

#### **RSNM:3321 Nuclear Medicine Technology Clinical Internship III** 6 s.h.

Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.

**RSNM:4121 Nuclear Medicine Technology Clinical Internship IV** **4 s.h.**

Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors.

Requirements: Nuclear Medicine Technology Program enrollment.

**RSNM:4221 Nuclear Medicine Technology Clinical Internship V** **4 s.h.**

Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors.

Requirements: Nuclear Medicine Technology Program enrollment.

**RSNM:4222 Nuclear Medicine Technology Capstone and Certification Exam Preparation** **6 s.h.**

Students in final semester of program work together to organize and deliver capstone and certification exam preparation course; review of specific topics and oral presentations by each student; preparation and distribution of detailed written outlines of exam content; series of content-specific quizzes, midterm, and final "Mock Board" exam to evaluate student learning and preparedness for taking the NMTCB and ARRT national certification exams; preparation and submission of capstone portfolios that provide evidence of scholarly and professional progress. Requirements: Nuclear Medicine Technology Program enrollment.

# Nuclear Medicine Technology, B.S.

Undergraduate study in nuclear medicine technology is guided by the academic rules and procedures outlined under Undergraduate Rules and Procedures [p. 1716] in the Carver College of Medicine section of the Catalog.

## Requirements

The Bachelor of Science with a major in nuclear medicine technology requires a minimum of 120 s.h. of credit. Work for the degree includes a set of courses that are prerequisite to entering the major, 60 s.h. of coursework in the major, and elective coursework sufficient to complete the minimum of 120 s.h. required for graduation. Students must maintain a cumulative g.p.a. of at least 2.00 and a grade of C or higher in each course required for the major (60 s.h.).

Students who plan to complete all requirements for the degree at the University of Iowa enter the University as students in the College of Liberal Arts and Sciences (CLAS) with a nuclear medicine technology interest. As CLAS students, they complete the coursework that is prerequisite to entering the major.

Admission to the major is competitive; the program accepts a maximum of eight students per year. Students must apply to the major by January 15 of the year in which they wish to enter the program. Personal interviews with qualified applicants are scheduled in February, and the class is selected by March 15. The program begins the following fall semester and lasts two years.

Applicants for admission to the University of Iowa whose first language is not English are strongly encouraged to complete the University of Iowa English Proficiency Evaluation and satisfy the University's English Proficiency Requirements before they apply to a professional program. Students must have permission to register for a full academic load before they may be admitted to the Nuclear Medicine Technology Program.

The nuclear medicine technology major requires students to complete a minimum of two years of a high school world language, or college-level coursework deemed by the University as equivalent, prior to admission.

Students who are admitted to the major become Carver College of Medicine students. Upon completing the program successfully, they are granted a Bachelor of Science degree. Graduates are eligible to apply for the nuclear medicine technology national certification examinations.

The program strongly advises students entering the University to pursue a course of study that is applicable to another major, most commonly biochemistry, biology, chemistry, or microbiology, so that if they are not admitted to the Nuclear Medicine Technology Program, they still may complete a major and receive a bachelor's degree.

The Bachelor of Science with a major in nuclear medicine technology requires the following work.

## Prerequisites to the Nuclear Medicine Technology Major

Students must complete the following prerequisite courses and must have earned 60 s.h. of college credit with a

cumulative g.p.a. of at least 2.50 before they may enter the nuclear medicine technology major. In addition to providing a foundation for the major, the prerequisite courses are good preparation for other majors.

## Rhetoric

Code	Title	Hours
RHET:1030	Rhetoric	4-5

## Culture, Society, and the Arts

See GE CLAS Core [p. 20] (College of Liberal Arts and Sciences) in the Catalog for approved courses in the culture, society, and the arts areas.

Students complete two courses for 3 s.h. each in two of these areas (total of 6 s.h.):

Code	Title	Hours
	Diversity and Inclusion approved coursework	
	Historical Perspectives approved coursework	
	International and Global Issues approved coursework	
	Literary, Visual, and Performing Arts approved coursework	
	Values and Culture approved coursework	

## Mathematics

Code	Title	Hours
One of these:		
MATH:1020	Elementary Functions	4
MATH:1440	Mathematics for the Biological Sciences	4

A more advanced mathematics course

## Introductory Chemistry with Laboratory

Code	Title	Hours
This course:		
CHEM:1110	Principles of Chemistry I	4

## Introductory Physics

Code	Title	Hours
One of these:		
PHYS:1400	Basic Physics	3-4
PHYS:1511	College Physics I	4

## Psychology

Code	Title	Hours
This course:		
PSY:1001	Elementary Psychology	3

## Medical Terminology

Code	Title	Hours
This course:		
CLSA:3750	Medical and Technical Terminology	2

## Anatomy with Laboratory

Code	Title	Hours
One of these options:		
ACB:3110 & HHP:1110	Principles of Human Anatomy - Human Anatomy Laboratory	4
HHP:1100 & HHP:1110	Human Anatomy - Human Anatomy Laboratory	4
HHP:1150	Human Anatomy Lecture with Lab	4
HHP:3115	Anatomy for Human Physiology with Lab	5

## Physiology with Laboratory

Code	Title	Hours
One of these options:		
HHP:1300 & HHP:1310	Fundamentals of Human Physiology - Human Physiology Laboratory	4
HHP:1350	Fundamentals of Human Physiology with Laboratory	4
HHP:3500 & HHP:1310	Human Physiology - Human Physiology Laboratory	4
HHP:3550	Human Physiology with Laboratory	5

## Recommended Pre-Major Courses

The Nuclear Medicine Technology Program strongly recommends that students who intend to apply to the major take the following coursework in addition to the required prerequisite courses listed above.

Code	Title	Hours
Both of these:		
CHEM:1120	Principles of Chemistry II	4
RSP:1100	Introduction to the Radiation Sciences	1
One of these:		
BIOL:1140	Human Biology: Nonmajors	4
BIOL:1411	Foundations of Biology	4
One of these:		
STAT:1020	Elementary Statistics and Inference	3
STAT:3510	Biostatistics	3
STAT:4143	Introduction to Statistical Methods	3
One of these:		
BAIS:1500	Business Computing Essentials	2
CS:1020	Principles of Computing	3

Prospective students are encouraged to consult the Nuclear Medicine Technology Program office to plan an appropriate pre-major program of study.

## Coursework in the Major

Students admitted to the nuclear medicine technology major spend two years in a clinical curriculum that is organized in accordance with the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT) Accreditation Standards for Nuclear Medicine Technologist Education. They complete coursework in the following areas:

radiopharmacy, radiation safety and radiobiology, patient care, nuclear medicine and positron emission tomography (PET) procedures, radiation physics and instrumentation, administration and management, medical and professional ethics, research methodology, and computed tomography (CT). Practical clinical rotations focus on nuclear medicine, PET and CT imaging, nuclear medicine therapy, clinical radiopharmacy, nuclear medicine computer applications, and quantification of radioactivity in vivo and in vitro.

Students must earn a grade of C or higher in each course required for the major.

The following coursework is required.

Code	Title	Hours
RSNM:3120	Fundamentals of Nuclear Medicine and PET	3
RSNM:3121	Nuclear Medicine Technology Clinical Internship I	3
RSNM:3131	Radiopharmaceuticals	3
RSNM:3220	Nuclear Medicine and PET Clinical Procedures	3
RSNM:3221	Nuclear Medicine Technology Clinical Internship II	3
RSNM:3231	Nuclear Medicine Instrumentation	3
RSNM:3321	Nuclear Medicine Technology Clinical Internship III	6
RSNM:4121	Nuclear Medicine Technology Clinical Internship IV	4
RSNM:4221	Nuclear Medicine Technology Clinical Internship V	4
RSNM:4222	Nuclear Medicine Technology Capstone and Certification Exam Preparation	6
RSCT:4100	Sectional Anatomy for Imaging Sciences	3
RSCT:4120	Computed Tomography Procedures I	3
RSCT:4130	Computed Tomography Physical Principles and QC	4
RSP:2120	Patient Care for the Radiation Sciences	3
RSP:3130	Radiation Safety and Radiobiology	2
RSP:3210	Medical Ethics and Law	2
RSP:3220	Radiation Sciences Quality Management and Health Care Administration	2
RSP:4110	Research Methodology for Radiation Sciences	3

**Total Hours** **60**

## Career Advancement

The Nuclear Medicine Technology Program has a stellar record of job placement. Graduates typically work as nuclear medicine technologists, beginning as entry-level staff at

hospitals or clinics. With experience, many earn advanced degrees in areas such as radiation biology, health physics, or medicine. Some work in the private sector as sales or marketing specialists in nuclear medicine.

Graduates also find career opportunities in education as instructors, coordinators, or program directors; and in administration, industry, or research and development. Those pursuing government-related jobs might find positions as regulatory agency inspectors or radiation safety officers. See the Occupational Outlook Handbook for nuclear medicine technologists on the United States Department of Labor Bureau of Labor Statistics website for career information and outlook.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

**Total Hours** **120-124**

- a The Academic Advising Center advises Nuclear Medicine Technology Interest students on prerequisite course planning. Students are advised for success, based on academic strength, not necessarily for a four year plan. Prerequisites may take more than two years to complete.
- b This course is strongly recommended to prepare for the anatomy and physiology courses.
- c This course is recommended not required.
- d Students must complete 6 s.h. by taking 3 s.h. courses from two of the following areas: Diversity and Inclusion, Historical Perspectives, International and Global Issues, Literary, Visual, and Performing Arts, or Values and Culture.
- e Please see the Radiation Sciences Programs' website and your academic advisor for detailed application instructions and deadlines.
- f Choose from: HHP:1150, HHP:3115, HHP:1100 and HHP:1110, ACB:3110 and HHP:1110.
- g Enrollment in math courses requires completion of a placement exam.
- h Enrollment in chemistry courses requires completion of a placement exam.
- i Choose from: HHP:1350, HHP:3550, HHP:1300 and HHP:1310, HHP:3500 and HHP:1310.
- j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Obstetrics and Gynecology

## Interim Chair

- Brad VanVoorhis

**Faculty:** <https://medicine.uiowa.edu/obgyn/profile/?appointment=PRIMARY&category=&query=&page=1&size=10>

**Website:** <https://medicine.uiowa.edu/obgyn/>

Faculty in the Department of Obstetrics and Gynecology contribute to a wide spectrum of educational programs. A six-week core clerkship is taken by all Carver College of Medicine medical students. Subinternships are offered in high risk obstetrics (maternal fetal medicine) and gynecologic oncology. Advanced electives are offered in reproductive endocrinology and infertility, family planning, night float, and urogynecology. Approximately 12 physician assistant (PA) students also complete a one month rotation within the department as part of their training.

There are five Accreditation Council for Graduate Medical Education (ACGME) accredited fellowship programs—female pelvic medicine and reconstructive surgery (urogynecology), gynecologic oncology, maternal fetal medicine (high risk obstetrics), combined maternal fetal medicine/clinical genetics, and reproductive endocrinology and infertility.

## M.D. Training

Courses supported by the Department of Obstetrics and Gynecology are designed to give medical students a comprehensive survey of female reproductive medicine. This is accomplished through a variety of didactic lectures, outpatient clinical assignments, inpatient rounds, and surgery.

The clerkship OBG:8301 Clinical Obstetrics and Gynecology supports students in developing the core knowledge, skills, and attitudes needed to provide basic obstetric, gynecology, and/or primary health care to female patients.

The department offers medical students a variety of advanced electives that provide training in specialty areas of obstetrics and gynecology.

## Residency

The department offers a four-year obstetrics and gynecology residency. Upon completion, graduates are eligible to register and take the written and oral examinations leading to certification by the American Board of Obstetrics and Gynecology.

Residents are assigned to the various divisions and clinical services of the department. They care for hospital inpatients and outpatients with training in normal and abnormal obstetrics, gynecologic surgery, office gynecology, ultrasound, reproductive endocrinology, gynecologic oncology, urogynecology, and family planning, as well as a variety of minimally invasive and endoscopic procedures.

## Courses

### Obstetrics and Gynecology Courses

#### **OBG:8301 Clinical Obstetrics and Gynecology arr.**

Proficiency in evaluation and management of core women's health care relating to the reproductive tract; special history taking, physical examination, laboratory and imaging assessment of obstetric and/or gynecological patients, application of current concepts to well women's health care and to management of diseases and pathologies; outpatient and inpatient obstetrics and gynecology; family planning, screening and early detection of cancer and other diseases.

#### **OBG:8401 Advanced Inpatient Subinternship in High Risk Antepartum Obstetrics arr.**

Experience in evaluating new patients in a high-risk obstetric clinic; continuing antepartum care; doing work-up, ordering diagnostic studies, and following course of complicated patients admitted to obstetric ward; assisting in diagnostic, therapeutic procedures such as fetal heart rate testing, amniocentesis, ultrasonography, intrauterine fetal transfusion.

#### **OBG:8402 Advanced Inpatient Subinternship in Gynecologic Oncology arr.**

Experience on a gynecologic oncology service, including operating room, inpatient and outpatient care; team management approach to gynecologic cancer patients, treatment and follow-up of invasive gynecologic malignancies, etiology and risk factors for gynecologic neoplasias, pre- and postoperative evaluation and treatment of surgical management of gynecologic neoplasia; research project encouraged.

#### **OBG:8403 Reproductive Endocrinology arr.**

Experience evaluating new and returning patients in the Reproductive Endocrinology and Infertility Clinic; participation in preoperative, operative, and inpatient postoperative care; advanced gynecologic ultrasonography, in vitro fertilization services.

#### **OBG:8405 Urogynecology Advanced Elective 4 s.h.**

Experience as active member of urogynecology clinical team, participating in clinical care activities including outpatient clinic, outpatient procedures, inpatient surgery, hospital care; presentation to team on topic chosen by student.

#### **OBG:8407 Family Planning 4 s.h.**

Experience with the Family Planning Services team; clinical activities, including clinic and outpatient procedures. Requirements: M.D. enrollment.

#### **OBG:8409 Obstetrics and Gynecology Night Float 4 s.h.**

Four week rotation; students are paired with a night resident with responsibility for inpatients on gynecology services; when not actively engaged, students participate in resident team work on low-dynamic-range (LDR), gaining obstetrics (OB) procedural competency as well as assisting with management of inpatients and consultations as delegated by the night chief and/or staff call physician; students and night resident generally perform the initial assessment of emergency department or inpatient consults/admissions under immediate supervision of the night chief and/or faculty; students carry out plans discussed at evening sign-out for inpatient gynecology services. Requirements: M.D. enrollment.

**OBG:8450 Continuity of Care in Outpatient  
Gynecology**

**4 s.h.**

Experience with gynecologist in longitudinal clinical experience for the academic year; students paired with faculty member to see patients in weekly clinic and provide clinical care to defined patient population.

**OBG:8497 Research in Obstetrics and Gynecology arr.**

Medical research, clinical or laboratory projects; individual study.

**OBG:8498 Obstetrics and Gynecology On Campus arr.**

**OBG:8499 Obstetrics and Gynecology Off Campus arr.**

# Ophthalmology and Visual Sciences

## Chair

- Keith D. Carter

**Professional certificate:** orthoptics

**Faculty:** <https://medicine.uiowa.edu/eye/people/>

**Website:** <https://medicine.uiowa.edu/eye/>

Ophthalmology is a medical and surgical specialty concerned with the diagnosis and treatment of diseases of the eye and its surrounding structures. The Department of Ophthalmology and Visual Sciences combines postgraduate training with research and patient care in all aspects of the visual sciences. Subspecialties represented in the department include cataract surgery, comprehensive ophthalmology, cornea and external diseases, contact lens and refraction services, genetics and molecular biology, glaucoma, laser refractive surgery, neuro-ophthalmology, oculoplastic surgery, ocular echography, ocular pathology, ocular vascular diseases, optometric services, pediatric ophthalmology and adult strabismus, vitreoretinal disorders, and vision rehabilitation.

## Continuing Education

The department sponsors clinical conferences open to community ophthalmologists in Iowa and surrounding states where physicians can earn continuing medical education credits. The department also sponsors an annual alumni meeting with participation by nationally and internationally recognized ophthalmologists and vision scientists.

## Programs

### Professional Program of Study

#### Certificate

- Certificate in Orthoptics [p. 1801]

## M.D. Training

### M.D. Student Training, Graduate Education

The department offers clinical and research training to M.D. students. A three-year residency program with clinical experience in the ophthalmic subspecialties is offered to physician trainees. Graduates qualify for the written and oral examinations leading to certification by the American Board of Ophthalmology. Postgraduate fellowships of one to two years are available for qualified ophthalmologists in most subspecialty areas.

## Facilities

The department maintains research laboratories for cell biology, biochemistry, morphology, tumor diagnosis, pathology, electrophysiology, pupillography, molecular biology, and vascular disease. Clinical facilities in ophthalmology are available at University of Iowa Hospitals & Clinics in the Pomerantz Family Pavilion, the University of Iowa Stead Family Children's Hospital in the Pediatric Specialty Clinic, the Iowa River Landing, the VA Iowa City Health

Care, and the VA Central Iowa Health Care in Des Moines. The department also manages outreach programs in other communities. The John and Marcia Carver Nonprofit Genetic Testing Laboratory, dedicated to providing affordable testing for rare eye diseases, is associated with the department.

## Courses

### Ophthalmology and Visual Sciences Courses

<b>OPHT:8301 Clinical Ophthalmology</b>	<b>2 s.h.</b>
All aspects of clinical ophthalmology; clinical experience, lectures, case presentations; clinical duties with staff, residents, and faculty in University of Iowa Hospitals & Clinics (UIHC) and Iowa City VA Medical Center (VAMC) ophthalmology clinics. Requirements: M.D. enrollment.	
<b>OPHT:8401 Elective in External Eye Disease</b>	<b>4 s.h.</b>
Common diseases of eyelid, conjunctiva, and cornea.	
<b>OPHT:8402 Elective in Neuro-Ophthalmology</b>	<b>4 s.h.</b>
Visual, ocular motor dysfunction due to neurologic disease; patient work-up, readings, neuro-ophthalmology rounds.	
<b>OPHT:8403 Molecular Ophthalmology</b>	<b>4 s.h.</b>
Use of recombinant DNA, tissue culture, protein electrophoresis in study of inherited eye diseases.	
<b>OPHT:8404 Elective in Ocular Pathology</b>	<b>4 s.h.</b>
Pathophysiology of eye disease.	
<b>OPHT:8405 Advanced Ophthalmology - Veterans Affairs</b>	<b>4 s.h.</b>
Opportunity for in-depth clinical experience in assessment and management of ophthalmology patients; students serve on the Iowa City VA Health Care System ophthalmology team and see outpatients and emergency room visits alongside residents and faculty.	
<b>OPHT:8406 Plastic and Reconstructive Surgery</b>	<b>4 s.h.</b>
Topics in ophthalmic plastic and reconstructive surgery.	
<b>OPHT:8497 Research in Ophthalmology</b>	<b>arr.</b>
Medical research, clinical or laboratory projects; individual study.	
<b>OPHT:8498 Ophthalmology On Campus</b>	<b>arr.</b>
<b>OPHT:8499 Ophthalmology Off Campus</b>	<b>arr.</b>

# Orthoptics, Professional Certificate

## Requirements

The professional Certificate in Orthoptics is a postgraduate certificate program. The orthoptic fellowship is offered by the Department of Ophthalmology and Visual Sciences. A prerequisite baccalaureate degree is required for application.

Orthoptics is an allied health profession and clinical science pertaining to the study of eye movements, visual function, and binocular cooperation. An orthoptist is an eye muscle specialist who works under the supervision of an ophthalmologist.

The majority of the 24-month training period is spent in a clinical setting. At the completion of the training period, candidates take written and practical board examinations administered by the American Orthoptic Council.

The first four to six weeks are spent reviewing general anatomy and physiology, and learning the basic anatomy, physiology, and terminology of the eye. Students are introduced to patient examination initially by observation of physicians and orthoptists, and gradually build up their exam skills as each new technique is learned. Over the first six months, optics and principles of strabismus (eye misalignment) and amblyopia (lazy eye) are taught in depth.

In the second six months of training, students expand their knowledge of basic orthoptic and ophthalmologic principles and apply them to a more complete patient examination and diagnostic skills.

The remaining months are spent examining patients in clinic, mastering examination techniques, and differential diagnosis as well as becoming proficient in the interpretation of diagnostic tests. At this stage, orthoptic students participate in the prescription of specific types of nonsurgical therapy. Each week, time is reserved for ophthalmic and orthoptic lectures, personal study time, or testing.

Contact the Department of Ophthalmology and Visual Sciences for information about the Certificate in Orthoptics.

# Orthopedics and Rehabilitation

## Chair

- J. Lawrence Marsh

**Graduate degree:** M.S. in athletic training

**Faculty:** <https://medicine.uiowa.edu/orthopedics/leadership>

**Website:** <https://medicine.uiowa.edu/orthopedics/>

The Department of Orthopedics and Rehabilitation offers a Master of Science degree in athletic training as well as a training program for residents. The department offers multiple education programs that include medical student education, orthopedic resident education, postgraduate education, and graduate athletic trainer education.

## Programs

### Graduate Program of Study

#### Major

- Master of Science in Athletic Training [p. 1806]

## Residency

The department offers a five-year integrated clinical program for postgraduate trainees, in which interns and residents participate simultaneously in inpatient and outpatient care, surgery, and sciences related to the neuromusculoskeletal system.

Trainees enter this program directly from medical school through the National Residency Matching Program.

During the first year, trainees gain experience not only in clinical orthopedics but also in surgical specialties, intensive care, radiology, and surgical skills.

During years two through five, residents gain experience in the diagnosis and management of adult and pediatric orthopedic disorders, including joint reconstruction; trauma, including multisystem trauma; surgery of the spine, including disk surgery, spinal trauma and deformities; hand and foot surgeries; athletic injuries and orthopedic rehabilitation; orthopedic oncology, including metastatic disease; and amputations as well as post-amputation care and nonoperative outpatient diagnosis and care, including all orthopedic anatomic areas.

## Facilities

The Department of Orthopedics and Rehabilitation is housed in the John Pappajohn Pavilion of University of Iowa Hospitals & Clinics and has an active service in the VA Iowa City Health Care. The department's facilities include 48 orthopedic beds, ten outpatient clinics, inpatient and outpatient operating rooms, a specialty library, a specialty radiology unit, and physical therapy and rehabilitation facilities. Its specialty clinics deal with virtually every orthopedic disorder known, including, but not limited to scoliosis, club feet, congenital dislocated hip, neuromuscular disease, metabolic disease, amputation, neoplasm, trauma, and neck, back, hip, foot, knee, and hand problems. Physicians in the outpatient clinic see approximately 280 patients per day and over

70,000 patients per year. Approximately 7,000 surgeries are performed each year.

The department's Sports Medicine Clinic provides MRI, X-ray, and physical therapy services, and a full range of nonoperative orthopedic ambulatory care services.

## Laboratories

The orthopedics laboratories deal with problems in these major subject areas.

### Biochemistry

The biochemistry of proteoglycans, collagens, and matrix proteins, both normal and altered in musculoskeletal disorders.

### Biomechanics

Problems of the upper extremity; biomechanics of the spine, hip, and gait; total joint replacements (in conjunction with the College of Engineering [p. 1460]).

### Bone Healing

Provides research toward better ways to heal bones.

### Cell and Molecular Biology

Studies of normal bone, cartilage, tendon, muscle, and tissues altered by experiment and disease.

## Courses

- Orthopedics and Rehabilitation Courses [p. 1802]
- Athletic Training Courses [p. 1803]

## Orthopedics and Rehabilitation Courses

<b>ORTH:8301 Clinical Orthopedics</b>	<b>arr.</b>
<b>ORTH:8401 Advanced Clinical Orthopedics</b>	<b>2,4 s.h.</b>
Requirements: fourth-year M.D. enrollment.	
<b>ORTH:8402 Advanced Inpatient Subinternship in Orthopedics: Trauma</b>	<b>4 s.h.</b>
Requirements: fourth-year M.D. enrollment.	
<b>ORTH:8403 Advanced Inpatient Subinternship in Orthopedics: Adult Hip/Knee Reconstruction</b>	<b>4 s.h.</b>
Opportunity to enhance clinical skills by taking intern-level responsibility for management of a limited number of orthopedic patients; proficiency in perioperative patient assessment and management, including assisting in procedures and using laboratory diagnosis and radiologic studies pertinent to one faculty member's clinical practice.	
<b>ORTH:8404 Introduction to Physical Medicine and Rehabilitation</b>	<b>2 s.h.</b>
Management of a wide range of common acute and chronic neuro-musculoskeletal pain conditions (shoulder, back, knee pain) to more devastating neuromuscular injuries (spinal cord injuries, brain injury, strokes, amputations). Requirements: M.D. enrollment.	

**ORTH:8405 Advanced Physical Medicine and Rehabilitation****4 s.h.**

Management of a wide range of common acute and chronic neuro-musculoskeletal pain conditions (shoulder, back, or knee pain) to more devastating neuromuscular injuries (spinal cord injuries, brain injury, strokes, amputations); students work-up individual patients in outpatient clinics and perform inpatient consultations at subintern level. Prerequisites: ORTH:8404. Requirements: M.D. enrollment.

**ORTH:8406 Physical Medicine and Rehabilitation Acute Inpatient Rehab, Cedar Rapids****2 s.h.**

Physical medicine and rehabilitation clerkship; participation in daily clinical activities including inpatient rounds, interdisciplinary team meetings, observing a variety of therapy sessions, and inpatient consults.

**ORTH:8407 Orthopedics: Adult Hip/Knee Reconstruction****4 s.h.**

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

**ORTH:8408 Orthopedics: Trauma****4 s.h.**

Development of in-depth skills in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

**ORTH:8409 Orthopedics: Pediatrics****4 s.h.**

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

**ORTH:8410 Orthopedics: Sports Medicine****4 s.h.**

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

**ORTH:8411 Orthopedics: Hand/Wrist/Elbow****4 s.h.**

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

**ORTH:8412 Orthopedics: Spine****4 s.h.**

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

**ORTH:8413 Orthopedics: Oncology/Tumor****4 s.h.**

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

**ORTH:8414 Orthopedics: Veterans Affairs****4 s.h.**

Participation in the Veterans Affairs service general orthopedics; development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

**ORTH:8415 Orthopedics: Foot/Ankle****4 s.h.**

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

**ORTH:8416 Physical Medicine and Rehabilitation Acute Inpatient Rehab, Iowa Rehabilitation Hospital****2 s.h.**

Physical medicine and rehabilitation clerkship; participation in daily clinical activities including inpatient rounds, interdisciplinary team meetings, observation of a variety of therapy sessions, and inpatient consults.

**ORTH:8497 Research in Orthopedics****arr.**

Medical research, clinical or laboratory projects; individual study.

**ORTH:8498 Orthopedics On Campus****arr.**

Requirements: fourth-year M.D. enrollment.

**ORTH:8499 Orthopedics Off Campus****arr.**

Requirements: fourth-year M.D. enrollment.

## Athletic Training Courses

**AT:3060 Advanced Anatomy for Athletic Training****4 s.h.**

Extremities and relevant body cavity anatomy; anatomical terminology, anatomical relationships of human body, 3D view of anatomy, clinical relevance of anatomy; basic science lectures, radiologic imaging discussions, introduction to clinically relevant anatomy, gross anatomy dissection laboratories, small group learning and teaching, and computer-assisted resources.

**AT:4000 Foundations of Athletic Training Practice****3 s.h.**

Introduction to athletic training; basic components of a prevention program; injury/illness assessment process including general injury classifications, medical terminology, and patient documentation skills); anatomical basis and technical aspects of applying clinical proficiencies relating to orthopedic applications in the care and prevention of injuries relating to physically active individuals including taping, wrapping, and pad fabrication; basic evaluation skills including goniometric measurements, manual muscle testing, and anatomical palpations.

**AT:4075 Medical Emergency Techniques****2 s.h.**

Educational competencies and clinical proficiencies; focus on emergency medical practice in athletic training using current evidence-based interventions for medical, orthopedic, and environmental emergencies; knowledge of Emergency Medical Service (EMS) system and role athletic trainers play in the acute-care process; emergency pharmacological interventions and other advanced care skills.

**AT:4125 Clinical Experience I****3 s.h.**

Integration of clinical competencies through a supervised field experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; first in a four-part series.

**AT:4200 Orthopedic Pathology and Clinical Examination I 4 s.h.**

Pathomechanics, clinical examination, diagnosis, and appropriate basic treatment plans for orthopedic injuries to the lower extremity and spine; application of theories and skill practice through real-patient interactions and documentation; surgical observation and physician interactions; first in a two-part series.

**AT:4250 Orthopedic Pathology and Clinical Examination II 4 s.h.**

Pathomechanics, clinical examination, diagnosis, and appropriate basic treatment plans for orthopedic injuries to the upper extremity, head, and C-spine; application of theories and skill practice through real-patient interactions and documentation; surgical observation and physician interactions; second in a two-part series. Prerequisites: AT:4200.

**AT:4300 Therapeutic Interventions 2 s.h.**

Introduction to theory, application, and treatment of orthopedic conditions using common therapeutic modalities; application of evidence-based research in planning, implementation, documentation, and evaluation of the efficacy of each therapeutic modality in treatment of injuries and illnesses of patients involved in physical activity; emphasis on indications, contraindications, and precautions; integration of patient-based outcome measures to aid in appropriate clinical decision making.

**AT:4375 Nutrition for Athletic Training 2 s.h.**

Interaction between nutrition, exercise, and athletic performance; biomechanical and physiological aspects of nutrition and exercise; nutrition for training and competition; impact of nutrition on healing processes, nutritional supplements, and ergogenic aids; nutritional aspects of body composition and weight control; demonstration of ability to plan and implement proper sport nutrition.

**AT:4400 Rehabilitation Techniques 3 s.h.**

Rehabilitation for athletic trainers based on theory and principles of therapeutic exercise using current evidence-based concepts; focus on pathology and mechanics of exercise therapy in treatment of musculoskeletal injuries; use of mechanical exercise equipment, stressing safety and use of proper body mechanics during exercise, as well as indications and contraindications for different exercises.

**AT:4450 Applied Rehabilitation Concepts 3 s.h.**

Functional, scientific approach to designing strength and conditioning programs for various populations; testing protocols used for measuring fitness, body composition, flexibility, strength, power, speed, and endurance; evaluation of posture and workplace ergonomics; manual therapy theory and techniques for orthopedic injuries, indications and contradictions, skill development in soft tissue assessment, application of manual and tool-assisted techniques; review of resistance training and program prescription based on literature. Prerequisites: AT:4400.

**AT:4525 Clinical Experience II 4 s.h.**

Integration of clinical competencies through a supervised field experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; second of a four-part series. Prerequisites: AT:4125.

**AT:5000 Pathology and Assessment of Non-Orthopedic Conditions 3 s.h.**

Introduction to recognition, assessment, and appropriate intervention or referral strategies for non-orthopedic conditions and disabilities; pathophysiology at cellular, organ, and total body levels applied in each organ system; systems may include cardiovascular, pulmonary, renal, dermatologic, reproductive, endocrine, neurologic, and gastrointestinal; additional topics include gender and pediatric pathology, ENT/ophthalmology, abdominal evaluation, and common contagious illnesses.

**AT:5075 Diagnostic Imaging and Lab Studies 1 s.h.**

Common diagnostic tests and radiological techniques used commonly by medical community in assessment and diagnosis of common orthopedic and non-orthopedic conditions; students gain knowledge and skills to identify anatomy, pathology, and proper terminology used by health care professionals when discussing diagnostic tests/results; coverage of multiple biological systems and organs of the human body to understand indications, contraindications, and clinical implications for each technique.

**AT:5200 Pathophysiology and Pharmacology in Sports Medicine 2 s.h.**

Pharmacologic applications for injury/illness sustained by various physically active populations; therapeutic drug classifications, indications, contraindications, interactions of medications, drug testing in sport, and relevant governing regulations; emphasis on drugs commonly used for orthopedic injuries, common conditions and illnesses, mental health and their effects on sport performance, and tissue healing.

**AT:6100 Research in Athletic Training 2 s.h.**

Identification of an athletic training problem/issue and examination through theories and research; analysis of literature and derivation of evidence-based concepts for clinical decision making and data-informed practice; use of appropriate academic writing style; differentiation between quantitative and qualitative research; critically responding to research dilemma in a way that aligns professional ethics and values; first in a two-part series.

**AT:6125 Clinical Experience III 6 s.h.**

Complete professional immersive clinical experience; integration of basic and complex clinical competencies through a supervised clinical experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; third in a four-part series. Prerequisites: AT:4525.

**AT:6200 Administration and Leadership 2 s.h.**

Overview of organization and administration of athletic training services; topics include organizational structures, human resources, information management, budget and finance, risk management, legal and ethical considerations in health care, purchasing and maintenance of equipment and facilities, and development of policies and procedures for daily operation of athletic training services.

**AT:6250 Applied Research in Athletic Training 2 s.h.**

Application of research models to athletic training topics; use of appropriate academic writing style; application of basic statistical measures to address clinical problems; continuation and completion of research projects from AT:6100; culminates with dissemination of research findings; second in a two-part series. Prerequisites: AT:6100.

**AT:6300 Psychosocial Recognition and Referral 2 s.h.**

Psychological factors relative to injury, rehabilitation, and performance; strategies for identifying problems, intervening, and making referrals especially related to psychological disorders, decreased performance, and health/substance abuse; exploration of various theories and models of cultural competence through the lens of sports medicine; students examine and analyze roles of cultural differences including cultural attitudes, beliefs, and expectations as they pertain to effective health care in diverse settings.

**AT:6400 Seminar in Athletic Training 2 s.h.**

Review of knowledge, skills, and abilities for successful pursuit of athletic training Board of Certification (BOC) credential and processes to obtain employment; résumé development and interviewing skills; emphasis on regulation of practice; professional and ethical responsibilities contributing to practice of athletic training; creation of a professional development plan.

**AT:6450 Advanced Topics in Athletic Training 1 s.h.**

Investigation and discussion of current events and advanced topics in athletic training and related health professions; evaluation of current professional and legislative issues in athletic training; discussions vary depending on current relevant topics.

**AT:6525 Clinical Experience IV 5 s.h.**

Integration of clinical competencies through a supervised clinical experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; last in a four-part series. Prerequisites: AT:6125.

# Athletic Training, M.S.

Athletic trainers are health care professionals who render service or treatment under the direction of, or in collaboration with, a physician in accordance with their education and training and the states' statutes, rules, and regulations. Services provided by athletic trainers include injury and illness prevention, wellness promotion and education, emergent care, examination and clinical diagnosis, therapeutic intervention, and rehabilitation of injuries and medical conditions.

Students who want to become certified athletic trainers may earn the M.S. degree or pursue the combined program as they earn the B.A. in health and human physiology (exercise science track) and the M.S. in athletic training. See the B.A. in health and human physiology [p. 626] (College of Liberal Arts and Sciences) in the Catalog.

The University of Iowa is accredited by the Commission on Accreditation of Athletic Training Education (CAATE).

## Learning Outcomes

Upon graduation, students will:

- communicate effectively among health care providers, patients, and all other stakeholders in their delivery of health care;
- practice with professionalism and integrity adhering to the Code of Ethics outlined by the National Athletic Trainers' Association (NATA) and the Code of Professional Responsibility by the Board of Certification (BOC);
- demonstrate cognitive and psychomotor competence and clinical proficiency based on clinically relevant research in the following BOC Practice Analysis content areas— injury and illness prevention and wellness promotion; examination, assessment, and diagnosis; immediate and emergency care; therapeutic intervention; and health care administration and professional responsibility;
- demonstrate critical thinking to effectively solve problems in a variety of dynamic athletic training environments;
- demonstrate growth in cultural competence among health care providers, patients, and all other stakeholders in their delivery of health care; and
- demonstrate a Kaizen philosophy in their learning and professional practice.

## Requirements

The Master of Science program in athletic training requires 62 s.h. of coursework. Students must maintain a cumulative g.p.a. of at least 3.00 and must earn a grade of C-minus or higher in all major coursework.

The program involves two full years, including summer sessions, of concentrated didactic and clinical experiences that lead to eligibility for the Board of Certification examination.

The M.S. with a major in athletic training requires the following work.

Code	Title	Hours
AT:3060	Advanced Anatomy for Athletic Training	4
AT:4000	Foundations of Athletic Training Practice	3

AT:4075	Medical Emergency Techniques	2
AT:4125	Clinical Experience I	3
AT:4200	Orthopedic Pathology and Clinical Examination I	4
AT:4250	Orthopedic Pathology and Clinical Examination II	4
AT:4300	Therapeutic Interventions	2
AT:4375	Nutrition for Athletic Training	2
AT:4400	Rehabilitation Techniques	3
AT:4450	Applied Rehabilitation Concepts	3
AT:4525	Clinical Experience II	4
AT:5000	Pathology and Assessment of Non-Orthopedic Conditions	3
AT:5075	Diagnostic Imaging and Lab Studies	1
AT:5200	Pathophysiology and Pharmacology in Sports Medicine	2
AT:6100	Research in Athletic Training	2
AT:6125	Clinical Experience III	6
AT:6200	Administration and Leadership	2
AT:6250	Applied Research in Athletic Training	2
AT:6300	Psychosocial Recognition and Referral	2
AT:6400	Seminar in Athletic Training	2
AT:6450	Advanced Topics in Athletic Training	1
AT:6525	Clinical Experience IV	5

**Total Hours** **62**

## Admission

Admission to the Master of Science program is competitive with a limited number of students admitted for each cohort. Applicants are expected to meet technical standards, pass a background check, and comply with health and safety standards, including vaccination requirements. Students are required to provide their own transportation to all clinical experiences and are responsible for all costs they incur during travel, including parking and gas.

To be considered for the Master of Science program in athletic training, applicants must:

- have completed a B.A. or B.S. degree at an accredited institution in the United States or have completed the first three years with at least 80 s.h. of undergraduate work for the 3+2 combined program at the University of Iowa;
- have completed 30 s.h. at the University of Iowa if a transfer student;
- have a cumulative undergraduate g.p.a. of at least 3.00 or a cumulative g.p.a. of at least 3.25 in the Undergrad to Grad (U2G) combined program;
- submit an application to the Graduate College through the Athletic Training Centralized Application Service (ATCAS), set up a University of Iowa account, and pay the supplemental fee;

- include two letters of recommendation—one from a medical professional and one from an academic professional;
- submit a résumé;
- include a statement of purpose and career goals;
- submit a Test of English as a Foreign Language (TOEFL) score (only the iBT—Internet-Based Test is accepted with a total score of 93 and a speaking score of 26) and the test must have been taken within the last two years, or submit a current acceptable score from the International English Language Testing System (IELTS) or from the Duolingo English Test (DET) if an international applicant and if English is not student's first language;
- have current CPR certification obtained within one year—Basic Life Support (BLS) or professional rescuer level and consistent with Board of Certification standards;
- have current first aid certification obtained within one year;
- submit a signed copy of the program's Technical Standards for Admission form;
- have completed a minimum of 50 hours of observation under a certified athletic trainer;
- have completed required prerequisite coursework with a grade of C or higher in biology, chemistry, physics, human anatomy, human physiology, exercise physiology, general psychology, biomechanics or kinesiology, nutrition, and statistics (see list below); and
- have completed additional recommended coursework in medical terminology, introductory athletic training, public health, motor learning, or psychology courses in areas such as abnormal, adolescent, or sports psychology.

Community college coursework is accepted as well as online coursework from accredited universities. AP and CLEP coursework may satisfy course requirements if listed on a college transcript.

Students must earn a grade of C or higher in these prerequisite courses.

Code	Title	Hours
	Biology (preferred human biology; with or without lab)	3
	Biomechanics or kinesiology	3
	Chemistry (with or without lab)	3
	Exercise physiology	3
	Human anatomy (may be taken combined with human physiology; two semesters minimum, if combined)	3
	Human physiology (may be taken combined with human anatomy; two semesters minimum, if combined)	3
	Nutrition (general or sport)	3
	Physics (with or without lab)	3
	Psychology (general psychology is required; additional psychology coursework recommended)	3
	Statistics	3

All application materials are due by February 1. Following the February 1 deadline, applications will be accepted on a continuing basis until program capacity is met. A personal interview is required. Coursework begins during the summer session.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Career Advancement

Athletic trainers have opportunities for employment in many areas. They include career options in:

- public and private secondary schools, colleges and universities, professional and Olympic sports;
- youth leagues, municipal and independently owned youth sports facilities;
- physician offices;
- rural and urban hospitals, hospital emergency rooms, urgent and ambulatory care centers;
- clinics with specialties in sports medicine, cardiac rehabilitation, medical fitness, wellness, and physical therapy;
- occupational health departments in commercial settings, which include manufacturing, distribution, and offices to assist with ergonomics;
- police and fire departments, academies, municipal departments, and branches of the military; and
- performing arts areas, including professional and collegiate-level dance and music settings.

## Academic Plans

### Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

### Athletic Training, M.S.

This sample plan is currently being updated and will be added at a later date.

# Otolaryngology—Head and Neck Surgery

## Chair

- Marlan R. Hansen

**Faculty:** <https://medicine.uiowa.edu/oto/profile>

**Website:** <https://medicine.uiowa.edu/oto/>

The Department of Otolaryngology—Head and Neck Surgery is one of the most comprehensive otolaryngology departments in the world. Founded in 1922, it is among the oldest in the United States. *U.S. News & World Report* has consistently ranked the department's program among the top 10 in the nation.

The department's chief focus areas are education and training, patient care, and research. M.D. students in the Carver College of Medicine, residents, and fellows benefit from a faculty dedicated to providing thorough training in all aspects of otolaryngology and patient care. Patients in the otolaryngology clinic enjoy access to comprehensive care in any of five subspecialties: pediatric otolaryngology, otology/neurotology, general otolaryngology and rhinology, head and neck oncology, and facial plastic and reconstructive surgery. University of Iowa faculty members from ophthalmology and visual sciences and radiation oncology hold joint appointments in otolaryngology, adding depth to the department's resources.

The department is home to prominent research programs in cleft palate and other craniofacial defects, head and neck oncology, cochlear implants, and molecular genetics. It also offers fellowships in otology/neurotology, pediatric otolaryngology, and head and neck oncology.

The department is located at University of Iowa Hospitals & Clinics.

## Fellowships

The Department of Otolaryngology—Head and Neck Surgery offers a two-year fellowship in otology/neurotology and a one-year fellowship in pediatric otolaryngology, which are accredited by the Accreditation Council for Graduate Medical Education. It also offers a one-year fellowship in head and neck oncology accredited by the Advanced Training Council of the American Head and Neck Society.

The otology/neurotology fellowship program accepts one applicant every two years. Otolaryngology fellows spend a minimum of 20 months in clinical service. They attend all otology/neurotology clinics and neurotology cases in the operating room and are responsible for inpatient service. They also have one day of dedicated research time each week.

The pediatric otolaryngology fellowship program accepts one applicant each year. Fellows spend a year in clinical service, where they have the opportunity to train with all pediatric otolaryngology faculty members.

One applicant is accepted as a head and neck oncology fellow each year. Training is largely clinical, allowing fellows the opportunity to participate in a variety of procedures, ranging from skull base resection to laryngeal rehabilitation. Fellows routinely perform 35 to 45 free-tissue transfers during one year of training. They also complete a clinical and/or basic science research project relating to head and neck oncology.

## Residency

The Department of Otolaryngology—Head and Neck Surgery offers a residency program accredited by the Accreditation Council for Graduate Medical Education. The program has two tracks: a five-year clinical track and a seven-year research track. Five applicants are accepted each year, three to the clinical track and two to the research track.

The clinical track provides five years of concentrated clinical study and application in all aspects of otolaryngology. Residents begin their training with a five-week intensive basic science course divided into an anatomy component and a 100-hour lecture series. The anatomy component includes a supervised cadaver dissection, and the lecture series details the study of otolaryngology and related disciplines. Residents also complete two research rotations in order to explore research areas that interest them.

The research track is a combined clinical-research program designed for residents interested in an otolaryngology research career. After an internship year, residents complete two years of research followed by four years of clinical training. The interaction of clinicians and basic scientists from several departments affords residents the opportunity for involvement in a wide spectrum of current research in areas such as electrophysiology of the auditory system, the genetics of head and neck cancer, and gene therapy.

## Courses

### Otolaryngology—Head and Neck Surgery Courses

<b>OTO:8199 Basic Otolaryngologic Science</b>	<b>arr.</b>
Supervised cadaver head and neck dissection, with 14 areas in detail. Two weeks.	
<b>OTO:8301 Clinical Otolaryngology</b>	<b>2 s.h.</b>
<b>OTO:8401 Subinternship in Otolaryngology</b>	<b>arr.</b>
<b>OTO:8402 Advanced Otolaryngology</b>	<b>4 s.h.</b>
Students become proficient in physical examination of the head and neck; increase their ability to diagnose, evaluate, and manage common disorders of the ears, nose, and throat; and work in outpatient clinic, on inpatient services, and in operating room.	
<b>OTO:8497 Research in Otolaryngology</b>	<b>arr.</b>
Medical research, clinical or laboratory projects; individual study.	
<b>OTO:8498 Otolaryngology On Campus</b>	<b>arr.</b>
<b>OTO:8499 Otolaryngology Off Campus</b>	<b>arr.</b>
Arranged by student with department approval.	

# Pathology

## Chair

- Nitin J. Karandikar

## Director, Clinical Functions

- Roseanne Meyer

**Graduate degree:** M.S. in pathology

**Faculty:** <https://medicine.uiowa.edu/pathology/people>

**Website:** <https://medicine.uiowa.edu/pathology/>

The Department of Pathology offers education and training for a broad range of students, from undergraduates through postgraduate fellows and researchers. It provides basic pathology courses to health sciences students, a clinical training program for medical laboratory scientists, a Master of Science program in pathology, residency training programs leading to American Board of Pathology certification in anatomic pathology and clinical pathology, fellowship training in pathology subspecialties, and postdoctoral research training in cellular and molecular pathology.

## Undergraduate Education

Pathology courses are a major component of the University's program in Medical Laboratory Science, a Bachelor of Science program that trains medical laboratory scientists; see Medical Laboratory Science [p. 1769] in the Catalog.

## Postgraduate Training

The Department of Pathology offers postgraduate clinical fellowship programs in hematopathology, transfusion medicine, clinical microbiology, cytopathology, molecular genetic pathology, and surgical pathology for physicians who have completed residency training in pathology. These fellowships consist of one to two years of diagnostic work and research.

The department provides postdoctoral research training in immunology, neuropathology, apoptosis, cancer biology, and clinical microbiology as well as in other areas of cellular and molecular pathology. These positions are open to individuals who have earned a Ph.D. or an M.D. degree.

## Programs

## Graduate Programs of Study

### Majors

- Master of Science in Pathology [p. 1811]
- Experimental pathology subprogram for the Doctor of Philosophy [p. 1602] in Biomedical Science

Students interested in doctoral studies in experimental pathology should apply under the umbrella program in Biomedical Science [p. 1599] (select experimental pathology subprogram).

## M.D. Training

The department provides five to seven 12-month fellowships for M.D. students (pathology externship), for students interested in careers as pathologists, and the Emory Warner Fellowship, a full-time research position in a facet

of experimental pathology. It also offers clerkships for M.D. students in all areas of anatomical and clinical pathology.

## Residency

The department offers 20 residency positions in pathology, which provide up to four years of training. Patients at University of Iowa Hospitals & Clinics and the VA Iowa City Health Care are integral to the residency programs.

Residents gain experience in systematic rotation through the varied laboratory services, including surgical pathology, autopsy pathology, neuropathology, dermatopathology, cytology, clinical chemistry, clinical microbiology, hematology, immunopathology, molecular pathology, and transfusion medicine. They also have the opportunity to pursue one or two years of additional fellowship training in many pathology subspecialties. To learn more, see Education on the Department of Pathology website.

## Facilities

The Department of Pathology is well-equipped to carry out the sophisticated technology of modern cellular and molecular pathology. It administers more than 90,000 square feet of clinical laboratories at University of Iowa Hospitals & Clinics and has individual research and core facility laboratories, including histopathology and laser capture microscopy for cellular and molecular pathology research, in the Medical Research Center, Medical Laboratories, and at the VA Iowa City Health Care. Also available are Carver College of Medicine research facilities for nucleic acid chemistry, hybridoma production, flow cytometry, ultrastructural studies, protein structure, image analysis, electron spin resonance, mass spectroscopy, nuclear magnetic resonance, and laboratory animal care.

## Courses

### Pathology Courses

**PATH:4151 MLS Program Registration** **0 s.h.**  
Requirements: admission to Medical Laboratory Science Program.

**PATH:5260 Translational Histopathology** **3 s.h.**  
Didactic sessions on human comparative histology, molecular and cellular pathology, and animal model applications; laboratory sessions on microscopy, histology, histotechnology, and immunohistochemistry, with group discussions of model papers; experience in scientific writing and oral presentation skills; for students who plan to investigate experimental models of human disease.

**PATH:5270 Pathogenesis of Major Human Diseases** **3 s.h.**  
Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Offered spring semesters of even years. Same as IGPI:5270, MMED:5270.

**PATH:5461 Introduction to Morphology in Research** **1 s.h.**  
Introduction to the histologic examination of organs and tissues utilizing human and/or animal examples; organ identification, comparative morphology, use of histologic techniques (e.g., stains).

**PATH:6220 Seminar in Pathology 1 s.h.**

Current research and literature. Requirements: pathology graduate standing.

**PATH:7001 Molecular and Cellular Biology of Cancer 3 s.h.**

Fundamental aspects of oncology at cellular and molecular levels; mechanisms of cancer initiation and progression, oncogene action, DNA damage and repair, carcinogenesis by radiation, chemicals, viruses; tumor immunology, anticancer therapies. Offered spring semesters. Requirements: strong basic science background. Same as FRRB:7001.

**PATH:7211 Research in Pathology arr.**

Basic aspects of pathology or clinical patient material; emphasis on experimental design, methods, literature review, obtaining formal answers to specific questions. Requirements: M.D. enrollment or graduate standing.

**PATH:8007 Medical Student Fellowships in Pathology (Externships) 0 s.h.**

First-hand experience in autopsy, surgical and clinical pathology, teaching, and research to further understanding of disease mechanisms, normal and pathologic anatomy, laboratory use.

**PATH:8008 Warner Fellowship in Experimental Pathology 0 s.h.**

One-year, full-time membership in established research laboratory in the Department of Pathology or collaborating laboratory. Requirements: M.D. enrollment.

**PATH:8133 Introduction to Human Pathology for Graduate Students 3-4 s.h.**

Human disease; basic disease processes, organ-related and multisystem diseases; case analysis. Offered fall semesters.

**PATH:8301 Laboratory Medicine in Clinical Practice arr.**

Issues in appropriate use of clinical laboratory and pathology resources in the primary care setting; case-based approach. Requirements: third- or fourth-year M.D. enrollment.

**PATH:8401 Autopsy Pathology Clerkship arr.****PATH:8402 Hematopathology Clerkship arr.****PATH:8403 Surgical Pathology Clerkship arr.****PATH:8404 Transfusion Medicine arr.****PATH:8405 Clinical Microbiology 2,4 s.h.**

Students rotate through bacteriology, molecular microbiology, mycology, mycobacteriology, and virology while participating in clinical and technical activities.

**PATH:8497 Research in Pathology arr.**

Medical research, clinical or laboratory projects; individual study with department approval.

**PATH:8498 Pathology On Campus arr.****PATH:8499 Pathology Off Campus arr.**

# Pathology, M.S.

The M.S. program in pathology prepares postbaccalaureate science majors for a range of biomedical careers. Graduate-level coursework provides students with a foundation in cellular and molecular biology, as well as specialized knowledge in pathobiology. A laboratory intensive thesis project equips trainees with cutting edge research skills. Students typically complete the program in two and one-half years.

## Requirements

The Master of Science program in pathology requires a minimum of 30 s.h. of graduate credit, including 21 s.h. of coursework and 9 s.h. of research leading up to the thesis. Students must maintain a program g.p.a. of at least 2.75.

The M.S. with a major in pathology requires the following coursework.

## Required Coursework

Code	Title	Hours
All of these:		
PATH:5270/ MMED:5270	Pathogenesis of Major Human Diseases	3
PATH:6220	Seminar in Pathology (taken two semesters for 1 s.h. each)	2
BIOS:4120	Introduction to Biostatistics	3
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
<b>Total Hours</b>		<b>11</b>

Required coursework results in:

- a basic understanding of molecular and cellular biology,
- a basic understanding of biostatistics, and
- an advanced understanding of pathobiology and mechanisms of human disease.

## Electives

Remaining graduate-level coursework consists of electives focused on the area or topic related to a student's thesis project. The elective courses are offered by a range of departments on the biomedical campus.

## Thesis

The thesis project is carried out under the guidance of the mentor and thesis committee. The committee is composed of a student's mentor and two additional faculty members. In general, the thesis consists of four chapters with the first being a concise review of the literature; the second, materials and methods; and the last two, a scholarly description of the project results. The thesis must be defended before the committee prior to final approval.

For more information, view the Master of Science in Pathology on the Department of Pathology website.

## Admission

Applicants must have a bachelor's degree in a science discipline and a g.p.a. of at least 3.00. In addition, previous research experience is highly desired. Applicants who are available for an on-site interview are preferred.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or Duolingo (DET). Test scores must meet Graduate College requirements.

Graduate Record Examination (GRE) General Test scores are no longer required to apply.

Students who are applying must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

All pathology graduate students receive full stipend and tuition support until they complete the program. Stipend amounts are at the same level as other graduate programs on the biomedical campus. The program also pays most of the costs for health and dental insurance.

## Career Advancement

The M.S. program in pathology is designed for graduates to advance into research assistant or research scientist positions in academic and private sector laboratories, or to be competitive for advanced degree programs such as the Ph.D., M.B.A., or M.D.

# Physical Therapy and Rehabilitation Science

## Chair

- Richard K. Shields

**Graduate degrees:** D.P.T.; M.A. in physical rehabilitation science; Ph.D. in physical rehabilitation science

**Faculty:** [https://medicine.uiowa.edu/pt/profile/?](https://medicine.uiowa.edu/pt/profile/?appointment=PRIMARY&category=&query=&page=1&size=10)

[appointment=PRIMARY&category=&query=&page=1&size=10](https://medicine.uiowa.edu/pt/)

**Website:** <https://medicine.uiowa.edu/pt/>

Physical therapists provide services to patients and clients who have impairments, functional limitations, disabilities, pain, or changes in physical function resulting from injury, disease, or other causes. Physical therapists practice and collaborate with a variety of health professionals. In the area of health promotion and wellness, they provide screening examinations, prescribe fitness programs, and educate the public regarding healthy lifestyles. Research, teaching, consultation, and administration also are parts of a physical therapist's professional role.

The Department of Physical Therapy and Rehabilitation Science is located in the Carver College of Medicine on the University of Iowa health sciences campus, which includes University of Iowa Hospitals & Clinics, one of the nation's largest university-owned teaching hospitals. Students have access to faculty members in the basic sciences and medicine, basic sciences courses, clinical specialty expertise, and innovative learning experiences associated with a medical college environment.

## Programs

### Graduate Programs of Study

#### Majors

- Doctor of Physical Therapy [p. 1818]
- Master of Arts in Physical Rehabilitation Science [p. 1817]
- Doctor of Philosophy in Physical Rehabilitation Science [p. 1822]

## Facilities

The department has state-of-the-art independent research laboratories and is well equipped for classroom and laboratory instruction and innovative research. The department's state-of-the-art research facilities include the Movement and Rehabilitation Laboratory and a spinal cord research laboratory at University Hospitals & Clinics, the Human Movement Control/Performance Laboratory, the Neurobiology of Pain Laboratory, the Neuromuscular Biomechanics Laboratory, the Human Integrative and Cardiovascular Physiology Laboratory, the Applied Neuroplasticity Laboratory, the Human Performance and Clinical Outcomes Laboratory, and the Orthopaedic Gait Analysis Laboratory.

## Courses

### Physical Therapy and Rehabilitation Science Courses

#### **PTRS:5100 Professional Issues and Ethics** 1 s.h.

Contemporary issues in clinical practice and professional development; legal and ethical perspectives on human rights, ethical theory and principles for analyzing and acting on ethical problems; professional and peer relationships.

#### **PTRS:5101 Introduction to Physical Therapy Practice** 2 s.h.

Professional development of physical therapists; evolution of profession; analysis of current role in health care and public health with respect to societal health challenges; patient management terminology including medical terminology and language utilized in the *Guide to Physical Therapist Practice*; concepts of enablement models and disablement models, including World Health Organization's *International Classification of Functioning, Disability and Health* model in the biopsychosocial model of health; introduction to evidence-based practice principles.

#### **PTRS:5102 Principles of Physical Therapy I** 2 s.h.

Patient management skills: fostering therapeutic alliance, history taking, systems review, positioning, draping, transfers, body mechanics, assisted gait, wheelchairs, and negotiation of architectural barriers.

#### **PTRS:5103 Principles of Physical Therapy II** 2 s.h.

Continuation of PTRS:5102; expansion of existing skills and provides new learning experiences in documentation, assessment of joint range of motion/goniometry, manual muscle testing, preambulatory intervention strategies, gait analysis; musculoskeletal, neuromuscular, and integumentary systems review. Prerequisites: PTRS:5102.

#### **PTRS:5131 Therapeutic Physical Agents** 2 s.h.

Theoretical and practical applications for safe, effective use of physical agents (superficial and deep heat, cold, hydrotherapy), electrotherapeutic modalities (biofeedback, NMES, TENS, iontophoresis); massage and soft tissue mobilization; emphasis on problem solving, clinical decision making.

#### **PTRS:5144 Interprofessional Education I: Team-Based Approach to Health Care** 1 s.h.

Development and interaction within small group of interprofessional students from physical therapy, medicine, pharmacy, dentistry, nursing, and public health; deans and faculty from each college facilitate; three-hour initial session for all disciplines followed by informal monthly electronic scenarios, second formal meeting followed by informal monthly electronic discussions.

#### **PTRS:5201 Musculoskeletal Therapeutics I** 3 s.h.

Musculoskeletal techniques and biomechanical principles applied to assessment and evaluation of common orthopedic problems of the spine; problem solving, case-study approach to clinical methods, skill acquisition.

- PTRS:5205 Health Promotion and Wellness** 3 s.h.  
Overview of health promotion, fitness, and wellness strategies, including information on levels of health promotion, risk assessment, applied physiology (skeletal muscle, energy metabolism, and physiological responses to exercise), exercise testing and training guidelines, body composition assessment, and development of individual weight management and exercise training programs; classroom and laboratory experiences.
- PTRS:5206 Cardiopulmonary Therapeutics** 3 s.h.  
Cardiorespiratory anatomy, physiology, and application of basic concepts, techniques in management of patients with acute and chronic cardiac, pulmonary disorders; laboratories.
- PTRS:5209 Surface Anatomy** 1 s.h.  
Laboratory teaching activities that parallel the human anatomy course; observation, palpation, and problem solving skills; upper- and lower-limb, head and neck, thorax, and abdomen.
- PTRS:5210 Kinesiology and Pathomechanics** 4 s.h.  
Normal and pathological movement based on understanding of muscle mechanics, segment and joint mechanics, muscle function; instructor- and student-centered learning experiences; integrative human movement system laboratories.
- PTRS:5212 Human Pathology for the Physical Therapist** 3 s.h.  
Students gain a cursory understanding of the physiologic mechanisms of human health and pathologic mechanisms of disease; emphasis on morphologic changes of cells and tissues, identification of causes of change (etiology), mechanisms of development (pathogenesis), and clinical manifestations of specific disease processes; influence of disease and medical diagnosis on physical therapy practice and physical therapy diagnosis.
- PTRS:5215 Applied Clinical Medicine** 2 s.h.  
Pathological disorders frequently encountered by physical therapists in clinical practice, addressed by physicians and health professionals who are not physical therapists; physical therapy management.
- PTRS:5235 Case-Based Learning I** 1 s.h.  
Small group case study seminars and simulated patient instructor learning experiences; clinical problems coordinated with concurrent courses; student-centered, problem-based learning format with emphasis on evidence-based practice objectives. First in a two-course sequence.
- PTRS:5236 Case-Based Learning II** 1 s.h.  
Small-group case study seminars and simulated patient instructor learning experiences; clinical problems coordinated with concurrent courses taken in curriculum; student centered, problem-based learning format; emphasis on evidence-based practice objectives. Second in a two-part series of integrated courses. Prerequisites: PTRS:5235.
- PTRS:5790 Integrated Clinical Education in Physical Therapy I** 1 s.h.  
Integrated clinical experiences in area physical therapy clinics; overview of diverse nature of practice through half-day experiences; basic skills in examination, intervention, and documentation.
- PTRS:5791 Integrated Clinical Education in Physical Therapy II** 1 s.h.  
Continuation of PTRS:5790; integrated clinical experiences in area physical therapy clinics; overview of diverse nature of practice through full-day clinical experiences; basic skills in examination, intervention, and documentation. Prerequisites: PTRS:5790. Requirements: Doctor of Physical Therapy program enrollment.
- PTRS:6120 Physical Therapy Management and Administration I** 2 s.h.  
The changing U.S. health care system; physical therapy services across continuum of care, reimbursement to health care providers, mechanisms for controlling costs while providing quality care; clinical vignettes, small group problem solving.
- PTRS:6121 Physical Therapy Management and Administration II** 1 s.h.  
Principles of management in physical therapy practice; historical perspective, current health care environment; business principles; marketing, managing risk, medical/legal concerns, professional and personal growth and development.
- PTRS:6122 Psychosocial Aspects of Patient Care** 1 s.h.  
Emotional reactions to illness/trauma; social determinants of health; recognition of mental illness in physical therapy examination and intervention; psychosocial aspects of disability as they relate to patient-physical therapist interaction; effective communication strategies; cultural competence in professional behavior and patient care.
- PTRS:6133 Pain Mechanisms and Treatment** 1-2 s.h.  
Introduction to basic science mechanisms, assessment, and management of pain; basic science mechanism involved in transmission and perception of painful stimuli after tissue injury, assessment and physical therapy management of pain; emphasis on scientific principles and published literature to support treatment techniques.
- PTRS:6134 Physical Therapy Management of Integumentary System** 2 s.h.  
Overview of physical therapy examination and management of the integumentary system; wound pathology, diagnosis associated with the integumentary system, inflammation and repair, examination and reexamination techniques, documentation, clinical decision making, lecture and laboratory formats; interventions, including patient/client information, physical agents, electrotherapy, wound dressing.
- PTRS:6143 Selected Topics in Physical Therapy Practice** 2 s.h.  
Specialty area of practice including wheelchair seating and prescription, pelvic health, home assessment, durable medical equipment (DME) recommendations, and geriatrics; topics dictated by changing needs of health care and the profession; emphasis on clinical decision making, synthesis and evaluation of information with respect to first-year physical therapy curriculum.
- PTRS:6145 Interprofessional Education II: Teaching Neural and Musculoskeletal Evaluation Principles** 1 s.h.  
Active involvement in integrating anatomy, kinesiology, and movement control principles as applied to a select group of pathologies with the goal of being able to teach content area; preassigned student group leaders; emphasis on student as active learner; opportunity to teach academic areas previously studied in first and second years of curriculum; may include teaching several of these musculoskeletal principles in a first-year medical student anatomy course.

**PTRS:6170 Management of People with Prosthetic and Orthotic Needs 2 s.h.**

Physical therapy management and assessment of patients in need of prosthetic and orthotic devices; principles and components of prosthetic and orthotic design and use.

**PTRS:6172 Radiology/Imaging for Physical Therapists 2 s.h.**

Basic principles and procedures for acquisition and interpretation of radiology and imaging in clinical practice and research; plain film radiographs, CT, MRI, other common imaging modalities; case-based, multidisciplinary approach.

**PTRS:6173 Differential Diagnosis in Physical Therapy 2 s.h.**

Use of physical therapy examination and evaluation skills to diagnose physical therapy problems; focus on use of good clinical decision-making skills when analyzing a patient's history and administering physical therapy tests and measures to confirm or rule out differential diagnoses; components of the medical examination; importance of collaboration between therapists and other health professionals; interactive case studies presented by clinical experts.

**PTRS:6176 Pharmacology for Physical Therapists 3 s.h.**

Contemporary pharmacology; overview of basic pharmacokinetic and pharmacodynamic principles; relation of drug therapy to therapeutic interventions provided by physical therapists; small group clinical case presentations.

**PTRS:6200 Pediatric Physical Therapy 2 s.h.**

Preparation for physical therapy practice in pediatric settings using interdisciplinary family-centered practice; normal and abnormal development, standardized assessment, service-delivery settings, interventions, management strategies specific to pediatrics.

**PTRS:6202 Musculoskeletal Therapeutics II 3 s.h.**

Pathology, assessment, management of orthopedic disorders of the upper quarter; problem-solving approach to evaluation and management of patients with musculoskeletal conditions. Prerequisites: PTRS:5201.

**PTRS:6203 Musculoskeletal Therapeutics III 4 s.h.**

Pathology, assessment, management of orthopedic disorders of the lower quarter; problem-solving approach to evaluation and management of patients with musculoskeletal conditions. Prerequisites: PTRS:6202.

**PTRS:6204 Progressive Functional Exercise 2 s.h.**

Therapeutic exercise options (e.g., isometrics, isotonic, isokinetic, plyometric, endurance exercises, stretching exercises) and training principles; application to functional activities, including those of daily living, work, recreation, and sport; laboratory component.

**PTRS:6224 Activity-Based Neural and Musculoskeletal Plasticity in Health Care 4 s.h.**

Examination of neural, muscular, and skeletal plasticity to increased and decreased use in normal and pathological states (chronic inactivity, obesity, metabolic syndromes, orthopedic and neurological injuries); principles of genetic regulation with physical activity including underlying mechanisms contributing to acute and chronic adaptations of muscle, spinal circuitry, and supra-spinal centers; integration of movement control concepts through contemporary papers evaluating short and long latency reflexes, posture and balance control, spasticity, and motor learning in individuals with acute and chronic perturbations to the nervous system.

**PTRS:6225 Neuromuscular Therapeutics 3 s.h.**

Evidence-based application of clinical neuroscience, motor control, and learning principles to practice of neurological physical therapy; approaches to evaluation and therapeutic intervention for clients with adult-onset neurological conditions, with emphasis on examination, developing a diagnosis, clinical decision making, and prescribing interventions that help clients accomplish goals. Prerequisites: PTRS:6224.

**PTRS:6237 Community Outreach and Engagement I 1 s.h.**

Outreach and engagement activities with individuals and organizations in the community; students select service learning experiences from current community partners, or may suggest their own idea, and develop their individual learning goals for these experiences; discussion and written assignments focus on reflection of student experiences with persons who are different than themselves, and on social responsibility, advocacy, and professionalism in the field of physical therapy; first in a two-course series.

**PTRS:6238 Community Outreach and Engagement II 1 s.h.**

Outreach and engagement activities with individuals and organizations in the community; students select from current community partners, or may suggest their own idea, and develop their individual learning goals for these experiences; discussion and written assignments focus on reflection about student experiences with persons who are different than themselves, and on social responsibility, advocacy, and professionalism in the field of physical therapy; second in a two-course series. Prerequisites: PTRS:6237.

**PTRS:6250 Critical Inquiry I: Evidence-Based Practice 2 s.h.**

Topics relevant to evidence-based practice and research design; identification of appropriate questions for research and clinical applications, location and evaluation of available evidence, identification of issues that affect validity of research designs, interpretation of basic statistical analyses.

**PTRS:6251 Critical Inquiry II: Rehabilitation Research 2 s.h.**

Experience conducting group research projects under faculty supervision; data collection and analysis, manuscript preparation, oral defense of research findings during a formal poster presentation. Prerequisites: PTRS:6250.

**PTRS:6252 Critical Inquiry III: Clinical Application 1 s.h.**

Principles and procedures learned in PTRS:6250 and PTRS:6251 applied to a clinical setting; students write and present a case report with an evidence-based practice focus, using a clinical case from their final internships. Prerequisites: PTRS:6251. Requirements: Physical Therapy and Rehabilitation Science program enrollment.

**PTRS:6253 Functional Neuroanatomy arr.**

Basic principles of neuroanatomy and neurophysiology; emphasis on human central nervous system; laboratory emphasis on anatomical study of spinal cord and brain. Offered spring semesters. Requirements: physical therapy and rehabilitation science enrollment or graduate standing. Same as ACB:6252.

**PTRS:6792 Integrated Clinical Education in Physical Therapy IV 1 s.h.**

Two-week, full-time clinical experience in physical therapy clinics under guidance of physical therapists; theory and practice of physical therapy procedures, competence building in basic skills. Prerequisites: PTRS:6793. Requirements: Doctor of Physical Therapy Program enrollment.

- PTRS:6793 Integrated Clinical Education in Physical Therapy III** 3 s.h.  
Six-week, full-time clinical education experience in a rural health environment. Prerequisites: PTRS:5791. Requirements: Doctor of Physical Therapy program enrollment.
- PTRS:6794 Terminal Clinical Education in Physical Therapy I** arr.  
Nine week, full-time clinical education experience divided among various settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty. Prerequisites: PTRS:6792. Requirements: Doctor of Physical Therapy program enrollment.
- PTRS:6795 Terminal Clinical Education in Physical Therapy II** 4 s.h.  
Nine-week, full-time clinical education experience divided among various settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty. Prerequisites: PTRS:6794. Requirements: Doctor of Physical Therapy program enrollment.
- PTRS:6796 Terminal Clinical Education in Physical Therapy III** 4 s.h.  
Nine-week, full-time clinical education experience divided among various settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty. Prerequisites: PTRS:6795. Requirements: Doctor of Physical Therapy program enrollment.
- PTRS:7812 Biomedical Instrumentation and Measurement** 3 s.h.  
Introduction to biomedical instrumentation and measurement; understanding sources of error and noise in biomedical research applications; basic circuit analysis, calibration of measurement tools, A/D conversion, digital filtering; lab components. Offered fall semesters of even years.
- PTRS:7820 Seminar in Rehabilitation Science** 1 s.h.  
Exploration of research related to rehabilitation science; lectures by faculty, graduate students, and guest scholars with expertise in areas relevant to rehabilitation science (e.g., neuroscience, physiology, medicine, engineering, pharmacology, integrated physiology).
- PTRS:7826 Scientific Writing in Rehabilitation Science** 2 s.h.  
Knowledge of and experience related to scientific writing, critical review of scientific literature, publication in the biomedical sciences, thesis/dissertation writing, grant writing, scientific presentation, writing used in academic and scientific careers.
- PTRS:7875 Analysis of Activity-Based Neural and Musculoskeletal Plasticity** 3 s.h.  
Examination of neural, muscular, and skeletal plasticity to increased/decreased use in normal and pathological states (chronic inactivity, obesity, metabolic syndromes, orthopedic and neurological injuries); genetic regulation with physical activity and underlying mechanisms contributing to acute and chronic adaptations of muscle, spinal circuitry, and supra-spinal centers; integration of movement control concepts through contemporary papers evaluating short and long latency reflexes, posture and balance control, spasticity, and motor learning in individuals with acute and chronic perturbations to the nervous system; individual research projects.
- PTRS:7880 Teaching Practicum** arr.  
Individual instruction, observation, experimentation in teaching, guidance, analysis of evaluation processes in Physical Therapy and Rehabilitation Science.
- PTRS:7884 Practicum in Research** arr.  
Laboratory experiences connected with investigative process; individual instruction, observation, activities in methodological development, data acquisition, data analysis aspects of research.
- PTRS:7895 Advanced Seminar in Rehabilitation Science** arr.  
Current status of research for biological, mechanical, psychological components pertinent to cardiopulmonary, musculoskeletal, neuromuscular areas of rehabilitation science; preparation for comprehensive exam.
- PTRS:7899 Introduction to Pain: Overview of Theories, Concepts, and Mechanisms** 1 s.h.  
Overview of pain concepts and mechanisms; general overview of pain, models of pain, peripheral and central mechanisms, and pain inhibition. Requirements: prior neuroscience course.
- PTRS:7900 Rehabilitation Research Capstone Project** arr.  
Specific phases of the research process; development of a research question and associated hypotheses, collection and analysis of data, interpretation and discussion of the information's meaning; presentation to sponsoring mentor's laboratory/program, and written document.
- PTRS:7901 Clinical Correlates of Pain: Syndromes and Management** 1 s.h.  
Common pain conditions and management of pain using an interdisciplinary focus; lectures by University of Iowa Hospitals and Clinics clinicians on a variety of acute and chronic pain conditions and management approaches. Requirements: prior neuroscience course.
- PTRS:7902 Molecular, Cellular, and Neural Mechanisms of Pain** 2 s.h.  
Basic science mechanisms of pain and pain modulation; understanding molecular basis for pain in nociceptive afferents (peripheral sensitization), underlying molecular and neuronal mechanisms of central processing of pain (central sensitization), cortical pain processing, animal and human experimental pain models; readings from past and current literature. Prerequisites: PTRS:7899. Requirements: prior neuroscience course.
- PTRS:7903 Rehabilitation Management of Pain** 1 s.h.  
Basic principles of rehabilitation for pain control including education, exercise, and electrophysical modalities; evidence-based approach to rehabilitation covering mechanisms of action and clinical effectiveness; case studies. Prerequisites: PTRS:7899 and PTRS:7901.
- PTRS:7925 Independent Study** arr.  
Problem-solving experience in physical therapy; commensurate with student's interest, ability.
- PTRS:7927 Research in Rehabilitation Science** arr.  
Placement of physical therapy on sound scientific base; therapy; initiation, refinement, establishment of methods in physical therapy evaluation, treatment; direct clinical and laboratory approach, philosophical treatise, or research proposal.
- PTRS:7930 Critical Thinking in Neuro-Mechanical Systems** arr.  
Problem solving experience in neuro-mechanical systems, commensurate with student interest, ability.

**PTRS:7931 Critical Thinking in Pain arr.**

Problem solving experience in pain, commensurate with student interest, ability.

**PTRS:7932 Critical Thinking in Biomechanics and Human Performance Assessment arr.**

Problem solving experience in biomechanics and human performance assessment, commensurate with student interest, ability.

**PTRS:7933 Critical Thinking in Movement Control/ Human Performance arr.**

Problem solving experience in movement control/human performance, commensurate with student interest, ability.

**PTRS:7934 Critical Thinking in Neural Plasticity arr.**

Problem solving experience in neural plasticity, commensurate with student interest, ability.

**PTRS:7935 Critical Thinking in Movement Science arr.**

Problem solving experience in movement science, commensurate with student interest; ability.

**PTRS:7936 Critical Thinking in Cardiovascular Physiology arr.**

Problem solving experience in cardiovascular physiology, commensurate with student interest, ability.

**PTRS:7990 Thesis: Rehabilitation Science arr.**

Investigative process: formulation of problem, literature search and analysis, procedure for collecting data, data analysis, organization and writing of thesis proposal, thesis.

# Physical Rehabilitation Science, M.A.

The Master of Arts program in physical rehabilitation science is granted to students working toward the Doctor of Philosophy in physical rehabilitation science.

## Requirements

The Master of Arts with a major in physical rehabilitation science is awarded to students pursuing knowledge about the underlying science of rehabilitation. The M.A. degree does not prepare students to practice physical therapy. Students often work toward the Doctor of Philosophy in physical rehabilitation science with the goal to promote scholarship in the field. See the Ph.D. in physical rehabilitation science [p. 1822] in this section of the Catalog.

# Doctor of Physical Therapy, D.P.T.

The Doctor of Physical Therapy (D.P.T.) is the entry-level professional degree for physical therapists. Based on the number of outstanding applicants, approximately 45 students are annually enrolled in the D.P.T. program.

## Technical Standards

Physical therapy is a profession that requires physical, mental, and emotional fitness. In the program, students obtain the foundation of knowledge, skills, attitudes, and behaviors that are necessary for a successful career as a physical therapist. Technical standards reflect the abilities that a physical therapist must possess for safe and effective clinical practice. Prospective and current students must meet the following technical standards.

### General Abilities

Students are expected to possess the intellectual ability to learn, integrate, analyze, and synthesize data. They must have functional use of the senses of vision, hearing, and smell, as well as unimpaired equilibrium. Their exteroceptive senses (touch, movement, stereognosis, and vibratory) must be sufficiently intact to perform activities required for a complete physical therapy education. Students must have motor function capabilities, physical endurance, and the emotional health to meet the demands of entry-level physical therapy education and the demands of total patient care, which may include extended hours of instruction and time in clinic (evenings, nights, and weekends). Students must be capable of punctual, consistent, and reliable attendance in the didactic and clinical education component of the curriculum.

### Observation

The ability to observe is required for demonstrations, visual presentations in lectures, and laboratories. Observation requires the functional use of vision, hearing, smell, somatic sensations, and the use of common sense. Students must be able to observe patients accurately and completely, both at a distance and up close, attending to both verbal and nonverbal communication.

### Communication

Students must be able to speak and listen to patients in order to elicit information, perceive nonverbal communication, describe changes in mood, communicate effectively and sensitively with patients and their families, as well as instruct patients and their families. Communication in oral, written, and electronic form with the health care team must be effective, efficient, and timely.

### Motor/Psychomotor Function

Students are required to have sufficient motor function to ascertain information from patients by auscultation, percussion, palpation, and movement facilitation. Intervention methods may include exercising, lifting, transferring of patients, and assisting during ambulation. These methods must be completed in a manner that assures the safety of a patient as well as the safety of the student. Students must have motor function sufficient to perform the movements required to provide both nonurgent and emergent treatment.

Such skills require coordination of gross and fine muscular movements, equilibrium, sensation, and muscle strength.

## Intellectual—Conceptual, Integrative, and Qualitative Abilities

Problem solving is a critical skill demanded of physical therapists, and requires conceptual, integrative, and qualitative thinking abilities. Students must be able to synthesize knowledge and integrate the relevant aspects of a patient's history, laboratory results, and physical examination to provide an explanation for intervention by recalling and retaining information in an efficient and timely manner. They must have the ability to incorporate new information from peers, teachers, and research to formulate intervention plans. Students must be able to comprehend three-dimensional relationships, the spatial and functional relationships of structures, and analyze and apply this information for problem-solving and decision-making purposes. They must be able to organize, prioritize, analyze, and evaluate detailed and complex information individually, in small groups, and in clinical settings, and do so within a limited time frame.

## Behavioral/Interpersonal Skills/ Professionalism

It is necessary that students have the emotional health to maximize their intellectual ability, exercise good judgment, and complete all responsibilities required for the evaluation and treatment of patients. They must be able to self-assess, accept criticism, and assume responsibility for maintaining professional behavior. Students must be able to develop mature, sensitive, and effective relationships with patients, families, caregivers, and colleagues. They must be able to tolerate physical and emotional stress and continue to function effectively. Students must possess qualities of adaptability and flexibility and be able to function in an atmosphere of uncertainty. They must be motivated to serve and demonstrate a high level of compassion for others. Students are required to demonstrate integrity and act in a manner that demonstrates consciousness of the profession's core values. They must possess sufficient interpersonal skills to interact positively with people from all levels of society, ethnic backgrounds, and belief systems.

## Requirements

The Doctor of Physical Therapy requires a minimum of 104 s.h. and is completed in two and a half years. Students must maintain a program g.p.a. of at least 3.00.

The program is fully accredited by the Commission on Accreditation in Physical Therapy Education. Satisfactory completion of the professional program qualifies candidates to take the National Physical Therapy Exam for licensure to practice. The minimum passing score on the exam is the same in all jurisdictions.

The Doctor of Physical Therapy degree requires the following coursework.

## First Year, Summer

Code	Title	Hours
PTRS:5101	Introduction to Physical Therapy Practice	2
PTRS:5102	Principles of Physical Therapy I	2

PTRS:5205	Health Promotion and Wellness	3
-----------	-------------------------------	---

## First Year, Fall

Code	Title	Hours
PTRS:5100	Professional Issues and Ethics	1
PTRS:5103	Principles of Physical Therapy II	2
PTRS:5144	Interprofessional Education I: Team-Based Approach to Health Care	1
PTRS:5209	Surface Anatomy	1
PTRS:5210	Kinesiology and Pathomechanics	4
PTRS:5212	Human Pathology for the Physical Therapist	3
PTRS:5235	Case-Based Learning I	1
PTRS:5790	Integrated Clinical Education in Physical Therapy I	1
ACB:5108	Human Anatomy	5

## First Year, Spring

Code	Title	Hours
PTRS:5131	Therapeutic Physical Agents	2
PTRS:5201	Musculoskeletal Therapeutics I	3
PTRS:5206	Cardiopulmonary Therapeutics	3
PTRS:5215	Applied Clinical Medicine	2
PTRS:5236	Case-Based Learning II	1
PTRS:5791	Integrated Clinical Education in Physical Therapy II	1
PTRS:6253	Functional Neuroanatomy	4

## Second Year, Summer

Code	Title	Hours
PTRS:6120	Physical Therapy Management and Administration I	2
PTRS:6143	Selected Topics in Physical Therapy Practice	2
PTRS:6176	Pharmacology for Physical Therapists	3
PTRS:6793	Integrated Clinical Education in Physical Therapy III	3

## Second Year, Fall

Code	Title	Hours
PTRS:6122	Psychosocial Aspects of Patient Care	1
PTRS:6134	Physical Therapy Management of Integumentary System	2
PTRS:6145	Interprofessional Education II: Teaching Neural and Musculoskeletal Evaluation Principles	1

PTRS:6170	Management of People with Prosthetic and Orthotic Needs	2
-----------	---	---

PTRS:6200	Pediatric Physical Therapy	2
PTRS:6202	Musculoskeletal Therapeutics II	3
PTRS:6224	Activity-Based Neural and Musculoskeletal Plasticity in Health Care	4
PTRS:6237	Community Outreach and Engagement I	1
PTRS:6250	Critical Inquiry I: Evidence-Based Practice	2

One of these (with advisor approval):

PTRS:7930	Critical Thinking in Neuro-Mechanical Systems	1
PTRS:7931	Critical Thinking in Pain	
PTRS:7932	Critical Thinking in Biomechanics and Human Performance Assessment	
PTRS:7933	Critical Thinking in Movement Control/Human Performance	
PTRS:7934	Critical Thinking in Neural Plasticity	
PTRS:7935	Critical Thinking in Movement Science	
PTRS:7936	Critical Thinking in Cardiovascular Physiology	

## Second Year, Spring

Code	Title	Hours
PTRS:6121	Physical Therapy Management and Administration II	1
PTRS:6133	Pain Mechanisms and Treatment	2
PTRS:6172	Radiology/Imaging for Physical Therapists	2
PTRS:6173	Differential Diagnosis in Physical Therapy	2
PTRS:6203	Musculoskeletal Therapeutics III	4
PTRS:6204	Progressive Functional Exercise	2
PTRS:6225	Neuromuscular Therapeutics	3
PTRS:6238	Community Outreach and Engagement II	1
PTRS:6251	Critical Inquiry II: Rehabilitation Research	2
PTRS:6792	Integrated Clinical Education in Physical Therapy IV	1

## Third Year, Summer

Code	Title	Hours
PTRS:6794	Terminal Clinical Education in Physical Therapy I	4

## Third Year, Fall

Code	Title	Hours
PTRS:6252	Critical Inquiry III: Clinical Application	1
PTRS:6795	Terminal Clinical Education in Physical Therapy II	4
PTRS:6796	Terminal Clinical Education in Physical Therapy III	4

### Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They must have completed a baccalaureate degree and all prerequisite coursework from an accredited institution in the United States, or anticipate completing the degree before enrolling in the D.P.T. program. They must have a cumulative g.p.a. of at least 3.00 and must have completed the following prerequisite coursework, preferably with a g.p.a. of at least 3.00.

All applicants must take the Graduate Record Examination (GRE) General Test. They must take the test early enough for their scores to be received prior to the application deadline.

### Prerequisite Science Courses

All science courses must include the appropriate laboratory instruction. The prerequisite courses must have been taken for a letter grade. Credit awarded through advanced placement testing may be applied only to the mathematics requirement.

### Biological Sciences

A complete introductory series of courses in principles of general biology or zoology and advanced coursework in biology or zoology (for which an introductory course is prerequisite) equivalent to 12 s.h.

### Anatomy

Human or comparative vertebrate anatomy, preferably with a lab component, equivalent to 3 s.h.

### Physiology

A systemic human physiology course equivalent to 3 s.h.

A two-course sequence of anatomy and physiology equivalent to 6 s.h., preferably with a lab component, can fulfill the physiology and anatomy prerequisites.

### Physics

A complete introductory series equivalent to 8 s.h.

### Chemistry

A complete introductory series equivalent to 8 s.h.

### Psychology

Courses equivalent to 6 s.h.

### Mathematics

A college-level mathematics course, at the level of trigonometry or higher, equivalent to 3 s.h.

## Statistics

A statistical methods course equivalent to 3 s.h.

## Applications

Applications are submitted online through the Physical Therapist Centralized Application Service (PTCAS). PTCAS allows applicants to use a single application and one set of materials to apply to multiple physical therapy programs. Once the application portfolio is complete with PTCAS, they will forward it to the University of Iowa.

Applications are accepted July 1 for entry into the D.P.T. program the following summer. Applicants who apply early and by September 15 will be given priority status in the admissions process. It is to an applicant's benefit to apply as soon as possible after July 1 as the admissions committee will begin the application review process to select those for interviews. Priority status application deadline is September 15, mid-application deadline is October 1, and final application deadline is December 1.

The physical therapy admissions committee requires personal, on-campus interviews. Since the number of students admitted into each class is limited, not all who apply for admission are invited for an interview.

## Background Checks

Enrollment in the Doctor of Physical Therapy program is contingent on a successful criminal background check. Drug screening may be required for some clinical rotations.

## Expenses

Applicants admitted to the D.P.T. program must make an advance tuition payment which is forfeited if the applicant does not enroll. In addition to paying University of Iowa tuition and fees, students are assessed laboratory fees for the human anatomy and neuroanatomy courses and are responsible for purchasing supplies, such as lab coats, patient evaluation kits, and course packets. Students also are responsible for all costs associated with professional development and clinical experiences.

All students are required to comply with the pre-entry and periodic health screening program developed by Student Health in cooperation with University of Iowa Hospitals & Clinics. All costs incurred for the health screenings are the student's responsibility. Students also are required to have health insurance.

## Financial Support

Many academic and professional development scholarship opportunities are available to D.P.T. students matriculating within the department; view the awards on the Department of Physical Therapy and Rehabilitation Science website.

Entering physical therapy students are eligible for financial aid as determined on the Free Application for Federal Student Aid (FAFSA). Students must sustain a strong academic performance in order to qualify for funds.

## Career Advancement

The employment outlook for physical therapy graduates is strong. Opportunities exist for professional practice in inpatient, outpatient, and community-based organizations. These include general or specialized hospitals, programs for

children with disabilities, private physical therapy clinics, extended care facilities, nursing homes, community and governmental agencies, rehabilitation centers, the armed forces, foreign service, home health agencies, school systems, fitness centers, and athletic facilities. Teaching and research positions also are available as well as options for successful self-employment.

Physical therapists report a very high level of job satisfaction, driven both by prevalent employment opportunities and social interaction.

# Physical Rehabilitation Science, Ph.D.

Through coursework and participation in research, the Doctor of Philosophy program in physical rehabilitation science emphasizes the development of an individual's expertise as a researcher in rehabilitation science. Approximately 20 students are enrolled in the Ph.D. program each year.

## Learning Outcomes

Graduates who complete the program are prepared for academic appointments that emphasize research, scholarship, and teaching. They possess:

- theoretical and scientific knowledge to perform basic, applied, or clinical-level original research that leads to scientific presentations, publication in peer-reviewed journals, and competition for extramural funding through scientific grant writing;
- breadth of knowledge in exercise physiology, biomechanic, neuroscience, or motor control specialty areas as they relate to impairment, functional limitation, and disability; and
- theoretical and practical skills required for college or university teaching at the professional entry and advanced graduate levels.

## Requirements

The Doctor of Philosophy with a major in physical rehabilitation science requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00.

The program is designed to advance a student's ability to independently develop and carry out research that establishes the scientific basis for prevention, evaluation, and treatment of impairments, functional limitations, and disability. The curriculum is flexible enough to accommodate research focusing on basic, applied, or clinical studies in the rehabilitation sciences. Students have access to the program's research laboratories (see Facilities [p. 1812] in this section of the Catalog).

## Curriculum

Students and their faculty advisor develop an individualized study plan. A preliminary study plan is developed within the first 9 s.h. of graduate study; a final plan is submitted to the Graduate College when the Ph.D. comprehensive examination is scheduled.

To ensure breadth of knowledge, all students complete specific core, research, and scientific specialty area content courses. Elective courses are selected to provide in-depth study of the specialty; they are complemented by an advanced seminar course specific to a student's specialty and taken in preparation for the comprehensive examination.

Students must satisfactorily complete the comprehensive examination, which is taken after all required coursework is completed. Doctoral study culminates with 12 s.h. of thesis research and an oral examination.

## General Core Requirement

Ph.D. students must complete the following core requirements. In addition to the courses below, the

Collaborative Institutional Training Initiative (CITI)—online, web-based training—must be completed before a student enrolls in BMED:7270 and BMED:7271.

Code	Title	Hours
All of these:		
PTRS:7812	Biomedical Instrumentation and Measurement	3
PTRS:7820	Seminar in Rehabilitation Science (taken twice for 1 s.h. each)	2
PTRS:7880	Teaching Practicum	arr.
BIOS:5120/ IGPI:5120/ STAT:5610	Regression Modeling and ANOVA in the Health Sciences	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
PSQF:7385/ EDTL:7385/ EPLS:7385/ GRAD:7385/ RCE:7385	Teaching and Learning in Higher Education	3
One of these:		
BIOS:4120	Introduction to Biostatistics	3
STAT:4143/ PSQF:4143	Introduction to Statistical Methods	3

## Research Requirement

Students complete at least 27 s.h. from the following. The capstone course PTRS:7900 is recommended but not required for students who enter the program with a master's or doctoral-level degree; however, it is required for students who enter with a bachelor's degree.

Code	Title	Hours
PTRS:7826	Scientific Writing in Rehabilitation Science	2
PTRS:7884	Practicum in Research	arr.
PTRS:7895	Advanced Seminar in Rehabilitation Science	arr.
PTRS:7900	Rehabilitation Research Capstone Project	arr.
PTRS:7927	Research in Rehabilitation Science	arr.
PTRS:7930	Critical Thinking in Neuro-Mechanical Systems	arr.
PTRS:7931	Critical Thinking in Pain	arr.
PTRS:7932	Critical Thinking in Biomechanics and Human Performance Assessment	arr.
PTRS:7933	Critical Thinking in Movement Control/Human Performance	arr.
PTRS:7934	Critical Thinking in Neural Plasticity	arr.
PTRS:7935	Critical Thinking in Movement Science	arr.
PTRS:7936	Critical Thinking in Cardiovascular Physiology	arr.

PTRS:7990	Thesis: Rehabilitation Science	arr.
-----------	--------------------------------	------

## Specialty Content Requirement

Students must complete at least 9 s.h. in their scientific specialty area. Students may choose courses from the following list, but other courses suited to a student's background knowledge and interest area are considered.

Code	Title	Hours
<b>Anatomy and Cell Biology</b>		
ACB:8401	Advanced Human Anatomy	arr.
<b>Epidemiology</b>		
EPID:6900	Design of Intervention and Clinical Trials	3
<b>Health and Human Physiology</b>		
HHP:6130	Advanced Skeletal Muscle Physiology	1,3
HHP:6150	Advanced Clinical Exercise Physiology	1,3
HHP:6300	Motor Control Seminar	1
HHP:6410	Advanced Exercise Physiology	1,3
HHP:6460	Advanced Cardiovascular Physiology	1,3
HHP:6470	Advanced Physiology of Aging	1,3
HHP:6480	Advanced Human Pharmacology	1,3
<b>Neuroscience</b>		
NSCI:7235/ NEUR:7235	Neurobiology of Disease	3
<b>Nursing</b>		
NURS:3460	Professional Role II: Research	3
<b>Occupational and Environmental Health</b>		
OEH:4310	Occupational Ergonomics: Principles	3
<b>Pharmacology</b>		
PCOL:5137	Neurotransmitters	1
PCOL:6207	Ion Channel Pharmacology	1
PCOL:6250	Advanced Problem Solving in Pharmacological Sciences	1
<b>Physical Therapy</b>		
PTRS:5210	Kinesiology and Pathomechanics	4
PTRS:5206	Cardiopulmonary Therapeutics	3
PTRS:6224	Activity-Based Neural and Musculoskeletal Plasticity in Health Care	4
PTRS:6250	Critical Inquiry I: Evidence-Based Practice	2
PTRS:6251	Critical Inquiry II: Rehabilitation Research	2
PTRS:6253	Functional Neuroanatomy	arr.
PTRS:7875	Analysis of Activity-Based Neural and Musculoskeletal Plasticity	3
PTRS:7899	Introduction to Pain: Overview of Theories, Concepts, and Mechanisms	1

PTRS:7901	Clinical Correlates of Pain: Syndromes and Management	1
PTRS:7902	Molecular, Cellular, and Neural Mechanisms of Pain	2
PTRS:7903	Rehabilitation Management of Pain	1

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations. They should have a cumulative g.p.a. of at least 3.00 and scores at or above the 50th percentile for each section of the Graduate Record Exam (GRE) General Test. A minimum of two years of clinical experience may be considered highly desirable, depending on the research interest area.

Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL). Acceptable scores for the International English Language Testing System (IELTS) and the Duolingo English Test (DET) also may be submitted.

Application materials must include a complete Graduate College application form, test scores, transcripts, three letters of recommendation, and a statement of purpose.

Personal interviews are required of all applicants selected for consideration by the admissions committee. On-campus interviews are preferred, but telephone interviews may be substituted when necessary.

Application deadlines are October 15 for spring semester entry (notification by December 15); March 15 for summer entry (notification by May 15); and May 15 for fall semester entry (notification by July 15).

## Financial Support

A number of assistantships are available for Ph.D. students. Faculty advisors provide guidance for students seeking external scholarship support through foundations and federal programs that support Ph.D. training.

## Career Advancement

The Ph.D. program trains students to obtain positions as professors and researchers in rehabilitation science.

**Website:** <https://medicine.uiowa.edu/pa/>

The physician assistant profession is one of the newest and most exciting in health care. Physician assistants (PAs) are licensed to practice medicine with physician supervision. They are responsible for making medical decisions and providing a broad range of diagnostic and therapeutic services.

In the traditional office setting, PAs see patients, obtain histories, perform physical examinations, and order necessary laboratory and/or radiological studies. Based on this information, the PA establishes a diagnosis, develops an appropriate management plan, and initiates treatment that may include prescribing medications. The physician is consulted as needed and remains ultimately responsible for the care provided by the physician/PA team. PAs also are involved in both patient and community health education.

The Department of Physician Assistant Studies and Services is located on the University of Iowa health sciences campus, which includes University of Iowa Hospitals & Clinics, one of the nation's largest university-owned teaching hospitals.

## Programs

### Graduate Program of Study

#### Major

- Master of Physician Assistant Studies [p. 1827]

## Courses

### Physician Assistant Studies and Services Courses

#### **PA:8212 Fundamentals of EKG and ACLS for Physician Assistant Students** 2 s.h.

Theory and practice with basic analysis of EKG strips and interpretation, including rhythm disturbances; completion of American Heart Association's Advanced Cardiac Life Support (ACLS) program.

#### **PA:8213 Fundamentals of Radiology for Physician Assistant Students** 1 s.h.

Theory and practice for interpretation of radiographs including general radiology, body, chest, musculoskeletal, pediatrics, and neurology. Requirements: enrollment in physician assistant studies and services.

#### **PA:8214 Fundamentals of Clinical Laboratory Medicine for Physician Assistant Students** 1 s.h.

Theory and practice of selected clinical laboratory techniques and procedures; emphasis on effective utilization of clinical laboratory in diagnosis and management of disease states. Requirements: enrollment in physician assistant studies and services.

#### **PA:8301 Seminar for Physician Assistant Students** 1 s.h.

Professional issues that affect the physician assistant's practice of medicine.

#### **PA:8302 Physician Assistant Professional and Clinical Skills** 1 s.h.

Hands-on experience and activities; suturing, injections, prescription and order writing, medical records, patient confidentiality, Iowa Law governing physician assistant practice, motivational interviewing, toddler and disability exams.

#### **PA:8303 Physician Assistant Senior Capstone** 1 s.h.

Demonstration of strong clinical knowledge base and proficiency in basic clinical problem solving; focus on student's ability to think logically and critically, integrate and synthesize knowledge, access evidence-based medical resources, document patient care appropriately, apply clinical knowledge, and demonstrate professional behavior. Requirements: enrollment in physician assistant studies and services.

#### **PA:8304 Emergency Medicine for Physician Assistant Students** arr.

Obtaining and recording pertinent historical data, obtaining indicated laboratory studies, assessing the results, arriving at a diagnosis, formulating a treatment plan, implementing appropriate therapy.

#### **PA:8305 Gynecology for Physician Assistant Students** 4 s.h.

Opportunity to develop proficiency in history and physical exams of gynecological patients; outpatient, family planning, gynecological cancer, concepts of diagnostic techniques and therapy.

#### **PA:8306 Family Practice I for Physician Assistant Students** 4 s.h.

Obtaining and recording complete history and physical exams; formulation of differential diagnosis and problem list; ordering, obtaining, and interpreting lab and diagnostic studies; implementation of therapeutic procedures and treatment plans.

- PA:8307 Family Practice II for Physician Assistant Students** 4 s.h.  
Opportunity to participate in delivery of ambulatory primary care; at a different site from PA:8306.
- PA:8308 General Surgery for Physician Assistant Students** 4-6 s.h.  
Preparation for work as an assistant to the generalist; outpatient and inpatient surgical services, including surgical procedures and management of postoperative course.
- PA:8309 Internal Medicine for Physician Assistant Students** 4,6 s.h.  
Eliciting a medical history, doing a pertinent physical exam, obtaining indicated lab studies, assessment of results, formulation of management plan, and implementation of appropriate therapy for common internal medicine problems.
- PA:8310 Pediatrics for Physician Assistant Students** arr.  
Knowledge and skills required for providing appropriate medical care to infants, children, and adolescents; initiation and promotion of interpersonal relationships.
- PA:8311 Psychiatry for Physician Assistant Students** 4 s.h.  
Training in history and physical exams of psychiatry patients, including individual and family therapy, vocational testing and guidance, development of interviewing skills.
- PA:8312 Long-Term Care for Physician Assistant Students** arr.  
Development of clinical knowledge and skill in diagnosing, treating, and performing procedures for patients of long-term care settings; knowledge of relevant conditions.
- PA:8320 Dermatology Elective for Physician Assistant Students** arr.  
Recognizing dermatologic diseases and disorders, instituting appropriate management of patients with dermatologic problems.
- PA:8321 Neurology Elective for Physician Assistant Students** arr.  
Performing general and neurological exams, establishing diagnosis, recommending lab studies, instituting appropriate management of common neurological diseases and disorders, recognizing the need for urgent treatment.
- PA:8322 Obstetrics for Physician Assistant Students** arr.  
Proficiency in physical exam of OB patients; applying concepts of diagnostic techniques and therapy; following patients' course, including labor, delivery, and postpartum care.
- PA:8323 Ophthalmology Elective for Physician Assistant Students** arr.  
Proficiency in recognizing ophthalmology problems; how to institute appropriate management of these conditions.
- PA:8324 Otolaryngology Elective for Physician Assistant Students** arr.  
Proficiency in recognizing otolaryngology problems; how to institute appropriate management of these conditions; opportunity for involvement in varied surgical procedures.
- PA:8325 Pediatric Elective for Physician Assistant Students** arr.  
Experience working with children and adolescents.
- PA:8326 Radiology Elective for Physician Assistant Students** arr.  
Proficiency in systematic evaluation of normal and abnormal routine radiologic examinations; listing indications for special exam procedures, including details of prepping the patient.
- PA:8327 Pediatric Elective (Hematology/Oncology) for Physician Assistant Students** arr.  
Basic clinical knowledge and skills for diagnosis, treatment, and management of pre- and post-bone marrow transplant patients.
- PA:8328 Pediatric (Cardiology) Elective for Physician Assistant Students** arr.  
Cardiovascular assessment and problem management of pediatric patients; experience with a range of acute, chronic, common, and rare cardiology diseases.
- PA:8329 Psychiatry Elective for Physician Assistant Students** arr.  
Training in evaluation and treatment of psychiatry patients.
- PA:8330 Surgery Elective for Physician Assistant Students** arr.  
Experience in a wide range of surgical problems, procedures, and treatments, including diagnosis, care and treatment, and postoperative courses of surgical patients.
- PA:8331 Surgery Elective (Transplant/Organ Retrieval) for Physician Assistant Students** arr.  
Extensive experience in care of patients with end-stage organ failure; evaluation of potential transplant candidates, participation in surgical procedures on transplant service.
- PA:8332 Surgery Elective (Burn Unit) for Physician Assistant Students** arr.  
Involvement in care on burn unit and in operating room; skills in burn debridement, grafting techniques, skin storage techniques, dressing changes, tub baths, and physical therapy procedures.
- PA:8333 Surgery Elective (Cardiac Surgery) for Physician Assistant Students** arr.  
Development of technical skills in operating room; essentials of preoperative evaluation and postoperative management of cardiac surgical patient.
- PA:8334 Orthopedics Elective for Physician Assistant Students** arr.  
Recognition of varied orthopedic problems and treatments; musculoskeletal diseases and disorders, both emergencies and common conditions, and how to establish appropriate management.
- PA:8335 Internal Medicine Elective for Physician Assistant Students** arr.  
Training in varied internal medicine problems; recognition, appropriate treatment.
- PA:8336 Internal Medicine (Cardiology) Elective for Physician Assistant Students** arr.  
Cardiovascular assessment and problem management; experience with wide range of acute, chronic, common, and rare diseases.
- PA:8337 Internal Medicine (EKG) Elective for Physician Assistant Students** arr.  
Experience reading electrocardiograms, interpreting cardiac arrhythmias, performing and evaluating EKG stress tests.
- PA:8338 Internal Medicine (Gastroenterology) Elective for Physician Assistant Students** arr.  
Experience with a wide range of gastrointestinal pathology; history and physical exams of gastrointestinal diagnostic procedures, follow-up care of patients through outpatient clinics.

**PA:8339 Internal Medicine (Oncology) Elective for Physician Assistant Students arr.**

Experience to develop diagnostic skills in clinical oncology and gain familiarity with methods of staging common cancers; assistance in therapy and outpatient management of cancer patients.

**PA:8340 Internal Medicine (Geriatrics) Elective for Physician Assistant Students arr.**

Familiarity with broad spectrum of medical conditions among the elderly; experience in history and physical exams, diagnosis of geriatric patients along with follow-up visits.

**PA:8341 Internal Medicine (Pulmonary) Elective for Physician Assistant Students arr.**

Development of basic clinical knowledge and skills for diagnosis, treatment, and management of pulmonary diseases.

**PA:8342 Internal Medicine (Palliative Care/Hospice) Elective for Physician Assistant Students arr.**

Work on a hospice care team performing evaluation, treatment, and education of patients with terminal illnesses; dealing with the prospect of death.

**PA:8343 Internal Medicine (Infectious Disease) Elective for Physician Assistant Students arr.**

Development of basic clinical knowledge and skills for diagnoses, treatment, and management of infectious diseases.

**PA:8345 Urology Elective for Physician Assistant Students arr.**

Proficiency in managing patients with urologic conditions; skill in taking a urologic history, performing physical exams, interpreting laboratory studies and data.

**PA:8346 Family Practice Elective for Physician Assistant Students arr.**

Proficiency in delivering ambulatory primary care.

**PA:8347 Gynecology Elective (Women's Health) for Physician Assistant Students arr.**

Experience in annual gynecologic exams, PAP screening, gynecology problems, contraception issues, STD screening and counseling, common gynecologic procedures.

**PA:8348 Migrant Health Elective for Physician Assistant Students arr.**

Basic clinical knowledge and skills for diagnosis, treatment, and prevention of diseases, injuries, and conditions related to environmental exposure in migrant worker populations.

**PA:8349 Occupational Medicine Elective for Physician Assistant Students arr.**

Basic clinical knowledge and skills for diagnosis, treatment, and prevention of work-related diseases, injuries, and conditions related to environmental exposure.

**PA:8350 Pediatrics (Neonatology) Elective for Physician Assistant Students arr.**

Basic clinical knowledge and skill for diagnosis, treatment, and management of critically ill infants.

**PA:8351 Internal Medicine (Rheumatology) for Physician Assistant Students arr.**

Basic clinical knowledge and skills for diagnosis, treatment, and management of rheumatologic diseases.

**PA:8352 Medical Intensive Care for Physician Assistant Students arr.**

Basic clinical knowledge and skills for diagnosis, treatment, and management of critically ill patients.

**PA:8353 International Medicine for Physician Assistant Students arr.**

Basic clinical knowledge and skills for diagnosis, treatment, and prevention of diseases, injuries, and conditions relevant to international medicine.

**PA:8354 Interventional Radiology for Physician Assistant Students arr.**

Basic clinical knowledge and skills for diagnosis and treatment of conditions requiring interventional therapy.

**PA:8355 Gynecologic Oncology Elective for Physician Assistant Students arr.**

Experience developing diagnostic skills in clinical gynecologic oncology, learning methods of staging specific cancers; and assisting in therapy and outpatient management of patients with varied cancers.

**PA:8356 Wilderness Medicine for Physician Assistant Students arr.**

Four-week emergency medicine elective taken in conjunction with Carver College of Medicine; mix of didactic and experiential learning; ten-day trip to Colorado to learn about hypothermia, altitude medicine, search and rescue, field evaluation, treatment and evacuation of common back country injuries; lectures and simulations.

**PA:8357 Physician Assistant Transitions to Clinical Rotations 1 s.h.**

Additional didactic and hands-on skills essential for preparation prior to core and elective clinical rotations. Requirements: enrollment in physician assistant studies and services.

**PA:8358 Internal Medicine (Endocrinology) Elective for Physician Assistant Students arr.**

Basic clinical knowledge and skills for diagnosis treatment and management for common endocrinology diseases.

**PA:8359 Surgery Elective for Physician Assistant Students (Plastics and Reconstruction) arr.**

Experience in a wide range of surgical problems, procedures, and treatments in medical reconstruction, plastics, and trauma; includes diagnosis, care and treatment, and postoperative courses for surgical patients.

**PA:8360 Physician Assistant Summer Clinicals 6 s.h.**

Clinical course for physician assistant students during their second summer session.

**PA:8361 Physician Assistant Remediation and Self Study arr.**

Completion of remediation or self-study program requirements.

**PA:8362 Independent Study for Physician Assistant Students arr.**

Students work on alternative experiences to supplement coursework and/or clinical experiences throughout various areas of the physician assistant program; self-guided experiences with faculty supervision.

**PA:8363 Primary Care Academic Rotation arr.**

Additional academic opportunities that enhance previous experiences gained in a clinical setting; emphasis on student participation in direct activities to supplement primary care experiences with observation and simulation activities as needed to provide a balanced experience in meeting course objectives.

**PA:8364 Emergency Medicine Elective for Physician Assistant Students 2,4 s.h.**

Training in varied emergency medicine problems; recognition and appropriate treatments.

# Master of Physician Assistant Studies, M.P.A.S.

The Master of Physician Assistant Studies (M.P.A.S.) program emphasizes primary care medicine, particularly family medicine. It also offers elective clinical rotations in selected medical subspecialties. Students who complete the program are eligible to take the National Certifying Examination for Primary Care Physician Assistants, which they must complete successfully in order to register as physician assistants in the United States.

The Department of Physician Assistant Studies and Services is accredited by the Accreditation Review Commission on Education for the Physician Assistant and is a member of the Physician Assistant Education Association.

## Requirements

The Master of Physician Assistant Studies requires a minimum of 114 s.h. of credit. The curriculum spans 28 months and consists of a didactic phase and a clinical phase. The program begins in August.

The Master of Physician Assistant Studies requires the following work.

## Didactic Curriculum

The M.P.A.S. program's didactic phase is built on a triple-helix model whose three strands consist of clinical and professional skills (CAPS), mechanisms of health and disease (MOHD), and medicine and society (MAS). The strands are interwoven, assuring that their material is integrated and revisited throughout the didactic phase, so that students' understanding and mastery of the material deepens progressively.

The didactic curriculum consists of the following courses.

### Human Anatomy and Foundations of Life

ACB:8101 Medical Gross Human Anatomy involves complete dissection of the human body. Students learn to identify the human body's components and learn how their structures and locations relate to their functions. They also learn much of the language they will need in order to communicate accurately and specifically with patients and other physicians.

MED:8123 Foundations of Cellular Life covers genetics, embryology, molecular biology, biochemistry, cell biology, and histology. Students learn the molecular events required for cellular life and how cells grow and interact to form the basic tissues of the human body. This course provides the necessary framework students will need in order to begin the mechanisms of health and disease series.

### Clinical and Professional Skills

The clinical and professional skills (CAPS) strand provides students with the knowledge, skills, and attitudes required for professional development and clinical excellence, including the sense of inquiry and lifelong habits of skill acquisition, self-assessment, and reflective practice. CAPS features developmental learning through increasingly challenging

experiences across the curriculum, repeated practice opportunities, observation and feedback, and self-directed learning and reflection. CAPS requires the following three courses.

MED:8121 Clinical and Professional Skills I introduces students to concepts of clinical reasoning, communication, physical examination, and evidence-based clinical practice as well as the principles of biomedical ethics. The Longitudinal Clinical Mentor (LCM) program allows early clinical interactions and helps place classroom experiences into the context of patient care. Through interactions with students from other health sciences colleges, M.P.A.S. students begin to explore the interprofessional approach to caring for patients.

MED:8131 Clinical and Professional Skills II reinforces clinical reasoning concepts from MED:8121 and introduces additional elements of clinical reasoning, which are practiced through interactions with standardized patients and through Longitudinal Clinical Mentor clinical visits. The varied experiences help students gain a deeper appreciation for issues in biomedical ethics. As part of interprofessional education, students focus on the strengths and barriers involved in providing comprehensive interdisciplinary patient care.

MED:8221 Clinical and Professional Skills III develops advanced clinical reasoning skills through focused patient encounters and interactions with special patient populations. Emphasis is on students' ability to integrate and use concepts from the other curricular strands that are required for cost-conscious, patient-centered, interdisciplinary care.

## Mechanisms of Health and Disease

The mechanisms of health and disease (MOHD) strand focuses on multisystem mechanisms. MOHD requires the following five courses.

MED:8124 Mechanisms of Health and Disease I covers normal and healthy processes within and among the mechanisms of oxygenation, metabolism, and genetics/development.

MED:8133 Mechanisms of Health and Disease II covers normal and healthy processes within and among the mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

MED:8134 Mechanisms of Health and Disease III covers abnormalities or disruptions leading to disease within and among the mechanisms of oxygenation, metabolism, and genetics/development.

MED:8223 Mechanisms of Health and Disease IV covers abnormalities or disruptions leading to disease within and among the mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

MED:8224 Mechanisms of Health and Disease Keystone provides a transition from classroom instruction in MED:8124, MED:8133, MED:8134, and MED:8223 to clinical practice. Foundational information from those courses is approached from the perspective of common clinic encounters. Students make diagnostic and management decisions about common important clinical problems using the foundational knowledge they gained from those courses.

## Medicine and Society

The medicine and society (MAS) strand teaches students about disease prevention, health promotion services, public health, epidemiology, health services organizations and

delivery, and community dimensions of medical practice. MAS requires the following three courses.

MED:8122 Medicine and Society I introduces social determinants of health. Students investigate the influence and impact of culture and the community on health care, learn about community resources, and apply health and risk assessment to individual patients and to themselves.

MED:8132 Medicine and Society II focuses on public health and epidemiology, with attention to screening, global health, and environmental hazards.

MED:8222 Medicine and Society III focuses on health services organization and delivery, with emphasis on community dimensions of medical practice and patient safety.

## Summer Curriculum

Summer curriculum consists of a six-week summer session that includes didactic workshop material in cardiology and radiology. Students complete a two-week introduction to clinical medicine before beginning the clinical rotations. Summer curriculum requires the following five courses.

Code	Title	Hours
PA:8212	Fundamentals of EKG and ACLS for Physician Assistant Students	2
PA:8213	Fundamentals of Radiology for Physician Assistant Students	1
PA:8214	Fundamentals of Clinical Laboratory Medicine for Physician Assistant Students	1
PA:8301	Seminar for Physician Assistant Students	1
PA:8302	Physician Assistant Professional and Clinical Skills	1

## Clinical Curriculum

The program's second phase concentrates on clinical education. Students complete four weeks of didactic workshops and rotations and a 36-week core of required primary care clinical rotations, including general internal medicine, surgery, family medicine, pediatrics, emergency medicine, gynecology, and psychiatry in affiliated hospitals throughout the United States and select international locations. Students then select eight weeks of electives which may include rotations such as geriatrics, cardiology, dermatology, and orthopedics.

The primary care clinical rotations are designed to provide instruction and experience in caring for patients in a way that enables students to integrate the knowledge, skills, behaviors, and attitudes they learned in the program's didactic phase. Clinical training is provided at University of Iowa Hospitals & Clinics, the VA Iowa City Health Care, the VA Central Iowa Health Care System and Broadlawns Medical Center in Des Moines, and other affiliated hospitals throughout Iowa. In elective rotations, students gain additional clinical experience through placement with selected preceptors involved in office-based practices, typically in medically underserved rural areas.

Students also complete a master's degree project as part of the clinical curriculum.

## Required Clinical Rotation

The following clinical rotations are required.

Code	Title	Hours
PA:8304	Emergency Medicine for Physician Assistant Students	4
PA:8305	Gynecology for Physician Assistant Students	4
PA:8306	Family Practice I for Physician Assistant Students	4
PA:8307	Family Practice II for Physician Assistant Students	4
PA:8308	General Surgery for Physician Assistant Students	6
PA:8309	Internal Medicine for Physician Assistant Students	6
PA:8310	Pediatrics for Physician Assistant Students	4
PA:8311	Psychiatry for Physician Assistant Students	4

## Elective Clinical Rotations

Students select elective clinical rotations from these.

Code	Title	Hours
PA:8320	Dermatology Elective for Physician Assistant Students	arr.
PA:8321	Neurology Elective for Physician Assistant Students	arr.
PA:8322	Obstetrics for Physician Assistant Students	arr.
PA:8323	Ophthalmology Elective for Physician Assistant Students	arr.
PA:8324	Otolaryngology Elective for Physician Assistant Students	arr.
PA:8325	Pediatric Elective for Physician Assistant Students	arr.
PA:8326	Radiology Elective for Physician Assistant Students	arr.
PA:8327	Pediatric Elective (Hematology/Oncology) for Physician Assistant Students	arr.
PA:8328	Pediatric (Cardiology) Elective for Physician Assistant Students	arr.
PA:8329	Psychiatry Elective for Physician Assistant Students	arr.
PA:8330	Surgery Elective for Physician Assistant Students	arr.
PA:8331	Surgery Elective (Transplant/Organ Retrieval) for Physician Assistant Students	arr.
PA:8332	Surgery Elective (Burn Unit) for Physician Assistant Students	arr.

- be citizens or permanent residents of the United States;
- hold a baccalaureate degree from an accredited institution in the United States (the degree does not have to be completed at the time of admission, but must be conferred prior to the start of the program)<sup>1</sup>;
- have a minimum cumulative g.p.a. of 3.00 on a 4.00 scale;
- have a minimum overall science g.p.a. of 3.20 on a 4.00 scale or a science g.p.a. of at least 3.20 on a 4.00 scale on the most recent 40 s.h. of college-level, science-based coursework (science courses are subject to department approval);
- have completed the prerequisite courses no more than 10 years before they apply and all courses must be taken for letter grades (see "Prerequisite Science Courses" below);
- have taken the Graduate Record Examination (GRE) General Test no more than 10 years before they apply (must score at the 25th percentile or higher in each of the individual sections—quantitative, verbal, and analytical) or the Medical College Admission Test (MCAT) no more than 10 years before they apply (no minimum MCAT score is required at this time);
- have completed a minimum of 1,000 hours of direct patient health care experience by December 31 of the application year (hours subject to departmental approval and applicants can be awarded between 0-100 percent of hours completed);
- submit three letters of recommendation (one must be from a collegiate academic reference and one must be from a health care supervisor (shadowing experience does not count, but may be used for the third recommendation letter));
- meet the admission requirements of the Graduate College (see the Manual of Rules and Regulations on the Graduate College website);
- have taken the Test of English as a Foreign Language (TOEFL) if English is not their native language (only the internet-based test is accepted and applicants must have a total score of at least 93 with a speaking score of at least 26) or have an acceptable score on the International English Language Testing System (IELTS) or the Duolingo English Test (DET)<sup>2</sup>; and
- be able to meet the program's technical standards (see "Technical Standards" below).

<sup>1</sup> International applicants will have their credentials reviewed for degree completion and equivalency.

<sup>2</sup> International applicants who do not speak English as their native language should have TOEFL scores sent from the Educational Testing Service (ETS) to the Department of Physician Assistant Studies and Services or have their acceptable IELTS or DET scores mailed to the University of Iowa. This requirement may be waived for applicants with a master's or doctoral degree from an accredited U.S. institution.

## Prerequisite Science Courses

Applicants must have completed preparatory science courses in biological, chemical, and statistical sciences. Prerequisite courses can be in progress at the time of admission unless stated below. Science-based courses are subject to the approval by the Physician Assistant Studies and Services Program.

### Biological Science

These courses are required:

## Admission

Applicants must:

- An introductory biology or zoology course sequence (minimum of a two semester sequence unless otherwise approved).
- An animal, exercise, or human physiology course.
- A minimum of three additional upper-level biological science courses. To qualify as upper level, the biological science courses must require a prerequisite course to enroll. Courses that have been used to satisfy this requirement include cell biology, cell physiology, endocrinology, genetics, histology, immunology, microbiology, molecular biology, neurobiology, pharmacology, and other related disciplines.

## Chemical Science

These courses are required:

- An introductory chemistry course sequence (a minimum of a two-semester sequence, unless otherwise approved).
- At least one semester of organic chemistry (must be at a higher level than a survey of organic chemistry course).
- At least one semester of biochemistry (must be at a higher level than a survey of biochemistry course and be completed at the time of application).

## Statistical Science

This course is required:

- Any course with a statistical focus, such as a general, introductory, psychological, or business statistics course; or biostatistics; or a qualitative research methods course.

Satisfaction of the basic admission requirements does not ensure acceptance to the program. The admission committee selects the applicants it considers best qualified. The admission committee requests interviews with the most qualified applicants.

## Technical Standards

Individuals admitted to the Department of Physician Assistant Studies and Services must possess the capability to complete the entire curriculum and earn the Master of Physician Assistant Studies degree. The curriculum requires demonstrated proficiency in a variety of cognitive, problem-solving, manipulative, communicative, and interpersonal skills. For more information, view the University of Iowa Carver College of Medicine Technical Standards for Admission and Retention on the Department of Physician Assistant Studies and Services website.

## Application Timeline and Process

Applications are accepted from the end of April to October 1 for entry into the program the following August. Applicants must apply through the Central Application Service for Physician Assistants (CASPA).

The admission committee prefers that the majority of prerequisite course requirements be completed by the October 1 application deadline date.

All materials must be received and verified by CASPA, and all additional information requested by the Physician Assistant Studies and Services Program submitted by the October 1 deadline.

All final decisions related to admission deadlines, process, and decisions regarding admission are up to the department administrator, in collaboration with the admission committee.

## Career Advancement

Physician assistants work in a variety of settings, including medical offices, hospital emergency rooms, nursing homes, rural satellite clinics, health maintenance organizations, and patients' homes.

# Psychiatry

## Chair

- Peggy C. Nopoulos

**Faculty:** <https://medicine.uiowa.edu/psychiatry/profile/?appointment=PRIMARY&category=&query=&page=1&size=10>

**Website:** <https://medicine.uiowa.edu/psychiatry/>

The Department of Psychiatry teaches M.D. students, principally during their third year, and trains resident physicians for academic and clinical careers in psychiatry.

## Research

Department of Psychiatry staff members are involved in genetic and family studies of psychiatric disorders and research in genetic and biological psychiatry, neurochemistry, neuroimaging, neurophysiology, neuropsychiatry, psychosocial aspects of behavior, and neuroinvasive brain stimulation.

The department's students and residents have many research opportunities in psychiatry and in the basic science areas of neurochemistry, neurophysiology, and electrophysiology. The clinical areas of psychology, child psychiatry, and psychotherapy also offer opportunities for research and further study to a limited number of students.

## Residency

The department offers a four-year training program approved by the Residency Review Committee of the American Medical Association. Training experiences are available at University of Iowa Hospitals & Clinics and at the VA Iowa City Health Care. Additional experiences are available at affiliated institutions: Broadlawns Medical Center in Des Moines, the Iowa Medical and Classification Center at Oakdale, the Community Mental Health Center for Mid-Eastern Iowa in Iowa City, and the Independence Mental Health Institute (Iowa Department of Human Services).

The department also offers an approved two-year residency in child psychiatry. Fellowships in consult/liaison psychiatry and addiction medicine are available after residency training.

## Courses

### Psychiatry Courses

**PSYC:8301 Clinical Psychiatry** 4 s.h.  
Requirements: third-year M.D. enrollment.

**PSYC:8401 Adult Psychiatry, Pappajohn Pavilion** arr.  
Requirements: M.D. enrollment.

**PSYC:8402 Child Psychiatry, Pappajohn Pavilion** arr.  
Roles of child psychiatry as a consultation service.  
Requirements: M.D. enrollment.

**PSYC:8403 Adult Outpatient Psychiatry and Psychotherapy** 2,4 s.h.  
Diagnostic assessment, evaluation, treatment of psychiatric patients; exposure to both psychotherapeutic, psychopharmacologic treatments. Requirements: M.D. enrollment.

**PSYC:8404 Women's Wellness and Counseling Service** 4 s.h.

Experience evaluating and treating women with mental illness, with some emphasis on practitioner's autonomy; four-week rotation. Requirements: psychiatry clerkship.

**PSYC:8405 Advanced Inpatient Subinternship in Medical Psychiatry** 4 s.h.

Hands-on experience in evaluation and treatment of patients with combined medical and psychiatric disease; decisions regarding appropriate consultations, diagnostic tests, treatment; etiology and pathophysiology. Requirements: M.D. enrollment.

**PSYC:8408 Advanced Inpatient Subinternship in Mood/Psychotic Disorders** 4 s.h.

Subinternship in adult psychiatry; experiences that maximize autonomy and responsibility; inpatient rotation focuses on one subspecialty area (psychotic disorders or mood disorders); emphasis on substantial medical comorbidity; assess and address medical and psychiatric needs of assigned patients in a collaborative and integrative fashion; assess and manage patients independently at the level of a psychiatry intern, reporting directly to the attending; call is required; didactic curriculum focuses on critical appraisal of medical literature. Prerequisites: PSYC:8301. Requirements: fourth-year M.D. enrollment.

**PSYC:8409 Eating Disorders** 2,4 s.h.

Inpatient rotation; emphasis on co-occurring psychiatric and comorbid medical conditions associated with eating disorders; patient assessment and management at an advanced level; direct patient care and engagement in clinical decision making for complex patients with substantial comorbidity; call is required; student experience maximizes autonomy and responsibility; didactic curriculum; focus on critical appraisal of relevant medical literature. Prerequisites: PSYC:8301. Requirements: fourth-year M.D. enrollment.

**PSYC:8410 Intellectual Disability** 2,4 s.h.

In-depth two week clinical experience in the interdisciplinary approach to assessment and management of individuals with intellectual disability. Requirements: M.D. enrollment.

**PSYC:8411 Substance Use** 2,4 s.h.

In-depth clinical experience in assessment and management of individuals with alcohol and drug abuse. Requirements: M.D. enrollment.

**PSYC:8412 Emergency Psychiatry** 2,4 s.h.

In-depth clinical experience in assessment and management of acute psychiatric illness under supervision of faculty with expertise in care within this setting; clinical experiences centered in emergency department at University of Iowa Hospitals & Clinics. Prerequisites: PSYC:8301. Requirements: third- or fourth-year M.D. enrollment.

**PSYC:8413 The Thriving Physician** 2 s.h.

Two-week elective for medical students in their clinical years; designed to promote awareness, wellbeing, compassion, and career satisfaction through contemplative practices and the integration of concepts of positive psychology into daily living; through readings, discussions, and experiential activities, physicians-in-training will learn how to engage in reflective personal and professional self-care; classes will be half-day in length with time outside of class dedicated to practicing and incorporating skills into everyday activities. Requirements: M.D. enrollment.

**PSYC:8414 Consultation Psychiatry 2,4 s.h.**

Opportunity for in-depth clinical experience in psychiatric assessment and management of general medical and surgical patients; elective clerks serve on consultation-liaison psychiatry teams at the University of Iowa Hospitals & Clinics and the Iowa City Veterans Affairs Health Care System; may include opportunities for outpatient work in relevant settings (e.g., emergency psychiatry, outpatient clinics providing integrated psychiatric and medical care). Requirements: M.D. enrollment.

**PSYC:8415 Geriatric Inpatient Psychiatry 4 s.h.**

Rotation in Department of Psychiatry specialized inpatient geriatric psychiatry unit; students work under faculty and resident supervision.

**PSYC:8450 Continuity of Care in Psychiatry 4 s.h.**

Experience in Psychiatry Continuity of Care Clinic; maximizes autonomy and responsibility in an outpatient continuous care setting. Requirements: fourth-year M.D. enrollment.

**PSYC:8497 Research in Psychiatry arr.**

Experience and training in practical application of scientific methodology; work with research project at psychiatric service or affiliated cooperating research centers.

**PSYC:8498 Psychiatry On Campus arr.**

Arranged by student with departmental approval. Requirements: M.D. enrollment.

**PSYC:8499 Psychiatry Off Campus arr.**

Requirements: M.D. enrollment.

# Radiation Oncology

## Chair

- John M. Buatti

## Director, Medical Physics Residency Program

- Joël J. St-Aubin

## Director, Physician Residency Program

- Carryn M. Anderson

## Associate Director, Physician Residency Program

- Kristin A. Plichta

**Faculty:** <https://medicine.uiowa.edu/radiationoncology/profile/?appointment=PRIMARY&category=&query=&page=1&size=10>  
**Website:** <https://medicine.uiowa.edu/radiationoncology/>

Radiation oncology specializes in the delivery of radiation treatments for cancer patients. It includes treatments with linear accelerators as well as isotopes and temporary and permanent surgically implanted sources. Radiation oncologists also use these methods to treat some benign diseases, such as Graves' ophthalmopathy and trigeminal neuralgia. Treatments often employ stereotactic CT-image guided and MR-image guided techniques.

The Department of Radiation Oncology is dedicated to educating undergraduate and graduate students, M.D. and other health professions students, and residents. Its faculty members provide instruction for Doctor of Philosophy students in the Free Radical and Radiation Biology Program [p. 1761] through their participation in FRRB:3110 Medical Physics I, FRRB:3215 Medical Physics II, FRRB:5000 Radiation Biology, FRRB:7000 Redox Biology and Medicine, and FRRB:7001 Molecular and Cellular Biology of Cancer.

The department's professional staff provides training in radiation therapy technology for undergraduate students in the Radiation Sciences Program [p. 1834] by teaching courses RSTH:3120 Radiation Therapy Clinical Internship I, RSTH:3225 Radiation Therapy Clinical Internship II, RSTH:3325 Radiation Therapy Clinical Internship III, RSTH:4125 Radiation Therapy Clinical Internship IV, and RSTH:4225 Radiation Therapy Clinical Internship V.

The department also offers specialized research projects and sponsors postdoctoral students in biology, physics, and clinical disciplines by arrangement with the instructor or mentor. Frequently, students from the Departments of Biomedical Engineering and Electrical and Computer Engineering are involved.

## Residency

The department provides a four-year physician residency training program in radiation oncology that includes clinical care and education. It also has a two-year residency program in medical physics.

M.D. students can elect a four-week radiation oncology rotation and/or a two-week multidisciplinary cancer care elective. Nursing students, dental residents, and fellows in gynecologic oncology, breast cancer, and in adult and

pediatric hematology and oncology complete rotations in the department.

## Courses

### Radiation Oncology Courses

#### **RADO:8401 Radiation Oncology for Medical Students** **4 s.h.**

Integration of clinical oncology, physics, and cancer biology; clinical work with faculty mentors; experience in clinical evaluation, technical physics, biological application.

#### **RADO:8491 Introduction to Radiation Oncology** **2 s.h.**

Role of radiation therapy in the management cancer patients; exposure to a variety of radiation oncology topics including basic principles of radiation oncology, radiation physics, radiation/cancer biology, oncologic work-up and management, and radiation treatment planning; for advanced medical students with an interest in radiation oncology or oncology related specialties.

#### **RADO:8497 Research in Radiation Oncology** **arr.**

Medical research, clinical or laboratory projects; individual study.

#### **RADO:8498 Radiation Oncology On Campus** **arr.**

Arranged by student with department approval.

#### **RADO:8499 Radiation Oncology Off Campus** **arr.**

Arranged by student with department approval.

# Radiation Sciences

## Director, Undergraduate Program

- Anthony W. Knight

## Director, Diagnostic Medical Sonography Program

- Stephanie Ellingson

## Director, Radiation Therapy Program

- Jared L. Stiles

## Director, Radiologic Technology Program

- Jean E. Wiese

## Director, Student Affairs

- Jennifer J. Maiers

**Undergraduate major:** radiation sciences (B.S.)

**Website:** <https://medicine.uiowa.edu/radsci/>

Radiation sciences professionals work with physicians to gather accurate patient information for diagnosis, treatment, and/or research of disease and injury. They provide direct patient care, produce quality images, and deliver treatment using a variety of radiation sources. The radiation sciences professional must apply knowledge, skill, and mature judgment while operating complex equipment safely and efficiently. Strong communication, organizational, and patient care skills are essential for a successful career in radiation sciences.

The University of Iowa's radiation sciences educational programs are designed to provide students with opportunities for intellectual, professional, and social growth. Students learn with faculty members and instructors who are committed to radiation sciences education.

Radiation sciences is one of two undergraduate majors in the field of medical imaging offered by the Carver College of Medicine. It encompasses radiologic technology, breast imaging, computed tomography, magnetic resonance imaging, cardiovascular interventional, diagnostic medical sonography, and radiation therapy programs. The other undergraduate major in medical imaging is nuclear medicine technology; see Nuclear Medicine Technology [p. 1792] in the Catalog.

The Carver College of Medicine is located on the University of Iowa health sciences campus, which includes University of Iowa Hospitals & Clinics, one of the nation's largest university-owned teaching hospitals. For information about the college's academic programs and resources, see Carver College of Medicine [p. 1715] in the Catalog.

UI Health Care and the Carver College of Medicine have a proud academic tradition of preparing students for successful careers in the radiation sciences. Today, that tradition continues through its strong curriculum, quality clinical experience, and commitment to undergraduate education in the creation of images and treatment of patients using highly sophisticated equipment and techniques.

The Carver College of Medicine, in partnership with the Department of Radiology, shares the University's commitment to equal access, and consistent with its academic mission and standards, strives to achieve excellence through the advancement of diversity, equity, and inclusion. The college is mindful of all aspects of human difference and defines

diversity in the broadest sense to mean inclusion of all persons. The programs it offers strive to create a welcoming and inclusive culture.

## Programs

### Undergraduate Program of Study

#### Major

- Major in Radiation Sciences (Bachelor of Science) [p. 1842]

## Courses

- Breast Imaging Courses [p. 1834]
- Cardiovascular Interventional Courses [p. 1835]
- Computed Tomography Courses [p. 1835]
- Diagnostic Medical Sonography Courses [p. 1836]
- Magnetic Resonance Courses [p. 1838]
- Radiation Sciences Courses [p. 1839]
- Radiation Therapy Courses [p. 1839]
- Radiologic Technology Courses [p. 1840]

### Breast Imaging Courses

#### **RSBI:3310 Patient Care for Breast Imaging** 3 s.h.

Foundation for providing high-quality patient care during breast imaging exams and procedures; patient communication, assessment, and treatment options including surgical, nonsurgical, and reconstruction. Requirements: radiation sciences major.

#### **RSBI:3315 Breast Imaging Clinical Internship I** 2 s.h.

Breast imaging clinical internship practicum at UI Health Care; rotation through department imaging rooms; competency and objective-based education with required clinical performance evaluations; participation in routine and advanced breast imaging exams; performance expectations become progressively higher as students gain experience and skills. Requirements: radiation sciences major.

#### **RSBI:4110 Breast Imaging Procedures and Analysis** 3 s.h.

Breast imaging exams including technique, image evaluation, and positioning.

#### **RSBI:4115 Breast Imaging Clinical Internship II** 4 s.h.

Breast imaging clinical internship scheduled at University of Iowa Hospital & Clinics; rotation through department imaging rooms; competency and objective-based education with required clinical performance evaluations; experience facilitated by breast imaging technologists, radiologists, residents, and clinical coordinator; participation in routine and advanced breast imaging exams; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSBI:3315. Requirements: radiation sciences major.

#### **RSBI:4120 Anatomy and Pathology for Breast Imaging** 2 s.h.

Anatomy, localization terminology, histology, and cytology; pathology including mammographic appearance and reporting terminology; benign, high risk, and malignant conditions and their mammographic appearances.

**RSBI:4130 Breast Imaging Acquisitions and Principles** 2 s.h.

Physics and hardware used in obtaining exams in breast imaging; equipment operations including design characteristics of mammography units, digital acquisition, display, and informatics.

**RSBI:4210 Breast Imaging Advanced Procedures and Analysis** 3 s.h.

Advanced breast imaging modalities including breast sonography, breast MRI, sentinel node mapping, and interventional procedures.

**RSBI:4215 Breast Imaging Clinical Internship III** 4 s.h.

Breast imaging clinical internship scheduled at University of Iowa Hospital & Clinics; rotation through department imaging rooms; competency and objective-based education with required clinical performance evaluations; experience facilitated by breast imaging technologists, radiologists, residents, and clinical coordinator; participation in routine and advanced breast imaging exams; performance expectations become progressively higher as students gain experience and skills.

**RSBI:4220 Quality Control in Breast Imaging** 3 s.h.

Quality control aspects related to breast imaging; quality assurance and evaluation including accreditation, certification, and Mammography Quality Standards Act (MQSA) regulations; quality control including mammographers tests and digital quality control tests; medical physicist test including general quality control tests and quality control tests specific to digital imaging and tomosynthesis.

## Cardiovascular Interventional Courses

**RSCI:4110 Vascular Anatomy** 3 s.h.

Normal arterial and venous anatomy of the circulatory system illustrated through angiographic, magnetic resonance imaging (MRI), and computed tomography (CG) images; common variants. Prerequisites: ACB:3110 or HHP:1100 or HHP:1150 or HHP:3105 or HHP:3115.

**RSCI:4120 CVI Principles** 4 s.h.

Imaging and accessory equipment for vascular interventional and cardiac interventional procedures; imaging equipment quality control; fundamental principles of vascular and cardiac procedures; patient preparation and care, radiation safety, contrast medium, pharmacology, and sedation. Corequisites: RSCI:4110. Requirements: acceptance to B.S. radiation science RT/CVI track or ARRT primary RT certification.

**RSCI:4130 Electrocardiogram and Hemodynamics** 3 s.h.

ECG analysis, hemodynamic principles and waveform analysis, cardiac output, vascular resistance, calculations of stenotic valves. Prerequisites: ACB:3110 or HHP:1100 or HHP:1150.

**RSCI:4140 CVI Peripheral Procedures and Pathology** 3 s.h.

Angiographic and interventional procedures of the abdomen, thorax, and upper and lower extremities; associated pathologies. Prerequisites: RSCI:4110. Corequisites: RSCI:4120, if not taken as a prerequisite. Requirements: RSCI:4110 or three months CVI experience.

**RSCI:4150 CVI Neurology and Nonvascular Procedures and Pathology** 3 s.h.

Angiographic and interventional procedures of the head and neck; associated pathologies. Prerequisites: RSCI:4110. Corequisites: RSCI:4120, if not taken as a prerequisite. Requirements: RSCI:4110 or three months CVI experience.

**RSCI:4160 CVI Cardiac Procedures and Pathology** 4 s.h.

Cardiac diagnostic and interventional procedures; associated pathologies. Prerequisites: RSCI:4110. Corequisites: RSCI:4120 and RSCI:4130, if not taken as prerequisites. Requirements: RSCI:4110 or three months CVI experience.

**RSCI:4170 Cardiac Interventional Clinical Internship** 4 s.h.

Cardiac-interventional clinical time scheduled at University of Iowa Hospitals & Clinics and Mercy Hospital, Iowa City; rotations in adult cardiac, electrophysiology, and pediatric catheterization; competency and objective-based education provided with clinical performance evaluations and constructive feedback from CI staff and clinical coordinator; clinical coordinator facilitates schedules, rotations, learning objectives, evaluations, and competencies. Corequisites: RSCI:4130 and RSCI:4160, if not taken as prerequisites. Requirements: acceptance to B.S. radiation sciences RT/CVI track.

**RSCI:4180 Vascular Interventional Clinical Internship** 4 s.h.

Vascular-interventional clinical time scheduled at University of Iowa Hospitals & Clinics; labs specialize in peripheral, neuro- and non-vascular procedures; competency and objective-based education; clinical performance evaluations providing constructive feedback from VI staff and clinical coordinator; clinical coordinator facilitates schedules, rotations, learning objectives, evaluations, and competencies. Corequisites: RSCI:4140 and RSCI:4150, if not taken as prerequisites. Requirements: acceptance to B.S. radiation sciences RT/CVI track.

**RSCI:4190 CVI Clinical Internship** 2 s.h.

Introduction to VI and CI labs including basic set up, equipment, and procedures; preparation to spend more concentrated time in each area for future internships; provides 192 hours of clinical experience over a 12-week period. Requirements: acceptance to radiation sciences RT/CVI degree track or CVI clinical internship.

## Computed Tomography Courses

**RSCT:4100 Sectional Anatomy for Imaging Sciences** 3 s.h.

Sectional anatomy identifiable on computed tomography and magnetic resonance imaging, including transverse, coronal, and sagittal planes. Prerequisites: ACB:3110 or HHP:1100 or HHP:1150 or HHP:3105 or HHP:3115.

**RSCT:4105 Computed Tomography Clinical Internship I** 2 s.h.

Clinical internship scheduled at University of Iowa Hospitals & Clinics; rotation through CT scanners, 3D lab, and radiation therapy departments; competency and objective-based education with required clinical performance evaluations; clinical coordinator facilitates schedules, rotations, learning objectives, evaluations, and competencies; experience facilitated by CT technologists, radiologists, residents, and coordinator; participation in routine and advanced CT scans; performance expectations become progressively higher as student gains experience and skills. Requirements: acceptance to B.S. radiation sciences RT/CT track.

**RSCT:4110 CT/MRI Pathology 3 s.h.**

Common pathological conditions found in CT and MRI images; protocol appearance variations; units of CNS, musculoskeletal, neck/thorax, and abdominopelvic pathology; textbook readings, in-class discussions, special projects including case studies and presentations. Requirements: concurrent enrollment in RSCT:4100, if not taken as a prerequisite, or at least 3 months fulltime CT/MRI clinical experience.

**RSCT:4115 Computed Tomography Clinical Internship II 4 s.h.**

CT scanners, 3D lab, and radiation therapy department rotation at University of Iowa Hospitals & Clinics; competency and objective-based education with required clinical performance evaluations; clinical coordinator facilitates schedule, rotations, learning objectives, evaluations, and competencies; experience facilitated by CT technologists, radiologists, residents, and coordinator; participation in routine and advanced CT scans; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSCT:4105.

**RSCT:4120 Computed Tomography Procedures I 3 s.h.**

Computed tomography procedures of the head, neck, thorax, mediastinum, abdomen, and pelvis; positioning techniques, patient preparation, monitoring and care, indications and contraindications for procedures; contrast media usage; basic protocol information with adjustments to tailor procedures for patient's indications; brief units on patient care relevant to CT; CT parameters and equipment. Corequisites: RSCT:4100. Requirements: acceptance to B.S. radiation sciences RT/CT track or ARRT primary certification in radiologic technology, nuclear medicine, or radiation therapy.

**RSCT:4125 Computed Tomography Procedures II 4 s.h.**

Imaging information in musculoskeletal exams, 3D reconstruction, CTAs; cardiac, including gating, biopsies, drains, post-myelography, radiation therapy planning, and 4D imaging; CT arthrography, PET/CT, SPECT/CT, virtual colonoscopy; procedure indications and contraindications, patient and room preparation, positioning techniques, contrast media usage, and scan parameters; basic protocol information and how to tailor procedures to a patient's indications. Prerequisites: RSCT:4120. Corequisites: RSCI:4110, if not taken as a prerequisite.

**RSCT:4130 Computed Tomography Physical Principles and QC 4 s.h.**

Physical principles and instrumentation; historical development and evolution of CT; characteristics of radiation, beam attenuation, linear attenuation coefficients, tissue characteristics, Hounsfield numbers, data acquisition, image manipulation techniques, tube configuration, collimation design and function, detectors, image quality factors, functions of CT computer and array processor; image processing and display examined from data acquisition through postprocessing and archiving; radiation protection practices and QC. Requirements: acceptance to B.S. radiation sciences RT/CT degree track or ARRT primary certification in radiologic technology, nuclear medicine, or radiation therapy.

**RSCT:4215 Computed Tomography Clinical Internship III 4 s.h.**

CT scanners, 3D lab, and radiation therapy department rotation at University of Iowa Hospitals & Clinics; competency and objective-based education with required clinical performance evaluations; clinical coordinator facilitates schedule, rotations, learning objectives, evaluations, and competencies; experience facilitated by CT technologists, radiologists, residents, and coordinator; participation in routine and advanced CT scans; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSCT:4115.

**Diagnostic Medical Sonography Courses****RSMS:3100 Cardiac Sonography I 3 s.h.**

Anatomy and physiology of cardiovascular system imaged sonographically; proper sonographic imaging techniques, normal anatomy, exam protocol, and proper instrument settings; pathology and pathophysiology of common conditions related to adult cardiovascular system. Prerequisites: RSMS:3110 with a minimum grade of C.

**RSMS:3101 Cardiac Sonography I Lab 2 s.h.**

Laboratory-based learning and simulation experience involving basic sonographic adult cardiac imaging and clinical history analysis; students perform sonographic exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plane orientation, transducer manipulation, instrumentation, and exam protocols. Prerequisites: RSMS:3111 with a minimum grade of C. Corequisites: RSMS:3100.

**RSMS:3110 Foundations of Sonography 3 s.h.**

Sonography history, ergonomics, terminology, image orientation; basic theories of sound waves, echo production, transducers, equipment operation, body imaging, Doppler, hemodynamics.

**RSMS:3111 Foundations of Sonography Lab 1 s.h.**

Sonography history, ergonomics, terminology, image orientation; basic theories of sound waves, echo production, transducers, equipment operation, body imaging, Doppler, and hemodynamics. Corequisites: RSMS:3110.

**RSMS:3115 Diagnostic Medical Sonography Clinical Internship I 2 s.h.**

Introductory clinical experience in health care setting developing a basic understanding of sonography clinical environment and professional practice standards; applying patient care techniques and developing professional communication skills. Prerequisites: RSP:2120.

**RSMS:3120 Abdominal Sonography I 3 s.h.**

Embryology, anatomy, and physiology of various abdominal structures imaged sonographically; abdominal vasculature, hepatobiliary system, pancreas, urinary system, adrenals, spleen, male anatomy; proper sonographic imaging techniques, including appearance of normal anatomy, imaging protocol, proper instrument settings. Prerequisites: RSMS:3110 with a minimum grade of C.

**RSMS:3121 Abdominal Sonography I Lab 1 s.h.**

Laboratory-based learning and simulation experience in sonographic abdominal imaging; students perform exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plane orientation, transducer manipulation, instrumentation, and exam protocols. Prerequisites: RSMS:3111 with a minimum grade of C. Corequisites: RSMS:3120.

**RSMS:3130 Obstetrical and Gynecological Sonography I** **3 s.h.**

Embryology, anatomy, and physiology of the female reproductive system and developing fetus; proper sonographic imaging techniques, including appearance of normal anatomy, imaging protocol, proper instrument settings. Prerequisites: RSMS:3110 with a minimum grade of C.

**RSMS:3131 Obstetrical and Gynecological Sonography I Lab** **1 s.h.**

Laboratory-based learning and simulation experience involving basic sonographic obstetrical and gynecological imaging and clinical history analysis; students perform sonographic exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plan orientation, transducer manipulation, instrumentation, and exam protocols. Prerequisites: RSMS:3111 with a minimum grade of C. Corequisites: RSMS:3130.

**RSMS:3140 Vascular Sonography I** **3 s.h.**

Anatomy and physiology of peripheral and cerebral vascular systems; analysis of hemodynamics, Doppler waveforms, pressure measurements, plethysmography, sonographic appearance, scanning techniques; evaluation of pathology and pathophysiology common to the lower extremity arterial and venous systems, and cerebrovascular system. Prerequisites: RSMS:3110 with a minimum grade of C.

**RSMS:3141 Vascular Sonography I Lab** **1 s.h.**

Laboratory-based learning and simulation experience involving basic vascular sonographic imaging and clinical history analysis; students perform non-imaging vascular physiologic tests and sonographic exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plane orientation, transducer manipulation, instrumentation, and exam protocols. Prerequisites: RSMS:3111 with a minimum grade of C. Corequisites: RSMS:3140.

**RSMS:3150 Cardiac Physiology and Hemodynamics** **3 s.h.**

Analysis of cardiac physiology and hemodynamics related to sonography; correlation with Doppler application in cardiovascular imaging, ECG, auscultation, cardiac catheterization; advanced and developing imaging techniques.

**RSMS:3205 Cardiac Sonography II** **3 s.h.**

Sonographic evaluation of advanced pathophysiology of human heart; sonographic appearance, imaging techniques, and exam modification. Prerequisites: RSMS:3100.

**RSMS:3206 Cardiac Sonography II Lab** **1 s.h.**

Laboratory-based learning and simulation experience involving the application of advanced sonographic cardiac imaging and clinical history analysis. Prerequisites: RSMS:3101. Corequisites: RSMS:3205.

**RSMS:3215 Diagnostic Medical Sonography Clinical Internship II** **3 s.h.**

Application of basic skills of sonographic imaging and physiologic vascular testing in the health care setting.

**RSMS:3230 Sonography Principles, Physics, and Instrumentation** **3 s.h.**

Physical principles of sound waves, their applications to imaging of the human body, operation and physical characteristics of various ultrasound transducers, method by which the sound wave is converted into a visual image, instrumentation components and their functions, Doppler principles, image artifacts, advanced hemodynamics, and spectral Doppler waveform analysis. Prerequisites: RSMS:3110.

**RSMS:3231 Sonography Principles, Physics, and Instrumentation Lab** **1 s.h.**

Laboratory-based learning and simulation experience in the application of sonographic imaging emphasizing physics principles, instrumentation, and quality assurance testing. Corequisites: RSMS:3230.

**RSMS:3240 Abdominal Sonography II** **3 s.h.**

Pathology and pathophysiology of abdominal and superficial structures imaged sonographically; interventional sonographic procedures; post-procedure protocol; associated clinical and laboratory findings; imaging techniques, analysis of findings, and documentation of pathology. Prerequisites: RSMS:3120.

**RSMS:3250 Obstetrical and Gynecological Sonography II** **3 s.h.**

Sonographically related pathological and abnormal congenital conditions of gynecology and obstetrics, infertility, assisted reproductive therapy, invasive procedures in obstetrics and gynecology, postpartum complications and maternal-fetal bonding; clinical findings, laboratory studies, and prognosis correlated with sonographic findings; appropriate image analysis and documentation of pathology. Prerequisites: RSMS:3130.

**RSMS:3260 Breast Sonography** **2 s.h.**

Embryology, anatomy, physiology, and pathophysiology of the breast as it relates to sonographic imaging; proper sonographic imaging techniques, including appearance of normal anatomy, imaging protocol, proper instrument settings; sonographic findings of diseases involving the breast.

**RSMS:3270 Vascular Sonography II** **3 s.h.**

Pathology and pathophysiology of complex diseases of the peripheral, cerebral, and abdominal vascular systems evaluated sonographically; associated clinical findings; techniques in physiologic, nonimaging tests, and duplex sonography; analysis of findings and documentation of pathology. Prerequisites: RSMS:3140.

**RSMS:3300 Pediatric Sonography** **3 s.h.**

Anatomy, sonographic anatomy, pathophysiology, sonographic appearance, and Doppler correlation of disorders affecting the pediatric population, including abdominal, musculoskeletal, peripheral vascular, and cerebrovascular systems, neonatal brain and spinal cord.

**RSMS:3305 Pediatric Cardiac Sonography** **3 s.h.**

Anatomy, sonographic anatomy, pathophysiology, sonographic appearance, and Doppler correlation of disorders affecting the pediatric cardiac population; associated clinical findings; techniques in sonographic imaging, analysis of findings, and documentation of pathology. Requirements: completion of or current enrollment in a diagnostic medical sonography program.

**RSMS:3306 Pediatric Cardiac Sonography Laboratory** 1 s.h.

Laboratory-based learning and simulation experience involving basic sonographic pediatric cardiac imaging and clinical history analysis; students perform sonographic exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plane orientation, transducer manipulation, instrumentation, and exam protocols. Corequisites: RSMS:3305. Recommendations: completion of or current enrollment in a diagnostic medical sonography program.

**RSMS:3315 Diagnostic Medical Sonography Clinical Internship III** 4 s.h.

Application of sonographic imaging and physiologic vascular testing skills in health care setting; students develop competency in basic exams.

**RSMS:3325 Abdominal Sonography II Lab** 1 s.h.

Laboratory-based learning and simulation utilizing computer-aided learning and scanning simulation to develop skills in interventional sonographic procedures with real-time ultrasound guidance; advanced abdominal and superficial structure imaging; exploring case studies; image analysis in identifying pathologies and differential diagnoses. Prerequisites: RSMS:3121.

**RSMS:3376 Vascular Sonography II Lab** 1 s.h.

Laboratory-based learning and simulation experience to develop skills in advanced sonographic imaging of the vascular system and performance of advanced nonimaging vascular physiologic tests; analysis of findings and documentation of pathology. Prerequisites: RSMS:3141.

**RSMS:4110 Advanced Sonography** 3 s.h.

Exploration of advanced sonographic imaging techniques and new technologies. Prerequisites: (RSMS:3240 with a minimum grade of C and RSMS:3250 with a minimum grade of C and RSMS:3270 with a minimum grade of C) or (RSMS:3205 with a minimum grade of C and RSMS:3270 with a minimum grade of C).

**RSMS:4111 Advanced Sonography Lab** 1 s.h.

Laboratory-based learning and simulated application of advanced sonographic imaging techniques and new technologies. Prerequisites: (RSMS:3325 with a minimum grade of C and RSMS:3376 with a minimum grade of C) or (RSMS:3206 with a minimum grade of C and RSMS:3376 with a minimum grade of C). Corequisites: RSMS:4110.

**RSMS:4115 Diagnostic Medical Sonography Clinical Internship IV** 5 s.h.

Application of sonographic imaging and physiologic vascular testing skills in the health care setting; students develop competency in high-level procedures. Prerequisites: RSMS:3315 with a minimum grade of C and RSMS:3376 with a minimum grade of C.

**RSMS:4120 Advanced Cardiac Sonography** 3 s.h.

Advanced cardiac sonographic imaging techniques, quantifications, and new technologies; analysis of applications and limitations of imaging techniques. Prerequisites: RSMS:3205 with a minimum grade of C and RSMS:3270 with a minimum grade of C.

**RSMS:4121 Advanced Cardiac Sonography Lab** 1 s.h.

Laboratory-based learning and simulated application of advanced cardiac sonographic imaging techniques, quantifications, and new technologies. Prerequisites: RSMS:3206 with a minimum grade of C. Corequisites: RSMS:4120.

**RSMS:4215 Diagnostic Medical Sonography Clinical Internship V** 5 s.h.

Application of sonographic imaging and physiologic vascular testing skills in health care setting; students develop advanced skills. Prerequisites: RSMS:4115 with a minimum grade of C and RSMS:4110 with a minimum grade of C and RSMS:4111 with a minimum grade of C.

**RSMS:4220 Multidisciplinary Capstone Seminar** 3 s.h.

Case-based learning; students analyze and synthesize data, determine proper course of action, and evaluate outcomes; preparation for professional work environment. Prerequisites: RSMS:4110.

## Magnetic Resonance Imaging Courses

**RSMR:4110 Fundamentals for the MRI Technologist** 3 s.h.

Caregiving skills specific to patients undergoing MRI examinations, including techniques in effectively communicating for safety and comfort; maintaining patient and personnel safety; patient preparation, monitoring, and venipuncture; technologist's role in a wide variety of MRI examinations and patient conditions. Requirements: acceptance to B.S. radiation sciences RT/MRI track or ARRT primary certification in radiologic technology, nuclear medicine, sonography, or radiation therapy.

**RSMR:4120 MRI Procedures I** 4 s.h.

Imaging techniques related to central nervous and musculoskeletal systems; specific clinical applications; available coils and their use; considerations in imaging parameters; specific choices in protocols and positioning criteria; anatomical structures and the plane that best demonstrates anatomy; signal characteristics of normal and abnormal structures. Prerequisites: RSCT:4100 and RSMR:4110. Requirements: concurrent registration in RSMR:4110, if not taken as a prerequisite; or three months MRI experience.

**RSMR:4130 MRI Procedures II** 3 s.h.

MRI techniques related to neck, thorax, breast, abdomen, and pelvis; specific clinical applications; available coils and their use; considerations in imaging parameters; specific choices in protocols and positioning criteria. Prerequisites: RSMR:4120.

**RSMR:4140 MRI Acquisition and Principles I** 3 s.h.

Physics and hardware used in obtaining a magnetic resonance signal, including magnetism, NMR signal production, tissue characteristics, spatial localization, pulse sequencing, imaging parameters and options, and special applications; exploration of skills useful in maximizing MR image quality. Prerequisites: RSMR:4110. Requirements: concurrent registration in RSMR:4110, if not taken as a prerequisite; or three months MRI experience.

**RSMR:4150 MRI Acquisition and Principles II** 3 s.h.

Advanced MRI techniques; MR angiography and further investigation of fast image acquisition sequences; overview of MR magnets, installation, operation, and facility design; computers and digital image acquisition as they apply to MR; outline of quality assurance procedures. Prerequisites: RSMR:4140.

**RSMR:4160 MRI Clinical Internship I 2 s.h.**

MRI clinical internship scheduled at University of Iowa Hospitals & Clinics; rotation through each MRI department scanning room; competency and objective-based education with required clinical performance evaluations; clinical preceptor facilitates schedules, rotations, learning objectives, evaluations, and competencies; experience facilitated by MRI technologists, radiologists, residents, and preceptor; participation in routine and advanced MRI scans; performance expectations become progressively higher as student gains experience and skills. Prerequisites: RSMR:4110. Corequisites: RSMR:4120 and RSMR:4140, if not taken as prerequisites. Requirements: acceptance to B.S. radiation sciences RT/MRI track.

**RSMR:4170 MRI Clinical Internship II 4 s.h.**

MRI clinical internship scheduled at University of Iowa Hospitals & Clinics; rotation through each MRI department scanning room; competency and objective-based education with required clinical performance evaluations; clinical preceptor facilitates schedules, rotations, learning objectives, evaluations, and competencies; experience facilitated by MRI technologists, radiologists, residents, and preceptor; participation in routine and advanced MRI scans; performance expectations become progressively higher as student gains experience and skills. Prerequisites: RSMR:4160. Corequisites: RSMR:4140, if not taken as a prerequisite. Requirements: acceptance to B.S. radiation sciences RT/MRI track.

**RSMR:4175 MRI Clinical Internship III 4 s.h.**

Rotation through MRI department scanning rooms at University of Iowa Hospitals & Clinics; competency and objective-based education with required clinical performance evaluations; clinical preceptor facilitates schedules, rotations, learning objectives, evaluations, and competencies; experience facilitated by MRI technologists, radiologists, residents, and preceptor; participation in routine and advanced MRI scans; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSMR:4170.

## Radiation Sciences Courses

**RSP:1100 Introduction to the Radiation Sciences 1 s.h.**

Exploration of radiation sciences field (radiologic technology, nuclear medicine and PET, diagnostic medical sonography, radiation therapy, computed tomography, magnetic resonance imaging, cardiovascular interventional); introduction to basic principles and modalities associated with the field in preparation for application to radiation sciences or nuclear medicine technology major.

**RSP:2110 Pathology for Radiation Sciences 2 s.h.**

General pathologic processes; introduction to imaging modalities; pathological terms that describe the body's response to stress and disease; how the body responds to and forms pathological diseases (e.g., infectious and parasitic diseases, inflammation and repair, immunopathology, neoplasia, genetic disorders, dietary deficiencies and excesses, hemodynamic disorders, trauma and emergencies). Requirements: acceptance to radiation science degree track.

**RSP:2120 Patient Care for the Radiation Sciences 3 s.h.**

Foundation for providing care to clients during radiographic examinations; taking medical histories, basic life support, medical emergencies, vital sign assessment, body mechanics, infection control, sterile techniques, intravenous equipment, administration; advance concepts in client assessment and monitoring, including evaluation and monitoring of clients in pain, and clients in acute and chronic states of illness; communication techniques, role playing. Requirements: acceptance to radiation science degree track.

**RSP:3130 Radiation Safety and Radiobiology 2 s.h.**

Instruction on safe operation of radiation producing equipment and handling of radioactive materials; origin and/or derivation of certain formulae and techniques useful in radiation protection programs; regulatory agencies, regulations, and regulatory guides pertinent to student's field; emphasis on applied aspects of radiation protection; characteristics and biological effects of ionizing radiations, properties and uses of radioisotopes, medical applications, and biological basis for protection procedures. Requirements: enrollment in radiation sciences or nuclear medicine technology program. Same as FRRB:3130.

**RSP:3210 Medical Ethics and Law 2 s.h.**

Introduction to ethical reasoning and problem solving; integration of knowledge about patient care and ethical/legal issues which occur in process of providing care; ethical principles of autonomy, beneficence, justice, nonmaleficence, paternalism, Patient's Bill of Rights, resolving moral dilemmas; legal principles of malpractice, intentional torts, negligence. Requirements: radiation science or nuclear medicine technology major.

**RSP:3220 Radiation Sciences Quality Management and Health Care Administration 2 s.h.**

Introduction to health care administration; quality management, safety, and patient satisfaction concepts for the radiation sciences professional. Requirements: radiation sciences or nuclear medicine technology major.

**RSP:4110 Research Methodology for Radiation Sciences 3 s.h.**

Introduction to research concepts and methods for the radiation science professional. Requirements: radiation sciences or nuclear medicine technology major.

## Radiation Therapy Courses

**RSTH:3100 Introduction to Radiation Therapy 3 s.h.**

Introduction to cancer as a disease; defining methods to treat cancer with emphasis on radiation therapy; simulation, planning, and treatment delivery of radiation therapy. Requirements: acceptance to radiation sciences therapy program.

**RSTH:3110 Medical Physics I 1-3 s.h.**

Introduction to radiation used in clinical setting; fundamental physical units, measurements, principles, atomic structure and types of radiation; X-ray generating equipment, X-ray production, and its interaction with matter. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program, and maxillofacial or radiation oncology resident. Same as FRRB:3110.

**RSTH:3120 Radiation Therapy Clinical Internship I 3 s.h.**

Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Requirements: acceptance to radiation sciences therapy program.

**RSTH:3205 Principles of Radiation Therapy I 3 s.h.**

Didactic and laboratory work in principles of radiation therapy; historic and current aspects of cancer treatment; role of radiation therapist; patient care, treatment delivery accessories, tumor localization treatment delivery protocols. Prerequisites: RSTH:3100. Requirements: enrollment in radiation sciences therapy program.

**RSTH:3215 Medical Physics II 0-3 s.h.**

Treatment units used in external radiation therapy; beam calculations, isodose distributions, brachytherapy, quality assurance and quality management, protection and safety. Prerequisites: RSTH:3110. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program. Same as FRRB:3215.

**RSTH:3225 Radiation Therapy Clinical Internship II 3 s.h.**

Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSTH:3120. Requirements: acceptance to radiation sciences therapy program.

**RSTH:3325 Radiation Therapy Clinical Internship III 4 s.h.**

Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSTH:3225. Requirements: acceptance to radiation sciences therapy program.

**RSTH:4105 Principles of Radiation Therapy II 2 s.h.**

Evaluation and management of neoplastic disease using knowledge in arts and sciences; critical thinking and basis of ethical clinical decision making; epidemiology, etiology, detection, diagnosis, patient condition, treatment and prognosis of neoplastic disease. Prerequisites: RSTH:3205. Requirements: enrollment in radiation sciences therapy program.

**RSTH:4125 Radiation Therapy Clinical Internship IV 4 s.h.**

Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSTH:3325. Requirements: acceptance to radiation sciences therapy program.

**RSTH:4225 Radiation Therapy Clinical Internship V 5 s.h.**

Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSTH:4125. Requirements: acceptance to radiation sciences therapy program.

**RSTH:4230 Radiation Therapy Capstone 3 s.h.**

Professional development; review of concepts. Requirements: acceptance to radiation sciences therapy program.

**Radiologic Technology Courses****RSRT:2110 Radiographic Procedures and Analysis I 4 s.h.**

Introduction to radiographic positioning principles; technical, positioning, and analysis information needed to perform and evaluate images of chest and abdomen on adult and pediatric patients; emphasis on quality patient care and adaptation to a variety of client conditions; labs. Requirements: acceptance to radiation sciences RT/CT, CVI, or MRI degree track.

**RSRT:2120 Radiologic Technology Clinical Internship I 1 s.h.**

Student rotations through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Requirements: acceptance to radiation sciences RT/CT, CVI, or MRI degree track.

**RSRT:2225 Radiologic Technology Clinical Internship II 3 s.h.**

Student rotation through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:2120.

**RSRT:2230 Radiographic Procedures II 3 s.h.**

Technical and radiographic positioning information needed to perform images of upper and lower extremity; emphasis on quality patient care and adaptation to a variety of client conditions. Prerequisites: RSRT:2110.

**RSRT:2240 Radiographic Analysis II 3 s.h.**

Radiographic procedure and image analysis information needed to evaluate images of upper and lower extremity and shoulder; emphasis on quality patient care and adaptation to a variety of client conditions; labs. Prerequisites: RSRT:2110.

**RSRT:2250 Radiographic Fluoroscopic Procedures 2 s.h.**

Technical, radiographic positioning, and analysis information needed to perform radiographic procedures that utilize fluoroscopy; emphasis on quality patient care and adaptation to a variety of client conditions. Prerequisites: RSRT:2110.

**RSRT:2325 Radiologic Technology Clinical Internship III 3 s.h.**

Student rotation through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:2225.

**RSRT:3115 Radiographic Procedures and Analysis III 4 s.h.**

Technical, positioning, and analysis information needed to perform and evaluate images of hip, pelvis, spine, thorax, skull, and GU system radiographic procedures; emphasis on quality patient care and adaptation to a variety of client conditions; labs.

**RSRT:3125 Radiologic Technology Clinical Internship IV 4 s.h.**

Student rotation through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:2325.

**RSRT:3140 Radiographic and Digital Imaging 5 s.h.**

Factors that govern and influence production of radiographic image; X-ray and scatter production; patient interactions; function of kVp, mAs, and distance as applied to contrast and spatial resolution; practical issues concerning automatic exposure control and grid usage; labs to practice and apply theoretical principles associated with production of quality images. Requirements: acceptance to radiation sciences RT/CT, CVI or MRI degree track.

**RSRT:3220 Emotional Intelligence for the Health Care Professional 2 s.h.**

Introduction to emotional intelligence; scientific background for why emotional intelligence exists and exploring its applications to the health care setting; connection of emotional intelligence to interactions that occur between health care professional and their patients, patient families, and coworkers.

**RSRT:3225 Radiologic Technology Clinical Internship V 3 s.h.**

Student rotation through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:3125.

**RSRT:3230 Radiographic Physics and Imaging Equipment 4 s.h.**

Characteristics of atomic structure, electricity, and X-ray machines; properties of X-rays and their interaction with matter; measurement of radiation exposure; construction principles and theories of operation of specialized imaging equipment, including fundamentals of acquisition for imaging intensification, geometric tomography, mobile/portable radiography, and magnification principles.

**RSRT:3325 Radiologic Technology Clinical Internship VI 2 s.h.**

Student rotation through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:3225.

**RSRT:4125 Radiologic Technology Clinical Internship VII 1 s.h.**

Student rotation through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:3325.

**RSRT:4225 Radiologic Technology Clinical Internship VIII 1 s.h.**

Student rotation through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:4125.

# Radiation Sciences, B.S.

The Radiation Sciences Program offers two paths toward completing the major:

- an on-campus program in radiologic technology, diagnostic medical sonography, or radiation therapy for students who have not completed a radiation sciences modality; or
- an online program for registered radiologic technologists and nuclear medicine technologists who would like to earn a Bachelor of Science degree by distance education.

Undergraduate study in radiation sciences is guided by the academic rules and procedures outlined under Undergraduate Rules and Procedures [p. 1716] in the Carver College of Medicine section of the Catalog.

## Requirements

The Bachelor of Science with a major in radiation sciences requires a minimum of 120 s.h. Work for the on-campus degree includes a set of courses that are prerequisite to entering the radiation sciences major, completion of one of seven radiation sciences professional programs, and elective coursework sufficient to complete the minimum of 120 s.h. required for graduation. Students must complete the radiation sciences professional program at the University of Iowa. Registered radiologic technologists interested in earning the degree by distance education should see RT to B.S. (Online) [p. 1850] in this section of the Catalog.

Admission to the radiation sciences major is competitive and selective; acceptance into a professional program or the major is not guaranteed. Students who wish to enter the major must first be admitted to the University of Iowa as College of Liberal Arts and Sciences (CLAS) students with a radiation sciences interest. As CLAS students, they must apply to the radiation sciences professional program of their choice by January 15 of the year in which they wish to enter; see Apply on the Radiation Sciences Program website. Transfer students are encouraged to apply in early December to allow for time for transfer course articulation. Accepted students enter a professional program, the radiation sciences major, and the Carver College of Medicine the following fall semester.

Applicants for admission to the University of Iowa whose first language is not English are strongly encouraged to complete the University of Iowa English Proficiency Evaluation and satisfy the University's English Proficiency Requirements before they apply to a professional program. Students must have permission to register for a full academic load before they may be admitted to a radiation sciences professional program.

The radiation sciences major requires students to complete a minimum of two years of a high school world language prior to admission.

For additional information on UI admission requirements, contact the University's Office of Admissions.

First-year and transfer applicants admitted to the College of Liberal Arts and Sciences as radiation sciences interest students must complete all courses that are prerequisite to the radiation sciences major (including approved transfer equivalents) by June 1 before they may begin one of the radiation sciences professional programs and enter the major. The only exception to this deadline is that the physics course required for the diagnostic medical sonography program may

be completed in the summer session. Prerequisite courses vary slightly depending on which professional program a student wishes to enter.

Students who have declared a radiation sciences interest but have not yet applied and been accepted to a professional program are advised at the University's Academic Advising Center. After they have been accepted to a professional program, they are advised by the Radiation Sciences Program.

Upon successful completion of the professional program, students are eligible to apply for national certification exams for their program's specialty area(s). Once they have completed the professional program and all other requirements for graduation, they are granted a Bachelor of Science degree.

The Bachelor of Science with a major in radiation sciences requires the following work.

## Prerequisites to the Radiation Sciences Major

Students must complete the following prerequisite courses (28-33 s.h.) before they may enter the program and the major. Students who wish to enter the radiation therapy professional program must complete a total of 60 s.h. of college coursework, including the following prerequisites, before they may enter the program and the major. Students are advised for success, based on academic strength, not necessarily for a four-year plan. Prerequisite courses for the radiologic technology and diagnostic medical sonography professional programs may take more than one year to complete. Prerequisite courses for the radiation therapy professional program may take more than two years to complete.

### Rhetoric

Code	Title	Hours
This course:		
RHET:1030	Rhetoric	4

### Anatomy

Code	Title	Hours
One of these:		
ACB:3110	Principles of Human Anatomy	3
HHP:1100	Human Anatomy	3
HHP:1150	Human Anatomy Lecture with Lab	4
HHP:3105	Anatomy for Human Physiology	3
HHP:3115	Anatomy for Human Physiology with Lab	5

### Physiology

Code	Title	Hours
One of these:		
HHP:1300	Fundamentals of Human Physiology	3
HHP:1350	Fundamentals of Human Physiology with Laboratory	4
HHP:3500	Human Physiology	3
HHP:3550	Human Physiology with Laboratory	5

## Physics

Code	Title	Hours
Students interested in diagnostic medical sonography or radiation therapy programs complete one of these:		
PHYS:1400	Basic Physics	3-4
PHYS:1511	College Physics I	4

## Quantitative or Formal Reasoning

Code	Title	Hours
One of these:		
MATH:1020	Elementary Functions	4
MATH:1440	Mathematics for the Biological Sciences	4

## Psychology

## Medical Terminology

Code	Title	Hours
This course:		
CLSA:3750	Medical and Technical Terminology	2

## Culture, Society, and the Arts

Code	Title	Hours
Two courses for 3 s.h. each in two of these areas:		
Diversity and Inclusion		
Historical Perspectives		
International and Global Issues		
Literary, Visual, and Performing Arts		
Values and Culture		

See GE CLAS Core [p. 20] (College of Liberal Arts and Sciences) in the Catalog for approved courses in the culture, society, and the arts areas listed above.

## Recommended Pre-Major Work

The Radiation Sciences Program recommends that before students submit an application to a radiation sciences professional program and the major, they job-shadow a professional who works in their area of interest, gain hands-on patient care experience, and complete the following additional preparatory courses.

Code	Title	Hours
These courses:		
RSP:1100	Introduction to the Radiation Sciences	1
BIOL:1140	Human Biology: Nonmajors	4
One of these:		
CHEM:1070	General Chemistry I	3
CHEM:1110	Principles of Chemistry I	4
One of these:		
PHYS:1400	Basic Physics	3-4
PHYS:1511	College Physics I	4
One of these:		

BAIS:1500	Business Computing Essentials	2
CS:1020	Principles of Computing	3
One of these:		
STAT:1020	Elementary Statistics and Inference	3
STAT:3510	Biostatistics	3
STAT:4143	Introduction to Statistical Methods	3

## Electives

In order to earn the minimum of 120 s.h. required for graduation, students may need to complete elective coursework in addition to the prerequisite coursework listed above and one of the professional programs in medical imaging. They should plan their elective courses in consultation with their advisor.

## Radiation Sciences Professional Programs

Students must complete one of the following on-campus radiation sciences professional programs at University of Iowa Hospitals & Clinics:

- radiologic technology and breast imaging [p. 1845];
- radiologic technology and cardiovascular interventional [p. 1845];
- radiologic technology and computed tomography [p. 1845];
- radiologic technology and magnetic resonance imaging [p. 1845];
- diagnostic medical sonography and cardiac/vascular [p. 1843];
- diagnostic medical sonography and general/vascular [p. 1843]; or
- radiation therapy [p. 1848].

Each program offers modality-specific didactic and supervised clinical education courses. Graduates of the professional programs and associated internships are eligible to apply for one or more certification exams.

The radiologic technology programs and diagnostic medical sonography programs last three years, and the radiation therapy program lasts two years. Each program begins in the fall.

Students must apply to the program of their choice by January 15 of the year in which they intend to enter the program. Students must first apply to the College of Liberal Arts and Sciences (CLAS) as a radiation sciences interest major and complete all prerequisite coursework. Students with transfer credit are encouraged to apply to CLAS by early December to allow time for transcript course articulation.

Admission to all radiation sciences professional programs is competitive; each program accepts a limited number of students and acceptance is not guaranteed. In addition to the prerequisite courses listed above, students must have earned a cumulative college g.p.a. of at least 2.50 prior to professional program admission.

## Diagnostic Medical Sonography

A diagnostic medical sonographer is a skilled professional who uses high-frequency sound wave equipment to

create diagnostic images and data that assist health care professionals in their diagnosis of patients with disease. Ultrasound imaging is used on many parts of the body, including the abdomen, heart, blood vessels, and the developing fetus of a pregnant woman. When determining normal and abnormal findings, the sonographer must demonstrate sectional anatomy through transducer manipulation. The sonographer uses independent judgment in recognizing the need to extend the scope of the study according to the diagnostic findings. The sonographer spends extended time with the patient obtaining a thorough history of symptoms, explaining the exam, answering questions, and performing the exam.

Each of the radiation sciences diagnostic medical sonography (DMS) degree tracks consist of two professional programs —DMS and cardiac and vascular sonography or DMS and general and vascular sonography. Each of these three-year programs is selective and competitive; acceptance is not guaranteed. Students must satisfy all UI admission requirements, complete all prerequisites, and be accepted into the diagnostic medical sonography professional program following an application and selection process; see Diagnostic Medical Sonography on the Radiation Sciences Program website.

## Diagnostic Medical Sonography and Cardiac and Vascular Sonography

The diagnostic medical sonography program in cardiac and vascular sonography provides a multispecialty education in cardiac (echocardiography) and vascular sonography (ultrasound imaging). Students learn about sonographic imaging and evaluation, hemodynamics and Doppler evaluation, sonography equipment, sectional anatomy, pathology, patient care, medical ethics, and quality assurance methods. They become proficient in using sonographic imaging equipment and in performing cardiac and vascular sonographic procedures, including invasive procedures, emergency exams, and 3D imaging. They also participate in supervised clinical education. Elective courses are available in pediatric cardiac sonography.

Upon completing the program, graduates are eligible to apply for the national certification exams in diagnostic medical sonography in the specialty areas of cardiac (echocardiography) and vascular technology.

Students who have completed all prerequisite courses by June 1 (except physics, which may be completed in the summer session) are eligible to apply to this three-year program. Application deadline is January 15. Six students are accepted into this track each year, which begins in the fall.

## Diagnostic Medical Sonography and General and Vascular Sonography

The diagnostic medical sonography program in general and vascular sonography provides a multispecialty education in obstetrical, abdominal, and vascular sonography (ultrasound imaging). Students learn about sonographic imaging and evaluation, hemodynamics and Doppler evaluation, sonography equipment, sectional anatomy, pathology, patient care, medical ethics, and quality assurance methods. They become proficient in using sonographic imaging equipment and in performing obstetrical and gynecological, abdominal, and vascular sonographic procedures, including invasive procedures, emergency exams, and 3D imaging. They also participate in supervised clinical education. Elective courses are available in pediatric and breast sonography.

Upon completing the program, graduates are eligible to apply for the national certification exams in diagnostic medical sonography in the specialty areas of obstetrics and gynecology, abdomen, and vascular technology.

Students who will have completed all prerequisite courses by June 1 (except physics, which may be completed in the summer session) are eligible to apply to this three-year program. Application deadline is January 15. Nine students are accepted into this track each year, which begins in the fall.

## Radiologic Technology

A radiologic technologist is a professional, qualified by education and clinical experience, who provides radiological (x-ray) services using a variety of exams and procedures. While utilizing excellent patient care skills, the technologist operates radiological equipment so that optimum radiographic quality is achieved with the minimum radiation exposure to the patient. Radiographers are employed primarily in hospitals, clinics, and doctors' offices, where they work closely with other members of the health care team to help diagnose and treat patients.

Each of the radiation sciences radiologic technology (RT) degree tracks consist of four professional programs—RT and breast imaging (BI), RT and cardiovascular interventional (CVI), RT and computed tomography (CT), or RT and magnetic resonance imaging (MRI). Each of these three-year programs is selective and competitive; acceptance is not guaranteed. Students must satisfy all UI admission requirements, complete all prerequisites, and be accepted into the radiologic technology professional program following an application and selection process; see Radiologic Technology on the Radiation Sciences Program website.

## Radiologic Technology

The new radiologic technology subprogram requirements will be available soon.

## Radiologic Technology and Breast Imaging

The radiologic technology component of this program provides education in pathology, radiation biology, radiation protection, patient care, and ethics. Students learn about radiographic procedures, imaging, and evaluation. They become acquainted with imaging equipment, study quality assurance, and participate in supervised clinical education in radiography and breast imaging (BI). The breast imaging component offers intensive study and practice in BI, including patient care procedures, pathology, anatomy, imaging procedures and analysis, mammography quality standards act (MQSA) quality control, and image acquisition principles.

Upon completion of the program, graduates are eligible to apply for the national certification exams in radiography and mammography.

Students typically apply to this three-year program during their first year and begin in the fall of their sophomore year. Application deadline is January 15. Two student are accepted into this track each year.

## Radiologic Technology and Cardiovascular Interventional

The radiologic technology component of this program provides education in pathology, radiation biology, radiation protection, patient care, and ethics. Students learn about radiographic procedures, imaging, and evaluation. They become acquainted with imaging equipment, study quality assurance, and participate in supervised clinical education in radiography, cardiac interventional, and peripheral/neurological interventional. The cardiovascular interventional component concentrates on imaging equipment; pharmacology; sterile techniques; cardiac monitoring; vascular anatomy and physiology; cardiovascular, peripheral, and neurological procedures and pathology; therapeutic intervention techniques; and digital angiography.

Upon completing the program, graduates are eligible to apply for the national certification exams in radiography, vascular interventional technology, and cardiac interventional technology.

Students who will have completed all prerequisite courses by June 1 are eligible to apply to this three-year program. Application deadline is January 15. Two students are accepted into this track each year, which begins in the fall.

RSRT:4225	Radiologic Technology Clinical Internship VIII	1

## Radiologic Technology and Computed Tomography

The radiologic technology component of this program provides education in pathology, radiation biology, radiation protection, patient care, and ethics. Students learn about radiographic procedures, imaging, and evaluation. They become acquainted with imaging equipment, study quality assurance, and participate in supervised clinical education in radiography and computed tomography (CT). The computed tomography component concentrates on sectional anatomy, single and multislice CT, electron beam CT, physiologic and 3D imaging, CT simulation, physics and imaging, and procedures and pathology.

Upon completion of the program, graduates are eligible to apply for the national certification exams in radiography and computed tomography.

Students who will have completed all prerequisite courses by June 1 are eligible to apply to this three-year program. Application deadline is January 15. Six students are accepted into this track each year, which begins in the fall.

## Radiologic Technology and Magnetic Resonance Imaging

The radiologic technology component of this program provides education in pathology, radiation biology, radiation protection, patient care, and ethics. Students learn about radiographic procedures, imaging, and evaluation. They become acquainted with imaging equipment, study quality assurance, and participate in supervised clinical education in radiography and magnetic resonance imaging (MRI). The magnetic resonance imaging component offers intensive study and practice in MRI, including patient care procedures, pathophysiology, physics, sectional anatomy, and instrumentation.

Upon completion of the program, graduates are eligible to apply for the national certification exams in radiography and magnetic resonance imaging.

Students who will have completed all prerequisite courses by June 1 are eligible to apply to this three-year program. Application deadline is January 15. Six students are accepted into this track each year, which begins in the fall.

### Radiation Therapy

A radiation therapist functions as a member of a team with physicians (radiation oncologist), physicists, dosimetrists, and nurses to provide treatment using ionizing radiation sources for patients with malignant and some benign diseases. The radiation therapist is responsible for the daily delivery of the prescribed treatment according to the treatment plan prepared by their physician in consultation with the medical physicist. The therapist works with the oncology nurse in the daily assessment of the patient's status and needs during their course of therapy. Radiation therapists are employed in radiation therapy facilities located in hospitals and freestanding centers.

Students completing the Radiation Therapy Program are trained to deliver therapeutic radiation. This two-year program

is selective and competitive; acceptance is not guaranteed. Since the program duration is two years, students must have completed a total of 60 s.h., including prerequisite courses by June 1, prior to the start of the program. Students must satisfy all UI admission requirements, complete all prerequisites, and be accepted into the Radiation Therapy professional program following an application and selection process; see Radiation Therapy on the Radiation Sciences Program website. Clinical and didactic education is provided by University of Iowa Hospitals & Clinics faculty in the Department of Radiation Oncology, with a hands-on component under the close guidance of licensed radiation therapists.

## Radiation Therapy

The radiation therapy professional program teaches theory and techniques of radiation therapy technology, with emphasis on competence in areas of oncology treatment planning, treatment delivery, dosimetry, and use of megavoltage radiation-producing equipment to administer treatment. Students participate in clinical education in radiation therapy. Radiation therapy students also complete coursework in sectional anatomy and computed tomography (CT)/magnetic resonance imaging (MRI) pathology. Students have the option of completing coursework in CT procedures and physics, MRI fundamentals and acquisition, or courses in both modalities.

Upon completing the program, graduates are eligible to apply for the national certification exam in radiation therapy. Students will have completed the coursework but not the clinical component to be eligible to apply for the national certification exam in computed tomography and/or magnetic resonance imaging.

Students typically apply to this two-year program during their sophomore year and begin it in fall of their junior year. Application deadline is January 15. Seven students are accepted into this track each year.

### Additional Prerequisites

The radiation therapy professional program requires two years of prerequisite coursework. The first year of coursework is listed under "Prerequisites to the Radiation Sciences Major" under Requirements [p. 1842] in this section of the Catalog.

Code	Title	Hours
One of these:		
PHYS:1400	Basic Physics	3
PHYS:1511	College Physics I	4
Recommended:		
PHYS:1512	College Physics II	4
CHEM:1070 or CHEM:1110	General Chemistry I Principles of Chemistry I	3-4
CHEM:1080 or CHEM:1120	General Chemistry II Principles of Chemistry II	3-4
CS:1020 or BAIS:1500	Principles of Computing Business Computing Essentials	2-3
STAT:1020 or STAT:3510 or STAT:4143	Elementary Statistics and Inference Biostatistics Introduction to Statistical Methods	3
Electives to reach a total of 60 s.h.		6

## Required Courses

Upon acceptance into the radiation therapy professional program, students will complete required courses and internships during their third and fourth years.

Code	Title	Hours
All of these:		
RSCT:4100	Sectional Anatomy for Imaging Sciences (online)	3
RSCT:4110	CT/MRI Pathology (online)	3
RSP:2110	Pathology for Radiation Sciences	2
RSP:2120	Patient Care for the Radiation Sciences	3
RSP:3130	Radiation Safety and Radiobiology	2
RSP:3210	Medical Ethics and Law	2
RSP:3220	Radiation Sciences Quality Management and Health Care Administration	2
RSP:4110	Research Methodology for Radiation Sciences	3
RSTH:3100	Introduction to Radiation Therapy	3
RSTH:3110	Medical Physics I	2
RSTH:3120	Radiation Therapy Clinical Internship I	3
RSTH:3205	Principles of Radiation Therapy I	3
RSTH:3215	Medical Physics II	2
RSTH:3225	Radiation Therapy Clinical Internship II	3
RSTH:3325	Radiation Therapy Clinical Internship III	4
RSTH:4105	Principles of Radiation Therapy II	2
RSTH:4125	Radiation Therapy Clinical Internship IV	4
RSTH:4225	Radiation Therapy Clinical Internship V	5
RSTH:4230	Radiation Therapy Capstone	3

Students choose from three options for coursework in their last year of the program, starting with the summer before the fourth year.

### Option 1 (MRI Coursework)

Code	Title	Hours
Both of these:		
RSMR:4110	Fundamentals for the MRI Technologist (online)	3
RSMR:4140	MRI Acquisition and Principles I (online)	3
Recommended:		
RSCI:4110	Vascular Anatomy (online elective)	3
RSMR:4120	MRI Procedures I (online elective)	4
RSMR:4130	MRI Procedures II (online elective)	3
RSMR:4150	MRI Acquisition and Principles II (online elective)	3

## Option 2 (CT Coursework)

Code	Title	Hours
Both of these:		
RSCT:4120	Computed Tomography Procedures I (online)	3
RSCT:4130	Computed Tomography Physical Principles and QC (online)	4
Recommended:		
RSCI:4110	Vascular Anatomy (online elective)	3
RSCI:4130	Electrocardiogram and Hemodynamics	3
RSCT:4125	Computed Tomography Procedures II (online elective)	4

## Option 3 (CT and MRI Coursework)

Code	Title	Hours
Both of these:		
RSCT:4130	Computed Tomography Physical Principles and QC (online)	4
RSMR:4110	Fundamentals for the MRI Technologist (online)	3
Recommended:		
RSCI:4110	Vascular Anatomy (online elective)	3
RSCT:4120	Computed Tomography Procedures I (online elective)	3
RSCT:4125	Computed Tomography Procedures II (online elective)	4
RSMR:4120	MRI Procedures I (online elective)	4
RSMR:4130	MRI Procedures II (online elective)	3
RSMR:4140	MRI Acquisition and Principles I (online elective)	3
RSMR:4150	MRI Acquisition and Principles II (online elective)	3

## RT to B.S. (Online)

The RT to B.S. is an online program designed for registered radiologic technologists and nuclear medicine technologists who wish to earn a Bachelor of Science degree with a major in radiation sciences by distance education. The program requires a minimum of 120 s.h. Students who successfully complete a radiologic technology (RT) or a nuclear medicine technology (NMT) program are awarded 60 s.h. of credit. They also are awarded credit for equivalent coursework that is prerequisite to entering the major. Upon admission to the major, students complete an online modality, advanced courses, and electives for graduation.

Students choose one of five online modalities: breast imaging (BI), cardiovascular interventional (CVI), computed tomography (CT), magnetic resonance imaging (MRI), or a multi-modality option. The modalities do not require an internship.

In order to be admitted to the radiation sciences major, students must pass the American Registry of Radiologic Technologists (ARRT) radiography, ARRT nuclear medicine technology, or Nuclear Medicine Technology Certification Board (NMTCB) exam. They also must have completed all coursework prerequisite to entering the major with a g.p.a. of at least 2.50, not including RT or NMT program courses. Students may count approved transfer credit toward the required prerequisites; learn more by visiting Transfer Courses in MyUI.

Applicants for admission to the University of Iowa whose first language is not English are strongly encouraged to complete the University of Iowa English Proficiency Evaluation and satisfy the University's English Proficiency Requirements.

The radiation sciences major requires students to complete a minimum of two years of a high school world language prior to admission.

For additional information on UI admission requirements, contact the University's Office of Admissions.

## Prerequisites to the Radiation Sciences Major

In addition to the completion of an RT or NMT program, students must complete the following prerequisite courses (25-29 s.h.) before they may enter the radiation sciences major.

### Rhetoric

Code	Title	Hours

## Medical Terminology

Code	Title	Hours
CLSA:3750	Medical and Technical Terminology	2

## Culture, Society, and the Arts

Code	Title	Hours
Two courses for 3 s.h. each in two of these areas:		
	Diversity and Inclusion	
	Historical Perspectives	
	International and Global Issues	
	Literary, Visual, and Performing Arts	
	Values and Society	

See GE CLAS Core [p. 20] (College of Liberal Arts and Sciences) in the Catalog for approved courses in the culture, society, and the arts areas listed above.

Once students are admitted to the Carver College of Medicine and the radiation sciences major, they must at least complete their final consecutive 30 s.h. at the University of Iowa, including an online modality (22-25 s.h.), two advanced courses (6 s.h.), and sufficient elective coursework to complete the minimum 120 s.h. and the final consecutive 30 s.h. required for graduation.

## Online Modality

Students complete one of the following online modalities.

### Breast Imaging

The breast imaging online modality requires the following coursework (22 s.h.).

Code	Title	Hours
RSBI:3310	Patient Care for Breast Imaging	3
RSBI:4110	Breast Imaging Procedures and Analysis	3
RSBI:4120	Anatomy and Pathology for Breast Imaging	2
RSBI:4130	Breast Imaging Acquisitions and Principles	2
RSBI:4210	Breast Imaging Advanced Procedures and Analysis	3
RSBI:4220	Quality Control in Breast Imaging	3
RSCI:4110	Vascular Anatomy	3
RSCT:4100	Sectional Anatomy for Imaging Sciences	3

## Cardiovascular Interventional

The cardiovascular interventional online modality requires the following coursework (23 s.h.).

Code	Title	Hours
RSCI:4110	Vascular Anatomy	3
RSCI:4120	CVI Principles	4
RSCI:4130	Electrocardiogram and Hemodynamics	3
RSCI:4140	CVI Peripheral Procedures and Pathology	3
RSCI:4150	CVI Neurology and Nonvascular Procedures and Pathology	3
RSCI:4160	CVI Cardiac Procedures and Pathology	4
RSCT:4100	Sectional Anatomy for Imaging Sciences	3

## Computed Tomography

The computed tomography online modality requires the following coursework (23 s.h.).

Code	Title	Hours
RSCI:4110	Vascular Anatomy	3
RSCI:4130	Electrocardiogram and Hemodynamics	3
RSCT:4100	Sectional Anatomy for Imaging Sciences	3
RSCT:4110	CT/MRI Pathology	3
RSCT:4120	Computed Tomography Procedures I	3
RSCT:4125	Computed Tomography Procedures II	4
RSCT:4130	Computed Tomography Physical Principles and QC	4

## Magnetic Resonance Imaging

The magnetic resonance imaging online modality requires the following coursework (25 s.h.).

Code	Title	Hours
RSCI:4110	Vascular Anatomy	3
RSCT:4100	Sectional Anatomy for Imaging Sciences	3
RSCT:4110	CT/MRI Pathology	3
RSMR:4110	Fundamentals for the MRI Technologist	3
RSMR:4120	MRI Procedures I	4
RSMR:4130	MRI Procedures II	3
RSMR:4140	MRI Acquisition and Principles I	3
RSMR:4150	MRI Acquisition and Principles II	3

## Multi-Modality Option

The multi-modality online modality requires the following coursework (22 s.h.).

Code	Title	Hours
RSCT:4100	Sectional Anatomy for Imaging Sciences	3
RSCI:4110	Vascular Anatomy	3

Additional 16 s.h. of breast imaging (RSBI), computed tomography (RSCT), cardiovascular interventional (RSCI), or magnetic resonance imaging (RSMR) coursework. 16

Course schedules can be found on the Online RT to BS page of the Radiation Sciences Program website.

## Advanced Courses

### Management and Leadership

Code	Title	Hours
One of these:		
COMM:1819	Organizational Leadership	3
MGMT:2100	Introduction to Management	3
MGMT:3500	Nonprofit Organizational Effectiveness I	3

### Statistics

Code	Title	Hours
One of these:		
STAT:1020	Elementary Statistics and Inference	3
STAT:4143	Introduction to Statistical Methods	3

### Electives

Students choose elective coursework to complete the minimum 120 s.h. required and the final consecutive 30 s.h. necessary to qualify for graduation.

## Career Advancement

The majority of radiation sciences graduates are employed shortly after graduation. Graduates generally find jobs in hospitals, clinics, imaging centers, and physicians' offices. With experience, and sometimes additional education, they may find related jobs in management, sales, education, or as application specialists. Some students choose to continue their education in a master's, physician assistant, or other related medical program.

Most radiation sciences professionals with full-time jobs work 40 hours a week and may have holiday, weekend, evening, night, and on-call hours.

Students who complete Iowa's professional radiation sciences programs are eligible to apply for national certification exams administered by the appropriate agency in order to practice.

Licensure laws for radiographers, sonographers, and radiation therapists vary from state to state. Iowa is a licensing state, requiring radiographers to have a permit to practice. Passing the national exam is a criterion used to issue a permit to practice.

More information on radiation sciences careers and outcomes may be found on the Radiation Sciences Program website. The Pomerantz Career Center offers multiple resources to help students find jobs.

## Academic Plans

### Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and

should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Radiation Sciences, B.S.

- Diagnostic Medical Sonography and Cardiac/Vascular Professional Program [p. 1852]
- Diagnostic Medical Sonography and General/Vascular Professional Program [p. 1853]
- Radiation Therapy Professional Program [p. 1855]
- Radiologic Technology and Breast Imaging Professional Program [p. 1856]
- Radiologic Technology and Cardiovascular Interventional Professional Program [p. 1857]
- Radiologic Technology and Computed Tomography Professional Program [p. 1859]
- Radiologic Technology and Magnetic Resonance Imaging Professional Program [p. 1860]

## Diagnostic Medical Sonography and Cardiac/Vascular Professional Program

Course	Title	Hours
<b>Academic Career</b>		
<b>Any Semester</b>		
Students apply to the Radiation Sciences B.S. program through a selective process. Acceptance is not guaranteed. <sup>a</sup>		
Students must earn a grade of C or higher in all RS** courses.		
The Diagnostic Medical Sonography and Cardiac/Vascular professional program is three years in duration.		
		<b>Hours</b>
		<b>0</b>
<b>First Year</b>		
<b>Any Semester</b>		
Recommended: health care experience (e.g. CNA), job shadowing in diagnostic medical sonography

Elective course <sup>j</sup>		2
Exam: Upon completion of the program students are eligible to apply to take certification exams.		
Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall)		
<b>Hours</b>		<b>12</b>
<b>Total Hours</b>		<b>122-129</b>

- a The Academic Advising Center advises Radiation Sciences Interest students on prerequisite course planning. Students are advised for success, based on academic strength, not necessarily for a four year plan. Prerequisites may take more than one year to complete.
- b Choose from: HHP:1100, HHP:1150, HHP:3105, HHP:3115, ACB:3110.
- c BIOL:1140 is recommended not required. Most students will need to complete BIOL:1140 prior to Human Anatomy (based on academic strength).
- d Enrollment in math courses requires completion of a placement exam.
- e Students must complete 6 s.h. by taking 3 s.h. courses from two of the following areas: Diversity and Inclusion, Historical Perspectives, International and Global Issues, Literary, Visual, and Performing Arts, or Values and Culture.
- f This course is recommended not required.
- g Please see the Radiation Sciences Programs' website and your academic advisor for detailed application instructions and deadlines.
- h Choose from: HHP:1300, HHP:1350, HHP:3500, HHP:3550.
- i PHYS:1400 may be completed in the spring or summer semester. Summer is recommended if both anatomy and physiology are taken in the spring.
- j If needed for full-time status or to reach the total s.h. required for graduation.
- k Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

<b>Hours</b>		<b>13</b>
<b>Total Hours</b>		<b>120-125</b>

- a The Academic Advising Center advises Radiation Sciences Interest students on prerequisite course planning. Students are advised for success, based on academic strength, not necessarily for a four year plan. Prerequisites may take more than one year to complete.
- b BIOL:1140 is recommended not required. Most students will need to complete BIOL:1140 prior to Human Anatomy (based on academic strength).
- c Choose from: HHP:1100, HHP:1150, HHP:3105, HHP:3115, ACB:3110.
- d Enrollment in math courses requires completion of a placement exam.
- e Students must complete 6 s.h. by taking 3 s.h. courses from two of the following areas: Diversity and Inclusion, Historical Perspectives, International and Global Issues, Literary, Visual, and Performing Arts, or Values and Culture.
- f This course is recommended not required.
- g Please see the Radiation Sciences Programs' website and your academic advisor for detailed application instructions and deadlines.
- h Choose from: HHP:1300, HHP:1350, HHP:3500, HHP:3550.
- i If not previously completed.
- j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

## Radiologic Technology and Cardiovascular Interventional Professional Program

Course	Title	Hours
<b>Academic Career</b>		
<b>Any Semester</b>		

Students apply to the Radiation Sciences B.S. program through a selective process. Acceptance is not guaranteed. <sup>a</sup>

Students must earn a grade of C or higher in all RS\*\* courses.

The Radiologic Technology and Cardiovascular Interventional professional program is three years in duration.

<b>Hours</b>		<b>0</b>
--------------	--	----------

### First Year Any Semester

Recommended: health care experience (e.g. CNA), job shadowing in radiologic technology, computed tomography, magnetic resonance imaging, cardiovascular interventional, and breast imaging.

<b>Hours</b>		<b>0</b>
--------------	--	----------

<b>Fall</b>		
RHET:1030	Rhetoric	4
BIOL:1140	Human Biology: Nonmajors <sup>b, c</sup>	3 - 4

MATH:1440	Mathematics for the Biological Sciences <sup>d</sup>	4
GE: General Education course (DI, IGI, HP, LVPA, or VC) <sup>e</sup>		3
RSP:1100	Introduction to the Radiation Sciences <sup>f</sup>	1

Admission Application: begin preparing materials for Radiation Sciences application (typically due in January)<sup>g</sup>

---

**Hours** **15-16**

<b>Spring</b>		
Human Physiology <sup>h</sup>		3 - 5
Human Anatomy <sup>b, i</sup>		3 - 5
PSY:1001	Elementary Psychology	3
CLSA:3750	Medical and Technical Terminology	2
GE: General Education course (DI, IGI, HP, LVPA, or VC) <sup>e</sup>		3

---

**Hours** **14-18**

**Second Year**  
**Any Semester**

The curriculum shown in the second, third, and fourth years on this plan begins upon acceptance into the Carver College of Medicine, Radiologic Technology Professional Program.

---

**Hours** **0**

<b>Fall</b>

# Radiology

## Chair

- Colin P. Derdeyn

**Faculty:** <https://medicine.uiowa.edu/radiology/our-people>

**Website:** <https://medicine.uiowa.edu/radiology/>

The Department of Radiology has a three-fold mission of education, research, and patient care. It trains Doctor of Medicine students, residents, and fellows and offers programs for medical professionals. It is a leader in innovative research relating to diagnosis and treatment across the clinical subspecialties, including MRI, PET, breast imaging, cardiac and pulmonary imaging, and imaging informatics. Residents, fellows, medical students, and graduate students have opportunities to participate in research projects in the department. The radiology library provides varied resources and services for department faculty and staff.

The department also provides diagnostic and therapeutic radiology services for patients and families in Iowa and surrounding states through its clinical services at University of Iowa Hospitals & Clinics. Visit the Department of Radiology website to learn more about the department's activities and resources.

## Undergraduate Education

The Department of Radiology offers clinical education to students in the Nuclear Medicine Technology [p. 1792] and Radiation Sciences [p. 1834] Programs.

### M.D. Training

The Department of Radiology offers a clerkship for Doctor of Medicine students and provides additional courses, research experiences, and externships for students interested in learning more about radiology. Several of the department's programs are open to medical students from other institutions. See Medical Student Training and Externship Program on the Department of Radiology website.

### Residency

The department offers three residency programs in diagnostic radiology, interventional radiology, and nuclear medicine; see Education on the Department of Radiology website.

Fellowships are available in these specialties: body imaging, breast imaging, endovascular surgical neuroradiology, interventional radiology, musculoskeletal radiology, neuroradiology, pediatric radiology, PET-CT imaging, and thoracic and cardiovascular imaging. Practicing radiologists have access to several departmental traineeships that provide category 1 continuing medical education credit through the Carver College of Medicine.

## Courses

### Radiology Courses

<b>RAD:8007 Medical Student Fellowships in Radiology (Externships)</b>	<b>0 s.h.</b>
Students work directly with on-call radiology residents; respond to pages, communication with clinicians and consults, facilitate communication with technologists; involves a large amount of medical thinking with emphasis on indications for diagnostic imaging, study protocols, and contrast utilization. Requirements: M.D. standing in radiology externship.	
<b>RAD:8301 Clinical Radiology</b>	<b>2 s.h.</b>
Two-week clerkship. Requirements: M.D. enrollment.	
<b>RAD:8401 Advanced Clinical Radiology</b>	<b>arr.</b>
Requirements: M.D. enrollment.	
<b>RAD:8402 Vascular and Interventional Radiology</b>	<b>arr.</b>
Requirements: M.D. enrollment.	
<b>RAD:8497 Research in Radiology</b>	<b>arr.</b>
Medical research, clinical or laboratory projects; individual study.	
<b>RAD:8498 Radiology On Campus</b>	<b>arr.</b>
Requirements: M.D. enrollment.	
<b>RAD:8499 Radiology Off Campus</b>	<b>arr.</b>
Requirements: M.D. enrollment.	

# Stead Family Department of Pediatrics

## Chair

- Alexander G. Bassuk

**Faculty:** <https://medicine.uiowa.edu/pediatrics/people>

**Website:** <https://medicine.uiowa.edu/pediatrics/>

The Stead Family Department of Pediatrics provides a solid foundation for M.D. students and postgraduate trainees. It offers extensive opportunities for general pediatrics and subspecialties training.

Affiliated programs add depth to the educational program in community pediatrics and primary care. The department is affiliated with the child and material health programs of the Bureau of Family Health, Iowa Department of Public Health, University of Iowa Stead Family Children's Hospital, the Center for Disabilities and Development, the Blank Children's Hospital in Des Moines, and community sites.

## M.D. Training

Didactic lectures and physical examination of newborns, toddlers, and older children provide M.D. students with their initial pediatric patient contact. This experience includes taking a history, performing a physical examination, appraisal of growth and development, nutrition, and symptomatology of newborns, toddlers, and adolescents.

For core and advanced medical students, the inpatient service provides training in the complex problems of disease and critical illness. Students participate in daily rounds involving general pediatrics and all subspecialties. Challenging and interesting cases are presented for discussion of diagnosis and treatment.

Outpatient experience, available in the core clerkship and advanced electives, stresses principles and practices required for the maintenance of children's health, treatment of common general pediatric disorders, and the diagnosis and treatment of subspecialty ambulatory patients.

## Residency, Fellowships

The department offers an accredited three-year residency program designed to prepare trainees for professional careers in general pediatrics or for further fellowship training. The program meets the eligibility requirements of the American Board of Pediatrics (ABP) and is approved for 15 residents and one child neurology resident per year by the Accreditation Council for Graduate Medical Education (ACGME).

Fellowships are available in multiple pediatrics subspecialties. Fellowship programs encourage development of knowledge and skill through research and clinical experiences in the chosen discipline. Upon satisfactory completion of the program, fellows meet the ABP eligibility requirements in their subspecialty.

## Facilities

The Stead Family Department of Pediatrics has inpatient and outpatient facilities in the University of Iowa Stead Family Children's Hospital. Additional outpatient facilities are located at Iowa River Landing in Coralville, UI Health Care—North

Liberty, UI Health Care—Scott Boulevard, and Cedar Rapids Pediatrics.

The pediatric inpatient service has approximately 189 beds, and more than 60,000 patients are seen each year in the general, specialty, continuity care, and field clinics and in University of Iowa Hospitals & Clinics Emergency Medicine. The Center for Disabilities and Development provides resources for children with intellectual or developmental disabilities and cerebral palsy.

The department maintains a number of laboratories that perform both clinical and research studies.

## Courses

### Pediatrics (Stead Family Department of Pediatrics) Courses

#### **PEDS:6101 Primary Care: Infants, Children, and Adolescents II** 3 s.h.

Enhancement of clinical knowledge and skills for infant, child, adolescent care; development and refinement of knowledge and skills in primary health care delivery. Prerequisites: NURS:6100. Corequisites: NURS:6702. Same as NURS:6101.

#### **PEDS:7245 Evaluation of Children with ADHD and LD** arr.

Clinical experience in conducting pediatric neuropsychology examinations in the Pediatric Attention/Learning Disorders Clinic. Requirements: course on psychological testing (including IQ) and graduate psychology standing (school, counseling, rehabilitation, clinical). Same as PSQF:7245.

#### **PEDS:7255 Autism Spectrum Disorders** 2 s.h.

Overview of autism spectrum disorders (ASDs), including autistic disorder, Asperger's disorder, other pervasive developmental disorders; ASD diagnoses and their etiology; tools used in assessing individuals with ASDs; common interventions for ASDs; resources for work with individuals who have ASDs.

#### **PEDS:7262 Biobehavioral Assessment and Intervention** 1-3 s.h.

Experience conducting brief functional assessments and behavioral treatments for children and adults with developmental disabilities; interviews with caregivers, behavioral assessments, matched treatments (e.g., functional communication training); follow-up with caregivers.

#### **PEDS:7264 Clinical Applications of Applied Behavior Analysis** 1-3 s.h.

Experience behavioral observations, consultation, and/or conducting behavioral assessments (including preference assessments and functional analyses), matched treatments; interviews with care providers, collect behavioral data, conduct behavioral assessments, matched treatments; follow-up with care providers.

#### **PEDS:8301 Clinical Pediatrics** 6 s.h.

Principles, practices of health maintenance and treatment of acute and chronic illnesses in children; emphasis on diagnosis and evaluation, nutrition, behavior problems, disorders affecting children; patient care, daily rounds, ward work. Requirements: third-year M.D. enrollment.

- PEDS:8401 Advanced Inpatient Subinternship in Pediatric Care** **arr.**  
Experience on pediatric inpatient team caring for patients ranging from infants through adolescents; evaluation, formulation of differential diagnoses, diagnostic workups, appropriate therapy programs. Requirements: fourth-year M.D. enrollment.
- PEDS:8402 Advanced Inpatient Subinternship in Pediatrics: Blank Children's Hospital, Des Moines** **arr.**  
Experience in the care of general pediatric inpatients; daily rounds and teaching by senior residents and faculty members; daily didactic conferences. Requirements: fourth-year M.D. enrollment.
- PEDS:8403 Neonatology (NICU)** **arr.**  
Experience caring for ill neonates, proficiency in using diagnostic tests and procedures; responsibility for care of several infants; reference and literature review, conferences, teaching, clinical rounds. Requirements: fourth-year M.D. enrollment.
- PEDS:8404 Critical Care (PICU)** **4 s.h.**  
Direct care of critically ill children in a multidisciplinary medical/surgical/cardiac intensive care unit, under supervision of pediatric residents and staff; participation in educational activities and formal clinical rounds. Requirements: fourth-year M.D. enrollment.
- PEDS:8405 Emergency Room Blank Children's Hospital, Des Moines** **arr.**  
Pediatric emergencies and urgent care, proficiency in pediatric medicine procedures; expansion of basic knowledge. Requirements: fourth-year M.D. enrollment.
- PEDS:8406 Pediatric Allergy/Immunology and Pulmonary** **arr.**  
Experience in evaluating and treating respiratory and allergic diseases in infants, children, and adolescents. Requirements: fourth-year M.D. enrollment.
- PEDS:8407 Pediatric Cardiology** **arr.**  
Participation in clinical activities; observation of cardiac catheterization; experience in cardiac auscultation, ECG, radiography; emphasis on physical diagnosis, approach to heart disease and murmurs in children. Requirements: fourth-year M.D. enrollment.
- PEDS:8408 Pediatric Gastroenterology** **arr.**  
Diagnosis, management, treatment of diseases of gastrointestinal tract, liver, pancreas in children; ward rounds, consultations, clinics, diagnostic procedures, conferences. Requirements: fourth-year M.D. enrollment.
- PEDS:8409 Pediatric Hematology/Oncology** **arr.**  
Basic concepts of clinical approach to hematologic and oncologic problems in children and adolescents; primarily outpatient experience. Requirements: fourth-year M.D. enrollment.
- PEDS:8410 Pediatric Neurology** **arr.**  
Participation in outpatient and inpatient activities, teaching, morning ward rounds. Requirements: fourth-year M.D. enrollment.
- PEDS:8412 Developmental and Behavioral Pediatrics** **2,4 s.h.**  
Normal developmental sequence of gestation and early childhood, impact of environmental influences; antecedents of developmental disabilities; methods to detect cognitive and motor delays in preschool children; long-term consequences of developmental disabilities for children, their families; advantages of interdisciplinary teamwork. Requirements: fourth-year M.D. enrollment.
- PEDS:8415 Medical Genetics for the Senior Student** **arr.**  
Participation in diagnostic, therapeutic problems; techniques for evaluation, appropriate counseling in genetic cases; conferences. Requirements: fourth-year M.D. enrollment.
- PEDS:8416 Neonatal Intensive Care Unit, Blank Children's Hospital** **4 s.h.**  
Experience equivalent to intern on neonatal intensive care unit teaching service at Blank Children's Hospital, Des Moines; four-week rotation.
- PEDS:8417 Community Pediatric Outpatient Elective** **2 s.h.**  
Opportunity to participate as active members of a community-based general pediatric office; work directly with community-based faculty and non-physician team members; build on clinical skills developed in M3 pediatric clerkship. Requirements: M.D. enrollment.
- PEDS:8418 Pediatric Intensive Care Unit, Blank Children's Hospital** **4 s.h.**  
Development of knowledge and clinical skills in recognition of critical illness in children; basic strategies of initial resuscitation and management.
- PEDS:8419 Pediatric Rheumatology, Allergy, and Immunology** **4 s.h.**  
Introduction to fields of rheumatology and allergy/immunology; utilization of self-reflection to guide self-directed learning; identification of knowledge and performance gaps and address those gaps; demonstration of ability to use evidence-based medicine in production of an evidence-based project; understand how socioeconomic factors affect patient populations through observed patient interactions. Requirements: M.D. enrollment.
- PEDS:8420 Pediatric Palliative Care** **2,4 s.h.**  
Palliative medicine as a specialty which enhances quality of life, reduces suffering for patients with serious illnesses, and provides education and support for their families; interdisciplinary consult teamwork with patient's primary medical providers for inpatient or outpatient management of symptoms, goal setting, and decision making; introduction to pediatric palliative care with option to be involved in adult palliative care and local hospice services. Requirements: M.D. enrollment.
- PEDS:8421 Pediatric Endocrinology** **2,4 s.h.**  
Diagnosis, management, and treatment of pediatric endocrine diseases: growth disorders (short stature, tall stature, delayed puberty, precocious puberty), thyroid disorders (hypothyroidism, hyperthyroidism, thyroid nodules), diabetes mellitus, diabetes insipidus, dysgenetic syndromes, ambiguous genitalia, adrenal insufficiency or adrenal steroid excess, and hypopituitarism. Requirements: M.D. enrollment.
- PEDS:8431 Pediatric Nephrology** **2,4 s.h.**  
Introduction to general pediatric nephrology cases and management. Requirements: M.D. enrollment.
- PEDS:8450 Continuity of Care in Outpatient General Pediatrics** **4 s.h.**  
Work with experienced general pediatrician in a longitudinal clinical experience for the academic year; paired with faculty pediatrician to see patients in a weekly clinic, provide clinical care to a defined patient population; growth and development, health supervision, and management of common acute and chronic clinical problems. Requirements: fourth-year M.D. enrollment.
- PEDS:8495 Pediatric Intensive Care Off Campus** **arr.**  
Arranged by student and department. Requirements: fourth-year M.D. enrollment.

**PEDS:8497 Research in Pediatrics** **arr.**

Medical research, clinical or laboratory projects; individual study.

**PEDS:8498 Pediatrics On Campus** **arr.**

Requirements: fourth-year M.D. enrollment.

**PEDS:8499 Pediatrics Off Campus** **arr.**

Requirements: fourth-year M.D. enrollment.

# Surgery

## Chair

- Ronald Weigel

**Faculty:** <https://medicine.uiowa.edu/surgery/profile?appointment=PRIMARY&category=&query=&page=1&size=10>

**Website:** <https://medicine.uiowa.edu/surgery/>

The Department of Surgery offers didactic instruction as well as clinical and other practical experiences for medical students. It also hosts a wide spectrum of clinical and scientific research.

The department also plays a primary instructional role in the University of Iowa Hospitals Clinics' Perfusion Technology Program,

## Faculty

The faculty's strengths center in pathophysiology and problems of severe burns, trauma, organ transplantation, surgical control of morbid obesity, surgical oncology, bowel disease, biliary tract disease, pediatric surgery, endocrine disease, plastic surgery, diseases of the esophagus, artificial organs, pediatric cardiac surgery, transplantation, and vascular surgery. Research also is under way in the sequence of mutations and in localization of genes predisposed to cancer.

## M.D. Training

Department of Surgery courses provide a unique combination of experience oriented toward patient care and understanding of surgery's place among a physician's skills. Surgery courses are open only to M.D. students and qualified students in associated health sciences.

Students develop an awareness of surgery's role in the treatment of disease. Emphasis is placed on general surgery, basic emergency surgery, trauma, oncology, burns, gastrointestinal and biliary tract disease, endocrine disease, pediatric surgery, transplantation, plastic and reconstructive surgery, and peripheral vascular surgery.

The majority of surgery courses involve patient-centered discussions and practical exercises interwoven with operating room experience. Lectures and conferences are scheduled regularly on specific topics.

The department offers independent study courses in selected surgery topics and clinical experiences; some are available to fourth-year M.D. students by arrangement with the faculty.

## Facilities

Abundant patient contact provides education in a wide variety of surgical diseases. The Department of Surgery provides training in the only burn unit in Iowa approved by the American College of Surgeons and in the Level I Trauma Center at University of Iowa Hospitals & Clinics.

Laboratories provide equipment, space, and technical expertise to support teaching and a wide spectrum of clinical and scientific research. Projects are available in gastrointestinal surgery, surgical microbiology, peripheral vascular surgery, transplantation, wound healing, organ preservation, vascular surgery, pediatric surgery, and surgical oncology.

The laboratories also are used for supervised teaching exercises in surgical technique for medical students and junior residents, and for refinement of technique for senior residents and faculty members.

## Courses

### Surgery Courses

**SURG:8301 Clinical Surgery** **6 s.h.**  
Experience as active member of surgical team; work on inpatient units, in clinics and operating room; assist in elective and emergency patient care.

**SURG:8401 Advanced General Surgery** **4 s.h.**  
Opportunity to strengthen clinical skills through experiences in the operating rooms, clinics, wards, and intensive care units of University of Iowa Hospitals & Clinics.

**SURG:8402 Advanced Inpatient Subinternship in General Surgery** **4 s.h.**  
Responsibility for management of selected surgical inpatients, on a surgical service. Prerequisites: SURG:8301.

**SURG:8406 General Surgery, Des Moines, IA** **4 s.h.**  
Care of general surgery patients in private hospital setting. Prerequisites: SURG:8301.

**SURG:8407 Intensive Care Unit - Trauma, Iowa Methodist** **4 s.h.**  
Subinternship on trauma service team; evaluation and management of critically ill patients in the emergency room, operating room, intensive care unit. Prerequisites: SURG:8301. Requirements: fourth-year M.D. enrollment.

**SURG:8409 General Surgery, Davenport, IA** **4 s.h.**  
Participation in diagnosis and management of general surgical patients under supervision of attending surgeons from Davenport Surgical Group, Genesis Medical Center. Prerequisites: SURG:8301. Requirements: fourth-year M.D. enrollment.

**SURG:8411 Multidisciplinary Breast Elective** **2,4 s.h.**  
Evaluation and management of benign and malignant breast diseases; focus on multidisciplinary nature of treatment of breast disease; for students who plan to pursue residency in general surgery, obstetrics and gynecology, family practice, or other field with focus on women's health. Requirements: M.D. enrollment.

**SURG:8460 Surgical Residency Preparation** **4 s.h.**  
Preparation for surgical residency; focus on application of knowledge and skills accumulated through medical school to surgical patient care; development of an advanced understanding of preoperative, intraoperative, and postoperative care of patients, critical care knowledge, communication skills, and technical skills necessary for surgical specialties. Requirements: M.D. enrollment.

**SURG:8497 Research in Surgery** **arr.**  
Medical research, clinical or laboratory projects; individual study.

**SURG:8498 Surgery On Campus** **arr.**  
Surgery on campus; individually arranged. Prerequisites: SURG:8301.

**SURG:8499 Surgery Off Campus** **arr.**  
Prerequisites: SURG:8301.

# Urology

## Chair

- Karl Kreder

**Faculty:** <https://medicine.uiowa.edu/urology/profile?appointment=PRIMARY&category=&query=&page=1&size=10>

**Website:** <https://medicine.uiowa.edu/urology/>

Urology encompasses the subspecialty areas of urologic nephrology, oncology, and endocrinology; male reproductive physiology; erectile dysfunction; neurourology; pediatric urology; urinary tract stone and infection, including endourology; laparoscopic and robotic urology; trauma and reconstructive urology; urodynamics and female urology; diagnostic urology; and urinary tract obstruction.

The Department of Urology offers instruction in all of these areas to M.D. and graduate students and provides continuing education for the delivery of urologic care.

## Continuing Education

The department offers continuing education activities throughout the year for urologic and family practitioners. These activities are conducted by the faculty, whose interests include pediatric urology, reproductive physiology and male infertility, urologic oncology, urinary tract stone (including endourology/laparoscopy), robotic surgical procedures, trauma and reconstructive urology, female urology, and prostatic diseases.

## Research

The department has earned international recognition for its studies of prostatic diseases. The urological laboratories conduct research and offer instruction in experimental oncology, cellular immunology, and infertility.

## M.D. Training

The Department of Urology cooperates with several University of Iowa basic science departments to educate first-year M.D. students in the relationship between urology and the basic sciences. It collaborates with the Department of Microbiology and Immunology [p. 1774] in teaching and research concerning immunology of genitourinary cancers and renal transplantation.

In the first-year M.D. course, MED:8134 Mechanisms of Health and Disease III, and the second-year courses, MED:8221 Clinical and Professional Skills III and MED:8224 Mechanisms of Health and Disease Keystone, the department presents illustrative lectures and demonstrations related to diagnosis and treatment of genitourinary tract diseases.

Second-, third-, and fourth-year M.D. students take Department of Urology courses that provide experience in all areas of urology. The department's selective two-week clerkship covers the fundamentals of these areas through experience in outpatient clinics, surgical settings, and inpatient units at University of Iowa Hospitals & Clinics, the Iowa River Landing, and the VA Iowa City Health Care. M.D. students can take advanced elective courses of intensive study in any of the urologic subspecialties after completion of URO:8301 Clinical Urology.

## Courses

### Urology Courses

- URO:8301 Clinical Urology** **2 s.h.**  
Work in urology unit, clinic; responsibility for patient care, working with residents.
- URO:8401 Advanced Urology** **4 s.h.**  
Experience as integral member of urological staff, junior resident level. Requirements: M.D. enrollment.
- URO:8402 Pediatric Urology** **2,4 s.h.**  
In-depth study of pediatric urology topics. Requirements: M.D. enrollment.
- URO:8403 Urologic Oncology** **2,4 s.h.**  
Multispecialty exposure to diagnosis and treatment of patients with current and newly diagnosed urologic malignancies. Requirements: M.D. enrollment.
- URO:8404 Female Pelvic Floor Dysfunction** **2,4 s.h.**  
Requirements: M.D. enrollment.
- URO:8497 Research in Urology** **arr.**  
Medical research, clinical or laboratory projects; individual study.
- URO:8498 Urology On Campus** **arr.**  
Clinical clerkship; individually arranged by student with departmental approval.
- URO:8499 Urology Off Campus** **arr.**  
Individually arranged by students with department approval.

# College of Nursing

## Dean

- Julie Zerwic

## Interim Executive Associate Dean

- Sandra E. Daack-Hirsch

## Associate Dean for Faculty

- Keela Herr

## Associate Dean for Research

- Barbara A. Rakel

## Associate Dean for Undergraduate Programs

- Anita C. Nicholson

## Assistant Dean for Graduate Practice Programs

- Mary S. Dirks

## Director, Ph.D. Program

- Stephanie Gilbertson-White

**Undergraduate degree:** B.S.N.

**Graduate degrees:** M.S.N.; D.N.P.; Ph.D. in nursing

**Graduate certificates:** adult gerontology acute care nurse practitioner; adult gerontology primary care nurse practitioner; family nurse practitioner; health systems; pediatric nurse practitioner-acute care; pediatric nurse practitioner-primary care; psychiatric/mental health nurse practitioner

**Faculty:** <https://nursing.uiowa.edu/faculty-staff/faculty-directory>

**Website:** <https://nursing.uiowa.edu/>

The College of Nursing is an integral part of the University of Iowa health science campus, sharing in and contributing to teaching, research, and patient care resources that have earned international recognition. The University provides a robust setting for nursing preparation because the educational and clinical resources vital to educating nurses are evidence based, diverse, and available on or near the campus. Faculty and students participate fully in University life and contribute their time, interests, and abilities to the many general and special activities of a major research university.

The college's Bachelor of Science in Nursing (B.S.N.), the Clinical Nurse Leader (CNL) and Nursing Systems Administration (NSA) subprograms for the Master of Science in Nursing (M.S.N.), and the Doctor of Nursing Practice (D.N.P.) programs are accredited by the Commission on Collegiate Nursing Education (CCNE), an autonomous accrediting arm of the American Association of Colleges of Nursing (AACN). They also are approved by the Iowa Board of Nursing. The anesthesia nursing program (in the Doctor of Nursing Practice) is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs.

Graduates of the prelicensure B.S.N. qualify to take the National Council Licensure Examination (NCLEX) required for practice as registered nurses (RN). Graduates of advanced practice majors in the graduate program are eligible to take certification examinations and apply for Advanced Registered Nurse Practitioner (ARNP) licensure.

## Related Minor and Certificates

### Aging and Longevity Studies

College of Nursing students may participate in the Aging and Longevity Studies Program, which provides undergraduate students with a multidisciplinary approach to gerontology. The program offers a certificate and a minor. Students plan their course of study with their academic advisor in close cooperation with the Aging and Longevity Studies Program coordinator. The Aging and Longevity Studies Program is administered by the School of Social Work (College of Liberal Arts and Sciences). For more information, see Aging and Longevity Studies [p. 44] in the Catalog (College of Liberal Arts and Sciences).

### Informatics (Health Informatics Subprogram)

The Graduate College offers the Certificate in Informatics with a health informatics subprogram. The subprogram emphasizes the organization, management, and use of health care information; health care research, education, and practice; and information technology developments in the socioeconomic context of health care.

College of Nursing students working toward the certificate complete IGPI:5200 Health Informatics, which explores decision-making processes and technological tools to support health care administration, management, and practice; and EPID:5200 Principles of Public Health Informatics, which focuses on systematic applications of information science, computer science, and technology to public health practice, research, and learning; methods of disease surveillance, data collection, analysis, and reporting with health informatics.

Students earn additional credit in foundational informatics coursework, including one elective chosen in consultation with their major program advisor and their certificate advisor. Students who earn credit for a thesis, project, or independent study in their major program of study may apply the credit as an elective if the certificate advisor determines that the subject matter is pertinent.

To learn more, see the Certificate in Informatics [p. 1646] (Graduate College) in the Catalog. For additional information, see Health Informatics on the Graduate College website.

### Professional Improvement

Registered nurses who wish to take University of Iowa coursework to fulfill professional or personal improvement objectives may request admission in the professional improvement (PI) category. This admission status allows students to take some graduate courses at the University without committing to a degree objective.

Admission as a nursing professional improvement student requires a formal application, including submission of three current written recommendations and all academic transcripts. Graduate Record Examination (GRE) General Test scores, required by the University, must be submitted before the end of first semester registration.

Application deadlines are July 15 for fall semester admission, December 1 for spring semester admission, and May 1 for summer session admission.

Since acceptance as a PI student does not influence acceptance to the college's graduate degree programs, PI students interested in earning a graduate degree in nursing must apply for admission to the degree program

(see Programs [p. 1869] and then "Admission" under each graduate program of study in this section of the Catalog). Students may count a maximum of 6 s.h. or two required nursing core courses that they complete as PI students toward M.S.N. requirements. Professional improvement students may not enroll in Ph.D. courses.

## Continuing Education

The college offers nonacademic, short-term continuing education programs for nurses. Contact hours are awarded for these programs. The College of Nursing is an Iowa Board of Nursing approved provider of continuing education (Provider Number 1).

## Student Organizations

All College of Nursing B.S.N. prelicensure students are members of the National Student Nurses Association and its local chapter, the Iowa Association of Nursing Students (IANS). The University of Iowa Association of Nursing Students (UIANS) provides opportunities for professional growth and development in nursing. UIANS representatives are members of the Undergraduate Student Government (USG).

The University of Iowa Multicultural Nursing Association (UIMNA) provides support, network opportunities for leadership and professional growth, and development for underrepresented students who are undergraduate nursing interest and nursing majors, graduate nursing students, and underrepresented nursing professionals in the region.

University of Iowa Men in Nursing (UIMiN) provides opportunities for nurses to meet, to recruit, to talk, and to influence the environment for men in nursing. It is open to all nursing students.

The college's Association of Graduate Nursing Students (AGNS) provides opportunities for professional growth, sharing of research, and representation on varied college and University committees.

See Nursing Student Organizations on the College of Nursing website.

## Programs

### Undergraduate Program of Study

#### Major

- Bachelor of Science in Nursing [p. 1880]

### Graduate Programs of Study

#### Majors

- Master of Science in Nursing [p. 1886]
- Doctor of Nursing Practice [p. 1889]
- Doctor of Philosophy in Nursing [p. 1903]

#### Certificates

- Adult Gerontology Acute Care Nurse Practitioner [p. 1905]
- Adult Gerontology Primary Care Nurse Practitioner [p. 1906]
- Family Nurse Practitioner [p. 1907]
- Health Systems [p. 1908]
- Pediatric Nurse Practitioner-Acute Care [p. 1909]

- Pediatric Nurse Practitioner-Primary Care [p. 1910]
- Psychiatric/Mental Health Nurse Practitioner [p. 1911]

## Facilities

The College of Nursing Building is centrally located on the University's main campus, in close proximity to the Carver College of Medicine, the College of Dentistry, the College of Pharmacy, the College of Public Health, University of Iowa Hospitals & Clinics, and the Hardin Library for the Health Sciences.

The renovated College of Nursing Building boasts collaborative spaces, flexible learning spaces, and state-of-art classroom technology. The renovated spaces include two 84-seat flexible classrooms, two 42-seat flexible classrooms, and an Instructional Technology Services (ITS) computer lab on the ground floor; collaboration rooms for quiet study and group learning, student commons, and graduate student space are on the first floor; five seminar seating classrooms on the third floor; and flexible conference room and office space on the fourth floor.

The Nursing Clinical Education Center (NCEC), located at University of Iowa Hospitals & Clinics (UIHC), provides hands-on simulation and laboratory experiences for both undergraduate and graduate nursing students. The center also is a training hub for the University's Department of Nursing Services and Patient Care. The NCEC houses state of the art health care simulation technology. It has multiple classrooms, a resource library, a lobby with ample seating, and gathering spaces for private meetings. The center is codirected by the College of Nursing and the UIHC Department of Nursing Services and Patient Care.

## Courses

### College of Nursing Courses

#### **NURS:1020 First-Year Seminar** **1 s.h.**

Introduces first-year undergraduate students to the intellectual life of the University of Iowa; provides an opportunity to work closely with a faculty member or senior administrator; seminars help students make the transition to college-level learning through active participation in their own learning.

#### **NURS:1030 Human Development and Behavior** **3 s.h.**

Normal developmental transitions experienced by individuals and family systems throughout the lifespan, including physical, cognitive, and social-emotional development. Requirements: nursing or nursing-interest major.

#### **NURS:1800 Aging Matters: Introduction to Gerontology** **3 s.h.**

Overview of the field of gerontology from a bio-psycho-social framework; how the human body and brain age, effects of these biological changes on physical and cognitive functions, and interaction of these individual factors with societal contexts; broad perspective to give students a foundation in gerontology, paving the way for more advanced courses in biology of aging, psychology of aging, and global aging; for students from a wide range of disciplines and levels, no prior knowledge of aging required. GE: Social Sciences. Same as ASP:1800, CSD:1800, SSW:1800, TR:1800.

- NURS:3099 Leadership U** **1-3 s.h.**  
Development of leadership in nursing; application of leadership theory in practice by participating in activities such as attending professional organization meetings, acting as a delegate, writing legislation, holding a board position, or being part of a multidisciplinary or international team to organize events for community involvement. Requirements: nursing major.
- NURS:3110 Healthcare Finance** **3 s.h.**  
Basic structure of U.S. health care system and how it is funded; tools for making decisions about available financial resources.
- NURS:3128 Health Assessment and Communication Across the Lifespan** **3 s.h.**  
Assessment and communication skills; development and application of cognitive skills to perform systematic, holistic, and culturally competent health assessments; emphasis on application of clinical reasoning involving assessment, nursing diagnoses, interventions, and outcomes. Corequisites: NURS:3138 and NURS:3160 and NURS:3518. Requirements: admission to the College of Nursing.
- NURS:3138 Nursing and Pharmacological Interventions I** **5 s.h.**  
First of a two-part series focusing on basic biophysical concepts that inform nursing and pharmacological interventions, including sleep, immobility, skin care, wound healing, infection, and human response to illness; selected disorders and/or diseases, including GI disease, diabetes, and cancer; introduction to health literacy and principles of health education. Prerequisites: CHEM:1070 and MATH:1440 and BIOL:1141 and ACB:3110 and MICR:3164 and (HHP:1300 or HHP:3500) and CHEM:1080. Corequisites: NURS:3128 and NURS:3160 and NURS:3518. Requirements: 64 s.h. of undergraduate coursework, including successful completion of required science courses and general education liberal arts and sciences requirements and electives.
- NURS:3151 Introduction to Clinical Concepts for Nursing** **2 s.h.**  
Introduction to aspects of nursing care including physical exam, health assessment, and psychomotor nursing interventions; students practice strategies to promote safe care of patients, including calculation of medications prior to administration; emphasis on effective patient communication, education, and integration of medical terminology; application of nursing interventions, psychomotor skills, and medication dosages and calculation; health, physical, and psychosocial assessment; first of a three-part laboratory and simulation series. Corequisites: NURS:3128 and NURS:3138 and NURS:3160 and NURS:3518. Requirements: admission to College of Nursing.
- NURS:3160 Professional Role I: Professionalism and Patient Safety** **3 s.h.**  
Introduction to inherent nursing values, history, theories, and scope of professional nursing; concepts of safety, risk identification, and clinical decision making; information technologies that promote quality and safety. Requirements: admission to the College of Nursing.
- NURS:3198 Distance Education: Independent Study** **1-3 s.h.**  
Supervised study designed for individual undergraduate students.
- NURS:3199 Independent Study** **1-3 s.h.**  
Supervised study designed for individual undergraduate students.
- NURS:3438 Nursing and Pharmacological Interventions II** **5 s.h.**  
Second of a two-part series focusing on complex biophysical concepts that inform nursing and pharmacological interventions, including fluids and electrolytes, shock, and perioperative care; focus on selected disorders and/or diseases, including neurological, immune, musculoskeletal, cardiovascular, respiratory, renal, and endocrine disorders. Prerequisites: NURS:3518 and NURS:3138 and NURS:3128 and NURS:3160. Corequisites: NURS:3460 and NURS:3620 and NURS:3625.
- NURS:3451 Basic Clinical Concepts for Nursing** **1 s.h.**  
Caring for the adult patient with diverse disease processes through experiential learning; emphasis on complex physical and psychosocial assessment, clinical reasoning, team building, interprofessional education and communication, and application of the nursing process to provide safe and effective nursing care; second of a three-part laboratory and simulation series. Prerequisites: NURS:3128 and NURS:3138 and NURS:3151 and NURS:3160 and NURS:3518. Corequisites: NURS:3438 and NURS:3460 and NURS:3615 and NURS:3620 and NURS:3625.
- NURS:3460 Professional Role II: Research** **3 s.h.**  
Introduction to concepts and process of research in nursing; primary focus on understanding research and its foundation for nursing practice. Requirements: basic statistics. Recommendations: upper-level statistics.
- NURS:3518 Pathology** **3 s.h.**  
Introduction to abnormal functioning of cells, tissues, organs, and systems over the human lifespan; focus on hematological, immune, neurological, musculoskeletal, cardiovascular, respiratory, renal, gastrointestinal, endocrine, and reproductive system; alterations in metabolic processes and alterations in homeostatic mechanisms impacting the internal milieu; emphasis on critical thinking. Prerequisites: (CHEM:1080 and ACB:3110 and BIOL:1141 and MICR:3164 and CHEM:1070 and (HHP:1300 or HHP:3500)) or NURS:3734. Requirements: admission to the College of Nursing.
- NURS:3595 Nonprofit Organizational Effectiveness I** **3 s.h.**  
Operational and financial aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as ENTR:3595, MGMT:3500, MUSM:3500, RELS:3700, SSW:3500.
- NURS:3600 Nonprofit Organizational Effectiveness II** **3 s.h.**  
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as MGMT:3600, RELS:3701, SSW:3600.
- NURS:3615 Adult Medical/Surgical Nursing Practicum** **3 s.h.**  
In-depth clinical experience; application of basic and complex concepts of nursing care for adults of all ages in a variety of settings, focus on older adults; development and application of critical thinking skills necessary to understand disease process, associated signs and symptoms; emphasis on interventions and outcomes. Prerequisites: NURS:3128 and NURS:3138 and NURS:3160 and NURS:3518. Corequisites: NURS:3438 and NURS:3460 and NURS:3620 and NURS:3625.

**NURS:3620 Gerontological Nursing 3 s.h.**

Nurse's role in promoting, maintaining, and restoring the health of aging adults; internal and external influences on older adults, application of nursing science to the care of older adults in diverse settings. Prerequisites: NURS:3128 and NURS:3138 and NURS:3518 and NURS:3160. Corequisites: NURS:3438 and NURS:3460 and NURS:3625.

**NURS:3625 Gerontological Nursing Practicum 2 s.h.**

In-depth clinical experience designed to apply basic and complex concepts of nursing care for adults of all ages in a variety of settings; focus on older adults; development and application of critical thinking skills necessary to understand disease process and the associated signs and symptoms, interventions, and outcomes. Prerequisites: NURS:3160 and NURS:3138 and NURS:3128 and NURS:3518. Corequisites: NURS:3438 and NURS:3460 and NURS:3615 and NURS:3620.

**NURS:3631 Nursing Care of Children and Families 2 s.h.**

Promoting, maintaining, and restoring the health of parents, infants, children, and adolescents in childbearing families; examination of nursing care of newborns, well children, and children with acute and chronic illness within the context of family and community. Prerequisites: NURS:3438 and NURS:3451 and NURS:3460 and NURS:3615 and NURS:3620 and NURS:3625. Corequisites: NURS:3632 and NURS:3635 and NURS:3640 and NURS:3645 and NURS:3651 and NURS:3660.

**NURS:3632 Nursing Care of Childbearing Families 2 s.h.**

Promoting, maintaining, and restoring health for women of reproductive age, childbearing families, and newborns; examination of nursing care for family planning, preconception health, prenatal care, childbirth, newborn care, and maternal and neonatal complications within the context of family and community. Prerequisites: NURS:3438 and NURS:3451 and NURS:3460 and NURS:3615 and NURS:3620 and NURS:3625. Corequisites: NURS:3631 and NURS:3635 and NURS:3640 and NURS:3645 and NURS:3651 and NURS:3660.

**NURS:3635 Parent Child Nursing Practicum 2 s.h.**

Application of nursing knowledge to promote, maintain, and restore health; vulnerable populations of interest including persons with mental health disorders, infants, children, adolescents, their families; processes of childbearing and childrearing within context of families. Prerequisites: NURS:3625 and NURS:3620 and NURS:3438 and NURS:3615 and NURS:3460. Corequisites: NURS:3640 and NURS:3645 and NURS:3660. Requirements: successful completion of two semesters in B.S.N. curriculum.

**NURS:3640 Psychiatric/Mental Health Nursing 3 s.h.**

General principles and practices of psychiatric/mental health nursing; psychiatric disorders, populations at risk, continuity of care, and problems in daily living; unique needs of diverse populations. Prerequisites: NURS:3438 and NURS:3620 and NURS:3615 and NURS:3625 and NURS:3460. Corequisites: NURS:3645 and NURS:3660.

**NURS:3645 Mental Health Nursing Practicum 2 s.h.**

Application of nursing knowledge to promote, maintain, and restore health; vulnerable populations of interest including persons with mental health disorders, infants, children, adolescents, their families; processes of childbearing and childrearing within context of families. Prerequisites: NURS:3625 and NURS:3438 and NURS:3620 and NURS:3615 and NURS:3460. Corequisites: NURS:3635 and NURS:3640 and NURS:3660. Requirements: successful completion of two semesters in B.S.N. curriculum.

**NURS:3650 Community and Public Health Nursing 3 s.h.**

Role of nursing in the relationship between community conditions and public health; emphasis on principles of public health combined with nursing knowledge and skills to address health needs of individuals, families, communities, and populations. Prerequisites: (NURS:3660 and NURS:3640 and NURS:3635 and NURS:3645) or NURS:3460. Corequisites: NURS:3655. Requirements: for pre-licensure B.S.N. student—successful completion of NURS:3620, NURS:3625, NURS:3640, and NURS:3645, and concurrent enrollment in NURS:4155 and NURS:4160; for post-licensure RN-B.S.N. student—successful completion of NURS:4160, 6 s.h. of required nursing elective courses, and completion of general education electives.

**NURS:3651 Advanced Clinical Concepts for Nursing 1 s.h.**

Advanced and specialty nursing skills; focus on pediatric and obstetric simulation as well as advanced, medical-surgical skills; opportunity for ongoing development of essential clinical skills including team communication, clinical reasoning, patient safety, evidence-based practice, incorporation of the nursing process, patient education, and nursing care across the lifespan; third of a three-part laboratory and simulation series. Prerequisites: NURS:3438 and NURS:3451 and NURS:3460 and NURS:3615 and NURS:3620 and NURS:3625. Corequisites: NURS:3631 and NURS:3632 and NURS:3635 and NURS:3640 and NURS:3645 and NURS:3660.

**NURS:3655 Community and Public Health Nursing Practicum 2 s.h.**

Learning opportunities to apply principles of public health with nursing knowledge and skills to address health promotion, disease and injury prevention, and nursing management of infectious disease and chronic health conditions; nursing activities focus on improvement of health outcomes at individual, family, community, and global levels within the context of population-focused practice. Prerequisites: (NURS:3645 and NURS:3635 and NURS:3640 and NURS:3660) or NURS:3460. Corequisites: NURS:3650. Requirements: for pre-licensure B.S.N. student—successful completion of NURS:3625 and NURS:3645, and concurrent enrollment in NURS:4155 and NURS:4160; for post-licensure RN-B.S.N. student—successful completion of NURS:3110 and NURS:3160 and NURS:3460 and NURS:3518 and NURS:3660 and NURS:3734 and NURS:4160, 6 s.h. of required nursing electives, completion of general education electives, RN licensure in state of practicum, and concurrent enrollment in NURS:3734, if not taken as a prerequisite.

**NURS:3660 Professional Role III: Improving Health Systems 2-3 s.h.**

Legal and regulatory processes that impact health care, how disparities influence health care, and evidence-based approaches for improving quality of care; strategies for working effectively in intra and interdisciplinary teams; integration of a culture of safety. Prerequisites: (NURS:3615 and NURS:3625 and NURS:3620 and NURS:3460 and NURS:3438) or (NURS:3160 and NURS:3460).

**NURS:3712 Human Sexuality, Diversity, and Society 1-3 s.h.**

Introduction to human sexuality from a biopsychosocial, sex-positive perspective; sexuality as a normal and essential component of human existence and expression throughout the life span; influence of gender, class, religion, race, ethnicity, sexual orientation, ability status, age, and culture on sexuality interwoven and highlighted; diversity of perspectives and experiences shared through active participation and respectful dialogue. Same as SSW:3712.

**NURS:3728 Quality Improvement and Patient Safety** 2 s.h.

Students work with faculty and staff involved in quality improvement and patient safety (QI/PS) at University of Iowa Hospitals & Clinics (UIHC); readings, didactic sessions, and hands-on activities to advance knowledge and practice of QI/PS in health care; activities include review of ongoing QI/PS projects at UIHC, application of QI/PS methodologies to project development and analysis, individual and team-based simulations, interdisciplinary collaboration and communication, participating in conferences related to QI/PS, and reflecting on these experiences with peers. Same as MED:8410.

**NURS:3731 Healthier Living for Well-Being** 1 s.h.

Strategies to reduce stress and promote healthy resilience; overall well-being and academic performance support; evidence-based, skills-building assignments focus on cognitive behavioral and coping techniques. Requirements: admission to the College of Nursing.

**NURS:3732 Global Health Nursing** 3 s.h.

Complexity of health and nursing in a global context; overview of biological, social, epigenetic, and environmental contributors to health and diseases in populations around the world and nursing's role in improving health; includes case studies of various global organizational and educational structures and systems relative to population health, selected infectious diseases, nutritional deficiencies, and health effects of environmental change. Same as GHS:3732.

**NURS:3734 Introduction to Human Genetics** 3 s.h.

Introduction to organization of the human genome and basic principles of inheritance in humans; cells and development, chromosome structure and function, gene structure and function, genes in pedigrees and populations, implications of genetic variation on health.

**NURS:3736 Legal Issues for Health Care Providers** 3 s.h.

Legal issues faced by health care providers, counselors, and social services providers; administrative and regulatory requirements, civil lawsuits, issues that affect students as providers, advocates, and individuals.

**NURS:3737 Care of the Patient in Pain** 3 s.h.

Foundational and advanced content in the area of pain management across populations, the lifespan, and settings of care; content and learning focus on core competencies for pain management recommended of all health care professionals; emphasis on development of interdisciplinary team, including nurses, as an advocate for quality and safe pain management; content areas include type of pain, pain therapies, assessment and measurement, treatment, self-management, evaluation/monitoring, disparities, and bioethics; no clinical component. Requirements: upper-division standing. Recommendations: pharmacology and pathophysiology.

**NURS:3739 Women and Their Bodies in Health and Illness** 3 s.h.

Basic facts about structure and functioning of female body; particular attention to adjustments the body makes during normal physiological events (menstruation, sexuality, reproduction, menopause) and during illness processes; women's mental and physical health issues in relation to women's lives and roles in society; relationship of women as consumers, practitioners, and activists to health system; achievements and limitations of women's health movements; anti-oppression, intersectionalities, and cross-cultural perspectives. Same as GWSS:3177.

**NURS:3740 End-of-Life Care for Adults and Families** 3 s.h.

End-of-life issues in care of adults, older adults, and their families. Same as ASP:3740, MED:3740, PHAR:3740.

**NURS:3741 Nurse Residency Role Transition Seminar** 3 s.h.

New graduate nurses entering practice are enrolled in transition-to-practice programs focused on integration of knowledge, skills, and professional behaviors necessary to provide safe, quality care; associate degree nurses evaluate how they achieved mastery of core knowledge and competencies and discuss Commission on Collegiate Nursing Education (CCNE) Entry-to-Practice Competencies; students examine transition-to-practice experience and document ways in which knowledge, skills, and attitudes are impacted and improved; engage in group discussion and reflective writing assignments to evaluate professional growth during transition-to-practice. Requirements: associate degree nurse graduate currently enrolled in or recent completion of a nurse residency program accredited by Commission on Collegiate Nursing Education (CCNE) or UI online nurse residency program (nurse residency program completed within two years or current enrollment with completion in a minimum of five months).

**NURS:3742 Selected Topics in Nursing** 1-2 s.h.

In-depth study of topics in professional nursing practice and health care; workshop format.

**NURS:3743 Perioperative Nursing** 3 s.h.

Patient assessments, nursing interventions, and patient responses for individuals undergoing surgical procedures; emphasis on phases of perioperative care including preoperative assessment, patient education, intraoperative care, and post-anesthesia care. Prerequisites: NURS:3615. Requirements: prerequisite course or RN licensure.

**NURS:3744 Critical Care Nursing** 3 s.h.

Provides nursing students with the knowledge required to safely and competently care for critically ill or injured patients; builds upon foundational courses in medical/surgical acute care. Prerequisites: NURS:3615. Requirements: prerequisite course or RN licensure.

**NURS:4096 Distance Education: Honors Independent Study** 3 s.h.

Building on honors seminar, students implement the project they designed in the seminar with guidance from the student's contracted honors faculty mentor; honors project is expected to apply current professional evidence and result in a rigorous scholarly product; the specific type of product is negotiated with honors faculty mentor; while a minimum of 90 hours is required for honors project, honors faculty mentor and student work together to determine the specific schedule commitments. Prerequisites: NURS:4098.

**NURS:4098 Honors Seminar** 1 s.h.

Crafting a meaningful honors project; structured steps for development of a project idea, measurable learning objectives, GANTT chart timeline, beginning literature review related to the independent study subject; identification/completion of organizational requirements such as approval processes, access to electronic systems, and training.

- NURS:4099 Honors Independent Study** 3 s.h.  
Building on honors seminar, students implement the project they designed in the seminar with guidance from the student's contracted honors faculty mentor; honors project is expected to apply current professional evidence and result in a rigorous scholarly product; specific type of product negotiated with honors faculty mentor; while a minimum of 90 hours is required for honors project, honors faculty mentor and student work together to determine specific schedule commitments. Prerequisites: NURS:4098.
- NURS:4155 Senior Nursing Internship** 5 s.h.  
Immersion capstone experience to engage in practice under direct supervision of a professional registered nurse mentor; design, provide, coordinate, and evaluate care; work with teams to deliver evidence-based care; improve quality, patient safety, and outcomes. Prerequisites: NURS:3640 and NURS:3660 and NURS:3635 and NURS:3645. Corequisites: NURS:3650 and NURS:3655 and NURS:4160.
- NURS:4160 Professional Role IV: Leadership and Professional Engagement** 3,5 s.h.  
Concepts of leadership, followership, management, informatics, and professional engagement; quality improvement strategies and skills; professional development, career trajectory, and role transitions. Prerequisites: (NURS:3660 and NURS:3645 and NURS:3635 and NURS:3640) or (NURS:3460 and NURS:3160 and NURS:3660). Corequisites: NURS:3660, if not taken as a prerequisite.
- NURS:4170 Baccalaureate Seminar** 1 s.h.  
Examination of didactic and clinical learning experiences; documentation of changes in knowledge, skills, and attitudes to demonstrate achievement of relevant competencies; group discussion and reflective writing assignments to evaluate professional growth that has occurred during the B.S.N. program.
- NURS:5002 Leadership and Management Essentials** 3 s.h.  
Roles and strategies for leading and managing others in health care environments to influence health care delivery and provide a healthy, innovative working environment; focus on selected leadership and organizational concepts essential to leaders in health care.
- NURS:5007 Applied Epidemiology** 3 s.h.  
Introduction to basic principles and methods of epidemiology and demonstration of applicability in field of nursing and nursing research; topics include historical perspectives of epidemiology, epidemiological models of health and disease, measures of disease occurrence and association, disease screening, causal inference, study design and application of epidemiological approaches to clinical practice, program planning and evaluation.
- NURS:5009 Evaluating Evidence for Practice** 3 s.h.  
Opportunity for clinicians to develop proficiency in use of research- and evidence-based practice; essentials of the research process, qualitative and quantitative research, components of evidence-based practice; acquisition of knowledge and skills necessary for research (knowledge) utilization initiatives and application of evidence-based practice principles in clinical settings; identification of appropriate research questions, synthesis of knowledge base for evidence-based practice, revision of clinical practice guidelines, and evaluation of research utilization and evidence-based practice initiatives.
- NURS:5010 Clinical Data Management and Evaluation** 3 s.h.  
Clinical data management essential for evaluating evidence-based practice/performance improvement projects; a high caliber data management plan will provide key stakeholders with information necessary to make decisions and includes components of identified processes and outcomes linked to variables and data sources, adequate statistical power, data cleaning and manipulation techniques, statistical methods, and a meaningful presentation of variables that addresses the concerns and questions of key stakeholders; knowledge and skills necessary to develop and execute data management plan for final project. Prerequisites: NURS:5009. Requirements: master's or doctoral standing.
- NURS:5015 Health Systems, Finance, and Economics** 3 s.h.  
Global, economic, organizational, legal, political, and technological contexts in advanced nursing practice; knowledge and skills necessary for understanding the evolution of health services organizations, financing of health care, and relationships among socioeconomic systems influencing health care and nursing practice; impact of macrosystems on distribution, acquisition, and use of financial and economic principles in delivery of health care services. Prerequisites: NURS:5002.
- NURS:5016 Health Care Infrastructure and Informatics** 3 s.h.  
Health care infrastructure with a focus on the United States; role of information and technology in its development and implementation; role of data sets, information technology, and emerging technologies in supporting providers in managing patient care and population health of vulnerable groups. Prerequisites: NURS:5002 and NURS:5015.
- NURS:5017 Quality and Safety** 3 s.h.  
Foundation for understanding concepts of safety and quality across health care settings; focus on providing a safe environment, elevating staff performance and clinical outcomes related to safety and quality, and methods for continuous improvement.
- NURS:5018 Clinical Education in the Care Environment** 3 s.h.  
Preparation to assume role of educator with individuals, groups, and communities, including staff and students; teaching/learning process for providing client education; knowledge and skills needed to effectively fill role of preceptor/mentor.
- NURS:5019 Role Development: Educator in a Practice Discipline** 3 s.h.  
Becoming an educator in a practice discipline; unique knowledge, skills, approaches to didactic and clinical teaching; overview of curriculum development process that affects revision/development; faculty role in curriculum development and evaluation; knowledge and skills to create a learner-centered environment for professional students; key facilitation and evaluation strategies; application of concepts during field experience working directly with experienced faculty.
- NURS:5020 Application of Educator Role Competencies** 1-3 s.h.  
Individually designed activities to strengthen performance as an educator in a practice discipline; meet with experienced instructor to develop specific objectives and related activities to be completed during a 45-hour field experience. Prerequisites: NURS:5019.

**NURS:5021 Physiology, Pathophysiology, and Pharmacology I for the Clinical Nurse Leader 3 s.h.**

Basic scientific concepts required for B.S.N. and clinical nursing experience; matches physiology and pathophysiology with pharmacological treatments as combined core elements; focus on regulation of cellular, organ, and system functions; regulation of internal milieu; functional interrelationships among body systems; cellular and body-wide defense mechanisms; synthesis of information related to pathophysiological phenomena; pharmacokinetic and pharmacodynamics principles essential for general practice; specific drug classes used in management of clinical conditions. Two semesters.

**NURS:5022 Physiology, Pathophysiology, and Pharmacology II for the Clinical Nurse Leader 3 s.h.**

Basic scientific concepts required for B.S.N. and clinical nursing experience; matches physiology and pathophysiology with pharmacological treatments as combined core elements; focus on regulation of cellular, organ, and system functions; regulation of internal milieu; functional interrelationships among body systems; cellular and body-wide defense mechanisms; synthesis of information related to pathophysiological phenomena; pharmacokinetic and pharmacodynamics principles essential for general practice; specific drug classes used in management of clinical conditions. Two semesters. Prerequisites: NURS:5021.

**NURS:5023 Pathophysiology for Advanced Clinical Practice 4 s.h.**

In-depth study of pathophysiologic processes across the lifespan; emphasis on dysregulation of cellular, organ, and system functions; clinical manifestations of common disease states; resultant physiological responses to internal milieu; interrelationships among body system; cellular and body-wide defense mechanisms; synthesis of evidence-based information from a variety of sources related to selected pathophysiological phenomena. Requirements: graduate-level physiology course.

**NURS:5031 Health Promotion and Assessment for Advanced Clinical Practice 3-4 s.h.**

Emphasis on health promotion and advanced health assessment; didactic and clinical laboratory instruction allows students to develop and demonstrate mastery of advanced knowledge and skills in health assessment; content related to promotion of health and prevention of disease; focus on application of content with individuals within the student's respective population-based scope of practice. Requirements: admission to post-B.S.N. D.N.P. program.

**NURS:5032 Mental Disorders in Advanced Practice 3 s.h.**

Foundation for advanced practice nurse to provide care for common mental health disorders; presentation of neurophysiological, genomic, environmental/social, and developmental theories to understand etiology and presentation of common mental health conditions; psychopharmacological and nonpharmacological principles and modalities for treatment of common mental health problems.

**NURS:5033 Pharmacotherapeutics for Advanced Practice Nursing 3 s.h.**

Examination of pharmacotherapeutic principles essential for advanced clinical practice nursing and prescribing; specific drug classes frequently used in management of clinical conditions experienced by various patient populations; legal considerations related to prescriptive authority and prescribing patterns. Prerequisites: NURS:5023.

**NURS:5035 Graduate Pharmacology Specialty 3 s.h.**

Principles of pharmacology learned in NURS:5033; principles and practices necessary for safe prescribing and medication management of a specialty population (e.g., pediatrics, geriatrics, acute care, mental health). Prerequisites: NURS:5033.

**NURS:5036 Psychopharmacology for Advanced Clinical Practice 3 s.h.**

Scientific knowledge of psychopharmacology and its application to treatment of clients with psychiatric disorders across the lifespan; advanced concepts in neuroscience, neurobiology of mental disorders, pharmacokinetics and pharmacodynamics of psychotherapeutic medications in the management of targeted symptoms of psychiatric disorders in clients across the lifespan. Prerequisites: NURS:5023 and NURS:5033.

**NURS:5037 Health Promotion and Assessment for Clinical Nurse Leaders 3-4 s.h.**

Emphasis on health promotion and advanced health assessment; didactic and clinical laboratory instruction allows students to develop and demonstrate mastery of advanced knowledge and skills in health assessment; content related to promotion of health and prevention of disease; focus on application of course content with individuals across the lifespan. Requirements: admission to M.S.N.-CNL program.

**NURS:5038 Advanced Diagnostic and Therapeutic Procedures for Acute Care 1 s.h.**

Introduction to use of advanced diagnostic and therapeutic techniques commonly encountered in acute and critical care; students are provided opportunities to interpret and incorporate technologically derived data; discussion of practices to protect patients, such as informed consent, risk benefit analysis, infection control, and pain management; laboratory experiences allow students to practice techniques used to perform invasive procedures. Prerequisites: NURS:5023 and NURS:5031 and NURS:5033. Requirements: graduate-level physiology course.

**NURS:5039 Advanced Diagnostic and Therapeutic Procedures for Primary Care 1 s.h.**

Introduction to use of advanced diagnostic and therapeutic techniques commonly encountered in primary care; selected laboratory experiences designed to enhance familiarity with use of technologies and interpretation of technologically derived data; discussion of practices used to protect patients (e.g., informed consent, risk benefit analysis, infection control, pain management). Prerequisites: NURS:5023 and NURS:5031 and NURS:5033. Requirements: graduate-level physiology course.

**NURS:5040 Genetics/Genomics for Advanced Nursing Practice 2 s.h.**

Essential content for understanding the role genetics/genomics plays in health and disease; focus on the core competencies of American Nurses Association (ANA), which provides a framework for advanced nursing practice preparation to incorporate genetics/genomics knowledge for development of prevention, diagnosis, and treatment options in order to optimize health outcomes relevant to clinical role and specialty. Requirements: master's or doctoral standing.

**NURS:5041 Psychotherapeutics for Advanced Practice Nursing Across the Lifespan I 2 s.h.**

Scientific knowledge of psychotherapies and its application to treatment of clients with psychiatric disorders across the lifespan; focus on advanced concepts of effective communication and utilizing evidenced-based psychotherapy theories in the management of targeted symptoms of psychiatric disorders in clients across the lifespan.

**NURS:5042 Psychotherapeutics for Advanced Practice Nursing Across the Lifespan II 1 s.h.**

Scientific knowledge of psychotherapies and its application to treatment of clients with psychiatric disorders across the lifespan from NURS:5041; students identify two forms of evidenced-based psychotherapy theories and prepare a pathway to certification in each form of psychotherapy. Prerequisites: NURS:5041.

**NURS:5210 Foundations of Professional Nursing 1 s.h.**

Introduction to professional nursing practice and exploration of nursing discipline, history, and interprofessional partnerships; examination of nursing theories and professional identity of the nurse.

**NURS:5215 Medical Surgical Care of Chronically Ill Adults 3 s.h.**

Chronic disease management and reinforcement of clinical judgment, prioritization, psychomotor skills, and professional behavior with diverse patient populations in a variety of health care settings; application of evidence-based nursing practice and safe person-centered practice in the nursing process to adult patients with chronic health care needs; clinical focus includes activities of daily living, positioning, mobility, nutrition, therapeutic communication, asepsis, medication administration, elimination management, interprofessional collaboration, and transition of care. Prerequisites: NURS:3645. Corequisites: NURS:3138.

**NURS:5220 Medical Surgical Care of Acutely Ill Adults 3 s.h.**
