GE CLAS Core: International and Global Issues [e]		3
Elective course [d]		3
Elective course (if needed) [d]		2 - 3
Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall) [i]		
	Hours	**14-17**
	Total Hours	**120-132**

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative or Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Society.

b Enrollment in chemistry courses requires completion of a placement exam.

c Students who have completed four levels of a single language or two levels of two different languages in high school or college have satisfied the GE CLAS Core World Languages requirement. Students who have completed three levels of a single language may complete a fourth-level course in the same language or may choose an

approved World Language and Cultural Exploration course. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course. Contact your academic advisor or CLAS Undergraduate Programs Office with questions concerning the World Languages requirement.

d Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.

e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.

f Students must take two of the applications courses SIED:4102, SIED:4103, SIED:4105, or SIED:4106, or SIED:4110.

g Students must complete 15 semester hours in their secondary emphasis area.

h Choose from BMB:3110, BIOL:2723, BIOL:3233, or BIOL:3363. Some courses are offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

i Please see Academic Calendar, on Office of the Registrar website, for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Degree Services.

h Students must complete 15 semester hours in their secondary emphasis area.

i Please see Academic Calendar, on Office of the Registrar website, for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Degree Services.

Teaching and Learning, MA

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Learning Outcomes

Students will:

- demonstrate understanding of and ability to analyze theoretical concepts and research in their field of study;
- express ideas effectively in written and spoken communication;
- connect research to practice and practical questions in their professional context;
- effectively apply their knowledge and skills to their professional context; and
- demonstrate curiosity, inquiry, and critical and data-based decision making.

Art Education

The Master of Arts in teaching and learning with an art education subprogram requires a minimum of 38 s.h. of graduate credit with a Graduate College program grade-point average (GPA) of at least 3.00 for graduation.

The program prepares highly qualified teachers of art for elementary and secondary schools and community colleges. Its strong academic emphasis helps teachers who are creative artists to become highly literate in the history and language of art.

The MA in teaching and learning with an art education subprogram requires the following coursework.

Requirements

Course #	Title	Hours
One of these options:		
Studio art courses (12 s.h.) and art history courses (6 s.h.)		18
Art history courses (12 s.h.) and studio art courses (6 s.h.)		18
And these:		
EDTL:6267	Seminar: Current Issues in Art Education	3-4
Additional coursework (consult advisor)		12
Studio or written thesis course (for both thesis and nonthesis students; consult advisor)		5

Admission

Applicants must meet the admission requirements of the Graduate College. They must have completed the equivalent of the minimum coursework in art required for a University of Iowa BA or BFA in art and must have a license/certificate to teach art.

English Education

The Master of Arts in teaching and learning with an English education subprogram requires a minimum of 30 s.h. of graduate credit with a Graduate College program grade-point average (GPA) of at least 3.00 for graduation.

The program is intended for experienced teachers of English. It provides opportunities for professional development and preparation for department chairs, supervisors of English, and curriculum specialists for secondary schools.

MA students specialize in English education and in one or two other areas. The other area(s) may include reading, writing, curriculum, adolescent literature, or a literary area. Students and their advisors plan the program of study together. The only required course is EDTL:6315 MA Seminar: English Education.

Final Examinations

Final examinations are developed in consultation with a student's advisor. Students ask three faculty members to serve on their committee. Faculty members may include professors outside of the College of Education. One of these faculty members, usually a student's advisor, serves as chair of the committee.

Admission

Applicants must meet the admission requirements of the Graduate College. They should have taken extensive coursework in English and should have taught English for at least two years. Application should be made to the College of Education.

Mathematics Education

The Master of Arts in teaching and learning with a mathematics education subprogram requires a minimum of 32 s.h. of graduate credit with a Graduate College program grade-point average (GPA) of at least 3.00 for graduation.

The program provides students with advanced specialization in mathematics and education as a better foundation for K–12 teaching.

Required Courses

MA students take a minimum of 9 s.h. of coursework in mathematics approved by their advisor. They also take a minimum of four courses in mathematics education and three courses chosen in consultation with their advisor.

Students choose a cognate area, usually enrolling in three or more courses in the area. Suggested areas include educational psychology, educational statistics and measurement, history or philosophy of education, pure or applied mathematics, instructional design and technology, counselor education, curriculum, administration, and special education. Courses are chosen in consultation with a faculty member from their cognate area.

Students also complete a sufficient number of electives in mathematics and education, chosen with the approval of their advisor, to complete 32 s.h. of credit.

Final Examination

Students take three two-hour final exams: one in mathematics education, the second in mathematics, and the third in their cognate area.

Admission

Applicants must meet the admission requirements of the Graduate College. Except in unusual cases, they should hold a professional license/certificate to teach school mathematics.

Multilingual Education

The Master of Arts in teaching and learning with a multilingual education subprogram requires a minimum of 33 s.h. of graduate credit. Students take at least 15 s.h. in multilingual education coursework, 9 s.h. in graduate language or linguistics courses, and 9 s.h. in elective coursework. They must earn 9 s.h. in courses numbered 5000 or above. Students must maintain a Graduate College program grade-point average of at least 3.00 while enrolled in the program. Candidacy for the master's degree is reevaluated annually.

The program is designed for students who would like to pursue a multilingual education specialization in teaching, including English as a Second Language (ESL) or English as a Foreign Language (EFL), bilingual and dual language education, or world language education, or in a related field (e.g., language laboratory directors, instructional materials designers, evaluation specialists, or assessment developers). It also offers enrichment in multilingual language pedagogical knowledge for practicing teachers. Students may design programs with a special focus.

The MA in teaching and learning with a multilingual education subprogram requires the following courses.

Course #	Title	Hours
This course:		
EDTL:6483	Multilingual Education and Applied Linguistics	3
At least 12 s.h. from these:		
EDTL:6015	PhD Seminar: Literacy, Culture, and Language Education	3
EDTL:6400	Fundamentals of Second Language Assessment	3
EDTL:6403	Language Policy and Planning	3
EDTL:6409	Cultural Curriculum	3
EDTL:6480	Graduate Seminar in Multilingual Education	3
EDTL:6484	Bi/Multilingual Literacies	3
EDTL:6497	Principles of Course Design for Second Language Instruction	3
EDTL:7405	Research Methods in Literacy, Culture, and Language Education	3
Students may take other courses to meet this requirement, in consultation with their advisor		

Target Language

In consultation with their advisor, students select at least 9 s.h. in courses numbered 3000 and above from the following subjects: Arabic, American Sign Language, Chinese, French, German, Italian, Japanese, Korean, Latin, linguistics, Portuguese, Russian, Spanish, and Swahili. Students are strongly encouraged to focus on coursework related to language and linguistic study.

Elective Courses

Students complete at least 9 s.h. in elective coursework chosen in consultation with their advisor. Students are permitted to select coursework numbered 3000 and above from the College of Education (CSED, EDTL, EPLS, and PSQF) and coursework listed in "Target Language."

Master's Examination

Students take a written exam during the semester in which they plan to graduate. The exam covers multilingual education and two areas of specialization selected by a student. It is written by the graduate committee, which consists of at least three faculty members, two of whom must be from the multilingual education program area.

Admission

Applicants must meet the admission requirements of the Graduate College and have prior teaching experience. Applicants should submit a statement of purpose explaining their graduate study goals and their commitment to multicultural education. International applicants should satisfy the English proficiency requirements as specified by the Graduate College.

Social Studies Education

The Master of Arts in teaching and learning with a social studies education subprogram requires 38 s.h. of graduate credit with a program grade-point average (GPA) of at least 3.00 for graduation.

The program provides an opportunity for interdisciplinary work in education, history, social science, or related areas for classroom teachers, high school department chairs, supervisors, and others interested in advancing their competence in history and the social sciences and greater proficiency in teaching and supervision.

Requirements

Students create a course of study in consultation with their advisor that aligns with their interests related to social studies education and/or their profession. Students distribute the program's required 38 s.h. among three concentration fields in history or a social science (or related area), social studies and global education, and general education. At least 9 s.h. must be earned in history or a social science and in general education courses numbered 3000 or above. Students must also earn at least 9 s.h. in courses numbered 6000 or above offered through the social studies education program or a related area of education.

Thesis Option

Students who choose the thesis option complete a research or investigative problem. If the thesis is research or investigation in history, social science, or a related area, the thesis director is a member of the appropriate department. If the thesis is an investigative problem in social studies education, the thesis director is a College of Education faculty member.

Final Examination

Candidates select one faculty member from each concentration area to serve as a committee member responsible for creating and reviewing a question for the written exam. Committee members are selected in consultation with a candidate's advisor. The required final

examination consists of three two-hour written exams, one on each of the three concentration fields.

Admission

Applicants must meet the admission requirements of the Graduate College. They should have a bachelor's degree in education, history, or one of the social sciences from an accredited institution. Typically, applicants are expected to hold a secondary teaching license/certificate.

Special Education

The Master of Arts in teaching and learning with a special education subprogram requires a minimum of 30 s.h. of graduate credit and the Master of Arts in teaching and learning with a subprogram in special education–ABA requires a minimum of 39 s.h. of graduate credit. A Graduate College program grade-point average (GPA) of at least 3.00 for graduation is required for students in both subprograms. A thesis is not required; a final exam is required.

The MA in teaching and learning with a special education subprogram prepares scholars to deliver services to individuals with disabilities. The MA is available with licensure and non-licensure. Contact theDepartment of Teaching and Learning for specific program requirements.

The MA in teaching and learning with a subprogram in special education [p. 1488] (30 s.h.) is available to individuals interested in becoming a special education teacher or enhancing their current teaching license, including U2G students. Students can prepare to work in elementary and secondary schools with individuals who have behavior disorders and learning disabilities, intellectual disabilities, and/or mild/moderate disabilities. This pathway prepares graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. Students typically pair the MA with a special education licensure and endorsement program. Course selections align with requirements for a specific licensure and/or endorsement; see the section "Teacher Licensure and Endorsements" for more information.

The MA in teaching and learning with a subprogram in special education–ABA [p. 1488] (39 s.h.) is a non-licensure program available to individuals interested in pursuing certification in applied behavior analysis. This pathway prepares graduates to become board-certified behavior analysts (BCBAs) and to provide services in education, community, or clinical settings. This pathway does not, however, lead to a teaching license to serve as a special education teacher.

Special Education Subprogram

The MA in teaching and learning with a subprogram in special education requires the following 30 s.h. of graduate coursework. Please note that while the MA requires 30 s.h., the student's chosen licensure preparation program and/or added endorsement program may require additional coursework. Students work closely with their advisor to determine which courses they should take based on the student's chosen licensure or endorsement. All courses for the subprogram must be taken on an A–F graded basis except for those completed for student teaching.

EDTL:6908	Secondary Practicum With Exceptional Persons	5

Teacher Licensure and Endorsements

Special education licensure and endorsement programs of the University of Iowa are approved by the state of Iowa. With this MA program, licensure preparation (preparation for initial licensure as a teacher) and added endorsement (an additional teaching area for licensed teachers) are offered in the following areas of specialization.

- Instructional strategist I (mild/moderate): added endorsements for K–8 or 5–12
- Instructional strategist II (behavioral disorders/learning disabilities): licensure preparation or added endorsement for K–12
- Instructional strategist II (intellectual disabilities): licensure preparation or added endorsement for K–12
- Instructional strategist I and II (all): licensure preparation or added endorsement for K–12

Added endorsement programs for regular education endorsements may also be available.

Contact the Teacher Education Program (TEP) for more information, including TEP admissions, requirements, and program policies.

TEP Academic and Professional Standards

For students who are enrolled for licensure preparation (preparation for initial licensure as a teacher), the state of Iowa teacher preparation standards require that teacher candidates demonstrate the content, pedagogical, and professional knowledge, skills, and dispositions necessary to help all students learn. Because of this, the College of Education and the Teacher Education Program have established academic and professional standards that students must maintain. For graduate-level teacher candidates in special education, these standards include:

- a UI minimum cumulative GPA of 2.75 in graded graduate courses (consistent with the academic standing policy of the Graduate College);
- a minimum TEP major GPA of 2.00 (2.70 for good standing);
- a minimum UI term GPA of 1.50 during fall or spring enrollment;
- a grade of C-minus or higher in TEP major courses; and
- no notices of concern in professional dispositional qualities.

Liberal Arts Core

For students pursuing initial licensure as a teacher, the state of Iowa teacher preparation standards require a core of liberal arts knowledge including but not limited to English composition, mathematics, natural sciences, social sciences, and humanities. Students who have not completed these requirements with their previous coursework will need additional coursework. Bachelor's degree graduates of the College of Education or the College of Liberal Arts and Sciences have met these requirements with the GE CLAS Core [p. 22] if a course in mathematics, statistics, or computer science was selected for the Quantitative and Formal Reasoning requirement. For additional information about these standards, contact the Office of Student Services.

Admission

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate GPA of at least 3.00 and/or at least 3.00 on a minimum of 12 s.h. of graduate coursework. Applicants seeking initial teacher licensure must have at least 10 hours of documented experience in K–12 schools.

Teaching, Leadership, and Cultural Competency

The Master of Arts in teaching and learning with a teaching, leadership, and cultural competency subprogram requires a minimum of 33 s.h. of graduate credit. Students must maintain a UI cumulative grade-point average (GPA) of at least 2.75.

The program is offered completely online and prepares practicing teachers, school-based personnel, and those working with K–12 populations in community settings for the challenges facing U.S. schools and communities in particular. Special emphasis is placed on understanding how identities, including race, sexuality, linguistic background, socioeconomic status, gender identity, ethnicity, and residency status impact learning in the environment, and in particular, how schools and classroom teachers can shift practices to create more just and inclusive learning environments. Students engage in these topics using up-to-date research and collaborative technologies under the guidance of a faculty member who has considerable experience supporting effective change in schools. Students who are changemakers and those motivated to serve and celebrate all students are encouraged to apply to this program.

Students take a 24 s.h. core, including courses in instructional leadership, cultural competency and diversity, assessment, technology, and curriculum; and 9 s.h. of elective coursework. Iowa teachers can apply their course credits toward their ongoing learning requirements for maintaining licensure. The program requirements are aligned with the National Board for Professional Teaching Standards (NBPTS) certification process. Additionally, elective tracks can be aligned with added state of Iowa endorsements in selected areas.

The MA in teaching and learning with a teaching, leadership, and cultural competency subprogram requires the following coursework.

Course #	Title	Hours
All of these:		
EDTL:5090	Diversity and Identity in K-12 Schools	3
EDTL:5095	Issues in U.S. Schools	3
EDTL:5099	Conducting School-Based Action Research	3
EDTL:6483	Multilingual Education and Applied Linguistics	3
EPLS:5090	Instructional Coaching for Teaching Excellence	3
PSQF:4740	Issues in K-12 Assessment	3
PSQF:4750	Learning Environments: Design, Context, and Activity	3
One of these:		
EDTL:5085	Generation Innovation: Technology Integration in 21st-Century K-12 Schools	3
PSQF:4760	Participatory Learning and Media: Creating, Remixing, Making, and Education	3
At least 9 s.h. of elective coursework chosen from the following:		
EDTL:4066	Curriculum and Programming for Advanced Learners	3
EDTL:4093	Teaching and Learning for a Global Perspective	3
EDTL:4392	Voice, Drama, and Debate in the Secondary Schools	3
EDTL:4393	Critical Media Studies and Production in Secondary Schools	3
EDTL:4467	Methods: ESL and Bilingual Education	4
EDTL:4498	Applied Linguistics and the Multilingual Classroom	4
EDTL:4565	Mathematics in Management and Social Sciences	3
EDTL:5081	Facilitating Student-Centered Discussions	3
EDTL:5087	Anti-Oppressive Literature Instruction	3
EDTL:5091	LGBTQ Topics in Education	3
EDTL:6164	Early Literacy Development and Instruction	2-3
EDTL:6171	Advanced Reading Clinic Techniques	2-3
EDTL:6172	Advanced Reading Clinic Practicum	2-3
EDTL:6563	STEM Through Mathematical Modeling	3
EDTL:6761	STEM Research and Leadership Seminar	3
EDTL:6762	STEM Experiential Learning	3
EDTL:6766	Physical Science Topics in STEM Education	3
EDTL:6767	Systems Thinking in Biology and Integrated STEM Education	3
CSED:4137	Introduction to Educating Advanced Learners	3
CSED:5300	Culturally Relevant Social and Emotional Learning	3
EPLS:6381	Analysis and Appraisal of Curriculum	3
PSQF:4121	Identification of Students for Advanced Programming	3
Other courses in consultation with an advisor		

Admission

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor's degree, a GPA of at least 3.00 in undergraduate coursework, a teaching license, or relevant significant teaching experience in K–12 education.

Academic Plans

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Teaching and Learning, MA

c Students must complete at least 9 s.h. of elective coursework. See the General Catalog for list of approved courses.

Teaching and Learning, MAT

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Learning Outcomes

Students will:

- demonstrate understanding of the central concepts, tools of inquiry, and structures of the discipline to be taught;
- plan discipline-specific and ethical instruction and assessment that reflect research and theory in education and their discipline;
- implement discipline-specific and ethical instruction and assessment using a variety of methods of teaching, instructional strategies, and pedagogical tools;
- demonstrate understanding of learner development and learning differences that vary across the cognitive, linguistic, social, emotional, and physical areas, as well as diverse cultures and communities; and
- express ideas effectively in written and spoken communication in collaboration with university and school professionals.

Art Education

The Master of Arts in Teaching in teaching and learning with an art education subprogram requires a minimum of 58 s.h. of graduate credit with a Graduate College program grade-point average (GPA) of at least 3.00 for graduation. Admission to the MAT requires admission to the Teacher Education Program (TEP), and students must maintain TEP academic and professional standards.

The program is designed primarily for graduates of baccalaureate degree programs in art who would like to become teachers but have no previous coursework in education. It features advanced work in art along with the courses required for certification. Additional art coursework may be advised to render a student's degree equivalent to one from the University of Iowa and to fulfill licensure requirements. Students may need to complete additional courses or other requirements to meet state standards for teacher preparation, licensure, or endorsements.

The MAT in teaching and learning with an art education subprogram requires the following work.

Course #	Title	Hours
All of these:		
EDTL:3002	Teaching and Learning Technologies	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas	1
EDTL:3143	Methods of Elementary Art and Field Experiences	3
EDTL:3204	Art Education Studio and Field Components	3
EDTL:3205	Methods of Secondary Art and Field Experience	3
EDTL:3290	Introduction and Practicum: Art	3
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4192	Special Area Student Teaching	6
EDTL:4900	Foundations of Special Education	3
EDTL:5222	Creativity, Imagination, Play, and Human Development Through the Arts	3
EDTL:6267	Seminar: Current Issues in Art Education	4
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3
Graduate-level coursework in art studio or art history or a related area (consult advisor)		6

The coursework in art studio or art history or a related field may contribute to licensure requirements. Other art licensure requirements may be taken prior to or in addition to the courses previously listed. To be considered for a teaching assistant (TA) position, students must take EDTL:7380 Practicum in College Teaching for 1 s.h. after their first semester in the program and after completion of EPLS:3000 Foundations of Education, EPLS:4180 Human Relations for the Classroom Teacher, and PSQF:6200 Educational Psychology, and a course in creativity, imagination, and play: human development through art.

Endorsements

The art education TEP is approved by the state of Iowa as preparation for teaching licensure with endorsements for 5–12 art and K–8 art. Added endorsement programs for additional teaching areas are available.

Final Examination

Students complete final examinations before their student teaching semester. The final examination involves a reflective project supervised by art education faculty. The project encompasses issues explored throughout the course of study and can involve inquiry through studio work or practice. For deadlines, a checklist, and instructions, see Graduate Exams on the Office of Student Services website.

Teacher Education Program Academic and Professional Standards

State of Iowa teacher preparation standards require that teacher candidates demonstrate the content, pedagogical, and professional knowledge, skills, and dispositions necessary to help all students learn. For this reason, the College of Education and the Teacher Education Program have established academic and professional standards that students must maintain. For graduate-level teacher

candidates and MAT candidates in art education, these standards include:

- a UI minimum cumulative GPA of 2.75 on graded graduate courses (consistent with the academic standing policy of the Graduate College);
- a minimum TEP major GPA of 2.00 (2.70 for good standing);
- a minimum UI term GPA of 1.50 during fall or spring enrollment;
- a grade of C-minus or higher in TEP major courses; and
- no notices of concern in professional dispositional qualities.

For additional information about these standards, contact the Office of Student Services.

Liberal Arts Core

State of Iowa teacher preparation standards require a core of liberal arts knowledge including but not limited to English composition, mathematics, natural sciences, social sciences, and humanities. Students who have not completed these requirements with their previous coursework will need additional coursework. Bachelor's degree graduates of the College of Education or the College of Liberal Arts and Sciences have met these requirements with the GE CLAS Core [p. 22] if a course in mathematics, statistics, or computer science was selected for the Quantitative and Formal Reasoning requirement. For additional information about these standards, contact the Office of Student Services.

Admission

Applicants must meet the admission requirements of the Graduate College. They should have completed a baccalaureate degree program in art, equivalent to those offered through the College of Liberal Arts and Sciences at the University of Iowa, with an undergraduate GPA of at least 3.00. Candidates must also meet all Teacher Education Program (TEP) application requirements. Since the MAT consists primarily of the preparation courses required for licensure as an art teacher, the MAT is not available to licensed teachers.

English Education

The Master of Arts in Teaching in teaching and learning with an English education subprogram requires a minimum of 45 s.h. of graduate credit with a Graduate College program grade-point average (GPA) of at least 3.00 for graduation. Admission to the MAT requires admission to the Teacher Education Program (TEP) and students must maintain TEP academic and professional standards.

The program is designed for students who have an undergraduate degree in English and few or no professional education courses. Successful completion of the program enables students to receive a credential to teach English in secondary schools. Students may need to complete additional courses or other requirements to meet state standards for teacher preparation, licensure, or endorsements.

The MAT in teaching and learning with an English education subprogram requires the following coursework.

English

Course #	Title	Hours
All of these:		
EDTL:3382	Language and Learning	3
EDTL:3393	Reading and Teaching Adolescent Literature	3
EDTL:4355	Approaches to Teaching Writing	3
EDTL:6315	MA Seminar: English Education	arr.
Students may take the following English courses as part of the MAT program or as part of their undergraduate program:		
ENGL:2020	Foundations of Creative Writing: Craft, Practice, Pleasure	3
A creative writing course (prefix CW) or creative nonfiction writing (prefix CNW) numbered 2000 or above		
A course in Shakespeare		
Three courses in American literature		
A course in British literature		

Education

Course #	Title	Hours
All of these:		
EDTL:3002	Teaching and Learning Technologies (must be taken during student's first semester in the college)	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	arr.
EDTL:4092	Observation and Laboratory Practice in the Secondary School	arr.
EDTL:4314	Introduction and Practicum: Secondary English (must be completed before enrollment in EDTL:4315 and EDTL:4394)	3
EDTL:4315	Learning to Teach Secondary English/Language Arts and Field Experience	3
EDTL:4394	Secondary Reading Instruction	3
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3

Endorsements

The English education TEP is approved by the state of Iowa as preparation for teaching licensure with the grades 5–

12 English/language arts endorsement. With this program, students have the option to complete additional coursework for added endorsements in grades 5–12 all language arts and grades 5–12 reading.

Final Examination

The final examination involves a series of reflective projects supervised by English education faculty. The projects encompass issues explored throughout the course of study and involve the integration of theory and practice.

Teacher Education Program Academic and Professional Standards

State of Iowa teacher preparation standards require that teacher candidates demonstrate the content, pedagogical, and professional knowledge, skills, and dispositions necessary to help all students learn. Because of this, the College of Education and the Teacher Education Program have established academic and professional standards that students must maintain. For graduate-level teacher candidates and MAT candidates in English education, these standards include:

- a UI minimum cumulative GPA of 2.75 on graded graduate courses (consistent with academic standing policy of the Graduate College);
- a minimum TEP major GPA of 2.00 (2.70 for good standing);
- a minimum UI term GPA of 1.50 during fall or spring enrollment;
- a grade of C-minus or higher in TEP major courses; and
- no notices of concern in professional dispositional qualities.

Liberal Arts Core

State of Iowa teacher preparation standards require a core of liberal arts knowledge including but not limited to English composition, mathematics, natural sciences, social sciences, and humanities. Students who have not completed these requirements with their previous coursework will need additional coursework. Bachelor's degree graduates of the College of Education or the College of Liberal Arts and Sciences have met these requirements with the GE CLAS Core [p. 22] if a course in mathematics, statistics, or computer science was selected for the Quantitative and Formal Reasoning requirement. For additional information about these standards, contact the Office of Student Services.

Admission

Applicants must meet the admission requirements of the Graduate College. They must have been granted a BA in English or the equivalent, with an undergraduate GPA of at least 3.00. They must also meet all Teacher Education Program (TEP) application requirements. Since the MAT is a credentialing program, candidates must not have qualified previously for a credential. Applicants are expected to have no more than 6 s.h. of coursework in professional education courses before admission.

Mathematics Education

The Master of Arts in Teaching in teaching and learning with a mathematics education subprogram requires a minimum of 52 s.h. of graduate credit with a Graduate College program grade-point average (GPA) of at least 3.00 for graduation. Admission to the MAT requires admission to the Teacher Education Program (TEP), and students must maintain TEP academic and professional standards.

The program is designed primarily for students who decide they would like to become teachers and have already completed a BS or BA in mathematics. It features advanced work in mathematics along with the courses required for licensure as a teacher of mathematics in secondary schools. It is assumed that students have completed a baccalaureate degree in mathematics equivalent to one that would be completed at the University of Iowa but have no previous coursework in education. More coursework may be required if there are mathematics courses a student has not taken as part of the undergraduate mathematics baccalaureate degree program to render the student's degree equivalent to one from the University of Iowa.

Students may need to complete additional courses or other requirements to meet state standards for teacher preparation, licensure, or endorsements.

The MAT in teaching and learning with a mathematics education subprogram requires the following work.

Education

Course #	Title	Hours
The first three courses should be taken during the first semester of registration:		
EDTL:3002	Teaching and Learning Technologies	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas	1
All of these:		
EDTL:3532	Introduction and Practicum: Mathematics	3
EDTL:3534	Methods: Middle School Mathematics	3
EDTL:4535	Methods: High School Mathematics	3
EDTL:4750	Assessment in Science, Technology, Engineering, and Mathematics (STEM)	2
EDTL:4751	Learning in the Science, Technology, Engineering, and Mathematics (STEM) Classroom	2
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3
One additional graduate-level mathematics education course in consultation with an advisor		
The following courses are taken concurrently and constitute the student teaching semester:		
EDTL:4087	Seminar: Curriculum and Student Teaching	3

EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6

Graduate Mathematics Requirements

Course #	Title	Hours
At least one of these:		
MATH:4050	Introduction to Discrete Mathematics	3
MATH:4060	Discrete Mathematical Models	3
MATH:4120	History of Mathematics	3

Endorsements

The mathematics education TEP is approved by the state of Iowa as preparation for teaching licensure with an endorsement for grades 5–12 mathematics. Added endorsement programs for additional teaching areas are available.

Final Examination

The final exam includes a required two-part exam in mathematics and mathematics education. At the discretion of the examining committee, this exam may consist of two parts and is both written and oral. The mathematics and mathematics education final examinations will not duplicate course examinations but will assess both mathematics education and the mathematics specialization area chosen by a student.

Teacher Education Program Academic and Professional Standards

State of Iowa teacher preparation standards require that teacher candidates demonstrate the content, pedagogical, and professional knowledge, skills, and dispositions necessary to help all students learn. Because of this, the College of Education and the Teacher Education Program have established academic and professional standards that students must maintain. For graduate-level teacher candidates and MAT candidates in mathematics education, these standards include:

- a UI minimum cumulative GPA of 2.75 on A–F graded graduate courses (consistent with the academic standing policy of the Graduate College);
- a minimum TEP major GPA of 2.00 (2.70 for good standing);
- a minimum UI term GPA of 1.50 during fall or spring enrollment;
- a grade of C-minus or higher in TEP major courses; and
- no notices of concern in professional dispositional qualities.

Liberal Arts Core

State of Iowa teacher preparation standards require a core of liberal arts knowledge including but not limited to English composition, mathematics, natural sciences, social sciences, and humanities. Students who have not completed these requirements with their previous coursework will need additional coursework. Bachelor's degree graduates of the College of Education or the College of Liberal Arts and Sciences have met these requirements with the GE CLAS Core [p. 22] if a course in mathematics, statistics, or computer science was selected for the Quantitative and Formal Reasoning requirement. For additional information about these standards, contact the Office of Student Services.

Admission

Applicants must meet the admission requirements of the Graduate College. They must also meet all Teacher Education Program (TEP) application requirements. Candidates should have completed a baccalaureate degree program in mathematics equivalent to that which is offered through the College of Liberal Arts and Sciences at the University of Iowa. An undergraduate GPA of at least 3.00 is required for admission and must be maintained throughout the enrollment period.

Combined Program

BA in Mathematics/MAT (Undergraduate to Graduate–U2G)

The College of Liberal Arts and Sciences and the College of Education offer students the opportunity to earn their Bachelor of Arts in Mathematics/Master of Arts in Teaching degree in education with a mathematics education subprogram in as little as five years.

The combined BA/MAT U2G program is a seamless process whereby students can progress from undergraduate to graduate status. The usual period of study for both the Bachelor of Arts and the Master of Arts in Teaching degree is six years. Through careful planning, many of the courses required for the MAT program can be taken during the undergraduate years, creating an opportunity to focus the fifth year of study on the comprehensive and student teaching requirements.

Admission to Combined Program

Students are eligible to apply to the U2G program during their sophomore or junior year if they have a cumulative GPA of at least 3.25 or if they meet special considerations. Application materials must include a completed application to the Teacher Education Program (TEP), two recommendations from University of Iowa faculty, a career plan describing how this program will enhance the student's scholarly and or career goals, and an unofficial transcript of the student's prior work.

Students who submit completed applications will be notified within 30 days if they have been accepted into the program. The program accepts a limited number of students each year on a competitive basis. Once accepted into the program, a student meets with an advisor to select an advisory committee to plan a course of study.

During the sixth semester, a student in the program who has completed 80 s.h. of undergraduate work and maintained a 3.00 minimum GPA must apply to the Graduate College. Application to the Graduate College must include a completed Graduate College application form, a letter of application/statement of purpose, one additional letter of recommendation from a faculty member in the mathematics major, and Test of English as a Foreign Language (TOEFL) test scores for international students.

Students are granted undergraduate/graduate credit for coursework during the fourth year; they begin paying graduate tuition during the fifth year until completion of the program. The baccalaureate degree must be conferred at the end of the eighth semester or in the program's fourth year.

Science Education

The Master of Arts in Teaching in teaching and learning with a science education subprogram requires a minimum of 48 s.h. of graduate credit with a Graduate College program grade-point average (GPA) of at least 3.00 for graduation. Admission to the MAT requires admission to the Teacher Education Program (TEP), and students must maintain TEP academic and professional standards.

The program is designed primarily for graduates of bachelor's degree programs in science who decide that they would like to become teachers. It features advanced work in science along with the courses required for certification, enabling students to earn a master's degree and teaching certification at the same time. It is assumed that students have completed considerable coursework in science as undergraduates, but no previous coursework in education. Students' science coursework should be equivalent to that required by the University of Iowa Science Studies program.

The MAT in teaching and learning with a science education subprogram requires the following work.

Professional Education Foundation Sequence

Course #	Title	Hours
All of these:		
EDTL:3002	Teaching and Learning Technologies (must be taken during student's first semester in the college)	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)	1
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
One of these:		
PSQF:1075	Educational Psychology and Measurement	3
PSQF:6200	Educational Psychology	3
Science education courses taken in the following sequence:		
EDTL:4750	Assessment in Science, Technology, Engineering, and Mathematics (STEM)	2
EDTL:4751	Learning in the Science, Technology, Engineering, and Mathematics (STEM) Classroom	2
EDTL:4752	Secondary Science Methods II With Field Experience	3
These two taken concurrently:		
EDTL:4753	Secondary Science Methods III With Field Experience	3
EDTL:4779	Secondary School Science Practicum	2
These three taken concurrently:		
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6

Broad Field Science Block

Students must take the following courses (12 s.h.) unless they completed equivalent courses as undergraduates.

Course #	Title	Hours
This course:		
SIED:4135	The Nature of Science	4
Two of these:		
SIED:4102	Societal and Educational Applications of Earth Science and Environmental	4
SIED:4103	Societal and Educational Applications of Biological Sciences	4
SIED:4105	Societal and Educational Applications of Physical Sciences	4
SIED:4106	Societal and Educational Applications of Chemical Concepts	4
SIED:4110	Exploring the Geology, Mining History, and Environmental Issues of the Colorado Rockies	4

Electives

Students may need to complete additional coursework to meet the minimum requirement of 48 s.h. of graduate credit. This coursework may also apply to earning an endorsement; see the following "Endorsements" section.

Endorsements

The science education TEP is approved by the state of Iowa as preparation for teaching licensure with one or more of the following endorsements: grades 5–12 biological sciences, grades 5–12 chemistry, grades 5–12 earth science, grades 5–12 physics, and grades 5–12 all science.

Added endorsement programs for additional teaching areas are available, including grades 5–12 basic science and subject areas other than science.

Science Education Content Courses

In addition to the science content courses that students completed in their undergraduate studies, students must complete the broad field science block and must complete additional science courses as needed to meet the

requirements of the subject areas the students are preparing to teach. Science content course requirements, including the broad field science block, may be satisfied with any combination of graduate or undergraduate credit.

Final Examination

Students complete final examinations before their student teaching semester. Two written final exams, one in science education and one in a science specialization area, are required. Students may not duplicate course examinations in these areas.

Teacher Education Program Academic and Professional Standards

State of Iowa teacher preparation standards require that teacher candidates demonstrate the content, pedagogical, and professional knowledge, skills, and dispositions necessary to help all students learn. Because of this, the College of Education and the Teacher Education Program have established academic and professional standards that students must maintain. For graduate-level teacher candidates and MAT candidates in science education, these standards include:

- a UI minimum cumulative GPA of 2.75 on A–F graded graduate courses(consistent with the academic standing policy of the Graduate College);
- a minimum TEP major GPA of 2.00 (2.70 for good standing);
- a minimum UI term GPA of 1.50 during fall or spring enrollment;
- a grade of C-minus or higher in TEP major courses; and
- no notices of concern in professional dispositional qualities.

Liberal Arts Core

State of Iowa teacher preparation standards require a core of liberal arts knowledge including but not limited to English composition, mathematics, natural sciences, social sciences, and humanities. Students who have not completed these requirements with their previous coursework will need additional coursework. Bachelor's degree graduates of the College of Education or the College of Liberal Arts and Sciences have met these requirements with the GE CLAS Core [p. 22] if a course in mathematics, statistics, or computer science was selected for the Quantitative and Formal Reasoning requirement. For additional information about these standards, contact the Office of Student Services.

Admission

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor's degree with a major or the equivalent in one of the sciences. A GPA of at least 3.00 is required for admission and must be maintained throughout the program. Applicants must meet all Teacher Education Program (TEP) application requirements.

Combined Program

BA/MAT

College of Liberal Arts and Sciences students who want to teach science and are working toward a Bachelor of Arts degree typically have a major in biology, chemistry, earth and environmental sciences, geographical and sustainability sciences, or physics, but the BA/MAT in science education is open to all majors wanting to obtain the combined Bachelor of Arts/Master of Arts in Teaching with a science education subprogram offered by the College of Liberal Arts and Sciences and the College of Education. The combined program enables students to earn a BA and an MAT in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 19 s.h. of qualifying credit toward both degrees.

BA students are admitted to the combined program before their fourth year. They may begin taking education courses during their third year, but they may not earn graduate credit for them until their fourth and fifth years, after they have been admitted to the combined program. Students take 30 s.h. of coursework during the fifth year and must complete all remaining requirements for both degrees that year.

Education courses required for the combined program are listed under "Combined Program." Requirements for the BA degree are listed under the BA in biology [p. 147], BA in chemistry [p. 184], BA in earth and environmental sciences [p. 374], BA in geographical and sustainability science [p. 382], and BA in physics [p. 899] (College of Liberal Arts and Sciences) in the catalog.

Social Studies Education

The Master of Arts in Teaching in teaching and learning with a social studies subprogram requires at least 48 s.h. of graduate credit with a Graduate College program grade-point average (GPA) of at least 3.00 for graduation. Admission to the MAT requires admission to the Teacher Education Program (TEP), and students must maintain TEP academic and professional standards.

The program provides an opportunity for interdisciplinary work in education, history, social science, or related areas. It is for students who have a bachelor's degree in history or a social science (or considerable coursework in one of the areas) and who wish to obtain a teaching license/certificate while earning the MAT degree. Students must apply to both the Graduate College and the Teacher Education Program.

Requirements

Students should have completed considerable work in the social sciences and/or history as undergraduates. Students in the College of Education's Teacher Education Program for secondary education in social studies may not apply credit they have earned as undergraduates in required licensure courses to the 38 s.h. required for the MAT, even though the credit counts toward state teaching licensure.

Students who completed EDTL:4811 Introduction and Practicum: Secondary Social Studies and/or EDTL:4870 Methods: Secondary Social Studies as undergraduate or postbaccalaureate students at the University of Iowa are required to retake these courses during the MAT program and before student teaching. Required teaching licensure coursework completed at other colleges or universities is reviewed on a case-by-case basis.

Students must satisfy the social studies education content course requirements of the program and 30 s.h. in a history or social science major subject area. The social studies education content courses may include previous undergraduate and/or graduate-level coursework.

Of the total semester hours required for the MAT, students must earn at least 6 s.h. in courses numbered 6000 or above in social studies education and a minimum of 9 s.h. of graduate coursework in history or a social science area. Students should take at least one course taught by the instructor who will serve on the examining committee in the history or social science area.

Students must complete all of the following professional education courses unless they completed some of them as part of their bachelor's degree. In such cases, the semester-hour requirement is reduced accordingly, but it never is below 48 s.h. Students may need to complete additional courses or other requirements to meet state standards for teacher preparation, licensure, or endorsements.

Professional Education Courses

Course #	Title	Hours
All of these:		
EDTL:3002	Teaching and Learning Technologies (must be taken during student's first semester in the college)	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)	1
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6
EDTL:4811	Introduction and Practicum: Secondary Social Studies	3
EDTL:4828	Curriculum and Teaching: Social Studies Education	3
EDTL:4870	Methods: Secondary Social Studies	3
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3

Endorsements

The social studies education TEP is approved by the state of Iowa as preparation for teaching licensure with endorsement for two or more subjects in secondary school history or social sciences. Endorsements available for the major subject area are: grades 5–12 American government, grades 5–12 American history, grades 5–12 American history with grades 5–12 world history (minimum 15 s.h. each), grades 5–12 anthropology, grades 5–12 economics, grades 5–12 geography, grades 5–12 psychology, grades 5–12 sociology, and grades 5–12 world history.

Endorsements available outside of the major subject area can be another of the subject areas previously listed, one of the following added endorsements, or both: grades 5–12 social sciences–basic (recommended for all students: authorizes teaching of American government, American history, and world history) and grades 5–12 all social sciences (authorizes teaching economics, geography, psychology, and sociology, in addition to American government, American history, and world history).

Added endorsement programs for additional teaching areas other than social studies are available.

Final Examination

Candidates select one faculty member from each concentration area to serve as a committee member responsible for creating and reviewing a question for the written exam. Committee members are selected in consultation with a candidate's advisor. The required final examination consists of three two-hour written exams, one on each of the three concentration fields.

Teacher Education Program Academic and Professional Standards

State of Iowa teacher preparation standards require that teacher candidates demonstrate the content, pedagogical, and professional knowledge, skills, and dispositions necessary to help all students learn. Because of this, the College of Education and the Teacher Education Program have established academic and professional standards that students must maintain. For graduate-level teacher candidates and MAT candidates in social studies education, these standards include:

- a UI minimum cumulative GPA of 2.75 on graded graduate courses(consistent with academic standing policy of the Graduate College);
- a minimum TEP major GPA of 2.00 (2.70 for good standing);
- a UI minimum term GPA of 1.50 during fall or spring enrollment;
- a grade of C-minus or higher in TEP major courses; and
- no notices of concern in professional dispositional qualities.

Liberal Arts Core

State of Iowa teacher preparation standards require a core of liberal arts knowledge including but not limited to English composition, mathematics, natural sciences, social sciences, and humanities. Students who have not completed these requirements with their previous coursework will need additional coursework. Bachelor's degree graduates of the College of Education or the College of Liberal Arts and Sciences have met these requirements with the GE CLAS Core [p. 22] if a course in mathematics, statistics, or computer science was selected for the Quantitative and Formal Reasoning requirement. For additional information about these standards, contact the Office of Student Services.

Admission

Applicants must meet the admission requirements of the Graduate College. They should have a bachelor's degree

in education, history, or one of the social sciences from an accredited institution.

World Language Education

The Master of Arts in Teaching in teaching and learning with a world language education subprogram requires a minimum of 57 s.h. of graduate credit with a program grade-point average (GPA) of at least 3.00 for graduation. Admission to the MAT requires admission to the Teacher Education Program (TEP), and students must maintain TEP academic and professional standards.

The program is designed for superior liberal arts and sciences graduates who have had few or no professional education courses. Successful completion of the program leads to elementary and/or secondary teacher licensure. The MAT is available in Chinese, French, German, Italian, Japanese, Latin, Russian, and Spanish languages.

Students must satisfy the world language education content course requirements of the program by completing 30 s.h. of post-secondary coursework in the language they are preparing to teach. This coursework can be taken prior to entry into this program as part of an undergraduate degree program. Students may need to complete additional courses or other requirements to meet state standards for teacher preparation, licensure, or endorsements.

The MAT in teaching and learning with a world language education subprogram requires the following work. Students must also complete at least 9 s.h. in graduate coursework either in the language department corresponding to their language of licensure or in world language teaching.

Professional Education

Course #	Title	Hours
All of these:		
EDTL:3002	Teaching and Learning Technologies (must be taken during student's first semester in the college)	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)	1,3
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3

World Language Teaching

Students complete these courses (at least 28 s.h.).

Course #	Title	Hours
All of these:		
EDTL:4406	World Language Practicum I	3
EDTL:4407	World Language Practicum II	3
EDTL:4416	Learning to Teach Second Languages I	3
EDTL:4417	Learning to Teach Second Languages II	3
EDTL:6483	Multilingual Education and Applied Linguistics	3
The following courses are taken concurrently and constitute the student teaching semester:		
EDTL:4087	Seminar: Curriculum and Student Teaching	1, 3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6

K–12 Licensure

The K–12 licensure option requires the following course.

Course #	Title	Hours
EDTL:4089	Special Subject Area Student Teaching	arr.

Endorsements

The world language education TEP is approved by the state of Iowa as preparation for teaching licensure with endorsement to teach a world language (Chinese, French, German, Italian, Japanese, Latin, Russian, or Spanish) in grades 5–12. The world language education TEP requires 30 s.h. in world language education content courses (courses in the language the student is preparing to teach), which generally are provided by the College of Liberal Arts and Sciences major in the language, or the equivalent. Endorsement in the language for kindergarten through grade 8 may be available for students with elementary-level student teaching. Added endorsement programs for additional teaching areas other than world languages are available, including English as a Second Language.

Final Examination

A final examination is required. The examination reflects a candidate's depth and breadth of knowledge in world language education, including but not limited to theory and practice as well as knowledge of and proficiency in the target language and/or literature of the candidate's choice. The candidate and the advisor discuss the exam's content and format eight months before the exam.

Teacher Education Program Academic and Professional Standards

State of Iowa teacher preparation standards require that teacher candidates demonstrate the content, pedagogical, and professional knowledge, skills, and dispositions necessary to help all students learn. Because of this, the College of Education and the Teacher Education Program have established academic and professional standards that students must maintain. For graduate-level teacher candidates and MAT candidates in world language education, these standards include:

- a UI minimum cumulative GPA of 2.75 on graded graduate courses (consistent with the academic standing policy of the Graduate College);

- a minimum TEP major GPA of 2.00 (2.70 for good standing);
- a minimum UI term GPA of 1.50 during fall or spring enrollment;

- a grade of C-minus or higher in TEP major courses; and
- no notices of concern in professional dispositional qualities.

Liberal Arts Core

State of Iowa teacher preparation standards require a core of liberal arts knowledge including but not limited to English composition, mathematics, natural sciences, social sciences, and humanities. Students who have not completed these requirements with their previous coursework will need additional coursework. Bachelor's degree graduates of the College of Education or the College of Liberal Arts and Sciences have met these requirements with the GE CLAS Core [p. 22] if a course in mathematics, statistics, or computer science was selected for the Quantitative and Formal Reasoning requirement. For additional information about these standards, contact the Office of Student Services.

Admission

Applicants must meet the admission requirements of the Graduate College. They must have been granted a bachelor's degree with a major or a strong concentration in a second language and must have an undergraduate GPA of at least 3.00. They must also meet all Teacher Education Program (TEP) application requirements.

Academic Plans

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Teaching and Learning, MAT

a Students wishing to be considered for a teaching assistant position must fulfill certain requirements and should work directly with their faculty advisor and the program administrator to determine those.

b Successful completion of the program enables students to receive a credential to teach art in grades K-12; see General Catalog and College of Education website for specifics about K-12 licensure requirements. Students may need to complete additional courses or other requirements to meet state standards for teacher preparation, licensure, or endorsements. Students should work directly with their faculty advisor and the program administrator regarding fulfilling any of these requirements.

c Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

d Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

e Must be taken during the first year fall semester.

f May complete course in related area; work with faculty advisor to determine appropriate coursework.
g Completion of capstone project prior to beginning student teaching.

e World Language Teaching course. Work with academic advisor to determine appropriate graduate coursework; see the General Catalog and the College of Education website for specifics.
f Students must complete at least 9 s.h. in graduate coursework either in the language department corresponding to their language of licensure or in world language teaching; work with academic advisor to determine appropriate graduate elective courses and sequence.
g Consists of a summative master's final exam and completion of degree requirements.

Teaching and Learning, MS

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Learning Outcomes

Students will:

- demonstrate understanding of and ability to analyze theoretical concepts and research in their field of study;
- express ideas effectively in written and spoken communication;
- connect research to practice and practical questions in their professional context;
- effectively apply their knowledge and skills to their professional context; and
- demonstrate curiosity, inquiry, and critical and data-based decision making.

Science Education

The Master of Science in teaching and learning with a science education subprogram requires a minimum of 38 s.h. of graduate credit. Students must maintain a Graduate College program grade-point average of at least 3.00.

The program is designed for teachers and supervisors (K–college) and professionals in related fields, such as medical education, college teaching, museum program management, and outreach programs. It is intended to provide experience in understanding teaching and learning and the research processes required to advance the field. Students complete coursework in four areas: science education, education, research, and science. Their individual programs of study are approved by the science education faculty.

The MS in teaching and learning with a science education subprogram requires the following coursework.

Required Courses

Course #	Title	Hours
All of these:		
EDTL:6757	Learning in the Science Classroom (no substitute for this course)	3
EDTL:6759	Advanced Pedagogy (no substitute for this course)	3
EDTL:7755	Independent Study in Science Education Research (taken two times for 3 s.h. each)	6
Two science content courses chosen in consultation with advisor. Courses numbered 3000 and above in biology (BIOL), chemistry (CHEM), computer science (CS), earth, environment, and sustainability sciences (SEES), health, sport, and human physiology (HHP), and physics and astronomy (PHYS) may count.		6
A minimum of 12 s.h. chosen from these:		
EDTL:6758	Writing in the Science Classroom	3
CSED:7338	Essentials of Qualitative Inquiry	3
PSQF:4143	Introduction to Statistical Methods	3
PSQF:6200	Educational Psychology	3
PSQF:6220	Quantitative Educational Research Methodologies	3
PSQF:6275	Constructivism and Design of Instruction	3
One additional qualitative or quantitative research methods course chosen in consultation with advisor:		
EDTL:6761	STEM Research and Leadership Seminar	3
EDTL:6765	STEM Independent Research	3
EDTL:7040	Advanced Topics in Teaching and Learning	arr.
EDTL:7070	Qualitative Research Methods in Teaching and Learning	3
EDTL:7071	Critical Discourse Analysis in Educational Research	3
EDTL:7072	Advanced Methods of Literacy Research: Qualitative Data Analysis and Reporting	3
EDTL:7093	Research Project	arr.
EDTL:7756	Research Apprenticeship in Science Education	3
EDTL:7953	Seminar: Single Subject Design Research	3
EPLS:7373	Qualitative Research Design and Methods	3
PSQF:4143	Introduction to Statistical Methods (if not used to satisfy the 12 s.h. requirement)	3
PSQF:6243	Intermediate Statistical Methods	3
One of these:		
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

Thesis

Students must complete a thesis, for which they earn 2–4 s.h. of credit.

Course #	Title	Hours
EDTL:6393	Master's Thesis	2-4

Final Examination

A final oral examination is administered on campus in which candidates defend their thesis. This examination includes a critical inquiry into the purposes, methods, and results of the thesis research investigation.

The final examination is conducted by a committee of no fewer than three members of the graduate faculty. In some cases, the committee must include a member from outside science education; consult the department.

Admission

Applicants must meet the admission requirements of the Graduate College. They should hold an undergraduate major in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis. The department recommends that applicants have teaching licensure/certification unless they are preparing for careers in allied health, museums, or community colleges.

Teaching and Learning, PhD

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Learning Outcomes

Students will:

- demonstrate understanding and application of research methods and methodological knowledge;
- demonstrate understanding of and ability to analyze theoretical concepts and research in their field of study;
- express ideas effectively in written and spoken communication;
- connect research to practice and practical questions in education; and
- plan, conduct, report on, and disseminate original research.

PhD Required Research Courses

Students admitted to doctoral programs must complete the program's research requirements.

Required Core Courses

All PhD students in the Department of Teaching and Learning must complete one or both of the following core courses, depending upon program requirements.

Course #	Title	Hours
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

Cognate Areas

The following list of cognates offered by program areas in the department is not exhaustive; students may select cognates from this list or they may customize their own cognate areas in consultation with their advisors.

Multilingual Education

Course #	Title	Hours
This course:		
EDTL:6483	Multilingual Education and Applied Linguistics	3
Two of these, chosen in consultation with faculty:		
EDTL:6400	Fundamentals of Second Language Assessment	3
EDTL:6403	Language Policy and Planning	3
EDTL:6409	Cultural Curriculum	3
EDTL:6480	Graduate Seminar in Multilingual Education	3
EDTL:6484	Bi/Multilingual Literacies	3
EDTL:6497	Principles of Course Design for Second Language Instruction	3

Gifted Education

Administrative Strand

Course #	Title	Hours
Two of these, chosen in consultation with faculty:		
EPLS:4110	Administration and Policy in Gifted Education	2
EPLS:4111	Evaluation of Gifted Programs	1
EPLS:4113	Staff Development for Gifted Programs	1

Programming Strand

Course #	Title	Hours
Both of these:		
EDTL:4066	Curriculum and Programming for Advanced Learners	3
EDTL:4199	Program Models in Gifted Education	3

Psychology Strand

Course #	Title	Hours
Two of these, chosen in consultation with faculty:		
CSED:4120	Psychology of Giftedness	3
CSED:4121	Identification of Students for Advanced Programming	3
CSED:4137	Introduction to Educating Advanced Learners	3
CSED:5226	Assessment of Students for Advanced Programming	3
CSED:5237	Seminar in Gifted Education	3

Language, Literacy, and Social Studies Education

Course #	Title	Hours
Both of these:		
EDTL:7008	Seminar: Research and Current Issues (topic chosen in consultation with advisor)	arr.
EDTL:7015	PhD Seminar in Language, Literacy, and Culture (topic chosen in consultation with advisor)	arr.

Mathematics Education

Course #	Title	Hours
Both of these:		
EDTL:6536	Teaching of Geometry	2-3
EDTL:7535	Seminar: Research in Mathematics Education	arr.

Science Education

Course #	Title	Hours
Both of these:		
EDTL:6757	Learning in the Science Classroom	2-3
EDTL:6759	Advanced Pedagogy	3

Special Education

Course #	Title	Hours
All of these:		
EDTL:7945	Current Issues and Trends in Learning Disabilities	3
EDTL:7948	Contemporary Research in Behavioral Disorders	3
EDTL:7953	Seminar: Single Subject Design Research	3

Language, Literacy, and Social Studies Education

The Doctor of Philosophy in teaching and learning with a language, literacy, and social studies education subprogram requires a minimum of 73 s.h. of graduate credit. All students must maintain a Graduate College program grade-point average (GPA) of at least 3.00. Students may be able to use some coursework completed for their master's degree toward the PhD; most courses for the PhD should be numbered 5000 or above.

This interdisciplinary program brings together scholarly traditions and contemporary theory in multilingual education and applied linguistics, literacy and cultural studies, and social studies education. The program provides students with the necessary content area knowledge and research skills for independent research, program administration, and varied leadership positions in language, literacy, and social studies education. In consultation with their advisor, students create a program of study that fits their interests and professional aspirations.

The PhD in teaching and learning with a language, literacy, and social studies education subprogram requires the following coursework.

Required Courses

Course #	Title	Hours
This course:		
EDTL:6015	PhD Seminar: Literacy, Culture, and Language Education	3
One of these:		
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

Disciplinary and Interdisciplinary Foundations

Students choose a disciplinary area in literacy education, multilingual education, or social studies education for their three foundational courses. They then select one or both of the other areas for their interdisciplinary foundation coursework.

Course #	Title	Hours
All of these:		
At least three courses in a chosen area of concentration		9
At least two courses in other areas of concentration		6

Research Methods

Course #	Title	Hours
Both of these:		
EDTL:7070	Qualitative Research Methods in Teaching and Learning	3
EDTL:7405	Research Methods in Literacy, Culture, and Language Education	3
One of these:		
PSQF:6241	Quantitative Policy Analysis for Practitioners	3
PSQF:6243	Intermediate Statistical Methods (for students who utilize quantitative methods in their dissertation)	3
And:		
Two additional advanced research methods courses in quantitative, qualitative, or mixed methods in consultation with their advisor		6

Electives

Students choose 27 s.h. of elective coursework in consultation with their advisor. Courses may be taken in any department and can be partially or completely unified as a cognate area of study.

Comprehensive Examination

Upon completion of their coursework, students take their comprehensive exam. This is an opportunity for students to show a comprehensive understanding of the scholarship in the field. Successful completion of the exam identifies candidates who are ready for dissertation work.

Dissertation

After students pass their comprehensive exam, they consult with their advisor to choose a dissertation committee with at least four faculty members who approve the dissertation proposal. After a successful defense of their dissertation, students conduct dissertation research in the following course.

Course #	Title	Hours
EDTL:7493	PhD Thesis	10

Admission

Applicants must meet the admission requirements of the Graduate College. They must have earned a bachelor's degree with an undergraduate GPA of at least 3.00 on a 4.00 scale and earned a master's degree or completed significant graduate coursework. It is recommended that applicants have at least two years of teaching experience in a related field within or outside of the United States.

Mathematics Education

The Doctor of Philosophy in teaching and learning with a mathematics education subprogram requires a minimum of 80–90 s.h. of graduate credit. Students must have a Graduate College program grade-point average of at least 3.00 or higher in all graduate work in mathematics, all University of Iowa graduate work in mathematics, all graduate work, and all University of Iowa graduate work.

The program prepares supervisors, teacher education personnel, community college personnel, and researchers in mathematics education. It is administered by the College of Education. Students must update graduate coursework completed more than 10 years before admission to the program.

The PhD program in teaching and learning with a mathematics education subprogram requires the following coursework.

Required Courses

Students must complete a minimum of 15 s.h. in qualitative and quantitative coursework, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed under PhD Research Requirements on the college's Graduate Student Resources website.

Core Course

Course #	Title	Hours
One of these:		
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

In addition, students must complete an approved cognate area; see the "Additional Requirements" section.

Students must complete a minimum of 24 s.h. of graduate work in the departments of Computer Science, Mathematics, and Statistics and Actuarial Science, as approved by their advisor. Electives are encouraged in the pure mathematics and applied mathematics sequences.

Students who completed their mathematics requirement at another institution must complete at least 6 s.h. of additional coursework in mathematics at the University of Iowa, chosen with advisor approval. They must also complete at least six courses in mathematics education.

Additional Requirements

Students concentrate in two additional comprehensive examination areas in either the mathematical sciences or education. A minimum of three courses usually are required for a comprehensive examination area, but candidates should consult with faculty members in the areas selected to determine which courses they should take in order to adequately prepare for the examinations.

Students must complete a total of at least 36 s.h. in College of Education courses; this includes the coursework listed above. They must complete an approved cognate area; a partial list of potential cognate areas is available from the mathematics education program.

Comprehensive Examination

Students take three written comprehensive examinations, one in mathematics education and two in other fields of education or mathematics; an oral examination follows the written examinations.

Dissertation

Candidates complete a dissertation on a research problem in mathematics education. A prospectus of the proposed research must be presented to the dissertation committee before candidates undertake the study. Upon completion of the dissertation, candidates defend the dissertation in an oral examination. Students must earn dissertation credit in the following course.

Course #	Title	Hours
EDTL:7493	PhD Thesis	10

Admission

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate major in mathematics or the equivalent, a current teaching license/certificate, and at least two years of teaching experience are strongly preferred. A faculty review committee makes admission decisions.

Science Education

The Doctor of Philosophy in teaching and learning with a science education subprogram requires a minimum of 85 s.h. of graduate credit. Students must maintain a Graduate College program grade-point average (GPA) of at least 3.00.

The program is designed for individuals who aspire to positions as college and university science educators; major supervisors in national, state, and local systems; teachers in small liberal arts colleges; instructors of general education science courses at major universities; research directors in science education; and professionals in medical and/or allied health education.

The PhD in teaching and learning with a science education subprogram requires the following coursework.

Required Courses

Students in science education complete a minimum of 15 s.h. in qualitative and quantitative coursework, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed under PhD Research Requirements on the college's Graduate Student Resources website. Course selections must be consistent with other requirements for the degree.

Core Courses

All doctoral students in science education complete one or both of the following core courses. Students may not substitute other courses for these.

Course #	Title	Hours
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

In addition, all doctoral students in the Department of Teaching and Learning complete an approved cognate area; see "Cognate Areas" under PhD Required Research Courses [p. 1505] in this section of the catalog.

Science Education

Course #	Title	Hours
All of these (15 s.h.):		
EDTL:6757	Learning in the Science Classroom	3
EDTL:6758	Writing in the Science Classroom	3
EDTL:6759	Advanced Pedagogy	3

Graduate-level science education courses chosen in consultation with advisor	6

Education

Course #	Title	Hours
Three courses chosen in consultation with advisor		9

Research in Science Education

Course #	Title	Hours
Both of these (21 s.h.):		
EDTL:7750	Seminar: Science Education (taken three times for 1 s.h. each)	3
EDTL:7755	Independent Study in Science Education Research (taken six times for 3 s.h. each)	18

Science Area

Students complete a family of courses (total of 12 s.h.) in a major science area.

Comprehensive Examination

Students take three written comprehensive examinations, one in science education and two in other fields of education or science; an oral examination follows the written examinations.

Dissertation

Course #	Title	Hours
This course:		
EDTL:7493	PhD Thesis	10

Admission

Applicants must meet the admission requirements of the Graduate College. They should have completed a bachelor's degree in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis; and have a cumulative GPA of at least 3.00 on undergraduate and graduate work.

Special Education

The Doctor of Philosophy in teaching and learning with a special education subprogram requires a minimum of 90 s.h. of graduate credit. Students must maintain a Graduate College program grade-point average (GPA) of at least 3.00.

The program prepares students for teaching and research positions in higher education, and for curriculum, supervisory, and research positions in state and local education agencies. The program permits students to study and practice extensively in their special education interest area and in an interest area outside of special education.

The PhD curriculum includes an emphasis on research skills, all facets of special education, an approved cognate area, and at least one specialization area.

Quantitative Research Requirements

Course #	Title	Hours
Both of these:		
PSQF:4143	Introduction to Statistical Methods	3
PSQF:6243	Intermediate Statistical Methods	3
Two of these:		
EPLS:6206	Research Process and Design	3
PSQF:6220	Quantitative Educational Research Methodologies	3
PSQF:6244	Correlation and Regression	4
PSQF:6246	Design of Experiments	3
PSQF:6247	Nonparametric Statistical Methods	3
PSQF:6249	Factor Analysis and Structural Equation Models	3
PSQF:6252	Introduction to Multivariate Statistical Methods	3

Qualitative Research Requirements

Course #	Title	Hours
This course:		
EDTL:7953	Seminar: Single Subject Design Research	3
One of these:		
EDTL:7410	Mixed Methods Research	3
CSED:7338	Essentials of Qualitative Inquiry	3
EPLS:7373	Qualitative Research Design and Methods	3
PSQF:7331	Qualitative Educational Research Methods	arr.

Core Course

Course #	Title	Hours
One of these:		
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

Proseminar Courses

Course #	Title	Hours
Both of these:		
EDTL:7943	Proseminar: Issues, Trends, and Research in Special Education	3
EDTL:7944	Proseminar: Issues, Trends, and Research in Special Education II	3

Seminar Requirements

Course #	Title	Hours
Both of these:		
EDTL:7945	Current Issues and Trends in Learning Disabilities	3
EDTL:7948	Contemporary Research in Behavioral Disorders	3

Practicum Requirement

Course #	Title	Hours
This course:		
EDTL:7380	Practicum in College Teaching (taken twice for 3 s.h. each)	6

Cognate

Students complete a cognate or specialty area for at least 9 s.h. in consultation with their advisor.

Competencies

Students work with their advisor to ensure they meet the core competencies of the degree by: completing the University of Iowa Institutional Review Board training; submitting a paper for publication; completing two conference presentations; and completing two service activities.

Comprehensive Examination

The comprehensive exam comprises the submission of a major area paper during the student's third year of enrollment in the program.

Dissertation

Students complete a doctoral dissertation for at least 10 s.h.

Course #	Title	Hours
This course:		
EDTL:7493	PhD Thesis	10

Admission

Applicants must meet the admission requirements of the Graduate College. They must have a master's degree or equivalent in special education; those without an MA thesis must have completed an equivalent project. Applicants should have a graduate GPA of at least 3.50. Applicants should have at least one year of full-time teaching experience with exceptional children; several years are preferred.

Final admission decisions are made by the special education graduate admissions committee.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

c In consultation with faculty advisor, complete 9 s.h. in a cognate or specialty area.

d Choose from EPLS:6206, PSQF:6220, PSQF:6244, PSQF:6246, PSQF:6247, PSQF:6249, PSQF:6252.

e When offered, enroll in EDTL:7943 and EDTL:7944; otherwise take PSQF:7201 and EALL:4130 or advisor approved coursework.

f Choose from CSED:7338, EDTL:7410, EPLS:7373, PSQF:7331.

g When offered, enroll in EDTL:7945 and EDTL:7948; otherwise work with faculty advisor to determine appropriate coursework.

h In consultation with faculty advisor, select appropriate graduate electives for remaining degree requirements.

i Major area paper.

j Typically completed by the end of third year.

k Take EDTL:7380 twice for 3 s.h. each, once for teaching course and once for supervising field placement students.

l Dissertation defense.

UI REACH

Director

- William "Bill" Loyd Jr.

Faculty: https://education.uiowa.edu/directory

Website: https://education.uiowa.edu/reach

UI REACH (Realizing Educational and Career Hopes) is a comprehensive transition certificate program for college students with intellectual, cognitive, and learning disabilities. UI REACH offers an integrated college experience in a caring and structured environment. UI REACH is a four-year program with early graduation options.

The UI REACH experience integrates academic skill building, career development, campus involvement, social development, and transition planning to create a dynamic and inclusive collegiate experience. A few of the program offerings include:

- an integrated, Big Ten University experience with on-campus residence hall living;
- person-centered goal planning to customize each student's college experience according to their interests and abilities;
- specialized and individualized support in the core areas of academics, career and transition, social growth, and student life;
- specialized core curriculum and electives delivered by College of Education instructors;
- inclusive academic learning opportunities including classes for credit or audit;
- employment preparation and career development;
- integrated community-based internships and employment opportunities with local businesses;
- access to over 600 student organizations and numerous inclusive campus activities;
- on-call emergency 24-hour support;
- scholarships and other financial aid options;
- a four-year certificate with second- and third-year certificate options;
- opportunities to earn career-specific enhanced credentials and certifications; and
- events around the country for current students, alumni, and families.

For more information, visit UI REACH on the College of Education website.

Courses

UI REACH Courses

REA:0010 Social Skills I 1-2 s.h.
Basic interpersonal skills needed to succeed in academic, social, and employment environments; structured learning process for gaining discrete social skills necessary to initiate and maintain conversations in a variety of settings; awareness of feelings and cues in conversation to respond appropriately and have successful reciprocal interactions; lectures, modeling, role play, and practice in the community.

REA:0020 Computers and Technology I 1-2 s.h.
Training in computer literacy and practical skills for computer use in everyday life; computer parts and functions, the Windows operating system, computer applications; use of the personal computer to improve personal, academic and workplace productivity; group discussion, demonstrations, and multimedia experience support diverse learning styles.

REA:0021 Computers and Technology II 1-2 s.h.
Builds on REA:0020; fundamental computer competencies and strategies to simplify everyday life and enhance workplace performance; opportunity to improve practical skills for the workplace, communication with others, and daily life; tools for improving personal organization and communication and for meeting academic, entertainment, and workplace needs; group discussion, demonstration, independent exploration, and a multimedia experience support diverse learning styles.

REA:0030 Health and Wellness I - Exploration 2 s.h.
Importance of health and wellness, personal relationships, sexuality and making healthy choices; overview of health and wellness topics college students face—nutrition, substance use, risky behaviors, personal relationships, sexual health, mental health.

REA:0031 Health and Wellness II - Healthy Lifestyles 2 s.h.
Health and wellness personalized for students; help in assessing individual health and wellness decisions and behaviors to improve current and long-term health and wellness; small group discussion, individual assessments, real-life exploration, interactions with health educators, one-on-one student support; second in a series.

REA:0040 Personal Finance 1-2 s.h.
Skills and strategies needed for managing personal finances and making informed spending decisions; initial focus on strategies for use while on a college campus and a larger goal of lifelong application; topics include budgeting, forms of payment, ATM use and etiquette, protecting yourself from financial fraud, differentiating needs and wants, comparison shopping, understanding discounts, tipping, and other personal finance topics needed for managing financial decisions while living independently.

REA:0041 Personal Finance and Math II 1-2 s.h.
Skills and knowledge needed for managing personal finances; banking, budgeting, insurance, how to be a good consumer; students plan for their financial future by studying paycheck information, actual income, and tax responsibility; research on independent living costs; second in a series.

REA:0045 Lifetime Literacy 1-3 s.h.
Students build writing and reading comprehension skills through text analysis and critical thinking; reading current events articles to construct argumentative and informational writing pieces; use of claim, evidence, and reasoning process to develop organized writing abilities.

REA:0050 Reading Strategies 2 s.h.
Building comprehension strategies and lifelong reading skills; using a novel to develop essential comprehension skills (e.g., summarizing, main ideas, prediction, inference, theme, sequencing); reading for enjoyment while sharpening skills that can be applied in broad reading applications.

REA:0062 Social Skills II 2 s.h.
Continuation of REA:0010; more advanced relationship skills that require self-regulation; self-awareness; applying skills for communicating under stress; structured learning process including repetitive practice and modeling as key components.

REA:0065 Independent Living Lab 0-1 s.h.
Development of independent living skills through a blended model of instruction and applied living in real-life settings; managing a living space independently; living in a shared room and community space; skill-building to manage cleaning, organization, and laundry independently.

REA:0070 College Foundations 2 s.h.
Components of successful independent campus and community living; healthy relationships and personal safety issues; effective communication skills for interacting with peers and college personnel; accessing campus and community resources; practical strategies for campus and community success, including basic budgeting, technology, academic success strategies, and technology.

REA:0072 College Transition II: Preparing for Independent Living 2 s.h.
Individual goal setting and planning for independent living after college; how to be interdependent and independent in the community, socially, in careers, and in educational settings; promoting self-awareness, self-advocacy, self-determination, and community engagement.

REA:0073 Transition III: Applied Independent Living 2 s.h.
Preparation for independent living through development of SMART goals, person-centered planning, community resource mapping, and identifying a circle of support. Planning and leading a transition meeting to outline transition for life after college.

REA:0074 Household Management II 2-4 s.h.
Continuation of REA:0075; preparation for independent apartment living; experiential training, assessment to determine support needs; apartment living, personal care, value shopping and budgeting, preparing meals, successful community living.

REA:0075 Household Management I 1-4 s.h.
Independent living skills introduced in the life skills and health and wellness courses; hands-on experience in room care, clothing care, food/kitchen safety, meal planning and nutrition, food preparation, simple recipes, grocery shopping, event planning.

REA:0100 Career Exploration 3 s.h.
Opportunity to explore, enhance, or broaden work interests, skills, and potential career opportunities; interest inventories, review of vocational experiences, interactive employer presentations, informational interviews, job site experiences; focus on self-assessment of one's individual vocational strengths.

REA:0101 Job Search Strategies 2 s.h.
Fundamental skills for finding employment; creating a résumé, techniques for interviewing and networking, essentials for disclosure and workplace accommodations.

REA:0103 Job Search Strategies II 1 s.h.
Continuation of REA:0101; students update résumés and references; further development of interview skills with emphasis on self-advocacy and advancement in the workplace.

REA:0110 Entrepreneurism 1 s.h.
Characteristics, advantages, and disadvantages of self-employment; basic aspects of forming a business; marketing; acquiring start-up funding and other resources; financial obligations and monitoring of funds required for a successful business; writing a business plan.

REA:0200 Business Support Seminar 1 s.h.
Aspects of careers in business support; office procedures, word processing skills, oral and written communication, records management, business terminology.

REA:0202 Education Career Seminar 1 s.h.
Aspects of careers in education; additional training typically required for careers in education, child/student needs, lesson planning.

REA:0203 Health Services Seminar 1 s.h.
Aspects of careers in health services; office procedures and equipment, customer service skills, terminology used in health care environments.

REA:0204 Health and Human Services Seminar 1 s.h.
Aspects of careers in hospitality and human services sectors; customer service skills, communication etiquette, and interpersonal relationships; industry outlook, terminology, and field experiences.

REA:0205 Human Services Seminar 1 s.h.
Aspects of careers in human services; types of human services environments, interpersonal relationships and boundaries, paperwork requirements, terminology commonly used in human services environments.

REA:0207 Marketing/Sales Seminar 1 s.h.
Aspects of careers in marketing and sales; customer service skills, use of retail equipment, marketing techniques and the importance of product appearance, pricing and advertising, vocabulary used in a retail sales environment.

REA:0208 Parks and Natural Resources Seminar 1 s.h.
Aspects of careers in parks and natural resources management; operation and maintenance of equipment, safety procedures, customer service skills, typical vocabulary for positions involving care and management of shrubs, trees, flowers, and turf.

REA:0209 Skilled Trades Seminar 1 s.h.
Aspects of careers in the skilled trades; occupational skill standards in specific skilled trades, apprenticeships or advanced training required, safety in the workplace, vocabulary typical for specific skilled-trade work environments.

REA:0210 Information/Technology Seminar 1 s.h.
Aspects of careers in information technology; occupational skill requirements and standards, knowledge of typical equipment employees must operate, safety in the workplace, typical vocabulary for information technology work environments.

REA:0211 Hospitality and Food Service Seminar 1 s.h.
Different types of careers in the food industry; workplace skills and tasks; continuing training and education options; equipment and food safety; basic preparation steps, food presentation, place settings; field trips. Requirements: enrollment in UI REACH program.

REA:0213 Recreation Seminar 1 s.h.
Aspects of careers in recreation, training and education requirements, tasks at work, and job prospects.

REA:0215 Advanced Customer Service 1 s.h.
Builds on previously learned customer service concepts with application to a wide range of careers; communication techniques through various modes, technology used in customer service, guest speakers, skill development, managing difficult customer situations, and other essential customer service skills.

REA:0220 Digital Citizenship 1 s.h.
Making informed choices regarding media and technology in a digital age; exploration of media balance and well-being, online communication and relationships, privacy and security, and the impact of a digital footprint; responsible decision-making and communication methods in an online world. Prerequisites: REA:0020.

REA:0250 Academics and Life Skills Exploration I 1-3 s.h.
Expand basic academic and/or life skills with discovery, experiential learning, progress monitoring, and self-reflection; focus on strengthening foundational skills in practical academics and life skills; first of a two-part series.

REA:0251 Academics and Life Skills Exploration II 0-2 s.h.
Builds on basic academic and/or life skills explored in REA:0250; UI REACH instructors and university faculty work together to enhance learning opportunities while providing explicit, interactive learning opportunities; progress monitoring, reflection, and focus on maintenance of basic academic and life skills; second of a two-part series.

REA:0300 Internship Prep arr.
Introduction to workplace readiness skills, job expectations, and workplace environments; participation in job shadowing, creating professional résumés, and use of career assessments and person-centered goals to identify a career path or area of interest.

REA:0301 Internship Experience arr.
Internship experience leading to increased independence in the workplace (e.g., more independent operation of equipment, socialization, workplace safety, problem solving, conflict management); opportunity to acquire additional workplace skills in the student's career emphasis area; employers and mentors guide students in fulfilling their job responsibilities; students maintain a journal and discuss their experience with their advisor or instructor; second of three consecutive internships.

REA:0302 Internship III arr.
Internship experience with opportunities to develop more advanced skills for independent communication, problem solving, and workplace performance in the student's career emphasis area; employers and mentors observe the student in the workplace; students maintain a journal and discuss their experience with their advisor or instructor; third of three consecutive internships.

REA:0303 Internship Group arr.
Individualized community work experiences with periodic classroom seminars; building independent work skills, such as researching bus routes and emailing weekly journals; students, instructors, and employers evaluate student's work performance.

REA:0304 Internship V arr.
Continuation of REA:0303; community work experiences with periodic classroom seminars; emphasis on work skills in student's career area of choice; soft skills needed to be an independent worker.

REA:0305 Career Capstone arr.
Application of knowledge and skills developed during college experience in a hands-on, experiential format. Integration of external learning experiences and activities including interviews, job fairs, networking, career advancement opportunities, and related seminars. Individual or small group experiences include seminars, independent study, and/or service projects. Requirements: UI REACH fourth-year enrollment.

REA:0306 Work Ready Seminar: Applied Job Skills arr.
Supported and structured seminar experience to build students' job search, interview, and workplace skills through an independent work experience on campus; students will apply for paid jobs and work a minimum of 15 hours within the 8-week course; students will specifically receive support with updating or creating resumes/references, completing applications, communications with employers, human resources meetings, and completing trainings or compliance.

REA:0310 WorkKeys Lab 1-2 s.h.
Students build essential career-related skills using curriculum that is aligned with ACT WorkKeys National Career Readiness Certificate (NCRC) assessments; topics include reading for information and applied math skills. WorkKeys is a registered trademark of ACT, Inc.

REA:0501 Special Topics arr.
Topics include leisure resources, current events, science, family life, consumerism, community involvement, self-determination, self-advocacy, leadership, assistive technology, mentoring; course assignments, instruction, and student assessment in classroom and/or community settings; may be required or elective course.

College of Engineering

Dean

- Ann F. McKenna

Associate Dean, Academic Programs

- Nicole M. Grosland

Associate Dean for Research and Faculty

- H.S. Udaykumar

Associate Dean for Graduate Education

- Suresh Raghavan

Undergraduate degree: BSE

Undergraduate certificates: applied climate science and energy technologies; artificial intelligence, modeling and simulation in engineering; naval science and technology; technological entrepreneurship

Graduate degrees: MS; PhD

Graduate certificates: artificial intelligence, modeling and simulation in engineering; sustainable water development

Website: https://engineering.uiowa.edu/

The College of Engineering has six academic departments: the Roy J. Carver Department of Biomedical Engineering [p. 1535] and the departments of Chemical and Biochemical Engineering [p. 1554], Civil and Environmental Engineering [p. 1576], Electrical and Computer Engineering [p. 1613], Industrial and Systems Engineering [p. 1635], and Mechanical Engineering [p. 1655].

Moreover, research and educational activities of the college are supported by four research centers and institutes: the Center for Bioinformatics and Computational Biology, the Iowa Institute for Biomedical Imaging, IIHR—Hydroscience and Engineering, and the Iowa Technology Institute.

Programs

Undergraduate Programs of Study

The College of Engineering offers the Bachelor of Science in Engineering [p. 1527] (BSE) with majors in biomedical [p. 1535], chemical [p. 1554], civil [p. 1576], computer science and engineering [p. 1613], electrical [p. 1613], environmental [p. 1576], industrial [p. 1635], and mechanical [p. 1655] engineering.

For information about each BSE major, see each area in the catalog.

The college also offers combined undergraduate degree programs with the College of Liberal Arts and Sciences and the Tippie College of Business; a dual degree with the University of Northern Iowa; a combined BSE/master's degree program in each engineering discipline; and combined BSE/master's degrees with the Department of Computer Science, the Department of Occupational and Environmental Health, and the School of Planning and Public Affairs. For additional information, see "Combined and Dual Degrees" in the Bachelor of Science in Engineering, BSE [p. 1529] section of the catalog.

In addition, the College of Engineering offers a Certificate in Applied Climate Science and Energy Technologies [p. 1521], the undergraduate Certificate in Artificial Intelligence, Modeling and Simulation in Engineering [p. 1524], a Certificate in Naval Science and Technology [p. 1676], and partners with the Tippie College of Business to offer a Certificate in Technological Entrepreneurship [p. 1681] for undergraduate engineering students.

Graduate Programs of Study

The College of Engineering offers graduate degree programs, the Master of Science (MS) and Doctor of Philosophy (PhD), in biomedical engineering [p. 1535], chemical and biochemical engineering [p. 1554], civil and environmental engineering [p. 1576], electrical and computer engineering [p. 1613], industrial engineering [p. 1635], and mechanical engineering [p. 1655]. See the College of Engineering Graduate Studies website for an overview, and the department sections in the catalog for information about specific areas of research and study, admission and degree requirements, and financial support for the graduate programs. The College of Engineering also offers the graduate Certificate in Artificial Intelligence, Modeling and Simulation in Engineering [p. 1526], Certificate in Transportation Planning [p. 1814], and a graduate Certificate in Sustainable Water Development [p. 1678].

Facilities and Resources

College of Engineering Facilities

Seamans Center for the Engineering Arts and Sciences

The Seamans Center for the Engineering Arts and Sciences is home to the College of Engineering. In addition to classrooms, conference rooms, instructional laboratories, and faculty offices, the Seamans Center houses the Lichtenberger Engineering Library, the Hanson Center for Technical Communication, a machine shop, an electronic shop, student workspaces, computational facilities, and research laboratories. A number of classrooms and open spaces located throughout the building were designed to readily accommodate collaborative work.

Engineering Student Services

The professional staff of Engineering Student Services administers student services for the College of Engineering, including advising, tutoring, student records, and global engineering. It is also the administrative home of Engineering Career Services and the Hanson Center for Technical Communication.

Engineering Career Services

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation,

job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

Leadership, Ethics, and Professional Pathways (LEaPP)

The LEaPP Academy aims to provide students with the knowledge, skills, and perspectives that enhance their long-term success, make them valuable leaders to the companies that employ them, and develop them as ethically and globally aware citizens of the world. LEaPP Scholars complete a number of cocurricular activities to earn leadership, ethical thinking, and professional development credentials. Individuals who complete the LEaPP Academy receive collegiate accolades and are honored with graduation cords specific to the LEaPP Program. The LEaPP Academy is designed to be accessible no matter the semester or timeline in which a student joins; each piece is individualized and self-led to offer the best experience to each student based on their needs.

Hanson Center for Communication

The Hanson Center for Communication is an endowed program that works closely with engineering faculty to train students in verbal and written communication throughout the curriculum. The center helps create, manage, and grade writing and presentation assignments and provides training to students, tutors, and faculty on best practices for communication. In addition, the Hanson Center for Communication is home to an innovative peer training center that conducts hundreds of one-on-one and team tutoring sessions each year. The center helps review lab reports, topical papers, technical essays, and technical presentations each semester. Peer tutors are undergraduate students who have shown exceptional promise as communicators and provide individualized feedback throughout the writing and presentation process. In addressing global concerns (organization, clarity, and context), peer tutors help their fellow students transform rough drafts into persuasive, logical documents and presentations.

Global Engineering

Many of today’s top employers are seeking engineering graduates with global experiences and competencies who can effectively interact with colleagues and customers around the world. Successful engineers are able to communicate across cultures, work on diverse teams, and productively deal with issues and conflicts arising from differences.

University of Iowa engineering students have a variety of opportunities to study, pursue internships, or conduct research abroad. Students can enroll in credit-bearing courses in English to fulfill engineering or general education requirements or earn credits toward a minor in another discipline or world language. In addition to completing coursework abroad, engineering students can pursue experiential opportunities abroad, including global internships, conducting independent research in other countries, and volunteering. For more information, see Study Abroad on the College of Engineering website. The College of Engineering and International Programs supports these endeavors by offering students a variety of scholarships and funding.

Engineering Computer Services

Engineering Computer Services (ECS) provides spaces and technology administration for curricular, administrative, and research computing at the College of Engineering. The college has three drop-in computer labs with 225 high-end Linux and Windows computer workstations with graphics processing unit (GPU) support, a 24-seat computer classroom, a 45-seat machine learning and virtual reality-capable computer classroom, and a 400-seat virtual computer lab with GPU support that students can access from the internet. Numerous public domain and commercial engineering applications support the full range of engineering classes. Software is regularly upgraded, and hardware is refreshed at least every four years. The college's computer labs are open 24 hours a day, every day of the year.

Engineering Machine Shop

The Engineering Machine Shop (EMS) is a full-service, light manufacturing facility that supports the curricular, research, and operational needs of the College of Engineering and the university. EMS provides professional design and fabrication services and gives students, staff, and faculty controlled access to a student shop that contains a variety of manufacturing equipment. The shop has a high-resolution 3D scanner, commercial 3D printers, a waterjet, a full wood shop, welding, and multi-axis CNC machines.

Lichtenberger Engineering Library

The Lichtenberger Engineering Library is a branch of the University of Iowa Main Library and is a center of engineering college activity. Its collection includes books (including required course textbooks), tools, equipment, and electronic resources to assist at any stage of research on projects both big and small. Staff are trained to help locate information and provide training on a wide variety of skills, including patent searching, data management, tool usage, and more.

The Engineering Library, located next to the Student Commons in the Seamans Center, provides access to computer workstations, quiet study in the lower level, and group study space where students may reserve a private room for their work. The Engineering Library also houses the Creative Space, a space for students to imagine, tinker, design, and create with virtual reality, 3D scanners, and more.

NEXUS

The NEXUS Program is an art and engineering program. NEXUS promotes collaboration efforts between the College of Engineering and the art community by getting people and ideas together. The goal is to involve students in science, technology, engineering, arts, and mathematics (STEAM) projects throughout the university and the surrounding community. The program helps participants to think outside the box.

College of Engineering Research Centers

Center for Bioinformatics and Computational Biology

The Center for Bioinformatics and Computational Biology (CBCB) is a multidisciplinary research center dedicated to applying high performance networking and computing to basic life science and applied biomedical research. With faculty and students representing more than 20 traditional disciplines, the CBCB has contributed to the understanding of inherited human diseases, including blinding eye disease, cancer, deafness, diabetes, autism, schizophrenia, hypertension, obesity, and heart disease. For almost 20 years, the CBCB

has been at the cutting edge of high-throughput molecular discovery and interpretation in transcriptomics, genomics, and proteomics. At the confluence of these efforts lies the current wavefront of personalized genomic medicine, in which the CBCB plays a central role in partnership with labs, centers, and institutes across the university's Carver College of Medicine and basic science programs across campus. The CBCB has also been a center for industry start-ups and partnerships with numerous commercial enterprises. The center is jointly sponsored by the College of Engineering and the Carver College of Medicine.

Iowa Institute for Biomedical Imaging

The Iowa Institute for Biomedical Imaging conducts research in the following areas: medical imaging (CT, MR, OCT, PET, SPECT, ultrasound, multimodality imaging), medical image analysis and computer-aided diagnosis; cardiovascular image analysis (angiography-intravascular ultrasound data fusion, MR image analysis of congenital heart disease, coronary CT image analysis, early detection of cardiovascular disease); pulmonary image analysis (CT and MR image analysis of the lung); cell image analysis (cell tracking, shape analysis); virtual surgery planning (augmented reality for surgical planning); cancer-related assessment of tumor progression/regression; staging; general machine learning; and disease/treatment outcome prediction. The institute is sponsored by the College of Engineering and the Carver College of Medicine.

IIHR—Hydroscience and Engineering

IIHR—Hydroscience and Engineering is a world-renowned center with more than 100 years of education, research, and public service focusing on hydraulic engineering and fluid mechanics. Based in the C. Maxwell Stanley Hydraulics Laboratory, a five-story red brick building on the banks of the Iowa River, IIHR is a unit of the College of Engineering. IIHR students, faculty members, research engineers and scientists, and staff work together to understand and manage one of the world's greatest resources—water. Students from around the world benefit from IIHR's comprehensive multidisciplinary approach, which includes basic fluid mechanics, laboratory experimentation, and computational approaches.

IIHR research activities include fluid dynamics (turbulent flows, vortex dynamics, ship hydrodynamics, biological fluid flow, atmospheric boundary layer, experimental and computational fluid dynamics); environmental hydraulics (river mechanics, hydraulic structures, fish passage, sediment management, heat disposal in water bodies and power productions, bioremediation of groundwater, computational hydraulics, water-quality monitoring); water and air resources (air pollution, hydroclimatology, hydrogeology, hydrology, hydrometeorology, remote sensing, water resources and basin-scale processes); environmental engineering and science (PCBs in the air and water, innovative ways of removing contaminants from the soil and water, ultra-fine particles of pollutants in the atmosphere, bioremediation strategies for persistent groundwater contaminants); and water sustainability (development of sound strategies and technological solutions to meet the challenges facing society's growing need for water resources). In 2009, the Iowa Flood Center was founded at IIHR as the only academic center devoted solely to flood-related research and education.

The University of Iowa's Water Sustainability Initiative (WSI) brought new interdisciplinary expertise to the institute in 2013 when WSI faculty members (based in the colleges of Liberal Arts and Sciences, Engineering, and Public Health) became affiliated with IIHR. The Iowa Geological Survey joined IIHR in 2014, bringing new expertise in Iowa's subsurface resources, groundwater modeling, innovative geophysical skills, and more.

Students gain hands-on experience through close cooperation with faculty and staff on research projects funded by industry, government, and other organizations.

Iowa Technology Institute

The Iowa Technology Institute (ITI) conducts basic and applied research. The mission is to cultivate collaboration across disciplines, invent advanced technologies, and conduct trailblazing research in design, simulation, and experimentation that enables a safer and more productive future. ITI provides a unique environment for research and development for faculty, graduate and undergraduate students, research fellows, and professional scientists. ITI spans more than 20 laboratories and centers, led by the Operator Performance Laboratory, the Virtual Soldier Research program, and the Atmospheric and Environmental Research Lab.

Research at ITI focuses on advanced manufacturing and materials, human modeling and simulation, aerospace technology, biotechnology, environment and energy, and systems and sensors. Scientists conduct experiments in flight testing, human performance, robotics, biomedical and biochemical research, machine learning, smart sensors, remote sensing, renewable energy, and modeling of environmental change.

ITI has a satellite office in Orlando, Florida, and has major contracts with the U.S. military and industry partners.

High School Program

FIRST Tech Challenge

For Inspiration and Recognition of Science and Technology (FIRST) gives students the opportunity for real-world application of science, technology, engineering, and math (STEM) concepts. Students participate in an atmosphere that encourages team building, entrepreneurship, and sportsmanship. FIRST Tech Challenge (FTC) allows teams of students to be responsible for designing, building, and programming robots to compete in an alliance format against other teams. Teams are required to develop strategies and build robots based on sound engineering principles. Students learn about working in a team environment, effective communication skills, the ability to fail and succeed at the same time, and competing fairly while being supportive of their competition.

Courses

The engineering course requirements for engineering majors are outlined in their respective catalog sections. Each undergraduate program builds upon a core program; see the Bachelor of Science in Engineering [p. 1527] in the catalog. Not all engineering core courses listed are required for each engineering major. Core program courses are intended for College of Engineering students. Undergraduate students in other disciplines who wish to register for core engineering courses should complete a special permission form.

- Engineering Courses [p. 1517]
- Engineering and Information Technology Courses [p. 1518]

Engineering Courses

ENGR:0000 Engineering Internships and Co-ops 0 s.h.
For engineering students completing a semester-long internship experience while working 35-40 hours a week at a professional company.

ENGR:0001 Engineering Co-op 0 s.h.
Multiple-semester cooperative education experience for students working 35-40 hours a week at a professional company.

ENGR:0004 Engineering Academic Internship arr.
Academic credit for engineering majors participating in the Cooperative Education and Internship Program. Requirements: for international students—F-1 or J-1 visa, engineering undergraduate standing, full-time internship offer letter in hand (at least 40 hours/week and one semester in length), internship approved by International Student and Scholar Services for F-1 Curricular Practical Training (CPT) or J-1 Academic Training (AT), concurrent registration in approved 3 s.h. distance education or evening course, and preapproval of internship by Engineering Career Services; non-international students may be eligible on case-by-case basis.

ENGR:1000 Engineering Success for First-Year Students 1 s.h.
Introduction to engineering student life; electronic resources; keys to and skills for success; coping with adversity; selecting a major; advising; curriculum choices and career objectives; ethics; communication; internships and co-ops; job search skills.

ENGR:1029 First-Year Seminar arr.
Introduction to engineering fields of study; work closely with a faculty member or senior administrator; participation that eases the transition to college-level learning; cutting-edge research taking place in the College of Engineering.

ENGR:1100 Introduction to Engineering Problem Solving 3 s.h.
Development and demonstration of specific problem solving skills; directed project or case study involving actual engineering problems and their solutions.

ENGR:1300 Introduction to Engineering Computing 3 s.h.
Engineering problem solving using computers; introduction to digital computations, problem formulation using a procedural high-level language; structured, top-down program design methodology; debugging and testing; introduction to use of software libraries; examples from numerical analysis and contemporary applications in engineering. Corequisites: MATH:1550.

ENGR:2110 Statics 2-3 s.h.
Vector algebra, forces, couples, moments, resultants of force couple systems; friction, equilibrium analysis of particles and finite bodies, centroids; applications. Prerequisites: MATH:1550. Corequisites: MATH:1560 and PHYS:1611.

ENGR:2120 Electrical Circuits 3 s.h.
Kirchhoff's laws and network theorems; analysis of DC circuits; first order transient response; sinusoidal steady-state analysis; elementary principles of circuit design; SPICE analysis of DC, AC, and transient circuits. Corequisites: MATH:2560.

ENGR:2130 Thermodynamics 3 s.h.
Basic elements of classical thermodynamics including first and second laws, properties of pure materials, ideal gas law, reversibility and irreversibility, and Carnot cycle; control volume analysis of closed simple systems and open systems at steady state; engineering applications, including cycles. Prerequisites: PHYS:1611 and CHEM:1110. Corequisites: MATH:1560.

ENGR:2510 Fluid Mechanics 4 s.h.
Fluid properties; hydrostatics; transfer of mass, momentum, and energy in control-volume and differential forms; dimensional analysis and similitude; laminar and turbulent flow in conduits; flow past bluff bodies and airfoils; engineering applications; experimental laboratories, computer simulation projects. Prerequisites: MATH:2560 and ENGR:2710. Corequisites: ENGR:2130.

ENGR:2710 Dynamics 3 s.h.
Vector calculus, Newton's laws, 3D motion of particles and multiparticle systems, 2D motion of rigid bodies applications. Prerequisites: ENGR:2110 and MATH:1550.

ENGR:2720 Materials Science 3 s.h.
Concepts and examples of selection and applications of materials used by engineers; mechanical, electrical, and thermal properties that govern a material's suitability for particular applications; lectures supplemented by laboratory experiments. Prerequisites: CHEM:1110. Corequisites: MATH:1550.

ENGR:2730 Computers in Engineering 3 s.h.
Advanced programming; good software engineering techniques including pseudocode and documentation dynamic data structures, recursive programming, procedural and object-oriented computing, inheritance, and standard template library; C++. Prerequisites: ENGR:1300.

ENGR:2750 Mechanics of Deformable Bodies 3 s.h.
Elementary theory of deformable bodies, stress, strain; axial, transverse, bending, torsion, combined and buckling loads; deflection of beam. Prerequisites: ENGR:2110. Corequisites: MATH:2560.

ENGR:3110 Introduction to Artificial Intelligence and Machine Learning in Engineering 3 s.h.
Introduction to artificial intelligence (AI), machine learning, data science, and data driven problem solving across all engineering disciplines; topics include supervised and unsupervised learning, clustering, heuristics, feature selection, ethics of AI—fairness and privacy issues, and performance evaluation; first in a series. Prerequisites: ENGR:1300. Corequisites: MATH:2550. Requirements: practical knowledge of programming, rudimentary understanding of probability concepts, and sophomore standing.

ENGR:4000 Engineering Honors Seminar 1 s.h.
Completion of an approved project under the supervision of a faculty member. Requirements: engineering honors and junior or higher standing.

ENGR:4001 Leadership Seminar: Mediocrity is Not an Option 1 s.h.
Skills needed to gain competitive edge in professional world with understanding that mediocrity is not an option; importance of developing a career plan, power of networking, significance of soft skills, value of mentoring; participation in series of discussions and activities; deeper insight of strengths and weaknesses, how to enhance skills that employers desire, and become effective leaders in workplace; presentation by retired chief operating officer of a leading aerospace company.

ENGR:5270 Finding Truth in a Sea of Big Data (and Social Media) 1 s.h.
How to detect and defuse misinformation from mainstream and social media; recognition of where misinformation occurs, what makes it misinformation, and provide statisticians or fellow scientists with a technical explanation of why a particular claim is nonsense; content is noncommittal of any political orientation since misinformation comes in all shapes and sizes from all corners of political spectrum. Requirements: engineering graduate standing.

ENGR:7270 Engineering Ethics 1 s.h.
Introduction to practical issues associated with being a responsible scientist; topics in responsible conduct of research in engineering and the sciences using case studies, presentations, and discussions with visiting speakers; conforms to mandates set by the Office of the Vice President for Research and the Graduate College to train graduate students and postdoctoral scholars/fellows in responsible conduct of research. Requirements: first-year graduate standing in College of Engineering.

ENGR:7604 Engineering Ethics for Post Docs 0 s.h.
Introduction to practical issues associated with being a responsible scientist; topics in responsible conduct of research in engineering and the sciences using case studies, presentations, and discussions with visiting speakers; conforms to mandates set by the Office of the Vice President for Research and the Graduate College to train graduate students and postdoctoral scholars/fellows in responsible conduct of research. Requirements: new postdoctoral research scholar/fellow in College of Engineering.

Engineering and Information Technology Courses

EIT:5120 Modern Automation and Control 3 s.h.
Study of sensor, motors, control, process automation, and internet of things (IoT).

EIT:5135 Modern Information Systems 3 s.h.
Introduction to enterprise information systems; RESTful service model, cloud service models, data storage models, big data considerations, network basics, security and privacy considerations; blockchain technology and its applications.

EIT:5150 Applied Artificial Intelligence 3 s.h.
Artificial Intelligence (AI), search and logic, data science and analysis, advanced machine learning and deep learning, digital manufacturing and design, signal processing and fault diagnosis, AI robotics and computer vision, and applications in engineering.

EIT:5155 Cyber-Physical Systems 3 s.h.
Introduction to modern "smart" systems providing intelligent monitoring, control, and coordination of societal, environmental, and business infrastructure; layered architecture for, relevant applications of, and projects involving conceptual design of cyber-physical systems.

EIT:5211 Machine Learning and Scientific Computing in Engineering 3 s.h.
Numerical methods in scientific computing; root problems and optimization; linear algebraic equations; eigenvalue problems; numerical differentiation and integration; interpolation and curve fitting; initial value and boundary value problems; machine learning in regression, classification, and clustering problems; Python programming and scikit-learn packages.

EIT:5216 Manufacturing Process and Modeling 3 s.h.
Fundamental science, modeling, and simulation technologies in materials processing; essential knowledge in automation and control of manufacturing systems; material removal processes, forming, microfabrication, and nontraditional material processes; finite element modeling/simulation of material processes; automation and control of manufacturing systems and processes.

EIT:5220 Advanced Control Engineering 3 s.h.
State-space representation of linear systems, equilibrium points, linearization, controllability, observability, stability, state feedback control, linear observer design, and separation principle.

EIT:5224 Mechanical Design and Realization 3 s.h.
Solid modeling, assemblies, drawings, geometric dimensioning and tolerancing, and basic engineering design process; use of analysis tools (e.g., Finite Element Analysis), fatigue and durability, optimization software.

EIT:5240 Kinematics of Modern Robotics 3 s.h.
Robotics motion, configuration space, and path planning.

EIT:5298 Mechanical Component Durability and Integrity Analysis 3 s.h.
System and component design, stress analysis, static failure, fatigue, fracture mechanics, vibration, materials science, and product life cycle.

EIT:5351 Cybersecurity 3 s.h.
Taxonomy of security threats and attacks; chain-of-trust principle; authentication, access control, and security domains; perimeter security and defense in depth; cryptographic protocols; key management and distribution; security assessment, internet of things (IoT) security and privacy issues.

EIT:5352 Modern Database Systems 3 s.h.
Introduction to contemporary database architectures: relational, key-value, document store, and graph-based; relative strengths and weaknesses of database architectures; enterprise scalability issues; data aggregation and visualization; project work involving use of modern database systems (e.g., MySQL, Redis, MongoDB, Neo4j).

EIT:5353 Big Data and Machine Learning 3 s.h.
Storage, management, and analysis of very large data sets; distributed file systems and object stores; MapReduce framework for processing large data sets; machine learning techniques; classification and clustering; pattern recognition; projects involving big data and machine learning frameworks (e.g., Apache Hadoop).

EIT:5380 Software Engineering Methods, Tools, and Frameworks 3 s.h.
Modern agile software development practices for cloud and web-based applications using state-of-the-art software engineering languages, tools, and technologies; software as a service (SaaS) architecture; software testing; introduction to enterprise application development frameworks; team-based project.

EIT:5381 Enterprise Software Engineering 3 s.h.
Modern DevOps practices and toolchains for enterprise information systems; scalable architecture; cloud services (e.g., SaaS, PaaS, LaaS); load balancing/autoscaling; identity management and security; performance monitoring and tuning; continuous integration and hot deployment.

EIT:5382 Human-Computer Interaction Design and User Experience 3 s.h.
Principles and guidelines for design and evaluation of human-computer interactions (HCI); design methodologies (e.g., participatory design, low- and high-fidelity prototyping); user interface technologies (e.g., input and output devices, interaction styles); quantitative and qualitative evaluation of user interfaces (e.g., expert reviews, usability testing).

Applied Climate Science and Energy Technologies

Chair, Department of Chemical and Biochemical Engineering

- Jun Wang

Certificate Coordinator

- Matthew McGill

Undergraduate certificate: applied climate science and energy technologies

Faculty: https://engineering.uiowa.edu/cbe/people

Website: https://engineering.uiowa.edu/cbe/cbe-undergraduate-program/acset

The applied climate science and energy technologies (ACSET) program takes a multidisciplinary approach, and its coursework has been coordinated and sequenced to provide a broad background in applied climate science and energy technologies as well as foundational knowledge in the area of weather and meteorology. The program is designed to serve a diverse range of student interests, including insurance and business operations, hazard surveillance, public health, precision agriculture, and more.

The certificate is administered by the Department of Chemical and Biochemical Engineering [p. 1554]. Contact the Office of Undergraduate Research (OUR) for more information.

Programs

Undergraduate Program of Study

Certificate

- Certificate in Applied Climate Science and Energy Technologies [p. 1521]

Applied Climate Science and Energy Technologies, Certificate

Requirements

The undergraduate Certificate in Applied Climate Science and Energy Technologies (ACSET) requires 18 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in coursework for the certificate. Up to 6 s.h. of transfer credit may be applied to the certificate. A maximum of 9 s.h. of coursework used to satisfy requirements for a major, a minor, or another certificate may be applied toward this certificate.

The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program. Undergraduate to Graduate (U2G) students may earn the certificate when the undergraduate classification is primary.

Students should consult with the ACSET coordinator about their intent to earn the certificate and are encouraged to work with their academic advisor and the ACSET coordinator to develop an individual plan of study that complements their degree program and career interests. Due to the interdisciplinary nature of the certificate, students should pay close attention to prerequisites and other requirements that must be completed prior to enrolling in certificate courses.

The undergraduate Certificate in Applied Climate Science and Energy Technologies requires the following coursework.

Core Course

Course #	Title	Hours
This course:		
CBE:2050/CEE:2050	Severe and Unusual Weather	3

Energy Technology and Climate Impacts/Solutions Courses

Students complete at least one course with an emphasis on energy technology and climate impacts/solutions.

Course #	Title	Hours
At least one of these:		
CBE:2030	Energy and Society	3
CBE:2040	Environment, Energy, and Climate Change	3
CBE:3405	Green Chemical and Energy Technologies	3
CEE:4180	Fundamentals of Atmospheric Science	3

Analytical, Statistical, and Applied Courses

Students complete at least two analytical, statistical, and applied courses with a focus on climate, atmospheric, and energy systems.

Course #	Title	Hours
At least two of these:		
CBE:3020	Applied Statistics for Chemical and Natural Resources Engineering	3
CBE:3405	Green Chemical and Energy Technologies	3
CBE:4410/CEE:4107	Sustainable Systems	3
CBE:4459/ CEE:4159/IGPI:4159	Air Pollution Control Technology	3
CBE:4460	Process and Design for Satellites and Environmental Sensors	3
CBE:5410	Electrochemical Engineering	3
CBE:5412	Atmospheric Modeling	3
CBE:5415/IGPI:5415	Satellite Image Processing and Remote Sensing of Atmosphere	3
CBE:5417/ CEE:5417/IGPI:5417	Physical Meteorology and Atmospheric Radiative Transfer	3
CBE:5425/CEE:5115	Atmospheric Chemistry and Physics	3
CEE:4180	Fundamentals of Atmospheric Science	3
CEE:5310/ IGPI:5311/URP:5310	Informatics for Sustainable Systems	3
CEE:5410	Politics and Economics of the Food, Energy, Water Nexus	3
CHEM:4873	Atmospheric and Environmental Chemistry	3
ECE:5630	Sustainable Energy Conversion	3
ISE:5520	Renewable Energy	3
ME:4048	Energy Systems Design	4

Electives

Course #	Title	Hours
At least two of these:		
BAIS:3200	Database Management	3
BAIS:3500	Data Mining	3
BAIS:4150	Business Analytics and Information Systems Capstone	3
CPH:1600	Public Health Science: Inquiry and Investigation in Public Health	3
CPH:2200	Climageddon: Understanding Climate Change and Associated Impacts on Health	3
CPH:2220	Building a Healthier Tomorrow: Public Health Methods to Minimize Disease and Pollutant Exposures	3
CPH:4200	Agriculture, Food Systems, and Sustainability	3
ECON:3625/ URP:3135	Environmental and Natural Resource Economics	3
ENGR:2730	Computers in Engineering	3

MKTG:4250	Marketing and Sustainability	3
SEES:2050	Foundations of GIS	4
SEES:2310	Introduction to Climatology	3
SEES:3320	Earth's Climate System	3
SEES:4720	Paleoclimatology	3
Additional courses from the "Energy Technology and Climate Impacts/Solutions Courses" list		
Additional courses from the "Analytical, Statistical, and Applied Courses" list		

Artificial Intelligence, Modeling and Simulation in Engineering

Chair, Department of Mechanical Engineering

- Ching-Long Lin

Undergraduate certificate: artificial intelligence, modeling and simulation in engineering

Graduate certificate: artificial intelligence, modeling and simulation in engineering

Faculty: https://engineering.uiowa.edu/me-people

Website: https://engineering.uiowa.edu/mechanical-engineering-undergraduate-program/me-certificates/artificial-intelligence-modeling-and

Artificial intelligence (AI) is a technology that mimics human intelligence to perform complex tasks. Machine learning (ML) is a subfield of AI that uses statistical methods to learn from data without being explicitly programmed. Deep learning (DL) is a main subset of machine learning that uses multi-layered neural networks to learn from data. Modeling and simulation (M&S) in engineering is a field that uses mathematical models as a basis for simulations to generate data analyzed for product and system design. M&S is a knowledge-based approach that develops models to generate data, while ML is a data-based approach that learns from data to generate models.

The AIMS certificate undergraduate program teaches students:

- the importance of uncertainty quantification (UQ) in all methods;
- the various types of combinations of approaches (M&S-assisted ML, ML-assisted M&S, and hybrid); and
- the notion of using hybrid models for the design of intelligent complex machines.

The certificate is administered by the Department of Mechanical Engineering.

Artificial Intelligence, Modeling and Simulation in Engineering, Certificate

Requirements

The undergraduate Certificate in Artificial Intelligence, Modeling and Simulation in Engineering (AIMS) requires 18 s.h. Students must maintain a grade-point average of at least 2.00 in coursework specifically for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

Mechanical engineering (ME) students may earn the certificate in AIMS while they complete the design, robotics, and autonomous systems or the manufacturing focus area for their major. In addition, mechanical engineering students may use the certificate as a tailored engineering focus area by adding one eligible course.

Students are strongly encouraged to participate in at least one workshop related to Python, R, or high-performance and parallel computing offered by the Information Technology Services Research Services (ITS-RS) department, and HACKUIOWA organized by the University of Iowa's Hydroinformatics Lab.

Students could petition to substitute certificate courses with artificial intelligence, machine learning, deep learning, and modeling and simulation-related courses offered by ME and other departments. Non-ME students may earn this certificate while completing their degrees without taking extra courses.

The undergraduate certificate in Artificial Intelligence, Modeling and Simulation requires the following coursework.

Required Courses

Students complete one machine learning course and one artificial intelligence course.

Course #	Title	Hours
CS:5430	Machine Learning (may be used as machine learning or artificial intelligence required course)	3
Machine Learning		
One of these:		
ME:4111	Scientific Computing and Machine Learning	3
MATH:3800	Introduction to Numerical Methods	3
Artificial Intelligence		
One of these:		
ME:4150	Artificial Intelligence in Engineering	3
CS:4420	Artificial Intelligence	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3

Elective Courses

Course #	Title	Hours
Three of these:		
ME:4110	Computer-Aided Engineering	3
ME:4112	Engineering Design Optimization	3
ME:4116	Manufacturing Processes Simulations and Automation	3
ME:4117	Finite Element Analysis	3
ME:4120	Advanced Linear Control Systems	3
ME:4175	Computational Naval Hydrodynamics	3
ME:5143	Computational Fluid and Thermal Engineering	3
ME:5170	Data-Driven Analysis in Engineering Mechanics	3
ME:5300	Uncertainty Quantification and Design Optimization	3
BME:2260	Quantitative Physiology	3
BME:4310	Computational Biochemistry	3
BME:5240	Deep Learning in Medical Imaging (DLMI)	3
BME:5335	Computational Bioinformatics	3
BME:5441	Numerical and Statistical Methods for Bioengineering	3
BME:5525	Cardiopulmonary Design and Modeling	3
BME:5620	Introduction to Applied Biomedical Finite Element Modeling	3
CS:4330	Theory of Computation	3
CS:4350	Logic in Computer Science	3
CS:4700	High Performance and Parallel Computing	3
CS:4720/ MATH:4820	Optimization Techniques	3
CS:5360	Randomized Algorithms	3
CS:5710/ MATH:5800	Numerical Methods I	3
CS:5720/ MATH:5810	Numerical Methods II	3
CS:5810	Formal Methods in Software Engineering	3
MATH:4060	Discrete Mathematical Models	3
MATH:4840	Mathematics of Machine Learning	3

Capstone Course

Students must incorporate aspects of artificial intelligence, machine learning, deep learning, and/or modeling and simulation into their capstone project. Students must submit a written report to the director of the AIMS undergraduate certificate program explaining how they incorporate one or more of these aspects into their capstone project shortly after completion of the course.

Course #	Title	Hours
One of these:		
ME:4086	Mechanical Engineering Design Project	3
ME:4098	Individual Investigations: Mechanical Engineering	3
BME:4910	Biomedical Engineering Senior Design I	4
BME:4920	Biomedical Engineering Senior Design II	4

CS:5990	Individualized Research or Programming Project (requires permission of certificate director)	1-3

Artificial Intelligence, Modeling and Simulation in Engineering, Graduate Certificate

Requirements

The graduate Certificate in Artificial Intelligence, Modeling and Simulation (AIMS) requires a minimum of 15 s.h. of graduate coursework. To earn the certificate, the student is required to maintain a Graduate College major program minimum grade-point average of 3.00.

Students are strongly encouraged to participate in at least one workshop related to Python, R, or high performance and parallel computing offered by the Information Technology Services Research Services (ITS-RS) department, and HACKUIOWA organized by the University of Iowa's Hydroinformatics Lab.

The Certificate in Artificial Intelligence, Modeling and Simulation in Engineering requires the following coursework.

Required Courses

Students must complete at least two of the following courses but may choose to complete all three courses as part of the certificate.

Course #	Title	Hours
At least two of these:		
ME:5170	Data-Driven Analysis in Engineering Mechanics	3
ME:5300	Uncertainty Quantification and Design Optimization	3
ME:6255	Multiscale Computational Science and Engineering	3

Students select courses from the following list to reach a total of 12 s.h. of credit when combined with two or all three of the courses previously listed. Students may petition to substitute other relevant graduate-level courses for the following courses in consultation with the AIMS faculty advisor.

Course #	Title	Hours
At least one of these:		
ME:4117	Finite Element Analysis	3
ME:4150	Artificial Intelligence in Engineering	3
ME:4175	Computational Naval Hydrodynamics	3
ME:5143	Computational Fluid and Thermal Engineering	3
ME:6240	Probabilistic Inference and Estimation for Mechanical Systems	3
ME:7256	Computational Solid Mechanics	3
ME:7257	Probabilistic Mechanics and Reliability	3
ME:7269	Computational Fluid Dynamics and Heat Transfer	3

Elective Course

In addition to the following courses, students may count a graduate-level course from another College of Engineering department or an independent investigation opportunity not in the following list in consultation with the AIMS faculty advisor.

Course #	Title	Hours
At least 3 s.h. from these:		
ME:6198	Individual Investigations: Mechanical Engineering	arr.
A mechanical engineering course (prefix ME) numbered 4100 or above		
A chemistry, mathematics, or physics course (prefix CHEM, MATH, or PHYS) numbered 5000 or above		

Bachelor of Science in Engineering

Undergraduate major: BSE

Website: https://engineering.uiowa.edu/

The Bachelor of Science in Engineering (BSE) degrees with majors in biomedical, chemical, civil, electrical, environmental, industrial, and mechanical engineering are accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET). The computer science and engineering program is accredited by the EAC and the Computing Accreditation Commission (CAC) of ABET. The College of Engineering has six departments and offers eight undergraduate BSE majors. View the BSE majors under each of the College of Engineering departments in the catalog.

Each program has its own set of articulated educational objectives, while all programs are designed to ensure that graduates possess the following at the time of graduation:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors;
- an ability to communicate effectively with a range of audiences;
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions; and
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Computer science and engineering majors will be able to do each of the following as they relate directly to computing:

- analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions;
- design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline;
- communicate effectively in a variety of professional contexts;
- recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles;
- function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline; and
- apply computer science theory and software development fundamentals to produce computing-based solutions.

Cooperative Education and Internship Program

The Cooperative Education and Internship Program supports students as they explore and develop their careers through periods of professional practice. These are professional, engineering-related experiences in business, industry, education, or government that are recognized by the College of Engineering. Experiences range from 10-week summer internships to multiterm co-ops. Students find co-ops and internships in several ways, including career fairs, job search websites, applying directly through the company's website, networking, personal connections, and Handshake (the University of Iowa's primary online recruiting system).

All students in the College of Engineering are eligible to participate in the co-op and internship program upon completion of one full semester at the university. Students are encouraged to begin their search early so that they may acquire a co-op or internship experience starting the summer after their first or second year. Students complete co-op and internship assignments at many companies around the country.

Internships and co-ops may be documented on the transcript when students follow the appropriate registration steps. For further details, see Engineering Career Services on the College of Engineering website.

Programs

Undergraduate Program of Study

Major

- Bachelor of Science in Engineering [p. 1529]

Policies

Students can view academic policies on the College of Engineering Current Students webpage.

Admission

First-year students are eligible for direct admission into the College of Engineering if they achieve a score of at least 265 on the Regent Admission Index (RAI) and meet the high school course requirements.

Engineering high school course requirements include:

- four years of English/language arts;
- four years of mathematics (including two years of algebra, one year of geometry, and one year of higher math such as precalculus or equivalent);
- two years of a single world language;
- three years of natural science, preferably with at least one year of chemistry and at least one year of physics; and
- two years of social studies.

Grades of B or higher in all high school math and science courses are highly recommended.

Students who are unsure whether to pursue a degree in engineering or a degree in liberal arts and sciences are strongly encouraged to begin in engineering if they meet the admission requirements.

Students who fall short of the engineering admission requirements may enroll in the College of Liberal Arts and

Sciences and be designated as engineering interest students. They may apply to transfer into the College of Engineering for the following semester once they have successfully completed MATH:1550 Engineering Calculus I (or equivalent) and either CHEM:1110 Principles of Chemistry I or PHYS:1611 Introductory Physics I.

More information about admission and the College of Engineering is available; see Prospective Undergraduate Students on the College of Engineering website.

Transfer Applicants

Transfer applicants must have completed the same high school unit requirements as entering first-year students and must submit an official high school transcript as well as a transcript of college work undertaken at other institutions. Collegiate coursework may be used to correct high school deficiencies.

Transfer students must have completed, with a grade of B-minus or higher, MATH:1550 Engineering Calculus I (or equivalent), and either CHEM:1110 Principles of Chemistry I or PHYS:1611 Introductory Physics I (the first semester of chemistry designed for majors or the first semester of calculus-based physics) or their equivalents.

Grades earned in additional math, science, and engineering courses (ideally all As and Bs) and overall grade-point average are also considered in transfer applications. Transfer courses completed with a grade below a C-minus are not accepted by the College of Engineering and will not satisfy degree requirements.

Information about admission requirements for transfer students is available on the college's website.

Bachelor of Science in Engineering, BSE

Requirements

The Bachelor of Science in Engineering (BSE) requires a minimum of 128 s.h. of credit. Students must be enrolled as a College of Engineering student for the last 30 s.h. of work toward the degree, or 45 of the last 60 s.h., or a total of 90 s.h. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

Engineering students earn the BSE degree in one of eight undergraduate programs of study (majors): biomedical engineering [p. 1535], chemical engineering [p. 1554], civil engineering [p. 1576], computer science and engineering [p. 1613], electrical engineering [p. 1613], environmental engineering [p. 1576], industrial engineering [p. 1635], or mechanical engineering [p. 1655].

The collegiate curriculum requires all students to complete a minimum of 30 s.h. of mathematics and basic sciences; 6 s.h. of core engineering; and 19 s.h. of general education courses (including RHET:1030 Rhetoric: Writing and Communication and 15 s.h. of additional electives). Collegiate courses are typically completed early in a student's undergraduate program, thereby allowing students to change programs during the first semesters without a loss in course credit.

These foundational courses serve as prerequisites or corequisites for more advanced coursework in the major. Each major has several focus areas consisting of required and elective courses that provide students the flexibility to tailor their studies to their career interests. Each major culminates in a capstone senior design project.

Collegiate Curriculum Requirements

All students in the College of Engineering are required to complete the following courses as part of their collegiate curriculum.

Requirements	Hours
Mathematics and Basic Sciences	30
Engineering Core	6
General Education	19

Mathematics and Basic Sciences

Students complete a minimum of 30 s.h. in mathematics and basic sciences. Courses with the option of a laboratory component must be taken with the lab. Students should refer to the individual departmental section in the catalog for information about fulfilling the statistics course and the basic science and college-level mathematics courses for their particular BSE program.

Course #	Title	Hours
CHEM:1110	Principles of Chemistry I (with lab)	4
MATH:1550	Engineering Calculus I	4
MATH:1560	Engineering Calculus II	4
MATH:2550	Engineering Matrix Algebra	2
MATH:2560	Engineering Differential Equations	3
PHYS:1611	Introductory Physics I (with lab)	4
Basic Science or College-Level Math		6
Statistics		3

Engineering Core

The engineering core consists of two engineering courses required by all undergraduate programs in the College of Engineering.

Course #	Title	Hours
ENGR:1100	Introduction to Engineering Problem Solving	3
ENGR:1300	Introduction to Engineering Computing	3

General Education

Students are required to complete 19 sh. of general education courses; for more information, see General Education Component [p. 1530] in this section of the catalog.

First- and Second-Semester Plan of Study

The majority of the collegiate curriculum can be completed in the first two semesters.

First Semester

Course #	Title	Hours
ENGR:1100	Introduction to Engineering Problem Solving	3
CHEM:1110	Principles of Chemistry I	4
MATH:1550	Engineering Calculus I	4
RHET:1030	Rhetoric: Writing and Communication	4
Total Hours		**15**

Second Semester

Course #	Title	Hours
ENGR:1300	Introduction to Engineering Computing	3
MATH:1560	Engineering Calculus II	4
MATH:2550	Engineering Matrix Algebra	2
PHYS:1611	Introductory Physics I	4
General education or major requirement course		3-4
Total Hours		**16-17**

Major Courses and Focus Areas

The curriculum for each BSE major is described in each of the departmental sections of the catalog. Each program has a number of focus areas that are designed to help students achieve exposure to and depth of study in an area that is complementary to their major. The focus areas enable students to gain technical skills consistent with their career goals. Moreover, these electives may contribute to earning a minor and/or certificate.

General Education Component

The General Education Component promotes understanding of and appreciation for arts, community, culture, and learning through coursework.

Students who enter the College of Engineering with a BA or BS degree are considered to have satisfied the General Education Component.

Students who enroll in a combined degree program in the College of Engineering and with the College of Liberal Arts and Sciences or with the Tippie College of Business must complete all requirements for both degrees, including all general education requirements. Students are encouraged to complete a course for the Engineering Be Creative requirement that will satisfy a general education requirement for the second college; see the "Engineering Be Creative" section.

General Education Areas

Students are required to complete 19 sh. of the General Education Component as outlined. Some focus areas in certain majors may recommend or require specific courses to fulfill the General Education Component. Credit may be earned by examination; consult the College of Engineering.

- Rhetoric [p. 1530] (4 s.h.)
- Engineering Be Creative [p. 1530] (3 s.h.)
- Cultural Perspectives, Values, and Society [p. 1531] (3 s.h.)
- Approved Course Subjects [p. 1531] (9 s.h.)

Rhetoric

Course #	Title	Hours
This course:		
RHET:1030	Rhetoric: Writing and Communication	4

Transfer students should refer to the Rhetoric section of the GE CLAS Core [p. 22] (College of Liberal Arts and Sciences) in the catalog for information about how transfer credit may affect the Rhetoric requirement.

Engineering Be Creative

Students must complete at least 3 s.h. selected from the following courses. Note that not all courses are offered every semester. Some courses will have sections designated for students with a major in the College of Engineering.

If a course has prerequisites listed, students wishing to take the course for the Engineering Be Creative requirement will need to request that prerequisites be waived by completing the "Request Prerequisite Special Permission" form on MyUI. This form should be completed several weeks prior to registration. Contact the College of Engineering for more information.

The following courses satisfy the Engineering Be Creative requirement.

Course #	Title	Hours
ARTS:1060	Elements of Digital Photography	3
ARTS:1510	Basic Drawing	3
ARTS:1520	Design Fundamentals	3
ARTS:2300	Hand Drawing Bicycles for Designers and Engineers	3
CERM:2010	Ceramics I: Handbuilding	3
CINE:1100	The Art of Smartphone Filmmaking	3
CINE:1150	Introduction to Screenwriting for Nonmajors	3
CINE:1834/ THTR:1834	Modes of Film and Video Production	4
CNW:1620	Introduction to Creative Nonfiction	3
CNW:2680/ ENGL:2730	The Art and Craft of Creative Nonfiction	3
CNW:2700	The Art and Craft of Personal Writing	3
CNW:2720	The Art and Craft of Writing About Culture	3
CNW:2730	The Art and Craft of Science Writing	3
CNW:2740	The Art and Craft of Writing about the Environment	3
CNW:2770	The Art and Craft of Writing for New Media	3
CNW:2780	The Art and Craft of Writing About Sports	3
CNW:2790	The Art and Craft of Humor Writing	3
CNW:2830	The Art and Craft of Immersion Journalism	3
CNW:2840	The Art and Craft of Travel Writing	3
CNW:2910	Writing for Applications and Awards	3
CNW:3632/ ENGL:3732/ WRIT:3632	Prose Style	3
CNW:3640	Writing for Business	3
CW:2100	Creative Writing	3
CW:2870	Fiction Writing	3
CW:2875	Poetry Writing	3

UICB:3380/ BKAT:3380	Letterpress	3
UICB:4100/ BKAT:4100	Paperworks	3
UICB:4415/ ARTS:4415	Introduction to Classical Calligraphy	3
WRIT:3005/ CW:3005/ INTD:3005	Professional and Creative Business Communication	3

Cultural Perspectives, Values, and Society

Students complete at least 3 s.h. from the GE CLAS Core [p. 22] areas of Understanding Cultural Perspectives or Values and Society.

The College of Engineering will accept transfer credit for the Cultural Perspectives, Values, and Society requirement. Students enrolled in other University of Iowa undergraduate degree programs should be aware that transfer credit may not be accepted for similar requirements in other colleges.

Approved Course Subjects

Students complete 9 s.h. of coursework from any of the following course subjects.

College of Law

Students may choose from University of Iowa Center for Human Rights [p. 1839] courses (prefix HRTS); view the courses and descriptions in the corresponding College of Law section of the catalog.

College of Liberal Arts and Sciences

Students may choose from courses in the following areas:

African American studies [p. 35] (prefix AFAM);
aging and longevity studies [p. 47] (prefix ASP);
American studies [p. 51] (prefix AMST);
anthropology [p. 64] (prefix ANTH);
art, art history, and design [p. 86] (prefix ARTE, ARTH, ARTS, BKAT, DSGN, DRAW, INTM, MTLS, PHTO, PNTG, PRNT, SCLP, or TDSN) with the exception of ceramics;
cinematic arts [p. 198] (prefix CINE);
classics [p. 217] (prefix CLSA, CLSG, or CLSL);
communication sciences and disorders [p. 246] (prefix CSD);
communication studies [p. 266] (prefix COMM);
creative nonfiction writing [p. 415] (prefix CNW);
creative writing [p. 415] (prefix CW);
criminology, law, and justice [p. 1017] (prefix CRIM);
critical cultural competence [p. 324] (prefix CCCC);
dance [p. 326] (prefix DANC);
digital arts [p. 356] (prefix DIGA);
disability studies [p. 360] (prefix DST);
English [p. 415] (prefix ENGL);
event planning [p. 465] (prefix EVNT);
gender, women's, and sexuality studies [p. 468] (prefix GWSS);
global health studies [p. 487] (prefix GHS);
history [p. 562] (prefix HIST and JSTU);
journalism and mass communication [p. 622] (prefix JMC);
languages, linguistics, literatures, and cultures [p. 659] (prefix ARAB, ASIA, ASL, ASLE, CHIN, CL, FREN, GRMN, IS, ITAL, JPNS, KORE, LING, RUSS, SWAH, and WLLC, with the exception of SOAS);
Latina/o/x studies [p. 763] (prefix LATS);
medieval studies [p. 805] (prefix MDVL);
museum studies [p. 808] (prefix MUSM);
music [p. 814] (prefix MUS);

Native American and Indigenous studies [p. 868] (prefix NAIS);
philosophy [p. 880] (prefix PHIL);
political science [p. 927] (prefix POLI);
psychology [p. 947] (prefix PSY);
religious studies [p. 968] (prefix RELS);
rhetoric [p. 988] (prefix RHET) numbered 2000 or above;
social justice [p. 468] (prefix SJUS);
social work [p. 998] (prefix SSW);
sociology [p. 1017] (prefix SOC);
Spanish, Portuguese, and Latin American studies [p. 1044] (prefix LATS, PORTS, and SPAN);
sport and recreation management (prefix SRM);
sport media and culture [p. 622] (prefix SMC);
sport studies [p. 51] (prefix SPST);
theatre arts [p. 1101] (prefix THTR);
therapeutic recreation (prefix TR); and
writing [p. 766] (prefix WRIT).

View the courses and descriptions in the corresponding College of Liberal Arts and Sciences section of the catalog.

Graduate College

Students may choose from courses in urban and regional planning [p. 1785] (prefix URP) in the School of Planning and Public Affairs; view the courses and descriptions in the corresponding Graduate College section of the catalog.

Tippie College of Business

Students may choose from courses in economics [p. 1185] (prefix ECON), management and entrepreneurship [p. 1237] (prefixes ENTR and MGMT), and marketing [p. 1261] (prefix MKTG); view the courses and descriptions in the corresponding Tippie College of Business section of the catalog.

University College

Students may choose from courses in aerospace studies [p. 2171] (prefix AERO), leadership studies [p. 2199] (prefix LS), and military science [p. 2207] (prefix MILS); view the courses and descriptions in the corresponding University College section of the catalog.

Combined and Dual Degrees

BSE and Undergraduate Degrees

BSE/BBA

The College of Engineering and the Tippie College of Business offer a combined degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (BBA) from the Tippie College of Business and a Bachelor of Science in Engineering (BSE) from the College of Engineering.

Students in the combined program must complete all requirements for both degrees, including all general education requirements. They must enroll in appropriate mathematics and engineering courses early in their course of study in order to complete the program in a timely way. Because courses in natural sciences, mathematics, humanities, and social sciences count toward the BBA and the BSE, students may count a single course toward both degrees.

Students usually meet the degree requirements of both colleges in about five years; the time required depends on a student's choice of major study areas. Students should consult their advisors about whether the second-grade-only option is available to them. They are assigned two advisors, one in the Tippie College of Business Undergraduate Program Office and the other in their College of Engineering major department.

To enter the combined degree program, students must have approval from both colleges and must be admitted to both colleges. Interested students should contact the Student Development Center. For information about the BBA, including requirements for the degree, see the Undergraduate Programs [p. 1132] (Tippie College of Business) in the catalog.

BSE/Liberal Arts and Sciences Degree

Students may earn two University of Iowa bachelor's degrees in a combined program in the College of Engineering and the College of Liberal Arts and Sciences. Successful candidates are awarded a BSE (Bachelor of Science in Engineering) by the College of Engineering and a BA (Bachelor of Arts), BS (Bachelor of Science), BFA (Bachelor of Fine Arts), or BM (Bachelor of Music) by the College of Liberal Arts and Sciences.

Students in combined degree programs must complete all requirements for both degrees, including the College of Liberal Arts and Sciences GE CLAS Core [p. 22] and the College of Engineering General Education Component. Students are encouraged to complete a course for the Engineering Be Creative requirement that will also satisfy a GE CLAS Core requirement. See General Education Component [p. 1530] in this section of the catalog.

Students in the combined program usually are able to meet the degree requirements of both colleges in about five academic years. The exact length of time necessary to complete the program is determined by the major areas of study selected in each college. Students who enter the combined degree program are assigned two faculty advisors, one in their major department in the College of Engineering and the other in their major department in the College of Liberal Arts and Sciences.

To enter the combined degree program, students must be admitted to both the College of Engineering and the College of Liberal Arts and Sciences and must have College of Engineering approval to enter the combined degree program. Combined degree program applicants must meet the high school course or unit requirements for admission to each of the two colleges.

It is crucial that students enroll in the proper mathematics and engineering courses early in their course of study to expedite the completion of the program. The specific engineering courses taken by each student vary according to one's engineering major. Since courses in natural sciences, mathematics, humanities, and social sciences are accepted for credit by both colleges, students may be able to count a particular course toward both degrees.

Contact the Student Development Center for information about specific requirements. To learn about liberal arts and sciences majors, visit College of Liberal Arts and Sciences [p. 20] in the catalog and select majors of interest in the departments.

BS/BSE Dual Degree with Northern Iowa

The 3+2 dual degree program leads to a BS in applied physics from the University of Northern Iowa (UNI) and a BSE from the University of Iowa. It requires approximately three years of study at UNI followed by approximately two years of study at

Iowa. There is no guarantee that students can complete the 3+2 degree in five years.

Students interested in the program are guaranteed admission to the University of Iowa portion of the program if they have a grade-point average of at least 3.00 (B average) in all coursework and in the chemistry, mathematics, and physics courses required by the University of Northern Iowa physics department.

During the first three years of the program, students complete at least 90 s.h. of coursework at the University of Northern Iowa. They must successfully complete courses in each of the following areas: chemistry, mathematics through differential equations, physics to satisfy the applied physics major requirements, and courses to satisfy the general education requirements. Credit for courses passed with a grade of C or higher is transferred to the University of Iowa as credit for equivalent coursework.

At the University of Iowa, students complete the BSE requirements that are current at the time of their admission to the College of Engineering. Coursework completed at the University of Iowa is transferred to the University of Northern Iowa and applied toward the requirements for that institution's BS in applied physics.

When transferring to the University of Iowa from UNI, students must submit applications for admission, housing, and financial aid to the University of Iowa by the university's established deadlines.

BSE and Graduate Degrees

BSE/MS Programs in Engineering

Engineering students may be eligible to enroll in one of the College of Engineering's combined BSE/MS programs, which allow students to begin working toward a master's degree in engineering while they are completing their bachelor's degree. The combined programs, which are offered by each of the college's departments, permit students to count certain courses toward both degrees, completing both programs in less time than they would need to complete them separately. See "Combined Programs" in each department's BSE sections of the catalog.

BSE in Biomedical Engineering (Biomechanics and Biomaterials Track)/MS in Occupational and Environmental Health (Industrial Hygiene Subprogram)

BSE students majoring in biomedical engineering in the biomechanics and biomaterials track who are interested in earning a Master of Science in occupational and environmental health with an industrial hygiene subprogram may apply to the combined BSE/MS program offered by the College of Engineering and the College of Public Health. The combined program permits students to count a limited amount of credit toward the requirements of both degrees, enabling them to begin the study of public health before they complete the bachelor's degree. See the MS in occupational and environmental health Undergraduate to Graduate (U2G) information on the Department of Occupational and Environmental Health (College of Public Health) website.

BSE in Civil Engineering/MS in Urban and Regional Planning

The College of Engineering and the School of Planning and Public Affairs offer the combined Bachelor of Science in Engineering in civil engineering/Master of Science in urban and regional planning. The program, which is completed in five years, is designed for students who wish to pursue a public or private sector career in planning, a field that encompasses the development of alternatives to improve the quality of life in cities and regions.

For additional information on the BSE in civil engineering [p. 1584], see that section of the catalog. For more information about the graduate degree, see the MS in urban and regional planning [p. 1797] (Graduate College) in the catalog. Contact Engineering Student Services for information about applying to the combined program.

BSE in Computer Science and Engineering/MCS

The College of Engineering and the Department of Computer Science (College of Liberal Arts and Sciences) offer a combined BSE in computer science and engineering/Master of Computer Science for computer science and engineering undergraduate students.

The combined degree program allows students to count a limited amount of credit toward both degrees. For more information, see the Master of Computer Science, MCS [p. 316] in the catalog.

Honors

Honors in Engineering

Outstanding undergraduate students who demonstrate exceptional accomplishment through research, directed independent study, teaching internships, or other approved nondegree enrichment activities may graduate with honors in engineering. They must maintain a University of Iowa grade-point average of at least 3.33, complete an honors project with a faculty member, and participate in a college-wide honors seminar with faculty members and other honors students. Successful completion of the honors requirements leads to a BSE with honors, which is noted on the student's transcript. See Engineering Honors Program on the College of Engineering website for details.

University of Iowa Honors Program

In addition to honors in engineering, undergraduate students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Career Advancement

Engineering is a well-respected profession that is used as a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors consistently rank among the top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). On average, 93–98% of graduates

are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

Roy J. Carver Department of Biomedical Engineering

Chair

- Kim L. Blackwell

Undergraduate major: biomedical engineering (BSE)

Graduate degrees: MS in biomedical engineering; PhD in biomedical engineering

Faculty: https://engineering.uiowa.edu/bme/people

Website: https://engineering.uiowa.edu/bme

The past half century has seen tremendous growth of technological activity in biology and medicine. As engineers increasingly have become involved with projects in the life and health sciences, biomedical engineering has emerged to bridge the gap between these sciences and engineering.

The Roy J. Carver Department of Biomedical Engineering fosters interdisciplinary activities across departments and colleges and maintains strong ties with the Carver College of Medicine and the colleges of Dentistry, Nursing, and Public Health. The department strives to provide a well-rounded and superior engineering education that attracts outstanding students at both the undergraduate and graduate levels; to conduct high-quality research that enables faculty members and students to keep pace with and initiate new developments; and to serve government, industry, and institutions worldwide by making the department's facilities and faculty expertise accessible.

Department faculty members have teaching and research expertise in areas related to cardiovascular and fluid biomechanics, musculoskeletal biomechanics, biomaterials and tissue engineering, bioinstrumentation, biosystems, biomedical imaging, biological signal analysis, bioinformatics and computational biology, respiratory and pulmonary engineering, computational neuroscience, and other allied fields. Several faculty members have joint appointments with the Carver College of Medicine, the College of Dentistry, or the College of Public Health. Biomedical engineering undergraduates and graduate students collaborate with faculty members and their colleagues on research problems in the life and health sciences.

Programs

Undergraduate Program of Study

Major

- Major in Biomedical Engineering (Bachelor of Science in Engineering) [p. 1543]

Graduate Programs of Study

- Master of Science in Biomedical Engineering [p. 1549]
- Doctor of Philosophy in Biomedical Engineering [p. 1551]

Facilities

Undergraduate Teaching Laboratories

Seven dedicated undergraduate teaching laboratories are associated with the required and elective courses in biomedical engineering: the Bioimaging and Bioinformatics Laboratory; the Biomechanics and Biomaterials Laboratory; the Carver Biomechanics and Mechanobiology Laboratory; the Carver Cellular Engineering Laboratory; the Carver Medical Device Design Laboratory; the Senior Design Laboratory; and the Systems, Instrumentation, and Data Acquisition Laboratory.

Bioimaging and Bioinformatics Laboratory

The Bioimaging and Bioinformatics Laboratory provides computer and experimental equipment to allow students to become familiar with biomedical imaging hardware and software for biomedical image analysis. The laboratory has four lab benches with computers for teamwork, two desktop ultrasound machines, and two desktop magnetic resonance imaging devices. In addition, the lab has 12 sets of in-house-built optics laboratory kits that use light sources and semitranslucent objects to simulate basic x-ray physics. Students are introduced to concepts such as image magnification as it relates to source-object distance (SOD)/source-image distance (SID), depth-dependent magnification, ideal point source versus parallel beam source effects, and projection image formation with lack of depth information artifacts. An instructor workstation and computer projector are available for presentations and software demonstrations. The lab is used primarily for the core course BME:2210 Bioimaging and Bioinformatics, the elective course BME:5210 Medical Imaging Physics, and senior design projects.

Biomechanics and Biomaterials Laboratory

The Biomechanics and Biomaterials Laboratory allows students to perform experiments relating to the cardiovascular and human musculoskeletal systems as well as the various properties of biomaterials. The laboratory houses a table-top material testing machine; a Tekscan I-scan system with associated sensors; two cone-and-plate viscometers; compact stress-strain devices for characterizing cardiovascular tissues; goniometers; human structures biomechanical modeling sets and associated sensors; still, video, and motion-capture digital cameras for kinematic analysis; a ski binding tester; a drop tower for impact testing; digital calipers; various skeletal/bone models; an assortment of hand tools; and dissecting tools. The lab is used for the course BME:2500 Biomaterials and Biomechanics, elective courses in cardiovascular and musculoskeletal biomechanics like BME:4710 Medical Device Design Studio, and senior design projects.

Carver Biomechanics and Mechanobiology Laboratory

The Carver Biomechanics and Mechanobiology Laboratory (CBML) is a shared resource in the Roy J. Carver Department of Biomedical Engineering with a mission to enhance teaching, training, and research in the field of biomechanics and mechanobiology. The lab helps students understand

cardiovascular disease, cancer metastasis, wound healing, medical device function, and stem cell therapies.

The lab houses a planar biaxial stress-strain test apparatus, a pulse duplicator apparatus for characterizing blood flow through mechanical and tissue heart valves, a micron-resolution particle image velocimetry (micro-PIV) system for quantifying flow and particle dynamics at the microscale, a stent crimper for characterizing vascular stent designs, a multimode plate reader for quantifying cell activity and extracellular matrix (ECM) remodeling, a lyophilizer for quantifying elastin and collagen content in soft tissue samples, a micromanipulator for performing micropipette aspiration studies, and a controlled microscope room for imaging live cells over long durations. The lab is used for courses in cardiovascular biomechanics and cellular engineering, other elective courses, and senior design projects.

Carver Cellular Engineering Laboratory

This laboratory trains students in cell culture and biochemical analysis techniques as a foundation for future work in quantitative cell-based studies. Students learn basic cell culture techniques, protein and nucleic acid analysis, as well as techniques for studying the effects of engineered materials on cellular systems.

Major equipment in the lab includes laminar flow hoods, cell culture incubators, centrifuges, spectrophotometers, an ultracold freezer, protein and nucleic acid electrophoresis equipment, thermal cyclers, microscopes, an automated microplate reader, and various support apparatus used in cell-based studies. This teaching lab is used for the courses BME:2400 Cell Biology for Engineers and BME:5421 Cell Material Interactions.

Carver Medical Device Design Laboratory

The Carver Medical Device Design Laboratory provides a space for students to gather to collaborate on the design of medical implants, fixtures for testing such implants, and software for modeling, analyzing, and optimizing the function of these devices. Space and equipment are provided for progressing from a back-of-the-napkin sketch to a finalized computer-aided design (CAD) model and through multiple iterations of physical prototypes.

A variety of tools and equipment are available, such as a micro 24 laser system, a benchtop milling machine, a bandsaw and lathe, a soldering station, an expanded plasma cleaner, a micro pulse arc welder, and five computer workstations. The lab was established to serve students with an interest in medical device design and in required and elective courses in the areas of biomaterials and biomechanics, including BME:2200 Systems, Instrumentation, and Data Acquisition and BME:5101 Biomaterials and Implant Design, and the senior design sequence BME:4910–BME:4920.

Senior Design Laboratory

The Senior Design Laboratory provides a collaborative atmosphere for student groups as they create working prototypes. It has computer workstations, project workspace, and storage space for the development of senior design projects. In addition, a variety of tools and equipment are available in the lab, including electronics measurement devices, soldering tools, Dremel tools, miscellaneous sample medical equipment, and other resources for students. It is used by students taking BME:4910 Biomedical Engineering Senior Design I and BME:4920 Biomedical Engineering Senior Design II.

Systems, Instrumentation, and Data Acquisition Laboratory

The Systems, Instrumentation, and Data Acquisition Laboratory provides a collaborative environment for student teams to gain practical experience designing and testing electronic biomedical devices. It is equipped to measure, acquire, and analyze biomedical signals of clinical and physiological interest; to design, build, and test electronic instrumentation; and to conduct modeling experiments in physiology. The equipment includes computer workstations, power supplies, multimeters, function generators, oscilloscopes, breadboards, electrical components, integrated circuits, various transducers, Arduino microprocessors, and National Instruments data acquisition boards. It is used for the courses BME:2200 Systems, Instrumentation, and Data Acquisition and BME:4710 Medical Device Design Studio, biomeasurements and biological systems analysis, and senior design projects.

Research Facilities and Laboratories

The following laboratories are transformational spaces that enable the biomedical engineering faculty and students (graduate and undergraduate research assistants) to interact with one another by bringing together investigators with complementary fields of study. The laboratories have a direct impact on training graduate students and contribute to numerous research projects across campus. They have been designed to be responsive to current and future needs; to encourage interaction among engineers, scientists, and physicians from various disciplines; to help recruit and retain qualified faculty and students; and to facilitate partnerships and development.

Coordinated Laboratory for Computational Genomics (CLCG)

The Coordinated Laboratory for Computational Genomics (CLCG) aims to catalyze the development of new areas of study and expanded research opportunities in informatics areas related to the basic biological sciences and applied medical research. Founded in 2002 as a joint enterprise between the College of Engineering and Carver College of Medicine, the CLCG involves faculty from five colleges, seven affiliated centers, institutes, and cores, and more than 19 departments. It serves as a coordinating home for interdisciplinary research, undergraduate, pre- and post-doctoral training, as well as faculty recruiting and professional development. At the hub of an inherently interdisciplinary field, the goal of the CLCG is to assist in overcoming traditional disciplinary hurdles to collaboration and assist in utilizing state-of-the-art instrumentation and analysis methods needed by 21st-century biomedical and basic science research.

Bioinformatics and Computational Biology Laboratory

The Center for Bioinformatics and Computational Biology is wired for high-speed networking (100-megabit and gigabit ethernet, hardwired and wireless). It includes two dedicated Linux clusters, 126 computing systems, 178 CPUs, more than 20 terabytes of RAM, and 250 terabytes of disk space. Computer resources include a dedicated experimental,

reconfigurable computer cluster of 18 Linux systems (36 CPUs) connected with a dedicated, switched, copper Gigabit Ethernet intranet and a second dedicated computer server cluster of 16 Linux systems (32 CPUs) connected with a dedicated, switched fiber-optic Gigabit Ethernet intranet. An additional 78 computers are used as compute servers, web servers, database servers, file servers, workstations, laptops, and for other developmental and experimental needs.

Biomechanics of Soft Tissues Laboratory

The Biomechanics of Soft Tissues Laboratory (BioMOST) seeks to leverage principles from biomechanics, biomaterials, and medical imaging to develop tools for plumbing the human body with a focus on the heart, arteries, and lungs. It houses a ViVitro Pulse duplicating left-heart simulating flow loop system, mechanical extension testers, durability testers for accelerated testing of valves, flow loop with programmable pump, resisters and compliance chambers, optical micrometer, a furnace for nitinol shape memory alloy stent fabrication, and the Vascular Simulations Replicator (a portable realistic angio-suite friendly blood flow simulator). The lab also houses high-end image and data processing workstations.

Bioinspired and Bioengineered Microsystems Laboratory

The Bioinspired and Bioengineered Microsystems Lab is interested in exploiting bioinspired and multidisciplinary approaches (cellular, material, and bioengineering) to help understand respiratory diseases and develop effective treatments and accessible diagnostic tests to benefit patients. Structural and proteinaceous materials, such as silk fibroin, are a central research focus, as these materials enable aqueous and ambient processing, facilitate host-implant integration, and exhibit rare immunogenicity, a promising alternative to most synthetic polymers.

The laboratory is equipped with major equipment for material and bioengineering research, including a Leica Stellaris 5 confocal microscopy, a Cellink Inkcredible 3D printer, an Eppendorf 5804R centrifuge, a Laurell spin coater, an OptiMelt Automated Melting Point System, a Class 100 vertical laminar chamber, and a SpectraMax iD3 microplate detection system. The lab also has access to other shared equipment, including a biosafety hood, CO2 incubators, a chemical fume hood, -80°C and -20°C freezers, a fridge, an ice machine, a Thermofisher Barnstead water purification system, and a Tuttnauer 2540E autoclave.

Carver Laboratory for Regenerative Engineering and Translational Science

The Carver Laboratory for Regenerative Engineering and Translational Science is a state-of-the-art multi-investigator wet laboratory devoted to cell and tissue-based research. Housed within this facility are the 3MT (multi-scale mechanics, mechanobiology, and tissue engineering) lab and Worthington lab.

The laboratory is equipped with major equipment to synthesize and characterize biomaterials, including a chemical fume hood, rotary evaporator, freeze-dryer, rheometer, and several light-based curing systems. To enable the growth, maintenance, and characterization of mammalian cells, the lab also houses biosafety cabinets, incubators, a transfection system, an automated cell counter, a low-volume spectrophotometer, a microplate reader, thermal cyclers, quantitative polymerase chain reaction (PCR) instruments, electrophoresis units, and a gel imaging system. The dedicated microscope room includes an atomic force microscope and several fluorescent microscopes, which are equipped with confocal and live cell imaging capabilities.

Computational Laboratory

The Collaborative Computational Laboratory is a shared research computing resource, providing space and computational equipment for research in several fields, including computational fluid dynamics, medical image analysis, magnetic resonance imaging, machine learning, computational neuroscience, and artificial intelligence. Desktop computers, compute servers, and access to the campus research data storage and high-performance computing cluster are available through the lab.

Computational Biomolecular Engineering Laboratory

The Computational Biomolecular Engineering Laboratory focuses on molecular biophysics theory and high-performance computational algorithms used for engineering drugs and organic biomaterials. Located in the Bowen Science Building, the lab is a collaboration between the Roy J. Carver Department of Biomedical Engineering and the Department of Biochemistry and Molecular Biology. It includes eight workstations used to simulate biomolecular phenotypes in the context of understanding the genetics of hearing loss, autism spectrum disorder, and vision loss. Heavy use is made of the University of Iowa Argon compute cluster, including dedicated availability of 22 compute nodes, 76 Nvidia graphics processing units (GPUs), and 100 terabytes of backed-up storage. The lab distributes a high-performance physics-based molecular simulation code called Force Field X (FFX) that is being used to produce a family of protein structures for genes associated with hearing loss, available in the Deafness Variation Database. The software is also used to predict how pharmaceuticals crystalize (i.e., into drug tablets) and to understand their thermodynamic properties (e.g., solubility).

Computational and Experimental Neuroplasticity Laboratory

The Computational and Experimental Neuroplasticity Laboratory (CENlab) is a multidisciplinary research group devoted to the biophysical and biochemical mechanisms of long-term memory storage in neurons and networks. The computational research takes place in the Collaborative Computational Laboratory. The experimental research, located in the Bowen Science Building, utilizes a whole cell patch recording rig, comprised of a vibration isolation table with faraday cage, IR-DIC microscope, temperature controller, LED light source for optogenetics, two micromanipulators, and a low-noise, ultra-fast, digital patch clamp amplifier with integrated A-D connected to a Windows computer for computerized experimental control and data acquisition. In addition, the laboratory contains a fume hood, vibratome, analytical balance, heating stir plate, and a refrigerator for solution and tissue preparation.

Orthopedic Biomechanics Laboratory

The Orthopedic Biomechanics Laboratory occupies 20 rooms on the ground floor of Westlawn. The purpose of the laboratory is macroscopic-level physical testing of musculoskeletal constructs (e.g., bones, articular joints, orthopedic implants) and corresponding computational

modeling. The physical testing area includes a multipurpose wet lab, a multipurpose dry lab, a surgical preparation room, a mechanical testing room, a machine shop, and a specimen storage area. The computational modeling area is arranged around eight separate workstation seats in two adjoining, partially partitioned areas. Adjacent to these core operational areas are offices for faculty, research staff, students, and fellows; a secretarial/reception area; a conference room; and a library.

Pulmonary Microfluidic Laboratory

The Pulmonary Microfluidic Laboratory integrates micro-engineering methods with biology to understand airway physiology, treat pulmonary disease, and improve human health.

Regenerative Engineering Laboratory

The Regenerative Engineering Laboratory inhabits over 1,000 square feet of the Pappajohn Biomedical Discovery Building. The lab leverages the principles of regenerative medicine to promote healing and resolution of disease in vivo and to build better models of human tissues in vitro. The lab is fully equipped to support research at the interface of materials, engineering, and cell biology. The Biosafety Level 2 (BSL-2) cell culture room in the lab has two Panasonic cell culture incubators, two Thermo Scientific biological safety cabinets, a fluorescent microscope, a 37°C bead bath, and centrifuges. A separate four-color fluorescence microscope is also available. The fully automated Leica DMI6000 captures four-color fluorescence images at up to 63x magnification. A built-in z-motor and post-acquisition analysis software allow for the capture and analysis of three-dimensional z-stacks.

The chemistry portion of the lab is equipped for biodegradable particle synthesis and analysis. In addition to a fume hood, sink, and laboratory counters, the lab has an analytical grade Mettler Toledo XS64 balance, water bath sonicator, homogenizer, syringe pumps, and a LabConco -86°C Cascade Lyophilizer. To support long-term storage of the reagents required for the molecular biology and chemistry portions of the lab, a variety of cold storage options are available, including 4°C, -20°C, -80°C, and -130°C.

Respiratory Dynamics Laboratory

The Respiratory Dynamics Laboratory, located in Seamans Center, uses multiscale dynamic imaging and biomechanics to learn how lung structures move, stretch, and transport gas during breathing and mechanical ventilation. The facility houses equipment for isolated lung preparation and imaging, including a laminar flow clean bench, a dissecting microscope, an isolated organ perfusion system, purpose-built mechanical ventilators, and a high-resolution x-ray micro-CT scanner. The lab maintains an array of supplies and equipment for electropneumatic control and measurement of respiratory gas flows and pressures. The facility also includes pressurized air and vacuum outlets, a chemical fume hood, biosafety cabinet, ice machine, water purification system, and cold storage at 4ºC, -20ºC, and -80ºC.

Spine Biomechanics Research Laboratory

The Spine Biomechanics Research Laboratory is equipped for interdisciplinary research. The lab's MTS Bionix servohydraulic testing equipment (with extended columns) permits the application of uniaxial tension or compression together with axial torsion under displacement or load control. The lab also has a fully automated three-dimensional motion measuring system. These devices are used to test the mechanical properties of biomechanical joints and tissues and for biomechanical evaluation of the performance of surgical treatment modalities. Other equipment includes digital cameras, surgical tools, and sensors (i.e., linear variable differential transformers, six-degrees-of-freedom load cell, pressure transducers, and digital inclinometers).

A biaxial biomechanical culture system is available for application of controlled compression and/or shear forces onto the intervertebral disc during culture in order to investigate the disc's biological responses to mechanical loads. This culture system is used in conjunction with an incubator in which cells and tissues can be cultured. Basic equipment for histology and immunohistochemical analyses includes a microtome, ovens, a microscope, and glassware for chemical processes.

Courses

Biomedical Engineering Courses

For current and planned course offerings, visit MyUI.

These advanced courses are offered infrequently depending on the research focus of currently enrolled graduate students: BME:6415 Advanced Biomechanics and Modeling of Soft Tissues and BME:6230 Principles of Magnetic Resonance Imaging.

BME:1010 First-Year Forum **1 s.h.**
Presentations by faculty, graduate students, collaborators from the Carver College of Medicine, and Colleges of Dentistry and Law; may include visits to laboratories and industries.

BME:2010 Professional Seminar: Biomedical Engineering **1 s.h.**
Professional aspects of biomedical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Requirements: sophomore or higher standing.

BME:2200 Systems, Instrumentation, and Data Acquisition **4 s.h.**
Introduction to engineering art and science of modeling, acquisition, and analysis of data collected from living systems; modeling of physiological and biological systems; concepts of analog circuit design, with emphasis on circuits for collecting data for biomedical applications using operational amplifiers, active filters, conversion, and interface to microcomputers; patient safety; clinical circuits; analysis of data using time domain and Fourier domain techniques and models; time domain sampling, and Nyquist sampling theorem. Prerequisites: ENGR:2120. Corequisites: (HHP:3500 or HHP:2400 or BME:2260) and (BIOS:4120 or STAT:3510).

BME:2210 Bioimaging and Bioinformatics **4 s.h.**
Introduction to bioinformatics and biomedical imaging; computer algorithms, machine learning, databases and SQL, the web and web servers, ethics, computer security, genome technology, public warehouses of biological data; medical imaging hardware and software for acquisition and analysis of medical images, especially those collected from X-ray, CT, MR, and ultrasound systems; medical imaging system physics, including interaction of energy with tissue, concepts of image spatial and temporal resolution; applications of filtering, enhancement, and image processing for analysis of medical images. Prerequisites: ENGR:1300 and BIOL:1411. Corequisites: BIOS:4120 or STAT:3510.

BME:2260 Quantitative Physiology 3 s.h.
Introduction to core concepts in human physiology, homeostatic regulation, and structure-function relationships across cellular and organ systems; emphasis on analytical and quantitative methods including topics from dynamical systems, systems analysis, feedback, and control; students use mathematical modeling and computational simulation (MATLAB) to explore sensitivity analysis and emergent phenomena in complex physiological systems. Prerequisites: CHEM:1120 and BIOL:1411 and MATH:2560 and ENGR:1300.

BME:2400 Cell Biology for Engineers 3 s.h.
Introduction to fundamental concepts in quantitative cell biology from an engineering perspective. Prerequisites: BIOL:1411. Corequisites: BIOS:4120 or STAT:3510.

BME:2500 Biomaterials and Biomechanics 4 s.h.
Introduction to mechanics and materials in biological systems; principles of mechanics (stress, strain, motion, fluid flow) presented and used to characterize behavior of biological entities (tendon/ligament, bone and cartilage, blood, blood vessels, heart); principles of material science; role of biomaterials (metals, polymers, ceramics) in medical devices. Prerequisites: ENGR:2110. Corequisites: (HHP:3500 or HPP:2400 or BME:2260) and (BIOS:4120 or STAT:3510).

BME:2710 Engineering Drawing, Design, and Solid Modeling 3 s.h.
Introduction to methods and principles used by engineers to define and describe geometry and topology of engineered components; use of Parametric Technology's Creo Pro (formerly ProEngineer) 3D computer-aided design software; emphasis on elements of design; basic commands used in parametric design to develop spatial visualization skills and the ability to create and understand 3D solid parametric design for assembly and 3D drawing documentation; creation of 3D assemblies and detailed drawings from art of design to part utilization of solid modeling techniques.

BME:3260 Quantitative Physiology 3 s.h.
Introduction to core concepts in human physiology, homeostatic regulation, and structure-function relationships across cellular and organ systems; emphasis on analytical and quantitative methods including topics from dynamical systems, systems analysis, feedback, and control; students use mathematical modeling and computational simulation (MATLAB) to explore sensitivity analysis and emergent phenomena in complex physiological systems. Prerequisites: CHEM:1120 and BIOL:1411 and MATH:2560 and ENGR:1300.

BME:3710 Medical Device Design: The Fundamentals 3 s.h.
Introduction to medical device design process; project-based; development of prototyping and fabrication skills needed for engineering design projects, safety, communication, and teamwork; focus on physical rehabilitation science and assistive technologies; preparation for senior design course sequence. Prerequisites: BME:2500 and BME:2710. Requirements: junior standing.

BME:3995 Undergraduate Research in Biomedical Engineering arr.
Research performed by a biomedical engineering student under mentorship of a faculty supervisor.

BME:3998 Individual Investigations: Biomedical Engineering arr.
Individual projects for biomedical engineering undergraduate students, such as laboratory study, engineering design projects, analysis and simulation of an engineering system, computer software development.

BME:4135 Health Monitoring of Structural and Mechanical Systems 3 s.h.
Measurements, structural modeling, structural analysis, stiffness method, trusses and frames, structural testing, modal analysis. Prerequisites: ENGR:2750. Same as CEE:4135, ME:4235.

BME:4310 Computational Biochemistry 3 s.h.
Introduction to biomolecular modeling and computer simulation techniques; biomolecular structure and molecular driving forces; principles of structural optimization and conformational sampling; applications to biomolecular phenotypes; scripting and molecular visualization in PyMol, setting up and running molecular dynamics simulations using VMD and NAMD, performing refinement of X-ray diffraction data sets using Phenix, and executing Poisson-Boltzmann electrostatic calculations using APBS. Prerequisites: (MATH:1560 or MATH:1860) and CHEM:1120. Recommendations: BMB:3110 or BMB:3120. Same as BMB:4310.

BME:4314 Introduction to Synthetic Biology in the Lab 4 s.h.
Introduction to theory and practice of large-scale design goals of synthetic biology in which various types of DNA instructions, known from decades of research and discovery on specific biological systems, are taken out of context and used to execute various novel tasks designed to solve real-world problems; basic laboratory instruction in standardized construction techniques for stringing together off-the-shelf DNA components that are then introduced into organisms capable of executing the instructional set; controlled experiments to investigate the degree of variability exhibited by engineered genetic constructs. Prerequisites: BIOL:1411. Same as BIOL:4314.

BME:4710 Medical Device Design Studio 3 s.h.
Intermediate medical device design geared towards electro-mechanical design and techniques; builds on foundational knowledge acquired in BME:3710 and BME:2200; focus on advanced prototyping skills including solid modeling, proper electrical component selection, integrating electrical components into hardware design, and testing electro-mechanical device against industry standards. Prerequisites: BME:2200 and BME:2500 and BME:2710 and BME:3710.

BME:4910 Biomedical Engineering Senior Design I 4 s.h.
Individual or group work on a creative design project involving current problems in biomedical engineering; interdisciplinary projects involving biomedical engineering and health sciences faculty members; first semester of a year-long senior capstone design project. Prerequisites: BIOS:4120 or STAT:3510. Requirements: senior standing.

BME:4920 Biomedical Engineering Senior Design II 4 s.h.
Second semester of a year-long senior capstone design project begun in BME:4910. Prerequisites: BME:4910.

BME:5010 Seminar in Biomedical Engineering 0 s.h.
Presentation of recent advances in biomedical engineering. Requirements: graduate standing.

BME:5101 Biomaterials and Implant Design 3 s.h.
Introduction to material and mechanical considerations underlying a broad range of medical implants; emphasis on understanding factors involved in orthopedic device design; major classes of biomaterials; considerations that underlie implant design, use, failure; contemporary areas of biomaterials and implant development. Prerequisites: ENGR:2750 and BME:2500.

BME:5200 Biomedical Signal Processing 3 s.h.
Application of signal processing methods (e.g., Fourier, Laplace, z-transforms) to biomedical problems, such as analysis of cardiac signals, circadian rhythm, the breathing cycle; computer simulation lab. Same as IGPI:5212.

BME:5210 Medical Imaging Physics 3 s.h.
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210. Same as ECE:5470, IGPI:5206.

BME:5240 Deep Learning in Medical Imaging (DLMI) 3 s.h.
Overview of deep learning architectures related to medical image analysis, including convolutional neural networks, auto-encoders, generative adversarial networks, and transformers; solve challenging medical imaging problems using image diagnosis, detection, segmentation, registration, and synthesis; use Python libraries including PyTorch, MONAI, SimpleITK, NumPy, and Matplotlib. Prerequisites: ENGR:3110. Requirements: practical knowledge of programming. Recommendations: ECE:5480, proficiency in Python, and comfortable with calculus, matrix algebra, and basic probability and statistics.

BME:5245 Introduction to Computed Tomography 3 s.h.
Principles of computed tomography (CT) from a signal processing perspective. Focus will be on image reconstruction and representation, with and without contrast, including identifiable sectional anatomy. Includes practical aspects such as CT system configurations, artifacts, and quality assurance. Also includes programming and literature readings. Prerequisites: BME:2210.

BME:5251 Advanced Biosystems 3 s.h.
Biological systems unique to systems analysis; operation under nonequilibrium conditions; tools for systems analysis developed from models of systems at equilibrium (i.e., mechanical systems); fundamental difference between biological and mechanical systems that impact systems analysis; expand knowledge of linear systems and begin work with nonlinear systems; various modeling and analysis approaches useful in biomedical and biomedical engineering research. Prerequisites: BME:2200. Same as IGPI:5251.

BME:5335 Computational Bioinformatics 3 s.h.
Introduction to computational methods used in genomics, genome analysis, biological sequence analysis, sequence database search, expression analysis, and biological network analysis; in-depth coverage of principal genome science challenges and contemporary solutions. Prerequisites: (BIOS:4120 or STAT:2020 or STAT:3510) and (CS:5110 or ENGR:1300).

BME:5340 Contemporary Topics in Biomedical Engineering 3 s.h.
New and emerging areas of biomedical engineering and related fields; specific content varies.

BME:5421 Cell Material Interactions 3 s.h.
Examine the current knowledge of cell and material interactions in terms of biomaterial science, the mechanobiology of native tissues and engineered analogs, and immunity. Prerequisites: BME:2400.

BME:5430 Biotransport 3 s.h.
Energy, mass, and momentum transport in living systems; processes essential for understanding how physiological systems function from molecular level through scale of tissues and organs; fluid mechanics and physiological flows, mass transport, biochemical kinetics and reactions, bioheat transfer; conservation laws; various biological applications. Prerequisites: BME:2500.

BME:5431 Biofabrication for Tissue Engineering 3 s.h.
Understanding the principles and approaches of advanced biofabrication for tissue engineering and regenerative medicine. Biofabrication relies on the use of biological materials and cells to create bioengineered tissue to regenerate or repair diseased or injured tissues and organs, such as respiratory bioengineering. Emphasis is on the fundamental mechanisms, processing conditions, and bioinspired strategies of biofabrication, additive approaches, the integration of molecular sciences, and tissue-level micro-physiological systems. Prerequisites: ENGR:2110 and BME:2400 and BME:2500.

BME:5435 Systems Biology for Biomedical Engineering 3 s.h.
Although systems biology is comprised of both experimental and computational aspects, focus is on computational aspects; introduction to deterministic models of biochemical reaction networks; development and application of mathematical models of reaction networks using systems of nonlinear ordinary differential equations; numerical techniques employed to study system stability and perform simulations in realistic biological contexts. Prerequisites: BME:2400 and BME:2200.

BME:5441 Numerical and Statistical Methods for Bioengineering 3 s.h.
Mathematics and computation as indispensable tools needed to model and explain complex phenomena relevant to biomedical engineering problems; introduction to concepts from linear algebra, differential equations, probability and statistics, nonlinear model regression, optimization, numerical integration, and other numerical methods, all using Matlab. Prerequisites: MATH:2560 and MATH:2550.

BME:5445 Stem Cells in Regenerative Engineering 3 s.h.
Discovery and history of stem cells, how they are defined and grouped, and various techniques for their isolation, creation, culture, and characterization; focus on current state of stem cells in medical research and treatment of human disease, as well as future outlook of their use; particular emphasis placed on practical knowledge that students may find useful as they pursue careers in cellular and tissue engineering. Prerequisites: BME:2400 or BIOL:2723.

BME:5451 Research Methods in Cellular Engineering 3 s.h.
Statistical approaches and principles of assays routinely used in cell engineering; design of experiments and statistical approaches commonly used to analyze biological data including t-tests and one- and two-way ANOVAs, taking into consideration the constraints of cellular engineering research; students design, execute, and analyze data collected from actual experiments; review of recently published literature and analysis of public data sets to understand how each assay and test contributes to understanding of cellular phenotype. Prerequisites: BIOL:1411 and (STAT:3510 or BIOS:4120).

BME:5460 Biomedical Micro Devices and Systems 3 s.h.
Micro-sized devices have impacted a variety of biomedical research and successfully entered the mainstreaming commercial markets, such as biochemical molecule sensing, single-cell transcriptomics, cell sorting, and high-throughput drug screening. These micro-devices include lab-on-a-chip, microfluidic, micro-electro-mechanical, micro total analysis systems, and beyond. Examine the history, theory, design, fabrication, and functional units of micro-sized devices; discuss the state-of-the-art technologies and real-life biomedical applications; fabricate and operate lab-on-a-chip devices. Prerequisites: BME:2500.

BME:5510 Cardiovascular Engineering 3 s.h.
Mechanics—forces and motion—at the heart of the cardiovascular system; fluid and solid mechanics inherent to the motion of the heart, valves, arteries, and veins, and how they facilitate the flow of blood; how to use mechanics to understand and diagnose the severity of cardiovascular disease states and to design implants and devices. Prerequisites: BME:2500.

BME:5525 Cardiopulmonary Design and Modeling 3 s.h.
Cardiac and pulmonary systems; physiologic fluid mechanics critical to tissue/organ function, transport, homeostasis, and disease progression; diseases that afflict cardiopulmonary system; focus on role of fluid mechanics in how diseases develop, progress, and are treated; use of computational modeling tools to simulate disease conditions and understand challenges of designing devices and interventions. Prerequisites: ENGR:2510 and BME:2500.

BME:5540 Quantitative Studies of Respiratory and Cardiovascular Systems 3 s.h.
Quantitative physiological aspects of respiratory and cardiovascular systems; classical linear and nonlinear models, including lumped and distributed parameter models to predict air and blood flows in branching tree structures; biomedical instrumentation for respiratory and cardiovascular measurements; computer models to simulate the behavior of the respiratory and cardiovascular systems in frequency and time domains, under conditions of health and disease; functional and quantitative imaging techniques for the respiratory and cardiovascular systems. Prerequisites: BME:2200.

BME:5610 Musculoskeletal Biomechanics 3 s.h.
Fundamentals of mechanical principles applied to analytical and experimental investigations of musculoskeletal systems, emphasizing biomechanical understanding of clinical problems in bones, tendons, ligaments, cartilages, and musculoskeletal joints. Prerequisites: BME:2500 and ENGR:2750.

BME:5620 Introduction to Applied Biomedical Finite Element Modeling 3 s.h.
Introduction to finite element modeling techniques, software, and analysis with particular emphasis on solid biomechanics applications. Topics include various modeling techniques (pre- and post-processing), element types, convergence, anatomic modeling, model verification and validation, and appropriate communication of finite element results. Prerequisites: ENGR:2750 and BME:2500.

BME:5630 Kinetics of Musculoskeletal Systems 3 s.h.
Principles of kinematic and kinetic analyses of multibody systems; multivariable calculus and vectors and matrices required for multibody kinetic analyses; examples of mathematical modeling and human musculoskeletal system. Prerequisites: ENGR:2710.

BME:5640 Ergonomics of Occupational Injuries 3 s.h.
Epidemiology, surveillance systems, ergonomics, biomechanics, physiology, psychology, legal aspects, and cost control. Prerequisites: BME:2500. Corequisites: ENGR:2750.

BME:5715 Advanced Medical Device Design Studio 3 s.h.
Continuation of BME:3710 and BME:4710; biomedical engineering project based; focus on advanced prototyping and manufacturing techniques of mechanical and electromechanical medical devices; implementation of design controls and testing to medical industry standards for quality and safety; development of project management skills and communication within a team; final course in medical device design sequence. Prerequisites: BME:2200 and BME:2500 and BME:2710 and BME:3710 and BME:4710.

BME:5720 Optimization of Structural Systems 3 s.h.
Advanced topics; optimization of structural topology, shape, and material; finite dimensional dynamic response optimization, sensitivity analysis, distributed parameter systems; projects. Same as CEE:5236.

BME:5998 Individual Investigations: Biomedical Engineering arr.
Individual projects for biomedical engineering graduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

BME:5999 Research: Biomedical Engineering MS Thesis arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of the requirements for the MS with thesis in biomedical engineering. Requirements: graduate standing.

BME:6225 Communicating Science 3 s.h.
Writing and speaking about biomedical engineering and science research; key principles of writing with clarity and cohesion; practice applying these principles on a piece of research writing students are currently working on; review of best practices for presenting research to peers and at conferences; students share their work with peers through writing and presentations.

BME:6230 Principles of Magnetic Resonance Imaging 3 s.h.
MRI is a powerful and versatile imaging modality capable of providing a wide variety of contrast mechanisms and visualizing soft tissues in detail; principles of MRI from a signal processing perspective; MATLAB programming, literature readings, final project, visits to MRI research scanner facility, guest lectures from leading MRI experts; MRI concepts, interpretation of commonly used pulse sequences in clinical MRI, and emerging trends in MRI. Prerequisites: BME:5210 or BME:5200 or ECE:5460. Recommendations: familiarity with digital signal processing.

BME:6415 Advanced Biomechanics and Modeling of Soft Tissues 3 s.h.
Application of continuum mechanics to the study of soft biological tissues and biomaterials; soft tissue mechanical behaviors such as nonlinear elasticity, viscoelasticity, and anisotropy; use of principles from continuum mechanics for characterizing three dimensional deformation of tissues and development of constitutive models to describe material behavior.

BME:7999 Research: Biomedical Engineering PhD Dissertation arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for PhD with thesis in biomedical engineering.

Biomedical Engineering, BSE

The major in biomedical engineering builds on the foundation provided by the BSE core requirements, preparing students for the challenges and opportunities associated with careers in the profession.

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Focus Areas

All BSE students complete a focus area within their chosen major. Students majoring in biomedical engineering select one of four preapproved focus areas: bioimaging, biomechanics and biomaterials, cellular engineering, or computational bioengineering. Each focus area may be designated pre-medicine by completing a specific set of electives.

Bioimaging

Bioimaging represents the acquisition, processing, and visualization of structural or functional images of living systems. Medical imaging and image processing are integral to the extraction of anatomical and biological information from the systems level down to the molecular level. Bioimaging clinically seeks to reveal, diagnose, or examine diseases and also investigates normal anatomy and physiology.

Biomechanics and Biomaterials

Biomechanics is the study of structure and function. It is the application of principles from classical mechanics to problems in biological systems. This focus area emphasizes cardiovascular and/or musculoskeletal biomechanics. The study of biomaterials plays an important role in the design of implants and surgical instrumentation for both cardiovascular and musculoskeletal applications.

Cellular Engineering

Cellular engineering involves the application of engineering principles to problems in cellular and molecular biology, particularly as they relate to human health. The goal of this focus area is to equip students with the quantitative tools necessary to understand, manipulate, and control cellular and subcellular processes for a range of biomedical applications, including those related to stem cells, tissue engineering, and regenerative medicine.

Computational Bioengineering

Computational bioengineering is an interdisciplinary field that develops methods and software tools for modeling and understanding biological data and systems that are typically represented by large amounts of data. Computational bioengineering is a combination of computer science, statistics, informatics, and engineering to analyze and interpret biological and genomic data. It is used for the identification of candidate genes to better understand the genetic basis of disease, unique adaptations, and differences between populations.

Educational Objectives

The department provides undergraduate students with a contemporary education in a multidisciplinary field of engineering. Its objective is to produce graduates who:

- advance the biomedical field through the responsible analysis and development of devices, systems, processes, and policies that improve human health;
- pursue a wide range of career options, including those in industry, academia, and medicine; and
- collaborate on multidisciplinary teams and become leaders in their chosen fields.

Requirements

The Bachelor of Science in Engineering (BSE) with a major in biomedical engineering requires a minimum of 128 s.h. of credit, plus up to two 1 s.h. departmental seminars. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1529] in the catalog. 6 s.h. of a student's major courses fulfill the collegiate curriculum's basic science and college-level math requirement. Students completing the major in biomedical engineering fulfill the collegiate statistics requirement through BIOS:4120 Introduction to Biostatistics or STAT:3510 Biostatistics.

The major in biomedical engineering may include the following departmental seminars depending on when a student declares the major.

Course #	Title	Hours
BME:1010	First-Year Forum	1
BME:2010	Professional Seminar: Biomedical Engineering	1

The program has been designed carefully to enable students to satisfy the entrance requirements of the Graduate College [p. 1682].

The BSE with a major in biomedical engineering requires the following coursework.

Requirements	Hours
Collegiate Curriculum	49
Basic Science and College-Level Math, from Major Requirements or Focus Area coursework	6
Major Requirements	40
Focus Area	33-34

Major Requirements

Major requirements include a set of common courses (38 s.h.) and two capstone design courses (8 s.h.).

Common Courses

Students in the bioimaging or computational bioengineering focus areas may choose between ENGR:2130 Thermodynamics or ENGR:3110 Introduction to Artificial Intelligence and Machine Learning in Engineering.

Course #	Title	Hours
All of these:		
BME:2200	Systems, Instrumentation, and Data Acquisition (with lab)	4
BME:2210	Bioimaging and Bioinformatics (with lab)	4
BME:2260	Quantitative Physiology	3
or HHP:2400	Fundamentals of Human Physiology	
BME:2400	Cell Biology for Engineers (with lab)	3
BME:2500	Biomaterials and Biomechanics (with lab)	4
BIOL:1411	Foundations of Biology	4
CHEM:1120	Principles of Chemistry II	4
ENGR:2110	Statics	2
ENGR:2120	Electrical Circuits	3
ENGR:2130	Thermodynamics	3
PHYS:1612	Introductory Physics II (with lab)	4

Capstone Design Courses

Course #	Title	Hours
Both of these:		
BME:4910	Biomedical Engineering Senior Design I	4
BME:4920	Biomedical Engineering Senior Design II	4

Focus Area

Students must select focus area courses according to guidelines established by the Roy J. Carver Department of Biomedical Engineering. Biomedical engineering students choose one of four preapproved focus areas: bioimaging [p. 1544], biomechanics and biomaterials [p. 1545], cellular engineering [p. 1545], or computational bioengineering [p. 1546]. For details about focus areas and their requirements, visit Curriculum Focus Areas on the department's website.

Each focus area has a group of four required courses (12–13 s.h.) and a list of suggested electives (21 s.h.).

Pre-Medicine Focus Area Electives

Students who choose to pursue pre-medicine can select any focus area and complete five of the following courses (16 s.h.) as their additional electives.

Course #	Title	Hours
Five of these:		
BIOL:1412	Diversity of Form and Function	4
BIOL:2512	Fundamental Genetics	4
BMB:3110	Biochemistry	3
CHEM:2210	Organic Chemistry I	3
CHEM:2220	Organic Chemistry II	3
CHEM:2410	Organic Chemistry Laboratory	3

Bioimaging

Required Bioimaging Courses

Course #	Title	Hours
All of these:		
BME:5210/ ECE:5470/IGPI:5206	Medical Imaging Physics	3
ECE:3330/IGPI:3330	Introduction to Software Design	3
ECE:5480/IGPI:5480	Digital Image Processing	3
ENGR:2730	Computers in Engineering	3

Bioimaging Electives

Course #	Title	Hours
Two of these:		
BME:5200/ IGPI:5212	Biomedical Signal Processing	3
BME:5240	Deep Learning in Medical Imaging (DLMI)	3
ECE:5330/IGPI:5331	Graph Algorithms and Combinatorial Optimization	3
ECE:5450/IGPI:5450	Machine Learning	3
ECE:5490	Multi-Dimensional Image Analysis Tools and Techniques	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering (if not taken to fulfill major requirements)	3

Additional Electives–Bioimaging

The following courses are suggested additional electives for the bioimaging focus area. Students are encouraged to consult their academic advisor when selecting electives.

Course #	Title	Hours
At least 15 s.h. from these:		
BME:5251/ IGPI:5251	Advanced Biosystems	3
BME:5441	Numerical and Statistical Methods for Bioengineering	3
ECE:5460/IGPI:5460	Digital Signal Processing	3
CS:2210	Discrete Structures	3
CS:2230	Computer Science II: Data Structures	4
ENGR:2130	Thermodynamics (if not taken to fulfill major requirements)	3
HHP:2100	Human Anatomy	3
HHP:4250	Human Pathophysiology	3
HHP:4260	Respiratory Pathophysiology	3
MATH:3550	Engineering Vector Calculus	3
MATH:3800/ CS:3700	Introduction to Numerical Methods	3
Additional courses from the "Bioimaging Electives" list		3
Courses from the "Pre-Medicine Focus Area Electives" list		3-4

Biomechanics and Biomaterials

Required Biomechanics and Biomaterials Courses

Course #	Title	Hours
All of these:		
ENGR:2510	Fluid Mechanics (with lab)	4
ENGR:2710	Dynamics	3
ENGR:2720	Materials Science	3
ENGR:2750	Mechanics of Deformable Bodies	3

Biomechanics and Biomaterials Electives

Course #	Title	Hours
Two of these:		
BME:2710	Engineering Drawing, Design, and Solid Modeling	3
BME:5101	Biomaterials and Implant Design	3
BME:5510	Cardiovascular Engineering	3
BME:5525	Cardiopulmonary Design and Modeling	3
BME:5610	Musculoskeletal Biomechanics	3

Additional Electives–Biomechanics and Biomaterials

The following courses are suggested additional electives for the biomechanics and biomaterials focus area. Students are encouraged to consult their academic advisor when selecting electives.

Course #	Title	Hours
At least 15 s.h. from these:		
BME:3710	Medical Device Design: The Fundamentals	3
BME:4710	Medical Device Design Studio	3
BME:5421	Cell Material Interactions	3
BME:5430	Biotransport	3
BME:5431	Biofabrication for Tissue Engineering	3
BME:5441	Numerical and Statistical Methods for Bioengineering	3
BME:5460	Biomedical Micro Devices and Systems	3
BME:5540	Quantitative Studies of Respiratory and Cardiovascular Systems	3
BME:5620	Introduction to Applied Biomedical Finite Element Modeling	3
BME:5630	Kinetics of Musculoskeletal Systems	3
BME:5715	Advanced Medical Device Design Studio	3
HHP:2100	Human Anatomy	3
HHP:4130	Skeletal Muscle Physiology	3
HHP:4460	Cardiovascular Physiology	3
ISE:2360 or ME:2300	Design for Manufacturing Manufacturing Processes	3
MATH:3550	Engineering Vector Calculus	3
ME:4110/CEE:4515	Computer-Aided Engineering	3
OEH:4310	Occupational Ergonomics: Principles	3
Additional courses from the "Biomechanics and Biomaterials Electives" list		3
Courses from the "Pre-Medicine Focus Area Electives" list		3-4
May include one of these:		
CEE:4533/IGPI:4115	Finite Element I	3
ME:4117	Finite Element Analysis	3

Cellular Engineering

Required Cellular Engineering Courses

Course #	Title	Hours
All of these:		
BME:5421	Cell Material Interactions	3
BME:5430	Biotransport	3
BME:5435	Systems Biology for Biomedical Engineering	3
ENGR:2750	Mechanics of Deformable Bodies	3

Cellular Engineering Electives

Course #	Title	Hours
Two of these:		
BME:4310/ BMB:4310	Computational Biochemistry	3
BME:5441	Numerical and Statistical Methods for Bioengineering	3
BME:5445	Stem Cells in Regenerative Engineering	3
BME:5451	Research Methods in Cellular Engineering	3
ECE:5480/IGPI:5480	Digital Image Processing	3

Additional Electives–Cellular Engineering

The following courses are suggested additional electives for the cellular engineering focus area. Students are encouraged to consult their academic advisor when selecting electives.

Course #	Title	Hours
At least 15 s.h. from these:		
BME:5431	Biofabrication for Tissue Engineering	3
BME:5460	Biomedical Micro Devices and Systems	3
BME:5525	Cardiopulmonary Design and Modeling	3
BIOL:1412	Diversity of Form and Function	4
BIOL:2512	Fundamental Genetics	4
BMB:3120	Biochemistry and Molecular Biology I	3
BMB:3130	Biochemistry and Molecular Biology II	3
ENGR:2510	Fluid Mechanics	4
ENGR:2710	Dynamics	3
ENGR:2720	Materials Science	3
ENGR:2730	Computers in Engineering	3
MATH:3550	Engineering Vector Calculus	3

MATH:4750	Introduction to Mathematical Biology	3
ME:5179/CEE:5179	Continuum Mechanics	arr.
Additional courses from the "Cellular Engineering Electives" list		3
Courses from the "Pre-Medicine Focus Area Electives" list		3-4

Computational Bioengineering

Required Computational Bioengineering Courses

Course #	Title	Hours
All of these:		
BME:4310/ BMB:4310	Computational Biochemistry	3
BME:5335	Computational Bioinformatics	3
ECE:3330/IGPI:3330	Introduction to Software Design	3
ENGR:2730	Computers in Engineering	3

Computational Bioengineering Electives

Course #	Title	Hours
Two of these:		
BME:5240	Deep Learning in Medical Imaging (DLMI)	3
ECE:5330/IGPI:5331	Graph Algorithms and Combinatorial Optimization	3
ECE:5820/CS:5820	Software Engineering Languages and Tools	3
ENGR:2130	Thermodynamics (if not taken to fulfill major requirements)	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering (if not taken to fulfill major requirements)	3

Additional Electives–Computational Bioengineering

The following courses are suggested additional electives for the computational bioengineering focus area. Students are encouraged to consult their academic advisor when selecting electives.

Course #	Title	Hours
At least 15 s.h. from these:		
BME:5435	Systems Biology for Biomedical Engineering	3
BME:5441	Numerical and Statistical Methods for Bioengineering	3
ANTH:2320/ GHS:2320	Origins of Human Infectious Disease	3
BIOL:2512	Fundamental Genetics	4
BIOL:3212/ IGPI:3212	Bioinformatics for Beginners	3
BIOL:3314/ IGPI:3314	Genomics	3
CHEM:5431	Statistical Thermodynamics I	3
CS:2210	Discrete Structures	3
CS:2230	Computer Science II: Data Structures	4
CS:3330	Algorithms	3
CS:5350	Design and Analysis of Algorithms	3
ECE:5450/IGPI:5450	Machine Learning	3
ECE:5800/CS:5800	Fundamentals of Software Engineering	3
ECE:5995	Contemporary Topics in Electrical and Computer Engineering (when topic is applied machine learning)	3
MATH:3550	Engineering Vector Calculus	3
MATH:4750	Introduction to Mathematical Biology	3
Additional courses from the "Computational Bioengineering Electives" list		3
Courses from the "Pre-Medicine Focus Area Electives" list		3-4

Combined Programs

Undergraduate to Graduate (U2G Programs)

Bachelor of Science in Engineering students in biomedical engineering may pair their degree with an Undergraduate to Graduate (U2G) program, which allows the student to earn a bachelor's and master's degree in five years of study. BME undergraduates are eligible to apply for the following U2G graduate programs and any other participating U2G programs. See the Undergraduate to Graduate (U2G) website for available programs.

BSE/MS in Biomedical Engineering

The College of Engineering offers a combined Bachelor of Science in Engineering/Master of Science for biomedical engineering undergraduate students who intend to earn an MS in biomedical engineering. Students admitted to this program are allowed to apply up to 12 s.h. of graduate coursework towards both the BSE and MS degree requirements and attend and participate in the departmental graduate seminar. Students may begin to work on their coursework or master's thesis starting as early as the summer following the junior year of undergraduate studies.

Students applying to the BSE/MS program in biomedical engineering must meet the following criteria at the time of application:

- a minimum of 80 s.h. completed towards their BSE degree;
- a cumulative grade-point average of 3.50 or higher; and
- identification of a research mentor if pursuing a thesis master's degree.

BSE/MPH (Occupational and Environmental Health Subprogram)

The combined BSE in biomedical engineering/MPH with the occupational and environmental health subprogram enables undergraduate students majoring in biomedical engineering to begin work toward the MPH degree while completing their

bachelor's degree. Students may count 15 s.h. of credit toward both the BSE and the MPH degree requirements. See the Master of Public Health, MPH [p. 2092] (occupational and environmental health subprogram) in the catalog.

BSE/MS in Electrical and Computer Engineering

BSE students majoring in biomedical engineering who are interested in earning a Master of Science in electrical and computer engineering may apply to the combined BSE/MS program offered by the College of Engineering. The combined program permits students to count a limited amount of credit toward the requirements of both degrees. See the MS in electrical and computer engineering [p. 1631] in the catalog.

BSE (Biomechanics and Biomaterials Track)/MS in Occupational and Environmental Health (Industrial Hygiene Subprogram)

BSE students majoring in biomedical engineering in the biomechanics and biomaterials track who are interested in earning a Master of Science in occupational and environmental health with an industrial hygiene subprogram may apply to the combined BSE/MS program offered by the College of Engineering and the College of Public Health. The combined program permits students to count a limited amount of credit toward the requirements of both degrees, enabling them to begin the study of public health before they complete the bachelor's degree. See the MS in occupational and environmental health Undergraduate to Graduate (U2G) information on the Department of Occupational and Environmental Health (College of Public Health) website.

Career Advancement

BSE graduates with a major in biomedical engineering may pursue career opportunities in biomedical industries, such as design and development of biomedical instrumentation, diagnostic aids, life support systems, prosthetic and orthotic devices, and man-machine systems; or they may pursue traditional career opportunities in industry, such as those rooted in mechanical or electrical engineering disciplines. Other career options are available in government (Food and Drug Administration, Environmental Protection Agency, National Institutes of Health, Veterans Affairs). Some biomedical engineering graduates elect to continue formal education in engineering, medicine, or law. On average, 93–98% of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Biomedical Engineering, BSE

Course	Title	Hours
First Year		
Fall		
RHET:1030	Rhetoric: Writing and Communication [a]	4
CHEM:1110	Principles of Chemistry I [b, c]	4
MATH:1550	Engineering Calculus I [b, d]	4
ENGR:1100	Introduction to Engineering Problem Solving [e]	3
ENGR:1000	Engineering Success for First-Year Students [e]	1

Focus Area: additional elective [k, n]		3
Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall) [p]		
	Hours	**17**
	Total Hours	**131**

a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.

b Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.

c Enrollment in chemistry courses requires completion of a placement exam.

d Enrollment in math courses requires completion of a placement exam.

e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.

f Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

g Students in the bioimaging or computational bioengineering focus areas can choose to take either ENGR:2130 or ENGR:3110; students in the biomechanics and biomaterials or cellular engineering focus areas are required to take ENGR:2130. ENGR:2130 is typically offered in the fall, spring, and summer session. ENGR:3110 is typically offered in the Spring semester only.

h BIOS:4120 typically is offered in fall, spring, and summer sessions; STAT:3510 typically is offered in fall and spring sessions. Check MyUI for course availability since offerings are subject to change.

i BME:2260 was created in fall 2023, and its frequency of availability is to be determined. HHP:2400 typically is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.

j All BME students are required to take the BME core courses (BME:2200, BME:2210, BME:2400, and BME:2500). These courses can be taken in any order

k Students majoring in biomedical engineering select one of four preapproved focus areas: bioimaging, biomechanics and biomaterials, cellular engineering, or computational bioengineering. Each focus area consists of a group of four required courses (12-13 s.h.), two focus area-specific elective courses (6 s.h.), and additional suggested electives (15 s.h.). See General Catalog or consult an advisor for more information.

l See General Catalog for list of approved course subjects.

m See General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI.

n Students who choose to pursue pre-medicine can select any focus area and take five of the following courses as their additional electives: BIOL:1412, BIOL:2512, BMB:3110, CHEM:2210, CHEM:2220, or CHEM:2410.

o Students select a course from one of two GE CLAS Core areas: Understanding Cultural Perspectives or Values and Society.

p Please see Academic Calendar, on Office of the Registrar website, for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Degree Services.

Biomedical Engineering, MS

Graduate study in biomedical engineering prepares students to use contemporary methods at an advanced level during a professional career in engineering design, development, and research.

Each student's course of study is based on individual background, career objectives, and sound academic practice. An individual program for each student may be developed from courses offered by the Roy J. Carver Department of Biomedical Engineering and other departments, especially mechanical engineering, electrical engineering, physiology, mathematics, and biological sciences. Students who want a more general program may combine emphases, while those who want some specialization in a particular field can achieve their goals through the combination of departmental courses and appropriate electives from other departments in the College of Engineering and the university.

Learning Outcomes

By completing the graduate curriculum in biomedical engineering, students will be able to:

- demonstrate broad knowledge of the field of biomedical engineering and deep knowledge in their specific area of study;
- communicate complex technical ideas concisely and effectively to both general and specialized audiences through verbal, visual, and written formats;
- formulate research questions, pose testable hypotheses, employ methods that enhance the reproducibility of research, and apply critical thinking skills to produce solutions to complex engineering problems that intersect with biology and human health; and
- operate with professionalism and under standards of ethical conduct.

Requirements

The Master of Science program in biomedical engineering requires a minimum of 30 s.h. of graduate credit, with or without a thesis. Students must maintain a UI cumulative grade-point average of at least 2.75 in all work for the degree. The MS may be a terminal degree or a step toward the PhD.

All MS students (thesis or nonthesis) must successfully complete the Graduate Core Courses as part of their graduate curriculum during their first year of study. Additionally, students are required to complete 18 s.h. of graduate-level coursework in the College of Engineering over the course of their studies. BSE/MS fast-track students may include courses taken during year four and/or year five.

A tentative plan of study for each student is determined through consultation with an advisor. An MS committee of at least three faculty members, including at least two tenure-track biomedical engineering faculty, is required.

Graduate Core Courses

Course #	Title	Hours
ENGR:7270	Engineering Ethics	1
HHP:3550	Human Physiology With Laboratory	5
ME:5113	Mathematical Methods in Engineering (or equivalent graduate mathematics course; approval of academic advisor required before registering)	3

Depending upon a student's performance in Graduate Core Courses and the nature of their research project, the student's examining committee may specify additional coursework to be completed to satisfy the Graduate Core Courses requirement.

Graduate Core Courses may be substituted by other equivalent courses at the discretion of the student's examining committee. Equivalent coursework taken as part of a student's undergraduate or graduate studies prior to starting the MS program at the University of Iowa may satisfy one or more of the Graduate Core Courses requirements. Students who wish to request a substitution or a waiver of HHP:3550 Human Physiology With Laboratory or ME:5113 Mathematical Methods in Engineering must submit a core course substitution or waiver form. Forms may be obtained from the graduate program coordinator.

Thesis Students

Students who choose the thesis program may count no more than 6 s.h. of thesis research and writing credit toward the degree. All thesis students must successfully complete the final examination administered by their committee, which consists of a written thesis and an oral presentation and defense to the examining committee.

Nonthesis Students

Students who choose the nonthesis program must earn at least 6 s.h. of credit in courses numbered 5000 or above. There is no oral or written exam required for the nonthesis master's degree.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants who have earned a baccalaureate or postbaccalaureate degree in engineering or in the mathematical or physical sciences with a grade-point average (GPA) of at least 3.00 are eligible to be considered for admission to the Master of Science program.

Reference letters, research interests, previous graduate GPA, and other factors may be considered in admission decisions.

Career Advancement

Biomedical engineers with MS degrees can pursue career opportunities in the health care industry in the fields of biomedical devices, diagnostic equipment, and software. Graduates have started careers in research, design, development, sales, and entrepreneurship, and they advance to administrative and leadership positions in their organizations. Graduates also have careers with health care providers, such as in hospitals, or use their biomedical engineering expertise to advance careers in medicine and law. Faculty mentors assigned to graduate students aid in their professional development. Students are exposed to

opportunities through seminar speakers who have relevant expertise and are invited to campus.

The Graduate College offers numerous career advancement opportunities and professional development programs for graduate students. Ongoing program offerings, news, and announcements can be found under Grad Success Center on the Graduate College website.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

c All students must complete this course during first year fall semester; does not count toward the total hours required for the degree.

d Course substitution or waiver allowed upon approval.

e Or equivalent graduate level mathematics course; advisor approval required prior to registration.

f 18 s.h. must be graduate coursework at the 5000 level or above from the College of Engineering or courses from the approved elective list; work with faculty advisor to determine appropriate graduate coursework and sequence.

g Completion of all degree requirements.

Biomedical Engineering, PhD

Graduate study in biomedical engineering prepares students to use contemporary methods at an advanced level during a professional career in engineering design, development, and research.

Each student's course of study is based on individual background, career objectives, and sound academic practice. An individual program for each student may be developed from courses offered by the Roy J. Carver Department of Biomedical Engineering and other departments, particularly mechanical engineering, electrical engineering, physiology, mathematics, and biological sciences. Faculty members in the department have teaching and research expertise in cardiovascular and fluid biomechanics, musculoskeletal biomechanics, biomaterials and tissue engineering, bioinstrumentation, biosystems, biomedical imaging, biological signal analysis, bioinformatics and computational biology, pulmonary engineering, computational neuroscience, and other allied fields.

PhD programs may center on any one of the previously described areas through the choice of appropriate coursework and research topic.

Learning Outcomes

By completing the graduate curriculum in biomedical engineering, students will be able to:

- demonstrate broad knowledge of the field of biomedical engineering and deep knowledge in their specific area of study;
- communicate complex technical ideas concisely and effectively to both general and specialized audiences through verbal, visual, and written formats;
- formulate research questions, pose testable hypotheses, employ methods that enhance the reproducibility of research, and apply critical thinking skills to produce solutions to complex engineering problems that intersect with biology and human health; and
- operate with professionalism and under standards of ethical conduct.

Requirements

The Doctor of Philosophy program in biomedical engineering requires a minimum of 72 s.h. of graduate work, including acceptable transfer credit. At least 42 s.h. must be earned in formal coursework taken after the BSE is awarded, and at least 12 s.h. must be earned through research and the thesis. Students who enter with an MS may count a maximum of 30 s.h. of approved transfer credit toward the PhD, but they must earn 39 s.h. of graduate credit at the University of Iowa, including at least 12 s.h. in research and the thesis. Based on a student's research progress, examination results, or other measures, the graduate committee may require additional formal coursework to strengthen perceived areas of weakness.

All PhD students must successfully complete the Graduate Core Courses as part of their graduate curriculum. Students are expected to complete them during their first year of study. Additionally, students must complete 18 s.h. of graduate-level coursework in the College of Engineering over the course of their studies. Medical scientist training program students are required to complete 12 s.h. of graduate-level coursework in the College of Engineering.

Graduate Core Courses

Course #	Title	Hours
ENGR:7270	Engineering Ethics	1
HHP:3550	Human Physiology With Laboratory	5
ME:5113	Mathematical Methods in Engineering (or equivalent graduate mathematics course; approval of academic advisor required before registering)	3

Depending upon a student’s performance in Graduate Core Courses and the nature of their research project, the student’s examining committee may specify additional coursework to be completed to satisfy the Graduate Core Courses requirement.

Graduate Core Courses may be substituted by other equivalent courses at the discretion of the student’s examining committee. Equivalent coursework taken as part of a student’s undergraduate or graduate studies prior to starting the biomedical engineering graduate program at the University of Iowa may satisfy one or more of the Graduate Core Courses requirements. Students who wish to request a substitution or a waiver for HHP:3550 Human Physiology With Laboratory or ME:5113 Mathematical Methods in Engineering must submit a core course substitution or waiver form. Forms may be obtained from the graduate program coordinator.

Admission to the PhD program is conditional until students successfully complete a qualifying examination. The biomedical engineering faculty administers the exam and decides whether a student's performance is adequate for admission to the PhD program.

Admission to PhD candidacy requires a grade-point average (GPA) of at least 3.00 on all graduate work at the University of Iowa. Upon completion of the coursework specified in the plan of study and with the required GPA and the advisor's recommendation, students are admitted to the comprehensive examination by their committee.

After satisfactorily completing the comprehensive examination, students must complete and defend their dissertations at the final examination. Requirements for the PhD generally can be completed in three to four years beyond the master's degree.

Combined Programs

PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical engineering in a combined degree program offered by the Carver College of Medicine and the College of Engineering. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Reference letters, research interests, previous graduate grade-point average, and other factors may be considered in admission decisions.

Admission to the Doctor of Philosophy in biomedical engineering is conditional until students successfully complete a qualifying examination.

Career Advancement

Biomedical engineers with PhDs can pursue career opportunities in the health care industry in the fields of biomedical devices, diagnostic equipment, and software. Graduates have started careers in research, design, development, sales, and entrepreneurship, and they have advanced to administrative and leadership positions in their organizations. Graduates also have careers with health care providers, such as in hospitals, or use their biomedical engineering expertise to advance careers in medicine and law. In addition, PhD graduates have careers in academia or at research institutions where they advance the understanding of human health. Faculty mentors assigned to graduate students aid in their professional development. Students are exposed to opportunities through seminar speakers who have relevant expertise and are invited to campus.

The Graduate College offers numerous career advancement opportunities and professional development programs for graduate students. Ongoing program offerings, news, and announcements can be found under Grad Success Center on the Graduate College website.

Chemical and Biochemical Engineering

Chair

- Jun Wang

Undergraduate major: chemical engineering (BSE)

Graduate degrees: MS in chemical and biochemical engineering; PhD in chemical and biochemical engineering

Faculty: https://engineering.uiowa.edu/cbe/people

Website: https://engineering.uiowa.edu/cbe

Chemical and biochemical engineers integrate chemical, physical, biological, and computational elements to solve problems and create products that benefit society. Chemical engineers drive innovation in a wide variety of technologies, including energy and fuels, computer chips, pharmaceuticals, biotechnology, advanced materials, consumer goods, waste treatment, decarbonization, and more. Biochemical engineers work on challenges such as turning crops into sustainable fuels and mass producing vaccines.

The Department of Chemical and Biochemical Engineering has six research areas: air quality and climate, biological and pharmaceutical engineering, machine learning and simulation, polymers and advanced materials, remote and smart sensing, and sustainable energy and clean water. Additionally, the program offers 13 different focus areas for undergraduates to specialize in, providing them with the skills and knowledge to excel in these fields.

The program offers a wide range of opportunities and support to help each student succeed, including personalized mentoring, a strong alumni network, and hands-on learning. Students can enhance their education by participating in co-ops and internships, conducting undergraduate research, pursuing minors and certificates, and choosing a five-year undergraduate to graduate option, earning both a bachelor's and master's degree in just five years.

As part of their training, Iowa chemical and biochemical engineers learn to design things in ways that are ethical and responsible. This includes considering health, employee safety, and global impact. The University of Iowa is a leader in chemical process safety education, teaching effective communication and environmentally conscious design.

Programs

Undergraduate Program of Study

Major

- Major in Chemical Engineering (Bachelor of Science in Engineering) [p. 1560]

Graduate Programs of Study

- Master of Science in Chemical and Biochemical Engineering [p. 1570]
- Doctor of Philosophy in Chemical and Biochemical Engineering [p. 1573]

Facilities

Chemical engineers at the University of Iowa, whether undergraduates or graduate students, benefit from the extensive resources of a top research university. Some of the key facilities and resources available to them include libraries, computing centers, machine and electronics shops, a tool library, prototyping and design studios, chemical analysis and microscopy resources, genetic, cell, and tissue analysis facilities, tutoring and writing centers, and other specialized research infrastructure. These resources are utilized according to each student's customized curriculum and research needs, ensuring they get the most out of their education and training. Specific laboratories maintained by the Department of Chemical and Biochemical Engineering to support undergraduate courses are listed as follows.

Materials Science Laboratory

The Materials Science Laboratory allows students in ENGR:2720 Materials Science to delve deeper into the concepts taught in class. It features tensiometers, hardness testers, an Izod impact tester, a contact angle goniometer, and heat treatment/sintering furnaces to characterize and examine the mechanical properties of a variety of materials. Additionally, students use optical microscopes, metallography specimen kits, and crystallography packages to gain hands-on experience of how material properties are related to their structure.

Chemical Engineering Laboratory

The Chemical Engineering Laboratory provides hands-on learning for undergraduate students in CBE:3150 Thermodynamics/Transport Laboratory and CBE:3155 Chemical Reaction Engineering/Separations Laboratory. The lab is equipped for student experimentation in thermodynamics, fluid flow, heat transfer, mass transfer, chemical reaction engineering, and separations. Much of the lab equipment is made of transparent materials so students can see exactly how things work inside. Additional equipment includes a fluid friction apparatus, a jacketed kettle, and a membrane gas separator. Students use state-of-the-art portable analytical devices in their investigations, including densitometers, polarimeters, and refractometers.

Additionally, a wide array of small equipment is available to support laboratory projects and demonstrations in chemical engineering courses and for use by students performing independent investigations or student groups competing in national chemical engineering contests.

Chemical Process Safety Laboratory

The Chemical Process Safety Laboratory is an integral part of CBE:3125 Chemical Process Safety. Through a series of experiments, students learn about flammability, reactivity, explosions, safety valve design, and electrostatics—all crucial for working safely in the chemical industry. The laboratory is equipped with two MiniFlash automatic flash point testers (closed cup), an advanced reactive system screening tool (ARSST), a minimum ignition energy (MIE) apparatus, a flammability chamber, a modified Hartmann tube, a Hartmann bomb, a liquid conductivity apparatus, a powder chargeability apparatus, a powder volume resistivity apparatus, a Van de Graaff generator, two high impedance electrometers, a field meter, a Faraday cage, and relief sizing software.

Biochemical Engineering Laboratory

The Biochemical Engineering Laboratory is an integral part of CBE:3205 Introduction to Biochemical Engineering. Students use this equipment to perform recombinant DNA experiments and to study the growth and metabolism of microorganisms. The lab is equipped with two controlled New Brunswick BioFlo/CelliGen 115 bioreactors, electrophoresis apparatus, and a thermocycler.

Process Control Laboratory

The Process Control Laboratory is used in CBE:4105 Process Dynamics and Control in Design and CBE:5199 Contemporary Topics: Chemical and Biochemical Engineering. In this lab, students use industrial-grade computer-controlled systems to manage flow, levels, composition, and temperature in pilot-scale devices. Students learn software tools, including DeltaV, a common industrial control system, and LabVIEW, a widely used scientific and engineering measurement and automation system.

Learning modules in the Process Dynamics lab focus on actuators (such as valves and motors), valve positioners, sensors, SCADA (supervisory control and data acquisition) software, distributed control system software, control block diagrams, piping and instrumentation diagrams, mathematical modeling of dynamic systems, and the specification of mathematical transfer functions for chemical, physical, and control operations.

CBE:5199 Contemporary Topics: Chemical and Biochemical Engineering is an introduction to the design and programming of DeltaV-based control systems. Students create a DeltaV operator screen for hardware selected from the process control lab. This allows students to integrate hardware and software and achieve computer control by implementing all project phases: (i) design, (ii) programming, (iii) hardware integration, and (iv) testing and troubleshooting.

Graduate Facilities and Laboratories

The department offers a wide variety of facilities to support and develop research activities.

Air Quality, Climate, Remote Sensing, and Smart Sensing Research Thrusts

The department maintains extensive facilities for computational, field, and laboratory studies of air pollution in the context of climate change. Part of this infrastructure is housed at the Center for Global and Regional Environmental Research (CGRER). The center occupies 5,000 square feet of lab and office space on the fourth floor of the Iowa Advanced Technology Laboratories. CGRER members have dedicated queues and storage within the University of Iowa's extensive High Performance Computing (HPC) facility.

Individual professors maintain a wide variety of air pollution sampling equipment, with a focus on both aerosol and gas-phase physics and chemistry in the context of climate, weather, and human health.

The Atmospheric and Environmental Research (AER) Lab has a diverse research portfolio that encompasses three research themes: development of remote sensing theory and algorithms for characterizing atmospheric (aerosol) particles and surface emissions (especially from fires); development and application of chemistry-aware atmospheric models and observation data to studies in air quality, weather, and climate; and interdisciplinary research via collaborative teamwork in such areas as air quality and public health, irrigation and climate change, environmental monitoring and solutions via community science and engagement.

The Iowa Atmospheric Sensor Development Laboratory (IASDL) is a fully equipped research laboratory dedicated to developing new remote sensing instruments to study the Earth's atmosphere. Focused on laser-based, or lidar, remote sensing, researchers in IASDL develop sensors for use in ground-based, airborne, and spaceborne applications. Advanced technologies and onboard machine learning processing are the basis for creating affordable sensors that produce real-time data products to impact air quality, human health, and decision-making. Researchers in IASDL frequently work with the Operator Performance Laboratory, which is home to several research aircraft, and collaborate with researchers at NASA and other organizations.

Biochemical Engineering

Biochemical engineering laboratories provide facilities for the preparation of biological media and the cultivation of organisms, as well as for the separation and analysis of biomolecules. This equipment includes biological incubators and floor incubator shakers, agitated and airlift bioreactors, light microscopes, autoclaves, Vi-Cell cell counter, thermocycler for polymerase chain reaction (PCR) amplification of DNA, high- and low-speed centrifuges, UV-Vis spectrophotometers, a lyophilizer, biological safety cabinets, and an anaerobic glove box. Phase-contrast and epifluorescence microscopes, gel electrophoresis systems, gas chromatography units with flame ionization and electron capture detectors, and several high-performance liquid chromatography systems with refractive index and photodiode array detectors are available for the characterization of microorganisms and constituent biomolecules.

Through collaborative research agreements, graduate students also have access to specialized facilities for electron microscopy, large-scale fermentation, protein structure, recombinant DNA research, and tissue culture/hybridoma; the Flow Cytometry Facility; and the High Resolution Mass Spectrometry Facility.

Biomedical Engineering

The biomedical engineering laboratories house particle technology equipment including microemulsion equipment for drug encapsulation, sonicators, benchtop scale spray dryers, laser diffraction particle sizer, zetapotentiometer; DNA preparation equipment, gel electrophoresis apparatus; interfacial stress rheometer, surface tensiometer, UV-Vis/fluorescent plate reader, high performance liquid chromatograph, luminometer, lyophilizer, custom-built simulated cough machine, microscopes, incubators, wet chemistry equipment, rotary shakers, incubated plate shakers, autoclave, centrifuges, and laboratory computers. Cell culture and bacterial culture facilities are housed adjacent to the laboratories.

Graduate students also have access to core research facilities, including the Central Microscopy Research Facility, Flow Cytometry Facility, Iowa Institute of Human Genetics, Electron Spin Resonance Facility, Nuclear Magnetic Resonance Facility, High Resolution Mass Spectrometry Facility, and the Center for Gene Therapy.

Computer Facilities

The departmental computer facilities contain a variety of laptops, desktop workstations, and printers. The department is supported by the college's Engineering Technology Center, which maintains a large network of high-performance Linux and Windows workstations along with extensive commercial and public domain software. The department has access to the university's central high-performance research computing facility through ITS–Research Services. The University of Iowa also has access to the ACCESS and Blue Waters national supercomputing resources and is a founding member of the Great Lakes Consortium for Petascale Computing. Locally hosted long-term data storage services are available.

Fundamentals and Applications of Photopolymerization

The Photopolymerization Center was established to advance a fundamental understanding of the kinetics and mechanisms of photopolymerizations. To this end, the center provides unique opportunities for collaborations by industrial and academic investigators to explore photopolymerization processes and develop novel applications based on photopolymerizations.

The center provides equipment and instrumentation for the characterization of photopolymerization systems on the molecular, microscopic, and macroscopic levels. Center researchers pursue an understanding of fundamental photophysical and photochemical processes involved in the photoinitiation reaction, characterization of high-speed propagation and termination kinetics that lead to the polymer structure, and evaluation of material properties through the course of the photopolymerization reaction. Both radical and cationic photopolymerizations are studied with state-of-the-art experimental techniques to elucidate the complex chemical and physical mechanisms that control the initiation, propagation, and termination of the active centers.

Machine Learning and Artificial Intelligence Resources

In addition to specialized software developed and maintained by researchers in the Chemical and Biochemical Engineering department, students, staff, and faculty also make use of the university's High Performance Computing (HPC) resources and the Iowa Institute for Artificial Intelligence (IIAI). HPC resources include GPU processors that are particularly useful for running machine learning algorithms. The Iowa Institute for Artificial Intelligence helps department researchers transform ideas for machine learning and artificial intelligence applications from concepts to working code.

Electrochemical Engineering

The electrochemical engineering laboratories house facilities for electrocatalyst synthesis and characterization, located in the Iowa Advanced Technology Laboratories (IATL). The equipment includes muffle furnaces and tube furnaces for materials synthesis, optical microscopes for surface characterization, rotating disk electrode (RDE) and rotating ring-disk electrode (RRDE) systems with rotators for electrochemical measurements, flow cells and electrolyzers for device testing, potentiostats/galvanostats (electrochemical workstations), and scanning electrochemical microscope (SECM) for local electrochemical analysis. Three-dimensional printers are available for fabricating customized equipment components and accessories for fluid handling and control. Graduate students also have access to core research facilities, including the Central Microscopy Research Facility, and MATFab Facility.

Courses

Chemical and Biochemical Engineering Courses

CBE:0000 Chemical Engineering Internship/Co-op 0 s.h.
Chemical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

CBE:1000 CBE Departmental Seminar 1 s.h.
Introduction to the profession and the department; presentations by guest speakers, visits to laboratories and industries.

CBE:1180 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

CBE:2030 Energy and Society 3 s.h.
History of energy development and use throughout the world; how energy has affected the development of human societies; societal impact of engineering advances; current state of energy consumption worldwide, including distribution of energy sources, global variations in consumption, advantages and disadvantages of current energy sources; role of fossil fuel consumption in global climate change, potential scenarios for the future of energy.

CBE:2040 Environment, Energy, and Climate Change 3 s.h.
Traditional concerns (e.g., pollution and conservation of energy resources) with clear, scientific explanations; Earth's dynamic processes and response to natural and human-induced stresses; link between energy and climate; reasons why we need to support reducing emissions and build a clean and sustainable environment.

CBE:2050 Severe and Unusual Weather 3 s.h.
Basic weather concepts behind severe weather phenomena and essential safety information; how weather events cause billions of dollars in damage and thousands of casualties; winter storms can impact half of the nation, paralyzing the transportation network with icy roads and wind driven snow; tornadoes can strike within minutes tearing apart homes; hurricanes can destroy entire communities with strong winds, heavy rain, and deadly storm surge; how understanding severe weather and knowing what to do before, during, and after an event can significantly reduce injury, deaths, and property damage. Same as CEE:2050.

CBE:2105 Material and Energy Balances 3 s.h.
Fundamental principles of chemical process analysis, including material and energy balances for single-unit and multiple-unit processes, analysis of reactive and nonreactive systems, introduction to equations of state, thermodynamics of multiphase systems. Prerequisites: MATH:1550.

CBE:2110 Computational Tools for Chemical Engineers 2 s.h.
Numerical methods for solving systems of linear and nonlinear equations, nonlinear regression, multivariable calculus, and ordinary differential equations using chemical engineering examples. Prerequisites: MATH:1550. Corequisites: MATH:1560.

CBE:3000 Professional Seminar: Chemical Engineering 1 s.h.
Professional aspects of chemical engineering presented through lectures and discussions by guest speakers, plant trips, and panel discussions. Prerequisites: CBE:2105. Requirements: sophomore standing.

CBE:3020 Applied Statistics for Chemical and Natural Resources Engineering 3 s.h.
Statistical and computational (Python programming) analysis of weather and climate data, univariate and multivariate statistics, hypothesis testing, statistical forecasting, forecast verification, time-series analysis, trend analysis, and principal component analysis.

CBE:3105 Chemical Engineering Thermodynamics 3 s.h.
Applications of thermodynamic principles to chemical and physical processes; prediction of material properties; phase and chemical equilibria applied to mixtures and reacting systems. Prerequisites: ENGR:2130. Corequisites: CBE:2105.

CBE:3109 Fluid Flow 2 s.h.
Fundamentals of fluid flow, including fluid statics, fluid rheology, laminar and turbulent flow in pipes, external flow, flow through packed beds, fluidized beds, pumps and compressors, boundary layer theory, potential flow, dimensional analysis, and Navier Stokes Equations. Corequisites: CBE:2105.

CBE:3113 Heat and Mass Transfer 3 s.h.
Fundamentals of heat and mass transfer including heat exchanger design; conductive, convective, and radiative heat transfer; mechanisms of diffusional and convective mass transfer. Prerequisites: MATH:2560 and CBE:2105. Recommendations: CBE:3109.

CBE:3117 Separations 3 s.h.
Solution of industrial problems including design of distillation, extraction, absorption, adsorption, drying, membrane processes, and mechanical separations. Prerequisites: CBE:2105 and CBE:3105. Corequisites: CBE:3113.

CBE:3120 Chemical Reaction Engineering 3 s.h.
Application of chemical reaction kinetics to design of chemical reactors: batch reactors, mixed flow reactors, plug flow reactors; reversible and irreversible single reactions; parallel, series, and mixed reactions; temperature and pressure effects on reactor design; heterogeneous catalysis; transport in porous catalysts. Prerequisites: MATH:2560. Corequisites: CBE:3105. Recommendations: CBE:3113.

CBE:3125 Chemical Process Safety 3 s.h.
Application of transport phenomena, thermodynamics, chemical kinetics to study of safety, health, loss prevention; government regulations, toxicology/industrial hygiene, relief sizing, runaway reactions, toxic release and dispersion models, source models, fires and explosions, risk assessment, hazard identification, case studies and accident investigation, incorporation of safety into design; laboratory experiments. Prerequisites: CBE:3105 and CBE:3109. Corequisites: CBE:3113.

CBE:3150 Thermodynamics/Transport Laboratory 3 s.h.
Error analysis, propagation of errors, experimental design, data collection techniques, report writing, oral presentations, laboratory safety; laboratory investigations of thermodynamics, fluid flow, heat transfer, fluid rheology. Prerequisites: CBE:3105 and CBE:3113. Recommendations: STAT:2020 or CBE:3020.

CBE:3155 Chemical Reaction Engineering/Separations Laboratory 3 s.h.
Experimental design, data collection techniques, report writing, oral presentations; laboratory investigations of chemical reaction engineering and separations; experiments with plug flow and batch reactors, distillation, evaporation, membrane separation. Prerequisites: CBE:3117. Corequisites: CBE:3120. Recommendations: STAT:2020.

CBE:3205 Introduction to Biochemical Engineering 3 s.h.
Biochemistry, cellular biology, recombinant DNA and hybridoma technologies; emphasis on engineering aspects of biotechnology, including enzyme kinetics, cell growth kinetics, transport phenomena in bioreactors, bioreactor design, bioseparations, formulation and sterilization of growth media, commercial applications of biotechnology. Prerequisites: CBE:2105. Corequisites: CBE:3109. Recommendations: CBE:3120.

CBE:3405 Green Chemical and Energy Technologies 3 s.h.
Strategies for pollution prevention for chemical processes studied at macroscale (industrial sector), mesoscale (unit operations), and microscale (molecular level); case studies. Prerequisites: CHEM:1070 or CHEM:1110.

CBE:3415 Statistical and Computational Analysis of Weather and Climate Data 3 s.h.
Statistical and computational (Python programming) analysis of weather and climate data, univariate and multivariate statistics, hypothesis testing, statistical forecasting, forecast verification, time-series analysis, principal component analysis, trend analysis, and cluster analysis. Requirements: senior or graduate standing.

CBE:3998 Individual Investigations: Chemical Engineering arr.
Individual projects for chemical engineering undergraduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

CBE:4105 Process Dynamics and Control in Design 3 s.h.
Theory and application of process dynamics to the design of chemical process control systems; mathematical models of unit operations, transfer functions, feedback and feed-forward control, stability, instrumentation, digital control systems; computer methods, including simulation and commercial software use; laboratory focus on process analysis and design. Prerequisites: MATH:2560 and CBE:2105 and CBE:3109. Corequisites: CBE:3120.

CBE:4109 Chemical Engineering Process Design I 2 s.h.
Engineering economics of process evaluation, including time value of money and bases for cost estimation; preliminary design of chemical process plants using computer-aided engineering. Prerequisites: CBE:3109 and CBE:3113 and CBE:3117. Corequisites: CBE:3120 and CBE:3125.

CBE:4110 Chemical Engineering Process Design II 3 s.h.
Capstone chemical engineering course; design and optimization of chemical process plants; application of process calculations, thermodynamics, kinetics, process synthesis, energy efficiency in separations, heat-exchanger network synthesis, physical property estimation, safety, computer-aided design, unit operations theory, process control, and economics. Prerequisites: CBE:4109. Recommendations: CBE:4105 and CBE:3205.

CBE:4125 Advanced Chemical Process Safety 3 s.h.
Chemical process safety including qualitative and quantitative hazard analysis, risk and consequence analysis, human factors and operator error, incident investigation, management of change procedures, interlocks and safety instrumented systems, layer of protection analysis, dust hazard analysis, and process safety management. Prerequisites: CBE:3125.

CBE:4195 Senior Enriching Activities Seminar 0 s.h.
Aspects of chemical engineering education, including multidisciplinary team skills, understanding the impact of engineering practice locally and globally. Corequisites: CBE:4110. Requirements: completion of enriching activity.

CBE:4410 Sustainable Systems 3 s.h.
New and emerging concepts in sustainable systems design and assessment. Same as CEE:4107.

CBE:4420 Environmental Chemistry 3 s.h.
Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisites: CHEM:1120. Same as CEE:4150.

CBE:4459 Air Pollution Control Technology 3 s.h.
Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Same as CEE:4159, IGPI:4159.

CBE:4460 Process and Design for Satellites and Environmental Sensors 3 s.h.
Exploration of how to design, develop, and implement science instruments, sensor networks, and satellite mission; emphasis on atmospheric sensors for planetary atmospheres; disciplines required, how to build a team, developing science requirements, developing instrument requirements, development and management of interface controls, workflow tracking, quality assurance verification, and resolving hardware/design problems; considerations needed by a principal investigator, instrument manager, instrument scientist, plan manager, or systems engineer to pursue a major instrument, mission development, industrial plan development, or expansion.

CBE:5000 Seminar in Chemical and Biochemical Engineering 1 s.h.
Presentation and discussion of recent advances and research in chemical and biochemical engineering by guest lecturers, faculty, students. Requirements: graduate standing.

CBE:5100 Graduate Professional Development Seminar 1 s.h.
Seminar participants work with a faculty member to select and attend eight hours of approved seminars and professional development trainings at the University of Iowa; final meeting of participants is held to share notable seminars; typical seminar series include College of Engineering lectures, departmental and research center graduate seminars, chemical and biochemical engineering professional seminar series, and Center for Teaching and Learning offerings. Requirements: master's standing in chemical and biochemical engineering.

CBE:5104 Introduction to Literature Review and Technical Writing 3 s.h.
Review of technical literature, how to contribute to it; produce and present orally a peer-reviewed-journal-quality review article; brainstorming, group writing, research ethics, plagiarism. Recommendations: nonthesis track graduate standing.

CBE:5105 Introduction to Literature Review and Proposal Writing 3 s.h.
Tools for reviewing literature, skills for critical reading of publications, training in successful proposal writing; experience drafting a proposal that can be used as a starting point for the PhD comprehensive.

CBE:5110 Intermediate Thermodynamics 3 s.h.
Fundamental principles of thermodynamics as applied to phase equilibrium; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Requirements: CBE:3105 or ME:4160 or graduate standing. Same as ME:5210.

CBE:5115 Transport Phenomena I 3 s.h.
Unified treatment of momentum, mass, energy transport in chemical engineering problems; use of vector and tensor notations in expressing equations of continuity, motion, energy.

CBE:5120 Data Science in Chemical and Engineering Systems 3 s.h.
Theory and application of numerical methods and data driven algorithms towards understanding chemical processes; scientific computing in Python programming language; numerical solutions to differential equations; nonlinear and constrained optimization; data preprocessing and visualization; dimensionality reduction and clustering; supervised machine learning.

CBE:5140 Mathematical Methods in Engineering 3 s.h.
Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: MATH:2550 and MATH:2560. Same as CEE:5513, ME:5113.

CBE:5199 Contemporary Topics: Chemical and Biochemical Engineering arr.
Research techniques for graduate students in chemical and biochemical engineering.

CBE:5210 Bioseparations 3 s.h.
Unit operations used to isolate and purify biologically derived chemicals, including flocculation, filtration, centrifugation, extraction, adsorption, chromatography, precipitation, crystallization, electrophoresis and cell disruption for intracellular product recovery.

CBE:5310 Polymer Science and Technology 3 s.h.
Uses and properties of industrially important polymeric materials; polymer chemistry, polymer structure, characterization, and polymer processing. Prerequisites: CHEM:2210 or CHEM:2230.

CBE:5315 Polymer Chemistry 3 s.h.
Monomer reactivity and polymerization reactions; step, radical, ionic, and ring-opening polymerizations. Prerequisites: CHEM:2220.

CBE:5390 Photopolymerization Topics 1 s.h.
Seminars presented by faculty members, research assistants, students.

CBE:5410 Electrochemical Engineering 3 s.h.
Fundamentals of electrochemical engineering; various applications; focus on processes and systems that transform chemical energy into electrical energy (e.g., batteries, fuel cells) and vice versa (e.g., electrolyzers, oxygen generators for medical applications); electrochemical engineering in an increasingly important role in energy, chemical, environmental, and biomedical sectors.

CBE:5412 Atmospheric Modeling 3 s.h.
Model equations and approaches for atmospheric dynamics and chemistry; numerical methods for radiative, chemical, and aerosol rates; parameterization of subgrid-scale processes; model evaluation and inverse modeling.

CBE:5415 Satellite Image Processing and Remote Sensing of Atmosphere 3 s.h.
Introduction to principles of atmospheric radiation and techniques for satellite image processing; hands-on experience with data calibration, image registration and enhancement, noise filtering and (supervised and unsupervised) multi-spectral classification of satellite imageries; various satellite sensors used for monitoring of different atmospheric processes and constituents. Same as IGPI:5415.

CBE:5417 Physical Meteorology and Atmospheric Radiative Transfer 3 s.h.
Physical processes for weather and climate including radiative transfer, cloud and precipitation formation, and atmospheric electricity; theory of scattering by atmospheric particles (e.g., clouds, aerosols, molecules), atmospheric radiative transfer equations, and numerical techniques and tools to solve these equations. Requirements: senior or graduate standing. Same as CEE:5417, IGPI:5417.

CBE:5425 Atmospheric Chemistry and Physics 3 s.h.
Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources, and removal processes. Corequisites: CBE:3120. Same as CEE:5115.

CBE:5466 Optical Components, Alignment, and Instrumentation for Remote Sensing 3 s.h.
Explore optical components including lenses, mirrors, beam splitters, fiber optics, and filters, and optical assemblies including beam expanders, interferometers, and laser cavities; assess and align optical assemblies using metrology equipment including collimators, autocollimators, and wavemeters; hands-on laboratory work. Work with optics, optical devices, and metrology equipment; learn how to handle, work with, and assess optics and optical components and how to align complex assemblages of components in a sensor. Recommendations: basic or introductory physics course with applications to atmospheric chemistry. Same as ECE:5466, PHYS:5466.

CBE:5740 Engineering Principles of Drug Delivery 3 s.h.
Fundamental concepts in drug delivery from an engineering perspective: delivery mechanisms; materials and formulations for drug delivery; drug modifications (prodrugs, PEGylation); engineering principles of controlled release and targeted delivery (nanoparticles, microparticles, polymer and lipid based systems); quantitative understanding of drug transport; significance of biodistributions and pharmacokinetic models; toxicity issues; immune responses.

CBE:5875 Perspectives in Biotechnology 1 s.h.
Topics related to careers in biotechnology with an emphasis on preparing graduate students for careers outside of academia; discussions led by a series of guest speakers from leading biotech industries; understanding the societal impact of basic research; participation in round-table discussions; and presentation of student research findings. Requirements: graduate standing and good academic standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BMB:5875, CEE:5875, CHEM:5875, MICR:5875, PHAR:5875.

CBE:5998 Individual Investigations: Chemical and Biochemical Engineering arr.
Individual projects for chemical and biochemical engineering graduate students; may include laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

CBE:5999 MS Thesis Research: Chemical and Biochemical Engineering arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for MS with thesis in chemical and biochemical engineering. Requirements: graduate standing.

CBE:6145 Diffusive Transport 3 s.h.
Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies; analytical and numerical solution techniques; inverse heat conduction; multiphase and multicomponent systems. Prerequisites: ME:5145. Same as ME:6245.

CBE:6415 Advanced Satellite and Remote Sensing of Atmosphere 3 s.h.
Cloud masking and retrieval of cloud properties from satellites, aerosol detection and retrievals, Earth radiation energy budget, land and/or ocean remote sensing, microwave remote sensing, wind retrieval, multi-sensor intercomparison and validation, optimization and inversion theory; hands-on projects.

CBE:6435 Advanced Atmospheric Radiative Transfer 3 s.h.
Theory of scattering by atmospheric particles (e.g., clouds, aerosols, molecules), atmospheric radiative transfer equations, and techniques to solve these equations for solar and terrestrial radiation; numerical experiments with Mie scattering, T-matrix calculation, and radiative transfer models.

CBE:7999 Research: Chemical and Biochemical Engineering PhD Dissertation arr.
Experimental and/or analytical investigation of an approved topic for PhD in chemical and biochemical engineering.

Chemical Engineering, BSE

The major in chemical engineering provides students with a comprehensive education at the forefront of technology, focusing on solving pressing societal issues. By emphasizing fundamental concepts, problem-solving skills, laboratory techniques, and effective communication, the program prepares graduates to tackle challenges in the areas of sustainability, climate change, environmental protection, energy, and health while driving innovation to create new sensors, advanced materials, and manufacturing processes.

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Focus Areas

All BSE students complete a focus area within their chosen major. Students majoring in chemical engineering select from twelve pre-approved focus areas: biochemical engineering; business, chemical process engineering; computation, data science, and machine learning; energy and environment; entrepreneurship; oil and gas engineering; pharmaceuticals; polymers; pre-medicine; safety and health; and sustainability. Alternatively, students may develop an individualized custom focus area with approval from the department's curriculum committee.

Biochemical Engineering

This focus area allows students to choose from a selection of courses that combine concepts of biology, biochemistry, and engineering. Biochemical engineers leverage knowledge from these fields to manufacture biological products, including fermentation products and pharmaceuticals. Graduates often work in the biotechnology and pharmaceutical industries as production leaders or researchers.

Business

This focus area consists of eight courses from the Tippie College of Business. Students gain foundational business knowledge on topics including finance, economics, accounting, marketing, law, and management. Past students have successfully applied their integrated business and technical knowledge in various settings, including manufacturing plants, consulting, and corporate offices.

Chemical Process Engineering

Process engineering involves the design, optimization, and operation of systems that transform raw materials into valuable products. Process engineers work with a variety of products, including foods and beverages, electronic materials, metals, plastics, fuels, building materials, and pharmaceuticals. Given its broad scope, students can select from a wide range of engineering, math, and science courses, allowing for ample customization based on individual interests.

Computation, Data Science, and Machine Learning

This focus area is designed for students who wish to blend advanced computation and programming with their chemical engineering degree. It can accommodate introductory training in cyber-physical systems, remote sensing, advanced simulation, supply chain management, in silico chemistry and biology, bioinformatics, software design, next-generation controls, machine learning, and artificial intelligence.

Energy and Environment

Students passionate about environmental issues should consider this focus area. Courses prepare students to address environmental challenges and revolutionize energy systems. Topics include air and water pollution, climate change, clean and renewable energy, environmental regulations, and sustainable systems. Students in this focus area may want to consider the Certificate in Applied Climate Science and Energy Technology.

Entrepreneurship

This focus area focuses on succeeding in the world of startups, innovation, business ownership, and new products. It is well-suited for students intending to start and operate their own businesses, as well as those interested in managing innovation within existing companies. A wide range of electives allows students to tailor their business courses to their individual interests. Students in this area should consider the Technological Entrepreneurship Certificate.

Oil and Gas Engineering

Designed for students interested in pursuing careers in oil and gas engineering, this focus area explores foundational elements of chemistry, geology, petrochemical refining, and environmental science. The course plan includes recommendations from experienced advisors with petrochemical backgrounds. Often viewed as the birthplace of chemical engineering, the petroleum industry offers numerous challenging and lucrative opportunities for chemical engineers.

Pharmaceuticals

Chemical and biochemical engineering are central to the design, formulation, and manufacturing of pharmaceutical products. Students passionate about medical applications can aim their chemical engineering skills toward a career in pharmaceuticals by choosing this focus area. The curriculum includes courses on biology, drug delivery, and the mechanisms and chemistry of drug interactions, with options spanning multiple departments, including biomedical engineering, biochemistry and molecular biology, pharmacy, and pharmacology.

Polymers

This focus area enables students to study the development of chemical compounds through polymerization, including the combination of small molecules into engineered networks to produce valuable plastics and other advanced materials. The program is ideal for students who wish to design new materials and understand the relationship between molecular-scale structures and macroscopic-scale properties.

Pre-Medicine

Concepts of chemical engineering are naturally applicable to biological processes. This focus area allows students to apply these concepts to gain a deeper understanding of the atoms and molecules that comprise living organisms and the pathways through which they operate. This program is designed for students aiming to gain acceptance into post-graduate education in the medical field.

Safety and Health

This focus area prepares students to prevent incidents and accidents in chemical and pharmaceutical manufacturing, particularly those resulting from the unintentional release of hazardous materials and energy into the environment, and provide a safe and healthy workplace by preventing injuries and hazards in the workplace environment.

Sustainability

This focus area covers the most important and current topics in environmental science, societal impacts, energy usage, and natural systems. Courses prepare students to understand and discuss these topics as they relate to chemical engineering. This focus area is designed to dovetail with the University of Iowa Certificate in Sustainability [p. 404].

Educational Objectives

The chemical engineering program produces graduates with a strong foundation of scientific and technical knowledge who are equipped with problem-solving, teamwork, and communication skills that will serve them throughout their careers, consistent with the following educational objectives. Within a few years following graduation, graduates will:

- attain careers as practicing chemical engineers in fields such as biomedical, biotechnology, chemical products, climate solutions, computation, energy, environmental engineering, food processing, pharmaceuticals, polymers/advanced materials, or semiconductors;
- pursue advanced studies in disciplines such as business, chemical engineering, computation, dentistry, environmental engineering, law, medicine, or pharmaceuticals; or
- assume professional leadership roles.

The following methods and strategies are used in the chemical engineering undergraduate program to achieve these program educational objectives. The department:

- fosters a unique and personalized undergraduate experience by leveraging the advantages of a small college atmosphere within a comprehensive liberal arts and research university;
- enriches the undergraduate experience through cultural diversity, international opportunities, and/or experiential learning;
- provides a solid foundation and understanding of the fundamental principles of mathematics, science, and engineering;
- provides students with experience in learning and applying tools and analyzing and interpreting data to solve theoretical and open-ended chemical engineering problems;
- provides students with opportunities to participate in collaborative teams;
- develops students' written and oral communication skills to a wide range of audiences;
- provides students with opportunities to design and conduct chemical engineering experiments and to design systems, components, and chemical processes to meet specific needs and constraints;
- provides a contemporary grounding in ethical and professional responsibility, including global, economic, environmental, safety, and societal impacts of engineering decisions; and
- instills the desire and the understanding of the need for lifelong learning.

Requirements

The Bachelor of Science in Engineering (BSE) with a major in chemical engineering requires a minimum of 128 s.h. of credit, plus up to five 1 s.h. seminars and one 0 s.h. course. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1529] in the catalog. 6 s.h. of a student's major courses fulfill the collegiate curriculum's basic science or college-level math requirement. Students completing the major in chemical engineering will also fulfill the collegiate statistics requirement by completing CBE:3020 Applied Statistics for Chemical and Natural Resources Engineering, STAT:2020 Probability and Statistics for the Engineering and Physical Sciences, or STAT:3510 Biostatistics. Some focus areas may suggest or require specific courses to fulfill the general education component of the collegiate curriculum; see the following section titled "Focus Area."

Students are required to participate in at least one enriching activity, which may include a research experience, a cooperative education or internship experience, study abroad, completion of the Certificate in Technological Entrepreneurship [p. 1681], Certificate in Applied Climate Science and Energy Technologies [p. 1521], or other approved experiences.

The major in chemical engineering may include the following departmental seminars depending on when a student declares the major.

Course #	Title	Hours
CBE:1000	CBE Departmental Seminar	1
CBE:3000	Professional Seminar: Chemical Engineering (taken four times for 1 s.h. each)	4
CBE:4195	Senior Enriching Activities Seminar	0

The BSE with a major in chemical engineering requires the following coursework.

Requirements	Hours
Collegiate Curriculum	49
Basic Science and College-Level Math, from Major Requirements or Focus Area	6
Major Requirements	58
Focus Area	12
Free Elective	3

Major Requirements

Common Courses

Major requirements include a set of common courses (53 s.h.), an advanced chemistry or biochemistry and molecular biology course (3 s.h.), an advanced science course (3 s.h.), and two capstone design courses (5 s.h.).

Course #	Title	Hours
All of these:		
CBE:2105	Material and Energy Balances	3
CBE:2110	Computational Tools for Chemical Engineers	2
CBE:3105	Chemical Engineering Thermodynamics	3
CBE:3109	Fluid Flow	2
CBE:3113	Heat and Mass Transfer	3
CBE:3117	Separations	3
CBE:3120	Chemical Reaction Engineering	3
CBE:3125	Chemical Process Safety	3
CBE:3150	Thermodynamics/Transport Laboratory	3
CBE:3155	Chemical Reaction Engineering/Separations Laboratory	3
CBE:3205	Introduction to Biochemical Engineering	3
CBE:4105	Process Dynamics and Control in Design	3
CHEM:1120	Principles of Chemistry II	4
CHEM:2210	Organic Chemistry I	3
or CHEM:2230	Organic Chemistry I for Majors	
CHEM:2220	Organic Chemistry II	3
or CHEM:2240	Organic Chemistry II for Majors	
CHEM:2410	Organic Chemistry Laboratory	3
or CHEM:2420	Organic Chemistry Laboratory for Majors	
ENGR:2130	Thermodynamics	3
ENGR:2720	Materials Science	3

Advanced Chemistry or Biochemistry and Molecular Biology Course

Some focus areas may suggest or require a specific course; see "Focus Area." Students select a course considered advanced for the minor in chemistry [p. 193] (College of Liberal Arts and Sciences) or one of the following courses in the Department of Biochemistry and Molecular Biology (Carver College of Medicine).

Course #	Title	Hours
BMB:3110	Biochemistry	3
BMB:3120	Biochemistry and Molecular Biology I	3
BMB:3130	Biochemistry and Molecular Biology II	3

Acceptable courses from the Department of Chemistry (College of Liberal Arts and Sciences) include but are not limited to the following.

Course #	Title	Hours
CHEM:3110	Equilibria and Electrochemistry	3
CHEM:3120	Spectroscopy and Separations	3
CHEM:4430	Principles of Physical Chemistry	3
CHEM:4431	Chemical Thermodynamics	3
CHEM:4432	Quantum Mechanics and Chemical Kinetics	3

Advanced Science Course

Students select an advanced science-based course either within or outside of the College of Engineering. Appropriate subject areas could include biochemistry and molecular biology (prefix BMB), biology (prefix BIOL), chemistry (prefix CHEM), microbiology and immunology (prefix MICR), and physics (PHYS). Any course numbered 3000 or above in these areas will fulfill this requirement. Some focus areas may suggest or require a specific course; see "Focus Area." Students may consult an advisor or visit the Department of Chemical and Biochemical Engineering website for more information.

Acceptable courses include but are not limited to the following. Consult an academic advisor for approval to take a course not on this list.

Course #	Title	Hours
CBE:4420	Environmental Chemistry	3
CBE:5315	Polymer Chemistry	3
CBE:5425	Atmospheric Chemistry and Physics	3
BIOL:4213	Bioinformatics	4
BME:2400	Cell Biology for Engineers	3
CEE:5440	Foundations of Environmental Chemistry and Microbiology	3
OEH:4240	Global Environmental Health	3
OEH:6420	Methods in Exposure Science	3
OEH:6710	Human Toxicology and Risk Assessment	3
PHYS:3741	Introduction to Quantum Mechanics I	3
SEES:4540	Isotope Geochemistry	3
Advanced chemistry and biochemistry courses in the areas previously listed		3

The following courses do not fulfill this requirement.

Course #	Title	Hours
CBE:3405	Green Chemical and Energy Technologies	3
CBE:5210	Bioseparations	3
CBE:5310	Polymer Science and Technology	3
CBE:5410	Electrochemical Engineering	3
BIOL:1411	Foundations of Biology	4
BIOL:1412	Diversity of Form and Function	4
PHYS:1612	Introductory Physics II	4

Capstone Design Courses

Course #	Title	Hours
Both of these:		
CBE:4109	Chemical Engineering Process Design I	2
CBE:4110	Chemical Engineering Process Design II	3

Focus Area

Students must select focus area courses according to guidelines established by the Department of Chemical and Biochemical Engineering. The department offers preapproved focus areas in biochemical engineering [p. 1563]; business [p. 1563]; chemical process engineering [p. 1563]; computation, data science, and machine learning [p. 1563]; energy and environment [p. 1564]; entrepreneurship [p. 1565]; oil and gas engineering [p. 1565]; pharmaceuticals [p. 1565]; polymers [p. 1566]; pre-medicine [p. 1566]; safety and health [p. 1566]; and sustainability [p. 1567].

Students may prefer to develop a custom-tailored focus area, which is subject to approval by the department's curriculum committee. Visit the Department of Chemical and Biochemical Engineering website for guidelines for tailored focus areas.

Focus areas in chemical engineering consist of content area courses (12 s.h.) and a free elective course (3 s.h.); carefully selected courses may contribute to earning a minor and/or certificate. Some focus areas also may suggest or require specific courses to fulfill the General Education Component of the collegiate curriculum, the chemical engineering major's advanced chemistry or biochemistry requirement, and/or the major's advanced science requirement.

Biochemical Engineering

Students in the biochemical engineering focus area are encouraged to complete BMB:3110 Biochemistry to satisfy the chemical engineering major's advanced chemistry/ biochemistry or advanced science requirement.

Required Biochemical Course

Course #	Title	Hours
This course:		
CBE:5210	Bioseparations	3

Biochemical Electives

Course #	Title	Hours
9 s.h. from these:		
CBE:3998	Individual Investigations: Chemical Engineering	arr.
CBE:5875/ BMB:5875/ CEE:5875/ CHEM:5875/ MICR:5875/ PHAR:5875	Perspectives in Biotechnology	1
BMB:3110	Biochemistry	3
BIOL:1411	Foundations of Biology	4
BIOL:1412	Diversity of Form and Function	4
BMB:3120	Biochemistry and Molecular Biology I	3
BMB:3130	Biochemistry and Molecular Biology II	3
BMB:3140	Experimental Biochemistry	3
BME:2400	Cell Biology for Engineers	3
BME:5430	Biotransport	3
CHEM:4850/ PHAR:4850	Upstream Biotechnology Processes	2
MICR:2157	General Microbiology	3
MICR:2158	General Microbiology Laboratory	2

In addition to the courses previously listed, students may select courses in biology (prefix BIOL), biochemistry and molecular biology (prefix BMB), chemistry (prefix CHEM), or microbiology and immunology (prefix MICR) numbered 3000 or above.

Business

The business focus area requires the following courses to fulfill the collegiate curriculum General Education Component approved course subjects requirement.

Course #	Title	Hours
All of these:		
ECON:1100	Principles of Microeconomics	4
ECON:1200	Principles of Macroeconomics	4
MKTG:3000	Introduction to Marketing Strategy	3

Required Business Course

Course #	Title	Hours
One of these:		
FIN:3000	Introductory Financial Management	3
ISE:2500	Engineering Economy	3

Business Electives

Course #	Title	Hours
Three of these:		
ACCT:2100	Introduction to Financial Accounting	3
ACCT:2200	Managerial Accounting Analytics and Data Visualization	3
MGMT:2000	Introduction to Law	3
MGMT:2100	Introduction to Management	3

Chemical Process Engineering

Students choose 12 s.h. from a broad selection of engineering, math, and science courses numbered 3000 or above. Students are encouraged to complete MATH:4820 Optimization Techniques and should consult academic advisors for additional course selection.

Computation, Data Science, and Machine Learning

Computation, Data Science, and Machine Learning Electives

Course #	Title	Hours
12 s.h. from these:		
CBE:3020	Applied Statistics for Chemical and Natural Resources Engineering	3
CBE:3998	Individual Investigations: Chemical Engineering	arr.
CBE:5417/ CEE:5417/IGPI:5417	Physical Meteorology and Atmospheric Radiative Transfer	3
CBE:5425/CEE:5115	Atmospheric Chemistry and Physics	3

ACCT:4200	Advanced Managerial Accounting Analytics	3
BAIS:3500	Data Mining	3
BAIS:3800	Optimization and Simulation Modeling	3
BIOL:4213/ GENE:4213/ IGPI:4213	Bioinformatics	2,4
BME:4310/ BMB:4310	Computational Biochemistry	3
CEE:4512/ME:4112	Engineering Design Optimization	3
CHEM:4480	Introduction to Molecular Modeling	3
CHEM:5431	Statistical Thermodynamics I	3
CS:2110	Programming for Informatics	4
CS:2210	Discrete Structures	3
CS:2230	Computer Science II: Data Structures	4
CS:3330	Algorithms	3
CS:4740/IGPI:4740/ MATH:4740/ STAT:4740	Large Data Analysis	3
CS:5110/IGPI:5110	Introduction to Informatics	3
ECE:2400	Linear Systems I	3
ECE:3330/IGPI:3330	Introduction to Software Design	3
ECE:5330/IGPI:5331	Graph Algorithms and Combinatorial Optimization	3
ECE:5420	Power Electronics	3
ENGR:2730	Computers in Engineering	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
ISE:3600/CEE:3142/ STAT:3620	Quality Control	3
ISE:4900	Introduction to Six Sigma	3
MATH:3770	Foundations of Analysis	4
MATH:3800/ CS:3700	Introduction to Numerical Methods	3
MATH:5600	Nonlinear Dynamics With Numerical Methods	3
MATH:5700	Introduction to Partial Differential Equations	3
ME:4111/CEE:4511	Scientific Computing and Machine Learning	3
ME:4150	Artificial Intelligence in Engineering	3
ME:5114	Nonlinear Control in Robotic Systems	3
ME:5143	Computational Fluid and Thermal Engineering	3
ME:6115	Cooperative Autonomous Systems	3

Energy and Environment

Required Energy and Environment Course

Course #	Title	Hours
This course:		
CBE:3405	Green Chemical and Energy Technologies	3

Energy and Environment Electives

Course #	Title	Hours
9 s.h. from these:		
CBE:2030	Energy and Society	3
CBE:2040	Environment, Energy, and Climate Change	3
CBE:2050/CEE:2050	Severe and Unusual Weather	3

CBE:5415/IGPI:5415	Satellite Image Processing and Remote Sensing of Atmosphere	3
CBE:5417/ CEE:5417/IGPI:5417	Physical Meteorology and Atmospheric Radiative Transfer	3
CBE:5425/CEE:5115	Atmospheric Chemistry and Physics	3
CEE:5380	Fluid Flows in Environmental Systems	3
CEE:5440	Foundations of Environmental Chemistry and Microbiology	3
CHEM:4873	Atmospheric and Environmental Chemistry	3
CHEM:5107	Electrochemistry	2-3
CHEM:5438	Surface Chemistry and Heterogeneous Processes	3
ECE:5630	Sustainable Energy Conversion	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
ME:4048	Energy Systems Design	4
OEH:6710	Human Toxicology and Risk Assessment	3
SEES:4490	Elements of Geochemistry	3
SEES:4540	Isotope Geochemistry	3
SEES:4630	Hydrogeology	4
SEES:4790	Applied Environmental Geology	3

In addition to the courses previously listed, students may select courses in chemistry (prefix CHEM), occupational and environmental health (prefix OEH), or earth, environment, and sustainability (prefix SEES) numbered 3000 or above.

Entrepreneurship

Required Entrepreneurship Course

Course #	Title	Hours
One of these:		
FIN:3000	Introductory Financial Management	3
ISE:2500	Engineering Economy	3

Entrepreneurship Electives

Course #	Title	Hours
9 s.h. from these:		
ENTR:2000	Entrepreneurship and Innovation	3
ENTR:3100	Entrepreneurial Finance	3
An approved course with prefix ENTR that counts toward the technological entrepreneurship certificate		3

Oil and Gas Engineering

The following courses are prerequisites for many of the oil and gas engineering focus area courses. Due to their introductory nature, they do not count toward the focus area's content requirements, but one of the two may be counted as the free elective.

Course #	Title	Hours
CEE:1030/ SEES:1030	Introduction to Earth Science	3-4
SEES:1050	Introduction to Geology	4

The following courses are recommended to students in the oil and gas engineering focus area to fulfill part of the collegiate curriculum General Education Component approved course subjects requirement.

Course #	Title	Hours
Both of these:		
HIST:1115/ SEES:1115	The History of Oil	3
SEES:3780/ GHS:3780/ HIST:3240/ POLI:3431	U.S. Energy Policy in Global Context	3

Students in this focus area are encouraged to select courses for the chemical engineering major's advanced science requirement from the following list.

Course #	Title	Hours
SEES:4110	Global Biogeochemical Cycles	3
SEES:4490	Elements of Geochemistry	3
SEES:4630	Hydrogeology	4
SEES:4640	Contaminant Hydrogeology	3

Required Oil and Gas Course

Course #	Title	Hours
This course:		
CBE:3405	Green Chemical and Energy Technologies	3

Oil and Gas Electives

Course #	Title	Hours
9 s.h. from these:		
CBE:5199	Contemporary Topics: Chemical and Biochemical Engineering	arr.
CBE:5415/IGPI:5415	Satellite Image Processing and Remote Sensing of Atmosphere	3
CBE:5425/CEE:5115	Atmospheric Chemistry and Physics	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
SEES:1290	Energy and the Environment	3
SEES:2410	Mineralogy (recommended for students specializing in petroleum)	4
SEES:2831	Geologic Field Methods	3
SEES:3100	Earth and Planetary Remote Sensing	4
SEES:3330	Sedimentary Geology (recommended for students specializing in petroleum)	4
SEES:3510	Igneous and Metamorphic Petrology (recommended for students specializing in petroleum)	4
SEES:3840	Structural Geology (recommended for students specializing in petroleum)	4
SEES:4760	Mineral and Petroleum Exploration Geology	3
SEES:4780	Global Stratigraphy	3
SEES:4790	Applied Environmental Geology	3
SEES:4820	Tectonics and Basin Analysis	3
SEES:4832	Geologic Field Analysis	3

Pharmaceuticals

Required Pharmaceuticals Course

Course #	Title	Hours
At least one of these:		
PCOL:2220	Drug Use and Abuse	3
PCOL:3101	Pharmacology I: A Drug's Fantastic Journey	3

Pharmaceuticals Electives

Students select from the following engineering, pharmaceutics, and science courses listed to reach a total of 12 s.h. when combined with either or both of the required pharmaceuticals courses.

Course #	Title	Hours
CBE:3998	Individual Investigations: Chemical Engineering	arr.
CBE:5210	Bioseparations	3
CBE:5740	Engineering Principles of Drug Delivery	3
BIOL:1411	Foundations of Biology	4
BMB:3110	Biochemistry	3

BMB:3120	Biochemistry and Molecular Biology I	3
BMB:3140	Experimental Biochemistry	3
BME:4310/ BMB:4310	Computational Biochemistry	3
BME:5421	Cell Material Interactions	3
BME:5430	Biotransport	3
CHEM:3110	Equilibria and Electrochemistry	3
CHEM:3120	Spectroscopy and Separations	3
CHEM:3430	Analytical Measurements	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
HHP:1400	Human Anatomy and Physiology	3
OEH:6450	Aerosol Technology	3
PCOL:3102	Pharmacology II: Mechanisms of Drug Action	3
PHAR:4146	Drug Disposition and Pharmacokinetics	2
PHAR:4736	Properties of Dosage Forms I	3
PHAR:4741	Immunology and Immunotherapies	2
PHAR:4800	Chemical and Biophysical Properties of Drugs	2
PHAR:4850/ CHEM:4850	Upstream Biotechnology Processes	2
A chemistry course (prefix CHEM) numbered 3000 or above		3

Polymers

Students in this focus area are encouraged to take CBE:5315 Polymer Chemistry to satisfy the chemical engineering major's advanced science requirement.

Course #	Title	Hours
This course:		
CBE:5310	Polymer Science and Technology	3

Polymers Electives

Course #	Title	Hours
9 s.h. from these:		
CBE:3998	Individual Investigations: Chemical Engineering	arr.
CBE:5199	Contemporary Topics: Chemical and Biochemical Engineering	arr.
CBE:5390	Photopolymerization Topics	1
CBE:5740	Engineering Principles of Drug Delivery	3
BME:2500	Biomaterials and Biomechanics	4
BME:5421	Cell Material Interactions	3
CHEM:4372	Advanced Organic Chemistry	3
CHEM:5118	Nanomaterials	3
ME:5146	Modeling of Materials Processing	3
ME:5167/CEE:5137	Composite Materials	3
Engineering, math, or science courses numbered 3000 or above		

Pre-Medicine

Students in this focus area are encouraged to complete the major's advanced chemistry or biochemistry and advanced science requirements by completing either the sequence BMB:3120 Biochemistry and Molecular Biology I and BMB:3130 Biochemistry and Molecular Biology II to satisfy both requirements, or BMB:3110 Biochemistry to satisfy one of the two requirements.

The following courses are recommended to students in the pre-medicine focus area to fulfill the collegiate curriculum General Education Component approved course subjects requirement.

Course #	Title	Hours
All of these:		
PSY:1001	Elementary Psychology	3
PSY:2130	Advanced Psychology for Pre-Medical Track	3
SOC:1010	Introduction to Sociology	3-4

Required Pre-Medicine Courses

Course #	Title	Hours
All of these:		
BIOL:1411	Foundations of Biology	4
BIOL:1412	Diversity of Form and Function	4
PHYS:1612	Introductory Physics II	4

Safety and Health

Students in this focus area are encouraged to complete OEH:6710 Human Toxicology and Risk Assessment to satisfy the chemical engineering major's advanced science requirement.

The following courses are recommended to students in the safety and health focus area as part of the collegiate curriculum General Education Component.

Course #	Title	Hours
Approved Course Subjects		
GHS:3560	Global Garbage and Global Health	3
SEES:3760/ GHS:3760	Hazards and Society	3
Understanding Cultural Perspectives		
HHP:1045	Diversity and Inclusion in Healthy Living	3

Required Safety and Health Course

Course #	Title	Hours
This course:		
CBE:4125	Advanced Chemical Process Safety	3

Safety and Health Electives

Course #	Title	Hours
9 s.h. from these:		
CBE:4459/ CEE:4159/IGPI:4159	Air Pollution Control Technology	3
CEE:4158/ OEH:4920	Solid and Hazardous Wastes	3

CPH:3200	Death at Work: Case Studies of Workplace Safety and Health	3
ISE:4175	Safety Engineering	3
OEH:5410	Occupational Safety	3
OEH:5620	Occupational Health	3
OEH:6420	Methods in Exposure Science	3
OEH:6440	Control of Occupational Hazards	3
OEH:6450	Aerosol Technology	3
OEH:6720	Advanced Toxicology	4

Sustainability

Students in the sustainability focus area are encouraged to complete CBE:5425 Atmospheric Chemistry and Physics to satisfy the chemical engineering major's advanced science requirement.

Students in this focus area are required to complete the following courses to fulfill the collegiate curriculum's General Education Component.

Course #	Title	Hours
Be Creative		
CNW:2740	The Art and Craft of Writing about the Environment	3
Approved Course Subjects		
ENGL:1510	Introduction to Environmental Literature	3
or JMC:1800	Environmental Communication	
SEES:1070	Contemporary Environmental Issues	3
SEES:2013/ BUS:2013/ URP:2013	Introduction to Sustainability	3

Sustainability Electives

It is recommended that students choose courses that contribute to completing the Certificate in Sustainability [p. 404] (College of Liberal Arts and Sciences).

Course #	Title	Hours
12 s.h. from these:		
CBE:4410/CEE:4107	Sustainable Systems	3
A course that counts toward the Certificate in Sustainability		3-4
A science or engineering course numbered 3000 or above		
May include one of these:		
SEES:1080	Introduction to Environmental Science	3-4
SEES:1085	Fundamentals of Environmental Science	4

Free Elective

Students are required to select an additional course of their choice and should consult with an academic advisor for assistance in selection as needed.

Students in the business focus area interested in completing the minor in business administration [p. 1156] (Tippie College of Business) are especially encouraged to complete all four courses listed under "Business Electives."

It is recommended that students in the entrepreneurship focus area choose an entrepreneurship course (prefix ENTR) that counts toward the Certificate in Technological Entrepreneurship [p. 1681].

It is recommended that students in the sustainability focus area choose a course that contributes to completing the Certificate in Sustainability [p. 404] (College of Liberal Arts and Sciences).

Combined Programs

BSE/MS in Chemical and Biochemical Engineering

The College of Engineering offers a combined Bachelor of Science in Engineering/Master of Science for chemical engineering undergraduate students who intend to earn an MS in chemical and biochemical engineering. BSE/MS students may count 12 s.h. of coursework (typically advanced chemistry sequences and electives) toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the BSE, and they typically complete the MS one year later.

To be admitted to the degree program, students must have a cumulative grade-point average of at least 3.25 and must apply to the Graduate College for acceptance into the program before starting their final two semesters. Visit Undergraduate to Graduate (U2G) Programs on the Department of Chemical and Biochemical Engineering website to learn more.

BSE/MS in Civil and Environmental Engineering

Bachelor of Science in Engineering students majoring in chemical engineering who are interested in earning a Master of Science in civil and environmental engineering may apply to the combined BSE/MS program offered by the College of Engineering. The combined program enables undergraduate students to begin work on the MS while completing their BSE. Students admitted to the program may count 9 s.h. of coursework toward both the BSE and the MS degree requirements. They may also count an additional 3 s.h. toward the MS degree requirements before they have been awarded the BSE. For more information, see the MS in civil and environmental engineering [p. 1599] in the catalog.

Career Advancement

Chemical and biochemical engineers work in a wide range of industries, including petroleum and specialty chemical production, polymer and plastic production, food processing, energy, microelectronics production, pharmaceutical production, biochemical processing, and environmental compliance. Potential jobs include production, process development, plant design and construction, and fundamental research. Many experienced chemical and biochemical engineers move through management ranks to high-level administrative positions. On average, 93–98% of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors continue to result in top-paying salaries post-graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Chemical Engineering, BSE

Course	Title	Hours
First Year		
Fall		
RHET:1030	Rhetoric: Writing and Communication [a]	4

CBE:4195	Senior Enriching Activities Seminar [f]	0
Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall) [q]		
	Hours	**15**
	Total Hours	**133**

a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.

b Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.

c Enrollment in math courses requires completion of a placement exam.

d Enrollment in chemistry courses requires completion of a placement exam.

e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.

f Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

g See General Catalog for list of approved course subjects. Some focus areas recommend or require specific courses. See General Catalog, chemical and biochemical engineering website, or consult your advisor.

h CHEM:2210 typically is offered in fall, spring, and summer sessions. CHEM:2230 typically is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.

i Students select a course from one of two GE CLAS Core areas: Understanding Cultural Perspectives or Values and Society. Some focus areas recommend or require specific courses. See General Catalog, chemical and biochemical engineering website, or consult your advisor.

j CBE:3020 typically is offered in spring semesters only. STAT:2020 and STAT:3510 typically is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.

k CHEM:2220 typically is offered in fall, spring, and summer sessions. CHEM:2240 typically is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

l CHEM:2410 typically is offered in fall, spring, and summer sessions. CHEM:2420 typically is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

m Students select one of many preexisting focus areas or work with an advisor to develop a custom focus area. Focus areas require 12 s.h. specific to their content area and a 3 s.h. elective course. Some focus areas may also suggest or require specific courses to fulfill the General Education Component, advanced chemistry, or advanced science courses. Students who do not declare a specific focus area are automatically placed in chemical process engineering. See General Catalog or consult an advisor for more information.

n See General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI. Some focus areas may require specific courses to fulfill this requirement.

o The advanced chemistry/biochemistry course must have a course subject of CHEM or BMB. Some focus areas may suggest or require specific courses to fulfill the advanced chemistry requirement. See General Catalog or consult an advisor for more information.

p Students select an advanced science-based course either within or outside of the College of Engineering. Appropriate subject areas could include biochemistry and molecular biology (prefix BMB), biology (prefix BIOL), chemistry (prefix CHEM), microbiology and immunology (prefix MICR), and physics (PHYS). Some focus areas may suggest or require specific courses to fulfill the advanced science requirement. See General Catalog or consult an advisor for more information.

q Please see Academic Calendar, on Office of the Registrar website, for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Degree Services.

Chemical and Biochemical Engineering, MS

The Department of Chemical and Biochemical Engineering provides a stimulating academic community where students engage in a highly personalized learning and research environment. The graduate program provides qualified students with deeper and broader training than is possible at the undergraduate level. The Master of Science program provides students with opportunities to obtain specialized knowledge and expertise through advanced coursework in chemical engineering and related disciplines, to engage in interdisciplinary research opportunities (thesis option), and to impact their communities through service learning.

Faculty within the department have focused research projects in biological and pharmaceutical systems, clean energy and water, air quality and climate, polymers and advanced materials, quantum chemical simulation, machine learning, and remote sensing; see Graduate Program on the Department of Chemical and Biochemical Engineering website.

Learning Outcomes

Graduates will:

- demonstrate a mastery of advanced chemical engineering concepts;
- effectively communicate scientific concepts and/or research results in both written and oral formats to scientific and general audiences;
- demonstrate knowledge of and commitment to safe and ethical behavior through adherence to best safety practices and academic integrity principles; and
- demonstrate the ability to serve as a STEM ambassador through outreach and service activities.

Students completing the program with thesis will additionally demonstrate the abilities to:

- perform independent research on an original topic in chemical engineering; and
- critically identify and solve research problems, summarize disciplinary information, and evaluate research findings.

Requirements

The Master of Science program in chemical and biochemical engineering without thesis requires a minimum of 33 s.h. The Master of Science program in chemical and biochemical engineering with a thesis requires a minimum of 30 s.h. in approved graduate courses. Students who pursue the thesis option may earn up to 6 s.h. in CBE:5999 MS Thesis Research: Chemical and Biochemical Engineering. All students must maintain a UI cumulative grade-point average (GPA) of at least 3.00.

Students entering with a degree other than chemical engineering may need to take additional coursework to attain proficiency in core areas of chemical engineering.

The MS in chemical and biochemical engineering requires the following coursework.

Core Courses

Students must maintain a GPA of at least 3.25 in the five core courses.

Course #	Title	Hours
One of these:		
CBE:5104	Introduction to Literature Review and Technical Writing (non-thesis)	3
CBE:5105	Introduction to Literature Review and Proposal Writing (thesis)	3
All of these:		
CBE:5110	Intermediate Thermodynamics	3
CBE:5115	Transport Phenomena I	3
CBE:5120	Data Science in Chemical and Engineering Systems	3
One of these:		
CBE:3205	Introduction to Biochemical Engineering	3
CBE:5315	Polymer Chemistry	3
CBE:5425	Atmospheric Chemistry and Physics	3

Professional Development Experience

Professional growth extends beyond the curriculum and the research laboratory. Graduate professionals must be able to identify and lead educational and research enterprises that advance the scope and impact of the discipline. Important skills include building professional networks, developing a comprehensive outlook for identifying emerging directions in the field, the ability to explain scientific and engineering principles to a variety of audiences, and more. Some examples of professional development experiences include an industrial internship, a second teaching assistant experience, teacher training, organizing a session at a national conference, and organizing a local conference. A student's professional development experience must be developed in consultation with their research mentor and approved by the director of graduate studies. The professional development experience is required for MS thesis students.

Electives

Students supplement the core curriculum with electives tailored to their interests.

Additional Requirements

All thesis students must take ENGR:7270 Engineering Ethics during their first semester and CBE:5000 Seminar in Chemical and Biochemical Engineering each semester in residence. MS thesis students are required to present at CBE:5000. MS thesis students are also required to serve as a teaching assistant at least once during the duration of their graduate studies. Nonthesis students must take CBE:5100 Graduate Professional Development Seminar in each of their final two semesters in the program.

Students in the nonthesis program may petition for entry into the thesis program or the PhD program by requesting a change of status through the Graduate College. The request is reviewed by the Graduate Admissions Committee. If approved

by the committee, the request is forwarded to the chemical and biochemical engineering faculty for final approval. Students then are assigned to research advisors as though they are newly admitted graduate students. For a detailed description of program requirements, see Graduate Program on the Department of Chemical and Biochemical Engineering website.

All students must pass a final examination.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must provide the following.

- Completed application form.
- Unofficial transcript(s). If admitted, official transcripts are required before enrollment. For international students, all academic records should bear the original stamp or seal of the institution and the signature of a school official. Documents not in English must be accompanied by a complete, literal English translation, certified by the issuing institution.
- Optional: Official Graduate Record Examination (GRE) General Test scores (verbal and quantitative) from Educational Testing Services (the university's institutional code is 6681).
- Statement of purpose.
- Three letters of recommendation.

Admission to the department is competitive and is based on an applicant's previous coursework, research, and/or industrial experience. The admissions committee looks for evidence that an applicant has demonstrated qualities such as creativity, self-initiative, dedication, and perseverance exhibited by successful master's degree students.

Applicants must have earned a four-year baccalaureate degree (Bachelor of Science or Bachelor of Science in Engineering) in chemical engineering or a related science or engineering discipline, such as chemistry, biochemistry, biological engineering, environmental science, atmospheric science, materials science, mathematics, or physics.

Applicants are expected to have a cumulative grade-point average (GPA) of at least 3.00 on a 4.00 scale in work for their undergraduate degree. Applicants through the Undergraduate to Graduate (U2G) BS/MS program must have a cumulative GPA of at least 3.25 on a 4.00 scale.

Career Advancement

Chemical and biochemical engineers work in a wide range of industries, including petroleum and specialty chemical production, polymer and plastic production, food processing, energy, microelectronics production, pharmaceutical production, biochemical processing, environmental monitoring and compliance, applied climate research, and big data analytics. Potential jobs include production, process development, plant design and construction, fundamental research, strategic planning, and policy-making. The engineering profession is also a foundation for a variety of careers in medicine, law, government, consulting, and business management. Many experienced chemical and biochemical engineers move through management ranks to high-level administrative positions. Faculty mentors assigned to graduate students aid in their professional development. Students are exposed to opportunities through seminar speakers who have relevant expertise and are invited to campus.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development. Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

The Graduate College offers numerous career advancement opportunities and professional development programs for graduate students. For ongoing program offerings, news, and announcements, see Grad Success Center on the Graduate College website.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Must be completed during first semester.
c Work with faculty advisor to determine appropriate graduate coursework and sequence.
d CBE:5315 is typically offered only during fall semesters .
e Students must take this course in each of their final two semesters in the program; credit earned does not count toward the 33 s.h. required to complete the degree.

Chemical and Biochemical Engineering, PhD

The Department of Chemical and Biochemical Engineering provides a stimulating academic community where students engage in a highly personalized learning and research environment. The graduate program provides qualified students with deeper and broader training than is possible at the undergraduate level. The Doctor of Philosophy program provides students with opportunities to obtain specialized knowledge and expertise through advanced coursework in chemical engineering and related disciplines, to engage in interdisciplinary research opportunities, and to impact their communities through service learning. The department emphasizes research; most opportunities for graduates are in research and development.

Faculty within the department have focused research projects in biological and pharmaceutical systems, clean energy and water, air quality and climate, polymers and advanced materials, quantum chemical simulation, machine learning, and remote sensing; see Graduate Program on the Department of Chemical and Biochemical Engineering website.

Learning Outcomes

Graduates will:

- demonstrate a mastery of advanced chemical engineering concepts;
- effectively communicate scientific concepts and/or research results in both written and oral formats to scientific and general audiences;
- demonstrate the ability to perform independent research on an original topic in chemical engineering;
- demonstrate the ability to critically identify and solve research problems, summarize disciplinary information, and evaluate research findings;
- demonstrate knowledge of and commitment to safe and ethical behavior through adherence to best safety practices and academic integrity principles; and
- demonstrate the ability to serve as a STEM ambassador through outreach and service activities.

Requirements

The Doctor of Philosophy program in chemical and biochemical engineering requires a minimum of 72 s.h. of graduate credit. However, the degree is granted primarily on the basis of research achievement rather than on the accumulation of semester hours. Students must maintain a UI cumulative grade-point average (GPA) of at least 3.25.

All students must complete a core curriculum, which consists of one course each in transport phenomena, chemical thermodynamics, chemical reaction kinetics, technical communication, and data science plus five additional courses (total of 30 s.h.).

Students entering with a degree other than chemical engineering may need to take additional coursework to attain proficiency in core areas of chemical engineering.

The PhD in chemical and biochemical engineering requires the following coursework.

Core Courses

Students must complete the five core courses with a minimum GPA of 3.50.

Course #	Title	Hours
All of these:		
CBE:5105	Introduction to Literature Review and Proposal Writing	3
CBE:5110	Intermediate Thermodynamics	3
CBE:5115	Transport Phenomena I	3
CBE:5120	Data Science in Chemical and Engineering Systems	3
One of these:		
CBE:3205	Introduction to Biochemical Engineering	3
CBE:5315	Polymer Chemistry	3
CBE:5425	Atmospheric Chemistry and Physics	3

Professional Development Experience

Professional growth extends beyond the curriculum and the research laboratory. Graduate professionals must be able to identify and lead educational and research enterprises that advance the scope and impact of the discipline. Important skills include building professional networks, developing a comprehensive outlook for identifying emerging directions in the field, the ability to explain scientific and engineering principles to a variety of audiences, and more.

Some examples of professional development experiences include an industrial internship, a second teaching assistant experience, teacher training, organizing a session at a national conference, and organizing a local conference. A student's professional development experience must be developed in consultation with their research mentor and approved by the director of graduate studies.

Service Expectations

The service expectation has two components: one that explicitly links the student's research to service and another that connects the student to the more general support activities of their academic and professional community.

For the first service component, students must discuss the impact of research and highlight how research provides outreach opportunities in a comprehensive proposal chapter. Like the rest of the proposal, the chapter is expected to be prospective and prompt the student to incorporate broader impacts into their professional activities.

For the second service component, students must identify approximately 10 hours of appropriate service in their individual development plan and then carry it out during the semester. Students submit documentation, including a description of the event and a photograph showing them carrying out the service.

Electives

Students supplement the core curriculum with electives tailored to their research area.

Additional Requirements

All students are required to take ENGR:7270 Engineering Ethics during their first semester and CBE:5000 Seminar in Chemical and Biochemical Engineering every semester in residence. Students are required to present at one CBE:5000 graduate seminar.

In addition to a minimum GPA in the five core courses, students are required to pass a comprehensive examination before they can become degree candidates. The comprehensive examination is the presentation and defense of the candidate's research proposal. These examinations are arranged by members of the examining committee and may be repeated at the committee's discretion. Comprehensive examination policies are published in the Manual of Rules and Regulations on the Graduate College website. All students are also required to serve as a teaching assistant at least once during the duration of their graduate studies. A final examination, which is a defense of the thesis, completes the doctoral program.

For a detailed description of program requirements, see Graduate Program on the Department of Chemical and Biochemical Engineering website.

Combined Programs

PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in chemical and biochemical engineering in a combined degree program offered by the College of Engineering and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must provide the following.

- Completed application form.
- Unofficial transcript(s). If admitted, official transcripts will be required before enrollment. For international students, all academic records should bear the original stamp or seal of the institution and the signature of a school official. Documents not in English must be accompanied by a complete, literal English translation certified by the issuing institution.
- Optional: Official Graduate Record Examination (GRE) General Test scores (verbal and quantitative) from Educational Testing Services (the university's institutional code is 6681).
- Statement of purpose.
- Three letters of recommendation.

Admission to the department is competitive and is based on an applicant's previous coursework, research, and/or industrial experience. The admissions committee looks for evidence that an applicant has demonstrated qualities such as creativity, self-initiative, dedication, and perseverance exhibited by successful PhD or master's degree students.

Applicants must have earned a four-year baccalaureate degree (Bachelor of Science or Bachelor of Science in Engineering) in chemical engineering or a related science or engineering discipline, such as chemistry, biochemistry, biological engineering, environmental science, atmospheric science, materials science, mathematics, and physics. An MS is not a prerequisite for admission to the PhD program. Applicants to the PhD program are expected to have a cumulative grade-point average of at least 3.00 on a 4.00 scale in work for their undergraduate degree.

Career Advancement

The PhD program is designed to equip students with the skills to pursue a career in industry, academia, or government. Faculty and alumni mentors assigned to graduate students aid in their professional development. Students are exposed to opportunities through seminar speakers who have relevant expertise and are invited to campus.

The Graduate College offers numerous career advancement opportunities and professional development programs for graduate students. For ongoing program offerings, news, and announcements, see Grad Success Center on the Graduate College website.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

	Hours	**1**
	Total Hours	**72**

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Students must take this course each semester in residence.
c Must be completed during first semester.
d Work with faculty advisor to determine appropriate graduate coursework and sequence.
e CBE:5315 is typically offered only during fall semesters .
f Complete within three years of entering program.
g Dissertation defense.

Civil and Environmental Engineering

Chair

- A. Allen Bradley Jr.

Undergraduate majors: civil engineering (BSE); environmental engineering (BSE)

Graduate degrees: MS in civil and environmental engineering; PhD in civil and environmental engineering

Faculty: https://engineering.uiowa.edu/cee/cee-people

Website: https://engineering.uiowa.edu/cee

Civil and environmental engineering is one of the three largest fields of engineering. It traditionally has been concerned with infrastructure facilities that are both large in scale and essential to modern life. Civil and environmental engineering projects include transportation systems and their components, such as bridges, highways, public transit systems, railways, harbors, airports, and seaports; large-scale structures and office buildings that provide enclosed working and living space; and environmental and hydraulic systems that provide clean water and air, including filtration plants and distribution systems for municipal and industrial water supplies, wastewater treatment plants, dams, levees, and irrigation systems.

Growth areas of civil and environmental engineering include water sustainability, infrastructure development, construction management, computer-aided design, hazardous waste management, and engineered environmental systems. In the future, civil and environmental engineers will be called upon to design structures for the earth, prevent erosion and sedimentation of rivers, predict the effects of global climate change on the environment, provide modern and efficient transportation systems, and ensure the quality of air, surface waters, and groundwaters.

In planning and design, civil and environmental engineers work with other engineers, architects, landscape architects, planners, economists, financiers, sociologists, lawyers, and other specialists as members of the design team. Some civil and environmental engineers work in engineering offices; others may be called upon to construct or supervise outdoor projects they have designed. These field assignments, many of which are in remote and fascinating parts of the world, are particularly appealing to many civil and environmental engineers. There also is significant potential for entrepreneurial work by civil and environmental engineers as they start their own companies.

In addition to the degree programs offered by the Department of Civil and Environmental Engineering, the department also participates in two Graduate College programs: Applied Mathematical and Computational Sciences [p. 1695], an interdisciplinary doctoral program; and Transportation Planning [p. 1813], a graduate certificate program.

Certificates

Sustainable Water Development

The graduate Certificate in Sustainable Water Development trains science, technology, engineering, and mathematics (STEM) students to address future challenges of water scarcity and variability while also meeting the food and energy demands of Earth's growing population. The Department of Civil and Environmental Engineering administers the certificate program; see the Certificate in Sustainable Water Development [p. 1678] in the catalog.

Related Certificate: Transportation Planning

The graduate Certificate in Transportation Planning focuses on the varied and complex problems of transportation and on interdisciplinary approaches to addressing them. The departments of Civil and Environmental Engineering, Industrial and Systems Engineering, Mechanical Engineering (College of Engineering), and Economics (Tippie College of Business), and the School of Planning and Public Affairs (Graduate College) participate in the program.

The certificate is coordinated by the School of Planning and Public Affairs; see the Certificate in Transportation Planning [p. 1814] in the catalog.

Programs

Undergraduate Programs of Study

Majors

- Major in Civil Engineering (Bachelor of Science in Engineering) [p. 1584]
- Major in Environmental Engineering (Bachelor of Science in Engineering) [p. 1592]

Graduate Programs of Study

- Master of Science in Civil and Environmental Engineering [p. 1599]
- Doctor of Philosophy in Civil and Environmental Engineering [p. 1604]

Facilities

Undergraduate Teaching Laboratories

Environmental Engineering Teaching Laboratory

Located at the water plant, this laboratory is designed to provide undergraduate students hands-on experience in water laboratory testing and analysis. It serves several program-required and elective courses with a laboratory component.

Engineering Fluids Laboratories

The Engineering Fluids Laboratories comprise a trio of rooms. The Fluids Fundamentals Lab includes recently built equipment and some that has been around for decades. The Advanced Measurements Lab includes larger experimental devices, such as a wind tunnel and a towing tank. The third laboratory, the Fluids Workshop, is a space in which students can perform their experiments.

Hydraulics Laboratory

The Hydraulics Laboratory experimental facilities include flumes and pipe systems to perform experiments on open-channel and closed-conduit flows. Instruments are available

for measuring various flow quantities such as discharge, pressure, velocity, and temperature.

Computer-Aided Design (CAD) Lab

The CAD Lab contains 17 workstations, all connected to the engineering computer network, that allow students to access AutoCAD, Pro/ENGINEER, and a full complement of structural, hydraulic, transportation, and environmental software to support work on engineering design projects.

Geomechanics Laboratory

This modern 936-square-foot climate-controlled wet teaching lab features two sinks, 10 central compressed air outlets, 10 central vacuum outlets, and a fume hood. It can accommodate up to 18 students at a time. The lab is outfitted for measurements of soil grain specific gravities, soil densities, grain-size distributions, Atterberg limits, hydraulic conductivities, liquefaction, soil compressibility, time-dependent soil consolidation properties, shear strength of soils via direct shear and triaxial compression machines, and soil compaction behavior.

Structures, Mechanics, and Materials Laboratory

The Structures, Mechanics, and Materials Laboratory is a teaching lab where students conduct experiments to quantify the physical and mechanical properties of construction materials. Equipment is available to test metals, aggregates, concrete, and asphalt.

Graduate Laboratories

Structures, Mechanics, and Materials

Facilities for computations, materials testing, geotechnical experiments, and small-scale structural testing are available for research and teaching. Faculty, staff, and students in structures, mechanics, and materials (SMM) have access to the computing resources of the Engineering Technology Center and the Iowa Technology Institute (ITI). Both centers continuously update their computing facilities to maintain pace with the rapidly changing field.

A wide range of experimental facilities are available for testing structural materials such as Portland cement concrete, asphalt, metals, timber, and composites. These facilities include several loading frames (purely uniaxial, purely torsional, and axial-torsional) that are available with computer-based control and data collection systems. Facilities for creep testing, triaxial soil testing, and high-cycle fatigue testing are also available. The laboratories have a variety of ovens and other facilities for the preparation and treatment of test specimens.

Four well-equipped physical testing laboratories are dedicated to SMM teaching and research: the Civil Materials Laboratory, the Soil Mechanics Laboratory, the Plasticity Laboratory, and the Asphalt Laboratory. The Civil Materials Laboratory currently has a small-scale, single-degree-of-freedom shaker table. Faculty, staff, and students have access through ITI to a six-degree-of-freedom man-rated shaker table with a 4,000-pound payload and a 12-camera Vicon motion-capture system.

Transportation Engineering

The department's Asphalt Laboratory is equipped with a set of Superpave testing equipment and asphalt mixture performance testing equipment. The lab has a Hamburg wheel tracking device for measuring the moisture sensitivity of asphalt mixtures, asphalt foaming equipment for mix design of cold in-place recycled asphalt using foamed asphalt, and equipment for semi-circular bending and indirect tensile strength tests and volumetric analysis of asphalt mixtures. The Asphalt Laboratory is one of the department's many laboratories for testing the strength behavior of other materials.

Water and the Environment

The teaching and research functions of the department are closely connected to the research activities of IIHR—Hydroscience and Engineering. The institute houses some of the most modern research facilities in the world, including a 100-meter towing tank, a wave basin facility for ship hydrodynamics research, several flumes, an array of field instrumentation for hydrologic experiments, extensive laboratory space for hydraulic modeling, state-of-the-art instrumentation for flow measurements and visualization, and comprehensive computational facilities.

Research related to ecohydraulics and the environment takes place at the Lucille A. Carver Mississippi Riverside Environmental Research Station. IIHR—Hydroscience and Engineering operates the 250-square-foot facility, which is located on the Mississippi River near Muscatine, Iowa. The station provides engineers and biological scientists with an ideal facility in which to examine the multifaceted ecohydraulic processes of the upper Mississippi. It is equipped with water quality laboratories, research boats, and a seminar room.

The Environmental Engineering and Science Laboratories provide state-of-the-art facilities, equipment, and expertise to support both undergraduate and graduate-level instruction and research. The labs support research in contaminant fate and transport in various media (air, water, soil, plants, and microbes), drinking water disinfection and distribution, wastewater treatment, geochemical-contaminant interactions, bioremediation, and phytoremediation. They also provide resources for analytical chemistry, electrochemistry, molecular biology, microscopy, computer modeling, and simulated environments at bench- and pilot-scale levels.

The Environmental Engineering and Science Laboratories are affiliated with the university's Center for Health Effects of Environmental Contamination, the Center for Global and Regional Environmental Research, the Environmental Health Sciences Research Center, an affiliate of the National Institute of Environmental Health Sciences (NIEHS), IIHR—Hydroscience and Engineering, and the Iowa Superfund Research Program.

Courses

Civil and Environmental Engineering Courses

CEE:1010 Introduction to Careers in Environmental Engineering 0 s.h.
Past, present, and future roles of environmental engineers in society; introduction to the discipline's historical roots and early visionary leaders in sanitation engineering and public health; growth during the environmental movement, and current role of environmental engineers in modern society as stewards for clean air, water, and energy; range of career opportunities available to environmental engineering majors, particularly in the emerging role of ambassadors for sustainable development.

CEE:1030 Introduction to Earth Science 3-4 s.h.
Relationships between plate tectonics, geologic time, and the rock cycle with volcanoes and igneous, sedimentary, metamorphic rocks; fossils; radioactive isotopes; landscape evolution; mountain building; natural resources; their impacts on civilization. GE: Natural Sciences with Lab; Natural Sciences without Lab. Same as SEES:1030.

CEE:1031 Introduction to Earth Science Laboratory 1 s.h.
Laboratory component of SEES:1030. Requirements: completion of 3 s.h. in SEES:1030 or CEE:1030. GE: Natural Sciences Lab only. Same as SEES:1031.

CEE:2010 Civil and Environmental Engineering Professional Practice and Ethics 1 s.h.
Introduction to the Civil and Environmental Engineering department, its curriculum, and the profession; explore the fields of civil and environmental engineering and provide a primer on the steps necessary to become a licensed professional engineer; introduce professional ethics, engineering work products, and project lifecycle.

CEE:2015 Civil Engineering Tools 2 s.h.
Tools and methods used in civil engineering career: AutoCAD, programming, project estimating, heavy equipment productivity estimation, and earthwork estimation.

CEE:2050 Severe and Unusual Weather 3 s.h.
Basic weather concepts behind severe weather phenomena and essential safety information; how weather events cause billions of dollars in damage and thousands of casualties; winter storms can impact half of the nation, paralyzing the transportation network with icy roads and wind driven snow; tornadoes can strike within minutes tearing apart homes; hurricanes can destroy entire communities with strong winds, heavy rain, and deadly storm surge; how understanding severe weather and knowing what to do before, during, and after an event can significantly reduce injury, deaths, and property damage. Same as CBE:2050.

CEE:2240 Drafting and Modeling With AutoCAD and Rhino 3 s.h.
Learn to expertly navigate AutoCAD and Rhino software to produce precise plans, elevations, and sections for various objects and interior spaces. Develop proficiency in creating and manipulating geometric forms. Explore the intricacies of texture mapping, background settings, and lighting techniques to enhance the realism of models. Master the use of cameras and viewpoints to create compelling visualizations and walkthroughs. Delve into basic animation principles to bring dynamic elements to designs. This comprehensive experience equips students with the technical skills and creative tools needed to excel in the field of digital design and modeling. Prerequisites: ARTS:1510 and ARTS:1520 and (CERM:2010 or DSGN:2500 or DRAW:2310 or INTM:2710 or MTLS:2910 or PHTO:2600 or PNTG:2410 or PRNT:2610 or SCLP:2810 or TDSN:2210). Same as TDSN:2240.

CEE:3001 Leadership Skills for Engineers 1 s.h.
Survey of leadership ideas and principles as applied to situations commonly encountered in civil engineering practice, especially as they relate to challenges that beginning engineers face; speakers in selected engineering professions provide context and examples; exercises on leadership principles. Requirements: junior standing in civil and environmental engineering.

CEE:3002 Technical Communication in Civil and Environmental Engineering 1 s.h.
Develop communication skills through data and oral presentations; demonstrate an ability to acquire data and new knowledge from reliable sources; prepare high-quality graphs for presentations. Requirements: sophomore standing.

CEE:3003 Project Management Skills 1 s.h.
Review and extension of civil and environmental engineering project management skills in preparation for capstone senior design course; project scheduling, cost estimating, contract types, construction phasing; review for Fundamentals of Engineering Exam (FE) and practice tests in four subdisciplinary areas. Requirements: senior standing.

CEE:3142 Quality Control 3 s.h.
Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisites: STAT:2020 or BAIS:9100 or (STAT:3100 and STAT:3101 and STAT:3200). Same as ISE:3600, STAT:3620.

CEE:3155 Principles of Environmental Engineering 4 s.h.
Water supply and treatment processes; wastewater treatment processes; processes for air pollution control, groundwater remediation; solid and hazardous waste management. Prerequisites: CHEM:1110.

CEE:3328 Fluvial Geomorphology 3 s.h.
Hydrologic principles, stream channel processes, and fluvial geomorphology within drainage basin systems; spatial and temporal variations in water distribution, analysis of hydrological data, flow mechanisms, sediment transport, forecasting procedures, hydrograph construction, modeling. Requirements: SEES:3020 or another 3000-level geology or hydraulics course. Same as SEES:3380.

CEE:3371 Principles of Hydraulics and Hydrology 3 s.h.
Hydraulics of pressure conduits and open channels, dimensional analysis, flow measurements, hydraulic machinery, laboratory. Prerequisites: ENGR:2510.

CEE:3430 Water Treatment 4 s.h.
Physical, chemical, and biological processes and operations to remove and treat chemical and pathogenic pollutants and protect human and environmental health; relevant to drinking water, municipal wastewater, water reuse, stormwater, industrial process water, agricultural wastewater; modern technologies and appropriate designs for the developing world; theory and applications; hands-on laboratory. Prerequisites: CEE:3155 and ENGR:2510.

CEE:3530 Geomechanics 4 s.h.
Identification and classification of earth materials; hydraulic and mechanical properties of soils; soil improvement; laboratory testing. Prerequisites: ENGR:2750.

CEE:3533 Principles of Structural Engineering 4 s.h.
Fundamental principles of structural analysis applied to statically determinate and indeterminate structures, continuous beams, trusses, and frames; external and internal equilibrium, compatibility of deformation, influence lines, virtual work; parallel use of classical and matrix formulation; slope deflection, flexibility and stiffness methods; use of computers. Prerequisites: ENGR:2750.

CEE:3586 Civil Engineering Materials 3 s.h.
Structure, strength and failure, durability, deformation, practice, and processing for primary construction materials systems, including steel, aluminum, concrete, asphalt, fiber-reinforced composites, masonry, timber. Prerequisites: ENGR:2750.

CEE:3763 Principles of Transportation Engineering 3 s.h.
History of transportation modes, new transport technologies, traffic operations and control, economic evaluation of transport alternatives, transportation planning, roadway design and construction, route location, preventive maintenance strategies. Requirements: sophomore standing.

CEE:3783 Surveying and Remote Sensing 3 s.h.
Engineering surveying measurements, methods, computations. Prerequisites: ENGR:1100.

CEE:3790 Resilient Infrastructure and Emergency Response 3 s.h.
Concepts of resilient cities with specific emphasis on role of infrastructure and built environment; risk analysis, hazard mitigation and emergency response to various threats; resiliency through good design.

CEE:3996 Civil and Environmental Engineering: Engineering Project 1 s.h.
Support for student learning associated with an engineering project; students work as a team to design and fabricate a product; student projects are often associated with a contest or competitions (e.g., steel bridge, concrete canoe).

CEE:3997 Engineering Service Project 1-3 s.h.
Provides support of student learning associated with a variety of international engineering service projects facilitated by the Department of Civil and Environmental Engineering; service projects are usually designed and built as part of an Engineers Without Borders USA and/or a Bridges to Prosperity (Continental Crossings) approved program; active involvement by students in these organizations required.

CEE:3998 Individual Investigations: Civil Engineering arr.
Individual projects for civil engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

CEE:4102 Groundwater 3 s.h.
Groundwater quality and quantity; Darcy's Law, 2D flow equation, unsaturated zone, contaminant transport, redox reactions, drinking water quality, bioremediation; laboratories in permeameter testing, porous media grain size analysis, pump testing, monitoring well installation.

CEE:4104 Groundwater Modeling 3 s.h.
Groundwater flow and contaminant transport modeling; numerical methods, applications of groundwater modeling to water supply, groundwater resources evaluation, remediation design using software; GMS (MODFLOW, MODPATH, and MT3D). Prerequisites: MATH:1860 and SEES:4630. Same as SEES:4660.

CEE:4107 Sustainable Systems 3 s.h.
New and emerging concepts in sustainable systems design and assessment. Same as CBE:4410.

CEE:4118 Statistical Methods in Water and the Environment 3 s.h.
Basic methods required for data analysis and interpretation of processes related to water and the environment; emphasis on formulating questions, choosing appropriate statistical tools for a given problem, drawing appropriate conclusions from analyses; concepts related to statistical inference and common probabilistic models, linear regression, non-parametric statistics; how to perform these analyses using R programming language; introduction to statistical methods through use of hands-on analyses with real data. Prerequisites: STAT:2020 and MATH:2560.

CEE:4119 Hydrology 3 s.h.
Overview of fundamental processes in water cycle, including precipitation, evaporation, infiltration, and runoff; quantitative approaches for predicting streamflow and design discharges; applications to flood hazard assessment and stormwater management. Prerequisites: ENGR:2510.

CEE:4135 Health Monitoring of Structural and Mechanical Systems 3 s.h.
Measurements, structural modeling, structural analysis, stiffness method, trusses and frames, structural testing, modal analysis. Prerequisites: ENGR:2750. Same as BME:4135, ME:4235.

CEE:4150 Environmental Chemistry 3 s.h.
Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisites: CHEM:1120. Same as CBE:4420.

CEE:4157 Environmental Engineering Design 3 s.h.
Application of physical, chemical, and biological operations and processes to the design of water and wastewater treatment systems; applications in solid and hazardous waste treatment. Prerequisites: CEE:3155.

CEE:4158 Solid and Hazardous Wastes 3 s.h.
Sources, characteristics, collection, disposal of solid and hazardous wastes; environmental impacts of hazardous waste management; resource recovery systems. Requirements: for OEH:4920—OEH:4240. Same as OEH:4920.

CEE:4159 Air Pollution Control Technology 3 s.h.
Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Same as CBE:4459, IGPI:4159.

CEE:4160 Introduction to Bridge Engineering 3 s.h.
Bridge engineering and design; history of the bridge; factors that affect bridge design; bridges according to use (e.g., road, rail, pedestrian and bicycle) and type (e.g., suspension, cable stay, truss); how sustainability concepts may impact bridge design; substantial design exercise. Prerequisites: CEE:3533.

CEE:4162 Structural Systems for Buildings 3 s.h.
Detailed analysis and design of gravity and lateral force resisting systems for buildings; roof, floor, and bearing wall gravity systems; steel braced frames, steel and concrete moment frames, and masonry and timber shear walls lateral systems; introduction to tall building structures. Prerequisites: CEE:3533.

CEE:4164 Design of Wood Structures 3 s.h.
Framing layout and analysis of wood frame structures for gravity and lateral loads; design of structural members for bending, axial load, and shear, including joists, beams, columns, engineered lumber, bearing walls, shear walls, and diaphragms; introduction to connection design. Prerequisites: CEE:3533.

CEE:4176 Transportation Research Methods and Analysis 3 s.h.
Methods for measuring current and future transportation demand based on changes in population, preferences, built environment, and changing policy objectives; survey design and analysis; basics of travel demand modeling. Same as URP:4262.

CEE:4180 Fundamentals of Atmospheric Science 3 s.h.
Review of fundamental principles in atmospheric sciences needed for study of interdisciplinary topics involving the Earth's atmosphere; understanding weather and climate processes to address problems in engineering; hydrometeorology of rainfall and its measurement by remote sensing; impact of climate anomalies and climate change on water resources; exchange of water, energy, and chemicals at the land-atmosphere boundary; forecasting of atmospheric chemistry and air quality. Prerequisites: ENGR:2510.

CEE:4317 Remote Sensing 3 s.h.
Fundamentals of electromagnetic waves, atmospheric radiative transfer, passive remote sensing, weather radar, hydrologic application of remote sensing.

CEE:4370 Open Channel Flow and Sediment Transport 3 s.h.
In-depth analysis of governing flow equations; steady uniform flow in channels of different resistance and cross section; flow control sections; specific energy considerations; analysis and computation of gradually varied profiles and spatially varied flow effected by lateral outflow and inflow; unsteady flow; flood routing. Prerequisites: CEE:3371.

CEE:4371 Water Resources Engineering 3 s.h.
Planning and economics of varied water resources projects; stochastic basis for design; flood damage mitigation, reservoirs, river morphology, economic analysis of water projects, urban water requirements, water supply, hydroelectric power systems, river navigation; contemporary civil-engineering problems and issues associated with water infrastructure development. Corequisites: CEE:3371.

CEE:4374 Water Resource Design 3 s.h.
Prerequisites to storm water management systems design, including design flows and rates; analysis and design of storm sewers, detention basins, street and highway drainage facilities, culverts, dams, spillways, measures for energy dissipation; review of wastewater transfer systems and design. Prerequisites: CEE:3371.

CEE:4385 Water Scarcity in Rural India 3 s.h.
Scientific, engineering, economic, and social aspects contributing to water scarcity in rural India; experiential learning using instruments and analysis of water enhancement projects.

CEE:4506 Design of Concrete Structures 3 s.h.
Fundamental analysis and design of reinforced concrete members and structures, flexure, shear, bond, continuity, beams, one-way slab system; columns. Prerequisites: CEE:3533.

CEE:4511 Scientific Computing and Machine Learning 3 s.h.
Numerical methods in scientific computing; root problems and optimization; linear algebraic equations; eigenvalue problems; numerical differentiation and integration; interpolation and curve-fitting; initial value and boundary value problems; machine learning in regression, classification, and clustering problems; Python programming and packages. Prerequisites: MATH:2560. Same as ME:4111.

CEE:4512 Engineering Design Optimization 3 s.h.
Engineering design projects involving modeling, formulation, and analysis using optimization concepts and principles; linear and nonlinear models, optimality conditions, numerical methods. Prerequisites: ENGR:2110 and MATH:2550. Requirements: junior standing. Same as ME:4112.

CEE:4515 Computer-Aided Engineering 3 s.h.
Computational engineering modeling and simulation, geometric modeling, grid generation, finite-element and finite-volume methods, uncertainty analysis, optimization, engineering applications. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as ME:4110.

CEE:4532 Fundamentals of Vibrations 3 s.h.
Vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, and arbitrary excitation; modal analysis; applications. Prerequisites: ENGR:2750. Same as ME:4153.

CEE:4533 Finite Element I 3 s.h.
One- and two-dimensional boundary value problems; heat flow, fluid flow, torsion of bars; trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisites: ENGR:2750. Same as IGPI:4115.

CEE:4535 Design of Steel Structures 3 s.h.
Concepts and procedures in steel design; LRFD (load and resistance factor design) methodology for beams/columns; analysis and design of indeterminate structures. Prerequisites: CEE:3533.

CEE:4539 Foundations of Structures 3 s.h.
Application of soil mechanics to analysis of structural foundations; slope stability analysis; bearing capacity and settlement of shallow and deep foundations; retaining structures, braced cuts, reinforced earth structures; usage of computational models; subsurface exploration methods. Prerequisites: CEE:3530.

CEE:4560 Pavement Engineering 3 s.h.
Fundamental design principles; characterization and testing of asphalt and concrete paving materials; stresses and stain development within pavement structure; basic principles of mechanistic-empirical pavement design procedures. Prerequisites: CEE:3763.

CEE:4730 Transportation Infrastructure Construction and Management 3 s.h.
Analytical methods for developing transportation infrastructure construction and management systems; e-construction, transportation infrastructure condition evaluation, performance modeling, maintenance and rehabilitation optimization, asset management, development of transportation infrastructure construction and management system; application of information technology and mobile computing to solving transportation infrastructure construction and management problems. Prerequisites: CEE:3763.

CEE:4762 Design of Transportation Systems 3 s.h.
Overview of different modes within transportation systems; concepts of sustainability and livability in transportation system design; derivation of standards for geometric design of highways; roundabout design; cross-sectional and longitudinal geometric design of highways. Prerequisites: CEE:3763.

CEE:4763 Traffic Engineering 3 s.h.
Design of traffic control devices; evaluation and analysis of intersections and transportation networks using appropriate computer software. Prerequisites: CEE:3763.

CEE:4850 Project Design and Management in Civil Engineering 3 s.h.
Design of civil engineering systems, individual and team design projects oriented toward the solution of local problems, project management, construction management, contracts, budgeting, bidding. Corequisites: CEE:3003. Requirements: final semester.

CEE:5083 Introduction to Comp Flow in Pipes and Channels 3 s.h.
General review of numerical methods in hydraulics (finite-difference, finite-element, and method of characteristics); stability and accuracy of numerical schemes; steady free surface flows; flow transients in pipelines and channels.

CEE:5095 Career Paths in Sustainable Water Development 0 s.h.
Introduction to different career paths in the food, energy, and water (FEW) sector; speakers from a variety of different careers—including researchers, professors, entrepreneurs, consultants, and civic, professional, and global engineers—discuss their own career paths as well as current opportunities in their fields; students prepare individual development plans that identify their preferred career (i.e., training) path, a plan of study (i.e., path coursework), mentors, and their preferred research area. Requirements: graduate standing in sustainable water development program.

CEE:5096 Water, Energy, and Food Nexus Seminar 0 s.h.
Invited presentations on research, policy, economics, and social drivers of water, energy, and food in the 21st century.

CEE:5097 Coaching Seminar on Communicating Water Science 0 s.h.
Presentation of student research on water, energy, and food in the 21st century; students receive live, immediate feedback from their peers and faculty coaches on best practices to improve their oral communication skills.

CEE:5098 Graduate Seminar in Structures, Materials, Mechanics, and Transportation 0 s.h.
Presentation and discussion of recent advances and research in structures, mechanics, materials, and transportation engineering by guest lecturers, faculty, and students. Requirements: graduate standing.

CEE:5099 Civil and Environmental Engineering Graduate Seminar 0 s.h.
Presentation and discussion of current topics, case studies, and research in civil and environmental engineering by students, faculty, and invited speakers.

CEE:5110 Managing and Sharing Your Research Data 1 s.h.
Overview of essential practices in managing the data you collect and generate during research. Topics include file organization; documenting your work and lab notebooks; optimizing spreadsheet data and cleanup tools; reproducibility; funder and publisher requirements; and conclude with how and where to share and publish data, from choosing a repository to creating a data record, including licensing, ownership, preservation of access, reuse, and citation. Applicable for any student currently doing research, or planning to do so. Same as OEH:5110.

CEE:5115 Atmospheric Chemistry and Physics 3 s.h.
Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources, and removal processes. Corequisites: CBE:3120. Same as CBE:5425.

CEE:5137 Composite Materials 3 s.h.
Mechanical behavior of composite materials and their engineering applications; composite constituents (fibers, particles, matrices) and their properties and behavior; macromechanical behavior of composite laminae; micromechanical predictions of composite overall properties; classical lamination theory; composite beams and plates. Prerequisites: ENGR:2750. Same as ME:5167.

CEE:5151 Building Future Leaders in Sustainable Development 3 s.h.
Focus on competencies needed to translate training and research into action for social good; topics include ethics, cultural competency, collaboration and team science, use-inspired design, and engagement. Same as SDG:5100.

CEE:5156 Physical and Chemical Environmental Processes 3 s.h.
Theory of physical and chemical operations and processes in water and wastewater treatment, including fundamental aspects of process dynamics; lectures, laboratory. Prerequisites: CEE:4150. Corequisites: CEE:3155.

CEE:5179 Continuum Mechanics arr.
Mechanics of continuous media; kinematics of deformation, concepts of stress and strain; conservation laws of mass, momentum and energy; constitutive theories; boundary and initial value problems. Prerequisites: ENGR:2750 or ENGR:2510. Same as ME:5179.

CEE:5225 Communicating Data Through Stories 3 s.h.
How to communicate science effectively and responsively with multiple audiences from peers and professors to potential employers, policymakers, and the lay public; focus on speaking about science clearly and vividly in ways that can engage varied audiences, especially those outside the student's own field; connecting and finding common ground with an audience, defining goals, identifying main points, speaking without jargon, explaining meaning and context, using storytelling techniques and multimedia elements. Same as GRAD:5225, SDG:5225.

CEE:5236 Optimization of Structural Systems 3 s.h.
Advanced topics; optimization of structural topology, shape, and material; finite dimensional dynamic response optimization, sensitivity analysis, distributed parameter systems; projects. Same as BME:5720.

CEE:5310 Informatics for Sustainable Systems 3 s.h.
Introduction to fundamental and advanced environmental informatics concepts and procedures including automated data collection, data management, data transformations, and processing to support modeling and analysis; scientific visualization of environmental data to support management of food, energy, and water (FEW) resources; sustainability in FEW systems. Same as IGPI:5311, URP:5310.

CEE:5350 Watershed Hydrology and Ecosystem Processes 3 s.h.
Introduction to hydrologic and ecosystem processes within a watershed; description of water, energy, and nutrient cycling in watersheds; focus on hydrologic and water-quality issues in agricultural Midwest; watershed modeling techniques, ecosystem goods and services, and selected case studies in watershed and ecosystem management problems. Requirements: graduate standing.

CEE:5355 Advanced Hydrology 3 s.h.
Expanding on core principles of hydraulics and hydrology, explore advanced distributed hydrologic modeling techniques used in early warning systems. Topics include probabilistic forecasting, spatial forecast verification, data assimilation, and data-driven simulation. Emphasis is placed on scientific computing using C++, Python, R, and MATLAB for practical learning. Prerequisites: CEE:3371.

CEE:5369 Intermediate Mechanics of Fluids 3 s.h.
Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisites: ENGR:2510. Same as ME:5160.

CEE:5372 Experimental Methods in Fluid Mechanics and Heat Transfer 3 s.h.
Hands-on experience in methodology of conducting experiments in fluid mechanics and heat transfer from design to data acquisition and processing; essential theoretical elements, experimental methodologies, data acquisition systems, uncertainty analysis; wide variety of instruments for fundamental and applied experimentation; work in small groups; design, implement, test, and report an experiment in area of interest. Same as ME:5162.

CEE:5380 Fluid Flows in Environmental Systems 3 s.h.
Introduction to environmental fluid flows and transport processes with focus on application and developing a language of environmental fluid mechanics; topics include physical and mathematical description of conservation and transport laws, statistical techniques for analyzing environmental flow data, scaling and similarity, stratification, turbulent flux measurement and modeling, environmental boundary conditions; application to surface waters and the planetary boundary layer; applied project involving collection and analysis of environmental flow data.

CEE:5390 PCBs in the Environment 3 s.h.
Polychlorinated biphenyls (PCBs) as potent carcinogens and linked to metabolic syndrome, autism, learning disabilities, hearing loss, and neurological disorders; how these compounds become to be such ubiquitous environmental pollutants; what the impact of their presence is; how sites are remediated and exposures reduced; in-depth examination through literature review, laboratory experiments, computational modeling, final written reports, and presentations. Recommendations: laboratory experience.

CEE:5410 Politics and Economics of the Food, Energy, Water Nexus 3 s.h.
Focus on the relationships between food, energy, and water resources; current and future political and economic frameworks that shape the food, energy, and water nexus.

CEE:5417 Physical Meteorology and Atmospheric Radiative Transfer 3 s.h.
Physical processes for weather and climate including radiative transfer, cloud and precipitation formation, and atmospheric electricity; theory of scattering by atmospheric particles (e.g., clouds, aerosols, molecules), atmospheric radiative transfer equations, and numerical techniques and tools to solve these equations. Requirements: senior or graduate standing. Same as CBE:5417, IGPI:5417.

CEE:5440 Foundations of Environmental Chemistry and Microbiology 3 s.h.
Investigation of chemical and biological processes at the food-energy-water nexus; example topic areas include biogeochemical cycling of nutrients, biomass conversion, resource recovery from wastewater, removing pollutants from drinking water sources, water reuse, engineered natural treatment systems, pollutant transformation and control, treatment of process waters. Requirements: undergraduate senior standing or graduate standing.

CEE:5460 Water Quality and Flow 3 s.h.
Laboratory and field experiments to promote student learning of flow-dependent movement and associated environmental transformation of surface water and groundwater pollutants; exploration of water quality and flow fundamentals needed to design and numerically model treatment reactors for small-community wastewater, urban storm water, and agricultural runoff; emphasis on engineered solutions that couple water quality and flow considerations as potential mitigations for adverse effects on natural water cycle caused by floods and other natural and human-influenced phenomena.

CEE:5513 Mathematical Methods in Engineering 3 s.h.
Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: MATH:2550 and MATH:2560. Same as CBE:5140, ME:5113.

CEE:5540 Intermediate Mechanics of Deformable Bodies 3 s.h.
Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: ENGR:2750. Same as ME:5150.

CEE:5549 Fracture Mechanics 3 s.h.
Three-dimensional stress states, definition and criteria for failure, nominal and local yield phenomena, linear elastic and elastic plastic fracture mechanics, plane stress and plane strain fracture toughness, J-Integral, crack opening displacement, environmental assisted cracking, fatigue crack growth, fail safe, and damage tolerant design. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as ME:5159.

CEE:5678 Application Simulation to Transportation 3 s.h.
Transportation system management and traffic engineering; application of real-time simulation and visualization. Prerequisites: CEE:3763 or CEE:4763. Same as URP:5678.

CEE:5875 Perspectives in Biotechnology 1 s.h.
Topics related to careers in biotechnology with an emphasis on preparing graduate students for careers outside of academia; discussions led by a series of guest speakers from leading biotech industries; understanding the societal impact of basic research; participation in round-table discussions; and presentation of student research findings. Requirements: graduate standing and good academic standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BMB:5875, CBE:5875, CHEM:5875, MICR:5875, PHAR:5875.

CEE:5990 Structural Engineering Practicum A 2 s.h.
Students select a design project and develop two or more alternative design concepts in consultation with a three-member advisory committee consisting of at least one faculty member and one design professional; entire design process documented in a written report. Prerequisites: CEE:4506 and CEE:4535.

CEE:5991 Structural Engineering Practicum B 1 s.h.
Detailed design development of one of the concepts developed in CEE:5990; students perform detailed design calculations using applicable structural analysis and design software, produce professional quality structural plans including connection details, and defend design to a three-member advisory committee. Prerequisites: CEE:5990.

CEE:5998 Individual Investigations: Civil and Environmental Engineering arr.
Individual projects for civil and environmental engineering graduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

CEE:5999 Research: Civil and Environmental Engineering MS Thesis arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the MS with thesis in civil and environmental engineering. Requirements: graduate standing.

CEE:6225 Communicating Science 3 s.h.
Writing and speaking about environmental engineering and science research; key principles of writing with clarity and cohesion, and practice applying these principles on a piece of research writing that students are currently working on; review best practices for presenting research to peers and at conferences; students are required to share their work with peers through writing and presentations. Recommendations: graduate standing in earth and environmental sciences; MS students must be thesis option.

CEE:6250 Environmental Biotechnology 3 s.h.
Environmental biotechnology utilizes microorganisms to improve sustainability of human society; basic concepts and quantitative tools needed for microbiological processes to behave in ways that are understandable, predictable, and unified; application of these fundamental principles to a variety of modern applications. Prerequisites: CEE:5440.

CEE:6253 Environmental Organic Chemistry 3 s.h.
Environmental factors that govern processes that determine fate of organic chemicals in natural and engineered systems; knowledge of chemical fate applied toward quantitatively assessing environmental behavior of organic chemicals; holistic view on physical-chemical properties of organic compounds, including aspects of gas-solid partitioning, bioaccumulation, and transformations in the atmosphere.

CEE:6255 Environmental Biotechnology and Bioremediation 3 s.h.
Concepts in molecular microbial ecology and bioremediation; microbial diversity and genetics, evolution of biodegradation pathways, application of quantitative PCR, high-throughput amplicon and metagenomic and transcriptomic sequencing, proteomics, stable isotopes; bioremediation research and practice.

CEE:6299 Advanced Topics in Water and the Environment 1-3 s.h.
Advanced topics or areas of study not formally offered in other civil and environmental courses; topics include environmental engineering and science, hydraulics, hydrology, water resources, and sustainable water development.

CEE:6310 Analytical Methods in Mechanical Systems 3 s.h.
Vector and function spaces; functionals and operators in Hilbert spaces; calculus of variations and functional analysis with application to mechanics; Ritz and Galerkin methods. Prerequisites: ME:5113. Same as ME:6214.

CEE:6376 Viscous Flow 3 s.h.
Equations of viscous flow; classical analytical and numerical solutions; flow regimes and approximations; laminar boundary layers—equations, solution methods, applications; stability theory and transition; incompressible turbulent flow—mean-flow and Reynolds-stress equations, modeling, turbulent boundary layers and free shear flows. Requirements: for ME:6260—ME:5160; for CEE:6376—CEE:5369. Same as ME:6260.

CEE:6520 Watershed Sedimentation 3 s.h.
Exploration of rich and complex field of sediment transport, geomorphology, and contaminant transport; associated physical, chemical, and biological processes with associated mathematical modeling; investigation of current topics not covered elsewhere, including physical processes affecting stability/mobility, transport, and fate of soil/sediments; lack of general understanding in development of fine-scale sedimentary structure in different systems, particularly contamination and contamination release; suspension effects on turbulent flows. Prerequisites: CEE:4370.

CEE:6532 Finite Element II 3 s.h.
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as IGPI:6216, ME:6215.

CEE:6599 Advanced Topics in Infrastructure Systems 1-3 s.h.
Advanced topics or areas of study not formally offered in other structures and transportation courses; topics may include one or more areas (e.g., structural dynamics, advanced structural systems, earthquake engineering, sustainable systems).

CEE:7250 Advanced Fracture Mechanics 3 s.h.
Fracture of modern engineering materials; linear-elastic fracture; computational methods; functionally graded materials; elastic-plastic fracture; multiscale fracture and fatigue crack initiation. Prerequisites: ME:5113 and (ME:5159 or CEE:4533). Same as ME:7250.

CEE:7999 Research: Civil and Environmental Engineering PhD Dissertation arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the PhD in civil and environmental engineering.

Civil Engineering, BSE

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Educational Objectives

Within a few years of graduation, graduates of the Bachelor of Science in Engineering (BSE) program in civil engineering will:

- be productive and contributing members of the civil engineering profession as practitioners, entrepreneurs, researchers, or teachers;
- be engaged in learning, understanding, and applying new ideas as the field develops;
- pursue advanced studies, if qualified and interested; and
- promote the safety, health, and welfare of the public and the environment through professional practice and civic leadership.

Requirements

The Bachelor of Science in Engineering (BSE) with a major in civil engineering requires a minimum of 128 s.h. of credit. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1529] in the catalog. 6 s.h. of a student's major courses fulfill the collegiate curriculum's basic science or college-level math requirement. Students completing the major in civil engineering fulfill the collegiate statistics requirement by completing STAT:2020 Probability and Statistics for the Engineering and Physical Sciences. Some focus areas may suggest or require specific courses to fulfill the general education component of the collegiate curriculum; see the section titled "Focus Area."

The BSE with a major in civil engineering requires the following coursework.

Requirements	Hours
Collegiate Curriculum	49
Basic Science and College-Level Math, from Major Requirements or Focus Area	6
Major Requirements	52
Focus Area	21-22

Major Requirements

Major requirements include a set of common courses (45 s.h.), four professional skills courses (4 s.h.), two design courses (6 s.h.), and one capstone design course (3 s.h.).

Common Courses

Course #	Title	Hours
All of these:		
CEE:1030	Introduction to Earth Science (no lab required)	3
or SEES:1080	Introduction to Environmental Science	
CEE:2015	Civil Engineering Tools	2
CEE:3155	Principles of Environmental Engineering	4
CEE:3371	Principles of Hydraulics and Hydrology	3
CEE:3530	Geomechanics	4
CEE:3533	Principles of Structural Engineering	4
CEE:3586	Civil Engineering Materials	3
CEE:3763	Principles of Transportation Engineering	3
ENGR:2110	Statics	2
ENGR:2130	Thermodynamics	3
ENGR:2510	Fluid Mechanics	4
ENGR:2710	Dynamics	3
ENGR:2750	Mechanics of Deformable Bodies	3
And one of these:		
CHEM:1120	Principles of Chemistry II	4
PHYS:1612	Introductory Physics II (with lab)	4

Professional Skills

Course #	Title	Hours
All of these:		
CEE:2010	Civil and Environmental Engineering Professional Practice and Ethics	1
CEE:3001	Leadership Skills for Engineers	1
CEE:3002	Technical Communication in Civil and Environmental Engineering	1
CEE:3003	Project Management Skills	1

Design Courses

Some focus areas require specific courses to fulfill part of this requirement; see "Focus Area." Students cannot count both CEE:4506 Design of Concrete Structures and CEE:4535 Design of Steel Structures towards the design requirement for the major.

Course #	Title	Hours
Two of these:		
CEE:4157	Environmental Engineering Design	3
CEE:4374	Water Resource Design	3
CEE:4506	Design of Concrete Structures	3
or CEE:4535	Design of Steel Structures	
CEE:4762	Design of Transportation Systems	3

Capstone Design Course

Course #	Title	Hours
This course:		
CEE:4850	Project Design and Management in Civil Engineering	3

Focus Area

Students must select focus area courses according to guidelines established by the Department of Civil and Environmental Engineering. Civil engineering students may choose from several standard focus areas developed by the department or create an individual focus area tailored to their interests.

Standard focus areas are offered in the broad field of civil practice [p. 1585] and in the four technical areas: environmental engineering [p. 1585]; hydraulics and water resources [p. 1586]; structures, mechanics, and materials [p. 1587]; and transportation engineering [p. 1588]. Other areas of focus include informatics [p. 1586], management [p. 1586], pre-architecture [p. 1587], and urban studies [p. 1588]. To see guidelines related to tailored focus areas, visit Civil Engineering Focus Areas on the Department of Civil and Environmental Engineering website.

Focus areas in civil engineering consist of content area courses, design courses, and elective courses; carefully selected elective courses may contribute to earning a minor and/or certificate. Some focus areas may also suggest or require specific courses to fulfill the design requirement for the major curriculum or the general education component of the collegiate curriculum.

Civil Practice

Students complete five civil and environmental engineering electives (15 s.h.) and two additional elective courses (6 s.h.).

Civil and Environmental Engineering Electives

Students complete 15 s.h. in civil and environmental engineering electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) not already taken for the major numbered 3000 or above.

It is recommended that students select from the following courses.

Course #	Title	Hours
CEE:3783	Surveying and Remote Sensing	3
CEE:3790	Resilient Infrastructure and Emergency Response	3
CEE:4102	Groundwater	3
CEE:4119	Hydrology	3
CEE:4158/ OEH:4920	Solid and Hazardous Wastes	3
CEE:4159/ CBE:4459/IGPI:4159	Air Pollution Control Technology	3
CEE:4371	Water Resources Engineering	3
CEE:4539	Foundations of Structures	3
CEE:4763	Traffic Engineering	3

Additional Electives–Civil Practice

Students complete 6 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) numbered 3000 or above and not already taken for the major or preapproved courses taken outside of the College of Engineering; see PreApproved Non-Engineering Electives [p. 1589] in this section of the catalog. Students should consult with an academic advisor.

The following courses are suggested electives in the civil practice focus area.

Course #	Title	Hours
ENGR:2120	Electrical Circuits	3
ENGR:2730	Computers in Engineering	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
ISE:2500	Engineering Economy	3

Environmental Engineering

Students complete one required course (4 s.h.), four focus area electives (12 s.h.), and two additional elective courses (6 s.h.).

Students in the environmental engineering focus area are required to complete CEE:4157 Environmental Engineering Design as one of their design courses for the civil engineering major. The second design course may be selected from the approved list; see "Design Courses."

Required Environmental Course

Course #	Title	Hours
This course:		
CEE:3430	Water Treatment	4

Environmental Electives

Course #	Title	Hours
Four of these:		
CEE:4102	Groundwater	3
CEE:4107/CBE:4410	Sustainable Systems	3
CEE:4119	Hydrology	3
CEE:4150/CBE:4420	Environmental Chemistry	3
CEE:4158/ OEH:4920	Solid and Hazardous Wastes	3
CEE:4159/ CBE:4459/IGPI:4159	Air Pollution Control Technology	3

Additional Electives–Environmental Engineering

Students complete 6 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) numbered 3000 or above and not already taken for the major, or preapproved courses taken outside of the College of Engineering; see Preapproved Non-Engineering Electives [p. 1589] in this section of the catalog. Students should consult with an academic advisor.

The following courses are suggested electives in the environmental engineering focus area.

Course #	Title	Hours
ENGR:2120	Electrical Circuits	3
ENGR:2730	Computers in Engineering	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
ISE:2500	Engineering Economy	3

Hydraulics and Water Resources

Students complete two required courses (6 s.h.), three focus area electives (9–10 s.h.), and two additional elective courses (6 s.h.).

Students in the hydraulics and water resources focus area are required to complete CEE:4374 Water Resource Design as one of their design courses for the civil engineering major. The second design course may be selected from the approved list; see "Design Courses."

Required Hydraulics and Water Resources Courses

Course #	Title	Hours
Both of these:		
CEE:4119	Hydrology	3
CEE:4371	Water Resources Engineering	3

Hydraulics and Water Resources Electives

Course #	Title	Hours
Three of these:		
CEE:3430	Water Treatment	4
CEE:3783	Surveying and Remote Sensing	3
CEE:4102	Groundwater	3
CEE:4107/CBE:4410	Sustainable Systems	3
CEE:4157	Environmental Engineering Design	3
CEE:4180	Fundamentals of Atmospheric Science	3
CEE:4370	Open Channel Flow and Sediment Transport	3

Additional Electives–Hydraulics and Water Resources

Students complete 6 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) numbered 3000 or above and not already taken for the major, or preapproved courses taken outside of the College of Engineering; see Preapproved Non-Engineering Electives [p. 1589] in this section of the catalog. Students should consult with an academic advisor.

The following courses are suggested electives in the hydraulics and water resources focus area.

Course #	Title	Hours
ENGR:2120	Electrical Circuits	3
ENGR:2730	Computers in Engineering	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
ISE:2500	Engineering Economy	3

Informatics

Students complete three required courses (10 s.h.), two focus area electives (6 s.h.), and two additional electives (6 s.h.).

Required Informatics Courses

Course #	Title	Hours
All of these:		
CS:2110	Programming for Informatics	4
CS:2420	Analyzing Data for Informatics	3
CS:2520	Human-Computer Interaction for Informatics	3

Informatics Electives

Course #	Title	Hours
Two of these:		
CEE:3783	Surveying and Remote Sensing	3
CEE:3790	Resilient Infrastructure and Emergency Response	3
CEE:4102	Groundwater	3
CEE:4119	Hydrology	3
CEE:4158/ OEH:4920	Solid and Hazardous Wastes	3
CEE:4159/ CBE:4459/IGPI:4159	Air Pollution Control Technology	3
CEE:4371	Water Resources Engineering	3
CEE:4539	Foundations of Structures	3
CEE:4763	Traffic Engineering	3
An additional civil and environmental engineering course (prefix CEE) numbered 3000 or above		3

Additional Electives–Informatics

Students complete 6 s.h. in additional electives.

Course #	Title	Hours
Two of these:		
ENGR:2730	Computers in Engineering	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
ISE:2500	Engineering Economy	3
An additional design course; see "Design Courses"		3
An additional civil and environmental engineering course (prefix CEE)		3

Management

Students complete five required courses (15 s.h.) and two additional elective courses (6 s.h.). Students in the management focus area must complete the minor in business administration [p. 1156] in the Tippie College of Business; this typically requires additional coursework outside of the civil engineering major.

Required Management Courses

Course #	Title	Hours
All of these:		
ACCT:2100	Introduction to Financial Accounting	3
ACCT:2200	Managerial Accounting Analytics and Data Visualization	3
FIN:3000	Introductory Financial Management	3
or ISE:2500	Engineering Economy	
MGMT:2100	Introduction to Management	3

MKTG:3000	Introduction to Marketing Strategy	3

Additional Electives–Management

Students complete 6 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) numbered 3000 or above and not already taken for the major. Students should consult with an academic advisor.

The following courses are suggested electives in the management focus area.

Course #	Title	Hours
CEE:3783	Surveying and Remote Sensing	3
CEE:3790	Resilient Infrastructure and Emergency Response	3
CEE:4102	Groundwater	3
CEE:4119	Hydrology	3
CEE:4158/ OEH:4920	Solid and Hazardous Wastes	3
CEE:4159/ CBE:4459/IGPI:4159	Air Pollution Control Technology	3
CEE:4371	Water Resources Engineering	3
CEE:4539	Foundations of Structures	3
CEE:4763	Traffic Engineering	3

Pre-Architecture

Students complete one required course (3 s.h.), one pre-architecture elective (3 s.h.), two structures electives (6 s.h.), one civil and environmental engineering elective (3 s.h.), and two art electives (6 s.h.). Students in the pre-architecture focus area must complete the minor in art [p. 126] in the College of Liberal Arts and Sciences; this typically requires additional coursework outside of the civil engineering major.

Students in the pre-architecture focus area are required to take CEE:4506 Design of Concrete Structures as one of their design courses for the civil engineering major. The second design course may be selected from the approved list, with the exception of CEE:4535 Design of Steel Structures; see "Design Courses."

Required Pre-Architecture Course

Course #	Title	Hours
This course:		
TDSN:2210	Introduction to 3D Design	3

Pre-Architecture Elective

Course #	Title	Hours
One of these:		
DRAW:2310	Life Drawing I	3
DSGN:2500	Graphic Design I	3
PHTO:2600	Photography I	3
PNTG:2410	Painting I	3
PRNT:2610	Introduction to Printmaking	3

Structures Electives

Course #	Title	Hours
Two of these:		
CEE:4164	Design of Wood Structures	3
CEE:4535	Design of Steel Structures	3
CEE:4539	Foundations of Structures	3

Civil and Environmental Engineering Elective

Course #	Title	Hours
One of these:		
A third structures course; see "Structures Electives"		3
An additional design course; see "Design Courses"		3
An additional civil and environmental engineering course (prefix CEE) numbered 3000 or above		3

Art Electives

Students complete 6 s.h. in additional electives chosen from courses that count toward the art minor in the College of Liberal Arts and Sciences. Students should consult with an academic advisor.

The following courses are suggested electives in the pre-architecture focus area.

Course #	Title	Hours
CEE:2240/ TDSN:2240	Drafting and Modeling With AutoCAD and Rhino	3
CERM:2010	Ceramics I: Handbuilding	3
INTM:2710/ CINE:2869	Introduction to Intermedia	3
MTLS:2910	Introduction to Jewelry and Metal Arts	3
SCLP:2810	Undergraduate Sculpture I	3
TDSN:2250	Digital Prototyping	3

Structures, Mechanics, and Materials

Students complete CEE:4535 Design of Steel Structures, four focus area electives (12 s.h.), and two additional elective courses (6 s.h.).

Students in the structures, mechanics, and materials focus area are required to take CEE:4506 Design of Concrete Structures as one of their design courses for the civil engineering major. The second design course may be selected from the approved list; see "Design Courses."

Required Structures, Mechanics, and Materials Course

Course #	Title	Hours
This course:		
CEE:4535	Design of Steel Structures	3

Structures, Mechanics, and Materials Electives

Course #	Title	Hours
12 s.h. from these:		
CEE:3783	Surveying and Remote Sensing	3
CEE:4135/ BME:4135/ME:4235	Health Monitoring of Structural and Mechanical Systems	3
CEE:4160	Introduction to Bridge Engineering	3

CEE:4162	Structural Systems for Buildings	3
CEE:4164	Design of Wood Structures	3
CEE:4511/ME:4111	Scientific Computing and Machine Learning	3
CEE:4512/ME:4112	Engineering Design Optimization	3
CEE:4532/ME:4153	Fundamentals of Vibrations	3
CEE:4533/IGPI:4115	Finite Element I	3
CEE:4539	Foundations of Structures	3
CEE:5179/ME:5179	Continuum Mechanics	arr.
CEE:5236/ BME:5720	Optimization of Structural Systems	3
CEE:5540/ME:5150	Intermediate Mechanics of Deformable Bodies	3

Additional Electives–Structures, Mechanics, and Materials

Students complete 6 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) numbered 3000 or above and not already taken for the major or preapproved courses taken outside of the College of Engineering; see Preapproved Non-Engineering Electives [p. 1589] in this section of the catalog. Students should consult with an academic advisor.

The following courses are suggested electives in the structures, mechanics, and materials focus area.

Course #	Title	Hours
ENGR:2120	Electrical Circuits	3
ENGR:2730	Computers in Engineering	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
ISE:2500	Engineering Economy	3

Transportation Engineering

Students complete five focus area electives (15 s.h.), and two additional elective courses (6 s.h.).

Students in the transportation engineering focus area are required to take CEE:4762 Design of Transportation Systems as one of their design courses for the civil engineering major. The second design course may be selected from the approved list; see "Design Courses."

Transportation Electives

Course #	Title	Hours
15 s.h. from these:		
CEE:3142/ISE:3600/ STAT:3620	Quality Control	3
CEE:3783	Surveying and Remote Sensing	3
CEE:3790	Resilient Infrastructure and Emergency Response	3
CEE:3998	Individual Investigations: Civil Engineering	arr.
CEE:4160	Introduction to Bridge Engineering	3
CEE:4176/URP:4262	Transportation Research Methods and Analysis	3
CEE:4560	Pavement Engineering	3
CEE:4730	Transportation Infrastructure Construction and Management	3
CEE:4763	Traffic Engineering	3
CEE:5678/URP:5678	Application Simulation to Transportation	3

Additional Electives–Transportation Engineering

Students complete 6 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) numbered 3000 or above and not already taken for the major or preapproved courses taken outside of the College of Engineering; see Preapproved Non-Engineering Electives [p. 1589] in this section of the catalog. Students should consult with an academic advisor.

The following courses are suggested electives in the transportation engineering focus area.

Course #	Title	Hours
ENGR:2120	Electrical Circuits	3
ENGR:2720	Materials Science	3
ENGR:2730	Computers in Engineering	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
ISE:2500	Engineering Economy	3

Urban Studies

Students complete one required course (3 s.h.), four focus area electives (12 s.h.), and two additional elective courses (6 s.h.).

Students planning to pursue the combined Bachelor of Science in Engineering/Master of Science program in urban and regional planning should complete URP:6202 Land Use Planning: Law and Practice and URP:6203 The Making of Cities: Histories and Theories of Planning. These courses can be counted toward the collegiate curriculum general education component approved course subjects requirement. See Combined Programs [p. 1589] in this section of the catalog.

Required Urban Studies Course

Course #	Title	Hours
This course:		
URP:3001/ SEES:3920	Planning Livable Cities	3

Urban Studies Electives

In addition to the following courses, students may also select courses that fulfill requirements for the minor in urban studies [p. 2244].

Course #	Title	Hours
12 s.h. from these:		
CRIM:4120	Environmental Criminology	3
PBAF:3560/ POLI:3560/ RHET:3560/ SJUS:3560	Public Policy and Persuasion	3
PBAF:3570/ GHS:3570/ POLI:3570	Poverty Policy	3

URP:2020/ PBAF:2020	Environment and Society: Sustainability, Policy, and Politics	3
URP:4225/ PBAF:4225	Applied GIS for Planning and Policy Making	3
URP:4253/ PBAF:4253	Designing Sustainable and Healthy Cities	1-3
URP:4260/ PBAF:4260	Transportation Policy and Planning	3
URP:4266/ PBAF:4266	Transportation, Urban Form, and Sustainability	3
URP:4273/ PBAF:4273	Community Development Through Creative Placemaking	3
URP:4280/ PBAF:4280	Planning for Disaster Mitigation and Recovery	2-3
URP:4295	Economic Development Policy	3

Additional Electives–Urban Studies

Students complete 6 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) numbered 3000 or above and not already taken for the major. Students should consult with an academic advisor.

The following courses are suggested electives in the urban studies focus area.

Course #	Title	Hours
CEE:3783	Surveying and Remote Sensing	3
CEE:3790	Resilient Infrastructure and Emergency Response	3
CEE:4102	Groundwater	3
CEE:4119	Hydrology	3
CEE:4158/ OEH:4920	Solid and Hazardous Wastes	3
CEE:4159/ CBE:4459/IGPI:4159	Air Pollution Control Technology	3
CEE:4371	Water Resources Engineering	3
CEE:4539	Foundations of Structures	3
CEE:4763	Traffic Engineering	3

Preapproved Non-Engineering Electives

Students pursuing a technical focus area (civil practice; environmental engineering; hydraulics and water resources; structures, mechanics, and materials; and transportation) may also choose from the following courses to satisfy their additional electives.

Course #	Title	Hours
CEE:2240/ TDSN:2240	Drafting and Modeling With AutoCAD and Rhino	3
CEE:3328/ SEES:3380	Fluvial Geomorphology	3
CPH:3400/ SEES:3250	Health, Work, and the Environment	3
ECON:3625/ URP:3135	Environmental and Natural Resource Economics	3
LAW:8992	Water Law	arr.
OEH:4240	Global Environmental Health	3
SEES:1070	Contemporary Environmental Issues	3
SEES:2050	Foundations of GIS	4
SEES:3360	Soil Genesis and Geomorphology	3
SEES:3390	Integrated Watershed Analysis	3
SEES:3520/ IGPI:3520	GIS for Environmental Applications	3
URP:3350/ ECON:3750/ SEES:3940	Transportation Economics	3

Combined Programs

BSE/MS in Civil and Environmental Engineering

The College of Engineering offers the combined Bachelor of Science in Engineering/Master of Science program for civil engineering undergraduate students who intend to earn an MS in civil and environmental engineering. BSE/MS students may attend the departmental graduate seminar and work on a master's thesis or research project while they are still undergraduates. They may count a limited amount of coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the BSE, and they are expected to complete the MS one year later.

To be admitted to the degree program, students must have completed at least 80 s.h. and have a cumulative grade-point average (GPA) of at least 3.25. They must submit an application form to the Department of Civil and Environmental Engineering, along with a letter stating their proposed area of specialization and the name of a department faculty member willing to be their primary MS advisor. Graduate Record Examination (GRE) General Test scores are not required for the degree program.

Applications are due by May 15.

BSE/MS in Urban and Regional Planning

The College of Engineering and the School of Planning and Public Affairs offer the combined Bachelor of Science in Engineering/Master of Science in urban and regional planning. The program, which is completed in five years, is designed for students who wish to pursue a public or private sector career in planning, a field that encompasses the development of alternatives to improve the quality of life in cities and regions.

Graduates are technically oriented professionals who have a clear understanding of policy development and implementation, which they apply to civil and industrial engineering problems. They fill positions such as public works director, transportation engineer, and public utilities staff member.

Each student in the combined program has two advisors, one in civil engineering and one in planning and public affairs. Students enroll in the College of Engineering for their first four years in the program and in the Graduate College for their fifth year. They follow the standard curriculum of their BSE program during the first two years and begin adding courses from the planning and public affairs program during the third year. Successful students receive a BSE at the end of the

fourth year and an MS in urban and regional planning at the end of the fifth year.

Students in the combined program must maintain a cumulative GPA of at least 3.00 in order to graduate with an MS in urban and regional planning.

For more information, see the MS in urban and regional planning [p. 1797] (Graduate College) in the catalog. Contact Engineering Student Services for information about applying to the combined program.

Career Advancement

When it comes to building the nation's infrastructure or protecting the natural environment, civil engineers are at the forefront. They not only design roads, bridges, and structures, provide clean drinking water, and protect people from natural hazards like flooding or earthquakes, they also engage with the public to create a more sustainable future. On average, 93–98% of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

	Hours	**15**
	Total Hours	**128**

a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.
b Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.
c Enrollment in math courses requires completion of a placement exam.
d Enrollment in chemistry courses requires completion of a placement exam.
e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
f See General Catalog for list of approved course subjects.
g Students select a course from one of two GE CLAS Core areas: Understanding Cultural Perspectives or Values and Society.
h Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
i Students select one of several standard focus areas developed by the department or create an individual focus area tailored to their interests. Focus areas in civil engineering include at least 21 s.h. in content area courses and electives; carefully selected elective courses may contribute to earning a minor and/or certificate. See General Catalog or consult an advisor for more information.
j See General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI.
k Students are required to complete two design courses (6 s.h.). Some focus areas require specific design courses; refer to General Catalog or consult an advisor for more information.
l Please see Academic Calendar, on Office of the Registrar website, for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Degree Services.

Environmental Engineering, BSE

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Educational Objectives

Within a few years of graduation, graduates of the Bachelor of Science in Engineering (BSE) program in environmental engineering will:

- be productive and contributing members of the environmental engineering profession as practitioners, entrepreneurs, researchers, or teachers;
- be engaged in learning, understanding, and applying new ideas as the field develops;
- pursue advanced studies, if qualified and interested; and
- promote the safety, health, and welfare of the public and the environment through professional practice and civic leadership.

Requirements

The Bachelor of Science in Engineering (BSE) with a major in environmental engineering requires a minimum of 128 s.h. of credit, plus up to two professional skills seminars. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1529] in the catalog. 6 s.h. of a student's major courses fulfill the basic science or college-level math collegiate requirement. Students completing the major in environmental engineering fulfill the collegiate statistics requirement by completing STAT:2020 Probability and Statistics for the Engineering and Physical Sciences. The focus area may require specific courses to count toward the general education component of the collegiate curriculum; see the section titled "Focus Area."

The major in environmental engineering may include the following professional skills seminars depending on when a student declares the major.

Course #	Title	Hours
CEE:1010	Introduction to Careers in Environmental Engineering (typically taken spring semester of the first year)	0
CEE:2010	Civil and Environmental Engineering Professional Practice and Ethics (typically taken in the spring semester of the second year)	1

The BSE with a major in environmental engineering requires the following coursework.

Requirements	Hours
Collegiate Curriculum	49
Basic Science and College-Level Math, from Major Requirements or Focus Area	6
Major Requirements	58
Focus Area	15-16

Major Requirements

Major requirements include a set of common courses (58 s.h.), three professional skills courses (3 s.h.), and one capstone design course (3 s.h.).

Common Courses

Course #	Title	Hours
All of these:		
CEE:1030	Introduction to Earth Science (no lab required)	3
or SEES:1080	Introduction to Environmental Science	
CEE:3155	Principles of Environmental Engineering (with lab)	4
CEE:3371	Principles of Hydraulics and Hydrology	3
CEE:3430	Water Treatment (with lab)	4
CEE:4102	Groundwater	3
CEE:4150	Environmental Chemistry	3
CEE:4157	Environmental Engineering Design	3
CEE:4158	Solid and Hazardous Wastes	3
CEE:4159	Air Pollution Control Technology	3
CEE:4374	Water Resource Design	3
BIOL:1411	Foundations of Biology	4
CHEM:1120	Principles of Chemistry II	4
CHEM:2210	Organic Chemistry I (no lab required)	3
ENGR:2110	Statics	2
ENGR:2130	Thermodynamics	3
ENGR:2510	Fluid Mechanics	4
ENGR:2710	Dynamics	3
ENGR:2720	Materials Science	3

Professional Skills

Course #	Title	Hours
All of these:		
CEE:3001	Leadership Skills for Engineers	1
CEE:3002	Technical Communication in Civil and Environmental Engineering	1
CEE:3003	Project Management Skills	1

Capstone Design Course

Course #	Title	Hours
This course:		
CEE:4850	Project Design and Management in Civil Engineering	3

Focus Area

Students must select focus area courses according to guidelines established by the Department of Civil and Environmental Engineering. Environmental engineering students may choose from several standard focus areas developed by the department or create an individual focus area tailored to their interests.

The department offers standard focus areas are offered in chemistry [p. 1593], ecological engineering [p. 1593], environmental [p. 1594], geoscience [p. 1594], hydrosciences [p. 1595], informatics [p. 1595], public health [p. 1595], sustainability [p. 1596], and urban studies [p. 1596]. To see guidelines related to tailored focus areas, see Environmental Engineering Focus Areas on the Department of Civil and Environmental Engineering website.

Focus areas in environmental engineering consist of content area courses and electives; carefully selected elective courses may contribute to earning a minor and/or certificate.

Chemistry

Students in the chemistry focus area complete at least 9 s.h. in chemistry electives and at least 6 s.h. in additional electives.

Chemistry Electives

Course #	Title	Hours
At least 9 s.h. from these:		
CHEM:2220	Organic Chemistry II	3
CHEM:2410	Organic Chemistry Laboratory	3
CHEM:3110	Equilibria and Electrochemistry	3
CHEM:3120	Spectroscopy and Separations	3
CHEM:3250	Inorganic Chemistry	3
CHEM:3430	Analytical Measurements	3
CHEM:3440	Physical Measurements	3
CHEM:3530	Inorganic Chemistry Laboratory	3
CHEM:4431	Chemical Thermodynamics	3
CHEM:4432	Quantum Mechanics and Chemical Kinetics	3
Another course approved for the minor in chemistry; see "Chemistry, Minor" in the College of Liberal Arts and Sciences section of the catalog.		3

Additional Electives–Chemistry Focus Area

Course #	Title	Hours
At least 6 s.h. from these:		
CEE:2015	Civil Engineering Tools	2
CEE:4107/CBE:4410	Sustainable Systems	3
CEE:4119	Hydrology	3
CEE:4371	Water Resources Engineering	3
CPH:3400/ SEES:3250	Health, Work, and the Environment	3
ECON:3625/ URP:3135	Environmental and Natural Resource Economics	3
ENGR:2730	Computers in Engineering	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
ISE:2500	Engineering Economy	3
OEH:4240	Global Environmental Health	3
SEES:2050	Foundations of GIS	4
A civil and environmental engineering course (prefix CEE) numbered 3000 or above		3

Ecological Engineering

Students in the ecological engineering focus area complete two required courses (4 s.h.) and at least 11 s.h. in ecological engineering and additional electives.

Required Ecological Engineering Courses

Course #	Title	Hours
Both of these:		
BIOL:2673/ SEES:2673	Ecology	3
SEES:1081	Introduction to Environmental Sciences Laboratory	1

Ecological Engineering Electives

Students can view courses applicable for the minor in earth and environmental sciences [p. 398] in the College of Liberal Arts and Sciences section of the catalog.

Course #	Title	Hours
At least one of these (minimum 3 s.h.):		
SEES:2950	Environmental Conservation	4
SEES:3315	Ecosystem Ecology	4
SEES:3350	Urban Ecology	3
SEES:3500/ IGPI:3500	Introduction to Environmental Remote Sensing	3
SEES:4110	Global Biogeochemical Cycles	3
SEES:4310	Climate Change	3
A course that counts toward the minor in earth and environmental sciences		3-4
At least one of these:		
CHEM:3430	Analytical Measurements	3
SEES:2001	Second-Year Field Trip for Earth and Environmental Sciences	1
SEES:2831	Geologic Field Methods	3
SEES:3001	Third-Year Field Trip for Earth and Environmental Sciences	1
SEES:3095	Field Ecology	4
SEES:3096	Winter Ecology	2
SEES:3230	Prairie Restoration	3
SEES:4001	Fourth-Year Field Trip for Earth and Environmental Sciences	2
SEES:4010	Field Methods in Physical Geography	3
SEES:4680	Field Methods in Hydrologic Science	3
A course that counts toward the minor in earth and environmental sciences		2-4

Additional Electives–Ecological Engineering Focus Area

Students select additional electives from the preceding ecological engineering electives or from the following list to bring the total for the focus area to 15 s.h. Courses not listed here may be counted with departmental approval.

Course #	Title	Hours
CEE:2015	Civil Engineering Tools	2
ECON:3625/ URP:3135	Environmental and Natural Resource Economics	3
ENGR:2730	Computers in Engineering	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
ISE:2500	Engineering Economy	3
OEH:4240	Global Environmental Health	3
SEES:2050	Foundations of GIS	4
SEES:3210	Principles of Paleontology	3
A civil and environmental engineering course (prefix CEE) numbered 3000 or above		

Environmental

Students in the environmental focus area complete two content area courses (6 s.h.) and three additional electives (9 s.h.).

Environmental Electives

Course #	Title	Hours
Two of these:		
CEE:4107/CBE:4410	Sustainable Systems	3
CEE:4119	Hydrology	3
CEE:4371	Water Resources Engineering	3

Additional Electives–Environmental Focus Area

Students complete 9 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) not already taken for the major numbered 3000 or above.

The following courses are additional suggested electives in the environmental focus area.

Course #	Title	Hours
CPH:3400/ SEES:3250	Health, Work, and the Environment	3
CPH:3500/ GHS:3500	Global Public Health	3
ECON:3625/ URP:3135	Environmental and Natural Resource Economics	3
ENGR:2120	Electrical Circuits	3
ENGR:2730	Computers in Engineering	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
ISE:2500	Engineering Economy	3
LAW:8992	Water Law	arr.
OEH:4240	Global Environmental Health	3
SEES:2050	Foundations of GIS	4

Geoscience

Students in the geoscience focus area complete two required courses (4 s.h.) and at least 11 s.h. in geoscience and additional electives.

Required Geoscience Courses

Course #	Title	Hours
All of these:		
SEES:1081	Introduction to Environmental Sciences Laboratory	1
SEES:3020	Earth Surface Processes	3

Geoscience Electives

Course #	Title	Hours
At least one of these:		
SEES:2410	Mineralogy	4
SEES:3080	Introduction to Oceanography	2
SEES:3320	Earth's Climate System	3
SEES:3360	Soil Genesis and Geomorphology	3
SEES:3380/ CEE:3328	Fluvial Geomorphology	3
SEES:3390	Integrated Watershed Analysis	3
SEES:4490	Elements of Geochemistry	3
SEES:4790	Applied Environmental Geology	3
SEES:4800	Global Geophysics	3
At least one of these:		
SEES:4010	Field Methods in Physical Geography	3
SEES:4680	Field Methods in Hydrologic Science	3

Additional Elective–Geoscience Focus Area

Students select additional electives from the preceding geoscience electives or from the following list to bring the total for the focus area to 15 s.h. Students can view courses applicable for the minor in earth and environmental sciences [p. 398] in the College of Liberal Arts and Sciences section of the catalog.

Course #	Title	Hours
CEE:2015	Civil Engineering Tools	2
CPH:3400/ SEES:3250	Health, Work, and the Environment	3
ECON:3625/ URP:3135	Environmental and Natural Resource Economics	3
ENGR:2730	Computers in Engineering	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
ISE:2500	Engineering Economy	3
OEH:4240	Global Environmental Health	3
SEES:2050	Foundations of GIS	4
A civil and environmental engineering course (prefix CEE) numbered 3000 or above		3
A course that counts toward the minor in earth and environmental sciences		1-4

Hydrosciences

Students in the hydrosciences focus area complete four required courses (10 s.h.), one hydrosciences elective (3–4 s.h.), and one field methods elective (3 s.h.).

Required Hydrosciences Courses

Course #	Title	Hours
All of these:		
CEE:4119	Hydrology	3
CEE:4371	Water Resources Engineering	3
SEES:1081	Introduction to Environmental Sciences Laboratory	1
SEES:3020	Earth Surface Processes	3

Hydrosciences Elective

Course #	Title	Hours
One of these:		
SEES:3380/ CEE:3328	Fluvial Geomorphology	3
SEES:3390	Integrated Watershed Analysis	3
SEES:4490	Elements of Geochemistry	3
SEES:4630	Hydrogeology	4
SEES:4640	Contaminant Hydrogeology	3
SEES:4790	Applied Environmental Geology	3

Field Methods Elective–Hydrosciences

Course #	Title	Hours
One of these:		
SEES:4010	Field Methods in Physical Geography	3
SEES:4680	Field Methods in Hydrologic Science	3

Informatics

Students in the informatics focus area complete three required courses (10 s.h.) and two informatics electives (at least 5 s.h.).

Required Informatics Courses

Course #	Title	Hours
All of these:		
CS:2110	Programming for Informatics	4
CS:2420	Analyzing Data for Informatics	3
CS:2520	Human-Computer Interaction for Informatics	3

Informatics Electives

Course #	Title	Hours
At least 5 s.h. from these:		
CEE:2015	Civil Engineering Tools	2
CPH:3400/ SEES:3250	Health, Work, and the Environment	3
ECON:3625/ URP:3135	Environmental and Natural Resource Economics	3
ENGR:2730	Computers in Engineering	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
ISE:2500	Engineering Economy	3
OEH:4240	Global Environmental Health	3
SEES:2050	Foundations of GIS	4
A civil and environmental engineering course (prefix CEE) numbered 3000 or above		3

Public Health

Students in the public health focus area complete one required course (3 s.h.), three focus area electives (9 s.h.), and at least 3 s.h. in additional electives.

Students in the public health focus area are required to complete the undergraduate certificate in public health in the College of Public Health [p. 2073]. The public health focus area requires CPH:1400 Fundamentals of Public Health as part of the collegiate curriculum general education component.

Required Public Health Course

Course #	Title	Hours
This course:		
CPH:1600	Public Health Science: Inquiry and Investigation in Public Health	3

Public Health Electives

Course #	Title	Hours
Three of these:		
CPH:1800	Social and Psychological Determinants of Health: Changing Behavior, Improving Health	3
CPH:2400	The U.S. Health System in a Global Context	3
CPH:3400/ SEES:3250	Health, Work, and the Environment	3
CPH:3500/ GHS:3500	Global Public Health	3

Additional Elective–Public Health Focus Area

Students complete at least 3 s.h. in additional electives. The following courses are suggested electives in the public health focus area. Students can view courses applicable for the Certificate in Public Health [p. 2091] in the College of Public Health section of the catalog.

Course #	Title	Hours
CPH:2200	Climageddon: Understanding Climate Change and Associated Impacts on Health	3
CPH:2220	Building a Healthier Tomorrow: Public Health Methods to Minimize Disease and Pollutant Exposures	3
CPH:4200	Agriculture, Food Systems, and Sustainability	3
CPH:4220/ GHS:4530/ OEH:4530	Global Road Safety	3

Courses that count toward the undergraduate Certificate in Public Health	2-3

Sustainability

Students in the sustainability focus area should complete ENGL:1510 Introduction to Environmental Literature or JMC:1800 Environmental Communication as an approved general education course. In addition, students complete two required courses (6 s.h.); one communication, ethics, and interpretation elective (3 s.h.); at least 3 s.h. in sustainability electives; and at least 3 s.h. in additional electives.

Required Sustainability Courses

Course #	Title	Hours
Both of these:		
SEES:1070	Contemporary Environmental Issues	3
SEES:2013/ BUS:2013/ URP:2013	Introduction to Sustainability	3

Communication, Ethics, and Interpretation Elective–Sustainability

Course #	Title	Hours
One of these:		
CNW:2740	The Art and Craft of Writing about the Environment	3
ENTR:3500	Social Entrepreneurship	3
FREN:1007	Nature/Ecology French Philosophy and Fiction	3
HIST:3230	American Environmental History	3
LAW:8622	International Environmental Law	3
MGMT:2000	Introduction to Law	3
RHET:3700	Advocacy and Sustainability: Crafting Stories of People, Place, and Resilience	3
SEES:4770/ AFAM:4770/ GHS:4770	Environmental Justice	3
URP:6273/ PBAF:6273	Community Development Through Creative Placemaking	3

Sustainability Elective

Course #	Title	Hours
At least 3 s.h. from these:		
CEE:4107/CBE:4410	Sustainable Systems	3
ABRD:3445	India Winterim (with consent of advisor)	arr.
ANTH:2261	Human Impacts on the Environment	3
ENTR:3700	Sustainable Innovation and Management	3
ENTR:4100	International Entrepreneurship, Culture, and Social Impact	1-3
EVNT:3180	Sustainable Events	3
GHS:4100	Topics in Global Health (when topic is sustainability)	1-3
MKTG:4250	Marketing and Sustainability	3
SEES:2930	Water Resources	3
SEES:3400	Iowa Environmental Policy in Practice	3
SEES:3760/ GHS:3760	Hazards and Society	3
TDSN:3260	Design for Production (when topic is special issues and topics in design)	4
URP:6256/ PBAF:6256	Environmental Policy	3
URP:6273/ PBAF:6273	Community Development Through Creative Placemaking	3

Additional Elective–Sustainability Focus Area

In addition to the following courses, students may select a course that fulfills requirements for the Certificate in Sustainability [p. 404].

Course #	Title	Hours
At least 3 s.h. from these:		
CEE:2015	Civil Engineering Tools	2
ISE:2500	Engineering Economy	3
SEES:2050	Foundations of GIS	4
A civil and environmental engineering course (prefix CEE) numbered 3000 or above		3

Urban Studies

Students in the urban studies focus area should complete URP:3001 Planning Livable Cities as an approved general education course. In addition, students complete at least 12 s.h. in urban studies electives and at least 3 s.h. in additional electives.

Urban Studies Electives

In addition to the following courses, students may select courses that fulfill requirements for the minor in urban studies [p. 2244].

Course #	Title	Hours
At least 12 s.h. from these:		
CRIM:4120	Environmental Criminology	3
PBAF:3560/ POLI:3560/ RHET:3560/ SJUS:3560	Public Policy and Persuasion	3
PBAF:3570/ GHS:3570/ POLI:3570	Poverty Policy	3
URP:2020/ PBAF:2020	Environment and Society: Sustainability, Policy, and Politics	3
URP:4225/ PBAF:4225	Applied GIS for Planning and Policy Making	3
URP:4253/ PBAF:4253	Designing Sustainable and Healthy Cities	1-3
URP:4260/ PBAF:4260	Transportation Policy and Planning	3
URP:4266/ PBAF:4266	Transportation, Urban Form, and Sustainability	3
URP:4273/ PBAF:4273	Community Development Through Creative Placemaking	3

URP:4280/ PBAF:4280	Planning for Disaster Mitigation and Recovery	2-3
URP:4295	Economic Development Policy	3

Additional Elective–Urban Studies Focus Area

Course #	Title	Hours
At least 3 s.h. from these:		
CEE:2015	Civil Engineering Tools	2
CPH:3400/ SEES:3250	Health, Work, and the Environment	3
ECON:3625/ URP:3135	Environmental and Natural Resource Economics	3
ENGR:2730	Computers in Engineering	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3
ISE:2500	Engineering Economy	3
OEH:4240	Global Environmental Health	3
SEES:2050	Foundations of GIS	4
URP:3350/ ECON:3750/ SEES:3940	Transportation Economics	3
A civil and environmental engineering course (prefix CEE) numbered 3000 or above		3

Combined Programs

BSE/MS in Civil and Environmental Engineering

The College of Engineering offers a Bachelor of Science in Engineering/Master of Science program for environmental engineering undergraduate students who intend to earn an MS in civil and environmental engineering. BSE/MS students may attend the departmental graduate seminar and work on a master's thesis or research project while they are still undergraduates. They may count a limited amount of coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the BSE, and they are expected to complete the MS one year later.

To be admitted to the degree program, students must have completed at least 80 s.h. and have a cumulative grade-point average of at least 3.25. They must submit an application form to the Department of Civil and Environmental Engineering, along with a letter stating their proposed area of specialization and the name of a department faculty member willing to be their primary MS advisor. Graduate Record Examination (GRE) General Test scores are not required for the fast-track degree program.

Applications are due by May 15.

Career Advancement

Environmental engineers apply engineering principles to design systems that control pollution and protect public health. Environmental engineers restore air, soil, and water quality at contaminated sites, and develop systems that convert waste into clean energy. Environmental engineering addresses the complex food, energy, and water issues of the 21st century. On average, 93–98% of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Environmental Engineering, BSE

Course	Title	Hours

Focus Area: course [i]		3
Focus Area: course [i]		3
Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall) [k]		
	Hours	**15**
	Total Hours	**129**

a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.

b Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.

c Enrollment in math courses requires completion of a placement exam.

d Enrollment in chemistry courses requires completion of a placement exam.

e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.

f Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

g See General Catalog for list of approved course subjects. Some focus areas may require specific courses that may be taken for General Education Component credit.

h Students select a course from one of two GE CLAS Core areas: Understanding Cultural Perspectives or Values and Society.

i Students select a standard focus area developed by the department or create an individual focus area tailored to their interests. Focus areas require 15 s.h. and consist of content area courses and additional electives; carefully selected elective courses may contribute to earning a minor and/or certificate. Some focus areas may require additional courses that may be taken for General Education Component credit. See the General Catalog or consult an advisor for more information.

j See General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI.

k Please see Academic Calendar, on Office of the Registrar website, for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Degree Services.

Civil and Environmental Engineering, MS

Graduate study in civil and environmental engineering prepares students for professional careers and further study. The principal concentration areas are environmental engineering and environmental science; hydraulics, hydrology, and water resources; structures, mechanics, and materials; sustainable water development; and transportation.

Research and Study Areas

Structures, Mechanics, and Materials

The structures, mechanics, and materials curriculum is designed for students who wish to gain knowledge and skill in the mechanics of solids and structures that they can apply to civil infrastructure systems and other fields. The program concentrates on developing appropriate methodologies for tackling broad, complex issues related to civil infrastructure systems, and on educating engineers in the implementation and application of methodologies to actual engineering projects. Faculty members have expertise in structural engineering, design optimization, solid mechanics, and computational methods.

Transportation Engineering

The transportation engineering curriculum is geared toward students interested in developing specialized knowledge and skills applicable to the diverse set of issues associated with transportation. Faculty members have expertise in traffic engineering, infrastructure management systems, pavement engineering, advanced construction materials, dynamic load and pavement simulation, optimal design, winter highway maintenance, real-time simulation, human factors, intelligent sensors, nondestructive testing, transportation planning, and travel demand modeling.

Water and the Environment

The water and the environment graduate program focuses on both fundamental and applied aspects of environmental systems and processes across a range of scales. The water and the environment program offers unique opportunities for students to actively participate in the research, analysis, and design aspects of real-world problems. There are three areas of specialization: environmental engineering and science; hydraulics, hydrology, and water resources; and sustainable water development.

The environmental engineering and science curriculum provides a comprehensive base of coursework and research in the areas of air and water quality management; environmental chemistry and microbiology; natural systems modeling; and processes for water supply, pollution control, and solid and hazardous waste management.

The hydraulics, hydrology, and water resources curriculum is associated with IIHR—Hydroscience and Engineering, a world-renowned research institute, where senior staff members of the institute are professors in the program. IIHR offers unique curriculum opportunities in laboratory and field-scale experimentation and in mathematical modeling with IIHR's high-speed computer facilities.

The sustainable water development curriculum is focused on training interdisciplinary professional engineers, researchers, educators, and those who are ready to meet the water resource challenges of communities most in need. Community service and professional development experiences complement innovative research at the food, energy, and water nexus.

Across all specialization areas within water and the environment, interdisciplinary research and study are conducted with programs including the Center for Global and Regional Environmental Research, the Center for Health Effects of Environmental Contamination, the Center for Hydrologic Development, the Iowa Flood Center, the Iowa Superfund Research Program, the Hazardous Substances Research Center, and the Center for Biocatalysis and Bioprocessing; the departments of Chemical and Biochemical Engineering (College of Engineering), Microbiology and Immunology (Carver College of Medicine), and Occupational and Environmental Health (College of Public Health); the School of Earth, Environment, and Sustainability (College of Liberal Arts and Sciences); and the School of Planning and Public Affairs (Graduate College). Other areas of interdisciplinary focus include groundwater contamination, biotechnology, global climate change, and hazardous substances.

Learning Outcomes

Students will gain the ability to:

- apply principles of engineering and science for problem solving to meet societal needs;
- communicate effectively with a range of audiences;
- make ethical and professional judgments that consider the global, economic, environmental, and societal contexts of their decisions and proposed engineering solutions; and
- conduct research through the use of modern research tools and methodologies (thesis students only).

Requirements

The Master of Science program in civil and environmental engineering requires a minimum of 30 s.h. of graduate credit for thesis students; 31 s.h. for nonthesis students. The program enables students to concentrate in one or more areas of their choice. Students must maintain a UI cumulative grade-point average of at least 2.75.

The thesis option requires a minimum of 25 s.h. (eight courses) with the remaining 5 s.h. obtained in CEE:5999 Research: Civil and Environmental Engineering MS Thesis.

With the approval of their advisor, students develop a study plan that satisfies the requirements of their chosen curriculum. Students must pass an oral examination and, in some program options, a written examination.

Core Courses

All students must successfully complete the civil and environmental graduate core courses for their area of focus. Students are expected to complete these courses during their first year of study.

Elective Courses

Students choose elective courses from any academic area that strengthens their knowledge in their area of focus and provides needed research topic training. Individual Investigations: Civil and Environmental Engineering (CEE:5998) is not considered a suitable elective.

Seminars

All full-time students are required to register for and participate in seminars in their respective program of study. This includes CEE:5096 Water, Energy, and Food Nexus Seminar for areas that fall under the water and environment curriculum (environmental engineering, environmental science, hydraulics, sustainable water development, and water resources) or CEE:5098 Graduate Seminar in Structures, Materials, Mechanics, and Transportation for students in transportation engineering or structures, mechanics, and materials.

Ethics Course

Students must enroll in ENGR:7270 Engineering Ethics.

Thesis

Students may earn up to 5 s.h. of research credit in CEE:5999 Research: Civil and Environmental Engineering MS Thesis. A total of 3 s.h. may be taken on an A–F graded basis at the discretion of the advisor.

Combined Programs

MS (Sustainable Water Development Subprogram)/MS in Urban and Regional Planning

The Department of Civil and Environmental Engineering and the School of Planning and Public Affairs collaborate to offer a combined Master of Science in civil and environmental engineering with a sustainable water development subprogram/Master of Science in urban and regional planning.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, see the MS in urban and regional planning [p. 1797] (Graduate College) in the catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Each of the program's curricula is flexible; students may be admitted from all disciplines of engineering as well as from the mathematical and basic sciences.

Applicants should have a cumulative undergraduate grade-point average (GPA) of at least 3.00. Those with GPAs slightly lower should contact the department.

Graduate Record Examination (GRE) General Test scores are not required.

Career Advancement

The current and projected demand for MS graduates is excellent. Graduates are placed in advanced technical positions in industry, consulting firms, or government, or they may continue their graduate study. On average, 93–98% of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

Civil and Environmental Engineering, PhD

Graduate study in civil and environmental engineering prepares students for professional careers and further study. The principal concentration areas are environmental engineering and environmental science; hydraulics, hydrology, and water resources; structures, mechanics, and materials; sustainable water development; and transportation.

Research and Study Areas

Structures, Mechanics, and Materials

The structures, mechanics, and materials curriculum is designed for students who wish to gain knowledge and skill in the mechanics of solids and structures that they can apply to civil infrastructure systems and other fields. The program concentrates on developing appropriate methodologies for tackling broad, complex issues related to civil infrastructure systems and on educating engineers in the implementation and application of methodologies to actual engineering projects. Faculty members have expertise in structural engineering, design optimization, solid mechanics, and computational methods.

Transportation Engineering

The transportation engineering curriculum is geared toward students interested in developing specialized knowledge and skills applicable to the diverse set of issues associated with transportation. Faculty members have expertise in traffic engineering, infrastructure management systems, pavement engineering, advanced construction materials, dynamic load and pavement simulation, optimal design, winter highway maintenance, real-time simulation, human factors, intelligent sensors, nondestructive testing, transportation planning, and travel demand modeling.

Water and the Environment

The water and the environment graduate program focuses on both fundamental and applied aspects of environmental systems and processes across a range of scales. The water and the environment program offers unique opportunities for students to actively participate in the research, analysis, and design aspects of real-world problems. There are three areas of specialization: environmental engineering and science; hydraulics, hydrology, and water resources; and sustainable water development.

The environmental engineering and science curriculum provides a comprehensive base of coursework and research in the areas of air and water quality management; environmental chemistry and microbiology; natural systems modeling; and processes for water supply, pollution control, and solid and hazardous waste management.

The hydraulics, hydrology, and water resources curriculum is associated with IIHR—Hydroscience and Engineering, a world-renowned research institute, where senior staff members of the institute are professors in the program. IIHR offers unique curriculum opportunities in laboratory and field-scale experimentation and in mathematical modeling with IIHR's high-speed computer facilities.

The sustainable water development curriculum is focused on training interdisciplinary professional engineers, researchers, educators, and those who are ready to meet the water resource challenges of communities most in need. Community service and professional development experiences complement innovative research at the food, energy, and water nexus.

Across all specialization areas within water and the environment, interdisciplinary research and study are conducted with programs including the Center for Global and Regional Environmental Research, the Center for Health Effects of Environmental Contamination, the Center for Hydrologic Development, the Iowa Flood Center, the Iowa Superfund Research Program, the Hazardous Substances Research Center, and the Center for Biocatalysis and Bioprocessing; the departments of Chemical and Biochemical Engineering (College of Engineering), Microbiology and Immunology (Carver College of Medicine), and Occupational and Environmental Health (College of Public Health); the School of Earth, Environment, and Sustainability (College of Liberal Arts and Sciences); and the School of Planning and Public Affairs (Graduate College). Other areas of interdisciplinary focus include groundwater contamination, biotechnology, global climate change, and hazardous substances.

Learning Outcomes

Students will gain the ability to:

- apply critical thinking skills and principles of engineering and science to solve problems that address societal needs;
- communicate effectively with a range of audiences;
- make ethical and professional judgments that consider the global, economic, environmental, and societal contexts of their decisions and proposed engineering solutions; and
- conduct original research that advances discovery through the use of modern research tools and methodologies.

Requirements

The Doctor of Philosophy program in civil and environmental engineering requires a minimum of 72 s.h. of graduate coursework, including at least 43 s.h. in formal coursework. Students may count a maximum of 29 s.h. in CEE:7999 Research: Civil and Environmental Engineering PhD Dissertation toward the degree. Students must maintain a UI cumulative grade-point average of at least 3.00.

Students may count up to 24 s.h. from the MS in civil and environmental engineering or from another qualified graduate program toward the PhD with departmental approval.

All students usually need at least three years of full-time graduate study to complete the degree. They must pass a qualifying examination and must pass a written and oral comprehensive examination before they may be formally admitted to PhD candidacy; the comprehensive examination is usually taken after all required coursework has been completed. Students devote one year to the preparation of a dissertation that contributes to knowledge in the field; they must defend their dissertation successfully in a final examination.

Core Courses

Students must successfully complete the appropriate civil and environmental graduate core courses for their area of focus. They are expected to complete core courses during their first year of study.

Elective Courses

Students should choose elective courses from any academic area that strengthens their knowledge in their area of focus and provides needed research topic training. Independent study, such as CEE:5998 Individual Investigations: Civil and Environmental Engineering, is not considered a suitable elective.

Seminars

All full-time students are required to register for and participate in seminars in their respective program of study. This includes CEE:5096 Water, Energy, and Food Nexus Seminar for areas that fall under the water and the environment curriculum (environmental engineering, environmental science, hydraulics, sustainable water development, and water resources) or CEE:5098 Graduate Seminar in Structures, Materials, Mechanics, and Transportation for students in transportation engineering or structures, mechanics, and materials. Depending on the program of study, there may be additional seminar requirements.

Ethics Course

Students must enroll in ENGR:7270 Engineering Ethics.

Dissertation

Students must complete a dissertation and may apply up to 29 s.h. in CEE:7999 Research: Civil and Environmental Engineering PhD Dissertation toward the degree. A total of 6 s.h. may be taken on an A–F graded basis at the discretion of the advisor.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Each of the program's curricula is flexible; students may be admitted from all disciplines of engineering as well as from the mathematical and basic sciences.

Applicants should have a graduate grade-point average (GPA) of at least 3.00. Those with GPAs slightly lower should contact the department.

Graduate Record Examination (GRE) General Test scores are not required.

Career Advancement

Graduates are placed in advanced technical positions in academia, industry, consulting firms, or government.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduate outcome collection, and the university's online recruiting system, Handshake.

Academic Plans

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Typically completed by the end of the first year. Refer to the CEE website and the Gradual College Manual of Rules and Regulations for details.
c Must be completed during first semester.
d Required every semester.
e Work with academic advisor to determine graduate elective coursework and sequence. See General Catalog and CEE website for specifics.
f Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
g Oral exam typically completed by the end of the second year after passing the Qualifying Exam; written dissertation prospectus must be submitted to the committee two weeks before exam.
h Enrollment during four semesters is required.
i Total of 29 s.h. from CEE:7999 is required. May take up to 6 s.h. for a letter grade; all other credits must be taken on S/U basis.
j Technical communication requirement; approved courses include RHET:7500, RHET:7930, RHET:7940. Other courses may be considered and should be submitted to the CEE Director of Graduate Studies for approval.
k Oral dissertation defense.

Electrical and Computer Engineering

Chair

- Gary E. Christensen

Undergraduate majors: computer science and engineering (BSE); electrical engineering (BSE)

Graduate degrees: MS in electrical and computer engineering; PhD in electrical and computer engineering

Faculty: https://engineering.uiowa.edu/ece-people

Website: https://engineering.uiowa.edu/ece

Electrical engineers and computer engineers make vital contributions to nearly all facets of modern society through their work in areas such as the internet of things (IoT), artificial intelligence, deep learning, computer systems, software applications, medical imaging, robotics, wireless communications, and fiber optics. From smart technologies to high-definition TV, cellular telephones, and computer networks, the contributions of electrical and computer engineers are constantly reinventing the world.

Many benefits that have sprung from electrical and computer engineering technology now are taken for granted —noninvasive imaging of the brain and other internal organs, astonishing views of the solar system's outer planets, and wireless telecommunications. Electrical and computer engineers also play crucial roles in major emerging technologies, such as driverless vehicles, smart cities, and human genomics.

As the United States strives to retain or enlarge its share of national and international markets, electrical and computer engineers will play a more important role in fostering innovation, increasing productivity, and creating intelligent systems to improve the quality of life for residents.

Electrical and computer engineers work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, TV, and power industries, and many graduates pursue entrepreneurial ventures.

Programs

Undergraduate Programs of Study

Majors

- Major in Computer Science and Engineering (Bachelor of Science in Engineering) [p. 1620]
- Major in Electrical Engineering (Bachelor of Science in Engineering) [p. 1625]

Graduate Programs of Study

- Master of Science in Electrical and Computer Engineering [p. 1631]
- Doctor of Philosophy in Electrical and Computer Engineering [p. 1633]

Research and Study Areas

Augmented Reality and Multimodal Sensing

The department is actively involved in research to advance augmented reality and virtual reality systems, particularly regarding their underlying multimodal imaging and sensing techniques. Work in this area relies on mathematics, instrumentation, software engineering, computer vision, and computer graphics to design and engineer novel methodologies and systems for sensing, virtually replicating, understanding, and then augmenting the world around us. This is an interdisciplinary research area that encompasses fields such as 3D/4D surface imaging and measurement, 3D/4D data compression and communication, real-time computer vision, computer-aided surgeries, machine learning, computer graphics, human-computer interaction, multimedia on mobile devices, and computer-aided design. In addition to advancing the basic science within those fields, departmental researchers are pursuing various applications of their work via collaborations with the Carver College of Medicine [p. 1843], the Digital Arts [p. 356] faculty cluster, the Iowa Initiative for Artificial Intelligence, the Iowa Institute for Biomedical Imaging, and the Iowa Technology Institute.

Bioinformatics and Computational Biology

The Center for Bioinformatics and Computational Biology (CBCB) is a multidisciplinary research enterprise that encompasses numerous laboratories and collaborates with many graduate programs on campus. Graduate students may earn the Certificate in Informatics [p. 1760] (Graduate College) to augment their PhD training in disciplines ranging from molecular biology to biochemistry to computer science to engineering.

The Coordinated Laboratory for Computational Genomics, a CBCB affiliate, engages in a broad range of research activities that complement the Human Genome Project. Members of the laboratory develop new hardware and software techniques for analysis and annotation of the genomic sequence, its transcription and translation, and the proteome. Other efforts are aimed at the systematic capture and curation of phenotypic information acquired from massive databases of clinical information derived from collaborations with the Carver College of Medicine. The goal of these projects is to elucidate the mechanisms of human disease and develop promising new methods for cures and treatments.

The laboratory's facilities include more than 200 workstations, three Linux clusters, and access to the National Science Foundation (NSF) TeraGrid and other high-performance computing facilities. Projects in the laboratory frequently involve cutting-edge genomic and proteomic instruments such as the Roche 454 next-generation sequencing platform and several high-throughput gene expression (microarray) measurement platforms.

Computer Systems

High-performance computing research involves the development of collaborative and parallel computing environments and associated software tools and the use of these facilities and tools in varied application domains, including image processing and computational biology. Current work in networking focuses on protocols and layer-

integration schemes that support high-performance wireless networking and on control and coordination of mobile ad hoc networks. Current research facilities in these areas include several large cluster computers and an experimental asynchronous transfer mode (ATM) network.

Departmental facilities that support this work include Linux and Windows workstations and server nodes that provide college-wide networked computer services. Advanced computing facilities are also available at national supercomputing centers and federal laboratories.

Control Systems and Systems Theory

Control systems and systems theory use feedback to improve the predictability and efficiency of engineered systems ranging from electronic amplifiers to vehicle guidance systems, manufacturing processes, communication channels, and the Internet. Work in control systems and systems theory draws heavily on results from mathematics, physics, and computer science to model the systems that are to be controlled and to implement feedback controllers.

Current research emphasizes optimal, adaptive, digital, robust, and stochastic control and the control of discrete event dynamical systems. Recent work has concerned the estimation, identification, and robust control of linear and nonlinear dynamical systems; set membership identification; control over wireless communication channels; coordinated fault tolerant control of unmanned vehicles; use of control theory to analyze distributed computing, communications, and manufacturing systems; interplay between communications and control; design of fast digital controllers using subband coding; and multirate control systems.

Research in control systems and systems theory is supported by extensive computing resources and collaborations with local industry, the Driving Safety Research Institute, the Iowa Technology Institute, and the Carver College of Medicine [p. 1843].

Nanoscale Electronics and Spintronics

Nanotechnology is the branch of technology that deals with dimensions that are 10,000 times smaller than the width of the hair. Nanoscience and nanotechnology involve the ability to see and control individual atoms and molecules. Utilizing the nanofabrication and nanoimaging facilities available on campus, nanoscale transistors, optical circuits, biosensors, and solar cells are being developed. Departmental researchers are pursuing experimental, theoretical, and large-scale computational approaches.

Optoelectronics

Current research topics are optical and electronic properties of semiconductors, semiconductor devices, electro-optics, nonlinear optics, nonlinear wave propagation in plasmas, nanotechnology, and medical devices. This research is at the interface of optical engineering, materials engineering, quantum physics, and electromagnetics.

Much work is done in collaboration with other University of Iowa departments, including the departments of Physics and Astronomy, Chemistry (College of Liberal Arts and Sciences), Internal Medicine, and Neurosurgery (Carver College of Medicine). Facilities include two molecular beam epitaxy reactors (in physics and astronomy), a microfabrication laboratory with nanometer resolution capabilities, electrical characterization capability to 22 GHz, several Ti-sapphire lasers, a mid-infrared optical parametric oscillator, and plasma equipment for nonlinear wave plasma interaction studies.

Examples of current projects are the design and fabrication of diode lasers and light-emitting diodes based on the bandgap engineering of antimony and arsenic-based III-V compound semiconductors, phase control of laser arrays, development of an all-optical power equalizer, characterization of quantum well devices, nonlinear waveguide devices, development of a noncontact method to measure transport properties, plasma and optical soliton excitation and propagation, development of cellular probes, gas sensors, and a laser scalpel for medical research.

Signal and Image Processing

Research in image processing and basic and applied signal processing is supported by a digital signal processing laboratory and an image analysis laboratory. Collaborative research with faculty in the departments of Radiology, Neurology, Psychiatry, Internal Medicine, Ophthalmology and Visual Sciences, Radiation Oncology (Carver College of Medicine), and the Roy J. Carver Department of Biomedical Engineering is directed at quantitative analysis of medical images.

In the area of signal processing, current projects include the analysis and design of efficient adaptive algorithms for signal processing, efficient coding and transmission of speech, speech processing aids for the hearing impaired, robust equalization of uncertain channels, application of neural networks to communications systems, multi-rate signal processing, and subband coding and channel equalization.

Image processing and analysis projects include the development of novel methods for image segmentation, image registration, computer-aided detection and diagnosis, early identification of disease patterns from medical image data, computer-aided surgical planning, virtual and augmented reality medical image visualization, building anatomic atlases, and a broad range of translational medicine projects focusing on research and clinical applications of the novel methods. The areas of interest span all scales, from molecules to cells to small animals to humans, and cover a broad range of organ systems and targeted diseases. The spectrum of medical imaging modalities used for research and applications in image processing and analysis is equally broad, encompassing all existing modalities, including X-ray, CT, MR, PET, SPECT, and OCT.

The Medical Image Analysis Labs consist of several specialized facilities for digital image processing. They are equipped with state-of-the-art devices for data storage, transfer, visualization, and analysis. High-capacity data storage devoted to image processing research offers more than 35 TB of online hard disk space. An augmented reality medical image visualization lab serves as a high-performance collaborative resource for the Iowa Institute for Biomedical Imaging. The institute makes additional resources available to image processing research, including small and large animal as well as human research scanning facilities, and provides a backbone for interdisciplinary medical image analysis research to electrical and computer engineering graduate students and faculty.

Wireless Communication Systems

The department is engaged in research using wireless sensor networks (WSNs), which consist of spatially distributed autonomous devices that use sensors to cooperatively monitor physical or environmental conditions such as temperature, sound, vibration, pressure, motion, and pollutants at different locations. WSNs are used for environment and habitat monitoring, health care applications, home automation, and traffic control. Current research includes the application of WSNs, traditional telemetry, and commercial cellular communication infrastructure for geosciences data collection (e.g., rainfall, water quality, and soil moisture).

Another important research interest involving distributed sensor networks is the distributed control of power systems, especially requirements of the next-generation electric grid with smart metering and distributed generation using small-scale wind and solar generators. Research on WSNs also includes the design of cooperative communication techniques for energy-efficient WSNs and issues of localization, network organization, and control.

Research activities in communication systems focus on the design and analysis of receivers for digital wireless communications, especially the development of effective and practical receivers for multiple-user wireless cellular systems in multipath channels. Topics of research include the design, analysis, and experimental demonstration of large-scale distributed multiple-input multiple-output (MIMO) arrays for communication sensing and electronic warfare; precision interference cancellation techniques using feedback control; and synchronization and channel estimation for massive MIMO Base Stations.

Facilities

Undergraduate Core

Electrical and computer engineering provides core instruction for the college in electrical circuits, electronics, instrumentation, and computers. A key part of this core teaching responsibility lies in providing students with an early opportunity to use engineering laboratory instrumentation.

Undergraduate Laboratories

The department's undergraduate laboratories include facilities for the study of the internet of things (IoT), electrical and electronic circuits, wireless communication, power and sustainable energy, signals and systems, embedded systems, measurement automation, communication systems, control systems, image processing, robotics, and optics. The laboratories are equipped with modern equipment, including digital oscilloscopes, computer-controlled virtual instrumentation, and software and hardware for embedded systems development.

Graduate Facilities and Laboratories

The department has laboratories intended primarily for graduate research in the areas of virtual and augmented reality, deep learning, big data, bioinformatics, image processing, software engineering, electro-optics, control systems, medical imaging and image analysis, large-scale intelligent systems, and wireless communication. Linux, Macintosh, and Windows workstations and server nodes provide college-wide networked computing support. Through cooperative arrangements, advanced computing facilities at national supercomputing centers, federal laboratories, and other universities are available for graduate research.

Courses

Electrical and Computer Engineering Courses

ECE:1000 First-Year Seminar **1 s.h.**
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

ECE:2400 Linear Systems I **3 s.h.**
Introduction to continuous and discrete time signals and systems with emphasis on Fourier analysis; examples of signals and systems; notion of state and finite state machines; causality; linearity and time invariance; periodicity; Fourier transforms; frequency response; convolution; IIR and FIR filters, continuous and discrete Fourier transforms; sampling and reconstruction; stability. Prerequisites: ENGR:2120 and MATH:2560.

ECE:2410 Principles of Electronic Instrumentation **4 s.h.**
Principles of analog signal amplification, signal conditioning, filtering; operational amplifier circuit analysis and design; principles of operation of diodes, bipolar transistors, field effect transistors; discrete transistor amplifier analysis and design; laboratory included. Prerequisites: ENGR:2120 and PHYS:1612 and MATH:2560.

ECE:3000 Electrical and Computer Engineering Professional Seminar **1 s.h.**
Professional aspects of electrical and computer engineering, and computer science, presented through lectures and discussions by guest speakers, field trips, and panel discussions. Requirements: junior standing.

ECE:3320 Introduction to Digital Design **3 s.h.**
Modern design and analysis of digital switching circuits; combinational logic; sequential circuits and system controllers; interfacing and busing techniques; design methodologies using medium- and large-scale integrated circuits; lab arranged. Requirements: sophomore standing.

ECE:3330 Introduction to Software Design **3 s.h.**
Design of software for engineering systems; algorithm design and structured programming; data structures; introduction to object-oriented programming in JAVA; applications to engineering problems; lab arranged. Prerequisites: ENGR:2730. Same as IGPI:3330.

ECE:3350 Computer Architecture and Organization **3 s.h.**
Basic concepts; computer evolution, register transfer level design, simulation techniques, instruction sets (CISC and RISC), assembly language programming, ALU design, arithmetic algorithms and realization of arithmetic functions, hardwired and microprogrammed control, memory hierarchies, virtual memory, cache memory, interrupts and DMA, input/output; introduction to high performance techniques, pipelining, multiprocessing; introduction to hardware description languages (Verilog, VHDL); students design and simulate a simple processor. Prerequisites: ENGR:2730 and ECE:3320.

ECE:3360 Embedded Systems 3 s.h.
Microprocessors and microcontrollers as components in engineering systems; embedded system design processes; microcontroller/microprocessor architecture; interrupts and traps; memory and device interfacing; low-level and high-level software design for embedded systems; examples of embedded system architecture and design; fundamentals of operating systems; tasks and processes; context switching and scheduling; memory and file management, interprocess communication; device drivers. Prerequisites: ENGR:2730 and ECE:3320. Corequisites: ECE:2410.

ECE:3400 Linear Systems II 3 s.h.
Builds on concepts from ECE:2400 towards application in digital signal processing; lab exercises, hands-on term project; review of key linear systems concepts; MATLAB basics, tools, and functions for digital signal processing; discrete time systems, difference equations in digital signal processing; Fourier analysis of discrete time signals; transient, steady-state, and frequency response of discrete time, linear time-invariant (LTI) systems; Z-transform analysis; sampling theorem and aliasing; power spectral density and periodograms; recording and processing of sound and music; finite impulse response (FIR) and infinite impulse response (IIR) filters; designing and using filters in MATLAB. Prerequisites: ECE:2400.

ECE:3410 Electronic Circuits 4 s.h.
Design and analysis of FET and BJT amplifiers; low, midrange, high-frequency analysis; difference amplifiers; feedback amplifiers; SPICE simulation; power amplifiers; digital logic families. Prerequisites: ECE:2410 and ECE:2400.

ECE:3500 Communication Systems 3 s.h.
Introduction to analog and digital communications, with an emphasis on modulation and noise analysis; Fourier analysis, probability theory, random variable and processes, AM, FM, pulse-coded modulation, binary digital modulation, SNR analysis of AM and FM, BER analysis of digital modulation schemes. Prerequisites: ECE:2400.

ECE:3540 Communication Networks 3 s.h.
Communication networks, layered network architectures, applications, network programming interfaces (e.g., sockets), transport, congestion, routing, data link protocols, local area networks, emerging high-speed networks, multimedia networks, network security, internet protocol; technology examples. Prerequisites: ENGR:2730. Corequisites: STAT:2020.

ECE:3600 Control Systems 3 s.h.
Fundamental concepts of linear feedback control, mathematical modeling, transfer functions, system response, feedback effects, stability, root-locus and frequency response analysis and design, compensation, lab arranged. Prerequisites: ECE:2400.

ECE:3700 Electromagnetic Theory 3 s.h.
Electric and magnetic forces, Maxwell's equations, wave propagation; applications, including radiation, transmission lines, circuit theory. Prerequisites: MATH:3550 and PHYS:1612.

ECE:3720 Semiconductor Devices 3 s.h.
Fundamentals of semiconductor physics and devices; principles of the p-n junction diode, bipolar transistor, field effect transistor. Prerequisites: ECE:3410 and PHYS:1612 and PHYS:2704.

ECE:3995 Undergraduate Contemporary Topics in Electrical and Computer Engineering 3 s.h.
New topics or areas of study not offered in other electrical and computer engineering courses; based on faculty/student interest; not available for individual study.

ECE:3998 Individual Investigations: Electrical Engineering arr.
Individual projects for electrical engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

ECE:4720 Introductory Optics 3 s.h.
Wave motion and superposition, electromagnetic theory, photons, propagation of light, geometrical and physical optics, interference, diffraction, polarization, Fourier optics, coherence, lasers, a and nonlinear optics. Prerequisites: (PHYS:1512 or PHYS:2703 or PHYS:1612) and (MATH:1560 or MATH:1860). Same as PHYS:4720.

ECE:4728 Introductory Solid State Physics 3 s.h.
Phenomena associated with solid state; classification of solids and crystal structures, electronic and vibrational properties in solids; thermal, optical, magnetic, dielectric properties of solids. Prerequisites: PHYS:3741. Same as PHYS:4728.

ECE:4880 Electrical and Computer Engineering Senior Design 1 3 s.h.
Design problems requiring integration of subject matter from other required electrical and computer engineering courses. Prerequisites: ECE:2410 and ENGR:2730. Requirements: senior standing.

ECE:4890 Electrical and Computer Engineering Senior Design 2 3 s.h.
Individual or team project; demonstration of completed project and formal engineering report. Prerequisites: ECE:4880 and (3 of the following are required: ECE:3330, ECE:3350, ECE:3360, ECE:3400, ECE:3410, ECE:3500, ECE:3600, CS:3330). Requirements: completion of three required subprogram courses.

ECE:5000 Graduate Seminar: Electrical and Computer Engineering 0 s.h.
Presentation and discussion of recent advances and research in electrical and computer engineering by guest lecturers, faculty, students. Requirements: graduate standing.

ECE:5320 High Performance Computer Architecture 3 s.h.
Problems involved in designing and analyzing current machine architectures using hardware description language (HDL) simulation and analysis, hierarchical memory design, pipeline processing, vector machines, numerical applications, multiprocessor architectures and parallel algorithm design techniques; evaluation methods to determine relationship between computer design and design goals. Prerequisites: ECE:3350 or CS:3620. Same as CS:5610.

ECE:5330 Graph Algorithms and Combinatorial Optimization 3 s.h.
Combinatorial optimization problems; time complexity; graph theory and algorithms; combinatorial optimization algorithms; complexity theory and NP-completeness; approximation algorithms; greedy algorithms and matroids. Prerequisites: ECE:3330. Same as IGPI:5331.

ECE:5410 Advanced Circuit Techniques 3 s.h.
Advanced circuit techniques and principles; analog circuit design including amplifiers, oscillators, multipliers, modulators, phase-locked loops, active filters, switching power supplies, analog to digital and digital to analog converters; lab activities include circuit simulation, design, printed circuit board (PCB) layout and fabrication, assembly, and testing. Prerequisites: ECE:3410.

ECE:5415 Radio Frequency Electronics 3 s.h.
Active and passive devices and transmission line structures at radio frequencies; analysis and design of radio frequency electronic circuits including amplifiers, mixers, multipliers, detectors, radio frequency filters, and oscillators using scattering parameters and the Smith chart; impedance matching, noise and distortion, and power amplifiers; laboratory projects include designing, simulating, building, and testing a radio frequency amplifier and other components used in a radio receiver or transmitter. Prerequisites: ECE:2410 and ECE:3700.

ECE:5420 Power Electronics 3 s.h.
Fundamental concepts and design techniques of power electronics circuits; switching power pole and various switch-mode DC to DC power conversion topologies; feedback control of switch-mode DC to DC power supplies; diode rectification of AC utility power and Power Factor Control (PFC) circuits; electromagnetic concepts and design of high-frequency inductors and transformers; electrically isolated switch-mode DC power supply topologies and soft-switching DC-DC converters and inverters; techniques for synthesis of DC and low-frequency AC sinusoidal voltages. Prerequisites: PHYS:1611 and ENGR:2120 and MATH:2560. Requirements: junior standing.

ECE:5430 Electric Drive Systems 3 s.h.
Basic characteristics of DC and AC electric motors and their associated power electronics interfaces; applications of electric machines and drives that are essential for wind turbines, electric and hybrid-electric; emphasis on vehicles; electric machines in context of overall drives and associated applications; space-vector theory used to analyze electric machines and drives; DC motor/generator characteristics and control; AC single phase and three-phase motor characteristics and feedback control, including AC synchronous and induction motors. Prerequisites: ENGR:2120 and PHYS:1611 and MATH:2560. Requirements: junior standing.

ECE:5450 Machine Learning 3 s.h.
Fundamentals of machine learning theory including regression, classification, neural networks, clustering, and principal component analysis; engineering applications. Prerequisites: ECE:2400 or BME:2200. Same as IGPI:5450.

ECE:5455 Statistical Foundations of Inference and Machine Learning 3 s.h.
Basic strategies to cope with noise in measurements with three objectives at core of most machine learning tasks —hypothesis testing (where one must choose between various hypotheses), parameter estimation (where multiple parameters whose values define how a system will behave must be estimated from noisy measurements), and filtering (where a noisy music signal must be cleaned up); topics include probability and statistics, random variables and signals, hypothesis testing, parameter estimation, discrete- and continuous-time random processes, and optimal filtering; assignments, written exams, and projects. Prerequisites: STAT:2020 and ECE:2400.

ECE:5460 Digital Signal Processing 3 s.h.
Theory, techniques used in representing discrete-time signals; system concepts in frequency and sampling domains; FIR and IIR digital filter theory, design and realization techniques; theory, application of discrete Fourier transforms/FFT. Prerequisites: ECE:3400. Same as IGPI:5460.

ECE:5466 Optical Components, Alignment, and Instrumentation for Remote Sensing 3 s.h.
Explore optical components including lenses, mirrors, beam splitters, fiber optics, and filters, and optical assemblies including beam expanders, interferometers, and laser cavities; assess and align optical assemblies using metrology equipment including collimators, autocollimators, and wavemeters; hands-on laboratory work. Work with optics, optical devices, and metrology equipment; learn how to handle, work with, and assess optics and optical components and how to align complex assemblages of components in a sensor. Recommendations: basic or introductory physics course with applications to atmospheric chemistry. Same as CBE:5466, PHYS:5466.

ECE:5470 Medical Imaging Physics 3 s.h.
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210. Same as BME:5210, IGPI:5206.

ECE:5480 Digital Image Processing 3 s.h.
Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image pre-processing, edge detection, filtering; image segmentation. Prerequisites: ECE:2400 or BME:2200. Same as IGPI:5480.

ECE:5490 Multi-Dimensional Image Analysis Tools and Techniques 3 s.h.
Broad exposure to common tools of medical imaging analysis in commercial, clinical, and research settings, including algorithm development (using C+++ and ITK), rapid prototyping (SimpleITK, nipype, ipython notebook), statistical analysis (R), machine learning (scikit-learn, keras/tensorflow) and reproducible science tools (python, git, bash); special emphasis on big data challenges associated with volume, velocity, and veracity; real-world settings for problems include image-guided robotic surgery, dose treatment planning, and image analysis. Prerequisites: ECE:5480 and (ECE:3330 or CS:2820).

ECE:5500 Digital Communications 3 s.h.
Random processes, source coding, digital transmission at baseband, optimum receiver design for Gaussian noise, error probability and power spectrum analysis, signal design for bandlimited channels, digital carrier modulation, bandwidth/energy/error probability tradeoffs, coding for error detection and correction. Prerequisites: STAT:2020 and ECE:3500.

ECE:5520 Introduction to Information and Coding Theories 3 s.h.
Quantitative measure of information; source encoding; error detecting codes; block and convolutional codes, design of hardware and software implementations; Viterbi decoding. Prerequisites: ECE:3500 and STAT:2020.

ECE:5525 Cryptography 3 s.h.
Introduction to cryptography, steam ciphers and block ciphers, data encryption standards, public key cryptosystems, digital signatures, message authentication codes, hash functions, and key management. Prerequisites: MATH:2550 and ENGR:2730.

ECE:5550 Internet of Things 3 s.h.
Internet of things (IoT) describes the evolution of the internet to intelligent devices, sensors, actuators, controllers, and other types of internet-enabled components; soon, IoT-based applications will enable seminal advances in a wide range of areas including health and lifestyle, transportation, smart cities, environment, energy, agriculture, and industry; topics include IoT logical and physical structure, IoT-enabled internet services, IoT devices/platforms/endpoints, IoT application domains, IoT security and privacy issues, and IoT data analytic; case studies and projects focused on design and implementation of a working IoT application. Prerequisites: ENGR:2730. Requirements: background in computer networks or embedded systems.

ECE:5600 Control Theory 3 s.h.
State space approach; controllability, observability, canonical forms, Luenberger observers, feedback control via pole placement, stability, minimal realization and optimal control. Prerequisites: ECE:3600.

ECE:5620 Electric Power Systems and Renewable Energy 3 s.h.
Overview of electric power systems; traditional and renewable forms of power generation; single phase and three-phase representations of electric power signals and electromagnetic concepts; AC transmission lines and underground cables, power flow in a power system network, AC power transformers, High Voltage DC (HVDC) power transmission and its application to renewable energy, electric power distribution, synchronous generators, voltage regulation and stability, power system transients and dynamic stability, control of interconnected power systems, transmission line faults, transient over-voltages and surge protection. Prerequisites: PHYS:1611 and ENGR:2120 and MATH:2560. Requirements: junior standing.

ECE:5630 Sustainable Energy Conversion 3 s.h.
Overview of sustainable energy conversion technologies; thermal energy conversion; Carnot and Rankine cycles; solar resource and raw energy availability, PV solar cell characteristics, solar panel construction, Maximum Power Point (MPP) tracking and utility grid interface; wind energy conversion resource and available energy, wind turbine configurations, electrical power interface electronics; ocean energy conversion tidal and wave resources and conversion technologies; tidal basin containment conversion and tidal current turbine systems. Prerequisites: ENGR:2120 and PHYS:1611 and MATH:2560. Requirements: junior standing.

ECE:5640 Computer-Based Control Systems 3 s.h.
Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisites: ECE:5600. Same as IGPI:5641.

ECE:5700 Advanced Electromagnetic Theory 3 s.h.
Time varying fields; plane wave propagation, reflection, refraction; waves in anisotropic media transmission lines, impedance matching, Smith chart; metallic and dielectric wave guides; resonators; antennas, antenna arrays. Prerequisites: ECE:3700.

ECE:5780 Optical Signal Processing 3 s.h.
Linear systems description of optical propagation; diffraction and angular plane wave spectrum; lenses as Fourier transformers, lens configurations as generalized optical processors; lasers, coherence, spatial frequency analysis; holography; convolvers, correlators, matched filters; synthetic aperture radar; optical computing. Requirements: for ECE:5780—ECE:3700; for PHYS:4820—PHYS:3812. Same as PHYS:4820.

ECE:5790 Electro Optics 3 s.h.
Wave equation solutions; optical birefringence; finite beam propagation in free space, dielectric waveguides and fibers; optical resonators; nonlinear phenomena; electro-optic, acousto-optic modulation; optical detection, noise; application to communication systems. Requirements: for ECE:5790—ECE:3700; for PHYS:4726—PHYS:3812. Same as PHYS:4726.

ECE:5800 Fundamentals of Software Engineering 3 s.h.
Problem analysis, requirements definition, specification, design, implementation, testing/maintenance, integration, project management; human factors; management, technical communication; design methodologies; software validation, verification; group project experience. Prerequisites: CS:2820 or ECE:3330. Same as CS:5800.

ECE:5810 Formal Methods in Software Engineering 3 s.h.
Models, methods, and their application in all phases of software engineering process; specification methods; verification of consistency, completeness of specifications; verification using tools. Prerequisites: ECE:3330 or CS:2820. Recommendations: CS:4350. Same as CS:5810.

ECE:5820 Software Engineering Languages and Tools 3 s.h.
Modern agile software development practices for cloud and web-based applications, using state-of-the-art software engineering languages, tools, and technologies; agile software development practices, software-as-a-service (SAAS), and the Ruby on Rails Development Framework. Prerequisites: ECE:3330 or CS:2820. Same as CS:5820.

ECE:5830 Software Engineering Project 3 s.h.
Team software development project using concepts and methodologies learned in earlier software engineering classes; practical aspects of large-scale software development. Prerequisites: ECE:5820. Same as CS:5830.

ECE:5840 Software Security 3 s.h.
Principles of computer security with emphasis on software development and deployment; cryptographic tools, authentication, access control, database and datacenter security, malicious software, denial of service attacks, firewalls, intrusion detection and prevention, buffer overflow attacks, and software and operating system security; case study investigations using hands-on tools. Prerequisites: ECE:3330 or CS:2820.

ECE:5845 Modern Databases 3 s.h.
Introduction to contemporary database architectures including relational, key-value, document-store, and graph databases; SQL, normalization; NoSQL models; relative strengths and weaknesses of database architectures; enterprise scalability issues; projects involving use of modern database systems (e.g., Postgres/MySQL, Redis, MongoDB, Neo4J). Prerequisites: ENGR:2730 or CS:2230.

ECE:5995 Contemporary Topics in Electrical and Computer Engineering arr.
New topics or areas of study not offered in other electrical and computer engineering courses; based on faculty/student interest; not available for individual study.

ECE:5998 Individual Investigations: Electrical and Computer Engineering arr.
Individual projects for electrical and computer engineering graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

ECE:5999 Research: Electrical and Computer Engineering MS Thesis arr.
Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for MS degree with thesis in electrical and computer engineering. Requirements: graduate standing.

ECE:6725 Microfabrication and Thin Film Materials 3 s.h.
Microfabrication and nanofabrication techniques and thin film materials growth used to create micro-, nano-, and opto-electronic devices that underlie modern technology; introduction to microfabrication techniques, physics, and chemistry; growth and properties of thin film materials upon which fabrication is performed; review of materials science; introduction to vacuum science and technology; survey of micro- and nano-devices; examination of thin film growth and deposition science, plasma etching and sputtering, micro- and nano-patterning and characterization, and film nucleation, growth, structure, and properties. Prerequisites: (PHYS:2704 or ENGR:2130 or CHEM:1120) and (MATH:1560 or MATH:1860) and (PHYS:1612 or PHYS:2703) and CHEM:1110. Recommendations: background in thermal and statistical physics, introductory quantum mechanics, and introductory chemistry. Same as ME:6725, PHYS:6725.

ECE:7470 Image Analysis and Understanding 3 s.h.
Mathematical foundations and practical techniques of digital image analysis and understanding; image segmentation (from edges and regions), object description (from boundaries, regions, scale, scale insensitive descriptions, 3D shape, texture) pattern recognition (statistical and syntactic methods, cluster analysis), image understanding (knowledge representation, control strategies, matching, context, semantics), image analysis and understanding systems; lab arranged. Prerequisites: ECE:5480. Same as IGPI:7470.

ECE:7480 Advanced Digital Image Processing 3 s.h.
Advanced local operators (scale-space imaging, advanced edge detection, line and corner detection), image morphology (binary/gray scale operators, morphological segmentation and watershed), digital topology and geometry (binary/fuzzy digital topology, distance functions, skeletonization), color spaces, wavelets and multi-resolution processing (Haar transform, multi-resolution expansions, wavelet transforms in one or two dimensions, fast wavelet transform, wavelet packets), image registration (intensity correlation, mutual information, and landmark-based deformable registration methods). Prerequisites: ECE:5460 and ECE:5480. Same as IGPI:7480.

ECE:7720 Semiconductor Physics 3 s.h.
Electronic, optical, and materials properties of semiconductors. Prerequisites: PHYS:4728 and PHYS:5742. Same as PHYS:7720.

ECE:7930 Seminar: Plasma Physics arr.
Current research. Same as PHYS:7930.

ECE:7999 Research: Electrical and Computer Engineering PhD Thesis arr.
Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for PhD in electrical and computer engineering.

Computer Science and Engineering, BSE

The Bachelor of Science in Engineering (BSE) program in computer science and engineering combines the technical content of a computer science degree and a computer engineering degree in a single degree program. The program curriculum is jointly taught by faculty from the Department of Electrical and Computer Engineering and the Department of Computer Science (College of Liberal Arts and Sciences). The program provides students with a strong theoretical and conceptual understanding of the principles underlying computer software and hardware along with the engineering analysis, design, and multidisciplinary teamwork skills needed to develop large and complex systems containing both software and hardware components.

The computer science and engineering program encompasses the technical rigor of a Bachelor of Science program in computer science and a Bachelor of Science program in computer engineering. This major is jointly accredited in computer science and computer engineering by the Accreditation Board for Engineering and Technology (ABET). Graduates gain the foundational knowledge provided by a computer science education together with the critical thinking, problem-solving, and system design skills at the heart of a computer engineering curriculum.

The major provides technical depth and breadth as well as flexibility and the opportunity for students to customize their programs according to their own goals and interests. Students choose one of several focus areas according to the type of job or research they plan to pursue; students also have the opportunity to work with their academic advisor to build a focus area plan that adheres to their goals and interests. Students select a focus area to personalize their curriculum and to prepare them for certain jobs or research studies they intend to seek.

In their senior year, students complete a two-semester capstone design sequence culminating in the development and implementation of a significant, original project. The capstone design experience emphasizes teamwork, professionalism, open-ended problem solving, and the ability to work within real-world constraints and engineering standards.

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Educational Objectives

Graduates of the computer science and engineering program will:

- exhibit leadership and vision in contributing to the computing-related technical and policy decisions of industry, government, and research enterprises;
- demonstrate computing skills and problem-solving abilities that permit them to contribute in a variety of technical, business, and academic careers;
- thrive in diverse, global, and multidisciplinary environments;
- possess the ability to communicate effectively and participate collaboratively in interactions with other computing and engineering professionals; and
- understand the importance of participating in lifelong learning activities that enhance their professional and personal development.

Requirements

The Bachelor of Science in Engineering (BSE) with a major in computer science and engineering requires a minimum of 128 s.h. of credits. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1529] in the catalog. 6 s.h. of a student's major courses fulfill the basic science or college-level math collegiate requirement. Students completing the major in computer science and engineering fulfill the collegiate statistics requirement by completing STAT:2020 Probability and Statistics for the Engineering and Physical Sciences.

The major in computer science and engineering includes ECE:3000 Electrical and Computer Engineering Professional Seminar, typically taken in the third year.

The BSE with a major in computer science and engineering requires the following coursework.

Requirements	Hours
Collegiate Curriculum	49
Basic Science and College-Level Math, from Major Requirements or Focus Area	6
Major Requirements	52
Focus Area	21

Major Requirements

Major requirements include a set of common courses (52 s.h.) and two capstone design courses (6 s.h.).

Common Courses

Course #	Title	Hours
All of these:		
ECE:2400	Linear Systems I	3
ECE:2410	Principles of Electronic Instrumentation	4
ECE:3320	Introduction to Digital Design	3
ECE:3330	Introduction to Software Design	3
ECE:3350	Computer Architecture and Organization	3
ECE:3360	Embedded Systems	3
ECE:3540	Communication Networks	3
CS:1210	Computer Science I: Fundamentals	4
CS:2210	Discrete Structures	3
CS:2230	Computer Science II: Data Structures	4
CS:3330	Algorithms	3
CS:3620	Operating Systems	3
CS:3820	Programming Language Concepts	3
ENGR:2120	Electrical Circuits	3

ENGR:2730	Computers in Engineering	3
PHYS:1612	Introductory Physics II (with lab)	4

Capstone Design Courses

In their senior year, students complete a two-semester capstone design sequence culminating in the development and implementation of a significant, original project.

Course #	Title	Hours
Both of these:		
ECE:4880	Electrical and Computer Engineering Senior Design 1	3
ECE:4890	Electrical and Computer Engineering Senior Design 2	3

Focus Area

Students must select focus area courses according to guidelines established by the Department of Electrical and Computer Engineering. A number of established focus areas are available, and students may also work with their academic advisor to create a customized plan tailored to their goals and interests.

Students complete a minimum of 21 s.h. in electives, including at least one complementary theory elective course (3 s.h.). Carefully selected elective and general education courses may contribute to earning a minor and/or certificate, including the Certificate in Sustainability [p. 404] (College of Liberal Arts and Sciences) or the Certificate in Technological Entrepreneurship [p. 1681].

For a complete list of focus areas and course selection guidelines, see Focus Areas on the Department of Electrical and Computer Engineering website. Although general guidelines and requirements for elective courses are listed, course recommendations for specific focus areas differ. While some courses may apply to more than one focus area requirement, a single course may only count once toward completing a focus area.

Electrical and Computer Engineering Electives

Students choose two focus area electives from electrical and computer engineering courses (prefix ECE) not already required for the major. Students must consult an academic advisor and gain approval from the undergraduate curriculum chair to count ECE:5998 Individual Investigations: Electrical and Computer Engineering toward this requirement.

Course #	Title	Hours
Both of these:		
Technical course in electrical and computer engineering (prefix ECE) numbered 3400 or above, excluding ECE:3998, ECE:5000, and ECE:5999		3
Advanced course in electrical and computer engineering (prefix ECE) numbered 5001-5995		3

Computer Science Electives

Students choose two focus area electives (at least 6 s.h.) from computer science courses (prefix CS) not already required for the major. At least one course must be numbered 4000 or above.

Course #	Title	Hours
Two of these, with at least one numbered 4000 or above:		
ECE:5320/CS:5610	High Performance Computer Architecture	3
ECE:5800/CS:5800	Fundamentals of Software Engineering	3
ECE:5810/CS:5810	Formal Methods in Software Engineering	3
ECE:5820/CS:5820	Software Engineering Languages and Tools	3
ECE:5830/CS:5830	Software Engineering Project	3
CS:3700/ MATH:3800	Introduction to Numerical Methods	3
CS:3980	Topics in Computer Science I	3
CS:4330	Theory of Computation	3
CS:4350	Logic in Computer Science	3
CS:4400	Database Systems	3
CS:4420	Artificial Intelligence	3
CS:4440	Web Mining	3
CS:4470	Health Data Analytics	3
CS:4500	Research Methods in Human-Computer Interaction	3
CS:4630	Mobile Computing	3
CS:4640	Computer Security	3
CS:4700/ MATH:4860	High Performance and Parallel Computing	3
CS:4720/ MATH:4820	Optimization Techniques	3
CS:4740/IGPI:4740/ MATH:4740/ STAT:4740	Large Data Analysis	3
CS:4980	Topics in Computer Science II	3
CS:5340	Limits of Computation	3
CS:5350	Design and Analysis of Algorithms	3
CS:5360	Randomized Algorithms	3
CS:5370	Computational Geometry	3
CS:5430	Machine Learning	3
CS:5620	Distributed Systems and Algorithms	3
CS:5630	Cloud Computing Technology	3
CS:5710/ MATH:5800	Numerical Methods I	3
CS:5720/ MATH:5810	Numerical Methods II	3
CS:5850	Programming Language Foundations	3
CS:5860	Lambda Calculus and Applications	3
CS:5980	Topics in Computer Science III	arr.

The following courses do not count towards the major; students take more advanced versions of these courses as part of their required coursework.

Course #	Title	Hours
CS:2630	Computer Organization	4
CS:2820	Introduction to Software Development	4
CS:3210	Programming Languages and Tools	arr.
CS:3640	Introduction to Networks and Their Applications	3

Additional Electives

Students select an additional 6 s.h. in courses to reach a minimum of 18 s.h. in focus area electives. Courses may be from the electrical and computer engineering (prefix ECE) or computer science (prefix CS) categories in the previous lists, or they may be chosen from outside of those lists with the approval of an academic advisor.

Theory Elective

Course #	Title	Hours
One of these:		
ECE:5330/IGPI:5331	Graph Algorithms and Combinatorial Optimization	3
ECE:5450/IGPI:5450	Machine Learning	3
ECE:5520	Introduction to Information and Coding Theories	3
ECE:5525	Cryptography	3
ECE:5810/CS:5810	Formal Methods in Software Engineering	3
CS:4330	Theory of Computation	3
CS:4350	Logic in Computer Science	3
CS:4720/ MATH:4820	Optimization Techniques	3
CS:5340	Limits of Computation	3
CS:5360	Randomized Algorithms	3
CS:5370	Computational Geometry	3
CS:5430	Machine Learning	3
CS:5620	Distributed Systems and Algorithms	3
CS:5850	Programming Language Foundations	3
CS:5860	Lambda Calculus and Applications	3

Double Major in Computer Science and Engineering/ Electrical Engineering

Students may earn a double major in computer science and engineering (CSE) and electrical engineering (EE). They must satisfy all requirements of the electrical track of the EE major and all requirements of the CSE major.

Combined Programs

BSE/MS in Electrical and Computer Engineering

The College of Engineering offers a Bachelor of Science in Engineering/Master of Science for computer science and engineering undergraduate students who intend to earn an MS in electrical and computer engineering. BSE/MS students may take up to 12 s.h. of graduate-level coursework and do thesis-level research while they are still undergraduates. They may count 9 s.h. of graduate coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the BSE, and they normally complete the MS one year later.

To be admitted to the degree program, students must have completed at least 80 s.h., have a cumulative grade-point average of at least 3.25, and submit a letter of application to the chair of the Department of Electrical and Computer Engineering. For more information, see Joint BS/MS Degree Program Undergraduate to Graduate (U2G) on the Department of Electrical and Computer Engineering website.

BSE/MCS

The College of Engineering and the Department of Computer Science (College of Liberal Arts and Sciences) offer a combined Bachelor of Science in Engineering/Master of Computer Science for computer science and engineering undergraduate students.

The combined degree program allows students to count a limited amount of credit toward both degrees. For more information, see the Master of Computer Science, MCS [p. 316] in the catalog.

Career Advancement

Students who earn a major in computer science and engineering work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, TV, and power industries, and many graduates pursue entrepreneurial ventures.

The major also prepares students for further study in many areas demanding computational and engineering skill sets.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduate outcome collection, and the university's online recruiting system, Handshake.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

	Hours	**15-16**
	Total Hours	**129-132**

a Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.

b Enrollment in math courses requires completion of a placement exam.

c Enrollment in chemistry courses requires completion of a placement exam.

d Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.

e Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.

f See General Catalog for list of approved course subjects.

g Students select a course from one of two GE CLAS Core areas: Understanding Cultural Perspectives or Values and Society.

h See General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with

prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI.

i Students complete 21 semester hours of focus area courses, not required in their major, composed of: one theory elective (3 s.h.), two electrical and computer engineering courses (prefix ECE) (6 s.h.), two computer science courses (prefix CS) (6 s.h.), and two additional electives (6 s.h.). See General Catalog and Department of Electrical and Computer Engineering website for specific requirements and recommendations. Or consult an advisor for more information.

j Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

k Please see Academic Calendar, on Office of the Registrar website, for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Degree Services.

Electrical Engineering, BSE

Electrical engineers develop technologies and systems for a wide variety of applications ranging from telecommunications to medical imaging. They play a central role in the design and implementation of any technology that is powered by electricity as well as the generation and distribution of electric power. Topics covered in the electrical engineering curriculum include the design of electronic circuits, communication systems, control systems, and semiconductor devices. Students may opt to specialize in any of these areas as well as others that include electrical power generation and distribution, medical image processing, computer systems, or design of micro- and nano-scale optical and electronic devices.

The major provides technical depth and breadth as well as flexibility and the opportunity for students to customize their programs according to their own goals. Students choose one of several focus areas according to the type of job or research they plan to pursue. More than 20 focus areas are available; see Focus Areas on the Department of Electrical and Computer Engineering website. Students also have the opportunity to work with their academic advisor to build a focus area plan that adheres to their goals and objectives. Focus areas allow students to personalize their curriculum and prepare them for the jobs or research they intend to pursue.

In their senior year, students complete a two-semester capstone design sequence culminating in a significant, original project.

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Educational Objectives

Graduates of the electrical engineering program will:

- exhibit leadership and vision in contributing to the technical and policy decisions of industry, government, and research enterprises;
- demonstrate problem-solving abilities that permit them to contribute to a variety of technical, business, and academic careers;
- thrive in diverse, global, and multidisciplinary environments;
- possess the ability to communicate effectively and participate collaboratively in interactions with engineers and other professionals; and
- understand the importance of participating in lifelong learning activities that enhance their professional and personal development.

Requirements

The Bachelor of Science in Engineering (BSE) with a major in electrical engineering requires a minimum of 128 s.h. of credit. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

The curriculum is built on a common core of electrical and computer engineering courses taken by all students. Beginning in their sophomore year, students select either the electrical or computer curricular track and begin taking more specialized courses. The electrical track is intended to provide a broad background in electrical engineering concepts and practice that prepares students for graduate study or electrical engineering careers in a wide range of industries and organizations. The computer track provides focus and depth for students preparing for graduate study or a career in computer hardware or software engineering. Students begin taking track and focus area elective courses in their third year.

All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1529] in the catalog. 6 s.h. of a student's major courses fulfill the basic science or college-level math collegiate requirement. Students completing the major in electrical engineering fulfill the collegiate statistics requirement by completing STAT:2020 Probability and Statistics for the Engineering and Physical Sciences.

The BSE with a major in electrical engineering requires the following coursework.

Requirements	Hours
Collegiate Curriculum	49
Basic Science and College-Level Math, from Major Requirements or Focus Area	6
Major Requirements, Computer Track	46
Focus Area, Computer Track	27
Major Requirements, Electrical Track	49
Focus Area, Electrical Track	24

Major Requirements

Major requirements include a set of common courses (29 s.h.), required courses within one of two tracks (16 s.h. in the computer track, 19 s.h. in the electrical track), one departmental seminar (1 s.h.), and two capstone design courses (6 s.h.).

Common Courses

Course #	Title	Hours
All of these:		
ECE:2400	Linear Systems I	3
ECE:2410	Principles of Electronic Instrumentation	4
ECE:3320	Introduction to Digital Design	3
ECE:3360	Embedded Systems	3
ECE:3700	Electromagnetic Theory	3
ENGR:2120	Electrical Circuits	3
ENGR:2730	Computers in Engineering	3
MATH:3550	Engineering Vector Calculus	3
PHYS:1612	Introductory Physics II (with lab)	4

Tracks

Beginning in the second year of study, students select either the electrical or computer curricular track and begin taking more specialized courses. The options for breadth and depth courses in the focus area are in part informed by the track a student is completing; see the section titled "Focus Area."

Computer Track Required Courses

Course #	Title	Hours
All of these:		
ECE:3330	Introduction to Software Design	3
ECE:3350	Computer Architecture and Organization	3
CS:2210	Discrete Structures	3
CS:2230	Computer Science II: Data Structures	4
CS:3330	Algorithms	3

Electrical Track Required Courses

Course #	Title	Hours
All of these:		
ECE:3400	Linear Systems II	3
ECE:3410	Electronic Circuits	4
ECE:3500	Communication Systems	3
ECE:3600	Control Systems	3
ECE:3720	Semiconductor Devices	3
PHYS:2704	Physics IV (without lab)	3

Departmental Seminar

The major in electrical engineering includes ECE:3000 Electrical and Computer Engineering Professional Seminar, typically taken in the third year.

Capstone Design Courses

In their final year of study, students complete a two-semester capstone design sequence culminating in the development and implementation of a significant, original project. The capstone design experience emphasizes teamwork, professionalism, open-ended problem solving, and the ability to work within real-world constraints and engineering standards.

Course #	Title	Hours
Both of these:		
ECE:4880	Electrical and Computer Engineering Senior Design 1	3
ECE:4890	Electrical and Computer Engineering Senior Design 2	3

Focus Area

Students must select focus area courses according to guidelines established by the Department of Electrical and Computer Engineering. A number of established focus areas are available, and students also may work with their academic advisor to create a customized plan tailored to their goals and objectives. Focus areas allow students to personalize their curriculum and to prepare them for the jobs or research they intend to pursue.

Focus areas in the electrical engineering major consist of one breadth elective (at least 3 s.h.), one depth elective (3 s.h.), two electrical and computer engineering courses (prefix ECE) numbered above 5000 (6 s.h.), two technical electives that align with the focus area (at least 6 s.h.), and two additional elective courses (6 s.h.). Students completing the computer track take an additional elective course (at least 3 s.h.) in electrical and computer engineering (prefix ECE).

The options for breadth and depth courses in the focus area are in part informed by the track a student is completing—computer or electrical. Carefully selected elective and general education courses may contribute to earning a minor and/or certificate, including the Certificate in Sustainability [p. 404] (College of Liberal Arts and Sciences) or the Certificate in Technological Entrepreneurship [p. 1681] (College of Engineering). Students who take an additional advanced math course meet the requirements for a minor in mathematics [p. 801] (College of Liberal Arts and Sciences). Students on the computer track who take an additional approved computer science course (prefix CS) meet the requirements for a minor in computer science [p. 314] (College of Liberal Arts and Sciences).

For a complete list of focus areas and course selection guidelines, see Focus Areas on the Department of Electrical and Computer Engineering website. Although general guidelines and requirements for elective courses are listed, course recommendations for specific focus areas differ. While some courses may apply to more than one focus area requirement, a single course may only count once toward completing a focus area.

Breadth Elective

Students in the computer track must choose their breadth elective from the list of required electrical track courses. Students in the electrical track must choose their breadth elective from the list of required computer track courses. See the section titled "Tracks." Students in either track may instead use ECE:3540 Communication Networks as their breadth elective.

Depth Elective

The depth elective must be an advanced course, normally numbered 4000 or above, in a subject area within a student's track.

Computer Track

Options for the computer track include the following.

Course #	Title	Hours
ECE:5320/CS:5610	High Performance Computer Architecture	3
ECE:5450/IGPI:5450	Machine Learning	3
ECE:5460/IGPI:5460	Digital Signal Processing	3
ECE:5480/IGPI:5480	Digital Image Processing	3
ECE:5525	Cryptography	3
ECE:5800/CS:5800	Fundamentals of Software Engineering	3
ECE:5810/CS:5810	Formal Methods in Software Engineering	3
ECE:5840	Software Security	3
ECE:5845	Modern Databases	3
CS:4400	Database Systems	3
CS:4420	Artificial Intelligence	3

Electrical Track

Options for the electrical track include the following.

Course #	Title	Hours
ECE:5320/CS:5610	High Performance Computer Architecture	3
ECE:5410	Advanced Circuit Techniques	3
ECE:5415	Radio Frequency Electronics	3

ECE:5455	Statistical Foundations of Inference and Machine Learning	3
ECE:5480/IGPI:5480	Digital Image Processing	3
ECE:5500	Digital Communications	3
ECE:5600	Control Theory	3
ECE:5620	Electric Power Systems and Renewable Energy	3
ECE:5640/IGPI:5641	Computer-Based Control Systems	3
ECE:5700	Advanced Electromagnetic Theory	3

Advanced Electrical and Computer Engineering Electives

Students complete at least two Department of Electrical and Computer Engineering courses (prefix ECE) numbered above 5000. Specific recommendations vary based on focus area.

Additional Electives

Students select additional courses from the focus area categories or from a list of suggested electives for their specific focus area. Additional electives for students pursuing the computer track total at least 15 s.h. (typically five courses) while electrical track electives total at least 12 s.h. (typically four courses).

Students may select courses in the Department of Electrical and Computer Engineering (prefix ECE) not already taken for the major. Courses not listed here may be able to count toward the focus area requirements; students should consult an academic advisor.

While course recommendations for specific focus areas differ, the following is a list of potential elective courses for either track.

Course #	Title	Hours
ACCT:2100	Introduction to Financial Accounting	3
ACCT:2200	Managerial Accounting Analytics and Data Visualization	3
CEE:4107/CBE:4410	Sustainable Systems	3
CHEM:1120	Principles of Chemistry II	4
CHEM:2220	Organic Chemistry II	3
CHEM:2410	Organic Chemistry Laboratory	3
ENGR:2130	Thermodynamics	3
ENTR:2000	Entrepreneurship and Innovation	3
ENTR:3100	Entrepreneurial Finance	3
ISE:2500	Engineering Economy	3
ISE:4172	Big Data Analytics	3
MATH:3800/ CS:3700	Introduction to Numerical Methods	3
MATH:4040	Matrix Theory	3
MATH:4200	Complex Variables	3
SEES:2013/ BUS:2013/ URP:2013	Introduction to Sustainability	3
STAT:4143/ PSQF:4143	Introduction to Statistical Methods	3
STAT:4520/ IGPI:4522/ PSQF:4520	Bayesian Statistics	3
STAT:4580/ DATA:4580/ IGPI:4580	Data Visualization and Data Technologies	3

Double Major in Electrical Engineering/Computer Science and Engineering

Students may earn a double major in electrical engineering (EE) and computer science and engineering (CSE). They must satisfy all requirements of the electrical track of the EE major and all requirements of the CSE major.

Combined Programs

BSE/MS in Electrical and Computer Engineering

The College of Engineering offers a Bachelor of Science in Engineering/Master of Science for electrical engineering undergraduate students who intend to earn a MS in electrical and computer engineering. BSE/MS students may take up to 12 s.h. of graduate-level coursework and do thesis-level research while they are still undergraduates. They may count 9 s.h. of graduate coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the BSE, and they typically complete the MS one year later.

To be admitted to the degree program, students must have completed at least 80 s.h., have a cumulative grade-point average of at least 3.25, and submit a letter of application to the chair of the Department of Electrical and Computer Engineering. For more information, see Joint BS/MS Degree Program Undergraduate to Graduate (U2G) on the Department of Electrical and Computer Engineering website.

Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors consistently rank among the top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). Electrical engineers find employment everywhere smart technology is employed. On average, 93–98% of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Electrical engineers work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, television, and power industries.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter

preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Electrical and Computer Engineering, MS

The Department of Electrical and Computer Engineering stimulates excellence in scholarship and research through close contact with the faculty and programs tailored to fit students' individual needs.

Students select an advisor and, with the advisor, plan an individual program bounded only by the broad guidelines of the Graduate College and the program. The department maintains close interdisciplinary ties with other University of Iowa departments, especially with the departments of Physics and Astronomy and Computer Science (College of Liberal Arts and Sciences); the Roy J. Carver Department of Biomedical Engineering and the departments of Industrial and Systems Engineering and Mechanical Engineering (College of Engineering); and the Carver College of Medicine. Principal areas of graduate study include medical image analysis, signal and image processing, control systems and systems theory, wireless communications, waves and materials, computer systems, and computational genomics. View principal areas of study under Research and Study Areas [p. 1613] in the Electrical and Computer Engineering section of the catalog.

Learning Outcomes

Students will:

- demonstrate a broad knowledge of electrical and computer engineering topics;
- be able to analyze electrical and computer engineering problems and apply their knowledge to solve them; and
- demonstrate professional skills of effective communication and ethical conduct in professional, social, and scholarly activities.

In addition to the learning outcomes listed, students who complete a thesis will:

- demonstrate a mastery of concepts in their specific area of study;
- be able to employ experimental methods to investigate and generate reports for research-oriented problems; and
- demonstrate leadership in professional, social, and scholarly activities.

Requirements

The Master of Science program in electrical and computer engineering requires 30 s.h. of graduate credit with or without thesis. Either option may precede PhD study. MS students must maintain a UI cumulative grade-point average of at least 3.00.

Thesis students must complete at least 12 s.h. from an approved list of electrical and computer engineering courses and 6 s.h. in ECE:5999 Research: Electrical and Computer Engineering MS Thesis. Nonthesis students must complete at least 18 s.h. from an approved list of electrical and computer engineering courses; they may count no more than 3 s.h. of independent study toward the degree. For a list of approved courses, see the Department of Electrical and Computer Engineering Graduate Handbook on the department's website. Courses required for the BSE in electrical engineering do not count toward the MS requirements.

Students who plan to satisfy thesis requirements must successfully complete a final examination, which is conducted by a committee of at least three faculty members. The final examination consists of an oral defense of the thesis.

Software Engineering Subprogram

A software engineering subprogram is available to both thesis and nonthesis students. Both thesis and nonthesis options require a minimum of 30 s.h. of graduate credit. All rules for additional credit and the MS final examination are the same as for the MS without the subprogram. Successful completion of the subprogram results in a degree designation that specifies the software engineering subprogram on a student's transcript.

The MS in electrical and computer engineering with a software engineering subprogram requires the following coursework.

Course #	Title	Hours
ECE:5320	High Performance Computer Architecture	3
ECE:5330	Graph Algorithms and Combinatorial Optimization	3
ECE:5800	Fundamentals of Software Engineering	3
ECE:5810	Formal Methods in Software Engineering	3
ECE:5820	Software Engineering Languages and Tools	3
ECE:5830	Software Engineering Project	3

In addition to the listed courses, thesis students complete another 3 s.h. of approved coursework and 6 s.h. in ECE:5999 Research: Electrical and Computer Engineering MS Thesis; nonthesis students complete another 9 s.h. of approved coursework. Students who complete one or more required courses as undergraduates can substitute courses from the list of approved electrical and computer engineering courses; see the list of approved courses in the Department of Electrical and Computer Engineering Graduate Handbook on the department's Graduate Program Information website.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must have a grade-point average (GPA) of at least 3.00 on all electrical and computer engineering, mathematics, and physics coursework. Those with a GPA between 2.75 and 3.00 in electrical and computer engineering, mathematics, and physics coursework may be admitted on probation if warranted by other aspects of their academic records.

Students with baccalaureate degrees in related areas (e.g., physics, mathematics, and computer science) may be admitted on conditional status. They may be required to complete additional coursework, without earning graduate credit, before being granted regular status.

Each application is reviewed individually. Extenuating circumstances may permit deviations from the usual standards.

Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Electrical engineers find employment everywhere smart technology is employed. On average, 93–98% of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

a Students must complete at least 18 s.h. from an approved list of Electrical and Computer Engineering courses; they may count no more than 3 s.h. of independent study toward the degree.

b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

c Must be completed during first semester.

d Work with faculty advisor to determine appropriate coursework and sequence, depending on area of interest or specialization; may include no more than 3 s.h. of independent study.

e Required attendance every semester until degree completion.

f Work with academic advisor to determine appropriate elective coursework and sequence.

g Completion of degree requirements.

Electrical and Computer Engineering, PhD

The Department of Electrical and Computer Engineering stimulates excellence in scholarship and research through close contact with the faculty and programs tailored to fit students' individual needs.

Students select an advisor and, with the advisor, plan an individual program bounded only by the broad guidelines of the Graduate College and the program. The department maintains close interdisciplinary ties with other University of Iowa departments, especially with the departments of Physics and Astronomy and Computer Science (College of Liberal Arts and Sciences); the Roy J. Carver Department of Biomedical Engineering and the departments of Industrial and Systems Engineering and Mechanical Engineering (College of Engineering); and the Carver College of Medicine. The principal areas of graduate study include medical image analysis, signal and image processing, control systems and systems theory, wireless communications, waves and materials, computer systems, and computational genomics. View principal areas of study under Research and Study Areas [p. 1613] in the Electrical and Computer Engineering section of the catalog.

Learning Outcomes

Graduates will:

- demonstrate a detailed knowledge of electrical and computer engineering topics and a mastery of advanced concepts within their specific area of study;
- master the analytical and methodological skills needed to identify, evaluate, and analyze novel discovery in their areas of specialization;
- be able to employ experimental methods to investigate and generate reports for research-oriented problems; and
- demonstrate professional skills, including concise and effective communication of complex technical ideas to both general and specialized audiences through verbal, visual, and written formats; leadership in their field of study; and ethical conduct in professional, social, and scholarly activities.

Requirements

The Doctor of Philosophy program in electrical and computer engineering requires a minimum of 72 s.h. of graduate credit. At least 45 s.h. must be earned in formal coursework (not in thesis work or other independent study), including 30 s.h. from an approved list of electrical and computer engineering courses. For the list of approved courses, see the Department of Electrical and Computer Engineering Graduate Handbook on the department's website. Each student's study plan must be approved by the student's advisor and by the graduate committee. Students must maintain a UI cumulative grade-point average (GPA) of 3.25 or higher in all graduate coursework.

Students take a qualifying examination and a comprehensive examination. Then they must successfully complete a research program that includes a minimum of 18 s.h. of PhD research and culminates in the preparation of a thesis. Finally, the candidate must present a successful oral defense of the thesis.

Qualifying Process

Acceptance to the PhD program requires successful completion of the PhD qualifying process. The qualifying process consists of two parts—an examination and a course breadth requirement. The half-day written exam is given once a year, late in the spring semester. It covers two subjects chosen by a student from a list of nine. Students normally are expected to take the qualifying examination within the first 30 s.h. of their graduate studies. A cumulative GPA of at least 3.25 is required for admittance to the exam. Students who fail the examination may retake it only once the next time it is offered.

To complete the breadth requirement, students must take two courses associated with the same list of nine subjects that the examination is drawn from and complete the courses with grades of at least A-minus. The breadth courses must not duplicate the subjects chosen for the examination and must be completed within the fourth semester of graduate study.

Comprehensive Examination

Following successful completion of the qualifying examination and invitation to the PhD program, a student must complete the two-part comprehensive examination. The first part is a written research proposal that includes a thorough literature survey providing the motivation and background for the proposal. The second part is an oral examination.

Students must pass the qualifying examination before they may take the comprehensive exam, and they must complete the comprehensive exam no later than three calendar years after passing the qualifying exam. Students who fail to meet this deadline must retake the qualifying exam. The qualifying exam and the comprehensive exam may not be taken in the same semester.

Thesis

The final requirement for completion of the PhD program is the preparation and successful defense of the thesis. This must be completed no sooner than six months but no longer than three years after the completion of the comprehensive examination.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must have a grade-point average of at least 3.25 on all electrical and computer engineering, mathematics, and physics coursework.

Each application is reviewed individually. Extenuating circumstances may permit deviations from the usual standards.

Career Advancement

Engineering is a well-respected profession that is used as a foundation for a variety of careers in industry, medicine, law, government, and consulting.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers,

including an engineering career fair and other career-development programming each semester. Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Electrical and Computer Engineering, PhD

Course	Title	Hours

a At least 45 s.h. must be earned in formal coursework (not in thesis work or other independent study), including 30 s.h. from an approved list of Electrical and Computer Engineering courses. Work with faculty advisor to determine appropriate graduate coursework and sequence.
b Must be completed during first semester.
c Work with faculty advisor to determine appropriate coursework and sequence.
d Required attendance every semester until degree completion.
e Typically completed no later than the end of second year spring semester; consists of two parts: an examination and a course breadth requirement. See the department website for more specifics.
f Work with academic advisor to determine appropriate elective coursework and sequence.
g Includes both written and oral components. See the department website for more specifics.
h Dissertation defense.

Industrial and Systems Engineering

Chair

- Yong Chen

Undergraduate major: industrial engineering (BSE)

Graduate degrees: MS in industrial engineering; PhD in industrial engineering

Faculty: https://engineering.uiowa.edu/people/ise-people

Website: https://engineering.uiowa.edu/ise

The Department of Industrial and Systems Engineering offers undergraduate and graduate degrees and research programs in industrial and systems engineering.

Industrial and systems engineering encompasses analysis, design, and implementation of systems through optimal use of resources—human, material, energy, information, and financial. Systems may range from small units to extremely large operations. The industrial engineer must be skilled in mathematics, physical sciences, management, and human relations, and understand and design solutions for the complexities of manufacturing, computer systems, economics, optimization, human behavior, and systems analysis and design.

Programs

Undergraduate Program of Study

Major

- Major in Industrial Engineering (Bachelor of Science in Engineering) [p. 1641]

Graduate Programs of Study

- Master of Science in Industrial Engineering [p. 1648]
- Doctor of Philosophy in Industrial Engineering [p. 1651]

Facilities

The following facilities and laboratories are operated by faculty in the Department of Industrial and Systems Engineering and may employ undergraduate and graduate students. For information about laboratories affiliated with core courses coordinated by other College of Engineering departments, see those departmental catalog sections.

Design for Manufacturing Laboratory

The Design for Manufacturing Laboratory provides students with experience in computer-aided design and computer-aided manufacturing (CAD/CAM) systems. It is equipped with three-axis computer numerical control (CNC) mills (Haas and Tormach), a CNC metal lathe (Haas), a manual vertical mill, a manual lathe, a drill press, a plastic injection molder, band saw, disc sander, bench grinder, polishing wheel, hand drill, foot shear, and plastic 3D printers. The lab has the latest software technology, including Creo Parametric.

Driving Safety Research Institute

The Driving Safety Research Institute (DSRI) is home to the National Advanced Driving Simulator—one of the world's largest and most realistic driving simulators—as well as a fleet of on-road research vehicles and a collection of other driving simulators. For the last 30 years, the University of Iowa has conducted advanced research and development to make roads safer and move vehicle and simulation technology forward. Most importantly, DSRI serves as a place where students can learn firsthand about how innovation occurs in science and engineering.

Major areas of research include driving behavior, drowsy and distracted driving, effects of drugs on driving, connected and automated vehicle technologies and how drivers use those technologies, simulation science, and safety and crash data analytics. Faculty, staff, and students at DSRI collaborate with nearly all UI colleges in their automotive safety research, and staff researchers have a range of backgrounds from psychology, engineering, computer science, and more. Research at DSRI is funded by government agencies and industry leaders for the public and private sectors. DSRI works with undergraduate, graduate, and doctoral students in driving research studies. Many of these studies include the use of the DSRI miniSim, which offers a range of high-performance driving simulators from desktop versions to half cabs. Students are often hired to help build custom miniSims for clients around the world and can work on both the software and hardware side of development

Automated vehicle technology is revolutionizing transportation, and DSRI is at the forefront of this research. The UI was the first in the world to test a highly automated vehicle on gravel roads, all while looking to improve accessibility for people living in rural areas. Their on-road vehicles are all instrumented to collect data and are also used for researching how drivers use advanced vehicle safety features and for analyzing driving performance in novice drivers, older drivers, or those with medical conditions.

Graphical Representation of Knowledge Lab (GROK)

The GROK Lab develops technologies to help scientists and doctors improve their understanding and control of complex systems such as robots, distributed sensor networks, and augmented-reality systems. The lab designs and builds software, electronic circuits, and mechanical devices that create or modify complex systems and that extend scientists' understanding of how to make these systems perform their intended tasks better.

The lab has a variety of software development platforms and manufacturing tools, including computer numerical control (CNC) machines and supplies for casting and molding, as well as a suite of equipment for circuit design, testing, and assembly. The GROK lab has developed technologies used by NASA to control robots exploring South America and Mars. Its most recent projects have focused on using distributed wireless sensor networks to monitor factory-related health hazards and on developing surgical simulators to better train orthopedic surgeons.

Intelligent Factory Operations & Manufacturing Automation Lab (INFORMAT)

The Intelligent Factory Operations & Manufacturing Automation (INFORMAT) Lab is a cutting-edge facility dedicated to advancing research and education in smart manufacturing and automation. Envisioned as a futuristic factory and production platform, this wet-lab space integrates collaborative robotic systems, advanced manufacturing processes, state-of-the-art sensing technologies, and data analytics to enable in situ monitoring and self-correcting handling and manufacturing of novel materials. The lab provides students with hands-on learning opportunities in manufacturing, robotics, simulation, and AI applications, preparing them to address the evolving challenges of modern manufacturing industries.

Intelligent Systems Laboratory

The Intelligent Systems Laboratory conducts research in data science and computational intelligence leading to applications in manufacturing, energy, service industry, and health care. The current project focuses on smart manufacturing, digital industry, cloud and edge modeling, service manufacturing, and autonomous systems. Many of the intelligent manufacturing concepts pursued globally have originated in the laboratory. The pioneering research has been marked with the publication of the textbook *Intelligent Manufacturing Systems* (Prentice Hall) and the Journal of Intelligent Manufacturing.

Laboratory for IoT-Enabled Data Analytics and System Informatics

The lab utilizes high-performance computing workstations to model uncertainty quantifications and complex variable relationships. The aim is to develop engineering-guided statistical techniques to facilitate the interpretability, real-time monitoring, and root cause analysis of complex systems. The lab focuses on developing and applying data analytics tools to various promising areas, including advanced manufacturing systems, driver simulation and monitoring systems, and water and hydrology modeling systems. The research in the group requires algorithm development, hardware design, theoretic analysis, and simulation and emulation.

Operator Performance Laboratory

The Operator Performance Laboratory (OPL) is a flight test organization at the University of Iowa. The lab specializes in civilian and military flight testing and assessment of technologies in operational contexts, such as flight in degraded visual environments and GPS-denied environments. One area of focus is the quantification of data link and sensor performance for manned and unmanned aircraft in such an operational context. OPL develops, tests, and evaluates helmet-mounted displays (HMDs), synthetic vision systems, live virtual constructive (LVC) training systems, physiological-based workload measurement systems, pilot spatial orientation enhancement systems, and embedded flight simulation capabilities.

Unmanned aircraft operations include test flights supporting commercial unmanned aircraft systems (UAS) autonomy, 5th- and 6th-generation manned-unmanned teaming (MUMT) concepts, and the extension of LVC toward MUMT. The OPL team developed the Cognitive Assessment Tool Set (CATS), which is able to accurately quantify human cognitive workload using a flight-approved sensor package. CATS has been used in many flight tests as the data collection and analysis tool for pilot behavior in real-world flight environments. OPL pioneered the development and testing of LVC technology that blends ground-based battlespace simulations with airborne testbeds equipped with radar and weapons simulators that can employ simulated ordnance for effect in distributed simulation environments. This capability has been demonstrated many times, including at the Interservice/Industry Training Simulation Education Conference. In 2004, the OPL team developed and tested a synthetic vision system that was subsequently commercialized by Dynon Avionics under the brand name Skyview. This system has sold over 10,000 units and is flying in thousands of aircraft.

OPL has performed many flight test projects on its fleet of aircraft, exceeding a total 2,400 flight hours of developmental test and evaluation and operational test and evaluation data collection. OPL has 10 instrumented research aircraft. These include two L-29 fighter jet trainers, two MI-2 twin-turbine helicopters, one A-36 Bonanza, one Cessna 172, three TBM 3M UAS (62 lbs), and one Vapor 55 (55 lbs). The OPL L-29s are the only tactical jet research aircraft that are equipped with the F-35 HMD. The OPL MI-2 is a one-of-a-kind sensor platform with a conformal HMD using full-color symbology to show threats and obstacles acquired by its suite of onboard sensors. Each OPL aircraft is also a flight simulator. Additionally, the OPL has a Boeing 737-800 full flight deck simulator, an unmanned aerial vehicle (UAV) ground control station simulator, a fast jet simulator, and deployable command and control (C2) bus as well as a C2 high mobility multipurpose wheeled vehicle for use as a forward command node in rugged terrain. OPL has an extensive deployable telemetry infrastructure. OPL's flight support system is also deployable using mobile tool control, spares, jigs, and jacks, among other means.

Science of Next-Generation (SONG) Manufacturing Laboratory

The SONG lab focuses on the design, manufacturing, and diagnostics of extreme materials—particularly ceramics, composites, and energetics—that operate under high-temperature and high-strain-rate conditions. Their research aims to leverage novel far-from-equilibrium conditions for the assembly and manufacture of extreme materials. Their work employs multi-scale in-situ experimental tools, including high-strain-rate dynamic testing, high-speed optical imaging, and high-speed thermometry to probe processing and material dynamics under extreme conditions.

Courses

Industrial and Systems Engineering Courses

ISE:1000 First-Year Seminar **0-1 s.h.**
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

ISE:2000 Industrial Engineering Sophomore Seminar 0 s.h.
Curriculum and profession; ethics and professionalism in classroom and workplace. Requirements: sophomore or transfer standing in engineering.

ISE:2360 Design for Manufacturing 3 s.h.
Fundamentals of design, engineering graphics, and manufacturing processes; computer graphics using Creo for CAD/CAM; typical industrial processes, including machining, casting, forming; prototype fabrication using additive manufacturing techniques; next generation manufacturing and design tools; laboratory exercises and projects. Topics include engineering design, computer graphics, computer-aided design, engineering materials, traditional and non-traditional manufacturing techniques, numerically controlled machine tools, additive manufacturing and process planning.

ISE:2500 Engineering Economy 3 s.h.
Basic concepts of engineering economy: time value of money, cash flow equivalence, depreciation, tax considerations, continuous cash flows, cost accounting overview; main analysis techniques—present worth, uniform annual cost, rate of return, benefit/cost ratio, replacement and break-even analysis. Corequisites: STAT:2020.

ISE:3000 Professional Seminar: Industrial Engineering 0 s.h.
Professional aspects of industrial engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Requirements: junior standing.

ISE:3300 Manufacturing Systems 3 s.h.
Manufacturing and logistics systems, supply chain management, MRP/ERP systems, lean manufacturing, concurrent engineering, value stream mapping and six sigma. Offered spring semesters. Prerequisites: ISE:2360 and ISE:3700.

ISE:3350 Process Engineering 3 s.h.
Methodologies, algorithms, and tools for processing modeling, analysis, and reengineering; modeling issues in product and component design, product and process modularity, quality, reliability, and agility. Prerequisites: ISE:3700.

ISE:3400 Human Factors 3 s.h.
Design of human-machine systems; development of optimum work environments by applying principles of behavioral science and basic knowledge of human capacities and limits. Offered fall semesters. Prerequisites: PSY:1001.

ISE:3450 Ergonomics 3 s.h.
Ergonomic design of jobs and products in an industrial and consumer market setting; principles of good design, examples of poor design; consequences of poor job and product design; principles of work sampling, usability studies, performance rating, sizing and planning of workstations, hand tool design, ergonomic design in transportation; related group project.

ISE:3500 Information Systems Design 3 s.h.
Structure and design of computer-based information systems; concepts of information systems, decision-making; computer hardware, software, data structures; methods for determining system requirements; designing, implementing, evaluating, managing information systems; applied projects. Prerequisites: ENGR:1300.

ISE:3600 Quality Control 3 s.h.
Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisites: STAT:2020 or BAIS:9100 or (STAT:3100 and STAT:3101 and STAT:3200). Same as CEE:3142, STAT:3620.

ISE:3610 Stochastic Modeling 3 s.h.
Fundamental probabilistic models and applications of industrial engineering; overview of probability and distributions, stochastic processes and Markov chains, queuing theory, inventory theory, decision theory under uncertainty, and elements of risk management. Prerequisites: STAT:2020. Corequisites: ISE:3700.

ISE:3660 Data Analytics With R 3 s.h.
Basics of data analytics and data mining; how to implement a variety of popular data mining methods in R to tackle business and engineering problems; focus on process of turning raw data into intelligent decisions and algorithms commonly used to build predictive models and find relevant patterns in data. Prerequisites: STAT:2020.

ISE:3700 Operations Research 3 s.h.
Operations research models and applications; emphasis on deterministic model (linear programming, duality). Offered fall semesters. Prerequisites: MATH:2550. Corequisites: STAT:2020.

ISE:3750 Digital Systems Simulation 3 s.h.
Simulation modeling and analysis; emphasis on construction of models, interpretation of modeling results; input and output analysis; hands-on usage of ARENA simulation software, manufacturing, health care, and service. Offered spring semesters. Prerequisites: ISE:3610 and ISE:3700.

ISE:3760 Applied Linear Regression 3 s.h.
Regression analysis with focus on applications; model formulation, checking, and selection; interpretation and presentation of analysis results; simple and multiple linear regression; logistic regression; ANOVA; polynomial regression; tree models; bootstrapping; hands-on data analysis with computer software. Prerequisites: STAT:2020 or STAT:2010 or STAT:3120. Same as DATA:3200, IGPI:3200, STAT:3200.

ISE:3998 Individual Investigations: Industrial Engineering arr.
Independent projects in industrial engineering for undergraduate students, including laboratory study, an engineering design project, analysis and simulation of an engineering system, computer software development, CAD/CAM applications, or research.

ISE:4116 Manufacturing Processes Simulations and Automation 3 s.h.
Material processing, metal cutting theories, forming, micro/nano fabrication, programmable logic controller, computer numerical controllers, discrete control system, DC and AC servo motors, Command generation. Prerequisites: ME:2300 or ISE:2360. Same as ME:4116.

ISE:4172 Big Data Analytics 3 s.h.
Principles of data mining and machine learning in context of big data; basic data mining principles and methods—pattern discovery, clustering, ordering, analysis of different types of data (sets and sequences); machine learning topics including supervised and unsupervised learning, tuning model complexity, dimensionality reduction, nonparametric methods, comparing and combining algorithms; applications of these methods; development of analytical techniques to cope with challenging and real "big data" problems; introduction to MapReduce, Hadoop, and GPU computing tools (Cuda and OpenCL). Prerequisites: STAT:2020 or BAIS:9100. Requirements: basic programming skills in C, C++, Java, or Python; knowledge of Matlab, Octave, or R; and knowledge of a word processor. Recommendations: ISE:3760 and CS:4400 and CS:3330 and MATH:2550.

ISE:4175 Safety Engineering 3 s.h.
Systems safety principles and methods, occupational safety, product safety and liability, accident investigation and prevention methods and analysis, hazard analysis, and standards and regulations.

ISE:4600 Industrial Engineering Design Project 1-4 s.h.
Projects involving product and related operational system design in an industrial or service organization; associated entrepreneurial or intrapreneurial planning. Corequisites: ISE:2500 and ISE:3300 and ISE:3350 and ISE:3400 and ISE:3450 and ISE:3500 and ISE:3600 and ISE:3750, if not taken as prerequisites. Requirements: completion of all ISE coursework.

ISE:4620 Design of Experiments for Quality Improvement 3 s.h.
Development of skills necessary to efficiently and effectively design and analyze experiments for quality improvement; topics include experiment planning, design, and statistical analysis of the results; experimentation is beneficial in all phases of industrial processes including new product design, process development, and manufacturing process improvement; students develop successful experiments that can lead to reduced development lead time, enhanced process performance, and improved product quality. Prerequisites: STAT:2020. Requirements: junior (third year) standing.

ISE:4900 Introduction to Six Sigma 3 s.h.
Six Sigma techniques for the DMAIC cycle (Define, Measure, Analyze, Improve, Control); what is needed for data collection (process inputs and outputs, measurement tools), conduct analysis (hypothesis testing, process capability studies), and conduct process improvement studies (design of experiments, response surface methodology); overview of Six Sigma, process and project management skills; application of the DMAIC model to a real-life improvement projection (a "learn-by-doing" approach). Prerequisites: ISE:3600.

ISE:5000 Graduate Seminar: Industrial Engineering 1 s.h.
Recent advances and research in industrial engineering presented by guest lecturers, faculty, students. Requirements: graduate standing.

ISE:5310 Advanced Computational Design and Manufacturing 3 s.h.
Provides understanding and practical experience in application of computational techniques to solve design and manufacturing problems; introduction to underlying concepts behind 3D geometry representations, algorithms, and underlying mathematical foundations essential to solving a wide variety of problems in computer-aided design (CAD), computer-aided manufacturing (CAM), and computer-aided engineering (CAE); hands-on computational skills working on team-based course projects. Requirements: knowledge of basic C/C++ programming concepts.

ISE:5420 Automated Vehicle Systems 3 s.h.
Overview of vehicle technologies (HAV) and advanced driver assistance systems (ADAS) including a historical perspective, testing, policy and regulation, algorithm design, and human factors. Recommendations: ISE:3400.

ISE:5460 User Experience Design 3 s.h.
Introduction to user experience (UX) research and design fundamentals; UX design as a critical first step in user research, designing products and services for users (e.g., digital, physical, hybrid), and validating products and services; UX theory, methods, and design; examination of user research techniques to facilitate UX design; UX design to achieve user engagement when using products and services; how demand for UX professionals has increased; lectures, readings, hands-on UX design activities, and UX design project.

ISE:5520 Renewable Energy 3 s.h.
Introduction to different sources of renewable energy generation including wind, solar, fuel cells, and bioenergy; design of energy solutions for different stand-alone applications (i.e., factories, data centers, hospitals) and system-wide solutions powering transportation systems, cities, or states; application-specific topics such as energy storage, control of energy generators, operations and maintenance, performance optimization, equipment health monitoring, predictive engineering, and integration of renewable energy with a grid.

ISE:5620 Design of Experiments 3 s.h.
Principles and methods of statistical design of experiments for product and process improvement; students develop skills necessary for planning, analysis, and optimization of experimental data, which can be applied across various fields of research including engineering, medicine, and the physical sciences. Prerequisites: STAT:2020.

ISE:5650 Mechatronics Engineering for Smart Device Design 3 s.h.
Introduction to basic mechatronics system components and design principles using mechatronics to meet functionality requirements of products, processes, and systems; lab-oriented assignments and team-based projects presented with innovative case studies in diverse application domains; labs require students to use a micro-controller kit to finish hardware development assignments; for students who plan to have a career in areas such as product development, robotics, design and manufacturing automation, technology management and innovations. Prerequisites: ENGR:2120 and ISE:2360.

ISE:5730 Digital Industry 3 s.h.
Modeling methodologies, analysis, and optimization of digital enterprise models; autonomous building of models from data stores; introduction to different application-as-a-service models embedded in edge, fog, and cloud architectures and solutions; science of process modeling and analysis illustrated with case studies. Prerequisites: ISE:3700.

ISE:5740 Design and Analysis of Computer Experiments 3 s.h.
Introduction to basic concepts of computer experiments; differences between computer and physical experiments; three technical contents including parametric and nonparametric prediction/inference models for computer experiments, space filling design for computer experiments, and criterion-based experiment design. Requirements: coding capability in at least one popular software (e.g., R, MATLAB, Python). Recommendations: STAT:4540, BAIS:9100 or MBA:8150, ISE:6790, or coding capability in R, MATLAB, or Python.

ISE:5995 Contemporary Topics in Industrial Engineering arr.
New topics or areas of study not offered in other industrial engineering courses; topics based on faculty/student interest.

ISE:5998 Individual Investigations: Industrial Engineering arr.
Individual projects for industrial engineering graduate students: laboratory study, engineering design, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

ISE:5999 Research: Industrial Engineering MS Thesis arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for MS with thesis in industrial engineering. Requirements: graduate standing.

ISE:6211 Human Factors in Healthcare Systems 3 s.h.
Solving human factors problems in health care work systems; cognitive systems engineering, interface design, health care productivity, patient safety; specific research including decision-making, information transfer, and communication; discrete event and dynamic systems simulation modeling; human computer interaction; health information technology/systems; usability; business models of organizational, technical, and social elements of health care systems.

ISE:6220 Cognitive Engineering 3 s.h.
Cognitive engineering principles; decision-making and judgment; distributed cognition; cognitive work; human system interaction; cognitive work analysis; situated action and ecological models; mental models and representation; cognitive engineering methods and applications.

ISE:6300 Innovation Science and Studies 3 s.h.
Innovative typology and sources, classical innovation models, measuring innovation, innovation discovery from data, evolutionary computation in innovation, innovation life cycle.

ISE:6350 Computational Intelligence 3 s.h.
Concepts, models, algorithms, and tools for development of intelligent systems; data mining, expert systems, neural networks for engineering, medical and systems applications. Same as NURS:6900.

ISE:6380 Deep Learning 3 s.h.
Basic principles of deep neural networks for various engineering applications; skill sets to design and implement deep learning algorithm for engineering applications; essential topics of deep learning for its practical use and exploring diverse methods and architectures for different types of applications.

ISE:6410 Research Methods in Human Factors Engineering 3 s.h.
Logic and methods for research and for analysis and evaluation of complex human-machine systems; advanced techniques for enhancement of human interaction with advanced information technology; emphasis on cognitive task analysis techniques for innovative design, understanding of how technology affects safety, performance, user acceptance.

ISE:6420 Human/Computer Interaction 3 s.h.
Development of projects using human factors principles in the design of computer interfaces.

ISE:6450 Human Factors in Aviation 3 s.h.
Measuring, modeling, and optimizing human visual performance; display design for optimal legibility, research in visibility, legibility, conspicuity, and camouflage; visibility model development.

ISE:6460 The Design of Virtual Environments 3 s.h.
Development of techniques for designing and creating three-dimensional representations of information for simulation, scientific visualization, and engineering; emphasis on human factors issues, software.

ISE:6480 Unmanned Aircraft Systems 3 s.h.
Applications and research in unmanned aircraft systems (UAS) with focus on engineering aspects; new era of aviation and how UAS are fast emerging as a disruptive technology in aviation; applications ranging from film production, photography, precision agriculture, remote sensing, and infrastructure inspections to military applications; problem space of UAS from a variety of angles including engineering controls design, data links, UAS types, human factors, regulatory aspects.

ISE:6600 Linear Programming 3 s.h.
Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Requirements: calculus and linear algebra. Same as BAIS:6600, IGPI:6600.

ISE:6650 Human Analytics and Behavioral Operations 3 s.h.
Introduction to several quantitative applications related to determining workforce size, skills-sets, and multifunctionality in service and manufacturing systems, based on measurable quality and productivity performance at the intersection of human factors engineering and production planning; modeling and solving problems in a context of speed and accuracy trade-off; models include learning, forgetting, teamwork, fatigue, procrastination, and individual difference measures.

ISE:6760 Pattern Recognition for Financial Data 3 s.h.
Modeling and harvesting useful information and patterns for financial data; topics include basic concepts of financial data, financial data visualization, modeling and forecasting of financial time series, seasonal models, volatility models, value at risk, principal component analysis, and factor models.

ISE:6780 Financial Engineering and Optimization 3 s.h.
Quantitative methods of modeling various financial instruments (i.e., stocks, options, futures) and tools for measurement and control of risks inherent to financial markets; fundamentals of interest rates; options and futures contract valuation, including weather and energy derivatives; risk management and portfolio optimization; emphasis on modeling and solution techniques based on optimization and simulation approaches traditional to industrial engineering and operations research. Recommendations: basic knowledge of probability and statistics, numerical methods, and optimization.

ISE:6790 Advanced Data Analytics and Informatics 3 s.h.
Advanced analytics techniques (i.e., linear mixed effects model, Gaussian process model, Bayesian analytics); team project on selected data analytics topics from Kaggle using real industrial data for performance demonstration; emphasis on understanding methodology and technology applications; application of each analytics technique on various industrial data context. Recommendations: STAT:4540 or MBA:8150; working knowledge of important discrete and continuous distributions, joint distributions, linear regression, random process, hypotheses testing, and analysis of variance; and programming capability in any language (e.g., Matlab, R, Python).

ISE:6810 Advanced Topics on Additive Manufacturing 3 s.h.
Review of critical challenges facing 3D printing; emphasis on techniques and practical experience in developing novel additive manufacturing processes and applications; topics include 3D content creation and preparation, CAD systems for additive manufacturing, additive manufacturing processes, fabrication speed and improvements, rapid tooling and indirective processes.

ISE:7998 Special Topics in Industrial Engineering arr.

ISE:7999 Research: Industrial Engineering PhD Dissertation arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for PhD in industrial engineering.

Industrial Engineering, BSE

The major in industrial engineering requires a strong foundation of courses in engineering science, mathematics, design, manufacturing, social science, and the humanities. Advanced work includes specialty courses in human factors and ergonomics, management, information systems, manufacturing, quality control, and operations research. Design is an integral part of the undergraduate program; all students complete a comprehensive design experience.

The Department of Industrial and Systems Engineering offers a host of options for each engineering student. From the undergraduate engineering degree, a dual Undergraduate to Graduate (U2G) degree, focus areas, and extracurricular activities, there are many options available to explore and develop professional skills. The industrial and systems engineering undergraduate program emphasizes a broad education in engineering fundamentals and the opportunity for in-depth learning in a focus area.

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Focus Areas and Specialized Opportunities

As part of the mission to help students be engineers and something more, the Department of Industrial and Systems Engineering offers a variety of focus area options so that students can pursue specialized interests. Industrial engineering focus areas include big data analytics, computer and information systems, design and manufacturing, entrepreneurship, human factors and ergonomics, management, and an option to tailor a focus area to an individual student's interests.

Big Data Analytics

Big data analytics is the process of examining big data in an effort to uncover hidden patterns, unknown correlations, and other useful information—95% of the data in the world today has been created in the last few years alone. This data comes from everywhere: sensors used to gather climate information, posts to social media sites, digital pictures and videos, purchase transaction records, and cell phone GPS signals, to name a few.

Computer and Information Systems

Industrial engineers have a natural role to play in this field by using quantitative system analysis, manufacturing system knowledge, and human factors skills to help design and refine computer systems that are becoming ever more complex. The field offers substantial opportunities for technical skill development, travel, and interaction with a diverse range of professionals.

Design and Manufacturing

Many graduates find careers in manufacturing industries that include the use of computer-aided design and manufacturing, virtual and physical prototyping, 3D design, design and simulation of manufacturing processes, and manufacturing systems. They find employment in diverse industries, including the supplier manufacturing industry (e.g., John Deere, Caterpillar, Collins Aerospace, Raytheon, Boeing), health care (e.g., Johnson & Johnson, Zimmer), software, and the information industry (e.g., Creo Parametric, CATIA, SolidWorks, AutoCAD).

Entrepreneurship

Entrepreneurship allows engineering students to explore venture capital, marketability of products, and technology transfer. They gain exposure to understanding sound business practices, acquire team-building skills in both small and large companies, understand the entrepreneurial approach to acquiring and managing resources, learn how to create a business plan, and obtain valuable contacts and networking opportunities with businesses and industries.

Human Factors and Ergonomics

The human factors and ergonomics focus area represents an increasingly important engineering specialty. The dramatic increase in netcentric computer technology makes system performance increasingly dependent on the match between system characteristics and human capabilities. Graduates find employment in diverse industries that include health care (e.g., GE, Medtronics, Guidant), original equipment manufacturer (OEM) and supplier manufacturing industry (e.g., Collins Aerospace, Boeing, John Deere, Caterpillar), computer systems (e.g., Microsoft, Intel, IBM), the government (e.g., NHTSA, NTSB, NASA, the Department of Defense), and consulting (e.g., Accenture, Battelle). Human factors considers cognitive characteristics, and ergonomics considers physical characteristics. This focus area provides advanced education in psychology, systems, statistics, and biomechanics.

Management

Industrial engineers are often assigned managerial tasks, project management, and financial assessments as they relate to project budgets, cost calculations, and optimization criteria. This focus area prepares students for a career in engineering and business management.

Tailored

Students work with an advisor to tailor a program that is specific to their individual needs. For more information about guidelines for tailored focus areas, see Focus Areas on the Department of Industrial and Systems Engineering website.

Student Organizations

Student organizations can have an enormous impact on an undergraduate student's career. The College of Engineering is home to a number of student organizations and clubs. Popular organizations for industrial and systems engineering students include the Institute of Industrial and Systems Engineers (IISE) and the Human Factors and Ergonomics Society (HFES).

Undergraduate Resources

Undergraduate resources are available to students to pursue research, access professional services available in the college and across the university, and participate in or view sports and arts events on campus and around town.

Scholarships

A variety of engineering scholarships and funding opportunities are available to industrial and systems engineering students.

Accreditation

The undergraduate program in industrial engineering is accredited by the Engineering Accreditation Commission of ABET.

Educational Objectives

The following educational objectives of the program are defined in conjunction with the accreditation process.

Within a few years of graduation, industrial engineering graduates will:

- continue learning;
- lead and inspire others; and
- engage in the community and society.

Requirements

The Bachelor of Science in Engineering (BSE) with a major in industrial engineering requires a minimum of 128 s.h. of credit, including two 0 s.h. departmental seminars. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1529] in the catalog. 6 s.h. of a student's major courses fulfill the basic science or college-level math collegiate requirement. Students completing the major in industrial engineering fulfill the collegiate statistics requirement by completing STAT:2020 Probability and Statistics for the Engineering and Physical Sciences. Students within the department are also required to take PSY:1001 Elementary Psychology to fulfill part of the BSE collegiate curriculum general education component approved course subjects requirement.

The BSE with a major in industrial engineering requires the following coursework.

Requirements	Hours
Collegiate Curriculum	49
Basic Science and College-Level Math, from Major Requirements or Focus Area	6
Major Requirements (includes two 0 s.h. seminars)	52
Focus Area	22

Major Requirements

Major requirements include a set of common courses (40 s.h.), at least 11 s.h. in engineering fundamentals elective courses, a systems elective (3 s.h.), two departmental seminars (0 s.h.), and one capstone design course (4 s.h.).

Common Courses

Course #	Title	Hours
All of these:		
ISE:2360	Design for Manufacturing	3
ISE:2500	Engineering Economy	3
ISE:3300	Manufacturing Systems	3
ISE:3350	Process Engineering	3
ISE:3400	Human Factors	3
ISE:3450	Ergonomics	3
ISE:3500	Information Systems Design	3
ISE:3600	Quality Control	3
ISE:3610	Stochastic Modeling	3
ISE:3660	Data Analytics With R	3
ISE:3700	Operations Research	3
ISE:3750	Digital Systems Simulation	3
PHYS:1612	Introductory Physics II (with lab)	4

Engineering Fundamentals

Students who are required to complete ENGR:2730 Computers in Engineering as part of their focus area must select a different course to fulfill the engineering fundamentals requirement.

Course #	Title	Hours
At least 11 s.h. from these:		
BME:2710	Engineering Drawing, Design, and Solid Modeling	3
CBE:2040	Environment, Energy, and Climate Change	3
ECE:2400	Linear Systems I (P: ENGR:2120 and MATH:2560)	3
ECE:2410	Principles of Electronic Instrumentation (P: ENGR:2120, PHYS:1612, MATH:2560)	4
ENGR:2110	Statics	2
ENGR:2120	Electrical Circuits	3
ENGR:2130	Thermodynamics	3
ENGR:2710	Dynamics	3
ENGR:2720	Materials Science	3
ENGR:2730	Computers in Engineering	3
ENGR:2750	Mechanics of Deformable Bodies	3
ENGR:3110	Introduction to Artificial Intelligence and Machine Learning in Engineering	3

Systems Elective

Students who complete ENGR:2730 Computers in Engineering or ISE:4900 Introduction to Six Sigma as part of their focus area must select a different course to fulfill their systems elective or work with their academic advisor for an appropriate substitution.

Course #	Title	Hours
One of these:		
ISE:4172	Big Data Analytics	3
ISE:4175	Safety Engineering	3
ISE:4900	Introduction to Six Sigma	3
ENGR:2730	Computers in Engineering	3
An industrial and systems engineering course (prefix ISE) numbered 5000 or above		3

Departmental Seminars

Course #	Title	Hours
Both of these:		
ISE:2000	Industrial Engineering Sophomore Seminar	0

ISE:3000	Professional Seminar: Industrial Engineering (taken in the third year)	0

Capstone Design Course

Course #	Title	Hours
This course:		
ISE:4600	Industrial Engineering Design Project	4

Focus Area

Students must select focus area courses according to guidelines established by the Department of Industrial and Systems Engineering. Focus areas include big data analytics [p. 1643], computer and information systems [p. 1643], design and manufacturing [p. 1643], entrepreneurship [p. 1644], human factors and ergonomics [p. 1644], management [p. 1645], and an option to tailor a focus area to an individual student's interests. For more information about focus area options and guidelines for tailored focus areas, see Focus Areas on the Department of Industrial and Systems Engineering website.

Focus areas in the industrial engineering major include content area courses and electives; carefully selected elective courses may contribute to earning a minor and/or certificate.

Big Data Analytics

Students in the big data analytics focus area complete four required courses (12 s.h.), two focus area electives (at least 6 s.h.), and one math or science elective (at least 3 s.h.).

Required Big Data Analytics Courses

Course #	Title	Hours
One of these:		
BAIS:3500	Data Mining	3
ECE:5450/IGPI:5450	Machine Learning	3
All of these:		
ENGR:2730	Computers in Engineering	3
STAT:4540/ BAIS:4540/ DATA:4540/ IGPI:4540	Statistical Learning	3
STAT:4580/ DATA:4580/ IGPI:4580	Data Visualization and Data Technologies	3

Big Data Analytics Electives

Course #	Title	Hours
Two of these:		
ISE:4172	Big Data Analytics	3
CS:2210	Discrete Structures	3
CS:2230	Computer Science II: Data Structures	4
CS:5110/IGPI:5110	Introduction to Informatics	3
ECE:3330/IGPI:3330	Introduction to Software Design	3
STAT:4740/ CS:4740/IGPI:4740/ MATH:4740	Large Data Analysis	3

Math or Science Elective–Big Data Analytics

Course #	Title	Hours
One of these:		
BIOL:1411	Foundations of Biology	4
CHEM:1120	Principles of Chemistry II	4
MATH:3550	Engineering Vector Calculus	3
MATH:3800/ CS:3700	Introduction to Numerical Methods	3
PHYS:2704	Physics IV (with or without lab)	3-4
STAT:3210	Experimental Design and Analysis	3

Computer and Information Systems

Students in the computer and information systems focus area complete five required courses (16 s.h.) and two focus area electives (at least 6 s.h.).

Required Computer and Information Systems Courses

Course #	Title	Hours
All of these:		
CS:2210	Discrete Structures	3
CS:2230	Computer Science II: Data Structures	4
ECE:3330/IGPI:3330	Introduction to Software Design	3
ENGR:2730	Computers in Engineering	3
MATH:3800/ CS:3700	Introduction to Numerical Methods	3

Computer and Information Systems Electives

Students in this focus area who wish to receive the minor in computer science [p. 314] must take CS:3330 Algorithms and CS:3210 Programming Languages and Tools or CS:3980 Topics in Computer Science I.

Course #	Title	Hours
Two of these:		
CS:2630	Computer Organization	4
CS:3210	Programming Languages and Tools	3
CS:3330	Algorithms	3
CS:3820	Programming Language Concepts	3
CS:3980	Topics in Computer Science I	3
CS:4400	Database Systems	3
CS:5800/ECE:5800	Fundamentals of Software Engineering	3

Design and Manufacturing

Students in the design and manufacturing focus area complete two required courses (6 s.h.), three focus area electives (at least 9 s.h.), one math or science elective (at least 3 s.h.), and one advanced engineering elective (at least 3 s.h.).

Required Design and Manufacturing Courses

Course #	Title	Hours
Both of these:		
ARTS:1020	Elements of 3D Design	3
TDSN:2240/ CEE:2240	Drafting and Modeling With AutoCAD and Rhino	3

Design and Manufacturing Electives

Course #	Title	Hours
Three of these:		
ISE:4116/ME:4116	Manufacturing Processes Simulations and Automation	3
ISE:4900	Introduction to Six Sigma	3
ISE:5310	Advanced Computational Design and Manufacturing	3
ISE:5620	Design of Experiments	3
ISE:5650	Mechatronics Engineering for Smart Device Design	3
BME:2500	Biomaterials and Biomechanics	4
BME:2710	Engineering Drawing, Design, and Solid Modeling	3
BME:5101	Biomaterials and Implant Design	3
ME:4112/CEE:4512	Engineering Design Optimization	3
ME:5167/CEE:5137	Composite Materials	3
MTLS:3285	Fabrication and Design: Hand-Made Bicycle	4
MTLS:4910	Mixed Media and Professional Practices	3-4
TDSN:2250	Digital Prototyping	3
TDSN:3200	Product Design	4

Math or Science Elective–Design and Manufacturing

Course #	Title	Hours
One of these:		
BIOL:1411	Foundations of Biology	4
CHEM:1120	Principles of Chemistry II	4
MATH:3550	Engineering Vector Calculus	3
MATH:3800/ CS:3700	Introduction to Numerical Methods	3
PHYS:2704	Physics IV (with or without lab)	3-4

Advanced Engineering Elective–Design and Manufacturing

Students select one course numbered 3000 or above from any department in the College of Engineering (prefix BME, CBE, CEE, ECE, ISE, or ME), excluding department seminars.

Entrepreneurship

Students in the entrepreneurship focus area complete three required courses (9 s.h.), two technological entrepreneurship courses (6 s.h.), one advanced elective (3 s.h.), and one math or science elective (at least 3 s.h.).

Required Entrepreneurship Courses

Course #	Title	Hours
All of these:		
ISE:4900	Introduction to Six Sigma	3
ENTR:2000	Entrepreneurship and Innovation	3
ENTR:3100	Entrepreneurial Finance	3

Technological Entrepreneurship Certificate Courses

Students select two courses that count toward the Certificate in Technological Entrepreneurship [p. 1681] for a total of 6 s.h.

Advanced Elective

Course #	Title	Hours
One of these:		
A course numbered 3000 or above in biomedical engineering (prefix BME), chemical and biochemical engineering (prefix CBE), civil and environmental engineering (prefix CEE), electrical and computer engineering (prefix ECE), industrial and systems engineering (prefix ISE), or mechanical engineering (prefix ME)		3
A course numbered 3000 or above in accounting (prefix ACCT), business analytics and information systems (prefix BAIS), business (prefix BUS), economics (prefix ECON), entrepreneurship (prefix ENTR), finance (prefix FIN), management (prefix MGMT), or marketing (prefix MKTG)		3

Math or Science Elective–Entrepreneurship

Course #	Title	Hours
One of these:		
BIOL:1411	Foundations of Biology	4
CHEM:1120	Principles of Chemistry II	4
MATH:3550	Engineering Vector Calculus	3
MATH:3800/ CS:3700	Introduction to Numerical Methods	3
PHYS:2704	Physics IV (with or without lab)	3-4
STAT:3210	Experimental Design and Analysis	3

Human Factors and Ergonomics

Students in the human factors and ergonomics focus area complete three required courses (10 s.h.), one math or science elective (3 s.h.), one engineering elective (at least 3 s.h.), and two general electives (at least 6 s.h.).

Required Human Factors and Ergonomics Courses

Course #	Title	Hours
All of these:		
PSY:2601	Introduction to Cognitive Psychology	3
PSY:2701	Introduction to Behavioral Neuroscience	4
PSY:2811	Research Methods and Data Analysis in Psychology I	3

Math or Science Elective–Human Factors and Ergonomics

Course #	Title	Hours
One of these:		
ISE:3760/ DATA:3200/ IGPI:3200/ STAT:3200	Applied Linear Regression	3
STAT:3210	Experimental Design and Analysis	3
STAT:4143/ PSQF:4143	Introduction to Statistical Methods	3

Engineering Elective

Course #	Title	Hours
One of these:		
ISE:4175	Safety Engineering	3
ISE:5420	Automated Vehicle Systems	3
ISE:5460	User Experience Design	3
ISE:6220	Cognitive Engineering	3
ISE:6410	Research Methods in Human Factors Engineering	3
ISE:6420	Human/Computer Interaction	3
ISE:6450	Human Factors in Aviation	3
ISE:6480	Unmanned Aircraft Systems	3
BME:2500	Biomaterials and Biomechanics	4
BME:5640	Ergonomics of Occupational Injuries	3

General Electives

Course #	Title	Hours
Two of these:		
PSY:3040	Psychology of Learning	3
PSY:3620	Human Memory	3
PSY:4020	Laboratory in Psychology	4
OEH:4310	Occupational Ergonomics: Principles	3

Management

Students in the management focus area complete five required courses (15 s.h.), one math or science elective (at least 3 s.h.), and one advanced engineering elective (3 s.h.).

Required Management Courses

Course #	Title	Hours
All of these:		
ACCT:2100	Introduction to Financial Accounting	3
ACCT:2200	Managerial Accounting Analytics and Data Visualization	3
MGMT:2000	Introduction to Law	3
MGMT:2100	Introduction to Management	3
MKTG:3000	Introduction to Marketing Strategy	3

Math or Science Elective–Management

Course #	Title	Hours
One of these:		
BIOL:1411	Foundations of Biology	4
CHEM:1120	Principles of Chemistry II	4
MATH:3550	Engineering Vector Calculus	3
MATH:3800/ CS:3700	Introduction to Numerical Methods	3
PHYS:2704	Physics IV (with or without lab)	3-4
STAT:3210	Experimental Design and Analysis	3

Advanced Engineering Elective–Management

Students select one course numbered 3000 or above with at least 3 s.h. from any department in the College of Engineering (prefix BME, CBE, CEE, ECE, ISE, or ME), excluding department seminars.

Tailored

Students work with their advisor to tailor a program that is specific to their individual needs.

Combined Programs

BSE/MS in Industrial Engineering

The College of Engineering offers a combined Bachelor of Science in Engineering/Master of Science program for industrial engineering undergraduate students who intend to earn an MS in industrial engineering.

Undergraduate students at the University of Iowa who have completed more than 80 s.h. and have a grade-point average higher than 3.25 may apply for admission to the Undergraduate to Graduate (U2G) program designed to accelerate the attainment of an MS in industrial engineering degree. Students typically complete their MS within one year of their BSE degree.

Students meet with their academic advisor, complete a plan, and submit an application for the MS program of study to the Graduate College. Graduate Record Examination (GRE) General Test scores are not required for University of Iowa students. Students continue to follow the industrial and systems engineering curriculum as planned with their advisor.

Students may take up to 12 s.h. of graduate coursework in the last year of undergraduate studies to be counted toward both degrees, attend the program's graduate seminar, and optionally work with a faculty member on a master's thesis project while they are still undergraduates.

Interested students should discuss the Undergraduate to Graduate (U2G) program with their advisor during their third year of study. Applications should be submitted to the department before the start of their fourth year.

Career Advancement

Industrial and systems engineers have many opportunities for employment and service in industrial, government, research, and public service organizations. Employment opportunities are among the most varied in the engineering field. Industrial and systems engineers hold positions as advisors to management or may participate directly in

management decisions. Representative job titles include industrial engineer, manufacturing engineer, systems analyst, quality specialist, operations research analyst, internal consultant, human factors specialist, supervisor, and manager. Industrial and systems engineers are employed by manufacturing and energy firms, wind turbine manufacturers, government agencies, and service organizations such as airlines, banks, hospitals, health care groups, and consulting companies.

People are often surprised to learn the impact and breadth of the industrial engineering profession, which is one of the fastest-growing occupations. According to the Bureau of Labor Statistics, employment of industrial engineers is projected to grow 12% over the next 10 years, compared to 3% for all occupations and 7% for all engineers. It is one of the more gender-diverse engineering degrees: 34.1% of industrial engineering bachelor's degrees are awarded to women, compared to 22.1% of all engineering bachelor's degrees, according to the Society of Women Engineers (SWE).

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programs related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduate outcome collection, and the university's online recruiting system, Handshake.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall) [m]		
	Hours	**16**
	Total Hours	**128-129**

a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.

b Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.

c Enrollment in math courses requires completion of a placement exam.

d Enrollment in chemistry courses requires completion of a placement exam.

e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.

f See General Catalog for list of approved course subjects.

g Students complete at least 11 s.h. in engineering fundamentals courses, selected from the following: BME:2710, CBE:2040, ECE:2400, ECE:2410, ENGR:2110, ENGR:2120, ENGR:2130, ENGR:2710, ENGR:2720, ENGR:2730, ENGR:2750, and ENGR:3110. Students who are required to complete ENGR:2730 as part of their focus area must select a different course to fulfill the engineering fundamentals requirement. See General Catalog or consult an advisor for more information.

h Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

i Students select one of several standard focus areas or tailor a focus area to individual interests. Focus areas require at least 21 s.h. and consist of content area courses and electives. Carefully selected elective courses may contribute to earning a minor and/or certificate. See General Catalog or consult an advisor for more information.

j See General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI.

k Students select a course from one of two GE CLAS Core areas: Understanding Cultural Perspectives or Values and Society.

l Students complete one systems elective (3 s.h.), selected from the following: ISE:4172, ISE:4175, ISE:4900, ENGR:2730, or a course with prefix ISE numbered 5000 or above. Students who are required to complete ENGR:2730 or ISE:4900 as part of their focus area must select a different course to fulfill the systems elective requirement. See General Catalog or consult an advisor for more information.

m Please see Academic Calendar, on Office of the Registrar website, for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Degree Services.

Industrial Engineering, MS

The MS in industrial engineering program supports two major paths: one focusing on courses and one on research and a thesis. The first path is intended primarily for students who wish to advance their technical knowledge and move toward a career in industry. The second path is also a good choice for students interested in industry, but it is targeted more toward developing independent research skills and writing, and it also can support future graduate work.

Both paths expect some diversity of technical skills in three major areas: systems, human factors, and analytics. The systems area emphasizes the design, construction, and analysis of complex systems with interdependent parts that include people and machines. The human factors area emphasizes the interaction of people with systems and includes the study and analysis of people's cognitive and physical limitations. The analytics area emphasizes the application of mathematical formulas, including statistical approaches, as well as algorithmic and computational approaches to deriving knowledge from data. Each area is supported by several faculty members and many faculty members support multiple areas; see Facilities [p. 1635] in the Department of Industrial and Systems Engineering section of the catalog to learn more about each research lab and its activities.

Learning Outcomes

Without Thesis

Students will:

- demonstrate a broad knowledge of the field of industrial and systems engineering and deep knowledge in their specific area of study;
- identify and analyze problems of value to industry and society;
- apply contemporary methodologies for solving problems valued by industry and society;
- demonstrate project and team management skills and initiative; and
- demonstrate ethical and professional behavior.

With Thesis

Students will:

- demonstrate a broad knowledge of the field of industrial and systems engineering and deep knowledge in their specific area of study;
- identify and analyze problems of value to industry and society;
- transform knowledge into applications valued by industry and society;
- demonstrate collaborative and communication skills;
- demonstrate project and team management skills; and
- demonstrate ethical and professional behavior.

Requirements

The Master of Science program in industrial engineering requires a minimum of 30 s.h. of graduate credit. Students must maintain a UI cumulative grade-point average higher than 3.25 to earn the degree.

In addition, students must enroll in ENGR:7270 Engineering Ethics, typically in the first fall semester of enrollment. ISE:5000 Graduate Seminar: Industrial Engineering must be taken in the first two consecutive semesters of enrollment and one semester (fall or spring) in subsequent academic years. More information about graduate seminar requirements can be found in the Graduate Student Handbook on the Department of Industrial and Systems Engineering Graduate Program website. Credit in ISE:5000 and ENGR:7270 may not be applied toward the 30 s.h. of required coursework.

Breadth Requirement

All students must successfully complete at least one approved graduate-level course in each of three focus areas—analytics, human factors, and systems. Those with a relevant academic background in these areas may be excused from this requirement by the director of graduate studies.

For more detailed information about program requirements and focus area courses, see the Graduate Student Handbook on the Department of Industrial and Systems Engineering website.

Master of Science Degree Without Thesis

The MS in industrial engineering without thesis requires at least 21 s.h. in Department of Industrial and Systems Engineering courses (prefix ISE), including the 9 s.h. breadth requirement and at least 12 s.h. of graduate-level courses at the 5000 level or above. Courses offered by other College of Engineering departments or courses from other colleges may be selected with the consent of the academic advisor to fulfill some or all of the remaining 9 s.h.

Master of Science With Thesis

Nonthesis students may petition for entry into the MS thesis program or the PhD program by requesting a change of status through the department. Typically, students make this request at the invitation of a faculty member who is ready to serve as a student's research advisor. The request is then reviewed by the Graduate Admissions Committee. The committee forwards approved requests to the department chair, who may authorize a change of status petition from the department to the Graduate College.

Students are encouraged to write their thesis as a publishable journal article and submit the article for publication. The thesis option consists of a minimum of 21 s.h. of coursework, including the 9 s.h. breadth requirement and up to 9 s.h. of research. Students pursuing the thesis option are permitted to enroll in ISE:5999 Research: Industrial Engineering MS Thesis. Up to 9 s.h. in the thesis course may count toward the graduate-level course requirement. In addition, students must submit the Final Examination: Advanced Degree form, complete a Report of Thesis Approval, and submit a copy of their thesis to the Graduate College by following the published guidelines and deadlines.

Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations on the Graduate College website.

Admission to the graduate program is competitive and based on an applicant's previous coursework, research, and industrial experience. The general admission standards are intended to maintain the quality of the graduate program and to ensure the sufficient preparation required for timely degree completion. Specific admission standards may be waived by the Graduate Admissions Committee when other evidence of competence is compelling. These standards are minimum standards, and meeting these standards does not ensure admission to the program; admitted students typically exceed these standards.

Applicants are expected to have a minimum cumulative grade-point average of 3.00 on a 4.00 scale and have earned a BSE in industrial engineering degree or in a related science or engineering discipline. Applicants are not required to submit the results of their Graduate Record Examination (GRE) General Test.

Applicants must arrange to have three letters of recommendation sent to the department online through the University of Iowa Admissions website. The letters should be completed by persons who are well acquainted with the applicant and the ability of the applicant to undertake graduate work in industrial or systems engineering.

While the department considers applications at any time, first consideration is given to students who have their application materials, including their application, transcripts, English language test scores (DET, IELTS, or TOEFL), and the required letters of recommendation, completed by the admission priority deadline as found on the Graduate Admissions website. The director of graduate admissions is responsible for overseeing the graduate recruiting activities and the admissions procedures in the department. The director serves as the point of initial contact between prospective graduate students and the department and maintains a record of each qualified applicant in the departmental office. The director, in consultation with the Graduate Admissions Committee and the department chair, screens applicants and ultimately determines which applicants are extended offers of admission.

Applicants With Degrees Not in Industrial or Systems Engineering

The department encourages students with degrees in other scientific disciplines, such as computer science, mathematics, physics, or other engineering disciplines, to apply for admission. Some students may have already completed MS degrees; however, these students are expected to attain proficiency in specified core areas of industrial and systems engineering equivalent to entering graduate students who hold a BSE degree in industrial engineering. The background of each student admitted to the program with a degree other than in industrial or systems engineering is reviewed by the faculty members. These proficiencies are intended to ensure that each admitted graduate student is able to fully participate in all industrial and systems engineering discipline areas at some level, even while advanced courses in certain areas may not be immediately accessible to all graduate

students. The director of graduate studies specifies in writing any remedial courses required of a student.

Degree Program Selection

Unless otherwise specified, graduate students in the Department of Industrial and Systems Engineering are enrolled in the MS nonthesis program. If a student and faculty member have jointly agreed a student may pursue the MS with thesis option, the student may be admitted into the thesis track.

Career Advancement

Industrial and systems engineers have many opportunities for employment and service in industrial, government, research, and public service organizations such as airlines, banks, hospitals, health care groups, and consulting companies. Employment opportunities are among the most varied in the engineering field. Industrial and systems engineers hold positions as advisors to management or may participate directly in management decisions. Representative job titles include industrial engineer, manufacturing engineer, systems analyst, quality specialist, operations research analyst, internal consultant, human factors specialist, supervisor, and manager.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

	Total Hours	**34**

a Must include at least 12 s.h. of graduate-level courses at the 5000 level or above. All students must also select one graduate-level ISE course from each of three focus areas: analytics, human factors, and systems.

b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

d Students must enroll in ENGR:7270, typically in the first semester of enrollment; does not count towards total semester hours for the degree.

e ISE:5000 must be taken in the first two consecutive semesters of enrollment, and one semester (fall or spring) in subsequent academic years; does not count towards total semester hours for the degree.

f See General Catalog for list of approved courses.

g Work with faculty advisor to determine appropriate graduate elective coursework and sequence.

Industrial Engineering, PhD

The PhD in industrial engineering program is intended for students who wish to prepare themselves for a career creating and cultivating new knowledge. In addition to a broad selection of technical research courses, the program emphasizes original research under the close supervision of a faculty member. Students develop an individualized research project that typically includes the design and analysis of experimental or theoretical work or the invention of new processes, techniques, or devices, which ultimately leads to original publications in the academic literature. The training is appropriate for people seeking a career in academia or in research and development in industry.

The coursework requires some diversity of technical skills in three major areas: systems, human factors, and analytics. The systems area emphasizes the design, construction, and analysis of complex systems with interdependent parts that include people and machines. The human factors area emphasizes the interaction of people with systems and includes the study and analysis of people's cognitive and physical limitations. The analytics area emphasizes the application of mathematical formulas, including statistical approaches, as well as algorithmic and computational approaches to deriving knowledge from data. Each area is supported by several faculty members, and many faculty members support multiple areas; see Facilities [p. 1635] in the Department of Industrial and Systems Engineering section of the catalog to learn more about each research lab and its activities.

Learning Outcomes

Students will:

- demonstrate a broad knowledge of the field of industrial and systems engineering and deep knowledge in their specific area of study;
- identify and solve problems of value to industry and society;
- demonstrate independent thinking and forge new paths to discovery;
- make meaningful and novel contributions to knowledge in a single or multiple domains;
- disseminate research results to the research and application community;
- demonstrate the ability to lead interdisciplinary teams in pursuit of research; and
- demonstrate ethical and professional behavior.

Requirements

The Doctor of Philosophy program in industrial engineering requires a minimum of 72 s.h. of graduate credit. Students must maintain a UI cumulative grade-point average of at least 3.50 to earn the degree. At least 36 s.h. must be taken in Department of Industrial and Systems Engineering courses (prefix ISE), including at least 24 s.h. in graduate-level courses numbered ISE:5000 and above.

Students must enroll in ENGR:7270 Engineering Ethics, typically in the first or second fall semester of enrollment. ISE:5000 Graduate Seminar: Industrial Engineering must be taken in the first two consecutive semesters of enrollment and one semester (fall or spring) in subsequent academic years. More information about Graduate Seminar requirements can be found in the Graduate Student Handbook on the Department of Industrial and Systems Engineering Graduate Program website. Credit in ISE:5000 and ENGR:7270 may be applied toward the 72 s.h. of required coursework.

Students must successfully complete coursework in each of three focus areas: see the section titled "Breadth Requirement." The academic advisor and/or examining committee may decide that a student must complete other requirements such as additional coursework or the acquisition of specific skills. The actual amount of coursework required is determined with the advice and consent of the academic advisor. Students who earned an MS at the University of Iowa may have satisfied this requirement.

Students are typically expected to have completed three academic years of residence at the University of Iowa, or two years if they already hold a recognized Master of Science. For students who earned an MS at the University of Iowa, no more than 36 s.h. from the MS may be counted toward the PhD. For students who earned an MS from another institution, a maximum of 30 s.h. may be transferred toward the doctoral program. The director of graduate studies reviews the transcripts of new students to determine which requirements have been met from previous coursework.

Excellence in research is the principal requirement for the degree. It is expected that the PhD dissertation research project represents an original and significant contribution to the body of knowledge in the field. At least one accepted research article in a peer-reviewed journal as first author with the research advisor as a co-author, in addition to the presentation of the research in a departmental seminar, are requirements. Submission of three first-authored papers and at least one research presentation at a national conference is typical. In addition, students must fulfill the qualifying requirement, pass the comprehensive examination, submit the Final Examination: Advanced Degree form, complete a Report of Thesis Approval, and submit a copy of their thesis to the Graduate College by following the published guidelines and deadlines.

Breadth Requirement

Students must successfully complete at least 6 s.h. in approved courses numbered 5000 or above offered by the Department of Industrial and Systems Engineering in each of the three focus areas—analytics, human factors, and systems. Students with a relevant academic background in these areas may be excused from the breadth requirement with the approval of the director of graduate studies. Approved courses are listed as follows.

Analytics

Course #	Title	Hours

ISE:6350	Computational Intelligence	3
ISE:6810	Advanced Topics on Additive Manufacturing	3

Qualifying Exam

Students interested in pursuing a PhD are initially admitted as MS nonthesis students until they have completed the qualifying examination. This is typically achieved within their first three semesters if beginning the program without an MS, or within the first two semesters if beginning the program with an MS. Once the exam is passed, students are formally admitted to the PhD program. The purpose of this qualifier is to determine a student's proficiency in research and scholarship.

Comprehensive Examination

The general rules for the administration of the PhD comprehensive examination are contained in the policies and procedures of the Graduate College. The tradition in the department is for the comprehensive examination to consist of a written and oral component. Students write and submit a comprehensive examination document, usually called the dissertation research proposal, to each member of the examination committee two weeks before the examination date. During the examination, students make a roughly 30-minute presentation on the content of the research proposal. Committee members may ask questions regarding the proposal before, during, or after the oral presentation. Having satisfactorily completed the comprehensive examination, students are accepted as candidates for the PhD.

Final Examination (Dissertation Defense)

Each student must defend the completed dissertation in the final examination, which is conducted by the examining committee.

En Passant Option

Students admitted to the PhD program may elect to earn their MS through the *en passant* option, with the permission of their PhD committee. This option allows students to write an English-language manuscript as the first author and submit it to a peer-reviewed research journal in lieu of writing the MS thesis. With this option, students, in conjunction with their academic advisor, author a paper that serves as the foundation for the PhD research. The decision to select this option must be made before the qualifying examination. The committee may determine, based on the published or submitted scholarship to peer-reviewed journals, that the presentation of a separate research thesis is not necessary. In this case, up to 9 s.h. in ISE:5999 Research: Industrial Engineering MS Thesis may be counted toward the nonthesis option. Students choosing the *en passant* option generally receive an MS without the thesis designation.

For more detailed information about program requirements, see Graduate Student Handbook on the Department of Industrial and Systems Engineering Graduate Program website.

Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations on the Graduate College website.

Admission to the graduate program is competitive and based on an applicant's previous coursework, research, and industrial experience. The general admission standards are intended to maintain the quality of the graduate program and to ensure the sufficient preparation required for timely degree completion. Specific admission standards may be waived by the Graduate Admissions Committee when other evidence of competence is compelling. These standards are minimum standards, and meeting these standards does not ensure admission to the program; admitted students typically exceed these standards.

Applicants are expected to have a minimum cumulative grade-point average of at least 3.00 on a 4.00 scale and have earned a BSE in industrial engineering degree or in a related science or engineering discipline. Applicants are not required to submit the results of the Graduate Record Examination (GRE) General Test.

Applicants must arrange to have three letters of recommendation sent to the department online through the University of Iowa Admissions website. The letters should be completed by persons who are well acquainted with the applicant and the ability of the applicant to undertake graduate work in industrial or systems engineering.

While the department considers applications at any time, first consideration is given to students who have their application materials, including their application, transcripts, English language test scores (DET, IELTS, or TOEFL), and the required

letters of recommendation, completed by the admission priority deadline as found on the Graduate Admissions website. The director of graduate admissions is responsible for overseeing the graduate recruiting activities and the admissions procedures in the department. The director serves as the point of initial contact between prospective graduate students and the department and maintains a record of each qualified applicant in the departmental office. The director, in consultation with the Graduate Admissions Committee and the department chair, screens applicants and ultimately determines which applicants are extended offers of admission.

Applicants With Degrees Not in Industrial or Systems Engineering

The department encourages students with degrees in other scientific disciplines, such as computer science, mathematics, physics, or other engineering disciplines, to apply for admission. Some students may have already completed MS degrees; however, these students are expected to attain proficiency in specified core areas of industrial and systems engineering equivalent to entering graduate students who hold a BSE degree in industrial engineering. The background of each student admitted to the program with a degree other than in industrial or systems engineering is reviewed by the faculty members. These proficiencies are intended to ensure that each admitted graduate student is able to fully participate in all industrial and systems engineering discipline areas at some level, even while advanced courses in certain areas may not be immediately accessible to all graduate students.

Career Advancement

Industrial and systems engineers have many opportunities for employment and service in industrial, government, research, and public service organizations. Employment opportunities are among the most varied in the engineering field. Industrial and systems engineers are employed by manufacturing and energy firms, government agencies, and service organizations such as airlines, banks, hospitals, health care groups, and consulting companies.

The PhD is a gateway toward careers of learning and creation. Employers typically hire people with doctorates to run laboratories, create research directions, and supervise other engineers at the boundaries of knowledge. PhD-level researchers generally enjoy great freedom and tailored work environments as they explore and learn to help create new visions of tomorrow. A PhD opens up academic, research, and entrepreneurial possibilities limited only by one's drive and creativity. Positions are often found through announcements in trade journals, international conferences, and specialized job-posting services. Students often work with faculty to identify and apply for appropriate positions. It is rare that students do not find an appropriate position before completing their thesis.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Mechanical Engineering

Chair

- Ching-Long Lin

Undergraduate major: mechanical engineering (BSE)

Graduate degrees: MS in mechanical engineering; PhD in mechanical engineering

Faculty: https://engineering.uiowa.edu/me-people

Website: https://engineering.uiowa.edu/me

The Department of Mechanical Engineering offers distinct undergraduate and graduate degrees and research programs in mechanical engineering. It also is the administrative home of the undergraduate Certificate in Naval Science and Technology and the undergraduate and graduate Certificates in Artificial Intelligence, Modeling and Simulation in Engineering.

Mechanical engineering is broadly concerned with the energy, manufacturing, and design of machines. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of a wide variety of devices, machines, and systems—including complex human-machine systems—for energy conversion, biofuel production, environmental control, materials processing, transportation, materials handling, and other purposes. Major subspecialties of mechanical engineering include thermal-fluids engineering and mechanical systems engineering.

Thermal-fluid phenomena occur in many engineering systems and devices such as aircraft; automobiles; off-road vehicles; ships; gas turbines; heat exchangers; material processes; heating, ventilating, air-conditioning, and refrigerating systems; hydraulic and wind turbines; airbag inflators; fuel cells; biofuel processes; environmental control devices; and biomedical systems.

Machines and mechanical systems are the foundations of human technology. Mechanical systems are found in mechanical engineering systems and devices such as manufacturing equipment, medical equipment, ground vehicles, heavy equipment, farm equipment, aircraft, ships, home appliances, packaging machinery, wind turbine blades and gearboxes, robots, and biomedical systems.

Mechanical engineers find a wide variety of career opportunities in industry, government, and education. Mechanical engineers form an integral part of most industries, including aerospace firms, energy companies, automobile manufacturers, health care providers, food- and metal-processing industries, petroleum refineries, electronic and computer manufacturers, heavy construction and agricultural vehicle manufacturers, wind turbine manufacturers, thermal comfort equipment firms, farm equipment firms, and consulting companies.

Certificates

Artificial Intelligence, Modeling and Simulation in Engineering

The Department of Mechanical Engineering offers the undergraduate and graduate certificate programs in Artificial Intelligence, Modeling and Simulation in Engineering; see Artificial Intelligence, Modeling and Simulation in Engineering [p. 1523] in the catalog.

Naval Science and Technology

The Department of Mechanical Engineering offers the undergraduate certificate program in Naval Science and Technology; see the Certificate in Naval Science and Technology [p. 1676] in the catalog.

Related Certificate: Transportation Planning

The graduate Certificate in Transportation Planning focuses on the varied and complex problems of transportation and on interdisciplinary approaches to addressing them. The departments of Civil and Environmental Engineering, Industrial and Systems Engineering, Mechanical Engineering (College of Engineering), and Economics (Tippie College of Business); and the School of Planning and Public Affairs (Graduate College) participate in the program.

The certificate is coordinated by the School of Planning and Public Affairs; see the Certificate in Transportation Planning [p. 1814] in the catalog.

Programs

Undergraduate Program of Study

Major

- Major in Mechanical Engineering (Bachelor of Science in Engineering) [p. 1663]

Graduate Programs of Study

- Master of Science in Mechanical Engineering [p. 1669]
- Doctor of Philosophy in Mechanical Engineering [p. 1672]

Facilities

Undergraduate Instruction

Departmental Instructional Facilities

The Department of Mechanical Engineering maintains six laboratories for undergraduate student learning, which consist of the Advanced Manufacturing Laboratory; the Control, Automation, and Robotics Laboratory; the Engineering Manufacturing Laboratory; the Ralph and Barbara Stephens Experimental Engineering Laboratory; the Laboratory for Machine Intelligence (under development); and two design project laboratories developed to facilitate collaboration on senior design projects and communication with project sponsors.

Advanced Manufacturing Laboratory

The Advanced Manufacturing (AM) Laboratory supports the elective mechanical engineering undergraduate course ME:4116 Manufacturing Processes Simulations and Automation. The laboratory includes a variety of machine tools and instruments for students to practice nontraditional material processes and controls. Facilities and instrumentation include a three-axis CNC laser cutter (Bodor laser), an ultrasonic metal seam welder (Branson), an ultrasonic metal spot welder (Branson), and a 25-programmable logic controller (Divelbiss). The facility uses the latest software technology, such as Abaqus, MATLAB, and EZ Ladder.

Control, Automation, and Robotics Laboratory

The Control, Automation, and Robotics (CAR) Laboratory is located in the Seamans Center for the Engineering Arts and Sciences and is managed by the Department of Mechanical Engineering. It provides students with experience in advanced control, robotics, and autonomous systems. The lab is equipped with one industrial 6-axis robotic arm, two Kuka mobile robots (KMR iiwa and KMP) with collaborative robotic arms, a desktop computer, two Roboception cameras, one co-act and one suction gripper, and four Quanser rotary servo base units. The facility has the latest software technology, such as LabVIEW and KUKA.Sim. The Quanser units are used in the laboratory assignments in ME:3600 Control of Mechanical Engineering Systems, while the robotic systems are used in ME:4140 Modern Robotics and Automation. In fall 2019, two control laboratories were developed based on two Quanser base units. The control laboratories were developed and tested in CAR and set up to accommodate a large class size. Later, two additional base units and three accessory modules were purchased to expand the control laboratories. In addition, the robotics systems are used in ME:4111 Scientific Computing and Machine Learning and ME:4150 Artificial Intelligence in Engineering to assist in the instruction of relevant course materials. The CAR laboratory is also used by students who have permission to work in the lab on honors and research projects.

Design Project Laboratories

The department also maintains two design project laboratories to support student teamwork on capstone design projects: the Design Lab and the MEDP/PEDE room. The Design Lab supports students taking the ME:4086 Mechanical Engineering Design Project and ME:4186 Enhanced Design Experience sequence in the Program for Enhanced Design Experience (PEDE) and Virtual International Project Teams (VIPT), whereas the MEDP/PEDE room is occupied by students completing the single-semester ME:4086 Mechanical Engineering Design Project (MEDP) course, as well as for PEDE and VIPT students. The Design Lab contains four workstations with large monitors for collaborative design and analysis activities, as well as tables and chairs for group discussions. An integrated teleconferencing room is enclosed with glass windows so students can communicate with project sponsors. The teleconferencing room contains a 4K LED smart TV connected to a desktop computer, as well as a video camera, microphone, speaker, and speakerphone for video conferencing and phone calls. The MEDP/PEDE room contains six computer workstations with four large computer monitors and two large TV monitors. There are four additional tables without workstations, two mobile whiteboards, and a sofa and mobile chairs for project design and collaborative activities.

Engineering Manufacturing Laboratory

The Engineering Manufacturing Laboratory is located in the Seamans Center for the Engineering Arts and Sciences. The laboratory provides students with experience in advanced CAD/CAM systems. It is managed by the Department of Mechanical Engineering and the Department of Industrial and Systems Engineering. The lab is equipped with three-axis CNC mills (Haas and Tormach), a CNC router (Techno-CNC), a CNC lathe (Haas), a drill press, a plastic injection molder, thermoforming machine, a band saw, a disc sander, a bench grinder, polishing wheel, hand drill, sandblasting cabinet, a press, and a three-in-one shear/break/roll machine. The facility has the latest software technology, such as Creo Parametric and Rhinoceros 4.0. The machinery is used in laboratory assignments in ME:2300 Manufacturing Processes. The room is extensively used near the end of each semester for the course project. It is also used by students who have permission to work in the lab on their honors and research projects.

Ralph and Barbara Stephens Experimental Engineering Laboratory

The Ralph and Barbara Stephens Experimental Engineering Laboratory supports required mechanical engineering undergraduate courses ME:3351 Engineering Instrumentation and ME:4080 Experimental Engineering.

Laboratory for Machine Intelligence

The Laboratory for Machine Intelligence provides an interactive environment for students to develop knowledge and skills in the design and use of smart and autonomous systems. Data analysis, control, and artificial intelligence concepts are integrated with innovative mechatronic systems through hands-on active learning. The lab is designed to empower students with the skills and theoretical tools needed to design, develop, and optimize intelligent machines capable of engaging in a broad range of tasks and complex environments. Systems to be studied in this lab include legged robots as well as land, air, and marine vehicles, non-locomotor machines, and medical assistive devices.

Collegiate Instructional Facilities

Fluid Mechanics Laboratories

The College of Engineering and IIHR—Hydroscience and Engineering have a long history of excellence in fluid mechanics education dating back to the 1920s, when IIHR developed the fluids laboratory as a hands-on learning environment for fluids-related disciplines within the College of Engineering. The long success of the institute's education program is due in large part to a new curriculum emphasizing scientific principles rather than merely practice in manipulating equipment.

IIHR is now modernized, expanded, and was relocated to the laboratory facilities, which were distributed throughout IIHR research facilities at the south end of the campus to the new Seamans Center Annex, where it occupies a 3,300 square foot laboratory suite. The laboratory suite comprises three distinct but connected laboratory spaces. The Fluids Fundamentals Laboratory houses experiments that directly support formal laboratory instruction in College of Engineering courses. Through the lab-development project, existing experimental facilities were modernized, refurbished, and installed, and additional experiments were developed. The laboratory has a large, reconfigurable open space in which different experiments and furnishings can be set up to support a variety of instructional activities.

The Fluids Workshop is the venue through which students can advance to independent and inquiry-driven, course-related, and extracurricular projects. The lab also supports the activities of College of Engineering student organizations. Advanced measurement instrumentation, computational hardware, and resources for developing experiments are available to students in the lab. Tables around the perimeter of the room contain additional PCs and Linux workstations for numerical computations, data analysis, and visualization.

The Advanced Measurements Laboratory houses major facilities supporting both instructional and inquiry-driven student activities. It contains three facilities that have been upgraded and relocated through this project: the vertical wind

tunnel, the visualization water channel, and a towing tank whose functionality has been expanded to also serve as an open channel flume. The laboratory, which is also designed to facilitate the safe use of laser-based instrumentation, is located behind the two front laboratories and is accessible from both rooms.

The fluids laboratories support formal laboratory activities for several courses taken by students in the biomedical, civil and environmental, and mechanical engineering departments, including ENGR:2510 Fluid Mechanics, CEE:3371 Principles of Hydraulics and Hydrology, CEE:5380 Fluid Flows in Environmental Systems, ME:4125 Biomimetic Fluid Dynamics, and ME:4176 Experimental Naval Hydrodynamics.

Additionally, it has been used as a resource in many other courses, including BME:4920 Biomedical Engineering Senior Design II, ECE:4890 Electrical and Computer Engineering Senior Design 2, ME:4080 Experimental Engineering, ME:4086 Mechanical Engineering Design Project, ME:4098 Individual Investigations: Mechanical Engineering, and ME:4186 Enhanced Design Experience.

Graduate Facilities

Fluid Mechanics

The program in fluid mechanics is conducted in close collaboration with IIHR—Hydroscience and Engineering. The equipment available to graduate students includes several wind tunnels and hydraulic flumes, an environmental flow facility, a towing tank, two special low-temperature flow facilities for the investigation of ice phenomena, hot-wire and laser anemometer systems, particle-image velocimetry systems, and computer-based data acquisition systems. Facilities available in the department include a flow visualization and imaging system with a charge-coupled devices (CCD) camera and a low-speed wind tunnel. IIHR and College of Engineering shops provide the necessary support. In addition to using in-house workstations and computers, the department's faculty members and students make extensive use of supercomputers at national centers.

Mechanical Systems

Computer-based simulation research activities in the mechanical systems area are carried out mainly in the Iowa Technology Institute. It maintains a variety of high-performance computer systems in support of its technology research and development efforts. General computing services are supported by a number of Linux and Windows application servers connected to centralized file servers. Computer-aided design/computer-aided engineering (CAD/CAE), software development, virtual prototyping, and virtual environment development applications are hosted on numerous high-performance workstations. Standard desktop, multimedia, and office productivity applications are hosted on a network of more than 40 workstations.

Thermal Sciences

Facilities for research in the thermal sciences and systems consist of a low-pressure combustion chamber, a high-pressure continuous flow combustion chamber, a high-pressure chamber for atomization study, a test rig for heat transfer to near supercritical fluids, a diffusion flame test rig, an enclosed laminar flame test rig, air atomization spray apparatus, test stands for melting and solidification studies, various optical measurement systems, and two fuel cell test rigs. Laser-based diagnostics (e.g., laser-induced fluorescence, imaging, and laser Doppler anemometry) are available for solidification, turbulent flow, heat transfer, and combustion studies. Flow visualization and imaging by CCD camera are available for the study of complex fluid motion, heat convection, and combustion flows.

Courses

Mechanical Engineering Courses

ME:1000 First-Year Seminar **0-1 s.h.**
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

ME:2020 Mechanical Engineering Program Seminar **0 s.h.**
Introduction to the mechanical engineering profession and curriculum; ethics and professionalism in classroom and workplace; mentorship program and professional societies; visits to laboratories and local companies.

ME:2200 Introduction to Mechanical Engineering Design **2 s.h.**
Solid modeling, assemblies, drawings, and Geometric Dimensioning and Tolerancing (GD&T); basic engineering design process; introduction to engineering standards, product liability, and ethics. Prerequisites: ENGR:1100.

ME:2300 Manufacturing Processes **3 s.h.**
Study of fundamental manufacturing processes used in engineering practice. Topics include machining, casting, forming, joining, additive manufacturing, and more. Emphasis on the relationships between material properties, manufacturing process selection, and product quality. Introduction to process planning, metrology, and basic computer-aided manufacturing (CAM) concepts. Corequisites: ENGR:2720 and (ME:2200 or BME:2710).

ME:3045 Heat Transfer **3 s.h.**
Principles of heat transfer by conduction, convection, radiation; analytical and numerical methods of solution; applications to engineering problems. Prerequisites: MATH:3550 and ENGR:2510 and ENGR:1300.

ME:3052 Mechanical Systems **4 s.h.**
Topics in mechanical behavior and failure of materials; materials selection in design; stress and deflection analysis; static failure theories; fatigue and durability in design; fracture, statistical, and reliability considerations; introduction to finite element analysis using commercial software packages; standards, product liability, engineering ethics. Prerequisites: ENGR:2750. Corequisites: ENGR:2720 and ME:2300 and STAT:2020.

ME:3091 Professional Seminar: Mechanical Engineering **0 s.h.**
Professional aspects of mechanical engineering: presentations, student/faculty interaction, professional society involvement, panel discussions, plant trip. Prerequisites: ME:2020.

ME:3351 Engineering Instrumentation **2 s.h.**
Basic elements of measuring circuits (bridges, voltage dividers, shunts, transformers); laboratory instrumentation (oscilloscopes, multimeters, power supplies, signal generators); amplifiers; frequency response principles; sensors; data acquisition, signal processing, filtering using Labview. Prerequisites: PHYS:1612 and ENGR:2120.

ME:3600 Control of Mechanical Engineering Systems **3 s.h.**
Introduction to fundamental control theory and robot manipulators. Prerequisites: MATH:2560 and ENGR:2710.

ME:4024 Product Design and Realization **3 s.h.**
Design principles and methods to develop 3D part models and assemblies; emphasis on use of mechanical engineering design principles and functional requirements through the complete design process using PTC Creo Parametric; for students with a basic knowledge of computer-aided design (CAD). Prerequisites: ME:2200 or ME:2300. Corequisites: ENGR:2750.

ME:4048 Energy Systems Design **4 s.h.**
Principles and design of energy conversion systems, including solar, wind, and geothermal power systems; design of thermal-fluid system components, modeling and simulation of systems, optimization techniques; design projects. Prerequisites: ME:3045.

ME:4055 Mechanical Systems Design **3 s.h.**
Kinematics of mechanisms, dynamics and vibration of machines, cam and gear, machine elements, computer-aided analysis of machines. Prerequisites: ENGR:2710 and ME:3052.

ME:4080 Experimental Engineering **4 s.h.**
Principles of physical measurements; standards calibration, estimation of error; static and dynamic performance of measuring systems; laboratory experience, experiment planning, report writing. Prerequisites: ME:3351 and ME:3045 and ME:3052.

ME:4086 Mechanical Engineering Design Project **3 s.h.**
Application of mechanical, thermal, fluid systems design; student or team design projects initiated at various levels in the design process and carried through to higher levels; emphasis on synthesis, written and oral communication. Corequisites: ME:4048 or ME:4055.

ME:4098 Individual Investigations: Mechanical Engineering **arr.**
Individual projects for mechanical engineering undergraduate students; laboratory study; engineering design project; analysis, synthesis, simulation of an engineering system; computer software development, research.

ME:4110 Computer-Aided Engineering **3 s.h.**
Computational engineering modeling and simulation, geometric modeling, grid generation, finite-element and finite-volume methods, uncertainty analysis, optimization, engineering applications. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as CEE:4515.

ME:4111 Scientific Computing and Machine Learning **3 s.h.**
Numerical methods in scientific computing; root problems and optimization; linear algebraic equations; eigenvalue problems; numerical differentiation and integration; interpolation and curve-fitting; initial value and boundary value problems; machine learning in regression, classification, and clustering problems; Python programming and packages. Prerequisites: MATH:2560. Same as CEE:4511.

ME:4112 Engineering Design Optimization **3 s.h.**
Engineering design projects involving modeling, formulation, and analysis using optimization concepts and principles; linear and nonlinear models, optimality conditions, numerical methods. Prerequisites: ENGR:2110 and MATH:2550. Requirements: junior standing. Same as CEE:4512.

ME:4116 Manufacturing Processes Simulations and Automation **3 s.h.**
Material processing, metal cutting theories, forming, micro/nano fabrication, programmable logic controller, computer numerical controllers, discrete control system, DC and AC servo motors, Command generation. Prerequisites: ME:2300 or ISE:2360. Same as ISE:4116.

ME:4117 Finite Element Analysis **3 s.h.**
Trusses and frames; Rayleigh-Ritz methods; 2D and 3D elasticity problems; heat transfer, thermo-mechanical coupling; transient problems; use of commercial software for applications in analysis and design of mechanical engineering systems. Prerequisites: ENGR:2750.

ME:4120 Advanced Linear Control Systems **3 s.h.**
Overview of system modelling and classical control design tools and methods, and bridges those with state-space approach for analysis and control of linear systems in the time domain; topics include linearization, root locus, Bode diagrams, Nyquist criteria, robustness margins, lead-lag compensators, observability and controllability, state-space realizations, internal stability and input-output stability, pole-placement, observers and reduced order observers, separation principle, performance limitations, linear quadratic regulator and its guaranteed margins, and optimal estimation. Prerequisites: ME:3600.

ME:4125 Biomimetic Fluid Dynamics **3 s.h.**
Study and development of engineered systems that mimic the structure and function of biological systems; overview of the fluid dynamic principles that govern locomotion by swimming or flapping flight; equations of motion, fundamentals of aerodynamics; analytical models of force generation for swimming and flight; parameters governing effective locomotion; experimental and numerical studies to understand the present state of the art, challenges, and important questions. Prerequisites: ENGR:2510.

ME:4140 Modern Robotics and Automation **3 s.h.**
Introduction to basics of robotics and automation; mechanical design development and manufacturing of smart and automated devices, components, and systems; principles of robotic motion and kinematics; introduction to process automation through system requirement identification, equipment integration, sensors, actuation, and logical control; fundamentals of design, analysis, and manufacturing to meet functionality requirements of products, devices, and systems using the principles of mechatronics to develop smart and automated products. Prerequisites: ENGR:2710.

ME:4145 Industrial Internet of Things (IIoT) **3 s.h.**
Introduction to process automation through system requirement identification, equipment integration, sensors, actuation, and logical control; fundamentals of design, analysis, and manufacturing to meet functionality requirements of products, devices, and systems using principles of mechatronics to develop smart and automated products; integration of advanced networking and monitoring into device control and automaton. Corequisites: ME:3351.

ME:4150 Artificial Intelligence in Engineering **3 s.h.**
Artificial intelligence, computational intelligence, data science and engineering, machine intelligence, digital manufacturing and design, intelligent machining, fault diagnosis, autonomy, robotics; applications in mechanical engineering. Prerequisites: ME:4111.

ME:4153 Fundamentals of Vibrations 3 s.h.
Vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, and arbitrary excitation; modal analysis; applications. Prerequisites: ENGR:2750. Same as CEE:4532.

ME:4160 Engines and Power Plants 3 s.h.
Fundamental principles of thermodynamics applied to areas of particular interest in mechanical engineering; power plants and refrigeration cycles, internal combustion engine cycles, gas mixtures and combustion, mixing processes and pollutant formation, and hybrid power systems. Prerequisites: ENGR:2130.

ME:4175 Computational Naval Hydrodynamics 3 s.h.
Simulations based on relevant vessels and propellers will be used to introduce the use of computational fluid dynamics for the analysis of surface and underwater marine craft performance, while also introducing naval hydrodynamics concepts related to resistance, propulsion, maneuvering, and seakeeping; an educational version of the naval hydrodynamics code REX will be freely distributed and used in the class. Prerequisites: ENGR:2510.

ME:4176 Experimental Naval Hydrodynamics 3 s.h.
Introduction to experimental methods for measurement of propeller thrust performance and resistance of surface vessels and underwater marine craft; present and expand on fundamental concepts related to fluid mechanics, measurement methods, and uncertainty analysis in a context that focuses on naval science and technology challenges; students work with models of relevant vessels and propellers in a dedicated towing tank facility. Prerequisites: ENGR:2510.

ME:4186 Enhanced Design Experience 2-3 s.h.
Experience working in teams on industry-sponsored design and product development projects scheduled for production; emphasis on practical experience with the complete design process, from conceptualization through prototyping, evaluation, testing, and production; written and oral communication. Prerequisites: ME:4086.

ME:4200 Modern Engineering Materials for Mechanical Design 3 s.h.
Overview of design approaches for different engineering materials (i.e., metals, polymers, ceramics); topics include manufacturing processes, smart and advanced functionalities for applications in emerging engineering fields, theoretical models describing mechanical behavior, failure mechanisms, and design criteria; introduction to composite materials; computer lab activities focus on finite element method (FEM) simulations of materials with different mechanical properties. Prerequisites: ME:3052.

ME:4235 Health Monitoring of Structural and Mechanical Systems 3 s.h.
Measurements, structural modeling, structural analysis, stiffness method, trusses and frames, structural testing, modal analysis. Prerequisites: ENGR:2750. Same as BME:4135, CEE:4135.

ME:5113 Mathematical Methods in Engineering 3 s.h.
Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: MATH:2550 and MATH:2560. Same as CBE:5140, CEE:5513.

ME:5114 Nonlinear Control in Robotic Systems 3 s.h.
Nonlinear analysis and control systems theory; focus on Lyapunov-based analysis methods and associated design techniques; introduction to definitions of stability for autonomous and nonautonomous systems leading to a Lyapunov framework, and based on the developed Lyapunov-based analysis tools, basic and advanced design tools for contemporary engineering problems are presented, including state-of-the-art techniques. Prerequisites: ME:3600 or ME:4120 or CBE:4105 or ECE:3600.

ME:5120 Vehicle System Dynamics 3 s.h.
Introduction to principles and basic procedures used in analysis of vehicle system dynamics and design; topics include tire mechanics, longitudinal and cornering tire force characteristics, steady-state and transient vehicle cornering responses, vehicle stability control, ride comfort, suspension design, off-road vehicle mobility, tire-soil interaction, and vehicle performance evaluations. Prerequisites: ENGR:2710.

ME:5143 Computational Fluid and Thermal Engineering 3 s.h.
Governing equations of fluid flow and heat transfer; basic numerical techniques for solution of the governing equations; estimation of accuracy and stability of the approximations; boundary conditions; grid generation; applications to flows and heat transfer in engineering systems; familiarity with software for analysis and design of thermo-fluids systems. Prerequisites: ME:3045.

ME:5145 Intermediate Heat Transfer 3 s.h.
Steady and unsteady conduction; forced and natural convection; surface and gaseous radiation; condensation and evaporation; analytical and numerical methods and applications. Prerequisites: ME:3045.

ME:5146 Modeling of Materials Processing 3 s.h.
Manufacturing processes for metals, polymers, semiconductors; processing by casting, solidification, crystal growth, polymer molding and extrusion, welding, heat treating, application of optical (laser) and electromagnetic energy; processes that use momentum, heat, mass transfer principles; measurement and instrumentation for materials processing; current topics in materials processing. Corequisites: ME:3045.

ME:5149 Propulsion Engineering 3 s.h.
Opportunity to develop basic understanding and knowledge of rocket and airbreathing propulsion systems; relevant terminology and analysis techniques, parameteric cycle analysis for ideal engines, off-design analysis methods, problem-solving methodology. Prerequisites: ENGR:2130. Requirements: graduate standing.

ME:5150 Intermediate Mechanics of Deformable Bodies 3 s.h.
Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: ENGR:2750. Same as CEE:5540.

ME:5154 Intermediate Kinematics and Dynamics 3 s.h.
Kinematic and dynamic analysis of mechanical systems; computational kinematics, Lagrangian dynamics, principle of virtual work in dynamics, constrained dynamics, spatial dynamics. Prerequisites: ENGR:2710.

ME:5159 Fracture Mechanics 3 s.h.
Three-dimensional stress states, definition and criteria for failure, nominal and local yield phenomena, linear elastic and elastic plastic fracture mechanics, plane stress and plane strain fracture toughness, J-Integral, crack opening displacement, environmental assisted cracking, fatigue crack growth, fail safe, and damage tolerant design. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as CEE:5549.

ME:5160 Intermediate Mechanics of Fluids 3 s.h.
Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisites: ENGR:2510. Same as CEE:5369.

ME:5162 Experimental Methods in Fluid Mechanics and Heat Transfer 3 s.h.
Hands-on experience in methodology of conducting experiments in fluid mechanics and heat transfer from design to data acquisition and processing; essential theoretical elements, experimental methodologies, data acquisition systems, uncertainty analysis; wide variety of instruments for fundamental and applied experimentation; work in small groups; design, implement, test, and report an experiment in area of interest. Same as CEE:5372.

ME:5167 Composite Materials 3 s.h.
Mechanical behavior of composite materials and their engineering applications; composite constituents (fibers, particles, matrices) and their properties and behavior; macromechanical behavior of composite laminae; micromechanical predictions of composite overall properties; classical lamination theory; composite beams and plates. Prerequisites: ENGR:2750. Same as CEE:5137.

ME:5170 Data-Driven Analysis in Engineering Mechanics 3 s.h.
Exposure to machine learning approach of problem solving; modular course structure containing four or five modules, each concentrating on a particular class of problem; theories and techniques relevant to a class of problems taught in corresponding module. Prerequisites: ENGR:2750 and ME:4111.

ME:5179 Continuum Mechanics arr.
Mechanics of continuous media; kinematics of deformation, concepts of stress and strain; conservation laws of mass, momentum and energy; constitutive theories; boundary and initial value problems. Prerequisites: ENGR:2750 or ENGR:2510. Same as CEE:5179.

ME:5195 Contemporary Topics in Mechanical Engineering arr.
New topics in fluid and thermal sciences and mechanical systems not covered in other courses; topic and coverage determined by student/faculty interest. Requirements: junior standing.

ME:5210 Intermediate Thermodynamics 3 s.h.
Fundamental principles of thermodynamics as applied to phase equilibrium; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Requirements: CBE:3105 or ME:4160 or graduate standing. Same as CBE:5110.

ME:5300 Uncertainty Quantification and Design Optimization 3 s.h.
Analytical and computational methods for uncertainty quantification for a design optimization of mechanical and structural systems; brief review of probability theory, second-moment analysis, reliability analysis, robust design optimization, and reliability-based design optimization; use of commercially available software suites. Prerequisites: ENGR:2750 and STAT:2020. Corequisites: ME:3052.

ME:6115 Cooperative Autonomous Systems 3 s.h.
How to enable ground, marine, and aerial robotic platforms to perform cooperative tasks autonomously in complex real-world environments; theoretical topics include numerical approximation, optimal control, nonlinear analysis and control, game theory, and graph theory; project-based activities in a laboratory environment; focus on design and implementation of motion planning, tracking, collision avoidance, and cooperative control algorithms for autonomous vehicles. Prerequisites: ME:3600 or ME:4120 or CBE:4105 or ECE:3600.

ME:6120 Mechatronics, Measurement, and Wearable Robotics 3 s.h.
From accelerometers in phones, heart rate monitors in watches, fitness trackers, and smart clothing to robotic surgery and assistive devices, wearable sensors and robotics are increasingly all around us; introduction to different sensors, signals, and processing techniques needed to study movement; practical applications and scientific principles of sensors and actuators; work with real-world data; development of key research skills in literature review and experiment design through theoretical, programming, and hands-on coursework, presentations, and projects. Prerequisites: ME:3351 and ME:3600 and ME:5154.

ME:6130 Novel Artificial Muscles and Sensors for Evolving Robotics 3 s.h.
Overview of novel smart materials-based actuators (i.e., artificial muscles) and sensors used in modern robotics (i.e., soft robotics, bio-inspired robotics, assistive robotics); evolution from conventional actuators/sensors to novel actuators/sensors based on smart, flexible, and compliant materials; working mechanism, theoretical models, manufacturing, and applications for each type of artificial muscle/sensor; lab demonstrations and activities involve manufacturing and testing of some artificial muscles and smart sensors.

ME:6191 Graduate Seminar: Mechanical Engineering 1 s.h.
Presentation and discussion of recent advances and research in mechanical engineering by guest lecturers, faculty, students.

ME:6198 Individual Investigations: Mechanical Engineering arr.
Individual project in mechanical engineering, for department graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

ME:6199 Research: Mechanical Engineering MS Thesis arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for MS with thesis in mechanical engineering.

ME:6214 Analytical Methods in Mechanical Systems 3 s.h.
Vector and function spaces; functionals and operators in Hilbert spaces; calculus of variations and functional analysis with application to mechanics; Ritz and Galerkin methods. Prerequisites: ME:5113. Same as CEE:6310.

ME:6215 Finite Element II 3 s.h.
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as CEE:6532, IGPI:6216.

ME:6216 Laser Materials Processing 3 s.h.
Proficient engineering background involved in laser processing and manufacturing; fundamentals and operation principles for various types of laser systems, laser optics, principles of laser-matter interactions, laser-induced thermal and thermo-mechanical effects; emerging areas of laser applications (e.g., microscale and nanoscale laser processing, ultrafast laser processing) and related energy transport analyses; video demonstrations. Prerequisites: ME:3045 and MATH:3550.

ME:6217 Advanced Modeling and Simulation for Manufacturing 3 s.h.
How materials often behave in a complicated manner involving deeply coupled effects among stress/stain, temperature, and microstructure during a manufacturing process; modeling and prediction of material processes based on a metallo-thermomechanical coupled analysis; focus on heat transfer modeling in material processes, fundamental mechanics aspects required for material processing analysis, and microstructural evolution modeling in material processes. Prerequisites: CEE:4533 and ME:3045.

ME:6240 Probabilistic Inference and Estimation for Mechanical Systems 3 s.h.
Theory and application of common techniques for probabilistic inference and estimation including types of estimators; Bayesian, Kalman, and Particle filtering; various motion and measurement models; and algorithms for simultaneous localization and mapping (SLAM). Prerequisites: ME:4120. Requirements: some level of exposure to probability and statistics, linear algebra, and 3D rigid body dynamics.

ME:6245 Diffusive Transport 3 s.h.
Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies; analytical and numerical solution techniques; inverse heat conduction; multiphase and multicomponent systems. Prerequisites: ME:5145. Same as CBE:6145.

ME:6255 Multiscale Computational Science and Engineering 3 s.h.
Computational science and engineering methods at different spatial and temporal scales; molecular methods, including quantum mechanical calculation, molecular dynamics, and Monte Carlo methods; continuum methods, including finite element, peridynamics, and mesh-free particle methods; hierarchical and concurrent multiscale modeling; reinforcement learning methods and their applications; agent-based modeling; quantum computing and quantum algorithms; and artificial intelligence-assisted modeling and simulations. Prerequisites: ME:4117.

ME:6260 Viscous Flow 3 s.h.
Equations of viscous flow; classical analytical and numerical solutions; flow regimes and approximations; laminar boundary layers—equations, solution methods, applications; stability theory and transition; incompressible turbulent flow—mean-flow and Reynolds-stress equations, modeling, turbulent boundary layers and free shear flows. Requirements: for ME:6260—ME:5160; for CEE:6376—CEE:5369. Same as CEE:6376.

ME:6261 Multibody System Dynamics 3 s.h.
Introduction to principles of analytical and computational dynamics for rigid and flexible multibody systems; spatial kinematics and dynamics of rigid body systems, numerical solution procedures for multibody dynamics analysis, and flexible multibody dynamics. Prerequisites: ME:5154.

ME:6262 Inviscid Flow 3 s.h.
Derivation of governing equations for fluid flow; general theorems for motion of inviscid, incompressible flows; solution techniques for two- and three-dimensional irrotational flows; forces and moments acting on immersed bodies; vortex kinematics and dynamics; steady and unsteady aerodynamic theory. Prerequisites: ME:5160.

ME:6263 Compressible Flow arr.
Compressible flow behavior; 1D unsteady flow and appropriate use of x-t diagrams; 2D flows and use of the method of characteristics; Burgers' Equation and its properties.

ME:6278 Nonlinear Elasticity 3 s.h.
Nonlinear elasticity theory; modern applications in biomechanics; vectors and tensors, constitutive theory of elastic material, some exact solutions of boundary value problems, inverse deformation relations, stability of elastic material, theories of tissue adaptive response. Prerequisites: ME:5150. Requirements: elementary linear elasticity.

ME:6280 Optical Measurement Techniques in Experimental Fluid Dynamics 3 s.h.
Fundamental principles and applications for fluid dynamics; designing and performing measurements like particle image velocimetry (PIV), addressing challenges such as in vivo measurements and turbulent wall-shear stress, and discussing dvanced 3D techniques (e.g., Tomo-PIV, 4D-PTV). Prerequisites: ME:4080 and ME:5160.

ME:6320 Fluid-Structure Interactions 3 s.h.
Foundations of fluid-structure interactions (FSI) with focus on hydro-electric responses of flexible structures in dense fluids; structural dynamics and fluid dynamics are too often characterized as distinct disciples and this dichotomous mindset fails to recognize the important effects that dynamics fluid loads exert upon structural vibrations and vice-versa; students are equipped with knowledge to approach modern FSI problems; foundations of theoretical FSI, experimental methods, and computational approaches. Prerequisites: (ME:5160 or ME:4125) and (ME:4153 or ME:5154).

ME:6725 Microfabrication and Thin Film Materials 3 s.h.
Microfabrication and nanofabrication techniques and thin film materials growth used to create micro-, nano-, and opto-electronic devices that underlie modern technology; introduction to microfabrication techniques, physics, and chemistry; growth and properties of thin film materials upon which fabrication is performed; review of materials science; introduction to vacuum science and technology; survey of micro- and nano-devices; examination of thin film growth and deposition science, plasma etching and sputtering, micro- and nano-patterning and characterization, and film nucleation, growth, structure, and properties. Prerequisites: (PHYS:2704 or ENGR:2130 or CHEM:1120) and (MATH:1560 or MATH:1860) and (PHYS:1612 or PHYS:2703) and CHEM:1110. Recommendations: background in thermal and statistical physics, introductory quantum mechanics, and introductory chemistry. Same as ECE:6725, PHYS:6725.

ME:7248 Combustion Theory 3 s.h.
Laminar flame theory; turbulent combustion; spray combustion; thermal ignition; pollutant formation, oxidation; combustion diagnostics. Prerequisites: ME:5145 and ME:5160.

ME:7250 Advanced Fracture Mechanics 3 s.h.
Fracture of modern engineering materials; linear-elastic fracture; computational methods; functionally graded materials; elastic-plastic fracture; multiscale fracture and fatigue crack initiation. Prerequisites: ME:5113 and (ME:5159 or CEE:4533). Same as CEE:7250.

ME:7256 Computational Solid Mechanics 3 s.h.
Advanced computational methods for nonlinear and dynamic analysis of solids, structures; new space- and time-discretization methods for problems, including highly nonlinearities, large deformation, contact/impact conditions. Prerequisites: ME:5113 and CEE:4533.

ME:7257 Probabilistic Mechanics and Reliability 3 s.h.
Stochastic and reliability analysis of mechanical systems; computational methods for structural reliability; random eigenvalue problem; random field and stochastic finite element methods. Prerequisites: CEE:4533 and ME:5113.

ME:7266 Interfacial Flows and Transport Processes 3 s.h.
Physics of fluid interfaces and numerical techniques to simulate interface dynamics; interfacial flow coupled with thermal-fluid transport, from molecular interactions to continuum approximations; development of computer code segments to track and represent interface-flow interactions. Prerequisites: ME:5145 and ME:5160.

ME:7267 Multiphase Flow and Transport 3 s.h.
Thermodynamic and mechanical aspects of interfacial phenomena and phase transitions; nucleation, phase-change, species transport, particulate flows, liquid-vapor systems, solidification, porous media. Prerequisites: ME:5145 and ME:5160.

ME:7268 Turbulent Flows 3 s.h.
Origin; need for modeling, averages, Reynolds equations, statistical description; experimental methods and analysis; turbulence modeling; free shear layers and boundary layers; complex shearflows; development of computational strategies; recent literature on theory and applications, chaos phenomena. Prerequisites: ME:5160.

ME:7269 Computational Fluid Dynamics and Heat Transfer 3 s.h.
Development of numerical and algebraic approximations for elliptic, parabolic, hyperbolic partial differential equations; finite-volume, spectral, pseudo-spectral, Galerkin techniques; stability of numerical methods; CFL condition; stiff problems; adaptive grid generation and boundary-fitted coordinates; numerical solutions for one- and two-dimensional compressible and incompressible fluid flow and heat transfer problems. Prerequisites: ME:4111 and ME:5160.

ME:7299 Research: Mechanical Engineering PhD Dissertation arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for PhD in mechanical engineering.

Mechanical Engineering, BSE

The major in mechanical engineering lays a foundation in the basic disciplines of mathematics, physics, and chemistry and in the engineering sciences of statics, dynamics, thermodynamics, mechanics of deformable bodies, mechanics of fluids and transfer processes, materials science, and electrical sciences. An understanding of these sciences enables mechanical engineers to design parts of systems and understand whole systems, plan the production and use of energy, plan and operate industrial manufacturing facilities, and design automatic control systems for machines and other mechanical systems.

Mechanical engineering students develop an awareness of social and humanistic issues relating to business, environment, government, history, language, religion, and international relations. They also acquire an appreciation of professional and ethical responsibilities.

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Educational Objectives

Within a few years of graduation, graduates of the mechanical engineering program will:

- have successful careers in engineering and beyond and will have assumed professional roles of increasing responsibility and impact;
- have acquired new knowledge and expertise through professional development opportunities or advanced education; and
- be engaged in workplace, professional, or civic communities.

Graduates from the Department of Mechanical Engineering BSE program will be prepared to contribute effectively as engineers in a diverse and multidisciplinary work environment. They will have the ability to:

- identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
- apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare as well as global, cultural, social, environmental, and economic factors;
- communicate effectively with a range of audiences;
- recognize ethical and professional responsibilities in engineering situations and make informed judgments that consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
- function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
- develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions; and
- acquire and apply new knowledge as needed, using appropriate learning strategies.

Requirements

The Bachelor of Science in Engineering (BSE) with a major in mechanical engineering requires a minimum of 129 s.h. of credit, including two 0 s.h. department seminars. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1529] in the catalog. 6 s.h. of a student's major courses fulfill the basic science or college-level math collegiate requirement. Students completing the major in mechanical engineering also fulfill the collegiate statistics requirement by completing STAT:2020 Probability and Statistics for the Engineering and Physical Sciences.

The BSE with a major in mechanical engineering requires the following coursework.

Requirements	Hours
Collegiate Curriculum	49
Basic Science and College-Level Math, from Major Requirements or Focus Area	6
Major Requirements (includes two 0 s.h. seminars)	53
Focus Area	21

Major Requirements

Major requirements include a set of common courses (56 s.h.), two departmental seminars (0 s.h.), and one capstone design course (3 s.h.).

Course #	Title	Hours
All of these:		
ME:2200	Introduction to Mechanical Engineering Design	2
ME:2300	Manufacturing Processes	3
ME:3045	Heat Transfer	3
ME:3052	Mechanical Systems	4
ME:3351	Engineering Instrumentation	2
ME:3600	Control of Mechanical Engineering Systems	3
ME:4048	Energy Systems Design	4
ME:4055	Mechanical Systems Design	3
ME:4080	Experimental Engineering	4
ENGR:2110	Statics	2
ENGR:2120	Electrical Circuits	3
ENGR:2130	Thermodynamics	3
ENGR:2510	Fluid Mechanics	4
ENGR:2710	Dynamics	3
ENGR:2720	Materials Science	3
ENGR:2750	Mechanics of Deformable Bodies	3
MATH:3550	Engineering Vector Calculus	3
PHYS:1612	Introductory Physics II (with lab)	4

Departmental Seminars

Course #	Title	Hours
Both of these:		
ME:2020	Mechanical Engineering Program Seminar	0
ME:3091	Professional Seminar: Mechanical Engineering	0

Capstone Design Course

Course #	Title	Hours
This course:		
ME:4086	Mechanical Engineering Design Project	3

Focus Area

Students must select focus area courses according to guidelines established by the Department of Mechanical Engineering. The mechanical engineering program offers a variety of focus area options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests. The focus area is a set of 21 s.h. of elective courses taken during the second through fourth years that provide mechanical engineering undergraduate students with a unique opportunity to acquire advanced education in an area of their choice.

Standard focus areas are offered in energy and environment [p. 1664], manufacturing [p. 1664], mechanical engineering design [p. 1665], and robotics and autonomous systems [p. 1666]. For guidelines regarding tailored focus areas, see ME Focus Areas on the Department of Mechanical Engineering website.

Focus areas in mechanical engineering consist of required courses, focus area electives, and additional electives; carefully selected elective courses may contribute to earning a minor and/or certificate.

Energy and Environment

Students in the energy and environment focus area complete one required course (3 s.h.), at least two focus area electives (6 s.h.), and up to four additional electives to total 21 s.h.

Required Energy and Environment Course

Course #	Title	Hours
At least one of these:		
ME:5145	Intermediate Heat Transfer	3
ME:5160/CEE:5369	Intermediate Mechanics of Fluids	3

Energy and Environment Electives

Course #	Title	Hours
At least two of these:		
ME:4111/CEE:4511	Scientific Computing and Machine Learning	3
ME:4160	Engines and Power Plants	3
ME:5145	Intermediate Heat Transfer (if not taken as a required course)	3
ME:5149	Propulsion Engineering	3
ME:5160/CEE:5369	Intermediate Mechanics of Fluids (if not taken as a required course)	3
CEE:4107/CBE:4410	Sustainable Systems	3

Additional Electives, Energy and Environment

The remainder of the 21 s.h. must be fulfilled by electives. In addition to the following courses, students may also select courses not already taken from the lists of required energy and environment courses and approved energy and environment electives. See "Flexible Electives" in this section of the catalog for more information.

Course #	Title	Hours
ME:4024	Product Design and Realization	3
ME:4125	Biomimetic Fluid Dynamics	3
ME:4175	Computational Naval Hydrodynamics	3
ME:4186	Enhanced Design Experience	3
ME:5143	Computational Fluid and Thermal Engineering	3
ME:5210/CBE:5110	Intermediate Thermodynamics	3
CBE:3405	Green Chemical and Energy Technologies	3
CBE:5415/IGPI:5415	Satellite Image Processing and Remote Sensing of Atmosphere	3
CBE:5417/ CEE:5417/IGPI:5417	Physical Meteorology and Atmospheric Radiative Transfer	3
CEE:3371	Principles of Hydraulics and Hydrology	3
CEE:4102	Groundwater	3
CEE:4159/ CBE:4459/IGPI:4159	Air Pollution Control Technology	3
CEE:5380	Fluid Flows in Environmental Systems	3
ECE:5620	Electric Power Systems and Renewable Energy	3
ISE:2500	Engineering Economy	3
May include one of these:		
SEES:1080	Introduction to Environmental Science	3-4
SEES:1290	Energy and the Environment	3

Manufacturing

Students in the manufacturing focus area complete two required courses (6 s.h.), at least two focus area electives (6 s.h.), and up to three additional electives (9 s.h.) to total 21 s.h.

Required Manufacturing Courses

Course #	Title	Hours
This course:		
ME:4111/CEE:4511	Scientific Computing and Machine Learning	3
And at least one of these:		
ME:4116/ISE:4116	Manufacturing Processes Simulations and Automation	3

ME:4140	Modern Robotics and Automation	3
ME:5146	Modeling of Materials Processing	3

Manufacturing Electives

Course #	Title	Hours
At least two of these:		
ME:4024	Product Design and Realization	3
ME:4116/ISE:4116	Manufacturing Processes Simulations and Automation (if not taken as a required course)	3
ME:4140	Modern Robotics and Automation (if not taken as a required course)	3
ME:4145	Industrial Internet of Things (IIoT)	3
ME:4200	Modern Engineering Materials for Mechanical Design	3
ME:5146	Modeling of Materials Processing (if not taken as a required course)	3
ME:5167/CEE:5137	Composite Materials	3
ME:5170	Data-Driven Analysis in Engineering Mechanics	3

Additional Electives, Manufacturing

The remainder of the 21 s.h. must be fulfilled by electives. In addition to the following courses, students may also select courses not already taken from the lists of required manufacturing courses and approved manufacturing electives. See "Flexible Electives" in this section of the catalog for more information.

Course #	Title	Hours
ME:4110/CEE:4515	Computer-Aided Engineering	3
ME:4112/CEE:4512	Engineering Design Optimization	3
ME:4117	Finite Element Analysis	3
ME:4150	Artificial Intelligence in Engineering	3
ME:4153/CEE:4532	Fundamentals of Vibrations	3
ME:4186	Enhanced Design Experience	3
ME:5114	Nonlinear Control in Robotic Systems	3
ME:5143	Computational Fluid and Thermal Engineering	3
ME:5145	Intermediate Heat Transfer	3
ME:5159/CEE:5549	Fracture Mechanics	3
ME:5300	Uncertainty Quantification and Design Optimization	3
BME:5620	Introduction to Applied Biomedical Finite Element Modeling	3
ECE:5550	Internet of Things	3
ISE:3300	Manufacturing Systems	3
ISE:3600/CEE:3142/ STAT:3620	Quality Control	3
ISE:3700	Operations Research	3
ISE:4620	Design of Experiments for Quality Improvement	3
ISE:4900	Introduction to Six Sigma	3

Mechanical Engineering Design

Students in the mechanical engineering design focus area complete two required courses (6 s.h.), at least two focus area electives (6 s.h.), and up to three additional electives (9 s.h.) to total 21 s.h.

Required Design Courses

Course #	Title	Hours
Both of these:		
ME:4111/CEE:4511	Scientific Computing and Machine Learning	3
ME:4186	Enhanced Design Experience	3

Students in the mechanical engineering design focus area are required to apply for a yearlong design experience comprised of ME:4086 Mechanical Engineering Design Project (see "Capstone Design Course") in the fall and ME:4186 Enhanced Design Experience in the spring (see Policy on Participation in PEDE or VIPT Programs). Students who are not accepted or who are unable to take the yearlong set of courses are required to replace ME:4186 with a course from the section titled "Design Electives" or " Additional Electives–Mechanical Engineering Design."

Design Electives

Course #	Title	Hours
At least two of these:		
ME:4024	Product Design and Realization	3
ME:4110/CEE:4515	Computer-Aided Engineering	3
ME:4112/CEE:4512	Engineering Design Optimization	3
ME:4117	Finite Element Analysis	3
ME:5143	Computational Fluid and Thermal Engineering	3
ME:5170	Data-Driven Analysis in Engineering Mechanics	3
ME:5300	Uncertainty Quantification and Design Optimization	3

Additional Electives, Mechanical Engineering Design

The remainder of the 21 s.h. must be fulfilled by electives. In addition to the following courses, students may also select courses not already taken from the list of approved design electives. See "Flexible Electives" in this section of the catalog for more information.

Course #	Title	Hours
ME:4116/ISE:4116	Manufacturing Processes Simulations and Automation	3
ME:4120	Advanced Linear Control Systems	3
ME:4125	Biomimetic Fluid Dynamics	3
ME:4140	Modern Robotics and Automation	3
ME:4145	Industrial Internet of Things (IIoT)	3

ME:4150	Artificial Intelligence in Engineering	3
ME:4153/CEE:4532	Fundamentals of Vibrations	3
ME:4175	Computational Naval Hydrodynamics	3
ME:4200	Modern Engineering Materials for Mechanical Design	3
ME:5114	Nonlinear Control in Robotic Systems	3
ME:5120	Vehicle System Dynamics	3
ME:5145	Intermediate Heat Transfer	3
ME:5149	Propulsion Engineering	3
ME:5150/CEE:5540	Intermediate Mechanics of Deformable Bodies	3
ME:5154	Intermediate Kinematics and Dynamics	3
ME:5159/CEE:5549	Fracture Mechanics	3
ME:5160/CEE:5369	Intermediate Mechanics of Fluids	3
ME:5167/CEE:5137	Composite Materials	3
ME:5179/CEE:5179	Continuum Mechanics	3

Robotics and Autonomous Systems

Students in the robotics and autonomous systems focus area complete two required courses (6 s.h.), at least two focus area electives (6 s.h.), and up to three additional electives (9 s.h.) to total 21 s.h.

Required Robotics and Autonomous Systems Courses

Course #	Title	Hours
Both of these:		
ME:4111/CEE:4511	Scientific Computing and Machine Learning	3
ME:4120	Advanced Linear Control Systems	3

Robotics and Autonomous Systems Electives

Course #	Title	Hours
At least two of these:		
ME:4116/ISE:4116	Manufacturing Processes Simulations and Automation	3
ME:4140	Modern Robotics and Automation	3
ME:4145	Industrial Internet of Things (IIoT)	3
ME:4150	Artificial Intelligence in Engineering	3
ME:4175	Computational Naval Hydrodynamics	3
ME:4176	Experimental Naval Hydrodynamics	3
ME:5114	Nonlinear Control in Robotic Systems	3
ME:5120	Vehicle System Dynamics	3
ME:5170	Data-Driven Analysis in Engineering Mechanics	3
ME:6115	Cooperative Autonomous Systems	3

Additional Electives, Robotics and Autonomous Systems

The remainder of the 21 s.h. must be fulfilled by electives. In addition to the following courses, students may also select courses not already taken from the list of approved robotics and autonomous systems electives. See "Flexible Electives" in this section of the catalog for more information.

Course #	Title	Hours
ME:4024	Product Design and Realization	3
ME:4110/CEE:4515	Computer-Aided Engineering	3
ME:4125	Biomimetic Fluid Dynamics	3
ME:4153/CEE:4532	Fundamentals of Vibrations	3
ME:4186	Enhanced Design Experience	3
ME:5150/CEE:5540	Intermediate Mechanics of Deformable Bodies	3
ME:5154	Intermediate Kinematics and Dynamics	3
ME:5300	Uncertainty Quantification and Design Optimization	3
ECE:5550	Internet of Things	3
ENGR:2730	Computers in Engineering	3

Flexible Electives

Students in all mechanical engineering focus areas may apply up to 3 s.h. of flexible elective courses to the additional elective requirement. Flexible elective courses include the following.

- A College of Engineering course that is required for another BSE major, excluding department seminars.
- A mechanical engineering course (prefix ME) numbered 4100 or above.
- A chemistry course (prefix CHEM) numbered above 1110, a mathematics course (prefix MATH) numbered above 3350, or a physics course (prefix PHYS) numbered above 1612. Students who have completed ME:4111 Scientific Computing and Machine Learning cannot use MATH:3800 Introduction to Numerical Methods as a flexible elective.
- An independent study (ME:4098) in a mechanical engineering subject area.

Combined Programs

BSE/MS in Mechanical Engineering

A Bachelor of Science/Master of Science combined degree program is available for qualified University of Iowa undergraduate students. This allows students to complete an MS in two or three semesters after completion of their BSE degree. Those in the combined degree program receive a BSE when all requirements have been completed, and then become MS students in the Department of Mechanical Engineering (ME).

The Undergraduate to Graduate (U2G) combined degree program is primarily intended for students interested in pursuing the MS without thesis. However, the MS thesis option can be pursued in instances where students have been conducting research under the supervision of an ME faculty member since at least the summer following their junior year,

and an ME faculty member is willing to advise them and serve as committee chair for their final exam.

Interested students should discuss the combined degree program with their advisor during their third year. Applications should be submitted during the second semester of their third year and before the start of their fourth year (two-semester blended model); see the U2G Program on the Department of Mechanical Engineering website. However, single-semester admits are allowed and must adhere to the application deadlines and other program requirements.

Accepted students are expected to have a minimum University of Iowa cumulative grade-point average (GPA) of at least 3.25 and maintain this GPA throughout their time in the program. Undergraduate students whose UI cumulative GPA falls below this minimum are removed from the combined program.

Students may contact any ME faculty member to inquire about participation in the U2G combined degree program, research opportunities, and financial support.

Program Benefits

Students may apply up to 12 s.h. of graduate-level coursework toward both their BSE and MS degrees. However, credit may not be applied to courses taken prior to admission to the combined degree program. Mechanical engineering courses eligible for graduate credit have a prefix of ME and be numbered 4100 or above, except for ME:4186 Enhanced Design Experience. The courses selected must fulfill MS coursework requirements and apply to BSE electives.

Students who select the thesis option can begin work on their MS thesis research with a faculty advisor during their fourth year of undergraduate studies.

Graduate Record Examination (GRE) General Test scores are not required for admission to the combined degree program. Students are assessed undergraduate tuition and fees until their BSE has been conferred; then, students are assessed graduate tuition and fees, and they may be eligible for graduate assistantships.

BSE/MS in Civil and Environmental Engineering

The combined BSE in mechanical engineering/MS in civil and environmental engineering enables undergraduate students majoring in mechanical engineering to begin work toward the MS in civil and environmental engineering while completing the bachelor's degree. Students admitted to the program may count 9 s.h. of coursework toward both the BSE and MS degree requirements. They may also count an additional 3 s.h. toward the MS degree requirements before they have been awarded the BSE. See the MS in civil and environmental engineering [p. 1599] in the catalog.

Career Advancement

Engineering is a well-respected profession that is used as a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors consistently claim several of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). On average, 93–98% of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduate outcome collection, and the university's online recruiting system, Handshake.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall) [l]		
	Hours	**16**
	Total Hours	**129-131**

a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.

b Enrollment in chemistry courses requires completion of a placement exam.

c Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.

d Enrollment in math courses requires completion of a placement exam.

e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.

f See General Catalog for list of approved course subjects.

g ENGR:2120 is typically taught fall, spring, and summer. ME:2200 is typically taught in the fall and spring. Check MyUI for course availability since offerings are subject to change.

h Students select one of the preapproved standard focus areas or create a tailored focus area. Focus areas require at least 21 s.h. of coursework and consist of required course and electives. See General Catalog or consult an advisor for more information.

i See General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI.

j Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

k Students select a course from one of two GE CLAS Core areas: Understanding Cultural Perspectives or Values and Society.

l Please see Academic Calendar, on Office of the Registrar website, for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Degree Services.

Mechanical Engineering, MS

The mechanical engineering graduate program in the College of Engineering emphasizes in-depth learning and research. In collaboration with faculty across campus, the mechanical engineering faculty currently research a diverse range of topics within the field. For more information, see the Department of Mechanical Engineering website.

Design and Uncertainty Quantification

The Design and Uncertainty Quantification focus area is concerned with the design optimization of complex mechanical systems in the presence of uncertainty. The focus area emphasizes the development of sound theoretical foundations, novel computational methods and algorithms, and modern software tools aimed at creating state-of-the-art engineering designs of automotive, aerospace, naval, nuclear, and biomedical systems. Current areas of excellence include artificial muscles and smart materials design, ship hydrodynamics, design sensitivity analysis, uncertainty quantification, and reliability-based design optimization.

Fluid Dynamics

The Fluid Dynamics focus area covers a wide variety of topics with the flow of liquids and gases as the common denominator. The graduate program in fluid dynamics emphasizes fundamental principles and applications, and the numerical and experimental techniques used to obtain and analyze fluid flows. Areas of concentration include computational fluid dynamics, experimental fluid dynamics, medical flows, naval hydrodynamics, biologically inspired air and underwater vehicles, multiphase flows, cavitation and ventilation, and fluid-structure interaction and turbulence, among others.

Heat Transfer and Combustion

The Heat Transfer and Combustion focus area applies to real-world systems in manufacturing and materials processing, propulsion, energy production, and other areas. The graduate program emphasizes the fundamental principles and techniques required for experimental and theoretical research. Current areas of research include solidification of materials, metal casting, 3D printing, laser-materials interaction, power plants and propulsion devices such as automobile and aircraft engines, energy conservation and production, energy storage, complex reactive materials, and machine learning in computational modeling and simulation.

Manufacturing and Materials

The Manufacturing and Materials focus area involves fundamental materials processing science, technological advancement in manufacturing applications, and the development of new manufacturing processes and new material functions. Current and emerging thrust areas include solidification, metal casting, laser materials processing, micro- and nanofabrication, joining, ultrasonic welding, machining, microstructure evolution, manufacturing process modeling and simulation, artificial muscles, artificial camouflage, smart materials, and material characterizations. These research activities are well supported by federal and state agencies and the manufacturing industry.

Robotics, Controls, and Autonomous Systems

Robotics, Controls, and Autonomous Systems (RCAS) are concerned with the modeling, analysis, design, and control of dynamic systems. The graduate program in RCAS emphasizes the fundamental principles and techniques of robotics, control theory, and artificial intelligence. Areas of concentration include computational intelligence, dynamic autonomous systems, cyber-physical systems, and networked robotic systems with potential applications in self-driving cars; medical and assistive robots for surgery and rehabilitation; industrial co-robots for human-robot collaboration; and uncrewed aerial, ground, and underwater vehicles.

Solid Mechanics and Multibody Dynamics

Solid Mechanics and Multibody Dynamics are concerned with the behavior of solid materials and flexible bodies, especially their deformation, motion, and stress responses under the action of applied loads. The graduate program in solid mechanics and multibody dynamics emphasizes the theoretical foundations and problem-solving techniques for engineering applications. Current research focuses of the faculty include multiscale mechanics of materials, biomechanics, vehicle dynamics, computational mechanics, multibody dynamics, and optimization.

Learning Outcomes

Graduates will:

- have a broad knowledge of mechanical engineering topics and advanced knowledge in their specific area of study;
- be able to analyze engineering problems and apply their knowledge to solve them, and thesis option graduates able to solve research-oriented problems; and
- develop professional skills that include effective communication, leadership, and ethical conduct in professional, social, and scholarly activities.

Requirements

The Master of Science program in mechanical engineering requires a minimum of 30 s.h. of coursework and research, including a minimum of 12 s.h. in mechanical engineering courses (prefix ME) numbered 5000 or above. Students must maintain a UI cumulative grade-point average of at least 3.00 in graduate work used to satisfy their requirements to earn the degree. The course plan should be approved by their advisor prior to registration each semester. All students choose either a thesis or nonthesis program.

The requirements for the MS may be completed within one calendar year. However, students with assistantship duties or other constraints may take up to two calendar years to complete their degree. Students must complete ENGR:7270 Engineering Ethics during their first fall semester in the program. They must register for ME:6191 Graduate Seminar: Mechanical Engineering each fall and spring semester until the successful completion of their final examination or thesis defense; credit in these courses does not substitute for regular coursework or research credit hours. For students who select the thesis option, normally 6 s.h., and no more than 9 s.h. of credit for thesis research is counted toward degree

requirements in ME:6199 Research: Mechanical Engineering MS Thesis.

Thesis students must be successful in their final examination. The exam is administered by a student's committee, which consists of at least three faculty members, including at least one with a primary appointment in the Department of Mechanical Engineering. The nonthesis option does not include a final exam.

Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations on the Graduate College website.

Applicants who have earned a baccalaureate or master's degree in engineering curriculum or in the mathematical or physical sciences are eligible to be considered for admission to graduate study in mechanical engineering. To be considered for regular admission, applicants must have a grade-point average (GPA) of at least 3.00 on a 4.00 scale in all previous college-level work.

Application Deadlines

Applications for fall: Jan. 15 (application deadline), March 1 (admission decision).

Applications for spring: Sept. 1 (application deadline), Oct. 1 (admission decision).

All requirements must be fulfilled by the respective deadlines. Applicants who apply after the deadline must be sponsored by a mechanical engineering faculty member for a deadline waiver.

Career Advancement

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

ME:6191	Graduate Seminar: Mechanical Engineering [c, g]	1
Final Exam [h]		
	Hours	**4**
	Total Hours	**35**

a Students may design their program around a particular research and study area; see General Catalog and ME website for specifics. Work with faculty advisor to determine appropriate graduate level coursework and sequence.

b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

c Credit for this course does not substitute for regular coursework or research credit hours.

d Must be completed during first semester.

e Minimum of 12 s.h. must be from Mechanical Engineering courses numbered 5000 or higher. Students may also select Mechanical Engineering courses numbered 4100 or higher except for ME:4186 which is not eligible for graduate credit.

f Work with academic advisor to determine appropriate elective coursework and sequence.

g Attendance required every fall and spring semester until degree completion.

h Completion of degree requirements.

Mechanical Engineering, PhD

The mechanical engineering graduate program in the College of Engineering emphasizes in-depth learning and research. In collaboration with faculty across campus, the mechanical engineering faculty currently research a diverse range of topics within the field. For more information, see the Department of Mechanical Engineering website.

Design and Uncertainty Quantification

The Design and Uncertainty Quantification focus area is concerned with the design optimization of complex mechanical systems in the presence of uncertainty. The focus area emphasizes the development of sound theoretical foundations, novel computational methods and algorithms, and modern software tools aimed at creating state-of-the-art engineering designs of automotive, aerospace, naval, nuclear, and biomedical systems. Current areas of excellence include artificial muscles and smart materials design, ship hydrodynamics, design sensitivity analysis, uncertainty quantification, and reliability-based design optimization.

Fluid Dynamics

The Fluid Dynamics focus area covers a wide variety of topics with the flow of liquids and gases as the common denominator. The graduate program in fluid dynamics emphasizes fundamental principles and applications and the numerical and experimental techniques used to obtain and analyze fluid flows. Areas of concentration include computational fluid dynamics, experimental fluid dynamics, medical flows, naval hydrodynamics, biologically inspired air and underwater vehicles, multiphase flows, cavitation and ventilation, and fluid-structure interaction and turbulence, among others.

Heat Transfer and Combustion

The Heat Transfer and Combustion focus area applies to real-world systems in manufacturing and materials processing, propulsion, energy production, and other areas. The graduate program emphasizes the fundamental principles and techniques required for experimental and theoretical research. Current areas of research include the solidification of materials, metal casting, 3D printing, laser-materials interaction, power plants and propulsion devices such as automobile and aircraft engines, energy conservation and production, energy storage, complex reactive materials, and machine learning in computational modeling and simulation.

Manufacturing and Materials

The Manufacturing and Materials focus area involves fundamental materials processing science, technological advancement in manufacturing applications, and the development of new manufacturing processes and new material functions. Current and emerging thrust areas include solidification, metal casting, laser materials processing, micro- and nanofabrication, joining, ultrasonic welding, machining, microstructure evolution, manufacturing process modeling and simulation, artificial muscles, artificial camouflage, smart materials, and material characterizations. These research activities are well supported by federal and state agencies and the manufacturing industry.

Robotics, Controls, and Autonomous Systems

Robotics, Controls, and Autonomous Systems (RCAS) are concerned with the modeling, analysis, design, and control of dynamic systems. The graduate program in RCAS emphasizes the fundamental principles and techniques of robotics, control theory, and artificial intelligence. Areas of concentration include computational intelligence, dynamic autonomous systems, cyber-physical systems, and networked robotic systems with potential applications in self-driving cars; medical and assistive robots for surgery and rehabilitation; industrial co-robots for human-robot collaboration; and uncrewed aerial, ground, and underwater vehicles.

Solid Mechanics and Multibody Dynamics

Solid Mechanics and Multibody Dynamics are concerned with the behavior of solid materials and flexible bodies, especially their deformation, motion, and stress responses under the action of applied loads. The graduate program in solid mechanics and multibody dynamics emphasizes the theoretical foundations and problem-solving techniques for engineering applications. Current research focuses of the faculty include multiscale mechanics of materials, biomechanics, vehicle dynamics, computational mechanics, multibody dynamics, and optimization.

Learning Outcomes

Graduates will:

- have extensive knowledge of mechanical engineering topics and mastery of advanced concepts in their specific area of study;
- be able to identify, formulate, analyze, and solve research problems, thereby advancing knowledge through creative scholarship; and
- develop professional skills that include effective communication, leadership, and ethical conduct in professional, social, and scholarly activities.

Requirements

The Doctor of Philosophy program in mechanical engineering requires 72 s.h. of graduate credit, including a minimum of 42 s.h. in mechanical engineering courses (prefix ME) with at least 12 s.h. selected from courses numbered 6000 or above. Students also must complete a minimum of 12 s.h. in thesis research in ME:7299 Research: Mechanical Engineering PhD Dissertation. A maximum of 30 credits of transfer credit may be applied toward the degree and coursework requirements. Students must maintain a UI cumulative grade-point average higher than 3.25 to earn the degree.

To be formally admitted to the PhD program, students must pass the qualifying examination. Information regarding the details of the qualifying exam procedure can be obtained from the Department of Mechanical Engineering website.

Students must complete ENGR:7270 Engineering Ethics during their first fall semester of enrollment. They must register for ME:6191 Graduate Seminar: Mechanical Engineering each fall and spring semester until the successful completion of their final examination or thesis defense; credit in these courses

does not substitute for regular coursework or research credit hours. They must have their course plan approved by their advisor prior to registration each semester.

Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations on the Graduate College website.

Students must have earned a minimum GPA of at least 3.00 on a 4.00 scale, submit three letters of recommendation, unofficial transcripts (with official transcripts submitted if accepted), and a statement of purpose.

Applying for Admission

Applications for fall: Jan. 15 (application deadline), March 1 (admission decision).

Applications for spring: Sept. 1 (application deadline), Oct. 1 (admission decision).

All requirements must be fulfilled by the respective deadlines. Applicants who apply after the deadline must be sponsored by a mechanical engineering faculty member for a deadline waiver.

Career Advancement

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students may design their program around a particular research and study area; see General Catalog and ME website for specifics. Work with faculty advisor to determine appropriate graduate level coursework and sequence.

b A minimum of 42 s.h. (not including thesis research) must be from courses taken beyond the BS degree. Of these a minimum of 12 s.h. must be from Mechanical Engineering courses numbered 6000 or higher. Students may also select Mechanical Engineering courses numbered 4100 or higher except for ME:4186 which is not eligible for graduate credit.

c Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

d Complete two qualifying exam courses during first two semesters in the program; must take ME:5113 plus one graduate level course in a focus area with a grade of A-minus or higher in each. Focus area courses are chosen in consultation with the faculty advisor from a specified list. More information is found in the General Catalog and on department website.

e Credit for this course does not substitute for regular coursework or research credit hours.

f Must be completed during first semester.

g Attendance required every fall and spring semester until degree completion.

h Work with academic advisor to determine elective graduate coursework and sequence.

i Submit dissertation prospectus to the exam committee not later than two weeks before the comprehensive exam.

j Oral exam to be completed after passing the qualifying exam and upon completion of coursework in the specified area of study no later than 28 months after entering the doctoral program. The exam will focus on the dissertation prospectus and related areas.

k Complete a minimum 12 s.h. of credit in thesis research.

l Dissertation defense.

Naval Science and Technology

Chair, Department of Mechanical Engineering

- Ching-Long Lin

Undergraduate certificate: naval science and technology

Website: https://engineering.uiowa.edu/mechanical-engineering-undergraduate-program/me-certificates/naval-science-and-technology

Naval science and technology has a tremendous impact upon defense, world commerce, and energy production. The U.S. Navy is expanding its fleet to the largest size in nearly 20 years. Approximately 90% of world trade is carried by sea. The number of offshore solar, wind, and wave energy installations continues to increase.

The underlying science and technology challenges demand a workforce with a strong foundation in the engineering sciences related to fluid flow, computational and experimental methods, autonomous systems, and control. The Certificate in Naval Science and Technology introduces students to the principles of naval hydrodynamics, including propulsion, resistance, maneuvering, and seakeeping, as well as the fundamentals of autonomous systems, including control systems, robotics, and artificial intelligence.

Students who complete the certificate will work in a unique learning community where they will have an opportunity to contribute to projects of interest to the Navy and its supporting industry, and learn about potential career paths.

The Certificate in Naval Science and Technology is administered by the Department of Mechanical Engineering [p. 1655].

Learning Objectives

The Certificate in Naval Science and Technology is built on eight learning objectives. The first six learning objectives are focused on providing students with strong technical and leadership skills and an understanding of marine systems, enabling them to work effectively in naval science and technology and other technology-intensive fields. Specifically, students will achieve the following.

- Demonstrate a foundation in the fundamentals of fluid mechanics and naval hydrodynamics.
- Use advanced numerical methods and/or measurement techniques to solve fluid-flow problems and design systems involving naval hydrodynamics.
- Demonstrate a foundation in the fundamentals of control theory and artificial intelligence, including optimal control, tracking, planning, machine learning, and reinforcement learning.
- Use simulators and experiments to evaluate, simulate, and design autonomous naval systems.
- Develop potential for continued growth and leadership in a complex and multidisciplinary technical environment.
- Demonstrate the organization and communication skills needed to manage open-ended projects.

The final two learning objectives focus on understanding the challenges faced by the Navy and helping students to identify related career paths.

- Recognize and address current science and technology challenges faced by the Navy.
- Be able to make decisions about career paths in the Navy, its contractors, and supporting industry.

Programs

Undergraduate Program of Study

Certificate

- Certificate in Naval Science and Technology [p. 1676]

Naval Science and Technology, Certificate

Requirements

The undergraduate Certificate in Naval Science and Technology requires 18 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in work for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

All of the certificate courses have prerequisites; students must complete all of a course's prerequisites before they may register for the course. Prerequisites do not count toward the 18 s.h. required for the certificate.

Mechanical engineering students may use the certificate as a tailored engineering focus area by adding an eligible course. In addition, mechanical engineering students may earn the Certificate in Naval Science and Technology while they complete either the design or the robotics and autonomous systems focus area for their major. For examples of combined plans of study, visit Naval Science and Technology Certificate on the Department of Mechanical Engineering website. College of Engineering students earning the certificate are advised by the Department of Mechanical Engineering.

The Certificate in Naval Science and Technology requires the following coursework.

Naval Hydrodynamics Courses

In certain circumstances, if it is not possible for students to complete two of these courses, they may request permission to take ME:5143 Computational Fluid and Thermal Engineering instead of ME:4175 Computational Naval Hydrodynamics.

Course #	Title	Hours
At least two of these:		
ME:4125	Biomimetic Fluid Dynamics	3
ME:4175	Computational Naval Hydrodynamics	3
ME:4176	Experimental Naval Hydrodynamics	3

Autonomous Systems and Machine Learning Courses

Course #	Title	Hours
At least two of these:		
ME:4111/CEE:4511	Scientific Computing and Machine Learning	3
ME:5114	Nonlinear Control in Robotic Systems	3
ME:6115	Cooperative Autonomous Systems	3

Capstone Course

Students must complete either a capstone design project on an approved naval science and technology topic or an independent investigation involving research or testing of a system related to naval hydrodynamics. If a student chooses, both courses may be completed for credit toward the certificate.

Course #	Title	Hours
One or both of these:		
ME:4098	Individual Investigations: Mechanical Engineering (students must register for at least 3 s.h.)	arr.
ME:4186	Enhanced Design Experience (subject to approval of application for capstone design path; ME:4086 is a prerequisite course)	3

Electives

Students select the remainder of the 18 s.h. required for the certificate from the following.

Course #	Title	Hours
ME:4116/ISE:4116	Manufacturing Processes Simulations and Automation	3
ME:4120	Advanced Linear Control Systems	3
ME:4140	Modern Robotics and Automation	3
ME:4150	Artificial Intelligence in Engineering	3
ME:4200	Modern Engineering Materials for Mechanical Design	3
ME:5143	Computational Fluid and Thermal Engineering	3
ME:5160/CEE:5369	Intermediate Mechanics of Fluids	3

Sustainable Water Development

Chair, Department of Civil and Environmental Engineering

- A. Allen Bradley Jr.

Graduate certificate: sustainable water development

Website: https://engineering.uiowa.edu/cee

The Certificate in Sustainable Water Development trains science, technology, engineering, and mathematics (STEM) graduate students to address future challenges of water scarcity and variability while also meeting the food and energy demands of Earth's growing population. The certificate leverages a unique learning environment focused on water sustainability that extends beyond any one discipline, department, or college.

The Certificate in Sustainable Water Development is administered by the Department of Civil and Environmental Engineering [p. 1576].

Programs

Graduate Program of Study

- Certificate in Sustainable Water Development [p. 1678]

Sustainable Water Development, Graduate Certificate

Requirements

The graduate Certificate in Sustainable Water Development requires 15 s.h. of credit, including at least 9 s.h. earned at the University of Iowa. The courses numbered 5000 and above required for the certificate must be taken at the University of Iowa. Students must maintain a Graduate College major program grade-point average of at least 2.50. The certificate is open to graduate students currently enrolled at the University of Iowa who are completing a degree program.

The Certificate in Sustainable Water Development requires the following coursework.

Required Courses

Course #	Title	Hours
All of these:		
CEE:5096	Water, Energy, and Food Nexus Seminar (taken for two semesters)	0
CEE:5350	Watershed Hydrology and Ecosystem Processes	3
CEE:5410	Politics and Economics of the Food, Energy, Water Nexus	3
URP:6209/ SDG:6000	Sustainable Communities Lab I	3

Electives

Students take two elective courses selected from the following list. For more information about approved certificate electives, contact the Sustainable Water Development Program coordinator.

Course #	Title	Hours
At least two of these for at least 6 s.h.:		
CEE:4102	Groundwater	3
CEE:4104/ SEES:4660	Groundwater Modeling	3
CEE:4107/CBE:4410	Sustainable Systems	3
CEE:4118	Statistical Methods in Water and the Environment	3
CEE:4158/ OEH:4920	Solid and Hazardous Wastes	3
CEE:4370	Open Channel Flow and Sediment Transport	3
CEE:4385	Water Scarcity in Rural India	3
CEE:5156	Physical and Chemical Environmental Processes	3
CEE:6253	Environmental Organic Chemistry	3
CEE:6255	Environmental Biotechnology and Bioremediation	3
ABRD:3445	India Winterim	arr.
ACCT:4300	Accounting Ethics and Law	3
ANTH:3110/ CBH:4200/ GHS:3110/ NAIS:3110	Colonialism and Indigenous Health Equity	3
BIOL:3663	Plant Response to the Environment	3
CBE:5140/ CEE:5513/ME:5113	Mathematical Methods in Engineering	3
CBE:5415/IGPI:5415	Satellite Image Processing and Remote Sensing of Atmosphere	3
CBE:5425/CEE:5115	Atmospheric Chemistry and Physics	3
CBH:5305	Evaluation: Approaches and Applications	3
CBH:6205	Designing and Implementing Interventions	3
CHEM:4760	Radiochemistry: Energy, Medicine, and the Environment	3
CHEM:4873	Atmospheric and Environmental Chemistry	3
CPH:3500/ GHS:3500	Global Public Health	3
ECE:5630	Sustainable Energy Conversion	3
ECON:3345	Global Economics and Business	3
ECON:3625/ URP:3135	Environmental and Natural Resource Economics	3
ECON:3800	Law and Economics	3

SEES:4580/ IGPI:4581	Introduction to Geographic Databases	3
SEES:4750/ URP:4750	Environmental Impact Analysis	3
URP:6205/ PBAF:6205	Economics for Policy Analysis	1,3
URP:6225/ PBAF:6225	Applied GIS for Planning and Policy Making	3
URP:6233/ PBAF:6233	Public Finance and Budgeting	3
URP:6253/ PBAF:6253	Designing Sustainable and Healthy Cities	1-3
URP:6256/ PBAF:6256	Environmental Policy	3
URP:6258/ PBAF:6258	Systems and Scenario Thinking	3
URP:6273/ PBAF:6273	Community Development Through Creative Placemaking	3
URP:6295/ PBAF:6295	Economic Development Policy	3

Admission

Students must:

- be in a relevant science, technology, engineering, or mathematics (STEM) field;
- submit their University of Iowa transcript;
- have a graduate grade-point average (GPA) higher than 3.00 if in a doctoral program or a GPA higher than 2.75 if in a master's program;
- submit their résumé or curriculum vitae;
- provide a statement of purpose of 500 words or less about their core research and training program and why the certificate program will benefit their training and goals for career placement; and
- provide a letter of endorsement from their advisor.

Admission to the certificate program is competitive. Applications are accepted on a rolling basis and are reviewed by the Sustainable Water Development Program; applications can be submitted online along with pertinent materials. Students receive an email after an admission decision has been made.

Technological Entrepreneurship

Undergraduate certificate: technological entrepreneurship

Website: https://engineering.uiowa.edu/future-students/future-undergraduate-students/majors-minors-and-certificates/technological

The College of Engineering partners with the John Pappajohn Entrepreneurial Center in the Tippie College of Business to offer the Certificate in Technological Entrepreneurship.

The program is intended for students who would like to develop an understanding of how to manage innovation in business environments, as well as those who plan to start and operate their own businesses.

Students who complete the certificate program are able to:

- gain exposure to understanding sound business thinking;
- employ a more innovative and creative mindset in problem solving;
- learn how to create a business plan as skillfully as solving difficult engineering equations;
- understand the entrepreneurial approach to acquiring and managing resources;
- acquire team-building skills critical in both small and large companies;
- get insights into how to bridge engineering and business problems; and
- obtain valuable contacts and network opportunities with successful, thriving businesses and industries.

The Certificate in Technological Entrepreneurship is administered by the College of Engineering [p. 1514].

Programs

Undergraduate Program of Study

Certificate

- Certificate in Technological Entrepreneurship [p. 1681]

Technological Entrepreneurship, Certificate

Requirements

The undergraduate Certificate in Technological Entrepreneurship requires a minimum of 18 s.h. of credit. Students must complete at least 12 s.h. of the 18 s.h. required for the certificate at the University of Iowa or in approved study abroad courses. They must maintain a grade-point average (GPA) of at least 2.00 in coursework for the certificate.

The certificate program is open to Bachelor of Science in Engineering students who have earned at least 45 s.h. of credit toward the BSE and have a University of Iowa GPA of at least 2.75. Students must be granted the BSE and complete all certificate requirements in order to receive the certificate.

Students must declare their intention to pursue the certificate on MyUI and must apply for admission; visit Technological Entrepreneurship Certificate on the College of Engineering website for more information.

Certificate students study how the entrepreneurial process relates to technology-based businesses. The program is intended for students who would like to develop an understanding of how to manage innovation in business environments, as well as those who plan to start and operate their own businesses.

The Certificate in Technological Entrepreneurship requires the following coursework.

Foundation Course

Course #	Title	Hours
This course:		
ISE:2500	Engineering Economy	3

Entrepreneurship Core

Course #	Title	Hours
Both of these:		
ENTR:2000	Entrepreneurship and Innovation	3
ENTR:3100	Entrepreneurial Finance	3

Entrepreneurship Course in the Major

Course #	Title	Hours
One of these, depending on a student's engineering major:		
BME:4910	Biomedical Engineering Senior Design I (biomedical engineering majors)	4
CBE:4109	Chemical Engineering Process Design I (chemical engineering majors)	2
CEE:4850	Project Design and Management in Civil Engineering (civil and environmental engineering majors)	3
ECE:4890	Electrical and Computer Engineering Senior Design 2 (electrical and computer science engineering majors)	3
ISE:4600	Industrial Engineering Design Project (industrial engineering majors)	4
ME:4086	Mechanical Engineering Design Project (mechanical engineering majors)	3

Entrepreneurship Electives

Students customize their programs with their choice of electives. They must earn sufficient elective credit to complete the 18 s.h. required for the certificate.

Course #	Title	Hours
BME:4920	Biomedical Engineering Senior Design II	4
ENTR:3200	Entrepreneurial Marketing	3
ENTR:3350	Entrepreneurial Strategy	3
ENTR:3400	Strategic Management of Technology and Innovation	3
ENTR:3500	Social Entrepreneurship	3
ENTR:3550	Commercializing New Technology I	3
ENTR:3575	Commercializing New Technology II	3
ENTR:3595	Nonprofit Organizational Effectiveness I	3
ENTR:3600	Social Media Strategies for Entrepreneurial Ventures	3
ENTR:3700	Sustainable Innovation and Management	3
ENTR:4000	Topics in Entrepreneurship	3
ENTR:4100	International Entrepreneurship, Culture, and Social Impact	1-3
ENTR:4200	Entrepreneurship: Business Consulting	3
ENTR:4300	Launching an Entrepreneurial Venture	3
ENTR:4400	Managing the Growth Business	3
ENTR:4460	Entrepreneurship and Global Trade	3

Graduate College

Interim Dean

- Saba R. Ali

Associate Deans

- Michelle L. Campo, Ana M. Rodríguez-Rodríguez

Assistant Deans

- Heidi Arbisi-Kelm, Jennifer R. Teitle

Website: https://grad.uiowa.edu

The University of Iowa has been a leading center of advanced study for more than a century. Presently, the Graduate College accounts for nearly one-fifth of the university's total enrollment. This high ratio reflects the breadth of the university's graduate programs and resources, the strength of a graduate faculty with a long tradition of personal and professional concern for students, and the opportunities afforded graduate students for involvement, recognition, and support.

The Graduate College is responsible for the review and approval of proposals for new graduate programs and for the periodic survey and evaluation of existing programs. Through its administration of scholarship, fellowship, and research assistantship funds, the college encourages research and strengthening of departments. Additionally, the college works with the other colleges and departments of the university to formulate policies concerning the selection, supervision, and support of graduate students.

The faculty of the Graduate College is made up of all university tenure-track faculty members at the ranks of assistant professor, associate professor, and professor. The Graduate Council, elected from and by the graduate faculty, is the executive committee of the graduate faculty and is advisory to the dean of the Graduate College.

Manual of Rules and Regulations

The current edition of the Manual of Rules and Regulations is available on the college's website.

Academic Affairs Office

The Academic Affairs Office (AAO) is responsible for supporting graduate student academic progress and success. Have a question? AAO can help. AAO oversees graduate student degree progress and completion, assists with student academic concerns, and provides support for graduate students' completion of their thesis or dissertation. AAO works broadly across campus by coordinating with graduate programs and campus partners to manage and uphold the rules and standards of graduate education with a focus on academic excellence, student success, and evidence-based initiatives to shape and improve students' experiences.

Graduate Student Success

Graduate Student Success means fostering a sense of belonging and creating community, engagement, and a supportive environment for all graduate students. The Graduate College is committed to enhancing community, promoting well-being, and offering opportunities for personal, academic, and professional growth through events, safe spaces, and welcoming initiatives.

The Graduate College takes a holistic approach to graduate student and postdoctoral scholar preparation. Whether a student's goal is a career in academia, industry, government, or elsewhere, professional development can expand one's options and make a student more marketable to employers. The Graduate Student Success Office can help graduate students in the realms of communication, research and publication, diversity, funding, teaching, leadership, careers, and wellness.

Research Resources

Many of the university's diverse research activities are centrally administered by the Office of the Vice President for Research, which has a cooperative relationship with the Graduate College.

Graduate Student Senate

The Graduate Student Senate is the university's graduate student body representative organization. Representatives are elected annually from each university department that has a graduate degree program. The senate's primary purpose is to serve the interests of the graduate student body in matters affecting its welfare. The senate advises the dean of the Graduate College on matters pertaining to the college.

Programs

Degrees Offered

The Graduate College confers the Master of Arts (MA), Master of Science (MS), Master of Accountancy (MAc), Master of Arts in Teaching (MAT), Master of Computer Science (MCS), Master of Fine Arts (MFA), Master of Health Administration (MHA), Master of Public Affairs (MPAff), Master of Public Health (MPH), Specialist in Education (EdS), Master of Science in Nursing (MSN), Master of Social Work (MSW), Doctor of Philosophy (PhD), Doctor of Education (EdD), Doctor of Musical Arts (DMA), Doctor of Nursing Practice (DNP), Doctor of Physical Therapy (DPT), and Doctor of Audiology (AuD) degrees.

The college currently confers degrees in the following major fields.

Accounting: MAc[2]
Actuarial Science: MS[2]
African American World Studies: MA[3]
American Studies: MA[1], PhD
Anthropology: MA[1], PhD
Applied Mathematical and Computational Sciences: PhD
Art: MA[1], MFA
Art History: MA[1], PhD
Astronomy: MS[1]
Athletic Training: MS[1]
Audiology: AuD
Biochemistry and Molecular Biology: MS[1], PhD
Biomedical Engineering: MS[1], PhD
Biomedical Science: MS[1], PhD
Biostatistics: MS[1], PhD
Book Arts: MFA
Business Administration: MA[1], PhD
Business Analytics: MS
Chemical and Biochemical Engineering: MS[1], PhD
Chemistry: MS[1], PhD
Civil and Environmental Engineering: MS[1], PhD

Interdisciplinary Degree Programs

The Graduate College participates in a number of University of Iowa interdisciplinary degree programs. Detailed information about the following master's and doctoral degree programs is provided later in these Graduate College sections of the catalog: Applied Mathematical and Computational Sciences [p. 1695], Genetics [p. 1733], Human Toxicology [p. 1737], Immunology [p. 1742], Informatics [p. 1747], Molecular Medicine [p. 1779], Neuroscience [p. 1781], Sustainable Development [p. 1805], and Translational Biomedicine [p. 1809].

In addition to the degree programs listed, the graduate faculty has authorized the awarding of interdisciplinary master's and doctoral degrees. Students seeking approval for interdisciplinary master's and doctoral programs must previously have been admitted to and enrolled in a departmental program in the Graduate College. See sections X.A. and XII.D. in the Manual of Rules and Regulations on the college's website.

Combined Programs

Combined Programs Offered Through the Graduate College

Various combined programs have been developed whereby students work simultaneously toward two degrees. There are three types of combinations: undergraduate and graduate degree combinations (U2G programs), combinations between graduate programs, and graduate and professional degree combinations. Consult the appropriate catalog sections for more information. Established combined graduate programs include, but may not be limited to, the following.

- Undergraduate to Graduate Degree Programs (U2G), Any Bachelor's Degree [p. 1684]
- Undergraduate to Graduate Degree Programs (U2G), Specific Bachelor's Degree [p. 1686]
- Non-UI Undergraduate to Graduate Degree Programs (U2G) [p. 1687]
- Combined Graduate Degree Programs [p. 1687]
- Combined Graduate and Professional Degree Programs [p. 1688]

Undergraduate to Graduate Degree Programs (U2G), Any Bachelor's Degree

The following graduate degrees offer U2G programs, which are open to any University of Iowa bachelor's degree or major.

MA in Library and Information Science

The combined program enables undergraduate students to begin work toward the MA in library and information science while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the bachelor's degree and MA degree requirements. Offered by the Graduate College; see the MA in library and information science [p. 1773] in the catalog.

MA in Psychological and Quantitative Foundations (Learning Sciences and Educational Psychology Subprogram)

The combined program enables undergraduate students to begin work toward the MA in psychological and quantitative foundations with a learning sciences and educational psychology subprogram while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the bachelor's degree and MA degree requirements. Offered by the Graduate College and the College of Education; see the MA in psychological and quantitative foundations in the catalog.

Master of Arts in Teaching (Mathematics Education Subprogram)

The combined program enables undergraduate students to begin work toward the Master of Arts in Teaching (MAT) with a mathematics education subprogram while completing the bachelor's degree. Students admitted to the program may count 18 s.h. of credit toward both the bachelor's degree and MAT degree requirements. Offered by the Graduate College and the College of Education; see the Master of Arts in Teaching, MAT [p. 1493] (mathematics education subprogram) in the catalog.

Master of Arts in Teaching (Science Education Subprogram)

The combined program enables undergraduate students to begin work toward the Master of Arts in Teaching (MAT) with a science education subprogram while completing the bachelor's degree. Students admitted to the program may count 19 s.h. of credit toward both the bachelor's degree and MAT degree requirements. Offered by the Graduate College and the College of Education; see the Master of Arts in Teaching, MAT [p. 1497] (science education subprogram) in the catalog.

Master of Computer Science (MCS)

The combined program enables undergraduate students to begin work toward the MCS while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of coursework toward both the bachelor's degree and MCS degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Master of Computer Science, MCS in the catalog.

Master of Public Affairs (MPAff)

The combined program enables undergraduate students to begin work toward the MPAff while completing the bachelor's degree. Students admitted to the program may count 16 s.h. of credit toward both the bachelor's degree and MPAff degree requirements. Offered by the Graduate College; see the Master of Public Affairs, MPAff in the catalog.

Master of Public Health (Biostatistics, Community and Behavioral Health, Occupational and Environmental Health, Policy Subprograms)

The combined program enables undergraduate students to begin work toward the Master of Public Health (MPH) while completing the bachelor's degree. Students admitted to the MPH (biostatistics, community and behavioral health, occupational and environmental health, and policy subprograms) may count 15 s.h. of credit toward both the bachelor's degree and the MPH degree requirements. Offered by the Graduate College and the College of Public Health; see the Master of Public Health, MPH [p. 2092] in the catalog.

Master of Public Health (Epidemiology Subprogram)

The combined program enables undergraduate students to begin work toward the Master of Public Health (MPH) while completing the bachelor's degree. Students admitted to the MPH (epidemiology subprogram) may count 17 s.h. of credit toward both the bachelor's degree and MPH degree requirements. Offered by the Graduate College and the College of Public Health; see the Master of Public Health, MPH [p. 2092] (epidemiology subprogram) in the catalog.

MS in Biomedical Engineering

The combined program enables undergraduate students to begin work toward the MS in biomedical engineering while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the bachelor's degree and MS degree requirements. Offered by the Graduate College and the College of Engineering; see the Roy J. Carver Department of Biomedical Engineering [p. 1535] in the catalog.

MS in Biostatistics

The combined program enables undergraduate students to begin work toward the MS in biostatistics while completing the bachelor's degree. Students admitted to the program may count 15 s.h. of credit toward both the bachelor's degree and MS degree requirements. Offered by the Graduate College and the College of Public Health; see MS in biostatistics [p. 2111] in the catalog.

MS in Business Analytics

The combined program enables undergraduate students to begin work toward the MS in business analytics with a full-time subprogram while completing the undergraduate degree. Students admitted to the program may count 14 s.h. of credit toward both the bachelor's degree and MS degree requirements. Offered by the Graduate College and the Tippie College of Business; see the MS in business analytics [p. 1169] in the catalog.

MS in Civil and Environmental Engineering

The combined program enables undergraduate students to begin work toward the MS in civil and environmental engineering while completing the bachelor's degree. Students admitted to the program may count 9 s.h. of coursework toward both the bachelor’s degree and MS degree requirements. They may also count an additional 3 s.h. toward the MS degree requirements before they have been awarded the bachelor’s degree. Offered by the Graduate College and the College of Engineering; see the MS in civil and environmental engineering [p. 1599] in the catalog.

MS in Data Science

The combined program enables undergraduate students to begin work toward the MS in data science while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the bachelor’s degree and MS degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see the MS in data science [p. 354] in the catalog.

MS in Electrical and Computer Engineering

The combined program enables undergraduate students to begin work toward the MS in electrical and computer engineering while completing the bachelor's degree. Students admitted to the program may count 9 s.h. toward both the bachelor’s degree and MS degree requirements. They may also count an additional 3 s.h. toward the MS degree requirements before they have been awarded the bachelor’s degree. Offered by the Graduate College and the College of Engineering; see Electrical and Computer Engineering [p. 1613] in the catalog.

MS in Epidemiology

The combined program enables undergraduate students to begin work toward the MS in epidemiology while completing the bachelor's degree. Students admitted to the MS program may count 15 s.h. of credit toward both the bachelor’s degree and MS degree requirements. Offered by the Graduate College and the College of Public Health; see the MS in epidemiology [p. 2131] in the catalog.

MS in Finance

The combined program enables undergraduate students to begin work toward the MS in finance while completing the undergraduate degree. Students admitted to the program may count 16 s.h. of credit toward both the bachelor’s degree and MS degree requirements. Offered by the Graduate College and the Tippie College of Business; see the MS in finance [p. 1226] in the catalog.

MS in Health and Human Physiology (Child Life Subprogram)

The combined program enables undergraduate students to begin work toward the MS in health and human physiology with a child life subprogram while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the bachelor’s degree and MS degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Health, Sport, and Human Physiology [p. 505] in the catalog.

MS in Industrial Engineering

The combined program enables undergraduate students to begin work toward the MS in industrial engineering while completing the bachelor's degree. Students admitted to the program may count 9 s.h. toward both the bachelor’s degree and MS degree requirements. They may also count an additional 3 s.h. toward the MS degree requirements before they have been awarded the bachelor’s degree. Offered by the Graduate College and the College of Engineering; see Industrial and Systems Engineering [p. 1635] in the catalog.

MS in Mechanical Engineering

The combined program enables undergraduate students to begin work toward the MS in mechanical engineering while completing the bachelor's degree. Students admitted to the program may count 12 s.h. toward both the bachelor’s degree and MS degree requirements. Offered by the Graduate College and the College of Engineering; see Mechanical Engineering [p. 1655] in the catalog.

MS in Occupational and Environmental Health (Industrial Hygiene Subprogram)

The combined program enables undergraduate students to begin work toward the MS in occupational and environmental health while completing the bachelor's degree. Students admitted to the MS program may count 15 s.h. of credit toward both the bachelor’s degree and MS degree requirements. Offered by the Graduate College and the College of Public Health; see the MS in occupational and environmental health [p. 2157] (industrial hygiene subprogram) in the catalog.

MS in Statistics

The combined program enables undergraduate students to begin work toward the MS in statistics while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the bachelor’s degree and MS degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Statistics and Actuarial Science [p. 1075] in the catalog.

MS in Sustainable Development

The combined program enables undergraduate students to begin work toward the MS in sustainable development while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the bachelor’s degree and MS degree requirements. Offered by the Graduate College and the College of Engineering; see the MS in sustainable development [p. 1806] in the catalog.

MS in Urban and Regional Planning

The combined program enables undergraduate students to begin work toward the MS in urban and regional planning while completing the bachelor's degree. Students admitted to the program may count 18 s.h. of credit toward both the bachelor’s degree and MS degree requirements. Offered by the Graduate College; see the MS in urban and regional planning [p. 1797] in the catalog.

PhD in Biochemistry

The combined program enables undergraduate students to begin work toward the PhD in biochemistry while completing the bachelor's degree. Students admitted to the program may

count 12 s.h. of credit toward both the bachelor's degree and PhD degree requirements. Offered by the Graduate College and the Carver College of Medicine; see the Department of Biochemistry and Molecular Biology [p. 1859] in the catalog.

Undergraduate to Graduate Degree Programs (U2G), Specific Bachelor's Degrees

The following graduate degrees offer U2G programs that are paired with a specific University of Iowa bachelor's degree or major.

BA in Elementary Education (Special Education Subprogram)/MA in Teaching and Learning (Special Education Subprogram)

The combined BA/MA program with a special education subprogram enables students to begin work toward the MA in teaching and learning while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the BA and MA degree requirements. Offered by the Graduate College and the College of Education; see the MA in teaching and learning [p. 1486] (special education subprogram) in the catalog.

BA in English or BA in English and Creative Writing/MA in English (Literary Studies Subprogram)

The combined BA/MA program with a literary studies subprogram enables students to begin work toward the MA in English while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the BA and MA degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see the MA in English (literary studies subprogram) in the catalog.

BS in Geographical and Sustainability Sciences (Geographic Information Science Subprogram)/MS in Informatics (Geoinformatics Subprogram)

The combined BS in geographical and sustainability sciences with a geographic information science subprogram/MS in informatics with a geoinformatics subprogram enables undergraduate students majoring in geographical and information sciences to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 12 s.h. toward both the BS and MS degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see BS in Geographical and Sustainability Sciences [p. 392] and the MS in informatics [p. 1753] (geoinformatics subprogram) in the catalog.

BA in Journalism and Mass Communication/MA in Strategic Communication

The combined BA/MA program enables students to begin work toward the MA in strategic communication while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the BA and MA degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see the MA in strategic communication in the catalog.

BA in Linguistics/MA in Linguistics (TESL Subprogram)

The combined BA/MA program in linguistics with a TESL subprogram enables students majoring in linguistics to begin work toward the MA while completing the bachelor's degree. Students admitted to the program may count 13 s.h. of advanced coursework toward both the BA and MA degree requirements and may take selected graduate-level courses before they have been awarded the BA degree. They may also gain experience teaching English as a second language (ESL) at the college level early in their graduate careers. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Linguistics, BA [p. 718] in the catalog.

BA or BS in Informatics/MS in Informatics (Health Informatics, Human-Computer Interaction Subprograms)

The combined BA or BS in informatics/MS in informatics with a health informatics or human-computer interaction subprogram enables students majoring in informatics to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 12 s.h. toward both the BA or BS and MS degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see the MS in informatics [p. 1753] in the catalog.

BS in Exercise Science/MS in Athletic Training

The combined BS in exercise science/MS in athletic training program enables students majoring in exercise science to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 22 s.h. of credit toward both the BS and MS degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Carver College of Medicine; see the MS in athletic training [p. 1938] in the catalog.

BSE in Chemical Engineering/MS in Chemical and Biochemical Engineering

The combined BSE in chemical engineering/MS in chemical and biochemical engineering program enables undergraduate students majoring in chemical engineering to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of coursework toward both the BSE and MS degree requirements. Offered by the Graduate College and the College of Engineering; see Chemical and Biochemical Engineering [p. 1554] in the catalog.

BSE in Any Engineering Major or CLAS Bachelor's Degree/PhD in Electrical and Computer Engineering

The combined BSE or CLAS bachelor's degree/PhD in electrical and computer engineering enables undergraduate students in any College of Engineering BSE or in any CLAS bachelor's program to begin work toward the PhD while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of coursework toward both the bachelor's degree

and PhD degree requirements. They may also count an additional 6 s.h. toward the PhD degree requirements before they have been awarded the bachelor's degree. Offered by the Graduate College and the College of Engineering; see Electrical and Computer Engineering [p. 1613] in the catalog.

BSN in Nursing (RN Subprogram)/DNP in Nursing

The combined BSN in nursing (RN subprogram)/DNP in nursing program enables students to begin work toward the DNP while completing the bachelor's degree. Students admitted to the program may count 9 s.h. of credit toward both the BSN and DNP degree requirements. Offered by the Graduate College and the College of Nursing, see the Bachelor of Science in Nursing, BSN [p. 2018] (nursing—RN subprogram) and the Doctor of Nursing Practice, DNP [p. 2029] in the catalog.

Non-UI Undergraduate to Graduate Degree Programs (U2G)

The following graduate degrees offer U2G programs that are paired with bachelor's degree programs at other colleges and universities.

Coe College, Cornell College, Grinnell College, or Luther College Bachelor's Degree/MPH (Biostatistics, Community and Behavioral Health, Epidemiology, Occupational and Environmental Health, Policy Subprograms)

The combined program enables undergraduate students at Coe College, Cornell College, Grinnell College, and Luther College to begin work toward the MPH while completing the bachelor's degree. Students admitted to the program may enroll in University of Iowa graduate-level courses to count toward the MPH degree while they are simultaneously completing the bachelor's degree. Offered by the Graduate College and the College of Public Health; see the Master of Public Health, MPH [p. 2092] in the catalog.

Grinnell College BA in Computer Science/MCS

The combined program enables undergraduate students majoring in computer science at Grinnell College to begin work toward the MCS while completing the bachelor's degree. Students admitted to the program may transfer Grinnell College coursework that articulates to 6 s.h. of graduate-level credit toward University of Iowa MCS degree requirements. Students admitted to the program may enroll in University of Iowa graduate-level courses to count toward the MCS degree while they are simultaneously completing the bachelor's degree. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Master of Computer Science, MCS [p. 316] in the catalog.

Nankai University Bachelor's Degree/ MS in Actuarial Science

The combined program enables undergraduate students at Nankai University in Tianjin, China to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may enroll in University of Iowa graduate-level courses to count toward the MS degree while they are simultaneously completing the bachelor's degree. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Statistics and Actuarial Science [p. 1075] in the catalog.

Nankai University Bachelor's Degree/ MS in Statistics

The combined program enables undergraduate students at Nankai University in Tianjin, China to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may enroll in University of Iowa graduate-level courses to count toward the MS degree while they are simultaneously completing the bachelor's degree. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Statistics and Actuarial Science [p. 1075] in the catalog.

Wartburg College Bachelor's Degree/ MA in Library and Information Science

The combined program enables undergraduate students at Wartburg College to begin work toward the MA while completing the bachelor's degree. Students admitted to the program may enroll in University of Iowa graduate-level courses to count toward the MA degree while they are simultaneously completing the bachelor's degree. Offered by the Graduate College; see Library and Information Science, MA in the catalog.

Combined Graduate Degree Programs

AuD/PhD in Speech and Hearing Science

The combined AuD/PhD in speech and hearing science program is designed for students who would like to practice audiology and hold a faculty position at a university. Students admitted to the program work concurrently toward the Doctor of Audiology and the Doctor of Philosophy; they may count 30 s.h. toward the requirements of both degrees. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Communication Sciences and Disorders [p. 245] in the catalog.

MA in French and Francophone World Studies/MFA in Literary Translation

The Department of Languages, Linguistics, Literatures, and Cultures offers a combined Master of Arts in French and Francophone world studies and a Master of Fine Arts in literary translation. Students interested in writing in its different forms—creative, academic, and translation—will find the University of Iowa to be the ideal place to develop their talents and an attractive option for more diversified career preparation. A separate application and admission to each degree program is required. For more information, review the admissions requirements for French and Francophone world studies and literary translation. Students in the combined program earn both degrees by completing a minimum of 60 s.h. of coursework, fewer semester hours than if each degree was completed separately. Qualified students may be eligible for up to three years of full funding for a teaching assistant (TA) position.

MA in Library and Information Science/ Certificate in Book Arts and Book Studies

The combined MA in library and information science and Certificate in Book Arts and Book Studies prepares students for careers in special collections librarianship. Students admitted to the program receive training in the management of varied types of special collections, such as rare books, manuscripts, archives, graphics, music, and ephemera. Offered by the Graduate College; see the MA in library and information science [p. 1773] and the Certificate in Book Arts and Book Studies [p. 1727] in the catalog.

MA in Library and Information Science/ MFA in Book Arts

The combined MA in library and information science/MFA in book arts program allows graduate students with strong interests in the physical book to acquire training in the book arts, book history, and material book studies. The earned expertise in the production and legacy of the book as a physical artifact combined with expertise in library and information science can be an asset for those focused on careers in special collections libraries and archives. Students in the combined program earn both degrees by completing fewer semester hours than if each degree was completed separately. Offered by the Graduate College; see the MA in library and information science [p. 1773] and the MFA in book arts [p. 1724] in the catalog.

MA in Library and Information Science/ PhD in English

The combined MA in library and information science/PhD in English program prepares students for careers in academic libraries as humanities subject specialists, reference and instruction librarians, first-year experience librarians, special collections librarians and curators, and archivists. It also enhances the research profiles and methodological toolboxes of digital humanists as well as archival historicists, in addition to improving pedagogical skills. Offered by the Graduate College and the College of Liberal Arts and Sciences; see the MA in library and information science [p. 1773] and the PhD in English [p. 449] in the catalog.

MS in Urban and Regional Planning/ MSW in Social Work

The combined MS in urban and regional planning/MSW in social work program is designed for students who would like to pursue a career in social work and urban planning. Offered by the Graduate College and the College of Liberal Arts and Sciences; see the MS in urban and regional planning and the MSW in social work in the catalog.

Combined Graduate and Professional Degree Programs

Graduate Degrees/Certificates in Business Fundamentals, Finance, Leadership, Marketing

Students can pursue a professional Certificate in Business Fundamentals, Finance, Leadership, or Marketing concurrently with their graduate degree. With graduate program approval, students may count up to 9 s.h. from a professional certificate toward their graduate degree. With approval from the professional certificate program, students may count up to 3 s.h. from any graduate degree program toward their certificate. Offered by the Graduate College and Tippie Professional Programs (Tippie College of Business), see the professional Certificates in Business Fundamentals [p. 1280], Finance [p. 1282], Leadership [p. 1286], or Marketing [p. 1287] in the catalog.

JD/Graduate Degrees

The College of Law and several Graduate College programs and schools have developed combined programs in which students pursue the Juris Doctor (JD) degree and a graduate degree concurrently. Offered by the Graduate College and the College of Law; see the Manual of Rules and Regulations on the Graduate College website and the Juris Doctor, JD [p. 1833] in the catalog.

MBA/MA in Strategic Communication

The combined Master of Business Administration/MA in strategic communication program aims to meet the evolving needs of the market by producing graduates with a unique skill set that integrates advanced communication strategies with robust business acumen for the digital world. Offered by Tippie Professional Programs (Tippie College of Business) and the College of Liberal Arts and Sciences; see the Master of Business Administration, MBA and the MA in strategic communication in the catalog.

MBA/Master of Health Administration (MHA)

The combined Master of Business Administration/Master of Health Administration serves students interested in combining health management and policy with greater exposure to advanced management techniques. The combined degree program prepares students to work within or consult for a greater variety of organizations, including but not limited to healthcare organizations and consulting firms. Offered by the Tippie Professional Programs (Tippie College of Business) and the College of Public Health; see the Master of Business Administration, MBA and the Master of Health Administration, MHA [p. 2142] in the catalog.

MBA/MS in Business Analytics (Professional Subprogram)

The combined Master of Business Administration/MS program in business analytics with a professional subprogram prepares students to manage organizations and analyze data available to support business decision-making. Offered by Tippie Professional Programs (Tippie College of Business); see the Master of Business Administration, MBA and the MS in business analytics [p. 1169] in the catalog.

MBA/MSW in Social Work

The combined Master of Business Administration/Master of Social Work program prepares students for careers in human services and nonprofit agency administration. Offered by Tippie Professional Programs (Tippie College of Business) and the College of Liberal Arts and Sciences; see the Master of Business Administration, MBA and the MSW in social work in the catalog.

MD/PhD (Medical Scientist Training Program)

The combined Doctor of Medicine/Doctor of Philosophy program prepares students for careers in academic medicine, with emphasis on basic and clinical research. Offered by the Graduate College and the Carver College of Medicine; see Medical Scientist Training Program [p. 1901] in the catalog.

Certificates

The Graduate College also participates with other University of Iowa colleges in offering the following graduate certificates.

Adult Gerontology Acute Care Nurse Practitioner

The Certificate in Adult Gerontology Acute Care Nurse Practitioner is a program for post-master's Advanced Practice Registered Nurse degree students who would like to pursue a second specialty. See the Certificate in Adult Gerontology Acute Care Nurse Practitioner [p. 2045] in the catalog.

Adult Gerontology Primary Care Nurse Practitioner

The Certificate in Adult Gerontology Primary Care Nurse Practitioner is a program for post-master's Advanced Practice Registered Nurse degree students who would like to pursue a second specialty. See the Certificate in Adult Gerontology Primary Care Nurse Practitioner [p. 2046] in the catalog.

African American Studies

The Certificate in African American Studies is a program that increases intellectual knowledge and understanding of African American culture and experience. See the Certificate in African American Studies [p. 46] in the catalog.

Aging and Longevity Studies

The Aging and Longevity Studies Program is a multidisciplinary certificate program administered by the College of Liberal Arts and Sciences in cooperation with other University of Iowa colleges. The program is designed to complement graduate degree programs or to serve as a stand-alone nondegree program for students with academic, professional, research, or service career interests in aging. See the Certificate in Aging and Longevity Studies [p. 50] in the catalog.

Agricultural Safety and Health

The Certificate in Agricultural Safety and Health is a postbaccalaureate program for practicing health care professionals serving rural areas and for health professions students who intend to practice in rural areas. The program is designed to help rural health professionals address safety and health issues in farm settings. See the Certificate in Agricultural Safety and Health [p. 2107] in the catalog.

Applied Behavior Analysis

The Certificate in Applied Behavior Analysis develops skills in behavioral intervention and intensive instruction. The course sequence contributes to eligibility for certification as a board-certified behavior analyst (BCBA). See the Certificate in Applied Behavior Analysis [p. 1352] in the catalog.

Artificial Intelligence and Machine Learning

The Certificate in Artificial Intelligence and Machine Learning serves as an enhancement for current online part-time business analytics students who want to focus their courses in AI and machine learning, a skillset in high demand. Students develop cutting-edge knowledge of emerging technologies that impact businesses today and in the future. See Certificate in Artificial Intelligence and Machine Learning [p. 1176] in the catalog.

Artificial Intelligence, Modeling and Simulation in Engineering

The Certificate in Artificial Intelligence, Modeling and Simulation (AIMS) in Engineering offers graduate students enrolled in the College of Engineering an opportunity to specialize in artificial intelligence, machine learning, deep learning, modeling and simulation, and uncertainty quantification. UI graduate students from other disciplines also may apply. See the Certificate in Artificial Intelligence, Modeling and Simulation in Engineering [p. 1526] in the catalog.

Biostatistics

The Certificate in Biostatistics is open to students in University of Iowa graduate degree programs outside biostatistics and to individuals admitted to the Graduate College as nondegree students. The certificate program enables students to add a formal biostatistics emphasis to their degree programs. Students who complete the certificate in conjunction with a graduate degree may count a maximum of 6 s.h. of certificate credit toward their graduate degree. See the Certificate in Biostatistics [p. 2116] in the catalog.

Book Arts and Book Studies

The Certificate in Book Arts and Book Studies is designed to be completed in one year. The program is open to students who are enrolled in a graduate degree program at the University of Iowa as well as to students enrolled in the Graduate College with nondegree status. See the Certificate in Book Arts and Book Studies [p. 1727] in the catalog.

Business Analytics

The Certificate in Business Analytics is open to students in University of Iowa graduate degree programs and to individuals admitted to the Graduate College as nondegree students. The certificate program is designed for working professionals and addresses a growing need to manage and analyze the rapidly increasing amount of data that is available to support business decision-making. See the Certificate in Business Analytics [p. 1177] in the catalog.

Cognitive Science of Language

The Certificate in Cognitive Science of Language is designed to complement doctoral study. The certificate program is open to University of Iowa PhD students in linguistics, neuroscience, psychology, and speech and hearing science. PhD students in other disciplines may petition to be permitted to earn the certificate. Students must complete a formal application to enter the certificate program; they should contact the program's coordinator before they apply. See the Certificate in Cognitive Science of Language [p. 1730] in the catalog.

College Teaching

The Certificate in College Teaching complements discipline-oriented graduate programs and prepares students for careers in postsecondary education. The certificate program is open to all University of Iowa doctoral and master's degree-seeking students.See the Certificate in College Teaching [p. 1732] in the catalog.

Emerging Infectious Disease Epidemiology

The Certificate in Emerging Infectious Disease Epidemiology is a postbaccalaureate program designed to meet the training needs in emerging infectious diseases of international public health professionals as well as University of Iowa graduate students. Applicants to the program must hold a bachelor's degree. See the Certificate in Emerging Infectious Disease Epidemiology [p. 2123] in the catalog.

Family Nurse Practitioner

The Certificate in Family Nurse Practitioner is a program for post-master's Advanced Practice Registered Nurse degree students who would like to pursue a second specialty. See the Certificate in Family Nurse Practitioner [p. 2047] in the catalog.

Gender, Women's, and Sexuality Studies

The Certificate in Gender, Women's, and Sexuality Studies is open to students enrolled in graduate degree programs. See the Certificate in Gender, Women's, and Sexuality Studies [p. 486] in the catalog.

Global Health Studies

The Certificate in Global Health Studies is open to graduate and professional students, except for those in the College of Pharmacy who have earned the PharmD degree—they are awarded the undergraduate certificate. Students must maintain a grade-point average of at least 3.00 in work for the certificate. See the Certificate in Global Health Studies [p. 503] in the catalog.

Health Systems

The Certificate in Health Systems is built on the foundational courses from the Doctor of Nursing Practice (DNP) with a health systems subprogram. The certificate is available to post-master's degree students seeking additional preparation in the area of health systems/administration. See the Certificate in Health Systems [p. 2048] in the catalog.

Healthcare Management

The Certificate in Healthcare Management provides foundational business and leadership skills to physicians, nurses, and other clinicians, and managers. See the Certificate in Healthcare Management [p. 2152] in the catalog.

Informatics

The Certificate in Informatics requires a variable amount of graduate credit, depending on the student's choice of subprogram. The certificate program is designed for students enrolled in University of Iowa graduate degree programs who wish to study informatics as a complement to their degree program and for nondegree students who are interested in increasing their knowledge of informatics. See the Certificate in Informatics [p. 1760] in the catalog.

Institutional Research and Effectiveness

The Certificate in Institutional Research and Effectiveness (IRE) is offered with hybrid and conventional courses. The certificate program prepares professionals to use data for institutional decision-making, reporting, and accountability in higher education and K–12 contexts. This certificate amends and complements students' competence in other areas (business affairs, information technology, student affairs, and development, among other areas) to prepare them with the skills and capabilities to use data for educational improvement, accountability, quality, and equity. See the Certificate in Institutional Research and Effectiveness [p. 1393] in the catalog.

K–12 Equity and Inclusion

The Certificate in K–12 Equity and Inclusion is offered with hybrid and conventional courses. The certificate program offers educational professionals or nondegree-seeking students currently working in K–12 schools, districts, and area education agencies expertise in equity and inclusion to better support the needs and interests of a diversifying K–12 student population. See the Certificate in K–12 Equity and Inclusion [p. 1395] in the catalog.

Literary Translation

The Certificate in Literary Translation includes coursework in translation practice and techniques. Translation workshops and coursework in translation theory are also central to the certificate program as they are essential to the training of literary translators. See the Certificate in Literary Translation [p. 761] in the catalog.

Multilingualism and Culturally Responsive Practice

The Certificate in Multilingualism and Culturally Responsive Practice is open to graduate students currently enrolled and in good standing in the Master of Science in Speech Language Pathology [p. 258] and is completed concurrently with the MS coursework. See the Certificate in Multilingualism and Culturally Responsive Practice [p. 265] in the catalog.

Native American and Indigenous Studies

The Native American and Indigenous Studies Program offers an interdisciplinary certificate program focusing on the histories, cultures, languages, arts, religious traditions, political and social organizations, economies, geographies, literatures, and contemporary legal and political concerns of Native Americans of the United States as well as other Indigenous peoples of the Western Hemisphere. See the Certificate in Native American and Indigenous Studies [p. 874] in the catalog.

Online Teaching

The Certificate in Online Teaching is designed to prepare students for the realities of online teaching and to help them expand their career options. The certificate is open to students in University of Iowa graduate degree programs and

to individuals admitted to the Graduate College as nondegree students. See the Certificate in Online Teaching [p. 1397] in the catalog.

Pediatric Nurse Practitioner—Acute Care

The Certificate in Pediatric Nurse Practitioner—Acute Care is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty. See the Certificate in Pediatric Nurse Practitioner—Acute Care [p. 2049] in the catalog.

Pediatric Nurse Practitioner—Primary Care

The Certificate in Pediatric Nurse Practitioner—Primary Care is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty. See the Certificate in Pediatric Nurse Practitioner—Primary Care [p. 2050] in the catalog.

Psychiatric/Mental Health Nurse Practitioner

The Certificate in Psychiatric/Mental Health Nurse Practitioner is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty. See the Certificate in Psychiatric/Mental Health Nurse Practitioner [p. 2051] in the catalog.

Public Digital Humanities

The Certificate in Public Digital Humanities is open to all University of Iowa graduate students in good academic standing. Students take a theory and practice course and select elective coursework to suit their disciplinary or technical needs. See the Certificate in Public Digital Humanities [p. 1803] in the catalog.

Public Health

The Certificate in Public Health is designed to improve public health practice and public health workforce capacity in Iowa and the upper Midwest. It is intended primarily for individuals in public health practice, those in the workforce, and those interested in strengthening their knowledge and skills in basic public health competencies. See the Certificate in Public Health [p. 2105] in the catalog.

Special Collections Librarianship and Archives

The Certificate in Special Collections Librarianship and Archives includes coursework that introduces students to the core theories supporting the collection and management of rare books, archival records, and manuscript collections. See the Certificate in Special Collections Librarianship and Archives [p. 1778] in the catalog.

Sustainable Water Development

The Certificate in Sustainable Water Development trains science, technology, engineering, and mathematics (STEM) graduate students to address future challenges of water scarcity and variability while also meeting the food and energy demands of Earth's growing population. See the Certificate in Sustainable Water Development [p. 1677] in the catalog.

Talent Development

The Certificate in Talent Development requires 14 s.h. of graduate credit. The certificate is open to students in University of Iowa graduate degree programs and to individuals admitted to the Graduate College as nondegree students. The purpose of the certificate is to increase understanding of talented individuals, the process of talent development and creativity, and to prepare advocates for talented individuals. In addition to coursework, students design a culminating original project aligned with a career objective or personal interest. Students may use the coursework embedded in the certificate to apply to the State of Iowa Gifted and Talented teaching endorsement. To learn more or apply, see the Certificate in Talent Development [p. 1429] in the catalog.

Translational and Clinical Investigation

The Certificate in Translational and Clinical Investigation is designed for clinicians who seek advanced training in clinical methodology and applied patient-oriented research skills. Students in the certificate program must be practicing academic clinicians who have completed doctoral training. See the Certificate in Translational and Clinical Investigation [p. 2166] in the catalog.

Transportation Planning

The Certificate in Transportation Planning includes a choice of coursework in traffic engineering, transportation and land use planning, design of transportation systems, transportation demand analysis, transportation policy and planning, as well as other transportation areas. Students may earn the certificate in conjunction with an MS or PhD in civil and environmental engineering or with an MS in urban and regional planning.

Individuals working toward degrees in other transportation-related disciplines are encouraged to apply to the Transportation Planning Program. Depending on a student's background, additional coursework in statistics, computer programming, simulation, mathematics, and operations research may be required for the certificate. Credit earned in these courses may not be applicable to the student's degree program. See the Certificate in Transportation Planning [p. 1814] in the catalog.

Financial Support

Approximately half of the university's graduate students receive some form of university-administered financial assistance. For eligibility requirements and application procedures, see "Section VII. Graduate Appointments" in the Manual of Rules and Regulations on the college's website. The following are the primary sources of assistance. For a more complete description of funding available to graduate students, see the Graduate College website.

Teaching and Research Assistantships

Teaching and research assistantships are available in most departments, but they prioritize doctoral students. Assistantship stipends are awarded for quarter-time, one-

third-time, and half-time academic-year appointments and quarter-time, one-third-time, and half-time fiscal-year appointments; assistantships of 25% or higher are also eligible for tuition scholarships. Assistants (one-quarter-time or more) pay resident tuition rates for fee purposes. See the Graduate College website for a more complete description of graduate assistantship benefits.

Iowa Arts Fellowships

Iowa Arts Fellowships are for University of Iowa graduate students entering MFA programs. Typical stipends are for the academic year, with all tuition and a percentage of mandatory fees paid, plus a health insurance allowance, for one academic year (the remaining years of support must be provided by the appointing program). There are no departmental service obligations while holding the first-year fellowship.

Iowa Performance Fellowships

Iowa Performance Fellowships are for first-year DMA candidates in a performance area of music. Recipients are nominated by the School of Music. Awards include academic-year fellowships, summer fellowships, and tuition and a percentage of mandatory fees paid (the fellow is responsible for the remainder of fees). The School of Music provides a one-quarter-time research assistantship in years two and three.

Graduate College Iowa Recruitment Fellowships

The Iowa Recruitment Fellowships program enhances departmental recruitment packages by offering the most accomplished new doctoral students a stipend supplement for up to five years and stipend support for up to four summer sessions (academic year graduate assistants) or a stipend supplement for the entire fiscal year (fiscal year graduate assistants). Tuition scholarships are to be paid during the academic years (fall, spring) by the appointing unit, while the Graduate College provides up to 1 s.h. of tuition and benefits for the summer sessions. Recipients are nominated by their department.

Graduate College Summer Fellowships

Graduate College Summer Fellowships are for advanced doctoral students who have completed their comprehensive exams, are working to complete their dissertations, and do not otherwise have funding for the summer session. Awards provide a summer stipend and up to 1 s.h. of tuition. Awardees must enroll in a summer session.

T. Anne Cleary International Research Fellowships

The T. Anne Cleary International Research Fellowships are for doctoral students who have completed all pre-dissertation requirements, including the comprehensive examination, and who will use the fellowship for international dissertation research. The monetary amounts may vary and are meant to supplement other research funds. PhD students in any discipline may apply.

Ballard and Seashore Dissertation Fellowships

Ballard and Seashore Dissertation Fellowships are one-semester fellowships for PhD candidates who have completed all doctoral degree requirements except their dissertation. Recipients are nominated by their departments. Fellowships provide monetary amounts for the semester plus tuition and a percentage of mandatory fees paid for up to 2 s.h. and a health insurance allowance.

Post-Comprehensive Research Fellowships

The post-comprehensive research awards program provides an opportunity for advanced PhD students to benefit from protected and supported time to pursue their scholarly research activities. The one-semester award is intended to recognize students with distinguished academic achievement during their early graduate training. These achievements should be evident from a combination of outstanding academic performance in coursework, as well as early scholarly research activities. Students who have held teaching assistantships in the previous two semesters or do not have other sources of assistantship/fellowship funds will have priority. Awardees will receive a stipend. The Graduate College also supports up to 2 s.h. of tuition, a percentage of the mandatory fees, and a health insurance allowance. Recipients are nominated by their department.

Scholarships

Scholarships typically provide partial tuition.

Graduate Student Travel Awards

Graduate student travel awards provide reimbursement for travel by students who present research and scholarship results at professional conferences. Awards are competitive across disciplines and vary. Funds are administered by the Graduate Student Senate and the Graduate College.

Other Sources

For other sources of financial support, contact the Office of Student Financial Aid.

Many departments offer additional support through traineeships, part-time employment in research, or part-time teaching appointments. The Office of the Vice President for Research maintains a library of information on public and private agencies that provide funds for research and graduate study. Much material has been collected concerning awards for overseas study.

Courses

Most Graduate College courses are offered by the college's programs and schools. They are listed and described in the corresponding catalog sections.

The college also offers the following nondepartmental courses.

Graduate College Courses

GRAD:3020 SROP Scholars Program **0 s.h.**

GRAD:5091 Statistics Career Seminar 1 s.h.
Practical, hands-on approach to demystify the job search process and build essential career-readiness skills for roles in statistics, actuarial science, and data science across academia, industry, government, and non-profit sectors. Same as STAT:5091.

GRAD:5225 Communicating Data Through Stories 3 s.h.
How to communicate science effectively and responsively with multiple audiences from peers and professors to potential employers, policymakers, and the lay public; focus on speaking about science clearly and vividly in ways that can engage varied audiences, especially those outside the student's own field; connecting and finding common ground with an audience, defining goals, identifying main points, speaking without jargon, explaining meaning and context, using storytelling techniques and multimedia elements. Same as CEE:5225, SDG:5225.

GRAD:5800 Writing for National Fellowships arr.
Process of writing applications for nationally competitive fellowship opportunities; completion of a fellowship application portfolio for a specific fellowship opportunity.

GRAD:5999 Graduate Final Registration 1 s.h.
Certificate students and non-thesis doctoral students.

GRAD:6000 PhD Postcomprehensive Registration 1 s.h.

GRAD:6001 Master's Final Registration 1 s.h.
Requirements: master's degree candidate.

GRAD:6002 Doctoral Continuous Registration 1 s.h.
Requirements: doctoral degree candidate who has passed comprehensive examinations.

GRAD:6003 Doctoral Final Registration 1 s.h.
Requirements: doctoral degree candidate in final session of enrollment.

GRAD:6217 Seminar in College Teaching 1-3 s.h.
Preparation for college teaching; for graduate students planning to teach. Same as PSQF:6217.

GRAD:6300 Writing for Learned Journals 1-4 s.h.
Seminar that supports graduate students in bringing written work to publishable form; analysis of target journals' audiences, interests, and citation politics; submission and the publication process; response to reader reports and criticism; best writing and research practices; discussion of knowledge cultures and discourses in disciplines and the contemporary academy. Same as AMST:6300, GWSS:6300, RHET:6330.

GRAD:6313 Studio Summer Fellowship 1 s.h.
Investigation of and reflection on digital scholarly collaboration, production, and promotion. Same as ULIB:6313.

GRAD:6510 Introduction to Programming 1 s.h.
How computer programming has quickly become a valuable skill across a diverse range of professions and academic disciplines; programming impacts on an increasingly large segment of professional activity—from analyzing text, visualizing data, creating maps, or developing web applications; knowledge of how to read and write code as a valuable literacy in modern mediated life; introduction to computer programming; students write simple programs of their own design (e.g., automate repetitive tasks, perform calculations on data, accept and process user input).

GRAD:6515 Basic Data Handling in Microsoft Excel 1 s.h.
Introduction to managing and examining spreadsheet data for humanities and social sciences; basic data types, organizing data records, creating summary reports and simple charts, tips and tricks for letting Microsoft Excel do the tedious parts; prior experience working with data or Microsoft Excel not required.

GRAD:6520 Data Visualization Basics 1 s.h.
Hands-on introduction to basics of data visualization—working with data, analyzing and designing clear and functional visualizations, and developing simple data visualizations in Excel and Python or R; basic static plots (e.g., scatterplots, histograms, line graphs); brief introduction to geographic maps and network graphs.

GRAD:6521 Scholarly Communication and Journal Publishing 1 s.h.
Process of publishing a scholarly journal. Several scholarly journals are published locally with the support of the University of Iowa Libraries. For graduate students interested in academic journal publishing, as well as scholarly communications more broadly.

GRAD:6522 Digital Exhibits: Effective Design and Development 1 s.h.
Practical technical skills for building digital exhibits; theoretical concepts; how digital exhibits are distinct from physical exhibits; values included in digital storytelling; management of digital exhibit life cycle; main concepts and topics of effective digital exhibit development including storytelling, structuring materials, digitization, metadata application, copyright, and fair use; students gain experience using digital exhibit software, Omeka, for importing and managing content and creating collections and exhibits.

GRAD:6530 Open Source Web Mapping for Beginners 1 s.h.
Maps are high-impact visual representations that can make complex ideas more comprehensible and enhance persuasive power of academic arguments; wide range of open source data and scripting libraries that are increasingly available to scholars who wish to present their data in interactive online maps; introduction to basic workflows and scripting for open web mapping with JavaScript, HTML, and CSS.

GRAD:6535 Data Visualization and Mapping 1 s.h.
Introduction to data visualization techniques for descriptive data analysis and geospatial visualization; introduction to Excel; basic editing and implementation of JavaScript; for graduate students interested in learning how to find, clean, manage, and analyze data for visual presentation in graphs, charts, or interactive digital maps. No prior experience necessary.

GRAD:6540 Careers Beyond Academia 1 s.h.
Preparation to search for and apply to a variety of careers outside of academia that allow students to use their digital scholarship and digital skills training; opportunities and challenges faced when transitioning to careers adjacent to and beyond academic environments in which students have become familiar with in their graduate training.

GRAD:6541 The Future of Knowledge 1 s.h.
Explores speculative research practices that reimagine how knowledge is created, shared, and understood; students will experiment with reading books with computers, using text mining and digital analysis, while also working with data and artifacts as creative materials for discovery; engage AI agents as collaborators, testing their potential and limits in research and use speculative methods such as world-building and counterfactuals to imagine new futures of scholarship; students will have prototyped bold hybrid works that blur the lines between research, design, and creative expression.

GRAD:6545 Introduction to Podcasting 1 s.h.
Introduction to podcasting basics including interview techniques, speaking and writing for podcast audiences, digital productions, and promotion. For graduate students interested in using digital techniques to share their creative works, research, or scholarship.

GRAD:6550 Design Fundamentals in Digital Scholarship 1 s.h.
Exploration of the role of design in communication while empowering students to grow more comfortable verbalizing the visual; students more accurately describe design elements, produce basic promotional assets, and assess legibility, navigability, and accessibility.

GRAD:6551 Promoting Your Scholarship 1 s.h.
Exploration of ways to communicate research clearly and effectively; investigation of social media platforms as a means of promoting research; promotional material design basics; online portfolio design and differences between curriculum vitae and résumé; experimentation with scholarship presentation; introduction to a variety of forms from press releases and pitches to interdisciplinary conferences and social media.

GRAD:6590 Digital Humanities Capstone arr.
Application and practice of classroom experience to a specific project under guidance from a faculty member and project team leader. Prerequisites: CLAS:7290. Requirements: admission to public digital humanities certificate program, an approved certificate plan of study on file, completion of 12 s.h. of approved coursework, and good standing in all required certificate coursework.

GRAD:6800 CIC Scholar arr.

GRAD:6801 Regents Exchange Program arr.

GRAD:6995 Interdisciplinary Studies Capstone arr.
Development of a project applying research and expertise acquired through completed coursework to an area of interest fitting student's academic and/or career ambitions; may include final presentation, portfolio, and/or written paper.

GRAD:6997 Graduate/Professional Transfer arr.

GRAD:6998 Undergraduate Transfer arr.

GRAD:6999 Resident/Fellow/Post-Doctoral 0 s.h.

GRAD:7280 Obermann Center for Advanced Studies Special Topics Seminars 1-3 s.h.
Active participation and engagement in a major program, such as the annual Humanities Symposium; readings on interdisciplinary histories, contexts, and theoretical perspectives that frame featured events; work of artists, scholars, and researchers participating in the program. Requirements: admission to Graduate College.

GRAD:7385 Teaching and Learning in Higher Education 3 s.h.
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as CSED:7385, EDTL:7385, EPLS:7385, PSQF:7385.

GRAD:7400 Practicum in College Teaching arr.
Supervised college teaching experience; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations. Requirements: admission to the graduate certificate in college teaching program.

GRAD:7601 Postdoctoral Research Scholar 0 s.h.
Requirements: postdoctoral standing.

GRAD:7602 Postdoctoral Research Fellow 0 s.h.
Requirements: postdoctoral standing.

Applied Mathematical and Computational Sciences

Chair

- Laurent O. Jay (Mathematics)

Graduate degree: PhD in applied mathematical and computational sciences

Faculty: https://amcs.uiowa.edu/faculty-research

Website: https://amcs.uiowa.edu/

Applied mathematical scientists consider problems in science and engineering formulated in mathematical terms. They solve those problems using analytical techniques, numerical methods, and computational tools. They discuss, interpret, and evaluate the results. They explore various areas of mathematical application and develop new models and methods when needed.

Programs

Graduate Program of Study

Applied Mathematical and Computational Sciences Courses

AMCS:5900 Seminar: Applied Mathematical and Computational Sciences **arr.**
Current research by faculty, students, guests.

AMCS:7990 Reading and Research **arr.**

Applied Mathematical and Computational Sciences, PhD

The PhD program in applied mathematical and computational sciences is broadly based and interdisciplinary. It is designed to help students achieve a command of applied mathematical techniques and computational tools and obtain basic knowledge in another area (e.g., in physics, engineering, operations research, chemistry, computer science, economics, statistics, geography, or in the biological, medical, or social sciences). The program is flexible; students can concentrate on applied mathematics areas, such as differential equations and numerical analysis, or on other applicable techniques in mathematics. Scientific computing is an important part of applied mathematics, so it is often a part of student training and dissertation research. Prospective students should have a desire to apply mathematical techniques or theory to relevant problems in an outside area.

Learning Outcomes

Students will gain:

- proficiency in core applied mathematics subjects and broad knowledge in mathematics;
- proficiency in computer programming/scientific computing;
- excellent knowledge in at least one application area outside mathematics;
- ability to communicate knowledge and research work to various audiences; and
- ability to carry out research and work independently at a professional level.

Requirements

The Doctor of Philosophy program in applied mathematical and computational sciences (AMCS) requires a minimum of 72 s.h. of graduate credit.

Course of Study

Faculty members can help each student plan a course of study that is consistent with the student's background, interests, and goals. Individual plans are designed to help students develop expertise in methods of applied mathematics and build a strong foundation in related topics. They also provide sufficient knowledge in an outside area to enable students to use mathematical techniques in that area. Students may also arrange their study plan to earn a master's degree from another department after they complete part of their plan. Students find suitable thesis problems and supervisors with the help of the faculty.

Required Courses in Core Areas

Students must successfully complete these three core course sequences in the first two years of graduate study.

Course #	Title	Hours
All of these:		
MATH:5200 & MATH:5210	Introduction to Analysis I and Introduction to Analysis II	6
MATH:5600 & MATH:5700	Nonlinear Dynamics With Numerical Methods and Introduction to Partial Differential Equations	6
MATH:5800 & MATH:5810	Numerical Methods I and Numerical Methods II	6

Outside Area Courses

Students must take and pass PhD-level courses in areas in which mathematics is applied: one preparation course in the first two years of study and then two advanced courses outside of mathematics numbered 6000 or above.

Advanced Mathematics Course Requirement

In order to establish a solid foundation in mathematics, students must successfully pass two more mathematics courses (prefix MATH) numbered 5000–5999 and complete at least 12 s.h. of graduate mathematics courses numbered 6000–7999, with the exception of seminar courses. The courses should be chosen to obtain mathematical breadth and must be approved by the AMCS chair.

Comprehensive Examination

Students complete a comprehensive examination that covers their research area within three and a half years after beginning their graduate study. The examination is typically based on outside area courses and/or directed readings.

Admission

Applicants must carefully follow the applied mathematical and computational sciences (AMCS) application procedures and they must meet the Graduate College Admission Requirements on the Graduate Admissions website. Those interested in applying may also view Admissions on the Graduate College website.

To be prepared for graduate-level coursework in applied mathematics, applicants should have a bachelor's or master's degree with a strong mathematics or computational component.

Applications for fall admission are due on Jan. 15. For more information about the academic program, contact the chair of the Applied Mathematical and Computational Sciences Program. The Manual of Rules and Regulations on the Graduate College website can also provide additional information.

Career Advancement

Career opportunities for applied mathematicians include positions in teaching and research institutions, national laboratories, the technology industry, business companies, and consulting firms.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Students must pass (grade of B-minus or higher in each course) all three core course sequences (or be exempted) in the first two years of graduate study.

c Taken in August.

d Students must take and successfully pass two MATH courses numbered 5000-5999, and complete at least 12 s.h. of MATH courses numbered 6000-7799 with the exception of the seminars. Work with faculty advisor to determine appropriate graduate coursework and receive departmental approval.

e Students must take and pass PhD level courses in areas in which mathematics is applied: one preparation course in the first two years and then two advanced courses outside of mathematics at the 6000 level or above.

f Work with faculty advisor to determine appropriate graduate coursework and sequence.

g Dissertation defense.

Biomedical Science

Director

- Prabhat Goswami

Graduate degrees: MS in biomedical science; PhD in biomedical science

Website: https://biomed.medicine.uiowa.edu/

The University of Iowa Biomedical Science Program is a first-year umbrella program that provides students the opportunity to explore multiple disciplines prior to affiliating with one of seven PhD programs.

The first year curriculum is tailored to enhance a student's education goals for the PhD program(s) in which they are most interested. Students choose from more than 280 laboratories for three different research rotations. At the end of the first year, students select their thesis laboratory and graduate program. Successful completion culminates with a PhD in biomedical science and affiliation with a respective subprogram.

Students select from one of seven subprograms: cancer biology [p. 1702]; cell and developmental biology [p. 1704]; experimental pathology [p. 1706]; free radical and radiation biology [p. 1708]; molecular medicine [p. 1710]; molecular physiology and biophysics [p. 1711]; or pharmacology [p. 1713].

Visit the Biomedical Science Program website for more information.

Programs

Graduate Programs of Study

- Master of Science in Biomedical Science [p. 1700]
- Doctor of Philosophy in Biomedical Science [p. 1701]

Admission

The Biomedical Science Program is sufficiently flexible to accommodate students with a relatively wide range of backgrounds. Students with a bachelor's degree in any of the biological, biochemical, engineering, or physical sciences who have a strong desire to pursue a research-oriented career are encouraged to apply. Students must have:

- a bachelor's degree from a regionally accredited American college or university or an equivalent degree from another country as determined by Admissions; and
- a minimum grade-point average of 3.00 or higher or the equivalent from another country as determined by Admissions.

Facilities

Biomedical science researchers benefit from state-of-the-art core research facilities and research support facilities. Much of the research is interdisciplinary, with collaborations coordinated through major research centers, institutes, and programs. The main biomedical research campus consists of over half a million square feet in seven buildings that connect directly with University of Iowa Health Care through tunnels and skywalks. The interconnectedness of the campus facilitates basic and translational collaboration across the entire college.

Financial Support

Students receive stipend and tuition support contingent on the continued availability of that funding. While the university makes every reasonable effort to ensure ongoing financial support, unforeseen changes in funding could affect continued support. Sources of support include departmental funds, training grants, research grants, and individual fellowships. Several offices on campus provide support for graduate trainees seeking to obtain prestigious fellowship awards to support their training. Continued financial support beyond the first year is also contingent on satisfactory academic performance and progress toward degree completion.

Career Advancement

The Biomedical Science Program prepares students for successful careers as researchers, educators, and future leaders in the international biomedical workforce. The core biomedical science curriculum has elements that highlight career diversity for PhD students and professional development for scientific careers. In addition, the Grad Success Center in the Graduate College provides opportunities for further development and one-on-one guidance for those searching for jobs and navigating pathways into scientific careers.

Courses

- Biomedical Science Courses [p. 1698]
- Cancer Biology Courses [p. 1699]

Biomedical Science Courses

BMED:5207 Principles of Molecular and Cellular Biology **3 s.h.**
Structure of DNA, RNA, and Protein; DNA replication, genetic and epigenetic regulation; RNA production and processing; protein production and post-translation modification; cellular membranes and trafficking; cytoskeleton and regulation of cell junctions and migration; signal transduction and regulation of cell cycle and apoptosis; didactic lectures and group discussion of primary research publications.

BMED:5208 Topics in Principles of Molecular and Cellular Biology **1 s.h.**
Research literature discussion that parallels subjects discussed in BMED:5207. Corequisites: BMED:5207.

BMED:7270 Scholarly Integrity/Responsible Conduct of Research I 0 s.h.
Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/ scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects). Requirements: successful completion of CITI online training (greater than 80% score for each module) and enrollment in Graduate College degree-seeking program. Recommendations: minimum first-year graduate standing (PhD, MS/MA), and involvement in mentored research activities (extramurally or intramurally funded).

BMED:7271 Scholarly Integrity/Responsible Conduct of Research II 0 s.h.
Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/ scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects). Requirements: successful completion of CITI online training (greater than 80% score for each module) and enrollment in Graduate College degree-seeking program. Recommendations: minimum of first-year graduate standing (PhD, MS/MA) and involvement in mentored research activities (extramurally or intramurally funded).

BMED:7604 Scholarly Integrity/Responsible Conduct of Research I 0 s.h.
Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/ society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects); meets responsible conduct of research training obligation for postdocs and faculty holding an NIH K award. Requirements: successful completion of CITI online training (greater than 80% score for each module).

BMED:7605 Scholarly Integrity/Responsible Conduct of Research II 0 s.h.
Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/ society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects); meets responsible conduct of research training obligation for postdocs and faculty holding an NIH K award. Requirements: successful completion of CITI online training (greater than 80% score for each module).

BMED:7777 Biomedical Science Seminar 1 s.h.
Foundational professional development in writing and oral presentation skills; presentations from local and visiting professors focusing on career pathways for biomedical scientists; students practice presenting their research in rotation presentations with detailed feedback.

BMED:7888 Biomedical Science Research arr.
Research experience in biomedical science graduate program faculty member's lab; students rotate in three labs during their first year to provide a range of biomedical research experience before choosing a dissertation research mentor.

Cancer Biology Courses

CBIO:3310 Practical Data Science and Bioinformatics 3 s.h.
Understanding how to access large biological data sets and use them to answer biological questions is an important skill for researchers; immersive introduction to computational handling of data; how to access and analyze publicly available data; critically evaluate data quality and analysis in context of measuring gene expression; basic coding in R/RStudio, plotting and data display, fitting and regression, statistical inference, statistical models, downloading and data wrangling; basic introduction to machine learning (clustering); for students with no computational background. Prerequisites: BIOL:1411 with a minimum grade of C- and BIOL:1412 with a minimum grade of C-. Requirements: college algebra. Recommendations: BMB:3110, or BMB:3120 and BMB:3130, or other upper-level life sciences courses. Same as BMB:3310, MMED:3310.

CBIO:5500 Topics in Cancer Biology 1 s.h.
Discussion and presentation of new scientific literature in cancer biology fields; how to evaluate and critically interpret scientific literature, data, and conclusions; journal club format. Requirements: admission to cancer biology graduate program.

CBIO:6000 Seminar: Cancer Research 1 s.h.
Attendance at seminar presentations of cutting-edge science in the field of cancer biology; presentations by experts in the field and trainees. Requirements: admission to cancer biology graduate program.

CBIO:6500 Research in Cancer Biology arr.
Research experience through research rotations and conduction of dissertation research in cancer research laboratories. Requirements: admission to cancer biology graduate program.

CBIO:7000 Clinical Connections 1 s.h.
Shadowing experiences arranged with clinicians who are treating cancer patients at University of Iowa Health Care. Requirements: admission to cancer biology graduate program.

CBIO:7001 Molecular and Cellular Biology of Cancer 3 s.h.
Fundamental aspects of oncology at cellular and molecular levels; mechanisms of cancer initiation and progression, oncogene action, DNA damage and repair, carcinogenesis by radiation, chemicals, viruses; tumor immunology, anticancer therapies. Offered spring semesters. Prerequisites: BMED:5207. Requirements: strong basic science background. Same as FRRB:7001, PATH:7001.

CBIO:7500 Crafting a Scientific Proposal 1 s.h.
Training in areas of scientific writing and development of a scientific proposal; students develop a proposal related to, but not identical to, the proposal for the comprehensive exam. Requirements: admission to cancer biology program.

Biomedical Science, MS

There is no direct admission to the MS program in biomedical science. Students interested in biomedical science are considered for PhD admission only. Visit the PhD in biomedical science [p. 1701] in this section of the catalog for information about the PhD degree program.

Biomedical Science, PhD

The Biomedical Science Graduate Program optimizes students' mobility and their ability to explore several graduate programs during their first academic year before affiliating with a specific biomedical science subprogram—cancer biology, cell and developmental biology, experimental pathology, free radical and radiation biology, molecular medicine, molecular physiology and biophysics, or pharmacology.

Students thrive in a collaborative environment in which they explore subprograms by performing three research rotations in the laboratories of any of the biomedical science faculty, regardless of their departmental or program affiliation. Biomedical science students are advised regarding course selections, research rotations, and registration by a designated faculty academic advisor. Students can tailor their choice of electives based on their interests.

Following completion of the first year, it is expected that students will be able to select a research laboratory and subprogram affiliation. The specific subprogram students choose for thesis training determines their curriculum for subsequent years.

Core Curriculum

First Year, Fall

Course #	Title	Hours
One of these:		
BIOS:4120	Introduction to Biostatistics	3
PCOL:5204	Basic Biostatistics and Experimental Design	1

BMED:7888	Biomedical Science Research	arr.
Elective course(s)		

First Year, Spring

Course #	Title	Hours
BMED:7777	Biomedical Science Seminar	1
BMED:7888	Biomedical Science Research	arr.
MMED:6260	Methods for Molecular and Translational Medicine	1
PHAR:6504	Mastering Reproducible Science	1
One of these:		
FRRB:7000	Redox Biology and Medicine	4
FRRB:7001	Molecular and Cellular Biology of Cancer	3
PATH:5270	Pathogenesis of Major Human Diseases	3
PCOL:5130	Basic Concepts in Pharmacology	3

Admission

Applicants must have a baccalaureate degree from a regionally accredited U.S. college or university, or an equivalent degree from another country as determined by University of Iowa Admissions. They must also have an undergraduate grade-point average of at least 3.00. Applicants must meet the admission requirements of the Graduate College.

Appropriate preparation includes a one-year, college-level course in biology, chemistry (inorganic and organic), and mathematics through calculus.

Learning Outcomes

Core Learning Outcomes

Students will:

- demonstrate expertise in foundational aspects of molecular and cellular biology, particularly in a human biomedical context;
- develop hypotheses and experimental methods that can be used to explore questions in molecular biology;
- apply knowledge of biomedical science to human disease through translational research paradigms;
- describe fundamental techniques, statistical methods, and core principles of rigor and reproducibility in biomedical science;
- describe the range of career pathways in the sciences for the biomedical PhD;
- develop proficiency in reading and interpreting scientific literature; and
- develop skills in written and oral communication of scientific work.

Cancer Biology

Students will:

- master foundational knowledge in cancer biology and demonstrate in-depth knowledge in their area of emphasis;
- understand and apply the scientific method, design experiments, and conduct research utilizing team-based collaboration, knowledge of current literature, and current laboratory methods;
- gain an appreciation of clinical management and therapeutic approaches to treat cancer;
- develop advanced skills in scientific writing and oral presentations in order to effectively communicate research progress and goals;
- exhibit and foster the highest ethical standards in the areas of education, publication, and scientific inquiry; and
- publish at least one first-author paper and write a grant application.

Cell and Developmental Biology

Students will:

- master foundational knowledge in cellular and developmental biology;
- engage in designing and executing experiments to test scientific hypotheses;
- critically evaluate scientific findings;
- communicate scientific findings effectively to diverse audiences;

- exhibit and foster ethics in the areas of education, publication, and scientific inquiry; and
- become an effective teacher of the biological sciences.

Experimental Pathology

Students will:

- demonstrate subject matter expertise in basic cell and molecular biology, biostatistics/bioinformatics, and pathobiology/mechanisms of human disease;
- understand and apply scientific methods allowing for the appropriate development and testing of hypotheses, problem-solving, and utilization of current literature and contemporary laboratory approaches;
- understand and apply the need to conduct research using a team-based approach, including ongoing input from the thesis mentor/committee as well as peers within the laboratory and graduate program environment;
- understand and apply the key principles of carrying out research and interpreting results using the highest ethical standards; and
- acquire the ability to effectively communicate research goals, approaches, and results using both written and oral means.

Free Radical and Radiation Biology

Students will:

- demonstrate comprehensive knowledge of foundational principals in free radical and radiation biology, a clear understanding of all free radical and radiation biology course material, and a thorough knowledge of the literature in their area of major emphasis;
- demonstrate a functional comprehension of scientific research, such as the use of relevant literature, the formulation of a hypothesis, hypothesis testing, data interpretation, and the lucid presentation of the research in both written and oral form;
- acquire and develop classroom and laboratory teaching skills;
- acquire advanced scientific writing and communication skills competing at the national level for visibility in scholarly activities and funding opportunities;
- produce research results worthy of publication in high-impact peer-reviewed journals relevant to the field of study; and
- participate in career development and networking activities at the local, regional, and national levels.

Molecular Medicine

Students will gain knowledge in:

- tracks for specialized coursework—demonstrate broad-based understanding of one of three tracks selected by students in their second year of studies (metabolic disorders, cardiovascular biology, or molecular and cellular medicine);
- oral and written presentation of scientific data—demonstrate proficiency in scientific writing as evidenced by external fellowship application requirement; organize, defend, and communicate ideas effectively in scientific oral presentations and settings; opportunities to present posters, full-length seminar presentations, short-form data blitzes, lay audience elevator pitches; comprehensive exam; on-topic or off-topic NRSA-style research proposal that is orally defended to a comprehensive exam committee comprised of subject-matter experts; scientific editing and research communication core; and service promoted to students to get one-on-one instruction in scientific editing, focused especially on grant writing;
- experimental design—instruction on experiment design provided by their mentor, experiences in the critical thinking course, and in the basic biostatistics and experimental design course;
- proficiency in research—three laboratory rotations before affiliating to a lab, conduct research in a responsible and ethical manner, carry out an in-depth research project, and contribute intellectually and technically to all parts of its development, execution, and analysis; and
- professional skills development—journal clubs, a course in critical thinking, and career development series.

Molecular Physiology and Biophysics

Students will:

- demonstrate a basic knowledge of physiology and biophysics that will serve as the foundation for the student's academic, scholarly, and research endeavors;
- exhibit the necessary practical, methodological, and technical expertise to perform original experimental work in an area of physiological research;
- gain professional skills required for successful academic or research-based careers, including skills in publishing, grant writing, presentation, and teaching; and
- acquire knowledge and respect for principles of biomedical research ethics.

Pharmacology

Students will:

- identify important research problems through the development of subject matter expertise related to pharmacology, and critical evaluation of the current state of knowledge in that area of expertise;
- formulate valid and testable hypotheses and/or research questions, and then plan feasible experiments to address them;
- conduct, analyze, and interpret independent original research that contributes new knowledge to the field of pharmacology;
- effectively communicate research results to a range of audiences in both written and oral formats; and
- conduct all aspects of research and communication of results with the highest ethical standards.

Cancer Biology

The Doctor of Philosophy in biomedical science with a cancer biology subprogram requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree.

Students enter the molecular medicine subprogram through the Biomedical Science Program. The Biomedical Science Program is designed to provide students maximum flexibility during the first year of graduate studies to take a course of study compatible with several programs while completing research rotations. At the end of the first year, students choose a subprogram affiliation. The cancer biology subprogram provides training in many areas of research—cell biology, genetics, immunology, and cell metabolism, among

others—that are necessary to understand the complexities of cancer etiology and treatment.

The subprogram does not offer a master's degree. Cancer biology is affiliated with the Holden Comprehensive Cancer Center, which was founded in 1980 and has been designed as a National Cancer Institute NCI-Designated Cancer Center since 2000.

The curriculum is a sequence of required and elective courses that provide students with advanced knowledge in current concepts related to molecular, cellular, and genetic processes that contribute to the development and treatment of cancer. It also provides specialized training in experimental methodology used to study cancer in a laboratory setting. Cancer biology prepares students for a variety of career paths in academic, clinical, and industry environments that deal with the study and/or treatment of cancer.

Students gain clinical exposure by shadowing oncologists. They are expected to have a solid background in chemistry, mathematics, and the biological sciences. They should have completed undergraduate coursework in introductory biology and chemistry, biochemistry, genetics, organic chemistry, physical chemistry, and calculus, and previous coursework in cancer biology is desirable. Deficiencies in a particular area, as determined by the Graduate Studies Committee, can be remedied by the completion of appropriate courses.

Selection of a PhD mentor (thesis advisor) is normally finalized near the end of the spring semester of a student's first year of study. The deadline for selection is determined by the Biomedical Science Program.

Students are required to complete the following core courses prior to their comprehensive examination. Students who wish to take the comprehensive examination should first make arrangements in consultation with their mentor, the program director, and the Student Advisory Committee. The exam is typically completed during the second summer of study.

The PhD in biomedical science with a cancer biology subprogram requires the following coursework.

Core Cancer Biology Curriculum

Additional Requirements

Laboratory Rotations

In order to gain more widespread experience in cancer biology research and to aid in selecting a laboratory home and thesis project, students perform three laboratory rotations prior to the selection of a thesis advisor. Laboratory rotations are normally carried out in research laboratories of the cancer biology faculty. A rotation can be completed with a faculty member outside the cancer biology program with the permission of the program director.

Three rotations, 12 weeks in length, begin in the fall semester of the first year. The goal of the rotations is to gain a

comprehensive view of the mentor's research program, to gain exposure to experimental methods used in the mentor's lab, and to learn about the mentoring styles of faculty members.

Teaching

The cancer biology program does not require teaching. Students with an interest in teaching experience are encouraged to discuss their career plans with their mentor and/or the program director.

Publication Requirements

Students are required to have a minimum of one first-author publication in a peer-reviewed journal prior to graduation. The article must be formally accepted and be in-press status or published prior to graduation. A co-first-authored, peer-reviewed publication will count toward this requirement.

Comprehensive Examination

Students are eligible to take the comprehensive examination when they are in good academic standing as defined by the Graduate College—the student has completed all program core courses with a grade of at least B or has a non-letter grade of pass.

Written Examination

The comprehensive exam is on-topic, meaning the subject should be a student's current research being conducted in the mentor's lab. Students normally take the comprehensive exam during the second spring or summer of their enrollment in the program. They submit a written exam, if that is acceptable to the comprehensive examination committee, and then prepare for an oral examination.

Oral Examination

The purpose of the oral examination is to determine whether the student's written submission adequately represents the student's knowledge. A student may be queried on issues beyond the scope of the written proposal to allow the committee to determine the student's general depth of knowledge.

Final Examination

The thesis committee is selected by each student after the successful completion of the comprehensive examination. Students are eligible for their oral thesis defense after completing 72 s.h. of coursework, publication of at least one primary author manuscript or having one in press status, and with consent of the thesis committee. The procedures are the same as for the comprehensive examination.

Combined Programs

PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical science (cancer biology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Cell and Developmental Biology

The Doctor of Philosophy in biomedical science with a cell and developmental biology subprogram requires 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree. They gain admission to graduate training laboratories in the Department of Anatomy and Cell Biology, Interdisciplinary Graduate Programs, or through direct admission into a specific laboratory.

The PhD in biomedical science with a cell and developmental biology subprogram requires the following coursework.

Core Cell and Developmental Biology Curriculum

Course #	Title	Hours
All of these:		
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
ACB:6220/ MMED:6220/ MPB:6220	Mechanisms of Cellular Organization	3

Elective (optional)		

Electives

Elective course offerings change each year and are determined shortly before the semester begins. Examples of elective courses offered in the past five years that would be acceptable for students in the cell and developmental biology subprogram follow.

Course #	Title	Hours
BIOL:4333	Genes and Development	3
GENE:6150	Genetic Analysis of Biological Systems	3
MMED:6226/ ACB:6226/ MPB:6226	Cell Cycle Control	1
MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions	1
PCOL:6225	Growth Factor Receptor Signaling	1

Additional Requirements

Laboratory Rotations

The faculty advisor, along with the biomedical sciences program director, assists students in the process of selecting their initial laboratory rotation during the first year. The first of three 10-week rotations begins the first week of the fall semester. Students may choose any biomedical science program faculty member laboratory for the remaining two laboratory rotations, depending upon the availability of positions and the mutual interest of students and host faculty. Students have the option of joining the cell and developmental biology subprogram after their three rotations.

Teaching

Students are required to complete a teaching requirement (3 s.h.). They may teach in a combination of 1 or 2 s.h. courses, or one 3 s.h. course. Teaching requirements must be met prior to the final thesis defense and graduation. Most students meet the requirement in the third year after completion of the comprehensive exam. A student must earn a satisfactory report from the course director in order to receive credit for the teaching requirement.

Publication Requirements

It is expected that a student will have contributed as an author to at least one research publication. The publication must demonstrate primary authorship and be at the accepted phase of the publication process. The number of publications and their quality, content, and impact is established by the thesis committee.

Seminar Presentations

Students present their thesis research annually in the cell and developmental biology seminar series in a 30-minute presentation. Evaluation critique by faculty and students is provided.

Comprehensive Examination

The comprehensive examination must be taken before the fall semester of a student's third year.

Written Examination

A written proposal follows the form of a standard National Institutes of Health (NIH) R01 research grant and covers the area of the research proposed for the student's anticipated thesis dissertation. One aim area should be completely of the student's own design, with no input from the thesis advisor.

Oral Examination

The oral examination of the student's research proposal lasts approximately two to three hours. The exam begins

with a brief student presentation on the proposed research project. Questions during the examination may come from the proposal, the thesis research, or other general areas of cell and developmental biology.

Thesis Defense

The five-member thesis committee serves as an advisory body for the preparation of the thesis. The candidate and the committee should meet yearly; however, the candidate, the thesis advisor, or the committee can request a meeting at any time. In the subultimate committee meeting, committee members review the material that is expected to be incorporated into the thesis. The final draft of the thesis is due to the committee two weeks before the final examination. The final examination takes the form of a seminar presented to the program, with questions, comments, and discussion following. After the seminar, the candidate meets with the committee for the final thesis defense.

Combined Programs

PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical science (cell and developmental biology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Experimental Pathology

The Doctor of Philosophy in biomedical science with an experimental pathology subprogram requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree. The subprogram provides students with advanced knowledge of disease pathogenesis at the genetic, molecular, cellular, and systems levels. It also teaches cutting-edge research skills enabling graduates to investigate the basis of disease and lay the foundation for novel and improved therapies.

The curriculum is a sequence of required and elective courses with the goal of providing students with a foundation in current cellular and molecular biology, in-depth knowledge of disease pathogenesis, and specialty content in the area of their thesis work.

Students enter the experimental pathology subprogram through the Biomedical Science Program. These students will perform laboratory rotations. The experimental pathology subprogram may also accept direct admits at this time. These direct admit students will have already identified a faculty mentor and laboratory upon entering the subprogram. Accordingly, these students in experimental pathology do not perform rotations, but begin developing a thesis project with their mentor at the onset of their PhD training. Consistent with the direct admission policy, Medical Scientist Training Program (MSTP or MD/PhD) students may join the experimental pathology PhD subprogram. Admission also is considered off-cycle or for the spring semester.

The PhD in biomedical science with an experimental pathology subprogram requires the following coursework.

Core Experimental Pathology Curriculum

Course #	Title	Hours

Additional Requirements

Laboratory Rotations

Rotations are not required for students entering the experimental pathology subprogram as direct admits, as a faculty mentor will already be identified. All other students will rotate through at least three different pathology labs during their first academic year in the program. This allows students to gain more experience in pathology research and to aid in selecting a laboratory home and thesis advisor.

Teaching

The experimental pathology subprogram does not have a teaching requirement. However, there are opportunities to teach if students desire this experience.

Publication Requirements

Students must have one first-author, peer-reviewed paper published or in press, as well as a co-authored, peer-reviewed paper or review article published or in press prior to being allowed to schedule their dissertation defense.

Comprehensive Examination

The comprehensive examination is generally taken in the spring semester of the second year of study. Students with advanced standing (medical scientist training program students or those with an MS) may choose to take the examination in the fall semester of their second year.

The comprehensive examination is off-topic. The focus of the proposal is on the field of a student's research. To determine the topic, each of the five comprehensive exam committee members choose a recent high-profile paper in the area of the student's research interests, but not directly related to the dissertation project. After examining the papers, the student chooses one and makes it the subject of the comprehensive exam.

The student then prepares and submits a two-page, single-spaced abstract to the committee. The abstract should include the background/rationale, the significance of the question being asked, and an outline of the specific aims. Upon approval of the abstract, the student is given permission to prepare a full proposal based on the NIH R21 format. Specifically, the proposal should be seven single-spaced pages and must include significance, innovation, rationale, and experimental approach. The proposal is then defended orally in front of the entire committee.

Final Examination

The dissertation committee consists of the mentor and four additional faculty. Students are required to select and meet with their committee by the end of the first fall semester of their second year, and at least yearly thereafter.

Upon meeting all requirements, students may then defend their dissertation/final exam. Two weeks prior to the defense, students must provide the entire committee with a completed draft of their dissertation. On the day of the defense, students present a public seminar on their dissertation work. This is then followed by a defense of the dissertation before the entire dissertation committee. A final version of the dissertation is prepared based on suggested edits provided by the committee. After final approval by the research advisor and committee, the dissertation is submitted to the Graduate College.

For more information, see the Experimental Pathology PhD Graduate Program on the Department of Pathology website.

Combined Programs

PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical science (experimental pathology subprogram) in a combined degree program offered by

the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Free Radical and Radiation Biology

The Doctor of Philosophy in biomedical science with a free radical and radiation biology subprogram is interdisciplinary and requires 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree. The possibility exists for a major emphasis in radiation biology or redox biology with a focus on cancer or degenerative diseases associated with aging. Although students with diverse academic backgrounds may enter the program, each student should have a science background which includes at least two years of chemistry, including organic chemistry and biochemistry; one year of physics; two years of biology; and mathematics, including at least one semester of calculus.

FRRB:5000 Radiation Biology and FRRB:7000 Redox Biology and Medicine each only need to be taken one time. They may be taken either in the first or second year of the program.

The PhD in biomedical science with a free radical and radiation biology subprogram requires the following coursework.

Typical Curriculum

First Year, Fall

Course #	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:5208	Topics in Principles of Molecular and Cellular Biology	1
BMED:7777	Biomedical Science Seminar	1
BMED:7888	Biomedical Science Research	arr.
FRRB:5000	Radiation Biology	4
PCOL:5204	Basic Biostatistics and Experimental Design	1

First Year, Spring

Course #	Title	Hours
BMED:7777	Biomedical Science Seminar	1
BMED:7888	Biomedical Science Research	arr.
FRRB:7000	Redox Biology and Medicine	4
MMED:6260	Methods for Molecular and Translational Medicine	1
PATH:5270/ IGPI:5270/ MMED:5270	Pathogenesis of Major Human Diseases	3
PHAR:6504	Mastering Reproducible Science	1

Second Year, Fall

Course #	Title	Hours
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
FRRB:5000	Radiation Biology	4
FRRB:6000	Seminar: Free Radical and Radiation Biology	1
FRRB:6004	Research: Free Radical and Radiation Biology	arr.
FRRB:6006	Topics in Free Radical Biology and Medicine	1
FRRB:6008	Topics in Radiation and Cancer Biology	1
Electives (as appropriate)		

Second Year, Spring

Course #	Title	Hours
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
FRRB:6000	Seminar: Free Radical and Radiation Biology	1
FRRB:6004	Research: Free Radical and Radiation Biology	arr.
FRRB:6006	Topics in Free Radical Biology and Medicine	1
FRRB:6008	Topics in Radiation and Cancer Biology	1
FRRB:7000	Redox Biology and Medicine	4
Electives (as appropriate)		

Elective Courses

Elective courses can be tailored to the student's area of interest.

Course #	Title	Hours
ACB:5203	Gross Human Anatomy for Graduate Students	5-6
ACB:6237	Critical Thinking in Biochemistry and Molecular Biology	1
ACB:6238	Critical Thinking in Genetics	1
ACB:6239	Critical Thinking in Cell Biology	1
ACB:6252/ PTRS:6253	Functional Neuroanatomy	arr.
BIOL:3172	Evolution	4
BIOL:3713	Molecular Genetics (fall)	4
BIOL:4333	Genes and Development	3
BIOL:5412	Fundamental Genetics: Graduate Lecture	3
BIOL:5512	Readings in Genetics	2
BIOS:4120	Introduction to Biostatistics	3
BMB:3140	Experimental Biochemistry (spring)	3
BMB:5244/ PHAR:5542	Molecular Recognition	1
BMB:7251	Introduction to Protein Structures (fall)	1
BMB:7252	Enzymes, Carbohydrates, Nucleic Acids, Lipids, and Membranes (fall)	1
BMB:7253	Introduction to Metabolism (fall)	1
BMB:7254	Metabolism I (spring)	1

BMB:7255	Metabolism II (spring)	1
BMB:7256	Molecular Biology (spring)	1
CS:5110/IGPI:5110	Introduction to Informatics	3
CBIO:7001/ FRRB:7001/ PATH:7001	Molecular and Cellular Biology of Cancer	3
GENE:6150	Genetic Analysis of Biological Systems	3
GENE:7191	Human Molecular Genetics	3
IMMU:6241	Writing a Scientific Proposal	2
IMMU:7221/ MICR:7207	Advanced Topics in Immunology	3
MICR:2157	General Microbiology (fall and spring)	3
MICR:3147	Immunology and Human Disease (fall)	3
MICR:6201/ IMMU:6201	Graduate Immunology (spring)	3
MICR:6247/ IMMU:6247	Graduate Immunology and Human Disease	4
MICR:6259	Graduate Bacteria and Human Disease	3-4
MICR:6267	Graduate Viruses and Human Disease	3
MICR:6268	Biology and Pathogenesis of Viruses	2
MICR:6270	Graduate Bacterial Genetics	3
MMED:6220/ ACB:6220/ MPB:6220	Mechanisms of Cellular Organization (fall)	3
MMED:6226/ ACB:6226/ MPB:6226	Cell Cycle Control	1
MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions (spring)	1
MPB:5153	Graduate Physiology	4
NEUR:7235/ NSCI:7235	Neurobiology of Disease	3
NSCI:5653/ BIOL:5653/ PSY:5203	Fundamental Neurobiology I	3
OEH:6710	Human Toxicology and Risk Assessment (spring)	3
PATH:5270/ IGPI:5270/ MMED:5270	Pathogenesis of Major Human Diseases	3
PATH:8133	Introduction to Human Pathology for Graduate Students (fall)	2-4
PCOL:5135	Principles of Pharmacology	1
PCOL:5136	Pharmacogenetics and Pharmacogenomics	1
PCOL:5137	Neurotransmitters	1
PCOL:6207	Ion Channel Pharmacology	1
PCOL:6225	Growth Factor Receptor Signaling	1
PSQF:6217/ GRAD:6217	Seminar in College Teaching (fall and spring)	1-3
PTRS:6224	Activity-Based Neural and Musculoskeletal Plasticity in Health Care	4

Additional Requirements

Laboratory Rotations

Graduate students rotate through at least three different free radical and radiation biology laboratories during their first academic year with primary and secondary faculty.

Seminar and Journal Clubs

Students must enroll in one seminar for credit once a year for three years as well as a thesis defense seminar. Students should not register for the seminar during their first academic year.

Students enrolled for research credit are required to submit a research report to their advisor on the last day of class each semester. The report is evaluated and graded by the advisor. The report, written in a form that is appropriate for a peer-reviewed publication, should define the goals, aims, and objectives for the specific semester, and describe the progress made by the student toward completion of the research objectives.

Topics in Free Radical Biology and Medicine (FRRB:6006) and Topics in Radiation and Cancer Biology (FRRB:6008) must each be taken at least two times.

Publication Requirements

Students must submit at least one first-author manuscript prior to the thesis defense. All PhD students are expected to have co-author publications prior to graduation and these publications should include first authorship.

Grant Writing Opportunities

National Institutes of Health (NIH) research grant proposals (i.e., F30, F31) and/or equivalent grant submissions are encouraged based on a student's work. The free radical and radiation biology program will provide resources and critiques of the application prior to submission. Students should review the instructions provided in the NIH publication, PHS-398, available from the National Institutes of Health website.

Comprehensive Examination

Students who have successfully completed four semesters since enrollment must take their comprehensive exam no later than February of their third year in the program. Students need to maintain full-time status (minimum of 9 s.h. per semester) prior to their comprehensive examination. The comprehensive examination includes both a written and an oral presentation on the topic of the student’s dissertation research. The written proposal needs to be organized following the National Institutes of Health guidelines for an R01 application. Students are encouraged to consult with their mentors and members of their PhD advisory/examination committee as they develop their research hypothesis and specific aims; this should be limited to one page. Once the hypothesis and aims page has been approved by the committee, the mentor and committee members will not have any input into the development and writing of the rest of the proposal. If appropriate, students are allowed a second attempt at the comprehensive examination. A second attempt needs to be completed no later than August of the same year as the first attempt of the comprehensive examination.

The written proposal is typically 14 pages, which includes an abstract (half-page summary, as a separate page), the hypothesis and aims (one page), the body of the proposal (12 pages), and references not included in the page count. A title page (not included in the page count) with only administrative information, such as the title of the proposal, name of the student, date of examination, and other such information is encouraged. The proposal should be prepared as single-spaced text, in 11-point Arial font.

Final Examination

The final examination is a defense of the thesis and explanation of the scientific principles involved, given in a public seminar and closed-door oral exam, with committee members. The student's research must be summarized in the format required by the Graduate College.

Combined Programs

PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical science (free radical and radiation biology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Molecular Medicine

The Doctor of Philosophy in biomedical science with a molecular medicine subprogram provides interdisciplinary training in the concepts and methodologies fundamental to the investigation of biological processes and molecular mechanisms that relate to human disease. The PhD requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree.

Students enter the molecular medicine subprogram through the Biomedical Science Program. The Biomedical Science Program is designed to provide students maximum flexibility during the first year of graduate studies to take a course of study compatible with several programs while completing research rotations. At the end of the first year, students choose a subprogram affiliation.

The curriculum is a sequence of required and elective courses, which provides students with broad exposure to areas including molecular biology, cell biology, biochemistry, and integrative sciences. It ensures a comprehensive exposure to conceptual and experimental aspects of molecular and cellular biology and translational studies. Sufficient flexibility is provided so that students can adapt the program to permit specialization in their own area of interest. Faculty members are involved in a variety of research projects involving molecular and cellular biology and molecular medicine.

The PhD in biomedical science with a molecular medicine subprogram requires the following coursework.

Typical Curriculum

First Year

See the Core Curriculum [p. 1701] at the beginning of the PhD in biomedical science section of the catalog for a typical first-year schedule.

Second Year

Students select coursework from the following three track areas: metabolic disorders, cardiovascular biology, and molecular and cellular medicine (general).

Course #	Title	Hours
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
MMED:6280	Critical Thinking in Molecular Medicine	1
MMED:7290	Seminars in Molecular Medicine	1
Electives		1-3

Students select coursework from the following three track areas: metabolic disorders, cardiovascular biology, and molecular and cellular medicine (general).

Metabolic Disorders

Course #	Title	Hours
BMB:7253	Introduction to Metabolism	1
BMB:7255	Metabolism II	1
MMED:6230	Pathogenesis of Metabolic and Cardiovascular Disorders	3
MMED:6280	Critical Thinking in Molecular Medicine	1
MMED:7310	Translational Medicine Education Rounds (taken fall and spring semesters)	1

Cardiovascular Biology

Course #	Title	Hours
MMED:6230	Pathogenesis of Metabolic and Cardiovascular Disorders	3
MMED:6280	Critical Thinking in Molecular Medicine	1
MMED:7310	Translational Medicine Education Rounds (taken fall and spring semesters)	1
Elective		3

Molecular and Cellular Medicine (General)

Course #	Title	Hours
MMED:6220/ ACB:6220/ MPB:6220	Mechanisms of Cellular Organization	3
MMED:6280	Critical Thinking in Molecular Medicine	1
MMED:7310	Translational Medicine Education Rounds (taken fall and spring semesters)	1
Related coursework from list in the molecular medicine Graduate Student Guidelines		2
3 s.h. from these:		
MMED:3310/ BMB:3310/ CBIO:3310	Practical Data Science and Bioinformatics	3
MMED:6226/ ACB:6226/ MPB:6226	Cell Cycle Control	1

MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions (elective, 1s.h. maximum)	1
PCOL:6225	Growth Factor Receptor Signaling	1
Elective		1

Additional Requirements

Laboratory Rotations

To ensure that students obtain early involvement in laboratory research, they are required to register for research credits and complete three laboratory rotations during their first year of graduate study. In general, these rotations are in the laboratories of three different molecular medicine faculty members. In some cases, if approved by the molecular medicine program, students may be allowed to complete two of their rotations in the same laboratory.

Teaching

Students are required to complete a teaching requirement (3 s.h.). They may teach in a combination of 1 or 2 s.h. courses, or one 3 s.h. course. This teaching requirement must be met prior to the final dissertation defense and graduation. It is recommended that teaching occurs in the third year following the completion of the comprehensive examination.

Publication Requirements

Students are required to have a minimum of one first-author publication in a peer-reviewed journal. The article must be formally accepted and be in-press status or be published prior to graduation. A co-first-authored, peer-reviewed publication will count toward this requirement.

External Fellowship Application Requirement

Students are required to submit a fellowship to an external funding agency (i.e., National Institutes of Health, American Heart Association) within one year of completing their comprehensive examination or by a date that is mutually agreed upon by the student, the dissertation advisor, and the molecular medicine program.

Comprehensive Examination

Students are expected to complete the comprehensive examination, both written and oral components, before the beginning of their third year. The preliminary specific aims document can be submitted to the comprehensive examination committee any time after approval of the dissertation plan, but must be submitted before April 1. The committee evaluation of the specific aims will be returned to the student within one week. A rejected specific aims document must be revised and resubmitted within three weeks. The committee then has one week to evaluate the resubmitted specific aims. The specific aims must be accepted by a majority vote of the committee before a student can proceed with the development of a full proposal. Only two rounds of submission are allowed.

Following acceptance of the specific aims, a student must submit the written proposal within six weeks. The committee has two weeks to review the written document. The oral presentation to defend the written proposal should be scheduled as soon after the two weeks as possible or at the convenience of the committee. It is expected that all examinations will be completed by July 15, in advance of the end of the student's second year.

The detailed Molecular Medicine Graduate Student Guidelines are located under Program Information on the Molecular Medicine Program website.

Final Examination

The five-member thesis committee serves as an advisory body for the preparation of the thesis. It is expected that a student meets with the committee annually, although the candidate, thesis advisor, or the committee can request a meeting at any time. The final examination takes the form of a seminar presented to the program followed by a final thesis defense with committee members. The student is required to present a complete copy of the thesis to the thesis committee members at least two weeks prior to the final defense date.

Combined Programs

PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical science (molecular medicine subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Molecular Physiology and Biophysics

The Doctor of Philosophy in biomedical science with a molecular physiology and biophysics subprogram offers opportunities for training and research. The degree requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average (GPA) of at least 3.00 to earn the degree.

Students enter the molecular physiology and biophysics subprogram through the Biomedical Science Program. The Biomedical Science Program is designed to provide students maximum flexibility during the first year of graduate studies to take a course of study compatible with several programs while completing research rotations. At the end of the first year, students choose a subprogram affiliation.

Students join an active group of faculty members and advanced students at a time of expanding interdisciplinary biomedical research at the University of Iowa. Faculty in the Department of Molecular Physiology and Biophysics have a strong research focus on the cellular, molecular, and physical mechanisms of physiological processes.

The PhD in biomedical science with a molecular physiology and biophysics subprogram requires the following coursework.

Typical Curriculum

First Year, Fall

Course #	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:5208	Topics in Principles of Molecular and Cellular Biology	1
BMED:7777	Biomedical Science Seminar	1

BMED:7888	Biomedical Science Research	arr.
PCOL:5204	Basic Biostatistics and Experimental Design	1
Elective course(s)		

First Year, Spring

Course #	Title	Hours
BMED:7777	Biomedical Science Seminar	1
BMED:7888	Biomedical Science Research	arr.
MMED:6260	Methods for Molecular and Translational Medicine	1
PATH:5270/ IGPI:5270/ MMED:5270	Pathogenesis of Major Human Diseases	3
Elective course(s)		

Second Year, Fall

Course #	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
MPB:5153	Graduate Physiology	4
MPB:6302	Research Physiology and Biophysics	6

Second Year, Spring

Course #	Title	Hours
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
MMED:6226/ ACB:6226/ MPB:6226	Cell Cycle Control (elective)	1
MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions (elective)	1
MPB:6302	Research Physiology and Biophysics	2
PCOL:6225	Growth Factor Receptor Signaling	1

Elective Coursework Options

Any elective preapproved by the director of graduate studies can be used to meet the elective requirement. A total of 9 s.h. of elective coursework is required.

The most common elective options are the following.

Course #	Title	Hours
GENE:6150	Genetic Analysis of Biological Systems	3
IGPI:5270/ MMED:5270/ PATH:5270	Pathogenesis of Major Human Diseases	3
MPB:6220/ ACB:6220/ MMED:6220	Mechanisms of Cellular Organization	3
NSCI:5653/ BIOL:5653/ PSY:5203	Fundamental Neurobiology I	3

Additional Requirements

Plan of Study

In consultation with the director of graduate studies, each newly admitted student formulates a plan of study to be completed before the comprehensive examination. This plan should include projected dates for completion of the comprehensive examination as well as provision for removal of deficiencies. Before completing the comprehensive exams, the normal course load is 15 s.h. each semester.

Required Courses

It is the intention of the department to have a curriculum that allows coursework to be mostly completed within the first year, though in some instances additional coursework in subsequent years is required. The core curriculum represents a minimum of required classes; although with the advice of the director of graduate studies and thesis advisor, some students may benefit from completing additional coursework.

Requests for waiver of required courses or change of course registration must be approved by the director of graduate studies after consultation with the faculty and the chair of the department.

Evaluation of Progress

Students must meet the progress requirements of the Department of Molecular Physiology and Biophysics and the Graduate College. To meet departmental requirements, students must earn a grade of B or higher in MPB:5153 Graduate Physiology and BMED:5207 Principles of Molecular and Cellular Biology (B-minus or lower constitutes a non-passing grade), a grade of satisfactory (S) for BMED:7270 Scholarly Integrity/Responsible Conduct of Research I, and a GPA of at least 3.00 in all elective coursework (a grade below B, but above D-minus, is permissible for individual electives, so long as the GPA of all combined electives taken during the graduate program remains higher than 3.00).

All core curriculum courses receiving a letter grade must be satisfactorily completed prior to taking the comprehensive exam. According to Graduate College regulations, students cannot take a comprehensive exam in a semester in which they are on academic probation.

Comprehensive Examination

Students admitted directly to the doctoral program are required to complete the comprehensive examination by June 30 of the second year in the program.

Workshop

All postcomprehensive students are required to present a workshop on the progress of their thesis research once per year. Students should consult with the workshop coordinator to arrange presentation dates. Precomprehensive students also are encouraged to present workshops, though it is not required. Students have the option to present a full or half workshop (typically 45 or 20 minutes, respectively).

Research Publication

It is expected that thesis research will result in findings that are of sufficient quality and completeness to warrant publication in good-quality peer-reviewed journals. At least

one first-author peer-reviewed research paper should be accepted for publication prior to the PhD thesis defense. The published paper or a letter from an editor indicating acceptance should be provided to the director of graduate studies before scheduling a final exam date. In certain cases, a first-author research manuscript might be written, but not yet accepted by a journal at the time a final PhD thesis exam is scheduled. In this case, the first-author requirement may be satisfied if trainees submit their manuscript to the preprint server for biology, bioRxiv.

Thesis Defense and Presentation

Students complete a thesis defense with their committee. Once this test is completed they must schedule a public thesis presentation.

Combined Programs

PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical science (molecular physiology and biophysics subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Pharmacology

The Doctor of Philosophy in biomedical science with a pharmacology subprogram requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree.

Qualified students who are interested in earning the Doctor of Medicine along with the PhD may apply to the Medical Scientist Training Program [p. 1901] in a combined MD/PhD program. Students have the opportunity to tailor their curriculum with courses that enhance their educational goals. They take a combination of graduate courses that include seminar courses.

The PhD in biomedical science with a pharmacology subprogram requires the following coursework.

Core Pharmacology Curriculum

Course #	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
MPB:5153	Graduate Physiology	4
PCOL:5130	Basic Concepts in Pharmacology	3
PCOL:5204	Basic Biostatistics and Experimental Design	1
PCOL:6203	Pharmacology for Graduate Students	5
PCOL:6250	Advanced Problem Solving in Pharmacological Sciences	1

Typical Curriculum

First Year, Fall

Course #	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:5208	Topics in Principles of Molecular and Cellular Biology	1
BMED:7777	Biomedical Science Seminar	1
BMED:7888	Biomedical Science Research	arr.
MPB:5153	Graduate Physiology	4
PCOL:5204	Basic Biostatistics and Experimental Design	1

First Year, Spring

Course #	Title	Hours
BMED:7777	Biomedical Science Seminar	1
BMED:7888	Biomedical Science Research	arr.
MMED:6260	Methods for Molecular and Translational Medicine	1
PATH:5270/ IGPI:5270/ MMED:5270	Pathogenesis of Major Human Diseases	3

PCOL:6090	Graduate Research in Pharmacology	arr.
PCOL:6203	Pharmacology for Graduate Students	5

Second Year, Spring

Course #	Title	Hours
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
PCOL:6015	Topics in Pharmacology and Neuroscience	1
PCOL:6080	Pharmacology Seminar	1
PCOL:6090	Graduate Research in Pharmacology	arr.

Additional Requirements

Laboratory Rotations

Newly admitted students complete three 12-week laboratory rotations by the end of the second semester.

Seminar and Journal Clubs

In subsequent semesters, students enroll in PCOL:6015 Topics in Pharmacology and Neuroscience and PCOL:6080 Pharmacology Seminar.

Comprehensive Examination

The comprehensive examination process normally begins during the spring of the student's second year in the program and is completed during the subsequent summer.

The exam consists of writing and defending a related-but-distinct proposal or if desired, an off-topic proposal. A related but distinct proposal is one based on the research program of the student's mentor(s) that is not the student's dissertation project or any other project being conducted in the laboratory. An off-topic proposal is one based on a subject completely unrelated to the student's dissertation research.

During the oral defense, the comprehensive exam committee may pose questions related to the written proposal and may also ask questions to determine whether the student has broad knowledge of the pharmacological sciences.

Publication

A first-authored manuscript derived from a student's thesis research must be accepted for publication before the PhD is granted.

Final Examination

The final oral examination is a defense of the thesis and is conducted by the thesis committee, typically immediately after a thesis seminar.

Combined Programs

PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical science (pharmacology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Academic Plans

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

c Work with faculty advisor to determine appropriate graduate elective coursework and sequence.

d Dissertation defense.

	Total Hours	**72**

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
c If only taking the courses described here, register for the indicated credit hours of BMED:7888; if taking additional courses, register for enough credit hours to bring total up to 15 s.h.
d Students must take this course just once, either during their first or second year.
e Take three times.

f On average, FRRB students complete a total of 30 s.h. of research credit for their PhD degree; no more than 6 s.h. of research credit per semester allowed without prior approval of FRRB faculty.
g Note: Students who are on the T32 Training Grant are required to give a seminar once a year.
h Take by third year spring semester.
i Dissertation defense.

a Students complete three 12-week laboratory rotations by the end of the second semester.

b During the first two semesters, all registered students enroll in BMED:5208 and BMED:7777. In subsequent semesters, students enroll in PCOL:6015 and PCOL:6080.

c Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

d Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

e Register for the indicated credit hours of BMED:7888 if taking the courses exactly as listed on the plan for this semester. If enrolling for additional courses, adjust BMED:7888 credit hours to bring total up to 15 s.h.

f Taking this course now allows for coursework completion in an optimal timeframe.

g Register for the indicated credit hours of PCOL:6090 if taking the courses exactly as listed on the plan for this semester. If enrolling for additional courses, adjust PCOL:6090 credit hours to bring total up to 15 s.h.

h The comprehensive examination process normally begins during the fourth semester and is completed during the fifth semester in the program.

i Dissertation defense.

Center for the Book

Director

- Sara A. Langworthy (Library and Information Sciences)

Assistant Director

- Kathleen Tandy

Graduate degree: MFA in book arts

Graduate certificate: book arts and book studies

Faculty: https://uicb.uiowa.edu/faculty-and-staff-0

Website: https://uicb.uiowa.edu/

The University of Iowa Center for the Book represents a community of faculty, staff, students, and local book specialists with interests in all facets of book production, distribution, and use. Some members of the center actively research the history and circulation of the book, examining the role of books in cultural and historical processes. They also look at how changes in book production affect the way books are viewed as artifacts. Specialists in book arts and technologies study the history and technique of book crafts, including letterpress printing, typography, calligraphy, papermaking, and bookbinding. Others engage in the conservation or production of books, including artists' books and literary fine press publications.

The center offers classes; sponsors lectures, seminars, and workshops; and encourages the exchange of ideas among individuals with interests in the book. A wide range of perspectives on the book as an aesthetic, cultural, and historical artifact is provided by associated faculty, staff, and graduate students in the schools of Art, Art History, and Design, and Library and Information Science; the departments of History and English; the University of Iowa Libraries; the Creative Writing Program (Iowa Writers' Workshop); and other areas. This interdisciplinary membership and the center's facilities combine to provide an exceptional environment for studying the history of the book, its evolution, and its future.

Graduate students may earn a master's degree or a graduate certificate through the Center for the Book. Undergraduate students may add dimension to their majors in English, art, journalism, history, and other disciplines by taking Center for the Book courses in book arts and book studies. They also may include an emphasis on book arts or on cultural and historical aspects of the book in the interdepartmental studies major.

Programs

Graduate Programs of Study

- Master of Fine Arts in Book Arts [p. 1724]
- Certificate in Book Arts and Book Studies [p. 1727]

Courses

Center for the Book Courses

UICB:2100 Creative Writing for Book Arts 3 s.h.
Creative writing in context of book arts; text and image, typography, visual sequence, graphic narrative; zines, chapbooks, broadsides, and artist's books.

UICB:2110 Introduction to Book Arts 3 s.h.
Topics related to artist books, hand bookbinding, letterpress printing, papermaking, and lettering arts. GE: Engineering Be Creative; Literary, Visual, and Performing Arts. Same as BKAT:2110.

UICB:2190 The Book in Global History 3 s.h.
Introduction to history of the book and book arts in diverse global contexts; histories of visual and verbal media, cross-cultural exchange, and the book's impact across time and space; hands-on work with historical books and book arts including papermaking, woodblock and letterpress printing, and binding. GE: Historical Perspectives. Same as ENGL:2901, HIST:2190.

UICB:2600 Graphic Design II 3 s.h.
Fundamentals of typography as a core element in visual communication; introduction to historical typographic practices as well as modern modes of designing with type. Prerequisites: ARTS:1510 and ARTS:1520. Corequisites: DSGN:2500. Same as DSGN:2600.

UICB:2900 Book Design for Publishing 3 s.h.
Introduction to the major aspects of book design, including typography, layout, standard industry software, discussion of trends in the field. Same as ARTS:2900, ENGL:2900, WRIT:2900.

UICB:3140 Literature and the Book 3 s.h.
The relationship between literature and the book as a medium. Same as ENGL:3140.

UICB:3142 Topics in Book History 3 s.h.
Authorship, publishing, etc. within specific historical and cultural contexts. Same as ENGL:3142.

UICB:3280 Elements of Book Art 3 s.h.
Overview of book art process and techniques for nonmajors; introduction to traditional bookbinding skills, nontraditional book structures, and content development for artist books. GE: Engineering Be Creative. Same as BKAT:3280.

UICB:3380 Letterpress 3 s.h.
Introduction to letterpress printing; metal type, relief printing, page layout, and basic typography; basic use of Vandercook Proof Press; experimentation with diverse letterpress techniques. GE: Engineering Be Creative. Same as BKAT:3380.

UICB:3401 Literature and Book History 3 s.h.
Same as ENGL:3401.

UICB:3900 Special Project for Undergraduates arr.
Independent study.

UICB:3980 American Print Culture 3 s.h.
Exploration of a wide range of imagery printed and published in the United States during 19th century (1776-1900); fine art original prints, popular imagery in periodicals and illustrated books, scholarly literature, history of evolving technologies, variety of printed work; shifting reputation of printed art and its makers. Same as ARTH:3980.

UICB:4100 Paperworks 3 s.h.
Conceptual and methodological approaches to 2D and 3D paper works; creation of works that couple unique properties of paper-pulp medium with personal visual ideas and clarity of intent; contemporary issues in paper pulp, medium's relationship to larger art and craft contexts. GE: Engineering Be Creative. Same as BKAT:4100.

UICB:4150 Introduction to Book Studies 3 s.h.
Theory and practice of book studies; meanings of word and image in the book format; comparative study of other media, applied study of the codex as a physical artifact. Same as ENGL:4150, SLIS:4150.

UICB:4205 Bookbinding I: Materials and Techniques 3 s.h.
Hands-on introduction to materials and techniques commonly used in bookbinding. Same as BKAT:4205.

UICB:4210 Boxes and Enclosures 3 s.h.
Hands-on techniques for a variety of book enclosures; appropriateness, aesthetic issues concerning box design; Japanese wraparound case, drop-spine box, hinged and lidded boxes, slipcase; technical skill development. Prerequisites: UICB:4205. Same as BKAT:4210.

UICB:4270 Bookbinding II 3 s.h.
Builds on skills acquired in UICB:4205; projects to complete six bindings based on historical and contemporary models; sewing styles, board attachments, endband types; nonadhesive and case-bound structures, varied materials and binding styles, their effects on structure, aesthetic considerations, further development of solid binding skills; historical development of particular binding practices. Prerequisites: UICB:4205. Same as BKAT:4270.

UICB:4280 Artists' Books 3 s.h.
Exploration of the book as a form for artistic expression; emphasis on conceptual development; relationship between content, form, and structure; how a book's structure and design can enhance and integrate part of the work's meaning. Prerequisites: UICB:4205 or BKAT:4205. Same as BKAT:4280.

UICB:4290 Historical Book Structures 3 s.h.
Historical development of book structures examined through surviving examples, construction of historical models. Prerequisites: UICB:4205.

UICB:4300 Letterpress I 3 s.h.
Mechanics of letterpress printing, typography, and design as applied to hand set metal type and edition printing; printing on a Vandercook proof press; introduction to photopolymer plates and methods of illustration related to edition printing, historical aspects of printing technology, typecasting, type classification; role of letterpress in modern private press and contemporary artist books. Same as ARTS:4300.

UICB:4370 Topics in Letterpress arr.
Rotating topics in intermediate letterpress printing; image-making, relief printing, typesetting, edition printing, print, and book production. Prerequisites: UICB:3380 or BKAT:3380 or UICB:4300 or ARTS:4300.

UICB:4380 Letterpress II 3 s.h.
Builds on skills acquired in UICB:4300; students produce an editioned letterpress printed chapbook or artist book, a poster for a public event, and an image built from metal type; exploration of hand-set metal, digital typesetting, printing from photopolymer plates, and pressure printing; press mechanics and operation; publication philosophies, manuscript acquisition, and topics specific to literary fine press and artist books; historical and contemporary context for literary fine press publications and artist book work. Prerequisites: UICB:4300. Same as ARTS:4380.

UICB:4390 Book and Publication Design 3 s.h.
Students plan, design, and produce a book using Adobe Creative Suite; page layout software, typography, page layout and design, book formatting, handling of image files, preparation of materials for print and other contemporary book media; history of book design, book design in contemporary publishing; visit to University of Iowa Libraries Special Collections. Prerequisites: DSGN:2600 or UICB:4300. Same as ARTS:4390.

UICB:4400 History of Western Letterforms 3 s.h.
History of Western letterforms, with focus on tools, materials, techniques; the major hands, their place in history, their influence on modern times; creation of letterforms using appropriate tools; hands-on approach with emphasis on understanding rather than mastery. Same as ARTS:4400.

UICB:4405 Introduction to Calligraphy Intensive 3 s.h.
Intensive, basic broad pen calligraphy; Roman capitals, lowercase Roman and italic lettering.

UICB:4415 Introduction to Classical Calligraphy 3 s.h.
Basic calligraphy with focus on the hands modern classic typefaces are inspired by (e.g., Roman capitals, lowercase Roman, italic). GE: Engineering Be Creative. Same as ARTS:4415.

UICB:4420 Introduction to Medieval Calligraphy 3 s.h.
Basic calligraphy covering several medieval hands collectively known as blackletter, from heavily vertical Textura to florid Gothic Cursive.

UICB:4490 Advanced Studies in Letter Arts 3 s.h.
Special topics and advanced projects in calligraphy and letter arts. Prerequisites: UICB:4400 or UICB:4415 or UICB:4420. Same as ARTS:4490.

UICB:4910 The Book in the Middle Ages 3 s.h.
Relation of text, decoration, function, creators, and audience in different genres of medieval manuscript books 400-1500 A.D. Same as HIST:4422, SLIS:4910.

UICB:4920 The Book in Early Modern Europe 3 s.h.
History of the book and communication in Europe 1400-1800; production, distribution, and use of texts in cultural context. Same as HIST:4429, SLIS:4920.

UICB:5110 Papermaking I: East Asia, Nepal, and Contemporary Practice 3 s.h.
History, technique, and aesthetics of East Asian and Nepalese papermaking, along with their respective contemporary practices. Same as BKAT:5110.

UICB:5130 Papermaking I: Central Asia, Europe, and Contemporary Practice 3 s.h.
Foundational papermaking; history, technique, and aesthetics of Central Asian, Islamicate, and European papermaking; respective contemporary practices. Same as BKAT:5120.

UICB:5140 Papermaking II: Contemporary Papermaking 3 s.h.
Contemporary papermaking studio practice and conceptual considerations; focus on nontraditional techniques and cross-disciplinary use of paper fibers and handmade paper; handmade paper as a form of artistic expression. Prerequisites: UICB:4100 or BKAT:4100 or UICB:5110 or BKAT:5110 or UICB:5130 or BKAT:5120. Same as BKAT:5140.

UICB:5170 Papermaking III: The Papermakers 3 s.h.
Students hone skills, drawing inspiration from papermaking societies, and conduct hands-on production and research. Prerequisites: UICB:4100 or UICB:5110 or UICB:5130 or UICB:5140 or BKAT:4100 or BKAT:5110 or BKAT:5120. Same as BKAT:5170.

UICB:5180 Advanced Projects in Paper 1-3 s.h.
Advanced independent projects undertaken in a classroom setting; collaborative group discussions to plan, implement, troubleshoot, and evaluate student projects. Prerequisites: UICB:5110 or UICB:5130 or BKAT:5110 or BKAT:5120. Same as BKAT:5180.

UICB:5210 Bookbinding III 3 s.h.
Bookbinding structures based on historical and contemporary models; differences in various binding practices, how these differences affect function, why the styles developed; experience choosing appropriate structures for particular uses; emphasis on fine tuning skills and techniques required for advanced binding practices; sewn endbands, rounding and backing, sewing on varied supports, board attachments, and covering methods. Prerequisites: (UICB:4205 or BKAT:4205) and (UICB:4270 or BKAT:4270). Requirements: for UICB:5210—UICB:4205 and UICB:4270; for BKAT:5210—BKAT:4205 or BKAT:4270 or UICB:4205 or UICB:4270. Same as BKAT:5210.

UICB:5220 Book Conservation 3 s.h.
Practical methods, materials assessment, conservation history and evolution. Prerequisites: UICB:4270. Same as SLIS:5535.

UICB:5280 Advanced Projects in Bookbinding 3 s.h.
Advanced studies in bookbinding; fine binding styles, leather paring and tooling, advanced finishing techniques, refining skills; continued look at differences in regional binding practices, how these differences affect function, and why particular styles developed. Prerequisites: UICB:4270.

UICB:5330 Letterpress III: Imagemaking arr.
Advanced work in alternative and innovative letterpress technologies as they apply to imagemaking processes for fine press printing; topics include pressure printing, photopolymer from nondigital negatives, explorations of type-high surfaces, monoprints on the Vandercook, and applying hand work to editioned prints; students complete a series of print exercises for each process, a small printed book sketch, and a longer format editioned artist book. Prerequisites: UICB:4380. Same as ARTS:5330.

UICB:5340 Letterpress III: The Handprinted Book 3 s.h.
Advanced work in fine press book design; exploration of problems in hand-printing books, choice of manuscript, editing, design, typesetting, proofreading, printing and binding; histories of printing and of the book, emphasis on 20th- and 21st-century book design and literature; issues of book design and production related to letterpress printing. Prerequisites: UICB:4380. Same as ARTS:5340.

UICB:5380 Advanced Projects in Letterpress 3 s.h.
Development and/or production of one substantial project; focus on acquiring or creating a text and/or other content; project development; range of print techniques available in letterpress printing; issues involved in producing editioned artist books or fine press work; opportunity to expand existing printing; classroom setting augments work sessions with in-progress critiques, readings, and visits to special collections. Prerequisites: UICB:4380.

UICB:5520 Studies in Book History and Technologies 0-3 s.h.
Topics related to production, distribution, and consumption of books through history and into the future. Same as SLIS:5520.

UICB:5530 Preservation Management 3 s.h.
Responsible stewardship of collections, integration of preservation into libraries and archives systems, maximizing limited resources, establishing preservation priorities, and advocacy; appropriate care of books, paper, photographs, time-based media (e.g., audio, video, film), and born-digital objects; lectures, discussions, student presentations, and hands-on activities; for students who will be responsible for managing collections. Same as SLIS:5530.

UICB:5540 Topics in Book Arts 1-3 s.h.
Focus on particular techniques and concepts in the book arts and related fields.

UICB:5550 Special Project for Graduate Students arr.
Independent study.

UICB:5600 Reading Culture: History and Research in Print and Digital Media 3 s.h.
What reading means, and what it means to read, have changed with time and place; cultural study of books and reading to evaluate strategies and resources involved in crafting historical interpretations of books and their readers; consideration of ways that reading has always been interdependent with other media, from needlework to social media; how researchers locate and interpret primary source material to study reading culture, and how cultural heritage organizations promote their holdings to researchers. Same as SLIS:5600.

UICB:5930 Topics in Material Analysis 3 s.h.
Analysis and description of physical book artifacts and their component parts (parchment, paper, bookbinding) and allied specialties (the lettering arts, printing and illustration techniques); reading, writing, presentations.

UICB:6100 Book Studies Proseminar 1-3 s.h.

UICB:6370 Topics in Book Studies 3 s.h.
Topics relevant to book studies and special collections. Same as SLIS:6370.

UICB:6510 Book Art Seminar: History, Practice, and Critique 3 s.h.
Art-historical introduction to book arts (printing, bookbinding, papermaking and paperworks, artist bookwork, lettering arts, literary fine press and fine press artist books); influences and origins, contemporary practice, critical considerations; locating field through lenses of fine art, craft, and book history; weekly readings, observational analyses, hands-on exercises; archival research in the University of Iowa Libraries Special Collections; final research, analytical, and/or critical project.

UICB:6520 Graduate Book Arts Workshop 3 s.h.
Development of artwork and studio practice; readings and research in contemporary theory and practice; analysis of visual language; integration of creative activities and critical thinking in student's own art practice and analysis of contemporary work in book arts; group and individual critiques, studio assignments, presentations, discussions.

UICB:6530 Book History Seminar 3 s.h.
Topics, theories, and methods in book history, material textual studies, material culture studies, and critical bibliography. Integration of historical questions, sources, and methods into student's scholarly and creative work. Same as HIST:6130.

UICB:6540 MFA Thesis Hours arr.

Book Arts, MFA

The MFA degree focuses on book arts as a hands-on practice, a creative medium, and a historical and cultural phenomenon. Its principal objectives are to provide aesthetic and scholarly contexts for the making of creative work and the study of book history, arts, and technologies. It also offers a structured program in book-related disciplines for graduate students interested in studio arts, librarianship, and literary and cultural history.

Learning Outcomes

Students will:

- have a breadth of hands-on and contextual (studio, art historical, cultural) experience with art, craft, and design disciplines within the book arts;
- deeply study one or more craft disciplines within the book arts;
- demonstrate sustained, project-based problem-solving accomplished through art-making;
- show proficiency in hand skills (scale: competence, proficiency, excellence/mastery);
- experience an interdisciplinary synthesis of studio art, scholarly practice, and material analysis;
- practice critical thinking within and across these book-based disciplines; and
- gain professional development experience and exposure to career tracks.

Requirements

The Master of Fine Arts in book arts requires a minimum of 60 s.h. of graduate credit, including a thesis. Students complete core courses and work with a faculty advisor to design an individualized curriculum spanning several studio practice disciplines: artist bookwork, bookbinding, lettering arts, digital bookwork, papermaking, or letterpress printing. The degree culminates with the successful completion of a thesis. A Graduate College program grade-point average of 3.00 is required.

All courses must be taken on an A–F basis. A maximum of 12 s.h. of transfer coursework is permitted and requires program approval.

Courses should be selected in consultation with an advisor.

The MFA in book arts requires the following coursework.

Requirements	Hours
Core Requirements	21
Studio Practice Courses	15
Scholarly Inquiry and Material Analysis Courses	6
Additional Electives	18

Core Requirements

With the permission of the advisor, students may be permitted to replace UICB:6520 Graduate Book Arts Workshop with a workshop taught outside of the Center for the Book.

Course #	Title	Hours
These courses:		
UICB:6510	Book Art Seminar: History, Practice, and Critique	3
UICB:6520	Graduate Book Arts Workshop (taken three times for 3 s.h. each)	9
Three of these (9 s.h.):		
UICB:4205/ BKAT:4205	Bookbinding I: Materials and Techniques	3
UICB:4300/ ARTS:4300	Letterpress I	3
UICB:4400/ ARTS:4400	History of Western Letterforms	3
UICB:4415/ ARTS:4415	Introduction to Classical Calligraphy	3
UICB:4420	Introduction to Medieval Calligraphy	3
UICB:5110/ BKAT:5110	Papermaking I: East Asia, Nepal, and Contemporary Practice	3
UICB:5130/ BKAT:5120	Papermaking I: Central Asia, Europe, and Contemporary Practice	3

Studio Practice Courses

Course #	Title	Hours
15 s.h. from these:		
UICB:3280/ BKAT:3280	Elements of Book Art	3
UICB:3380/ BKAT:3380	Letterpress	3
UICB:4100/ BKAT:4100	Paperworks	3
UICB:4205/ BKAT:4205	Bookbinding I: Materials and Techniques	3
UICB:4210/ BKAT:4210	Boxes and Enclosures	3
UICB:4270/ BKAT:4270	Bookbinding II	3
UICB:4280/ BKAT:4280	Artists' Books	3
UICB:4290	Historical Book Structures	3
UICB:4300/ ARTS:4300	Letterpress I	3
UICB:4370	Topics in Letterpress	arr.
UICB:4380/ ARTS:4380	Letterpress II	3
UICB:4390/ ARTS:4390	Book and Publication Design	3
UICB:4400/ ARTS:4400	History of Western Letterforms	3
UICB:4405	Introduction to Calligraphy Intensive	3
UICB:4415/ ARTS:4415	Introduction to Classical Calligraphy	3
UICB:4420	Introduction to Medieval Calligraphy	3
UICB:4490/ ARTS:4490	Advanced Studies in Letter Arts	3
UICB:5110/ BKAT:5110	Papermaking I: East Asia, Nepal, and Contemporary Practice	3

UICB:5130/ BKAT:5120	Papermaking I: Central Asia, Europe, and Contemporary Practice	3
UICB:5140/ BKAT:5140	Papermaking II: Contemporary Papermaking	3
UICB:5170/ BKAT:5170	Papermaking III: The Papermakers	3
UICB:5180/ BKAT:5180	Advanced Projects in Paper	1-3
UICB:5210/ BKAT:5210	Bookbinding III	3
UICB:5220/ SLIS:5535	Book Conservation	3
UICB:5280	Advanced Projects in Bookbinding	3
UICB:5330/ ARTS:5330	Letterpress III: Imagemaking	arr.
UICB:5340/ ARTS:5340	Letterpress III: The Handprinted Book	3
UICB:5380	Advanced Projects in Letterpress	3
UICB:5520/ SLIS:5520	Studies in Book History and Technologies	0-3

Scholarly Inquiry and Material Analysis Courses

Additional courses may apply to this area with departmental approval.

Course #	Title	Hours
Two of these for a total of 6 s.h.:		
UICB:3140/ ENGL:3140	Literature and the Book	3
UICB:3142/ ENGL:3142	Topics in Book History	3
UICB:3401/ ENGL:3401	Literature and Book History	3
UICB:3980/ ARTH:3980	American Print Culture	3
UICB:4150/ ENGL:4150/ SLIS:4150	Introduction to Book Studies	3
UICB:4910/ HIST:4422/ SLIS:4910	The Book in the Middle Ages	3
UICB:4920/ HIST:4429/ SLIS:4920	The Book in Early Modern Europe	3
UICB:4390/ ARTS:4390	Book and Publication Design	3
UICB:5600/ SLIS:5600	Reading Culture: History and Research in Print and Digital Media	3
UICB:5930	Topics in Material Analysis	3
UICB:6100	Book Studies Proseminar	3
UICB:6370/ SLIS:6370	Topics in Book Studies	3
UICB:6530/ HIST:6130	Book History Seminar	3
ARTH:3870	History of Photography	3

Additional Electives

Students complete 18 s.h. in additional electives from Center for the Book courses (prefix UICB) numbered 3000 or above, excluding UICB:3900. A maximum of 6 s.h. in UICB:6540 MFA Thesis Hours may be applied to this requirement.

With the permission of an advisor, students may be able to apply a maximum of 6 s.h. of coursework outside of the Center for the Book toward this requirement.

Combined Programs

MFA/MA in Library and Information Science

The Center for the Book and the School of Library and Information Science offer a combined Master of Fine Arts in book arts/Master of Arts in library and information science. The combined degree program allows students with strong interests in the book arts, book history, and material book studies to also gain expertise in library and information science. The degrees provide book artists and librarians with credentials reflecting a depth of skills and knowledge that have been used to secure positions in special collections libraries and archives. Students in the combined program earn both degrees by completing fewer semester hours than if each degree was completed separately.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, see the MA in library and information science [p. 1773] in the catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. Visit Admissions on the Center for the Book website for more information.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

c Choose three courses for a total of 9 s.h. See the General Catalog for list of approved courses.

d Complete a total of 15 s.h. of studio practice courses. See the General Catalog for list of approved courses.

e Choose two courses for a total of 6 s.h. See the General Catalog for list of approved courses.

f With the permission of the advisor, students may be permitted to replace UICB:6520 with a workshop taught outside of the Center for the Book.

g Must be taken three times for a total of 9 s.h.

h Complete 18 s.h. of additional electives from Center for the Book courses (prefix UICB) numbered 3000 or above, excluding UICB:3900. A maximum of 6 s.h. in UICB:6540 may be applied to this requirement. With the permission of an advisor, students may be able to apply a maximum of 6 s.h. of coursework outside of the Center for the Book toward this requirement.

i Hours may be required for this additional elective if fewer than 6 s.h. of thesis credits are completed.

j Maximum of 6 s.h. of thesis credit allowed.

k Thesis defense.

Book Arts and Book Studies, Graduate Certificate

Requirements

The graduate Certificate in Book Arts and Book Studies requires 18 s.h. of graduate credit. Students must earn a UI cumulative grade-point average of at least 2.75 in certificate coursework. The certificate is open to students enrolled in a graduate degree program and nondegree students.

Courses should be selected in consultation with an advisor.

The program requires the following coursework.

Studio Practice

Combined Programs

Certificate/MA in Library and Information Science

The Center for the Book and the School of Library and Information Science collaborate to offer the Certificate in Book Arts and Book Studies/MA in library and information science. It requires admission to the School of Library and Information Science MA program and the Center for the Book certificate program.

The certificate/MA in Library and Information Science offers multiple pathways into professional engagement with artifacts available in archives and libraries, such as rare and artist books. Students select courses that enable them to gain skills and knowledge in areas of service such as conservation, cataloging, instruction, and outreach. The combined program requires 51 s.h. of coursework. Students take 27 s.h. of library and information science courses (prefix SLIS) and 15 s.h. of book arts and studies courses (prefix UICB). The remaining 9 s.h. may be taken in either School of Library and Information Science or Center for the Book coursework, or from another unit with approval of the School of Library and Information Science.

Admission deadline is Feb. 1 for fall entry. For more information, see Library and Information Science, MA [p. 1773] in the catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. Visit Admissions on the Center for the Book website for more information.

Cognitive Science of Language

Chair, Psychological and Brain Sciences

- Mark S. Blumberg

Coordinator, Cognitive Science of Language

- Robert M. McMurray (Psychological and Brain Sciences)

Graduate certificate: cognitive science of language

Faculty: https://cogscilang.grad.uiowa.edu/people

Website: https://cogscilang.grad.uiowa.edu

The scientific study of language is larger than any one field, due in part to the broad diversity in forms and uses of language. The Cognitive Science of Language Program uses an interdisciplinary approach to the study of language, helping to prepare language scientists who are conversant in multiple domains.

Programs

Graduate Program of Study

- Certificate in Cognitive Science of Language [p. 1730]

Cognitive Science of Language, Graduate Certificate

Requirements

The graduate Certificate in Cognitive Science of Language requires a minimum of 12–15 s.h. of graduate credit. Designed to complement doctoral study, the certificate program is open to University of Iowa PhD students in linguistics, neuroscience, psychology, and speech and hearing science. PhD students in other disciplines may petition to be permitted to earn the certificate. Students must complete a formal application to enter the certificate program; they should contact the program's coordinator before they apply.

The certificate program ensures that students have training in interdisciplinary approaches to the study of language along with a strong theoretical grounding in their PhD discipline. Certificate students work with their PhD advisor and the certificate program's coordinator to develop an individual plan of study that complements their degree program and career interests. In order to be granted the Certificate in Cognitive Science of Language, students must complete all of the requirements of their PhD program as well as all of the certificate requirements.

Certificate students must participate in the cognitive science of language proseminar, a two-semester (6 s.h.) survey course on the five major disciplines within the language sciences—psychology, formal linguistics, neuroscience, communication disorders, and computational approaches. They must also complete three courses on cognitive science or language outside their field of study. Students can choose from the approved courses in the following lists, or they can petition the program for other courses. Students may enroll in the proseminar and three additional courses before or concurrently with other courses in their programs.

Students must include a faculty member from the Cognitive Sciences of Language Program on their PhD comprehensive and dissertation exam committees.

The Certificate in Cognitive Science of Language requires the following coursework.

Requirements	Hours
Proseminar	6
Disciplinary Courses	6-9

Proseminar

Course #	Title	Hours
Both of these:		
PSY:6101/ CSD:6101/ LING:6101	Cognitive Science of Language Proseminar I	3
PSY:6102/ CSD:6102/ LING:6102	Cognitive Science of Language Proseminar II	3

Disciplinary Courses

Students take at least 6–9 s.h. from the following lists (typically three courses).

Communication Sciences and Disorders

Course #	Title	Hours
CSD:3116/ LING:3116	Basic Neuroscience for Speech and Hearing	3
CSD:3118/ LING:3118	Language Acquisition	1-3
CSD:4145	Developmental Language Disorders	3
CSD:5146	Neurogenic Disorders of Language	3
CSD:5233	Aphasia	2
CSD:5256	Anatomy and Physiology of Hearing	3-4
CSD:5282	Clinical Phonology and Speech Sound Disorders	2
CSD:6230	Psychoacoustics	2-3
CSD:6538	Advanced Topics in Speech, Language, and Hearing Research	1

Linguistics

Course #	Title	Hours
LING:3030	Child Language-Linguistic Perspectives	3
LING:4090	Practical Phonetics	3
LING:5010	Introduction to Syntax (requires a corequisite course which does not count toward the certificate)	3
LING:5020	Introduction to Phonology	3
LING:6050	Language Universals Linguistic Typology	3
LING:6080	Topics in Second Language Acquisition	3
LING:7090	Seminar: Problems in Linguistics	2-3

Psychological and Brain Sciences

Course #	Title	Hours
PSY:3670/ LING:3670	Language Processes	3
PSY:7610	Seminar: Cognitive Psychology	2-3

Spanish and Portuguese

Course #	Title	Hours
SPAN:4100	Introduction to Spanish Phonology	3
SPAN:4150	Introduction to Spanish Syntax	3
SPAN:6110	Spanish Phonology	3
SPAN:6120	Spanish Syntax	3
SPAN:6150	Topics in Spanish Language Acquisition	3

College Teaching

Director

- Mitchell J. Kelly (Psychological and Quantitative Foundations)

Graduate certificate: college teaching

Website: https://education.uiowa.edu/areas-study/graduate-and-continuing-education/certificates-and-endorsements/certificate-college

The certificate program in college teaching provides coursework and supervised experiences that prepare graduate students for careers in postsecondary education.

The Certificate in College Teaching is administered by the Graduate College.

Programs

Graduate Program of Study

- Certificate in College Teaching [p. 1732]

College Teaching, Graduate Certificate

Requirements

The graduate Certificate in College Teaching requires a minimum of 12 s.h. of graduate credit. Previous teaching experience does not count toward certificate requirements.

The certificate program is available to all University of Iowa doctoral and master's degree-seeking students and to non-degree seeking students.

Students apply to the certificate program on the Office of Graduate Teaching Excellence (OGTE) website.

The Certificate in College Teaching requires the following coursework. Courses selected from the following categories can be completed in any order at any time.

Category 1

Category 1 coursework provides an overview of basic instructional issues and methods in college teaching. The work requires students to engage in discipline-specific thinking as they consider their own teaching situations.

Students choose two courses (minimum of 6 s.h. required) from the following.

Course #	Title	Hours
At least one of these:		
EPID:7200	Teaching in Epidemiology	3
GRAD:6217/ PSQF:6217	Seminar in College Teaching	3
GRAD:7385/ CSED:7385/ EDTL:7385/ EPLS:7385/ PSQF:7385	Teaching and Learning in Higher Education	3
PSQF:6205	Design of Instruction	3
PSQF:6417	Introduction to Postsecondary STEM Teaching (taken once for 3 s.h.)	3
RHET:5352	Seminar: Topics in Teaching and Professional Development	3
SOC:7010	Teaching Sociology	3
May take one of these:		
JMC:5600	Teaching Media Writing, Production, and Design (must complete the series of three, 5-week, 1 s.h. sections)	3
MUS:6215	Music Theory Pedagogy (music students only)	3
PSQF:6203	Tools and External Representations in Individual and Social Learning	3
PSQF:6211	Universal Design and Accessibility for Online Instruction	3
PSQF:6214	Design of Learning Environments: Theory, Practice, and Method	3
PSQF:6215	Online Instruction: Design and Facilitation	3
PSQF:6216	Tools and Utilities for Online Teaching	3
RHET:7940	Public Speaking for Academics	3

Category 2

Category 2 requires students to complete two practicum courses under the guidance of two different professors. Prior or current experience as a teaching assistant does not count toward this requirement.

Students enroll in one of the following courses twice or two courses from the following list, with each enrollment supervised by a different faculty member. Students earn a total of 3 s.h. for the two enrollments. They can enroll in two practicums with two different professors in the same semester or they can complete practicum experiences in separate semesters.

Course #	Title	Hours
CSED:7380	Internship in Teaching (counseling students only)	1-3
CSED:7470	Counselor Education and Supervision Doctoral Integrated Professional Internships (counseling students only)	3
EDTL:7380	Practicum in College Teaching	1-3
EPLS:7380	Practicum in College Teaching	1-3
GRAD:7400	Practicum in College Teaching (faculty member must be outside the College of Education)	1-3
PSQF:7380	Practicum in College Teaching	1-3

Category 3

For Category 3, students develop a full portfolio that demonstrates their skills and competencies in teaching, research, and service. The portfolio requires sample syllabi, a statement of teaching philosophy, samples of assignments and student work, and reflective essays on critical issues in teaching in higher education. The portfolio artifacts are reviewed and evaluated by the course instructor.

Category 3 requires the following course.

Course #	Title	Hours
EALL:7475	ePortfolio in College Teaching	3

Genetics

Chair

- Lori L. Wallrath (Biochemistry and Molecular Biology)

Graduate degree: PhD in genetics

Faculty: https://genetics.grad.uiowa.edu/people/faculty

Website: https://genetics.grad.uiowa.edu

Prospective doctoral students in genetics should have a strong undergraduate background in science, including courses in general genetics, organic chemistry, biochemistry and molecular biology, introductory physics, and mathematics, as well as a strong commitment to genetic research and teaching. Students are able to make up deficiencies in a particular area during their first year of graduate study.

Programs

Graduate Program of Study

- Doctor of Philosophy in Genetics [p. 1734]

Courses

Genetics Courses

GENE:4213 Bioinformatics 2,4 s.h.
Overview of bioinformatics topics, including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BMB:3120 or MICR:3170 or BIOL:2512 or BMB:3110. Recommendations: grade of B-plus or higher in BIOL:2512 or graduate standing. Same as BIOL:4213, IGPI:4213.

GENE:6150 Genetic Analysis of Biological Systems 3 s.h.
Genetic techniques and approaches for analysis of biological processes; comparison of strengths, weaknesses of a variety of experimental systems.

GENE:6200 Current Topics in Genetics 1 s.h.
Focus is on a broad topic of central importance to genetics and biology as a whole; invited speakers are distinguished researchers from institutions across the country and within the University of Iowa, their work grounded in genetics, and cover diverse topics using a wide range of genetic model systems and approaches; seminar series. Same as ACB:6200.

GENE:6210 Seminars in Genetics 1 s.h.
Attendance at weekly forum and presentation of research data to foster oral communication, presentation skills, and collaboration.

GENE:6234 Basic Biostatistical Methods With Genetics Applications 1 s.h.
Introduction to terminology, fundamental concepts, and methods of biostatistics as applied to genetic research; genetic investigation examples used to illustrate statistical approaches. Same as BIOS:6234.

GENE:6280 Directed Study in Genetics arr.

GENE:7191 Human Molecular Genetics 3 s.h.
Molecular genetic approaches to human disease; the human genome project, linkage analysis, candidate gene screening, special features of inbred populations, triplet repeat expansions, mitochondrial genetics, genetics of complex traits. Requirements: fundamental genetics and molecular biology.

GENE:7301 Graduate Research in Genetics arr.

Genetics, PhD

Learning Outcomes

The PhD in genetics will:

- develop students' ability to learn relevant literature, and to design and complete successful experiments with rigor and reproducibility;
- develop students' ability to communicate concepts, present and publish scientific data, and interact with diverse audiences;
- facilitate students as they acquire teaching skills and develop teaching effectiveness in the classroom and in the laboratory; and
- prepare students for diverse careers in the discipline.

Requirements

The Doctor of Philosophy program in genetics requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of 3.00. The program is designed to promote collaborative investigation and intellectual interaction among students and faculty participants affiliated with several different departments.

Students who enroll in the PhD program are encouraged to obtain a broad background in genetics, including molecular, population, and human genetics. Within this context, course requirements are flexible enough to permit students to tailor their formal coursework to their individual needs. All students are required to do some teaching as part of their development as future scientists and faculty members.

Students have the option to declare a PhD emphasis in computational genetics.

All students enrolled in the program are required to take the following courses.

Course #	Title	Hours
All of these:		
GENE:6150	Genetic Analysis of Biological Systems	3
GENE:6200	Current Topics in Genetics (seminar)	1
GENE:6210	Seminars in Genetics	1
GENE:6234	Basic Biostatistical Methods With Genetics Applications	1
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
One of these:		
GENE:7191	Human Molecular Genetics	3
BIOL:3172	Evolution	4
BIOL:3713	Molecular Genetics	4
BIOL:4333	Genes and Development	3
And these:		
Elective coursework in molecular and microbial genetics, cell and development genetics, human genetics, or computational genetics		8
Seminar courses approved by the program		5
Total Hours		**36**

Even more important than formal coursework is the opportunity to do significant research in genetics. Research interests of the participating faculty include virtually all areas of genetics, ranging from bacteriophage genetics to human medical genetics. In each area of genetics, there is a group of faculty members who have closely related interests.

The university is strong in several related disciplines, including microbial physiology, enzymology, virology, protein biochemistry and molecular biology, computational genetics, and developmental and cell biology, all of which contribute significantly to the overall training program.

In addition to completing research and coursework, students must pass a comprehensive examination, usually at the end of their second year in the program.

Associated Courses

Credit earned in the following courses may be counted toward the PhD in genetics. Not all courses are offered every year.

Course #	Title	Hours
GENE:4213	Bioinformatics	4
BIOL:4386	Introduction to Scientific Computing for Biologists	3
BIOS:7330	Advanced Biostatistical Computing	3
BIOS:7700	Problems/Special Topics in Biostatistics	arr.
BMB:4310	Computational Biochemistry	3
BME:5335	Computational Bioinformatics	3
CS:5430	Machine Learning	3
EPID:5241	Statistical Methods in Epidemiology	4
FRRB:7001	Molecular and Cellular Biology of Cancer	3
IGPI:6480	Knowledge Discovery	3
MICR:6268	Biology and Pathogenesis of Viruses	2
MMED:6220	Mechanisms of Cellular Organization	3
MMED:6226	Cell Cycle Control	1
MMED:6227	Cell Fate Decisions	1
NSCI:7235	Neurobiology of Disease	3
PCOL:6225	Growth Factor Receptor Signaling	1
STAT:4580	Data Visualization and Data Technologies	3
Total Hours		**43**

PhD and Dental Scientist Training Program

PhD students in genetics who have earned a DDS degree may be candidates for advanced training programs in dentistry. For information, contact the College of Dentistry.

Combined Programs

PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in genetics in a combined degree program offered by the Carver College of Medicine and the Graduate College. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Admission

Prospective students should have a strong undergraduate science background and a strong commitment to research in genetics. Previous coursework should include general genetics, biochemistry, organic chemistry, and introductory physics and mathematics. However, deficiencies can be rectified during the first year as a graduate student.

Students who want to apply online should view the Interdisciplinary Graduate Program in Genetics website. For additional information, see the program website.

Students generally begin graduate work in the fall semester.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes

more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

c If needed, adjust the number of semester hours for GENE:7301 so total enrollment equals 15 s.h.

d Counts toward the 5 s.h. seminar degree requirement.

e Choose from: BIOL:3172, BIOL:3713, BIOL:4333, GENE:7191, or take an equivalent course with advisor approval.

f Take 8 s.h. from coursework in molecular and microbial genetics, cell and development genetics, human genetics, or computational genetics. Work with faculty advisor to select appropriate courses from approved list.

g Program seminar followed by the dissertation defense.

Human Toxicology

Director

- Peter S. Thorne (Occupational and Environmental Health/ Civil and Environmental Engineering)

Director, Graduate Studies

- Jong Sung Kim (Occupational and Environmental Health)

Graduate degrees: MS in human toxicology; PhD in human toxicology

Faculty: https://toxicology.grad.uiowa.edu/faculty

Website: https://toxicology.grad.uiowa.edu

Toxicology is the study of how biological, chemical, physical, and radiological agents affect living organisms and the ecosystem, and how to prevent or lessen the adverse effects of those agents. The Human Toxicology Program prepares toxicologists to identify and assess environmental exposures, identify mechanisms by which toxicants affect homeostasis or induce disease, identify interventions to prevent adverse effects and estimate acceptable levels of exposure to protect public health.

The program is interdisciplinary, involving the Graduate College, the College of Public Health, the Carver College of Medicine, and the colleges of Engineering, Liberal Arts and Sciences, and Pharmacy.

The Graduate College supports the Human Toxicology Program. Students receive support from the Iowa Superfund Research Program, the Environmental Health Sciences Research Center, and other faculty research grants.

Programs

Graduate Programs of Study

- Master of Science in Human Toxicology [p. 1738]
- Doctor of Philosophy in Human Toxicology [p. 1740]

Facilities

Training is conducted primarily in laboratories and teaching facilities of the departments and colleges of Human Toxicology Program faculty members. These are among the best-equipped laboratories on campus. Together with the university's central research facilities, they provide access to the most up-to-date research equipment and expertise.

Courses

Human Toxicology Courses

TOX:7173 Professional Development in Toxicology arr.
Presentations and discussion on professional development topics including toxicology research methods and analysis, grant writing, proposal development, oral presentation skills, networking, and creating a portfolio framework that can be used after graduation.

TOX:7180 Toxicology Research Seminar 0-1 s.h.
Contemporary research topics.

TOX:7201 Toxicology Research arr.
Research that constitutes part of the thesis.

TOX:7300 Thesis/Dissertation arr.
Thesis or dissertation research; seminar preparation.

Human Toxicology, MS

Learning Outcomes

Students will be able to:

- demonstrate an in-depth knowledge of the principles of toxicology, including metabolism, toxicity, risk assessment, and specific expertise related to the area of their thesis (molecular biology, in vitro and/or in vivo techniques, analytical methods);
- apply the knowledge and skills of toxicology to conduct independent and innovative research;
- demonstrate high ethical and professional standards and responsible conduct in research; and
- synthesize the knowledge and skills of toxicology to succeed as a professional in diverse toxicology careers.

Requirements

The Master of Science program in human toxicology requires a minimum of 39 s.h. of graduate credit and a thesis. Students must maintain a cumulative grade-point average of at least 3.00.

The program is designed for students who wish to pursue a master's degree as a second degree or through part-time study, particularly those who perform toxicologists' functions in their jobs and who need additional training.

Entering students should have backgrounds in the biological, engineering, and physical sciences and should have completed courses in introductory chemistry, introductory biology, and organic chemistry.

After entering the program, students work with their mentor to choose an advisory committee, which meets at least once a semester to help them explore their research interests. The committee also provides consultation on coursework and research activities and serves as the committee for the final examination (thesis defense).

The Human Toxicology Program is flexible. Students work with their advisory committees to plan a course of study tailored to their individual interests and goals within the field of toxicology.

Required Courses

MS students in human toxicology must successfully complete the following coursework as part of their course of study.

Course #	Title	Hours
One of these:		
OEH:6710	Human Toxicology and Risk Assessment	3
PHAR:6501	Principles and Mechanisms of Chemical Toxicology	3
And all of these:		
TOX:7173	Professional Development in Toxicology	2
TOX:7180	Toxicology Research Seminar (enrollment is required each semester)	0-1
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
OEH:6720	Advanced Toxicology	4

Upon successful completion of all requirements, including the thesis and its oral defense, students are awarded the Master of Science degree.

Admission

Prospective students may apply to the program via a centralized application system; see Admission Information on the Human Toxicology Program website.

Completed applications should be submitted by Jan. 1; applications submitted after that date are reviewed as they are received and are considered for any remaining openings.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

e Thesis defense.

Human Toxicology, PhD

Learning Outcomes

Students will be able to:

- demonstrate an in-depth knowledge of the principles of toxicology, including metabolism, toxicity, risk assessment, and specific expertise related to the area of their dissertation (molecular biology, in vitro and/or in vivo techniques, analytical methods);
- apply the knowledge and skills of toxicology to conduct independent and innovative research;
- demonstrate high ethical and professional standards and responsible conduct in research; and
- synthesize the knowledge and skills of toxicology to succeed as a professional in diverse toxicology careers.

Requirements

The Doctor of Philosophy program in human toxicology requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00.

The program is designed for students with backgrounds in the biological, engineering, and physical sciences. Entering students should have solid training in science, including courses in introductory chemistry and biology, and organic chemistry; knowledge of biochemistry and molecular biology also is useful. Students may remedy deficiencies by taking appropriate courses during their first year of graduate study.

Students begin the program with three two-month rotations in the laboratories of participating faculty members in order to identify a mentor. After the first year, the mentor assumes financial responsibility for the student. With advice from the mentor, each student chooses an advisory committee, which meets at least once a semester to help the student explore the student's research interests. The committee also provides consultation on coursework and research activities and serves as the committee for the comprehensive examination and the final examination (dissertation defense).

The Human Toxicology Program is flexible. Students work with their advisory committees to plan a course of study tailored to their individual interests and goals within the field of toxicology.

PhD students in human toxicology must successfully complete the following coursework as part of their course of study.

Course #	Title	Hours
One of these:		
OEH:6710	Human Toxicology and Risk Assessment	3
PHAR:6501	Principles and Mechanisms of Chemical Toxicology	3
And all of these:		
TOX:7173	Professional Development in Toxicology	2
TOX:7180	Toxicology Research Seminar (enrollment is required each semester)	0-1
BIOS:4120	Introduction to Biostatistics	3
BIOS:5120	Regression Modeling and ANOVA in the Health Sciences	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I (must be completed within first two years of graduate study)	0
OEH:6720	Advanced Toxicology	4

After successfully completing the comprehensive examination, usually at the end of the second year of graduate study, the student advances to PhD candidacy. Students devote all of their time to dissertation research and writing. Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded the Doctor of Philosophy degree.

Combined Programs

PhD/MD

Students may work toward the PhD and the Doctor of Medicine in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Admission

Prospective students may apply to the program via a centralized application system; see Admission Information on the Human Toxicology Program website.

Completed applications are encouraged to be submitted by Dec. 1, but applications after that date are given full consideration. Applications submitted after March 1 are reviewed when received and are considered for any remaining openings.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

c Students register for 0 s.h. until they present their thesis defense, and then should register for 1 s.h.

d Work with faculty advisor to select graduate level coursework to meet research interests and goals within the field of toxicology.

e Students present their dissertation research.

f Dissertation defense.

Immunology

Director

- Kevin L. Legge (Pathology)

Graduate degree: PhD in immunology

Faculty: https://immuno.grad.uiowa.edu/people/faculty

Website: https://immuno.grad.uiowa.edu/

The Immunology Program provides interdisciplinary training in the concepts and methodologies of basic and applied immunology. Faculty members are involved in a variety of research projects dealing with the immune system at all levels—structural, functional, cellular, biochemical, and molecular. Students take coursework in immunology and related disciplines and are directly involved in laboratory research throughout their study.

Programs

Graduate Program of Study

- Doctor of Philosophy in Immunology [p. 1743]

Facilities

Training is conducted in laboratories and teaching facilities of the Carver College of Medicine departments of Internal Medicine, Microbiology and Immunology, Otolaryngology–Head and Neck Surgery, Pathology, Pharmacology, Urology, and the Stead Family Department of Pediatrics, and the College of Public Health Department of Epidemiology. Faculty laboratories and central research core facilities provide students with access to state-of-the-art research equipment.

Courses

Immunology Courses

IMMU:2040 Summer Undergraduate IDGP Research **0 s.h.**

IMMU:6201 Graduate Immunology **3 s.h.**
Immune cell ontogeny, activation, and function of T lymphocytes and B lymphocytes; innate immune effector mechanisms; major histocompatibility complex; antigen presentation; thymocyte positive and negative selection; signaling of T lymphocytes and B lymphocytes; emphasis on experimental methods for analysis of these processes and how they have led to current advanced concepts in immunology. Prerequisites: MICR:3147 or MICR:6247. Requirements: for IMMU:6201—college biology, general chemistry, and introductory immunology courses; for MICR:6201—courses in college biology, genetics, general chemistry, and introductory immunology. Recommendations: for IMMU:6201—courses in biochemistry and genetics; for MICR:6201—biochemistry course. Same as MICR:6201.

IMMU:6211 Immunology Graduate Student Seminar **1 s.h.**
Requirements: immunology graduate standing.

IMMU:6221 Rigor and Reproducibility in Immunology **1 s.h.**
Principles and concepts in rigor and reproducibility; rigorous experimental practices in immunology and study design including concepts in redundancy (e.g., replication, validation, generalization, perturbation, consistency), controls, authentication of key reagents and resources, biological variables, recognition of error, avoidance of logical traps, and intellectual honesty. Prerequisites: IMMU:6201.

IMMU:6231 Research in Immunology **arr.**
Laboratory research. Requirements: immunology graduate standing.

IMMU:6241 Writing a Scientific Proposal **2 s.h.**
How to write a scientific proposal. Prerequisites: IMMU:6201. Requirements: enrollment in immunology graduate program.

IMMU:6247 Graduate Immunology and Human Disease **4 s.h.**
Important principles and key concepts in immunology with a focus on the involvement of the immune system in disease pathogenesis; overview of innate and adaptive immune systems and their functions at cellular and molecular levels; learning enhanced by case-based, small-group discussion and writing exercises. Same as MICR:6247.

IMMU:7221 Advanced Topics in Immunology **3 s.h.**
In-depth analysis of selected areas. Prerequisites: IMMU:6201 or MICR:6201. Same as MICR:7207.

Immunology, PhD

Learning Outcomes

Students will:

- develop the ability to think critically and work collaboratively;
- develop the ability to evaluate data and scientific literature;
- develop the ability to problem solve, expand technical skills, and design rigorous and reproducible experiments;
- develop the ability to communicate their scientific findings and knowledge via both written and oral methods to a variety of audiences; and
- prepare for independent careers as leaders, investigators, and educators in cutting-edge research, teaching, and service in basic and applied immunology.

Requirements

The Doctor of Philosophy in immunology requires 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree. The program provides interdisciplinary training in the concepts and methodologies of basic and applied immunology.

Students complete coursework in immunology and related disciplines, and are directly involved in laboratory research throughout their study. Immunology graduate courses are offered not only to teach students the current concepts and paradigms within the field, but to emphasize the scientific approaches and methods used to attain this understanding.

The PhD in immunology requires the following coursework.

Core Curriculum

Course #	Title	Hours
IMMU:6201/ MICR:6201	Graduate Immunology	3
IMMU:6211	Immunology Graduate Student Seminar	1
IMMU:6221	Rigor and Reproducibility in Immunology	1
IMMU:6231	Research in Immunology	arr.
IMMU:6241	Writing a Scientific Proposal	2
IMMU:6247/ MICR:6247	Graduate Immunology and Human Disease	4
IMMU:7221/ MICR:7207	Advanced Topics in Immunology	3
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
PCOL:5204	Basic Biostatistics and Experimental Design	1
Elective		3

Typical Curriculum

First Year, Fall

Course #	Title	Hours
IMMU:6211	Immunology Graduate Student Seminar	1
IMMU:6231	Research in Immunology	arr.
IMMU:6247/ MICR:6247	Graduate Immunology and Human Disease	4
BMED:5207	Principles of Molecular and Cellular Biology	3
PCOL:5204	Basic Biostatistics and Experimental Design	1

First Year, Spring

Course #	Title	Hours
IMMU:6201/ MICR:6201	Graduate Immunology	3
IMMU:6211	Immunology Graduate Student Seminar	1
IMMU:6231	Research in Immunology	arr.
Elective (optional)		1-3

Second Year, Fall

Course #	Title	Hours
IMMU:6211	Immunology Graduate Student Seminar	1
IMMU:6221	Rigor and Reproducibility in Immunology	1
IMMU:6231	Research in Immunology	arr.
IMMU:6241	Writing a Scientific Proposal	2
IMMU:7221/ MICR:7207	Advanced Topics in Immunology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
Elective (optional)		1-3

Second Year, Spring

Course #	Title	Hours
IMMU:6211	Immunology Graduate Student Seminar	1
IMMU:6231	Research in Immunology	arr.
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
Elective (optional)		1-3

Electives

The following are possible elective choices.

Course #	Title	Hours
ACB:5218/ BIOL:5218/ MICR:5218	Microscopy for Biomedical Research	3
BIOS:4120	Introduction to Biostatistics	3
BMB:7251	Introduction to Protein Structures	1
BMB:7252	Enzymes, Carbohydrates, Nucleic Acids, Lipids, and Membranes	1

BMB:7253	Introduction to Metabolism	1
BMB:7254	Metabolism I	1
BMB:7255	Metabolism II	1
BMB:7256	Molecular Biology	1
MICR:6259	Graduate Bacteria and Human Disease	4
MICR:6267	Graduate Viruses and Human Disease	3
MICR:6268	Biology and Pathogenesis of Viruses	2
MICR:6270	Graduate Bacterial Genetics	3
MMED:6220/ ACB:6220/ MPB:6220	Mechanisms of Cellular Organization	3
MMED:6226/ ACB:6226/ MPB:6226	Cell Cycle Control	1
MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions	1
PATH:5270/ IGPI:5270/ MMED:5270	Pathogenesis of Major Human Diseases	3
PCOL:6207	Ion Channel Pharmacology	1
PCOL:6225	Growth Factor Receptor Signaling	1

Additional Requirements

Laboratory Rotations

Prior to selecting a laboratory for dissertation work, students are expected to perform three laboratory rotations, with each rotation lasting approximately 12 weeks in duration. During the first semester, students should become acquainted with the research interests of the faculty members in the immunology program. This learning process is facilitated by faculty presentations in IMMU:6211 Immunology Graduate Student Seminar during the fall semester. Students are also encouraged to meet with specific faculty to discuss their research programs. This enables students to make an informed decision about their laboratory rotations, with the guidance and approval of their advisor and the graduate studies committee.

At the latest, students should begin their first rotation within the first week of graduate study. Medical Scientist Training Program (MSTP) students who have completed rotations in immunology program laboratories before joining the program are excused from further rotations if joining that immunology laboratory. Students with MS degrees that include a research-based dissertation may be excused from one rotation.

Rotations are graded either satisfactory or unsatisfactory. This grade is based upon a number of criteria including attendance and work habits. When not in classes or seminars, students are expected to spend the remaining portion of the day in the laboratory. Without a strong commitment to the rotation project, it is difficult to fulfill the purpose and aims of the rotation. A satisfactory grade is required in each of the laboratory rotations. If a satisfactory grade is not received in one of the rotations, an additional rotation is assigned. Failure to receive a satisfactory grade in the extra rotation results in the student being placed on academic probation. Following each rotation, an evaluation is given to each student by the faculty member and submitted to the graduate studies committee.

Teaching

Students complete a teaching requirement lasting one semester. A variety of courses are available in several departments, and the program leadership place students in courses based upon interest, expertise, and scheduling.

Publication Requirements

It is expected that the dissertation project be of sufficient breadth, depth, and novelty to result in first-author research publications in high-quality peer-reviewed journals. A minimum of one peer-reviewed paper must be published or in press prior to the completion of the PhD. In addition, a second publication, in which the student is a coauthor on a peer-reviewed article, a review, or book chapter must be published or in press prior to the completion of the degree. Students are not permitted to schedule a dissertation defense until it has been demonstrated that both of these requirements have been met.

Comprehensive Examination

The comprehensive examination is generally taken in the spring semester of the second year of study. MSTP students who joined their dissertation laboratory at the beginning of the first year of graduate study and students entering the program with an MS degree may begin the comprehensive exam process in September of the second year of graduate study.

Students taking the comprehensive examination prepare a single abstract of an original research proposal. The examination committee determines if the abstract topic is appropriate as nonoverlapping in major approach or topic with the student's dissertation research and if the abstract is scientifically sound to potentially serve as the basis for a defensible research proposal. After the abstract is accepted, students are given four weeks to complete and submit the written comprehensive examination proposal. The oral defense is scheduled 14–21 days after the proposal is accepted by the committee, depending on the availability of the committee members. The written portion of the comprehensive exam is written in the form of an NIH-style pilot grant proposal based on the abstract and instructions from the comprehensive examination. A detailed student handbook is available on the Interdisciplinary Graduate Program in Immunology website.

Final Examination

The five members of the thesis committee serve as an advisory body for the preparation of the thesis. The committee meets with each student to review the material that they expect to be incorporated into the thesis. Although meetings with the committee should be yearly, the candidate, thesis advisor, or the committee can request a meeting at any time. A final draft of the thesis must be given to all members of the committee a minimum of two weeks before the final examination.

The final examination takes the form of a seminar presented to the program. This presentation is announced according to Graduate College policy. Questions, comments, and discussion follow. After the seminar, the candidate meets with the committee for the final thesis defense. In some cases revisions may be required. The degree is not awarded until the thesis is signed.

Combined Programs

PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in immunology in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Admission

For information regarding admission and application procedures, visit the Interdisciplinary Graduate Program in Immunology website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Informatics

Chair

- Juan Pablo Hourcade (Computer Science/Nursing)

Graduate degrees: MS in informatics; PhD in informatics

Graduate certificate: informatics

Faculty: https://cs.uiowa.edu/people

Website: https://informatics.grad.uiowa.edu/

The Interdisciplinary Graduate Program in Informatics (IGPI) was proposed in 2006, largely motivated by the increasing amount of research at the intersection of computational disciplines and the humanities, arts, and the natural, biological, health, and social sciences. The proposal to establish the program emphasized the rapid changes brought about by information technology and how they in turn changed approaches across a wide variety of disciplines. Among these changes were the ability to ask different types of questions and analyze information at scales not previously possible.

The program aimed to fill a gap in training for practitioners and researchers who could provide a bridge between computing and other disciplines. IGPI graduates would receive training in core computational and statistical topics and combine it with coursework in a cognate area.

Changes in computing and how it affects society and scholarship make informatics even more relevant today than it was in 2006. One of the key changes has been in the increasing ubiquity of computer devices that facilitate communication and information access. These trends clearly point toward a near future where most people will be able to communicate with most other people around the world, as well as access any information, anytime, anywhere. The main barriers are likely to be political instead of technological. These changes mean that computers are directly affecting the way most people perceive the world, remember information, pay attention, communicate, learn, and make decisions.

This ubiquity means that it is becoming increasingly difficult to exercise one's basic rights and fulfill basic needs without using interactive technologies. People use computers to vote, to stay informed, and to express and share opinions. In addition, people use computers to ride public transportation, get money from banks, and pay for groceries. Hence, there are increased responsibilities in the design of computing systems, as well as the need to study their impact on society.

One final trend that is germane to informatics is the increasing availability and low cost of digital storage and processing, together with the wide availability and use of sensors, digital instruments, and other forms of capturing digital data. The result has been a tremendous growth in the amount of data available to scientists, businesses, and government. These changes have brought about the need for novel analysis techniques, for researchers and practitioners who can understand the data and these techniques, as well as the need to design these systems so they can enable new discoveries and insights while safeguarding privacy.

This world, where computers are playing a vital role not only in academic disciplines, but in society at large, calls for practitioners and researchers who can understand computing and also interface with other fields. IGPI was developed to fill this gap. The program is interdisciplinary, involving the Graduate College, the Carver College of Medicine, the Tippie College of Business, and the colleges of Dentistry, Engineering, Liberal Arts and Sciences, Nursing, Pharmacy, and Public Health. Students may pursue a Master of Science degree in informatics (with one of three cognates in geoinformatics, health informatics, or human-computer interaction) or a PhD in informatics. University of Iowa graduate students in other programs may elect to earn a Certificate in Informatics in addition to their main program of study. All three programs complete the same core courses, with flexible electives that allow students to focus on the subarea of greatest interest to them.

Geoinformatics provides methods and technologies needed to measure, store, analyze, manage, and visualize information about phenomena occurring on or near the earth's surface. It is an increasingly essential technology for understanding and managing the complex world.

Health informatics uses contemporary information technologies to improve the storage, organization, retrieval, and evaluation of health information in order to support clinical, clinical research, and public health applications.

The human-computer interaction cognate is intended for students interested in designing useful and usable technologies. The cognate's courses provide an interdisciplinary foundation including psychology, sociology, and engineering.

Programs

Graduate Programs of Study

- Master of Science in Informatics [p. 1753]
- Doctor of Philosophy in Informatics [p. 1757]
- Certificate in Informatics [p. 1760]

Courses

Informatics Courses

IGPI:3011 Social Science Approaches to Global Health **3 s.h.**
Review of major components of research in the social sciences as they apply to global health topics; preparation for academic pursuits or careers that utilize research to address global health issues in a systematic way. Same as GHS:3010.

IGPI:3050 Geospatial Programming **3 s.h.**
Introduction to geospatial programming with Python; programming basics, data structures, and algorithms; spatial data models and structures; vector-based and raster-based geoprocessing; automating GIS tasks and models; spatial libraries (e.g., ArcPy, GeoPandas, GDAL, PySAL). Prerequisites: SEES:2050. Same as SEES:3050.

IGPI:3100 Introduction to Mathematical Statistics I **4 s.h.**
Review of mathematical basics for mathematical statistics, descriptive statistics, probability, conditional probability, discrete and continuous univariate and multivariate distributions, and sampling distributions. Prerequisites: MATH:1860 or MATH:1560. Same as STAT:3100.

IGPI:3101 Introduction to Mathematical Statistics II **3 s.h.**
Point and interval estimation, testing statistical hypotheses, simple regression, nonparametric methods. Prerequisites: STAT:3100. Same as STAT:3101.

IGPI:3120 Probability and Statistics 4 s.h.
Models, discrete and continuous random variables and their distributions, estimation of parameters, testing statistical hypotheses. Prerequisites: MATH:1560 or MATH:1860. Same as DATA:3120, STAT:3120.

IGPI:3200 Applied Linear Regression 3 s.h.
Regression analysis with focus on applications; model formulation, checking, and selection; interpretation and presentation of analysis results; simple and multiple linear regression; logistic regression; ANOVA; polynomial regression; tree models; bootstrapping; hands-on data analysis with computer software. Prerequisites: STAT:2020 or STAT:2010 or STAT:3120. Same as DATA:3200, ISE:3760, STAT:3200.

IGPI:3212 Bioinformatics for Beginners 3 s.h.
Overview of bioinformatics topics including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics, and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BIOL:2512 or BIOL:2211 or BMB:3120 or MICR:3170. Same as BIOL:3212.

IGPI:3314 Genomics 3 s.h.
Major areas of genomics including genome sequencing, assembly, and annotation; evolutionary genomics, metagenomics, functional genomics, and computational genomics; synthetic biology and genome engineering. Prerequisites: BIOL:1412 and (BIOL:2211 or BIOL:2512 or BIOL:2723 or MICR:3170). Same as BIOL:3314.

IGPI:3330 Introduction to Software Design 3 s.h.
Design of software for engineering systems; algorithm design and structured programming; data structures; introduction to object-oriented programming in JAVA; applications to engineering problems; lab arranged. Prerequisites: ENGR:2730. Same as ECE:3330.

IGPI:3500 Introduction to Environmental Remote Sensing 3 s.h.
Basic concepts and principles of remote sensing; sources of data; georegistration; digital processing and classification of remotely sensed images for extraction of environmental information; linkage of remote sensing techniques with GIS analysis. Same as SEES:3500.

IGPI:3510 Biostatistics 3 s.h.
Statistical concepts and methods for the biological sciences; descriptive statistics, elementary probability, sampling distributions, confidence intervals, parametric and nonparametric methods, one-way ANOVA, correlation and regression, categorical data. Requirements: MATH:0100 or MATH:1005 or ALEKS score of 30 or higher. Same as STAT:3510.

IGPI:3520 GIS for Environmental Applications 3 s.h.
Students learn new, more advanced techniques for the representation and study of human and natural systems using geographic information systems (GIS); application of this new knowledge to environmental management and problem solving. Prerequisites: SEES:2050. Same as SEES:3520.

IGPI:3540 Geographic Visualization 3 s.h.
Concepts and techniques that underlie cartographic representation, interaction, and geovisualization; map symbolization and visual variables; spatiotemporal visualization, multivariate mapping, interactive cartography, animation, geovisual analytics, 3D visualization, virtual and augmented reality. Prerequisites: SEES:2050. Same as SEES:3540.

IGPI:4100 Statistical Inference I 3 s.h.
Review of probability, distribution theory (multiple random variables, moment-generating functions, transformations, conditional distributions), sampling distributions, order statistics, convergence concepts, generating random samples. Prerequisites: MATH:2850 and STAT:3101. Recommendations: undergraduate standing. Same as STAT:4100.

IGPI:4101 Statistical Inference II 3 s.h.
Continuation of STAT:4100; principles of data reduction, point estimation theory (MLE, Bayes, UMVU), hypothesis testing, interval estimation, decision theory, asymptotic evaluations. Prerequisites: STAT:4100. Recommendations: undergraduate standing. Same as STAT:4101.

IGPI:4115 Finite Element I 3 s.h.
One- and two-dimensional boundary value problems; heat flow, fluid flow, torsion of bars; trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisites: ENGR:2750. Same as CEE:4533.

IGPI:4150 Health and Environment: GIS Applications 3 s.h.
Introduction to how geographic information systems (GIS) and spatial statistics are used in the study of patterns of health and disease in space and time. Same as GHS:4150, SEES:4150.

IGPI:4159 Air Pollution Control Technology 3 s.h.
Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Same as CBE:4459, CEE:4159.

IGPI:4200 Statistical Methods and Computing 3 s.h.
Methods of data description and analysis using SAS; descriptive statistics, graphical presentation, estimation, hypothesis testing, sample size, power; emphasis on learning statistical methods and concepts through hands-on experience with real data. Recommendations: graduate standing in non-statistics or less quantitative major. Same as STAT:4200.

IGPI:4213 Bioinformatics 2,4 s.h.
Overview of bioinformatics topics, including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BMB:3120 or MICR:3170 or BIOL:2512 or BMB:3110. Recommendations: grade of B-plus or higher in BIOL:2512 or graduate standing. Same as BIOL:4213, GENE:4213.

IGPI:4373 Molecular Evolution: Genes, Genomes, and Organisms 3 s.h.
Theory underlying phylogenetic analysis with application of these methods to molecular data sets; analysis of multigene data, organellar, and nuclear genome sequences to reconstruct the history of cells. Prerequisites: BIOL:3172 with a minimum grade of C-. Same as BIOL:4373.

IGPI:4500 Advanced Remote Sensing 4 s.h.
Theory and practice of remote sensing and digital image processing; practical applications to human-environment interactions. Requirements: SEES:3100 or SEES:3500 or CEE:3783. Same as SEES:4500.

IGPI:4520 GIS for Environmental Studies: Applications 3 s.h.
Project-driven course to advance student knowledge of geographic information systems (GIS); application of GIS to environmental change analysis, environmental assessment, hazard/risk analysis, and environmental decision-making. Prerequisites: SEES:3520. Same as SEES:4520.

IGPI:4522 Bayesian Statistics 3 s.h.
Bayesian statistical analysis, with focus on applications; Bayesian and frequentist methods compared; Bayesian model specification, choice of priors, computational methods; hands-on Bayesian data analysis using appropriate software; interpretation and presentation of analysis results. Prerequisites: STAT:3200 and (STAT:3101 or STAT:4101 or STAT:3120). Same as PSQF:4520, STAT:4520.

IGPI:4540 Statistical Learning 3 s.h.
Introduction to supervised and unsupervised statistical learning, with a focus on regression, classification, and clustering; methods will be applied to real data using appropriate software; supervised learning topics include linear and nonlinear (e.g., logistic) regression, linear discriminant analysis, cross-validation, bootstrapping, model selection, and regularization methods (e.g., ridge and lasso); generalized additive and spline models, tree-based methods, random forests and boosting, and support-vector machines; unsupervised learning topics include principal components and clustering. Requirements: an introductory statistics course and a regression course. Recommendations: prior exposure to programming and/or software, such as R, SAS, and Matlab. Same as BAIS:4540, DATA:4540, STAT:4540.

IGPI:4580 Data Visualization and Data Technologies 3 s.h.
Introduction to common techniques for visualizing univariate and multivariate data, data summaries, and modeling results; how to create and interpret these visualizations and assess effectiveness of different visualizations based on an understanding of human perception and statistical thinking; data technologies for obtaining and preparing data for visualization and further analysis; students learn how to present results in written reports and use version control to manage their work. Requirements: an introductory statistics course and a regression course. Recommendations: prior exposure to basic use of statistical programming software (e.g., R or SAS) as obtained from a regression course strongly recommended. Same as DATA:4580, STAT:4580.

IGPI:4581 Introduction to Geographic Databases 3 s.h.
Introduction to basic building blocks of spatial database design, spatial data models, structures, relationships, queries (SQL), indexing, and geoprocessing; design and construction of various types of spatial databases, including relational and big data approaches such as ArcGIS geodatabase, PostGIS/PostgreSQL, and MongoDB. Prerequisites: SEES:2050. Same as SEES:4580.

IGPI:4740 Large Data Analysis 3 s.h.
Current areas that deal with problem of big data; techniques from computer science, mathematics, statistics; high performance and parallel computing, matrix techniques, cluster analysis, visualization; variety of applications including Google PageRank, seismology, Netflix-type problems, weather forecasting; fusion of data with simulation; projects. Prerequisites: (CS:1210 with a minimum grade of C- or ENGR:2730 with a minimum grade of C-) and (MATH:3800 or CS:3700) and (STAT:3200 or IE:3760 or IGPI:3200). Same as CS:4740, MATH:4740, STAT:4740.

IGPI:5001 Introductory Methodology 3-4 s.h.
Introduction to quantitative techniques in political science; set theory, probability distributions, estimation, testing; emphasis on acquiring mathematical skills for more advanced quantitative work in political science. Requirements: MA or PhD standing in political science. Same as POLI:5001.

IGPI:5015 Independent Study arr.

IGPI:5110 Introduction to Informatics 3 s.h.
Fundamentals of computer science: algorithms, complexity, relational databases, systems concepts, programming in Python. Same as CS:5110.

IGPI:5120 Regression Modeling and ANOVA in the Health Sciences 3 s.h.
Continuation of BIOS:4120; correlation, simple and multiple linear regression, confounding, interactions, model selection, single and multiple factor ANOVA (analysis of variance) models, contrasts, multiple comparisons, nested and block designs; introduction to mixed models; for non-biostatistics majors. Offered spring semesters. Prerequisites: BIOS:4120. Same as BIOS:5120, STAT:5610.

IGPI:5130 Applied Categorical Data Analysis 3 s.h.
Analysis of proportions, risk measures, and measures of association; Mantel-Haenszel method; logistic regression for binary responses and for matched data; logistic regression for multi-category responses; analysis of count data (Poisson regression and negative binomial regression); analysis of clustered data (generalized estimating equations and generalized linear mixed effects model); special topics include the application of propensity score methods; designed for non-biostatistics majors. Offered fall semesters. Prerequisites: BIOS:5120. Same as BIOS:5130.

IGPI:5199 Applied Statistics I 4 s.h.
Descriptive statistics, basic inferential methods (confidence intervals, chi-square tests); linear models (regression and ANOVA models—specification and assumptions, fitting, diagnostics, selection, testing, interpretation); nonlinear models, logistic regression. Prerequisites: STAT:3101. Corequisites: STAT:4100 or STAT:5100. Requirements: facility with matrix algebra. Same as STAT:5200.

IGPI:5206 Medical Imaging Physics 3 s.h.
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210. Same as BME:5210, ECE:5470.

IGPI:5211 Genes, Genomes, and the Human Condition Graduate Lecture 3 s.h.
Organization, expression, and evolution of genes in context of genomes; focus on human genome; distribution and transmission of variation in human population. Recommendations: BIOL:1411 highly recommended. Same as BIOL:5211.

IGPI:5212 Biomedical Signal Processing 3 s.h.
Application of signal processing methods (e.g., Fourier, Laplace, z-transforms) to biomedical problems, such as analysis of cardiac signals, circadian rhythm, the breathing cycle; computer simulation lab. Same as BME:5200.

IGPI:5251 Advanced Biosystems 3 s.h.
Biological systems unique to systems analysis; operation under nonequilibrium conditions; tools for systems analysis developed from models of systems at equilibrium (i.e., mechanical systems); fundamental difference between biological and mechanical systems that impact systems analysis; expand knowledge of linear systems and begin work with nonlinear systems; various modeling and analysis approaches useful in biomedical and biomedical engineering research. Prerequisites: BME:2200. Same as BME:5251.

IGPI:5270 Pathogenesis of Major Human Diseases 3 s.h.
Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Offered spring semesters. Same as MMED:5270, PATH:5270.

IGPI:5310 Research Data Management 3 s.h.
Introduction to data management techniques and problems encountered in gathering and processing data from biomedical investigations; introduction to SAS, techniques taught in SAS; designed for non-biostatistics majors. Recommendations: prior programming experience with C, C++, Python, Java, or other. Same as BIOS:5310, STAT:5810.

IGPI:5311 Informatics for Sustainable Systems 3 s.h.
Introduction to fundamental and advanced environmental informatics concepts and procedures including automated data collection, data management, data transformations, and processing to support modeling and analysis; scientific visualization of environmental data to support management of food, energy, and water (FEW) resources; sustainability in FEW systems. Same as CEE:5310, URP:5310.

IGPI:5331 Graph Algorithms and Combinatorial Optimization 3 s.h.
Combinatorial optimization problems; time complexity; graph theory and algorithms; combinatorial optimization algorithms; complexity theory and NP-completeness; approximation algorithms; greedy algorithms and matroids. Prerequisites: ECE:3330. Same as ECE:5330.

IGPI:5400 Computing in Statistics 3 s.h.
R; database management; graphical techniques; importing graphics into word-processing documents (e.g., LaTeX); creating reports in LaTeX; SAS; simulation methods (Monte Carlo studies, bootstrap, etc.). Prerequisites: CS:1210 and STAT:3200 and (STAT:3120 or STAT:3101 or STAT:4101). Corequisites: STAT:5100 and STAT:5200 if not already completed. Same as DATA:5400, STAT:5400.

IGPI:5415 Satellite Image Processing and Remote Sensing of Atmosphere 3 s.h.
Introduction to principles of atmospheric radiation and techniques for satellite image processing; hands-on experience with data calibration, image registration and enhancement, noise filtering and (supervised and unsupervised) multi-spectral classification of satellite imageries; various satellite sensors used for monitoring of different atmospheric processes and constituents. Same as CBE:5415.

IGPI:5417 Physical Meteorology and Atmospheric Radiative Transfer 3 s.h.
Physical processes for weather and climate including radiative transfer, cloud and precipitation formation, and atmospheric electricity; theory of scattering by atmospheric particles (e.g., clouds, aerosols, molecules), atmospheric radiative transfer equations, and numerical techniques and tools to solve these equations. Requirements: senior or graduate standing. Same as CBE:5417, CEE:5417.

IGPI:5450 Machine Learning 3 s.h.
Fundamentals of machine learning theory including regression, classification, neural networks, clustering, and principal component analysis; engineering applications. Prerequisites: ECE:2400 or BME:2200. Same as ECE:5450.

IGPI:5460 Digital Signal Processing 3 s.h.
Theory, techniques used in representing discrete-time signals; system concepts in frequency and sampling domains; FIR and IIR digital filter theory, design and realization techniques; theory, application of discrete Fourier transforms/FFT. Prerequisites: ECE:3400. Same as ECE:5460.

IGPI:5480 Digital Image Processing 3 s.h.
Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image pre-processing, edge detection, filtering; image segmentation. Prerequisites: ECE:2400 or BME:2200. Same as ECE:5480.

IGPI:5510 Biostatistical Computing 2 s.h.
Introduction to computer programming using SAS and R statistical software packages; programming language syntax, constructs, procedures, and techniques for data management, data analysis, and statistical programming commonly encountered in biostatistics; designed for first-year biostatistics majors. Offered fall semesters. Corequisites: BIOS:5710. Same as BIOS:5510.

IGPI:5641 Computer-Based Control Systems 3 s.h.
Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisites: ECE:5600. Same as ECE:5640.

IGPI:5710 Biostatistical Methods I 4 s.h.
Probability distributions, moments, estimation, parametric and nonparametric inference for one-sample and two-sample problems, analysis of frequency data; emphasis on use of computers; designed for first-year biostatistics majors. Offered fall semesters. Requirements: two semesters of calculus. Same as BIOS:5710.

IGPI:5720 Biostatistical Methods II 4 s.h.
Continuation of BIOS:5710; multi-factor ANOVA (analysis of variance), multiple comparisons, orthogonal contrasts, linear regression and correlation, regression diagnostics and remedial measures, model selection, and mixed models; designed for first-year biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5710. Requirements: one semester of linear algebra. Same as BIOS:5720.

IGPI:5730 Biostatistical Methods in Categorical Data 3 s.h.
Estimation of proportions, rates, risks, relative risks, and odds ratios; Mantel-Haenszel method; logistic regression (including ordinal logistic regression and multi-category nominal logistic regression); Poisson regression and negative binomial regression; methods for correlated or clustered data (conditional logistic regression, generalized estimating equations, and mixed effects models); special topics include an introduction to generalized linear models and likelihood-based inferential techniques in this framework; designed for first-year biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5510 and BIOS:5710. Corequisites: BIOS:5720. Same as BIOS:5730.

IGPI:6140 Academic User Services and Technology 3 s.h.
Information and technological needs of academic library users; methods and models of reference and technical support services; standards for user interface (UI)/user experience (UX), including web content accessibility guidelines (WCAG); communicating about and ethical implications of academic library technologies. Same as SLIS:6140.

IGPI:6155 Information Visualization 3 s.h.
Introduction to theories, techniques, and examples of information visualizations for different presentations of data. Prerequisites: SLIS:5020. Same as SLIS:6155.

IGPI:6210 Applied Survival Analysis 3 s.h.
Nonparametric, parametric, and semi-parametric methods for time-to-event data; types of censoring; Kaplan-Meier estimation; Cox proportional hazards models, including methods for assessing adequacy of the proportional hazards assumption; time varying covariates; sample size calculations for comparison of two or more groups; focus on analysis of real data sets and examples using statistical software. Offered spring semesters. Prerequisites: BIOS:5120 or BIOS:5720. Same as BIOS:6210.

IGPI:6216 Finite Element II 3 s.h.
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as CEE:6532, ME:6215.

IGPI:6310 Introductory Longitudinal Data Analysis 3 s.h.
Introduction to statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; focus on applications and computer software methods for ANOVA based methods, hierarchical linear models, linear mixed models, correlated regression models, generalized estimating equations, and generalized linear mixed models. Offered fall semesters. Prerequisites: BIOS:5120 or STAT:3200. Same as BIOS:6310, STAT:6550.

IGPI:6420 Advanced Database Management and Big Data 3 s.h.
Advanced database management topics; basics of semi-structured data and web services; how to retrieve real-world big data sets from web services; use of SQL and PL/SQL to analyze data in relational databases; big data related topics (e.g., Hadoop, Hive). Same as BAIS:6420.

IGPI:6480 Knowledge Discovery 3 s.h.
Knowledge discovery process including data reduction, cleansing, and transformation; advanced modeling techniques from classification, prediction, clustering, and association; evaluation and integration. Same as BAIS:6480.

IGPI:6490 Information Policy and Ethics 3 s.h.
Recent developments in production, use, and organization of information have created new opportunities and raised ethical challenges that demand responses from information professionals; exploration of major ethical frameworks and their relevance for addressing ethical issues arising in information-intensive environments; practice-based assignments that provide opportunities for students to apply ethical theories to key ethical issues faced in various information-intensive contexts. Same as SLIS:6490.

IGPI:6501 Seminar in Spatial Analysis and Modeling 1-3 s.h.
Research themes in spatial analysis, GIScience, simulation, remote sensing. Same as SEES:6500.

IGPI:6510 Readings in Informatics arr.
Topics not covered in other courses; individual study.

IGPI:6515 Independent Study arr.

IGPI:6520 Research for Dissertation arr.
Requirements: PhD candidacy.

IGPI:6530 Environmental and Spatial Statistics 3 s.h.
Geostatistics kriging, variogram estimation, trend estimation, sampling design, extensions to river networks and the globe, lattice data analysis, analysis of spatial point patterns. Prerequisites: STAT:4101 and STAT:3200. Same as STAT:6530.

IGPI:6600 Linear Programming 3 s.h.
Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Requirements: calculus and linear algebra. Same as BAIS:6600, ISE:6600.

IGPI:6610 Statistical Methods in Clinical Trials 3 s.h.
Survey of statistical methods commonly used in clinical trials; primary focus on methodologic perspective for the design, conduct, analysis, and interpretation of all phases of clinical trials; logistical and operational aspects of conducting multisite clinical trials; designed for biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5720. Requirements: familiarity with SAS and R programming. Same as BIOS:6610.

IGPI:6650 Causal Inference 3 s.h.
Causal inference overview, emphasis on inference in observational research; conceptual issues (e.g., counterfactuals, causal graphs, time-varying treatments/confounding), methods (e.g., inverse probability weighting, doubly robust estimators), and related applications (e.g., causal mediation analysis, quantitative bias analysis); for advanced biostatistics or epidemiology students. Prerequisites: (BIOS:5720 and BIOS:5730) or (EPID:6400 and EPID:5241 and EPID:5610). Same as BIOS:6650, EPID:6655.

IGPI:6700 Discrete Optimization 3 s.h.
Introduction to modeling and solving discrete optimization problems; integer programming, network flows, dynamic programming. Prerequisites: BAIS:6600. Same as BAIS:6700.

IGPI:7000 Business Analytics Topics 3 s.h.
Same as BAIS:7000.

IGPI:7210 Survival Data Analysis 3 s.h.
Types of censoring and truncation; survival function estimation; parametric inference using exponential, Weibull, and accelerated failure time models; nonparametric tests; sample size calculation; Cox regression with stratification and time-dependent covariates; regression diagnostics; competing risks; topics may include analysis of correlated survival data and/or recurrent events; designed for biostatistics and statistics majors. Offered fall semesters of odd years. Prerequisites: BIOS:5720 and ((STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101)). Same as BIOS:7210, STAT:7570.

IGPI:7310 Longitudinal Data Analysis 3 s.h.
Statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; includes ANOVA based methods, hierarchical linear models, linear mixed models, error structures, generalized estimating equations, and generalized linear mixed models; may include Bayesian approaches; designed for biostatistics and statistics majors. Offered spring semesters of odd years. Prerequisites: (BIOS:5720 and STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101). Same as BIOS:7310.

IGPI:7400 Computer Intensive Statistics 3 s.h.
Computer arithmetic, random variate generation, numerical optimization, numerical linear algebra, smoothing techniques, bootstrap methods, cross-validation, MCMC, EM and related algorithms; other topics per student/instructor interests. Prerequisites: (BIOS:5710 or STAT:5200) and STAT:3101 and STAT:5400. Requirements: proficiency in Fortran or C or C++ or Java. Same as DATA:7400, STAT:7400.

IGPI:7470 Image Analysis and Understanding 3 s.h.
Mathematical foundations and practical techniques of digital image analysis and understanding; image segmentation (from edges and regions), object description (from boundaries, regions, scale, scale insensitive descriptions, 3D shape, texture) pattern recognition (statistical and syntactic methods, cluster analysis), image understanding (knowledge representation, control strategies, matching, context, semantics), image analysis and understanding systems; lab arranged. Prerequisites: ECE:5480. Same as ECE:7470.

IGPI:7480 Advanced Digital Image Processing 3 s.h.
Advanced local operators (scale-space imaging, advanced edge detection, line and corner detection), image morphology (binary/gray scale operators, morphological segmentation and watershed), digital topology and geometry (binary/fuzzy digital topology, distance functions, skeletonization), color spaces, wavelets and multi-resolution processing (Haar transform, multi-resolution expansions, wavelet transforms in one or two dimensions, fast wavelet transform, wavelet packets), image registration (intensity correlation, mutual information, and landmark-based deformable registration methods). Prerequisites: ECE:5460 and ECE:5480. Same as ECE:7480.

IGPI:7600 Advanced Biostatistics Seminar 0-3 s.h.
Current topics; supervised experience in reading and interpreting biostatistical literature. Same as BIOS:7600.

Informatics, MS

The MS in informatics is a non-research, course-based program for students who wish to enhance their careers with advanced knowledge of informatics. The coursework combines core informatics courses with cognate courses in one of these areas: geoinformatics, health informatics, or human-computer interaction.

Learning Outcomes

Students will exhibit:

- understanding of computational thinking concepts;
- experience in software development;
- expertise in data analytics methods;
- comprehension of and practice applying human-centered computing concepts;
- awareness of professional ethics; and
- domain-specific knowledge and skills related to the cognate area.

Requirements

The Master of Science program in informatics requires a total of 31 s.h. of graduate credit, including 19 s.h. of core courses and 12 s.h. of coursework in a chosen subprogram: geoinformatics, health informatics, or human-computer interaction. Students must maintain a Graduate College Program grade-point average of at least 3.00.

The MS in informatics requires the following coursework.

Core Courses

All students complete the following core courses.

Programming

Course #	Title	Hours
This course:		
CS:5110/IGPI:5110	Introduction to Informatics	3
One of these:		
CS:3010	Software Engineering Fundamentals in Java	3
CS:3210	Programming Languages and Tools	3
CS:3980	Topics in Computer Science I	3
SEES:3050/ IGPI:3050	Geospatial Programming (required for geoinformatics cognate)	3

Statistics

Course #	Title	Hours
One of these:		
BIOS:4120	Introduction to Biostatistics (required for health informatics cognate)	3
STAT:4143/ PSQF:4143	Introduction to Statistical Methods	3

Data Science

Course #	Title	Hours
One of these:		
BAIS:6480/ IGPI:6480	Knowledge Discovery	3
STAT:4540/ BAIS:4540/ DATA:4540/ IGPI:4540	Statistical Learning	3
An approved course (consult advisor)		3

Databases

Course #	Title	Hours
One of these:		
CS:4400	Database Systems	3
SEES:4580/ IGPI:4581	Introduction to Geographic Databases (required for geoinformatics cognate)	3

Human Factors

Course #	Title	Hours
One of these:		
CS:4500	Research Methods in Human-Computer Interaction	3
CS:4510	Human-Computer Interaction for Computer Science (if student has not taken CS:2520)	3
SEES:3540/ IGPI:3540	Geographic Visualization (required for geoinformatics cognate)	3

Ethics

Course #	Title	Hours
This course:		
CS:5980	Topics in Computer Science III	1

Subprograms

Students choose one of three subprograms and complete the requirements.

Geoinformatics Subprogram

Course #	Title	Hours
All of these:		
SEES:3500/ IGPI:3500	Introduction to Environmental Remote Sensing	3
SEES:3520/ IGPI:3520	GIS for Environmental Applications	3
SEES:3570	Light Detection and Ranging (LiDAR): Principles and Applications	3
SEES:4150/ GHS:4150/ IGPI:4150	Health and Environment: GIS Applications	3

Health Informatics Subprogram

Course #	Title	Hours
Four of these:		
BIOL:3212/ IGPI:3212	Bioinformatics for Beginners	3
BIOL:4386	Introduction to Scientific Computing for Biologists	3
BIOS:5120/ IGPI:5120/ STAT:5610	Regression Modeling and ANOVA in the Health Sciences	3
BMB:3310/ CBIO:3310/ MMED:3310	Practical Data Science and Bioinformatics (recommended for students with a biology background)	3
BMB:4310/ BME:4310	Computational Biochemistry	3
BME:5335	Computational Bioinformatics	3
CS:4470	Health Data Analytics	3
EPID:4400	Epidemiology I: Principles	3

Human-Computer Interaction Subprogram

Course #	Title	Hours
Three of these:		
PSQF:6243/ STAT:6513	Intermediate Statistical Methods	3
PSY:3060	Sensation and Perception	3
An approved elective (consult director)		3
One of these:		
CS:4500	Research Methods in Human-Computer Interaction (if not taken to satisfy Human Factors requirement)	3
CS:4510	Human-Computer Interaction for Computer Science (if not taken to satisfy Human Factors requirement and if have not taken CS:2520)	3
ISE:6211	Human Factors in Healthcare Systems	3
ISE:6220	Cognitive Engineering	3

For more information about the Master of Science requirements, see the Interdisciplinary Graduate Program in Informatics website.

Combined Programs

MS (Health Informatics–Pharmacy Subprogram)/PharmD

The purpose of the combined program is to provide an opportunity for professional students in the College of Pharmacy to receive formal training in health informatics in addition to training in pharmacotherapy and health care. Students completing the degree program receive an MS in informatics with the health informatics–pharmacy subprogram (without thesis) from the Graduate College and a PharmD from the College of Pharmacy. Students develop special expertise in information technology, including management of electronic health records, health information exchange standards, electronic prescribing, medication management, decision support, and other competencies.

The combined program requires 34 s.h. Courses that can be used to count toward both programs include 19 s.h. of core courses, 6 s.h. of courses from the health informatics cognate, and 9 s.h. from the PharmD curriculum selected from the following.

Course #	Title	Hours
PHAR:8209	Introductory Pharmacy Practice Experiences Hospital	3
PHAR:8250	Applications of Pharmacy Practice I	2
PHAR:8265	Applications of Pharmacy Practice II	2
PHAR:8374	Applications of Pharmacy Practice III	2
PHAR:8378	Pharmacy Law and Ethics	2

A separate application for each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. It is recommended that students apply to the Graduate College for admission to the MS program before entering the spring semester of their first year in the pharmacy program. For more information, see Doctor of Pharmacy, PharmD [p. 2061] in the College of Pharmacy section of the catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They must also meet the admission requirements of the informatics subprogram they want to enter; see PhD and MS Admission on the program's website.

Academic Plans

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Informatics, MS

- Geoinformatics Subprogram [p. 1754]
- Health Informatics Subprogram [p. 1755]
- Human-Computer Interaction Subprogram [p. 1755]

Geoinformatics Subprogram

Course	Title	Hours
Academic Career		
Any Semester		
31 s.h. must be graduate level coursework; graduate transfer credits allowed upon approval. More information is included in the General Catalog and on department website. [a]		
	Hours	**0**

First Year		
Fall		
STAT:4143 or BIOS:4120	Introduction to Statistical Methods or Introduction to Biostatistics	3
CS:5110	Introduction to Informatics	3
Programming course [b]		3
	Hours	**9**
Spring		
STAT:4540 or BAIS:6480	Statistical Learning or Knowledge Discovery	3
CS:4400 or SEES:4580	Database Systems or Introduction to Geographic Databases	3
CS:5980	Topics in Computer Science III [c]	1
SEES:3500	Introduction to Environmental Remote Sensing	3
	Hours	**10**
Second Year		
Fall		
CS:4510 or SEES:3540 or CS:4500	Human-Computer Interaction for Computer Science or Geographic Visualization or Research Methods in Human-Computer Interaction	3
SEES:3520	GIS for Environmental Applications	3
	Hours	**6**
Spring		
SEES:3570	Light Detection and Ranging (LiDAR): Principles and Applications	3
SEES:4150	Health and Environment: GIS Applications	3
	Hours	**6**
	Total Hours	**31**

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Choose from CS:3010, CS:3210, CS:3980, SEES:3050.
c Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

c Choose from CS:3010, CS:3210, CS:3980, SEES:3050.

d See the General Catalog for list of approved courses.

Informatics, PhD

The PhD in informatics emphasizes preparation for research, teaching, and scholarly endeavors in academic settings or private, industrial, or governmental laboratories. Students focus on applying informatics research to a field of choice (e.g., health, biology, human-computer interaction, geography, design).

Learning Outcomes

Students will exhibit:

- broad, up-to-date knowledge of informatics topics including computational thinking, software development, data analytics, human-centered computing concepts, and professional ethics;
- domain-specific knowledge and skills related to the field of application of informatics research;
- fluency at reading, analyzing, synthesizing, and communicating research; and a
- thorough understanding of relevant research methods and ability to conduct original research that contributes to the field of informatics.

Requirements

The Doctor of Philosophy program in informatics requires at least 72 s.h. of graduate credit. A total of 19 s.h. of core courses are required plus an additional 12 s.h. of courses approved by a student's committee. The remaining 41 s.h. may be completed with additional coursework or through reading or research hours. Students must maintain a Graduate College major program grade-point average of at least 3.00.

It requires completion of coursework, satisfactory performance on the qualifying exam, comprehensive exam, and the proposal, plus the production and formal defense of a dissertation describing original research results.

Students select an advisor from among the program faculty. On the rare occasion when students choose a PhD advisor who is outside the program, a co-advisor from the program faculty must be designated.

The PhD in informatics requires the following coursework.

Core Courses

Students complete a total of 19 s.h. in core coursework. The student's advisor and the rest of the student's committee consisting of at least two other faculty select the remaining courses (12 s.h. minimum) for a total of at least 31 s.h. of coursework.

Programming

Course #	Title	Hours
This course:		
CS:5110/IGPI:5110	Introduction to Informatics	3

Elective Core Coursework

Course #	Title	Hours
Coursework selected in consultation with advisor and committee		12

Electives

The remaining 41 s.h. may be completed with additional coursework or through reading or research hours.

Comprehensive Examination

PhD students must pass a comprehensive examination at or near completion of their coursework requirements. Students prepare a 20–30 page survey/discussion (along the lines of the introduction and literature review from an eventual thesis) for distribution to their faculty committee, followed at least

two weeks later by a 20–40 minute oral presentation, and a question/answer session.

Students may request that the MS be granted at the time of the comprehensive exam. The MS without thesis is awarded upon successful completion of the comprehensive exam but may, at the examination committee's discretion, be awarded even if students do not pass the exam. Students may also choose to complete the thesis requirements and be awarded an MS with thesis.

Dissertation

Students complete dissertation coursework in consultation with their advisor.

Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded the Doctor of Philosophy degree.

For more information about the Doctor of Philosophy requirements, see the Interdisciplinary Graduate Program in Informatics website.

Combined Programs

MD/PhD

Students may work toward the Doctor of Medicine degree and a PhD in informatics in a combined degree program offered by the Carver College of Medicine and the Graduate College. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Admission

Students applying to the PhD program do not need a master's degree prior to admission. Students who hold a master's degree upon entering the PhD program may apply to use transfer credit from their master’s degree courses toward their PhD program requirements.

Students applying to the PhD program who are not selected for admission are automatically considered for admission to the MS program if they do not already hold a master's degree.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They must also meet the admission requirements of the informatics program; see PhD and MS Admission on the program's website.

Career Advancement

The program emphasizes preparation for research, teaching, and scholarly endeavors in academic settings or private, industrial, or governmental laboratories.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

g Typically completed six months prior to final oral exam (dissertation defense).
h Oral dissertation defense.

Informatics, Graduate Certificate

Requirements

The graduate Certificate in Informatics requires 19 s.h. of graduate credit. Students must earn a major program grade-point average of at least 3.00 in certificate coursework. The certificate program is designed for students enrolled in University of Iowa graduate degree programs who wish to study informatics as a complement to their degree program and for nondegree students who are interested in increasing their knowledge of informatics.

The Certificate in Informatics requires the following coursework.

Required Courses

Programming

Interdisciplinary Studies

Graduate degrees: MA in interdisciplinary studies; MFA in interdisciplinary studies; MS in interdisciplinary studies; PhD in interdisciplinary studies

The interdisciplinary studies graduate program serves students seeking a more diversified and comprehensive advanced study program than typically allowed for those specializing in a single discipline. Interested students must already be admitted to an existing graduate program prior to seeking approval for an interdisciplinary studies program.

The interdisciplinary studies program allows students to tailor their educational interests, research, and scholarship. With the permission of the student's advisory committee and of the graduate college, students may complete additional graduate certificates and degrees.

Programs

Graduate Programs of Study

- Master of Arts in Interdisciplinary Studies [p. 1763]
- Master of Fine Arts in Interdisciplinary Studies [p. 1764]
- Master of Science in Interdisciplinary Studies [p. 1765]
- Doctor of Philosophy in Interdisciplinary Studies [p. 1766]

Interdisciplinary Studies, MA

Learning Outcomes

- Develop the ability to integrate knowledge and methodologies from multiple disciplines to address complex problems and create innovative solutions.
- Enhance critical thinking and analytical skills by evaluating and synthesizing diverse perspectives and approaches.
- Cultivate communication skills around interdisciplinary concepts and findings to both specialized and general audiences.
- Foster collaboration skills to work effectively in diverse teams and interdisciplinary areas.

Requirements

The MA in interdisciplinary studies requires a minimum of 30 s.h. of graduate credit. Students accepted to the MA in interdisciplinary studies may work with the Graduate College to include a self-defined subprogram as part of the new degree title. The self-defined subprogram is a tailored and topical subtitle for the MA in interdisciplinary studies and typically defines the focus of the students' courses and/or scholarship.

A final exam may be required. Students have the option to complete a thesis. Coursework is approved by the student's advisory committee and must be numbered 3000 or above.

Contact the Office of Academic Affairs [gradcoll@uiowa.edu] in the Graduate College for more information.

Interdisciplinary Studies, MFA

Learning Outcomes

- Develop the ability to integrate knowledge and methodologies from multiple disciplines to address complex problems and create innovative solutions.
- Enhance critical thinking and analytical skills by evaluating and synthesizing diverse perspectives and approaches.
- Cultivate communication skills around interdisciplinary concepts and findings to both specialized and general audiences.
- Foster collaboration skills to work effectively in diverse teams and interdisciplinary areas.

Requirements

The MFA in interdisciplinary studies requires a minimum of 48 s.h. of graduate credit. Students accepted to the MFA in interdisciplinary studies may work with the Graduate College to include a self-defined subprogram as part of the new degree title. The self-defined subprogram is a tailored and topical subtitle for the MFA in interdisciplinary studies and typically defines the focus of the students' courses and/or scholarship.

A thesis and final exam are required. Coursework is approved by the student's advisory committee and must be numbered 3000 or above.

Contact the Office of Academic Affairs [gradcoll@uiowa.edu] in the Graduate College for more information.

Interdisciplinary Studies, MS

Learning Outcomes

- Develop the ability to integrate knowledge and methodologies from multiple disciplines to address complex problems and create innovative solutions.
- Enhance critical thinking and analytical skills by evaluating and synthesizing diverse perspectives and approaches.
- Cultivate communication skills around interdisciplinary concepts and findings to both specialized and general audiences.
- Foster collaboration skills to work effectively in diverse teams and interdisciplinary areas.

Requirements

The MS in interdisciplinary studies requires a minimum of 30 s.h. of graduate credit. Students accepted to the MS in interdisciplinary studies may work with the Graduate College to include a self-defined subprogram as part of the new degree title. The self-defined subprogram is a tailored and topical subtitle for the MS in interdisciplinary studies and typically defines the focus of the students' courses and/or scholarship.

A final exam may be required. Students have the option to complete a thesis. Coursework is approved by the student's advisory committee and must be numbered 3000 or above.

Contact the Office of Academic Affairs [gradcoll@uiowa.edu] in the Graduate College for more information.

Interdisciplinary Studies, PhD

Learning Outcomes

- Develop the ability to conduct original research that integrates theories, methodologies, and knowledge from multiple disciplines to address complex problems and contribute to the advancement of knowledge.
- Enhance critical thinking and analytical skills by evaluating and synthesizing diverse perspectives and approaches to generate innovative solutions.
- Cultivate advanced communication skills to effectively articulate interdisciplinary research findings to both specialized and general audiences.
- Foster collaboration skills to work effectively in diverse teams and interdisciplinary settings, promoting a culture of cooperation and mutual respect.

Requirements

The PhD in interdisciplinary studies requires a minimum of 72 s.h. of graduate credit. Students accepted to the PhD in interdisciplinary studies may work with the Graduate College to include a self-defined subprogram as part of the degree title. The self-defined subprogram is a tailored and topical subtitle for the PhD in interdisciplinary studies and typically identifies the focus of students' courses and/or scholarship.

A comprehensive exam, final exam, and thesis are required. Coursework is approved by the Graduate College and the student's advisory committee and must be numbered 3000 or above.

International Writing Program

Director

- Christopher Merrill

Faculty: https://iwp.uiowa.edu/people

Website: https://iwp.uiowa.edu

The International Writing Program (IWP) conducts a unique fall residency program for established writers from outside the United States. During the fall semester, IWP may offer courses related to the program's general mission.

Residency Program

Each fall the International Writing Program assembles a community of poets, fiction writers, essayists, playwrights, and journalists for an 11-week residency on campus. Participants range from emerging talents to writers who are among their countries' leading literary figures and writers of world stature. For most, their time in the program is their first, or their first extended, stay in the United States.

At the University of Iowa, they live and interact with each other while working on writing and translation projects and participating in public events. Throughout their residency, they present their work in IWP:3191 International Literature Today and IWP:5205 International Translation Workshop, and participate as guests in many other courses on campus. They also meet with the public through readings, panel discussions, a film series, and other presentations.

Since 1967 over 1,600 writers from over 160 countries have participated in the program.

International Writing Program participants are supported by the University of Iowa, and through bilateral agreements with many countries, grants from cultural institutions and governments abroad, and private funds.

For more information, contact the International Writing Program.

Courses

International Writing Program Courses

IWP:3191 International Literature Today **1,3 s.h.**
Same as ENGL:3595, TRNS:3191, WLLC:3191.

IWP:5205 International Translation Workshop **1,3 s.h.**
International writers pair with University of Iowa translators to write new works of poetry and fiction in English; second-language fluency not required for international writers. Same as TRNS:5210.

IWP:7460 Translation Workshop **3 s.h.**
Requirements: at least one world language. Same as TRNS:7460.

Library and Information Science

Director

- Lucilia (Lucy) Santos Green

Graduate degree: MA in library and information science

Graduate certificate: special collections librarianship and archives

Faculty: https://slis.uiowa.edu/faculty-and-staff

Website: https://slis.uiowa.edu/

The School of Library and Information Science offers a graduate-level program of professional and academic preparation for careers in libraries and information centers. The program is accredited by the American Library Association. In concert with the mission of the University of Iowa, the school seeks excellence in its education of future library and information professionals, its contribution to the knowledge base of library and information science, and its service to the school's local, regional, national, and international constituencies.

Library and information professionals serve the needs of their own constituencies—children and teachers, members of academic communities, employees of profit and nonprofit organizations, and the public at large—ranging from information poor to information rich. They work in the contexts of issues such as information and communication technology, public and private information policy, managerial policy, and regional, national, and international economics.

The school offers the MA in Library and Information Science and a variety of dual degrees and certificates to specialize in different areas of librarianship, including joint offerings with the Center for the Book, the College of Law, the Department of English, and a school teacher-librarian endorsement for licensed K–12 teachers. The MA may be pursued while completing other degrees at the University of Iowa, including other master's and PhD degrees. Undergraduates at the University of Iowa may also apply for the Undergraduate to Graduate (U2G) degree program and complete their bachelor's degree in combination with the MA in Library and Information Science.

Student Organizations and Activities

All MA students in the school are automatically members of LISSO, the Library and Information Science Student Organization, which also serves as the student chapter of the American Library Association. LISSO sponsors various activities, such as speaker series, workshops, brown bag lunches, and social events. Participation in LISSO events provides students with significant opportunities for professional and extracurricular growth as well as completion of capstone portfolio requirements. Students are encouraged to join other state and national professional organizations.

Honor Society

The Beta Beta Theta Chapter of Beta Phi Mu, the international honor society for library and information science, is located at the University of Iowa. Each year new members are chosen from the top 25% of the preceding year's graduating class. To be eligible for membership, graduates must achieve a grade-point average of at least 3.75, demonstrate professional promise, and be recommended by the faculty.

Related Certificate

Certificate in Book Arts and Book Studies

Students may apply to earn the Certificate in Book Arts and Book Studies. The program requires 15 additional s.h. of graduate credit through the University of Iowa Center for the Book for students who are enrolled in the joint Library and Information Sciences MA/Certificate in Book Arts and Book Studies program. For more information, see the MA and Certificate in Book Arts and Book Studies [p. 1775] in the catalog.

Programs

Graduate Programs of Study

- Master of Arts in Library and Information Science [p. 1773]
- Certificate in Special Collections Librarianship and Archives [p. 1778]

Facilities

The School of Library and Information Science (SLIS) is housed in the south wing on the third floor of the university's Main Library, in a setting that promotes community among students, faculty, and staff and provides easy access to the resources of the University of Iowa Libraries. Facilities are provided for the varied instructional and research activities of the school.

The school includes classrooms dedicated for use by School of Library and Information Science faculty and students. These classrooms feature a wired workstation technology setup with Windows and Macintosh computers fully equipped with videoconferencing systems and large high-definition screens.

Gunther Commons

Gunther Commons, a state-of-the-art collaborative laboratory equipped with workstations, is the school's combined student center and technology lab. Individuals and teams of students gather in Gunther Commons to work on course assignments and to gain experience with specialized software. Students have access to Windows and Macintosh computers, with gigabit access to the campus network and wireless service throughout the Main Library.

University of Iowa Libraries

All of the resources of the University of Iowa Libraries are available to the school's students and faculty. The system contains more than 4 million volumes in the Main Library and six departmental libraries.

The web-based catalog provides access to books and periodicals, electronic indexes, and full-text databases held by the university libraries. In addition, InfoHawk+ provides online resource access to resources arranged by subject and academic discipline. Wireless internet access is available in the Main Library.

The school benefits from proximity to the Learning Commons, encompassing the majority of public space on the first floor of the Main Library. The Learning Commons is a technology-

infused, comfortable, and flexible learning space, and an academic and information help center.

The third floor of the Main Library, where SLIS is located, also houses the map collection, Special Collections, and University Archives, including the Iowa Women's Archives.

Other Libraries

Students have access to a variety of libraries through field trips, practicum experience, and personal use: the State Historical Society of Iowa library in Iowa City; the Iowa City, Coralville, and Cedar Rapids public and school libraries; the Augustana, Coe, Cornell, Mount Mercy, and Grinnell college libraries; and the Herbert Hoover Presidential Library and Museum in West Branch, IA.

Other Resources

The second floor of the University Capitol Centre houses the instructional services and campus services departments of the university's Information Technology Services. It provides instructional and research computing facilities and services for the university community. All university students, staff, and faculty may use the center's computers for university-related research, thesis preparation, and class work. Instructional Technology Centers provide campuswide access to the university's academic computing resources.

Courses

Library and Information Science Courses

SLIS:4150 Introduction to Book Studies 3 s.h.
Theory and practice of book studies; meanings of word and image in the book format; comparative study of other media, applied study of the codex as a physical artifact. Same as ENGL:4150, UICB:4150.

SLIS:4910 The Book in the Middle Ages 3 s.h.
Relation of text, decoration, function, creators, and audience in different genres of medieval manuscript books 400-1500 A.D. Same as HIST:4422, UICB:4910.

SLIS:4920 The Book in Early Modern Europe 3 s.h.
History of the book and communication in Europe 1400-1800; production, distribution, and use of texts in cultural context. Same as HIST:4429, UICB:4920.

SLIS:5010 Libraries, Culture, and Society 3 s.h.
Role of libraries and information agencies in society; major issues including information policy, professional ethics, literacy, diversity, technology, and pedagogy. Requirements: admission to library and information science.

SLIS:5020 Public User Services and Technology 3 s.h.
Information and technological practices and affordances of public and school libraries; information technology needs of public and school library users; digital divide and inequality; reference and technical support practices and systems in public and school libraries; user technology management (IT strategic planning and public computing policies). Requirements: admission to library and information science.

SLIS:5030 Information Organization 3 s.h.
Introduction to information organization, the systems and standards used in libraries and information centers to describe and organize documents and records for optimal stewardship and retrieval; hands-on experience in creating media (e.g., LibGuides, Omeka galleries) and encoding XML documents; preparation for further practice in cataloging, metadata, preservation, and retrieval. Requirements: admission to library and information science.

SLIS:5041 College and University Libraries 3 s.h.
Focus on praxis of academic librarianship—the way theories and ideas are applied and embodied in day-to-day work of librarians and organization of academic libraries; exploration of different types of academic libraries and their goals, functions, services, and contexts in which they operate; different types of academic librarianship; development of a preparedness for engaging complexities of academic library work as it progresses the goals of higher education; for students interested in academic librarianship, archives, and special collections. Requirements: admission to library and information science program.

SLIS:5042 Public Libraries 3 s.h.
Modern public libraries were founded on principles of equality, democracy, intellectual freedom, and public good; exploration of the historical development of public libraries and current issues related to their management and operations; practical projects and observation of library operations; opportunity to apply classroom learning to real-world work; for students interested in working in a public library or archives. Requirements: admission to library and information science program.

SLIS:5044 School Library Media Administration 3 s.h.
How to create and deliver a program that focuses on teaching responsibilities of school librarians and their collaborative role in the school; examination of research, standards, curricular frameworks, information process, and inquiry models; administrative and leadership roles of teacher librarian including policy and procedure development, budgeting, and program evaluation; development of a functional library program plan.

SLIS:5200 Innovation and Technology Methodology 3 s.h.
Power of technology to connect, communicate, create, convince, and collaborate within library setting; development of a personal philosophy and network within the innovative technology realm; introduction to a variety of multimedia tools; creation of projects on multiple platforms.

SLIS:5220 Resources for Children 3 s.h.
Children's literature and librarianship are entwined, interdisciplinary fields that now encompass everything from storytelling to new media, reflecting the field's service to a population spanning from newborns to 14-year-olds; survey of issues that youth librarians must understand by studying a progression of ages and developmental stages, issues of professional practice, and elements of genre and media for young people, anchored by books and media suited to these ages; strategies and resources that youth services professionals can use for creating responsive services and collections in the 21st century.

SLIS:5230 Resources for Young Adults 3 s.h.
Examination of topics related to populations served by youth service departments (i.e., societal issues and informational needs) and the ways libraries meet needs of young adults; immersion into the world of young adults and how this relates to recreational reading and information seeking needs; how to evaluate and select from a variety of fiction, nonfiction, print, digital, and web-based resources; how to guide young adults to become competent, critical consumers and producers of information while creating a welcoming environment that celebrates diversity.

SLIS:5240 Resources for Adults 3 s.h.
Role of public libraries in meeting adults' informational and recreational needs; popular culture materials, reader's advisory services, lifelong learning.

SLIS:5400 Community Archives 3 s.h.
Community archives are projects and organizations that employ archival methods to organize self-determined group memory. Set in sometimes complex symbiotic relationships with other heritage organizations like libraries, institutional archives, and museums, community archives can be community-led and participatory. Explore the state of community memory as organized by community leaders; ask after community archival practices, prerogatives, and sustainability in the contemporary United States toward broader concerns that tie community memory and how it is kept with questions of community self-determination and wellbeing.

SLIS:5450 Reader's Advisory: Practices, Resources, and Media 3 s.h.
Reader's advisory, the professional term for connecting books and readers in libraries, is made up of practices and ideas that facilitate leisure reading and enjoyment of books and media. Cover different modes, strategies, and resources for reader's advisory work in libraries; give attention to related activities such as author visits, book clubs, and algorithms and reading. Share learning about recommendations and genres as part of a plan for developing best practices in this important area of public library service.

SLIS:5520 Studies in Book History and Technologies 0-3 s.h.
Topics related to production, distribution, and consumption of books through history and into the future. Same as UICB:5520.

SLIS:5530 Preservation Management 3 s.h.
Responsible stewardship of collections, integration of preservation into libraries and archives systems, maximizing limited resources, establishing preservation priorities, and advocacy; appropriate care of books, paper, photographs, time-based media (e.g., audio, video, film), and born-digital objects; lectures, discussions, student presentations, and hands-on activities; for students who will be responsible for managing collections. Same as UICB:5530.

SLIS:5535 Book Conservation 3 s.h.
Practical methods, materials assessment, conservation history and evolution. Prerequisites: UICB:4270. Same as UICB:5220.

SLIS:5600 Reading Culture: History and Research in Print and Digital Media 3 s.h.
What reading means, and what it means to read, have changed with time and place; cultural study of books and reading to evaluate strategies and resources involved in crafting historical interpretations of books and their readers; consideration of ways that reading has always been interdependent with other media, from needlework to social media; how researchers locate and interpret primary source material to study reading culture, and how cultural heritage organizations promote their holdings to researchers. Same as UICB:5600.

SLIS:5630 Introduction to Special Collections and Archives 3 s.h.
Introduction to history of collecting in special collections and key areas of praxis (e.g., appraisal, arrangement and description, preservation, reference and access, outreach).

SLIS:5700 Cultural Heritage 3 s.h.
Increased use of digital technologies in collection, organization, dissemination, and use of heritage resources that generate intellectual, social, technological, legal, and ethical challenges to—and opportunities for—the heritage practice; exploration of challenges and opportunities, as well as their impact on the heritage profession; students become familiar with key heritage-related concepts and topics, apply them to a concrete project, and write a report of their findings.

SLIS:6020 Literacy and Learning 3 s.h.
Learning and literacy theory relevant to work in information services; how librarians can help people process information and use it to form understanding and create new knowledge. Prerequisites: SLIS:5010.

SLIS:6040 Media Production Workshop 3 s.h.
Hands-on workshop to familiarize students with media production software and methods common to work in libraries and information centers; students may produce media including websites, apps, podcasts, videos, infographics, and tweets; studio course with emphasis on peer assistance and feedback.

SLIS:6115 Introduction to Research Methods in Library and Information Science 3 s.h.
An introduction to the fundamental concepts and techniques of research in library and information science, with an emphasis on both qualitative and quantitative research methods. Students will explore the purpose of research in social inquiry, develop an understanding of empirical research, and distinguish between basic and applied research. Key topics include research design, sampling techniques, data collection, and analysis, as well as ethical considerations in research.

SLIS:6130 Community Engagement 3 s.h.
Community engagement is the process of asking, listening to, and empowering individuals, organizations, and partners to build relationships and move toward common goals that benefit and improve a community; exploration of applications for community engagement; opportunity for students to explore community engagement principles through practical experiences; for students interested in library programming and outreach, or work in a library or archives. Requirements: admission to library and information science program.

SLIS:6140 Academic User Services and Technology 3 s.h.
Information and technological needs of academic library users; methods and models of reference and technical support services; standards for user interface (UI)/user experience (UX), including web content accessibility guidelines (WCAG); communicating about and ethical implications of academic library technologies. Same as IGPI:6140.

SLIS:6145 Digital Preservation and Stewardship 3 s.h.
Concepts, theories, and ethical practices for preservation of born-digital and digitized materials in cultural heritage institutions. Learn to apply standards, best practices, and sustainable strategies for the preservation of wide-ranging digital collections; situate preservation as a key component of responsible digital stewardship, assess tools and systems, devise storage strategies, and optimize workflows for the long-term accessibility of digital collections; understand basic digital stewardship practices, personal digital archives, digital forensics, social media and web archiving, and data management for the digital humanities.

SLIS:6150 Information Behavior 3 s.h.
People seek, gather, and use information in various contexts; exploration of patterns of information behavior to develop a better understanding of personal and sociocultural aspects of human information needs and practices in contexts; practice-based assignments that provide opportunities for students to research an information activity or phenomenon, a type of information, or a particular user group; how librarianship is about understanding and serving information needs of various communities.

SLIS:6155 Information Visualization 3 s.h.
Introduction to theories, techniques, and examples of information visualizations for different presentations of data. Prerequisites: SLIS:5020. Same as IGPI:6155.

SLIS:6170 Management, Teams, and Leadership 3 s.h.
Managers, teams, and leaders are critical for effective operations of libraries and information centers; exploration of principles and practices of organizational management, human resources, financial management, budgeting, communications, policy making, and strategic planning; strategies for cultivating and supporting inclusive, culturally competent organizations and structured approaches for planning and evaluating library programs and services; practical assignments that prepare students to work in libraries and archives. Requirements: admission to library and information science program.

SLIS:6250 Cataloging and Classification 3 s.h.
Introduction to various systems used to describe materials and information in library catalogs; principles of organizing catalog information for effective retrieval; standards used across libraries, archives, and museums including Anglo-American Cataloguing Rules (AACR2), Resource Description and Access (RDA), Dewey Decimal System, and Library of Congress Classification; knowledge and skills needed to begin work as professional catalogers in a diverse range of libraries.

SLIS:6255 Rare Book Cataloging 3 s.h.
Application of cataloging standards to rare books and other special collections materials; hands-on cataloging of rare books and visits to local collections; critical skills and confidence necessary to begin cataloging rare, special, and unusual books using accepted standards from the field; for students interested in archives and special collections librarianship.

SLIS:6330 Collection Development 3 s.h.
Collecting is a core library activity that includes various types of media collected from traditional print to digital media; focus on curating an inclusive collection that is accessible to all library patrons; examination of the life cycle of a resource within the library from understanding intellectual freedom policies to identification of resource needs, selection and acquisition, promotion and use, to deselection; collection development across library settings and how collection development relates to instruction in libraries. Prerequisites: SLIS:5010 and SLIS:5030.

SLIS:6335 Metadata Theories and Applications 3 s.h.
Introduction to concepts, principles, functional requirements, and practices of metadata; emphasis on metadata implementations in library, archive, and museum communities; extensive hands-on exercises; application and design of metadata element sets and schemas, data exchange formats, and value vocabularies.

SLIS:6345 Stewardship of Information and Collections 3 s.h.
Library collections provide a foundation for library service; exploration of issues affecting development and management of library collections including policies, assessment, budgeting, selection, deselection, acquisitions, partnerships, formats, marketing, legal issues, cooperation, and ethics; strategies for cultivating and supporting inclusive, culturally competent collections, and how this supports intellectual freedom; practical assignments that prepare students for collection stewardship work in public, academic, and school libraries. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite. Requirements: admission to library and information science program.

SLIS:6350 Archives: Theory and Practice 3 s.h.
Overview of theories, principles, ethical practices, and core functional areas of archival stewardship. Covers collection development, appraisal, accessioning, preservation, collection management, arrangement and description, access and use, and digitization. Students develop an understanding of the history of the field of archives and engage with contemporary issues that shape the profession. Topics include the decolonization of archives, rapid-response collecting, Protocols for Native American Archival Materials (PNAAM), reparative archival work, environmental sustainability, digital repatriation, and community archives.

SLIS:6355 Advanced Topics in Special Collections 3 s.h.
Advanced focused study in the areas relating to special collections and archives.

SLIS:6370 Topics in Book Studies 3 s.h.
Topics relevant to book studies and special collections. Same as UICB:6370.

SLIS:6411 Special Topics in Library and Information Science 3 s.h.
Processes and resources that humanities students and scholars use to find information and create knowledge considered in context of larger cultural forces that shape inquiry, and library and university resources that support scholarly communication; for students interested in humanities subject librarianship, special collections, and humanities centered archives.

SLIS:6490 Information Policy and Ethics 3 s.h.
Recent developments in production, use, and organization of information have created new opportunities and raised ethical challenges that demand responses from information professionals; exploration of major ethical frameworks and their relevance for addressing ethical issues arising in information-intensive environments; practice-based assignments that provide opportunities for students to apply ethical theories to key ethical issues faced in various information-intensive contexts. Same as IGPI:6490.

SLIS:6520 Practicum in Libraries and Information Centers 3 s.h.
Focus on practical application of theory; students gain experience in library and information science work, work with faculty member to identify opportunities for practicum placement in libraries and other organizations, and set professional and personal goals; 120 hours of fieldwork; participation in classroom conversations. Requirements: 12 s.h. of SLIS coursework.

SLIS:6530 School Library Media Practicum 3 s.h.
Field experience in an elementary and a secondary school library program for a total of 40 hours; discussion of various program components including delivery of library's instructional program, collaborative efforts, integration of information literacy skills and technology to support learning, and administrative and operational tasks involved in managing a school library program; students facilitate a lesson at both sites and complete a project that supports library instruction. Prerequisites: SLIS:5044.

SLIS:6570 Independent Study 1-3 s.h.
Formal contract between student and faculty member. Requirements: formal proposal.

SLIS:6571 Distance and Online Education: Independent Study 1-3 s.h.
Formal contract between student and faculty member; opportunity to pursue in-depth research in a particular area of interest that does not duplicate an existing course in the curriculum; students meet with faculty member to design a plan of study and submit a bibliography and description of the final project. Requirements: formal proposal.

SLIS:6580 Thesis 0-6 s.h.

SLIS:6600 Curation and Collection Development for Special Collections 3 s.h.
Fundamentals of collection development for special collections curators that guide the collecting lifecycle for rare books and distinctive collections; includes an overview of the history of institutional collecting, proactive collecting and policy creation, collections assessment, and workflows; students will learn approaches to budgeting and allocating funding, strategies for building relationships with dealers, approaches for working with individual donors alone and in collaboration with development officers, as well as the legal and ethical frameworks that guide the purchase, acquisition, use, circulation, and deaccessioning of cultural heritage materials.

SLIS:6700 Digital Leadership in Cultural Heritage Institutions 3 s.h.
Introduces the foundational concepts of digital leadership within the context of libraries, archives, and museums, with a focus on navigating the challenges and opportunities of a post-digital society; students will explore how emerging technologies—particularly artificial intelligence—are reshaping the competencies, mindsets, and strategic approaches required of contemporary GLAM professionals; prepares students to lead digital transformation efforts with ethical awareness, technological fluency, and visionary thinking through case studies, critical readings, and applied projects.

SLIS:6800 Applied Research in Archives and Special Collections 3 s.h.
Introduction to original research in special collections librarianship and archives, emphasizing the development of independent research projects grounded in historical, socio-cultural, ethical, or practical dimensions of the field; students will build on prior coursework to formulate research questions, craft proposals, engage in scholarly inquiry, and craft a publishable-quality paper in consultation with the instructor; emphasis will be placed on critical thinking, peer review, and communicating research findings which will equip students with the skills to contribute meaningfully to the professional and academic discourse in the field.

SLIS:6900 Introduction to Legal Research for Library and Information Science Students 3 s.h.
Introducing students without legal training to the concepts and tools necessary to provide basic legal research assistance in an academic, public, or special library; structure of the U.S. legal system, reading and understanding legal citations, and free and subscription legal research resources; ethics of providing legal research assistance to non-lawyers. Corequisites: SLIS:5010.

SLIS:7900 SLIS Graduation Seminar 0 s.h.
Creation of an electronic portfolio that includes an introduction, résumé, professional statement, and work samples (with introductory reflective essays) that document competency in the American Library Association's nine professional competency areas.

Library and Information Science, MA

Students who pursue the Master of Arts in library and information science gain an understanding of the foundations of library and information professions, including the history of the fields, ethical and philosophical concerns, and principles of stewardship for a variety of forms of documentation and records. Students are taught the theory and practice of strategic management within information organizations, preparing them for careers and leadership in a broad variety of information organizations. They gain the knowledge needed to anticipate future trends in information access and organization. Students study the close relationship between research and practice. Finally, students become knowledgeable about the factors that underlie users' information needs and appropriate strategies to assist them.

The MA in library and information science has held continuous accreditation from the American Library Association since 1971. The degree prepares students to work in public libraries, K–12 school libraries, academic libraries, law libraries, archives, and special collections.

The School of Library and Information Science combines online education with on-campus opportunities and collaboration allowing online students to participate in real-time learning experiences with their on-campus classmates. Both full- and part-time enrollment options are available for on-campus and virtual coursework. For more information about the online program option, see Online MA in LIS on the School of Library and Information Science website. Not all coursework for this program is taught in person. On-campus students will be required to take some online coursework to complete the degree requirements.

Learning Outcomes

Gateway Knowledge

Students will understand the historical, social, cultural, and civic contexts of various library and information service roles in the United States, and students will internalize key values of the profession such as intellectual freedom, information equality, and community well-being. Students will also learn best practices in professional communication and development.

Information Resources

Students will understand the lifecycle of recorded knowledge and information from creation to use and the best practices for developing collections—including acquisition, selection, purchasing, processing, storage, and deselection—with special attention to emerging formats and genres of information resources.

Lifelong Learning and Continuing Education

Students will understand that lifelong learning and continuing education are organizational goals for libraries and information centers to provide as well as professional goals for library and information workers to seek out. Students will understand best practices for professional development and also best practices for teaching and learning in libraries and information centers.

Management and Administration

Students will understand best practices for project and team management, strategic planning and communication, organizational workflows and assessment, library advocacy and development, and community partnerships and engagement.

Organization of Recorded Knowledge and Information

Students will understand how to evaluate, represent, and organize information and knowledge across cultures and communities as well as how to devise, maintain, and use systems of organization in both physical and digital environments toward efficient discovery and retrieval by diverse users.

Reference and User Services

Students will understand the techniques for discovering, retrieving, evaluating, and synthesizing information from diverse sources, and students will understand methods for learning and describing the information needs of various users and communities and how libraries and information centers can work with these communities toward meeting their needs.

Research and Evidence-Based Practice

Students will understand the methods of intervention-oriented research and assessment methods in libraries and information centers, and students will recognize, evaluate, and apply the different types of evidence that information professionals use to measure the success of services, practices, and facilities.

Information Equity

Students will understand that a central value of libraries and information centers is to mitigate information inequality, and students will endeavor to improve library and information practices through informed, respectful, and inclusive interventions that recognize and centralize social difference across race, gender, sexuality, (dis)ability, socioeconomic status, nationality, religion, age, education, literacy, and other vectors.

Technological Knowledge and Skills

Students will understand and identify the technological infrastructure that enables library and information services, and students will be able to evaluate existing and emerging technologies toward inclusive and effective practice.

Requirements

The Master of Arts in library and information science requires 36 s.h. of graduate credit. Students must maintain a minimum Graduate College program grade-point average (GPA) of 3.00. Students must earn a grade of B-minus or higher in all core courses and a grade of C or higher in elective courses. Courses may be repeated one time if a student receives a grade below the stated threshold; however, the original grade will still contribute to the cumulative GPA. If the second completion does not result in a minimum qualifying grade, the student will be ineligible to complete the MA in library and information science at the University of Iowa.

See the School of Library and Information Science Handbook on the School of Library and Information Science website for further details.

Students may apply a maximum of 12 s.h. of graduate transfer credit from non-University of Iowa institutions and 9 s.h. transfer credit from a University of Iowa graduate program. These courses must be in library and information science or areas related to the degree and are subject to applicable rules and approval by the curriculum committee. Approval is based on the course's content, currency, and applicability to a student's program.

The program may be completed fully online or through a mix of online and in-person courses. Please check residence criteria for any joint degrees and certificates. Most of the online coursework is delivered synchronously and is designed to be completed in two years with an enrollment of 9 s.h. during each of the fall and spring semesters. The School of Library and Information Science strongly recommends that students not register for more than 12 s.h. during fall and spring semesters and 8 s.h. during summer sessions. The program also may be completed through part-time study.

A thesis option may be available; interested students should contact the program for more information.

The MA in library and information science requires the following coursework.

Requirements	Hours
Core Courses	15
Electives	21

The curriculum includes two levels of coursework. Core courses consist of five required courses that provide a solid grounding for all successive coursework. Students select elective coursework consisting of seven courses for 21 s.h. or a combined electives course total of 21 s.h. based on their areas of interest. This two-level arrangement allows students to concentrate in an area that most closely matches their professional goals.

Core Courses

Course #	Title	Hours
All of these:		
SLIS:5010	Libraries, Culture, and Society (taken in student's first semester)	3
SLIS:5030	Information Organization	3
SLIS:6115	Introduction to Research Methods in Library and Information Science	3
SLIS:6170	Management, Teams, and Leadership	3
SLIS:7900	SLIS Graduation Seminar	0
One of these:		
SLIS:5020	Public User Services and Technology	3
SLIS:6140	Academic User Services and Technology	3

Electives

Course #	Title	Hours
With their advisor's guidance, students select seven courses for 21 s.h. or a combined course total of 21 s.h. from these:		
SLIS:4150	Introduction to Book Studies	3
SLIS:4910	The Book in the Middle Ages	3
SLIS:4920	The Book in Early Modern Europe	3
SLIS:5041	College and University Libraries	3
SLIS:5042	Public Libraries	3
SLIS:5044	School Library Media Administration	3
SLIS:5200	Innovation and Technology Methodology	3
SLIS:5220	Resources for Children	3
SLIS:5230	Resources for Young Adults	3
SLIS:5400	Community Archives	3
SLIS:5450	Reader's Advisory: Practices, Resources, and Media	3
SLIS:5520	Studies in Book History and Technologies	0-3
SLIS:5530	Preservation Management	3
SLIS:5535	Book Conservation	3
SLIS:5600	Reading Culture: History and Research in Print and Digital Media	3
SLIS:5630	Introduction to Special Collections and Archives	3
SLIS:6020	Literacy and Learning	3
SLIS:6040	Media Production Workshop	3
SLIS:6130	Community Engagement	3
SLIS:6140	Academic User Services and Technology	3
SLIS:6145	Digital Preservation and Stewardship	3
SLIS:6150	Information Behavior	3
SLIS:6250	Cataloging and Classification	3
SLIS:6255	Rare Book Cataloging	3
SLIS:6330	Collection Development	3
SLIS:6335	Metadata Theories and Applications	3
SLIS:6345	Stewardship of Information and Collections	3
SLIS:6350	Archives: Theory and Practice	3
SLIS:6355	Advanced Topics in Special Collections	3
SLIS:6370	Topics in Book Studies	3
SLIS:6411	Special Topics in Library and Information Science	3
SLIS:6490	Information Policy and Ethics	3
SLIS:6520	Practicum in Libraries and Information Centers	3
SLIS:6530	School Library Media Practicum	3
SLIS:6570	Independent Study	1-3
SLIS:6580	Thesis	0-6

Students may choose to satisfy up to 6 s.h. for the degree with an approved practicum (SLIS:6520 Practicum in Libraries and Information Centers). Students may repeat the practicum once for a total of 6 s.h. Placements must be preapproved by the practicum faculty lead. For more information, see the School of Library and Information Science website.

Specializations

To earn the degree, students do not need to select an area of specialization. However, programs often are designed around particular career goals, and the school offers courses in the following specialized focus areas that students may choose to take to prepare them for working in a specific area of library and information science.

Public Libraries

Public libraries provide informational, educational, and recreational materials and a wide range of services for a diverse clientele. Although public libraries receive the bulk of their funding from local taxes, they also may be organized on a regional or statewide cooperative basis. The variety of uses, services, materials, and organizational structures of public libraries makes this a challenging area of librarianship. Public librarians need to develop skills in analyzing the communities they serve, designing comprehensive marketing plans to meet their needs, implementing the plans in a cost-effective way, and evaluating the success of their efforts.

Academic Libraries

The academic library, whether in a community college, a four-year college, or a university, provides information services in support of the parent institution's teaching, research, and public service missions. These services include instruction in the use of the library and its resources. Management skills and subject or language competence are often required. Since librarians in this setting usually are considered academic faculty members, a second master's or other advanced degree is recommended.

School Libraries

Teacher librarians provide instruction to students in accessing, evaluating, and using information; collaborate with teachers on the use of resources in instruction; provide leadership in the use of instructional and information technologies for technology-enabled student learning; offer reading guidance; provide reference service; and manage the library media center. In the state of Iowa, school librarians are referred to as teacher librarians.

The University of Iowa offers a state-approved program leading to endorsement as Teacher Librarian K–12. In order to fulfill state requirements for this endorsement, students must hold or be eligible for a teaching license and must complete a designated sequence of courses that leads both to certification and to the MA degree.

Licensed teachers employed in Iowa schools may enroll in a distance education program that leads to an MA in library and information science and endorsement for teacher librarianship. Contact the School of Library and Information Science for details.

Students who are interested in school libraries but lack a valid Iowa teaching license may earn licensure as a teacher librarian by completing 30 s.h. in the College of Education. The Master of Arts in library and information science with teacher licensure requires 66 s.h. of credit. Students must apply and be admitted to both programs.

Combined Programs

Undergraduate Degree/MA

Students working on an undergraduate degree at the University of Iowa who are interested in earning an MA in library and information science may apply to a combined undergraduate degree and MA degree program. The Undergraduate to Graduate (U2G) program enables students to begin work on the MA as they complete their baccalaureate degree and complete both degrees in five years. Students admitted to the program may count 12 s.h. toward both their undergraduate degree and the MA.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program.

For more information, visit Undergraduate to Graduate (U2G) on the Graduate College website.

MA/JD

The School of Library and Information Science and the College of Law offer a combined Master of Arts/Juris Doctor program. Students in the combined program may apply a limited amount of credit toward both degrees, thereby completing the combined program with fewer semester hours than if each degree was completed separately. Students enroll in law courses their first year and begin taking School of Library and Information Science courses in their second year.

Separate application to each degree program is required. For more information about the JD, see Juris Doctor, JD [p. 1833] (College of Law) in the catalog. Elective courses also are available through the College of Law for students who wish to specialize in law librarianship but who do not want to pursue the JD.

MA/MFA in Book Arts

The School of Library and Information Science and the Center for the Book offer a combined Master of Arts/Master of Fine Arts in book arts. The combined program allows students with a strong interest in the physical book to acquire training in the book arts, book history, and material book studies. The earned expertise in the production and legacy of the book as a physical artifact combined with expertise in library and information science can be an asset for those focused on careers in special collections libraries and archives.

Students in the combined program earn both degrees by completing fewer semester hours than if each degree was completed separately. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, see the MFA in book arts [p. 1724] in the catalog.

Students interested in a librarianship career with a more general interest in the physical book should consider the book studies/book arts and technologies certificate in combination with the MA in library and information science.

MA/Certificate in Book Arts and Book Studies

The Center for the Book and the School of Library and Information Science (SLIS) collaborate to offer the Certificate in Book Arts and Book Studies/MA library and information science program. The combined program enables students to

earn an MA in library and information science and a Certificate in Book Arts and Book Studies. It requires admission to the School of Library and Information Science MA program and the Center for the Book certificate program.

The MA/Certificate in Book Arts and Book Studies offers multiple pathways into professional engagement with artifacts available in archives and libraries, such as rare and artist books. Students select courses that enable them to gain skills and knowledge in areas of service such as conservation, cataloging, instruction, and outreach. The combined program requires 51 s.h. of coursework. Students take 27 s.h. of SLIS courses; 15 s.h. of book arts, studies, and technologies courses; and the remaining 9 s.h. may be taken in either SLIS or Center for the Book coursework, or from another unit with approval from the SLIS advisor.

Admission deadline is Feb. 1 for fall entry. For more information, see the Certificate in Book Arts and Book Studies [p. 1727] in the catalog.

MA/PhD in English

The combined MA in library and information science/PhD in English program prepares students for careers in academic libraries as humanities subject specialists, reference and instruction librarians, first-year experience librarians, special collections librarians and curators, and archivists. It also enhances the research profiles and methodological toolboxes of digital humanists as well as archival historicists, in addition to improving pedagogical skills. Offered by the Graduate College and the College of Liberal Arts and Sciences; see the PhD in English in the catalog.

Admission

Applicants begin the admission process by submitting an online graduate application through Admissions. Applicants then receive a HawkID and can upload the remaining application documents through MyUI. Transcripts of all academic work, a written statement of purpose and goals, a résumé or curricula vitae, and three letters of recommendation are required. Applicants to the teacher-librarian program are asked to include a copy of their current teaching certificate. The admission committee considers each applicant's letters of recommendation, statement of purpose, résumé or curriculum vitae, and other appropriate criteria, as well as an applicant's grade-point average (GPA). Applicants for admission to the MA program should have a GPA of at least 3.00 on a 4.00 scale. Graduate Record Examination (GRE) General Test scores are not required. Admission is competitive.

Completed applications should be received by Feb. 1 for priority consideration for fall admission. Decisions of the admissions committee are announced approximately six weeks after the application deadline. Late applications are considered if places are still available. Financial aid is often not available for late applicants. Admitted students are assigned a faculty advisor for program planning during their first semester.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Career Advancement

School of Library and Information Science graduates have many options for employment. Alumni hold positions in public, school, special, and academic libraries as well as other information settings. They serve in varied roles, such as information consultant, database manager, library administrator, webmaster, network coordinator, cataloger, children's librarian, school library media specialist, and archivist.

The school shares announcements of national and international job opportunities through an electronic mailing list. In addition, the Library and Information Science Student Organization (LISSO) sponsors talks by speakers versed in areas of librarianship as well as workshops on résumé writing, social media networking, and interviewing. Internships and other opportunities provide students with hands-on experience that may enhance their job prospects.

For recent information on library and information science placement, see the Library Research Service (LRS) website and the annual Placement and Salaries 2022 report on the Library Journal website.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Library and Information Science, MA

Course	Title	Hours
Academic Career		
Any Semester		
36 s.h. of graduate level coursework must be completed; up to 12 s.h. of graduate transfer credits allowed upon approval. More information is included in the General Catalog and on department website. [a]		
Graduate College program GPA of at least 3.00 is required. [b]		
Students must earn a grade of B-minus or higher in all core courses and a grade of C or higher in elective courses.		
Students may design their program around particular career goals such as Public Librarianship, Information Processes, Medical Librarianship, Youth Services, Archives and Media, and Academic Librarianship by working with their advisor to determine coursework and sequence.		
Students may pursue select degrees, certificates or a certification simultaneously in less time than would be required to complete the programs of study independently. [c]

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

c Students can complete a combined degree with the SLIS MA and either a Juris Doctor or the Book Arts MFA, or may consider the SLIS MA with the Book Arts and Book Studies certificate, Informatics certificate, or Public Digital Humanities certificate. The SLIS MA may also be combined with the School Library Media certification.

d Course should be taken during the first semester of the program.

e SLIS core course.

f Students must complete 21 s.h. of SLIS elective graduate coursework. Work with an academic advisor to determine coursework and sequence. Additional information can be found in the General Catalog and on department website.

g Course should be taken during the second semester of the program.

h Course can be taken in either year one or two based on individual schedule.

i Students will complete and submit a capstone portfolio during their final semester. If they are graduating in the summer, they will submit their capstone portfolio during the previous spring semester.

Special Collections Librarianship and Archives, Graduate Certificate

Requirements

The graduate certificate in Special Collections Librarianship and Archives requires 15 s.h. of coursework.

The certificate develops students' skills in a variety of areas suitable to work in special collections, archives, and cultural heritage settings. Students take an introductory course and select four additional courses, one from each of the areas of study: material culture research and analysis; care and use of collections; arrangement, description, and cataloging; and digital curation and stewardship. Students may choose to complete an approved practicum in special collections.

The Certificate in Special Collections Librarianship and Archives requires the following coursework.

Required Course

Course #	Title	Hours
This course:		
SLIS:5630	Introduction to Special Collections and Archives	3

Areas of Study

Students take four courses for a total of 12 s.h., one from each of the following areas.

Material Culture Research and Analysis

Courses in this area offer students knowledge of primary source literacies and research skills that can be applied to the care, use, and interpretation of unique and distinct collections and supporting the researchers who work with them.

Course #	Title	Hours
One of these:		
SLIS:4920	The Book in Early Modern Europe	3
SLIS:5600	Reading Culture: History and Research in Print and Digital Media	3
SLIS:6411	Special Topics in Library and Information Science	3

Care and Use of Collections

Courses in this area explore the role of the special collections practitioner in the balance between providing access and promoting the use of collections and the preservation practices that ensure the long-term safety and stewardship of unique and distinct collections.

Course #	Title	Hours
One of these:		
SLIS:5530	Preservation Management	3
SLIS:6145	Digital Preservation and Stewardship	3

Arrangement, Description, and Cataloging

Courses in this area explore contemporary descriptive practices for special collections and archives with a focus on user discovery.

Course #	Title	Hours
One of these:		
SLIS:6255	Rare Book Cataloging	3
SLIS:6350	Archives: Theory and Practice	3

Digital Curation and Stewardship

Courses in this area investigate the selection, acquisition, development, preservation, and delivery of digitized and born-digital collections.

Course #	Title	Hours
One of these:		
SLIS:5530	Preservation Management	3
SLIS:6140	Academic User Services and Technology	3

Molecular Medicine

Director

- Krystal Parker

Faculty: https://mmed.medicine.uiowa.edu/profile

Website: https://mmed.medicine.uiowa.edu/

The Molecular Medicine Program provides interdisciplinary training in the concepts and methodologies fundamental to the investigation of biological processes and molecular mechanisms that relate to human disease.

The program provides the curriculum for the molecular medicine subprogram for the Doctor of Philosophy in biomedical science. It is a sequence of required and elective coursework, which provides students with broad exposure to areas, including molecular biology, cell biology, biochemistry, and integrative sciences. The curriculum ensures comprehensive exposure to conceptual and experimental aspects of molecular and cellular biology and of translational studies. Sufficient flexibility is provided so that students can adapt the program to allow specialization in their own area of interest. See the PhD in biomedical science [p. 1701] (molecular medicine subprogram) in the Graduate College section of the catalog.

Faculty members are involved in a variety of research projects involving molecular and cellular biology and molecular medicine.

Facilities

Training is conducted primarily in laboratories and teaching facilities of the Carver College of Medicine Stead Family Department of Pediatrics and the departments of Anatomy and Cell Biology, Biochemistry and Molecular Biology, Internal Medicine, Microbiology and Immunology, Molecular Physiology and Biophysics, Neurology, Neuroscience and Pharmacology, Obstetrics and Gynecology, Ophthalmology and Visual Sciences, Otolaryngology–Head and Neck Surgery, Pathology, Psychiatry, Radiation Oncology, and Surgery; and the College of Liberal Arts and Sciences departments of Biology and Chemistry. Faculty laboratories and central research facilities available to students provide access to the most up-to-date research equipment.

Courses

Molecular Medicine Courses

MMED:3310 Practical Data Science and Bioinformatics **3 s.h.**
Understanding how to access large biological data sets and use them to answer biological questions is an important skill for researchers; immersive introduction to computational handling of data; how to access and analyze publicly available data; critically evaluate data quality and analysis in context of measuring gene expression; basic coding in R/RStudio, plotting and data display, fitting and regression, statistical inference, statistical models, downloading and data wrangling; basic introduction to machine learning (clustering); for students with no computational background. Prerequisites: BIOL:1411 with a minimum grade of C- and BIOL:1412 with a minimum grade of C-. Requirements: college algebra. Recommendations: BMB:3110, or BMB:3120 and BMB:3130, or other upper-level life sciences courses. Same as BMB:3310, CBIO:3310.

MMED:5270 Pathogenesis of Major Human Diseases **3 s.h.**
Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Offered spring semesters. Same as IGPI:5270, PATH:5270.

MMED:6220 Mechanisms of Cellular Organization **3 s.h.**
Current understanding of basic cell biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BMB:3130. Same as ACB:6220, MPB:6220.

MMED:6226 Cell Cycle Control **1 s.h.**
Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Same as ACB:6226, MPB:6226.

MMED:6227 Cell Fate Decisions **1 s.h.**
Cellular fate decisions including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Same as ACB:6227, MPB:6227.

MMED:6230 Pathogenesis of Metabolic and Cardiovascular Disorders **3 s.h.**
Students focus on metabolic and cardiovascular diseases—the leading cause of morbidity and mortality in the United States; introduction to major subclasses of metabolic and cardiovascular diseases, definition of pathogenesis and clinical features of diseases, and exploration of methodologies used to study diseases; course format includes lecture, critical examination of literature, and demonstration of experimental models.

MMED:6250 Mechanisms of Parasitism Journal Club **1 s.h.**
Reviews of recent publications in molecular parasitology research and thesis research by training grant or journal club students; for students pursuing graduate thesis research in microbiology or a related discipline. Same as MICR:6250.

MMED:6260 Methods for Molecular and Translational Medicine 1 s.h.
Basic and advanced scientific techniques used to integrate biological questions in molecular and translational medicine; particularly useful for comprehensive exam preparation.

MMED:6280 Critical Thinking in Molecular Medicine 1 s.h.
Opportunity to work closely with participating faculty to gain skill in critical reading of research literature and facility in presenting material to an audience. Requirements: advanced graduate standing.

MMED:7290 Seminars in Molecular Medicine 1 s.h.
Research findings in molecular biology. Requirements: molecular and cellular biology graduate standing.

MMED:7305 Molecular Medicine Research arr.
Requirements: molecular and cellular biology graduate standing.

MMED:7310 Translational Medicine Education Rounds 1 s.h.
Students obtain clinical insights into their area of specialty in biomedical research through selection of a clinical mentor to complement the expertise of their research mentor; clinical mentors provide students with case studies, clinical scenarios, and physician shadowing opportunities which may allow students to gain new perspectives and insight into applications of biomedical research. Requirements: enrollment in Molecular Medicine Program, completion of rotations, and selection of a research mentor.

MMED:8115 Molecular Physiology 4 s.h.
Principles of human physiology, organ systems, cell function. Offered fall semesters.

Neuroscience

Chair

- Daniel T. Tranel (Neurology/Psychological and Brain Sciences)

Graduate degree: PhD in neuroscience

Faculty: https://neuroscience.grad.uiowa.edu/people/faculty

Website: https://neuroscience.grad.uiowa.edu

The Neuroscience Program provides an interdisciplinary and interdepartmental approach to graduate education and research training in the structure, function, and development of the nervous system and its role in cognition and behavior. Students obtain training at all levels of the nervous system, from cellular/molecular to the behavioral/cognitive.

Programs

Graduate Program of Study

- Doctor of Philosophy in Neuroscience [p. 1782]

Facilities

Training is conducted primarily in the laboratories and teaching facilities of the Carver College of Medicine graduate departments of Anatomy and Cell Biology, Biochemistry and Molecular Biology, Internal Medicine, Molecular Physiology and Biophysics, Neurology, Neuroscience and Pharmacology, and Psychiatry; the College of Liberal Arts and Sciences departments of Biology, Communication Sciences and Disorders, Health, Sport, and Human Physiology, and Psychological and Brain Sciences; and the Neuroscience Program.

Students use faculty laboratories and central research facilities for ultrastructural analysis; histochemistry and immunocytochemistry; electrophysiology; fluorescence-activated cell sorting; cellular and subcellular biochemistry; cell, tissue, and organ culture; operant and classical conditioning; molecular biology; behavioral genetics; neural substrates of complex behavior; brain-behavior relationships in humans; neuropsychology; and functional neuroimaging (PET, fMRI).

Courses

Neuroscience Courses

NSCI:5212 Foundations in Behavioral and Cognitive Neuroscience 4 s.h.
Concepts, methods, and findings in behavioral and cognitive neurosciences. Prerequisites: BIOL:3253. Same as PSY:5212.

NSCI:5365 Seminar: Neuropsychology and Neuroscience arr.
Clinical neuropsychology and cognitive neuroscience: cutting-edge research from scientific journals, case presentations in clinical neuropsychology, and current research. Same as NEUR:5365, PSY:5365.

NSCI:5653 Fundamental Neurobiology I 3 s.h.
Neurobiology from molecular/cellular to systems levels, including cell biology of the neuron; membrane electrophysiology; synaptic transmission and plasticity, functional neuroanatomy, sensory, motor and autonomic systems; emotion, memory, sleep, language, attention and cognition, neuronal development; focus on systems and developmental neurobiology; first in a two-semester sequence. Same as BIOL:5653, PSY:5203.

NSCI:5654 Fundamental Neurobiology II 3 s.h.
Neurobiology from molecular/cellular to systems levels, including cell biology of the neuron; membrane electrophysiology; synaptic transmission and plasticity; functional neuroanatomy, sensory, motor and autonomic systems; emotion, memory, sleep, language, attention and cognition, neuronal development; focus on molecular/cellular neurobiology and neurophysiology; second in a two-semester sequence. Prerequisites: BIOL:5653 or NSCI:5653 or PSY:5203. Same as BIOL:5654, PSY:5205.

NSCI:5658 Fundamental Neurobiology I Discussion 2 s.h.
Discussion of selected papers, including classics from neurobiology literature; coordinated with BIOL:5653 lecture material. Same as BIOL:5658, PSY:5204.

NSCI:5659 Fundamental Neurobiology II Discussion 2 s.h.
Discussion of selected papers, including classics from neurobiology literature; coordinated with BIOL:5654 lecture material. Same as BIOL:5659, PSY:5206.

NSCI:6265 Neuroscience Seminar 0-1 s.h.
Research presentations. Same as ACB:6265, BIOL:6265, MPB:6265, PSY:6265.

NSCI:7235 Neurobiology of Disease 3 s.h.
Broad, thematic understanding of disease mechanisms in neurobiological disorders. Prerequisites: ACB:6252. Same as NEUR:7235.

NSCI:7305 Neuroscience Research arr.
Requirements: neuroscience graduate standing.

Neuroscience, PhD

For information about predoctoral training opportunities in neuroscience, contact the Neuroscience Program.

Learning Outcomes

Graduates will:

- achieve a broad and deep knowledge base in neuroscience spanning the subdisciplines from cell/molecular to systems/cognitive neuroscience;
- achieve a high proficiency in research theory, design, and practice, including the ability to apply appropriate quantitative methods and statistical approaches, design and carry out the research with rigor and reproducibility, and incorporate responsible conduct in all phases of the research;
- develop strong oral and written communication skills so that they can be conversant with neuroscientists in any area of the field and can bring a broad interdisciplinary perspective to their own research;
- develop teaching effectiveness in formal and informal settings and establish credentials in teaching excellence; and
- provide impactful service to the program, institution, and scientific community, and understand the value of providing engaging outreach to society to prepare them for effective entry into the workforce and society.

Requirements

The Doctor of Philosophy program in neuroscience requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of 3.00. The program's curriculum is designed around three tracks: molecular/cellular, developmental/systems, and cognitive/behavioral. Following broad-based instruction in a core curriculum, students specialize in one of the tracks.

Within a framework of core, track-specific, and elective courses, students pursue a program of study individually designed according to their undergraduate training and graduate research goals. After enrolling in the neuroscience program, entering students consult with the advisory committee regarding their level of preparation for the program's required courses.

The Student Advisory Committee meets with all first- and second-year graduate students once each semester, helping students explore their research interests and select faculty mentors for the required laboratory rotations. Each student is expected to complete three rotations in faculty laboratories before selecting a thesis advisor. Rotations ordinarily last 12 weeks but may last from 8 to 16 weeks. Under special circumstances, two rotations may be in the same laboratory, an arrangement that permits a student to learn a variety of techniques and approaches before settling down to work on the dissertation project. Students usually choose a dissertation lab at the end of their first year.

Background Requirements

Successful students will have demonstrated preparedness for graduate training in neuroscience by completing a bachelor's degree and substantive prior research experience in one or more of the following areas: biochemistry, general physiology, cell biology, and statistics. Didactic coursework in quantitative methods, statistics, and/or computer programming is also beneficial.

Neuroscience Core

The following courses form the core of the neuroscience graduate curriculum.

Course #	Title	Hours
NSCI:5653	Fundamental Neurobiology I	3
NSCI:7235	Neurobiology of Disease	3
ACB:6252	Functional Neuroanatomy	arr.
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
PSY:6370	Principles of Neuropsychology	3
One statistics course		3-4
In addition, students register for the following two courses each semester:		
NSCI:6265	Neuroscience Seminar	0-1
NSCI:7305	Neuroscience Research	arr.

Electives

Elective requirements may be met by completing 8 s.h. from a list of courses offered by the departments of Anatomy and Cell Biology, Biology, Molecular Physiology and Biophysics, Neuroscience and Pharmacology, Psychological and Brain Sciences, and other departments as appropriate. With permission of the Student Advisory Committee, students may satisfy the elective requirement wholly or in part by registration in the following courses.

Course #	Title	Hours
NSCI:5212	Foundations in Behavioral and Cognitive Neuroscience	4
NSCI:5365	Seminar: Neuropsychology and Neuroscience	arr.
BIOL:3343	Animal Physiology	3
BIOL:4213	Bioinformatics	2,4
BMED:5207	Principles of Molecular and Cellular Biology	3
CSD:5234	Acquired Cognitive-Communication Disorders	arr.
CSD:6230	Psychoacoustics	2-3
GENE:6200	Current Topics in Genetics	1
HHP:6300	Motor Control Seminar	1
MATH:5750	Mathematical Biology I	3
MICR:5218	Microscopy for Biomedical Research	arr.
MMED:6220	Mechanisms of Cellular Organization	3
MMED:6226	Cell Cycle Control	1
MMED:6227	Cell Fate Decisions	1
PCOL:5135	Principles of Pharmacology	1
PCOL:5137	Neurotransmitters	1
PCOL:6207	Ion Channel Pharmacology	1
PCOL:6225	Growth Factor Receptor Signaling	1
PSY:3320	Psychopathology	3

PSY:5070	Programming for Psychologists	3
PSY:5080	Foundations in Cognitive Neuroscience	4
PSY:5610	Proseminar in Cognition and Perception	3
PSY:6440	Developmental Cognitive Neuroscience	3
PSY:7150	Current Topics in Psychology	3
PSY:7210	Seminar: Advanced Topics in Behavioral and Cognitive Neuroscience	3
RHET:7500	Science Communication in the Digital Age	2-3
STAT:6300	Probability and Stochastic Processes I	3

Combined Programs

PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in neuroscience in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants apply to the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a This Interdisciplinary graduate program is designed within a framework of core, track-specific, and elective courses. Students pursue a program of study individually designed according to their undergraduate training and graduate research goals. The curriculum is designed around three tracks: molecular/cellular, developmental/systems, and cognitive/behavioral; following broad-based instruction in a core curriculum, students specialize in one of the tracks.

b Students must complete specific requirements in the University of Iowa Graduate College after program

admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

d Each student is expected to complete three rotations in faculty laboratories before selecting a dissertation advisor. Rotations ordinarily last 12 weeks but may last from 8 to 16 weeks. Under special circumstances, two rotations may be in the same laboratory, an arrangement that permits a student to learn a variety of techniques and approaches before settling down to work on the dissertation project.

e Elective requirements may be met by completing 8 s.h. from a list of courses offered by the departments of Anatomy and Cell Biology, Biology, Molecular Physiology and Biophysics, Neuroscience and Pharmacology, Psychological and Brain Sciences, and other departments with approval.

f Work with faculty advisor to select an appropriate course.

g Dissertation defense.

Planning and Public Affairs

Director

- Haifeng Qian

Graduate degrees: MPAff; MS in urban and regional planning

Faculty: https://sppa.uiowa.edu/faculty-staff

Website: https://sppa.uiowa.edu/

Planning and public affairs encompasses the development and implementation of public policies that improve the quality of life in cities, regions, states, and nations as well as protects the environment and sustains the earth. Concentration areas for the MS in urban and regional planning include economic development, land use and environmental planning, housing and community development, and transportation. Focus is on analytical urban planning, public policy, and sustainability. Concentration areas for the Master of Public Affairs include public and nonprofit management and public policy.

The School of Planning and Public Affairs is a campus leader in community engagement and hosts the Iowa Initiative for Sustainable Communities (IISC) through which students from disciplines across campus provide key answers to important sustainability questions for communities in Iowa.

Related Certificate

Transportation Planning

The Transportation Planning Program offers the Certificate in Transportation Planning. The program focuses on the varied and complex problems of transportation and on interdisciplinary approaches to addressing them. The departments of Civil and Environmental Engineering, Industrial and Systems Engineering, Mechanical Engineering (College of Engineering), Economics (Tippie College of Business), and the School of Planning and Public Affairs (Graduate College) participate in the program.

The certificate is coordinated by the School of Planning and Public Affairs. See the Certificate in Transportation Planning [p. 1814] (Graduate College) in the catalog.

Programs

Graduate Programs of Study

- Master of Public Affairs [p. 1793]
- Master of Science in Urban and Regional Planning [p. 1797]

Courses

- Urban and Regional Planning Courses [p. 1785]
- Public Affairs Courses [p. 1789]

Urban and Regional Planning Courses

URP:1001 How to Change the World **3 s.h.**
Have you ever wondered what it would take to solve our biggest societal problems (e.g., pollution, hunger, homelessness, access to health care)? Often the answer is through public policy—the programs, rules, and laws meant to guide society; introduction to public policy through case studies and examples of people and institutions that have truly changed the world; activities designed to help students change the world around them. GE: Social Sciences. Same as PBAF:1001.

URP:1030 Climate Leadership and Justice **3 s.h.**
Preparation for engaged students to lead on climate change in their communities; understanding climate change causes and impacts, consideration of intergenerational justice and equity in climate adaptation and mitigation; application of best practices in climate policies and planning; supporting community and business resilience and capacity building. Same as PBAF:1030.

URP:2013 Introduction to Sustainability **3 s.h.**
Introduction to sustainability knowledge, skills, and habits as a means to shape one's vision of a sustainable citizen; emphasis on basic skills of literacy, applied math, and finding information; traditional sustainability knowledge areas related to society, economy, and environment; intersecting themes (e.g., informed consumerism, eco-economics, and livable environments). GE: Sustainability. GE: Social Sciences; Sustainability. Same as BUS:2013, SEES:2013.

URP:2020 Environment and Society: Sustainability, Policy, and Politics **3 s.h.**
How society balances its needs against those of the natural environment when addressing modern challenges like climate change, conservation, and energy crises; exploration of sustainability through the lens of U.S. environmental policy and politics; application of fundamental theories of public policy to answer questions—when do environmental problems become policy problems; what economic, social, and political forces shape environmental policy decisions; and what are the consequences of environmental policies for individuals and organizations? GE: Sustainability. GE: Social Sciences; Sustainability. Same as PBAF:2020.

URP:2056 The Splendor of Cities **3 s.h.**
Exploration and journey through space and time of global cities—London in the 1600s, Paris in the 1800s, and New Delhi in the 20th century—by use of videos and documentaries; how cities form and grow in response to social, political, cultural, and economic forces. GE: International and Global Issues. Same as PBAF:2056.

URP:3001 Planning Livable Cities **3 s.h.**
Development of livable cities in the United States; economic, physical, environmental, and political forces that shape their growth; impact of planning, how it shapes the future of cities. Same as SEES:3920.

URP:3002 Foundations of Community Engagement 1 s.h.
Knowledge, skills, and tools necessary for meaningful community engagement. Through a combination of theoretical insights, case studies, and practical strategies, become better prepared to engage partners in community-engaged courses and future careers. Effectively engage with diverse community members, assess local issues, and incorporate best practices of community engagement into academic and professional work.

URP:3134 Regional and Urban Economics 3 s.h.
Theory of location and regional development; central place theory; why cities exist and trade with one another; models of land use patterns, rents; empirical tests of models; policy applications. Prerequisites: ECON:1100. Same as ECON:3640.

URP:3135 Environmental and Natural Resource Economics 3 s.h.
Environmental and resource use problems; efficient mechanisms and other policies for environmental protection, management of common property resources. Prerequisites: ECON:1100 and ECON:1200. Same as ECON:3625.

URP:3350 Transportation Economics 3 s.h.
Overview of transportation markets—intercity, rural, urban; transportation modes—rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Recommendations: ECON:1100 and ECON:1200. Same as ECON:3750, SEES:3940.

URP:4001 Foundations of Community Engagement 1 s.h.
Knowledge, skills, and tools necessary for meaningful community engagement. Through a combination of theoretical insights, case studies, and practical strategies, become better prepared to engage partners in community-engaged courses and future careers. Effectively engage with diverse community members, assess local issues, and incorporate best practices of community engagement into academic and professional work.

URP:4225 Applied GIS for Planning and Policy Making 3 s.h.
Analysis of Census of Population and Housing data using GIS software; data and analytical needs of urban planners; coverage of GIS topics to plan functions of GIS and spatial analysis, varied GIS software in a planning organization; structure of the census. Same as PBAF:4225.

URP:4243 The Land Development Process 3 s.h.
How land is developed; analysis of site suitability, preparation of subdivision plan, site plan review, development approval process, infrastructure and site preparation, negotiating local development politics; field trips.

URP:4245 Growth Management 3 s.h.
Causes and consequences of urban sprawl, shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges.

URP:4253 Designing Sustainable and Healthy Cities 1-3 s.h.
Principles and practical elements of urban design for sustainable and healthy cities; general urban design background for policy makers and planners; impacts of urban design for environmental sustainability, community health, and well-being; physical, mental, social, and environmental health as affected by urban form, air and water quality, green spaces, and climate change impacts. Same as PBAF:4253.

URP:4256 Environmental Policy 3 s.h.
Environmental policy formation and politics; comparative international perspective on the United States' experience. Same as PBAF:4256.

URP:4260 Transportation Policy and Planning 3 s.h.
Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues. Same as PBAF:4260.

URP:4262 Transportation Research Methods and Analysis 3 s.h.
Methods for measuring current and future transportation demand based on changes in population, preferences, built environment, and changing policy objectives; survey design and analysis; basics of travel demand modeling. Same as CEE:4176.

URP:4266 Transportation, Urban Form, and Sustainability 3 s.h.
Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, and travel behavior modeling; current policies that influence travel behavior and urban form. Same as PBAF:4266.

URP:4271 Housing Policy 3 s.h.
Recent housing policy initiatives at federal, state, and local levels.

URP:4273 Community Development Through Creative Placemaking 3 s.h.
Examination of practices, ideas, and techniques for community development in small to large communities; particular focus on creative placemaking, in which planners and the public strategically shape the physical and social character of a neighborhood, town, city, or region around arts and cultural activities; application of this approach to a specific community project; for students in the arts, humanities, social sciences, and planning and public affairs. Same as PBAF:4273.

URP:4280 Planning for Disaster Mitigation and Recovery 2-3 s.h.
Types of disasters that communities face; what role planners play, what role should they play; importance of hazard mitigation and planning for post-disaster recovery; where planners' unique skills play the most significant roles in aiding a community to redesign a safer future. Same as PBAF:4280.

URP:4295 Economic Development Policy 3 s.h.
Analysis of policies and programs at national, regional, state, and local levels that address problems of economic growth, development, decline.

URP:4297 Financing Economic Development for Poverty Alleviation 3 s.h.
How public policies in general, and planning practices in particular, have an impact on an individual's likelihood of becoming poor, remaining poor, and getting out of poverty; how land use, housing, transportation, and economic development policies affect distribution and accessibility of jobs, education, housing, and public services. Same as PBAF:4297.

URP:4750 Environmental Impact Analysis 3 s.h.
In-depth exposure to the history and evolution of the U.S. Environmental Impact Assessment (EIA) process; discussion of major court cases; ecological, economic, and political aspects of current environmental controversies; exposure to real-world scenarios that are crucial to understanding the EIA process in action; field trips to six or seven environmental control facilities in Iowa City and neighboring areas. Prerequisites: SEES:1070. Same as SEES:4750.

URP:5310 Informatics for Sustainable Systems 3 s.h.
Introduction to fundamental and advanced environmental informatics concepts and procedures including automated data collection, data management, data transformations, and processing to support modeling and analysis; scientific visualization of environmental data to support management of food, energy, and water (FEW) resources; sustainability in FEW systems. Same as CEE:5310, IGPI:5311.

URP:5678 Application Simulation to Transportation 3 s.h.
Transportation system management and traffic engineering; application of real-time simulation and visualization. Prerequisites: CEE:3763 or CEE:4763. Same as CEE:5678.

URP:5679 Landscape Planning and Design 1,3 s.h.
Introduction to landscape architecture; natural processes and human/nature relations; history of landscape architecture including major forms and designs in eastern and western civilizations; urban gardens (e.g., industrialization, garden cities, parks, streetscapes, roof gardens, etc.); components of landscapes (e.g., land, soils, water, plants, climate); landscape planning (e.g., regional level, urban, zonal scales); landscape design process.

URP:5800 Environmental Policy: Theory and Practice 3 s.h.
Various types of approaches to environmental policy, with a focus on the differences between market-based (taxes and regulatory markets) and command and control (regulations and bans); assessment of approaches in terms of efficacy, efficiency, and equity; key United States and international environmental policies such as the Clean Water Act, the Endangered Species Act, and the Paris Agreement; role of technology, research, and development in addressing environmental problems. Same as PBAF:5800, SEES:5800.

URP:6200 Analytical Methods for Evidence-Based Policy 1-3 s.h.
Data science, statistics, quantitative reasoning, study design and analysis for planning and policy; applied quantitative and qualitative research, surveys, public participation; data sharing and data management for reproducibility and accessibility. Same as PBAF:6200.

URP:6201 Data Science for Urban Analytics 3 s.h.
Integration of methods with the planning process; application of multiple regression, population estimation and projection, survey methods, time series analysis, industrial growth and change; presentation of results to decision makers and the public. Prerequisites: URP:6200. Same as PBAF:6201.

URP:6202 Land Use Planning: Law and Practice 3 s.h.
Legal, social foundations of land use planning; comprehensive planning, zoning and subdivision review; legal aspects of land use, environmental planning; ordinance drafting; staff report writing; citizen participation.

URP:6203 The Making of Cities: Histories and Theories of Planning 1,3 s.h.
Histories and dynamics of urban change in Western cities as a reflection of social, cultural, economic, and environmental forces; alternative city planning philosophies, perspectives, and ethics relevant to planners and policy makers; special attention to how urban planning intersects with racism and social justice, as well as climate change and sustainability.

URP:6205 Economics for Policy Analysis 1,3 s.h.
Principles of economics, concepts and techniques of microeconomic analysis, market failures, role of government in the economy, tax policy, income inequality, and program evaluation. Same as PBAF:6205.

URP:6208 Program Seminar 1 s.h.
Planning, administrative, and policy processes; roles of planners, public policy analysts, and administrators; professional ethics and standards. Same as PBAF:6208.

URP:6209 Sustainable Communities Lab I 3 s.h.
Experience working on a two-semester project involving a current planning issue, usually for a client. Requirements: urban and regional planning graduate standing. Same as SDG:6000.

URP:6210 Sustainable Communities Lab II 3 s.h.
Continuation of URP:6209. Prerequisites: URP:6209. Requirements: urban and regional planning graduate standing. Same as SDG:6210.

URP:6211 Community Outreach Practicum 1-3 s.h.
Application of planning skills to community work by nonprofit organizations in local area; urban planners contributing to their communities; community outreach.

URP:6225 Applied GIS for Planning and Policy Making 3 s.h.
Analysis of U.S. Census data using GIS software; data and analytical needs for urban planning and public policy making; coverage of GIS topics including spatial analysis of social science and environmental problems, site selection; graphical display of results, including online maps; development of models in GIS. Same as PBAF:6225.

URP:6229 Practicum 1-5 s.h.
Full-time internship of at least five months with a planning-related organization. Requirements: urban and regional planning graduate standing.

URP:6233 Public Finance and Budgeting 3 s.h.
Local budgeting process and revenue instruments available for local governments to finance their infrastructure; local budgeting process, mechanics of property tax and other revenue sources, connection between taxation and land use, economic development, growth management, and transportation; issues regarding financing K-12 public schools. Same as PBAF:6233.

URP:6240 Public Management: State and Local Perspectives 3 s.h.
Public management in a democratic society; balancing of administrative and democratic values and interests; examination of institutional, political, organizational, and ethical context of public management and policy making; students acquire important management, leadership, and decision-making skills, as well as reflect on their values and behaviors with regard to administration and public service, particularly in a diverse and changing society; service in public sector contrasted with service in private and nonprofit sectors. Same as PBAF:6240.

URP:6243 The Land Development Process 1,3 s.h.
How land is developed; analysis of site suitability, preparation of subdivision plan, site plan review, development approval process, infrastructure and site preparation, negotiating local development politics; field trips. Prerequisites: URP:6202.

URP:6245 Growth Management 3 s.h.
Causes and consequences of urban sprawl, shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges. Same as PBAF:6245.

URP:6253 Designing Sustainable and Healthy Cities 1-3 s.h.
Principles and practical elements of urban design for sustainable and healthy cities; general urban design background for policy makers and planners; impacts of urban design for environmental sustainability and for community health and well-being; physical, mental, social, and environmental health as they are affected by urban form, air and water quality, green spaces and climate change impacts. Same as PBAF:6253.

URP:6256 Environmental Policy 3 s.h.
Environmental policy formation and politics; comparative international perspective on the United States' experience. Same as PBAF:6256.

URP:6258 Systems and Scenario Thinking 3 s.h.
Quantitative and qualitative methods for complex dynamic systems; participatory modeling; systems thinking, integrated assessment, and scenario planning; decision-making, policy development, and evaluation; nonlinear dynamics of cities, materials, energy, and human-environment relationships; numerical modeling; historical and contemporary roles of human activities in the Earth system. Same as PBAF:6258.

URP:6260 Transportation Policy and Planning 3 s.h.
Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues. Same as PBAF:6260.

URP:6263 Special Topics in Transportation Planning 3 s.h.
Introduction to a topic in transportation planning not covered in depth in other course offerings. The topics will rotate based on instructor and student interests, but may include areas such as public transportation, freight, and airport planning. Regardless of the topic area, students will learn about current topics in the field and analytical techniques, with a focus on increasing the sustainability and equity of transportation systems.

URP:6266 Transportation, Urban Form, and Sustainability 3 s.h.
Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, travel behavior modeling; current policies that influence travel behavior and urban form. Same as PBAF:6266.

URP:6268 Freight Transportation Planning 3-4 s.h.
Freight transportation planning in the United States; surface modes, primarily trucking and rail, as well as trade-offs in bulk movements by inland waterways and pipelines; comparison with recent developments in policy, planning, and practice for surface transportation in other developed economies (e.g., Europe).

URP:6270 Transportation Planning Studio 3 s.h.
Community-engaged transportation planning project administered through the Iowa Initiative for Sustainable Communities; application of transportation planning knowledge to produce a plan or study, and presentation of results to a client. Prerequisites: URP:6266.

URP:6271 Housing Policy 3 s.h.
Recent housing policy initiatives at federal, state, and local levels. Same as PBAF:6271.

URP:6273 Community Development Through Creative Placemaking 3 s.h.
Examination of practices, ideas, and techniques for community development in small to large communities; particular focus on creative placemaking, in which planners and the public strategically shape the physical and social character of a neighborhood, town, city, or region around arts and cultural activities; students and faculty apply this approach to a specific community project; for students in the arts, humanities, social sciences, and planning and public affairs. Same as PBAF:6273.

URP:6277 Affordable Housing Finance 3 s.h.
Financing development or rehabilitation of affordable housing; low-income housing tax credits, the housing finance system and current regulatory issues, mortgage discrimination, improving financing for rental housing.

URP:6278 Nonprofit Organizational Effectiveness I 3 s.h.
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as HMP:6360, MGMT:9150, PBAF:6278, RELS:6070, SPST:6010, SSW:6247.

URP:6279 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as HMP:6365, MGMT:9160, PBAF:6279, RELS:6075, SPST:6020, SSW:6248.

URP:6280 Planning for Disaster Mitigation and Recovery 2-3 s.h.
Types of disasters that communities face; what role planners play, what role should they play; importance of hazard mitigation and planning for post-disaster recovery; where planners' unique skills play the most significant roles in aiding a community to redesign a safer future. Same as PBAF:6280.

URP:6282 Grant Writing 1-2 s.h.
Same as PBAF:6282, SSW:6282.

URP:6295 Economic Development Policy 3 s.h.
Business and industrial locations, theories of regional growth and development, tools for regional economic analysis, economic impacts of COVID-19, development strategies in increasingly knowledge-driven and globalizing regional economies, economic development finance and policy, and economic development planning process. Same as PBAF:6295.

URP:6297 Financing Economic Development for Poverty Alleviation 3 s.h.
How public policies in general, and planning practices in particular, have an impact on an individual's likelihood of becoming poor, remaining poor, and getting out of poverty; how land use, housing, transportation, and economic development policies affect distribution and accessibility of jobs, education, housing, and public services. Same as PBAF:6297.

URP:6305 Readings arr.

URP:6315 Independent Study in Planning 1-6 s.h.
Research and analysis of a special planning problem; opportunity to apply knowledge in area of specialization.

URP:6325 Thesis: Urban and Regional Planning arr.

URP:6335 Internship 1-3 s.h.
Work in a planning or related agency or nonprofit organization.

URP:6340 Public Policy Analysis 3 s.h.
Rationales and goals of public policy; major steps, key methods, and tools in policy analysis; professional delivery of policy recommendations. Same as PBAF:6340.

URP:6400 Sustainable Development: The Kerala Experience 3 s.h.
Exploration of student interests in social entrepreneurship, global health, microfinance, cultural production, environmental sustainability, or other development issues in India; varied disciplinary perspectives (i.e., public health, business, social work, geography, art); student work with Indian NGOs employing a diverse variety of techniques to address social problems such as child labor, health care for the poor, illiteracy, and disability services. Winter session. Same as PBAF:6400.

Public Affairs Courses

PBAF:1001 How to Change the World 3 s.h.
Have you ever wondered what it would take to solve our biggest societal problems (e.g., pollution, hunger, homelessness, access to health care)? Often the answer is through public policy—the programs, rules, and laws meant to guide society; introduction to public policy through case studies and examples of people and institutions that have truly changed the world; activities designed to help students change the world around them. GE: Social Sciences. Same as URP:1001.

PBAF:1030 Climate Leadership and Justice 3 s.h.
Preparation for engaged students to lead on climate change in their communities; understanding climate change causes and impacts, consideration of intergenerational justice and equity in climate adaptation and mitigation; application of best practices in climate policies and planning; supporting community and business resilience and capacity building. Same as URP:1030.

PBAF:2020 Environment and Society: Sustainability, Policy, and Politics 3 s.h.
How society balances its needs against those of the natural environment when addressing modern challenges like climate change, conservation, and energy crises; exploration of sustainability through the lens of U.S. environmental policy and politics; application of fundamental theories of public policy to answer questions—when do environmental problems become policy problems; what economic, social, and political forces shape environmental policy decisions; and what are the consequences of environmental policies for individuals and organizations? GE: Sustainability. GE: Social Sciences; Sustainability. Same as URP:2020.

PBAF:2056 The Splendor of Cities 3 s.h.
Exploration and journey through space and time of global cities—London in the 1600s, Paris in the 1800s, and New Delhi in the 20th century—by use of videos and documentaries; how cities form and grow in response to social, political, cultural, and economic forces. GE: International and Global Issues. Same as URP:2056.

PBAF:3001 Public Policy Lab 3 s.h.
Research project offering students first-hand experience with public policy projects. Each lab differs in specific topic, based on the instructor's area of expertise. All labs offer the following on-the-ground experience: organization and analysis of data; how to construct and analyze a "big data" data set in an interdisciplinary collaborative research setting; how to apply and build policy theory with empirical data; and how to write an academic journal article.

PBAF:3117 Bureaucratic Politics and Public Administration 3 s.h.
Examination of bureaucracy from political, theoretical, and practical perspectives; what we mean by "bureaucracy" and how it developed over time; political control of bureaucracy; how bureaucracy performs its tasks, including behavior of bureaucrats; role of nonprofit service delivery in modern bureaucracy; how bureaucracy affects American policy and politics. Same as POLI:3117.

PBAF:3560 Public Policy and Persuasion 3 s.h.
Students build their skill set in policy analysis, formation, and communication through a social justice lens; engagement in service learning projects in one Iowa community, where work done directly impacts that community's ability to make changes; development of effective writing and oral presentation styles that can be adapted to different audiences; focus on homelessness policy using social policy and social justice concepts to explore work of policy makers who have "right-sized" existing systems to serve communities in crisis and propose solutions to systemic problems that disadvantage marginalized populations. Prerequisites: RHET:1030 or RHET:1040 or RHET:1060. Same as POLI:3560, RHET:3560, SJUS:3560.

PBAF:3570 Poverty Policy 3 s.h.
How poverty is regulated and addressed in the United States, and by federal, state, and local governments; particular focus on programs including Temporary Assistance for Needy Families (TANF), Section 8 housing, Medicaid, and Medicare; how these systems have changed over time; current models and innovations that have emerged in practice. Same as GHS:3570, POLI:3570, SSW:3570.

PBAF:3580 Native American Public Policy 3 s.h.
Exploration of ways that Native nations govern themselves, including the relationship between these sovereign entities and the U.S. government; topics include Indian Child Welfare Act, membership and enrollment, income and taxation, crime and justice; how these systems have changed over time; current practices and innovations that have emerged within different tribes. Same as NAIS:3580.

PBAF:4205 Economics for Policy Analysis 1-3 s.h.
Principles of economics, concepts and techniques of microeconomic analysis, market failures, role of government in the economy, tax policy, income inequality, and program evaluation.

PBAF:4225 Applied GIS for Planning and Policy Making 3 s.h.
Analysis of Census of Population and Housing data using GIS software; data and analytical needs of urban planners; coverage of GIS topics to plan functions of GIS and spatial analysis, varied GIS software in a planning organization; structure of the census. Same as URP:4225.

PBAF:4233 Public Finance and Budgeting 3 s.h.
Local budgeting process and revenue instruments available for local governments to finance their infrastructure; local budgeting process, mechanics of property tax and other revenue sources, connection between taxation and land use, economic development, growth management, and transportation; issues regarding financing K-12 public schools.

PBAF:4253 Designing Sustainable and Healthy Cities 1-3 s.h.
Principles and practical elements of urban design for sustainable and healthy cities; general urban design background for policy makers and planners; impacts of urban design for environmental sustainability, community health, and well-being; physical, mental, social, and environmental health as affected by urban form, air and water quality, green spaces, and climate change impacts. Same as URP:4253.

PBAF:4256 Environmental Policy 3 s.h.
Environmental policy formation and politics; comparative international perspective on the United States' experience. Same as URP:4256.

PBAF:4260 Transportation Policy and Planning 3 s.h.
Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues. Same as URP:4260.

PBAF:4266 Transportation, Urban Form, and Sustainability 3 s.h.
Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, and travel behavior modeling; current policies that influence travel behavior and urban form. Same as URP:4266.

PBAF:4273 Community Development Through Creative Placemaking 3 s.h.
Examination of practices, ideas, and techniques for community development in small to large communities; particular focus on creative placemaking, in which planners and the public strategically shape the physical and social character of a neighborhood, town, city, or region around arts and cultural activities; application of this approach to a specific community project; for students in the arts, humanities, social sciences, and planning and public affairs. Same as URP:4273.

PBAF:4280 Planning for Disaster Mitigation and Recovery 2-3 s.h.
Types of disasters that communities face; what role planners play, what role should they play; importance of hazard mitigation and planning for post-disaster recovery; where planners' unique skills play the most significant roles in aiding a community to redesign a safer future. Same as URP:4280.

PBAF:4297 Financing Economic Development for Poverty Alleviation 3 s.h.
How public policies in general, and planning practices in particular, have an impact on an individual's likelihood of becoming poor, remaining poor, and getting out of poverty; how land use, housing, transportation, and economic development policies affect distribution and accessibility of jobs, education, housing, and public services. Same as URP:4297.

PBAF:4340 Public Policy Analysis 3 s.h.
Rationales and goals of public policy; major steps, key methods, and tools in policy analysis; professional delivery of policy recommendations.

PBAF:5117 Bureaucratic Politics and Public Administration 3 s.h.
Examination of bureaucracy from political, theoretical, and practical perspectives; what we mean by "bureaucracy" and how it developed over time; political control of bureaucracy; how bureaucracy performs its tasks, including behavior of bureaucrats; role of nonprofit service delivery in modern bureaucracy; how bureaucracy affects American policy and politics. Same as POLI:5117.

PBAF:5120 Public Policy Process 3 s.h.
Theoretical and practical approaches to policy formation, adoption, implementation, and analysis; builds on theories of organizations, institutions, and interest group dynamics; important substantive policy areas (e.g., environmental, energy, housing, fiscal, infrastructure) that strengthen understanding of contemporary policies; application of theoretical and analytical tools to actual policy domains.

PBAF:5800 Environmental Policy: Theory and Practice 3 s.h.
Various types of approaches to environmental policy, with a focus on the differences between market-based (taxes and regulatory markets) and command and control (regulations and bans); assessment of approaches in terms of efficacy, efficiency, and equity; key United States and international environmental policies such as the Clean Water Act, the Endangered Species Act, and the Paris Agreement; role of technology, research, and development in addressing environmental problems. Same as SEES:5800, URP:5800.

PBAF:6200 Analytical Methods for Evidence-Based Policy 1-3 s.h.
Data science, statistics, quantitative reasoning, study design and analysis for planning and policy; applied quantitative and qualitative research, surveys, public participation; data sharing and data management for reproducibility and accessibility. Same as URP:6200.

PBAF:6201 Data Science for Urban Analytics 3 s.h.
Integration of methods with the planning process; application of multiple regression, population estimation and projection, survey methods, time series analysis, industrial growth and change; presentation of results to decision makers and the public. Prerequisites: URP:6200. Same as URP:6201.

PBAF:6205 Economics for Policy Analysis 1,3 s.h.
Principles of economics, concepts and techniques of microeconomic analysis, market failures, role of government in the economy, tax policy, income inequality, and program evaluation. Same as URP:6205.

PBAF:6208 Program Seminar 1 s.h.
Planning, administrative, and policy processes; roles of planners, public policy analysts, and administrators; professional ethics and standards. Same as URP:6208.

PBAF:6213 Public Affairs Capstone I 2 s.h.
Students work on a community, state, federal, or nonprofit-based project focused on research and development of policy proposals and management action steps.

PBAF:6214 Public Affairs Capstone II 3 s.h.
Students work on a community, state, federal, or nonprofit-based project with focus on research and development of policy proposals and management action steps. Requirements: MPAff graduate standing.

PBAF:6225 Applied GIS for Planning and Policy Making 3 s.h.
Analysis of U.S. Census data using GIS software; data and analytical needs for urban planning and public policy making; coverage of GIS topics including spatial analysis of social science and environmental problems, site selection; graphical display of results, including online maps; development of models in GIS. Same as URP:6225.

PBAF:6233 Public Finance and Budgeting 3 s.h.
Local budgeting process and revenue instruments available for local governments to finance their infrastructure; local budgeting process, mechanics of property tax and other revenue sources, connection between taxation and land use, economic development, growth management, and transportation; issues regarding financing K-12 public schools. Same as URP:6233.

PBAF:6238 Public Human Resource Management 1 s.h.
Fundamental human resource management principles; application to a variety of human resource issues in public and nonprofit organizations including recruitment, employee development and evaluation, compensation and benefits, diversity, performance management systems, health/safety systems, and employee relations.

PBAF:6240 Public Management: State and Local Perspectives 3 s.h.
Public management in a democratic society; balancing of administrative and democratic values and interests; examination of institutional, political, organizational, and ethical context of public management and policy making; students acquire important management, leadership, and decision-making skills, as well as reflect on their values and behaviors with regard to administration and public service, particularly in a diverse and changing society; service in public sector contrasted with service in private and nonprofit sectors. Same as URP:6240.

PBAF:6241 Strategic Management of Public and Nonprofit Organizations 3 s.h.
Application of well-known concepts of strategic planning and management to public and nonprofit organizations; topics include environmental assessment, mission identification, strategic issue identification, strategy formulation, strategic budgeting, strategic management and human relations, information technology and strategic management, performance measurement, strategic communication, strategic management and collaboration, strategic management and politics.

PBAF:6245 Growth Management 3 s.h.
Causes and consequences of urban sprawl, shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges. Same as URP:6245.

PBAF:6253 Designing Sustainable and Healthy Cities 1-3 s.h.
Principles and practical elements of urban design for sustainable and healthy cities; general urban design background for policy makers and planners; impacts of urban design for environmental sustainability and for community health and well-being; physical, mental, social, and environmental health as they are affected by urban form, air and water quality, green spaces and climate change impacts. Same as URP:6253.

PBAF:6256 Environmental Policy 3 s.h.
Environmental policy formation and politics; comparative international perspective on the United States' experience. Same as URP:6256.

PBAF:6258 Systems and Scenario Thinking 3 s.h.
Quantitative and qualitative methods for complex dynamic systems; participatory modeling; systems thinking, integrated assessment, and scenario planning; decision-making, policy development, and evaluation; nonlinear dynamics of cities, materials, energy, and human-environment relationships; numerical modeling; historical and contemporary roles of human activities in the Earth system. Same as URP:6258.

PBAF:6260 Transportation Policy and Planning 3 s.h.
Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues. Same as URP:6260.

PBAF:6266 Transportation, Urban Form, and Sustainability 3 s.h.
Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, travel behavior modeling; current policies that influence travel behavior and urban form. Same as URP:6266.

PBAF:6271 Housing Policy 3 s.h.
Recent housing policy initiatives at federal, state, and local levels. Same as URP:6271.

PBAF:6273 Community Development Through Creative Placemaking 3 s.h.
Examination of practices, ideas, and techniques for community development in small to large communities; particular focus on creative placemaking, in which planners and the public strategically shape the physical and social character of a neighborhood, town, city, or region around arts and cultural activities; students and faculty apply this approach to a specific community project; for students in the arts, humanities, social sciences, and planning and public affairs. Same as URP:6273.

PBAF:6278 Nonprofit Organizational Effectiveness I 3 s.h.
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as HMP:6360, MGMT:9150, RELS:6070, SPST:6010, SSW:6247, URP:6278.

PBAF:6279 Nonprofit Organizational Effectiveness II **3 s.h.**
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as HMP:6365, MGMT:9160, RELS:6075, SPST:6020, SSW:6248, URP:6279.

PBAF:6280 Planning for Disaster Mitigation and Recovery **2-3 s.h.**
Types of disasters that communities face; what role planners play, what role should they play; importance of hazard mitigation and planning for post-disaster recovery; where planners' unique skills play the most significant roles in aiding a community to redesign a safer future. Same as URP:6280.

PBAF:6282 Grant Writing **1-2 s.h.**
Same as SSW:6282, URP:6282.

PBAF:6295 Economic Development Policy **3 s.h.**
Business and industrial locations, theories of regional growth and development, tools for regional economic analysis, economic impacts of COVID-19, development strategies in increasingly knowledge-driven and globalizing regional economies, economic development finance and policy, and economic development planning process. Same as URP:6295.

PBAF:6297 Financing Economic Development for Poverty Alleviation **3 s.h.**
How public policies in general, and planning practices in particular, have an impact on an individual's likelihood of becoming poor, remaining poor, and getting out of poverty; how land use, housing, transportation, and economic development policies affect distribution and accessibility of jobs, education, housing, and public services. Same as URP:6297.

PBAF:6315 Independent Study in Public Affairs **1-6 s.h.**
Exploration of the field of public policy and/or public administration.

PBAF:6335 Internship **1-3 s.h.**
Internship; 240 hours of public affairs work with a public or nonprofit organization.

PBAF:6340 Public Policy Analysis **3 s.h.**
Rationales and goals of public policy; major steps, key methods, and tools in policy analysis; professional delivery of policy recommendations. Same as URP:6340.

PBAF:6400 Sustainable Development: The Kerala Experience **3 s.h.**
Exploration of student interests in social entrepreneurship, global health, microfinance, cultural production, environmental sustainability, or other development issues in India; varied disciplinary perspectives (i.e., public health, business, social work, geography, art); student work with Indian NGOs employing a diverse variety of techniques to address social problems such as child labor, health care for the poor, illiteracy, and disability services. Winter session. Same as URP:6400.

Master of Public Affairs, MPAff

One of the enduring grand challenges is how to collectively, creatively, and democratically respond to key challenges facing our communities, nation, and the world. Among these challenges are environmental change, including an increased incidence and intensity of disasters such as flooding, sea level rise, and wildfires attributable to climate change; health care; an aging population; addiction; inadequate infrastructure; inequality; unaffordable housing; racism; transportation; immigration; economic development; and public safety.

In response, the Master of Public Affairs program trains future leaders to systematically and creatively address these and other challenges in the coming years. With its interdisciplinary public affairs infrastructure—representing colleges, departments, and centers across campus—the University of Iowa is a leader in public affairs locally and nationally. The program educates public affairs leaders who will creatively and knowledgeably address society's most critical issues and contribute to addressing the grand challenges of the 21st century.

Learning Outcomes

Ability To Lead and Manage in Public Governance

- Understand public administration and management theories and practices.
- Apply public administration and management theories and practices to achieve the goals of public and nonprofit organizations.
- Understand budgeting, financing, and human resource management in public and nonprofit organizations.
- Develop leadership and team-building skills.

Ability To Participate In and Contribute to the Public Policy Process

- Understand the policymaking process in the institutional and market context.
- Identify key stakeholders in the policy process and understand their interactions with the public policy process.
- Conduct policy analysis and make policy recommendations.

Ability To Analyze, Synthesize, Think Critically, Solve Problems, and Make Evidence-Informed Decisions in a Complex and Dynamic Environment

- Properly frame policy problems, policy goals, and policy alternatives.
- Collect, analyze, and report data, and apply economic, statistical, and spatial analysis methods in data analysis.
- Synthesize quantitative and qualitative evidence to inform policymaking.

Ability To Articulate and Apply a Public Service Perspective

- Recognize competing values in public interest and engage the general public in decision-making.
- Understand the importance of accountability in public administration.
- Apply professional codes of ethics in policy analysis, policymaking, and administering policy.

Ability To Communicate and Interact Productively With a Diverse and Changing Workforce and Society at Large

- Understand the changing demographics and values of society and the implications of these changes for public service and public policymaking.
- Value and identify ways to engage and represent the public in the public sector.
- Develop oral, writing, and media skills for effective communication with diverse stakeholders.

Ability To Pursue Sustainable Outcomes Through Public Policy, Public Administration, and Public Management (Program-Specific Competency)

- Understand complex interactions between public, private, and nonprofit organizations and the role of these organizations within human and natural systems.
- Articulate and apply a sustainability perspective (the implementation of policies, processes, and practices that meet the needs of the present without compromising the ability of future generations to meet their own needs) to public administration, management, and policy.
- Analyze real-world problems through multidisciplinary perspectives and work collaboratively to solve problems.

Requirements

The graduate Master of Public Affairs (MPAff) requires a minimum of 42 s.h. of credit. Students must earn a grade of B-minus or higher in all core and concentration area courses and must maintain a Graduate College program grade-point average of at least 3.00.

The required curriculum includes eight core courses, electives (including those taken within a concentration area), a year-long capstone project, and an internship. Courses are offered by the School of Planning and Public Affairs (Graduate College), the departments of Management and Entrepreneurship (Tippie College of Business), Civil and Environmental Engineering (College of Engineering), Educational Policy and Leadership Studies (College of Education), Political Science, Sociology and Criminology, the School of Earth, Environment, and Sustainability, the MA in strategic communication program in the School of Journalism and Mass Communication (College of Liberal Arts and Sciences), the College of Public Health, and the Larned A. Waterman Iowa Nonprofit Resource Center (College of Law).

The Master of Public Affairs requires the following coursework.

Requirements	Hours
Core Courses	19
Concentration Area	9
Capstone	5
Electives	9

Core Courses

Students must earn a grade of B-minus or higher in all core courses except PBAF:6208.

Course #	Title	Hours
All of these:		
PBAF:5117	Bureaucratic Politics and Public Administration	3
PBAF:5120	Public Policy Process	3
PBAF:6200	Analytical Methods for Evidence-Based Policy	3
PBAF:6205	Economics for Policy Analysis	3
PBAF:6208	Program Seminar	1
PBAF:6225	Applied GIS for Planning and Policy Making	3
PBAF:6233	Public Finance and Budgeting	3

Concentration Area

Students complete 9 s.h. in one of two concentration areas: public and nonprofit management or public policy. 6 s.h. must be in planning and public affairs (prefix PBAF) or urban and regional planning (prefix URP) courses numbered 5000 or above. Students further develop competencies in the concentration area by applying the concepts and skills gained in core coursework. All concentration area coursework requires a grade of B-minus or above.

Public and Nonprofit Management

Course #	Title	Hours
This required course:		
PBAF:6240	Public Management: State and Local Perspectives	3
6 s.h. from these:		
JMC:5220	Foundations of Strategic Communication	3
JMC:5225	Digital Strategic Communication	3
JMC:5236	Topics in Strategic Communication	3
JMC:5270	Leadership Communication	3
LAW:8753	Nonprofit Organizations: Structure, Governance, and Strategy	3
LAW:8755	Nonprofit Organizations: Advocacy, Collaboration, and Fundraising	3
MGMT:3500	Nonprofit Organizational Effectiveness I	3
MGMT:3600	Nonprofit Organizational Effectiveness II	3
MGMT:4600	Nonprofit Ethics and Governance	3
PBAF:6238	Public Human Resource Management	1
PBAF:6241	Strategic Management of Public and Nonprofit Organizations	3
PBAF:6282	Grant Writing	2
PBAF:3560	Public Policy and Persuasion	3

Public Policy

Course #	Title	Hours
One of these:		
PBAF:6201	Data Science for Urban Analytics	3
PBAF:6340	Public Policy Analysis	3
6 s.h. from these:		
CEE:3790	Resilient Infrastructure and Emergency Response	3
CEE:4107	Sustainable Systems	3
CEE:5410	Politics and Economics of the Food, Energy, Water Nexus	3
CRIM:3416	Race, Crime, and Justice	3
CRIM:3417	Community Corrections	3
CRIM:3425	Women, Crime, and Justice	3
CRIM:3600	Crime and Public Policy	3
EPLS:6222	Introduction to Educational Policy	3
EPLS:6225	Higher Education Policy	3
EPLS:6228	K-12 Education Finance and Policy	3
HMP:5610	Health Policy	3
HMP:5650	Health Policy Analysis	3
HMP:6710	Federalism and Health Policy	3
JMC:5248	Strategic Political Communication	3
LAW:8433	Environmental Law	3
LAW:8622	International Environmental Law	3
PBAF:5120	Public Policy Process	3
PBAF:6201	Data Science for Urban Analytics	3
PBAF:6340	Public Policy Analysis	3
POLI:3102	The U.S. Congress	3
POLI:3104	Immigration Politics	3
POLI:3118	Interest Groups	3
POLI:3203	Campaigns, Elections, and Voting Behavior	3
POLI:3204	Public Opinion	3
POLI:3518	Water Wars: Conflict and Cooperation	3
POLI:3519	Politics of Aging	3
SEES:3420	Sustainable and Green Building Concepts	3
SEES:4750	Environmental Impact Analysis	3
SEES:4770	Environmental Justice	3
URP:5800	Environmental Policy: Theory and Practice	3
URP:6253	Designing Sustainable and Healthy Cities	3
URP:6256	Environmental Policy	3

URP:6258	Systems and Scenario Thinking	3
URP:6260	Transportation Policy and Planning	3
URP:6263	Special Topics in Transportation Planning	3
URP:6266	Transportation, Urban Form, and Sustainability	3
URP:6271	Housing Policy	3
URP:6273	Community Development Through Creative Placemaking	3
URP:6295	Economic Development Policy	3
URP:6297	Financing Economic Development for Poverty Alleviation	3

Capstone

Students take the public affairs capstone courses, typically in their final two semesters. They work on a community, state, federal, or nonprofit project in which they focus their efforts on an analysis of a contemporary public policy problem, research, development of policy proposals, and recommended action steps. This is done in tandem with the university's Iowa Initiative for Sustainable Communities (IISC), which for ten years has been providing public consultation to communities in Iowa.

Course #	Title	Hours
Both of these:		
PBAF:6213	Public Affairs Capstone I	2
PBAF:6214	Public Affairs Capstone II	3

Electives

Students complete an additional 9 s.h. of elective coursework. Elective courses may be chosen from planning and public affairs (prefix PBAF) or urban and regional planning (prefix URP) courses numbered 4000 or above, with the exception of URP:6305 Readings and URP:6325 Thesis: Urban and Regional Planning; from courses outside of the School of Planning and Public Affairs listed under the preceding "Concentration Area" section; or from the following course list. With the permission of the program, additional courses not listed here may be approved as electives.

Students must complete a minimum of 3 s.h. in elective courses from planning and public affairs (prefix PBAF) or urban and regional planning (prefix URP) courses numbered 5000 or above.

Students are encouraged, but not required, to complete an approved internship with a public agency or a nonprofit organization through PBAF:6335 Internship. They engage in 80, 160, or 240 hours of internship work under the supervision of a public affairs professional. A maximum of 3 s.h. of PBAF:6335 Internship can apply toward elective requirements.

Course #	Title	Hours
CEE:3003	Project Management Skills	1
EPLS:5240	Topics in Education	arr.
EPLS:6217	Theory and Practice of Leadership	2-3
IS:3910	Approaches to Advocacy: From Theory to Practice	3

Final Examination

An oral and written exam constitute the final examination. If the oral exam is passed, then the written exam does not need to be taken.

Combined Programs

Undergraduate Degree/MPAff

Students working on an undergraduate degree program in the Tippie College of Business or the colleges of Education, Engineering, Liberal Arts and Sciences, and Public Health who are interested in earning the Master of Public Affairs degree may apply to a combined undergraduate degree/MPAff graduate degree program. The Undergraduate to Graduate (U2G) program enables students to begin work on the MPAff degree as they complete their baccalaureate degree. Combined degree programs enable students to earn both degrees in less time than it would take to earn the two degrees separately.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, visit Undergraduate to Graduate (U2G) on the Graduate College website.

Admission

Admission requires an undergraduate degree and fulfillment of the minimum requirements of the Graduate College.

The priority deadline for funding consideration is Jan. 15 for fall admission. Funding for those who submit materials after these dates is considered only as funding permits. Applications for admission are accepted until July 15; April 15 for international students. For spring admission, applications are accepted until Dec. 1.

To apply, follow the directions on the Graduate Admissions website. Applicants can apply online and upload all supporting materials. All students requesting funding must also complete and upload the Funding Application/Award Form.

Career Advancement

Graduates land positions in professional policy analytical and/or managerial service in the public and nonprofit sectors. The degree builds knowledge and skills in a mix of topics that includes policy, economics, statistics, research, and management and prepares students for professions that influence public policy through analysis, application, or management. They have a number of career choices available, many of which lead to executive positions in federal, state, and local governments, or in nonprofit agencies.

Example positions in the local, state, federal, nonprofit, and private sectors include:

- local—government specialist leading to a city manager, community health director, or public housing manager;
- state—program manager for a state housing authority or a policy analyst/program manager for a variety of state agencies;

- federal—presidential management fellow, or starting as a GS-9 position in the federal government in a variety of federal agencies;
- nonprofit—program director leading to a nonprofit organization director; and
- public, private, and nonprofit—public and government relations specialist, lobbyist, or elected official.

The School of Planning and Public Affairs provides career assistance efforts for both internship and post-graduation job seekers. It offers job information access and one-on-one advising support from the school's career services coordinator.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Students must earn a grade of B-minus or higher in all core and concentration area courses except PBAF:6208.

c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

d Students complete an additional 9 s.h. of elective coursework. Elective courses may be chosen from planning and public affairs (prefix PBAF) or urban and regional planning (prefix URP) courses numbered 4000 or above with the exception of URP:6305 and URP:6325; from courses outside of the School of Planning and Public Affairs included in the General Catalog concentration area list; or from CEE:3003, EPLS:5240, EPLS:6217, IS:3910.

e Students are encouraged, but not required, to complete an approved internship with a public agency or a nonprofit organization through PBAF:6335. They engage in 80, 160, or 240 hours of internship work under the supervision of a public affairs professional. A maximum of 3 s.h. of PBAF:6335 can apply toward elective requirements.

f Students complete 9 s.h. in one of two concentration areas: public and nonprofit management or public policy. 6 s.h. must be in planning and public affairs (prefix PBAF) or urban and regional planning (prefix URP) courses numbered 5000 or above. See the General Catalog for list of approved courses.

g Typically taken in final semester.

h Consists of both oral and written components.

Urban and Regional Planning, MS

The Master of Science in urban and regional planning is a two-year degree program fully accredited by the Planning Accreditation Board. It is built on the premise that planners must be educated in methods of policy analysis and that there is a common body of knowledge, represented in the core curriculum, that provides a solid foundation for all specializations in the field.

A wide range of educational backgrounds provides good preparation for graduate study in urban and regional planning. Students with undergraduate majors such as environmental policy and planning, architecture, anthropology, public policy, geographic information science, business administration, economics, engineering, communication studies, finance, geography, education, marketing, political science, sociology, history, journalism, and English currently study in the school. With an increasingly diverse student body and a low student-faculty ratio, the School of Planning and Public Affairs is committed to creating an environment that is inclusive and welcoming of all students. Approximately 20 full-time students and some part-time students are enrolled and about 20% are international students.

The common core of courses and the design of the facilities allow students to get to know each other quickly. Students interact closely with faculty members in the classroom, in informal conversation, and while working on research projects. Students and faculty also collaborate in the second-year capstone courses, URP:6209 Sustainable Communities Lab I and URP:6210 Sustainable Communities Lab II, to prepare plans and reports for communities throughout Iowa. This work is supported by the university's Iowa Initiative for Sustainable Communities, which was created by the School of Planning and Public Affairs.

Graduate students working toward a master's degree in urban and regional planning may elect to pursue one of the combined degree programs offered by the school in collaboration with the colleges of Education, Engineering, Law, and Public Health, and the schools of Earth, Environment, and Sustainability and Social Work (College of Liberal Arts and Sciences).

Learning Outcomes

General Planning Knowledge

The comprehension, representation, and use of ideas and information in the planning field, including appropriate perspectives from history, social science, and the design professions:

- purpose and meaning of planning—appreciation of why planning is undertaken, the impact of planning;
- planning theory—appreciation of the behaviors and structures available to bring about sound planning outcomes;
- planning law—appreciation of the legal and institutional contexts within which planning occurs;
- human settlements and history of planning—understanding of growth and development of places over time and space;
- the future—understanding relationships between past, present, and future in planning domains, potential for intervention; and
- global dimensions—appreciation of interactions, flows of people and materials, cultures, and differing approaches to planning.

Planning Skills

Use and application of knowledge to perform specific tasks required in the practice of planning:

- research—tools for assembling and analyzing information from practice, scholarship, from primary/secondary sources;
- written, oral, and graphic communication—the ability to prepare clear, accurate, compelling text, graphics, and maps for presentations;
- quantitative and qualitative methods—data collection, analysis, modeling tools for forecasting, analysis, and projects/plans design;
- plan creation and implementation—tools for sound plan formulation, adoption, and implementation and enforcement;
- planning process methods—tools for stakeholder involvement, community engagement, and working with diverse communities; and
- leadership—tools for attention, formation, strategic decision-making, team building, and organizational/community motivation.

Values and Ethics

Values inform ethical and normative principles used to guide planning in a democratic society:

- professional ethics and responsibility—appreciation of key issues of planning ethics, public decision-making, research, and client representation (American Institute of Certified Planners Code of Ethics);
- governance and participation—appreciation of the roles of officials, stakeholders, and community members in planned change;
- sustainability and environmental quality—appreciation of natural resources, how to create sustainable futures;
- growth and development—appreciation of economic, social, and cultural factors in urban and regional growth and change; and
- social justice—appreciation of equity concerns in planning.

Requirements

The Master of Science in urban and regional planning requires a minimum of 45 s.h. of graduate credit. Students must maintain a Graduate College program grade-point average of at least 3.00.

The graduate curriculum is based on the philosophy that planners must develop the theoretical and analytic skills that will permit them to analyze social problems and evaluate public policies. Planners must also cultivate professional skills such as report writing, oral presentation, computer use, and team management in order to work effectively in various organizational and political environments.

Work for the master's degree includes core courses, an area of concentration, electives, and capstone courses. A final examination is required. A thesis is not required, although

students may petition to write one. Students are encouraged to complete an approved internship or practicum.

The MS in urban and regional planning requires the following coursework.

Requirements	Hours
Core Curriculum	25
Concentration Area	9
Elective Courses	5
Capstone Courses	6

Core Curriculum

The core curriculum helps students develop an understanding of the institutions—social, economic, political, administrative, and legal systems—that provide the context for policy analysis and that constrain public choices. It also promotes developing the ability to identify social goals and normative criteria for evaluating public policies, as well as the analytic skills to perform such investigations.

The core requires a minimum of 25 s.h., including an advanced economic methods course. The advanced economics methods course usually is taken during the first three semesters. Early core courses are drawn primarily from traditional disciplines, particularly economics and statistics, and include an introduction to land use planning and to theories and practice of planning. As students proceed through the curriculum, increasing emphasis is placed on the development of critical judgment and insight, achieved through the application of theory and methods to realistic planning problems and case studies.

The core curriculum includes the following courses; students may request a substitution of selected core courses on the basis of previous coursework. Students must earn a grade of B-minus or higher in all core courses except PBAF:6208 Program Seminar.

Course #	Title	Hours
All of these:		
URP:6200	Analytical Methods for Evidence-Based Policy	3
URP:6201	Data Science for Urban Analytics	3
URP:6202	Land Use Planning: Law and Practice	3
URP:6203	The Making of Cities: Histories and Theories of Planning	3
URP:6205	Economics for Policy Analysis	3
URP:6208	Program Seminar	1
URP:6225	Applied GIS for Planning and Policy Making	3
URP:6233	Public Finance and Budgeting	3
URP:6258	Systems and Scenario Thinking	3

Concentration Area

Beginning in the second semester, students choose a concentration area and develop it by applying the concepts and skills developed in the core. Currently, the school's faculty and course offerings support four concentration areas: economic development, housing and community development, land use and environmental planning, and transportation planning.

Each concentration area consists of one required course and two electives; at least one of the electives must be in a School of Planning and Public Affairs course (prefix PBAF or URP) numbered 5000 or above. Students must earn a grade of B-minus or higher in all concentration area courses.

Students may combine two concentration areas as approved by the student's advisor. Examples of combined areas are environmental and economic development planning, and transportation and community development planning. Students may also design other concentration areas, subject to faculty approval. For example, they may specialize in health services planning with appropriate coursework in the departments of Health Management and Policy or Occupational and Environmental Health, or in human services planning with courses in the School of Social Work.

Economic Development

Course #	Title	Hours
This course:		
URP:6295	Economic Development Policy	3

CEE:4107	Sustainable Systems	3
CEE:4158	Solid and Hazardous Wastes	3
CEE:4159	Air Pollution Control Technology	3
CEE:5410	Politics and Economics of the Food, Energy, Water Nexus	3
JMC:5266	Risk Communication	3
OEH:4240	Global Environmental Health	3
OEH:4260	Global Water and Health	3
SEES:3340	Ecosystem Services	3
SEES:3350	Urban Ecology	3
SEES:3390	Integrated Watershed Analysis	3
SEES:3500	Introduction to Environmental Remote Sensing	3
SEES:3760	Hazards and Society	3
SEES:4150	Health and Environment: GIS Applications	3
SEES:4210	Sustainability as a System Science	3
SEES:4500	Advanced Remote Sensing	4
SEES:4770	Environmental Justice	3
SEES:6300	Seminar in Environment, Conservation, and Land Use	3
An additional course from this list		3

Transportation Planning

Course #	Title	Hours
This course:		
URP:6266	Transportation, Urban Form, and Sustainability	3
At least one of these:		
URP:6260	Transportation Policy and Planning	3
URP:6263	Special Topics in Transportation Planning	3
One of these:		
URP:3350	Transportation Economics	3
URP:4262	Transportation Research Methods and Analysis	3
CEE:3763	Principles of Transportation Engineering	3
CEE:4730	Transportation Infrastructure Construction and Management	3
CEE:4762	Design of Transportation Systems	3
CEE:4763	Traffic Engineering	3
CEE:5998	Individual Investigations: Civil and Environmental Engineering	3
CPH:4220	Global Road Safety	3
An additional course from this list		3

Elective Courses

Students complete an additional 5 s.h. of elective courses; a minimum of 3 s.h. must be completed in School of Planning and Public Affairs courses (prefix URP or PBAF) numbered 5000 and above. With the permission of the program, courses not listed below may supplement those offered by the School of Planning and Public Affairs.

Students are encouraged but not required to complete an internship in a planning agency or related organization by taking URP:6335 Internship. To earn 2 s.h. of credit for the internship, students must submit a brief paper summarizing and evaluating their experience. Internships are usually paid staff positions and are completed during the summer between the first and second years or during the academic year.

Course #	Title	Hours
At least 5 s.h. from these:		
CEE:3003	Project Management Skills	1
EPLS:5240	Topics in Education	arr.
EPLS:6217	Theory and Practice of Leadership	2-3
IS:3910	Approaches to Advocacy: From Theory to Practice	3
School of Planning and Public Affairs courses (prefix URP or PBAF) numbered 4000 or above		

Non-School of Planning and Public Affairs courses (prefix URP or PBAF) approved for a concentration area; see "Concentration Area" above	

Thesis

A thesis is not required, although students may petition to write one. Up to 5 s.h. of credit from URP:6305 Readings and URP:6325 Thesis: Urban and Regional Planning may apply toward the elective requirement.

Capstone Courses

Students complete the following two capstone courses, usually during the third and fourth semesters. A grade of B- minus or higher is required for both courses.

Course #	Title	Hours
Both of these:		
URP:6209	Sustainable Communities Lab I	3
URP:6210	Sustainable Communities Lab II	3

Alternatively, an extended internship, consisting of at least five months of full-time employment in a planning-related organization, may qualify as a practicum. The practicum course URP:6229 Practicum generally takes place during the summer after the first year and fall semester of the second year. Students register for the practicum course in two consecutive sessions for a total of at least 6 s.h.

Final Exam

A final exam is required for all students. Thesis students are required to pass an oral defense of their thesis in place of the final exam. An oral and written examination constitutes the final exam for students who do not write a thesis. Students who do not write a thesis do not enroll in any course to prepare for the final exam. If the oral examination is passed, then the written examination does not need to be taken.

Combined Programs

The School of Planning and Public Affairs participates in several combined degree programs, in which students work toward an MS in urban and regional planning at the same time they work toward another degree. Combined degree programs enable students to earn both degrees in less time than it would take to earn the two degrees separately.

Undergraduate Degree/MS

Students working on an undergraduate degree program in the Tippie College of Business or the colleges of Education, Engineering, Liberal Arts and Sciences, and Public Health who are interested in earning the MS in urban and regional planning may apply to a combined undergraduate degree/MS graduate degree program. The Undergraduate to Graduate (U2G) program enables students to begin work on the MS as they complete their baccalaureate degree. Combined degree programs enable students to earn both degrees in less time than it would take to earn the two degrees separately.

A separate application for each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, visit Undergraduate to Graduate (U2G) on the Graduate College website.

Graduate Degrees/MS

See "Two Master's Degrees" under Master's Degrees in the Manual of Rules and Regulations on the Graduate College website for information on earning concurrent master's degrees. The following combined degree programs for the Master of Science in urban and regional planning are available.

- JD/MS; see Juris Doctor, JD [p. 1833] (College of Law) in the catalog.
- MS in civil and environmental engineering with a sustainable water development subprogram/MS; see the MS in civil and environmental engineering [p. 1599] (College of Engineering) in the catalog.
- MS in occupational and environmental health/MS; see the MS in occupational and environmental health [p. 2157] (College of Public Health) in the catalog.
- MSW/MS; see the Master of Social Work, MSW [p. 1010] (College of Liberal Arts and Sciences) in the catalog.
- MA in educational policy and leadership studies with a higher education and student affairs subprogram/MS; see the MA in educational policy and leadership studies (College of Education) in the catalog.

Requirements for each combined degree program can vary. The minimum requirements for the urban and regional planning part of any combined degree include completion of at least 35 s.h. in School of Planning and Public Affairs courses (prefix URP), the core and capstone courses, 9 s.h. of a concentration, and the master's degree final examination. In the case of two master's degrees, all programs require at least 60 s.h. of credit.

Students who wish to enter a combined degree program must apply to each program separately; they must be admitted to both programs before they may be admitted to the combined program. Other combined degrees may be possible. Contact the admissions coordinator at the School of Planning and Public Affairs for more information about combined degree programs.

Admission

Admission to the School of Planning and Public Affairs requires an undergraduate degree and fulfillment of the minimum requirements of the Graduate College. For fall admission, prospective students should submit complete materials to graduate admissions by Jan. 15 if funding is requested. Funding for those who submit materials after these dates is considered only as funding permits. Applications for admission are accepted until July 15; April 15 for international students. For spring admission, the deadline is Nov. 1 if funding is requested. Applications are accepted until Dec. 1.

To apply, follow the directions on the Graduate Admissions website. Applicants can apply online and upload all supporting materials. All students requesting funding must also complete and upload the Funding Application/Award Form.

Career Advancement

Today's planners find themselves in demand for such diverse jobs as sustainability coordinator and planner, environmental analyst/planner, land use planner, transportation planner, community development planner, zoning coordinator, water resources planner, community organizer, economic development planner, recycling coordinator, planning director,

neighborhood planner, state legislative analyst, planning consultant, and nonprofit project manager or director.

Recent graduates have taken positions with city, metropolitan, and regional planning agencies; state and federal government; nonprofit organizations; and private consulting firms. They work in all geographic regions of the United States and in countries around the world.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Elective course [g]		2
Exam: Master's Final Exam [h]		
	Hours	**11**
	Total Hours	**47-53**

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

c Students are encouraged to complete an internship in a planning agency or related organization. To earn 2 s.h. of credit for the internship, students must submit a brief paper summarizing and evaluating their experience.

d An extended internship, consisting of at least five months of full-time employment in a planning-related organization, may qualify as a practicum. It carries 5 s.h. of credit and substitutes for the internship and the capstone courses.

e Students must complete at least 9 s.h. in one of the following concentration areas: Transportation Planning, Housing and Community Development, Economic Development, Land Use and Environmental Planning, or Geographic Information Systems. Work with faculty advisor to determine appropriate coursework and sequence.

f Capstone coursework; grade of B-minus or better required.

g Complete at least 5 s.h. of electives. See the General Catalog for list of approved courses and work with faculty advisor to determine appropriate coursework and sequence.

h If the oral examination is passed, then the written examination does not need to be taken.

Public Digital Humanities

Advisor

- Thomas Keegan (English)

Graduate certificate: public digital humanities

Faculty: https://www.lib.uiowa.edu/studio/contact/

Website: https://www.lib.uiowa.edu/studio/pdh-certificate/

The Certificate in Public Digital Humanities welcomes students with no prior training in the digital humanities. The certificate program offers credentials to graduate students who plan to incorporate digital technology into their future research, teaching, or careers. Students learn interdisciplinary ways of conceiving of their own and other's digital work, while exploring digital tools that underlie many humanistic and social scientific research projects. Students also learn important skills such as how to manage an original project, collaborate with digital humanities scholars and practitioners across different departments, programs, units, and centers, participate in teams, and communicate technical information to a nonspecialist audience.

The certificate provides crucial training and education for the 21st-century humanist interested in the intersection between technology and research.

The Certificate in Public Digital Humanities is administered by the Graduate [p. 1682] College.

Programs

Graduate Program of Study

- Certificate in Public Digital Humanities [p. 1803]

Public Digital Humanities, Graduate Certificate

Requirements

The graduate Certificate in Public Digital Humanities requires 12 s.h. of coursework. Students must maintain a Graduate College major program grade-point average of at least 3.00 for the certificate.

The Certificate in Public Digital Humanities requires the following coursework.

Required Course

Course #	Title	Hours
This course:		
CLAS:7290	Digital Humanities Theory and Practice	3

Electives

Students choose elective coursework to suit their disciplinary or technical needs. Since electives are updated every semester, students can view a full list of available elective courses as well as access an elective course petition form; visit Public Digital Humanities Certificate on the University of Iowa Libraries website.

Course #	Title	Hours
6 s.h. from these:		
AFAM:6500/ AMST:6500/ ENGL:6050	Critical Readings in Cultural Studies: Stuart Hall's Legacy and Influences	3
AMST:3078/ GWSS:3078/ MUSM:3078/ SPST:3078	Archiving Women's History	3
AMST:3600/ AFAM:3600	Digitizing Blackness	3
AMST:5000	Interdisciplinary Research in American Cultures	3
ARTH:3000	Digital Approaches to the Study of Art	3
CINE:4620	Topics in Film Form, Style, and Theory (when topic is film adaptation)	3
CLSL:6014	Later Empire (when topic is digital text analysis)	arr.
COMM:6336	Seminar in Rhetorical Theory (when topic is critical approaches to digital culture)	1-4
ENGL:3182	Digital Cultures and Literacies	3
ENGL:6080	New Media Poetics	3
GRAD:6510	Introduction to Programming	1
GRAD:6521	Scholarly Communication and Journal Publishing	1
GRAD:6522	Digital Exhibits: Effective Design and Development	1
GRAD:6530	Open Source Web Mapping for Beginners	1
GRAD:6535	Data Visualization and Mapping	1
GRAD:6545	Introduction to Podcasting	1
GWSS:3050	Topics in Gender, Women's, and Sexuality Studies (when topic is race, gender, and sexuality in the digital humanities)	1,3
HIST:6002	Introduction to Graduate Studies in History: Historiography and Methods (when topic is digital related)	3
IGPI:4580/ DATA:4580/ STAT:4580	Data Visualization and Data Technologies	3
JMC:3122	Influencers, Artificial Intelligence, and Digital Games	3
JMC:3425	Personal Branding	3-4
JMC:3640	Information and Data Visualization	3-4
JMC:6333	Seminar in Media Communication (when topic is critical media studies or digital cultures or global digital media)	3
RHET:7500	Science Communication in the Digital Age	2-3
SEES:3540/ IGPI:3540	Geographic Visualization	3
SEES:4150/ GHS:4150/ IGPI:4150	Health and Environment: GIS Applications	3
SLIS:6140/ IGPI:6140	Academic User Services and Technology	3
SLIS:6145	Digital Preservation and Stewardship	3
SLIS:6155/ IGPI:6155	Information Visualization	3
SLIS:6350	Archives: Theory and Practice	3
SLIS:6411	Special Topics in Library and Information Science (when topic is designing "dataviz")	3

Capstone Course

Students should complete all certificate coursework before they enroll in the capstone course.

Course #	Title	Hours
This course:		
GRAD:6590	Digital Humanities Capstone	3

View Public Digital Humanities Certificate on the University of Iowa Libraries website for more information.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and

should be discussed with an academic advisor. For additional sample plans, see MyUI.

Sustainable Development

Director

- David M. Cwiertny (Chemical and Biochemical Engineering/ Chemistry/Civil and Environmental Engineering)

Graduate degree: MS in sustainable development

Website: https://sdg.grad.uiowa.edu/

First introduced in the Brundtland Report of 1987, *Our Common Future*, the principle of sustainable development calls for meeting the needs of society today without compromising the ability of future generations to meet their own needs. Today, the United Nations Sustainable Development Goals (UN SDGs) provide a blueprint for sustainable development that addresses global challenges including climate change, access to clean water, healthy air, safe and reliable energy, long-term economic well-being, equity, responsibility to other species, and conflict over limited resources.

Through training centered on the UN SDGs, the sustainable development program prepares students for technical and/ or policy leadership roles in the private or public sector to advance the sustainable development of communities in Iowa, across the United States, and around the world. Leveraging existing strengths at the University of Iowa in the areas of resource sustainability and engagement for sustainable communities, the sustainable development program is built on coursework, community-engaged projects, and professional development experiences that culminate in the MS in sustainable development.

This program of study aims to train the next generation of sustainability professionals for career placement opportunities at state and federal agencies, national laboratories, policy think tanks, nongovernmental organizations (NGOs), and in the private sector.

Programs

Graduate Program of Study

- Master of Science in Sustainable Development [p. 1806]

Courses

Sustainability Development Goals Courses

SDG:4000 The United Nations Sustainable Development Goals: A Blueprint for a Sustainable Future 3 s.h.
Establishment of baseline competencies among students from diverse backgrounds; introduction to the United Nations sustainable development goals framework; foundational concepts for sustainable development (e.g., life-cycle analysis, systems thinking, data processing, visualization). Same as SEES:4000.

SDG:5100 Building Future Leaders in Sustainable Development 3 s.h.
Focus on competencies needed to translate training and research into action for social good; topics include ethics, cultural competency, collaboration and team science, use-inspired design, and engagement. Same as CEE:5151.

SDG:5225 Communicating Data Through Stories 3 s.h.
How to communicate science effectively and responsively with multiple audiences from peers and professors to potential employers, policymakers, and the lay public; focus on speaking about science clearly and vividly in ways that can engage varied audiences, especially those outside the student's own field; connecting and finding common ground with an audience, defining goals, identifying main points, speaking without jargon, explaining meaning and context, using storytelling techniques and multimedia elements. Same as CEE:5225, GRAD:5225.

SDG:6000 Sustainable Communities Lab I 3 s.h.
Experience working on a two-semester project involving a current planning issue, usually for a client. Requirements: urban and regional planning graduate standing. Same as URP:6209.

SDG:6210 Sustainable Communities Lab II 3 s.h.
Continuation of URP:6209. Prerequisites: URP:6209. Requirements: urban and regional planning graduate standing. Same as URP:6210.

SDG:6325 Thesis: Sustainable Development 1-5 s.h.

Sustainable Development, MS

This interdisciplinary program equips students with higher-order learning skills as well as more practical, applied preparation for a variety of careers in sustainable development. The program's goal is to produce trainees with not only the fundamental and theoretical understanding expected from more traditional graduate degree recipients, but also the highly marketable, professional skills of someone graduating from an applied field of study.

Learning Outcomes

Graduates will be able to:

- analyze problems, conduct research, and make policy recommendations on topics related to the United Nations Sustainable Development Goals (UN SDGs), and anticipate the social, economic, political, technological, human health, and environmental impacts of their proposed interventions;
- communicate science effectively and responsively with diverse audiences, from technical peers to potential employers, policymakers, and the public, as well as communicate across modern forms of media intended for public engagement and dissemination of advances toward sustainable development goals; and
- demonstrate qualities essential to thrive across a range of careers, including interpersonal skills (e.g., collaboration, teamwork, and cultural competence), problem-solving abilities (e.g., inquiry, critical thinking, and creativity), and professional strengths (e.g., work ethic, responsible conduct, management, and leadership).

Requirements

The interdisciplinary Master of Science program in sustainable development requires a total of 30 s.h. of graduate credit to earn the degree without thesis. Students may choose to earn the degree with thesis. All students must maintain a UI cumulative grade-point average of at least 2.75.

With the approval of their faculty advisors, students develop a study plan that satisfies the requirements of their chosen curriculum. All students must successfully complete the core courses and take two analytical and methods courses plus elective coursework that focuses on one of the United Nations Sustainable Development Goals (UN SDGs).

The thesis option requires the completion of a project with a program partner (e.g., a community, nongovernmental organization, public agency, or private sector partner) and culminates in a required project portfolio. Students choosing the thesis option must register for SDG:6325 Thesis: Sustainable Development.

Some grants also require students to complete a responsible conduct of research or research ethics course (ENGR:7270 Engineering Ethics). Students should check with the program director to determine whether this requirement applies to them.

The MS in sustainable development requires the following coursework.

Core Courses

Course #	Title	Hours
All of these:		
SDG:4000/ SEES:4000	The United Nations Sustainable Development Goals: A Blueprint for a Sustainable Future	3
SDG:5100/ CEE:5151	Building Future Leaders in Sustainable Development	3
SDG:5225/ CEE:5225/ GRAD:5225	Communicating Data Through Stories	3
SDG:6000/ URP:6209	Sustainable Communities Lab I	3
SDG:6210/ URP:6210	Sustainable Communities Lab II	3

Analytical and Methods Courses

Students choose two courses (at least 6 s.h.) offered by supporting programs. The courses provide students with training in analytical competencies necessary for sustainable development, including spatial analysis, statistics, informatics, data management, and decision analysis.

Course #	Title	Hours
Two of these:		
CEE:5310/ IGPI:5311/URP:5310	Informatics for Sustainable Systems	3
CEE:5460	Water Quality and Flow	3
SEES:3050/ IGPI:3050	Geospatial Programming	3
SEES:3500/ IGPI:3500	Introduction to Environmental Remote Sensing	3
SEES:3520/ IGPI:3520	GIS for Environmental Applications	3
SEES:3540/ IGPI:3540	Geographic Visualization	3
SEES:4150/ GHS:4150/ IGPI:4150	Health and Environment: GIS Applications	3
SEES:4520/ IGPI:4520	GIS for Environmental Studies: Applications	3
SEES:4580/ IGPI:4581	Introduction to Geographic Databases	3
URP:6200/ PBAF:6200	Analytical Methods for Evidence-Based Policy	3
URP:6225/ PBAF:6225	Applied GIS for Planning and Policy Making	3
URP:6258/ PBAF:6258	Systems and Scenario Thinking	3

Electives

Students complete at least 9 s.h. in elective coursework structured around the 2030 Sustainable Development Goals (SDGs). Students are required to focus on one SDG and complete three courses in that specialization area to provide depth in one area.

Students completing a thesis are permitted to apply a maximum of 3 s.h. of SDG:6325 Thesis: Sustainable

Development toward elective requirements but are not required to do so.

Affordable and Clean Energy

Course #	Title	Hours
CBE:3405	Green Chemical and Energy Technologies	3
CEE:5410	Politics and Economics of the Food, Energy, Water Nexus	3
CHEM:4760	Radiochemistry: Energy, Medicine, and the Environment	3
SEES:3780/ GHS:3780/ HIST:3240/ POLI:3431	U.S. Energy Policy in Global Context	3

Clean Water and Sanitation

Course #	Title	Hours
CEE:4102	Groundwater	3
CEE:4119	Hydrology	3
CEE:4150/CBE:4420	Environmental Chemistry	3
CEE:4385	Water Scarcity in Rural India	3
CEE:5350	Watershed Hydrology and Ecosystem Processes	3
CEE:5440	Foundations of Environmental Chemistry and Microbiology	3
CEE:5460	Water Quality and Flow	3
OEH:4240	Global Environmental Health	3

Climate Action

Course #	Title	Hours
CEE:4159/ CBE:4459/IGPI:4159	Air Pollution Control Technology	3
CEE:4180	Fundamentals of Atmospheric Science	3
SEES:3331	Human Dimensions of Climate	3
SEES:4470	Ecological Climatology	3
SEES:5800/ PBAF:5800/ URP:5800	Environmental Policy: Theory and Practice	3

Industry, Innovation, and Infrastructure

Course #	Title	Hours
SEES:3420	Sustainable and Green Building Concepts	3
URP:6202	Land Use Planning: Law and Practice	3
URP:6266/ PBAF:6266	Transportation, Urban Form, and Sustainability	3

Responsible Consumption and Production

Course #	Title	Hours
CEE:4158/ OEH:4920	Solid and Hazardous Wastes	3
GHS:3560	Global Garbage and Global Health	3
SEES:3090/ GHS:3070	Hungry Planet: Global Geographies of Food	3
SEES:4750/ URP:4750	Environmental Impact Analysis	3
SEES:4770/ AFAM:4770/ GHS:4770	Environmental Justice	3
URP:6256/ PBAF:6256	Environmental Policy	3

Sustainable Cities and Communities

Course #	Title	Hours
CEE:4107/CBE:4410	Sustainable Systems	3
SEES:3350	Urban Ecology	3
SEES:3400	Iowa Environmental Policy in Practice	3
SEES:3760/ GHS:3760	Hazards and Society	3
SEES:4210	Sustainability as a System Science	3
URP:6245/ PBAF:6245	Growth Management	3

The Biosphere (Life Below Water and Life on Land)

Course #	Title	Hours
CBE:3405	Green Chemical and Energy Technologies	3
CEE:5350	Watershed Hydrology and Ecosystem Processes	3
SEES:3020	Earth Surface Processes	3
SEES:3340	Ecosystem Services	3
SEES:4790	Applied Environmental Geology	3

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations and the Graduate College Admission Requirements on the Graduate College website and the sustainable development admission requirements.

Prospective students must hold a baccalaureate degree or the equivalent from an accredited institution with preparation appropriate for advanced study in the field of sustainability. Students with an undergraduate degree in natural and social sciences, technology, engineering, and/or mathematics will be well prepared to thrive in this interdisciplinary degree program. The program is intentionally designed to be inclusive for students coming from different and diverse academic backgrounds given the broad range of perspectives and expertise that are needed to move society closer to sustainable development goals.

Application materials must include:

- one- or two-page self-statement describing an applicant's interest in the sustainable development program, how formal and informal experiences make the applicant a good fit for the program, and how the applicant can uniquely contribute to the program; the statement should

briefly discuss the career path(s) the applicant intends to pursue upon completion of the degree;
- a résumé; and
- three letters of recommendation.

Career Advancement

Graduates can obtain employment across a variety of sectors that intersect with sustainability and sustainable development, including jobs in public service at the local, state, or federal level in all areas related to the environment (e.g., watershed management coordinators, state natural resource departments, and sustainability directors for cities across the United States, analysts and scientists at governmental agencies such as the U.S. Department of Agriculture or the U.S. Environmental Protection Agency. Graduates may find employment in the private sector as consultants for industries seeking to improve the sustainability of their operations and processes (e.g., sustainable supply chain, waste management, minimization, and sustainability reporting, metric development, and management).

Graduates are better qualified for positions in the private sector including chief sustainability officer, director of sustainability, and sustainability project manager or coordinator. Opportunities also exist for careers in global development, working internationally with nongovernmental organizations (NGOs), and other organizations that strive to advance sustainable development goals worldwide, particularly in resource-constrained areas of the developing world. In addition, degree recipients are well-positioned to pursue additional graduate studies toward a PhD, MBA, or JD degree.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Translational Biomedicine

Executive Dean

- Patricia L. Winokur

Education Director

- Donna A. Santillan (Obstetrics and Gynecology)

Graduate degree: MS in translational biomedicine

Website: https://icts.uiowa.edu/

The Translational Biomedicine Program offers training in translational biomedicine, biostatistics, ethics, and in various elective areas while providing time to conduct mentored research under the direction of an interdisciplinary team. It is specifically tailored to clinicians in medicine, nursing, pharmacy, dentistry, and psychology, as well as to PhD researchers conducting translational research in the biomedical sciences.

Related Programs

Certificate

The Department of Epidemiology and the Institute for Clinical and Translational Science offer the graduate certificate program in translational and clinical investigation; see the Certificate in Translational and Clinical Investigation [p. 2166] (College of Public Health) in the catalog.

Master of Science

The Department of Epidemiology (College of Public Health) offers an MS in clinical investigation [p. 2128] which may be a good alternative to the Translational Biomedicine Program.

Programs

Graduate Program of Study

- Master of Science in Translational Biomedicine [p. 1810]

Facilities

Training is conducted mainly in the laboratories and teaching facilities of the Carver College of Medicine and the College of Public Health. The university's Institute for Clinical and Translational Science is available for research training. The program is also linked with the Carver College of Medicine's graduate training program in clinical research.

Courses

Translational Biomedicine Courses

TBM:5000 Translational Biomedical Research arr.
Student research guided by mentor.

TBM:5001 Introduction to Translational Biomedicine 3 s.h.
Basis for clinical and translational research; introduction to principles of experimental design for patient- and population-oriented research; approaches available to clinical and translational investigators (e.g., statistics, questionnaires, ethics, imaging, information technology); infrastructure that supports clinical and translational investigators at the University of Iowa and nationally; for early-career clinicians/scientists and established investigators. Requirements: enrollment in translational biomedicine MS program.

TBM:5002 Critical Thinking and Communication: Study Design and Commercialization 1 s.h.
Various study design methodologies and process of commercialization; presentations of current projects. Requirements: candidacy for MS in translational biomedicine.

TBM:5003 Critical Thinking and Communication: Scientific Writing and Presentation Strategies 1 s.h.
Grant development and journal writing process; development of effective scientific presentations.

TBM:5004 Critical Thinking and Communication: Career Development and the Funding Process 1 s.h.
Introduction to a variety of career development awards and their requirements; opportunity to work on personal career development grant applications.

TBM:5005 Critical Thinking and Communication: Leadership, Team Science, and Community Engagement 1 s.h.
Leadership skills for managing and developing a research team; leading and organizing a team; managing and sharing resources with other faculty and fellows; finding, hiring, and keeping good people; leading productive meetings; delegation strategies, resources and tools for quality community engagement; information on applying and teaching leadership skills to mentees.

Translational Biomedicine, MS

Learning Outcomes

The goals of the MS program in translational biomedicine are to:

- promote interaction and collaboration among researchers across the translational research spectrum;
- enrich understanding of T1 research (laboratory), T2 research (application to evidence-based practice), T3 research (implementation and dissemination), and T4 research (population studies and policy development) for basic and clinical scientists to expand the relevance of their work in these areas; and
- develop skills in ethical decision-making, scientific leadership, team building, networking, and research program management.

Requirements

The Master of Science program in translational biomedicine (TBM) requires a minimum of 34 s.h. of graduate credit plus a final project. Students must maintain a UI cumulative graduate program grade-point average of at least 3.00. The plan of study for students in the two-year program is tailored to their scientific goals and interests.

The program is designed to teach members of scientific teams how to move biomedical discoveries into clinical applications and beyond. It is tailored for individuals who have completed doctoral-level training in one area of biomedicine and wish to apply their expertise to the translational research spectrum. The program admits individuals who hold medical or graduate degrees (e.g., MD, DO, DDS, DNP, PhD, PharmD, DVM, or the equivalent) and are employed by the University of Iowa at the faculty ranks of associate professor, assistant professor, instructor/associate, fellow physician, or postdoctoral scholar/fellow.

The MS in translational biomedicine requires the following coursework.

Core Courses

Course #	Title	Hours
All of these:		
TBM:5000	Translational Biomedical Research	9
TBM:5001	Introduction to Translational Biomedicine	3
TBM:5002	Critical Thinking and Communication: Study Design and Commercialization	1
TBM:5003	Critical Thinking and Communication: Scientific Writing and Presentation Strategies	1
TBM:5004	Critical Thinking and Communication: Career Development and the Funding Process	1
TBM:5005	Critical Thinking and Communication: Leadership, Team Science, and Community Engagement	1
BIOS:4120	Introduction to Biostatistics	3
EPID:4400	Epidemiology I: Principles	3
EPID:6950	Clinical Research Ethics	2
One of these:		
BIOS:5120	Regression Modeling and ANOVA in the Health Sciences	3
EPID:5241	Statistical Methods in Epidemiology	4

Electives

Students must earn a minimum of 6 s.h. in graduate-level elective coursework pertinent to their educational goals. Electives may be selected from the following lists, or students may obtain approval for other courses with program administration approval.

Biostatistics

Course #	Title	Hours
BIOS:5130	Applied Categorical Data Analysis	3
BIOS:5310	Research Data Management	3
BIOS:6210	Applied Survival Analysis	3
BIOS:6310	Introductory Longitudinal Data Analysis	3

IGPI:3314	Genomics	3

Innovation

Course #	Title	Hours
ENTR:2000	Entrepreneurship and Innovation	3
MED:8073	Biomedical Innovation	1
NURS:6553	Seminar on Innovations	4

Neuroscience

Course #	Title	Hours
BIOL:2753	Introduction to Neurobiology	3
NSCI:5212	Foundations in Behavioral and Cognitive Neuroscience	4
NSCI:5653	Fundamental Neurobiology I	3
PSY:6370	Principles of Neuropsychology	3

Final Project

In addition to completion of the 34 s.h. in required coursework, scholars must submit a final project. The project may be in one of the following formats.

- A complete grant application for a K01, K08, K23, R01, R03, R21, a U.S. Department of Veterans Affairs career development award, or the equivalent. The R03 completed as part of the required grant writing course may not be submitted as the final project.
- An original research manuscript that is of acceptable quality for a peer-reviewed biomedical journal (the paper can be ready for submission, under review, or already published). The manuscript must contain the following components: a structured abstract; an introductory section that adequately frames the research question addressed; and a methodology section that sufficiently describes the following elements (study design, study sample, data collection strategies and sources, data elements, and data analysis), results of the study, and a discussion including a description of the relationship of the current findings to prior relevant research and/or policy implications of the findings and methodological limitations.

Admission

The Translational Biomedicine Program welcomes applicants who have diverse educational and scientific backgrounds and varied research interests. Applicants must have a strong interest and background in a health science profession and knowledge of basic sciences and medicine.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Translational biomedicine applicants must:

- have a doctoral-level degree in a biomedical discipline (e.g., MD, DO, DDS, DNP, PhD, PharmD, DVM, or the equivalent);
- be employed by the University of Iowa as an associate professor, assistant professor, instructor/associate, a fellow physician, or a postdoctoral scholar/fellow;
- be engaged in scientific research with a University of Iowa mentor who has funding from a peer-reviewed source (e.g. National Institutes of Health, National Science Foundation, and so forth);
- hold a bachelor's degree from a regionally accredited American college or university or an equivalent degree from an international institution, as determined by University of Iowa Admissions; and
- have a grade-point average of at least 3.00 or the international equivalent, as determined by University of Iowa Admissions.

Applicants must submit a curriculum vitae, a statement of research interest and career goals, and three letters of recommendation. One letter must be from the applicant’s UI research mentor; the program recommends that the second be a letter of support from the applicant’s department chair.

Students and their mentors must guarantee sufficient time for coursework and research. The program does not require a specific percent effort, but successful candidates would likely devote 50–75% of their time to a combination of coursework and research.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Complete one of the following formats: a complete grant application (K01, K08, K23, R01, R03, R21, or VA career award) or an original research manuscript (>2500 words) of published or in-publishable quality for a peer-reviewed journal. Additional requirements apply.

c Elective coursework pertinent to educational goals and background may be selected from specific lists in Biostatistics, Device Development, Drug Discovery, Epidemiology, Genetics, Informatics, Innovation, and Neuroscience. Program administration approval required for other courses.

Transportation Planning

Director, School of Planning and Public Affairs

- Haifeng Qian

Coordinators, Transportation Planning

- Bogdan Kapatsila, Abbi Castle

Graduate certificate: transportation planning

Faculty: https://sppa.uiowa.edu/faculty-staff

Website: https://sppa.uiowa.edu/

Transportation is vital to modern society. The United States, like other nations, faces many critical transportation problems and issues. The highway system is reaching an advanced stage of its life cycle, transportation finance is unsustainable, public transit operating deficits are growing, the quality of transportation available to many citizens is unacceptably low, serious inequities exist between transportation modes, and extensive changes are called for in traditional transportation institutions. New approaches to financing the nation's road system are badly needed.

Transportation engineers and planners draw on a number of skills to respond to the challenges they face. They must analyze and forecast the movement of people and goods within and between cities; identify effective and efficient means for providing desired transportation services; price these services properly; and evaluate the impact that transportation changes have on land use, environmental quality, economic activity, the local or regional economy, and various subgroups within society.

The graduate Certificate in Transportation Planning is designed for:

- practitioners in planning, engineering, and other fields who want to increase their transportation planning expertise; and
- graduate students at the University of Iowa or other institutions with an interest in the field.

The Certificate in Transportation Planning is coordinated by the School of Planning and Public Affairs [p. 1785].

Programs

Graduate Program of Study

- Certificate in Transportation Planning [p. 1814]

Transportation Planning, Graduate Certificate

Requirements

The graduate Certificate in Transportation Planning requires 12 s.h. of credit.

In order to cover the variety of topics needed for professionals in transportation planning, the certificate curriculum includes transportation planning history, policy, analytic methods, and the relationship between travel, city form, and urban design. For the capstone course, students undertake a real-world transportation project in collaboration with a community partner through the Iowa Initiative for Sustainable Communities.

The first course in the certificate program introduces students to the fundamentals of urban planning history, theory, and the symbiotic relationship between transportation systems, urban form, and sustainability. Elective courses deepen knowledge through specialization in areas of policy, travel behavior analysis, and traffic safety. Students complete the capstone project as their last course to earn the certificate.

The certificate may be completed in one calendar year or completed over a two-year span if students complete one transportation course per semester. This option accommodates part-time students and those currently enrolled in a two-year master's degree program at the University of Iowa.

Courses are taught primarily in hybrid or online formats. Some elective courses are offered on campus only. Courses are taught by faculty members in the School of Planning and Public Affairs and the College of Public Health.

The Certificate in Transportation Planning requires the following work.

Required Coursework

Course #	Title	Hours
This course (completed first):		
URP:6266	Transportation, Urban Form, and Sustainability	3
Two of these:		
URP:4262	Transportation Research Methods and Analysis	3
URP:6233	Public Finance and Budgeting	3
URP:6260	Transportation Policy and Planning	3
CPH:4220	Global Road Safety	3
One of these:		
URP:6210	Sustainable Communities Lab II (with advisor approval)	3
URP:6270	Transportation Planning Studio	3

Master of Science in urban and regional planning students may apply to the certificate program through the Graduate College. See Planning and Public Affairs [p. 1785] in the catalog for information about graduate study and degree requirements in the school.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

College of Law

Dean

- Todd E. Pettys

Associate Deans

- Carin N. Crain, Emily A. Hughes, Daria Fisher Page, Jason Rantanen, Adrien K. Wing

Assistant Dean

- Collins B. Byrd

Director, Law Library

- Carissa J. Vogel

Undergraduate certificate: human rights

Professional degrees: JD; LLM; MSL; SJD

Faculty: https://law.uiowa.edu/faculty-and-scholarship/meet-our-faculty

Website: https://law.uiowa.edu

The University of Iowa College of Law is the oldest law school west of the Mississippi River. Founded in 1865 as the Iowa Law School, the college is a charter member of the American Association of Law Schools and an American Bar Association-approved law school.

The College of Law is part of Iowa City's unique cultural community. Students, faculty, and staff work together in a friendly, relaxed, and productive environment that puts students' needs first.

Iowa's challenging law school curriculum carefully balances substantive courses, perspective offerings, examination of ethical values and professionalism, and experiential programs, including a highly active in-house legal clinic. The college's low student-to-faculty ratio and the faculty's open-door policy ensure that students have opportunities for interaction and collaboration with their law professors.

The college's writing program—one of the strongest among law schools nationwide—is integral to all students' academic experience. During both semesters of their first year, students take a small-section course in legal analysis, writing, and research. During the second and third years, they complete four additional writing units. Among opportunities for completing the writing requirement is to work on one of the law school's four student-run scholarly journals: *Iowa Law Review; Journal of Corporation Law; Journal of Gender, Race & Justice;* and *Transnational Law & Contemporary Problems*.

Programs

Undergraduate Program of Study

- Certificate in Human Rights (under University of Iowa Center for Human Rights [p. 1839])

Professional Programs of Study

- Juris Doctor [p. 1833]
- Master of Laws [p. 1836]
- Master of Studies in Law [p. 1837]

The Master of Studies in Law program is not accepting graduate students at this time.

- Doctor of Juridical Science [p. 1838]

Facilities

Facilities and Resources

Boyd Law Building

The Willard L. Boyd Law Building exemplifies Iowa's continuing commitment to legal education and the legal profession. The building's large, circular structure reflects the special character of the Iowa law school and allows the college to operate in a physical environment in which every square foot of space is designed to promote the college's academic and professional programs.

Among the building's facilities are classrooms, the Levitt Auditorium, the Law Library; faculty and administrative offices, offices for the college's cocurricular programs, meeting rooms, and a bookstore. The first floor features the Lauridsen Family Law Commons, a renovation project completed in 2016. This space provides ample areas for studying, including two conference rooms, two seminar rooms, and the Court Café. The third floor of the Boyd Law Building is where the college's clinical law programs are located. This suite functions as a teaching law firm, offering ease of access, usability, and visibility.

Law Library

The centerpiece of the Boyd Law Building is the University of Iowa Law Library. The Law Library has one of the most comprehensive collections of legal materials in the country, containing more than 1.4 million separately cataloged titles. A particular strength of the library is its collection of U.S. legal materials. The Law Library also holds an exceptionally strong collection of materials in foreign, comparative, and international law, including a print collection comprising more than 280,000 volumes and over 1,500 serials and subscriptions.

Research Centers and Programs

Participation in research centers and outreach programs is an important part of the College of Law's service to professional and civic communities.

Iowa Innovation, Business and Law Center

The Iowa Innovation, Business and Law Center is an interdisciplinary teaching and research venture that brings together faculty members who teach and study problems of business, technology, innovation, regulation, and legal policy from diverse perspectives. The center's purpose is twofold: first, it offers an innovative curriculum and outstanding legal training in areas pertaining to government regulation of entrepreneurship, innovation, and management of resources; second, it encourages creative individual and collaborative interdisciplinary research in these areas.

Labor Center

The University of Iowa Labor Center provides educational programs and research support to Iowa's working people and their organizations. Since 1951, the Labor Center has acted as a bridge between the university and Iowa's labor community.

Larned A. Waterman Iowa Nonprofit Resource Center

The Larned A. Waterman Iowa Nonprofit Resource Center offers information and assistance from across the University of Iowa to help Iowa's charitable nonprofit organizations become more effective in building their communities.

Law, Health Policy and Disability Center

The Law, Health Policy and Disability Center is a leader in law, technology, education, and research focused on improving the quality of life for persons living with disabilities. Based at the University of Iowa College of Law, the center concentrates on public policy and its impact on persons with disabilities, emphasizing employment, self-determination, and self-sufficiency.

National Health Law and Policy Resource Center

The National Health Law and Policy Resource Center, founded in 1981, promotes laws and public policies that foster and facilitate accessible, affordable, and quality health services and related services for all Americans, particularly members of vulnerable and disadvantaged populations. The center provides a nonpartisan forum for informed dialogue between academics, practitioners, and public policymakers based on the best available data and information about important health law and policy issues.

University of Iowa Center for Human Rights

The University of Iowa Center for Human Rights was founded in 1999 as an outgrowth of the university's year-long commemoration celebrating the 50th anniversary of the Universal Declaration of Human Rights. Based in the College of Law, the center engages in human rights teaching, scholarship, and public engagement.

Courses

- Law Courses [p. 1816]
- Law Study Abroad Courses [p. 1831]

The following courses are those offered by the College of Law during the past four academic years and those scheduled to be offered during the coming academic year. See Courses and Curriculum on the College of Law website for a list of College of Law courses defined by Interpretation 509-1 of the American Bar Association Standards for the Approval of Law Schools.

Law Courses

LAW:1010 Introduction to the Legal System and Practice **3 s.h.**
Initial study of law and legal reasoning; introduces the nature and function of rules/law, the distinctiveness of legal reasoning, and some basic kinds of law; broad level overview of legal profession, including both criminal and civil proceedings; general foundation for those interested in considering law school or for those whom basic legal knowledge will enhance their career aspirations. GE: Social Sciences.

LAW:4800 Undergraduate Clinical Law Internship Program **arr.**
Students learn about law school experience and legal careers through intensive training in a range of lawyering skills and collaboration with teams of law students on actual client matters; students enrolled in the Center for Environmental Law and Policy work with law students representing a nonprofit or other entity using nonlitigation means to advance social or economic justice; students enrolled in the Federal Criminal Defense Clinic work as investigators with law students representing indigent criminal defendants in the Northern District of Iowa; involves weekly seminars and team supervision, biweekly undergraduate supervision meetings.

LAW:8006 Civil Procedure **4 s.h.**
Procedure before trial; commencement of a suit; subject matter jurisdiction; jurisdiction over the person and venue; pleadings, motion practice, including summary judgment, simple joinder of parties and claims in determining scope and size of the lawsuit; pretrial discovery procedures, the trial, claim and issue preclusion.

LAW:8010 Constitutional Law I **3 s.h.**
Constitutional allocation of governmental powers; doctrine of judicial review and nature of judicial function in constitutional cases; relationships among several branches of national government; the federal system, including powers delegated to national government, powers reserved to states, and intergovernmental immunities; role of judicial process in structuring limits within which society operates; institutional development of legal system, relationship among institutions within the system.

LAW:8017 Contracts **4 s.h.**
Law that governs the otherwise unregulated sector of the economy and concerns the making and enforcement of promises, usually as part of a bargain; basics-formation of agreements, consideration, invalidating causes, parol evidence and interpretation, conditions, remedies; roles of promises and promissory exchanges in a modern economy; limitations the law places on freedom of contract.

LAW:8022 Criminal Law **3 s.h.**
Basic understanding of substantive criminal law; underlying premises of and justifications for criminal law; emphasis on general doctrines that dictate the minimum elements necessary to impose criminal liability, essential requirements of culpable conduct (an *actus reus*, or guilty act), blameworthy mental state (a *mens rea* or guilty mind); rape, homicide, causation, attempt, conspiracy, accomplice liability; various defenses to criminality, such as self-defense, duress, intoxication, insanity, diminished capacity.

LAW:8026 Introduction to Law and Legal Reasoning **1 s.h.**
Basic concepts and intellectual skills necessary for understanding the first-year curriculum.

LAW:8027 Introduction to Legal Theory and Perspectives on the Law **1 s.h.**
Introduction to foundational legal theories and perspectives on the law necessary for understanding the law and law school curriculum.

LAW:8028 Advanced Bar Preparation **3 s.h.**
Extended bar preparation for third-year law students that supplements regular bar exam course; provides strong conceptual understanding of the most highly tested principles of law across three or four subjects; flexible and robust analytical framework to solve bar exam problems from multiple choice to essay questions; preparation to learn skills to study for bar exam following law school graduation.

LAW:8032 Legal Analysis Writing and Research I 2 s.h.
Structured development of effective skills in legal analysis, writing, and research; first of a two-semester sequence.

LAW:8033 Legal Analysis Writing and Research II 3 s.h.
Structured development of effective skills in legal analysis, writing, and research; second of a two-semester sequence. Prerequisites: LAW:8032.

LAW:8037 Property 4 s.h.
Concept of private property as one of legal system's basic foundations; development of Anglo-American property law with changing currents of economic, social, political thought; understanding decision-making by courts in common-law tradition, legislative enactments; origins of property rights; possession and ownership; capacity of property law to recognize a wide range of interest configurations; ease and reliability in conveyance of property interests commercially, gratuitously; function of public recording; role of adverse possession, long-standing property relationships; responsiveness of property law to social change illustrated by modern reforms in landlord-tenant act.

LAW:8046 Torts 4 s.h.
Development of tort principles; civil responsibility for harms to tangible personal and property interests; roles of legislatures, judges, juries; intentional harms, negligence, and strict liability considered from perspectives of jurisprudence, economics, and moral philosophy.

LAW:8105 Administrative Law 3 s.h.
Formal and informal procedures, processes, and functions of state and federal administrative agencies; legislative, executive, and judicial control of their actions; nature and definition of administrative agencies; permissible delegation of authority to administrative agencies; scope of agency authority; agencies' right to obtain information from members of the public; citizens' right to obtain information in agencies' possession; definition and types of administrative rules; rule-making procedure; agency discretion to make law by rule or adjudication; right to a trial-type hearing before an agency; parties' specific rights in an administrative hearing, including notice, open or closed hearing, right to counsel, evidence, nature and exclusivity of the record; agency decision-making process, including role of hearing officers, separation of functions and bias of decision makers, nature of opinion required; judicial review of administrative action, including reviewability of agency action, primary jurisdiction of agencies, exhaustion of administrative remedies, standing, scope of judicial review, mechanics of judicial review.

LAW:8121 Advanced Legal Research Methods in Specialized Subjects 1 s.h.
Legal research methods in specific legal practice and research areas; specific topic rotates each year (litigation and ADR legal research, business and tax legal research, federal legislative history legal research, legal history research); students work with real-world examples to improve research skills related to a particular legal subject.

LAW:8123 Advanced Legal Research 2 s.h.
Builds on LAW:8032 and LAW:8033; in-depth exploration of American legal resources; current print and electronic resources that help students develop better, more efficient search techniques and select the most effective formats for their research; opportunity to review the basic sources of legal information, use varied techniques to access legal information, develop personal strategies for managing information; advanced training in LEXIS, WESTLAW, the internet; nonlegal information sources important to the legal community.

LAW:8124 Legal Research in Practice 2 s.h.
Introduction to legal research methods and resources utilized in the practice of law. Prepares students to effectively and efficiently perform legal research in both print and electronic resources, evaluate information for relevancy, and apply/utilize it in a simulated client environment. Prerequisites: LAW:8033.

LAW:8125 State Legal Research 1 s.h.
Legal resources available for a particular state; exploration of current print and electronic resources, particularly low-cost electronic resources such as FastCase and the internet are explored for purposes of developing better, more efficient search techniques; selection of the most effective formats for research; sources of legal information; techniques for accessing legal information.

LAW:8146 Antitrust Law 3 s.h.
Laws dealing with restraints of trade, monopolization and mergers; history of these laws and their development in the courts; current doctrine and its underlying legal and economic theories; analytical tools of trade: sufficiency of economic efficiency as the measure of justice.

LAW:8153 Applied Evidence 2 s.h.
Opportunities to apply the rules of evidence; use of mock case problems presenting evidentiary issues that attorneys in real practice would address by filing motions in limine; students are enabled to more fully comprehend the reasoning and rationale behind the rules, and appreciate the intricacies of applying the rules to a set of facts; focus on pretrial evidentiary litigation and specific rules of evidence. Prerequisites: LAW:8460.

LAW:8158 Arbitration Principles and Practice 2-3 s.h.
Introduction to law of arbitration and essential skills and procedures involved in its practice; role of arbitration in modern conflict resolution in various settings in which it is used; conceptual framework and explanatory theories for analysis of issues frequently encountered in arbitration; statutory and contractual grounds for arbitration (e.g., labor relations, employment, consumer and commercial transactions); development of skills and understanding of procedure through use of problems and exercises simulating common arbitration scenarios in which students participate as lawyers, arbitrators, and parties.

LAW:8162 Art and Entertainment Law 3 s.h.
Issues affecting creative artists, financiers, producers, other participants in the world of theater, print publishing, motion pictures, television, music, and fine arts; emphasis on the doctrine of droit moral, including the federal Visual Artist's Rights Act and American courts' treatment of the moral rights; cases involving artistic control, credit and billing, grant of privacy and publicity rights, and sound-alike performers.

LAW:8164 Art, Law, and Ethics 3 s.h.
How law and ethics apply to individuals and institutions concerned with visual arts. Same as MUSM:4045.

LAW:8166 Art Law and the Business of Art 2 s.h.
Overview of significant legal, ethical, and business issues in the art market.

LAW:8186 Bankruptcy 3-4 s.h.
Students study the rights of individuals and entities under the federal bankruptcy laws from the perspective of both debtors and creditors; there are three types of bankruptcy proceedings—liquidation bankruptcy for consumers and businesses (Chapter 7), consumer reorganization, known as "wage earner's plans" (Chapter 13), and business reorganization (Chapter 11); students survey foundational topics relevant to all these forms of bankruptcy—in general, equal weight given to both consumer and business bankruptcies; attention given to some of the intricacies of business reorganizations towards the end of the course.

LAW:8187 Debtor-Creditor Law 4 s.h.
Introduction to federal bankruptcy law, debtors' rights and creditors' remedies under state and federal law, and secured transactions under the Uniform Commercial Code. Specific topics of study include how to enforce secured and unsecured debts outside of bankruptcy and the ways in which a bankruptcy filing alters debtor-creditor relationships.

LAW:8189 Banking Law 2 s.h.
Overview of various bank and nonbank financial institutions (including national banks and state banks) and federal regulation of these institutions; examination of goals and policies behind bank and nonbank financial institution regulations to determine whether these goals and policies are achieved by the regulations; attention given to recent developments in regulation of bank and nonbank financial institutions.

LAW:8194 Basic Federal Income Taxation 3-4 s.h.
Operation, policies, principles of federal income tax, including gross income, deductions, property dispositions, tax accounting, assignment of income among family members, time value of money, leveraging.

LAW:8216 Civil Procedure in Pre-Trial Theory and Practice arr.
The law of pleadings and other pretrial matters presented in LAW:8006; hypothetical case developed from interview to pleading to early pretrial stages; experience drafting relevant pleadings and motions. Prerequisites: LAW:8006.

LAW:8224 Client Counseling 1-2 s.h.
Immersion in practice skills fundamental to any attorney-client relationship—interviewing and counseling; exploration of critical unseen factors which impact interviewing and counseling (e.g., self-awareness, cultural competence, bias, beliefs about the role of the lawyer in an attorney-client relationship); introduction and critique of three models of representation including traditional or regnant lawyering, client-centered lawyering, and rebellious or democratic lawyering.

LAW:8230 Commercial Leasing 3 s.h.
Commercial leasing is perhaps the most important part of the real estate business, and more lawyers practice in the area of commercial leasing than any other real estate area; focus on legal doctrine and foundational skills related to a commercial leasing legal practice. Prerequisites: LAW:8017 and LAW:8037.

LAW:8237 Comparative Corporate Governance 2 s.h.
Today's global economy has resulted in a proliferation of multi-national corporations, where frequently the parent corporation is governed by the law of one country, and one or more subsidiaries are governed by the laws of other countries; comparative assessment of advantages and disadvantages to incorporating in a particular country; focus on corporations considering mergers, acquisitions, or joint ventures with corporations outside of their own jurisdiction; and consideration of reasons why a corporation might form a subsidiary under the law of another jurisdiction.

LAW:8241 Comparative Constitutional Law 2-3 s.h.
Comparative focus on the United States Constitution with particular emphasis on the Constitution of France and the freedom of expression in areas such as libel law, hate speech, and more; suitably tailored writing component to help students master course material while also improving their own expressive abilities.

LAW:8242 Cross-Border Discovery 2 s.h.
With increased globalization, transnational civil litigation is part and parcel of civil litigation practice for U.S. lawyers; explore cross-border civil discovery in disputes involving private parties. Prerequisites: LAW:8006.

LAW:8243 Comparative Criminal Law arr.
Comparative study of issues in British and American criminal law; focus on the right of silence/right against self-incrimination in the two countries; historical origins and recent development of these rights in Britain and America with emphasis on the practical application of the rights; effect of capacity and age on the exercise of the rights; prosecution's obligation of disclosure and discovery; confessions; and the admissibility of evidence.

LAW:8263 Comparative Law 2-3 s.h.
Comparative study of origins, development, and principal features of the world's main legal systems; common and civil law traditions; historical development of the main legal systems, their sources, ideologies, techniques; subjects important to international legal practice (e.g., international judicial assistance, application of foreign law in American courts; in-depth study of modern legal systems of the United States, Britain, France, Germany, Japan, Russia; introduction to other legal traditions, including preliterate tribal law, traditional Chinese and Islamic law.

LAW:8265 English Law and Literature 2-5 s.h.
Exploration of relationships between English law and English literature at historical, practical, imaginative, and theoretical levels; students read novels, short stories, plays, poems, and nonfiction works—the earliest piece written by Geoffrey Chaucer in 1387 and most recent piece written by a barrister working in London in 2018; selections intended to provide a diverse cross-section of English literary writings that engage with and are shaped by English law.

LAW:8266 English and European Legal History 2 s.h.
Introduction to English and European legal history; exploration of historical anthropology of law, and, in particular, how written law evolved from custom; development of a single European legal order (medieval England); law of marriage, sexual relations, property and women's rights in comparative perspective; continental and English law.

LAW:8267 English Law and Literature II 1 s.h.
Advanced topics in English law and literature to be taught during the London Law Program; for students who have previously completed the LAW:8265. Prerequisites: LAW:8265.

LAW:8272 Conflict of Laws 2-3 s.h.
Examination of legal problems created when a transaction or relationship has associations with more than one state or nation; students examine questions of judicial jurisdiction (which state's or nation's courts should hear a case?), choice of law (which state's or nation's laws should determine the outcome of a case?), and enforcement of judgments (when will a state or nation enforce the judicial judgments of a different state or nation?).

LAW:8278 First Amendment: Freedom of Expression and Religion 3 s.h.
Examination of the First Amendment's legal protections for freedom of expression and religion; students pursue topics at greater depth than possible in required constitutional law courses; topics include historical roots of these freedoms to current controversies over their scope (i.e., regulation of online misinformation about public health and elections, or whether religious objectors should have exemptions from antidiscrimination laws).

LAW:8280 Constitutional Law II 3 s.h.
Limits on governmental power imposed by the national constitution for protection of individuals; protection of life, liberty, and property by due process and equal protection; freedom of expression and association; religious freedom and the guarantee against establishment of religion; 1st and 14th Amendments.

LAW:8288 Consumer Finance Law 2-3 s.h.
Consumer spending drives the economy; system of consumer finance—the way in which consumers consumption is financed; focus on empirical state of household finances, psychology and sociology of consumer finance, business of consumer finance, and regulation and political economy of consumer finance.

LAW:8301 Copyrights 3-4 s.h.
Federal law of copyrights, primarily the Copyright Act of 1976; emphasis on copyright protections affecting new technologies, such as videotape, computer hardware and software, electronic data transfer, cable television rebroadcast; ability of legal concepts to keep pace with technological developments. Recommendations: LAW:8643.

LAW:8307 Corporate Finance 1-3 s.h.
Introduction to fundamental principles of corporate finance, including financial statement analysis, valuation of corporate securities and of businesses, capital structure decisions, portfolio theory, and efficient capital markets hypothesis; focus on financial and accounting aspects of corporate decisions than with any particular body of law. Prerequisites: LAW:8331.

LAW:8309 Principles of Corporate Finance 1 s.h.
Fundamental concepts of corporate finance and accounting as accepted by the courts and applied in matters relating to securities regulation and disputes arising from mergers and acquisitions: cash versus accrual accounting; how to read and interpret schedules and disclosures contained in a company's balance sheet, income statement, and statement of cash flows; how to interpret and apply various financial ratios derived from a company's financial statements; how to understand, calculate, and apply net present value principles to evaluate investment opportunities; how to calculate equity values using the CapM equation.

LAW:8312 Foundations of Corporate Law 1 s.h.
Corporate law and theory. Topics include the structure and characteristics of both large publicly and closely held corporations, corporate governance, fiduciary duties, and basic principles of agency.

LAW:8318 Corporate Governance and Control 1-4 s.h.
Principal issues in creation of appropriate governance and control systems for large publicly held corporations; questions of corporate structure, shareholder voting rights, duties of directors, derivative suits, indemnification and transfers of control viewed from perspective of Delaware's statutory and common law. Recommendations: LAW:8331.

LAW:8320 Corporate and Partnership Taxation 4 s.h.
Introduction to the federal tax treatment of business entities, analysis of statutory and regulatory materials, and discussion of significant business tax reform proposals. Prerequisites: LAW:8194.

LAW:8322 Corporate Taxation arr.
Influence of tax considerations on the structure of corporate transaction, from a merger to a restructuring to a securities offering; examination of primary Internal Revenue Code provisions that affect corporations and their shareholders; corporate formations, dividends, redemptions, liquidations, taxable asset and stock acquisitions, tax-free reorganizations; analysis of statutory and regulatory materials; tax reform proposals. Prerequisites: LAW:8194. Corequisites: LAW:8331.

LAW:8325 Role of In-House Counsel 3 s.h.
The role of in-house counsel sits at the intersection of law, business, technology, and policy. Explore how in-house lawyers add value as strategic advisors and business partners; focus on developing and honing essential lawyering skills crucial for effective and ethical in-house practice.

LAW:8329 Comparative Criminal Procedure 2 s.h.
Study abroad program.

LAW:8331 Business Associations 3-4 s.h.
Structure, characteristics of both large publicly and closely held corporations; distribution of powers among management, directors, shareholders; fiduciary duties that limit those powers; enforcement of such duties by shareholder suits; may include basic principles of agency, partnership, and limited partnership law.

LAW:8335 Artificial Intelligence, Law, and Business 1,3 s.h.
Exploration of the convergence of artificial intelligence (AI), law, and business. Topics include AI technology and development; domestic and international rules and standards; privacy, compliance, and cybersecurity issues; AI’s role in organizational management and behavior; business and finance uses of AI; and practical tools and skills for the business attorney.

LAW:8342 Topics in Criminal Law Practice 1-3 s.h.
Substantive and procedural aspects of criminal law not covered in regular College of Law criminal law and criminal procedure courses; topics vary. Prerequisites: LAW:8022.

LAW:8343 Topics in Criminal Law Practice II 1-3 s.h.
Substantive and procedural aspects of criminal law not covered in regular College of Law criminal law and criminal procedure courses; topics vary. Prerequisites: LAW:8022.

LAW:8348 Criminal Procedure: Adjudication 3-4 s.h.
Adjudicatory phases of the criminal justice system: indictments and the charging process, preliminary hearings, applications for release on bail and pretrial detention, processes of discovery, guilty pleas, jury selection, conduct of criminal trials, sentencing proceedings and post-trial motions, appellate review, collateral remedies; focus on constitutional rights, specifically the Fifth, Sixth, Eighth, and Fourteenth Amendments; statutory provisions, rules of criminal procedure.

LAW:8350 Criminal Procedure: Investigation 3-4 s.h.
Guarantees and rights of the Fourth, Fifth, and Sixth Amendments to the U.S. Constitution against police and prosecutorial practices designed to investigate and prove criminal cases; protection against unreasonable searches and seizures, guarantee against extraction of involuntary confessions, privilege against self-incrimination constraints upon securing confessions (i.e., *Miranda* doctrine), due process protection against unreliably suggestive identification procedures, right to counsel, protection against inculpatory admissions and identification practices; exclusionary rules and remedies that enforce constitutional guarantees.

LAW:8362 Critical Race Theory arr.
Race relations and racial discrimination in America from perspectives of the Critical Race Theory movement (CRT); affirmative action, hate speech, queer theory, voting rights, postmodernism, liberalism, Asian-critical theory, Latin-critical theory, federal Indian law, critical white studies; critical race feminism—essentialism, motherhood, lawbreaking, employment law, sexual harassment, global issues.

LAW:8373 Secured Transactions 3 s.h.
Article 9 of the Uniform Commercial Code; establishment and perfection of security interests pursuant to credit sales contracts; problems focusing on the interface between Article 9 and federal bankruptcy law, Article 9 and real property security; priority disputes among collateral claimants; rules related to default and rights after default; emphasis on developing an understanding of and facility with a code-based statutory scheme.

LAW:8392 Youth Law and Juvenile Courts 3 s.h.
Examine the criminal legal system, juvenile courts, and their impact on youth.

LAW:8399 Election Law 3 s.h.
The Supreme Court has long declared that the right to vote is fundamental, because it is preservative of all other rights; the right to vote in theory and practice, with focus on its relationship to racial and economic justice; what has been done and what should be done to move us closer to the ideal of political equality; proper role of unelected judges in our democracy; history of the right to vote, "one person, one vote" principle, Voting Rights Act, partisan gerrymandering, voter identification, voter registration, political parties, and campaign finance.

LAW:8415 Employment Discrimination 2-3 s.h.
Legal prohibitions against discrimination in employment on the basis of race, sex, national origin, age; focus on Title VII of the Civil Rights Act of 1964; procedural and remedial problems, elementary issues of proof.

LAW:8421 Employment Law 3-4 s.h.
Legal rights of employers and employees in private workplaces that do not have unions—which is more than 90% of work settings; hiring, minimum wage, independent contractors, termination, workplace privacy, employment-related intellectual property issues, covenants not to compete, occupational safety and health, and unemployment eligibility set into a context of historical origins, new developments, and contemporary trends.

LAW:8423 ERISA: The Basics 2 s.h.
Fundamental requirements, plans and programs covered by the Employee Retirement Income Security Act of 1974 (ERISA) as amended; for students who are interested in employee benefit plans and roles of the Internal Revenue Service (IRS), U.S. Department of Labor, U.S. Government Accountability Office, and Pension Benefit Guaranty Corporation in the regulation of ERISA.

LAW:8428 British Legal System 1-2 s.h.
Taught in London Law Consortium.

LAW:8433 Environmental Law 2-3 s.h.
Role of the legal system in addressing problems of environmental disruption, with special emphasis on air, water, hazardous waste pollution.

LAW:8434 Wildlife and Habitat Conservation Law 1 s.h.
Introduction to the law of species and habitat protection, focusing on animals and plants located in the Macbride Nature Recreation Area, managed by UI WILD.

LAW:8436 Energy Law and Policy 3 s.h.
Introduction to law and policy of energy generation, transmission, and distribution; focus on public utility regulation, energy efficiency and renewable energy mandates, wholesale and retail electricity markets.

LAW:8437 Environmental Disaster Law and Policy 3 s.h.
Introduction to law and policy of environmental disasters, including climate change; complex web of United States laws related to prevention, mitigation, response, and recovery from "natural" disasters.

LAW:8438 Nuclear Energy Law and the Environment 3-4 s.h.
Explore the legal, technical, and policy requirements for the licensing of nuclear power plants and nuclear waste facilities in the United States; critically evaluate existing environmental, safety, and health (ESH) requirements.

LAW:8439 Disaster Response and Recovery 2 s.h.
Law and professional skills necessary to effectively implement federal, state, and local laws designed to save lives, infrastructure, housing, and businesses when a disaster strikes. Corequisites: LAW:8437, if not taken as a prerequisite.

LAW:8453 European Union Business and Competition/ Antitrust Law 2-3 s.h.
Introduction to European Union Business Law; provides an introduction to the European Union's (EU) political and constitutional structure; observes the internal market in goods, workers, establishment, and capital (the so-called four freedoms) as the internal market impacts trade within the EU and non-EU members such as the United States; focuses on the competition/antitrust of the EU with comparisons to U.S. law.

LAW:8456 Survey of Iowa Law 3 s.h.
Survey of Iowa law; Iowa constitutional law, torts, criminal law, and other subjects; students gain an appreciation of unique aspects of Iowa law as well as exposure to common areas of law that attorneys practicing in Iowa are likely to encounter; may involve guest lectures from practitioners, judges, elected officials, or other visitors.

LAW:8460 Evidence 3-4 s.h.
Rules of evidence developed in common-law courts and under statutes; judicial notice; examination of witnesses; privilege and competence; remote and prejudicial evidence; hearsay; burden of proof and presumptions; roles of judge and jury.

LAW:8467 Family Law 3-4 s.h.
Creation, dissolution of marriage and parent-child relationships; lawyer's practical approach to family law problems combined with a broader view of how the law might treat those problems in light of findings from social and behavioral sciences.

LAW:8481 Federal Courts 3-4 s.h.
Role of the federal courts in our federal system of government; the federal courts' original and appellate jurisdiction; Supreme Court review of state courts' judgments; Congress' power to strip the federal courts of jurisdiction; development of federal common law; federal writ of habeas corpus; abstention doctrines; state sovereign immunity; federal remedies against state and local action; and Congress' power to create non-Article III adjudicative tribunals. Prerequisites: LAW:8006 and LAW:8010.

LAW:8497 Federal Criminal Practice 2 s.h.
Introduction to each step in the criminal process together with instruction in advocacy skills required for the effective practice of law; complete chronology of a typical federal criminal case, from grand jury investigation through post-trial motions; importance of strategic thinking. Prerequisites: LAW:8350.

LAW:8498 Federal Sentencing Advocacy 1-2 s.h.
Examination of federal sentencing scheme and procedures; application to a mock criminal case from which students draft a sentencing memoranda and present mock oral sentencing arguments to instructor; effective written and oral advocacy in federal sentencing proceedings.

LAW:8504 Corporate Crimes 1-3 s.h.
Introduction to corporate criminal law; black letter doctrines of corporate liability and sentencing; Department of Justice policies and practices that shape the course of corporate prosecutions; criminal statutes that are of frequent concern for corporations, including those that address false claims, securities fraud, bribery, and mail and wire fraud; developments occurring in this evolving area of law.

LAW:8513 Foreign Comparative and International Legal Research 1-2 s.h.
Treaty research, locating and identifying documents from international organizations and tribunals, legal research in selected jurisdictions outside the United States; variety of print and electronic sources; research methods in foreign and international law.

LAW:8558 Genetics and the Law 3 s.h.
Introduction to legal issues raised by genetic and genomic technologies; genetic privacy, uses and abuses of genetic testing, prenatal diagnosis, mandatory screening, genetic discrimination, regulation of genetic research, DNA banking, research on stored tissue samples, ownership of genetic material and information, and provision of genetic services including informed consent, disclosure, and duties to family members at risk for genetic disease.

LAW:8562 Health Law 2-3 s.h.
Major areas of concern in health law; tension between quality, access, costs; may include malpractice, quality control, health care financing, access (insurance, Medicare, and Medicaid), licensing, bioethics (end-of-life decisions, informed consent, surrogacy, organ transplantation).

LAW:8566 Health Care Financing and Delivery 2-3 s.h.
Major areas of concern in health law with focus on health care financing and delivery, health care organizations, fraud and abuse, and antitrust.

LAW:8567 Health Care Quality and Regulation 3 s.h.
Major areas of concern in health law with focus on quality and patient experiences; tension between quality, access, and costs; may include malpractice, quality control, licensing, and bioethics (i.e., end-of-life decisions, informed consent, surrogacy, organ transplantation).

LAW:8570 Human Rights in the World Community 1-3 s.h.
Introduction to established and developing legal rules, procedures, and enforcement mechanisms that govern protection of international human rights; liberal western and developing world notions of human rights, recent examples of human rights controversies worldwide; international human rights of women.

LAW:8572 International Human Rights Law and Practice 3 s.h.
Introduction to the foundations of international human rights law, institutions, and practice. Consider the historical and theoretical roots of the contemporary human rights system and critiques from a variety of ideological perspectives. Examine how human rights are enforced at the international and regional levels, with special attention paid to the domestic application of human rights law, including within the United States.

LAW:8573 Business and Human Rights 3 s.h.
Exploring how to assess lawyers' and their clients' conduct and the risks of involvement in adverse human rights impacts based on the American Bar Association's 2024 resolution. Corequisites: LAW:8572 or LAW:8649 or LAW:8570 or LAW:8575.

LAW:8575 Seminar: Approaches to Human Rights 3 s.h.
Engagement with historical events, philosophical narratives, legal cases, institutional reports, lived experiences, and theoretical works to study origins, functions, and history of the discourse on human rights; application of a systems thinking framework to events involving treatment of women, Indigenous peoples, disabled persons, racial and ethnic groups, and other disempowered social groups across cultures and throughout history; examination of writings that attempted to explain key historical events and ideas relevant to human rights. Same as RELS:6710.

LAW:8577 Immigration Law and Policy 1-3 s.h.
Legal, historical, social, philosophical, and policy foundations of immigration control; modern debate over immigration; criteria and procedures that govern admission of non-U.S. citizens to the United States for permanent residence and temporary visits; deportation criteria and processes; national security and civil liberties implications of immigration policy; refugees and political asylum; undocumented migrants; acquisition, loss, and significance of U.S. citizenship; focus on U.S. law with introduction to perspectives from comparative and international law; experience analyzing varied fact problems that require strategic decision-making and interpretation of complex statutory provisions.

LAW:8584 Insurance Law 1-3 s.h.
State regulation of insurance, adverse selection and moral hazard, risk classification and rate regulation, and insurance contracts; emphasis on life, long-term care, and disability insurance; may include health insurance, reinsurance, and other types of insurance; focus on social and economic underpinnings of insurance.

LAW:8593 Federal Indian Law arr.
Specialized body of law allocating power and authority in Indian country that has grown up around native American peoples and their reservations; sovereignty, jurisdiction, federal Indian policy, tribal self-government.

LAW:8594 Interest-Based Negotiation for Lawyers 2-3 s.h.
Theory and practice of an approach to negotiation, known as interest-based or problem-solving negotiation; focus of this negotiation model is not on positions of disputants, but interests that underlie these positions; interest-based negotiators attempts to generate options that satisfy, at least minimally, interest of all parties and can lead agreements from which all parties realize some gains; emphasis on acquisition and enhancement of skills necessary to apply this negotiation approach; in-class exercises. Requirements: no prior enrollment in LAW:8720.

LAW:8600 International Business Transactions 1-3 s.h.
Legal and practical issues in international trade and investment; typical private transactions, such as the sale of goods (documentary sales transaction, INCOTERMS, letters of credit, agency, distribution), transfer of technology (franchising, licensing), and direct investment across national borders; how private international sales, investment, and licensing transactions are structured to permit private businesses to minimize and plan for the risks associated with conducting business on a global scale.

LAW:8615 International Commercial Arbitration arr.
Formation and enforcement of agreements to enter arbitration in order to settle international business disputes; process of arbitrating an international business dispute; recognition and enforcement of arbitral awards.

LAW:8622 International Environmental Law 3 s.h.
Laws and institutions developed by the international community to deal with international environmental problems, including those of the atmosphere (acid rain, ozone depletion, radioactive fallout, climate change), hydrosphere (land-based sea pollution, sea-based vessel pollution, transboundary groundwater diversion), lithosphere (hazardous waste disposal, toxic pollutants, decertification), biosphere (driftnet fishing, endangered elephants, loss of tropical rainforests).

LAW:8629 Taxation of International Business Transactions 2-3 s.h.
Introduction to United States aspects of international taxation and international tax policy issues; how the U.S. taxes foreign persons on income they derive from U.S. sources; taxation of U.S. persons on their worldwide income; U.S. bilateral tax treaty network under which many of the statutory rules regarding the taxation of foreigners are modified or supplanted; solving problems that illustrate the operation of the Code and regulations. Prerequisites: LAW:8194.

LAW:8631 International Trade Law: Basic Norms and Regulations 3 s.h.
Basic norms and legal framework of international trade as expressed in the GATT/WTO regime and U.S. trade laws; issues raised by regional trade blocs such as NAFTA; controversies such as the economic and philosophical justifications for, and objections to, free trade from a variety of perspectives.

LAW:8643 Introduction to Intellectual Property 1,3-4 s.h.
Introduction to some of the most important intellectual property rules; goals and theories underlying these rules; common ways in which ideas may be protected—from basic form of protection (secrecy and trace secrecy) to exclusive rights granted over inventions (patents) and creative works (copyright), and concluding with rights related to market-based identities (trade and service marks); brief exploration of ways in which debates over intellectual property rights have permeated modern culture.

LAW:8644 Information Privacy Law 3 s.h.
Every day when we go about the world, we share bits of data about us. Who can amass that data, who can use it, and for what ends? Introduction to information privacy law and policy; law of information privacy; students address statutory, common law, regulatory, and constitutional provisions that determine how governments and private actors collect, store, process, and use information.

LAW:8646 Quantitative Reasoning for Lawyers 3 s.h.
Introduction to quantitative concepts and methods that have become increasingly valuable in legal practice. Explore these concepts through their application to a variety of legal contexts such as employment discrimination, trademark infringement, jury selection, policing, the death penalty, and antitrust to provide students with the skills necessary to engage in quantitative reasoning and to become informed and critical consumers of quantitative evidence.

LAW:8648 IP Challenges in Tech Startups 1 s.h.
In the tech startup world, the in-house counsel's role is an ever-changing landscape of fires to put out with limited time and limited resources, like how to guide the company in licensing its IP; how to handle internal issues that affect external dynamics with customers; and what approach to take in negotiation and strategy as the business evolves and the goal posts move. Students directly engage in exercises that present real-life situations in tech startups.

LAW:8649 Foundations of International Law 1-3 s.h.
Introduction to fundamentals of international law; focus on aspects of international law that concern interests in the United States; survey of sources, methodology, and major doctrines of international law within framework of understanding diverse jurisprudential approaches; international law's relationship to U.S. domestic law and institutions; procedural aspects of international law involving international institutions, including the International Court of Justice; foundation course for students interested in international trade, business, family law, human rights, environmental law, and an interest in European Union law.

LAW:8653 Juries and Jury Selection 1 s.h.
Examines the law and professional skills regarding juries and jury selection. Topics include legal issues arising in jury selection and trial advocacy in the context of jury selection.

LAW:8655 Survey of Legal Advocacy 1 s.h.
Explores how the form and manner of advocacy and persuasion changes based on the legal context and the decision-maker. What may be persuasive before a jury may not be as persuasive before a panel of appellate judges or before a district judge. The ability to advocate changes depending on context; explore how attorneys can and should alter their manner and means of advocacy depending on the context and the decision-maker.

LAW:8658 Jurisprudence 2-3 s.h.
Exploration of questions central to jurisprudence by looking at positions that have been adopted by legal positivist, natural law theory, and sociological models of jurisprudence (i.e., is there more to legal argument than the strategic battle for a favorable judicial ruling? How would one have to conceive of legal reasoning if one were a judge? Are there right answers to legal questions? Do they presuppose a necessary connection between law and morality? Is any exchange of pros and cons merely a spectacle created in order to hide from the dumbfounded public that legal reasoning does not really matter?); comparative dimension provided in readings with background in civil law.

LAW:8660 Justice101 1-3 s.h.
Immersive course on Fourth Amendment rights; students are equipped with tools necessary to teach Justice101 curriculum to the community-at-large with a goal to increase student and community awareness of what is allowed and prohibited during different types of contact with law enforcement; focus on changes in power dynamics in four situations where interactions are most likely to occur—walking in the street, traveling in a vehicle, at school, and at home.

LAW:8670 Labor Law 3-4 s.h.
How national labor law regulates labor relations in the private sector; law relating to unionized employees and firms; right of employees to organize into unions; limits of concerted activities by employees; scope and provisions of collective bargaining; enforcement of the collective bargaining agreement; rights of individual employees in collective units and in labor organizations; lawyer's role in dealing with judicial, administrative, and arbitral tribunals involved in enforcing labor law; lawyer's role in complex interrelationships between policy, statute, judicial, and administrative decisions.

LAW:8673 Land Use 2-3 s.h.
The developed environment as an outcome of legal and political choices; how people should live together; how to regulate and control future use of land; the resulting legal regime and its implications on equity, freedom, sustainability, and daily life. Prerequisites: LAW:8037. Requirements: closed to students who have taken LAW:8796.

LAW:8675 Civil Discourse 1 s.h.
Communication skills needed to engage in civil discourse, including a mix of casebook readings, scholarly articles, and books related to developing skills in navigating difficult conversations with people who hold different views on important topics.

LAW:8676 Public Speaking Lab for Lawyers 2 s.h.
Consider ways to develop clear, persuasive, and informative presentations, and deliver those presentations with comfort and confidence. .

LAW:8677 Accounting, Tax, and Business Considerations for Lawyers 1-3 s.h.
Accounting, tax, and business considerations for lawyers and why these are important considerations for lawyers; changes occurring in today's business models; discussions on choosing a legal structure for a business; financial statements basics, detailed example of a financial statement, and discussion on accounting basics expanded; advanced topics in accounting to allow some background on these topics.

LAW:8680 Law and Economics arr.
Introduction to economics analysis of law; how economic reasoning is used to explain and predict the effects of legal rules; fundamental areas of American law (e.g., property, contracts, torts, criminal law); use of economic efficiency as a normative criterion for evaluating legal rules; efficiency compared to various moral concepts to evaluate such rules.

LAW:8698 Law in the Muslim World 2-3 s.h.
International and comparative law issues relevant to countries in the Muslim world; legal cultures, institutions, rules, actors, processes of several jurisdictions including Afghanistan, Saudi Arabia, Iran, Iraq, Algeria, Nigeria, Palestine, Pakistan; Islamic sharia law as practiced in Sunni and Shiite countries; the role of church versus state, fundamentalism versus secularism, as manifested in the legal system; tension between communitarianism and individualism in modern constitutionalism; intertwining of customary and religious legal practices; first, second, and third generations of human rights; international law on issues such as terrorism, self-determination; women's rights, including polygamy, divorce, child custody, inheritance.

LAW:8709 Introduction to French Law 1-3 s.h.
Introduction to laws of France, characteristic features, and role of main institutions; civil law, contacts, tort, family law, commercial law, criminal law, labor law; visits to a French law school, Paris Court, and Ecole of Magistrature National (ENM), the National Judge School in Bordeaux. Summer abroad program.

LAW:8712 Legislation 2-3 s.h.
Issues related to legislation and legislative process; introduction to legislation, legislative process, legislative advocacy, statutory interpretation, and statutory drafting; students gain an understanding of the role of lawyers in legislative process and formation of public policy.

LAW:8720 Mediation: Theory and Practice 2-4 s.h.
Essential characteristics; comparison of mediation with litigation and other alternative dispute resolution processes; stages of mediation; confidentiality; enforceability of agreement; ethical problems, particularly lawyer-mediator; student role playing; short writing assignments.

LAW:8726 Mergers and Acquisitions 3 s.h.
Significant legal and financial aspects of business combination transactions; transaction documents (e.g., stock purchase agreements, asset purchase agreements, merger agreements); valuation of companies and pricing of deals; legal and financial considerations affecting the structuring of deals; tender offers and their regulation under the Williams Act, tender offer rules; fiduciary duties of target board, including Revlon duties and the Unocal standard; anti-takeover devices (e.g., poison pills and staggered boards, deal protection devices, freezeout transactions); state anti-takeover statutes. Prerequisites: LAW:8331.

LAW:8728 Start-Up and Emerging Companies 3 s.h.
Exposure to myriad legal issues and obstacles faced by start-ups and emerging companies and the lawyers who represent them.

LAW:8742 Negotiations 1-3 s.h.
Nature and theory of negotiations, diverse rhetorics (including the rhetoric of legal argument) relevant to conduct of negotiations, conflict between ethics and effectiveness; readings from game theory, social psychology, anthropology, rhetoric and ethics.

LAW:8743 Negotiation Theory 1 s.h.
Explore negotiation theory in large and small group sessions. Large group sessions address key negotiation topics, such as distributive bargaining; integrative bargaining; legal ethics; cognitive biases; and culture, gender, and race. Small group sessions address these topics in the context of different practice areas, depending on the faculty member leading the small group session.

LAW:8745 Dispute Resolution 3 s.h.
Methods of dispute resolution in civil cases, including negotiation, mediation, and arbitration. Selection of a dispute resolution process is now mandatory in some jurisdictions. Examine different types of dispute resolution mechanisms, the legal framework for these processes, and skills and techniques lawyers use when advocating for clients and neutrals may employ in resolving disputes. Prerequisites: LAW:8006 and LAW:8017. Requirements: closed to students who have already taken or are currently enrolled in LAW:8720, LAW:8594, or LAW:8158.

LAW:8753 Nonprofit Organizations: Structure, Governance, and Strategy 3 s.h.
Focused examination of internal operations of nonprofit organizations; introduction to historical conditions that generated an incredible expansion of diverse and complex organizations that make up the nonprofit sector in the U.S., as well as a multitude of contemporary, real-world obstacles and opportunities leaders and managers navigate within their organizations; topics include issues of accountability, board governance, budgeting, financial management, leadership, strategic planning, taxation, and more; what is a nonprofit organization and what makes a nonprofit organization effective; development of valuable skills necessary to improve the performance of nonprofit organizations.

LAW:8755 Nonprofit Organizations: Advocacy, Collaboration, and Fundraising 3 s.h.
Broad overview of the role nonprofit organizations play in building and enhancing communities; focused examination of the external operations of these organizations; students explore numerous threads that connect nonprofit organizations to outside individuals and entities and are presented with a multitude of contemporary, real-world obstacles and opportunities that leaders and managers navigate outside their organizations; topics focus on issues of advocacy, government relations, fundraising, leadership, marketing, partnerships, public relations, volunteerism, and more.

LAW:8763 Patent Law 2-4 s.h.
All aspects of U.S. patent law; patent claims, adequacy of disclosure, statutory subject matter, validity, inequitable conduct, infringement, remedies, varied specialized doctrines; focus on recent pronouncements from the Court of Appeals for the Federal Circuit. Recommendations: LAW:8643.

LAW:8791 Professional Responsibility 2-3 s.h.
Inquire into the public and private professional responsibility of lawyers as informed by the American Bar Association's Model Rules for Professional Conduct (the template for nearly every state bar's ethics rules) and by other areas of substantive law touching on the legal profession. Examine the convergence and divergence of personal values, professional values, and ethical and professional standards, in order to apply them to professional dilemmas and conflicts.

LAW:8793 Products Liability 2-3 s.h.
General survey of the sources, development, and limits of American laws providing compensation for injuries caused by defective products. Prerequisites: LAW:8017 and LAW:8046.

LAW:8796 Property II 3 s.h.
Continuation of LAW:8037; limits on landowner's use of property by private agreements, judicial actions, public regulations; problem areas (servitudes, nuisance, eminent domain); constitutional limits on government activities adversely affecting private property, community planning, zoning, other forms of local land use control; discrimination related to land development, housing; effectiveness of private ordering, judicial decisions, legislative enactments, administrative processes for resolving conflicts over use of land resources; relationships between law and other disciplines in forging solutions to land use issues; law as instrument for achieving societal objectives regarding land use.

LAW:8798 Real Estate Transactions 3 s.h.
Examination of acquisition, financing, and development of real estate; topics include listing agreements, purchase agreements, conveyancing, real estate finance and security instruments, foreclosure, mechanics' liens, and forms of real estate development, including homeowners/condominium associations and other kinds of common interest communities.

LAW:8800 Issues in Mass Media Law 3 s.h.
Selected topics in mass media law, focusing especially on the media’s role as a disseminator of news. Addresses the tension between freedom of the press and competing interests in privacy, reputation, emotional integrity, and public safety. Examines liability for invasion of privacy, libel, the right of publicity, legal restrictions on newsgathering, access to the media, restrictions on indecency and incitement, and special rules applying to internet publications. Requirements: closed to students who have taken LAW:9829.

LAW:8819 Judicial Remedies 3 s.h.
The law of remedies is the working tool kit for civil litigators, offering various ways to redress a given wrong; remedies to be examined include compensatory damages, injunctive orders, restitution, declaratory judgment, contempt, garnishment, asset tracing, punitive damages, and methods to preserve assets before judgment; cases are drawn from diverse substantive fields, including tort, contract, intellectual property, civil rights, administrative, antitrust, attorneys' fees, and constitutional law.

LAW:8856 Securities Regulation arr.
Examination of law regulating the issuance and sale of securities (i.e., stocks, bonds, other investment vehicles) in the United States; topics include initial public offerings (IPOs), regulation of stock exchanges, private placements of stock, securities fraud litigation, and insider trading law; relevant statutes are the Securities Act of 1933 and the Securities Exchange Act of 1934. Corequisites: LAW:8331.

LAW:8857 Market Regulation 3 s.h.
Examination of how capital markets are regulated; primary emphasis on secondary markets which trade on national stock exchanges, rather than on primary market activity such as initial public offerings (IPOs). Prerequisites: LAW:8331.

LAW:8877 Sex-Based Discrimination 2-3 s.h.
Survey of sex-based discrimination and legal responses in the United States and worldwide; American context—constitutional guarantees and various statutory guarantees, including Title VII of the Civil Rights Act of 1964 and Title IX of the Education Amendments of 1972; global context—examination of various regions of the world, emphasis on France, South Africa, and countries with majority Muslim populations; issues involving customary law, affirmative action/quotas, and constitutional reform.

LAW:8879 Sports Law 2-3 s.h.
Various legal issues relating to the structure and operation of amateur and professional sports industries; topics include labor law and collective bargaining in professional sports, history and status of collective bargaining efforts by college athletes, antitrust law as applied to professional and intercollegiate sports, the NCAA enforcement process, Title IX as applied to intercollegiate sports, the NCAA principle of amateurism and legal challenges, representation of professional athletes and negotiation of sports contracts.

LAW:8880 Baseball Salary Arbitration 1-3 s.h.
Major league baseball salary arbitration process that sports agents, attorneys, and team executives participate in, presided over by panels of lawyer arbitrators; students develop written and oral advocacy skills while participating in mock salary arbitration hearings; three students are chosen to represent the UI College of Law at the Tulane University Law School International Baseball Arbitration Competition in mid-January.

LAW:8881 College Athletics Infractions Process 1-2 s.h.
Moot court competition involving college athletics rules violations; the National Collegiate Athletic Association (NCAA) processes major rules infractions (e.g., recruiting violations) through a hearing process that is similar to an administrative law proceeding; NCAA infractions process; participation in mock hearings.

LAW:8891 State and Local Taxation 2-3 s.h.
Limitations on state taxing powers under the United States Constitution, including Commerce, Due Process, and Privileges and Immunities Clauses; subnational jurisdictions, particularly states with an emphasis on sales tax and corporate income taxes, gross receipts taxes, and excise taxes; issues relating to ecommerce.

LAW:8929 Taxation of Partnerships 2-3 s.h.
Introduction to federal tax treatment of partnerships and limited liability companies, the most common business entities in use in the United States today; classification of entities as partnerships for federal tax purposes; formation of partnership and subsequent contributions to partnership capital; flow-through tax treatment of partnership operations; tax-sensitive allocations of items of partnership income, deduction, credit and loss; partnership distributions and related tax-sheltering strategies, liquidation or sale of partnership interests; death or retirement of partners, tax treatment of partnerships compared with S corporations. Prerequisites: LAW:8194.

LAW:8935 National Security Law 3 s.h.
Surveys several key areas of law and government institutions involved in "national security" with a focus on counterterrorism. Topics include intelligence and surveillance law, domestic national security-related criminal law, domestic and international law related to detention and interrogation, and ongoing and historic debates over domestic terrorism, encryption, and compelled decryption.

LAW:8938 Technology in Law Practice 2 s.h.
Introduction to selected technologies that affect modern law practice including cloud computing, document preparation tools and techniques, e-discovery tools and issues, practice management, professional responsibility concerns, legal project management, courtroom technology, and legal research analytics.

LAW:8954 Trademarks and Unfair Competition Law 2-3 s.h.
Law of unfair competition with primary emphasis on trademarks; subjects include policies underlying unfair competition law, creation and establishment of trademark and trademark-like rights, enforcement of those rights, non-trademark concepts of false advertising, rights in one's persona, and the intersection of the First Amendment and trademark law; practical aspects of trademarks including mechanics of the federal registration process; for students who have an interest in trademark and unfair competition law, both specifically and as part of a broader business law practice.

LAW:8981 Trusts and Estates I 1-4 s.h.
Law of succession and trusts; topics include policy basis of inheritance and the changing character of intergenerational wealth transfer; intestate succession; the requirements for executing and revoking wills; the rise of will substitutes; spousal protection against disinheritance; the creation, modification, and termination of trusts; the particular rules applicable to charitable trusts; the fiduciary duties of trustees; the nature of a beneficiary's interest in trust, the range of the trustee's discretion, and the rights of a beneficiary's creditors; recurring construction problems and pitfalls in drafting.

LAW:8987 Veterans Benefits Law 2-3 s.h.
Theory of veterans' benefits law and introduction to skills necessary to represent veteran clients at every stage of the U.S. Department of Veterans Affairs (VA) adjudication process; how many veterans struggle to navigate the complex VA benefits system without assistance of counsel; law that governs administration and adjudication of these benefits; fundamental law of VA claims adjudication process; dispute resolution and federal agency litigation practice; what is required to effectively represent veterans in their appeals for much needed benefits.

LAW:8992 Water Law arr.
Legal schemes for securing and using water rights in surface water and groundwater for private and public uses in the United States; riparian and prior appropriation doctrines of water allocation, groundwater management regimes, federal water management and regulation, and interstate and transboundary allocation devices; evolving role of science, economics, and policy in water allocation law; does not address issues of water quality, which are covered in environmental law.

LAW:8993 Water Quality and Pollution Control Law 3 s.h.
Overview of environmental laws enacted to protect the integrity and quality of water. Examines existing federal statutes.

LAW:9010 Appellate Advocacy I 1 s.h.
Experience based on an assigned fictitious case: writing an appellate brief asserting the client's position, and arguing the case before a panel of students, faculty, community attorneys. Prerequisites: LAW:8032 and LAW:8033. Requirements: closed to students who have taken LAW:9012.

LAW:9011 Client-Centered Public Defense Advocacy 1-3 s.h.
Introduction to core elements of court-appointed representation in criminal courts.

LAW:9012 Advanced Appellate Advocacy 2-3 s.h.
Continuation of argument and advocacy skills introduced in LAW:8033. Prerequisites: LAW:8033. Requirements: closed to students who have taken LAW:9010.

LAW:9021 Van Oosterhout Baskerville Moot Court Competition 1 s.h.
Single-elimination tournament culminating in the final four advocates arguing before a panel of judges; advocates write a portion of the brief, argue for and against the issue they briefed. Prerequisites: LAW:9010.

LAW:9028 Jessup Moot Court Competition Team 1-2 s.h.
Participation as team member in Jessup International Moot Court Competition; preparation of memorials in fall, travel to February regional rounds; travel to international competition in Washington, D.C., for top two teams. Prerequisites: LAW:9010.

LAW:9033 National Moot Court Competition Team 1 s.h.
Participation by third-year students as law school's representatives in the National Moot Court Competition. Requirements: placement as one of four finalists in LAW:9021.

LAW:9034 National Moot Court Tutorial 2 s.h.
For students participating in the National Moot Court competition; provides a problem and a substantial record, which provide basis for appellate brief and oral argument competition; integrates teaching of substantive law with development of oral and written advocacy skills in preparation and application for the national competition.

LAW:9037 Advanced Moot Court Competition Team 1 s.h.
Advanced Moot court team; members are top advocates from previous year's Van Oosterhout/Baskerville competition. Fall of third year.

LAW:9038 Jessup International Moot Court Competition 1 s.h.
Participation by second-year students in intramural regional- and national-level moot court competition in international law; intensive criticism in appellate brief writing and oral argument. Prerequisites: LAW:9010.

LAW:9041 Vis International Moot Court 1-3 s.h.
Participation for up to four students in the Vis International Moot Court, an annual international moot competition concerning international commercial arbitration under the Vienna Convention on the International Sale of Goods (CISG); under close supervision of instructor, students prepare two briefs, one for the claimant and one for the respondent, are mooted repeatedly by instructor and practicing attorneys (often alumni of the competition), and then participate in multiple rounds of moot court competition in the United States and, ultimately, either Hong Kong or Vienna. Recommendations: one course in international arbitration or international business transactions.

LAW:9046 Moot Court Board 1-3 s.h.
Experience as member of the Moot Court Board administering the Appellate Advocacy Program, researching appellate cases used in the program, judging appellate arguments. Requirements: membership based on performance in LAW:9010.

LAW:9055 Jury Focus Groups 1 s.h.
Role of the jury in civil and criminal court systems; how lawyers can use jury focus groups to learn more about their cases.

LAW:9060 Trial Advocacy 1-2 s.h.
Opportunities to develop and refine skills used in preparation and trial of civil and criminal cases; students are "on their feet" during most class sessions, practicing the arts of voir dire, opening statement, direct and cross examination, introduction of exhibits, use of expert testimony, and closing argument; the course culminates with a full-scale trial, from filing of pretrial motions to rendering of a jury verdict conducted by student co-counsel; students receive extensive criticism on the effectiveness of their classroom and final performances, and all class sessions are frequently recorded for review and critiqued by instructors and fellow students. Prerequisites: LAW:8460.

LAW:9061 Advanced Trial Advocacy - Stephenson Competition 1-2 s.h.
Review and expansion of topics presented in the initial trial advocacy course; preparation and application of these principles in the Stephenson trials; introduction to additional advanced problems such as the evidentiary issues raised in the trial problem. Corequisites: LAW:9060.

LAW:9062 Trial Advocacy Board 1-2 s.h.
Administration of Trial Advocacy Program and Stephenson Competition; research and writing in connection with trial problems and readings used in program; critique of performances of trial problems. Prerequisites: LAW:8460 and LAW:9060.

LAW:9066 Stephenson Trial Advocacy Team arr.
Student participation as College of Law representatives in Stephenson Trial Advocacy Competition. Prerequisites: LAW:9061.

LAW:9115 Law Review 1-2 s.h.
Performance of substantive tasks to produce a first-rate scholarly journal; writing a substantial note; comprehensive legal research experience; analysis of complex legal issues with enhanced critical-reasoning skills and command of the legal standard, The Bluebook citation system; selection of students that transfer to UI College of Law after their first year and rising second-year students is based on the Write-On Competition.

LAW:9118 Student Journal Editor - Law Review arr.
Experience on the *Iowa Law Review* editorial staff: managing production, overseeing business operations, administering student writing program, selecting and editing articles for publication, supervising student research and writing. Eligibility based on previous writing for the journal. Prerequisites: LAW:9115.

LAW:9124 Journal of Corporation Law 1-2 s.h.
Experience editing articles and writing commentaries for *The Journal of Corporation Law*, a student-operated scholarly publication that examines subjects of current importance to businesses and the bar.

LAW:9127 Student Journal Editor - Journal of Corporate Law arr.
Experience on *The Journal of Corporation Law* editorial staff: managing production, overseeing business operations, administering student writing program, selecting and editing articles for publication, supervising student research and writing. Eligibility based on previous writing for the journal. Prerequisites: LAW:9124.

LAW:9142 Transnational Law and Contemporary Problems Journal 1-2 s.h.
Experience researching and writing on issues in international and comparative law for the journal *Transnational Law & Contemporary Problems*. Requirements: second- or third-year law standing.

LAW:9145 Student Journal Editor - TLCP Journal arr.
Experience researching, writing, and editing on issues in international and comparative law for the journal *Transnational Law & Contemporary Problems*. Requirements: second- or third-year law standing.

LAW:9163 Journal of Gender, Race and Justice 1-2 s.h.
Academic year experience on *The Journal of Gender, Race & Justice:* writing two journal pieces, including a recent development and a note or a comment, and performing office duties. Requirements: second- or third-year law standing.

LAW:9166 Student Journal Editor - Gender, Race and Justice arr.
Experience on *The Journal of Gender, Race & Justice* editorial staff: managing student writing program, overseeing business operations and production, selecting symposium topic and participants, selecting and editing all publications pieces; eligibility based on writing and editing experience.

LAW:9302 Clinical Law Program: Internship arr.
Experience working directly with faculty members on cases and in-house program; full participation in interviewing, fact investigation, negotiation, courtroom proceedings.

LAW:9303 Advanced Clinical Law Internship arr.
Continued representation of a specific client or matter; or continued representation of clients in the practice group in which students worked their first semester, but with more ownership and greater independence; opportunity to serve as mentors to new clinical law internship students. Prerequisites: LAW:9302.

LAW:9310 Human Rights Initiative Clinic 6 s.h.
Work with partner organizations to preserve the basic guardrails for a free and fair society, supporting human rights defenders, journalists and others who experience repression based on the peaceful exercise of the rights to speech, association, and civic participation. Corequisites: LAW:8572.

LAW:9319 Poverty Law Practicum 4 s.h.
Provide opportunities to practice client interview and counseling skills, writing skills geared toward high-volume litigation, and oral and written advocacy, including an opportunity to represent clients in state small claims court.

LAW:9320 Field Placement: District of Columbia Program arr.
Students work closely with attorneys and enroll in a weekly seminar with other externs in the Washington, DC, area; through seminar and field work, students examine the role of attorneys in the nation's capital, witness the function of administrative agencies and the process of federal lawmaking, and engage in self-evaluation and reflection on field work.

LAW:9322 Field Placement: Judicial arr.
Close work with a federal district court judge or state appellate judge conducting research and drafting a wide variety of legal memoranda, orders, and opinions; assist in hearings and perform other duties generally associated with a judicial clerkship; weekly meetings with a faculty supervisor to discuss student's work in chambers; participation in biweekly classroom discussions.

LAW:9324 New York Pro Bono Scholars Program arr.
Students spend 12 weeks working full time in a pro bono placement while also completing an academic component at their law school; students are permitted to take the New York bar examination in February of their final year of study before they graduate; after successful completion of the program and any other graduation requirements, students are admitted to practice as soon as practicable after they receive their JD degree (typically in June).

LAW:9331 Field Placement: General arr.
Students earn credit working closely with attorneys in a wide range of placements; field placements designed so that students are directly involved in activities characteristically performed by attorneys in a real-world setting; some placements routinely offered and arranged by the law school, others by students and approved by faculty; some placements are local and students take them along with their other classes; other placements are full time, located across the country and around the world; in addition to fieldwork, students are enrolled in a seminar with other externs.

LAW:9332 Field Placement: Advanced arr.
Students appear in court, advise clients, or engage in other lawyering tasks; skills topics tailored to student interest and selected to cover material not explored in the general field placement course; students develop and and teach a class on a lawyering skill topic of their choice for the general field placement course.

LAW:9335 Summer Legal Placement 1-3 s.h.
Externship opportunities for direct involvement in activities characteristically performed by attorneys (e.g., research and writing, document drafting, client interviewing and counseling, fact investigation, negotiations, court appearances); in-depth exposure to as many facets of the actual practice of law as practicable in each externship.

LAW:9423 Tutorial arr.
Different types of pedagogical techniques.

LAW:9429 Intellectual Property Advocacy 1-4 s.h.
Integrates teaching of substantive intellectual property law with development of oral and written advocacy skills in intellectual property field; builds on earlier learning in preparation for practice of law.

LAW:9436 Sexuality and the Law 3 s.h.
The field of sexuality studies can cover everything from sexual knowledge, beliefs, attitudes, values, and behaviors of individuals to sexual cultures, identities, and communities; focus on social, economic, political, and cultural dimensions of sexuality.

LAW:9444 Tutorial for Foreign-Trained Lawyers 1 s.h.
Introduction to the legal system and legal educational system of the United States; particular emphasis on those aspects of the U.S. system that present a strong contrast with other countries' legal systems, whether from civil or common law traditions; for foreign-trained law students (LLM, JD, or SJD) who have not earned a U.S.-based JD or U.S.-based LLM degree that includes an introduction to U.S. law and legal system.

LAW:9455 Medical Tutorial for Law Students arr.
Participation on medical and/or surgical rounds under supervision of attending physician; didactic sessions on legal, medical, and ethical issues arising from the clinical experience, and issues such as peer review, credentialing, quality assurance, cost containment, AIDS, reproductive technology; recent developments in medical technologies. Cosponsored by Carver College of Medicine.

LAW:9460 SJD Tutorial 5 s.h.
Thesis work under supervision of Doctor of Juridical Science (SJD) committees; dissertation committee chairs conduct an irregular series of meetings to learn about and discuss issues common to research and writing of each thesis involved; students develop full thesis proposals and draft individual chapters; forum provided for workshopping student work and development of students' abilities to discuss and critique legal scholarship; for all SJD students during their two semesters of residency at the College of Law.

LAW:9473 Writing Tutorial arr.
Writing project on a subject or topical area specified by the supervising faculty member; group meetings; writing tutorial.

LAW:9478 Advanced Legal Writing: Writing Center 2 s.h.
Qualities of good legal writing including predictive, persuasive, and academic writing; how to teach those skills to others. Requirements: College of Law writing center tutor.

LAW:9486 Directed Research and Writing arr.
Research and writing project unrelated to any substantive course, supervised by a faculty member.

LAW:9490 Independent Research Project arr.
Work under faculty supervision; research.

LAW:9491 Independent Research and Writing arr.
Independent research and writing under thesis advisor/committee chair. Requirements: SJD enrollment.

LAW:9508 Environmental, Social, and Governance Basics 2-3 s.h.
By developing an awareness of Environmental, Social, and Governance (ESG) issues confronting society, students will be better positioned to advise a range of clients on a range of issues. Students will also be better prepared to draft a range of documents at the intersection of law and ESG, such as corporate disclosure documents, model legislation, and policy statements.

LAW:9509 Advanced Problems in International Environmental Law arr.
Research and writing seminar exploring selected topics that may be encountered in practice; topics vary.

LAW:9510 Climate Change Law and Policy 3 s.h.
Introduction to law and policy related to climate change; seminar readings provide an overview of laws and policies that seek to mitigate climate change and adapt to its effects; fundamentals of climate science including scientific knowledge regarding impacts of climate change and obstacles to effective communication about climate science; various private and public responses to climate change at local, state, federal, and international levels; exploration of different trends in climate change litigation.

LAW:9528 Advanced Topics in International Law arr.
Contemporary problems of public international law and policy; issues arising from armed conflict, use of force, pacific settlement of disputes; human rights law and policy (individual civil, political, economic, social, and cultural rights; group rights such as self-determination, development, environment, peace); trade and development; environmental law and policy (e.g., climate change, species extinction, pollution).

LAW:9545 Tax Policy 2-4 s.h.
Tools to evaluate existing and proposed changes to state and federal tax systems; evaluation of tax systems through numerous perspectives whether economic, philosophical, or comparative, depending on student interest; specific attention to tax policy proposals that command popular and congressional attention; students write a policy paper that evaluates a current tax policy proposal. Requirements: prior or concurrent enrollment in any tax course.

LAW:9554 Compliance, Ethics, and Risk Management arr.
Public and private organizations—including corporations, nonprofits, universities, and government agencies—are responsible for ensuring that their personnel comply with legal and regulatory requirements; organizations must find mechanisms to develop strategies and cultures of compliance; students develop an understanding of the field of organizational compliance and issues that compliance professionals are responsible for overseeing, establish a strong foundation in behavioral and traditional legal ethics, and develop persuasive arguments regarding strengths and weaknesses of compliance efforts undertaken by organizations. Corequisites: LAW:8331.

LAW:9556 Constitutional Theory: Originalism and Its Critics 3 s.h.
Originalism is ascendant, at least at the Supreme Court, but there is widespread disagreement about what originalism is, what it would require of judges, and whether originalist methods are justified; exploration of scholarship supporting different forms of originalism. Prerequisites: LAW:8010 or LAW:8280.

LAW:9558 Corporate Boards Seminar 2 s.h.
Simulation of seven meetings of a board of directors of a hypothetical company; students act as board members facing a discrete issue of corporate governance and take turns acting as chair of the board or as general counsel, leading the board of directors though a discussion of the issues; focus on the normal functioning of United States publicly listed companies, as well as on the duties of directors in times of crisis or significant change to the corporation. Prerequisites: LAW:8331 and (LAW:8307 or LAW:8309).

LAW:9573 Cultural Property/Heritage arr.
Concept of cultural property, measures for its protection, impact of these measures on the transfer of cultural items; traditional art and architecture, biological and fossil material, human remains; contexts in which issues have arisen, such as stolen cultural property, property acquired during armed conflict and in colonial settings, and property collected in the field or excavated; international, national, and state law, including UNESCO convention on illicit transfer of cultural property, U.S. Archaeological Resources Protection Act, Native American Graves Protection and Repatriation Act; how developing professional ethics codes affect the concept of cultural property.

LAW:9578 Electronic Surveillance Law 3-4 s.h.
Explore many of the electronic surveillance authorities and related privacy protections that exist in United States, including the Wiretap Act, Stored Communications Act, Pen Register Act, national security letter statutes, state statutes, and related topics like compelled decryption.

LAW:9582 Deals arr.
Economic structure of complex commercial transactions as memorialized in agreements including bank credit facilities, indentures, underwriting agreements, other documents governing equity financings and financings involving convertible or preferred securities, venture capital agreements, securitization documents, business combination agreements, joint venture and shareholders agreements, limited liability company operating agreements, project finance documents; commercial agreements and how sophisticated parties order their private relationships to achieve efficient results. Prerequisites: (LAW:8331 and LAW:8726) or LAW:8307.

LAW:9591 Family Law in the World Community arr.
Family law from a global perspective; treatment of family law problems in varied legal systems; application of international treaties and conventions to issues such as child custody, adoption and foster care, education and child labor, juvenile crime and punishment, child trafficking and exploitation, migrant and refugee children, child soldiers.

LAW:9630 Leadership in Higher Education 3 s.h.
Introduction to leadership in higher education; readings provide an overview of leadership skills needed to navigate some of the most pressing issues in higher education; students consider the role of professional schools operating within a larger university; discussion topics may include academic freedom, diversity/equity/inclusion, and intercollegiate athletics; assessment and development of individual leadership skills while analyzing policy questions associated with institutional responses to everyday decision-making and crisis management.

LAW:9631 Higher Education and the Law arr.
Introduction to the most pressing legal issues facing colleges and universities today: free speech on campus; academic freedom and tenure; diversity; student discipline; student privacy, safety, and well-being; Title IX; and intercollegiate athletics; a major goal is to consider the policy questions associated with institutional responses to these legal issues.

LAW:9635 Happiness and the Law 3-4 s.h.
Happiness, law, and public policy; lawyer and client relationship; how to be a happy lawyer; pedagogical mix of Socratic discussion of readings and experiential components through which students experiment with mindfulness techniques and constructing an actionable and personal career-life plan that takes into account themes explored; additional experiential exercises.

LAW:9639 History of Regulation of Smoking and Tobacco arr.
Regulation of smoking and tobacco use; history, beginning with 19th and early 20th centuries; state statutes and case law; OSHA, EPA, and FDA regulations; class action litigation, involvement of law firms in formulating tobacco company strategies, use of medical studies, economic history of the tobacco industry.

LAW:9641 Drug Use, Addiction, and the Law 3 s.h.
Focus on the ethical, philosophical, and policy issues that inform how the legal system addresses drug use and addiction; includes a mix of casebook readings and scholarly articles.

LAW:9645 Race, Class, and Education 2-3 s.h.
Education plays a crucial role in sustaining a democratic society, and as such, it is critical to understand and be able to critique legal and public policy choices that shape educational systems; exploration of issues of equity, access, and reform in American education, particularly as pertains to race and class.

LAW:9660 Twentieth-Century American Legal History 3 s.h.
Addresses major developments in American law, with a focus on three topics: freedom of expression and belief, immigration and citizenship, and civil rights. Situates legal developments within their social, cultural, and political contexts; considers the activities of a range of legal actors, from Supreme Court justices to social protest movements to ordinary citizens.

LAW:9681 Elder Law arr.
With the aging population, elder law has become one of the fastest growing areas of law practice; examination of legal, policy, and planning issues related to aging in America; topics include planning for incapacity, guardianship, end-of-life planning (advance medical directives), social security, Medicare and Medicaid, planning for catastrophic illness and long-term care, elder abuse and neglect; exploration of ethical issues dealing with elderly and adult children of elderly.

LAW:9701 International Criminal Law arr.
Available legal responses to ISIS; topics include the law of genocide, war crimes (including gender crimes), crimes against humanity, terrorism, human trafficking, money laundering, the International Criminal Court, and alternatives to prosecution including national truth commissions; strengths and weaknesses of international criminal law as a response to mass atrocity; practical considerations that limit and permit the effective functioning of this burgeoning legal experiment.

LAW:9708 International and Comparative Labor and Employment Law 2-3 s.h.
Survey of labor and employment laws and norms developed and promulgated by the International Labor Organization (ILO), the European Union, free trade agreements, and corporate codes; comparative focus on laws of the United States, Germany, and China—three leading world economies with vastly different labor and employment law systems; how to make informed questions, including to local counsel, when cross-border, employment-related legal issues are encountered; why countries have different systems of labor and employment protection despite the fact that they all try to solve similar problems; how the United States is, or is not, unique.

LAW:9723 Seminar on Islamic Law and Government 3 s.h.
Islamic legal and political legacy from formative period until modern time; critical analysis of logic and context of development; development of jurisprudential, legal, and political literature; overview of theories and practices of governance in Islam beginning with Caliphate system and ending with modern nation-state models. Same as RELS:6723.

LAW:9739 Topics in the Philosophy of Law arr.
Opportunity to explore certain questions in law and philosophy at greater depth; topics vary, ranging from foundational questions to issues with strong practical implications for public policy; readings specifically selected to fit topic area.

LAW:9759 Narrative and Law 3-4 s.h.
How arguments can be made more interesting and relevant by storytelling techniques, and how the portrayals of the law in literature have evolved over the years.

LAW:9770 Latinx and the Law 3 s.h.
Exploration of legal and theoretical issues relevant to Latina/o/x people in the United States; topics include role of law in defining Latinx identity, legal histories of Latinx subgroups (e.g., Mexican Americans, Puerto Ricans, Cuban Americans), legal regulation of language and accent, immigration and citizenship law, and antidiscrimination law.

LAW:9805 Hot Topics in Iowa Law and Legislation 3 s.h.
Exploration of recent developments and hot topics in Iowa state law, including recently passed legislation and legislation being considered by the Iowa legislature.

LAW:9820 The Law of Low-Wage Workers 3 s.h.
Exploration of how traditional labor and employment law might be insufficient to properly protect low-wage workers; focus on alternative representational institutions (e.g., worker centers) and the special role that federal, state, and local law enforcement agencies and attorneys general play in this area; special concerns of particular groups of low-wage workers (e.g., agriculture, meatpacking, the “gig” economy, households/domestic work); may include immigrant and prison labor. Prerequisites: LAW:8421 or LAW:8670 or LAW:8415.

LAW:9821 Law and Political Economy 3-5 s.h.
How law and lawyers contribute to the transformation of political and economic life.

LAW:9826 LLM Seminar arr.
Basic research and analytical methodologies for the international and comparative law fields; workshop approach to project proposals, drafts.

LAW:9829 Media Law 3 s.h.
Overview of law that applies to mass media, citizen media, and social media; how law has attempted to define "the Media," and how it has distinguished between distribution platforms in treatment of media rights and obligations; American press and notions of press freedom at time of founding; tracking evolution of law governing injuries inflicted by speakers beginning with common-law treatment of libel and slander to constitutionalization of those torts; examination of law that applies to various journalistic tools; problems of jurisdiction and choice of law posed by online news; examining market influence on content; comparing American system with other countries approaches to media law.

LAW:9830 Housing Law and Policy 3 s.h.
Examination of how housing laws and policies in this country have fallen short of realizing the Housing Act's lofty ideal; exploration of challenges and tradeoffs inherent in developing effective legal solutions to the housing crisis through class discussions and exercises, research papers, and moderated presentations by housing professionals—from community organizers to legal aid lawyers to real estate developers and public officials.

LAW:9831 Property and Race in U.S. History 3-4 s.h.
How property law and policy has reflected and shaped the treatment of different racialized groups in the United States; how this history affects property ownership and racial and economic status today; property considered narrowly (e.g., through probate, citizenship restrictions on land ownership, access to mortgages, and the Fair Housing Act) and broadly (e.g., through assertion of sovereign authority over territory and arguments that race itself is a form of property).

LAW:9834 Transportation Law and Policy 3-4 s.h.
Transportation plays an outsized and understudied role in day-to-day life, economy, and society; law plays a similarly vital and underappreciated role in determining transportation policy; introduction to the law and policy of transportation.

LAW:9858 Mass Tort Litigation 3 s.h.
Focus on the procedural and substantive issues raised by the explosion of product and enterprise liability in the context of mass injuries. Representative topics include the introduction to the topic of mass tort litigation, seminal cases, analytical frameworks for the handling and resolution of mass torts, general causation versus specific causation in toxic torts, and problems raised by heterogeneity of plaintiffs and their injuries. Prerequisites: LAW:8046.

LAW:9860 Inside-Out: Social Justice Issues and Critical Theory 2-4 s.h.
Use of Inside-Out model; law students (outside students) co-learn with incarcerated students (inside students) at the Iowa Medical and Classification Center (IMCC), also known as Oakdale, a medium security state prison and the site for the University of Iowa Liberal Arts Beyond Bars (UI LABB) program; analysis and discussion of current social justice issues through a critical legal theory lens (i.e., critical race theory, feminist legal theory, LatCrit, ClassCrits, queer theory, critical disability theory).

LAW:9861 Current Social Justice Issues and Critical Theory Perspectives 2-4 s.h.
Use of critical theories as a tool to examine current social justice issues; creation of a learning environment that adheres to the values of critical legal theories—which is non-hierarchical, values expression in all forms from a broad range of authors/creators, and disrupts traditional understanding of the classroom.

LAW:9863 Patent Prosecution Seminar 3-4 s.h.
Drafting seminar on patent application preparation and prosecution; student drafting exercises and presentations on advanced patent law topics; administrative rules and procedures governing practice before the U.S. Patent and Trademark Office; for students who plan to practice patent law. Prerequisites: LAW:8643 or LAW:8763.

LAW:9865 Intellectual Property Scholarship Seminar 3-4 s.h.
Exploration of major themes in intellectual property law scholarship through juxtaposition of classic and contemporary intellectual property law articles.

LAW:9871 Privacy Law and Technology 3-4 s.h.
We have become, wittingly or not, compulsive data makers; every day we shed reams of personal information that those who have an interest in empowering, monetizing, manipulating, or suppressing us are eager to acquire; this dynamic is redrawing the line between what it means for information to be private/public, personal/commercial, ours/theirs; privacy law and technology serves an interdisciplinary introduction to technologies, laws, and policies that shape how that information is collected, who has access to it, and what it can reveal about us; class sessions alternate between focusing on legal frameworks and the technologies they implicate.

LAW:9873 Contract Drafting Boot Camp 1 s.h.
Contracts are an essential part of the practice of law for transactional lawyers who draft contracts, and litigators who often argue about what contracts mean; introduction to the parts of a contract and the principles of contract drafting in a week-long intensive simulation; students consider doctrine, theory, skills, and ethics associated with contract drafting, and engage in multiple contract drafting exercises. Requirements: no prior, current, or future enrollment in LAW:9874.

LAW:9874 Principles of Contract Drafting 2-3 s.h.
Principles of drafting business contracts; focus on structure of contracts, how to draft each of the parts of a business contract, and how to translate the needs of the business into clear and understandable contractual language; examination of typical business contracts (e.g., nondisclosure agreements, letters of intent, purchase agreements, and other types of agreements); students complete drafting exercises and a series of larger contract drafting projects.

LAW:9875 Judicial Opinion Drafting 3 s.h.
Introduction to duties and responsibilities of judicial clerkships; writing bench memoranda and draft opinions at trial and appellate levels.

LAW:9882 Public Health Law arr.
Introduction to scope, function, and history of governmental activities and programs encompassed by public health regimes (primarily in the United States); legal and constitutional powers and duties of states to create prerequisites for health of population as a whole; limitations on exercise of that power to restrict individuals interests (inter alia) in liberty, autonomy, privacy, and property; tensions and conflicts that arise when collective action on behalf of public/common good constrains what the state deems to be acceptable risks triggered by actions of private individuals.

LAW:9886 Reconstruction and the Constitution arr.
After the Civil War, during Reconstruction, Congress enacted the 13th, 14th, and 15th Amendments that changed the constitutional course of the nation and took place during the period of most progressive reform in U.S. history; students address: How do these amendments fit together? Where did the language of these amendments come from? How did these relate to the Dred Scott case? How did this constitutional change occur? What was necessary for this reform to come about? What was necessary legally? What was necessary in terms of social context for this progressive reform to occur? How do these amendments relate to the Bill of Rights and the 17th Amendment for women's suffrage? Prerequisites: LAW:8010.

LAW:9912 Selected Issues in Family Law arr.
In-depth look at an issue or set of issues in family law; relevant cases, statutes, scholarship; class visits or on-the-job observations with community members who play roles in the family law process being examined.

LAW:9915 Reproductive Justice Seminar 3 s.h.
Introduces students to foundational concepts within reproductive justice and rights. Focus on legal and systemic oppressions that impact all aspects of reproductive decision-making, including the equally important rights to not have a child and to have a child. Emphasizes questions of how race, ethnicity, gender, sexual orientation, and socioeconomic status can affect reproductive decision-making and experiences.

LAW:9936 Selected Topics in Immigration Law arr.
Issues arising out of contemporary problems of immigration law and practice; topics may include immigration enforcement policy, draft immigration legislation, initiating representation, bond hearings, suppression/other motions practice, defensive asylum/related claims, appellate practice, "know your rights" counseling, establishing powers of attorney/other forms of legally binding substitute decision-making pertaining to family members/property/other assets, identifying and working with local resources/community organizations that can assist with or reinforce goals of individual client representation; may involve guest speakers/field trips to local nonprofits/ government agencies. Recommendations: no specialized knowledge of immigration law is presupposed and no prior immigration law courses required.

LAW:9950 SJD Continuous Enrollment 1 s.h.
Intended for SJD students working on their dissertation with no mandatory classes left to take; continuous registration is a College of Law policy and students should register for continuous registration only if they are not going to register for any other tuition and fee-assessing courses. Requirements: SJD enrollment, completion of required coursework, and promotion to candidacy.

LAW:9959 Supreme Court Seminar arr.
Supreme Court practice, procedure, jurisdiction; the art of opinion writing; in-depth analysis of cases on the court's pending docket; writing briefs, conducting research, conferencing cases, assigning and preparing opinions, and persuading colleagues; preparation of an opinion.

LAW:9965 Empirical Analysis of Crime and Criminal Justice Policy 3 s.h.
Selected readings of social science articles on criminal justice system; basic concepts needed to become educated consumers of empirical research in general.

LAW:9989 Litigation for Decarceration 2-3 s.h.
Analysis and discussion of recent criminal-legal reforms aimed at reducing the number of individuals who are imprisoned in the federal system.

LAW:9990 Wrongful Convictions and the American Criminal Justice System arr.
Over 300 innocent persons in the United States have been exonerated through DNA evidence after being convicted of crimes they did not commit since 1989; how wrongful convictions occur, how they are remedied, how future injustices can be prevented; introduction to criminal appeals and postconviction proceedings; examination of cases of wrongful convictions; common factors that contribute to conviction of innocent; challenges of proving innocence under statutory and constitutional law; how the system can be reformed to prevent wrongful convictions.

Law Study Abroad Courses

LWAB:8230 France Summer Program: Paris and Arcahon arr.
Intensive coursework in France taught by professors from Iowa and France; program begins in Paris where students visit courts and a law school with speakers including prominent judges and lawyers; students then travel to Arcachon for remainder of stay. Five-week courses in May and June.

LWAB:8825 London Law Program 1-3 s.h.
London Law Program is open to second- and third-year law students who spend ten days taking classes in the heart of London; students visit parliament, the UK supreme court, the Inns of Court, and attend a symposium at Oxford University as part of their coursework; each course offered includes a strong comparative dimension. Winter session.

LWAB:9223 Law Study Abroad at Catolica University arr.
Exchange student study at the University of Católica in Lisbon, Portugal.

LWAB:9226 Law Study Abroad at Radboud University Nijmegen arr.
Exchange student study at Radbound University in Nijmegen, Netherlands.

LWAB:9230 Law Study Abroad at Ewha Womens University arr.
Exchange student study at Ewha Womens University in Seoul, South Korea.

LWAB:9238 Law Study Abroad at National University Ireland arr.
Exchange student study at National University Ireland, Galway, Ireland.

LWAB:9242 Law Study Abroad at Pontifica Comillas University arr.
Exchange student study at Pontifica Comillas University, Madrid, Spain.

Juris Doctor, JD

The Juris Doctor (JD) is a professional degree awarded by the College of Law. The University of Iowa College of Law is approved by the Council of the Section of Legal Education and Admissions to the Bar of the American Bar Association.

The first year of the JD program offers the personal connection and attention students need to develop a strong intellectual foundation for legal thinking and writing. The College of Law has one of the lowest student-to-faculty ratios of any law school. Professors have an open-door policy, and they serve as models for the kind of highly collaborative, rigorously professional behavior that prepares students to serve as counselors to their clients. Students get intensive, individualized instruction from legal writing faculty; the College of Law is one of the few law schools in the nation with a full-time faculty dedicated solely to a student's growth as a legal writer.

In the second and third years, students focus on the areas of law that most interest them, drawing from a rich menu of mainstream, specialized, and clinical courses. Students have access to a wide array of experiential learning opportunities, including participating in moot court competitions; taking the lead with real clients through field placement and clinical law programs; and writing for one of the four student-run scholarly journals. The field placement program, in particular, provides a wide range of placements for students still in law school. Students have worked in U.S. District Courts, legal aid centers, federal public defenders' offices, and nongovernmental organizations (NGOs) around the world. Students also may add distinction to their résumés by participating in study abroad or exchange programs.

Details about applications and admission to the program are available on the College of Law website.

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Cocurricular and Extracurricular Programs

Students enrich their course of study by participating in the college's cocurricular and extracurricular programs, which include Moot Court, the Trial Advocacy Program, and four student-produced journals.

Moot Court

In the Moot Court appellate advocacy programs, students draft appellate briefs, build expertise with citation form, develop research skills, and strengthen their persuasive abilities through oral arguments.

Trial Advocacy

The Trial Advocacy Program is a student-run, faculty-supervised program in which students develop and refine skills used to prepare and try civil and criminal cases. The heart of the program is LAW:9060 Trial Advocacy, a course taught by law school faculty, federal and state judges, and experienced trial attorneys. Students are on their feet during most class sessions, practicing the arts of jury selection, opening statement, direct and cross-examination, introduction of exhibits, use of expert testimony, and closing argument. The course culminates with a full-scale trial—from the filing of pretrial motions to the rendering of a jury verdict—conducted by student co-counsel before a visiting judge and a jury of laypersons.

The Stephenson Competition is named after Judge Roy L. Stephenson, a U.S. District Court and Eighth Circuit Court of Appeals judge and a 1940 graduate of the College of Law. Students who demonstrate superior ability in advocacy skills during the trial advocacy courses participate in a series of mock trials judged by local members of the bench and bar. Individuals selected from the competition represent the University of Iowa in the national trial competition.

Iowa Law Review

Since its inception in 1915, the *Iowa Law Review* has served as a scholarly legal journal, noting and analyzing developments in the law and suggesting future paths for the law to follow. Students have managed the review since 1935, editing and publishing articles by professors and students. To learn more, visit the Iowa Law Review website.

Journal of Corporation Law

The *Journal of Corporation Law* is the nation's oldest and most cited student-published legal periodical specializing in corporate law. The journal's scope includes antitrust, intellectual property, labor law, securities, taxation, employment discrimination, insurance, product liability, and regulated industries, as well as traditional corporate topics. Selected articles submitted by practitioners and academics are published in each of four annual issues. See the Journal of Corporation Law website.

Journal of Gender, Race & Justice

The *Journal of Gender, Race & Justice* pushes the boundaries of legal scholarship and theory in its focus on social justice issues. The journal hosts a symposium at the College of Law every third year, bringing together nationally renowned legal scholars and practitioners to discuss the relationships among the law and race, gender, sex, sexual identity, economic class, ability, and other identity characteristics. The journal publishes an annual volume of legal works that includes symposium papers, papers from conferences outside the college, and articles written by Iowa law students. To learn more, visit the Journal of Gender, Race & Justice website.

Transnational Law & Contemporary Problems

Transnational Law & Contemporary Problems addresses issues and problems that transcend traditional political boundaries, that are of interest to the international and comparative law community, and that are not commonly found in other journals and reviews. One issue takes the form of a symposium addressing specific topics; this issue has a guest editor who is a legal scholar noted for work on the symposium topic. The second issue is submission-based. Every other year the journal organizes and sponsors a symposium on a contemporary international issue; past topics include climate change, the European Union's sovereign debt crisis, and war crimes. For more information, visit the Transnational Law & Contemporary Problems website.

Requirements

The Juris Doctor (JD) requires a minimum of 88 s.h. to earn the degree. To be eligible for a JD degree, students must meet the credit hour requirements, meet the length of study requirements, achieve a cumulative grade-point average of

at least 2.10, take and complete all required courses, satisfy the writing requirements, and satisfy the experiential course requirement.

First-Year Curriculum

The first-year curriculum emphasizes development of analytical skills, a sense of the role of legal institutions in society, and essential writing skills. Each course in the first-year curriculum shares these emphases and conveys substantive knowledge about a particular area of the law.

First-year students take the following courses.

Course #	Title	Hours
First Year, Fall		
LAW:8017	Contracts	4
LAW:8026	Introduction to Law and Legal Reasoning	1
LAW:8027	Introduction to Legal Theory and Perspectives on the Law	1
LAW:8032	Legal Analysis Writing and Research I	2
LAW:8037	Property	4
LAW:8046	Torts	4
First Year, Spring		
LAW:8006	Civil Procedure	4
LAW:8010	Constitutional Law I	3
LAW:8022	Criminal Law	3
LAW:8033	Legal Analysis Writing and Research II	3
Elective		3

The two-semester sequence LAW:8032 and LAW:8033, Legal Analysis Writing and Research (LAWR), is designed to equip students with effective skills in legal analysis, writing and oral communication (oral advocacy), and research.

Second- and Third-Year Curriculum

Second- and third-year courses cover the range of specialties within the legal profession, allowing students to explore and follow their professional interests in a particular career specialization, to write for one of the school's four student-run scholarly journals, to pursue combined degrees in law-related graduate programs, or to simply obtain the widest possible exposure to the legal landscape.

All second- and third-year students must complete the following coursework.

Course #	Title	Hours
LAW:8280	Constitutional Law II	3
LAW:8791	Professional Responsibility	3
Experiential course requirement		
Four writing units beyond the writing requirements of the first year		

Combined Programs

JD/Graduate Degrees

Some students want to explore areas beyond the law, whether it is to maximize their skill sets for future careers, gain in-depth knowledge in a second subject matter, or simply broaden their minds. Combined degree programs allow students to pursue two degrees simultaneously, taking advantage of synergies between degree requirements while gaining significant exposure to a second area of study. Juris Doctor students may pursue combined degree programs with most graduate and professional programs at the University of Iowa. Students may earn a JD degree and another graduate or professional degree in a shorter amount of time than if the two degrees were pursued independently.

Admissions Qualification

To pursue a combined degree, students must apply to and be accepted separately into the JD program and another graduate or professional program. Students typically seek admission to the second degree-granting program after matriculation at the College of Law by applying to the graduate program of interest during their first year of law school. In some cases, it is possible to apply to both programs simultaneously. Students who have already begun graduate work at the University of Iowa may apply to the College of Law. Once students have been accepted into the JD program and another graduate or professional program, they must obtain permission from the associate dean for student affairs or the dean of the College of Law to be classified as a combined degree candidate. Prospective students interested in a combined degree program should contact the admissions offices of both programs to discuss the proposed program of study.

Students who wish to pursue a combined degree program and obtain admission into one college but not the other may enter the college in which they were admitted. However, they are not granted combined degree status. Likewise, combined degree students who terminate work toward one of the degree programs may typically continue to work toward the other degree.

Admissions Procedures

Prospective combined degree students must submit separate applications to the College of Law and the graduate program of interest. They must take the Law School Admission Test (LSAT) and comply with all College of Law admissions requirements. Students must also meet the admission requirements of their other graduate program by taking tests such as the Graduate Record Examination (GRE) General Test or the Graduate Management Admission Test (GMAT). Prospective students should inform the admissions offices of both programs that they are applying to a combined degree program to confirm the admissions requirements for the other program.

Students interested in a combined degree program at the beginning of their legal studies should indicate they are seeking a combined degree on their application. Students who are admitted to both colleges will receive separate letters of admission from those colleges as well as an official notification of being admitted to the combined degree program from Admissions.

Admission information for the Juris Doctor (JD) is available on the College of Law Admissions page. For information about other graduate programs of interest, visit Academics on the University of Iowa home page.

Shared Credit Policies

Students enrolled in a combined degree program must satisfy the semester hours and course requirements that all students must satisfy for each degree separately. However, they have the option of using credit for some courses toward both degrees. These courses are typically electives in each

discipline. For example, students enrolled in a combined JD/MPH program may be able to count the family law and introduction to U.S. health care system courses toward the graduation requirements of both the JD and MPH degrees.

The amount of shared credit that may be applied toward both programs of study varies by program. Generally, combined degree program students may apply up to 12 s.h. earned in their second program of study toward the JD provided that the courses satisfy the College of Law policy on non-law courses. The JD/MPH degree permits up to 12 s.h. of specific College of Law courses to count toward MPH graduation requirements. Some degree programs allow students to count up to 6 s.h. of College of Law courses toward a non-law degree. Details on the Graduate College policy may be found in the Manual of Rules and Regulations on the Graduate College website. Prospective students should check with their graduate or professional program of interest to determine the law semester hours that count for both programs as well as other rules or restrictions concerning the counting of courses toward both degrees with the College of Law.

Additional details about College of Law graduation requirements and other policies may be found in the College of Law Student Handbook. Students considering a combined degree program should be aware that the first-year program in the College of Law consists of required courses and they typically may not take courses outside the College of Law.

Student Tuition Assessment Policy

Students in a JD and a graduate/professional degree combined program are assessed tuition at the College of Law rate if the tuition in the other college is lower than in the College of Law, except for any semester or summer session in which they are not enrolled in any law courses and none of the semester hours being earned in other colleges are applied toward their JD degree. All combined degree students pursuing a JD degree are assessed at least six semesters of law school tuition.

Master of Laws, LLM

The Master of Laws (LLM) is designed for two types of students, those who could benefit from either the legal practice or the research track.

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Legal Practice Track

This track is for foreign-trained jurists who seek a comparative introduction to, and specific training in, aspects of United States law and legal institutions, and a path to state bar admission. Students benefit from the College of Law's legal analysis, writing, and research course, and core courses including contracts, property, torts, and professional responsibility. An extended orientation provides an introduction to United States law.

Research Track

This track is for foreign-trained jurists or graduates of JD programs in the United States who wish to deepen their understanding of law and are interested in research. The program encourages close collaboration with renowned experts in comparative law; anti-competition law; law and economics; law and society; international law, including the law pertaining to international business transactions and/or human rights; and business and innovation.

The LLM program admits fewer applicants so that students receive substantial attention from the faculty. Admission is competitive. All applicants must present evidence of high academic potential and strong recommendations, especially from law professors who supervised their work in classes or seminars.

Requirements

The Master of Laws program requires that students successfully complete a minimum of 24 s.h. of credit, as approved by their faculty advisor. Coursework is selected from the College of Law's general course offerings and from LLM-specific courses.

Required Courses

Course #	Title	Hours
All of these:		
LAW:8026	Introduction to Law and Legal Reasoning	1
Two faculty-supervised writing units		1-4
Two first-year courses, including at least one of these:		
LAW:8017	Contracts	4
LAW:8037	Property	4
LAW:8046	Torts	4
May include one of these:		
LAW:8006	Civil Procedure	4
LAW:8010	Constitutional Law I	3
LAW:8022	Criminal Law	3

Legal Practice Track

This track is open to foreign-trained lawyers who do not have a JD earned in the United States. Students enroll in the LLM orientation to the U.S. legal system course in two parts; a course in professional legal writing; a course in professional responsibility; and at least two basic bar exam courses, such as contracts, torts, or constitutional law. This track is designed to qualify students to take the bar exam in states that allow graduates of LLM programs to complete the bar exam.

Research Track

This track is open to both foreign-trained students and students who hold a JD degree earned in the United States. LLM students without a JD degree must take the LLM orientation to the U.S. legal system course in August before the start of the fall semester. Students take the LLM seminar, a research and writing course in which they write a research paper on a topic chosen with the approval of their advisor. This track is especially suitable for those seeking to enter into an academic career or one that primarily involves policy formulation or research.

Students who earned a JD in the United States and international students who have been trained in another common-law jurisdiction, whose English competence is sufficiently high, and who choose the research track are required to undertake a more ambitious research project intended to lead to the production of a publishable paper. Those who are suitably qualified may also attempt the longer research paper with their advisor's approval.

With the exception of the LLM orientation course and the LLM seminar, courses are taken with other JD students from law course offerings, especially offerings on U.S., international, and comparative law. This method of instruction ensures a very effective comparative experience through broad contact with U.S. law students and professors, and U.S.-trained students similarly benefit from close contact with foreign-trained lawyers.

Master of Studies in Law, MSL

The Master of Studies in Law program has been suspended and is not accepting graduate students at this time. The suspension of this program was approved by the Iowa Board of Regents in spring 2023.

The Master of Studies in Law (MSL) degree is primarily intended to educate students and professionals in other fields who do not wish to practice law but who need to recognize and respond effectively to legal issues arising in their work. Individuals who have completed their BA or BS degree may choose to better position themselves in the job market. Others may be on an established career path but seek to increase their skill set and enhance mobility and promotion opportunities.

The MSL program provides professionals with an overview of the legal system as a whole, as well as an introduction to some of the legal issues that they are likely to confront in their fields. Students take existing courses in the College of Law alongside JD students.

The degree may be completed in as little as one year of full-time study or no more than four years of part-time study. The MSL program does not qualify graduates to practice law.

Doctor of Juridical Science, SJD

The Doctor of Juridical Science (SJD) program is intended for students who wish to conduct original and advanced legal research in law under faculty supervision.

Requirements

The Doctor of Juridical Science program includes five requirements for earning the SJD degree.

Year of Residency

Doctor of Juridical Science students must spend at least one academic year (two semesters) in residence in the SJD program at the College of Law.

Students must complete 18 s.h. of credit during their first year of residency; students who have not earned an LLM degree complete 24 s.h. They must enroll in the SJD tutorial (5 s.h. each semester; 10 s.h. total) to conduct research and writing under the supervision of their SJD dissertation committee. The work in the SJD tutorial focuses on formulating a detailed dissertation proposal, beginning research for and writing portions of the dissertation, and completing one or more chapters.

Students are expected to write a dissertation of publishable quality making a significant and original contribution to legal scholarship. The dissertation should be a book-length manuscript or a series of related articles of equivalent intellectual ambition and scope.

The balance of the required 18 s.h. will be earned through research and writing related to a student's dissertation, supervised by the student's SJD chair. However, at the discretion of a student's SJD committee, some of the semester hours may be allocated to courses or seminars that the committee feels a student needs to strengthen their ability to write a successful dissertation.

Admission to SJD Candidacy

Admission to candidacy is a formal step that must be achieved before a student has the right to continue in the SJD program to complete a dissertation and is determined by the student's committee on the basis of the work done during the student's year of residency in the program.

As part of the assessment process, the SJD committee holds an oral examination toward the end of a student's year of residency that focuses on the work the candidate has completed on the dissertation, the candidate's general knowledge and understanding in relation to the subject matter of the dissertation, and the candidate's further plans for completion of the dissertation. If the committee is not able to admit the student to SJD candidacy at the conclusion of the first year of residency, the committee may give an extension of up to one calendar year if it finds a sufficient basis to believe that the student likely will be able to satisfy the necessary standard within that time.

Presentation of Dissertation Work

Each student is required to make at least one substantive presentation of dissertation work at a meeting of the SJD tutorial to a specially constituted group of faculty, or in a public meeting, as arranged with the student's SJD committee.

Completion of the Dissertation

Students admitted to SJD candidacy continue to enroll in 1 s.h. of dissertation credit, which provides access to university resources, including the Law Library. However, students admitted to SJD candidacy are free to complete their dissertations wherever they wish. In any event, they must continue to coordinate with their committee and continue to register each fall and spring semester as an SJD candidate in the college.

Oral Defense of the Dissertation

Before a student's SJD committee decides whether to approve the student's completed dissertation, the student must successfully defend the dissertation in an oral defense led by the committee. A student must complete the dissertation and have it approved by the committee within five calendar years from the date of admission to SJD candidacy.

Admission

To be admitted to the SJD program, students typically first complete the LLM degree at the University of Iowa or a similar master's-level degree at another law school, either in the United States or at an English-language law school with academic standards equivalent to those of highly ranked United States LLM programs. In appropriate circumstances, the admissions committee will consider applications from excellent students without an English-language master's-level degree who wish to proceed directly to work on their SJD degree. All applicants must show strong evidence of scholarly research and writing abilities.

For more information, visit the SJD application process website.

University of Iowa Center for Human Rights

Director, Center for Human Rights

- Adrien K. Wing

Director, Human Rights Certificate Program

- Brian R. Farrell

Undergraduate certificate: human rights

Faculty: https://uichr.uiowa.edu/academics/faculty

Website: https://uichr.uiowa.edu/

The University of Iowa Center for Human Rights administers the Certificate in Human Rights, the only undergraduate credential awarded by the College of Law.

The Certificate in Human Rights involves an integrated, specific course of study that includes an introduction to foundational concepts in human rights as they have been informed by political, ethical, moral, legal, and historical thought. Through the curriculum, students explore diverse, pressing human rights topics from interdisciplinary perspectives, identify solutions to global challenges, learn to translate foundational human rights concepts into effective advocacy, and strengthen their ability to communicate with academic and nonacademic audiences.

Human rights purport that all people deserve to live life with dignity; that human beings are owed the protection of these rights simply because they are human. Universal human rights apply to all equally and without discrimination. They encompass civil and political rights; economic, social, and cultural rights; and apply to both individuals and groups. The rights set forth in human rights doctrines, such as the Universal Declaration of Human Rights, are interrelated, interdependent, and indivisible.

The University of Iowa Center for Human Rights prepares students to apply human rights concepts to their professional career or field of study. Students learn to appreciate the value of empathy, social responsibility, and engaged global citizenship.

Pre-law students and others considering legal careers can experience undergraduate courses taught by law faculty and explore the role of the law and legal regimes—and how they intersect with civil society—to promulgate, promote, and protect human rights.

Students enrolled in the certificate program enjoy a unique, optional opportunity to engage in a field-based supervised internship on behalf of a scholar imprisoned for their ideas. HRTS:3920 Advocacy in Action: From the Classroom to Congress (Washington, D.C.) begins with team-based development of an advocacy plan on behalf of the scholar and culminates by implementing the advocacy plan on the ground in Washington D.C. in the halls of Congress.

The center also offers merit-based funding to support summer rights-related internships, hosts an annual student academic conference and essay contest, and provides hands-on learning experiences through center internships.

Programs

Undergraduate Program of Study

Certificate

- Certificate in Human Rights [p. 1841]

Courses

University of Iowa Center for Human Rights Courses

HRTS:2115 Introduction to Human Rights 3 s.h.
Analysis and evaluation of the international human rights program; relationship between human rights and international law. Same as IS:2115.

HRTS:2902 The Arts and Human Rights 1-3 s.h.
Examination of emerging human rights issues in the arts from an interdisciplinary and international perspective. Same as IS:2902.

HRTS:2903 Technology and Human Rights 1-3 s.h.
Examination of emerging human rights issues in technology from an interdisciplinary and international perspective. Same as IS:2903.

HRTS:2907 Literature and Human Rights 1-3 s.h.
Examination in human rights in literature from an interdisciplinary and international perspective. Same as IS:2907.

HRTS:2908 Governance and Human Rights 1-3 s.h.
Examination of emerging human rights related to governance issues from an interdisciplinary and international perspective. Same as IS:2908.

HRTS:2909 Human Rights Lab 1-3 s.h.
Discussion-based examination of emerging human rights issues from an interdisciplinary and international perspective. Same as IS:2909.

HRTS:2910 Law and Human Rights 1-3 s.h.
Examination of the law to address emerging human rights issues from an interdisciplinary perspective.

HRTS:3904 Business, Labor, and Human Rights 1-3 s.h.
Examination of emerging human rights issues in labor and business from an interdisciplinary and international perspective. Same as IS:3904.

HRTS:3905 Topics in Human Rights 1-3 s.h.
Examination of emerging human rights issues from an interdisciplinary and international perspective. Same as IS:3905.

HRTS:3906 Global Crises and Human Rights 3 s.h.
Exploration of human rights in context of global challenges; multidisciplinary; topics may include military conflict, nuclear war, human trafficking, environmental disasters, and other international human rights crises.

HRTS:3910 Approaches to Advocacy: From Theory to Practice 3 s.h.
Examine the application of advocacy models to the practice of human rights advocacy. Students explore real-life human rights and humanitarian advocacy initiatives, learn to apply a variety of advocacy models, and critically analyze challenges faced by practitioners working in the field of human rights advocacy. Same as IS:3910.

HRTS:3920 Advocacy in Action: From the Classroom to Congress (Washington, D.C.) 3 s.h.
Supervised, organized internship; focus on collaborative design and implementation of human rights-based advocacy plan for imprisoned scholar; includes three-day field experience in Washington D.C.

HRTS:3930 Peer Assistantship 1-2 s.h.
Designed to foster student and faculty collaboration in the classroom through a supervised mentoring internship; creates a credited opportunity for the student to work with the faculty member in a course they have previously taken by providing peer assistance and mentoring to currently enrolled students.

Human Rights, Certificate

Learning Outcomes

Students who earn the Certificate in Human Rights will be able to:

- critically analyze real-world global challenges from a human rights perspective;
- articulate creative and effective solutions to real-world global challenges from interdisciplinary perspectives by applying human rights principles, advocacy strategies, and tactics grounded in the inherent dignity and the equal and inalienable rights of all people;
- identify and trace the impact of the major events that have led to the formation of contemporary human rights concepts, norms, and institutions;
- explain the historical underpinnings of international human rights advocacy and international institutions that emerged in response to doctrines of racial superiority, inequality, discrimination, imperialism, and conflict during the 20th century;
- identify the relevance of, difference between, and constructive potential for problem-solving using interdisciplinary academic methods and inquiries;
- explain differences between a human rights approach and general normative or ethical approaches to an issue (i.e., how is the question “what is unjust or unfair” different from “what is a violation of human rights”?);
- apply human rights frameworks to other fields of study, including the student’s primary major and professional work;
- integrate concepts from other fields of study into their human rights coursework;
- critically analyze the major scholarly debates about human rights, past and present;
- articulate justifications of human rights frameworks and regimes as well as critiques of discourses on, and approaches to, human rights;
- explain foundational international human rights legal concepts;
- develop skills to interpret and apply legal norms;
- create recommendations to improve the efficacy of violation mitigation and/or the international human rights system;
- identify the potential and the limits of the law in advancing human rights;
- identify human rights violations and analyze mitigation options based on existing international human rights legal frameworks;
- identify the basic operational functions of international and domestic legal regimes involved with the promulgation, promotion, and protection of modern human rights standards;
- analyze and evaluate the relationship of human rights to individuals, governments, corporations, and civil society organizations and analyze and evaluate the role of each in the promotion and protection of human rights and in relationship to other social priorities;
- identify specific target audience(s) with the capacity to raise awareness about and mitigate human rights abuses and to effectively communicate desired actions and outcomes to these diverse audiences in both academic and/or non-academic settings;
- critically analyze when and how human rights frameworks can benefit organizational and business settings;
- develop collaborative skills, improve effective oral communication and presentation skills; and
- develop critical thinking, reading, listening, writing, research, and analytical skills.

Requirements

The undergraduate Certificate in Human Rights requires 18 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in certificate coursework. They may count a maximum of 6 s.h. of transfer credit toward the certificate with approval from the certificate program's faculty advisory group.

The certificate may be earned by any student admitted to the University of Iowa who is not enrolled in a UI graduate or professional degree program. Undergraduate to Graduate (U2G) students may earn the certificate when the undergraduate classification is primary.

Individuals should declare their intent to earn the certificate in MyUI.

The Certificate in Human Rights requires the following coursework.

Foundations in Human Rights

Course #	Title	Hours
All of these:		
HRTS:2115/IS:2115	Introduction to Human Rights	3
HIST:3108	History of Human Rights	3
PHIL:3430	Philosophy of Human Rights	3

Contemporary Global Issues in Human Rights

HRTS:2909/IS:2909 Human Rights Lab is repeatable. Other contemporary global issues courses are repeatable if the topic differs.

Course #	Title	Hours
6 s.h. from these:		
HRTS:2902/IS:2902	The Arts and Human Rights	1-3
HRTS:2903/IS:2903	Technology and Human Rights	1-3
HRTS:2907/IS:2907	Literature and Human Rights	1-3
HRTS:2908/IS:2908	Governance and Human Rights	1-3
HRTS:2909/IS:2909	Human Rights Lab	1-3
HRTS:3904/IS:3904	Business, Labor, and Human Rights	1-3
HRTS:3905/IS:3905	Topics in Human Rights	1-3
HRTS:3906	Global Crises and Human Rights	3

Human Rights in Practice

Course #	Title	Hours
One of these:		
HRTS:3910/IS:3910	Approaches to Advocacy: From Theory to Practice	3

HRTS:3920	Advocacy in Action: From the Classroom to Congress (Washington, D.C.)	3

Career Advancement

The Certificate in Human Rights teaches students to explore topics from interdisciplinary perspectives, identify solutions to global challenges, translate foundational concepts into effective advocacy, and strengthen their ability to communicate with diverse audiences. The certificate not only bolsters the skillsets of students who transition directly to a career following graduation, but it also benefits students bound for law school or other professional or graduate studies. Students enroll in the certificate program from undergraduate departments and majors across the University of Iowa.

Certificate program graduates currently have careers:

- practicing law;
- advancing access to justice and legal reform;
- investigating human rights violations for metropolitan governmental commissions;
- creating legislative policy;
- working for human rights nongovernmental organizations (NGOs), such as the Center for Civilians in Conflict;
- coordinating services for people who are homeless;
- advocating for domestic abuse survivors;
- designing K–12 curriculums;
- creating international development programs for governmental agencies, such as the U.S. Agency for International Development (USAID);
- producing print and broadcast news; and
- resettling refugees and asylum seekers.

The center circulates a student newsletter to alert students to relevant internship and employment opportunities. The Pomerantz Career Center also offers multiple resources to help students find internships and jobs.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Human Rights, Certificate

Course	Title	Hours
Academic Career		
Any Semester		
Courses for the Certificate in Human Rights may be taken in any order but taking HRTS:2115 Introduction to Human Rights in your first semester is recommended. Most other HRTS courses are offered only one semester each year.		
	Hours	**0**
First Year		
Fall		
HRTS:2115	Introduction to Human Rights	3
Certificate: Contemporary Global Issues in Human Rights course(s) [a]		3
	Hours	**6**
Spring		
HIST:3108	History of Human Rights	3
Certificate: Contemporary Global Issues in Human Rights course(s) (HRTS:2909 Human Rights Lab is recommended) [a]		1
	Hours	**4**
Second Year		
Any Semester		
HRTS:3920 or HRTS:3910	Advocacy in Action: From the Classroom to Congress (Washington, D.C.) [b] or Approaches to Advocacy: From Theory to Practice	3
	Hours	**3**
Fall		
PHIL:3430	Philosophy of Human Rights	3
Certificate: Contemporary Global Issues in Human Rights course(s) [a]		1
	Hours	**4**
Spring		
Certificate: Contemporary Global Issues in Human Rights course(s) [a]		1
	Hours	**1**
	Total Hours	**18**

a Complete a total of 6 s.h. of Contemporary Global Issues in Human Rights courses (prefix HRTS) numbered 2902 through 2909 or 3904 through 3906. There are typically 1 s.h., off-cycle courses as well as a 3 s.h. course in Contemporary Global Issues offered in the fall and spring semesters.

b Complete the 3 s.h. of Human Rights in Practice requirement by taking HRTS:3910 (typically offered in the fall) or HRTS:3920 (typically offered in the spring).

Carver College of Medicine

Vice President for Medical Affairs and the Tyrone D. Artz Dean

- Denise J. Jamieson

Executive Dean and Senior Associate Dean for Clinical and Translational Medicine

- Patricia L. Winokur

Vice Dean, Clinical Affairs

- Douglas J. Van Daele

Senior Associate Dean, External Affairs

- Gerard P. Clancy

Senior Associate Dean, Medical Education

- Christopher S. Cooper

Associate Dean, Continuing and Integrated Medical Education

- Joseph F. Szot

Interim Associate Dean for Health Equity

- Joyce Goins-Fernandez

Associate Dean, Faculty Affairs and Development

- Peter M. Snyder

Associate Dean, Graduate and Postdoctoral Studies

- Daniel T. Tranel

Associate Dean, Graduate Medical Education

- Mark C. Wilson

Associate Dean, Medical Education

- Amal Shibli-Rahhal

Associate Dean, Medical Education and Professional Programs

- David P. Asprey

Associate Dean, Research

- Robert C. Piper

Assistant Deans

- Ken L. Cheney, James Y. Choi, Gregory C. Nelson

Undergraduate majors: medical laboratory science (BS); nuclear medical technology (BS); radiation sciences (BS)

Undergraduate certificate: EMT paramedic program

Professional degrees: MCA; MCN; MD; MM; MPA

Graduate degrees: MA; MME; MS; DPT; PhD

Website: https://medicine.uiowa.edu/

The Roy J. and Lucille A. Carver College of Medicine is an integral part of the University of Iowa. It contributes to the education of thousands of university students, is home to ground-breaking research in a wide array of disciplines, and provides a statewide health care resource.

The Carver College of Medicine is the only college in Iowa that offers a curriculum leading to the Doctor of Medicine. It also offers a Bachelor of Science in medical laboratory science, nuclear medicine technology, and radiation sciences (see "Undergraduate Programs of Study" under Programs [p. 1844] in this section of the catalog). It offers Master of Science and Doctor of Philosophy degrees in several disciplines, the Master in Medical Education, and the Doctor of Physical Therapy (see "Graduate Programs of Study" under Programs [p. 1844] in this section of the catalog). In addition, the Carver College of Medicine offers professional degrees: the Doctor of Medicine, the Master of Clinical Anatomy, the Master of Clinical Nutrition, and the Master of Physician Assistant Studies (see "Professional Programs of Study" under Programs [p. 1844] in this section of the catalog).

Doctor of Medicine and other health sciences students have a number of opportunities to gain experience in medical clinics, community hospitals, and a major academic medical center. MD graduates may pursue further training in the specialties of family and community medicine, internal medicine, surgery, and pediatrics at one of 13 University of Iowa-affiliated residency programs in six Iowa cities. The college also participates in the education of students in the colleges of Dentistry, Nursing, Pharmacy, and Public Health and in the life sciences and health-related programs of the colleges of Liberal Arts and Sciences and Engineering, and the Graduate College.

Health professionals from throughout the Midwest take part in the college's year-round continuing medical education programming, updating their knowledge and skills through refresher courses, clinics, and conferences. The college also offers a variety of services that support Iowa physicians and community hospitals.

In addition to providing education and resources for physicians and other health care organizations, the college addresses broad public issues of distribution and organization of health care services. Its faculty members advise and serve on national, state, and regional health planning councils, health boards, and various health agencies.

Accredited by the Liaison Committee on Medical Education of the American Medical Association and the Association of American Medical Colleges, the Carver College of Medicine meets the requirements of all state licensing boards. Its MD diploma admits the holder to all privileges granted to graduates of all medical colleges before such boards. All other professional programs administered by the college are accredited by their respective accrediting bodies.

Doctor of Medicine (MD)

The Doctor of Medicine is a four-year program that prepares students to practice primary care medicine and to pursue further education and training in specialized areas of medicine. For a description of the MD curriculum and information about admission to the program, financial support, and academic rules and procedures, see Doctor of Medicine [p. 1880] in the catalog.

Programs

Undergraduate Programs of Study

The Carver College of Medicine offers a Bachelor of Science with majors in medical laboratory science, nuclear medicine technology, and radiation sciences. See Medical Laboratory Science [p. 1897], Nuclear Medicine Technology [p. 1923], and Radiation Sciences [p. 1966] in the catalog. In addition, the college offers an undergraduate certificate; see the EMT Paramedic Program [p. 1846] in this section of the catalog.

Graduate Programs of Study

The Carver College of Medicine offers graduate programs leading to the MS in athletic training (see the Department of Orthopedics and Rehabilitation [p. 1934]), the MS and PhD in biochemistry (see the Department of Biochemistry and Molecular Biology [p. 1859]), the MS and PhD in microbiology (see the Department of Microbiology and Immunology [p. 1903]), the MS in pathology (see the Department of Pathology [p. 1941]), the Doctor of Physical Therapy and the PhD in physical rehabilitation science (see the Department of Physical Therapy and Rehabilitation Science [p. 1945]), and the Master in Medical Education (see the Medical Education Program [p. 1893]). Departmental participation and teaching contribute to the Graduate College's MS and PhD in biomedical science [p. 1698] with cell and developmental biology, free radical and radiation biology, molecular physiology and biophysics, and pharmacology subprograms.

The college also offers a combined MD/PhD degree through the Medical Scientist Training Program [p. 1901]; see Combined Programs [p. 1882] in the Doctor of Medicine section of the catalog.

Many of the college's faculty members participate in the Graduate College's interdisciplinary programs in genetics [p. 1733], immunology [p. 1742], molecular medicine [p. 1779], and neuroscience [p. 1781]**.**

Professional Programs of Study

The Carver College of Medicine offers the Doctor of Medicine [p. 1881] degree, the Master of Clinical Nutrition [p. 1878] (MCN), the Master of Midwifery [p. 1931] (MM), the Master of Physician Assistant Studies [p. 1957] (MPA), and the Master of Clinical Anatomy [p. 1855] (MCA).

Undergraduate Rules and Procedures

Undergraduate study in the Carver College of Medicine is guided by the following academic rules and procedures. Students should also refer to their respective programs' policies and procedures.

Health Insurance, Immunizations

All health professions students are required to provide proof of health insurance coverage annually. Contact the University Benefits Office or visit its website.

All health sciences students must show proof of immunizations. For more information, contact Student Health and see Student Requirements and Forms on their website.

Application for Degree

Students who want to be considered for graduation must submit a Degree Application with the Office of the Registrar through MyUI before the deadline for the session in which the degree is to be conferred. Students who have fulfilled the requirements for a minor or a certificate must indicate this on the degree application form filed through MyUI so that completion of the requirements for the minor or certificate can be verified and noted on their transcript.

Academic Recognition

The University of Iowa and the Carver College of Medicine recognize academic achievement every fall and spring semester.

Graduation With Distinction

Graduation with distinction recognizes high academic achievement based on grades. See Grading [p. 17] in the "Academics at Iowa" section of the catalog.

Dean's List

Undergraduate students who achieve a grade-point average (GPA) of 3.50 or higher on 12 s.h. or more of University of Iowa courses graded on an A–F basis during a fall or spring semester and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean's List for that semester.

President's List

University of Iowa undergraduate students who achieve a GPA of 4.00 on 12 s.h. or more of University of Iowa graded coursework and who have no semester hours of I (incomplete) or O (no grade reported) for two consecutive semesters (excluding summer sessions) are recognized by inclusion on the President's List.

Financial Support

Students are eligible to apply for undergraduate financial aid. Scholarships, grants, loans, and work-study positions are administered by the university's Office of Student Financial Aid. Part-time employment, sometimes in a related area, is available.

Registration, Credit, Grading

Registration

Information about tuition and fees, registration, and deadlines is available from the Office of the Registrar. Students who add or drop a course after registration or who register late may be assessed a fee. Each course dropped after the deadline results in a W (withdrawn) on the transcript (see the section titled "Changes in Registration"). Students are not allowed to register for full-semester courses after the second week of the semester or the first week of the summer session. Students must register for off-cycle courses before the first day of the course.

The maximum permitted registration for fall and spring semesters is 18 s.h. per semester. The maximum registration for summer session varies: 4 s.h. for the four-week sub-session; 9 s.h. for the eight-week sub-session; 9 s.h. for the six- and eight-week sub-sessions combined; 12 s.h. for the four-week sub-session and the eight-week sub-session; and 12 s.h. for the four-, six-, eight-, and twelve-week sub-sessions combined. Students may register for a maximum of 16 s.h.

of fall semester or spring semester coursework during early registration. Students must contact their academic advisor to discuss permission to register for more than the maximum semester hours allowed.

Changes in Registration

Students may change their registration on MyUI. After the start of the semester, students should view Changes in Registration for information on how to change their schedule of courses and the required permissions.

Approval for all other changes in registration is granted only in extraordinary circumstances. Students whose dropped course or courses result in a registration of 0 s.h. for the semester must follow the procedure for withdrawal from the university instead of the add/drop procedure.

It is the student's responsibility to obtain the required permissions and to understand any consequences associated with the change in registration. Information regarding permissions and consequences will be posted on MyUI; the student should contact their advisor with any questions. See Drop or Withdraw Tuition Responsibility on the Office of the Registrar website.

The Course Deadlines look-up on the Office of the Registrar website provides course-specific deadlines. The cut-off time for obtaining any permissions on deadline days is 4:30 p.m. Students have until 11:59 p.m. to process a drop in MyUI if they have obtained all required permissions by 4:30 p.m.

Withdrawal of Registration

Removing all courses from a schedule (even if only registered for one course) is considered a withdrawal of registration. Students should view the Withdrawal Information on the Office of the Registrar website

It is the student's responsibility to obtain the required permissions and to understand any consequences associated with the withdrawal. Information regarding permissions and consequences will be posted on MyUI; the student should contact their advisor with any questions. See Drop or Withdraw Tuition Responsibility on the Office of the Registrar website.

Auditing Courses

Students may register to audit a course with the approval of the appropriate program director and course instructor. In addition to obtaining these signatures, students must register for zero credit in the course to be audited. The mark of AUS (audit successful) is assigned if a student's attendance and performance are satisfactory; if they are unsatisfactory, the mark of AUU (audit unsuccessful) is assigned. Courses completed with a mark of AUS do not meet any college requirement and carry no credit toward graduation. Auditing may not be used as a second-grade-only option. Tuition will be assessed for audited courses.

Courses Offered by Other University of Iowa Colleges

Students who enroll in courses offered by other University of Iowa colleges are governed by those colleges' rules in matters regarding the courses. See Cross-College Enrollment and Records Policy on the College of Liberal Arts and Sciences website.

Duplication and Regression

Duplication occurs when students take the same course more than once or when they take a course that duplicates the content of a course they already have completed satisfactorily. Regression occurs when students take a course that is less advanced or at a lower level than one in the same subject that they already have completed satisfactorily. Duplication and regression are assessed by the registrar. Semester hours earned by duplication or regression do not count toward graduation.

Minimum Grade Requirement

Students must earn a semester, UI, and overall cumulative GPA of at least 2.00 after acceptance to the Carver College of Medicine.

Students must earn a C or higher in all didactic, lab, and clinical courses. A final course grade of C-minus or below is a failing grade for the program and the BS degree and will not count toward the degree requirements.

Second-Grade-Only Option

Repeating courses for the second-grade-only option is only allowed in extraordinary circumstances. Prior to repeating a course, students must obtain approval from their program director and academic advisor. Upon completion of the course, students must contact their academic advisor to finalize the process.

If the second-grade-only is approved, both grades remain on the permanent record, but only the second one is used to calculate grade-point average and credit earned. Students using the second-grade-only option for courses that are not part of their major must follow the procedure of the college that offers the course.

Since many courses, labs, and internships are prerequisites to others, it may not be possible to repeat a course.

On the permanent record, the second-grade-only option appears as a pound symbol (#), showing that the first grade has been replaced by the second grade in grade-point average calculations and that only the hours from the second registration have been counted as hours earned.

The second-grade-only option cannot be applied to coursework for which a student has already been awarded a UI degree.

Degrees and Minors

Two Bachelor's Degrees

Students who want to earn two bachelor's degrees concurrently, each from a different college, must communicate the request to their academic advisor, who will then contact University of Iowa Admissions. Interested students must complete all requirements for both majors, including the residency requirements.

Second Bachelor's Degree

Students who already hold a bachelor's degree and wish to earn an additional bachelor's degree must satisfy all college and program degree requirements, including at least 30 s.h. consecutively in the Carver College of Medicine.

Minors and Certificates

Students graduating from the Carver College of Medicine may earn a minor and/or certificate in any degree-granting

department or program in the college outside of their program of study or in another college of the university by meeting that department's requirements.

Academic Progress, Probation, Dismissal

Students are expected to maintain satisfactory academic standards and to demonstrate reasonable progress toward the Bachelor of Science Degree. Students who fail to maintain satisfactory academic progress as determined by their program policies will be subject to sanctions that include, but are not limited to, academic probation and program dismissal. Probation serves as a warning that students will not graduate unless their academic performance improves.

Students may be placed on Carver College of Medicine academic probation if their semester, UI, or overall cumulative grade-point average drops below 2.00. Entering students may be admitted on academic probation if they fail to meet the minimum stated standards for admission.

Academic Misconduct

Plagiarism and Cheating

All cases of plagiarism and cheating in the Carver College of Medicine are reported to the associate dean for medical education and professional programs with a statement of relevant facts.

The course instructor may impose course penalties including, but not limited to reduction of the student's course grade or reduction of the assignment and/or exam in question to a 0 or F.

The program director, promotions committee, associate dean for medical education and professional programs, or a faculty committee appointed by the dean, may impose the following or other penalties, as the offense warrants: written warning, programmatic probation, educational sanction, clinical attendance sanction, suspension, and/or dismissal.

Appeals Procedure

Students who would like to appeal a decision should follow their program's appeals procedure.

EMT Paramedic Program

Emergency Medical Technology (EMT) Paramedic Program

Website: https://emergencymedicine.medicine.uiowa.edu/

The Emergency Medical Services Learning Resources Center (EMLSRC) paramedic program is designed to educate individuals currently certified and licensed at the EMT or AEMT level to provide advanced emergency medical care and transportation to victims of serious illness or injury. This program is nationally accredited and follows the 2021 National EMS Education Standards. The three-semester program consists of two semesters of classroom training with a minimum of 284 hours of supervised hospital clinical time. Following completion of the classroom and clinical experience, there is a minimum of 360 hours of supervised paramedic internship. The paramedic program is offered twice per year with cohorts starting in January and August. Students who successfully complete the program are eligible to take the National Registry paramedic examinations, which leads to Iowa certification as a paramedic. Out-of-state applicants should check with their state regarding requirements for reciprocity or recognition of paramedic training received through the EMSLRC.

The classroom portion of the program is held on a "shift-friendly" schedule. Following a three-week rotation, the class meets Monday and Thursday of the first week, Wednesday the second week, and Tuesday and Friday of the third week following the University of Iowa academic calendar. Most clinical rotations are scheduled by the student concurrently with the winter session; however, several foundational rotations are completed in the fall semester. The field internship is scheduled by the student during the final semester.

Program Goal

The program aims to prepare paramedics who are competent in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains to enter the profession.

Curriculum

The program adheres to the National Emergency Medical Services Education Standards as defined by the National Highway Traffic Safety Administration (NHTSA). Students who successfully complete the program are eligible for the National Registry paramedic examination.

All students enroll in the courses EMTP:3101 Emergency Medical Technician - Paramedic I and EMTP:3102 Emergency Medical Technician - Paramedic II.

Accreditation

The University of Iowa Hospitals and Clinics EMSLRC paramedic program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon the recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP).

The University of Iowa Health Care EMSLRC is approved by the Iowa Department of Public Health Bureau of Emergency and Trauma Services as an EMS training program (#018).

Facilities

The Carver College of Medicine consists of twelve buildings containing 1.6 million square feet of space with one building (College of Medicine Administration Building) dedicated to administrative departments only. The other eleven buildings house research activities which include research centers, programs, and institutes, as well as the Core Research Facilities, which are a collection of centralized laboratories dedicated to developing and providing state-of-the-art research resources to facilitate biomedical research. They are available on a fee-for-service basis to the entire health sciences community along with outside entities.

The Medical Education Research Facility houses medical education space and research laboratories, including the Holden Comprehensive Cancer Center and the Institute for Vision Research. It also contains the college’s four learning communities. The communities group students who are at different stages in their medical education, encouraging peer-to-peer learning and emphasizing leadership and community service. Each learning community features small-group rooms, study and social spaces, computer workstations, a kitchen area, and staff offices. The Medical Education Research Facility also houses the Performance-

Based Assessment Program, which evaluates students' clinical and communication skills by reviewing simulated physician-patient encounters recorded in mock patient examination suites.

Students acquire clinical skills experience at University of Iowa Health Care, the VA Iowa City Health Care, and in affiliated hospitals and ambulatory care centers throughout Iowa. University of Iowa Hospitals & Clinics serves as a tertiary care center for Iowa and portions of adjoining states. Many patients are referred to University of Iowa Health Care for care and treatment not available in their home communities.

Eckstein Medical Research Building is the home of the Iowa Institute of Human Genetics Genomics Division, Viral Vector Core Facility, Flow Cytometry Facility, and the Biomedical Research Store.

The five basic science departments are housed in the Bowen Science Building and include the departments of Anatomy and Cell Biology, Biochemistry and Molecular Biology, Microbiology and Immunology, Molecular Physiology and Biophysics, and Neuroscience and Pharmacology.

The Medical Education Building houses research and educational space for the Department of Physical Therapy and Rehabilitation Science. It also houses research space for the Department of Psychiatry and is the home of the Office of Consultation and Research in Medical Education (OCRME). OCRME is staffed by education specialists from a range of disciplines who serve the faculty, staff, and administrators in all Carver College of Medicine programs. The office provides educational consultation, initiates and cooperates in educational research endeavors, and conducts faculty development activities.

There are teaching laboratories located in the Medical Education Building, the Bowen Science Building, and the Medical Research Facility.

Other buildings that house a wide range of College of Medicine departments, administration, and research activities are the Carver Biomedical Research Building, Westlawn, Medical Laboratories, the Medical Research Facility, the Medical Research Center, and the Multi-Tenant Facility.

The newest building, completed in 2014, is the Pappajohn Biomedical Discovery Building. The Iowa Neuroscience Institute is located on the first and second floors of the building. The third and fourth floors house the Fraternal Order of Eagles Diabetes Research Center and the Abboud Cardiovascular Research Center, on the fifth floor is the Auditory Research Group, and on the sixth floor is the Lung Biology and Cystic Fibrosis Research Center. The Iowa Institute for Biomedical Imaging is on the lower basement levels housing the 7 Tesla MRI scanner (one of few such devices in the U.S.), 3T along with several smaller devices, and a 3D visualization lab. All researchers in this building are chosen by the Pappajohn Biomedical Institute in which scientists from across the university collaborate to explore high-risk/high-yield scientific questions in the life sciences with the goal of advancing treatments for a wide array of human diseases.

Interdisciplinary Programs and Centers

The college's interdisciplinary programs and centers draw strength from college faculty members and the facilities available to them, without regard to departmental units or to the distinction between graduate and postgraduate training. For more information, contact the vice dean for research.

The following centers are subdivisions of the Carver College of Medicine.

Alzheimer's Disease Research Center

The Alzheimer's Disease Research Center studies Alzheimer's disease and related neurological conditions from the viewpoint of neuroanatomy, neuroimaging, neuropsychology, and neurochemistry. The center's purposes are to improve the diagnosis and treatment of these conditions, to disseminate information on new research to the public, and to contribute to a better understanding of the neural basis of cognition.

Carver Genetic Testing Laboratory

The John and Marcia Carver Nonprofit Genetic Testing Laboratory provides genetic testing for rare eye diseases, especially diseases so rare that commercial tests are unavailable for them. The laboratory's test results provide information to patients and their families while keeping the tests affordable.

Holden Comprehensive Cancer Center

The Holden Comprehensive Cancer Center (HCCC) coordinates the efforts of University of Iowa faculty and staff in research, education, and clinical programs related to all aspects of cancer. The HCCC is recognized by the National Cancer Institute as an NCI-designated cancer center and has comprehensive status, a designation that recognizes the depth and breadth of interdisciplinary cancer research activity taking place at the University of Iowa.

UI Heart and Vascular Center

The UI Heart and Vascular Center coordinates research and training programs related to cardiovascular diseases. It encompasses several programs: Program Project Grant on Integrative Neurobiology of Cardiovascular Function, Program Project Grant on Cerebral Blood Vessels, Program Project Grant on Oxidative Mechanisms in Vascular Disease, Program Project Grant on Genetic and Signaling Mechanisms in the Central Regulation of Blood Pressure, Program Project Grant on Airway Physiology and Pathophysiology in a Porcine CF Model, Program Project Grant on Gene Therapy for Cystic Fibrosis Lung Disease, a Leducq Foundation Consortium grant, and a Cystic Fibrosis Foundation research and development program. It also coordinates several training programs and a program of other interdisciplinary research supported by a number of individual project grants. The center occupies two floors of cardiovascular research laboratories and administrative offices in the Medical Research Center.

Courses

- Carver College of Medicine Courses [p. 1848]
- EMT-Paramedic Program Courses [p. 1851]
- Orthoptics Teaching Program Course [p. 1851]

Most Carver College of Medicine courses are offered by the college's departments and programs. They are listed and described in the corresponding General Catalog sections. The college also offers the following nondepartmental courses.

Carver College of Medicine Courses

MED:0006 Summer Health Professions Education Program 0 s.h.
Summer Health Professions Education Program (SHPEP) for students interested in health professional careers. Requirements: Summer Health Professions Education Program enrollment.

MED:1100 Introduction to Health Care Professions 3 s.h.
Introduction to current U.S. health care system and changes that are likely in the near future; information about distinct health care professions grouped by discipline (e.g., nursing, pharmacy, public health), and less traditional career pathways in health care fields; how health care professionals across disciplines coordinate to deliver better health care; instruction by prominent health care faculty at the University of Iowa; for students considering a career in the health care field.

MED:3740 End-of-Life Care for Adults and Families 3 s.h.
End-of-life issues in care of adults, older adults, and their families. Same as ASP:3740, NURS:3740.

MED:5416 Foundations in Healthcare Ethics 3 s.h.
Major ethical traditions, ideas, and frameworks that have shaped contemporary approaches to healthcare ethics in morally pluralistic Western cultures; four prominent frameworks in healthcare ethics include virtue based, principle based, circumstance based, and consequence based that emphasize four aspects of ethical decision-making—agent, action, context, and outcome.

MED:8001 Medical Elective arr.

MED:8003 Clinical Clerkships arr.

MED:8005 Medical Student Research Fellowships 0 s.h.

MED:8010 Introduction to Medical Education at Iowa 0 s.h.
Introduction to first-year fall courses; advanced concepts in anatomy, biochemistry, cell biology, and clinical reasoning skills; for MD students.

MED:8021 Community Health Outreach I 0-1 s.h.
Presentations and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

MED:8022 Community Health Outreach II 1-2 s.h.
Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

MED:8023 Community Health Outreach III 1-2 s.h.
Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

MED:8028 Introduction to U.S. Health Care System 1 s.h.
Structure, function, and finance of U.S. health care system; access, cost, quality, finance mechanisms, reform process.

MED:8029 Disruptive Forces in Medicine 1 s.h.
Exploration of the pathogenesis of COVID-19 and its impact on medicine at University of Iowa Health Care; students gain perspective and knowledge about the virus, its impact on medical practice, and future consequences; mechanisms of COVID-19 pathogenesis; racial and social inequities highlighted by the pandemic; insight into clinical challenges (i.e., telemedicine); best practices for patient education and clinician safety in different fields. Requirements: MD enrollment.

MED:8031 Reproductive and Gynecological Health Seminar 1 s.h.
Education on reproductive and gynecological health topics, service opportunities, and mentorship. Requirements: MD standing.

MED:8033 Clinical Skills for Responding to Sexual Violence 1 s.h.
Training that focuses specifically on epidemiology, screening, clinical presentation, initial evaluation, and medical management of sexual violence and interpersonal violence victimization; opportunity to apply preclinical and/or concurrent coursework to true-to-reality, clinically relevant, and medically complex health problems with sexual violence as the underlying cause; development of communication and clinical skills necessary to address sexual and interpersonal violence in a clinical setting. Requirements: MD standing or physician assistant standing or enrollment in degree-seeking graduate or health professional program.

MED:8070 The Examined Life: Writing and Medicine 1 s.h.
Literature, essays, poetry; discussion of participants' writing; students prepare portfolios of their own writing.

MED:8071 Career Life Planning 1 s.h.
Students' individual interests, values, and decision-making processes important in selecting a specialty, engaging in the match process, and integrating oneself into the medical profession; personal career development, culture and climate in which physicians work and learn.

MED:8073 Biomedical Innovation 1 s.h.
Introduction to all phases of medical device/technology development; development of knowledge of entire medical innovation process through didactic sessions, faculty, interactions, and interdisciplinary collaboration; interdisciplinary approach; research and development of a novel medical device, therapy, or model of care. Requirements: MD enrollment.

MED:8074 Research Skills Seminar 1 s.h.
Seminar series designed to bridge gap from undergraduate and medical student experiences to research during residency and beyond; topics include identification of projects and mentors, leadership, collaboration, translation, evidence-based medicine, project development, statistical analysis, presentation, publication, and career progression.

MED:8076 Bioethics and Humanities Seminar 1 s.h.
Broad range of topics in bioethics and medical humanities, including philosophical principles, clinical ethics, research ethics, medical professionalism, narrative ethics, and historical and cultural aspects of medicine. Requirements: enrollment in Carver College of Medicine humanities distinction track.

MED:8077 Personal-Professional Compass 1 s.h.
Provides help for medical students to understand, articulate, and integrate personal and professional values and goals while making their way through medical school; promote student growth as humanistic professionals through written reflections on personal experience, readings from medicine and the humanities, and discussions with peers and mentors; preparation to write an authentic and compelling personal statement for residency applications. Requirements: MD enrollment.

MED:8081 Global Health Issues I 1 s.h.
Core issues in the current field of global health, including history of global health, health and development, social determinants of health, measuring health and disease, disparities in the American health care system, poverty and health, gender issues and reproductive health, child health, immigrant and migrant health issues, and introduction of major players in global health. Requirements: MD enrollment.

MED:8082 Global Health Issues II 1 s.h.
Core issues in the current field of global health, including health care as a human right, why the Third World is the Third World, communicable disease issues, outbreaks and pandemics, noncommunicable issues, malnutrition and obesity, cultural context of health care, violence as a health issue, and emergency response and transition to development. Prerequisites: MED:8081. Requirements: MD enrollment.

MED:8083 Global Cross-Cultural Elective arr.
Cross-cultural medical program with focus on health care problems of a domestic or international community; individually arranged.

MED:8084 Global Health Seminar 1 s.h.
Presentations by faculty members, university special guests, and alumni on their current work in global medicine/global health; implementation of global health concepts. Requirements: MD enrollment.

MED:8121 Clinical and Professional Skills I 3 s.h.
Introduction to concepts of clinical reasoning, communication, physical examination, and evidence-based clinical practice; principles of biomedical ethics; early clinical interactions and placement of classroom experiences into context of patient care through the Early Clinical Experiences (ECE) program; interaction with students from other health sciences colleges to explore the interprofessional approach to caring for patients. Requirements: MD enrollment.

MED:8122 Medicine and Society I 3 s.h.
Delivery of individual disease prevention/health promotion services; introduction to social determinants of health; influence and impact of culture and community on health care; community resources; application of health and risk assessment to individual patients and self. Requirements: MD enrollment.

MED:8123 Foundations of Cellular Life 5 s.h.
Genetics, embryology, molecular biology, biochemistry, cell biology and histology; molecular events required for cellular life; how cells grow and interact to form basic tissues of human body; necessary framework to explore six mechanisms of health and disease. Requirements: MD enrollment.

MED:8124 Mechanisms of Health and Disease I 8 s.h.
Normal and healthy processes within and among mechanisms of oxygenation, metabolism, and genetics/development; first in a series on multisystem mechanisms of health and disease. Requirements: MD enrollment.

MED:8131 Clinical and Professional Skills II 4 s.h.
Interpersonal skills, lifelong learning, interviewing skills, physical examination skills, ethical issues in patient care, and basic approach to patients in terms of prevention, treatment, and follow-up care. Second in a sequence during preclinical semesters of medical school and continuing as an integrated strand throughout curriculum. Requirements: MD enrollment.

MED:8132 Medicine and Society II 4 s.h.
Knowledge and skills related to health promotion and disease prevention from a medicine and society perspective, including impact of behavior, environment, culture, and socioeconomics; identification of major public health problems associated with mechanisms of health and disease. Second in a sequence during preclinical semesters of medical school and continuing as an integrated strand throughout curriculum. Requirements: MD enrollment.

MED:8133 Mechanisms of Health and Disease II 7 s.h.
Normal and healthy processes within and among mechanisms of Immunology/Inflammation, locomotion/integument, and neuropsychiatry; second in a series on mechanisms of health and disease. Requirements: MD enrollment.

MED:8134 Mechanisms of Health and Disease III 11 s.h.
Abnormalities or disruptions leading to disease within and among mechanisms of oxygenation, metabolism, and genetics/development; third in a series on multisystem mechanisms of health and disease. Requirements: MD enrollment.

MED:8199 First-Year Special Study arr.
First-year special study. Requirements: MD enrollment.

MED:8221 Clinical and Professional Skills III 4 s.h.
Advanced clinical reasoning skills through focused patient encounters and interactions with special patient populations; emphasis on integration and use of concepts for cost conscious, patient-centered, interdisciplinary care. Requirements: MD enrollment.

MED:8222 Medicine and Society III 4 s.h.
Health services organization and delivery; emphasis on community dimensions of medical practice and patient safety. Requirements: MD enrollment.

MED:8223 Mechanisms of Health and Disease IV 10 s.h.
Abnormalities or disruptions leading to disease within and among mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry; fourth in a series on multisystem mechanisms of health and disease. Requirements: MD enrollment.

MED:8224 Mechanisms of Health and Disease Keystone 7 s.h.
Transition between classroom instruction in mechanisms of health and disease and clinical practice; foundational information from mechanisms of health and disease sequence approached from perspective of what is commonly encountered in clinics; application of information to making diagnostic and management decisions of common important clinical problems. Requirements: MD enrollment.

MED:8299 Second-Year Special Study arr.
Second-year special study. Requirements: MD enrollment.

MED:8320 Transition to Clerkships 1-2 s.h.
Two weeks of skills training prior to start of core clinical clerkships. Requirements: MD or MPA enrollment.

MED:8401 Medicine, Literature, and Writing arr.
Insights, freedom, joy, responsibilities, and challenges of a life in medicine; reading, discussion, individual creative writing.

MED:8403 Teaching Skills for Medical Students 4 s.h.
Practical teaching techniques; opportunity for students to develop teaching skills before they become medical residents.

MED:8404 Advanced Teaching Skills for Medical Students 2 s.h.
Opportunity to expand knowledge and experience in medical education; investigation of medical education in students' specialty of interest through literature research and interaction with faculty; primary focus is to design and successfully complete a faculty approved project. Prerequisites: MED:8403. Requirements: fourth-year MD enrollment.

MED:8405 Leadership for Future Physicians 2 s.h.
Formal training in multiple aspects of leadership; offers future leaders in health science specialties an earlier opportunity to consider leadership abilities and perspectives; for fourth-year medical, physician assistant, nursing, pharmacy, public health, and dental students. Requirements: health science enrollment.

MED:8410 Quality Improvement and Patient Safety 2 s.h.
Students work with faculty and staff involved in quality improvement and patient safety (QI/PS) at University of Iowa Health Care; readings, didactic sessions, and hands-on activities to advance knowledge and practice of QI/PS in health care; activities include review of ongoing QI/PS projects at UI Health Care, application of QI/PS methodologies to project development and analysis, individual and team-based simulations, interdisciplinary collaboration and communication, participating in conferences related to QI/PS, and reflecting on these experiences with peers.

MED:8411 Foundational Science and Drug Therapy 2 s.h.
Advanced medical students partner with advanced pharmacy students and work together to devise evidence-based treatments for patients suffering from common illnesses; foundational science concepts from each student's respective discipline—including mechanisms of health and disease and principles of pharmacokinetics and pharmacodynamics—are used to design and explain proposed treatments; two weeks, case-based.

MED:8412 Improvisation: A Life Skill 4 s.h.
Drawing from interpersonal communication techniques, experiences that help students communicate more empathically with their patients, patients' families, and other health care team members in order to create a safe and trusting exchange.

MED:8413 Oaths and Ethics 4 s.h.
History and purpose of medical oaths; medical oaths compared with professional codes; content of medical oaths in terms of ethical principles and virtues; review of ethical values communicated in ethics-related seminars at University of Iowa Health Care; students write a medical oath that crystallizes their own most important professional commitments.

MED:8414 Health Policy Advocacy Des Moines 4 s.h.
Health policy advocacy experience in Des Moines while Iowa Legislature is in session; students choose an area of interest in health policy advocacy and work with senior legislators, policy advisors, state health department representatives, or advocates of various professional organizations involved in advocacy efforts for health policy; students receive prior approval regarding which health policy issue they want to work on and which individual or professional organization they plan to work with during their onsite experience. Requirements: MD enrollment.

MED:8415 Financial Management for Rising Interns 2 s.h.
Foundational concepts of personal financial management; topics include personal budgeting, educational loan management, investing, risk management and mitigation, medical practice investment, taxation, and additional relevant areas of interest for rising resident physicians. Requirements: MD enrollment.

MED:8416 Foundations in Healthcare Ethics 3 s.h.
Major ethical traditions, ideas, and frameworks that have shaped contemporary approaches to healthcare ethics in morally pluralistic Western cultures; four prominent frameworks in healthcare ethics include virtue based, principle based, circumstance based, and consequence based that emphasize four aspects of ethical decision-making—agent, action, context, and outcome.

MED:8423 Teaching Skills for Teaching Distinction Students 4 s.h.
Practical teaching techniques; opportunity for students to develop teaching skills before they become medical residents. Requirements: MD enrollment. Recommendations: enrollment in the teaching distinction track.

MED:8470 Self-Directed Learning in Advanced Clinical Topics 0 s.h.
Online learning modules on advanced clinical topics; for students in MD program.

MED:8480 Global Health Clerkship arr.
Cross-cultural medical program at an international site; focus on health care problems of a specific community; individual educational objectives set in advance.

MED:8499 Individually Arranged Medicine Elective arr.
Individually arranged elective through the Office of Student Affairs and Curriculum.

MED:9701 Instructional Design and Technology 3 s.h.
Skills and techniques necessary for analysis, design, development, implementation, and evaluation of effective instruction.

MED:9702 Clinical Teaching in Medical Education 3 s.h.
Principles and methods for teaching individuals and small groups in outpatient and inpatient settings. Prerequisites: MED:9701 or PSQF:6205. Recommendations: educational psychology course.

MED:9703 Educational Research and Evaluation 3 s.h.
Research design and program evaluation; approaches relevant to medical education.

MED:9711 Teaching Methods in Medical Education 3 s.h.
Principles and methods for teaching in large and small classrooms. Recommendations: educational psychology course.

MED:9712 Introduction to Educational Measurement in Medical Education 3 s.h.
Classical test theory; overview of medical education assessment methods; practical information for designing and critiquing assessments.

MED:9713 Assessment in Medical Education 3 s.h.
Medical education assessment methods; research methods and literature that support current practices; research project. Prerequisites: MED:9712.

MED:9714 Current Issues in Medical Education 3 s.h.
Selected issues, policies, and research.

MED:9720 Portfolio Project 3 s.h.
Production of individual student portfolios used to integrate knowledge across courses; capstone activity.

MED:9721 Study in Faculty Development 3 s.h.
Academic credit for approved project or other assigned activities for students in the Teaching Scholars program.

MED:9722 Independent Study arr.

MED:9724 Leadership in Medicine 3 s.h.
Introduction to basic leadership and management theories pertaining to a health care setting; focus on the history of leadership development, various components of leadership, and how these components can be used to be a successful leader/administrator. Requirements: Master in Medical Education degree program enrollment.

MED:9725 Simulation in Medical Education 3 s.h.
Appropriate use of various types of simulation in medical education; how to design, deliver, and debrief a simulation activity; literature supporting use of simulation in medical education. Requirements: Master in Medical Education degree program enrollment.

MED:9726 Curriculum Development in Medical Education 3 s.h.
Curriculum development using knowledge and experience gained from MED:9701 and MED:9711; identify an area/topic for creation of curriculum; conduct a needs assessment to identify topics and/or components of curriculum; create a plan with curriculum goals, learning objectives, and methods for evaluation; develop preliminary planning and aspects of implementation and evaluation phases of the model.

MED:9727 Teaching and Assessing Communication Skills in Medical Education 3 s.h.
Explores broad issues related to both teaching and assessing clinician-patient communication skills in medical education; review literature on best practices in clinician-patient communication and on teaching and/or assessing skills among medical learners; explore observation and feedback as key technique in addressing communication skills through observation of peers and learners; video recording of interactions with patients.

MED:9728 Educational Research and Evaluation in Practice 3 s.h.
Mentored research on a topic of interest in health professions education, including obtaining Institutional Review Board (IRB) approval, developing or refining data collection instruments, conducting primary data collection, assisting with statistical or qualitative data analysis and interpretation, and preparing scholarly submissions such as manuscripts and conference abstracts. Recommendations: MED:9703.

Hospital Certificate Programs of Study

The following courses are conducted by University of Iowa Health Care staff.

EMT-Paramedic Program Courses

EMTP:3101 Emergency Medical Technician - Paramedic I 0 s.h.
Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Requirements: certification as an emergency medical technician-basic.

EMTP:3102 Emergency Medical Technician - Paramedic II 0 s.h.
Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Requirements: admission to emergency medical technician paramedic program.

EMTP:3103 Emergency Medical Technician - Paramedic III 0 s.h.
Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Requirements: admission to emergency medical technology paramedic program.

Orthoptics Teaching Program Course

OTP:4902 Orthoptics Program 0 s.h.
Clinical science of binocular vision, ocular motility, and related eye disorders; practical, theoretical training in the Department of Ophthalmology and Visual Sciences two-year program; written, oral and practical national board examinations required at completion. Requirements: bachelor's degree with specific class recommendations.

Anatomy and Cell Biology

Interim Chair

- Robert C. Piper

Professional degree: MCA

Faculty: https://acb.medicine.uiowa.edu/profile/

Website: https://acb.medicine.uiowa.edu/

The Department of Anatomy and Cell Biology performs three major functions. It teaches human anatomy to students preparing for careers in the health care professions; provides advanced courses, teaching experience, and research training to graduate students preparing for careers in academic research and related scientific fields; and conducts original research on the biological basis of cellular functions and human disease processes.

Preclinical Study

The department contributes to the preclinical education of health care professionals by providing major courses in gross anatomy, cell biology, histology, and neuroscience.

Graduate Study

The department offers the cell and developmental biology [p. 1704] subprogram for a PhD in biomedical science in the Biomedical Science Program [p. 1698]. It also participates in the Carver College of Medicine's Medical Scientist Training Program [p. 1901] and the Graduate College's Molecular Medicine [p. 1779], Immunology [p. 1742], Genetics [p. 1733], and Neuroscience [p. 1781] Programs. On occasion, students are directly admitted to a Department of Anatomy and Cell Biology laboratory by arrangement with the laboratory director.

Professional Study

The Department of Anatomy and Cell Biology offers a professional degree, the Master of Clinical Anatomy [p. 1855] (MCA).

Programs

Professional Program of Study

- Master of Clinical Anatomy [p. 1855]

Facilities

The department occupies more than 35,000 square feet in the Bowen Science Building on the University of Iowa health sciences campus. The building houses modern teaching facilities and well-equipped research laboratories. The most modern instrumentation is available, including facilities and equipment for digital microscopic imaging, confocal microscopy, molecular biological techniques, tissue culture, and protein chemistry. Other specialized equipment (e.g., electron microscopes, mass spectrophotometers) is available in other facilities. Through collaborative programs with the Holden Comprehensive Cancer Center and the Abboud Cardiovascular Research Center, faculty and students also have access to outstanding research facilities throughout the university's health sciences campus.

Courses

Anatomy and Cell Biology Courses

ACB:3110 Principles of Human Anatomy 3 s.h.
Gross and microscopic human anatomy; systemic approach to regional anatomy with emphasis on clinical relevance; optional tutorial sessions.

ACB:3122 Independent Study in Anatomy and Cell Biology arr.
Projects arranged with department faculty members.

ACB:5108 Human Anatomy 5 s.h.
Regional dissection, lectures, demonstrations; areas important to physical therapists, particularly the upper and lower extremities. Offered fall semesters. Requirements: physical therapy and rehabilitation science enrollment.

ACB:5203 Gross Human Anatomy for Graduate Students 5-6 s.h.
Regional dissection, lectures, demonstrations, tutorials, discussions, seminars; clinically relevant areas of anatomical radiology, surface anatomy with clinical correlations. Requirements: enrollment in Master of Clinical Anatomy program.

ACB:5206 Graduate Research in Cell and Developmental Biology arr.
Individual laboratory research training in anatomical sciences.

ACB:5210 General Histology Online 4 s.h.
Histology of all tissues of human body starting with basic tissues and working through systems of the body; linked in sequence to ACB:5203 so that students learn about related content at the same time in anatomy and histology; recorded lectures, online modules, and extensive use of Virtual Microscope. Requirements: enrollment in Master of Clinical Anatomy program.

ACB:5218 Microscopy for Biomedical Research arr.
Basic microscopy methods for research including optics, preparation, and analysis of biomedical specimens; light, fluorescence, confocal, transmitting electron, scanning electron, atomic force microscopes, elemental analysis; immunochemistry and stereology techniques; individualized laboratory instruction. Prerequisites: BIOL:2723. Same as BIOL:5218, MICR:5218.

ACB:5224 Graduate Seminar in Cell and Developmental Biology 0-1 s.h.
Current research, literature. Requirements: cell and developmental biology graduate standing.

ACB:6000 Human Anatomy for Advanced Practice 4 s.h.
Integrated study of interrelationships between anatomic structure and physiological function in health and disease at various points in the lifespan; mechanisms governing and supporting cellular, organ, and system function; internal milieu; relationship of study to clinical assessment of functional integrity of individual organ systems utilizing pertinent objective and subjective data; implications of pathophysiology for anesthesia and implications of anesthesia for pathophysiology; foundation for clinical practicums and courses in nurse anesthesia. Requirements: completion of an undergraduate human anatomy and physiology course and admission to anesthesia nursing program. Same as NURS:6000.

ACB:6200 Current Topics in Genetics 1 s.h.
Focus is on a broad topic of central importance to genetics and biology as a whole; invited speakers are distinguished researchers from institutions across the country and within the University of Iowa, their work grounded in genetics, and cover diverse topics using a wide range of genetic model systems and approaches; seminar series. Same as GENE:6200.

ACB:6220 Mechanisms of Cellular Organization 3 s.h.
Current understanding of basic cell biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BMB:3130. Same as MMED:6220, MPB:6220.

ACB:6226 Cell Cycle Control 1 s.h.
Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Same as MMED:6226, MPB:6226.

ACB:6227 Cell Fate Decisions 1 s.h.
Cellular fate decisions including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Same as MMED:6227, MPB:6227.

ACB:6237 Critical Thinking in Biochemistry and Molecular Biology 1 s.h.
How nucleic acids, proteins, lipids, and carbohydrates interact to influence the function of cells and tissues; how molecules drive signaling pathways and cellular processes essential for biological functions; based on research publications.

ACB:6238 Critical Thinking in Genetics 1 s.h.
Current topics in molecular and classical genetics; emphasis on genetic underpinnings of disease; based on primary research publications.

ACB:6239 Critical Thinking in Cell Biology 1 s.h.
Understanding subcellular organization and intercellular communication; emphasis on critical thinking and primary research publications.

ACB:6248 Critical Thinking in Development 1 s.h.
Current topics in molecular basis of vertebrate development; based on primary research publications.

ACB:6249 Critical Thinking in Cellular Physiology 1 s.h.
Control of physiological systems at the cellular level; emphasis on regulation by molecular signaling pathways; literature based.

ACB:6250 Critical Thinking in Scientific Writing and Presentations 1 s.h.
Scientific grant writing, particularly specific aims development, and oral presentations. Requirements: second-year standing in cell and developmental biology graduate program.

ACB:6252 Functional Neuroanatomy arr.
Basic principles of neuroanatomy and neurophysiology; emphasis on human central nervous system; laboratory emphasis on anatomical study of spinal cord and brain. Offered spring semesters. Requirements: physical therapy and rehabilitation science enrollment or graduate standing. Same as PTRS:6253.

ACB:6265 Neuroscience Seminar 0-1 s.h.
Research presentations. Same as BIOL:6265, MPB:6265, NSCI:6265, PSY:6265.

ACB:7000 Clinical Anatomy Graduate Research 1-3 s.h.
Individual laboratory or education-related research training. Requirements: MCA enrollment.

ACB:7001 Teaching and Learning in the Anatomical Sciences 2 s.h.
Strategies involved in anatomical sciences education including interactive lecturing, dissection, peer teaching/learning, plastination, virtual microscopy, simulation, case presentation, and assessment techniques; recorded lectures and online modules. Requirements: enrollment in Master of Clinical Anatomy program.

ACB:7002 Seminar in Anatomical Sciences 1 s.h.
Opportunity to discuss peer-reviewed anatomical, clinical, and education research articles as related to issues of teaching in anatomical sciences; student- and/or faculty-led presentations prompt further discussion of various in-depth studies that focus on bringing current information into the classroom. Requirements: enrollment in Master of Clinical Anatomy program.

ACB:7010 Anatomy Through Imaging 2 s.h.
Exploration of anatomy through basic imaging techniques; online modules and in-class activities; focus on identification of normal structures through application of anatomical concepts. Requirements: enrollment in Master of Clinical Anatomy program.

ACB:7020 Human Embryology Online 2 s.h.
Major events of embryologic development in humans; more of a morphologic focus than a molecular focus, including important molecular concepts of development; backstory of adult human anatomy and how various birth defects occur. Offered spring semesters. Prerequisites: ACB:5203 or ACB:8101 or ACB:5108. Requirements: enrollment in Master of Clinical Anatomy program.

ACB:7227 Anatomic Study for Teaching 2-3 s.h.
Experience completing a detailed dissection of a region of the human body; opportunity to create models depicting anatomical concepts. Requirements: enrollment in Master of Clinical Anatomy program.

ACB:7400 Practicum in College Teaching for Master of Clinical Anatomy 1-4 s.h.
Supervised college teaching experience; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations. Recommendations: enrollment in Master of Clinical Anatomy program.

ACB:7401 Advanced Human Anatomy 4 s.h.
Regional dissection of the body with emphasis on systems; discussion, reading, clinically relevant imaging, embryology. Requirements: enrollment in Master of Clinical Anatomy program.

ACB:7402 Teaching Elective in Regional Anatomy 2 s.h.
Expand knowledge and experience in medical education; investigate educational pedagogy in a laboratory setting coupled with self-directed learning of anatomical content relevant to professional development; prepare, design, and implement four teaching interactions with year one medical, dental, and physician assistant (M1/D1/PA1) students; design a classroom exercise (e.g., interactive lecture, learning activity, computer-based study module) that helps bridge the basic science content with clinical procedure. Requirements: enrollment in Master of Clinical Anatomy program.

ACB:7500 Case-Based Learning 1 2 s.h.
Case-Based Learning (CBL) is an active technique that uses small group discussion, self-directed learning, and presentation skills via healthcare related cases to learn/revisit didactic concepts. By having opportunities to deeply explore anatomical topics, students can begin to move beyond rote memorization of factual material toward application and integration of these facts to a clinical case. Over time and with increasing levels of expertise, students will be able to evaluate novel patient scenarios in the context of the anatomical sciences. CBL I explores cases related to concepts in gross anatomy, histology, and introductory material related to neuroanatomy and embryology. Requirements: enrollment in Master of Clinical Anatomy program.

ACB:7600 Case-Based Learning 2 2 s.h.
Case-based learning is an active and student-centered technique that uses small group discussion, self-directed learning, and presentation skills via healthcare-related cases to learn didactic concepts. By becoming familiar with and having opportunities to explore anatomical topics, students begin to move beyond memorization of factual material toward application and integration of these facts to a clinical case. Over time and with increasing levels of expertise students will be able to evaluate novel patient scenarios in the context of the anatomical sciences; students explore cases related to advanced concepts in gross anatomy, histology, neuroanatomy, embryology, and imaging. Prerequisites: ACB:7500 with a minimum grade of C. Requirements: enrollment in Master of Clinical Anatomy program.

ACB:7701 Advanced Neuroimaging 1 s.h.
In-depth training of human cross-sectional neuroanatomy and diagnostic neuroimaging, building on prior learning in ACB:6252/PTRS:6253; features a combination of didactic instruction, case review, and active interpretation and presentation of structural brain images. Prerequisites: ACB:6252 or PTRS:6253. Requirements: Master of Clinical Anatomy or health profession graduate program enrollment.

ACB:7702 Advanced Osteology 1 s.h.
In-depth exploration of human bony anatomy, including detailed identification techniques and methods for assessing age, sex, and biological affinity. Requirements: Master of Clinical Anatomy or health profession graduate program enrollment.

ACB:7703 Art and Anatomy 1 s.h.
Exploration of the human body through an artistic lens, including how it has been represented over history and how it has shaped art. Prerequisites: ACB:5203 or ACB:8101 or ACB:8120 or ACB:5108 or ACB:6000 or AT:3060 or HHP:4110. Requirements: Master of Clinical Anatomy enrollment.

ACB:7704 Surface Anatomy and Palpation 1 s.h.
Regional exploration of gross anatomy in the living body through study of structures that are visible and palpable through the skin. Prerequisites: ACB:5203 or ACB:8101 or ACB:5108 or NURS:6000. Requirements: Master of Clinical Anatomy enrollment.

ACB:8101 Medical Gross Human Anatomy 5 s.h.
Complete dissection of the body with regional emphasis stressing relationships to the living system; clinically relevant areas of radiologic imaging, surface anatomy, embryology, and clinical correlations; anatomical knowledge through lectures, small group work, independent activities. Offered fall semesters. Requirements: MD or MPA enrollment.

ACB:8120 Human Gross Anatomy for Dental Students 6 s.h.
Exploration of gross anatomy of human body including thorax, abdomen, and upper limb; extensive focus on head, neck, and neuroanatomy; regional and systemic approaches; course sequence and assessment blended with general histology for dental students; cadaveric dissections closely follow lecture sequence; emphasis on correlations to dental practice. Offered spring semesters. Requirements: DDS enrollment.

ACB:8121 General Histology for Dental Students 4 s.h.
Microscopic study of cells, fundamental tissues, and organ systems; emphasis on tooth-related structures. Offered spring semesters. Requirements: DDS enrollment or anatomy and cell biology graduate standing.

ACB:8401 Advanced Human Anatomy arr.
Regional dissection of the body with emphasis on systems relevant to student's specialty interests; discussion, reading, clinically relevant imaging, embryology. Offered spring semesters. Requirements: fourth-year MD enrollment or graduate standing.

ACB:8402 Teaching Elective in Regional Anatomy 2,4 s.h.
Students expand knowledge and experience in medical education; investigation of educational pedagogy in a laboratory setting coupled with self-directed learning of anatomical content relevant to professional development; preparation, design, and implementation of four teaching interactions with year one medical, dental, and physician assistant (M1/D1/PA1) students; designing a classroom exercise (e.g., interactive lecture, learning activity, computer-based study module) that helps bridge the basic science content with clinical procedure. Requirements: MD standing and enrollment in teaching distinction track.

ACB:8405 Advanced Clinical Neuroanatomy 2 s.h.
Focused training in interpretation of cross-sectional neuroanatomy at a level far exceeding what is currently taught in preclinical curriculum; builds on prior training in diagnostic neuroimaging of the human brain during first and second phases of the medical curriculum, producing postgraduate year one (PGY-1) level of readiness interpreting structural brain images; core knowledge and skills of neurological examination applied within context of clinical problems. Requirements: MD enrollment.

ACB:8498 Special Study On Campus arr.
Anatomy research on campus; individually arranged. Requirements: MD enrollment.

Master of Clinical Anatomy, MCA

The Master of Clinical Anatomy (MCA) program provides a comprehensive education focused on developing clinically relevant content knowledge in the anatomical sciences, including anatomy, histology, neuroanatomy, and embryology. The degree is designed to prepare students who wish to advance to professional programs (e.g., MD, DDS, PA, DPT, etc.) or continue into educational professions or other health-related careers. The MCA program is well-suited for students looking to improve their competitive applications or who want to expand their understanding of the anatomical sciences to make a more informed career decision.

Requirements

The professional Master of Clinical Anatomy (MCA) program requires a minimum of 32 s.h. of work that is distributed between required (25 s.h.) and elective (7 s.h.) coursework. Students must maintain a grade-point average of at least 3.00. The program is designed so that students can complete the requirements in a year and a half and provides clinically relevant content coupled with opportunities for experiential learning to develop skills in teaching and educational research. A portion of the curriculum is offered online to complement classroom and laboratory learning.

Students with a degree in a specific biological science (e.g., genetics) for which no formal coursework in basic gross anatomy has been completed may be required to take a prerequisite undergraduate anatomy course.

The Master of Clinical Anatomy requires the following coursework.

Required Courses

Course #	Title	Hours
ACB:5203	Gross Human Anatomy for Graduate Students	5
ACB:5210	General Histology Online	4
ACB:6252	Functional Neuroanatomy	4
ACB:7001	Teaching and Learning in the Anatomical Sciences	2
ACB:7002	Seminar in Anatomical Sciences (taken twice for 1 s.h. each)	2
ACB:7010	Anatomy Through Imaging	2
ACB:7020	Human Embryology Online	2
ACB:7500	Case-Based Learning 1	2
ACB:7600	Case-Based Learning 2	2

Electives

Students select at least 7 s.h. in elective coursework.

Course #	Title	Hours
ACB:5206	Graduate Research in Cell and Developmental Biology (may earn 1-3 s.h. in addition to required course)	1-3
ACB:7020	Human Embryology Online	2
ACB:7400	Practicum in College Teaching for Master of Clinical Anatomy (may earn 1-2 s.h. in addition to required course)	1-2
ACB:7401	Advanced Human Anatomy	4
ACB:7402	Teaching Elective in Regional Anatomy	2
ACB:8401	Advanced Human Anatomy	4
ACB:8402	Teaching Elective in Regional Anatomy	2
GRAD:7385	Teaching and Learning in Higher Education	3
MED:8403	Teaching Skills for Medical Students	4
PSQF:6205	Design of Instruction	3
Other coursework with MCA program approval		1-3

Research/Education Project

Students successfully present their research/education project in November of their second year.

Capstone Assessment

The capstone assessment is the final formal examination that students are required to pass in order to graduate from the MCA program. The exam is held in the fall semester of the second year and is comprised of a series of hands-on/interactive, case-based assessment tasks that take place across multiple stations. Each station intentionally tests the critical thinking, problem-solving, and analytical skills developed by students during the MCA program while allowing them to demonstrate graduate-level expertise in the anatomical sciences by integrating content knowledge from each of the foundational areas studied during the program: gross anatomy, histology, neuroanatomy, embryology, and anatomical imaging.

Admission

Applicants must:

- have a BA or BS degree with a strong science background;
- have a cumulative grade-point average of at least 3.00;
- provide three letters of reference/support;
- submit a personal statement;
- be available for an interview with the MCA faculty, and;
- submit a Test of English as a Foreign Language (TOEFL) score (only the iBT—Internet-Based Test is accepted with a total score of 93 and a speaking score of 26) and the test must have been taken within the last two years, or submit a current acceptable score from the International English Language Testing System (IELTS) if an international applicant and if English is not student's first language.

Optional for applicants:

- an external performance exam from the last five years, such as the Medical College Admission Test (MCAT), Graduate Record Examination (GRE), or the Dental Admission Test (DAT).

Application deadline is May 22.

For detailed application instructions and forms, visit the Department of Anatomy and Cell Biology website.

Career Advancement

Graduates are prepared for a variety of anatomical sciences education settings that include advanced professional study, faculty/lectureship positions in medicine, and allied health care fields at community colleges. Some will want to continue their studies within a health care profession, others may want to prepare for college-level teaching, and others may want to pursue a career in anatomical sciences.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Elective course [c]		1 - 4
	Hours	**2-8**
Second Year		
Fall		
ACB:7010	Anatomy Through Imaging	2
ACB:7600	Case-Based Learning 2	2
Elective course (if needed) [c]		1 - 4
Elective course (if needed) [c]		1 - 4
Exam: Master's Final Exam [d]		
	Hours	**6-12**
	Total Hours	**29-41**

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Taken twice for 1 s.h. each.

c Students select at least 7 s.h. in elective coursework. See the General Catalog for list of approved courses.

d This is the final formal examination that students are required to pass in order to graduate from the MCA program. The exam is held in the fall semester of the second year and is comprised of a series of hands-on/interactive, case-based assessment tasks that take place across multiple stations. Each station intentionally tests the critical thinking, problem-solving, and analytical skills developed by students during the MCA program while allowing them to demonstrate graduate-level expertise in the anatomical sciences by integrating content knowledge from each of the foundational areas studied during the program: gross anatomy, histology, neuroanatomy, embryology, and anatomical imaging.

Anesthesia

Chair

- Cynthia Wong

Website: https://anesthesia.medicine.uiowa.edu/

Since its inception, the Department of Anesthesia at the University of Iowa has educated more than 700 anesthesiologists, and at least 18 former residents have served as heads of departments of anesthesiology at American medical colleges.

The department has been, and continues to be, well-represented on editorial boards of major anesthesia journals. It provides refresher course lectures for the annual meeting of the American Society of Anesthesiologists, has physician-researchers who are recognized by the National Institutes of Health as independently funded principal investigators, provides many board examiners for the oral exams of the American Board of Anesthesiology, and has earned high national ranking because of these and other objective accomplishments.

The department coordinates the Anesthesia Nursing Program, a collaboration between the Carver College of Medicine and the College of Nursing. The program, which is open to nurses who hold a bachelor's degree, prepares nurse anesthetists to serve rural hospitals in Iowa and nationwide. The curriculum provides intensive training in didactic and clinical anesthesia and includes diverse clinical experience as well as classroom instruction, seminars, and clinical case conferences. For more information, see the Doctor of Nursing Practice [p. 2029] (College of Nursing) section of the catalog.

MD Training

The Department of Anesthesia introduces second-year medical students to anesthesia as a specialty; helps third-year students develop concepts and technical skills related to resuscitation, airway management, and care of the unconscious patient; and offers fourth-year students intensive study in the specialty.

The department offers the following courses for medical students. For course descriptions and prerequisite information, see Courses [p. 1857] in this section of the catalog.

Course #	Title	Hours
ANES:8301	Clinical Anesthesia	2
ANES:8401	Clinical Anesthesia Senior	arr.
ANES:8402	Surgical and Neurosciences Intensive Care	arr.
ANES:8403	Chronic Pain Management	2
ANES:8495	Intensive Care Off Campus	arr.
ANES:8497	Research in Anesthesia	arr.
ANES:8498	Anesthesia On Campus	arr.
ANES:8499	Anesthesia Off Campus	arr.

Residency

Postgraduate and Residency Program

The department's postgraduate and residency program involves diverse clinical experiences, seminars and teaching conferences, and ongoing research activities that help postgraduate students and residents develop the knowledge and skills required of an anesthesia specialist.

Courses

Anesthesia Courses

ANES:6004 Scientific Principles for Anesthesia Practice 4 s.h.
Applicable chemical and physical properties of molecules important in anesthesia; technological principles and equipment used to safely deliver those molecules to patients and monitor patients during anesthesia; topics include basic chemical and physical calculations, properties of substances in solution, measurement, behavior of gases and other fluids, effects of heat transfer, and the specific chemistry of inhaled and intravenous anesthetics and adjuvant drugs. Corequisites: NURS:6006. Same as NURS:6004.

ANES:6006 Pharmacology of Anesthesia Practice 3 s.h.
Builds on content from foundational graduate pharmacology course; focus on safe prescribing, administration, and management of medications used to provide general, regional, or local anesthesia and analgesia for all patient populations across lifespan undergoing varied surgical, obstetrical, or other procedures in any health care setting. Prerequisites: PCOL:6204 with a minimum grade of B-. Requirements: enrollment in anesthesia nursing program. Same as NURS:6006.

ANES:6007 Basic Principles of Anesthesia Practice 5 s.h.
Overview and integration of anesthetic agents and techniques; patient assessment, preoperative airway evaluation, anesthetic planning, principles of fluid management, and arterial blood gas interpretation; principles of general and regional anesthesia and techniques as they pertain to each surgical specialty; Occupational, Safety and Health Administration (OSHA), The Joint Commission (TJC), and institutional regulations and requirements pertinent to anesthesia practice. Prerequisites: NURS:6004 with a minimum grade of B- and NURS:6006 with a minimum grade of B-. Same as NURS:6007.

ANES:6010 Advanced Principles of Anesthesia Practice I 4 s.h.
Special needs and intraoperative anesthetic management of complex patient populations and those with advanced pathologic states; anesthetic techniques for specific surgical subspecialties including pediatrics, obstetrics, neurosurgery, cardiac, vascular, thoracic, transplant, trauma, EENT, dental, and aesthetic or reconstructive procedures; pertinent pathophysiology and anesthetic monitoring and management techniques; clinical case conferences provide opportunities to discuss perianesthetic complications and challenges. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as NURS:6010.

ANES:6012 Advanced Principles of Anesthesia Practice II 1 s.h.
Acute and chronic pain treatment modalities for all patients presenting for a variety of medical or surgical procedures across the lifespan. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as NURS:6012.

ANES:6050 Introductory Clinical Anesthesia 2 s.h.
Initial mentorship in clinical anesthesia; development of basic clinical skills needed for a career as nurse anesthetist; application and integration of theoretical knowledge in clinical setting. Prerequisites: NURS:6004 and NURS:6006. Corequisites: NURS:6007. Same as NURS:6050.

ANES:6051 Clinical Anesthesia I 2 s.h.
Mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialities including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6050 or ANES:6050. Corequisites: NURS:6010. Same as NURS:6051.

ANES:6052 Clinical Anesthesia II 2 s.h.
Additional mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialities including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6051 or ANES:6051. Same as NURS:6052.

ANES:6053 Advanced Clinical Anesthesia 2 s.h.
Mentored clinical anesthesia at selected sites; development of advanced clinical skills and critical thinking by providing anesthesia for all surgical specialties and invasive diagnostic procedures in all anesthetizing locations; providing anesthesia for all patients in all settings, including on call emergency surgeries. Prerequisites: NURS:6052. Same as NURS:6053.

ANES:6054 Obstetrical Anesthesia 2 s.h.
Experience delivering analgesia and anesthesia for parturients during labor and delivery process. Prerequisites: NURS:6052. Same as NURS:6054.

ANES:6055 Rural Anesthesia 2 s.h.
Opportunity to develop experience providing anesthesia and associated health care services at UI-affiliated clinical sites in rural settings. Prerequisites: NURS:6052. Same as NURS:6055.

ANES:8007 Medical Student Fellowships in Anesthesia (Externships) 0 s.h.
Anesthesia call team clinical experience. Requirements: MD standing in anesthesia externship.

ANES:8301 Clinical Anesthesia 2 s.h.
Clinical instruction in perioperative care of the surgical patient; preoperative evaluation, consideration of coexisting medical problems, intraoperative care, postoperative management; basic airway management; introduction to clinical management of acute and chronic pain; case conferences, simulator training.

ANES:8401 Clinical Anesthesia Senior arr.
Advanced clinical experience in anesthesia management of surgical patients with coexisting medical problems; clinical experience in various forms of anesthesia; general, regional (spinal, epidural, peripheral nerve block) anesthesia; practical experience in airway management; mask ventilation, endotracheal intubation, LMA placement, other alternative airway techniques; medical management of surgical patient under anesthesia; pharmacology, cardiovascular and pulmonary physiology; case conferences.

ANES:8402 Surgical and Neurosciences Intensive Care arr.
Evaluation and treatment of critically ill neurological and post-surgical patients; evaluation of pulmonary function, ventilator management, monitoring and management of hemodynamics, fluid balance, acid-based problems, acute kidney injury, acute neurological events, and advanced monitoring techniques.

ANES:8403 Chronic Pain Management 2 s.h.
How to interview and assess patients with pain, work with a multidisciplinary team to determine the type of pain and/or diagnosis, and develop a multimodal treatment plan; readings, classroom discussions, and experiential activities.

ANES:8495 Intensive Care Off Campus arr.
Evaluation and treatment of seriously ill patients in an intensive care unit (other than University of Iowa Hospitals and Clinics); artificial ventilation, evaluation of pulmonary function, monitoring of cardiovascular status, fluid balance and acid base problems, advance monitoring techniques. Prerequisites: ANES:8401. Requirements: 4 s.h. of ANES:8401.

ANES:8497 Research in Anesthesia arr.
Medical research, clinical or laboratory projects; individual study.

ANES:8498 Anesthesia On Campus arr.
Well defined research project relating to anesthesia; arranged by student with departmental approval.

ANES:8499 Anesthesia Off Campus arr.
Knowledge development in anesthesia work and monitor use; ability to identify respiratory, cardiovascular, and neurologic effects of anesthetic agents; skill in airway management; basic skills in general, spinal, epidural, and peripheral nerve block anesthesia.

Biochemistry and Molecular Biology

Chair

- Kris A. DeMali

Undergraduate major: biochemistry and molecular biology (BA, BS)

Graduate degrees: MS in biochemistry and molecular biology; PhD in biochemistry and molecular biology

Website: https://bmb.medicine.uiowa.edu

Biochemistry is the study of basic chemical processes that occur in and govern all living systems. Nearly all areas of the life sciences engage in biochemical research.

The Department of Biochemistry and Molecular Biology offers undergraduate and graduate degrees, and determines the curricula for those programs. Undergraduate students majoring in biochemistry and molecular biology receive their degrees (Bachelor of Arts or Bachelor of Science) from the College of Liberal Arts and Sciences. The Master of Science and the Doctor of Philosophy degrees are awarded by the Graduate College.

Faculty and Research

The department's faculty members supervise research in biochemistry and molecular, cellular, developmental, computational, and structural biology. Their research is supported by grants from the National Institutes of Health (NIH), the National Science Foundation (NSF), the American Heart Association, the American Cancer Society, the Muscular Dystrophy Association (MDA), and other sources. To learn more about the department's faculty members and areas of research, visit the Department of Biochemistry and Molecular Biology website.

Programs

Undergraduate Programs of Study

Majors

- Major in Biochemistry and Molecular Biology (Bachelor of Arts) [p. 1862]
- Major in Biochemistry and Molecular Biology (Bachelor of Science) [p. 1865]

Graduate Programs of Study

- Master of Science in Biochemistry and Molecular Biology [p. 1869]
- Doctor of Philosophy in Biochemistry and Molecular Biology [p. 1870]

Facilities

The Department of Biochemistry and Molecular Biology occupies 36,700 square feet on the fourth floor of the Bowen Science Building, 3,500 square feet on the third floor of the Medical Education Research Facility, and 1,450 square feet on the fourth floor of the Pappajohn Biomedical Discovery Building in the Fraternal Order of Eagles Diabetes Research Center on the university's health sciences campus. It has a number of well-equipped research laboratories and other departmental facilities, including the Biochemistry Stores, the Mattill Biochemistry Reading Room, and the Heath Conference Room.

The department makes available a number of shared instruments. Faculty, staff, and students in the department have access to a variety of shared Carver College of Medicine resources, including the Protein and Crystallography Facility, the Iowa Institute of Human Genetics Genomics Division (DNA Facility), the Nuclear Magnetic Resonance Facility, and the Central Microscopy Research Facility.

Courses

Biochemistry and Molecular Biology Courses

BMB:3110 Biochemistry **3 s.h.**
One-semester survey of basic concepts in modern biochemistry and molecular biology; emphasis on application of biochemical concepts to human metabolism; appropriate for students who plan to pursue a career in health care or want an overview of biochemistry as a discipline. Prerequisites: CHEM:2210 with a minimum grade of C- or CHEM:2230 with a minimum grade of C-. Recommendations: college-level biology course.

BMB:3120 Biochemistry and Molecular Biology I **3 s.h.**
First of the two-semester sequence of biochemistry courses, followed by BMB:3130. Physical and chemical foundations of biochemistry, structure of biological molecules, catalysis, transport, biosignaling, glycolysis, and gluconeogenesis. Prerequisites: CHEM:2210 with a minimum grade of C- or CHEM:2230 with a minimum grade of C-. Recommendations: college-level biology course.

BMB:3130 Biochemistry and Molecular Biology II **3 s.h.**
Second of the two-semester comprehensive biochemistry sequence. Glycogen metabolism, citric acid cycle and the molecular principles of photosynthesis and oxidative phosphorylation; metabolism of lipids, amino acids, and nucleic acids; DNA replication, transcription, and protein translation; team-taught, didactic lecture style. Prerequisites: BMB:3120 with a minimum grade of C-.

BMB:3140 Experimental Biochemistry **3 s.h.**
Use of modern instruments and techniques to fractionate, identify, and characterize constituents of biochemical systems. Prerequisites: BMB:3120 with a minimum grade of C-. Requirements: two semesters of general chemistry and one semester of organic chemistry.

BMB:3150 Development of Senior Research Project **2 s.h.**
Preparation for biochemistry majors pursuing a senior research project in BMB:4999; communicating technical information through writing and speaking; presenting scientific journal articles and writing experimental protocols; developing detailed proposal for one-year senior research project. Prerequisites: BMB:3120 or BMB:3140 or BMB:3130. Requirements: biochemistry major, and junior or senior standing.

BMB:3310 Practical Data Science and Bioinformatics 3 s.h.
Understanding how to access large biological data sets and use them to answer biological questions is an important skill for researchers; immersive introduction to computational handling of data; how to access and analyze publicly available data; critically evaluate data quality and analysis in context of measuring gene expression; basic coding in R/RStudio, plotting and data display, fitting and regression, statistical inference, statistical models, downloading and data wrangling; basic introduction to machine learning (clustering); for students with no computational background. Prerequisites: BIOL:1411 with a minimum grade of C- and BIOL:1412 with a minimum grade of C-. Requirements: college algebra. Recommendations: BMB:3110, or BMB:3120 and BMB:3130, or other upper-level life sciences courses. Same as CBIO:3310, MMED:3310.

BMB:3800 Biochemistry Teaching Practicum arr.
Training for qualified junior or senior undergraduates majoring in biochemistry or a related field to contribute to undergraduate courses; interns may hold review sessions, offer regular office hours, draft questions for homework or exams, assist in proctoring exams, assist students in a laboratory setting, and help with course implementation; guidance from the faculty director and instructors in each course; interns are expected to work approximately three hours per week for each semester hour of credit earned. Requirements: completion of a course covering the same or equivalent material with a grade of B or higher, and must arrange for a short interview with the appropriate course director prior to registration.

BMB:3993 Undergraduate Biochemistry Research arr.
Preparation for BMB:4999; directed research with a biochemistry and molecular biology faculty member; experience in an active biochemistry and molecular biology research lab, learning and performing experiments relevant to current projects in that lab, including exposure to scientific literature; arranged in advance by student and biochemistry and molecular biology faculty member.

BMB:4240 Biophysics and Advanced Biochemistry 3 s.h.
Principles and experimental approaches used to study macromolecular structure, stability, and function; ligand binding and macromolecular interactions; enzyme kinetics and mechanisms; X-ray crystallography and NMR spectroscopy; single molecule and other biophysical approaches. Prerequisites: BMB:3120 and BMB:3130 with a minimum grade of C-. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.

BMB:4310 Computational Biochemistry 3 s.h.
Introduction to biomolecular modeling and computer simulation techniques; biomolecular structure and molecular driving forces; principles of structural optimization and conformational sampling; applications to biomolecular phenotypes; scripting and molecular visualization in PyMol, setting up and running molecular dynamics simulations using VMD and NAMD, performing refinement of X-ray diffraction data sets using Phenix, and executing Poisson-Boltzmann electrostatic calculations using APBS. Prerequisites: (MATH:1560 or MATH:1860) and CHEM:1120. Recommendations: BMB:3110 or BMB:3120. Same as BME:4310.

BMB:4999 Advanced Undergraduate Biochemistry Research arr.
Advanced directed research with a biochemistry and molecular biology faculty member; work on an individualized research project relevant to research goals of that lab; learning related scientific literature and presentation of research results; arranged in advance by student and biochemistry and molecular biology faculty member and taken after completion of core biochemistry and molecular biology curriculum. Prerequisites: BMB:3120 with a minimum grade of B- and BMB:3130 with a minimum grade of B- and BMB:3140 with a minimum grade of B- and BMB:3150 with a minimum grade of B- and (BMB:3993 or URES:3994 or HONR:3994).

BMB:5215 Directed Readings for Graduate Students arr.
Directed readings with course content arranged with professor.

BMB:5240 Biophysics and Advanced Biochemistry 3 s.h.
Principles and experimental approaches used to study macromolecular structure, stability, and function; ligand binding and macromolecular interactions; enzyme kinetics and mechanisms; X-ray crystallography and NMR spectroscopy; single molecule and other biophysical approaches. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.

BMB:5244 Molecular Recognition 1 s.h.
Focus on determinants in protein small molecule binding, particularly involving pharmaceutically relevant enzymes and receptors; how modern structure-based drug discovery is greatly aided by ability to employ protein structures in discovery and design of certain classes of drugs; structural approaches for predicting and improving drug affinity and selectivity, which have made a lasting impact across a number of diseases; important contemporary topics include in-depth lectures on fragment based drug discovery (FBDD), use and pitfalls of *in silico* docking and other screening methods, and emergence of covalent drugs. Requirements: introductory course in biochemistry. Same as PHAR:5542.

BMB:5261 Research Techniques 1-6 s.h.
Laboratory rotation for first-year graduate students in biochemistry.

BMB:5282 Seminar 0-2 s.h.
How to evaluate reports of scientific investigations critically; techniques for presenting scientific information.

BMB:5875 Perspectives in Biotechnology 1 s.h.
Topics related to careers in biotechnology with an emphasis on preparing graduate students for careers outside of academia; discussions led by a series of guest speakers from leading biotech industries; understanding the societal impact of basic research; participation in round-table discussions; and presentation of student research findings. Requirements: graduate standing and good academic standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as CBE:5875, CEE:5875, CHEM:5875, MICR:5875, PHAR:5875.

BMB:7251 Introduction to Protein Structures 1 s.h.
Basics of protein structures and amino acids; module covers selected chapters of Lehninger's *Principles of Biochemistry*. Recommendations: first-year graduate standing in biosciences or physical sciences.

BMB:7252 Enzymes, Carbohydrates, Nucleic Acids, Lipids, and Membranes 1 s.h.
Basics of enzyme kinetics and enzyme mechanisms, carbohydrates, nucleic acids, and lipids; module covers selected chapters of Lehninger's *Principles of Biochemistry*. Recommendations: first-year graduate standing in biosciences or physical sciences.

BMB:7253 Introduction to Metabolism 1 s.h.
Introduction to metabolism including bioenergetics of metabolic reactions, biochemical signaling, and the basics of carbohydrate metabolism (glycolysis, gluconeogenesis, the pentose phosphate pathway). Module covers selected chapters of Lehninger's *Principles of Biochemistry*. Recommendations: first-year graduate standing in biosciences or physical sciences.

BMB:7254 Metabolism I 1 s.h.
Glycogen metabolism, the citric acid cycle, and amino acid and fatty acid catabolism. Module covers selected chapters of Lehninger's *Principles of Biochemistry*. Recommendations: first-year graduate standing in biosciences or physical sciences.

BMB:7255 Metabolism II 1 s.h.
Oxidative phosphorylation, photosynthesis, the synthesis of nitrogen-containing compounds (amino acids, nucleotides), and principles of hormonal regulation of metabolic pathways. Module covers selected chapters of *Principles of Biochemistry* by Lehninger. Recommendations: first-year graduate standing in biosciences or physical sciences.

BMB:7256 Molecular Biology 1 s.h.
Chromosomal organization, DNA replication, gene expression, RNA processing, and translation; module covers selected chapters of Lehninger's *Principles of Biochemistry*; for graduate students who wish to refresh or advance their knowledge of the central dogma of molecular biology. Recommendations: first-year graduate standing in biosciences or physical sciences.

BMB:7292 Research Biochemistry arr.
Thesis research.

BMB:8101 Biochemistry for Dental Students 3 s.h.
Biochemical concepts and application to clinical problems. Requirements: CHEM:2210 and DDS enrollment. Recommendations: CHEM:2220.

Biochemistry and Molecular Biology, BA

The curriculum for the BA with a major in biochemistry and molecular biology is identical to the BS degree in the first two years of study to maximize student flexibility.

Requirements

The Bachelor of Arts with a major in biochemistry and molecular biology requires a minimum of 120 s.h., including at least 58 s.h. of work for the major. Students must maintain a grade-point average (GPA) of at least 2.00 in all courses for the major and in all UI courses for the major. They must also complete the College of Liberal Arts and Sciences GE CLAS Core [p. 22].

The biochemistry and molecular biology major for the Bachelor of Arts degree provides a rigorous education in biochemical concepts and practice in the laboratory while giving students flexibility to specialize in additional disciplines and to obtain clinical volunteer experience. The BA program is intended for most students majoring in biochemistry and molecular biology, including those with pre-medicine, pre-pharmacy, pre-dental, and other pre-health professions interests. It also is appropriate for students earning more than one major.

Qualified students may graduate with honors in the biochemistry and molecular biology major; see "Honors in the Major" under Honors [p. 1863] in this section of the catalog.

The BA with a major in biochemistry and molecular biology requires the following coursework.

Requirements	Hours
Common Requirements	52-53
Additional Requirements	6

Common Requirements

Students complete the following during their first three years.

Course #	Title	Hours
All of these:		
BMB:3120 & BMB:3130	Biochemistry and Molecular Biology I and Biochemistry and Molecular Biology II	6
BMB:3140	Experimental Biochemistry	3
BMB:4240	Biophysics and Advanced Biochemistry	3
BIOL:1411 & BIOL:1412	Foundations of Biology and Diversity of Form and Function	8
CHEM:1110 & CHEM:1120	Principles of Chemistry I and Principles of Chemistry II	8
CHEM:2210	Organic Chemistry I	3
or CHEM:2230	Organic Chemistry I for Majors	
CHEM:2220	Organic Chemistry II	3
or CHEM:2240	Organic Chemistry II for Majors	
CHEM:2410	Organic Chemistry Laboratory	3
or CHEM:2420	Organic Chemistry Laboratory for Majors	
MATH:1850	Calculus I	4
or MATH:1550	Engineering Calculus I	
or MATH:1460	Calculus for the Biological Sciences	
PHYS:1511	College Physics I	4
or PHYS:1611	Introductory Physics I	
PHYS:1512	College Physics II	4
or PHYS:1612	Introductory Physics II	
One of these:		
BIOS:4120	Introduction to Biostatistics	3
MATH:1560	Engineering Calculus II	4
MATH:1860	Calculus II	4
STAT:3510	Biostatistics	3

If students take PHYS:1612 Introductory Physics II, they must take the course with the lab component.

Additional Requirements

In addition to the common requirements listed, students must complete the following.

Course #	Title	Hours
Advanced science electives, as listed in the student handbook.		6

Students intending to earn advanced degrees in the biological or health sciences are advised to enroll in BMB:3993 Undergraduate Biochemistry Research or BMB:4999 Advanced Undergraduate Biochemistry Research for independent research. There are no prerequisites for BMB:3993. The course involves experience in an active biochemistry and molecular biology research lab, which must be arranged ahead of time with a supervising faculty member. Students may make arrangements directly with the faculty member, or they may request assistance from an undergraduate advisor. Credit earned in BMB:3993 does not count toward the major, but it does count toward the minimum of 120 s.h. required to graduate.

Before students register for BMB:4999 Advanced Undergraduate Biochemistry Research, they must have completed BMB:3120 Biochemistry and Molecular Biology I, BMB:3130 Biochemistry and Molecular Biology II, BMB:3140 Experimental Biochemistry, and BMB:3150 Development of Senior Research Project, with a grade of B-minus or higher in each course. Students are required to have prior research experience, such as in BMB:3993 Undergraduate Biochemistry Research, URES:3992 Undergraduate Research and Creative Projects, URES:3994 Undergraduate Research and Creative Projects, or HONR:3994 Honors Research Practicum, and permission of the instructor.

Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

Honors

Honors in the Major

Students have the opportunity to graduate with honors in the major. They must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33 and a GPA of at least 3.33 in coursework for the major. They must earn 6 s.h. in BMB:4999 Advanced Undergraduate Biochemistry Research and present their research results as a written manuscript and in an oral presentation given at the Lata Undergraduate Research Symposium.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the biochemistry and molecular biology major.

Career Advancement

Biochemistry and molecular biology graduates with bachelor's degrees often work as research assistants in industry, government, academia, or health services; teach in secondary schools; or go on to advanced study in medicine, dentistry, or other areas. The program offers solid preparation for careers in biochemistry, medicine, biology, chemistry, dentistry, research, or related sciences. About one-third of biochemistry and molecular biology majors go on to study medicine; others enter graduate programs or professional degree programs.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the third semester begins: CHEM:1110 Principles of Chemistry I, CHEM:1120 Principles of Chemistry II, and two semesters of advanced math (e.g., Calculus I, Calculus II, or Biostatistics).

Before the fifth semester begins: BIOL:1411 Foundations of Biology, BIOL:1412 Diversity of Form and Function, CHEM:2210 Organic Chemistry I or CHEM:2230 Organic Chemistry I for Majors, CHEM:2220 Organic Chemistry II or CHEM:2240 Organic Chemistry II for Majors, and CHEM:2410 Organic Chemistry Laboratory or CHEM:2420 Organic Chemistry Laboratory for Majors.

Before the seventh semester begins: PHYS:1611 Introductory Physics I or PHYS:1511 College Physics I, PHYS:1612 Introductory Physics II or PHYS:1512 College Physics II, BMB:3120 Biochemistry and Molecular Biology I, BMB:3130 Biochemistry and Molecular Biology II, BMB:3140 Experimental Biochemistry, a science elective, and at least 90 s.h. earned toward the degree.

Before or during the eighth semester: BMB:4240 Biophysics and Advanced Biochemistry, a science elective, and all remaining coursework in the major, all remaining GE CLAS Core courses, and a minimum of 120 total s.h. to graduate.

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative or Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Society.

b Fulfills a major requirement and may fulfill a GE requirement.

c Enrollment in chemistry courses requires completion of a placement exam.

d Enrollment in math courses requires completion of a placement exam.

e Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.

f Choose from BIOS:4120, MATH:1560, MATH:1860, STAT:3510.

g GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.

h Students who have completed four levels of a single language or two levels of two different languages in high school or college have satisfied the GE CLAS Core World Languages requirement. Students who have completed three levels of a single language may complete a fourth-level course in the same language or may choose an approved World Language and Cultural Exploration course. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course. Contact your academic advisor or CLAS Undergraduate Programs Office with questions concerning the World Languages requirement.

i Students are required to complete 6 s.h. in advanced science electives approved by BMB advisor.

j Students intending to earn advanced degrees in the biological or health sciences are advised to enroll in BMB:3993 or BMB:4999 for independent research. Consult with BMB advisor regarding appropriate coursework and sequence.

k Please see Academic Calendar, on Office of the Registrar website, for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Degree Services.

Biochemistry and Molecular Biology, BS

The curriculum for the BS with a major in biochemistry and molecular biology is identical to the BA degree in the first two years of study to maximize student flexibility.

Requirements

The Bachelor of Science with a major in biochemistry and molecular biology requires a minimum of 120 s.h., including at least 70 s.h. of work for the major. Students must maintain a grade-point average (GPA) of at least 2.00 in all courses for the major and in all UI courses for the major. They must also complete the College of Liberal Arts and Sciences GE CLAS Core [p. 22].

All students majoring in biochemistry and molecular biology are initially placed in the Bachelor of Arts degree program. Students in good academic standing can switch to the Bachelor of Science degree program after completing one semester of organic chemistry (CHEM:2210 Organic Chemistry I or CHEM:2230 Organic Chemistry I for Majors). Students who wish to change their degree program to the Bachelor of Science should contact the College of Liberal Arts and Sciences [clas-undergrad@uiowa.edu].

The biochemistry and molecular biology major for the Bachelor of Science degree is intended primarily for students planning careers in research. The BS program prepares students to pursue graduate degrees, such as an MS, PhD, or a combined MD/PhD, or to work as research technicians. The BS program requires 12 sh. or more in science and laboratory electives than the BA program.

Qualified students may graduate with honors in the biochemistry and molecular biology major; see "Honors in the Major" under Honors [p. 1866] in this section of the catalog.

The BS with a major in biochemistry and molecular biology requires the following coursework.

Requirements	Hours
Common Requirements	52-53
Additional Requirements	18

Common Requirements

Students complete the following during their first three years.

Course #	Title	Hours
All of these:		
BMB:3120 & BMB:3130	Biochemistry and Molecular Biology I and Biochemistry and Molecular Biology II	6
BMB:3140	Experimental Biochemistry	3
BMB:4240	Biophysics and Advanced Biochemistry	3
BIOL:1411 & BIOL:1412	Foundations of Biology and Diversity of Form and Function	8
CHEM:1110 & CHEM:1120	Principles of Chemistry I and Principles of Chemistry II	8
CHEM:2210	Organic Chemistry I	3
or CHEM:2230	Organic Chemistry I for Majors	
CHEM:2220	Organic Chemistry II	3
or CHEM:2240	Organic Chemistry II for Majors	
CHEM:2410	Organic Chemistry Laboratory	3
or CHEM:2420	Organic Chemistry Laboratory for Majors	
MATH:1850	Calculus I	4
or MATH:1550	Engineering Calculus I	
or MATH:1460	Calculus for the Biological Sciences	
PHYS:1511	College Physics I	4
or PHYS:1611	Introductory Physics I	
PHYS:1512	College Physics II	4
or PHYS:1612	Introductory Physics II	
One of these:		
BIOS:4120	Introduction to Biostatistics	3
MATH:1560	Engineering Calculus II	4
MATH:1860	Calculus II	4
STAT:3510	Biostatistics	3

If students take PHYS:1612 Introductory Physics II, they must take the course with the lab component.

Additional Requirements

In addition to the common requirements listed, students must complete the following.

Course #	Title	Hours
One of these:		
CHEM:4430	Principles of Physical Chemistry	3
CHEM:4431	Chemical Thermodynamics	3
CHEM:4432	Quantum Mechanics and Chemical Kinetics	3
One of these options:		
BMB:4999	Advanced Undergraduate Biochemistry Research	6
Advanced laboratory courses		6
And:		
Advanced science electives as listed in the student handbook.		9

Students are encouraged to begin research by taking BMB:3993 Undergraduate Biochemistry Research, which has no prerequisites. The course involves experience in an active biochemistry and molecular biology research lab, which must be arranged ahead of time with a supervising faculty member. Students may make arrangements directly with the faculty member, or they may request assistance from an undergraduate advisor. Credit earned in BMB:3993 does not count toward the major, but it does count toward the minimum of 120 s.h. required to graduate.

Before students register for BMB:4999 Advanced Undergraduate Biochemistry Research, they must have completed BMB:3120 Biochemistry and Molecular Biology I, BMB:3130 Biochemistry and Molecular Biology II, BMB:3140 Experimental Biochemistry, and BMB:3150 Development of Senior Research Project, with a grade of B-minus or higher in each course. Students are required to have prior research experience, such as in BMB:3993 Undergraduate Biochemistry Research, URES:3992 Undergraduate Research and Creative Projects, URES:3994 Undergraduate Research and Creative Projects, or HONR:3994 Honors Research Practicum, and permission of the instructor. Students can only count 6 s.h. in BMB:4999 toward their requirements for the degree.

Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

Combined Programs

BS/PhD

The combined Bachelor of Science/Doctor of Philosophy in the biochemistry and molecular biology program permits students to transition into the PhD program during their senior year and to count 12 s.h. of credit toward both the BS and PhD requirements. The combined program provides a research-intensive experience and shortens the training time for students interested in pursuing independent biochemistry research careers. Students in the program typically receive financial support during the second half of their senior year and throughout their PhD study.

Students must be pursuing a Bachelor of Science with a major in biochemistry and molecular biology, and by the beginning of their senior year they must:

- have 108 s.h. of undergraduate credit;
- have a minimum grade-point average of 3.50;
- have completed four semesters of research experience (summer research counts as one semester); and
- have completed BMB:3120 Biochemistry and Molecular Biology I, BMB:3130 Biochemistry and Molecular Biology II, and BMB:3140 Experimental Biochemistry.

Students interested in the combined program should speak with their academic advisor and the biochemistry and molecular biology honors advisor during their first year or at the beginning of their sophomore year. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, contact the Department of Biochemistry and Molecular Biology.

Honors

Honors in the Major

Students have the opportunity to graduate with honors in the major. They must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33 and a GPA of at least 3.33 in coursework for the major. They must earn 6 s.h. in BMB:4999 Advanced Undergraduate Biochemistry Research and present their research results as a written manuscript and in an oral presentation given at the Lata Undergraduate Research Symposium.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the biochemistry and molecular biology major.

Career Advancement

Biochemistry and molecular biology graduates with bachelor's degrees often work as research assistants in industry, government, academia, or health services; teach in secondary schools; or go on to advanced study in medicine, dentistry, or other areas. The program offers solid preparation for careers in biochemistry, medicine, biology, chemistry, dentistry, research, or related sciences. About one-third of biochemistry and molecular biology majors go on to study medicine; others enter graduate programs or professional degree programs.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the third semester begins: CHEM:1110 Principles of Chemistry I, CHEM:1120 Principles of Chemistry II, and two semesters of advanced math (e.g., Calculus I, Calculus II, or Biostatistics).

Before the fifth semester begins: BIOL:1411 Foundations of Biology, BIOL:1412 Diversity of Form and Function, CHEM:2210 Organic Chemistry I or CHEM:2230 Organic Chemistry I for Majors, CHEM:2220 Organic Chemistry II or CHEM:2240 Organic Chemistry II for Majors, and CHEM:2410 Organic Chemistry Laboratory or CHEM:2420 Organic Chemistry Laboratory for Majors.

Before the seventh semester begins: PHYS:1611 Introductory Physics I or PHYS:1511 College Physics I, PHYS:1612 Introductory Physics II or PHYS:1512 College Physics II, BMB:3150 Development of Senior Research Project, one semester of BMB:3993 Undergraduate Biochemistry Research for students planning to take BMB:4999 Advanced Undergraduate Biochemistry Research, BMB:3120 Biochemistry and Molecular Biology I, BMB:3130 Biochemistry and Molecular Biology II, BMB:3140 Experimental Biochemistry, two science electives, and at least 90 s.h. earned toward the degree.

Before or during the eighth semester: BMB:4240 Biophysics and Advanced Biochemistry or CHEM:4430 Principles of Physical Chemistry or CHEM:4431 Chemical Thermodynamics or CHEM:4432 Quantum Mechanics and Chemical Kinetics, a science elective, and at least 2–3 s.h. (total of 6 s.h.) of BMB:4999 Advanced Undergraduate Biochemistry Research. Enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a minimum of 120 of s.h. to graduate.

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and

should be discussed with an academic advisor. For additional sample plans, see MyUI.

Biochemistry and Molecular Biology, MS

Students admitted to graduate study in biochemistry and molecular biology pursue the Doctor of Philosophy.

Requirements

The Master of Science program in biochemistry and molecular biology requires a minimum of 30 s.h. of graduate credit, thesis research, and a thesis. See the PhD in biochemistry and molecular biology [p. 1870] in this section of the catalog for information about the graduate curriculum.

Admission

The department does not directly admit students to the master's program. Graduate students in biochemistry and molecular biology work toward a Doctor of Philosophy. Students who wish to leave or change PhD programs can instead matriculate with a master's degree if they have met the requirements.

Biochemistry and Molecular Biology, PhD

Learning Outcomes

- Identify significant research problems through critical examination of the scientific literature.
- Develop a research proposal that uses a scientific approach to test hypotheses or accomplish research goals.
- Gain broad expertise in their chosen field and develop critical thinking and quantitative skills to independently design, acquire, and interpret experimental data.
- Effectively communicate research findings to a broad audience in written and oral formats.
- Perform all aspects of research and communication with high ethical standards.
- Preparation for career options in academia, industry, government, or other fields.

Requirements

The Doctor of Philosophy in biochemistry and molecular biology requires a minimum of 72 s.h. of graduate credit (34 s.h. of coursework and 38 s.h. of research). Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree. Qualified students interested in earning the Doctor of Medicine along with the PhD may apply to the Medical Scientist Training Program [p. 1901], which offers a combined MD/PhD program.

Students have the opportunity to tailor their curriculum with courses that enhance their educational goals. They take a combination of graduate-level courses that include a first-year laboratory research rotation course, and seminar courses.

The PhD in biochemistry and molecular biology requires the following coursework.

Core Curriculum

Course #	Title	Hours
BMB:5261	Research Techniques	1-6
BMB:5282	Seminar	0-2
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
Biophysical chemistry coursework		3
Four molecular medicine courses		6-8
Additional courses offered by the Department of Biochemistry and Molecular Biology and other departments, as appropriate for each student		

Typical Curriculum

First Year, Fall

Course #	Title	Hours
BMB:5240	Biophysics and Advanced Biochemistry	3
BMB:5261	Research Techniques	4
BMB:5282	Seminar	1
BMED:5207	Principles of Molecular and Cellular Biology	3

First Year, Spring

Course #	Title	Hours
BMB:5261	Research Techniques	4
BMB:5282	Seminar	1
MMED:6226/ ACB:6226/ MPB:6226	Cell Cycle Control	1
MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions	1
Electives		

Second Year, Fall

PCOL:5204	Basic Biostatistics and Experimental Design	1
PCOL:6225	Growth Factor Receptor Signaling	1

Additional Requirements

Laboratory Rotations

Students rotate through at least three different laboratories during their first academic year; they enroll in BMB:5261 Research Techniques. The laboratory rotations are approximately ten weeks each. At the conclusion of each rotation, a student meets with an advisory committee of three faculty members. A student is required to present the research and training completed during that rotation. The advisory committee writes a short evaluation of the student's performance and assigns a grade for the laboratory work.

The evaluation and grade become part of the student's departmental record.

Teaching

Students participate in the formal teaching programs of the department for at least one semester. First-year students as well as students who are within a year of receiving their PhD degree are usually not asked to teach. Teaching may take a variety of forms, including tutoring, leading discussions and laboratory groups, correcting examinations, preparing teaching materials, and lecturing.

Thesis Research Proposal

During the fall semester of the second year, students in collaboration with their thesis advisor prepare a detailed thesis proposal that describes the proposed research to be conducted for the dissertation as part of BMB:5282 Seminar.

Comprehensive Examination

The comprehensive examination has two parts: a written proposal and an oral defense of the proposal. The examination must be taken before June 30 of the second year.

Written Report of Comprehensive Examination

Students receive their topic by March 1 and their written examination is submitted to their committee by April 22. The written proposal should have a cover page followed by no more than 20 pages. For more information, a detailed guide is located in the Department of Biochemistry and Molecular Biology Graduate Student Manual.

Oral Presentation of Comprehensive Examination

Questions during the oral examination may come from the examination proposal, the PhD thesis proposal, or other general areas of biochemistry and molecular biology. To pass the oral comprehensive examination, students must perform satisfactorily both in defense of the examination proposal and in answering general biochemistry and molecular biology questions that are germane to the proposal or that are important for a full understanding of the proposed experiments and their interpretation.

The Fifth-Semester Seminar

After successful completion of the comprehensive examination, usually the fall semester of the third year (the fifth semester), students update and revise the written PhD thesis proposal prepared during the fall semester of the second year (prior to the comprehensive examination), and present a seminar on the thesis research to the department at one of the weekly biochemistry and molecular biology workshops.

The Fourth-Year Workshop

In the fourth year, during fall or spring, students are asked to present at one of the weekly departmental workshops. The presentation is based on their research.

The Fifth-Year Retreat

The Department of Biochemistry and Molecular Biology holds a yearly retreat where students and faculty present their current research. Students in their fifth year may be asked to give an oral presentation at the retreat.

Final Examination

The five-member PhD thesis committee serves as an advisory body for the preparation of the thesis. This committee meets with students to review the material that is expected to be incorporated into the thesis. Although meetings of the candidates with the committee should be yearly, the candidates, thesis advisor, or the committee can request a meeting at any time. A final draft of the thesis must be given to all members of the committee two weeks before the final examination. The final examination takes the form of a seminar presented to the department. This presentation is announced according to Graduate College policy. Questions, comments, and discussion then follow. After the seminar, candidates meet with their committee for the final thesis defense. The PhD is not awarded until the thesis is signed. In some cases, revisions may be required.

Combined Programs

PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biochemistry and molecular biology in a combined degree program offered by the Department Biochemistry and Molecular Biology and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Admission

Applicants must have a baccalaureate degree from a regionally accredited U.S. college or university, or an equivalent degree from another country as determined by Admissions. Those who apply must have an undergraduate grade-point average of at least 3.00. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Appropriate preparation includes one-year, college-level courses in organic and physical chemistry, biology, physics, and mathematics through calculus. Students are expected to have had one or more introductory courses in biochemistry.

Career Advancement

Graduates have secured a variety of career positions, including in academic institutions and the government, and as scientists, physicians, lecturers, and science educators. Some go on to pursue postdoctoral or additional training, and others land jobs in business and industry.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students are also required to complete at least one semester of formal teaching experience as a TA.

b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

d During the first academic year, students register for BMB:5261 and rotate through three different laboratories (approximately ten weeks each) unless they have satisfied this requirement in part by previous equivalent research experience. At the end of each laboratory rotation, the student will prepare a written report and present an oral summary of the research project to the Rotation Advisory Committee.

e Work with faculty advisor to determine appropriate graduate elective coursework and sequence.

f The comprehensive examination has two parts: a written proposal and an oral defense of the proposal. The examination must be taken before June 30 of the second year.

g Dissertation defense.

Cardiothoracic Surgery

Chair

- Kalpaj Parekh

Program Director

- Shahna Helmick

Undergraduate certificate: perfusion technology

Website: https://perfusion.medicine.uiowa.edu/

The University of Iowa cardiothoracic surgery program is the third oldest program of its kind in the United States. Since its establishment in 1948 as a division within the Department of Surgery, it is now its own department providing operative interventions for patients with diseases of the chest and performing a broad range of the most current and innovative surgical procedures.

Cardiothoracic surgery's facilities are located at University of Iowa Health Care. Each year cardiothoracic surgeons at the hospitals perform more than 500 adult and pediatric heart surgeries, including coronary bypasses, transplants, and placement of mechanical cardiac assist devices; minimally invasive procedures such as mitral valve replacement and epicardial lead placement; coronary artery bypass grafting using robotics; and more than 600 general thoracic surgeries with emphasis on esophageal and lung diseases.

The Perfusion Technology Program is a 20-month program of study. For more information about the Perfusion Technology Program, visit the Perfusion Technology Program website.

Programs

Undergraduate Program of Study

Certificate

- Certificate in Perfusion Technology [p. 1875]

Residency

Iowa's cardiothoracic surgery residency program was established in 1948 and is fully accredited by the Accreditation Council for Graduate Medical Education (ACGME). It is the only cardiothoracic surgery training program in Iowa. One resident is accepted into the two-year fellowship program each year. Cardiothoracic surgery was approved by the ACGME to start a six-year integrated thoracic residency. Medical students begin the program after they graduate from medical school. A new resident enters the program each year.

Facilities

Cardiothoracic surgery has specialty laboratories in gastric motility, analytical chemistry, transplantation, tissue culture, surgical bacteriology, shock, and cardiac bypass. These facilities permit the study of experimental procedures such as heart valve replacement in large animals and heterotopic heart transplantation in mice and rats.

Courses

- Cardiothoracic Surgery Courses [p. 1873]
- Perfusion Technology Courses [p. 1873]

Cardiothoracic Surgery Courses

CTS:8401 Advanced Inpatient Subinternship in Cardiothoracic Surgery **arr.**
Participation in diagnosis, preoperative, operative, and postoperative care of thoracic and cardiac patients; attendance at division conferences; students assume responsibility and act as an intern; may concentrate interest in cardiac surgery or thoracic surgery; diagnosis and management of patients on an inpatient service under close supervision by an upper-level resident/fellow and faculty member.

CTS:8497 Research in Cardiothoracic Surgery **arr.**
Work on a short- or long-term research project arranged with instructor; may involve clinical material or laboratory; students organize and complete a project, finishing with a publishable manuscript.

CTS:8498 Cardiothoracic Surgery On Campus **arr.**
Clinical clerkship individually arranged by student with department approval.

CTS:8499 Cardiothoracic Surgery Off Campus **4 s.h.**
Individually arranged by student with approval of department to rotate outside of University of Iowa Health Care. Requirements: MD enrollment.

Perfusion Technology Courses

PERF:4161 Instrumentation in Perfusion Technology **3 s.h.**
Electrical circuitry, filters, pressure transducers, thermistors, cardiac output computers, fluid dynamics, intra-aortic balloon pumps, blood gas analyzers. Requirements: Perfusion Technology Program enrollment.

PERF:4162 Pathophysiology of Perfusion Technology **5 s.h.**
Hemostasis, acid base physiology, gas transfer, heart anatomy, heart embryology, congenital cardiac defects. Requirements: Perfusion Technology Program enrollment.

PERF:4163 Clinical Experience I **2 s.h.**
Perfusion in operating room: patient workup, observation, and reporting on extracorporeal setup, surgical procedure. Requirements: Perfusion Technology Program enrollment.

PERF:4164 Clinical Experience II **3 s.h.**
Continuation of PERF:4163; setup of extracorporeal circuit; ancillary duties of perfusionist. Requirements: Perfusion Technology Program enrollment.

PERF:4165 Clinical Experience III **12 s.h.**
Continuation of PERF:4164; management of cardiopulmonary bypass system. Requirements: Perfusion Technology Program enrollment.

PERF:4166 Clinical Experience IV **12 s.h.**
Continuation of PERF:4165; emphasis on supply maintenance, perfusion department management. Requirements: Perfusion Technology Program enrollment.

PERF:4167 Perfusion Seminar **1 s.h.**
Ethics in perfusion. Requirements: Perfusion Technology Program enrollment.

PERF:4168 Research in Perfusion 1 s.h.
From topic selection to manuscript. Requirements: Perfusion Technology Program enrollment.

PERF:4169 Clinical Experience V 12 s.h.
Continuation of PERF:4166. Requirements: Perfusion Technology Program enrollment.

PERF:4170 Principle and Practice of Perfusion Technology 6 s.h.
Hypothermia, hemodilution, left heart bypass, dialysis, ultrafiltration, membrane and bubbler oxygenation. Requirements: Perfusion Technology Program enrollment.

PERF:4171 Devices in Perfusion Technology 3 s.h.
Components of extracorporeal circuit; in vitro laboratory evaluation of components. Requirements: Perfusion Technology Program enrollment.

PERF:4172 Pharmacology for Perfusion I 2 s.h.
Basic principles of pharmacotherapeutics and pharmacologic interventions; focus on mechanism of drug actions in patient treatment.

PERF:4199 Pharmacology for Perfusion II 2 s.h.
Principles of pharmacotherapeutics and pharmacologic interventions; focus on mechanism of drug actions in patient treatment. Requirements: Perfusion Education Program enrollment.

Perfusion Technology, Certificate

Requirements

The undergraduate Certificate in Perfusion Technology requires 68 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in work for the certificate. The certificate is a 21-month program that spans over five semesters. The program is accredited by the Commission on Accreditation of Allied Health Education Programs upon the recommendation of the Accreditation Committee for Perfusion Education (AC-PE). Students are awarded the certificate upon successful completion of the program, making them eligible to take the American Board of Cardiovascular Perfusion certification exam.

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Three to five students are accepted annually and begin the program in the fall semester. During the first two semesters of the program, students pursue a core curriculum that provides a solid scientific base while the second year (three semesters) is reserved for the completion of an independent research project, clinical training in the operation of the heart-lung machine, and learning ancillary procedures such as blood salvaging, circulatory support, and artificial hearts.

The Certificate in Perfusion Technology requires the following coursework.

Course #	Title	Hours
PERF:4161	Instrumentation in Perfusion Technology	3
PERF:4162	Pathophysiology of Perfusion Technology	5
PERF:4163	Clinical Experience I	2
PERF:4164	Clinical Experience II	3
PERF:4165	Clinical Experience III	12
PERF:4166	Clinical Experience IV	12
PERF:4169	Clinical Experience V	12
PERF:4167	Perfusion Seminar (taken five times for 1 s.h. each)	5
PERF:4168	Research in Perfusion (taken five times for 1 s.h. each)	5
PERF:4170	Principle and Practice of Perfusion Technology	6
PERF:4171	Devices in Perfusion Technology	3
Total Hours		**68**

Admission

Admission to the program is based on the decision of the Admissions Committee. Decisions are based upon a combination of grade-point average, references, an essay, and interview scores.

For information about application materials, see Admissions on the Perfusion Technology Program website.

Applications must be submitted by Nov. 1.

Prerequisites

The following coursework is required before admission to the certificate program.

Requirements	Hours
Baccalaureate degree	
Anatomy (must include 1 s.h. of lab)	4
Biology (introduction or human biology); must include 1 s.h. of lab	8
Chemistry (must include 2 s.h. of lab)	8
Mathematics (waived if completed college calculus)	4
Physics (must include 1 s.h. of lab)	4
Physiology (must include 1 s.h. of lab)	4
Statistics	3

Dermatology

Chair

- Ali Jabbari

Faculty: https://dermatology.medicine.uiowa.edu/profile/

Website: https://dermatology.medicine.uiowa.edu/

The Department of Dermatology instructs MD students and trains dermatology residents in the care of patients with skin diseases. It also provides researchers with an opportunity to develop their skills in dermatology.

MD Training

The Department of Dermatology rotation is one of seven selective courses offered to third- and fourth-year medical students. Students spend two weeks in the clinic and attend several one-hour lectures. They see a good cross-section of patients, including those receiving primary or tertiary care at University of Iowa Health Care, Iowa River Landing, and VA Iowa City Health Care.

Varied electives are open to fourth-year MD students, including further clinical experience, dermatologic research, and special studies.

Courses

Dermatology Courses

DERM:8301 Clinical Dermatology **2 s.h.**
Basic dermatology; lectures, independent study, clinical experience. Requirements: third-year MD enrollment.

DERM:8401 Dermatology Elective **arr.**
Advanced clinical experience, dermatologic surgery, special assignments. Requirements: fourth-year MD enrollment.

DERM:8497 Research in Dermatology **arr.**
General principles of medical research; clinical or laboratory projects; individual study.

DERM:8498 Dermatology On Campus **arr.**
Clinical clerkship; individually arranged by student with departmental approval.

DERM:8499 Dermatology Off Campus **arr.**
Arranged by student with departmental approval.

Dietary

Executive Dean

- Patricia L. Winokur

Graduate degree: MCN

Website: https://uihealthcare.org/education/university-iowa-master-clinical-nutrition-program

The dietary program is committed to patient care through dietitian service, research, and education.

Graduate-level courses for the Master of Clinical Nutrition degree are administered by the Carver College of Medicine and the College of Public Health.

Programs

Graduate Program of Study

- Master of Clinical Nutrition [p. 1878]

Courses

Dietary Courses

DIET:9101 Advanced Medical Nutrition Therapy I 3 s.h.
Nutritional impact on health and disease as it relates to physiology and biochemistry with an emphasis on medical nutrition therapy and the relationship to various disease states. Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9102 Advanced Medical Nutrition Therapy II 3 s.h.
Continuation of DIET:9101; review of the nutritional impact on health and disease as it relates to physiology and biochemistry with an emphasis on medical nutrition therapy and the relationship to various disease states. Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9200 Nutrition Assessment 3 s.h.
Study of nutrition assessment methods including dietary intake, anthropometric and biochemical measures, as well as nutrition focused physical examination; utilization of nutrition care process including nutrition assessment, diagnosis, interventions, monitoring, and evaluation with individuals, groups, or populations. Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9300 Critical Care and Nutrition Support 3 s.h.
Advanced enteral and parenteral nutrition in an acute care setting; indications, calculations, potential complications, and ethical consideration of nutrition support. Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9400 Pediatric Nutrition 3 s.h.
Examination of physiological, biochemical, and nutritional aspects of disease processes relevant to infants and children up to 18 years of age; emphasis on evidence-based medical nutrition therapy for a variety of disease states. Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9501 Supervised Experiential Learning I 3 s.h.
Supervised hands-on training at the bedside in inpatient units, and in outpatient clinics, communities, and food service management; completion of coursework specific to Registered Dietitian and Nutritionist (RDN) training while learning in field (e.g., ServSafe certification, diet meals, event planning, professional issues and trends). Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9502 Supervised Experiential Learning II 3 s.h.
Supervised hands-on training at the bedside in inpatient units, and in outpatient clinics, communities, and food service management; completion of coursework specific to Registered Dietitian and Nutritionist (RDN) training while learning in field (e.g., legislative and regulatory issues, research seminar, clinical rounds, Commission on Dietetic Registration portfolio development, RDN licensure and credentialing). Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9600 Management in Foods and Nutrition 3 s.h.
Application of the principles of health care management as it pertains to food and nutrition including budgeting, cost control, and financial analysis; clinical coding and billing; quality and performance improvement measures; human resource management; and operating plan development. Requirements: enrollment in Master of Clinical Nutrition program.

Master of Clinical Nutrition, MCN

The Master of Clinical Nutrition program inspires and educates students to be leaders in clinical nutrition through innovative and interprofessional graduate education as a Registered Dietitian Nutritionist (RDN).

The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND).

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Requirements

The graduate Master of Clinical Nutrition (MCN) requires 36 s.h. of credit. Students must maintain a cumulative grade-point average of at least 2.50 in major coursework. The degree requires no thesis.

The MCN is a 20-month program of study. After successful completion of the program, students earn the degree and receive a verification statement that provides eligibility to take the Commission on Dietetic Registration (CDR) entry-level registration examination for dietitians.

The Master of Clinical Nutrition requires the following work.

First Year, Fall

Course #	Title	Hours
DIET:9101	Advanced Medical Nutrition Therapy I	3
DIET:9200	Nutrition Assessment	3
EPID:6360	Nutrition Intervention in Clinical Trials Research	2
EPID:6370	Nutrition Intervention in Research Lab	3

First Year, Spring

Course #	Title	Hours
DIET:9102	Advanced Medical Nutrition Therapy II	3
EPID:6330	Global Nutrition Policy	2
EPID:6350	Nutritional Epidemiology	2
HHP:6310	Advanced Sport and Exercise Nutrition	3

First Year, Summer

Course #	Title	Hours
DIET:9300	Critical Care and Nutrition Support	3

Second Year, Fall

Course #	Title	Hours
DIET:9501	Supervised Experiential Learning I	3
DIET:9600	Management in Foods and Nutrition	3

Second Year, Spring

Course #	Title	Hours
DIET:9400	Pediatric Nutrition	3
DIET:9502	Supervised Experiential Learning II	3

Supervised Experiential Learning

All supervised experiential learning occurs on campus at University of Iowa Health Care, with the exception of community nutrition which occurs in the greater Iowa City community. The rotation schedule is developed according to the following guidelines.

- Clinical dietetics (disordered eating, oncology, cardiology, critical care, pediatrics, and outpatient counseling): 21 weeks.
- Food service management (clinical management, food service, production, business and finance, patient services, and event planning): 8 weeks.
- Community nutrition: 5 weeks.

Admission

Applicants to the MCN program must either have completed a Didactic Program in Dietetics (DPD) or meet the following course requirements:

- have a baccalaureate degree from a regionally accredited institution in the United States;
- have a minimum cumulative grade-point average of at least 3.00 on a 4.00 scale;
- have health care or food service work experience in the field;
- submit three recommendation letters (one from a collegiate academic reference, one from a health care or food service experience supervisor, and one from anyone in an academic or work setting); and
- meet education requirements (see the following section, "Education Requirements").

Applicants whose first language is not English must submit official test scores to verify English proficiency. They can do this by submitting official test scores for the Test of English as a Foreign Language (TOEFL). In order to review an application, official TOEFL scores must be received from the Educational Testing Service. Only the IBT (internet-based test) is accepted. A minimum total score of 93 and a speaking score of 26 are necessary for entry into the program.

Education Requirements

Biological Sciences Coursework

- At least one semester of biology (animal or human) or general zoology.
- An animal, exercise, or human physiology course.
- An animal or human anatomy course.
- At least two additional courses in advanced biology or advanced physiology. Examples of courses include cell biology, genetics, immunology, microbiology, molecular biology, pharmacology, embryology, endocrinology, histology, or neuroscience.

Chemical Sciences Coursework

- At least one semester of inorganic chemistry.
- At least one semester of organic chemistry.
- An introductory or general biochemistry course.

Statistical Sciences Coursework

- A general statistics or biostatistics course.

Professional Coursework

- At least one nutrition course such as introductory nutrition, lifespan nutrition, advanced nutrition, or medical nutrition therapy.

Recency of Education Requirements

Additional courses in dietetics or a related area are required to update a degree that was completed five or more years prior to the current application deadline. The number of required credits is outlined as follows.

- 5–10 years (3 s.h. of medical nutrition therapy or clinical nutrition).
- 10 or more years (3 s.h. of medical nutrition therapy, 3 s.h. of physiology, 3 s.h. of biochemistry).

Application Process

Application should be made through the Master of Clinical Nutrition program. All materials for the application, including three recommendations and college transcripts, must be received by February 1.

If required, official Test of English as a Foreign Language (TOEFL) scores should be sent to the University of Iowa using institution code 6681.

The University of Iowa online application for admission requires a nonrefundable application fee of $60 for U.S. applicants and $100 for international applicants.

Career Development

The Master of Clinical Nutrition program prepares students to be competent as a registered dietitian nutritionist (RDN).

According to the Occupational Outlook Handbook released by the U.S. Department of Labor Statistics, the employment of registered dietitians and nutritionists is projected to grow 7% from 2023 to 2033, faster than the average for all occupations.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Doctor of Medicine

Professional degree: MD

Website: https://medicine.uiowa.edu/md/

The Doctor of Medicine is a professional degree awarded by the Carver College of Medicine. The college is accredited by the Liaison Committee on Medical Education of the American Medical Association and the Association of American Medical Colleges and meets the requirements of all state licensing boards. Its MD diploma admits the holder to all privileges granted to graduates of all medical colleges before such boards.

Programs

Professional Program of Study

Major

- Doctor of Medicine [p. 1881]

Academics Rules and Procedures

Student Promotion

The Carver College of Medicine has established promotion policies and procedures to ensure that each of its graduates has adequate skills, knowledge, judgment, ethical standards, and personal integrity to assume the responsibilities of a medical doctor. The student promotions committee, comprised of seven faculty members and two students, performs these duties with the cooperation, advice, and judgment of course directors, faculty members, students, and administrators.

The committee recommends specific actions to be taken when a student's skills, knowledge, judgment, or ethical behavior is in any way considered consistently marginal or unsatisfactory. Possible recommendations include dismissal of the student from the college, suspension for a specified period of time, requiring the student to repeat all or any part of the curriculum on academic probation, and allowing the student to continue on academic probation with a full or partial course load. The committee's recommendations are forwarded for action to the executive dean of the Carver College of Medicine.

Specific information about student promotion policies and procedures is available from the Office of Student Affairs and Curriculum and is online in the Student Handbook.

Leaves of Absence, Withdrawal, Reinstatement

The Carver College of Medicine has established policies regarding leaves of absence, dropping courses, withdrawal from the college, and reinstatement to the college. Information about each of these policies is available on the college's Office of Student Affairs and Curriculum website and is published annually in the Student Handbook.

Disputes and Complaints

Student complaints concerning the actions of faculty members or departments are pursued first through mechanisms established in the Carver College of Medicine. These procedures allow the greatest flexibility for all concerned in resolving a conflict. They are intended for situations such as grading disputes, alleged academic dishonesty, alleged dishonesty during a clinical rotation, alleged unethical or unprofessional conduct, and perceived discrimination or harassment.

Complaints regarding sexual harassment are handled confidentially in accordance with university policy and procedures; see the university's Sexual Harassment and Sexual Misconduct Policies.

For information about the established informal mechanisms, contact the Office of Student Affairs and Curriculum or see the Student Handbook.

Doctor of Medicine, MD

Website: https://medicine.uiowa.edu/md

Requirements

The Doctor of Medicine is a full-time, four-year program that prepares students to practice primary care medicine and to pursue further education and training in specialized areas of medicine. The program admits 152 new students each year. The MD curriculum is built on a triple-helix model whose three strands extend through all four years of medical school: the clinical and professional skills strand, the mechanisms of health and disease strand, and the medicine and society strand.

Clinical experiences begin during the first few weeks of medical school, and clinical clerkships start after just three semesters of preclinical instruction. By the end of the fifth semester, students have completed all of their core requirements and have the remaining three semesters to tailor their educational experience in preparation for their selected specialty.

Students complete in-depth clinical coursework and serve clinical clerkships primarily at University of Iowa Health Care, the VA Iowa City Health Care, and the Des Moines Area Medical Education Consortium. Students may also have opportunities to gain experience in private medical offices and community hospitals.

Students are required to pay a minimum of eight semesters of full-time tuition. At the conclusion of medical school, students will match into a residency program and complete their training in a chosen specialty.

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Preclinical Curriculum (Phase I)

The first three semesters of the MD program present an integrated core of sciences basic to the study of medicine. They also introduce students to the foundations of clinical practice.

Coursework includes human anatomy, foundations of cellular life, clinical and professional skills (a three-course series), medicine and society (a three-course series), and mechanisms of health and disease (a five-course series).

Some elective courses are available to students during the first and second years, normally for 1 or 2 s.h. of credit. Topics include areas not specifically covered in the regular curriculum and areas related to medical practice and the role of the physician. Courses vary from year to year, but typical subject areas are global health issues, U.S. health care systems, and community health outreach.

The MD program's preclinical curriculum requires the following coursework.

First Semester

Course #	Title	Hours
ACB:8101	Medical Gross Human Anatomy	5
MED:8121	Clinical and Professional Skills I	3
MED:8122	Medicine and Society I	3
MED:8123	Foundations of Cellular Life	5
MED:8124	Mechanisms of Health and Disease I	8

Second Semester

Course #	Title	Hours
MED:8131	Clinical and Professional Skills II	4
MED:8132	Medicine and Society II	4
MED:8133	Mechanisms of Health and Disease II	7
MED:8134	Mechanisms of Health and Disease III	11

Third Semester

Course #	Title	Hours
MED:8221	Clinical and Professional Skills III	4
MED:8222	Medicine and Society III	4
MED:8223	Mechanisms of Health and Disease IV	10
MED:8224	Mechanisms of Health and Disease Keystone	7

Clinical Curriculum (Phase II and III)

Students complete one week of skills training in MED:8320 Transition to Clerkships prior to the start of clinical clerkships. The two-and-one-half-year clinical component of the medical curriculum is comprised of supervised hands-on clinical training at the bedside of inpatient units, in outpatient clinics, and in communities throughout the state. In contrast to the preclinical semesters, the clinical years vary according to a student's individual needs. This period of training begins in January of the second year with 44 weeks of core clerkships (Phase II). Students then enter various pathways where they complete a minimum of 10 weeks of electives, four weeks of critical medicine, one four-week subinternship, and 32 weeks of advanced electives (Phase III).

After completing the core clerkships, students must successfully complete Step 1 of the United States Medical Licensing Examination (USMLE) before they may be promoted to the pathways component of the curriculum. Students take Step 2 of the USMLE during Phase III of the MD program, and must pass Step 2 in order to graduate.

Primary venues for clinical training of medical students include University of Iowa Health Care, the VA Iowa City Health Care, and the Des Moines Area Medical Education Consortium. Students also participate in the family and community medicine clerkship, which is an off-campus rotation. Other courses may be assigned to off-campus sites.

The MD program's clinical curriculum requires the following clerkships and selectives.

Generalist Core (Phase II)

MD students complete the generalist core during the fourth and fifth semesters. It consists of the following 44 weeks of clerkships.

Course #	Title	Hours
Internal Medicine Block		
IM:8310	Internal Medicine (10 weeks)	10
Family Medicine/Pediatrics Block		
FAM:8302	Family and Community Medicine (6 weeks)	6
PEDS:8301	Clinical Pediatrics (6 weeks)	6
Obstetrics and Gynecology/Surgery Block		
OBG:8301	Clinical Obstetrics and Gynecology (6 weeks)	6
SURG:8301	Clinical Surgery (6 weeks)	6
Neurology/Psychiatry/Emergency Medicine Block		
EM:8301	Core Emergency Medicine (2 weeks)	2
NEUR:8301	Clinical Neurology (4 weeks)	4
PSYC:8301	Clinical Psychiatry (4 weeks)	4

Selectives

MD students complete 10 weeks of selectives chosen from the following.

Course #	Title	Hours
ANES:8301	Clinical Anesthesia (2 weeks)	2
DERM:8301	Clinical Dermatology (2 weeks)	2
OPHT:8301	Clinical Ophthalmology (2 weeks)	2
ORTH:8301	Clinical Orthopedics (2 weeks)	2
OTO:8301	Clinical Otolaryngology (2 weeks)	2
RAD:8301	Clinical Radiology (2 weeks)	2
URO:8301	Clinical Urology (2 weeks)	2

Advanced Required Clerkships (Phase III)

MD students complete the following required clerkships and other work during the three advanced clinical-year semesters. In addition to the clerkships, students complete training modules in advanced clinical topics that include MED:8470 Self-Directed Learning in Advanced Clinical Topics.

Requirements	Hours
Critical care medicine (4 weeks)	
Advanced inpatient subinternship (4 weeks)	
Advanced electives (total of 32 weeks)	

Combined Programs

Students must be admitted to both of the individual degree programs before they may be admitted to a combined degree program. Those interested in the combined programs must make arrangements with the appropriate departments and with the Carver College of Medicine associate dean for student affairs and curriculum.

MD/JD

The Carver College of Medicine and the College of Law offer the combined Doctor of Medicine/Juris Doctor program; see Juris Doctor, JD [p. 1833] in the catalog.

MD/MBA

The College of Medicine collaborates with the Tippie College of Business to offer the combined Doctor of Medicine/Master of Business Administration. For more information about the MBA, see the Iowa MBA in the Master of Business Administration, MBA [p. 1274] section of the catalog.

MD/MPH

The College of Medicine collaborates with the College of Public Health to offer the combined Doctor of Medicine/Master of Public Health program; see the Master of Public Health, MPH [p. 2092] in the catalog.

MD/PhD (Medical Scientist Training Program)

The Carver College of Medicine offers a combined MD/PhD program for students who are interested in a career that combines clinical and academic medicine with basic and clinical research; see the Medical Scientist Training Program [p. 1901] in the catalog.

Admission

The Carver College of Medicine participates in the American Medical College Application Service (AMCAS), a nonprofit centralized application processing service for applicants to U.S. medical schools. AMCAS applications are available for completion in May of the year preceding the beginning of the class for which the application is being made. Applicants are strongly encouraged to submit application materials by Oct. 15. The deadline for AMCAS submission is Nov. 1. All application materials are due by Dec. 15.

Secondary applications are extended to applicants meeting minimum qualifications.

Admitted applicants must have an official transcript from each college they have attended sent to University of Iowa Admissions.

Technical Standards for Admission and Retention

The College of Medicine seeks candidates who will be able to best serve the needs of society and strives to graduate skilled and effective physicians. To achieve this goal, the following principles and technical standards will be applied to candidates for admission and continuing students. Review the current Technical Standards on the Carver College of Medicine Admissions website.

Admission Requirements

Applicants for admission to the Carver College of Medicine must have a bachelor's degree, or they must be enrolled in a bachelor's degree program with the expectation of receiving their degree prior to enrollment. Applicants should refer to the Carver College of Medicine Admissions website for current admission requirements.

All students who enter the Carver College of Medicine are required to comply with the pre-entrance and annual health screening program developed by the University of Iowa Student Health in cooperation with University of Iowa Health Care; see Student Requirements and Forms on the Student Health website.

All registered Carver College of Medicine students are required to maintain health insurance (or an equivalent care plan) that satisfies minimum standards of coverage. Insurance coverage must be maintained continuously throughout each year of attendance at the University of Iowa.

Financial Support

The Carver College of Medicine's philosophy is that no student should be denied a medical education due to a lack of financial resources. The college's financial services staff actively seeks sources of aid so that every student interested in medical education will be able to finance that education.

Financial assistance is provided by the Carver College of Medicine primarily on the basis of demonstrated financial need. Although a limited number of collegiate or institutional grants are available for the most economically disadvantaged students, most aid is in the form of loans. Examples of federal loan programs are the Federal Direct Unsubsidized Stafford/ Ford Student Loan, the Federal Direct Grad PLUS loan, and the Primary Care Loan (PCL). Students may also qualify for collegiate loans or private loans to supplement their financial aid package.

In addition, the college supports scholarship and loan programs through permanent endowments and/or contributions from alumni and friends of the Carver College of Medicine. These funds are administered by the college's financial services staff and are awarded as a part of a student's total financial aid package. Funds to support short-term emergency loans are available for students with immediate financial need.

A small number of Dean's Scholarships are awarded by the college's admissions office to highly qualified candidates on the basis of their academic excellence, leadership abilities, and their potential to enrich the college. Dean's Scholarships are included in the recipient's overall financial aid package. About 15% of students enrolled in each class receive some level of Dean’s Scholarship.

The Carver College of Medicine has a fully integrated Financial Literacy Program, CCOMmon Cents, which provides medical students the knowledge, tools, and resources to better understand the financial aid process, to manage their student loans more effectively, to make better informed decisions, and to encourage students to minimize their educational debt whenever possible. This program also strives to help students reach their personal financial goals while pursuing their medical education.

To learn more about financial aid, contact the Carver College of Medicine Financial Services office.

Career Advancement

An interest in science, the healing arts, helping people, and medical research can lead to a great number of satisfying careers. For information about career options in health care, review the Road to Becoming a Physician on the College of Medicine website and the Occupational Outlook Handbook on the United States Department of Labor Bureau of Labor Statistics website.

Emergency Medicine

Chair

- Andrew Nugent

Faculty: https://medicine.uiowa.edu/emergencymedicine/profile

Website: https://medicine.uiowa.edu/emergencymedicine/

The Department of Emergency Medicine prepares new physicians to recognize and treat a variety of urgent and emergent conditions. The program fosters basic science and clinical research relevant to emergency medicine and is dedicated to the education and training of Emergency Medical Services (EMS) personnel through the Emergency Medical Services Learning Resources Center (EMSLRC).

Research

Research in the department is built on four research pillars: clinical, injury prevention, medical education, and health systems. Faculty members, graduate students, emergency medicine residents, medical students, and undergraduates are involved in research in a variety of projects and programs. Specific research interests include:

- rural regionalization and telemedicine;
- quality of care, efficiency, and cost-effectiveness of interhospital transport;
- prevention, diagnosis, and care of traumatic brain injury;
- off-road injury prevention;
- highway motor vehicle crash scene analysis;
- safe driving advocacy;
- simulation in medical education;
- improving access and quality of emergency care;
- decision-making processes for optimal drug selection in the emergency department;
- addiction medicine and harm reduction;
- toxicology;
- global health care access;
- interpersonal violence; and
- early risk stratification and prophylaxis in critical illness.

Patient Care

The Department of Emergency Medicine at University of Iowa Health Care and University of Iowa Stead Family Children's Hospital provides care for the most critically ill adults and children in a patient- and family-centered atmosphere. The department handles emergency cases in Iowa and from surrounding states.

Resources

The Emergency Department, located on the first floor of Roy J. Carver Pavilion, is a Level I Adult and Pediatric Trauma Center. It serves as a referral center for communities across Iowa.

MD Training

The two-week core emergency medicine experience is completed either at University of Iowa Health Care, Iowa City, or UnityPoint Health, Des Moines. This provides an initial opportunity to experience and learn emergency medicine. The advanced emergency medicine four-week clerkship at UI Health Care takes place sometime after the core year and provides an opportunity for a more in-depth emergency medicine experience. In both clerkships, a student acts as an integral member of the care team and experiences a wide variety of patient scenarios and clinical pathology.

Elective rotations for Doctor of Medicine students are available at several other sites throughout Iowa, including St. Luke's Hospital, Cedar Rapids; Great River Health, Burlington; MercyOne Waterloo Medical Center, Waterloo; Broadlawns Medical Center, Des Moines; and Genesis Health Group, Davenport. Students may also arrange an off-service elective independently with established residency programs throughout the United States.

Additionally, the program offers an annual introductory month to emergency medicine; advanced life support; Wilderness Medicine, a rotation that includes scenario and didactic training in wilderness medicinal skills with travel to areas such as Colorado; and a two- or four-week toxicology elective.

Residency

The emergency medicine faculty directs the Emergency Medicine Residency. The residency is a three-year program that prepares residents for careers in diverse areas of emergency medicine, from rural practice to academics. The program emphasizes critical care training and rotations in a wide variety of specialties. Part of the clinical component is spent at St. Luke's Hospital, Cedar Rapids.

Courses

Emergency Medicine Courses

EM:8301 Core Emergency Medicine 2 s.h.
Participation in direct patient care as part of a care team during emergency medicine clinical shifts; opportunity to perform supervised bedside procedures and call consults. Requirements: MD enrollment.

EM:8401 Advanced Life Support 4 s.h.
Experience managing acute threats to life—including trauma, respiratory failure, poisoning, sepsis, stupor/coma, and acute myocardial infarction (MI)—using Advanced Cardiovascular Life Support (ACLS) and Pediatric Advanced Life Support (PALS) courses and clinical manikin work with EMS staff. Requirements: completion of MD core clerkship year.

EM:8402 Emergency Medicine UIHC arr.
Preceptorship with residents and faculty; emphasis on principles of acute medicine; clinical shifts, case conferences, simulations, exams.

EM:8403 Wilderness Medicine 4 s.h.
Didactic and scenario training in physiology, diagnosis, and emergency treatment of heat- and cold-related illnesses, high altitude disorders, wilderness trauma, envenomations, and immersion injuries. Taught in wilderness areas. Requirements: completion of MD third year.

EM:8404 Emergency Medicine: St. Luke's, Cedar Rapids 4 s.h.
Preceptorship with full-time emergency department physicians; clinical shifts, case conferences, simulations, exams.

EM:8405 Rural Emergency Medicine at Burlington, Iowa 4 s.h.
In-depth clinical experience in a busy rural hospital emergency department under supervision of residency-trained emergency physicians; lectures, skill labs, projects.

EM:8406 Emergency Medicine Des Moines 4 s.h.
Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Broadlawns Hospital, Des Moines.

EM:8407 Emergency Medicine Waterloo 4 s.h.
Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Covenant Medical Center, Waterloo.

EM:8409 Introduction to Advanced Life Support 2 s.h.
Intensive program providing basic training in life support skills, experience in procedures common to inpatient hospital environment, and practice with simulated critical care scenarios; lectures, small group discussions, procedure labs, high-fidelity simulations, and self-directed online learning; students become certified in Advanced Cardiac Life Support (ACLS).

EM:8410 Medical Toxicology Sioux City 2,4 s.h.
Clerkship at the Iowa Poison Control Center; intense introduction to breadth and depth of medical toxicology; students work independently and concentrate on many different areas and interests; work with a multidisciplinary team of nurses, pharmacists, and physicians; activities may include reviewing and presenting active poisoned patient cases during daily rounds and opportunities to see toxicology patients at bedside; preparation and short presentation in any area of medical toxicology. Requirements: MD enrollment.

EM:8411 Medical Toxicology UIHC 2,4 s.h.
In-depth introduction to medical toxicology; how to recognize and treat various toxidromes and the most common toxicologic exposures; initial management steps for life-threatening toxicologic exposures; focus on basics of pathophysiology and pharmacology to understand how drugs affect patients, and critical assessment of laboratory and other data obtained on the poisoned patient.

EM:8412 Emergency Medicine Unity Point Des Moines 4 s.h.
Clinical shifts in emergency department and emergency medicine related didactics; advanced cardiovascular life support (ACLS), airway management, calling a consult/ communication, chest pain, toxicology, trauma, sepsis, ultrasound, febrile infant, headache, and psychobehavioral disorders.

EM:8413 Emergency Medicine Genesis Davenport 4 s.h.
Clinical shifts in emergency department and emergency medicine related didactics; advanced cardiovascular life support (ACLS), airway management, calling a consult/ communication, chest pain, toxicology, trauma, sepsis, ultrasound, febrile infant, headache, and psychobehavioral disorders.

EM:8497 Research in Emergency Medicine arr.
Medical research, clinical or laboratory projects; individual study.

EM:8498 Emergency Medicine On Campus arr.
Advanced knowledge, skills, and tools applied under supervision in a clinical setting.

EM:8499 Emergency Medicine Off Campus arr.
Preceptorship with residents and faculty; emphasis on principles of acute medicine; Liaison Committee on Medical Education (LCME) accredited off-campus site. Requirements: completion of MD third year and approval from UIHC Emergency Medicine clerkship director.

Family and Community Medicine

Chair

- Jeffrey D. Quinlan

Faculty: https://familymedicine.medicine.uiowa.edu/people

Website: https://familymedicine.medicine.uiowa.edu/

The Department of Family and Community Medicine is nationally recognized for excellence in patient care, teaching, and research. The department is dedicated to providing primary care for the citizens of Iowa, educating medical students, training resident physicians, providing continuing education, and creating new knowledge to improve primary care and health care delivery systems.

MD Training

The Department of Family and Community Medicine ensures that all graduates from the University of Iowa Carver College of Medicine students receive a well-rounded education to help them succeed in whatever specialty they may choose. All CCOM medical students complete a required clerkship in Family and Community Medicine during their core year. The department also offers a multitude of advanced electives for students interested in primary care as well as select opportunities for visiting medical students. Advanced elective rotations provide students with opportunities to engage with diverse Iowa communities through work in affiliated hospitals, connected facilities, and clerkships with selected family physicians across the state, as well as within the University of Iowa Health Care family medicine department and clinics. Students also have the opportunity for independent study during their advanced clerkships.

Residency

Family and Community Medicine Residency

The Department of Family and Community Medicine directs a three-year residency program whose graduates are eligible for certification by the American Board of Family Medicine. The residency program trains physicians to provide continuous and comprehensive medical care to patients and their families. Residents are educated in all areas of family and community medicine—adult medicine, maternal and child health, behavioral science, surgical specialties, and community medicine. Training emphasizes the value of wellness and preventive medicine as well as curative medicine.

The program is organized as a progressive educational experience. It consists of formal teaching and clinical experiences on assigned rotations, structured conferences, and patient care in the Family Medicine Clinic. As residents develop clinical skills, medical judgment, and competence, their patient responsibilities increase. Some patients at the Family Medicine Clinic are assigned to residents, who provide medical care under faculty supervision. Residents are responsible for their patients for the duration of the residency program.

Residents also learn the principles of practice management, including organizational and administrative decision-making, patient record and bookkeeping procedures, and chart auditing methodologies.

Residents are expected to take responsibility for their learning environment, to avail themselves of the department's diverse resources, and to collaborate with the faculty in order to have the best possible learning experience.

Family and Community Medicine–Psychiatry Residency

The Department of Family and Community Medicine and the Department of Psychiatry cosponsor the combined Family and Community Medicine–Psychiatry Residency program. The program's residents acquire broad-based training in both disciplines, including focused training in geriatrics and geriatric psychiatry, substance and alcohol abuse, diagnosis and treatment of depression, delirium, eating disorders, panic disorders, and neurotic and somatizing behavior. Graduates are eligible for certification by the American Board of Family Medicine and the American Board of Psychiatry and Neurology.

Facilities

The Department of Family and Community Medicine is located on the University of Iowa health sciences campus. Faculty offices are close to the Family Medicine Clinic, where patients are seen by appointment. The department also has community-based clinics in northeastern Iowa City, Coralville, Cedar Rapids, Muscatine, North Liberty, Riverside, and additional communities in the area.

Courses

Family and Community Medicine Courses

FAM:8005 Medical Education Community Orientation **0 s.h.**
Experience in a local health care delivery system away from the university setting, between first and second year of MD program.

FAM:8301 Preceptorship in Family Medicine **arr.**
One-on-one experience with a practicing physician; exposure to illnesses, conditions often seen in primary care; realistic background for evaluation of family medicine as a career alternative.

FAM:8302 Family and Community Medicine **6 s.h.**
One-on-one experience with a practicing physician; exposure to illnesses and conditions often seen in primary care; realistic background for evaluation of family medicine as a career alternative; clinical activities, work with community agencies and resources; didactic and conferences.

FAM:8401 Advanced Inpatient Subinternship in Family Medicine, University of Iowa **4 s.h.**
Inpatient aspects of family medicine's key components; experience on the family medicine inpatient service.

FAM:8402 University of Iowa Family Medicine Clerkship 2,4 s.h.
Work with family practice residents and staff in day-to-day delivery of primary medical care at Family Practice Center; experience in the Family Stress Clinic observing family-centered counseling; nursing home visits, work with departmental social worker and sports medicine specialist.

FAM:8403 Advanced Preceptorship in Family Medicine 2,4 s.h.
Experience in community practice of family medicine.

FAM:8405 Geriatrics Elective 2,4 s.h.
Experience in monitoring and evaluating health and functional status of patients age 65 and older in the UI Geriatric Assessment Clinic and community settings.

FAM:8406 Advanced Inpatient Subinternship in Family Medicine, Cedar Rapids 4 s.h.
Experience as a junior resident in all areas of inpatient family medicine, including maternity care, child and adolescent health, adult medicine.

FAM:8407 Clerkship in Family Medicine, Cedar Rapids 4 s.h.
Experience as a junior resident in all areas of family medicine, including maternity care, child and adolescent health, adult medicine.

FAM:8408 Family Medicine Clerkship, Broadlawns Hospital, Des Moines Family Health Center 4 s.h.
Clinical experience in inpatient and outpatient care.

FAM:8409 Advanced Inpatient Subinternship in Family Medicine, Iowa Lutheran 4 s.h.
Patient-oriented interactive experience in an inpatient family practice environment. Requirements: fourth-year MD enrollment.

FAM:8410 Family Medicine, Iowa Lutheran 4 s.h.
Requirements: fourth-year MD enrollment.

FAM:8411 Family Medicine Clerkship, Davenport 4 s.h.
Assignment to problems commonly seen in family practice office; supervision by residents and faculty for history and physical evaluation and diagnostic workups and treatment of each specific problem; exposure to acutely ill patients in services of medicine, surgery, obstetrics, pediatrics.

FAM:8412 Advanced Inpatient Subinternship in Family Medicine, Davenport 4 s.h.
Experience in inpatient family medicine; assessing and managing hospitalized patients, evaluating and treating patients in the emergency room, participating in call coverage with family medicine residents.

FAM:8413 Family Medicine Geriatrics, Davenport 4 s.h.
Geriatric, palliative, and end-of-life care issues; assessment of competency in evaluation and management of patients; interdisciplinary nature of geriatric and palliative care.

FAM:8415 Advanced Inpatient Subinternship in Family Medicine, Sioux City 4 s.h.
Experience as a junior resident in all areas of family medicine. Requirements: fourth-year MD enrollment.

FAM:8416 Family Medicine Clerkship, Sioux City 2,4 s.h.
Methods common in family practice medicine; participation in care of patients seen by family practice physicians and residents.

FAM:8417 Advanced Inpatient Subinternship in Family Medicine, Waterloo 4 s.h.
Experience working as a member of family practice inpatient team at Allen Memorial Hospital and Covenant Medical Center, following patients from admission through discharge.

FAM:8418 Family Medicine Clerkship, Waterloo 4 s.h.
Rotation at the Northeast Iowa Family Practice Center; work with patients from outpatient care through hospitalization; basic concepts of family practice, team concept in medical care.

FAM:8419 River Crossing Family Medicine Clerkship 2,4 s.h.
Experience providing patient care in a rural setting; continuity of care for patients of all ages. Requirements: fourth-year MD enrollment.

FAM:8420 Family Medicine, Mason City 2,4 s.h.
Work with family physicians on staff at Mercy or other affiliated community hospitals; management of all patients admitted by the family physicians, participation in care rendered by consultants; primary care experience in family practice office.

FAM:8421 Primary Care Sports Medicine 4 s.h.
Comprehensive, diverse, and educational experience in the field of sports medicine; clinical competence to diagnose and manage medical illnesses and injuries related to sports and exercise in varied patients, recreational and organized athletes, and teams. Requirements: MD enrollment.

FAM:8422 Family Medicine/Psychiatry Elective 2,4 s.h.
Integration of mental and physical health care across outpatient family medicine and outpatient psychiatry arenas. Requirements: MD enrollment.

FAM:8423 Family Medicine, Ames Student Health 4 s.h.
Primary care of late adolescent and young adult patients in a student health center setting; students work with family medicine and mental health providers to address health care needs of this population.

FAM:8424 Family Caregiving Transitions arr.
Students enhance clinical learning from caregiving experiences and increase empathy and patient communication skills; students also enhance personal understanding of, and growth through, caregiving responsibilities in periods of family health transitions.

FAM:8425 Advanced Inpatient Subinternship in Rural Family Medicine, Algona 4 s.h.
Rural hospital-based subinternship; students provide family medicine service alongside board-certified family physician faculty, performing all admissions on weekdays, rounding on hospitalized patients each day, and call responsibilities including deliveries and ER coverage.

FAM:8426 Disease Registry Management 4 s.h.
Use of electronic medical record-based disease registries to investigate care, identify areas for improvement, and optimize management of chronic disease at individual and/or population level.

FAM:8427 Maternity Care 4 s.h.
Experience in triaging of pregnant patients; students provide usual intrapartum and postpartum care, manage common intrapartum and postpartum complications, and provide care to newborn infants, healthy and ill. Requirements: MD enrollment.

FAM:8428 Caring for the Underserved 2 s.h.
Caring for a variety of medically underserved patient populations with cultural competency and compassion; participation in a variety of experiences with clinical and ancillary/allied services, and community agencies that specialize in providing services to these populations. Requirements: MD enrollment.

FAM:8429 Advanced Inpatient Subinternship in Family Medicine, Broadlawns 4 s.h.
Provides students with advanced training in the knowledge and skills that are foundational to the field of family medicine; through Broadlawns Medical Center in Des Moines. Requirements: MD enrollment.

FAM:8450 Continuity of Care - Family Medicine 4 s.h.
Longitudinal continuity of care experience for fourth-year MD students in an outpatient family medicine setting.

FAM:8496 Independent Studies arr.
Work with departmental researcher on investigation in family medicine, community medicine, health care delivery, health maintenance, and other areas.

FAM:8497 Research in Family Medicine arr.
Medical research, clinical or laboratory projects; individual study.

FAM:8498 Family Medicine On Campus arr.
Clinical clerkship; individually arranged by student with departmental approval.

FAM:8499 Family Medicine Off Campus arr.
Clerkships; may include community hospitals.

Free Radical and Radiation Biology

Director

- Andrean Burnett (Radiation Oncology)

Faculty: https://frrbp.medicine.uiowa.edu/people

Website: https://frrbp.medicine.uiowa.edu/

The Free Radical and Radiation Biology Program provides in-depth training and research experience in the physical, chemical, and biological effects of radiation. It also focuses on the metabolic production of free radicals and their role in biology and medicine.

Free radicals are of interest to researchers and clinicians due to their role in a variety of diseases and pathological states, including degenerative diseases of aging and cancer. Manipulation of free radical reactions and redox biology holds great promise for the future development of new therapies for a variety of human diseases. The Free Radical and Radiation Biology Program stresses the importance of these areas of research to basic science, translational research, and public health.

Undergraduate Education

Three courses offered by the Free Radical and Radiation Biology Program are open to University of Iowa undergraduate students: FRRB:3130 Introduction to Radiation Safety and Radiobiology; FRRB:4000 Special Topics: Advanced Undergraduates; and with instructor approval, FRRB:5000 Radiation Biology. Students looking for an overview of the biological effects of radiation, including the role of free radicals, will find FRRB:5000 especially appropriate.

Graduate Education

See Carver College of Medicine [p. 1843] and Graduate [p. 1682] College in the catalog for general information about study in medicine and graduate study at the university.

Postgraduate Training

Postdoctoral training is available by arrangement with the program's director and individual faculty members. Contact the Free Radical and Radiation Biology Program.

Facilities

The Free Radical and Radiation Biology Program is the home of the Radiation and Free Radical Research Core Lab (RFRRC). The lab operates radiation sources including an Xstrahl Small Animal Radiation Research Platform (SARRP) and a 5,000-Curie Cs-137 irradiator (Ionizing Radiation Services). Students and staff have access to additional core lab support through RFRRC, with services and expertise related to analytical chemistry (Electron Paramagnetic Resonance Services) and redox biology, biochemistry (Antioxidant Enzyme Services), and linear accelerators in the Department of Radiation Oncology.

The program has a number of radiation detectors and counters, including liquid scintillation counters. It also has ultraviolet/visible spectrophotometers; various types of equipment for densitometry, chromatography, and electrophoresis; modern tissue culture facilities; seahorse metabolic profiling instruments; molecular biology equipment, including thermal cyclers; an automatic cell counter and particle sizer; tissue culture facilities; Typhoon phosphorimager; high performance liquid chromatography (HPLC); electron spin resonance spectrometers; and nitric oxide analyzers. Visit Research Core on the program's website to learn more.

Courses

Free Radical and Radiation Biology Courses

FRRB:3110 Medical Physics I **1-3 s.h.**
Introduction to radiation used in clinical setting; fundamental physical units, measurements, principles, atomic structure and types of radiation; X-ray generating equipment, X-ray production, and its interaction with matter. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program, and maxillofacial or radiation oncology resident. Same as RSTH:3110.

FRRB:3130 Introduction to Radiation Safety and Radiobiology **1 s.h.**
Instruction on safe operation of radiation producing equipment and handling of radioactive materials; origin and/or derivation of certain formulae and techniques useful in radiation protection programs; regulatory agencies, regulations, and regulatory guides pertinent to student's field; emphasis on applied aspects of radiation protection; characteristics and biological effects of ionizing radiations, properties and uses of radioisotopes, medical applications, and biological basis for protection procedures. Requirements: enrollment in radiation sciences or nuclear medicine technology program. Same as RSP:3130.

FRRB:3215 Medical Physics II **0-3 s.h.**
Treatment units used in external radiation therapy; beam calculations, isodose distributions, brachytherapy, quality assurance and quality management, protection and safety. Prerequisites: RSTH:3110. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program. Same as RSTH:3215.

FRRB:4000 Special Topics: Advanced Undergraduates **arr.**
Readings and/or laboratory experience. Offered fall semesters.

FRRB:5000 Radiation Biology **4 s.h.**
Comprehensive study of molecular and biological effects of ionizing radiations with emphasis on biomedical therapeutic applications; mammalian radiobiology, contribution of metabolism to radiation effects, and therapeutic applications of radiation in cancer therapy. Offered fall semesters. Prerequisites: CHEM:2210 and BMB:3120. Requirements: college-level physics.

FRRB:5001 Research: Special Topics **arr.**

FRRB:6000 Seminar: Free Radical and Radiation Biology **1 s.h.**
Seminar presentations of cutting edge science in the field of free radical and radiation biology, given by experts in the field as well as trainees.

FRRB:6004 Research: Free Radical and Radiation Biology **arr.**
Representation of intensive laboratory-based studies in the field of free radical and radiation biology, determined by mutual agreement between faculty members sponsoring the research and consultation with graduate student.

FRRB:6006 Topics in Free Radical Biology and Medicine **1 s.h.**
Discussion and presentation of new literature reports in the field of free radical biology and medicine in journal club format.

FRRB:6008 Topics in Radiation and Cancer Biology **1 s.h.**
Emerging concepts in the biological effects of radiation and cancer biology; current topics in journal club format.

FRRB:7000 Redox Biology and Medicine **4 s.h.**
Chemistry of free radicals, related oxidants, and antioxidants; antioxidant (redox) enzymes—their structure, biochemical function, regulation, and function in redox biology; targets of oxidants—lipids, proteins, DNA; redox biology of health (infants to healthy aging) and disease (cancer, cardiovascular disease, diabetes, neurodegenerative diseases). Offered spring semesters of even years. Prerequisites: BMB:3120 or CHEM:2210.

FRRB:7001 Molecular and Cellular Biology of Cancer **3 s.h.**
Fundamental aspects of oncology at cellular and molecular levels; mechanisms of cancer initiation and progression, oncogene action, DNA damage and repair, carcinogenesis by radiation, chemicals, viruses; tumor immunology, anticancer therapies. Offered spring semesters. Prerequisites: BMED:5207. Requirements: strong basic science background. Same as CBIO:7001, PATH:7001.

Internal Medicine

Chair

- Upinder Singh

Faculty: https://medicine.uiowa.edu/internalmedicine/people

Website: https://medicine.uiowa.edu/internalmedicine/

Internal medicine is concerned with the diagnosis, prevention, and treatment of diseases of adults. The Department of Internal Medicine's educational, patient care, and research activities cover all facets of the discipline, including general internal medicine and primary care as well as the specialized areas of allergy and immunology, cardiology, clinical pharmacology, endocrinology and metabolism, gastroenterology and hepatology, hematology, oncology, blood and marrow transplant, infectious diseases, nephrology, pulmonary, critical care, occupational medicine, and rheumatology.

The department is committed to the complete spectrum of medical education, from didactic and clinical education of MD students to resident and fellowship training.

MD Training

Department of Internal Medicine faculty members bear a major share of teaching medical and physician assistant students in the preclinical curriculum. During the first year, faculty members participate in MED:8121 Clinical and Professional Skills I and MED:8131 Clinical and Professional Skills II, as well as MED:8122 Medicine and Society I and MED:8132 Medicine and Society II. They also participate in teaching MED:8124 Mechanisms of Health and Disease I, MED:8133 Mechanisms of Health and Disease II, and MED:8134 Mechanisms of Health and Disease III. Departmental faculty members are key contributors in the third semester, instructing MED:8221 Clinical and Professional Skills III, MED:8222 Medicine and Society III, MED:8223 Mechanisms of Health and Disease IV, and keystone courses.

During the core clinical clerkship year, the department's faculty members instruct students for 10 weeks in IM:8310 Internal Medicine at University of Iowa Health Care, Iowa River Landing, and the VA Iowa City Health Care, or in hospitals of the Des Moines Area Medical Education Consortium. Students actively participate as members of an inpatient ward team and/or specialty consult services, and in the evaluation and management of patients at outpatient internal medicine clinics in IM:8310.

During their advanced clerkship students may select a clinical experience to fit their own career goals from courses offered in general medicine, subspecialties, intensive care, and a subinternship program IM:8401 Advanced Inpatient Subinternship in Internal Medicine.

Residency

The department offers a three-year residency training program in internal medicine. In addition, most of the department's specialty divisions offer two- and three-year clinical and research fellowships, in which fellows develop special knowledge and skills relevant to their specialties. Fellows who hold doctoral degrees may be accepted to programs whose major focus is laboratory research.

Facilities

Teaching in the Department of Internal Medicine takes place in the Iowa City area at University of Iowa Health Care, Iowa River Landing, and the VA Iowa City Health Care, and in Des Moines at the VA Central Iowa Health Care and Iowa Methodist Medical Center.

Courses

Internal Medicine Courses

IM:8301 Inpatient Internal Medicine arr.
Development of knowledge, diagnostic and management skills vital to care of hospitalized patients; clinical responsibilities, educational conferences, independent study.

IM:8302 Outpatient Internal Medicine 3-4 s.h.
Development of knowledge, diagnostic and management skills in the outpatient clinical setting; clinical activities, discussion of problems, independent study.

IM:8310 Internal Medicine 10 s.h.
Development of knowledge, diagnostic, and management skills of vital signs in outpatient and inpatient clinical settings; clinical responsibilities, discussion of problems, educational conferences, independent study. Requirements: MD enrollment.

IM:8401 Advanced Inpatient Subinternship in Internal Medicine 4 s.h.
Student responsibility for evaluating, treating, and following patients admitted to inpatient general medicine services. Requirements: fourth-year MD enrollment.

IM:8410 Clinical Allergy Immunology arr.
Pathogenesis, diagnosis, and management of asthma and allergic and immunologic diseases; conducting and interpreting relevant specialized clinical and laboratory tests; emphasis on outpatients; formal and informal teaching sessions.

IM:8412 Clinical Cardiology arr.
Development of breadth and depth in diagnostic and therapeutic problems encountered in clinical cardiology; participation in evaluation and decisions regarding patients seen sometimes in the cardiovascular clinic, inpatient cardiology wards, and electrophysiology service.

IM:8413 Noninvasive Cardiovascular Assessment: EKG Interpretation and Experiences in Ultrasound 2 s.h.
Develop and further the confidence to read basic EKG patterns and rhythms critical to the primary care physician; these are the same objectives and methods as are stressed within the EKG portion of the transitions to clinical clerkships course; students are expected to refamiliarize themselves with this ICD material before beginning the course; students will learn by reading actual EKG's on their own with facilitation of learning by direct instructor feedback of their interpretation. Requirements: MD enrollment.

IM:8414 Clinical Endocrinology arr.
New patient evaluation, inpatient referral; returning patients in diabetes, endocrine clinics; complete patient evaluations, charts; participation in clinical conferences.

IM:8416 Clinical Gastroenterology arr.
Work in consultation service at University of Iowa Health Care or VA Iowa City Health Care; assistance in diagnostic procedures for patients examined as part of consultation service; participation in patient follow-up through weekly return clinic.

IM:8418 Hematology Oncology arr.
Diagnostic skills in hematology and oncology.

IM:8422 Clinical Infectious Disease arr.
Diagnosis, treatment, follow-up, study of patients with infectious diseases, under staff guidance; techniques of diagnostic microbiology; participation in conferences, teaching activities.

IM:8424 Medical Intensive Care Unit arr.

IM:8426 Pulmonary Disease arr.
Breadth, depth in diagnostic, therapeutic problems encountered in clinical pulmonary disease; evaluation of outpatients and inpatients under staff supervision; interpretation of special studies carried out in pulmonary function laboratory, fiberoptic bronchoscopy and brush biopsy of lung; exposure to diagnosis and management of acute respiratory failure in intensive care units at University of Iowa Health Care and VA Iowa City Health Care.

IM:8428 Nephrology arr.
Evaluation of patients from University of Iowa Health Care inpatient service, VA Iowa City Health Care and clinics; emphasis on early kidney disease and all varieties of hypertension.

IM:8434 Clinical Rheumatology arr.
Clinical features of rheumatic diseases, their differential diagnosis, and principles of management; patients from arthritis clinic, inpatient consultation service of University of Iowa Health Care and VA Iowa City Health Care.

IM:8435 Palliative Care 2,4 s.h.
Requirements: MD enrollment.

IM:8437 Multidisciplinary Cancer Care 2 s.h.
Basic concepts of cancer care; role of multidisciplinary team in care of cancer patients; development of attitudes, knowledge, and skills useful for entering a specialty that encounters patients with cancer. Requirements: MD enrollment.

IM:8446 Occupational Medicine 2,4 s.h.
First-hand experience in occupational medicine, focusing on the relationships between the health of workers, the physical, chemical, and social environments in the workplace, and the health effects of environmental exposures. Requirements: MD enrollment.

IM:8449 Editorial Writing for Medical Students 4 s.h.
Students understand and practice the skill of writing opinion editorials aimed at improving the public's understanding of health and health care; how to effectively engage a broad, non-medical audience through writing with the goal of producing an opinion editorial piece that could be submitted for publication to a local or national newspaper.

IM:8450 Continuity of Care in Outpatient Internal Medicine 4 s.h.
Experience with longitudinal continuity of care for patients in the outpatient setting; clinical and didactic exposure to broad spectrum of general internal medicine problems. Requirements: fourth-year MD enrollment.

IM:8451 Advanced Inpatient Subinternship in Internal Medicine, Des Moines arr.
Four-week rotation at Des Moines Medical Education Consortium; experience as a subintern in general internal medicine and the ICU. Requirements: fourth-year MD enrollment.

IM:8452 Advanced Inpatient Subinternship in Internal Medicine, VA Des Moines 4 s.h.
Rotation at the Veterans Affairs Central Iowa Health Care System; subinternship on general internal medicine ward. Requirements: fourth-year MD enrollment.

IM:8453 Critical Care Rotation, IMMC, ICU, DM 4 s.h.
Subinternship on medical critical care team, with daily rounds, teaching. Requirements: fourth-year MD enrollment.

IM:8454 General Medicine Hospitalist, Des Moines arr.
Principles of consultative medicine provided by general internists to non-internal medicine patients; how to assess perioperative risk for patients evaluated before surgery.

IM:8455 Public Health Medicine arr.
Participation in ongoing projects related to public health issues of acute disease; training and career opportunities in public health practice.

IM:8456 Clinical Cardiology Coronary Care Experience, Iowa Methodist, Des Moines arr.

IM:8457 Clinical Nephrology, Iowa Methodist, Des Moines 2,4 s.h.
Exposure to common nephrology problems, including acute renal failure, chronic renal failure, acid-base disorders, common electrolyte disorders.

IM:8460 Transitions to Internal Medicine Residency 2 s.h.
Hands-on, specialty-specific training beyond what is offered through current Carver College of Medicine curriculum; for students who are applying to internal medicine residency or programs requiring a transitional or preliminary medicine year. Requirements: MD enrollment.

IM:8495 Internal Medicine ICU Off Campus arr.
Experience as subintern in the ICU/MICU; daily rounds and teaching with medical critical care staff.

IM:8497 Research in Internal Medicine arr.
Medical research, clinical or laboratory projects; individual study.

IM:8498 Internal Medicine On Campus arr.

IM:8499 Internal Medicine Off Campus arr.

Medical Education Program

Executive Dean

- Patricia L. Winokur

Graduate degree: MME

Graduate certificate: medical education

Faculty: https://ocrme.medicine.uiowa.edu/about-ocrme/faculty-and-staff

Website: https://ocrme.medicine.uiowa.edu/

The purpose of the Medical Education Program is to develop a community of academic medical faculty with formal training in education who will create and sustain a culture of educational excellence within the Carver College of Medicine, University of Iowa Health Care, the University of Iowa, and in the medical education community. The program consists of the Master in Medical Education (MME) degree and the Certificate in Medical Education.

The program is coordinated through the Office of Consultation and Research in Medical Education (OCRME). Courses are taught by OCRME faculty, who also advise students in the program.

Programs

Graduate Programs of Study

- Master in Medical Education [p. 1894]
- Certificate in Medical Education [p. 1896]

Master in Medical Education, MME

Learning Outcomes

The Master in Medical Education program gives faculty members in health professions education the opportunity to specialize in the theory and practice of curriculum design, effective teaching, assessment, and other aspects of health professions education. Graduates of the program will be able to:

- design evidence-based education programs and materials with appropriate scope, sequence, and focus for intended learners;
- deliver effective instruction to individuals and small or large groups in classroom, laboratory, or clinical settings;
- evaluate the effectiveness of educational instruction, using both formative and summative methods;
- understand basic principles of educational measurement and apply these principles to health professions education;
- evaluate and choose different assessment methods to promote learning and assess learning progress and outcomes;
- understand basic principles of educational research and be able to interpret and use educational research;
- apply fundamental theories, designs, and methods of program evaluation to health professions education;
- identify current issues in health professions education and resources available for monitoring developments in the field;
- develop skills in reflection on past experience, including skills of self-awareness, self-analysis, and self-evaluation, that results in the ability to generate a new perspective or plan of action; and
- identify the evolving role of technology in health professions education and research.

Requirements

The Master in Medical Education (MME) requires 30 s.h. of graduate credit. The program is designed to prepare health professions faculty to educate health professionals. It is intended for Carver College of Medicine faculty members and professional staff as well as for University of Iowa resident physicians and fellows.

The MME may be completed in as few as two years or as many as five. Students may begin the program in fall semester, spring semester, or summer session. Some of the required courses are offered online, and required on-campus courses have evening meeting times.

The curriculum includes 24 s.h. of required courses and 6–9 s.h. of electives. Students must register for at least one course each academic year in order to maintain satisfactory progress toward the degree. The program's faculty provides substantial student advising and consultation.

During their first semester, students file a plan of study. Each student's plan must include a description of the student's goals, intended graduation date, and a list of courses the student plans to take each semester. The study plan must incorporate all of the courses required for the degree and must include any requests for transfer credit. The plan must be approved by the director of the MME program and by the student's advisor. Subsequent revisions of the plan must have the advisor's approval.

The Master in Medical Education requires the following coursework.

Course #	Title	Hours
MED:9701	Instructional Design and Technology	3
MED:9702	Clinical Teaching in Medical Education	3
MED:9703	Educational Research and Evaluation	3
MED:9711	Teaching Methods in Medical Education	3
MED:9712	Introduction to Educational Measurement in Medical Education	3
MED:9713	Assessment in Medical Education	3
MED:9714	Current Issues in Medical Education	3
MED:9720	Portfolio Project	3
Electives		6-9
Total Hours		**30-33**

Students who are not involved with clinical teaching may substitute another course for MED:9702 Clinical Teaching in Medical Education.

Students must have completed at least 18 s.h. before enrolling in MED:9720 Portfolio Project. In the portfolio, students integrate the materials they have developed over the course of the program into a document. Three faculty members review the project and evaluate the student's participation in the program.

Electives require approval of the student's advisor. They may include courses in the MME program as well as those offered by relevant departments and programs (e.g., College of Education, Tippie College of Business). Students should check with their advisors to determine which courses are at a graduate level.

Admission

Applicants should hold an MD degree and must have performed satisfactorily on the Medical College Admission Test (MCAT). Other applicants without an MD must hold an equivalent terminal degree (MSW, PharmD, PhD, etc.) and must have performed satisfactorily on an admission test equivalent to the MCAT (i.e., GRE).

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET).

Application materials must include an official transcript showing medical coursework and medical degree, or equivalent for basic sciences applicants (current and former University of Iowa students do not need to request a UI transcript or transcripts previously submitted to the university); a letter of reference from the applicant's department chair and one additional letter of reference; and a 300–500 word essay describing the applicant's interest in

medical education and in the Master in Medical Education program.

To apply to the MME program, see Applications and Admissions on the Office of Consultation and Research in Medical Education (OCRME) website. Application materials should be submitted to the University of Iowa Admissions.

Application deadlines are:

- July 15 for fall semester entry;
- Nov. 15 for spring semester entry; and
- April 15 for summer session entry.

Medical Education, Graduate Certificate

Requirements

The graduate certificate program is designed to help health professions education faculty members, professional staff, residents, and fellows in the Carver College of Medicine and University of Iowa Health Care find new ways to enhance their scholarship and skills in teaching, curriculum design, and education assessment. The Certificate in Medical Education program involves the same courses as the Master in Medical Education (MME); however, it only requires 12 s.h. of graduate credit. Individuals who complete the certificate and then decide to earn the master's degree may count their certificate coursework toward the MME degree.

The Certificate in Medical Education requires the following coursework.

Methods

Course #	Title	Hours
One of these:		
MED:9701	Instructional Design and Technology	3
MED:9702	Clinical Teaching in Medical Education	3
MED:9711	Teaching Methods in Medical Education	3

Research and Measurement

Course #	Title	Hours
One of these:		
MED:9703	Educational Research and Evaluation	3
MED:9712	Introduction to Educational Measurement in Medical Education	3

Additional Courses

Course #	Title	Hours
Students choose courses from MME requirements		6

For additional courses that satisfy the certificate requirements, view Master in Medical Education (MME) [p. 1894] in this section of the catalog. Students may choose up to two electives to substitute for required courses.

Admission

Applicants should hold an MD degree and must have performed satisfactorily on the Medical College Admission Test (MCAT). Other applicants without an MD must hold an equivalent terminal degree (i.e., MSW, PharmD, PhD) and must have performed satisfactorily on an admission test equivalent to the MCAT (i.e., GRE).

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET).

Application materials must include an official transcript showing medical coursework and medical degree, or equivalent for basic sciences applicants (current and former University of Iowa students do not need to request a UI transcript or transcripts previously submitted to the university); a letter of reference from the applicant's department chair and one additional letter of reference; and a 300–500 word essay describing the applicant's interest in medical education and in the Certificate in Medical Education program.

To apply to the certificate program, see Nondegree Seeking Students on the University of Iowa Admissions website. Application materials should be submitted to University of Iowa Admissions.

Application deadlines are:

- July 15 for fall semester entry;
- Nov. 15 for spring semester entry; and
- April 15 for summer session entry.

Medical Laboratory Science

Coordinator

- Gabriella Young

Undergraduate major: medical laboratory science (BS)

Website: https://mls.medicine.uiowa.edu/

Medical laboratory scientists and medical technologists perform the laboratory tests that provide health care practitioners with information vital for accurate diagnosis, proper treatment of disease, and assistance in monitoring the treatment of the disease. They are in demand in hospital, private, reference, and government laboratories; clinics; physicians' offices; and industrial, pharmaceutical, biological, veterinary, and environmental research laboratories. Medical laboratory scientists and medical technologists are highly skilled health team professionals who use complex procedures and instruments in their analysis. They possess a specialized set of knowledge and skills acquired through the completion of a formal twelve-month program of academic and clinical study in laboratory medicine.

Programs

Undergraduate Program of Study

Major

- Major in Medical Laboratory Science (Bachelor of Science) [p. 1898]

Medical Laboratory Science, BS

The Carver College of Medicine partners with various programs to offer the Bachelor of Science in medical laboratory science. The Kirkwood medical laboratory science program is currently seeking accreditation by the National Accrediting Agency for Clinical Laboratory Sciences. The Mercy program is fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences.

Undergraduate study in medical laboratory science is guided by the academic rules and procedures [p. 1844] outlined in the Carver College of Medicine section of the catalog.

The Carver College of Medicine partners with affiliated institutions that provide the medical laboratory science professional training programs; students in this major are not held to the University of Iowa in-residence requirement.

Affiliated Programs

- Kirkwood Community College
- Mercy College of Health Sciences

Expenses

Students are responsible for all tuition, textbooks, and other associated expenses during their time in one of the affiliated programs. Tuition is assessed by the affiliated learning institution or program.

Requirements

The Bachelor of Science with a major in medical laboratory science requires a minimum of 124 s.h., including preparatory study at the University of Iowa and the professional (clinical) program. Acceptance into the affiliated programs is competitive; see specific program websites for admission requirements.

Students who plan to pursue a BS degree in medical laboratory science at the University of Iowa enter the university as students in the College of Liberal Arts and Sciences, where they complete the preparatory coursework that is prerequisite to entering the major. Students then begin the professional program, which consists of both didactic lectures and clinical rotations. Students who successfully complete the professional requirements through one of the affiliated medical laboratory science programs graduate with a BS in medical laboratory science awarded by the University of Iowa.

To learn more about the professional programs, visit the medical laboratory science pages on the Mercy College of Health Sciences website or the medical laboratory technology page on the Kirkwood Community College website.

General Education Requirement

All students pursuing the BS in medical laboratory science complete at least 3 s.h. in each of these areas:

- Understanding Cultural Perspectives
- Historical Perspectives
- International and Global Issues (may be taken concurrently while at Kirkwood if attending UI first)
- Literary, Visual, and Performing Arts
- Rhetoric (minimum 4 s.h.)
- Natural Sciences, with lab component (minimum 4 s.h.)
- Natural Sciences, with or without lab component
- Quantitative or Formal Reasoning
- Social Sciences

See GE CLAS Core [p. 22] (College of Liberal Arts and Sciences) in the catalog for approved courses in the areas listed. GPA and individual course grade minimums may apply based on the clinical program students complete; see the following sections for more information.

Kirkwood Community College

Students in the Kirkwood program must maintain a cumulative grade-point average (GPA) of at least 2.00 in all courses for the major and in all University of Iowa courses. They must earn a grade of C (not C-minus) or higher in every course.

Students complete the prerequisite coursework in the first two years at the University of Iowa. Alternatively, students may choose to attend the Kirkwood program first and continue their studies at the University of Iowa. Some general education courses may be taken concurrently at the University of Iowa while completing coursework at Kirkwood.

Required Courses

Students take the following required courses at the University of Iowa. Students who begin at UI must complete all of the following before they may be admitted to the major in medical laboratory science, with the exception of five courses that may be taken concurrently with Kirkwood coursework. Enrollment in chemistry and mathematics courses requires completion of a placement exam. Courses may require prerequisites.

Course #	Title	Hours
All of these:		
BIOL:1411	Foundations of Biology	4
BIOL:1412	Diversity of Form and Function	4
BMB:3110	Biochemistry (may be taken concurrently while at Kirkwood if attending UI first)	3
CHEM:1110	Principles of Chemistry I	4
CHEM:1120	Principles of Chemistry II	4
CHEM:2210	Organic Chemistry I	3
HHP:2400	Fundamentals of Human Physiology	3
MATH:1005	College Algebra (or a math course [prefix MATH] numbered above 1005)	4
MICR:3147	Immunology and Human Disease (may be taken concurrently while at Kirkwood if attending UI first)	3
PATH:4201	Laboratory Management (may be taken concurrently while at Kirkwood if attending UI first)	3
SOC:1010	Introduction to Sociology	3-4
One of these:		
BAIS:1500	Business Computing Essentials	2

CS:1020	Principles of Computing (may be taken concurrently while at Kirkwood if attending UI first)	3
One of these:		
STAT:1020	Elementary Statistics and Inference	3
STAT:1030	Statistics for Business (preferred)	4

Students who begin at the University of Iowa must complete the following courses before admission to the major. Students who begin at Kirkwood Community College must satisfy the following but may be able to transfer equivalent courses.

Course #	Title	Hours
HHP:1400	Human Anatomy and Physiology	3
MICR:3164	Microbiology and Human Health	4

Mercy College of Health Sciences

Students in the Mercy College of Health Sciences (MCHS) program in Des Moines must maintain a cumulative grade-point average (GPA) of at least 2.50 in all courses for the major and in all University of Iowa courses.

Students in the Mercy College program complete the prerequisite coursework in the first three years at the University of Iowa and must pursue admission into the MCHS program for the fourth year.

Prerequisites for Admission to the Major, Mercy College

Students must:

- achieve a cumulative GPA of at least 2.50 on a 4.00 scale in all college-level coursework;
- achieve a cumulative GPA of at least 2.50 on a 4.00 scale in all college-level coursework in science, which includes biology, microbiology, zoology, chemistry, physics, mathematics, statistics, and related courses; and
- earn a grade of C (not C-minus) or higher in all required courses.

Students must complete the following coursework and be accepted into the program at MCHS before they may be admitted to the major in medical laboratory science.

Course #	Title	Hours
All of these:		
BIOL:1411 & BIOL:1412	Foundations of Biology and Diversity of Form and Function	8
CHEM:1110 & CHEM:1120	Principles of Chemistry I and Principles of Chemistry II	8
CHEM:2210 & CHEM:2220	Organic Chemistry I and Organic Chemistry II	6
CHEM:2410	Organic Chemistry Laboratory	3
MATH:1005	College Algebra	4
MICR:2157 & MICR:2158	General Microbiology and General Microbiology Laboratory	5
One of these:		
HHP:1400	Human Anatomy and Physiology	3
HHP:2100 & HHP:2110	Human Anatomy and Human Anatomy Laboratory	4
HHP:2400 & HHP:2410	Fundamentals of Human Physiology and Human Physiology Laboratory	4
HHP:3105	Anatomy for Human Physiology	3
HHP:3115	Anatomy for Human Physiology With Lab	5
HHP:3500	Human Physiology	3
HHP:3550	Human Physiology With Laboratory	5
MICR:3147	Immunology and Human Disease	3

Coursework taken to meet the biology and chemistry requirements completed seven or more years before application may require updating. This is determined by the MCHS program chair.

Questions about the requirements should be directed to the Mercy College of Health Sciences.

Admission

Admission to the medical laboratory science professional programs is competitive; enrollment may be limited. Students must apply to the medical laboratory science program directly. Students interested in the Mercy College of Health Sciences program apply during the fall of their third year and begin the professional program following that year; students interested in the Kirkwood Community College program would typically apply during the second year to begin the professional program the following year.

Before beginning the professional program, students must complete all prerequisites and must have earned at least 58 s.h. of college credit for the Kirkwood Community College program or at least 88 s.h. of college credit for the Mercy College of Health Sciences program. Students satisfy the English and public speaking prerequisites by fulfilling the GE CLAS Core Rhetoric requirement. They must satisfy any English as a Second Language (ESL) requirements specified by the University of Iowa before beginning the professional program.

Students should consult with a Medical Laboratory Science Program advisor as early as possible to plan preclinical studies that meet all requirements.

Career Advancement

The demand for medical laboratory scientists is much greater than the number of people qualified to fill the positions, and graduates have numerous employment opportunities nationwide. They consistently find employment before or very soon after graduation.

Opportunities for advancement include positions such as lab manager, computer specialist, technical specialist, or sales/instrument representative. An advanced degree in basic sciences, medicine, hospital administration, or business can expand earning potential.

Graduates often enjoy diverse work environments, including labs in hospitals, research institutions, public health facilities, forensic units, pharmaceutical companies, or the armed forces. They have an impact in the field as integral members of health care teams, providing information essential for the treatment and prevention of disease.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Medical Scientist Training Program

Director

- Gordon F. Buchanan (Neurology)

Administrative Director

- Linda M. Varvel

Faculty: https://mstp.medicine.uiowa.edu/faculty

Website: https://mstp.medicine.uiowa.edu/

The Iowa Medical Scientist Training Program (MSTP) prepares trainees for careers in academic medicine, emphasizing basic and clinical research.

Combined Programs

MD/PhD

The combined Doctor of Medicine/Doctor of Philosophy program normally requires seven to eight years of continuous study. It provides an effective and efficient means to integrate graduate and clinical training, combining the scientific approach with clinical medicine.

Students register for MSTP:8515 Medical Scientist Training Program Topics every semester. The course focuses on a variety of topics relevant to training as a physician-scientist.

During the first three semesters of the program, trainees take coursework in the basic sciences fundamental to the study of medicine and complete experiences that introduce mechanisms of health and disease, and principles of clinical practice; see Doctor of Medicine [p. 1880] in the catalog. This early training provides broad exposure to the language and organizing concepts that form the foundation for a career as a physician-scientist. Trainees also begin the research component of the graduate phase of the program during this time, through summer laboratory MSTP:8511 Medical Scientist Training Program Research rotations, enrollment in MSTP:8513 Sitting in the Middle: Physician Scientist 101, research presentations by MSTP faculty and students, and a student-sponsored seminar series. Trainees participate in Conversations in Research, in which MSTP faculty members discuss their research and career interests, and they attend MSTP Grand Rounds, a forum for patient-based discussions that emphasizes how science and medicine intersect.

During the fourth and fifth semesters, trainees enroll in core clinical clerkships, in which they gain broad exposure to the spectrum of human disease and experience direct patient care before they enter the graduate phase of training.

After completing core clerkships and United States Medical Licensing Examination Step 1 and 2 examinations, trainees select a PhD thesis mentor and begin research. This happens in the spring of their third year. They also enroll in a graduate department or interdisciplinary graduate program to begin their scientific training in the fall of their fourth year.

The focus of the graduate years of study is engagement in academic and research experiences that promote the trainees' development into independent investigators. Clinical contact is maintained during this phase of training through participation in seminar programs, MSTP Grand Rounds, and MSTP:8512 Medical Scientist Training Program Clinical Connections, a course that provides the opportunity for mentored clinical experiences.

Upon completing the PhD dissertation, trainees return to the Carver College of Medicine's MD curriculum to complete the advanced clinical clerkship requirements for the MD/PhD combined program. During this phase, trainees bring sophistication in the scientific approach to problem-solving that they apply to human disease. They renew and develop clinical skills acquired in their early training and reinforce their understanding of the scientific basis of disease through continued participation in MSTP Grand Rounds. Upon completion of the clinical curriculum, trainees are awarded the MD and PhD degrees.

Most graduates of the program elect to enter residency programs in clinical medicine and embark on careers as medical school faculty members in clinical disciplines with opportunities for basic and applied research. Other graduates accept academic appointments in basic science departments and spend a major part of their professional activity in biomedical research and teaching.

Admission

Applicants must meet the requirements for admission to the MD program in the Carver College of Medicine; see Admission [p. 1882] in the Doctor of Medicine section of the catalog. They also must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants should have completed the requirements for a bachelor's degree at an accredited academic institution. In addition to outstanding academic credentials, including strength in biological, physical, and mathematical sciences, they must demonstrate aptitude for and commitment to scientific research through productive research experience during their undergraduate years or after. Admission normally is made for entry to the first year of the program, but applicants already enrolled in the Carver College of Medicine may request admission with advanced standing.

Application

The Carver College of Medicine participates in the American Medical College Application Service (AMCAS). Program applicants should select MD/PhD Program-Type on their AMCAS application and instruct AMCAS to forward their credentials to the Carver College of Medicine (IA131). Applications should be submitted as early as possible to allow careful review by the admissions committees of the Medical Scientist Training Program (MSTP) and the Carver College of Medicine.

All candidates must take the Medical College Admission Test (MCAT), according to Carver College of Medicine requirements. The Graduate Record Exam (GRE) General Test is not required for admission.

Application to the Graduate College is not required before acceptance to the MSTP. Trainees admitted to the program receive assistance with Graduate College enrollment.

Financial Support

Trainees receive a stipend and full tuition support from a National Institutes of Health Medical Scientist Training Program training grant to the University of Iowa, supplemented by other institutional and individual awards.

Students in the graduate phase of training receive support from their graduate departments or interdisciplinary programs and their research advisors. The program office also helps selected trainees apply for competitive national awards for outstanding academic and research achievement.

Courses

Medical Scientist Training Program Courses

MSTP:7270 Medical Scientist Training Program Principles of Scholarly Integrity **1 s.h.**
Training in responsible conduct of research; student/mentor responsibilities; authorship and reviewing; plagiarism and falsification/fabrication of data; intellectual property; fiscal, institutional, societal conflicts of interest; treatment of human and animal subjects; data handling. Requirements: Medical Scientist Training Program enrollment.

MSTP:8511 Medical Scientist Training Program Research **arr.**
Research experience. Requirements: Medical Scientist Training Program enrollment.

MSTP:8512 Medical Scientist Training Program Clinical Connections **arr.**
Experience with physician-scientist preceptor in medical interviewing, physical examination, patient presentation through direct patient interaction. Requirements: Medical Scientist Training Program graduate phase enrollment.

MSTP:8513 Sitting in the Middle: Physician Scientist 101 **1 s.h.**
Physician scientists have a unique role in the processes of medical research and patient care. Students study a variety of topics crucial to becoming an effective physician scientist, including critical interpretation of medical literature, time management, imposter syndrome, data presentation, and interactions with patients.

MSTP:8514 Grant Writing Basics: A Focus on Predoctoral Applications **1 s.h.**
Introduction to practical and conceptual aspects of grant-writing process, with the goal of completing an NIH F30-like grant; encourages critical thinking about significance, innovation, and experimental design; relate critical information and study design in concise and clear language; practical concepts of grant writing such as specific aims, experimental design, and the grant review process; trainees will present their research ideas, establishing opportunities to give and receive scientific criticism. Requirements: Medical Scientist Training Program enrollment.

MSTP:8515 Medical Scientist Training Program Topics **1 s.h.**
Workshops and speakers; focus on a variety of topics including wellness, research presentations, professional development, and on-going faculty research partnerships. Requirements: Medical Scientist Training Program enrollment.

Microbiology and Immunology

Chair

- Li Wu

Director, Undergraduate Studies

- Aloysius J. Klingelhutz

Director, Graduate Studies

- Craig D. Ellermeier

Undergraduate major: microbiology (BS)

Undergraduate minor: microbiology

Graduate degrees: MS in microbiology; PhD in microbiology

Faculty: https://microbiology.medicine.uiowa.edu/profile/leadership

Website: https://microbiology.medicine.uiowa.edu/

Study in the Department of Microbiology and Immunology is dedicated to the branch of biological sciences that investigates the smallest living things: microbes that include bacteria, archaea, fungi, algae, protozoa, and viruses. It is coupled with immunology that includes the study of the protective responses of higher organisms to disease-causing microbes and cancers, and mistakes in immune function. Microbiology and immunology often interact in humans through the microbiome, those microbes that live with humans on their skin and mucosal surfaces, and yet must be restricted from causing diseases by the immune system.

Microbiology and immunology are at the forefront of the modern biological revolution. Microbes are experimental subjects of choice for examining genetic and biological phenomena because of their small size, rapid growth rate, relative simplicity, and variety of characteristics that allow them to cause many kinds of infections and alter normal body functions. Immunology often makes use of microbes and cancer cells to study the critical and complex human responses to eliminate microbes and cancers. A significant portion of contemporary biochemical research employs microbiological and immunological methods.

Current research is making theoretical and practical advances concerning microbes that infect animals, including humans, and the immune response to those microbes; the use of comparative genomics, gene expression profiling, and recombinant DNA methods to analyze biological processes and generate valuable products, such as antibiotics and antibodies; genetics and regulation of metabolic processes; and the genetics and regulation of the immune response, including characterization of mechanisms used by microbes to signal one another and characterization of interactions between different types of immune cells and their targets.

The Department of Microbiology and Immunology offers an undergraduate major and a minor, and graduate majors leading to an MS and a PhD, and determines the curricula for those programs. Undergraduates majoring in microbiology receive their degrees (Bachelor of Science) from the College of Liberal Arts and Sciences and are governed by that college's undergraduate academic policies. The graduate degrees are awarded by the Graduate College.

Programs

Undergraduate Programs of Study

Major

- Major in Microbiology (Bachelor of Science) [p. 1906]

Minor

- Minor in Microbiology [p. 1912]

Graduate Programs of Study

- Master of Science in Microbiology [p. 1913]
- Doctor of Philosophy in Microbiology [p. 1914]

Facilities

The Department of Microbiology and Immunology is situated on the University of Iowa health sciences campus, where it shares the Bowen Science Building with the departments of Anatomy and Cell Biology, Biochemistry and Molecular Biology, Molecular Physiology and Biophysics, and Neuroscience and Pharmacology. Laboratory space and modern equipment are available for teaching and research.

Courses

Microbiology and Immunology Courses

MICR:2157 General Microbiology 3 s.h.
Principles of bacterial and viral diversity, structure, genetics, physiology, and metabolism in contexts of molecular biology, immunology, infectious disease, and environmental microbiology; for students majoring in microbiology and biology-related fields and students pursuing health professions and research-focused graduate programs. Prerequisites: BIOL:1411 and CHEM:1110.

MICR:2158 General Microbiology Laboratory 2 s.h.
Practice of basic techniques commonly used today for study of easy-to-grow microorganisms; variety of individual and group lab activities that challenge students to apply observations about bacteria and viruses. Corequisites: MICR:2157, if not taken as a prerequisite.

MICR:3145 Honors in Microbiology Thesis Preparation 1 s.h.
Guidance and constructive criticism on written and oral presentation of honors research project; submission of thesis introduction; multiple presentations and updates of research project in preparation for final oral presentation at departmental Undergraduate Research Symposium; for honors in the major students and taken final semester before graduation. Prerequisites: MICR:4171.

MICR:3147 Immunology and Human Disease 3 s.h.
Important principles and key concepts in immunology with a focus on the involvement of the immune system in disease pathogenesis; overview of innate and adaptive immune systems and their functions at cellular and molecular levels. Prerequisites: BIOL:1412 with a minimum grade of C or MICR:2157 with a minimum grade of C.

MICR:3159 Bacteria and Human Disease 3 s.h.
Infection and replication strategies of diverse bacteria with an emphasis on how host-pathogen interactions facilitate disease and pathogenesis. For students interested in microbiology or other biological sciences including epidemiology and/or health-related occupations. Prerequisites: MICR:2157 with a minimum grade of C.

MICR:3162 Bacterial Physiology and Cell Biology 2 s.h.
Bacterial physiology and its consequences for health and disease; examines the structure, metabolism, growth, and regulatory mechanisms of bacteria, focusing on how they acquire energy and nutrients to live and reproduce. Students will integrate biochemistry, genetics, and cell biology to gain an appreciation for the fundamental processes that drive bacterial life and discuss how these fundamental life processes dictate interactions with the microbial world. Prerequisites: MICR:2157 with a minimum grade of C.

MICR:3164 Microbiology and Human Health 4 s.h.
Microbiology for nursing, pharmacy, and certain other health professions. Prerequisites: (BIOL:1411 or BIOL:1140 or BIOL:1141 with a minimum grade of C) and (CHEM:1070 or CHEM:1110 with a minimum grade of C).

MICR:3165 Genetics of Bacterial Pathogens Lab and Discussion 3 s.h.
Use of bacterial genetics and molecular biology techniques and methodologies to study bacteria which cause human disease; development of skills in data analysis and presentation, reading scientific literature, and writing scientific abstracts; for students interested in microbiology or other biological sciences, epidemiology, and/or health-related occupations. Prerequisites: MICR:2157 with a minimum grade of C and MICR:2158 with a minimum grade of C. Corequisites: MICR:3159 or MICR:3170, if not taken as a prerequisite.

MICR:3168 Viruses and Human Disease 3 s.h.
Infection and replication strategies of viruses with an emphasis on human disease; for microbiology majors as well as students interested in pre-medicine, biological sciences, epidemiology, and/or other health-related occupations. Prerequisites: BIOL:1412 with a minimum grade of C or MICR:2157 with a minimum grade of C. Recommendations: basic understanding of molecular biology and immunology.

MICR:3170 Bacterial Genetics 3 s.h.
Genetics of bacteria and bacteriophages including classical, molecular, and genome-wide approaches. Prerequisites: BIOL:2512 with a minimum grade of C or MICR:2157 with a minimum grade of C.

MICR:3177 Virology Discussion 2 s.h.
Students read, present, and discuss papers from virology literature that address classic and current issues in virology research. Students will learn how to critically evaluate and present methods and results from virology research papers. Prerequisites: MICR:3168 with a minimum grade of C.

MICR:3178 Virology Laboratory 2 s.h.
Practical approaches to studying viruses; basic techniques in virology including virus detection, virus growth measurement, and virus genetics; introduction to bioinformatic analysis of virus genomes and infections. Prerequisites: MICR:2157 with a minimum grade of C and MICR:2158 with a minimum grade of C. Corequisites: MICR:3168 (if not taken as a prerequisite).

MICR:3182 From Data to Discovery: Hands-On Code-Free Computational Biology 2 s.h.
Learning and applying user-friendly and coding-free computational tools to analyze and manipulate protein structures, analyze large datasets of DNA and protein sequences, and utilize machine learning algorithms to computationally address biological questions. Prerequisites: BIOL:1411 with a minimum grade of C and CHEM:1110 with a minimum grade of C. Recommendations: major in biomedical science-related field.

MICR:4161 Undergraduate Research in Microbiology arr.
Experimental research under faculty supervision. Prerequisites: BIOL:1411.

MICR:4171 Honors Undergraduate Research in Microbiology arr.
Experimental research under faculty supervision. Prerequisites: BIOL:1411. Requirements: microbiology major, junior or senior standing, 3.33 overall GPA, and 3.33 GPA in microbiology courses.

MICR:4175 Topics in Parasitism 1 s.h.
Molecular and immunologic mechanisms by which bacteria, viruses, and protozoa cause human diseases; based on manuscript readings and/or student presentations. Requirements: junior or higher standing in microbiology or related discipline, and current or prior research in a microbiology and immunology laboratory.

MICR:5218 Microscopy for Biomedical Research arr.
Basic microscopy methods for research including optics, preparation, and analysis of biomedical specimens; light, fluorescence, confocal, transmitting electron, scanning electron, atomic force microscopes, elemental analysis; immunochemistry and stereology techniques; individualized laboratory instruction. Prerequisites: BIOL:2723. Same as ACB:5218, BIOL:5218.

MICR:5264 Directed Study in Microbiology arr.
Advanced-level experimental research or teaching under faculty supervision.

MICR:5875 Perspectives in Biotechnology 1 s.h.
Topics related to careers in biotechnology with an emphasis on preparing graduate students for careers outside of academia; discussions led by a series of guest speakers from leading biotech industries; understanding the societal impact of basic research; participation in round-table discussions; and presentation of student research findings. Requirements: graduate standing and good academic standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BMB:5875, CBE:5875, CEE:5875, CHEM:5875, PHAR:5875.

MICR:6201 Graduate Immunology 3 s.h.
Immune cell ontogeny, activation, and function of T lymphocytes and B lymphocytes; innate immune effector mechanisms; major histocompatibility complex; antigen presentation; thymocyte positive and negative selection; signaling of T lymphocytes and B lymphocytes; emphasis on experimental methods for analysis of these processes and how they have led to current advanced concepts in immunology. Prerequisites: MICR:3147 or MICR:6247. Requirements: for IMMU:6201—college biology, general chemistry, and introductory immunology courses; for MICR:6201—courses in college biology, genetics, general chemistry, and introductory immunology. Recommendations: for IMMU:6201—courses in biochemistry and genetics; for MICR:6201—biochemistry course. Same as IMMU:6201.

MICR:6247 Graduate Immunology and Human Disease 4 s.h.
Important principles and key concepts in immunology with a focus on the involvement of the immune system in disease pathogenesis; overview of innate and adaptive immune systems and their functions at cellular and molecular levels; learning enhanced by case-based, small-group discussion and writing exercises. Same as IMMU:6247.

MICR:6250 Mechanisms of Parasitism Journal Club 1 s.h.
Reviews of recent publications in molecular parasitology research and thesis research by training grant or journal club students; for students pursuing graduate thesis research in microbiology or a related discipline. Same as MMED:6250.

MICR:6255 Graduate Experimental Approaches to Molecular Microbiology 2 s.h.
Exposure to common experimental approaches through examination of primary literature and facilitated discussions on application of those approaches to advance scientific inquiry. Requirements: microbiology graduate standing.

MICR:6259 Graduate Bacteria and Human Disease 3-4 s.h.
Infection and replication strategies of diverse bacteria with an emphasis on human disease and interactions with the host and environment.

MICR:6262 Graduate Bacterial Physiology and Cell Biology 2 s.h.
Bacterial physiology and its consequences for health and disease; examines the structure, metabolism, growth, and regulatory mechanisms of bacteria, focusing on how they acquire energy and nutrients to live and reproduce. Students will integrate biochemistry, genetics, and cell biology to gain an appreciation for the fundamental processes that drive bacterial life and discuss how these fundamental life processes dictate interactions with the microbial world.

MICR:6265 Introduction to Grant Writing 2 s.h.
How to think and write like scientists and become familiar with the elements of a research proposal; writing a grant proposal modeled on a National Institutes of Health Exploratory/ Developmental Research Grant Award (NIH R21); students critique proposals written by other students; faculty read proposals and provide constructive criticism; lectures describe elements of a grant proposal and strategies for effective writing. Requirements: enrollment in microbiology graduate program, or enrollment in a graduate program training in a microbiology and immunology department laboratory, or enrollment in a biological science graduate program and not working in a microbiology and immunology department laboratory for thesis project.

MICR:6267 Graduate Viruses and Human Disease 3 s.h.
Infection and replication strategies of viruses with an emphasis on human disease. Recommendations: concurrent enrollment in MICR:6269.

MICR:6268 Biology and Pathogenesis of Viruses 2 s.h.
Molecular biology of animal DNA and RNA viruses, viral immunology and pathogenesis, and interaction of these viruses with eukaryotic cells; mechanisms of viral latency, persistence, cellular transformation, oncogenesis; virology literature. Prerequisites: MICR:3168 or MICR:6267.

MICR:6269 Graduate Virology Discussion 1 s.h.
Discussion of primary virology literature from a range of topics, may include techniques used for studying viruses, viral entry and replication, evasion of immune responses by viruses, vaccines, and viral pathogenesis; short presentations; development of specific aims for a mock grant proposal on a virology-related topic. Recommendations: completion of a virology course.

MICR:6270 Graduate Bacterial Genetics 3 s.h.
Genetics of bacteria and bacteriophages including classical, molecular, and genome-wide approaches.

MICR:6282 Graduate From Data to Discovery: Hands-On Code-Free Computational Biology 2 s.h.
Learning and applying user-friendly and coding-free computational tools to analyze and manipulate protein structures, analyze large datasets of DNA and protein sequences, and utilize machine learning algorithms to computationally address biological questions.

MICR:6310 Biology of Bacteria and Interactions With the Host 2 s.h.
Discussion of primary literature based on molecular biology of bacteria, bacterial pathogenesis, bacterial gene regulation and stress responses, bacterial cell biology, bacterial behaviors, antimicrobial resistance, interaction of bacteria with host cells, interactions of bacteria with immune system; how bacteria adapt to different environments, including in a eukaryotic host or complex polymicrobial community. Requirements: microbiology graduate standing. Recommendations: MICR:6270 or MICR:6259.

MICR:7207 Advanced Topics in Immunology 3 s.h.
In-depth analysis of selected areas. Prerequisites: IMMU:6201 or MICR:6201. Same as IMMU:7221.

MICR:7261 Graduate Research in Microbiology arr.
Requirements: microbiology graduate standing.

MICR:7263 Graduate Student Research Seminar 1 s.h.
Presentation of thesis work in progress. Requirements: microbiology graduate standing.

MICR:7265 Topics in Virology Literature 1 s.h.
Papers of current interest in primary virology literature.

MICR:8230 Dental Microbiology 3 s.h.
Medical microbiology: bacteriology, immunology, pathogenic bacteriology, virology, mycology, parasitology. Requirements: DDS enrollment.

MICR:8402 Teaching Elective in Microbiology 2 s.h.
Expand knowledge and understanding in medical education by preparing and implementing five teaching interactions with year two medical and physician assistant students (M2/PA2) during the microbiology lab portion of MED:8223. Students can also develop interactive classroom exercises or sessions to improve memory and develop critical analysis skills. Requirements: MD standing and enrollment in teaching distinction track.

Microbiology, BS

Microbiology is an excellent major for undergraduate students who want a strong general education with an emphasis on an important and interesting branch of biological sciences.

Majoring in microbiology offers many benefits, including the following.

- Diverse career opportunities: Microbiology opens doors to various fields such as healthcare, environmental science, biotechnology, and research.
- Medical advancements: Microbiologists play a crucial role in developing new treatments and diagnostic tools, contributing to public health.
- Environmental impact: Studying microbiology helps in understanding and solving environmental issues, such as pollution and climate change.
- Biotechnology innovations: Microbiologists are at the forefront of creating new biotechnological applications, including biofuels and pharmaceuticals.
- Food safety: Ensuring the safety and quality of food products is another important area where microbiologists make significant contributions.

Requirements

The Bachelor of Science with a major in microbiology requires a minimum of 120 s.h., including 60–65 s.h. of work for the major, depending on the track. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. Courses for the major may not be taken pass/nonpass. Students must also complete the College of Liberal Arts and Sciences GE CLAS Core [p. 22].

Students must complete at least 12 s.h. of the required 18–19 s.h. in Department of Microbiology and Immunology courses at the University of Iowa.

The major in microbiology can be pursued on either a pre-medicine or a scholar track.

Students in the pre-medicine track complete admission requirements for the Carver College of Medicine and for most colleges of medicine as an integral part of the completion of their major requirements. This track is recommended for pre-medical, pre-dental, and pre-pharmacy students.

Students in the scholar track pursue a curriculum with streamlined organic chemistry and physics requirements and expanded microbiology and immunology courses, including advanced laboratory and global health studies coursework. The scholar track is recommended for students interested in pursuing graduate training or in developing a career as a microbiologist.

Students may shift from one track to the other during their program of study.

The BS with a major in microbiology requires the following coursework.

Pre-Medicine Track

Students in the pre-medicine track complete the following coursework.

Requirements	Hours
Supporting Coursework	42-43
Microbiology and Immunology Courses	18
Advanced Elective Coursework	3

Pre-Medicine Track, Supporting Coursework

Course #	Title	Hours
All of these:		
BIOL:1411 & BIOL:1412	Foundations of Biology and Diversity of Form and Function	8
BMB:3120 & BMB:3130	Biochemistry and Molecular Biology I and Biochemistry and Molecular Biology II	6
CHEM:1110 & CHEM:1120	Principles of Chemistry I and Principles of Chemistry II	8
CHEM:2210 & CHEM:2220	Organic Chemistry I and Organic Chemistry II	6
CHEM:2410	Organic Chemistry Laboratory	3
One of these:		
BIOS:4120	Introduction to Biostatistics	3
MATH:1460	Calculus for the Biological Sciences	4
MATH:1550	Engineering Calculus I	4
MATH:1850	Calculus I	4
STAT:3510/ IGPI:3510	Biostatistics	3
One of these sequences:		
PHYS:1511 & PHYS:1512	College Physics I and College Physics II	8
PHYS:1611 & PHYS:1612	Introductory Physics I and Introductory Physics II	8

Pre-Medicine Track, Microbiology and Immunology Courses

Students earn a minimum of 18 s.h. in Department of Microbiology and Immunology courses from the following.

Course #	Title	Hours
Both of these:		
MICR:2157	General Microbiology (required with a grade of C or higher)	3
MICR:2158	General Microbiology Laboratory (required with a grade of C or higher)	2
Three of these:		
MICR:3147	Immunology and Human Disease	3
MICR:3159	Bacteria and Human Disease	3
MICR:3168	Viruses and Human Disease	3
MICR:3170	Bacterial Genetics	3
At least 4 s.h. from these:		
MICR:3145	Honors in Microbiology Thesis Preparation	1
MICR:3162	Bacterial Physiology and Cell Biology	2

MICR:3165	Genetics of Bacterial Pathogens Lab and Discussion	3
MICR:3177	Virology Discussion	2
MICR:3178	Virology Laboratory	2
MICR:3182	From Data to Discovery: Hands-On Code-Free Computational Biology	2
MICR:4161	Undergraduate Research in Microbiology	arr.
MICR:4171	Honors Undergraduate Research in Microbiology	arr.
MICR:4175	Topics in Parasitism	1
MICR:5264	Directed Study in Microbiology	arr.

A maximum of 4 s.h. earned in either MICR:4161 Undergraduate Research in Microbiology or MICR:4171 Honors Undergraduate Research in Microbiology may be counted toward the major. However, students earning honors in the major must complete 6 s.h. in MICR:4171 Honors Undergraduate Research in Microbiology; see Honors [p. 1908] in this section of the catalog.

Pre-Medicine Track, Advanced Elective Coursework

Course #	Title	Hours
At least 3 s.h. from these:		
BIOL:2512	Fundamental Genetics	4
BIOL:2723	Cell Biology	3
BIOL:3172	Evolution	4
BIOL:3212/ IGPI:3212	Bioinformatics for Beginners	3
BIOL:3314/ IGPI:3314	Genomics	3
BIOL:4213/ GENE:4213/ IGPI:4213	Bioinformatics	2,4
CPH:2230	Finding Patient Zero: The Exploration of Infectious Disease Transmission and Pandemic Threats	3
GHS:2000/ ANTH:2103	Introduction to Global Health Studies	3
GHS:2320/ ANTH:2320	Origins of Human Infectious Disease	3
PCOL:3101	Pharmacology I: A Drug's Fantastic Journey	3
PCOL:3102	Pharmacology II: Mechanisms of Drug Action	3
Additional microbiology and immunology courses (prefix MICR) numbered MICR:3145 to MICR:5264, excluding MICR:3164		

Scholar Track

Students in the scholar track complete the following coursework.

Requirements	Hours
Supporting Coursework	35-40
Microbiology and Immunology Courses	19
Advanced Elective Coursework	6

Scholar Track, Supporting Coursework

Course #	Title	Hours
All of these:		
BIOL:1411 & BIOL:1412	Foundations of Biology and Diversity of Form and Function	8
BMB:3120 & BMB:3130	Biochemistry and Molecular Biology I and Biochemistry and Molecular Biology II	6
CHEM:1110 & CHEM:1120	Principles of Chemistry I and Principles of Chemistry II	8
CHEM:2210	Organic Chemistry I	3
One of these:		
PHYS:1400	Basic Physics	4
PHYS:1400 & PHYS:1409	Basic Physics and Basic Physics Lab (PHYS:1400 taken for 3 s.h. and PHYS:1409 taken for 1 s.h.)	4
PHYS:1511 & PHYS:1512	College Physics I and College Physics II	8
One of these:		
BIOS:4120	Introduction to Biostatistics	3
MATH:1460	Calculus for the Biological Sciences	4
MATH:1550	Engineering Calculus I	4
MATH:1850	Calculus I	4
STAT:3510/ IGPI:3510	Biostatistics	3
One of these:		
GHS:2000/ ANTH:2103	Introduction to Global Health Studies	3
GHS:2320/ ANTH:2320	Origins of Human Infectious Disease	3

Scholar Track, Microbiology and Immunology Courses

Students earn a minimum of 19 s.h. in Department of Microbiology and Immunology courses from the following.

Course #	Title	Hours
Both of these:		
MICR:2157	General Microbiology (required with a grade of C or higher)	3
MICR:2158	General Microbiology Laboratory (required with a grade of C or higher)	2
One of these:		
MICR:3165	Genetics of Bacterial Pathogens Lab and Discussion	3
MICR:3178	Virology Laboratory	2
MICR:4161	Undergraduate Research in Microbiology (must be taken for at least 2 s.h.)	arr.
MICR:4171	Honors Undergraduate Research in Microbiology (must be taken for at least 2 s.h.)	arr.

At least three of these:		
MICR:3147	Immunology and Human Disease	3
MICR:3159	Bacteria and Human Disease	3
MICR:3168	Viruses and Human Disease	3
MICR:3170	Bacterial Genetics	3

Students fulfill the remainder of the 19 s.h. with additional microbiology and immunology courses (prefix MICR) selected from the following.

Course #	Title	Hours
MICR:3145	Honors in Microbiology Thesis Preparation (required for honors in microbiology)	1
MICR:3162	Bacterial Physiology and Cell Biology	2
MICR:3165	Genetics of Bacterial Pathogens Lab and Discussion	3
MICR:3177	Virology Discussion	2
MICR:3178	Virology Laboratory	2
MICR:3182	From Data to Discovery: Hands-On Code-Free Computational Biology	2
MICR:4161	Undergraduate Research in Microbiology	arr.
MICR:4171	Honors Undergraduate Research in Microbiology	arr.
MICR:4175	Topics in Parasitism	1
MICR:5264	Directed Study in Microbiology	arr.

A maximum of 4 s.h. earned in either MICR:4161 Undergraduate Research in Microbiology or MICR:4171 Honors Undergraduate Research in Microbiology may be counted toward the major. However, students earning honors in the major must complete 6 s.h. in MICR:4171 Honors Undergraduate Research in Microbiology; see Honors [p. 1908] in this section of the catalog.

Scholar Track, Advanced Elective Coursework

Course #	Title	Hours
6 s.h. from these:		
BIOL:2512	Fundamental Genetics	4
BIOL:2723	Cell Biology	3
BIOL:3172	Evolution	4
BIOL:3212/ IGPI:3212	Bioinformatics for Beginners	3
BIOL:3314/ IGPI:3314	Genomics	3
BIOL:4213/ GENE:4213/ IGPI:4213	Bioinformatics	2,4
BMB:3310/ CBIO:3310/ MMED:3310	Practical Data Science and Bioinformatics	3
CPH:2230	Finding Patient Zero: The Exploration of Infectious Disease Transmission and Pandemic Threats	3
GHS:2000/ ANTH:2103	Introduction to Global Health Studies (if not taken as supporting coursework option)	3
GHS:2320/ ANTH:2320	Origins of Human Infectious Disease (if not taken as supporting coursework option)	3
PCOL:3101	Pharmacology I: A Drug's Fantastic Journey	3
PCOL:3102	Pharmacology II: Mechanisms of Drug Action	3
Additional microbiology and immunology course (prefix MICR) numbered MICR:3145 or above, excluding MICR:3164 and MICR:5875		

Honors

Honors in the Major

Students majoring in microbiology (either track) have the opportunity to graduate with honors in the major. They must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33 and a GPA of at least 3.33 in work for the major. To graduate with honors in the microbiology major, students must complete an additional 3 s.h. of coursework in microbiology and immunology beyond that required for the major. This must include 6 s.h. in MICR:4171 Honors Undergraduate Research in Microbiology that introduces them to experimental research. The final semester before graduation, students must complete MICR:3145 Honors in Microbiology Thesis Preparation, and must successfully present written and oral presentations of their research projects.

More information on honors in Microbiology can be found here.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the microbiology major.

Career Advancement

Graduates find employment opportunities in government, hospitals, public health laboratories, research laboratories, and industrial laboratories (food, dairy, chemical, pharmaceutical, and biotechnology companies). Those who pursue advanced degrees have more advanced career opportunities in these same areas, with greater responsibilities and higher salaries, as well as in college and university teaching.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the third semester begins: BIOL:1411 Foundations of Biology, CHEM:1110 Principles of Chemistry I, CHEM:1120 Principles of Chemistry II, and an approved calculus or biostatistics course.

Before the fifth semester begins: BIOL:1412 Diversity of Form and Function, CHEM:2210 Organic Chemistry I, MICR:2157 General Microbiology, and MICR:2158 General Microbiology Laboratory.

Before the seventh semester begins: seven more courses in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: another 10–12 s.h. of coursework.

During the eighth semester: enrollment in all remaining coursework in the major, all remaining required GE CLAS Core courses, and a sufficient number of semester hours to graduate.

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative or Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Society.

b Enrollment in chemistry courses requires completion of a placement exam.

c Fulfills a major requirement and may fulfill a GE requirement.

d Other course options include BIOS:4120, MATH:1550, MATH:1850, STAT:3510; selecting a course that satisfies the Quantitative or Formal Reasoning GE requirement is recommended.

e Enrollment in math courses requires completion of a placement exam.

f Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.

g Students must earn a grade of C or higher in BIOL:1411, or in MICR:2157 and MICR:2158, in order to take more advanced Department of Microbiology and Immunology courses.

h GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.

i Students who have completed four levels of a single language or two levels of two different languages in high school or college have satisfied the GE CLAS Core World Languages requirement. Students who have completed three levels of a single language may complete a fourth-level course in the same language or may choose an approved World Language and Cultural Exploration course. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course. Contact your academic advisor or CLAS Undergraduate Programs Office with questions concerning the World Languages requirement.

j Students must complete at least 18 s.h. of microbiology and immunology courses including the following: MICR:2157 and MICR:2158; three courses (9 s.h.) from MICR:3147, MICR:3159, MICR:3168, MICR:3170; additional departmental courses (4 s.h., prefix MICR) to satisfy remaining hours. See the General Catalog for list of approved courses. Some courses are not offered every semester, so check MyUI for availability.

k See the General Catalog for list of approved courses.

l Please see Academic Calendar, on Office of the Registrar website, for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Degree Services.

Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course. Contact your academic advisor or CLAS Undergraduate Programs Office with questions concerning the World Languages requirement.

k GHS:2320 is typically offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

l Consult academic advisor for guidance and approval of research project. A maximum of 4 s.h. earned in MICR:4161 may be counted toward the major.

mAlternatively, students may take both PHYS:1511 and PHYS:1512. PHYS:1400 can also be completed for 3 s.h. if taken with PHYS:1409.

n See the General Catalog for list of approved courses.

o Please see Academic Calendar, on Office of the Registrar website, for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Degree Services.

Microbiology, Minor

Requirements

The undergraduate minor in microbiology requires a minimum of 15 s.h. in Department of Microbiology and Immunology courses (prefix MICR), including 12 s.h. in courses considered advanced for the minor taken at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

Courses numbered MICR:3147 and above are considered advanced for the minor, excluding MICR:3164.

Students may count a maximum of 2 s.h. earned in MICR:4161 Undergraduate Research in Microbiology or MICR:4171 Honors Undergraduate Research in Microbiology toward the minor.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Microbiology, Minor

Course	Title	Hours
Academic Career		
Any Semester		
Students must maintain a GPA of at least 2.00 in all courses for the microbiology minor and in all UI courses for the minor.		
Coursework in the microbiology minor may not be taken pass/nonpass.		
	Hours	**0**
First Year		
Fall		
CHEM:1110	Principles of Chemistry I [a, b]	4
	Hours	**4**
Spring		
BIOL:1411	Foundations of Biology [c]	4
	Hours	**4**
Second Year		
Fall

	Total Hours	**25**

a Prerequisite for BIOL:1411, which is a prerequisite for all advanced microbiology courses.
b Enrollment in chemistry courses requires completion of a placement exam.
c Prerequisite for all advanced microbiology courses.
d Prerequisite with a grade of C or higher for most advanced microbiology courses.
e Prerequisite with a grade of C or higher for advanced microbiology laboratory courses.
f Courses numbered MICR:3147 and above are considered advanced for the minor, excluding MICR:3164.

Microbiology, MS

Learning Outcomes

Graduates will be able to:

- demonstrate detailed knowledge in their area of specialization;
- master the analytical/methodological and critical thinking skills needed to evaluate and conduct research in their areas of specialization;
- demonstrate their ability to design and conduct original research in their chosen fields of specialization;
- teach college-level courses in their areas of specialization; and
- communicate in both the written and oral form in a clear and effective manner.

Requirements

The Master of Science program in microbiology requires a minimum of 30 s.h. of graduate credit. Students must maintain a UI cumulative grade-point average of at least 2.80 to earn the degree. They are required to earn a minimum of 12 s.h. in microbiology courses chosen from three of the department's four subdisciplines: bacteriology, parasitology, immunology, and virology. They may substitute a course they have already taken (at the University of Iowa or elsewhere) for a course requirement, with the MS advisory committee's approval.

Additional course requirements depend on students' interests and the advice of the thesis committee. Students must write a thesis based on their own research and defend it satisfactorily in an oral examination. No more than 9 s.h. of credit for thesis research may be counted toward the 30 s.h. required for the degree.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They should have a cumulative grade-point average of at least 3.00 and must have completed courses in biology, chemistry (inorganic and organic), mathematics including calculus, and physics. Those admitted with deficiencies must complete the relevant coursework during their first year of graduate study. Admission is determined through a review and formal vote by the primary microbiology faculty.

Students interested in the MS program in microbiology require a microbiology faculty sponsor and approval of the microbiology graduate admission or graduate advisory committee.

Microbiology, PhD

Graduate study in microbiology is designed to help students become highly qualified in microbiology research and teaching. PhD students develop expertise in research in a specific area of microbiology and/or immunology.

Faculty members have strengths in bacteriology, parasitology, immunology, and virology. Areas of research include cellular microbiology, molecular virology and immunology, bacterial biochemistry and physiology, bacterial and viral pathogenesis, and molecular parasitology. Working in the laboratory of their PhD advisor, students learn to define and experimentally investigate scientific questions and to conduct original research in preparation for positions in academia, government, and industry.

Learning Outcomes

Graduates will be able to:

- demonstrate detailed knowledge in their area of specialization;
- master the analytical/methodological and critical thinking skills needed to evaluate and conduct research in their areas of specialization;
- demonstrate their ability to design and conduct original research in their chosen fields of specialization;
- teach college-level courses in their areas of specialization; and
- communicate in both the written and oral form in a clear and effective manner.

Requirements

The Doctor of Philosophy in microbiology requires a minimum of 72 s.h. of graduate credit, including at least 12 s.h. of graded coursework. Students must maintain a UI cumulative grade-point average of at least 3.00 to earn the degree. Qualified students interested in earning the Doctor of Medicine (MD) along with the PhD may apply to the Medical Scientist Training Program [p. 1901], which offers a combined MD/PhD program.

Students have the opportunity to tailor their curriculum with courses that enhance their educational goals. They take a combination of graduate-level courses that include seminar courses.

The PhD in microbiology requires the following coursework.

Core Curriculum

Course #	Title	Hours
MICR:6255	Graduate Experimental Approaches to Molecular Microbiology	2
MICR:6265	Introduction to Grant Writing	2
MICR:7263	Graduate Student Research Seminar	1
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0

Additional courses offered by the Department of Microbiology and Immunology and other departments, as appropriate for each student

Students enroll for a minimum of 8 additional s.h., which can be selected from the following.

Course #	Title	Hours
MICR:6201/ IMMU:6201	Graduate Immunology	3
MICR:6247/ IMMU:6247	Graduate Immunology and Human Disease	4
MICR:6259	Graduate Bacteria and Human Disease	4
MICR:6267	Graduate Viruses and Human Disease	3
MICR:6268	Biology and Pathogenesis of Viruses	2
MICR:6270	Graduate Bacterial Genetics	3
MICR:6310	Biology of Bacteria and Interactions With the Host	2
MICR:7265	Topics in Virology Literature	1

Examples of Elective Coursework

Course #	Title	Hours
BIOL:4386	Introduction to Scientific Computing for Biologists	3
BMED:5207	Principles of Molecular and Cellular Biology	3
MMED:6220/ ACB:6220/ MPB:6220	Mechanisms of Cellular Organization	3

Additional Requirements

Laboratory Rotations

Graduate students rotate through two to three different laboratories during their first academic year. The laboratory rotations are approximately ten weeks each. At the conclusion of each rotation, a student meets with the rotation mentor for an exit interview and an evaluation of the student's performance. This evaluation becomes part of the student's departmental record. The student is also required to present the research completed during the rotation in the graduate seminar course.

Teaching

Graduate students participate in the formal teaching activities of the department for at least two semesters. First-year students as well as students who are within a year of receiving the PhD typically are not asked to teach. Teaching may take a variety of forms, including tutoring, leading discussions and laboratory groups, correcting examinations, preparing teaching materials, and lecturing.

Comprehensive Examination

The comprehensive examination is designed to measure a student’s ability to write and defend a research proposal. The format of this proposal follows guidelines for R21 research proposals outlined by the National Institutes of Health (NIH). Guidance, in the design of these proposals, is provided by the director of graduate studies and the student’s comprehensive examination committee.

Written Examination

During the spring semester of the second year, a student prepares a detailed research proposal. The topic of the research proposal is determined in collaboration with the advisor and the comprehensive examination committee. A detailed guide can be found in the Graduate Program in Microbiology Graduate Student Handbook on the Department of Microbiology and Immunology website.

Oral Examination

Questions during the oral examination may come from the examination proposal, coursework, or other general areas of microbiology. In order to pass the comprehensive examination, a student must satisfactorily defend the written research proposal and answer questions of general microbiology that are germane to the proposal or that are important for a full understanding of the proposed experiments and their interpretation.

Final Examination

The PhD thesis committee serves as an advisory body for the preparation of the thesis. This committee meets with the student to review the material that is expected to be incorporated into the thesis. Although meetings of the candidate with the committee should be yearly, the candidate, thesis advisor, or the committee can request a meeting at any time. A final draft of the thesis must be given to all members of the committee two weeks before the final examination. The final examination takes the form of a seminar presented to the department. This presentation is announced according to the Graduate College policy. Questions, comments, and discussion will follow. After the seminar, the candidate meets with the committee for the final thesis defense. The PhD is not awarded until the thesis is signed by the committee members and the department chair. In some cases, revisions may be required.

Combined Programs

PhD/MD

Students may work toward the MD degree and a PhD in microbiology in a combined degree program offered by the Department of Microbiology and Immunology and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1901] (Carver College of Medicine) in the catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They should have a cumulative grade-point average of at least 3.00 and have completed courses in biology, chemistry (inorganic and organic), mathematics including calculus, and physics. Those admitted with deficiencies in certain areas may be required to complete the relevant coursework during their first year of graduate study. Admission is determined through a review, interview, and formal vote of the admission committee.

Career Advancement

Graduates typically pursue research or teaching positions.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Graduate students participate in the formal teaching activities of the department for at least two semesters.

b Graduate students rotate through two to three different laboratories during their first academic year.

c Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

d Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

e Program seminar followed by the dissertation defense.

Molecular Physiology and Biophysics

Chair

- Kevin P. Campbell

Executive Associate Chair

- W. Scott Moye-Rowley

Faculty: https://physiology.medicine.uiowa.edu/profile/

Website: https://physiology.medicine.uiowa.edu/

The Department of Molecular Physiology and Biophysics participates in interdisciplinary graduate programs, including the Medical Scientist Training Program [p. 1901], a combined MD/PhD program offered by the Graduate College and the Carver College of Medicine, and it provides instruction in molecular physiology and biophysics for MD, DDS, and other health professions students. The department also conducts a co-op exchange, a vigorous training program that gives undergraduate students the opportunity to develop as independent researchers in preparation for graduate studies.

The department's principal research areas include cell biology, genetics, endocrinology, neuroscience, and membrane physiology and biophysics. The unifying theme is the understanding of signal transduction mechanisms involved in regulating function at the cellular and molecular levels.

Research

Faculty research interests in the Department of Molecular Physiology and Biophysics encompass molecular and cellular endocrinology, cellular and developmental neurophysiology, and membrane structure and function. Within these, there are multiple areas of interest, including hormone receptors, reproductive endocrinology, signal transduction, regulation of gene expression, synaptic transmission, neuronal differentiation, membrane ion channels, regulation of excitability, and cardiovascular electrophysiology and regulation. Experimental models currently being investigated include rodents, yeast, Drosophila, and cultured cell lines from a variety of species.

Facilities

Two floors of the Bowen Science Building are devoted to research and teaching in the Department of Molecular Physiology and Biophysics. Department faculty members also occupy laboratory facilities in the Medical Education Research Facility, Pappajohn Biomedical Discovery Building, and the Carver Biomedical Research Building. In addition to specialized equipment in faculty research laboratories, the department provides equipment for fluorescence microscopy, isotope analysis, cell culture, and molecular biology. It also has access to the university network and the multimedia education facilities. Additional resources are available at the Hardin Library for the Health Sciences.

Courses

Molecular Physiology and Biophysics Courses

MPB:4199 Research, Independent Study **arr.**
Recommendations: closed to molecular physiology and biophysics graduate students.

MPB:5153 Graduate Physiology **4 s.h.**
Principles of human physiology, organ systems, cell function. Offered fall semesters. Requirements: grades of C- or higher in BIOL:1411 and CHEM:2210 and CHEM:2220, and graduate standing.

MPB:5200 Medical Physiology Online **5 s.h.**
Fundamental principles of cellular membranes, muscle, sensory organs, motor neurological systems, autonomic nervous systems, cardiovascular, pulmonary, renal, gastrointestinal, endocrine, and reproductive systems; interdependence of organ systems to maintain a normal physiological state using clinical correlates as applied to humans; basic physiological principles that establish a solid foundation for future pathophysiological and pharmacological concepts. Recommendations: medical, dental, physician assistant, nurse anesthesia, physical therapy, or graduate standing.

MPB:5201 Advanced Physiology Online **3 s.h.**
Examination of cellular and organ systems of medical physiology; fundamental principles of cellular membranes including muscle, sensory organs, motor neurological systems, autonomic nervous system, cardiovascular, pulmonary, renal, gastrointestinal, endocrine, and reproductive physiology; emphasis on interdependence of organ systems to maintain a normal physiological state (homeostasis) using clinical correlates as applied to humans; basic physiological principles that establish a solid foundation for future pathophysiological and pharmacological concepts.

MPB:5241 Neuromuscular Diseases: Case-Based Seminar **1 s.h.**

MPB:6220 Mechanisms of Cellular Organization **3 s.h.**
Current understanding of basic cell biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BMB:3130. Same as ACB:6220, MMED:6220.

MPB:6226 Cell Cycle Control **1 s.h.**
Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Same as ACB:6226, MMED:6226.

MPB:6227 Cell Fate Decisions **1 s.h.**
Cellular fate decisions including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Same as ACB:6227, MMED:6227.

MPB:6265 Neuroscience Seminar **0-1 s.h.**
Research presentations. Same as ACB:6265, BIOL:6265, NSCI:6265, PSY:6265.

MPB:6302 Research Physiology and Biophysics **arr.**
Requirements: molecular physiology and biophysics graduate standing.

MPB:7402 Thesis arr.
Requirements: molecular physiology and biophysics PhD candidacy.

MPB:8115 Human Physiology for Dental Students 4 s.h.
Principles of human physiology, organ systems, cell function. Offered fall semesters. Requirements: grades of C- or higher in BIOL:1411, CHEM:2210, and CHEM:2220; and DDS enrollment.

Neurology

Chair

- George B. Richerson

Faculty: https://neurology.medicine.uiowa.edu/profile/

Website: https://neurology.medicine.uiowa.edu/

Neurology is the branch of medical science concerned with diagnosis and management of disorders of the brain, spinal cord, peripheral nervous system, and muscle.

The Department of Neurology's hallmark is its history of carefully integrating patient care, scientific investigation, and the education of medical, postdoctoral, and graduate students. The department also offers research opportunities in various fields of neuroscience including neuropsychology, neuroimaging, and neuroanatomy to PhD students in neuroscience and psychology.

Research

The faculty's investigative interests center on cognitive neuroscience, degenerative diseases, cerebrovascular disease, neurogenetics, neuromuscular diseases, electrophysiological correlates of central and peripheral nervous system disease, growth factors in the nervous system, control and regulation of autonomic functions, neuro-ophthalmology, movement disorders, epilepsy, and pain management. For more information see the Department of Neurology website.

The new Iowa Center for Neurodegeneration, housed in the Department of Neurology and affiliated with the Iowa Neuroscience Institute, will concentrate on combating neurodegenerative diseases such as Alzheimer’s disease, Parkinson’s disease, dementia, and amyotrophic lateral sclerosis (ALS).

MD Training

The department provides clinical and clinical research training to second-, third-, and fourth-year MD students.

Residency

The Department of Neurology offers an active, four-year approved residency program that qualifies physician trainees for board certification in neurology. Experience in clinical electrophysiology, pediatric neurology, psychiatry, and neuropathology is part of this training.

Courses

Neurology Courses

NEUR:5365 Seminar: Neuropsychology and Neuroscience arr.
Clinical neuropsychology and cognitive neuroscience: cutting-edge research from scientific journals, case presentations in clinical neuropsychology, and current research. Same as NSCI:5365, PSY:5365.

NEUR:7235 Neurobiology of Disease 3 s.h.
Broad, thematic understanding of disease mechanisms in neurobiological disorders. Prerequisites: ACB:6252. Same as NSCI:7235.

NEUR:8301 Clinical Neurology 2,4 s.h.
Experience in clinical neurology through ward work and case-based conferences linked to required reading; focus on neurologic examination, diagnosis of neurologic problems.

NEUR:8401 Advanced Inpatient Neurology 2,4 s.h.
Experience and management of patients with seizure disorders, headache, cerebrovascular diseases; conferences, clinical rounds; two weeks on each inpatient service for a total of four weeks. Prerequisites: NEUR:8301.

NEUR:8402 Advanced Outpatient Neurology 2,4 s.h.
Experience in evaluation, management of patients with various neurologic diseases; four weeks in clinic patient care. Prerequisites: NEUR:8301.

NEUR:8404 Advanced Inpatient Subinternship in Neurology 4 s.h.
Care of patients with acute and serious neurological diseases, management of patients with varied cerebrovascular diseases; treatment of acute brain disease, comorbid medical diseases, medical and neurological complications that occur among patients with stroke; clinical assessments of patients, writing orders and clinical notes, contribution to rounds; close communication with patients, families, and colleagues; assignment to evening calls for emergency visits and consultations.

NEUR:8497 Research in Neurology arr.
Medical research, clinical or laboratory projects; individual study.

NEUR:8498 Neurology On Campus arr.

NEUR:8499 Neurology Off Campus arr.

Neuroscience and Pharmacology

Chair

- Edwin "Ted" G. Abel

Faculty: https://neuroscience-pharmacology.medicine.uiowa.edu/people

Website: https://neuroscience-pharmacology.medicine.uiowa.edu/

The Department of Neuroscience and Pharmacology drives breakthroughs in the scientific understanding of neurological, metabolic/obesity, and cancer-related diseases, develops innovative treatments, and educates the next generation of leaders in the pharmacological sciences.

The department's mission is supported by dedicated faculty mentors and the centers and institutes they participate in, including the Holden Comprehensive Cancer Center, the Abboud Cardiovascular Research Center, the UI Fraternal Order of Eagles Diabetes Research Center, and the Iowa Neuroscience Institute. Students at all levels (undergraduate, graduate, professional, and postdoctoral scholar) work side-by-side with faculty to explore the basic mechanisms of disease and drug action while also performing meaningful, translational research. Through cutting-edge research facilities, highly applicable coursework, and a collaborative environment, the department provides students with the skills and expertise needed to succeed in the field.

Programs

Graduate Programs of Study

- Master of Science in Pharmacology
- Doctor of Philosophy in Pharmacology

Students interested in doctoral studies in pharmacology should apply under the umbrella program in Biomedical Science [p. 1698] (select pharmacology subprogram). Direct applications to the MS and PhD in pharmacology are not currently being considered.

Courses

Neuroscience and Pharmacology Courses

PCOL:2220 Drug Use and Abuse 3 s.h.
Effects of common drugs on the body and how they occur; consumer education in easy-to-understand language; basic principles of pharmacology and toxicology; drugs that work on specific systems including antibiotics, oral contraceptives, sedatives, stimulants, hallucinogens, narcotics, steroids, diabetes drugs, and cancer drugs; for students with little to no science background. Offered spring semesters. GE: Natural Sciences without Lab.

PCOL:3101 Pharmacology I: A Drug's Fantastic Journey 3 s.h.
Introduction to basic pharmacological principles by following a drug's journey from its site of administration to its site of elimination; common mechanisms by which drugs affect the body and mechanisms underlying drug actions on two primary body systems—nervous and cardiovascular; structured learning environment bolstered by highly interactive application sessions where students apply course material via collaborative work on problem sets/activities; for students interested in medicine, pharmacy, research, and industry. Offered fall semesters. Prerequisites: (CBE:3205 or BIOL:1411) and CHEM:1110. Recommendations: additional higher-level biology and chemistry courses helpful.

PCOL:3102 Pharmacology II: Mechanisms of Drug Action 3 s.h.
Expansion of basic pharmacological concepts and further exploration of how they are applied to define a drug's actions on the body; students continue their exploration of the body by discussing various disorders including neuropsychiatric and immune disorders, cancer, diabetes, and microbial infections in conjunction with current treatments; structured learning environment bolstered by highly interactive discussion sessions where students learn to apply course material via collaborative work on problem sets/activities; for students interested in medicine, pharmacy, research, and industry. Offered spring semesters. Prerequisites: PCOL:3101. Recommendations: additional higher-level courses in biology and chemistry helpful.

PCOL:4199 Undergraduate Research in Neuroscience and Pharmacology arr.
Experimental research under faculty supervision in department laboratories.

PCOL:5130 Basic Concepts in Pharmacology 3 s.h.
Introduces pharmacological principles underlying drug absorption, distribution, and metabolism and how these principles affect drug dosing and drug receptor interactions. Explore two of the following four receptor/signaling systems commonly affected by drugs: growth factors, neurotransmitters, ion channels, or steroid and G protein-coupled receptors. Offered spring semesters.

PCOL:5135 Principles of Pharmacology 1 s.h.
Basic pharmacological principles underlying drug absorption, drug distribution throughout the body, drug metabolism, and drug elimination; how these processes determine drug dosing and the means by which dosing parameters are characterized; drug receptor interactions and their quantitation. Offered spring semesters.

PCOL:5136 Pharmacogenetics and Pharmacogenomics 1 s.h.
Impact of genetic variation on the actions and metabolism of drugs; database search techniques to identify variants. Offered spring semesters. Recommendations: PCOL:5135, and undergraduate or graduate biochemistry and/or genetics.

PCOL:5137 Neurotransmitters 1 s.h.
Mechanisms of neurotransmission focusing on mechanisms of synthesis, regulation of release, mechanisms of action, means of degradation, and CNS pathways for major neurotransmitters; disease states involving various neurotransmitter systems. Offered spring semesters.

PCOL:5204 Basic Biostatistics and Experimental Design 1 s.h.
Overview of theory of experimental design and data analysis in biological sciences; types of analyses available for common types of data generated in biomedical sciences; review of statistical methods used in published studies; cursory coverage of mathematical computations involved in various analytical tests. Offered fall semesters.

PCOL:6015 Topics in Pharmacology and Neuroscience 1 s.h.
Recent advances in pharmacology, neuropharmacology, developmental neurobiology, neuroendocrinology, and related neurosciences.

PCOL:6080 Pharmacology Seminar 1 s.h.

PCOL:6090 Graduate Research in Pharmacology arr.

PCOL:6099 Special Topics in Pharmacology arr.

PCOL:6203 Pharmacology for Graduate Students 5 s.h.
Pharmacology of all major drugs in use today; discussion of basic principles underlying drug actions and disposition; physiology, biochemistry, and pathophysiology of specific organ systems; how various drugs impact these systems; how drugs are used to treat disorders of each system; major adverse effects of drugs and how those occur; differences among drugs within each drug group. Offered fall semesters. Prerequisites: BMED:5207 and MPB:5153.

PCOL:6204 Pharmacology for Health Sciences: Nurse Anesthetist 5 s.h.
Pharmacology of all major drugs in use today; discussion of basic principles underlying drug actions and disposition; physiology, biochemistry, and pathophysiology of specific organ systems; how various drugs impact these systems; how drugs are used to treat disorders of each system; major adverse effects of drugs and how those occur; differences among drugs within each drug group. Offered fall semesters. Prerequisites: MPB:5200 and NURS:6000. Requirements: enrollment in Anesthesia Nursing Program.

PCOL:6207 Ion Channel Pharmacology 1 s.h.
Heuristic, semiquantitative approach to concepts in ion channel physiology and pharmacology; up-to-date physical principles, classification, and structure/function relationships for major voltage-gated ion channels that facilitate application of abstract concepts to physiological, pharmacological, and general biological problems. Offered spring semesters.

PCOL:6211 Steroid and G Protein-coupled Receptors 1 s.h.
Structure-function relationships of small molecular weight of steroid hormone receptors and G protein-coupled receptors. Special emphasis on the molecular mechanisms of signaling for both receptor families.

PCOL:6225 Growth Factor Receptor Signaling 1 s.h.
Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling and relevance of these signaling processes to various human diseases. Offered fall semesters.

PCOL:6250 Advanced Problem Solving in Pharmacological Sciences 1 s.h.
Discussion of methodologies, strategies, and approaches commonly used to solve pharmacological sciences problems; use of interpersonal problem-solving skills to develop experimental study plans for solving contemporary scientific problems in pharmacology.

Neurosurgery

Chair

- Matthew A. Howard

Faculty: https://medicine.uiowa.edu/neurosurgery/profile/

Website: https://medicine.uiowa.edu/neurosurgery/

The Department of Neurosurgery provides an experience oriented toward patient care and basic research concerning diseases and the physiology of the nervous system. Students develop awareness of neurosurgery's role in treating head and spine trauma, vascular disorders, brain and spinal cord tumors, pain and peripheral nerve abnormalities, degenerative spine pathology, and surgical treatment of epilepsy and movement disorders.

Clinical courses are designed around patient-centered discussions interwoven with operating room experiences. Lectures and conferences are scheduled on specific topics.

Faculty

Neurosurgery faculty strengths are centered in the physiology of spinal cord trauma, epilepsy, auditory brain function and pain, primary brain tumor genetics, central nervous system tissue culture, spinal column biomechanics, and movement disorders. The department has expertise in clinical management across the spectrum of central nervous system diseases.

MD Training

The department provides third- and fourth-year MD students with access to special expertise in selected topics of investigation regarding the central nervous system and to a clinical course through special arrangements with the faculty.

Facilities

Multiple, fully equipped laboratory space is available to support scientific research of the central nervous system. Faculty and technical assistance is available in all laboratories.

Courses

Neurosurgery courses are open only to MD and qualified associated health sciences students.

Neurosurgery Courses

NSG:8401 Subinternship in Neurosurgery 4 s.h.
Advanced clinical clerkship in neurological surgery; emphasis on diagnosis and operative management of surgical neurological disease.

NSG:8497 Research in Neurological Surgery arr.
Laboratory investigation of spinal cord injury, spinal column biomechanics and instrumentation, electrophysiology of pain, epilepsy and hearing, molecular genetics and physiology of brain tumors.

NSG:8498 Neurosurgery On Campus arr.
Clinical clerkship; individually arranged by student with departmental approval.

NSG:8499 Neurosurgery Off Campus arr.
Arranged by student with department approval.

Nuclear Medicine Technology

Director

Director, Medical

- Yusuf Menda

Director, Technical

- Daniel Petersen

Undergraduate major: nuclear medicine technology (BS)

Website: https://medicine.uiowa.edu/radsci/programs/nuclear-medicine-technology

Nuclear medicine technologists are professionals in a medical specialty that uses radioactive tracers for diagnostic, therapeutic, and research purposes. Technologists provide direct patient care and generally are employed in hospitals and clinics. They work hand in hand with nuclear medicine physicians, health physicists, radiopharmacists, and radiochemists as an integral part of a highly trained specialty team.

In addition to using sophisticated detectors and computers to trace the movement and localization of radioactive tracers in the human body, nuclear medicine technologists have responsibilities that include radiation safety, quality control testing, radiopharmaceutical preparation and administration, and general patient care.

The Nuclear Medicine Technology Program is fully accredited by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT). Nuclear medicine technology is one of two undergraduate majors in the field of medical imaging offered by the Carver College of Medicine; see Radiation Sciences [p. 1966] in the catalog.

The Carver College of Medicine is located on the University of Iowa health sciences campus, which includes University of Iowa Health Care, one of the nation's largest university-owned teaching hospitals. For information about the college's academic programs and resources, see Carver College of Medicine [p. 1843] in the catalog.

Programs

Undergraduate Program of Study

Major

- Major in Nuclear Medicine Technology (Bachelor of Science) [p. 1925]

Courses

Nuclear Medicine Technology Courses

RSNM:3120 Nuclear Medicine and PET Clinical Procedures I **3 s.h.**
Introduction to medical specialty of nuclear medicine and molecular imaging; basic theories of radiation protection, radiation physics and nuclear medicine instrumentation, radiopharmacy, nuclear medicine and positron emission tomography (PET) clinical procedures, professional standards of nuclear medicine technologist. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3121 Nuclear Medicine Technology Clinical Internship I **3 s.h.**
Hands-on clinical experience working with patients and performing routine nuclear medicine diagnostic imaging procedures under direct supervision of qualified clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3131 Radiopharmaceuticals **3 s.h.**
Introduction to radiopharmaceuticals; emphasis on physical, chemical, and biologic properties and their clinical use; fundamental aspects of radiopharmaceuticals including characteristics, preparation, quality control, and clinical use. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3132 Radiation Safety and Regulations in Nuclear Medicine **1 s.h.**
Continuation of RSP:3130; geared towards students enrolled in the nuclear medicine technology program.

RSNM:3140 Foundations in Nuclear Medicine and PET **1 s.h.**
Foundational instruction in the math and chemistry associated with radiopharmacy and instrumentation in the nuclear medicine technology profession, such as positron emission tomography (PET). Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3220 Nuclear Medicine and PET Clinical Procedures II **3 s.h.**
Proper execution of nuclear medicine and positron emission tomography (PET) procedures from a technical point of view; published protocols and procedures specific to University of Iowa Health Care; routine setup, common errors, artifact identification, computer processing protocols, and patient care concerns identified for each procedure; review of human anatomy, physiology, and pathology germane to understanding and proper execution of nuclear medicine procedures. Prerequisites: RSNM:3120. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3221 Nuclear Medicine Technology Clinical Internship II **3 s.h.**
Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors. Prerequisites: RSNM:3121. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3231 Nuclear Medicine Instrumentation 3 s.h.
Instruments used in medical imaging to generate and detect ionizing radiation (i.e., SPECT/CT and PET/CT scanners, dose calibrators, well counters, survey meters); focus on instrument quality control testing. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3320 Foundations in Nuclear Medicine Instrumentation 2 s.h.
Instruction in physics and statistics associated with nuclear medicine and positron emission tomography (PET) instrumentation. Prerequisites: RSNM:3220. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3321 Nuclear Medicine Technology Clinical Internship III 4 s.h.
Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors. Prerequisites: RSNM:3221. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:4121 Nuclear Medicine Technology Clinical Internship IV 4 s.h.
Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors. Prerequisites: RSNM:3321. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:4221 Nuclear Medicine Technology Clinical Internship V 5 s.h.
Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors. Prerequisites: RSNM:4121. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:4222 Nuclear Medicine Technology Capstone and Certification Exam Preparation 5 s.h.
Students prepare to take the Nuclear Medicine Technology Certification Board (NMTCB) and American Registry of Radiologic Technologists (ARRT) national certification exams. Requirements: Nuclear Medicine Technology Program enrollment.

Nuclear Medicine Technology, BS

Undergraduate study in nuclear medicine technology is guided by the academic rules and procedures outlined under Undergraduate Rules and Procedures [p. 1844] in the Carver College of Medicine section of the catalog.

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Requirements

The Bachelor of Science in nuclear medicine technology requires a minimum of 120 s.h. of credit. Work for the degree includes a set of courses that are prerequisite to entering the major, 60 s.h. of coursework in the major, and elective coursework sufficient to complete the minimum of 120 s.h. required for graduation. Registered nuclear medicine technologists interested in earning a Bachelor of Science degree by distance education should see the Radiation Sciences RT to BS (Online) [p. 1985] section of the catalog.

Accepted students enter the professional program, the nuclear medicine technology major, and the Carver College of Medicine the following fall semester. Students must maintain an overall cumulative, UI, and semester grade-point average (GPA) of at least 2.00. Students must also earn a grade of C or higher in each course required for the major. Upon successful completion of the program, they earn a Bachelor of Science degree and are eligible to apply for the nuclear medicine technology national certification examinations.

The program strongly advises students entering the university to pursue a course of study that is applicable to another major, most commonly biochemistry, biology, chemistry, or microbiology, so that if they are not admitted to the Nuclear Medicine Technology Program, they still may complete a major and earn a bachelor's degree.

Students who have declared a nuclear medicine technology interest but have not yet applied and been accepted to the Carver College of Medicine major are advised by the University of Iowa Academic Advising Center. After they have been accepted to the nuclear medicine technology program, they are advised by the Radiation Sciences Office of Student Affairs.

The Bachelor of Science in nuclear medicine technology requires the following coursework.

Prerequisites to the Nuclear Medicine Technology Major

Students must complete the following prerequisite courses and must have earned 60 s.h. of college credit with an overall cumulative GPA of at least 2.50 and a UI GPA of at least 2.00. Additionally, they must earn a 2.00 term GPA in the spring semester immediately preceding the start of the nuclear medicine major.

Course #	Title	Hours
Rhetoric		
RHET:1030	Rhetoric: Writing and Communication	4-5
Chemistry With Laboratory		
CHEM:1110	Principles of Chemistry I	4
Anatomy With Laboratory		
One of these:		
HHP:2100 & HHP:2110	Human Anatomy and Human Anatomy Laboratory	4
HHP:3115	Anatomy for Human Physiology With Lab	5
Physiology With Laboratory		
One of these:		
HHP:2400 & HHP:2410	Fundamentals of Human Physiology and Human Physiology Laboratory	4
HHP:3500 & HHP:2410	Human Physiology and Human Physiology Laboratory	4
HHP:3550	Human Physiology With Laboratory	5
Physics		
One of these:		
PHYS:1400	Basic Physics	3-4
PHYS:1511	College Physics I	4
Psychology		
PSY:1001	Elementary Psychology	3
Mathematics		
One of these:		
MATH:1020	Elementary Functions	4
MATH:1440	Mathematics for the Biological Sciences	4
A more advanced mathematics course		
Medical Terminology		
CLSA:3750	Medical and Technical Terminology	2

Culture, Society, and the Arts

Students complete two courses for 3 s.h. each in two of these areas (total of 6 s.h.).

- Understanding Cultural Perspectives
- Historical Perspectives
- International and Global Issues
- Literary, Visual, and Performing Arts
- Values and Society

See GE CLAS Core [p. 22] (College of Liberal Arts and Sciences) in the catalog for approved courses in the areas listed.

Coursework in the Major

Students admitted to the nuclear medicine technology major spend two years in a clinical curriculum that is organized in accordance with the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT) Accreditation Standards for Nuclear Medicine Technologist Education. They complete coursework in the following areas: radiopharmacy, radiation safety and radiobiology, patient care, nuclear medicine and positron emission tomography (PET) procedures, radiation physics and instrumentation, quality management, healthcare administration, medical and professional ethics, research methodology, emotional intelligence, magnetic resonance imaging (MRI), and computed tomography (CT). Practical

clinical rotations focus on nuclear medicine, PET and CT imaging, nuclear medicine therapy, clinical radiopharmacy, nuclear medicine computer applications, and quantification of radioactivity in vivo and in vitro.

Students must earn a grade of C or higher in each course required for the major.

Course #	Title	Hours
RSNM:3120	Nuclear Medicine and PET Clinical Procedures I	3

RSRT:3220	Emotional Intelligence for the Health Care Professional	2
Total Hours		**60**

Admission

Admission to the nuclear medicine technology major is competitive and selective; acceptance into the major is not guaranteed. Students who wish to enter the major must first be admitted to the University of Iowa as College of Liberal Arts and Sciences (CLAS) students with a nuclear medicine technology interest.

As CLAS students, there are two application options for the nuclear medicine technology professional program. Early acceptance is an option for students who will have at least 30 s.h. and half of the prerequisite courses completed by the end of the spring semester of the year in which they are applying. Standard acceptance is an option for students who will have all of the prerequisite courses, including 60 s.h., completed by the end of the spring semester of the year in which they are applying. Students must apply to the nuclear medicine technology professional program by Jan. 15. Standard acceptance applications will be considered for the upcoming fall; early acceptance applications will be considered for the following fall. See Apply on the Radiation Sciences Program website. Transfer students are encouraged to apply in early November to allow time for transfer course articulation.

The Nuclear Medicine Technology Program accepts a maximum of eight students per year. Applications are due by January 15 and the class is selected by early March. The program begins each fall semester and lasts two years.

Applicants for admission to the University of Iowa whose first language is not English are strongly encouraged to complete the University of Iowa English Proficiency Evaluation and satisfy the university's English Proficiency Requirements before they apply to a professional program. Students must have permission to register for a full academic load before they may be admitted to the Nuclear Medicine Technology Program.

The nuclear medicine technology major requires students to complete a minimum of two years of a high school world language, or college-level coursework deemed by the university as equivalent, prior to admission.

For additional information on UI admission requirements, contact the University of Iowa Admissions.

Recommended Pre-Major Courses

The Nuclear Medicine Technology Program recommends that before students submit an application to the program and the major, they job-shadow a professional who works in nuclear medicine and positron emission tomography (PET) and gain hands-on patient care experience.

The following courses are recommended prior to the Nuclear Medicine Technology Program application.

Course #	Title	Hours
All of these:		
CHEM:1120	Principles of Chemistry II	4
PSY:1010	Your Brain Unlocked: Learning About Learning	1
RSP:1100	Introduction to the Radiation Sciences	1
STAT:1020	Elementary Statistics and Inference	3
One of these:		
BIOL:1140	Human Biology: Nonmajors	4
HHP:1400	Human Anatomy and Physiology	3
One of these:		

BAIS:1500	Business Computing Essentials	2
CS:1020	Principles of Computing	3

Career Advancement

The Nuclear Medicine Technology Program has a stellar record of job placement. Graduates typically work as nuclear medicine technologists, beginning as entry-level staff at hospitals or clinics. With experience, many earn advanced degrees in areas such as radiation biology, health physics, or medicine. Some work in the private sector as sales or marketing specialists in nuclear medicine.

Graduates also find career opportunities in education as instructors, coordinators, or program directors; and in administration, industry, or research and development. Those pursuing government-related jobs might find positions as regulatory agency inspectors or radiation safety officers. See the Occupational Outlook Handbook for nuclear medicine technologists on the United States Department of Labor Bureau of Labor Statistics website for career information and outlook.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a The Academic Advising Center advises Nuclear Medicine Technology Interest students on prerequisite course planning. Students are advised for success, based on academic strength, not necessarily for a four year plan. Prerequisites may take more than two years to complete.

b This course is recommended not required.

c One of these courses is strongly recommended to prepare for the anatomy and physiology courses.

d Students must complete 6 s.h. by taking 3 s.h. courses from two of the following areas: Historical Perspectives, International and Global Issues, Literary, Visual, and Performing Arts, Understanding Cultural Perspectives, or Values and Society.

e See the Radiation Sciences website and your academic advisor for detailed application instructions and deadlines.

f Choose either HHP:3115, or HHP:2100 and HHP:2110.

g Enrollment in math courses requires completion of a placement exam.

h Enrollment in chemistry courses requires completion of a placement exam.

i Choose from HHP:3550, HHP:2400 and HHP:2410, or HHP:3500 and HHP:2410.

j Please see Academic Calendar, on Office of the Registrar website, for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Degree Services.

Obstetrics and Gynecology

Chair

- Christian Pettker

Professional degree: MM

Faculty: https://medicine.uiowa.edu/obgyn/profile/?appointment=PRIMARY&category=&query=&page=1&size=10

Website: https://medicine.uiowa.edu/obgyn/

Faculty in the Department of Obstetrics and Gynecology contribute to a wide spectrum of educational programs. A six-week core clerkship is taken by all Carver College of Medicine medical students. Subinternships are offered in high-risk obstetrics (maternal-fetal medicine) and gynecologic oncology. Advanced electives are offered in reproductive endocrinology and infertility, family planning, night float, and urogynecology. Approximately 12 physician assistant (PA) students also complete a one-month rotation within the department as part of their training.

The Accreditation Council for Graduate Medical Education (ACGME) accredited fellowship programs are urogyn (urogynecology), gynecologic oncology, maternal-fetal medicine (high-risk obstetrics), and reproductive endocrinology and infertility.

MD Training

Courses supported by the Department of Obstetrics and Gynecology are designed to give medical students a comprehensive survey of female reproductive medicine. This is accomplished through a variety of didactic lectures, outpatient clinical assignments, inpatient experiences, and surgery.

The clerkship OBG:8301 Clinical Obstetrics and Gynecology supports students in developing the core knowledge, skills, and attitudes needed to provide basic obstetric, gynecology, and/or primary health care to female patients.

The department offers medical students a variety of advanced electives that provide training in specialty areas of obstetrics and gynecology.

Residency

The department also offers a four-year obstetrics and gynecology residency. Upon completion, graduates are eligible to register and take the written and oral examinations leading to certification by the American Board of Obstetrics and Gynecology.

Residents are assigned to the various subspecialty divisions and clinical services of the department. They care for hospital inpatients and outpatients with training in normal and abnormal obstetrics, gynecologic surgery, office gynecology, ultrasound, reproductive endocrinology, gynecologic oncology, urogynecology, and family planning, as well as a variety of minimally invasive and endoscopic procedures.

Courses

Obstetrics and Gynecology Courses

OBG:8301 Clinical Obstetrics and Gynecology arr.
Proficiency in evaluation and management of core women's health care relating to reproductive tract; history taking, physical examination, laboratory and imaging assessment of obstetric and/or gynecological patients; application of current concepts to well women's health care and to management of diseases and pathologies; outpatient and inpatient obstetrics and gynecology; family planning, screening, and early detection of cancer and other diseases.

OBG:8401 Advanced Inpatient Subinternship in High Risk Antepartum Obstetrics arr.
Experience in evaluating new patients in a high-risk obstetric clinic; continuing antepartum care; ordering diagnostic studies and following the course of complicated patients admitted to obstetric ward; assisting in diagnostic and therapeutic procedures (e.g., fetal heart rate testing, amniocentesis, ultrasonography, intrauterine fetal transfusion).

OBG:8402 Advanced Inpatient Subinternship in Gynecologic Oncology arr.
Experience on a gynecologic oncology service, including operating room, inpatient and outpatient care; team management approach to gynecologic cancer patients, treatment and follow-up of invasive gynecologic malignancies, etiology and risk factors for gynecologic neoplasias, pre- and postoperative evaluation and treatment of surgical management of gynecologic neoplasis.

OBG:8403 Reproductive Endocrinology arr.
Experience evaluating new and returning patients in the Reproductive Endocrinology and Infertility Clinic; participation in preoperative, operative, and inpatient postoperative care; advanced gynecologic ultrasonography and in vitro fertilization services.

OBG:8405 Urogynecology Advanced Elective 4 s.h.
Experience as active member of urogynecology clinical team, participating in clinical care activities including outpatient clinic, outpatient procedures, inpatient surgery, hospital care; presentation to team on topic chosen by student.

OBG:8407 Family Planning 4 s.h.
Experience with family planning clinical activities at several different local sites, including outpatient procedures. Requirements: MD enrollment.

OBG:8409 Obstetrics and Gynecology Night Float 4 s.h.
Four week rotation; students are paired with a night resident with primary responsibility for inpatients on gynecology services; when not actively engaged, students participate in resident team work on labor/delivery/recovery (LDR), gaining obstetrics (OB) procedural competency as well as assisting with management of inpatients and consultations as delegated by night chief and/or staff call physician; students and night resident generally perform initial assessment of emergency department or inpatient consults/admissions under immediate supervision of the fellow and/or faculty; students carry out plans discussed at evening sign-out for inpatient gynecology services. Requirements: MD enrollment.

OBG:8410 Translational Science in Reproductive Health 4 s.h.
Exposure to and education in basic and applied translational research in reproductive sciences, obstetrics, gynecology, and developmental biology/perinatal programming; direct involvement with Department of Obstetrics and Gynecology ongoing research efforts. Requirements: MD enrollment.

OBG:8450 Continuity of Care in Outpatient Obstetrics and Gynecology 4 s.h.
Experience with gynecologist in longitudinal clinical experience for the academic year; students paired with faculty member to see patients in weekly clinic and provide clinical care to defined patient population.

OBG:8451 Obstetrics and Gynecology Scientific Writing 4 s.h.
Advanced medical students gain experience with the process of scientific publication; manuscript preparation, scientific communication, editorial duties, and publication process through the lens of journal editor and manuscript author. Requirements: MD enrollment.

OBG:8497 Research in Obstetrics and Gynecology arr.
Medical research, clinical or laboratory projects; individual study.

OBG:8498 Obstetrics and Gynecology On Campus arr.

OBG:8499 Obstetrics and Gynecology Off Campus arr.

Master of Midwifery, MM

The Master of Midwifery (MM) program of study is under development. More information is forthcoming.

Ophthalmology and Visual Sciences

Chair

- Keith D. Carter

Professional certificate: orthoptics

Faculty: https://eye.medicine.uiowa.edu/profile/

Website: https://eye.medicine.uiowa.edu/

Ophthalmology is a medical and surgical specialty concerned with the diagnosis and treatment of diseases of the eye and its surrounding structures. The Department of Ophthalmology and Visual Sciences combines postgraduate training with research and patient care in all aspects of the visual sciences. Subspecialties represented in the department include cataract surgery, comprehensive ophthalmology, cornea and external diseases, contact lens and refraction services, genetics and molecular biology, glaucoma, laser refractive surgery, neuro-ophthalmology, oculoplastic surgery, ocular echography, ocular pathology, ocular vascular diseases, optometric services, pediatric ophthalmology and adult strabismus, vitreoretinal disorders, and vision rehabilitation.

Continuing Education

The department sponsors clinical conferences open to community ophthalmologists in Iowa and surrounding states where physicians can earn continuing medical education credits. The department also sponsors an annual alumni meeting with participation by nationally and internationally recognized ophthalmologists and vision scientists.

Programs

Professional Program of Study

Certificate

- Certificate in Orthoptics [p. 1933]

MD Training

MD Student Training, Graduate Education

The department offers clinical and research training to MD students. A three-year residency program with clinical experience in the ophthalmic subspecialties is offered to physician trainees. Graduates qualify for the written and oral examinations leading to certification by the American Board of Ophthalmology. Postgraduate fellowships of one to two years are available for qualified ophthalmologists in most subspecialty areas.

Facilities

The department maintains research laboratories for cell biology, biochemistry, morphology, tumor diagnosis, pathology, electrophysiology, pupillography, molecular biology, and vascular disease. Clinical facilities in ophthalmology are available at University of Iowa Health Care in the Pomerantz Family Pavilion, the University of Iowa Stead Family Children's Hospital in the Pediatric Specialty Clinic, the Iowa River Landing, the VA Iowa City Health Care, and the VA Central Iowa Health Care in Des Moines. The department also manages outreach programs in other communities. The John and Marcia Carver Nonprofit Genetic Testing Laboratory, dedicated to providing affordable testing for rare eye diseases, is associated with the department.

Courses

Ophthalmology and Visual Sciences Courses

OPHT:8008 Corneal Medical Student Research Fellowship **0 s.h.**
One-year, full-time membership in established research laboratory in the Department of Ophthalmology or collaborating laboratory. Requirements: MD enrollment.

OPHT:8301 Clinical Ophthalmology **2 s.h.**
All aspects of clinical ophthalmology; clinical experience, lectures, case presentations; clinical duties with staff, residents, and faculty in University of Iowa Health Care and VA Iowa City Health Care ophthalmology clinics. Requirements: MD enrollment.

OPHT:8401 Cornea and Anterior Segment of the Eye **4 s.h.**
Common diseases of eyelid, conjunctiva, and cornea.

OPHT:8402 Elective in Neuro-Ophthalmology **4 s.h.**
Visual, ocular motor dysfunction due to neurologic disease; patient work-up, readings, neuro-ophthalmology rounds.

OPHT:8403 Molecular Ophthalmology **4 s.h.**
Use of recombinant DNA, tissue culture, protein electrophoresis in study of inherited eye diseases.

OPHT:8404 Elective in Ocular Pathology **4 s.h.**
Pathophysiology of eye disease.

OPHT:8405 Advanced Ophthalmology - Veterans Affairs **4 s.h.**
Opportunity for in-depth clinical experience in assessment and management of ophthalmology patients; students serve on the VA Iowa City Health Care ophthalmology team and see outpatients and emergency room visits alongside residents and faculty.

OPHT:8406 Plastic and Reconstructive Surgery **4 s.h.**
Topics in ophthalmic plastic and reconstructive surgery.

OPHT:8497 Research in Ophthalmology **arr.**
Medical research, clinical or laboratory projects; individual study.

OPHT:8498 Ophthalmology On Campus **arr.**

OPHT:8499 Ophthalmology Off Campus **arr.**

Orthoptics, Professional Certificate

Requirements

The professional Certificate in Orthoptics is a postgraduate certificate program. The orthoptic fellowship is offered by the Department of Ophthalmology and Visual Sciences. A baccalaureate degree is required for application.

Orthoptics is an allied health profession and clinical science pertaining to the study of eye movements, visual function, and binocular cooperation. An orthoptist is an eye muscle specialist who works under the supervision of an ophthalmologist.

The majority of the 24-month training period is spent in a clinical setting. At the completion of the training period, candidates take written and practical board examinations administered by the American Orthoptic Council.

The first four to six weeks are spent reviewing general anatomy and physiology and learning the basic anatomy, physiology, and terminology of the eye. Students are introduced to patient examination initially by observation of physicians and orthoptists, and gradually build up their exam skills as each new technique is learned. Over the first six months, optics and principles of strabismus (eye misalignment) and amblyopia (lazy eye) are taught in depth.

In the second six months of training, students expand their knowledge of basic orthoptic and ophthalmologic principles and apply them to a more complete patient examination and diagnostic skills.

The remaining months are spent examining patients in clinic, mastering examination techniques, and differential diagnosis as well as becoming proficient in the interpretation of diagnostic tests. At this stage, orthoptic students participate in the prescription of specific types of nonsurgical therapy. Each week, time is reserved for ophthalmic and orthoptic lectures, personal study time, or testing.

Contact the Department of Ophthalmology and Visual Sciences for information about the Certificate in Orthoptics.

Orthopedics and Rehabilitation

Chair

- J. Lawrence Marsh

Graduate degree: MS in athletic training

Faculty: https://orthopedics.medicine.uiowa.edu/profile/our-leadership

Website: https://orthopedics.medicine.uiowa.edu/

The Department of Orthopedics and Rehabilitation offers a Master of Science degree in athletic training as well as a training program for residents. The department offers multiple education programs that include medical student education, orthopedic resident education, postgraduate education, and graduate athletic trainer education.

Programs

Graduate Program of Study

- Master of Science in Athletic Training [p. 1938]

Residency

The department offers a five-year integrated clinical program for postgraduate trainees, in which interns and residents participate simultaneously in inpatient and outpatient care, surgery, and sciences related to the neuromusculoskeletal system.

Trainees enter this program directly from medical school through the National Residency Matching Program.

During the first year, trainees gain experience not only in clinical orthopedics but also in surgical specialties, intensive care, radiology, and surgical skills.

During years two through five, residents gain experience in the diagnosis and management of adult and pediatric orthopedic disorders, including joint reconstruction; trauma, including multisystem trauma; surgery of the spine, including disk surgery, spinal trauma, and deformities; hand and foot surgeries; athletic injuries and orthopedic rehabilitation; orthopedic oncology, including metastatic disease; and amputations as well as post-amputation care and nonoperative outpatient diagnosis and care, including all orthopedic anatomic areas.

Facilities

The Department of Orthopedics and Rehabilitation is housed in the John Pappajohn Pavilion of University of Iowa Health Care and has an active service in the VA Iowa City Health Care. The department's facilities include 48 orthopedic beds, 10 outpatient clinics, inpatient and outpatient operating rooms, a specialty library, a specialty radiology unit, and physical therapy and rehabilitation facilities. Its specialty clinics deal with virtually every orthopedic disorder known, including, but not limited to scoliosis, club feet, congenital dislocated hip, neuromuscular disease, metabolic disease, amputation, neoplasm, trauma, and neck, back, hip, foot, knee, and hand problems. Physicians in the outpatient clinic see approximately 280 patients per day and over 70,000 patients per year. Approximately 7,000 surgeries are performed each year.

The department's Sports Medicine Clinic provides MRI, X-ray, and physical therapy services, and a full range of nonoperative orthopedic ambulatory care services.

Laboratories

The orthopedics laboratories deal with problems in these major subject areas.

Biochemistry

The biochemistry of proteoglycans, collagens, and matrix proteins, both normal and altered in musculoskeletal disorders.

Biomechanics

Problems of the upper extremity; biomechanics of the spine, hip, and gait; total joint replacements (in conjunction with the College of Engineering [p. 1514]).

Bone Healing

Provides research toward better ways to heal bones.

Cell and Molecular Biology

Studies of normal bone, cartilage, tendon, muscle, and tissues altered by experiment and disease.

Courses

- Orthopedics and Rehabilitation Courses [p. 1934]
- Athletic Training Courses [p. 1935]

Orthopedics and Rehabilitation Courses

ORTH:8301 Clinical Orthopedics **arr.**

ORTH:8402 Advanced Inpatient Subinternship in Orthopedics: Trauma **4 s.h.**
Requirements: fourth-year MD enrollment.

ORTH:8403 Advanced Inpatient Subinternship in Orthopedics: Adult Hip/Knee Reconstruction **4 s.h.**
Opportunity to enhance clinical skills by taking intern-level responsibility for management of a limited number of orthopedic patients; proficiency in perioperative patient assessment and management, including assisting in procedures and using laboratory diagnosis and radiologic studies pertinent to one faculty member's clinical practice.

ORTH:8404 Introduction to Physical Medicine and Rehabilitation **2 s.h.**
Management of a wide range of common acute and chronic neuro-musculoskeletal pain conditions (shoulder, back, knee pain) to more devastating neuromuscular injuries (spinal cord injuries, brain injury, strokes, amputations). Requirements: MD enrollment.

ORTH:8405 Advanced Physical Medicine and Rehabilitation **4 s.h.**
Management of a wide range of common acute and chronic neuro-musculoskeletal pain conditions (shoulder, back, or knee pain) to more devastating neuromuscular injuries (spinal cord injuries, brain injury, strokes, amputations); students work-up individual patients in outpatient clinics and perform inpatient consultations at subintern level. Prerequisites: ORTH:8404. Requirements: MD enrollment.

ORTH:8407 Orthopedics: Adult Hip/Knee Reconstruction 4 s.h.
Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8408 Orthopedics: Trauma 4 s.h.
Development of in-depth skills in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8409 Orthopedics: Pediatrics 4 s.h.
Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8410 Orthopedics: Sports Medicine 4 s.h.
Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8411 Orthopedics: Hand/Wrist/Elbow 4 s.h.
Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8412 Orthopedics: Spine 4 s.h.
Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8413 Orthopedics: Oncology/Tumor 4 s.h.
Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8414 Orthopedics: Veterans Affairs 4 s.h.
Participation in the Veterans Affairs service general orthopedics; development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8415 Orthopedics: Foot/Ankle 4 s.h.
Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8416 Physical Medicine and Rehabilitation Acute Inpatient Rehab, Iowa Rehabilitation Hospital 2 s.h.
Physical medicine and rehabilitation clerkship; participation in daily clinical activities including inpatient rounds, interdisciplinary team meetings, observation of a variety of therapy sessions, and inpatient consults.

ORTH:8417 Orthopedics: Shoulder/Elbow 4 s.h.
Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems, recommend appropriate solutions to each problem, and assist in the management of problems and solutions. Requirements: MD enrollment.

ORTH:8497 Research in Orthopedics arr.
Medical research, clinical or laboratory projects; individual study.

ORTH:8498 Orthopedics On Campus arr.
Requirements: fourth-year MD enrollment.

ORTH:8499 Orthopedics Off Campus arr.
Requirements: fourth-year MD enrollment.

Athletic Training Courses

AT:1010 Exploring Athletic Training 1 s.h.
Exploration of professional preparation for athletic trainers; application, career opportunities, professional organizations, awareness of basic athletic training principles; topics include emergency care, preventative strategies, injury evaluation, and rehabilitation techniques; for students interested in applying to the MS in athletic training program. Requirements: undergraduate major in health and human physiology or enrollment in pre-athletic training program.

AT:1200 CPR and First Aid for Health Care Professions 2 s.h.
Advanced CPR and first aid with automated external defibrillator (AED); opportunity for certification at Basic Life Support (BLS) level through the American Heart Association; satisfies first aid and CPR requirement for athletic training program application; for pre-health care professions majors.

AT:3060 Advanced Anatomy for Athletic Training 4 s.h.
Extremities and relevant body cavity anatomy; anatomical terminology, anatomical relationships of human body, 3D view of anatomy, clinical relevance of anatomy; basic science lectures, radiologic imaging discussions, introduction to clinically relevant anatomy, gross anatomy dissection laboratories, small group learning and teaching, and computer-assisted resources.

AT:4000 Foundations of Athletic Training Practice 3 s.h.
Introduction to athletic training; basic components of a prevention program; injury/illness assessment process including general injury classifications, medical terminology, and patient documentation skills); anatomical basis and technical aspects of applying clinical proficiencies relating to orthopedic applications in the care and prevention of injuries relating to physically active individuals including taping, wrapping, and pad fabrication; basic evaluation skills including goniometric measurements, manual muscle testing, and anatomical palpations.

AT:4075 Medical Emergency Techniques 2 s.h.
Educational competencies and clinical proficiencies; focus on emergency medical practice in athletic training using current evidence-based interventions for medical, orthopedic, and environmental emergencies; knowledge of Emergency Medical Service (EMS) system and role athletic trainers play in the acute-care process; emergency pharmacological interventions and other advanced care skills.

AT:4125 Clinical Experience I 3 s.h.
Integration of clinical competencies through a supervised field experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; first in a four-part series.

AT:4200 Orthopedic Pathology and Clinical Examination I 4 s.h.
Pathomechanics, clinical examination, diagnosis, and appropriate basic treatment plans for orthopedic injuries to the lower extremity and spine; application of theories and skill practice through real-patient interactions and documentation; surgical observation and physician interactions; first in a two-part series.

AT:4250 Orthopedic Pathology and Clinical Examination II 4 s.h.
Pathomechanics, clinical examination, diagnosis, and appropriate basic treatment plans for orthopedic injuries to the upper extremity, head, and C-spine; application of theories and skill practice through real-patient interactions and documentation; surgical observation and physician interactions; second in a two-part series. Prerequisites: AT:4200.

AT:4300 Therapeutic Interventions 3 s.h.
Introduction to theory, application, and treatment of orthopedic conditions using common therapeutic modalities; application of evidence-based research in planning, implementation, documentation, and evaluation of the efficacy of each therapeutic modality in treatment of injuries and illnesses of patients involved in physical activity; emphasis on indications, contraindications, and precautions; integration of patient-based outcome measures to aid in appropriate clinical decision-making.

AT:4375 Nutrition for Athletic Training 2 s.h.
Interaction between nutrition, exercise, and athletic performance; biomechanical and physiological aspects of nutrition and exercise; nutrition for training and competition; impact of nutrition on healing processes, nutritional supplements, and ergogenic aids; nutritional aspects of body composition and weight control; demonstration of ability to plan and implement proper sport nutrition.

AT:4400 Rehabilitation Techniques 3 s.h.
Rehabilitation for athletic trainers based on theory and principles of therapeutic exercise using current evidence-based concepts; focus on pathology and mechanics of exercise therapy in treatment of musculoskeletal injuries; use of mechanical exercise equipment, stressing safety and use of proper body mechanics during exercise, as well as indications and contraindications for different exercises.

AT:4450 Applied Rehabilitation Concepts 3 s.h.
Functional, scientific approach to designing strength and conditioning programs for various populations; testing protocols used for measuring fitness, body composition, flexibility, strength, power, speed, and endurance; evaluation of posture and workplace ergonomics; manual therapy theory and techniques for orthopedic injuries, indications and contradictions, skill development in soft tissue assessment, application of manual and tool-assisted techniques; review of resistance training and program prescription based on literature. Prerequisites: AT:4400.

AT:4525 Clinical Experience II 4 s.h.
Integration of clinical competencies through a supervised field experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; second of a four-part series. Prerequisites: AT:4125.

AT:5000 Pathology and Assessment of Non-Orthopedic Conditions 3 s.h.
Introduction to recognition, assessment, and appropriate intervention or referral strategies for non-orthopedic conditions and disabilities; pathophysiology at cellular, organ, and total body levels applied in each organ system; systems may include cardiovascular, pulmonary, renal, dermatologic, reproductive, endocrine, neurologic, and gastrointestinal; additional topics include gender and pediatric pathology, ENT/ophthalmology, abdominal evaluation, and common contagious illnesses.

AT:5075 Diagnostic Imaging and Lab Studies 1 s.h.
Common diagnostic tests and radiological techniques used commonly by medical community in assessment and diagnosis of common orthopedic and non-orthopedic conditions; students gain knowledge and skills to identify anatomy, pathology, and proper terminology used by health care professionals when discussing diagnostic tests/results; coverage of multiple biological systems and organs of the human body to understand indications, contraindications, and clinical implications for each technique.

AT:5200 Pathophysiology and Pharmacology in Sports Medicine 2 s.h.
Pharmacologic applications for injury/illness sustained by various physically active populations; therapeutic drug classifications, indications, contraindications, interactions of medications, drug testing in sport, and relevant governing regulations; emphasis on drugs commonly used for orthopedic injuries, common conditions and illnesses, mental health and their effects on sport performance, and tissue healing.

AT:6100 Research in Athletic Training 2 s.h.
Identification of an athletic training problem/issue and examination through theories and research; analysis of literature and derivation of evidence-based concepts for clinical decision-making and data-informed practice; use of appropriate academic writing style; differentiation between quantitative and qualitative research; critically responding to research dilemma in a way that aligns professional ethics and values; first in a two-part series.

AT:6125 Clinical Experience III 6 s.h.
Complete professional immersive clinical experience; integration of basic and complex clinical competencies through a supervised clinical experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; third in a four-part series. Prerequisites: AT:4525.

AT:6200 Administration and Leadership 2 s.h.
Overview of organization and administration of athletic training services; topics include organizational structures, human resources, information management, budget and finance, risk management, legal and ethical considerations in health care, purchasing and maintenance of equipment and facilities, and development of policies and procedures for daily operation of athletic training services.

AT:6250 Applied Research in Athletic Training 1 s.h.
Application of research models to athletic training topics; use of appropriate academic writing style; application of basic statistical measures to address clinical problems; continuation and completion of research projects from AT:6100; culminates with dissemination of research findings; second in a two-part series. Prerequisites: AT:6100.

AT:6300 Psychosocial Recognition and Referral 2 s.h.
Psychological factors relative to injury, rehabilitation, and performance; strategies for identifying problems, intervening, and making referrals especially related to psychological disorders, decreased performance, and health/substance abuse; exploration of various theories and models of cultural competence through the lens of sports medicine; students examine and analyze roles of cultural differences including cultural attitudes, beliefs, and expectations as they pertain to effective health care in diverse settings.

AT:6400 Seminar in Athletic Training 2 s.h.
Review of knowledge, skills, and abilities for successful pursuit of athletic training Board of Certification (BOC) credential and processes to obtain employment; résumé development and interviewing skills; emphasis on regulation of practice; professional and ethical responsibilities contributing to practice of athletic training; creation of a professional development plan.

AT:6450 Advanced Topics in Athletic Training 1 s.h.
Investigation and discussion of current events and advanced topics in athletic training and related health professions; evaluation of current professional and legislative issues in athletic training; discussions vary depending on current relevant topics.

AT:6525 Clinical Experience IV 5 s.h.
Integration of clinical competencies through a supervised clinical experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; last in a four-part series. Prerequisites: AT:6125.

Athletic Training, MS

Athletics trainers are health care professionals who render service or treatment under the direction of, or in collaboration with, a physician in accordance with their education and training and the states' statutes, rules, and regulations. Services provided by athletic trainers include injury and illness prevention, wellness promotion and education, emergent care, examination and clinical diagnosis, therapeutic intervention, and rehabilitation of injuries and medical conditions.

Students who want to become certified athletic trainers may earn the MS or pursue the combined program as they earn the BS in exercise science and the MS in athletic training. See the BS in exercise science [p. 522] (College of Liberal Arts and Sciences) in the catalog.

The University of Iowa is accredited by the Commission on Accreditation of Athletic Training Education (CAATE).

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Learning Outcomes

Upon graduation, students will:

- communicate effectively among health care providers, patients, and all other stakeholders in their delivery of health care;
- practice with professionalism and integrity adhering to the Code of Ethics outlined by the National Athletic Trainers' Association (NATA) and the Code of Professional Responsibility by the Board of Certification (BOC);
- demonstrate cognitive and psychomotor competence and clinical proficiency based on clinically relevant research in the following BOC Practice Analysis content areas—injury and illness prevention and wellness promotion; examination, assessment, and diagnosis; immediate and emergency care; therapeutic intervention; and health care administration and professional responsibility;
- demonstrate critical thinking to effectively solve problems in a variety of dynamic athletic training environments;
- demonstrate growth in cultural competence among health care providers, patients, and all other stakeholders in their delivery of health care; and
- demonstrate a Kaizen philosophy in their learning and professional practice.

Requirements

The Master of Science program in athletic training requires 62 s.h. of coursework. Students must maintain a Graduate College program grade-point average of at least 3.00 and must earn a grade of C-minus or higher in all major coursework.

The program involves two full years, including summer sessions, of concentrated didactic and clinical experiences that lead to eligibility for the Board of Certification examination.

The MS in athletic training requires the following work.

Course #	Title	Hours
AT:3060	Advanced Anatomy for Athletic Training	4
AT:4000	Foundations of Athletic Training Practice	3
AT:4075	Medical Emergency Techniques	2
AT:4125	Clinical Experience I	3
AT:4200	Orthopedic Pathology and Clinical Examination I	4
AT:4250	Orthopedic Pathology and Clinical Examination II	4
AT:4300	Therapeutic Interventions	3
AT:4375	Nutrition for Athletic Training	2
AT:4400	Rehabilitation Techniques	3
AT:4450	Applied Rehabilitation Concepts	3
AT:4525	Clinical Experience II	4
AT:5000	Pathology and Assessment of Non-Orthopedic Conditions	3
AT:5075	Diagnostic Imaging and Lab Studies	1
AT:5200	Pathophysiology and Pharmacology in Sports Medicine	2
AT:6100	Research in Athletic Training	2
AT:6125	Clinical Experience III	6
AT:6200	Administration and Leadership	2
AT:6250	Applied Research in Athletic Training	1
AT:6300	Psychosocial Recognition and Referral	2
AT:6400	Seminar in Athletic Training	2
AT:6450	Advanced Topics in Athletic Training	1
AT:6525	Clinical Experience IV	5
Total Hours		**62**

Admission

Admission to the Master of Science program is competitive with a limited number of students admitted for each cohort. Applicants are expected to meet technical standards, pass a background check, and comply with health and safety standards, including vaccination requirements. Students are required to provide their own transportation to all clinical experiences and are responsible for all costs they incur during travel, including parking and gas.

To be considered for the Master of Science program in athletic training, applicants must:

- have completed a BA or BS degree at an accredited institution in the United States, or have completed a bachelor's degree from a Board of Certification for the Athletic Trainer International Arrangement (IA) country;
- have completed 30 s.h. at the University of Iowa if a transfer student;

- complete 80 s.h. of undergraduate coursework at the University of Iowa if an Undergraduate to Graduate (U2G) student;
- have a cumulative undergraduate grade-point average (GPA) of at least 3.00 or a cumulative GPA of at least 3.25 in the Undergraduate to Graduate (U2G) combined program; and
- complete or be in progress with required prerequisite coursework with a grade of C or higher in biology, chemistry, physics, human anatomy, human physiology, exercise physiology, general psychology, biomechanics or kinesiology, nutrition, and statistics or research methods (see the course list that follows).

To apply, submit the following to the Athletic Training Centralized Application Service (ATCAS):

- official and unofficial transcripts;
- contact information of two references, one from a medical professional and one from an academic professional;
- statement of purpose and career goals; and
- current CPR certification obtained within one year—must be Basic Life Support (BLS or professional rescuer level.

Recommended materials:

- Coursework in medical terminology, introductory coursework in athletic training, public health, motor learning, or additional psychology coursework.
- Observation hours under an athletic trainer.

Community college coursework is accepted as well as online coursework from accredited universities. AP and CLEP coursework may satisfy course requirements if listed on a college transcript.

Students must earn a grade of C or higher in these prerequisite courses.

Course #	Title	Hours
Biology (preferred human biology; with or without lab)		3
Biomechanics or kinesiology		3
Chemistry (with or without lab)		3
Exercise physiology		3
Human anatomy (may be taken combined with human physiology; two semesters minimum, if combined)		3
Human physiology (may be taken combined with human anatomy; two semesters minimum, if combined)		3
Nutrition (general or sport)		3
Physics (with or without lab)		3
Psychology (general psychology is required; additional psychology coursework recommended)		3
Statistics or research methods		3

Applications will be forwarded to the Graduate College by the program director. Students will be notified to set up a University of Iowa account and pay the supplemental fee ($60 if offered an interview; $100 for international students).

Applications are reviewed immediately upon submission. Interested students should submit their application materials as soon as possible to ensure a spot is available. Priority admission deadline is Dec. 1 with a standard admission deadline of March 1. Following the March 1 deadline, applications will be accepted continuously until program capacity is met. A waitlist will be used once the cohort is full. A virtual interview is required. Coursework begins during the summer session.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

If formally admitted, students must:

- submit to a background check;
- complete HIPAA and BBP training;
- complete the program technical standards form;
- submit current vaccination records;
- submit current physical examination; and
- provide final course grades and GPA.

These additional forms will be sent directly to the program director upon acceptance.

Admission Deferral Policy

In rare cases, a student may need to defer their admission to the program. These requests will be approved on a case-by-case basis by the program director. The one-time option to defer is good for up to one year beyond the original matriculation date. A student does not have to pay the Graduate College application fee again if they opt to defer. An applicant's data will be transferred to the new session through the graduate admissions office only at the request/approval of the program director. Depending on the situation, the student may need to submit additional/repeat application documents.

Career Advancement

Athletic trainers have opportunities for employment in many areas. They include career options in:

- public and private secondary schools, colleges and universities, professional and Olympic sports;
- youth leagues, municipal and independently owned youth sports facilities;
- physician offices;
- rural and urban hospitals, hospital emergency rooms, urgent and ambulatory care centers;
- clinics with specialties in sports medicine, cardiac rehabilitation, medical fitness, wellness, and physical therapy;
- occupational health departments in commercial settings, which include manufacturing, distribution, and offices to assist with ergonomics;
- police and fire departments, academies, municipal departments, and branches of the military; and
- performing arts areas, including professional and collegiate-level dance and music settings.

Otolaryngology–Head and Neck Surgery

Chair

- Marlan R. Hansen

Website: https://otolaryngology.medicine.uiowa.edu/

The Department of Otolaryngology–Head and Neck Surgery is one of the most comprehensive otolaryngology departments in the world. Founded in 1922, it is among the oldest in the United States. *U.S. News & World Report* has consistently ranked the department's program among the top 10 in the nation.

The department's chief focus areas are education and training, patient care, and research. MD students in the Carver College of Medicine, residents, and fellows benefit from a faculty dedicated to providing thorough training in all aspects of otolaryngology and patient care. Patients in the otolaryngology clinic enjoy access to comprehensive care in any of five subspecialties: pediatric otolaryngology, otology/neurotology, general otolaryngology and rhinology, head and neck oncology, and facial plastic and reconstructive surgery. University of Iowa faculty members from ophthalmology and visual sciences and radiation oncology hold joint appointments in otolaryngology, adding depth to the department's resources.

The department is home to prominent research programs in cleft palate and other craniofacial defects, head and neck oncology, cochlear implants, and molecular genetics. It also offers fellowships in otology/neurotology, pediatric otolaryngology, and head and neck oncology.

The department is located at University of Iowa Health Care.

Fellowships

The Department of Otolaryngology–Head and Neck Surgery offers a two-year fellowship in otology/neurotology and a one-year fellowship in pediatric otolaryngology, which are accredited by the Accreditation Council for Graduate Medical Education. It also offers a one-year fellowship in head and neck oncology accredited by the Advanced Training Council of the American Head and Neck Society.

The otology/neurotology fellowship program accepts one applicant every two years. Otology fellows spend a minimum of 20 months in clinical service. They attend all otology/neurotology clinics and neurotology cases in the operating room and are responsible for inpatient service. They also have one day of dedicated research time each week.

The pediatric otolaryngology fellowship program accepts one applicant each year. Fellows spend a year in clinical service, where they have the opportunity to train with all pediatric otolaryngology faculty members.

One applicant is accepted as a head and neck oncology fellow each year. Training is largely clinical, allowing fellows the opportunity to participate in a variety of procedures, ranging from skull base resection to laryngeal rehabilitation. Fellows routinely perform 35 to 45 free-tissue transfers during one year of training. They also complete a clinical and/or basic science research project relating to head and neck oncology.

Residency

The Department of Otolaryngology–Head and Neck Surgery offers a residency program accredited by the Accreditation Council for Graduate Medical Education. The program has two tracks: a five-year clinical track and a seven-year research track. Five applicants are accepted each year, three to the clinical track and two to the research track.

The clinical track provides five years of concentrated clinical study and application in all aspects of otolaryngology. Residents begin their training with a five-week intensive basic science course divided into an anatomy component and a 100-hour lecture series. The anatomy component includes a supervised cadaver dissection, and the lecture series details the study of otolaryngology and related disciplines. Residents also complete two research rotations in order to explore research areas that interest them.

The research track is a combined clinical research program designed for residents interested in an otolaryngology research career. After an internship year, residents complete two years of research followed by four years of clinical training. The interaction of clinicians and basic scientists from several departments affords residents the opportunity to be involved in a wide spectrum of current research in areas such as electrophysiology of the auditory system, the genetics of head and neck cancer, and gene therapy.

Courses

Otolaryngology–Head and Neck Surgery Courses

OTO:8199 Foundations of Otolaryngology **arr.**
Supervised cadaver head and neck dissection, with 14 areas in detail. Two weeks.

OTO:8301 Clinical Otolaryngology **2 s.h.**

OTO:8401 Subinternship in Otolaryngology **arr.**

OTO:8402 Advanced Otolaryngology **4 s.h.**
Students become proficient in physical examination of the head and neck; increase their ability to diagnose, evaluate, and manage common disorders of the ears, nose, and throat; and work in outpatient clinic, on inpatient services, and in operating room.

OTO:8497 Research in Otolaryngology **arr.**
Medical research, clinical or laboratory projects; individual study.

OTO:8498 Otolaryngology On Campus **arr.**

OTO:8499 Otolaryngology Off Campus **arr.**
Arranged by student with department approval.

Pathology

Chair

- Nitin J. Karandikar

Director, Clinical Functions

- Brad Seaton

Graduate degree: MS in pathology

Faculty: https://pathology.medicine.uiowa.edu/our-people

Website: https://pathology.medicine.uiowa.edu/

The Department of Pathology offers education and training for a broad range of students, from undergraduates through postgraduate fellows and researchers. It provides basic pathology courses to health sciences students, a clinical training program for medical laboratory scientists, a Master of Science program in pathology, residency training programs leading to American Board of Pathology certification in anatomic pathology and clinical pathology, fellowship training in pathology subspecialties, and postdoctoral research training in cellular and molecular pathology.

Undergraduate Education

Pathology courses are a major component of the university's program in Medical Laboratory Science, a Bachelor of Science program that trains medical laboratory scientists; see Medical Laboratory Science [p. 1897] in the catalog.

Postgraduate Training

The Department of Pathology offers postgraduate clinical fellowship programs in hematopathology, transfusion medicine, clinical microbiology, cytopathology, neuropathology, molecular genetic pathology, and surgical pathology for physicians who have completed residency training in pathology. These fellowships consist of one to two years of diagnostic work and research.

The department provides postdoctoral research training in immunology, neuropathology, apoptosis, cancer biology, and clinical microbiology as well as in other areas of cellular and molecular pathology. These positions are open to individuals who have earned a PhD or an MD degree.

Programs

Graduate Programs of Study

- Master of Science in Pathology [p. 1943]
- Experimental pathology subprogram for the Doctor of Philosophy in Biomedical Science

Students interested in doctoral studies in experimental pathology should apply under the umbrella program in Biomedical Science [p. 1698] (select experimental pathology subprogram).

MD Training

The department provides five to seven 12-month fellowships for MD students (pathology externship), for students interested in careers as pathologists, and the Emory Warner Fellowship, a full-time research position in a facet of experimental pathology. It also offers clerkships for MD students in all areas of anatomical and clinical pathology.

Residency

The department offers 20 residency positions in pathology, which provide up to four years of training. Patients at University of Iowa Health Care and the VA Iowa City Health Care are integral to the residency programs.

Residents gain experience in systematic rotation through varied laboratory services, including surgical pathology, autopsy pathology, neuropathology, dermatopathology, cytology, clinical chemistry, clinical microbiology, hematology, immunopathology, molecular pathology, and transfusion medicine. They also have the opportunity to pursue one or two years of additional fellowship training in many pathology subspecialties. To learn more, see Education on the Department of Pathology website.

Facilities

The Department of Pathology is well-equipped to carry out the sophisticated technology of modern cellular and molecular pathology. It administers more than 90,000 square feet of clinical laboratories at University of Iowa Health Care and has individual research and core facility laboratories, including histopathology and laser capture microscopy for cellular and molecular pathology research, in the Medical Research Center, Medical Laboratories, and at the VA Iowa City Health Care. Also available are Carver College of Medicine research facilities for nucleic acid chemistry, hybridoma production, flow cytometry, ultrastructural studies, protein structure, image analysis, electron spin resonance, mass spectroscopy, nuclear magnetic resonance, and laboratory animal care.

Courses

Pathology Courses

PATH:4151 MLS Program Registration **0 s.h.**
Requirements: admission to Medical Laboratory Science Program.

PATH:4201 Laboratory Management **3 s.h.**
Core principles of laboratory management in the current field of clinical laboratory science including basic principles and organizational structure, human resources, finance, and laboratory operations. Develop knowledge of the concepts and principles of lab management and apply these concepts to real-life situations. Requirements: minimum overall GPA of 2.00.

PATH:5270 Pathogenesis of Major Human Diseases **3 s.h.**
Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Offered spring semesters. Same as IGPI:5270, MMED:5270.

PATH:5461 Introduction to Morphology in Research **1 s.h.**
Introduction to the histologic examination of organs and tissues utilizing human and/or animal examples; organ identification, comparative morphology, use of histologic techniques (e.g., stains).

PATH:6220 Seminar in Pathology **1 s.h.**
Current research and literature. Requirements: pathology graduate standing.

PATH:7001 Molecular and Cellular Biology of Cancer 3 s.h.
Fundamental aspects of oncology at cellular and molecular levels; mechanisms of cancer initiation and progression, oncogene action, DNA damage and repair, carcinogenesis by radiation, chemicals, viruses; tumor immunology, anticancer therapies. Offered spring semesters. Prerequisites: BMED:5207. Requirements: strong basic science background. Same as CBIO:7001, FRRB:7001.

PATH:7211 Research in Pathology arr.
Basic aspects of pathology or clinical patient material; emphasis on experimental design, methods, literature review, obtaining formal answers to specific questions. Requirements: MD enrollment or graduate standing.

PATH:8007 Medical Student Fellowships in Pathology (Externships) 0 s.h.
First-hand experience in autopsy, surgical and clinical pathology, teaching, and research to further understanding of disease mechanisms, normal and pathologic anatomy, laboratory use.

PATH:8008 Warner Fellowship in Experimental Pathology 0 s.h.
One-year, full-time membership in established research laboratory in the Department of Pathology or collaborating laboratory. Requirements: MD enrollment.

PATH:8133 Introduction to Human Pathology for Graduate Students 2-4 s.h.
Human disease; basic disease processes, organ-related and multisystem diseases; case analysis. Offered fall semesters.

PATH:8302 Pathology 2 s.h.
Introduction to pathology in the medical field. Requirements: MD enrollment.

PATH:8401 Autopsy Pathology Clerkship arr.

PATH:8402 Hematopathology Clerkship arr.

PATH:8403 Surgical Pathology Clerkship arr.

PATH:8404 Transfusion Medicine arr.

PATH:8405 Clinical Microbiology 2,4 s.h.
Students rotate through bacteriology, molecular microbiology, mycology, mycobacteriology, and virology while participating in clinical and technical activities.

PATH:8497 Research in Pathology arr.
Medical research, clinical or laboratory projects; individual study with department approval.

PATH:8498 Pathology On Campus arr.

PATH:8499 Pathology Off Campus arr.

Pathology, MS

The MS program in pathology prepares postbaccalaureate science majors for a range of biomedical careers. Graduate-level coursework provides students with a foundation in cellular and molecular biology, as well as specialized knowledge in pathobiology. A laboratory-intensive thesis project equips trainees with cutting-edge research skills. Students typically complete the program in two and one-half years.

Learning Outcomes

Graduates will be able to:

- demonstrate subject matter expertise in basic cell and molecular biology, biostatistics, and pathobiology/ mechanisms of human disease;
- understand and apply scientific methods allowing for the appropriate development and testing of hypotheses, problem solving, and utilization of current literature and contemporary laboratory approaches;
- understand and apply the need to conduct research using a team-based approach, including ongoing input from the thesis mentor and committee as well as peers within the laboratory and departmental environment;
- understand and apply the key principles of carrying out research and interpreting results using the highest ethical standards; and
- acquire the ability to effectively communicate research goals, approaches, and results using both written and oral means.

Requirements

The Master of Science program in pathology requires a minimum of 30 s.h. of graduate credit, including 21 s.h. of coursework and 9 s.h. of research leading up to the thesis. Students must maintain a Graduate College program grade-point average of at least 2.75.

The MS in pathology requires the following coursework.

Required Coursework

Course #	Title	Hours
All of these:		
PATH:5270/ IGPI:5270/ MMED:5270	Pathogenesis of Major Human Diseases	3
PATH:6220	Seminar in Pathology (taken two semesters for 1 s.h. each)	2
BIOS:4120	Introduction to Biostatistics	3
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0

Required coursework results in a basic understanding of molecular and cellular biology, a basic understanding of biostatistics, and an advanced understanding of pathobiology and mechanisms of human disease.

Electives

The remaining graduate-level coursework consists of electives focused on the area or topic related to a student's thesis project. The elective courses are offered by a range of departments on the biomedical campus.

Thesis

The thesis project is carried out under the guidance of the mentor and thesis committee. The committee is composed of a student's mentor and two additional faculty members. In general, the thesis consists of four chapters with the first being a concise review of the literature; the second, materials and methods; and the last two, a scholarly description of the project results. The thesis must be defended before the committee prior to final approval.

For more information, view the Master of Science in Pathology on the Department of Pathology website.

Admission

Applicants must have a bachelor's degree in a science discipline from a regionally accredited American college or university, or an equivalent degree from another country as determined by University of Iowa Admissions. Applicants must also have a minimum grade-point average of 3.00 on a 4.00 scale, or the international equivalent as determined by Admissions. In addition, laboratory-based research experience is highly desired. Graduate Record Examination (GRE) General Test scores are not required to apply.

A subset of applicants will be selected for interviews, conducted either in person or virtually. Admission decisions are determined based on academic performance, research experience, letters of recommendation, personal statements, and interviews.

Students who are applying must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Career Advancement

The MS program in pathology is designed for graduates to advance into research assistant or research scientist positions in academic and private sector laboratories, or to be competitive for advanced degree programs such as the PhD, MBA, or MD.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Pathology, MS

Course	Title	Hours
Academic Career		
Any Semester		
30 s.h. must be graduate level coursework. More information is included in the General Catalog and on department website. [a, b]		
Graduate College program GPA of at least 2.75 is required. [c]		
	Hours	**0**
First Year

Third Year		
Fall		
PATH:7211	Research in Pathology	2
Final Exam [e]		
	Hours	**2**
	Total Hours	**30**

a Must include 21 s.h. of graduate level coursework, including electives focused on the area or topic related to a student's thesis project, and 9 s.h. of research leading to thesis; graduate transfer credits allowed upon approval.

b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.

d Work with faculty advisor to determine appropriate graduate elective coursework and sequence.

e Thesis defense.

Physical Therapy and Rehabilitation Science

Chair

- Richard K. Shields

Graduate degrees: DPT; MA in physical rehabilitation science; PhD in physical rehabilitation science

Faculty: https://pt.medicine.uiowa.edu/our-people

Website: https://pt.medicine.uiowa.edu/

Physical therapists provide services to people with and without impairments, functional limitations, disabilities, or pain from activity, age, injury, disease, and/or surgery. The mission of the Department of Physical Therapy and Rehabilitation Science is to prepare a clinical and scientific workforce that leads patients, health systems, and a diverse society toward greater health. The department achieves this mission by cultivating excellence in education and clinical practice, discovering and disseminating new knowledge, and developing leaders who serve the profession and society.

The department's guiding principles are articulated through their priorities, focusing on creative people, operational efficiency, innovative discovery, and offering a high-value education. Their team of faculty, staff, and students use these priorities to organize and develop annual goals and strategies to address rapid changes in education, research, and healthcare. These priorities are designed to stimulate continual reflection and discussion about present and future needs to advance the profession, University of Iowa Health Care, the Carver College of Medicine, and the University of Iowa. The Department of Physical Therapy and Rehabilitation Science is located in the Carver College of Medicine on the University of Iowa health sciences campus.

Programs

Graduate Programs of Study

- Doctor of Physical Therapy [p. 1951]
- Master of Arts in Physical Rehabilitation Science [p. 1950]
- Doctor of Philosophy in Physical Rehabilitation Science [p. 1954]

Facilities

The department has state-of-the-art independent research laboratories and is well-equipped for classroom and laboratory instruction and innovative research. The department's state-of-the-art research facilities include the Movement and Rehabilitation Laboratory and a spinal cord research laboratory at University of Iowa Health Care, the Human Movement Control/Performance Laboratory, the Neurobiology of Pain Laboratory, the Neuromuscular Biomechanics Laboratory, the Human Integrative and Cardiovascular Physiology Laboratory, the Applied Neuroplasticity Laboratory, the Human Performance and Clinical Outcomes Laboratory, and the Movement, Imaging, and Rehabilitation Laboratory.

Courses

Physical Therapy and Rehabilitation Science Courses

PTRS:5100 Professional Issues and Ethics 1 s.h.
Contemporary issues in clinical practice and professional development; legal and ethical perspectives on human rights, ethical theory and principles for analyzing and acting on ethical problems; professional and peer relationships.

PTRS:5101 Introduction to Physical Therapy Practice 2 s.h.
Professional development of physical therapists; evolution of profession; analysis of current role in health care and public health with respect to societal health challenges; patient management terminology including medical terminology and language utilized in the *Guide to Physical Therapist Practice*; concepts of enablement models and disablement models, including World Health Organization's *International Classification of Functioning, Disability and Health* model in the biopsychosocial model of health; introduction to evidence-based practice principles.

PTRS:5102 Principles of Physical Therapy I 2 s.h.
Patient management skills: fostering therapeutic alliance, history taking, systems review, positioning, draping, transfers, body mechanics, assisted gait, wheelchairs, and negotiation of architectural barriers.

PTRS:5103 Principles of Physical Therapy II 2 s.h.
Continuation of PTRS:5102; expansion of existing skills and provides new learning experiences in documentation, assessment of joint range of motion/goniometry, manual muscle testing, preambulatory intervention strategies, gait analysis; musculoskeletal, neuromuscular, and integumentary systems review. Prerequisites: PTRS:5102.

PTRS:5131 Therapeutic Physical Agents 2 s.h.
Theoretical and practical applications for safe, effective use of physical agents (superficial and deep heat, cold, hydrotherapy), electrotherapeutic modalities (biofeedback, NMES, TENS, iontophoresis); massage and soft tissue mobilization; emphasis on problem solving, clinical decision-making.

PTRS:5144 Interprofessional Education I: Team-Based Approach to Health Care 1 s.h.
Learn the foundations of interprofessional, team-based health care practice; orientation to interprofessionalism and population health; learn about peer professions and process a simulated patient case. Assignments provide opportunities for reflection on professional roles and interprofessional teamwork.

PTRS:5201 Musculoskeletal Therapeutics I 3 s.h.
Musculoskeletal techniques and biomechanical principles applied to assessment and evaluation of common orthopedic problems of the spine; problem solving, case-study approach to clinical methods, skill acquisition.

PTRS:5205 Health Promotion and Wellness 3 s.h.
Overview of health promotion, fitness, and wellness strategies, including information on levels of health promotion, risk assessment, applied physiology (skeletal muscle, energy metabolism, and physiological responses to exercise), exercise testing and training guidelines, body composition assessment, and development of individual weight management and exercise training programs; classroom and laboratory experiences.

PTRS:5206 Cardiopulmonary Therapeutics 3 s.h.
Cardiorespiratory anatomy, physiology, and application of basic concepts, techniques in management of patients with acute and chronic cardiac, pulmonary disorders; laboratories.

PTRS:5209 Surface Anatomy 1 s.h.
Laboratory teaching activities that parallel the human anatomy course; observation, palpation, and problem solving skills; upper- and lower-limb, head and neck, thorax, and abdomen.

PTRS:5210 Kinesiology and Pathomechanics 4 s.h.
Normal and pathological movement based on understanding of muscle mechanics, segment and joint mechanics, muscle function; instructor- and student-centered learning experiences; integrative human movement system laboratories.

PTRS:5212 Human Pathology for the Physical Therapist 3 s.h.
Students gain a cursory understanding of the physiologic mechanisms of human health and pathologic mechanisms of disease; emphasis on morphologic changes of cells and tissues, identification of causes of change (etiology), mechanisms of development (pathogenesis), and clinical manifestations of specific disease processes; influence of disease and medical diagnosis on physical therapy practice and physical therapy diagnosis.

PTRS:5215 Applied Clinical Medicine 2 s.h.
Pathological disorders frequently encountered by physical therapists in clinical practice, addressed by physicians and health professionals who are not physical therapists; physical therapy management.

PTRS:5235 Case-Based Learning I 1 s.h.
Small group case study seminars and simulated patient instructor learning experiences; clinical problems coordinated with concurrent courses; student-centered, problem-based learning format with emphasis on evidence-based practice objectives. First in a two-course sequence.

PTRS:5236 Case-Based Learning II 1 s.h.
Small-group case study seminars and simulated patient instructor learning experiences; clinical problems coordinated with concurrent courses taken in curriculum; student centered, problem-based learning format; emphasis on evidence-based practice objectives. Second in a two-part series of integrated courses. Prerequisites: PTRS:5235.

PTRS:5790 Integrated Clinical Education in Physical Therapy I 1 s.h.
Integrated clinical experiences in area physical therapy clinics; overview of diverse nature of practice through half-day experiences; basic skills in examination, intervention, and documentation.

PTRS:5791 Integrated Clinical Education in Physical Therapy II 1 s.h.
Continuation of PTRS:5790; integrated clinical experiences in area physical therapy clinics; overview of diverse nature of practice through full-day clinical experiences; basic skills in examination, intervention, and documentation. Prerequisites: PTRS:5790. Requirements: Doctor of Physical Therapy program enrollment.

PTRS:6120 Physical Therapy Management and Administration I 2 s.h.
The changing U.S. health care system; physical therapy services across continuum of care, reimbursement to health care providers, mechanisms for controlling costs while providing quality care; clinical vignettes, small group problem solving.

PTRS:6121 Physical Therapy Management and Administration II 1 s.h.
Principles of management in physical therapy practice; historical perspective, current health care environment; business principles; marketing, managing risk, medical/legal concerns, professional and personal growth and development.

PTRS:6122 Psychosocial Aspects of Patient Care 1 s.h.
Emotional reactions to illness/trauma; social determinants of health; recognition of mental illness in physical therapy examination and intervention; psychosocial aspects of disability as they relate to patient-physical therapist interaction; effective communication strategies; cultural competence in professional behavior and patient care.

PTRS:6133 Pain Mechanisms and Treatment 1-2 s.h.
Introduction to basic science mechanisms, assessment, and management of pain; basic science mechanism involved in transmission and perception of painful stimuli after tissue injury, assessment and physical therapy management of pain; emphasis on scientific principles and published literature to support treatment techniques.

PTRS:6134 Physical Therapy Management of Integumentary System 2 s.h.
Overview of physical therapy examination and management of the integumentary system; wound pathology, diagnosis associated with the integumentary system, inflammation and repair, examination and reexamination techniques, documentation, clinical decision-making, lecture and laboratory formats; interventions, including patient/client information, physical agents, electrotherapy, wound dressing.

PTRS:6143 Selected Topics in Physical Therapy Practice 2 s.h.
Specialty area of practice including wheelchair seating and prescription, pelvic health, home assessment, durable medical equipment (DME) recommendations, and geriatrics; topics dictated by changing needs of health care and the profession; emphasis on clinical decision-making, synthesis and evaluation of information with respect to first-year physical therapy curriculum.

PTRS:6145 Interprofessional Education II: Communication, Teaching, and Learning 1 s.h.
Practical skills for effective communication, teaching, and learning in contemporary interprofessional practice. Learning experiences include workshop-based training in teaching, culminating in opportunities to teach functional anatomy to year-one medical students. Hone therapeutic communication skills, including patient education, and work as teams to select and administer appropriate neuromusculoskeletal examination techniques. Interact with clinicians from peer professions; explore fundamentals of co-treatment and effective interprofessional communication.

PTRS:6170 Management of People With Prosthetic and Orthotic Needs 2 s.h.
Physical therapy management and assessment of patients in need of prosthetic and orthotic devices; principles and components of prosthetic and orthotic design and use.

PTRS:6172 Radiology/Imaging for Physical Therapists 2 s.h.
Basic principles and procedures for acquisition and interpretation of radiology and imaging in clinical practice and research; plain film radiographs, CT, MRI, other common imaging modalities; case-based, multidisciplinary approach.

PTRS:6173 Differential Diagnosis in Physical Therapy 2 s.h.
Use of physical therapy examination and evaluation skills to diagnose physical therapy problems; focus on use of good clinical decision-making skills when analyzing a patient's history and administering physical therapy tests and measures to confirm or rule out differential diagnoses; components of the medical examination; importance of collaboration between therapists and other health professionals; interactive case studies presented by clinical experts.

PTRS:6176 Pharmacology for Physical Therapists 3 s.h.
Contemporary pharmacology; overview of basic pharmokinetic and pharmacodynamic principles; relation of drug therapy to therapeutic interventions provided by physical therapists; small group clinical case presentations.

PTRS:6200 Pediatric Physical Therapy 2 s.h.
Preparation for physical therapy practice in pediatric settings using interdisciplinary family-centered practice; normal and abnormal development, standardized assessment, service-delivery settings, interventions, management strategies specific to pediatrics.

PTRS:6202 Musculoskeletal Therapeutics II 3 s.h.
Pathology, assessment, management of orthopedic disorders of the upper quarter; problem-solving approach to evaluation and management of patients with musculoskeletal conditions. Prerequisites: PTRS:5201.

PTRS:6203 Musculoskeletal Therapeutics III 4 s.h.
Pathology, assessment, management of orthopedic disorders of the lower quarter; problem-solving approach to evaluation and management of patients with musculoskeletal conditions. Prerequisites: PTRS:6202.

PTRS:6204 Progressive Functional Exercise 2 s.h.
Therapeutic exercise options (e.g., isometrics, isotonics, isokinetics, plyometrics, endurance exercises, stretching exercises) and training principles; application to functional activities, including those of daily living, work, recreation, and sport; laboratory component.

PTRS:6224 Activity-Based Neural and Musculoskeletal Plasticity in Health Care 4 s.h.
Examination of neural, muscular, and skeletal plasticity to increased and decreased use in normal and pathological states (chronic inactivity, obesity, metabolic syndromes, orthopedic and neurological injuries); principles of genetic regulation with physical activity including underlying mechanisms contributing to acute and chronic adaptations of muscle, spinal circuitry, and supra-spinal centers; integration of movement control concepts through contemporary papers evaluating short and long latency reflexes, posture and balance control, spasticity, and motor learning in individuals with acute and chronic perturbations to the nervous system.

PTRS:6225 Neuromuscular Therapeutics 3 s.h.
Evidence-based application of clinical neuroscience, motor control, and learning principles to practice of neurological physical therapy; approaches to evaluation and therapeutic intervention for clients with adult-onset neurological conditions, with emphasis on examination, developing a diagnosis, clinical decision-making, and prescribing interventions that help clients accomplish goals. Prerequisites: PTRS:6224.

PTRS:6237 Community Outreach and Engagement I 1 s.h.
Outreach and engagement activities with individuals and organizations in the community; students select service learning experiences from current community partners, or may suggest their own idea, and develop their individual learning goals for these experiences; discussion and written assignments focus on reflection of student experiences with persons who are different than themselves, and on social responsibility, advocacy, and professionalism in the field of physical therapy; first in a two-course series.

PTRS:6238 Community Outreach and Engagement II 1 s.h.
Outreach and engagement activities with individuals and organizations in the community; students select from current community partners, or may suggest their own idea, and develop their individual learning goals for these experiences; discussion and written assignments focus on reflection about student experiences with persons who are different than themselves, and on social responsibility, advocacy, and professionalism in the field of physical therapy; second in a two-course series. Prerequisites: PTRS:6237.

PTRS:6250 Critical Inquiry I: Evidence-Based Practice 2 s.h.
Topics relevant to evidence-based practice and research design; identification of appropriate questions for research and clinical applications, location and evaluation of available evidence, identification of issues that affect validity of research designs, interpretation of basic statistical analyses.

PTRS:6251 Critical Inquiry II: Rehabilitation Research 2 s.h.
Experience conducting group research projects under faculty supervision; data collection and analysis, manuscript preparation, oral defense of research findings during a formal poster presentation. Prerequisites: PTRS:6250.

PTRS:6252 Critical Inquiry III: Clinical Application 1 s.h.
Principles and procedures learned in PTRS:6250 and PTRS:6251 applied to a clinical setting; students write and present a case report with an evidence-based practice focus, using a clinical case from their final internships. Prerequisites: PTRS:6251. Requirements: Physical Therapy and Rehabilitation Science program enrollment.

PTRS:6253 Functional Neuroanatomy arr.
Basic principles of neuroanatomy and neurophysiology; emphasis on human central nervous system; laboratory emphasis on anatomical study of spinal cord and brain. Offered spring semesters. Requirements: physical therapy and rehabilitation science enrollment or graduate standing. Same as ACB:6252.

PTRS:6792 Integrated Clinical Education in Physical Therapy IV 1 s.h.
Two-week, full-time clinical experience in physical therapy clinics under guidance of physical therapists; theory and practice of physical therapy procedures, competence building in basic skills. Prerequisites: PTRS:6793. Requirements: Doctor of Physical Therapy Program enrollment.

PTRS:6793 Integrated Clinical Education in Physical Therapy III 3 s.h.
Six-week, full-time clinical education experience in a rural health environment. Prerequisites: PTRS:5791. Requirements: Doctor of Physical Therapy program enrollment.

PTRS:6794 Terminal Clinical Education in Physical Therapy I 4 s.h.
Nine week, full-time clinical education experience divided among various settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty. Prerequisites: PTRS:6792. Requirements: Doctor of Physical Therapy program enrollment.

PTRS:6795 Terminal Clinical Education in Physical Therapy II 4 s.h.
Nine-week, full-time clinical education experience divided among various settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty. Prerequisites: PTRS:6794. Requirements: Doctor of Physical Therapy program enrollment.

PTRS:6796 Terminal Clinical Education in Physical Therapy III 4 s.h.
Nine-week, full-time clinical education experience divided among various settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty. Prerequisites: PTRS:6795. Requirements: Doctor of Physical Therapy program enrollment.

PTRS:7812 Biomedical Instrumentation and Measurement 3 s.h.
Introduction to biomedical instrumentation and measurement; understanding sources of error and noise in biomedical research applications; basic circuit analysis, calibration of measurement tools, A/D conversion, digital filtering; lab components. Offered fall semesters of even years.

PTRS:7820 Seminar in Rehabilitation Science 1 s.h.
Exploration of research related to rehabilitation science; lectures by faculty, graduate students, and guest scholars with expertise in areas relevant to rehabilitation science (e.g., neuroscience, physiology, medicine, engineering, pharmacology, integrated physiology).

PTRS:7826 Scientific Writing in Rehabilitation Science 2 s.h.
Knowledge of and experience related to scientific writing, critical review of scientific literature, publication in the biomedical sciences, thesis/dissertation writing, grant writing, scientific presentation, writing used in academic and scientific careers.

PTRS:7875 Analysis of Activity-Based Neural and Musculoskeletal Plasticity 3 s.h.
Examination of neural, muscular, and skeletal plasticity to increased/decreased use in normal and pathological states (chronic inactivity, obesity, metabolic syndromes, orthopedic and neurological injuries); genetic regulation with physical activity and underlying mechanisms contributing to acute and chronic adaptations of muscle, spinal circuitry, and supra-spinal centers; integration of movement control concepts through contemporary papers evaluating short and long latency reflexes, posture and balance control, spasticity, and motor learning in individuals with acute and chronic perturbations to the nervous system; individual research projects.

PTRS:7880 Teaching Practicum arr.
Individual instruction, observation, experimentation in teaching, guidance, analysis of evaluation processes in Physical Therapy and Rehabilitation Science.

PTRS:7884 Practicum in Research arr.
Laboratory experiences connected with investigative process; individual instruction, observation, activities in methodological development, data acquisition, data analysis aspects of research.

PTRS:7895 Advanced Seminar in Rehabilitation Science arr.
Current status of research for biological, mechanical, psychological components pertinent to cardiopulmonary, musculoskeletal, neuromuscular areas of rehabilitation science; preparation for comprehensive exam.

PTRS:7899 Introduction to Pain: Overview of Theories, Concepts, and Mechanisms 1 s.h.
Overview of pain concepts and mechanisms; general overview of pain, models of pain, peripheral and central mechanisms, and pain inhibition. Requirements: prior neuroscience course.

PTRS:7900 Rehabilitation Research Capstone Project arr.
Specific phases of the research process; development of a research question and associated hypotheses, collection and analysis of data, interpretation and discussion of the information's meaning; presentation to sponsoring mentor's laboratory/program, and written document.

PTRS:7901 Clinical Correlates of Pain: Syndromes and Management 1 s.h.
Common pain conditions and management of pain using an interdisciplinary focus; lectures by University of Iowa Hospitals and Clinics clinicians on a variety of acute and chronic pain conditions and management approaches. Requirements: prior neuroscience course.

PTRS:7902 Molecular, Cellular, and Neural Mechanisms of Pain 2 s.h.
Basic science mechanisms of pain and pain modulation; understanding molecular basis for pain in nociceptive afferents (peripheral sensitization), underlying molecular and neuronal mechanisms of central processing of pain (central sensitization), cortical pain processing, animal and human experimental pain models; readings from past and current literature. Prerequisites: PTRS:7899. Requirements: prior neuroscience course.

PTRS:7903 Rehabilitation Management of Pain 1 s.h.
Basic principles of rehabilitation for pain control including education, exercise, and electrophysical modalities; evidence-based approach to rehabilitation covering mechanisms of action and clinical effectiveness; case studies. Prerequisites: PTRS:7899 and PTRS:7901.

PTRS:7925 Independent Study arr.
Problem-solving experience in physical therapy; commensurate with student's interest, ability.

PTRS:7927 Research in Rehabilitation Science arr.
Placement of physical therapy on sound scientific base; therapy; initiation, refinement, establishment of methods in physical therapy evaluation, treatment; direct clinical and laboratory approach, philosophical treatise, or research proposal.

PTRS:7930 Critical Thinking in Neuro-Mechanical Systems arr.
Problem solving experience in neuro-mechanical systems, commensurate with student interest, ability.

PTRS:7931 Critical Thinking in Pain arr.
Problem solving experience in pain, commensurate with student interest, ability.

PTRS:7932 Critical Thinking in Biomechanics and Human Performance Assessment **arr.**
Problem solving experience in biomechanics and human performance assessment, commensurate with student interest, ability.

PTRS:7933 Critical Thinking in Activity-Based Plasticity **arr.**
Problem solving experience in movement control/human performance, commensurate with student interest, ability.

PTRS:7934 Critical Thinking in Neural Plasticity **arr.**
Problem solving experience in neural plasticity, commensurate with student interest, ability.

PTRS:7935 Critical Thinking in Movement Science **arr.**
Problem solving experience in movement science, commensurate with student interest; ability.

PTRS:7936 Critical Thinking in Cardiovascular Physiology **arr.**
Problem solving experience in cardiovascular physiology, commensurate with student interest, ability.

PTRS:7990 Thesis: Rehabilitation Science **arr.**
Investigative process: formulation of problem, literature search and analysis, procedure for collecting data, data analysis, organization and writing of thesis proposal, thesis.

Physical Rehabilitation Science, MA

The Master of Arts in physical rehabilitation science is granted to students working toward the Doctor of Philosophy in physical rehabilitation science.

Learning Outcomes

Graduates will be prepared for research appointments that emphasize research in rehabilitation science. They will possess:

- theoretical and scientific knowledge to perform basic, applied, or clinical-level original research that leads to scientific presentations, publication in peer-reviewed journals, and competition for extramural funding through scientific grant writing; and
- breadth of knowledge in exercise physiology, biomechanics, neuroscience, or motor control specialty areas as they relate to impairment, functional limitation, and disability.

Requirements

The Master of Arts in physical rehabilitation science is awarded to students pursuing knowledge about the underlying science of rehabilitation. The MA degree does not prepare students to practice physical therapy. Students often work toward the Doctor of Philosophy in physical rehabilitation science with the goal of promoting scholarship in the field. See the PhD in physical rehabilitation science [p. 1954] in this section of the catalog.

Doctor of Physical Therapy, DPT

The Doctor of Physical Therapy (DPT) is the entry-level professional degree for physical therapists. Based on the number of outstanding applicants, approximately 50 students are annually enrolled in the DPT program.

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Learning Outcomes

Graduates will be prepared to:

- examine, evaluate, treat, and prevent impairments, functional limitations, and disabilities;
- maintain and promote fitness, health, and quality of life; and
- ensure availability, accessibility, and excellence in the delivery of physical therapy services to patients/clients.

As essential participants in the health care delivery system, graduates will be:

- prepared to assume leadership roles in prevention and health maintenance programs, in the provision of rehabilitation services, and in professional and community organizations; and
- able to play important roles in developing health policy and appropriate standards as well as assessing clinical outcomes for the various elements of physical therapy practice.

Requirements

The Doctor of Physical Therapy requires a minimum of 104 s.h. and is completed in two and a half years. Students must maintain a Graduate College program grade-point average of at least 3.00.

The Doctor of Physical Therapy Program at the University of Iowa is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). Satisfactory completion of the professional program qualifies candidates to take the National Physical Therapy Exam for licensure to practice. The minimum passing score on the exam is the same in all jurisdictions.

The Doctor of Physical Therapy degree requires the following coursework.

First Year, Summer

Course #	Title	Hours
PTRS:5101	Introduction to Physical Therapy Practice	2
PTRS:5102	Principles of Physical Therapy I	2
PTRS:5205	Health Promotion and Wellness	3

First Year, Fall

Course #	Title	Hours
PTRS:5100	Professional Issues and Ethics	1
PTRS:5103	Principles of Physical Therapy II	2
PTRS:5209	Surface Anatomy	1
PTRS:5210	Kinesiology and Pathomechanics	4
PTRS:5212	Human Pathology for the Physical Therapist	3
PTRS:5235	Case-Based Learning I	1
PTRS:5790	Integrated Clinical Education in Physical Therapy I	1
ACB:5108	Human Anatomy	5

First Year, Spring

Course #	Title	Hours
PTRS:5131	Therapeutic Physical Agents	2
PTRS:5144	Interprofessional Education I: Team-Based Approach to Health Care	1
PTRS:5201	Musculoskeletal Therapeutics I	3
PTRS:5206	Cardiopulmonary Therapeutics	3
PTRS:5215	Applied Clinical Medicine	2
PTRS:5236	Case-Based Learning II	1
PTRS:5791	Integrated Clinical Education in Physical Therapy II	1
PTRS:6253	Functional Neuroanatomy	4

Second Year, Summer

Course #	Title	Hours
PTRS:6120	Physical Therapy Management and Administration I	2
PTRS:6143	Selected Topics in Physical Therapy Practice	2
PTRS:6176	Pharmacology for Physical Therapists	3
PTRS:6793	Integrated Clinical Education in Physical Therapy III	3

Second Year, Fall

Course #	Title	Hours
PTRS:6122	Psychosocial Aspects of Patient Care	1
PTRS:6134	Physical Therapy Management of Integumentary System	2
PTRS:6145	Interprofessional Education II: Communication, Teaching, and Learning	1
PTRS:6170	Management of People With Prosthetic and Orthotic Needs	2
PTRS:6200	Pediatric Physical Therapy	2
PTRS:6202	Musculoskeletal Therapeutics II	3

PTRS:6224	Activity-Based Neural and Musculoskeletal Plasticity in Health Care	4
PTRS:6237	Community Outreach and Engagement I	1
PTRS:6250	Critical Inquiry I: Evidence-Based Practice	2
One of these (with advisor approval):		1
PTRS:7930	Critical Thinking in Neuro-Mechanical Systems	1
PTRS:7931	Critical Thinking in Pain	1
PTRS:7932	Critical Thinking in Biomechanics and Human Performance Assessment	1
PTRS:7933	Critical Thinking in Activity-Based Plasticity	1
PTRS:7934	Critical Thinking in Neural Plasticity	1
PTRS:7935	Critical Thinking in Movement Science	1
PTRS:7936	Critical Thinking in Cardiovascular Physiology	1

Second Year, Spring

Course #	Title	Hours
PTRS:6121	Physical Therapy Management and Administration II	1
PTRS:6133	Pain Mechanisms and Treatment	2
PTRS:6172	Radiology/Imaging for Physical Therapists	2
PTRS:6173	Differential Diagnosis in Physical Therapy	2
PTRS:6203	Musculoskeletal Therapeutics III	4
PTRS:6204	Progressive Functional Exercise	2
PTRS:6225	Neuromuscular Therapeutics	3
PTRS:6238	Community Outreach and Engagement II	1
PTRS:6251	Critical Inquiry II: Rehabilitation Research	2
PTRS:6792	Integrated Clinical Education in Physical Therapy IV	1

Third Year, Summer

Course #	Title	Hours
PTRS:6794	Terminal Clinical Education in Physical Therapy I	4

Third Year, Fall

Course #	Title	Hours
PTRS:6252	Critical Inquiry III: Clinical Application	1
PTRS:6795	Terminal Clinical Education in Physical Therapy II	4
PTRS:6796	Terminal Clinical Education in Physical Therapy III	4

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They must have completed a baccalaureate degree and all prerequisite coursework from an accredited institution in the United States, or anticipate completing the degree before enrolling in the DPT program. They must have a cumulative grade-point average (GPA) of at least 3.00 and must have completed the following prerequisite coursework, preferably with a GPA of at least 3.00.

All applicants must take the Graduate Record Examination (GRE) General Test. They must take the test early enough for their scores to be received prior to the application deadline.

Prerequisite Science Courses

All science courses should include the appropriate laboratory instruction, if available. The prerequisite courses must be taken for a letter grade. Credit awarded through advanced placement testing may be applied to the prerequisites as indicated below.

Biological Sciences

8 s.h. of introductory biology courses plus one advanced biology course, or AP biology credit plus 8 additional s.h. of biology including at least one advanced biology course, equivalent to 12 s.h.

Physiology

A systemic human physiology course, preferably with a lab component, equivalent to 3 s.h., or a two-course sequence of anatomy and physiology, preferably with a lab component, equivalent to 6 s.h., can fulfill the physiology and anatomy prerequisites.

Anatomy

Human or comparative vertebrate anatomy, preferably with a lab component, equivalent to 3 s.h., or a two-course sequence of anatomy and physiology, preferably with a lab component, equivalent to 6 s.h., can fulfill the physiology and anatomy prerequisites.

Physics

A complete introductory series equivalent to 8 s.h.

Chemistry

A complete introductory series equivalent to 8 s.h.

Psychology

The equivalent of 6 s.h. of psychology courses, or AP psychology credit plus one additional psychology course beyond the introductory level.

Mathematics

A college-level mathematics course at the level of trigonometry or higher, equivalent to 3 s.h., or AP credit.

Statistics

A statistical methods course equivalent to 3 s.h.

Applications

Applications are submitted online through the Physical Therapist Centralized Application Service (PTCAS). PTCAS

allows applicants to use a single application and one set of materials to apply to multiple physical therapy programs. Once the application portfolio is complete with PTCAS, they will forward it to the University of Iowa.

See Application Timeline on the Department of Physical and Rehabilitation Therapy website for the application timeline.

The physical therapy admissions committee requests personal, on-campus interviews. Since the number of students admitted into each class is limited, not all who apply for admission are invited for an interview.

Background Checks

Enrollment in the Doctor of Physical Therapy program is contingent on a successful criminal background check. Drug screening may be required for some clinical rotations. These costs are the responsibility of the applicant.

Expenses

Applicants admitted to the DPT program must make an advance tuition payment which is forfeited if the applicant does not enroll. In addition to paying University of Iowa tuition and fees plus departmental fees, students are assessed laboratory fees for the human anatomy and neuroanatomy courses and are responsible for purchasing supplies, such as lab coats. Students are also responsible for all costs associated with professional development and clinical experiences.

All students are required to comply with the pre-entry and periodic health screening program developed by Student Health in cooperation with University of Iowa Health Care. All costs incurred for the health screenings are the student's responsibility. Students are also required to have health insurance.

Career Advancement

The employment outlook for physical therapy graduates is strong. Opportunities exist for professional practice in inpatient, outpatient, and community-based organizations. These include general or specialized hospitals, programs for children with disabilities, private physical therapy clinics, extended care facilities, nursing homes, community and governmental agencies, rehabilitation centers, the armed forces, foreign service, home health agencies, school systems, fitness centers, and athletic facilities. Teaching and research positions also are available as well as options for successful self-employment.

Physical therapists report a very high level of job satisfaction, driven both by prevalent employment opportunities and social interaction.

Physical Rehabilitation Science, PhD

Through coursework and participation in research, the Doctor of Philosophy program in physical rehabilitation science emphasizes the development of an individual's expertise as a researcher in rehabilitation science.

Learning Outcomes

Graduates who complete the program are prepared for academic appointments that emphasize research, scholarship, and teaching. They possess:

- theoretical and scientific knowledge to perform basic, applied, or clinical-level original research that leads to scientific presentations, publication in peer-reviewed journals, and competition for extramural funding through scientific grant writing;
- breadth of knowledge in exercise physiology, biomechanics, neuroscience, or motor control specialty areas as they relate to impairment, functional limitation, and disability; and
- theoretical and practical skills required for college or university teaching at the professional entry and advanced graduate levels.

Requirements

The Doctor of Philosophy in physical rehabilitation science requires a minimum of 72 s.h. of graduate credit. Students must maintain a UI cumulative grade-point average of at least 3.00.

The program is designed to advance a student's ability to independently develop and carry out research that establishes the scientific basis for the prevention, evaluation, and treatment of impairments, functional limitations, and disability. The curriculum is flexible enough to accommodate research focusing on basic, applied, or clinical studies in the rehabilitation sciences. Students have access to the program's research laboratories (see Facilities [p. 1945] in this section of the catalog).

Curriculum

Students and their faculty advisors develop an individualized study plan. A preliminary study plan is developed within the first year of study for full-time students and within the second year of study for part-time students; a final plan is submitted to the Graduate College when the PhD comprehensive examination is scheduled.

To ensure breadth of knowledge, all students complete specific core, research, and scientific specialty area content courses. Elective courses are selected to provide in-depth study of the specialty; they are complemented by an advanced seminar course specific to a student's specialty and taken in preparation for the comprehensive examination.

Students must satisfactorily complete the comprehensive examination, which is taken after all required coursework is completed. Doctoral study culminates with 12 s.h. of thesis research and an oral examination.

General Core Requirement

PhD students must complete the following core requirements. In addition to the following courses, the Collaborative Institutional Training Initiative (CITI)—online, web-based training—must be completed before a student enrolls in BMED:7270 and BMED:7271.

Course #	Title	Hours
All of these:		
PTRS:7812	Biomedical Instrumentation and Measurement	3
PTRS:7820	Seminar in Rehabilitation Science (taken twice for 1 s.h. each)	2
PTRS:7880	Teaching Practicum	arr.
BIOS:5120/ IGPI:5120/ STAT:5610	Regression Modeling and ANOVA in the Health Sciences	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
PSQF:7385/ CSED:7385/ EDTL:7385/ EPLS:7385/ GRAD:7385	Teaching and Learning in Higher Education	3
One of these:		
BIOS:4120	Introduction to Biostatistics	3
STAT:4143/ PSQF:4143	Introduction to Statistical Methods	3

Research Requirement

Students complete at least 27 s.h. from the following. The capstone course PTRS:7900 is recommended but not required for students who enter the program with a master's or doctoral-level degree; however, it is required for students who enter with a bachelor's degree.

Course #	Title	Hours
PTRS:7826	Scientific Writing in Rehabilitation Science	2
PTRS:7884	Practicum in Research	arr.
PTRS:7895	Advanced Seminar in Rehabilitation Science	arr.
PTRS:7900	Rehabilitation Research Capstone Project	arr.
PTRS:7927	Research in Rehabilitation Science	arr.
PTRS:7930	Critical Thinking in Neuro-Mechanical Systems	arr.
PTRS:7931	Critical Thinking in Pain	arr.
PTRS:7932	Critical Thinking in Biomechanics and Human Performance Assessment	arr.
PTRS:7933	Critical Thinking in Activity-Based Plasticity	arr.
PTRS:7934	Critical Thinking in Neural Plasticity	arr.
PTRS:7935	Critical Thinking in Movement Science	arr.
PTRS:7936	Critical Thinking in Cardiovascular Physiology	arr.

PTRS:7990	Thesis: Rehabilitation Science	arr.

Specialty Content Requirement

Students must complete at least 9 s.h. in their scientific specialty area. Students may choose courses from the following list, but other courses suited to a student's background knowledge and interest area are considered.

Course #	Title	Hours
Anatomy and Cell Biology		
ACB:8401	Advanced Human Anatomy	arr.
Epidemiology		
EPID:6900	Design of Intervention and Clinical Trials	3
Health and Human Physiology		
HHP:6130	Advanced Skeletal Muscle Physiology	1,3
HHP:6150	Advanced Clinical Exercise Physiology	1,3
HHP:6300	Motor Control Seminar	1
HHP:6410	Advanced Integrative Physiology of Exercise	1,3
HHP:6460	Advanced Cardiovascular Physiology	1,3
HHP:6470	Advanced Physiology of Aging	1,3
Neuroscience		
NSCI:7235/ NEUR:7235	Neurobiology of Disease	3
Nursing		
NURS:3460	Professional Role II: Research	3
Occupational and Environmental Health		
OEH:4310	Occupational Ergonomics: Principles	3
Pharmacology		
PCOL:5137	Neurotransmitters	1
PCOL:6207	Ion Channel Pharmacology	1
PCOL:6250	Advanced Problem Solving in Pharmacological Sciences	1
Physical Therapy		
PTRS:5210	Kinesiology and Pathomechanics	4
PTRS:5206	Cardiopulmonary Therapeutics	3
PTRS:6224	Activity-Based Neural and Musculoskeletal Plasticity in Health Care	4
PTRS:6250	Critical Inquiry I: Evidence-Based Practice	2
PTRS:6251	Critical Inquiry II: Rehabilitation Research	2
PTRS:6253	Functional Neuroanatomy	arr.
PTRS:7875	Analysis of Activity-Based Neural and Musculoskeletal Plasticity	3
PTRS:7899	Introduction to Pain: Overview of Theories, Concepts, and Mechanisms	1
PTRS:7901	Clinical Correlates of Pain: Syndromes and Management	1
PTRS:7902	Molecular, Cellular, and Neural Mechanisms of Pain	2
PTRS:7903	Rehabilitation Management of Pain	1

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations. They should have a cumulative grade-point average of at least 3.00 and scores at or above the 50th percentile for each section of the Graduate Record Exam (GRE) General Test. A minimum of two years of clinical experience may be considered highly desirable, depending on the research interest area.

Application materials must include a complete Graduate College application form, test scores, transcripts, three letters of recommendation, and a statement of purpose.

Personal interviews are required of all applicants selected for consideration by the admissions committee. On-campus interviews are preferred, but telephone interviews may be substituted when necessary. Approximately 20 students are enrolled in the PhD program each year.

Career Advancement

The PhD program trains students to obtain positions as professors and researchers in rehabilitation science.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

The physician assistant profession is one of the newest and most exciting in health care. Physician assistants (PAs) are licensed to practice medicine with physician supervision in most states. Some states are granting independent practice status to PAs nationally. They are responsible for making medical decisions and providing a broad range of diagnostic and therapeutic services.

In the traditional office setting, PAs see patients, obtain histories, perform physical examinations, and order necessary laboratory and/or radiological studies. Based on this information, the PA establishes a diagnosis, develops an appropriate management plan, and initiates treatment that may include prescribing medications. The physician is consulted as needed and remains ultimately responsible for the care provided by the physician/PA team. PAs also are involved in both patient and community health education.

The Department of Physician Assistant Studies and Services is located on the University of Iowa health sciences campus, which includes University of Iowa Health Care, one of the nation's largest university-owned teaching hospitals.

Programs

Graduate Program of Study

- Master of Physician Assistant Studies [p. 1960]

Courses

Physician Assistant Studies and Services Courses

PA:8212 Fundamentals of EKG and ACLS for Physician Assistant Students 2 s.h.
Theory and practice with basic analysis of EKG strips and interpretation, including rhythm disturbances; completion of American Heart Association's Advanced Cardiac Life Support (ACLS) program.

PA:8213 Fundamentals of Radiology for Physician Assistant Students 1 s.h.
Theory and practice for interpretation of radiographs including general radiology, body, chest, musculoskeletal, pediatrics, and neurology. Requirements: enrollment in physician assistant studies and services.

PA:8214 Fundamentals of Clinical Laboratory Medicine for Physician Assistant Students 1 s.h.
Theory and practice of selected clinical laboratory techniques and procedures; emphasis on effective utilization of clinical laboratory in diagnosis and management of disease states. Requirements: enrollment in physician assistant studies and services.

PA:8301 Seminar for Physician Assistant Students 1 s.h.
Professional issues that affect the physician assistant's practice of medicine.

PA:8302 Physician Assistant Professional and Clinical Skills 2 s.h.
Hands-on experience and activities; suturing, injections, prescription and order writing, medical records, patient confidentiality, Iowa Law governing physician assistant practice, motivational interviewing, toddler and disability exams.

PA:8303 Physician Assistant Senior Capstone 1 s.h.
Demonstration of strong clinical knowledge base and proficiency in basic clinical problem solving; focus on student's ability to think logically and critically, integrate and synthesize knowledge, access evidence-based medical resources, document patient care appropriately, apply clinical knowledge, and demonstrate professional behavior. Requirements: enrollment in physician assistant studies and services.

PA:8304 Emergency Medicine for Physician Assistant Students arr.
Obtaining and recording pertinent historical data, obtaining indicated laboratory studies, assessing the results, arriving at a diagnosis, formulating a treatment plan, implementing appropriate therapy.

PA:8305 Gynecology for Physician Assistant Students 4 s.h.
Opportunity to develop proficiency in history and physical exams of gynecological patients; outpatient, family planning, gynecological cancer, concepts of diagnostic techniques and therapy.

PA:8306 Family Practice I for Physician Assistant Students 4 s.h.
Obtaining and recording complete history and physical exams; formulation of differential diagnosis and problem list; ordering, obtaining, and interpreting lab and diagnostic studies; implementation of therapeutic procedures and treatment plans.

PA:8307 Family Practice II for Physician Assistant Students 4 s.h.
Opportunity to participate in delivery of ambulatory primary care; at a different site from PA:8306.

PA:8308 General Surgery for Physician Assistant Students 4-6 s.h.
Preparation for work as an assistant to the generalist; outpatient and inpatient surgical services, including surgical procedures and management of postoperative course.

PA:8309 Internal Medicine for Physician Assistant Students 4,6 s.h.
Eliciting a medical history, doing a pertinent physical exam, obtaining indicated lab studies, assessment of results, formulation of management plan, and implementation of appropriate therapy for common internal medicine problems.

PA:8310 Pediatrics for Physician Assistant Students arr.
Knowledge and skills required for providing appropriate medical care to infants, children, and adolescents; initiation and promotion of interpersonal relationships.

PA:8311 Psychiatry for Physician Assistant Students 4 s.h.
Training in history and physical exams of psychiatry patients, including individual and family therapy, vocational testing and guidance, development of interviewing skills.

PA:8312 Long-Term Care for Physician Assistant Students arr.
Development of clinical knowledge and skill in diagnosing, treating, and performing procedures for patients of long-term care settings; knowledge of relevant conditions.

PA:8322 Obstetrics for Physician Assistant Students arr.
Proficiency in physical exam of OB patients; applying concepts of diagnostic techniques and therapy; following patients' course, including labor, delivery, and postpartum care.

PA:8325 Pediatric Elective for Physician Assistant Students arr.
Experience working with children and adolescents.

PA:8326 Radiology Elective for Physician Assistant Students arr.
Proficiency in systematic evaluation of normal and abnormal routine radiologic examinations; listing indications for special exam procedures, including details of prepping the patient.

PA:8329 Psychiatry Elective for Physician Assistant Students arr.
Training in evaluation and treatment of psychiatry patients.

PA:8330 Surgery Elective for Physician Assistant Students arr.
Experience in a wide range of surgical problems, procedures, and treatments, including diagnosis, care and treatment, and postoperative courses of surgical patients.

PA:8331 Surgery Elective (Transplant/Organ Retrieval) for Physician Assistant Students arr.
Extensive experience in care of patients with end-stage organ failure; evaluation of potential transplant candidates, participation in surgical procedures on transplant service.

PA:8335 Internal Medicine Elective for Physician Assistant Students arr.
Training in varied internal medicine problems; recognition, appropriate treatment.

PA:8337 Internal Medicine (EKG) Elective for Physician Assistant Students arr.
Experience reading electrocardiograms, interpreting cardiac arrhythmias, performing and evaluating EKG stress tests.

PA:8338 Internal Medicine (Gastroenterology) Elective for Physician Assistant Students arr.
Experience with a wide range of gastrointestinal pathology; history and physical exams of gastrointestinal diagnostic procedures, follow-up care of patients through outpatient clinics.

PA:8340 Internal Medicine (Geriatrics) Elective for Physician Assistant Students arr.
Familiarity with broad spectrum of medical conditions among the elderly; experience in history and physical exams, diagnosis of geriatric patients along with follow-up visits.

PA:8341 Internal Medicine (Pulmonary) Elective for Physician Assistant Students arr.
Development of basic clinical knowledge and skills for diagnosis, treatment, and management of pulmonary diseases.

PA:8342 Internal Medicine (Palliative Care/Hospice) Elective for Physician Assistant Students arr.
Work on a hospice care team performing evaluation, treatment, and education of patients with terminal illnesses; dealing with the prospect of death.

PA:8346 Family Practice Elective for Physician Assistant Students arr.
Proficiency in delivering ambulatory primary care.

PA:8347 Gynecology Elective (Women's Health) for Physician Assistant Students arr.
Experience in annual gynecologic exams, PAP screening, gynecology problems, contraception issues, STD screening and counseling, common gynecologic procedures.

PA:8348 Migrant Health Elective for Physician Assistant Students arr.
Basic clinical knowledge and skills for diagnosis, treatment, and prevention of diseases, injuries, and conditions related to environmental exposure in migrant worker populations.

PA:8349 Occupational Medicine Elective for Physician Assistant Students arr.
Basic clinical knowledge and skills for diagnosis, treatment, and prevention of work-related diseases, injuries, and conditions related to environmental exposure.

PA:8353 International Medicine for Physician Assistant Students arr.
Basic clinical knowledge and skills for diagnosis, treatment, and prevention of diseases, injuries, and conditions relevant to international medicine.

PA:8355 Gynecologic Oncology Elective for Physician Assistant Students arr.
Experience developing diagnostic skills in clinical gynecologic oncology, learning methods of staging specific cancers; and assisting in therapy and outpatient management of patients with varied cancers.

PA:8357 Physician Assistant Transitions to Clinical Rotations 1 s.h.
Additional didactic and hands-on skills essential for preparation prior to core and elective clinical rotations. Requirements: enrollment in physician assistant studies and services.

PA:8358 Internal Medicine (Endocrinology) Elective for Physician Assistant Students arr.
Basic clinical knowledge and skills for diagnosis treatment and management for common endocrinology diseases.

PA:8360 Physician Assistant Summer Clinicals 6 s.h.
Clinical course for physician assistant students during their second summer session.

PA:8361 Physician Assistant Remediation and Self Study arr.
Completion of remediation or self-study program requirements.

PA:8362 Independent Study for Physician Assistant Students arr.
Students work on alternative experiences to supplement coursework and/or clinical experiences throughout various areas of the physician assistant program; self-guided experiences with faculty supervision.

PA:8363 Primary Care Academic Rotation arr.
Additional academic opportunities that enhance previous experiences gained in a clinical setting; emphasis on student participation in direct activities to supplement primary care experiences with observation and simulation activities as needed to provide a balanced experience in meeting course objectives.

PA:8364 Emergency Medicine Elective for Physician Assistant Students 2,4,6,8,10 s.h.
Training in varied emergency medicine problems; recognition and appropriate treatments.

Master of Physician Assistant Studies, MPA

The Master of Physician Assistant Studies (MPA) program emphasizes primary care medicine, particularly family medicine. It also offers elective clinical rotations in selected medical subspecialties. Students who complete the program are eligible to take the National Certifying Examination for Primary Care Physician Assistants, which they must complete successfully in order to register as physician assistants in the United States.

The Department of Physician Assistant Studies and Services is accredited by the Accreditation Review Commission on Education for the Physician Assistant and is a member of the Physician Assistant Education Association.

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

Requirements

The Master of Physician Assistant Studies (MPA) requires a minimum of 114 s.h. of credit. The curriculum spans 28 months and consists of a didactic phase and a clinical phase. The program begins in August.

The Master of Physician Assistant Studies requires the following work.

Didactic Curriculum

The MPA program's didactic phase is built on a triple-helix model whose three strands consist of clinical and professional skills (CAPS), mechanisms of health and disease (MOHD), and medicine and society (MAS). The strands are interwoven, assuring that their material is integrated and revisited throughout the didactic phase so that students' understanding and mastery of the material deepens progressively.

The didactic curriculum consists of the following courses.

Human Anatomy and Foundations of Life

Course #	Title	Hours
ACB:8101	Medical Gross Human Anatomy	5
MED:8123	Foundations of Cellular Life	5

Clinical and Professional Skills

The clinical and professional skills (CAPS) strand provides students with the knowledge, skills, and attitudes required for professional development and clinical excellence, including the sense of inquiry and lifelong habits of skill acquisition, self-assessment, and reflective practice. CAPS features developmental learning through increasingly challenging experiences across the curriculum, repeated practice opportunities, observation and feedback, and self-directed learning and reflection. CAPS requires the following three courses.

Course #	Title	Hours
MED:8121	Clinical and Professional Skills I	3
MED:8131	Clinical and Professional Skills II	4
MED:8221	Clinical and Professional Skills III	4

Mechanisms of Health and Disease

The mechanisms of health and disease (MOHD) strand focuses on multisystem mechanisms. MOHD requires the following five courses.

Course #	Title	Hours
MED:8124	Mechanisms of Health and Disease I	8
MED:8133	Mechanisms of Health and Disease II	7
MED:8134	Mechanisms of Health and Disease III	11
MED:8223	Mechanisms of Health and Disease IV	10
MED:8224	Mechanisms of Health and Disease Keystone	7

Medicine and Society

The medicine and society (MAS) strand teaches students about disease prevention, health promotion services, public health, epidemiology, health services organizations and delivery, and community dimensions of medical practice. MAS requires the following three courses.

Course #	Title	Hours
MED:8122	Medicine and Society I	3
MED:8132	Medicine and Society II	4
MED:8222	Medicine and Society III	4

Summer Curriculum

The summer curriculum consists of a six-week summer session that includes didactic workshop material in cardiology and radiology. Students complete a two-week introduction to clinical medicine before beginning the clinical rotations. The summer curriculum requires the following four courses.

Course #	Title	Hours
PA:8212	Fundamentals of EKG and ACLS for Physician Assistant Students	2
PA:8213	Fundamentals of Radiology for Physician Assistant Students	1
PA:8301	Seminar for Physician Assistant Students	1
PA:8302	Physician Assistant Professional and Clinical Skills	2

Clinical Curriculum

The program's second phase concentrates on clinical education. Students complete four weeks of didactic workshops and rotations and a 36-week core of required primary care clinical rotations, including general internal medicine, surgery, family medicine, pediatrics, emergency medicine, gynecology, and psychiatry in affiliated hospitals throughout the United States and select international locations. Students then select eight weeks of electives,

which may include rotations such as geriatrics, cardiology, dermatology, and orthopedics.

The primary care clinical rotations are designed to provide instruction and experience in caring for patients in a way that enables students to integrate the knowledge, skills, behaviors, and attitudes they learned in the program's didactic phase. Clinical training is provided at University of Iowa Health Care, the VA Iowa City Health Care, the VA Central Iowa Health Care System, Broadlawns Medical Center in Des Moines, and other affiliated hospitals throughout Iowa. In elective rotations, students gain additional clinical experience through placement with selected preceptors involved in office-based practices, typically in medically underserved rural areas.

Students also complete a master's degree project as part of the clinical curriculum.

Required Clinical Rotation

The following clinical rotations are required.

Course #	Title	Hours
PA:8304	Emergency Medicine for Physician Assistant Students	4
PA:8305	Gynecology for Physician Assistant Students	4
PA:8306	Family Practice I for Physician Assistant Students	4
PA:8307	Family Practice II for Physician Assistant Students	4
PA:8308	General Surgery for Physician Assistant Students	6
PA:8309	Internal Medicine for Physician Assistant Students	6
PA:8310	Pediatrics for Physician Assistant Students	4
PA:8311	Psychiatry for Physician Assistant Students	4

Elective Clinical Rotations

Students select elective clinical rotations from one of the following general categories. Subspecialties for the clinical rotations are included with each general category. Registration in the subspecialty area may vary based on availability from year to year.

Course #	Title	Hours
PA:8325	Pediatric Elective for Physician Assistant Students (Subspecialty areas: allergy, bone marrow transplant, cardiology, gastroenterology, genetics, neonatal intensive care (NICU), neonatology, orthopedics, pulmonary, and psychiatry)	arr.
PA:8326	Radiology Elective for Physician Assistant Students	arr.
PA:8329	Psychiatry Elective for Physician Assistant Students	arr.
PA:8330	Surgery Elective for Physician Assistant Students (Subspeciality areas: burn, cardiothoracic, neurology, surgical neonatal intensive care (SNICU), transplant and organ retrieval)	arr.
PA:8335	Internal Medicine Elective for Physician Assistant Students (Subspecialty areas: alternative medicine, cardiology, correctional medicine, dermatology, endocrinology, gastroenterology, genetics, gynecological oncology, hospice, infectious disease, interventional radiology, medical intensive care unit (MICU), migrant health, nephrology, neurology, obstetrics, ophthalmology, oncology, orthopedics, otolaryngology/ear, nose, throat, palliative care, pulmonary, rheumatology, and urology)	arr.
PA:8337	Internal Medicine (EKG) Elective for Physician Assistant Students	arr.
PA:8346	Family Practice Elective for Physician Assistant Students	arr.
PA:8347	Gynecology Elective (Women's Health) for Physician Assistant Students	arr.
PA:8353	International Medicine for Physician Assistant Students	arr.
PA:8364	Emergency Medicine Elective for Physician Assistant Students (Subspecialty areas: occupational health, toxicology, urgent care, and wilderness medicine)	2,4,6,8,10

Admission

Applicants must:

- be citizens or permanent residents of the United States;
- hold a baccalaureate degree from an accredited institution in the United States (the degree does not have to be completed at the time of admission, but must be conferred prior to the start of the program; international students will have their credentials reviewed for degree completion and equivalency);
- have a minimum cumulative grade-point average (GPA) of 3.00 on a 4.00 scale;
- have a minimum overall science GPA of 3.20 on a 4.00 scale or a science GPA of at least 3.20 on a 4.00 scale on the most recent 40 s.h. of college-level, science-based coursework (science courses are subject to department approval);
- have completed the prerequisite courses no more than 10 years before they apply and all courses must be taken for letter grades (see "Prerequisite Science Courses");

- have completed a minimum of 1,000 hours of direct patient health care experience by Dec. 31 of the application year (hours subject to departmental approval and applicants can be awarded between 0–100% of hours completed);
- submit three letters of recommendation—one must be from a collegiate academic reference and one must be from a health care supervisor (shadowing experience does not count, but may be used for the third recommendation letter);
- meet the admission requirements of the Graduate College (see the Manual of Rules and Regulations on the Graduate College website);
- be able to meet the program's technical standards (see "Technical Standards" below).

Prerequisite Science Courses

Applicants must have completed preparatory science courses in biological, chemical, and statistical sciences. Prerequisite courses can be in progress at the time of admission unless stated otherwise. Science-based courses are subject to the approval by the Department of Physician Assistant Studies and Services.

Biological Science

These courses are required.

- An introductory biology or zoology course sequence (minimum of a two-semester sequence unless otherwise approved).
- An animal, exercise, or human physiology course.
- A minimum of three additional upper-level biological science courses. To qualify as upper level, the biological science courses must require a prerequisite course to enroll. Courses that have been used to satisfy this requirement include cell biology, cell physiology, endocrinology, genetics, histology, immunology, microbiology, molecular biology, neurobiology, pharmacology, and other related disciplines.

Chemical Science

These courses are required.

- An introductory chemistry course sequence (a minimum of a two-semester sequence, unless otherwise approved).
- At least one semester of organic chemistry (must be at a higher level than a survey of organic chemistry course).
- At least one semester of biochemistry (must be at a higher level than a survey of biochemistry course and be completed at the time of application).

Statistical Science

This course is required.

- Any course with a statistical focus, such as a general, introductory, psychological, or business statistics course; or biostatistics; or a qualitative research methods course.

Satisfaction of the basic admission requirements does not ensure acceptance to the program. The admission committee selects the applicants it considers best qualified. The admission committee requests interviews with the most qualified applicants.

Technical Standards

Individuals admitted to the Department of Physician Assistant Studies and Services must possess the capability to complete the entire curriculum and earn the Master of Physician Assistant Studies degree. The curriculum requires demonstrated proficiency in a variety of cognitive, problem-solving, manipulative, communicative, and interpersonal skills. For more information, view the University of Iowa Carver College of Medicine Technical Standards for Admission and Retention on the Department of Physician Assistant Studies and Services website.

Application Timeline and Process

Applications are accepted from the end of April to Oct. 1 for entry into the program the following August. Applicants must apply through the Central Application Service for Physician Assistants (CASPA).

The admission committee prefers that the majority of prerequisite course requirements be completed by the Oct. 1 application deadline.

All materials must be received and verified by CASPA, and all additional information requested by the Physician Assistant Studies and Services Program submitted by the Oct. 1 deadline.

All final decisions related to admission deadlines, processes, and decisions are up to the department administrator, in collaboration with the admission committee.

Career Advancement

Physician assistants work in a variety of settings, including medical offices, hospital emergency rooms, nursing homes, rural satellite clinics, health maintenance organizations, and patients' homes.

Psychiatry

Chair

- Peggy C. Nopoulos

Website: https://psychiatry.medicine.uiowa.edu/

The Department of Psychiatry teaches MD students, principally during their third year, and trains resident physicians for academic and clinical careers in psychiatry.

Research

Department of Psychiatry staff members are involved in genetic and family studies of psychiatric disorders and research in genetic and biological psychiatry, neurochemistry, neuroimaging, neurophysiology, neuropsychiatry, psychosocial aspects of behavior, and neuroinvasive brain stimulation.

The department's students and residents have many research opportunities in psychiatry and in the basic science areas of neurochemistry, neurophysiology, and electrophysiology. The clinical areas of psychology, child psychiatry, and psychotherapy also offer opportunities for research and further study to a limited number of students.

Residency

The department offers a four-year training program approved by the Residency Review Committee of the American Medical Association. Training experiences are available at University of Iowa Health Care and at the VA Iowa City Health Care. Additional experiences are available at affiliated institutions: Broadlawns Medical Center in Des Moines, the Iowa Medical and Classification Center at Oakdale, the Mid-Eastern Iowa Community Mental Health Center in Iowa City, and the Independence Mental Health Institute (Iowa Department of Human Services).
