The first three semesters of the MD program present an integrated core of sciences basic to the study of medicine. They also introduce students to the foundations of clinical practice.
Coursework includes human anatomy, foundations of cellular life, clinical and professional skills (a three-course series), medicine and society (a three-course series), and mechanisms of health and disease (a five-course series). Each of these courses is described below.
Some elective courses are available to students during the first and second years, normally for 1 or 2 s.h. of credit. Topics include areas not specifically covered in the regular curriculum and areas related to medical practice and the role of the physician. Courses vary from year to year, but typical subject areas are global health issues, U.S. health care systems, and community health outreach.

The MD program's preclinical curriculum requires the following coursework.

## First Semester

ACB:8101 Medical Gross Human Anatomy: complete dissection of the body with regional emphasis stressing relationships to the living system; clinically relevant areas of radiologic imaging, surface anatomy, embryology, and clinical correlations; anatomical knowledge through lectures, small group work, and independent activities.

MED:8121 Clinical and Professional Skills I: introduction to concepts of clinical reasoning, communication, physical examination, and evidence-based clinical practice; principles of biomedical ethics; early clinical interactions and placement of classroom experiences into the context of patient care through the Early Clinical Experiences (ECE) program; interactions with students from other health sciences colleges to explore the interprofessional approach to caring for patients.

MED:8122 Medicine and Society I: delivery of individual disease prevention/health promotion services; introduction to social determinants of health; influence and impact of culture and community on health care; community resources; students apply health and risk assessment to individual patients and to themselves.
MED:8123 Foundations of Cellular Life: genetics, embryology, molecular biology, biochemistry, cell biology and histology; molecular events required for cellular life; how cells grow and interact to form basic tissues of the human body; framework necessary for exploring the mechanisms of health and disease.
MED:8124 Mechanisms of Health and Disease I: normal and healthy processes within and among mechanisms of oxygenation, metabolism, and genetics/development.

## Second Semester

MED:8131 Clinical and Professional Skills II: reinforcement of clinical reasoning concepts introduced in MED:8121 and introduction of additional concepts; application of concepts through interactions with standardized patients and through clinical visits; varied experiences help students gain a deeper appreciation for issues in biomedical ethics; strengths and barriers involved in providing comprehensive interdisciplinary patient care.
MED:8132 Medicine and Society II: knowledge and skills related to health promotion and disease prevention from a medicine and society perspective, including impact of behavior, environment, culture, and socioeconomics; identification of major public health problems associated with mechanisms of health and disease; focus on public health and epidemiology, with attention to screening, global health, and environmental hazards.
MED:8133 Mechanisms of Health and Disease II : normal and healthy processes within and among mechanisms of immunology/ inflammation, locomotion/integument, and neuropsychiatry.
MED:8134 Mechanisms of Health and Disease III: abnormalities or disruptions leading to disease within and among mechanisms of oxygenation, metabolism, and genetics/development.

## Third Semester

MED:8221 Clinical and Professional Skills III: advanced clinical reasoning skills gained through focused patient encounters and interactions with special patient populations; emphasis on students' ability to integrate and use concepts from the MD curricular strands that are required for cost-conscious, patient-centered, interdisciplinary care.

MED:8222 Medicine and Society III: health services organization and delivery, with emphasis on community dimensions of medical practice and patient safety.

MED:8223 Mechanisms of Health and Disease IV: abnormalities or disruptions leading to disease within and among mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

MED:8224 Mechanisms of Health and Disease Keystone: transition from classroom instruction in MED:8124, MED:8133, MED:8134, and MED:8223 to clinical practice; foundational information from those courses approached from the perspective of common clinic encounters; diagnostic and management decisions about common important clinical problems using the foundational knowledge gained from those courses.

## Clinical Curriculum (Phase II and III)

Students complete one week of skills training in MED:8320 Transition to Clerkships prior to the start of clinical clerkships. The two-and-one-half-year clinical component of the medical curriculum is comprised of supervised hands-on clinical training at the bedside of inpatient
units, in outpatient clinics, and in communities throughout the state. In contrast to the preclinical semesters, the clinical years vary according to a student's individual needs. This period of training begins in January of the second year with 44 weeks of core clerkships (Phase II). Students then enter various pathways where they complete a minimum of 10 weeks of electives, four weeks of critical medicine, one four-week subinternship, and 32 weeks of advanced electives (Phase III).

After completing the core clerkships, students must successfully complete Step 1 of the United States Medical Licensing Examination (USMLE) before they may be promoted to the pathways component of the curriculum. Students take Step 2 of the USMLE during Phase III of the MD program, and must pass Step 2 in order to graduate.

Primary venues for clinical training of medical students include University of Iowa Hospitals \& Clinics, the VA Iowa City Health Care, and the Des Moines Area Medical Education Consortium. Students also participate in the family and community medicine clerkship, which is an off-campus rotation. Other courses may be assigned to off-campus sites.
The MD program's clinical curriculum requires the following clerkships and selectives.

## Generalist Core (Phase II)

MD students complete the generalist core during the fourth and fifth semesters. It consists of the following 44 weeks of clerkships.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Internal Medicine Block |  |  |
| IM:8310 | Internal Medicine (10 weeks) | 10 |
| Family Medicine/Pediatrics Block |  |  |
| FAM:8302 | Family and Community Medicine (6 weeks) | 6 |
| PEDS:8301 | Clinical Pediatrics (6 weeks) | 6 |
| Obstetrics and Gynecology/Surgery Block |  |  |
| OBG:8301 | Clinical Obstetrics and Gynecology (6 weeks) | 6 |
| SURG:8301 | Clinical Surgery ( 6 weeks) | 6 |
| Neurology/Psychiatry/Emergency Medicine Block |  |  |
| EM:8301 | Core Emergency Medicine (2 weeks) | 2 |
| NEUR:8301 | Clinical Neurology (4 weeks) | 4 |
| PSYC:8301 | Clinical Psychiatry (4 weeks) | 4 |

## Selectives

MD students complete 10 weeks of selectives chosen from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ANES:8301 | Clinical Anesthesia (2 weeks) | 2 |
| DERM:8301 | Clinical Dermatology (2 weeks) | 2 |
| OPHT:8301 | Clinical Ophthalmology (2 <br> weeks) | 2 |
| ORTH:8301 | Clinical Orthopedics (2 weeks) | 2 |
| OTO:8301 | Clinical Otolaryngology (2 <br> weeks $)$ | 2 |
| RAD:8301 | Clinical Radiology (2 weeks) | 2 |
| URO:8301 | Clinical Urology (2 weeks) | 2 |

## Advanced Required Clerkships (Phase III)

MD students complete the following required clerkships and other work during the three advanced clinical-year semesters. In addition to the clerkships, students complete training modules in advanced
clinical topics that include MED:8470 Self-Directed Learning in Advanced Clinical Topics.

| Requirements | Hours |
| :--- | :--- |
| Critical care medicine (4 weeks) |  |
| Advanced inpatient subinternship (4 weeks) |  |
| Advanced electives (total of 32 weeks) |  |

## Combined Programs

Students must be admitted to both of the individual degree programs before they may be admitted to a combined degree program. Those interested in the combined programs must make arrangements with the appropriate departments and with the Carver College of Medicine associate dean for student affairs and curriculum.

## MD/JD

The Carver College of Medicine and the College of Law offer the combined Doctor of Medicine/Juris Doctor program; see Juris Doctor, JD [p. 1720] in the catalog.

## MD/MBA (Professional Program)

The College of Medicine collaborates with the Tippie College of Business to offer the combined Doctor of Medicine/Professional Master of Business Administration Program. For more information about the MBA, see the MBA Professional Program in the Master of Business Administration, MBA [p. 1217] section of the catalog.

## MD/MPH

The College of Medicine collaborates with the College of Public Health to offer the combined Doctor of Medicine/Master of Public Health program; see the Master of Public Health, MPH [p. 1964] in the catalog.

## MD/PhD (Medical Scientist Training Program)

The Carver College of Medicine offers a combined MD/PhD program for students who are interested in a career that combines clinical and academic medicine with basic and clinical research; see the Medical Scientist Training Program [p. 1784] in the catalog.

## Admission

The Carver College of Medicine participates in the American Medical College Application Service (AMCAS), a nonprofit centralized application processing service for applicants to U.S. medical schools. AMCAS applications are available for completion in May of the year preceding the beginning of the class for which application is being made. Prospective students are urged to apply as early as possible. The deadline for AMCAS submission is Nov. 1.

Secondary applications are forwarded to applicants whose AMCAS applications pass a review conducted by the college.

Admitted applicants must have an official transcript from each college they have attended sent to the University of Iowa Office of Admissions.

## Technical Standards for Admission and Retention

The College of Medicine seeks candidates who will be able to best serve the needs of society and strives to graduate skilled and effective physicians. To achieve this goal, the following principles and technical standards will be applied to candidates for admission and
continuing students. Review the current Technical Standards on the Carver College of Medicine Admissions website.

## Admission Requirements

Applicants for admission to the Carver College of Medicine must have a bachelor's degree, or they must be enrolled in a bachelor's degree program with the expectation of receiving their degree before enrolling in the Carver College of Medicine. Applicants should refer to the Carver College of Medicine Admissions website for current admission requirements.

All students who enter the Carver College of Medicine are required to comply with the pre-entrance and annual health screening program developed by the University of Iowa Student Health in cooperation with University of Iowa Hospitals \& Clinics; see Student Requirements and Forms on the Student Health website.

All registered Carver College of Medicine students are required to maintain health insurance (or an equivalent care plan) that satisfies minimum standards of coverage. Insurance coverage must be maintained continuously throughout each year of attendance at the University of Iowa.

## Financial Support

The Carver College of Medicine's philosophy is that no student should be denied a medical education due to a lack of financial resources. The college's financial services staff actively seeks sources of aid so that every student interested in a medical education will be able to finance that education.

Financial assistance is provided by the Carver College of Medicine primarily on the basis of demonstrated financial need. Although a limited number of collegiate or institutional grants are available for the most economically disadvantaged students, most aid is in the form of loans. Examples of federal loan programs are the Federal Direct Unsubsidized Stafford/Ford Student Loan, the Federal Direct Grad PLUS loan, and the Primary Care Loan (PCL). Students also may qualify for collegiate loans or private loans to supplement their financial aid package.

In addition, the college supports scholarship and loan programs through permanent endowments and/or contributions from alumni and friends of the Carver College of Medicine. These funds are administered by the college's financial services staff and are awarded as a part of a student's total financial aid package. Funds to support short-term emergency loans are available for students with immediate financial need.

A small number of Dean's Scholarships are awarded by the college's admissions office to highly qualified candidates on the basis of their academic excellence, leadership abilities, and their potential to enrich the college. Dean's Scholarships are included in the recipient's overall financial aid package. About $15 \%$ of students enrolled in each class receive some level of Dean's Scholarship.
The Carver College of Medicine has a fully integrated Financial Literacy Program, CCOMmon Cents, which provides medical students the knowledge, tools, and resources to better understand the financial aid process, to manage their student loans more effectively, to make better informed decisions, and to encourage students to minimize their educational debt whenever possible. This program also strives to help students reach their personal financial goals while pursuing their medical education.

To learn more about financial aid, contact the Carver College of Medicine Financial Services office.

## Career Advancement

An interest in science, the healing arts, helping people, and medical research can lead to a great number of satisfying careers. For information about career options in health care, review the Road to Becoming a Physician on the College of Medicine website and the Occupational Outlook Handbook on the United States Department of Labor Bureau of Labor Statistics website.

## Emergency Medicine

## Chair

- Andrew Nugent

Faculty: https://medicine.uiowa.edu/emergencymedicine/profile
Website: https://medicine.uiowa.edu/emergencymedicine/
The Department of Emergency Medicine prepares new physicians to recognize and treat a variety of urgent and emergent conditions. The program fosters basic science and clinical research relevant to emergency medicine and is dedicated to the education and training of Emergency Medical Services (EMS) personnel through the Emergency Medical Services Learning Resources Center (EMSLRC).

## Research

Research in the department is built on four research pillars: clinical, injury prevention, medical education, and health systems. Faculty members, graduate students, emergency medicine residents, medical students, and undergraduates are involved in research in a variety of projects and programs. Specific research interests include:

- rural regionalization and telemedicine;
- quality of care, efficiency, and cost effectiveness of interhospital transport;
- prevention, diagnosis, and care of traumatic brain injury;
- off-road injury prevention;
- highway motor vehicle crash scene analysis;
- safe driving advocacy;
- simulation in medical education;
- improving access and quality of emergency care;
- decision-making processes for optimal drug selection in the emergency department;
- addiction medicine and harm reduction;
- toxicology;
- global health care access;
- interpersonal violence; and
- early risk stratification and prophylaxis in critical illness.

## Patient Care

The Department of Emergency Medicine at University of Iowa Hospitals \& Clinics and University of Iowa Stead Family Children's Hospital provides care for the most critically ill adults and children in a patient- and family-centered atmosphere. The department handles emergency cases in Iowa and from surrounding states.

## Resources

The Emergency Department, located on the first floor of Roy J. Carver Pavilion, is a Level I Adult and Pediatric Trauma Center. It serves as a referral center for communities across Iowa.

## MD Training

The two-week core emergency medicine experience is completed either at University of Iowa Hospitals \& Clinics (UIHC), Iowa City or UnityPoint Health, Des Moines. This provides an initial opportunity to experience and learn emergency medicine. The advanced emergency medicine four-week clerkship at UIHC takes place sometime after the core year, and provides an opportunity for a more in-depth emergency medicine experience. In both clerkships, a student acts as an integral member of the care team and experiences a wide variety of patient scenarios and clinical pathology.

Elective rotations for Doctor of Medicine students are available at several other sites throughout Iowa, including St. Luke's Hospital, Cedar Rapids; Great River Health, Burlington; MercyOne Waterloo Medical Center, Waterloo; Broadlawns Medical Center, Des Moines; and Genesis Health Group, Davenport. Students also may arrange an off-service elective independently with established residency programs throughout the United States.
Additionally, the program offers an annual introductory month to emergency medicine; advanced life support; Wilderness Medicine, a rotation that includes scenario and didactic training in wilderness medicinal skills with travel to areas such as Colorado; and a two- or four-week toxicology elective.

## Residency

The emergency medicine faculty directs the Emergency Medicine Residency, Iowa's only emergency medicine residency. The residency is a three-year program that prepares residents for careers in diverse areas of emergency medicine, from rural practice to academics. The program emphasizes critical care training and rotations in a wide variety of specialties. Part of the clinical component is spent at St. Luke's Hospital, Cedar Rapids.

## Courses

## Emergency Medicine Courses

EM:8301 Core Emergency Medicine
Participation in direct patient care as part of a care team during emergency medicine clinical shifts; opportunity to perform supervised bedside procedures and call consults. Requirements: MD enrollment.

## EM:8401 Advanced Life Support

4 s.h.
Experience managing acute threats to life-including trauma, respiratory failure, poisoning, sepsis, stupor/coma, and acute myocardial infarction (MI)—using Advanced Cardiovascular Life Support (ACLS) and Pediatric Advanced Life Support (PALS) courses and clinical manikin work with EMS staff. Requirements: completion of MD core clerkship year.

## EM:8402 Emergency Medicine UIHC

arr.
Preceptorship with residents and faculty; emphasis on principles of acute medicine; clinical shifts, case conferences, simulations, exams.

## EM:8403 Wilderness Medicine

4 s.h.
Didactic and scenario training in physiology, diagnosis, and emergency treatment of heat- and cold-related illnesses, high altitude disorders, wilderness trauma, envenomations, and immersion injuries. Taught in wilderness areas. Requirements: completion of MD third year.

EM:8404 Emergency Medicine: St. Luke's, Cedar Rapids 4 s.h.
Preceptorship with full-time emergency department physicians; clinical shifts, case conferences, simulations, exams.
EM:8405 Rural Emergency Medicine at Burlington, Iowa
4 s.h.
In-depth clinical experience in a busy rural hospital emergency department under supervision of residency-trained emergency physicians; lectures, skill labs, projects.
EM:8406 Emergency Medicine Des Moines
4 s.h.
Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Broadlawns Hospital, Des Moines.
EM:8407 Emergency Medicine Waterloo
4 s.h.
Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Covenant Medical Center, Waterloo.

EM:8409 Introduction to Advanced Life Support
2 s.h.
Intensive program providing basic training in life support skills, experience in procedures common to inpatient hospital environment, and practice with simulated critical care scenarios; lectures, small group discussions, procedure labs, high-fidelity simulations, and self-directed online learning; students become certified in Advanced Cardiac Life Support (ACLS).
EM:8410 Medical Toxicology Sioux City 2,4 s.h.
Clerkship at the Iowa Poison Control Center; intense introduction to breadth and depth of medical toxicology; students work independently and concentrate on many different areas and interests; work with a multidisciplinary team of nurses, pharmacists, and physicians; activities may include reviewing and presenting active poisoned patient cases during daily rounds and opportunities to see toxicology patients at bedside; preparation and short presentation in any area of medical toxicology. Requirements: MD enrollment.
EM:8411 Medical Toxicology UIHC 2,4 s.h.
In-depth introduction to medical toxicology; how to recognize and treat various toxidromes and the most common toxicologic exposures; initial management steps for life-threatening toxicologic exposures; focus on basics of pathophysiology and pharmacology to understand how drugs affect patients, and critical assessment of laboratory and other data obtained on the poisoned patient.
EM:8412 Emergency Medicine Unity Point Des Moines 4 s.h. Clinical shifts in emergency department and emergency medicine related didactics; advanced cardiovascular life support (ACLS), airway management, calling a consult/communication, chest pain, toxicology, trauma, sepsis, ultrasound, febrile infant, headache, and psychobehavioral disorders.
EM:8413 Emergency Medicine Genesis Davenport 4 s.h.
Clinical shifts in emergency department and emergency medicine related didactics; advanced cardiovascular life support (ACLS), airway management, calling a consult/communication, chest pain, toxicology, trauma, sepsis, ultrasound, febrile infant, headache, and psychobehavioral disorders.

## EM:8497 Research in Emergency Medicine

 arr. Medical research, clinical or laboratory projects; individual study.EM:8498 Emergency Medicine On Campus
arr.
Clinical research experience with a mentor in the Emergency
Treatment Center and the Department of Emergency Medicine; principles of design, methodology, basic statistics.
EM:8499 Emergency Medicine Off Campus
arr.
Preceptorship with residents and faculty; emphasis on principles of acute medicine; Liaison Committee on Medical Education (LCME) accredited off-campus site. Requirements: completion of MD third year and approval from UIHC Emergency Medicine clerkship director.

## Family Medicine

## Chair

- Jeffrey D. Quinlan

Faculty: https://medicine.uiowa.edu/familymedicine/people/people
Website: https://medicine.uiowa.edu/familymedicine/
The Department of Family Medicine is nationally recognized for excellence in patient care, teaching, and research. The department is dedicated to providing primary care for the citizens of Iowa, educating medical students, training resident physicians, providing continuing education, and creating new knowledge to improve primary care and health care delivery systems.

## MD Training

The Department of Family Medicine trains primary care physicians. The department offers coursework that is included throughout the four-year MD program. Advanced elective rotations give students opportunities for exposure to various Iowa communities through work in affiliated hospitals or connected facilities including clerkships with selected family physicians throughout the state and within University of Iowa Hospital \& Clinics family medicine department and clinics. Students also have the opportunity for independent study during their fourth year.

## Residency

## Family Medicine Residency

The Department of Family Medicine directs a three-year residency program whose graduates are eligible for certification by the American Board of Family Medicine. The residency program trains physicians to provide continuous and comprehensive medical care to patients and their families. Residents are educated in all areas of family medicine-adult medicine, maternal and child health, behavioral science, surgical specialties, and community medicine. Training emphasizes the value of wellness and preventive medicine as well as curative medicine.

The program is organized as a progressive educational experience. It consists of formal teaching and clinical experiences on assigned rotations, structured conferences, and patient care in the Family Medicine Clinic. As residents develop clinical skills, medical judgment, and competence, their patient responsibilities increase. Some patients at the Family Medicine Clinic are assigned to residents, who provide medical care under faculty supervision. Residents are responsible for their patients for the duration of the residency program.
Residents also learn the principles of practice management, including organizational and administrative decision-making, patient record and bookkeeping procedures, and chart auditing methodologies.

Residents are expected to take responsibility for their learning environment, to avail themselves of the department's diverse resources, and to collaborate with the faculty in order to have the best possible learning experience.

## Family Medicine-Psychiatry Residency

The Department of Family Medicine and the Department of Psychiatry cosponsor the combined Family Medicine-Psychiatry Residency program. The program's residents acquire broad-based training in both disciplines, including focused training in geriatrics and geriatric psychiatry, substance and alcohol abuse, diagnosis and treatment of depression, delirium, eating disorders, panic disorders,
and neurotic and somatizing behavior. Graduates are eligible for certification by the American Board of Family Medicine and the American Board of Psychiatry and Neurology.

## Facilities

The Department of Family Medicine is located on the University of Iowa health sciences campus. Faculty offices are close to the Family Medicine Clinic, where patients are seen by appointment. The department also has community-based clinics in southeast Iowa City, Coralville, Cedar Rapids, Muscatine, North Liberty, and Riverside, Iowa.

## Courses

## Family Medicine Courses

## FAM:8005 Medical Education Community Orientation 0 s.h.

Experience in a local health care delivery system away from the university setting, between first and second year of MD program.

## FAM:8301 Preceptorship in Family Medicine <br> One-on-one experience with a practicing physician; exposure to

 illnesses, conditions often seen in primary care; realistic background for evaluation of family medicine as a career alternative.FAM:8302 Family and Community Medicine 6 s.h.
One-on-one experience with a practicing physician; exposure to illnesses and conditions often seen in primary care; realistic background for evaluation of family medicine as a career alternative; clinical activities, work with community agencies and resources; didactic and conferences.

## FAM:8401 Advanced Inpatient Subinternship in Family Medicine, University of Iowa

4 s.h.
Inpatient aspects of family medicine's key components; experience on the family medicine inpatient service.
FAM:8402 University of Iowa Family Medicine Clerkship 2,4 s.h. Work with family practice residents and staff in day-to-day delivery of primary medical care at Family Practice Center; experience in the Family Stress Clinic observing family-centered counseling; nursing home visits, work with departmental social worker and sports medicine specialist.
FAM:8403 Advanced Preceptorship in Family Medicine 2,4 s.h. Experience in community practice of family medicine.
FAM:8405 Geriatrics Elective 2,4 s.h.
Experience in monitoring and evaluating health and functional status of patients age 65 and older in the UI Geriatric Assessment Clinic and community settings.
FAM:8406 Advanced Inpatient Subinternship in Family Medicine, Cedar Rapids 4 s.h. Experience as a junior resident in all areas of inpatient family medicine, including maternity care, child and adolescent health, adult medicine.

FAM:8407 Clerkship in Family Medicine, Cedar Rapids 4 s.h. Experience as a junior resident in all areas of family medicine, including maternity care, child and adolescent health, adult medicine.
FAM:8408 Family Medicine Clerkship, Broadlawns Hospital, Des Moines Family Health Center 4 s.h. Clinical experience in inpatient and outpatient care.

FAM:8409 Advanced Inpatient Subinternship in Family Medicine, Iowa Lutheran

4 s.h.
Patient-oriented interactive experience in an inpatient family practice environment. Requirements: fourth-year MD enrollment.

FAM:8410 Family Medicine, Iowa Lutheran
4 s.h.

FAM:8411 Family Medicine Clerkship, Davenport 4 s.h. FAM:8425 Advanced Inpatient Subinternship in Rural Family Assignment to problems commonly seen in family practice office; supervision by residents and faculty for history and physical evaluation and diagnostic workups and treatment of each specific problem; exposure to acutely ill patients in services of medicine, surgery, obstetrics, pediatrics.
FAM:8412 Advanced Inpatient Subinternship in Family Medicine, Davenport
Experience in inpatient family medicine; assessing and managing hospitalized patients, evaluating and treating patients in the emergency room, participating in call coverage with family medicine residents.
FAM:8413 Family Medicine Geriatrics, Davenport
Geriatric, palliative, and end-of-life care issues; assessment of competency in evaluation and management
of patients; interdisciplinary nature of geriatric and palliative care.

## FAM:8415 Advanced Inpatient Subinternship in Family

 Medicine, Sioux CityExperience as a junior resident in all areas of family medicine. Requirements: fourth-year MD enrollment.
FAM:8416 Family Medicine Clerkship, Sioux City 2,4 s.h. Methods common in family practice medicine; participation in care of patients seen by family practice physicians and residents.

## FAM:8417 Advanced Inpatient Subinternship in Family

## Medicine, Waterloo

Experience working as a member of family practice inpatient team at Allen Memorial Hospital and Covenant Medical Center, following patients from admission through discharge.
FAM:8418 Family Medicine Clerkship, Waterloo
Rotation at the Northeast Iowa Family Practice Center; work with patients from outpatient care through hospitalization; basic concepts of family practice, team concept in medical care.
FAM:8419 River Crossing Family Medicine Clerkship 2,4 s.h. Experience providing patient care in a rural setting; continuity of care for patients of all ages. Requirements: fourth-year MD enrollment.

## FAM:8420 Family Medicine, Mason City

Work with family physicians on staff at Mercy or other affiliated community hospitals; management of all patients admitted by the family physicians, participation in care rendered by consultants; primary care experience in family practice office.

## FAM:8421 Primary Care Sports Medicine <br> 4 s.h.

Comprehensive, diverse, and educational experience in the field of sports medicine; clinical competence to diagnose and manage medical illnesses and injuries related to sports and exercise in varied patients, recreational and organized athletes, and teams. Requirements: MD enrollment.

FAM:8422 Family Medicine/Psychiatry Elective 2,4 s.h.
Integration of mental and physical health care across outpatient family medicine and outpatient psychiatry arenas. Requirements: MD enrollment.

FAM:8423 Family Medicine, Ames Student Health 4 s.h.
Primary care of late adolescent and young adult patients in a student health center setting; students work with family medicine and mental health providers to address health care needs of this population.
FAM:8424 Family Caregiving Transitions
arr.
Students enhance clinical learning from caregiving experiences and increase empathy and patient communication skills; students also enhance personal understanding of, and growth through, caregiving responsibilities in periods of family health transitions.

4 s.h.

4 s.h.

4 s.h.

4 s.h.
Medicine, Algona 4 s.h.

Rural hospital-based subinternship; students provide family medicine service alongside board-certified family physician faculty, performing all admissions on weekdays, rounding on hospitalized patients each day, and call responsibilities including deliveries and ER coverage.

## FAM:8426 Disease Registry Management

4 s.h.
Use of electronic medical record-based disease registries to investigate care, identify areas for improvement, and optimize management of chronic disease at individual and/or population level.

## FAM:8427 Maternity Care

4 s.h.
Experience in triaging of pregnant patients; students provide usual intrapartum and postpartum care, manage common intrapartum and postpartum complications, and provide care to newborn infants, healthy and ill. Requirements: MD enrollment.
FAM:8428 Caring for the Underserved 2 s.h.
4 s.h. Caring for a variety of medically underserved patient populations with cultural competency and compassion; participation in a variety of experiences with clinical and ancillary/allied services, and community agencies that specialize in providing services to these populations. Requirements: MD enrollment.
FAM:8450 Continuity of Care - Family Medicine 4 s.h. Longitudinal continuity of care experience for fourth-year MD students in an outpatient family medicine setting.

## FAM:8496 Independent Studies

arr.
Work with departmental researcher on investigation in family medicine, community medicine, health care delivery, health maintenance, and other areas.
FAM:8497 Research in Family Medicine
arr.
Medical research, clinical or laboratory projects; individual study.
FAM:8498 Family Medicine On Campus
arr.
Clinical clerkship; individually arranged by student with departmental approval.
FAM:8499 Family Medicine Off Campus
arr.

# Free Radical and Radiation Biology 

## Director

- Douglas R. Spitz (Radiation Oncology/Pathology)

Faculty: https://frrbp.medicine.uiowa.edu/people
Website: https://frrbp.medicine.uiowa.edu/
The Free Radical and Radiation Biology Program provides indepth training and research experience in the physical, chemical, and biological effects of radiation. It also focuses on the metabolic production of free radicals and their role in biology and medicine.
Free radicals are of interest to researchers and clinicians due to their role in a variety of diseases and pathological states, including degenerative diseases of aging and cancer. Manipulation of free radical reactions and redox biology holds great promise for the future development of new therapies for a variety of human diseases. The Free Radical and Radiation Biology Program stresses the importance of these areas of research to basic science, translational research, and public health.

## Undergraduate Education

Three courses offered by the Free Radical and Radiation Biology Program are open to University of Iowa undergraduate students: FRRB:3130 Radiation Safety and Radiobiology; FRRB:4000 Special Topics: Advanced Undergraduates; and with instructor approval, FRRB:5000 Radiation Biology. Students looking for an overview of the biological effects of radiation, including the role of free radicals, will find FRRB:5000 especially appropriate.

## Graduate Education

See Carver College of Medicine [p. 1729] and Graduate [p. 1589] College in the catalog for general information about study in medicine and graduate study at the university.

## Postgraduate Training

Postdoctoral training is available by arrangement with the program's director and individual faculty members. Contact the Free Radical and Radiation Biology Program.

## Programs

## Graduate Programs of Study

## Majors

- Master of Science in Free Radical and Radiation Biology
- Doctor of Philosophy in Free Radical and Radiation Biology

Students interested in doctoral studies in free radical and radiation biology should apply under the umbrella program in Biomedical Science [p. 1603] (select free radical and radiation biology subprogram). Direct applications to the MS and PhD in free radical and radiation biology are not currently being considered.

## Facilities

The Free Radical and Radiation Biology Program is the home of the Radiation and Free Radical Research Core Lab (RFRRC). The lab operates radiation sources including an Xstrahl Small Animal Radiation Research Platform (SARRP) and a 5,000-Curie Cs-137 irradiator (Ionizing Radiation Services). Students and staff have
access to additional core lab support through RFRRC, with services and expertise related to analytical chemistry (Electron Paramagnetic Resonance Services) and redox biology, biochemistry (Antioxidant Enzyme Services), and linear accelerators in the Department of Radiation Oncology.

The program has a number of radiation detectors and counters, including liquid scintillation counters. It also has ultraviolet/visible spectrophotometers; various types of equipment for densitometry, chromatography, and electrophoresis; modern tissue culture facilities; seahorse metabolic profiling instruments; molecular biology equipment, including thermal cyclers; an automatic cell counter and particle sizer; tissue culture facilities; Typhoon phosphorimager; high performance liquid chromatography (HPLC); electron spin resonance spectrometers; and nitric oxide analyzers. Visit Research Core on the program's website to learn more.

## Courses

## Free Radical and Radiation Biology Courses

## FRRB:3110 Medical Physics I 1-3 s.h.

Introduction to radiation used in clinical setting; fundamental physical units, measurements, principles, atomic structure and types of radiation; X-ray generating equipment, X-ray production, and its interaction with matter. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program, and maxillofacial or radiation oncology resident. Same as RSTH:3110.

FRRB:3130 Radiation Safety and Radiobiology 2 s.h
Instruction on safe operation of radiation producing equipment and handling of radioactive materials; origin and/or derivation of certain formulae and techniques useful in radiation protection programs; regulatory agencies, regulations, and regulatory guides pertinent to student's field; emphasis on applied aspects of radiation protection; characteristics and biological effects of ionizing radiations, properties and uses of radioisotopes, medical applications, and biological basis for protection procedures. Requirements: enrollment in radiation sciences or nuclear medicine technology program. Same as RSP:3130.

## FRRB:3215 Medical Physics II

 0-3 s.h.Treatment units used in external radiation therapy; beam calculations, isodose distributions, brachytherapy, quality assurance and quality management, protection and safety. Prerequisites: RSTH:3110. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program. Same as RSTH:3215.

FRRB:4000 Special Topics: Advanced Undergraduates arr Readings and/or laboratory experience. Offered fall semesters.

FRRB:5000 Radiation Biology 4 s.h. Comprehensive study of molecular and biological effects of ionizing radiations with emphasis on biomedical therapeutic applications; mammalian radiobiology, contribution of metabolism to radiation effects, and therapeutic applications of radiation in cancer therapy. Offered fall semesters. Prerequisites: CHEM:2210 and BMB:3120. Requirements: college-level physics.

FRRB:5001 Research: Special Topics
FRRB:5005 Rigor and Reproducibility in Redox Biology 1 s.h. Experiments in redox biology are prone to artifact due to unwanted or unknown oxidations, misunderstanding of how laboratory tools work, assumptions by the investigator that do not hold, and more; faculty and students discuss common experimental approaches used in research in the field-their strengths, weakness, and current best approaches to avoid artifacts-and best approaches to present data to stand the test of time and are easily understood by readers.

FRRB:6000 Seminar: Free Radical and Radiation Biology 1 s.h.
Seminar presentations of cutting edge science in the field of free radical and radiation biology, given by experts in the field as well as trainees.

FRRB:6004 Research: Free Radical and Radiation Biology arr.
Representation of intensive laboratory-based studies in the field of free radical and radiation biology, determined by mutual agreement between faculty members sponsoring the research and consultation with graduate student.
FRRB:6006 Topics in Free Radical Biology and Medicine 1 s.h.
Discussion and presentation of new literature reports in the field of free radical biology and medicine in journal club format.
FRRB:6008 Topics in Radiation and Cancer Biology 1 s.h.
Emerging concepts in the biological effects of radiation and cancer biology; current topics in journal club format.
FRRB:7000 Redox Biology and Medicine
4 s.h.
Chemistry of free radicals, related oxidants, and antioxidants; antioxidant (redox) enzymes-their structure, biochemical function, regulation, and function in redox biology; targets of oxidants-lipids, proteins, DNA; redox biology of health (infants to healthy aging) and disease (cancer, cardiovascular disease, diabetes, neurodegenerative diseases). Offered spring semesters of even years. Prerequisites: BMB:3120 or CHEM:2210.
FRRB:7001 Molecular and Cellular Biology of Cancer 3 s.h.
Fundamental aspects of oncology at cellular and molecular levels; mechanisms of cancer initiation and progression, oncogene action, DNA damage and repair, carcinogenesis by radiation, chemicals, viruses; tumor immunology, anticancer therapies. Offered spring semesters. Requirements: strong basic science background. Same as PATH:7001.

# Internal Medicine 

## Interim Chair

- Isabella Grumbach

Faculty: https://medicine.uiowa.edu/internalmedicine/people Website: https://medicine.uiowa.edu/internalmedicine/
Internal medicine is concerned with the diagnosis, prevention, and treatment of diseases of adults. The Department of Internal Medicine's educational, patient care, and research activities cover all facets of the discipline, including general internal medicine and primary care as well as the specialized areas of allergy and immunology, cardiology, clinical pharmacology, endocrinology and metabolism, gastroenterology and hepatology, hematology, oncology, blood and marrow transplant, infectious diseases, nephrology, pulmonary, critical care, occupational medicine, and rheumatology.
The department is committed to the complete spectrum of medical education, from didactic and clinical education of MD students to resident and fellowship training.

## MD Training

Department of Internal Medicine faculty members bear a major share of teaching medical and physician assistant students in the preclinical curriculum. During the first year, faculty members participate in MED:8121 Clinical and Professional Skills I and MED:8131 Clinical and Professional Skills II, as well as MED:8122 Medicine and Society I and MED:8132 Medicine and Society II. They also participate in teaching MED:8124 Mechanisms of Health and Disease I, MED:8133 Mechanisms of Health and Disease II, and MED:8134 Mechanisms of Health and Disease III. Departmental faculty members are key contributors in the third semester, instructing MED:8221 Clinical and Professional Skills III, MED:8222 Medicine and Society III, MED:8223 Mechanisms of Health and Disease IV, and keystone courses.

During the core clinical clerkship year, the department's faculty members instruct students for 10 weeks in IM:8310 Internal Medicine at University of Iowa Hospitals \& Clinics, Iowa River Landing, and the VA Iowa City Health Care, or in hospitals of the Des Moines Area Medical Education Consortium. Students actively participate as members of an inpatient ward team and/or specialty consult services, and in the evaluation and management of patients at outpatient internal medicine clinics in IM:8310.

During their advanced clerkship students may select a clinical experience to fit their own career goals from courses offered in general medicine, subspecialties, intensive care, and a subinternship program IM:8401 Advanced Inpatient Subinternship in Internal Medicine.

## Residency

The department offers a three-year residency training program in internal medicine. In addition, most of the department's specialty divisions offer two- and three-year clinical and research fellowships, in which fellows develop special knowledge and skills relevant to their specialties. Fellows who hold doctoral degrees may be accepted to programs whose major focus is laboratory research.

## Facilities

Teaching in the Department of Internal Medicine takes place in the Iowa City area at University of Iowa Hospitals \& Clinics, Iowa River

Landing, and the VA Iowa City Health Care, and in Des Moines at the VA Central Iowa Health Care and Iowa Methodist Medical Center.

## Courses

## Internal Medicine Courses

## IM:8301 Inpatient Internal Medicine

arr.
Development of knowledge, diagnostic and management skills vital to care of hospitalized patients; clinical responsibilities, educational conferences, independent study.
IM:8302 Outpatient Internal Medicine 3-4 s.h.
Development of knowledge, diagnostic and management skills in the outpatient clinical setting; clinical activities, discussion of problems, independent study.
IM:8310 Internal Medicine
Development of knowledge, diagnostic, and management skills of vital signs in outpatient and inpatient clinical settings; clinical responsibilities, discussion of problems, educational conferences, independent study. Requirements: MD enrollment.

IM:8401 Advanced Inpatient Subinternship in Internal Medicine

4 s.h.
Student responsibility for evaluating, treating, and following patients admitted to inpatient general medicine services. Requirements: fourthyear MD enrollment.
IM:8410 Clinical Allergy Immunology
arr.
Pathogenesis, diagnosis, and management of asthma and allergic and immunologic diseases; conducting and interpreting relevant specialized clinical and laboratory tests; emphasis on outpatients; formal and informal teaching sessions.
IM:8412 Clinical Cardiology
Development of breadth and depth in diagnostic and therapeutic problems encountered in clinical cardiology; participation in evaluation and decisions regarding patients seen sometimes in the cardiovascular clinic, inpatient cardiology wards, and electrophysiology service.
IM:8413 Noninvasive Cardiovascular Assessment: EKG Interpretation and Experiences in Ultrasound
Develop and further the confidence to read basic EKG patterns and rhythms critical to the primary care physician; these are the same objectives and methods as are stressed within the EKG portion of the transitions to clinical clerkships course; students are expected to refamiliarize themselves with this ICD material before beginning the course; students will learn by reading actual EKG's on their own with facilitation of learning by direct instructor feedback of their interpretation. Requirements: MD enrollment.

## IM:8414 Clinical Endocrinology

New patient evaluation, inpatient referral; returning patients in diabetes, endocrine clinics; complete patient evaluations, charts; participation in clinical conferences.
IM:8416 Clinical Gastroenterology
Work in consultation service at University Hospitals \& Clinics or VA Iowa City Health Care; assistance in diagnostic procedures for patients examined as part of consultation service; participation in patient follow-up through weekly return clinic.

IM:8418 Hematology Oncology
arr.
Diagnostic skills in hematology and oncology.
IM:8422 Clinical Infectious Disease arr.
Diagnosis, treatment, follow-up, study of patients with infectious diseases, under staff guidance; techniques of diagnostic microbiology; participation in conferences, teaching activities.

## IM:8426 Pulmonary Disease

Breadth, depth in diagnostic, therapeutic problems encountered in clinical pulmonary disease; evaluation of outpatients and inpatients under staff supervision; interpretation of special studies carried out in pulmonary function laboratory, fiberoptic bronchoscopy and brush biopsy of lung; exposure to diagnosis and management of acute respiratory failure in intensive care units at University of Iowa Hospitals \& Clinics, and VA Iowa City Health Care.

## IM:8428 Nephrology

Evaluation of patients from University of Iowa Hospitals \& Clinics inpatient service, VA Iowa City Health Care and clinics; emphasis on early kidney disease and all varieties of hypertension.

## IM:8434 Clinical Rheumatology

Clinical features of rheumatic diseases, their differential diagnosis, and principles of management; patients from arthritis clinic, inpatient consultation service of University of Iowa Hospitals \& Clinics, and VA Iowa City Health Care.

IM:8435 Palliative Care
Requirements: MD enrollment.
IM:8437 Multidisciplinary Cancer Care 2 s.h.
Basic concepts of cancer care; role of multidisciplinary team in care of cancer patients; development of attitudes, knowledge, and skills useful for entering a specialty that encounters patients with cancer. Requirements: MD enrollment.
IM:8449 Editorial Writing for Medical Students 4 s.h.
Students understand and practice the skill of writing opinion editorials aimed at improving the public's understanding of health and health care; how to effectively engage a broad, non-medical audience through writing with the goal of producing an opinion editorial piece that could be submitted for publication to a local or national newspaper.
IM:8450 Continuity of Care in Outpatient Internal Medicine 4 s.h.
Experience with longitudinal continuity of care for patients in the outpatient setting; clinical and didactic exposure to broad spectrum of general internal medicine problems. Requirements: fourth-year MD enrollment.

## IM:8451 Advanced Inpatient Subinternship in Internal Medicine, Des Moines arr.

Four-week rotation at Des Moines Medical Education Consortium; experience as a subintern in general internal medicine and the ICU. Requirements: fourth-year MD enrollment.
IM:8452 Subinternship in Internal Medicine at VAMC, Des Moines ..... arr.
subinternship on general internal medicine ward. Requirements:
fourth-year MD enrollment.
IM:8453 Critical Care Rotation, IMMC, ICU, DM ..... 4 s.h.
Subinternship on medical critical care team, with daily rounds,teaching. Requirements: fourth-year MD enrollment.
IM:8454 General Medicine Consult Service, IMMC ..... arr.Principles of consultative medicine provided by general internists tonon-internal medicine patients; how to assess perioperative risk for patients evaluated before surgery.
IM:8455 Public Health Medicine
Participation in ongoing projects related to public health issues of acute disease; training and career opportunities in public health practice.
IM: 8456 Clinical Cardiology Coronary Care Experience, Iowa
Methodist, Des Moines
arr.
arr. IM:8457 Clinical Nephrology, Iowa Methodist, Des Moines 2,4 s.h. Exposure to common nephrology problems, including acute renal failure, chronic renal failure, acid-base disorders, common electrolyte disorders.

## IM:8460 Transitions to Internal Medicine Residency 2 s.h.

Hands-on, specialty-specific training beyond what is offered through current Carver College of Medicine curriculum; for students who are applying to internal medicine residency or programs requiring a transitional or preliminary medicine year. Requirements: MD enrollment.

IM:8495 Internal Medicine ICU Off Campus arr.
Experience as subintern in the ICU/MICU; daily rounds and teaching with medical critical care staff.
IM:8497 Research in Internal Medicine arr. Medical research, clinical or laboratory projects; individual study.

## IM:8498 Internal Medicine On Campus

arr.
arr.

## Medical Education Program

Executive Dean

- Patricia L. Winokur

## Graduate degree: MME

Graduate certificate: medical education
Faculty: https://medicine.uiowa.edu/ocrme/about/faculty-staff
Website: https://medicine.uiowa.edu/ocrme/program-goals
The purpose of the Medical Education Program is to develop a community of academic medical faculty with formal training in education who will create and sustain a culture of educational excellence within the Carver College of Medicine, University of Iowa Hospitals \& Clinics, the University of Iowa, and in the medical education community. The program consists of the Master in Medical Education (MME) degree and the Certificate in Medical Education.

The program is coordinated through the Office of Consultation and Research in Medical Education (OCRME). Courses are taught by OCRME faculty, who also advise students in the program.

## Programs

Graduate Programs of Study

## Major

- Master in Medical Education [p. 1779]

## Certificate

- Certificate in Medical Education [p. 1780]

## Master in Medical Education, MME

## Learning Outcomes

The Master in Medical Education program gives health care education faculty members the opportunity to specialize in theory and practice of curriculum design, effective teaching, assessment, and other aspects of medical education. Graduates of the program will be able to:

- design evidence-based education programs and materials with appropriate scope, sequence, and focus for intended learners;
- deliver effective instruction to individuals and small or large groups in classroom, laboratory, or clinical settings;
- evaluate the effectiveness of educational instruction, using formative and summative methods;
- understand basic principles of educational measurement and be able to apply them to medical education;
- use assessments to promote learning and to assess learning progress and status;
- understand basic principles of, and be able to interpret and use, educational research;
- apply the fundamental theories, designs, and methods of program evaluation to the medical education environment;
- identify current issues in medical education and resources available for monitoring developments in the field;
- develop skills in reflection on past experience, including skills of self-awareness, self-analysis, and self-evaluation, that results in the ability to generate a new perspective or plan of action; and
- identify the evolving role of technology in medical education and research.

## Requirements

The Master in Medical Education (MME) requires a minimum of 30 s.h. of graduate credit. The program is designed to prepare medical faculty members to educate health professionals. It is intended for Carver College of Medicine faculty members and professional staff as well as for University of Iowa resident physicians and fellows.

The MME may be completed in as few as two years or as many as five. Students may begin the program in fall semester, spring semester, or summer session. Some of the required courses are offered online, and required on-campus courses have evening meeting times.

The curriculum includes 24 s.h. of required courses and 6-9 s.h. of electives. Students must register for at least one course each academic year in order to maintain satisfactory progress toward the degree. The program's faculty provides substantial student advising and consultation.

During their first semester, students file a plan of study. Each student's plan must include a description of the student's goals, intended graduation date, and a list of courses the student plans to take each semester. The study plan must incorporate all of the courses required for the degree and must include any requests for transfer credit. The plan must be approved by the director of the MME program and by the student's advisor. Subsequent revisions of the plan must have the advisor's approval.
The Master in Medical Education requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| MED:9701 | Instructional Design and | 3 |
|  | Technology |  |

| MED:9702 | Clinical Teaching in Medical <br> Education | 3 |
| :--- | :--- | ---: |
| MED:9703 | Educational Research and <br> Evaluation | 3 |
| MED:9711 | Teaching Methods in Medical <br> Education <br> Introduction to Educational <br> Measurement in Medical <br> Education | 3 |
| MED:9713 | Assessment in Medical <br> Education | 3 |
| MED:9714 | Current Issues in Medical <br> Education | 3 |
| MED:9720 | Portfolio Project | 3 |
| Electives |  | 3 |
| Total Hours |  | $\mathbf{3 0 - 3 3}$ |

Students who are not involved with clinical teaching may substitute another course for MED:9702 Clinical Teaching in Medical Education.

Students must have completed at least 18 s.h. before enrolling in MED:9720 Portfolio Project. In the portfolio, students integrate the materials they have developed over the course of the program into a document. Three faculty members review the project and evaluate the student's participation in the program.
Electives require approval of the student's advisor. They may include courses in the MME program as well as those offered by relevant departments and programs (e.g., College of Education, Tippie College of Business). Students should check with their advisors to determine which courses are graduate level.

## Admission

Applicants should hold an MD degree and must have performed satisfactorily on the Medical College Admission Test (MCAT). Basic sciences applicants without an MD must hold an equivalent degree and must have performed satisfactorily on an admission test equivalent to the MCAT.
Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET).
Application materials must include an official transcript showing medical coursework and medical degree, or equivalent for basic sciences applicants (current and former University of Iowa students do not need to request a UI transcript or transcripts previously submitted to the university); a letter of reference from the applicant's department chair and one additional letter of reference; and a 300-500 word essay describing the applicant's interest in medical education and in the Master in Medical Education program.

To apply to the MME program, see Applications and Admissions on the Office of Consultation and Research in Medical Education (OCRME) website. Application materials should be submitted to the University of Iowa Office of Admissions.
Application deadlines are:

- July 15 for fall semester entry;
- Nov. 15 for spring semester entry; and
- April 15 for summer session entry.

## Medical Education, Graduate Certificate

## Requirements

The graduate certificate program is designed to help health care education faculty members, professional staff, residents, and fellows in the Carver College of Medicine and University of Iowa Hospitals \& Clinics find new ways to enhance their scholarship and skills in teaching, curriculum design, and education assessment. The Certificate in Medical Education program involves the same courses as the Master in Medical Education (MME); however, it only requires a minimum of $12 \mathrm{~s} . \mathrm{h}$. of graduate credit. Individuals who complete the certificate and then decide to earn the master's degree may count their certificate coursework toward the MME degree.

The Certificate in Medical Education requires the following coursework.

## Methods

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| One of these: | Instructional Design and |  |
| MED:9701 | Technology | 3 |
| MED:9702 | Clinical Teaching in Medical <br> Education | 3 |
| MED:9711 | Teaching Methods in Medical <br> Education | 3 |

## Research and Measurement

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| One of these: | Educational Research and <br> Evaluation | 3 |
| MED:9703 | Introduction to Educational <br> Measurement in Medical <br> Education | 3 |

## Additional Courses

| Course \# | Title | Hours |
| :--- | ---: | ---: |
| Students choose courses from MME requirements | 6 |  |

For additional courses that satisfy the certificate requirements, view Master in Medical Education (MME) [p. 1779] in this section of the catalog.

## Admission

Applicants should hold an MD degree and must have performed satisfactorily on the Medical College Admission Test (MCAT). Basic sciences applicants without an MD must hold an equivalent degree and must have performed satisfactorily on an admission test equivalent to the MCAT.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET).

Application materials must include an official transcript showing medical coursework and medical degree, or equivalent for basic sciences applicants (current and former University of Iowa students do
not need to request a UI transcript or transcripts previously submitted to the university); a letter of reference from the applicant's department chair and one additional letter of reference; and a 300-500 word essay describing the applicant's interest in medical education and in the Certificate in Medical Education program.

To apply to the certificate program, see Nondegree Seeking Students on the University of Iowa Office of Admissions website. Application materials should be submitted to the Office of Admissions.

Application deadlines are:

- July 15 for fall semester entry;
- Nov. 15 for spring semester entry; and
- April 15 for summer session entry.

# Medical Laboratory Science 

## Coordinator

- Gabriella Young

Undergraduate major: medical laboratory science (BS)
Website: https://medicine.uiowa.edu/pathology/education/medical-laboratory-science-program-mlsp

Medical laboratory scientists and medical technologists perform the laboratory tests that provide health care practitioners with information vital for accurate diagnosis, proper treatment of disease, and assistance in monitoring the treatment of the disease. They are in demand in hospital, private, reference, and government laboratories; clinics; physicians' offices; and industrial, pharmaceutical, biological, veterinary, and environmental research laboratories. Medical laboratory scientists and medical technologists are highly skilled health team professionals who use complex procedures and instruments in their analysis. They possess a specialized set of knowledge and skills acquired through completion of a formal twelvemonth program of academic and clinical study in laboratory medicine.

## Programs

## Undergraduate Program of Study

## Major

- Major in Medical Laboratory Science (Bachelor of Science) [p. 1782]

# Medical Laboratory Science, BS 

#### Abstract

The Carver College of Medicine partners with various programs to offer the major in medical laboratory science. The programs are fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences. All graduates are eligible for national certification examinations in medical laboratory science.

Undergraduate study in medical laboratory science is guided by the academic rules and procedures [p. 1730] outlined in the Carver College of Medicine section of the catalog. Because the Carver College of Medicine partners with affiliated programs for the medical laboratory science major, students are not held to the University of Iowa in-residence requirement.

## Affiliated Programs

- Mercy College of Health Sciences
- St. Luke's Hospital/UnityPoint Health

## Expenses

Students are responsible for all tuition, textbooks, and other associated expenses during their time in this program.

## Requirements

The Bachelor of Science with a major in medical laboratory science requires a minimum of 124 s.h., including 84-92 s.h. of preparatory study and $32-40$ s.h. in the professional (clinical) program, which consists of 11 months of didactic and practical instruction depending on the program in which a student enrolls. Acceptance into the affiliated programs is competitive; see specific program websites for admission requirements.
Students in the Mercy College of Health Sciences program in Des Moines must maintain a cumulative grade-point average (GPA) of at least 2.50 in all courses for the major and in all University of Iowa courses. They also must complete the College of Liberal Arts and Sciences GE CLAS Core.

Students in the St. Luke's program will need an overall GPA of 2.50, with a GPA of 2.50 in required science courses. They also must complete the College of Liberal Arts and Sciences GE CLAS Core.

Bachelor of Science students who have completed all preparatory study (years one through three) begin the fourth-year professional program, which consists of both didactic lectures and clinical rotations. Students who successfully complete the professional program graduate with a BS degree in medical laboratory science awarded from the University of Iowa.

To learn more about the professional program, visit the medical laboratory science pages on the Mercy College of Health Sciences or St. Luke's Hospital/UnityPoint Health websites.

## Preparatory Study

## Mercy College of Health Sciences: Prerequisites for Admission to the Major

Students must:

- achieve a cumulative GPA of at least 2.50 on a 4.00 scale in all college-level coursework;
- achieve a cumulative GPA of at least 2.50 on a 4.00 scale in all college-level coursework in science, which includes biology,
microbiology, zoology, chemistry, physics, mathematics, statistics, and related courses; and
- earn a grade of C (not C -minus) or higher in all required courses.

Students must complete the following coursework before they may be admitted to the major in medical laboratory science.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| BIOL:1411- <br> BIOL:1412 | Foundations of Biology Diversity of Form and Function | 8 |
|  <br> CHEM:1120 | Principles of Chemistry I-II | 8 |
|  <br> CHEM:2220 | Organic Chemistry I-II | 6 |
| CHEM:2410 | Organic Chemistry Laboratory | 3 |
| MATH:1005 | College Algebra | 4 |
| $\begin{aligned} & \text { MICR:2157- } \\ & \text { MICR:2158 } \end{aligned}$ | General Microbiology - General Microbiology Laboratory | 5 |
| One of these: |  |  |
| $\begin{aligned} & \text { HHP: } 1300 \text { \& } \\ & \text { HHP: } 1310 \end{aligned}$ | Fundamentals of Human Physiology - Human Physiology Laboratory | 4 |
| HHP:3115 | Anatomy for Human Physiology with Lab | 5 |
| HHP:3550 | Human Physiology with Laboratory | 5 |
| MICR:3147 | Immunology and Human Disease | 3 |

Coursework taken to meet the biology and chemistry requirements completed seven or more years before application may require updating. This is determined by the program chair.

Questions about the requirements should be directed to the Mercy College of Health Sciences.

## St. Luke's Hospital/UnityPoint Health: Prerequisites for Admission to the Major

Students must:

- achieve an overall GPA of 2.50,
- achieve a GPA of 2.50 in required science courses, and
- have earned 90 s.h. of college credit.

Students must complete the following coursework before they may be admitted to the major in medical laboratory science.

| Course \# <br> One of these: | Title | Hours |
| :--- | :--- | ---: |
| MATH:1005 | College Algebra (or a higher <br> numbered math course) | 4 |
| A statistics course |  | $3-4$ |
| One of these: <br>  <br> HHP:1110 | Human Anatomy - Human <br> Anatomy Laboratory (both <br> courses) | 4 |
| HHP:1300 \& | Fundamentals of Human <br> Physiology - Human Physiology |  |
| HHP:3115 | Laboratory (both courses) <br> Anatomy for Human Physiology <br> with Lab | 4 |
| HHP:3550 | Human Physiology with <br> Laboratory | 5 |
| All of these: | Foundations of Biology <br> BIOL:1411 | F |

| BIOL:2512 <br> or BIOL:3713 | Fundamental Genetics <br> Molecular Genetics | 4 |
| :--- | :--- | ---: |
| BMB:3110 | Biochemistry | 3 |
| CHEM:1110 \& | Principles of Chemistry I-II | 8 |
| CHEM:1120 |  |  |
| CHEM:2210 | Organic Chemistry I | 3 |
| MICR:2157 \& | General Microbiology - General | 5 |
| MICR:2158 | Microbiology Laboratory |  |

Additional biology coursework to total 16 s.h. 3
Additional chemistry coursework to total 16 s.h. 2
Applicants who have met the minimal preclinical requirements five or more years before applying to the program must update their academic preparation in a manner acceptable to the National Accreditation Agency for Clinical Laboratory Sciences (NAACLS) and the program. For these applicants, current clinical laboratory experience will be taken into consideration.

Questions about the requirements should be directed to St. Luke's Hospital/UnityPoint Health.

## Fourth Year: Professional Program

Students must successfully complete the professional program requirements through one of the medical laboratory science programs in order to graduate with the BS degree in medical laboratory science.

## Admission

Admission to the fourth-year medical laboratory science professional programs are competitive; enrollment may be limited. Students must apply to the medical laboratory science program directly. Most students apply during the fall of their third year and begin the professional program following that year.
Before beginning the professional program, students must complete all prerequisites, including the College of Liberal Arts and Sciences GE CLAS Core requirements, and must earn at least 84 s.h. of college credit for the Mercy Des Moines program or at least 90 s.h. for the St. Luke's program. Students satisfy the English and public speaking prerequisites by fulfilling the GE CLAS Core Rhetoric requirement. Applicants must have a cumulative grade-point average of at least 2.50 both overall and in science coursework for admission into the Mercy College of Health Sciences program in Des Moines or the St. Luke's Hospital Cedar Rapids Medical Laboratory Science Program. They must satisfy any English as a Second Language (ESL) requirements specified by the University of Iowa before beginning the professional program.

Students should consult with a Medical Laboratory Science Program advisor as early as possible to plan preclinical studies that meet all requirements.

## Career Advancement

The demand for medical laboratory scientists is much greater than the number of people qualified to fill the positions, so graduates have numerous employment opportunities nationwide. They consistently find employment before or very soon after graduation.

Opportunities for advancement include positions such as lab manager, computer specialist, technical specialist, or sales/instrument representative. An advanced degree in basic sciences, medicine, hospital administration, or business can expand earning potential.
Graduates often enjoy diverse work environments, including labs in hospitals, research institutions, public health facilities, forensic units, pharmaceutical companies, or the armed forces. They have an
impact in the field as integral members of health care teams, providing information essential for the treatment and prevention of disease.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

# Medical Scientist Training Program 

## Director

- Steven Lentz (Internal Medicine)

## Administrative Director

- Linda M. Varvel

Faculty: https://medicine.uiowa.edu/mstp/directories/current-mentors
Website: https://medicine.uiowa.edu/mstp/
The Iowa Medical Scientist Training Program (MSTP) prepares trainees for careers in academic medicine, with emphasis on basic and clinical research.

## Combined Degree

MD/PhD
The combined Doctor of Medicine/Doctor of Philosophy program normally requires seven to eight years of continuous study. It provides an effective and efficient means to integrate graduate and clinical training, combining the scientific approach with clinical medicine.

Students register for MSTP:8515 Medical Scientist Training Program Topics every semester. The course focuses on a variety of topics relevant to training as a physician-scientist.
During the first three semesters of the program, trainees take coursework in the basic sciences fundamental to the study of medicine and complete experiences that introduce mechanisms of health and disease, and principles of clinical practice; see Doctor of Medicine [p. 1766] in the catalog. This early training provides broad exposure to the language and organizing concepts that form the foundation for a career as a physician scientist. Trainees also begin the research component of the graduate phase of the program during this time, through summer laboratory MSTP:8511 Medical Scientist Training Program Research rotations, enrollment in MSTP:8513 Analyzing and Presenting Medical Research, research presentations by MSTP faculty and students, and a student-sponsored seminar series. Trainees participate in Conversations in Research, in which MSTP faculty members discuss their research and career interests, and they attend MSTP Grand Rounds, a forum for patient-based discussions that emphasizes how science and medicine intersect.

During the fourth and fifth semesters, trainees enroll in core clinical clerkships, in which they gain broad exposure to the spectrum of human disease and experience direct patient care before they enter the graduate phase of training.
After completing core clerkships and United States Medical Licensing Examination Step 1 and 2 examinations, trainees select a PhD thesis mentor and begin research. This happens in the spring of their third year. They also enroll in a graduate department or interdisciplinary graduate program to begin their scientific training in the fall of their fourth year.
The focus of the graduate years of study is engagement in academic and research experiences that promote the trainees' development into independent investigators. Clinical contact is maintained during this phase of training through participation in seminar programs, MSTP Grand Rounds, and MSTP:8512 Medical Scientist Training Program Clinical Connections, a course that provides the opportunity for mentored clinical experiences.
Upon completing the PhD dissertation, trainees return to the Carver College of Medicine's MD curriculum to complete the advanced clinical clerkship requirements for the MD/PhD combined program.

During this phase, trainees bring a sophistication in the scientific approach to problem solving that they apply to human disease. They renew and develop clinical skills acquired in their early training and reinforce their understanding of the scientific basis of disease through continued participation in MSTP Grand Rounds. Upon completion of the clinical curriculum, trainees are awarded the MD and PhD degrees.
Most graduates of the program elect to enter residency programs in clinical medicine and embark on careers as medical school faculty members in clinical disciplines with opportunities for basic and applied research. Other graduates accept academic appointments in basic science departments and spend a major part of their professional activity in biomedical research and teaching.

## Admission

Applicants must meet requirements for admission to the MD program in the Carver College of Medicine; see Admission [p. 1768] in the Doctor of Medicine section of the catalog. They also must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants should have completed requirements for a bachelor's degree at an accredited academic institution. In addition to outstanding academic credentials, including strength in biological, physical, and mathematical sciences, they must demonstrate aptitude for and commitment to scientific research through productive research experience during their undergraduate years or after. Admission normally is made for entry to the first year of the program, but applicants already enrolled in the Carver College of Medicine may request admission with advanced standing.

## Application

The Carver College of Medicine participates in the American Medical College Application Service (AMCAS). Program applicants should select MD/PhD Program-Type on their AMCAS application and instruct AMCAS to forward their credentials to the Carver College of Medicine (IA131). Applications should be submitted as early as possible to allow careful review by the admissions committees of the Medical Scientist Training Program and the Carver College of Medicine.

All candidates must take the Medical College Admission Test (MCAT), according to Carver College of Medicine requirements. The Graduate Record Exam (GRE) General Test is not required for admission.

Application to the Graduate College is not required before acceptance to the MSTP. Trainees admitted to the program receive assistance with Graduate College enrollment.

## Financial Support

Trainees receive stipend and full tuition support from a National Institutes of Health MSTP training grant to the University of Iowa, supplemented by other institutional and individual awards. Students in the graduate phase of training receive support from their graduate departments or interdisciplinary programs and their research advisors. The program office also helps selected trainees apply for competitive national awards for outstanding academic and research achievement.

## Courses

## Medical Scientist Training Program

## Courses

MSTP:8511 Medical Scientist Training Program Research arr.
Research experience. Requirements: Medical Scientist Training
Program enrollment.
MSTP:8512 Medical Scientist Training Program Clinical

## Connections

arr.
Experience with physician-scientist preceptor in medical interviewing, physical examination, patient presentation through direct patient interaction. Requirements: Medical Scientist Training Program graduate phase enrollment.
MSTP:8513 Analyzing and Presenting Medical Research 1 s.h. How to read, interpret, and present medical and scientific literature; students read and present representative papers from scientific and medical literature.
MSTP:8514 Grant Writing Basics: A Focus on Predoctoral Applications
Introduction to practical and conceptual aspects of grant-writing process, with the goal of completing an NIH F30-like grant; encourages critical thinking about significance, innovation, and experimental design; relate critical information and study design in concise and clear language; practical concepts of grant writing such as specific aims, experimental design, and the grant review process; trainees will present their research ideas, establishing opportunities to give and receive scientific criticism. Requirements: Medical Scientist Training Program enrollment.
MSTP:8515 Medical Scientist Training Program Topics 1 s.h. Workshops and speakers; focus on a variety of topics including wellness, research presentations, professional development, and ongoing faculty research partnerships. Requirements: Medical Scientist Training Program enrollment.

# Microbiology and Immunology 

## Chair

- Li Wu

Director, Undergraduate Studies

- Aloysius J. Klingelhutz

Director, Graduate Studies

- Craig D. Ellermeier

Undergraduate major: microbiology (BS)
Undergraduate minor: microbiology
Graduate degrees: MS in microbiology; PhD in microbiology
Faculty: https://medicine.uiowa.edu/microbiology/people-0
Website: https://medicine.uiowa.edu/microbiology/
Study in the Department of Microbiology and Immunology is dedicated to the branch of biological sciences that investigates the smallest living things: microbes that include bacteria, archaea, fungi, algae, protozoa, and viruses. It is coupled with immunology that includes the study of the protective responses of higher organisms to disease-causing microbes and cancers, and mistakes in immune function. Microbiology and immunology often interact in humans at the microbiome, those microbes that live with humans on their skin and mucosal surfaces, and yet must be restricted from causing diseases by the immune system.

Microbiology and immunology are at the forefront of the modern biological revolution. Microbes are experimental subjects of choice for examining genetic and biological phenomena because of their small size, rapid growth rate, relative simplicity, and variety of characteristics that allow them to cause many kinds of infections and alter normal body functions. Immunology often makes use of microbes and cancer cells to study the critical and complex human responses to eliminate microbes and cancers. A significant portion of contemporary biochemical research employs microbiological and immunological methods.

Current research is making theoretical and practical advances concerning microbes that infect animals, including humans, and the immune response to those microbes; the use of comparative genomics, gene expression profiling, and recombinant DNA methods to analyze biological processes and generate valuable products, such as antibiotics and antibodies; genetics and regulation of metabolic processes; and the genetics and regulation of the immune response, including characterization of mechanisms used by microbes to signal one another and characterization of interactions between different types of immune cells and their targets.

The Department of Microbiology and Immunology offers an undergraduate major and a minor, and graduate majors leading to an MS and a PhD , and determines the curricula for those programs. Undergraduates majoring in microbiology receive their degrees (Bachelor of Science) from the College of Liberal Arts and Sciences and are governed by that college's undergraduate academic policies. The graduate degrees are awarded by the Graduate College.

## Programs

Undergraduate Programs of Study

## Major

[^5]
## Minor

- Minor in Microbiology [p. 1794]

# Graduate Programs of Study 

Majors

- Master of Science in Microbiology [p. 1795]

## Facilities

The Department of Microbiology and Immunology is situated on the University of Iowa health sciences campus, where it shares the Bowen Science Building with the Departments of Anatomy and Cell Biology, Biochemistry and Molecular Biology, Molecular Physiology and Biophysics, and Neuroscience and Pharmacology. Laboratory space and modern equipment are available for teaching and research.

## Courses

## Microbiology and Immunology Courses

MICR:2157 General Microbiology
Principles of bacterial and viral diversity, structure, genetics, physiology, and metabolism in contexts of molecular biology, immunology, infectious disease, and environmental microbiology. Prerequisites: BIOL:1411 and CHEM:1110.
MICR:2158 General Microbiology Laboratory 2 s.h.
Practice of basic techniques commonly used today for study of easy-to-grow microorganisms; variety of individual and group lab activities that challenge students to apply observations about bacteria and viruses. Corequisites: MICR:2157, if not taken as a prerequisite.
MICR:3145 Honors in Microbiology Thesis Preparation 1 s.h. Guidance and constructive criticism on written and oral presentation of honors research project; submission of thesis introduction; multiple presentations and updates of research project in preparation for final oral presentation at departmental Undergraduate Research Symposium; for honors in the major students and taken final semester before graduation. Prerequisites: MICR:4171.

MICR:3147 Immunology and Human Disease 3 s.h. Important principles and key concepts in immunology with a focus on the involvement of the immune system in disease pathogenesis; overview of innate and adaptive immune systems and their functions at cellular and molecular levels. Prerequisites: BIOL:1411 with a minimum grade of C and BIOL: 1412 with a minimum grade of C .

MICR:3150 Eukaryotic Pathogens and Human Disease 2 s.h. Foundational understanding of the lifecycle, epidemiology, pathogenesis, diagnosis, and treatment of major eukaryotic pathogens/ parasites that cause human disease. Prerequisites: MICR:2157 with a minimum grade of C. Recommendations: genetics, biochemistry, and immunology.
MICR:3159 Bacteria and Human Disease
3 s.h.
Infection and replication strategies of bacteria with an emphasis on human disease; for students interested in microbiology or other biological sciences, epidemiology, and/or health-related occupations. Prerequisites: MICR: 2157 with a minimum grade of C .

MICR:3164 Microbiology and Human Health Microbiology for nursing, pharmacy, and pre-health professions. Prerequisites: BIOL:1411 or BIOL:1140 or BIOL:1141.

## MICR:3165 Genetics of Bacterial Pathogens Lab and Discussion

Use of bacterial genetics and molecular biology techniques and methodologies to study bacteria which cause human disease; development of skills in data analysis and presentation, reading scientific literature, and writing scientific abstracts; for students interested in microbiology or other biological sciences, epidemiology, and/or health-related occupations. Prerequisites: MICR:2157 with a minimum grade of C and MICR:2158 with a minimum grade of C. Corequisites: MICR:3159 or MICR:3170, if not taken as a prerequisite.

MICR:3168 Viruses and Human Disease
3 s.h.
Infection and replication strategies of viruses with an emphasis on human disease; for microbiology majors as well as students interested in pre-medicine, biological sciences, epidemiology, and/ or other health-related occupations. Prerequisites: BIOL:1412 with a minimum grade of C or MICR:2157 with a minimum grade of C . Recommendations: basic understanding of molecular biology and immunology.

## MICR:3170 Microbial Genetics and Physiology

3 s.h.
Genetics of bacteria and bacteriophages including classical, molecular, and genome-wide approaches. Prerequisites: BIOL:2512 with a minimum grade of C or MICR: 2157 with a minimum grade of C .
MICR:3177 Virology Discussion
2 s.h.
Students read, present, and discuss papers from virology literature that address classic and current issues in virology research. Students will learn how to critically evaluate and present methods and results from virology research papers. Prerequisites: MICR:3168 with a minimum grade of C .
MICR:3178 Virology Laboratory
2 s.h.
Practical approaches to studying viruses; basic techniques in virology including virus detection, virus growth measurement, and virus genetics; introduction to bioinformatic analysis of virus genomes and infections. Prerequisites: MICR:2157 with a minimum grade of C and MICR:2158 with a minimum grade of C. Corequisites: MICR:3168 (if not taken as a prerequisite).
MICR:4161 Undergraduate Research in Microbiology Experimental research under faculty supervision. Prerequisites: BIOL:1411.

## MICR:4171 Honors Undergraduate Research in Microbiology arr.

Experimental research under faculty supervision. Prerequisites:
BIOL:1411. Requirements: microbiology major, junior or senior standing, 3.33 overall GPA, and 3.33 GPA in microbiology courses.

## MICR:4175 Topics in Parasitism

Molecular and immunologic mechanisms by which bacteria, viruses, and protozoa cause human diseases; based on manuscript readings and/or student presentations. Requirements: junior or higher standing in microbiology or related discipline, and current or prior research in a microbiology and immunology laboratory.

## MICR:5218 Microscopy for Biomedical Research

arr.
Basic microscopy methods for research including optics, preparation, and analysis of biomedical specimens; light, fluorescence, confocal, transmitting electron, scanning electron, atomic force microscopes, elemental analysis; immunochemistry and stereology techniques; individualized laboratory instruction. Prerequisites: BIOL:2723. Same as ACB:5218, BIOL:5218.
MICR:5264 Directed Study in Microbiology
Advanced-level experimental research or teaching under faculty supervision.

MICR:5875 Perspectives in Biotechnology
3 s.h. Topics related to careers in biotechnology with an emphasis on preparing graduate students for careers outside of academia; discussions led by a series of guest speakers from leading biotech industries; understanding the societal impact of basic research; participation in round-table discussions; and presentation of student research findings. Requirements: graduate standing and good academic standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BMB:5875, CBE:5875, CEE:5875, CHEM:5875, PHAR:5875.

## MICR:6201 Graduate Immunology

Immune cell ontogeny, activation, and function of T lymphocytes and B lymphocytes; innate immune effector mechanisms; major histocompatibility complex; antigen presentation; thymocyte positive and negative selection; signaling of T lymphocytes and B lymphocytes; emphasis on experimental methods for analysis of these processes and how they have led to current advanced concepts in immunology. Prerequisites: MICR:3147 or MICR:6247. Requirements: for IMMU:6201-college biology, general chemistry, and introductory immunology courses; for MICR:6201—courses in college biology, genetics, general chemistry, and introductory immunology. Recommendations: for IMMU:6201—courses in biochemistry and genetics; for MICR:6201—biochemistry course. Same as IMMU:6201.

## MICR:6240 Graduate Eukaryotic Pathogens and Human Disease <br> 2 s.h. <br> Foundational understanding of the lifecycle, epidemiology,

 pathogenesis, diagnosis, and treatment of major eukaryotic pathogens/ parasites that cause human disease. Recommendations: genetics, biochemistry, and immunology.MICR:6247 Graduate Immunology and Human Disease 4 s.h. Important principles and key concepts in immunology with a focus on the involvement of the immune system in disease pathogenesis; overview of innate and adaptive immune systems and their functions at cellular and molecular levels; learning enhanced by case-based, small-group discussion and writing exercises. Same as IMMU:6247.

## MICR:6250 Mechanisms of Parasitism Journal Club 1 s.h

 Reviews of recent publications in molecular parasitology research and thesis research by training grant or journal club students; for students pursuing graduate thesis research in microbiology or a related discipline. Same as MMED:6250.
## MICR:6255 Graduate Experimental Approaches to Molecular Microbiology 2 s.h.

Exposure to common experimental approaches through examination of primary literature and facilitated discussions on application of those approaches to advance scientific inquiry. Requirements: microbiology graduate standing.
MICR:6259 Graduate Bacteria and Human Disease 3 s.h. Infection and replication strategies of bacteria with an emphasis on human disease; discussion focuses on experimental approaches used to study mechanisms of disease.
MICR:6265 Introduction to Grant Writing
How to think and write like scientists and become familiar with the elements of a research proposal; writing a grant proposal modeled on a National Institutes of Health Exploratory/Developmental Research Grant Award (NIH R21); students critique proposals written by other students; faculty read proposals and provide constructive criticism; lectures describe elements of a grant proposal and strategies for effective writing. Requirements: enrollment in microbiology graduate program, or enrollment in a graduate program training in a microbiology and immunology department laboratory, or enrollment in a biological science graduate program and not working in a microbiology and immunology department laboratory for thesis project.

MICR:6267 Graduate Viruses and Human Disease
4 s.h.
Infection and replication strategies of viruses with an emphasis on human disease; discussion focuses on topics and techniques used in primary literature and development of specific aims for a miniproposal.
MICR:6268 Biology and Pathogenesis of Viruses
Molecular biology of animal DNA and RNA viruses, viral immunology and pathogenesis, and interaction of these viruses with eucaryotic cells; mechanisms of viral latency, persistence, cellular transformation, oncogenesis; virology literature. Prerequisites:
MICR:3168 or MICR:6267.
MICR:6269 Graduate Virology Discussion
1 s.h.
Discussion of primary virology literature from a range of topics, may include techniques used for studying viruses, viral entry and replication, evasion of immune responses by viruses, vaccines, and viral pathogenesis; short presentations; development of specific aims for a mock grant proposal on a virology-related topic. Recommendations: completion of a virology course.
MICR:6270 Graduate Microbial Genetics and Physiology 3 s.h. Genetics of bacteria and bacteriophages including classical, molecular, and genome-wide approaches.

## MICR:6310 Biology of Bacteria and Interactions with the

 Host2 s.h.
Discussion of primary literature based on molecular biology of bacteria, bacterial pathogenesis, bacterial gene regulation and stress responses, bacterial cell biology, bacterial behaviors, antimicrobial resistance, interaction of bacteria with host cells, interactions of bacteria with immune system; how bacteria adapt to different environments, including in a eukaryotic host or complex polymicrobial community. Requirements: microbiology graduate standing. Recommendations: MICR:6270 or MICR:6259.
MICR:7207 Advanced Topics in Immunology 3 s.h.
In-depth analysis of selected areas. Prerequisites: IMMU:6201 or MICR:6201. Same as IMMU:7221.

MICR:7261 Graduate Research in Microbiology arr.
Requirements: microbiology graduate standing.
MICR:7263 Graduate Student Research Seminar 1 s.h.
Presentation of thesis work in progress. Requirements: microbiology graduate standing.

## MICR:7265 Topics in Virology Literature

1 s.h.
Papers of current interest in primary virology literature.
MICR:8230 Dental Microbiology
3 s.h.
Medical microbiology: bacteriology, immunology, pathogenic bacteriology, virology, mycology, parasitology. Requirements: DDS enrollment.

## Microbiology, BS

Microbiology is an excellent major for undergraduate students who want a good general education with emphasis on an important and interesting branch of biological sciences.

## Requirements

The Bachelor of Science with a major in microbiology requires a minimum of 120 s.h., including 60-64 s.h. of work for the major, depending on the track. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. Courses for the major may not be taken pass/nonpass.
Students also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].
Students must complete at least $12 \mathrm{~s} . \mathrm{h}$. of the required 18-19 s.h. in Department of Microbiology and Immunology courses at the University of Iowa.

The major in microbiology can be pursued on either a pre-medicine or a scholar track.

Students in the pre-medicine track complete admission requirements for the Carver College of Medicine and for most colleges of medicine as an integral part of the completion of their major requirements. This track is recommended for pre-medical, pre-dental, and pre-pharmacy students.

Students in the scholar track pursue a curriculum with streamlined organic chemistry and physics requirements and expanded microbiology and immunology courses, including advanced laboratory and global health studies coursework. The scholar track is recommended for students interested in pursuing graduate training or in developing a career as a microbiologist.

Students may shift from one track to the other during their program of study.

The BS with a major in microbiology in the pre-medicine or the scholar track requires the following coursework.

## Pre-Medicine Track

Students in the pre-medicine track complete the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Supporting Coursework | $42-43$ |
| Microbiology and Immunology Courses | 18 |
| Advanced Elective Coursework | 3 |

## Pre-Medicine Track: Supporting Coursework

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| BIOL:1411- <br> BIOL:1412 | Foundations of Biology Diversity of Form and Function | 8 |
| BMB:3120 \& BMB:3130 | Biochemistry and Molecular Biology I-II | 6 |
| CHEM:1110 \& CHEM:1120 | Principles of Chemistry I-II | 8 |
| CHEM:2210 \& CHEM:2220 | Organic Chemistry I-II | 6 |
| CHEM:2410 | Organic Chemistry Laboratory | 3 |
| One of these: |  |  |
| BIOS:4120 | Introduction to Biostatistics | 3 |
| MATH:1460 | Calculus for the Biological Sciences | 4 |

| MATH:1550 | Engineering Mathematics I: <br> Single Variable Calculus | 4 |
| :--- | :--- | :--- |
| MATH:1850 | Calculus I | 4 |
| STAT:3510/ | Biostatistics | 3 |
| IGPI:3510 |  | 8 |
| One of these sequences: |  |  |
| PHYS:1511- College Physics I-II <br> PHYS:1512  <br> PHYS:1611- Introductory Physics I-II <br> PHYS:1612  |  |  |

## Pre-Medicine Track: Microbiology and Immunology Courses

Students earn a minimum of 18 s.h. in Department of Microbiology and Immunology courses from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| MICR:2157 | General Microbiology (required <br> with a grade of C or higher) | 3 |
| MICR:2158 | General Microbiology <br> Laboratory (required with a <br> grade of C or higher) | 2 |
|  | Honors in Microbiology Thesis <br> Preparation (required for honors <br> in microbiology) | 1 |

Additional microbiology and immunology courses (prefix MICR) numbered MICR:3147 or above, excluding MICR:3164; students select from the following:

| MICR:3147 | Immunology and Human Disease | 3 |
| :---: | :---: | :---: |
| MICR:3150 | Eukaryotic Pathogens and Human Disease | 2 |
| MICR:3159 | Bacteria and Human Disease | 3 |
| MICR:3165 | Genetics of Bacterial Pathogens Lab and Discussion | 3 |
| MICR:3168 | Viruses and Human Disease | 3 |
| MICR:3170 | Microbial Genetics and Physiology | 3 |
| MICR:3177 | Virology Discussion | 2 |
| MICR:3178 | Virology Laboratory | 2 |
| MICR:4161 | Undergraduate Research in Microbiology | arr. |
| MICR:4171 | Honors Undergraduate Research in Microbiology | arr. |
| MICR:5218 | Microscopy for Biomedical Research | arr. |
| MICR:5264 | Directed Study in Microbiology | arr. |

A maximum of 4 s.h. earned in either MICR:4161 Undergraduate Research in Microbiology or MICR:4171 Honors Undergraduate Research in Microbiology may be counted toward the major. However, students earning honors in the major must complete 6 s.h. in MICR:4171 Honors Undergraduate Research in Microbiology; see Honors [p. 1791] in this section of the catalog.

## Pre-Medicine Track: Advanced Elective Coursework

| Course $\#$ | Hours |
| :--- | ---: |
| Up to 3 s.h. from these: |  |
| BIOL:2723 Cell Biology | 3 |
| BIOL:3212/IGPI:3212 Bioinformatics for Beginners | 3 |

| BIOL:3314/IGPI:3314 Genomics | 3 |  |
| :--- | :--- | ---: |
| BIOL:4213/ | Bioinformatics | 2,4 |
| GENE:4213/ |  |  |
| IGPI:4213 |  |  |$\quad$| BMB:3310/ | Practical Data Science and |
| :--- | :--- |
| CBIO:3310/ | Bioinformatics |
| MMED:3310 | Finding Patient Zero: The |

## Scholar Track

Students in the scholar track complete the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Supporting Coursework | $35-36$ |
| Microbiology and Immunology Courses | 19 |
| Advanced Elective Coursework | 6 |

Scholar Track: Supporting Coursework

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| BIOL:1411- <br> BIOL:1412 | Foundations of Biology Diversity of Form and Function | 8 |
|  <br> BMB:3130 | Biochemistry and Molecular Biology I-II | 6 |
| CHEM:1110 \& CHEM:1120 | Principles of Chemistry I-II | 8 |
| CHEM:2210 | Organic Chemistry I | 3 |
| PHYS:1400 | Basic Physics | 4 |
| One of these: |  |  |
| BIOS:4120 | Introduction to Biostatistics | 3 |
| MATH:1460 | Calculus for the Biological Sciences | 4 |
| MATH:1550 | Engineering Mathematics I: Single Variable Calculus | 4 |

| $\begin{aligned} & \text { GHS:2320/ } \\ & \text { ANTH:2320 } \end{aligned}$ | Origins of Human Infectious Disease | 3 |

In addition, this course may be recommended for some
students:
CNW:2680

## Scholar Track: Microbiology and Immunology Courses

Students earn a minimum of 19 s.h. in Department of Microbiology and Immunology courses from the following.

3

MICR:4171 Honors Undergraduate Research arr in Microbiology (must be taken for at least 2 s.h.)
Additional microbiology and immunology courses (prefix MICR) numbered MICR:3147 or above, excluding MICR:3164; students select from the following:

| MICR:3147 | Immunology and Human Disease | 3 |
| :---: | :---: | :---: |
| MICR:3150 | Eukaryotic Pathogens and Human Disease | 2 |
| MICR:3159 | Bacteria and Human Disease | 3 |
| MICR:3165 | Genetics of Bacterial Pathogens Lab and Discussion | 3 |
| MICR:3168 | Viruses and Human Disease | 3 |
| MICR:3170 | Microbial Genetics and Physiology | 3 |
| MICR:3177 | Virology Discussion | 2 |
| MICR:3178 | Virology Laboratory | 2 |
| MICR:4161 | Undergraduate Research in Microbiology | arr. |
| MICR:4171 | Honors Undergraduate Research in Microbiology | arr. |
| MICR:5218 | Microscopy for Biomedical Research | arr. |
| MICR:5264 | Directed Study in Microbiology | arr. |

A maximum of 4 s.h. earned in either MICR:4161 Undergraduate Research in Microbiology or MICR:4171 Honors Undergraduate Research in Microbiology may be counted toward the major. However, students earning honors in the major must complete 6 s.h. in MICR:4171 Honors Undergraduate Research in Microbiology; see Honors [p. 1791] in this section of the catalog.

## Scholar Track: Advanced Elective Coursework

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Up to 6 s.h. from these: | 4 |  |
| BIOL:3172 | Evolution | 3 |
| BIOL:3212/IGPI:3212 Bioinformatics for Beginners | 3 |  |

| :--- | :--- | :--- |
| PCOL:3101 | Pharmacology I: A Drug's <br> Fantastic Journey | 3 |
| Additional microbiology and immunology course |  |  |
| (prefix MICR) numbered MICR:3147 or above, |  |  |
| excluding MICR:3164 |  |  |$\quad 3$

## Honors

## Honors in the Major

Students majoring in microbiology (either track) have the opportunity to graduate with honors in the major. They must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33 and a GPA of at least 3.33 in work for the major. To graduate with honors in the microbiology major, students must complete an additional 3 s.h. of coursework in microbiology and immunology beyond that required for the major. This must include 6 s.h. in MICR:4171 Honors Undergraduate Research in Microbiology that introduces them to experimental research. The final semester before graduation, students must complete MICR:3145 Honors in Microbiology Thesis Preparation, and must successfully present written and oral presentations of their research projects.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the microbiology major.

## Career Advancement

Graduates find employment opportunities in government, hospitals, public health laboratories, research laboratories, and industrial laboratories (food, dairy, chemical, pharmaceutical, and biotechnology companies). Those who pursue advanced degrees have more advanced career opportunities in these same areas, with greater responsibilities and higher salaries, as well as in college and university teaching.
The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's

3 Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.
3 Before the third semester begins: BIOL:1411 Foundations of Biology, CHEM:1110 Principles of Chemistry I, CHEM:1120
3 Principles of Chemistry II, and an approved calculus or biostatistics course.

Before the fifth semester begins: BIOL:1412 Diversity of Form and Function, CHEM:2210 Organic Chemistry I, MICR:2157 General Microbiology, and MICR:2158 General Microbiology Laboratory.

Before the seventh semester begins: seven more courses in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: another 10-12 s.h. of coursework.

During the eighth semester: enrollment in all remaining coursework in the major, all remaining required GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

| GE CLAS Core: or elective course | World Languages First Level Proficiency | 4-5 |

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Enrollment in chemistry courses requires completion of a placement exam.
c Fulfills a major requirement and may fulfill a GE requirement.
d Other course options include BIOS:4120, MATH:1550, MATH:1850, STAT:3510; selecting a course that satisfies the Quantitative or Formal Reasoning GE requirement is recommended.
e Enrollment in math courses requires completion of a placement exam.
f Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
g Students must earn a grade of C or higher in BIOL:1411, or in MICR:2157 and MICR:2158, in order to take more advanced Department of Microbiology and Immunology courses.
h GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
i Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
j See the General Catalog for list of approved courses.
k Complete at least 13 s s. . of advanced microbiology and immunology courses (prefix MICR) numbered MICR:3147 or above, excluding MICR:3164; see the General Catalog for list of approved courses.
1 Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

i Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
j Complete at least $14 \mathrm{~s} . \mathrm{h}$. of advanced microbiology and immunology courses (prefix MICR) numbered MICR:3147 or above, excluding MICR:3164; see the General Catalog for list of approved courses.
k See the General Catalog for list of approved courses.
1 Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Microbiology, Minor

## Requirements

The undergraduate minor in microbiology requires a minimum of 15 s.h. in Department of Microbiology and Immunology courses (prefix MICR), including 12 s.h. in courses considered advanced for the minor taken at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.
Courses numbered MICR:3147 Immunology and Human Disease and above are considered advanced for the minor, excluding MICR:3164 Microbiology and Human Health.

Students may count a maximum of 2 s.h. earned in MICR:4161 Undergraduate Research in Microbiology or MICR:4171 Honors Undergraduate Research in Microbiology toward the minor. They also may count MICR:5218 Microscopy for Biomedical Research toward the minor.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Microbiology, Minor

| Course | Title | Hours |
| :---: | :---: | :---: |
| Academic Career |  |  |
| Any Semester |  |  |
| Students must maintain a GPA of at least 2.00 in all courses for the microbiology minor and in all UI courses for the minor. |  |  |
| Coursework in the microbiology minor may not be taken pass/nonpass. |  |  |
|  | Hours | 0 |
| First Year |  |  |
| Fall |  |  |

| Fall |  |
| Minor: advanced microbiology course $(\text { prefix MICR })^{f}$ | 3 |
| $\quad$ Hours | $\mathbf{3}$ |
| $\quad$ Total Hours | $\mathbf{2 5}$ |

a Prerequisite for BIOL:1411, which is a prerequisite for all advanced microbiology courses.
b Enrollment in chemistry courses requires completion of a placement exam.
c Prerequisite for all advanced microbiology courses.
d Prerequisite with a grade of C or higher for most advanced microbiology courses.
e Prerequisite with a grade of C or higher for advanced microbiology laboratory courses.
f Courses numbered MICR:3147 and above are considered advanced for the minor, excluding MICR:3164.

## Microbiology, MS

## Learning Outcomes

Graduates will be able to:

- demonstrate detailed knowledge in their area of specialization;
- master the analytical/methodological and critical thinking skills needed to evaluate and conduct research in their areas of specialization;
- demonstrate their ability to design and conduct original research in their chosen fields of specialization;
- teach college-level courses in their areas of specialization; and
- communicate in both the written and oral form in a clear and effective manner.

## Requirements

The Master of Science program in microbiology requires a minimum of 30 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 2.80 to earn the degree. They are required to earn a minimum of $12 \mathrm{~s} . \mathrm{h}$. in microbiology courses chosen from three of the department's four subdisciplines: bacteriology, eukaryotic pathogens, immunology, and virology. They may substitute a course they have already taken (at the University of Iowa or elsewhere) for a course requirement, with the MS advisory committee's approval.

Additional course requirements depend on students' interests and the advice of the thesis committee. Students must write a thesis based on their own research and defend it satisfactorily in an oral examination. No more than 9 s.h. of credit for thesis research may be counted toward the 30 s.h. required for the degree.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They should have a cumulative grade-point average of at least 3.00 and must have completed courses in biology, chemistry (inorganic and organic), mathematics including calculus, and physics. Those admitted with deficiencies must complete the relevant coursework during their first year of graduate study. Admission is determined through a review and formal vote by the faculty.
Students interested in the MS program in microbiology require a faculty sponsor and approval of the microbiology graduate admission or graduate advisory committee.

## Microbiology, PhD

Graduate study in microbiology is designed to help students become highly qualified in microbiology research and teaching. PhD students develop expertise in research in a specific area of microbiology and/or immunology.

Faculty members have strengths in bacteriology, eukaryotic pathogens, immunology, and virology. Areas of research include bioinformatics, cellular microbiology, molecular virology and immunology, bacterial biochemistry and physiology, bacterial and viral pathogenesis, and molecular parasitology. Working in the laboratory of their PhD advisor, students learn to define and experimentally investigate scientific questions and to conduct original research in preparation for positions in academia, government, and industry.

## Learning Outcomes

Graduates will be able to:

- demonstrate detailed knowledge in their area of specialization;
- master the analytical/methodological and critical thinking skills needed to evaluate and conduct research in their areas of specialization;
- demonstrate their ability to design and conduct original research in their chosen fields of specialization;
- teach college-level courses in their areas of specialization; and
- communicate in both the written and oral form in a clear and effective manner.

## Requirements

The Doctor of Philosophy in microbiology requires a minimum of 72 s.h. of graduate credit, including at least 12 s.h. of graded coursework Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree. Qualified students interested in earning the Doctor of Medicine along with the PhD may apply to the Medical Scientist Training Program [p. 1784], which offers a combined MD/ PhD program.

Students have the opportunity to tailor their curriculum with courses that enhance their educational goals. They take a combination of graduate-level courses that include seminar courses.

The PhD with a major in microbiology requires the following coursework.

## Core Curriculum

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| MICR:6255 | Graduate Experimental |  |
|  | Approaches to Molecular <br> Microbiology | 2 |
| MICR:6265 | Introduction to Grant Writing | 2 |
| MICR:7263 | Graduate Student Research <br> Seminar | 1 |
| BMED:7270 | Scholarly Integrity/Responsible <br> Conduct of Research I | 0 |
| BMED:7271 | Scholarly Integrity/Responsible <br> Conduct of Research II | 0 |

Additional courses offered by the Department of
Microbiology and Immunology and other departments, as appropriate for each student

Students enroll for a minimum of 8 additional s.h., which can be selected from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| MICR:6201/ |  |  |
| IMMU:6201 | Graduate Immunology | 3 |
| MICR:6240 | Graduate Eukaryotic Pathogens <br> and Human Disease | 2 |
| MICR:6247/ | Graduate Immunology and <br> IMMU:6247 <br> MICR:6259 | Graduate Bacteria and Human <br> Disease |
| MICR:6267 | Graduate Viruses and Human <br> Disease | 4 |
| MICR:6268 | Biology and Pathogenesis of <br> Viruses | 3 |
| MICR:6270 | Graduate Microbial Genetics <br> and Physiology | 4 |
| MICR:6310 | Biology of Bacteria and <br> Interactions with the Host | 2 |
| MICR:7265 | Topics in Virology Literature | 3 |

Examples of Elective Coursework

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| BIOL:4386 | Introduction to Scientific | 3 |
|  | Computing for Biologists |  |
| BMED:5207 | Principles of Molecular and | 3 |
|  | Cellular Biology |  |
| MMED:6220/ | Mechanisms of Cellular | 3 |
| ACB:6220/MPB:6220 | Organization |  |

## Additional Requirements

## Laboratory Rotations

Graduate students rotate through two to three different laboratories during their first academic year. The laboratory rotations are approximately ten weeks each. At the conclusion of each rotation, a student meets with the rotation mentor for an exit interview and an evaluation of the student's performance. This evaluation becomes part of the student's departmental record. The student also is required to present the research completed during the rotation in the graduate seminar course.

## Teaching

Graduate students participate in the formal teaching activities of the department for at least two semesters. First-year students as well as students who are within a year of receiving the PhD typically are not asked to teach. Teaching may take a variety of forms, including tutoring, leading discussions and laboratory groups, correcting examinations, preparing teaching materials, and lecturing.

## Comprehensive Examination

The comprehensive examination is designed to measure a student's ability to write and defend a research proposal. The format of this proposal follows guidelines for R21 research proposals outlined by the National Institutes of Health (NIH). Guidance, in the design of these proposals, is provided by the director of graduate studies and the student's comprehensive examination committee.

## Written Examination

During the spring semester of the second year, a student prepares a detailed research proposal. The topic of the research proposal is determined in collaboration with the advisor and the comprehensive examination committee. A detailed guide can be found in the Graduate Program in Microbiology Graduate Student Handbook on the Department of Microbiology and Immunology website.

## Oral Examination

Questions during the oral examination may come from the examination proposal, coursework, or other general areas of microbiology. In order to pass the comprehensive examination, a student must satisfactorily defend the written research proposal and answer questions of general microbiology that are germane to the proposal or that are important for a full understanding of the proposed experiments and their interpretation.

## Final Examination

The PhD thesis committee serves as an advisory body for preparation of the thesis. This committee meets with the student to review the material that is expected to be incorporated in the thesis. Although meetings of the candidate with the committee should be yearly, the candidate, thesis advisor, or the committee can request a meeting at any time. A final draft of the thesis must be given to all members of the committee two weeks before the final examination. The final examination takes the form of a seminar presented to the department. This presentation is announced according to the Graduate College policy. Questions, comments, and discussion will follow. After the seminar, the candidate meets with the committee for the final thesis defense. The PhD is not awarded until the thesis is signed by the committee members and the department chair. In some cases, revisions maybe required.

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in microbiology in a combined degree program offered by the Department of Microbiology and Immunology and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They should have a cumulative grade-point average of at least 3.00 and have completed courses in biology, chemistry (inorganic and organic), mathematics including calculus, and physics. Those admitted with deficiencies in certain areas may be required to complete the relevant course work during their first year of graduate study. Admission is determined through a review, interview, and formal vote of the admission committee.

## Financial Support

Graduate student tuition, benefits, and a stipend are fully supported during PhD training, which typically spans five years.

## Career Advancement

Graduates typically pursue research or teaching positions.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be
discussed with an academic advisor. For additional sample plans, see MyUI.

# Molecular Physiology and Biophysics 

## Chair

- Kevin P. Campbell

## Executive Associate Chair

- W. Scott Moye-Rowley

Faculty: https://medicine.uiowa.edu/physiology/profile
Website: https://medicine.uiowa.edu/physiology/
The Department of Molecular Physiology and Biophysics participates in interdisciplinary graduate programs, including the Medical Scientist Training Program [p. 1784], a combined MD/PhD program offered by the Graduate College and the Carver College of Medicine, and it provides instruction in molecular physiology and biophysics for MD, DDS, and other health professions students. The department also conducts a co-op exchange, a vigorous training program that gives undergraduate students the opportunity to develop as independent researchers in preparation for graduate studies.

The department's principal research areas include cell biology, genetics, endocrinology, neuroscience, and membrane physiology and biophysics. The unifying theme is the understanding of signal transduction mechanisms involved in regulating function at the cellular and molecular levels.

## Research

Faculty research interests in the Department of Molecular Physiology and Biophysics encompass molecular and cellular endocrinology, cellular and developmental neurophysiology, and membrane structure and function. Within these, there are multiple areas of interest, including hormone receptors, reproductive endocrinology, signal transduction, regulation of gene expression, synaptic transmission, neuronal differentiation, membrane ion channels, regulation of excitability, and cardiovascular electrophysiology and regulation. Experimental models currently being investigated include rodents, yeast, Drosophila, and cultured cell lines from a variety of species.

## Programs

## Graduate Programs of Study

## Majors

- Master of Science in Molecular Physiology and Biophysics
- Doctor of Philosophy in Molecular Physiology and Biophysics

Students interested in doctoral studies in molecular physiology and biophysics should apply under the umbrella program in Biomedical Science [p. 1603] (select molecular physiology and biophysics subprogram). Direct applications to the MS and PhD in molecular physiology and biophysics are not currently being considered.

## Facilities

Two floors of the Bowen Science Building are devoted to research and teaching in the Department of Molecular Physiology and Biophysics. Department faculty members also occupy laboratory facilities in the Medical Education Research Facility, Pappajohn Biomedical Discovery Building, and the Carver Biomedical Research Building. In addition to specialized equipment in faculty research laboratories, the department provides equipment for fluorescence microscopy, isotope analysis, cell culture, and molecular biology. It also has access to the
university network and the multimedia education facilities. Additional resources are available at the Hardin Library for the Health Sciences.

## Courses <br> Molecular Physiology and Biophysics Courses

MPB:4199 Research, Independent Study arr.
Recommendations: closed to molecular physiology and biophysics graduate students.
MPB:5153 Graduate Physiology 4 s.h.
Principles of human physiology, organ systems, cell function. Offered fall semesters. Requirements: grades of C- or higher in BIOL:1411 and CHEM:2210 and CHEM:2220, and graduate standing.
MPB:5200 Medical Physiology Online 5 s.h.
Fundamental principles of cellular membranes, muscle, sensory organs, motor neurological systems, autonomic nervous systems, cardiovascular, pulmonary, renal, gastrointestinal, endocrine, and reproductive systems; interdependence of organ systems to maintain a normal physiological state using clinical correlates as applied to humans; basic physiological principles that establish a solid foundation for future pathophysiological and pharmacological concepts. Recommendations: medical, dental, physician assistant, nurse anesthesia, physical therapy, or graduate standing.
MPB:5201 Advanced Physiology Online 3 s.h.
Examination of cellular and organ systems of medical physiology; fundamental principles of cellular membranes including muscle, sensory organs, motor neurological systems, autonomic nervous system, cardiovascular, pulmonary, renal, gastrointestinal, endocrine, and reproductive physiology; emphasis on interdependence of organ systems to maintain a normal physiological state (homeostasis) using clinical correlates as applied to humans; basic physiological principles that establish a solid foundation for future pathophysiological and pharmacological concepts.
MPB:5241 Neuromuscular Diseases: Case-Based Seminar 1 s.h.
MPB:6220 Mechanisms of Cellular Organization
3 s.h.
Current understanding of basic cell biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BMB:3130. Same as ACB:6220, MMED:6220.

MPB:6226 Cell Cycle Control

1 s.h.

Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Same as ACB:6226, MMED:6226.
MPB:6227 Cell Fate Decisions
1 s.h.
Cellular fate decisions including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Same as ACB:6227, MMED:6227.

MPB:6265 Neuroscience Seminar
0-1 s.h.
Research presentations. Same as ACB:6265, BIOL:6265, NSCI:6265, PSY:6265.
MPB:6302 Research Physiology and Biophysics
arr.
Requirements: molecular physiology and biophysics graduate standing.

MPB:7402 Thesis arr.
Requirements: molecular physiology and biophysics PhD candidacy.

MPB:8115 Human Physiology for Dental Students 4 s.h.
Principles of human physiology, organ systems, cell function. Offered fall semesters. Requirements: grades of C- or higher in BIOL:1411,
CHEM:2210, and CHEM:2220; and DDS enrollment.

## Neurology

## Chair

- George B. Richerson

Faculty: https://medicine.uiowa.edu/neurology/profile
Website: https://medicine.uiowa.edu/neurology/
Neurology is the branch of medical science concerned with diagnosis and management of disorders of the brain, spinal cord, peripheral nervous system, and muscle.

The Department of Neurology's hallmark is its history of carefully integrating patient care, scientific investigation, and the education of medical, postdoctoral, and graduate students. The department also offers research opportunities in various fields of neuroscience including neuropsychology, neuroimaging, and neuroanatomy to PhD students in neuroscience and psychology.

## Research

The faculty's investigative interests center on cognitive neuroscience, degenerative diseases, cerebrovascular disease, neurogenetics, neuromuscular diseases, electrophysiological correlates of central and peripheral nervous system disease, growth factors in the nervous system, control and regulation of autonomic functions, neuroophthalmology, movement disorders, epilepsy, and pain management. For more information see the Department of Neurology website.
The new Iowa Center for Neurodegeneration, housed in the Department of Neurology and affiliated with the Iowa Neuroscience Institute, will concentrate on combating neurodegenerative diseases such as Alzheimer's disease, Parkinson's disease, dementia, and amyotrophic lateral sclerosis (ALS).

## MD Training

The department provides clinical and clinical research training to second-, third-, and fourth-year MD students.

## Residency

The Department of Neurology offers an active, four-year approved residency program that qualifies physician trainees for board certification in neurology. Experience in clinical electrophysiology, pediatric neurology, psychiatry, and neuropathology is part of this training.

## Courses

## Neurology Courses

NEUR:5365 Seminar: Neuropsychology and Neuroscience arr. Clinical neuropsychology and cognitive neuroscience: cuttingedge research from scientific journals, case presentations in clinical neuropsychology, and current research. Same as NSCI:5365, PSY:5365.

NEUR:7235 Neurobiology of Disease
Broad, thematic understanding of disease mechanisms in neurobiological disorders. Prerequisites: ACB:6252. Same as NSCI:7235.

## NEUR:8301 Clinical Neurology

Experience in clinical neurology through ward work and casebased conferences linked to required reading; focus on neurologic examination, diagnosis of neurologic problems.

NEUR:8401 Advanced Inpatient Neurology
2,4 s.h.
Experience and management of patients with seizure disorders, headache, cerebrovascular diseases; conferences, clinical rounds; two weeks on each inpatient service for a total of four weeks. Prerequisites: NEUR:8301.
NEUR:8402 Advanced Outpatient Neurology 2,4 s.h.
Experience in evaluation, management of patients with various neurologic diseases; four weeks in clinic patient care. Prerequisites: NEUR:8301.
NEUR:8404 Advanced Inpatient Subinternship in Neurology 4 s.h. Care of patients with acute and serious neurological diseases, management of patients with varied cerebrovascular diseases; treatment of acute brain disease, comorbid medical diseases, medical and neurological complications that occur among patients with stroke; clinical assessments of patients, writing orders and clinical notes, contribution to rounds; close communication with patients, families, and colleagues; assignment to evening calls for emergency visits and consultations.
NEUR:8497 Research in Neurology arr. Medical research, clinical or laboratory projects; individual study.
NEUR:8498 Neurology On Campus
NEUR:8499 Neurology Off Campus

## Neuroscience and

Pharmacology

## Chair

- Edwin "Ted" G. Abel

Faculty: https://medicine.uiowa.edu/neuroscience-and-pharmacology/ people
Website: https://medicine.uiowa.edu/neuroscience-andpharmacology/

The Department of Neuroscience and Pharmacology provides professional training for health science students and participates with other departments in educational and research activities such as the Medical Scientist Training Program [p. 1784], the Physician Scientist Training Pathway, the Molecular Medicine Program [p. 1672], the Neuroscience Program [p. 1674], the Holden Comprehensive Cancer Center, the Abboud Cardiovascular Research Center, the UI Fraternal Order of Eagles Diabetes Research Center, and the Iowa Neuroscience Institute.

The department was a pioneer in offering pharmacology to undergraduate students with little or no science background. Currently, undergraduates can enroll in PCOL:2220 Drug Use and Abuse. This course emphasizes the mechanisms of drug action and give students a background for rational decisions concerning use of drugs.

Department of Neuroscience and Pharmacology graduate study includes both didactic and research experience. Students interested in doctoral studies should apply under the umbrella program in Biomedical Science [p. 1603] (pharmacology subprogram). Qualified students may pursue the combined $\mathrm{MD} / \mathrm{PhD}$ in the university's Medical Scientist Training Program.
Pre- and postdoctoral students pursue research training in all areas of neuroscience and pharmacology in the department in preparation for career opportunities in academia, government, and industry.

## Programs

## Graduate Programs of Study

## Majors

- Master of Science in Pharmacology
- Doctor of Philosophy in Pharmacology

Students interested in doctoral studies in pharmacology should apply under the umbrella program in Biomedical Science [p. 1603] (select pharmacology subprogram). Direct applications to the MS and PhD in pharmacology are not currently being considered.

## Courses

## Neuroscience and Pharmacology Courses

## PCOL:2220 Drug Use and Abuse <br> 3 s.h.

Effects of common drugs on the body and how they occur; consumer education in easy-to-understand language; basic principles of pharmacology and toxicology; drugs that work on specific systems including antibiotics, oral contraceptives, sedatives, stimulants, hallucinogens, narcotics, steroids, diabetes drugs, and cancer drugs; for students with little to no science background. Offered spring semesters. GE: Natural Sciences without Lab.

PCOL:3101 Pharmacology I: A Drug's Fantastic Journey
3 s.h. Introduction to basic pharmacological principles by following a drug's journey from its site of administration to its site of elimination; common mechanisms by which drugs affect the body and mechanisms underlying drug actions on two primary body systems-nervous and cardiovascular; structured learning environment bolstered by highly interactive application sessions where students apply course material via collaborative work on problem sets/activities; for students interested in medicine, pharmacy, research, and industry. Offered fall semesters. Prerequisites: (CBE:3205 or BIOL:1411) and CHEM:1110. Recommendations: additional higher-level biology and chemistry courses helpful.
PCOL:3102 Pharmacology II: Mechanisms of Drug Action 3 s.h. Expansion of basic pharmacological concepts and further exploration of how they are applied to define a drug's actions on the body; students continue their exploration of the body by discussing various disorders including neuropsychiatric and immune disorders, cancer, diabetes, and microbial infections in conjunction with current treatments; structured learning environment bolstered by highly interactive discussion sessions where students learn to apply course material via collaborative work on problem sets/activities; for students interested in medicine, pharmacy, research, and industry. Offered spring semesters. Prerequisites: PCOL:3101. Recommendations: additional higher-level courses in biology and chemistry helpful.
PCOL:4130 Drug Mechanisms and Actions
Pharmacology of major drugs in use today; basic principles underlying drug action and disposition; physiology, biochemistry, and pathophysiology of specific organ systems; how various drugs impact these systems and how they treat disorders of each system; major adverse effects of drugs and how those occur; differences among drugs within each drug group. Offered spring semesters. Requirements: undergraduate biochemistry and physiology courses.

## PCOL:4199 Undergraduate Research in Neuroscience and Pharmacology

arr.
Experimental research under faculty supervision in department laboratories.

PCOL:5130 Fundamentals of Pharmacology 3 s.h.
Basic pharmacological principles underlying drug absorption, distribution, and metabolism; how these processes determine drug dosing; drug receptor interactions and their quantitation; impact of genetic variation on the actions and metabolism of drugs; mechanisms of neurotransmission focusing on synthesis, release, actions, and degradation; central nervous system (CNS) pathways for major neurotransmitters; disease states involving various abnormal neurotransmitter function. Offered spring semesters.

PCOL:5135 Principles of Pharmacology 1 s.h. Basic pharmacological principles underlying drug absorption, drug distribution throughout the body, drug metabolism, and drug elimination; how these processes determine drug dosing and the means by which dosing parameters are characterized; drug receptor interactions and their quantitation. Offered spring semesters.
PCOL:5136 Pharmacogenetics and Pharmacogenomics 1 s.h. Impact of genetic variation on the actions and metabolism of drugs; database search techniques to identify variants. Offered spring semesters. Recommendations: PCOL:5135, and undergraduate or graduate biochemistry and/or genetics.

PCOL:5137 Neurotransmitters
1 s.h.
Mechanisms of neurotransmission focusing on mechanisms of synthesis, regulation of release, mechanisms of action, means of degradation, and CNS pathways for major neurotransmitters; disease states involving various neurotransmitter systems. Offered spring semesters.

PCOL:5204 Basic Biostatistics and Experimental Design 1 s.h.
Overview of theory of experimental design and data analysis in biological sciences; types of analyses available for common types of data generated in biomedical sciences; review of statistical methods used in published studies; cursory coverage of mathematical computations involved in various analytical tests. Offered fall semesters.

PCOL:6015 Topics in Pharmacology and Neuroscience
Recent advances in pharmacology, neuropharmacology, developmental neurobiology, neuroendocrinology, and related neurosciences.
PCOL:6080 Pharmacology Seminar 1 s.h.
PCOL:6090 Graduate Research in Pharmacology arr.
PCOL:6099 Special Topics in Pharmacology arr.
PCOL:6203 Pharmacology for Graduate Students 5 s.h.
Pharmacology of all major drugs in use today; discussion of basic principles underlying drug actions and disposition; physiology, biochemistry, and pathophysiology of specific organ systems; how various drugs impact these systems; how drugs are used to treat disorders of each system; major adverse effects of drugs and how those occur; differences among drugs within each drug group. Offered fall semesters. Prerequisites: BMED:5207 and MPB:5153.

## PCOL:6204 Pharmacology for Health Sciences: Nurse

## Anesthetist

5 s.h.
Pharmacology of all major drugs in use today; discussion of basic principles underlying drug actions and disposition; physiology, biochemistry, and pathophysiology of specific organ systems; how various drugs impact these systems; how drugs are used to treat disorders of each system; major adverse effects of drugs and how those occur; differences among drugs within each drug group. Offered fall semesters. Prerequisites: MPB:5200 and NURS:6000. Requirements: enrollment in Anesthesia Nursing Program.

## PCOL:6207 Ion Channel Pharmacology

1 s.h.
Heuristic, semiquantitative approach to concepts in ion channel physiology and pharmacology; up-to-date physical principles, classification, and structure/function relationships for major voltagegated ion channels that facilitate application of abstract concepts to physiological, pharmacological, and general biological problems. Offered spring semesters.
PCOL:6210 Receptors and Cell Signaling 3 s.h.
Mechanisms of signaling by growth factors, cytokines and related molecules; principles of ion channel physiology and pharmacology; structure-function relationships of small molecular weight and heteromeric G proteins; G protein-coupled receptors; genomic and nongenomic actions of intracellular receptors; basis for actions of novel new ligands on intracellular receptors. Offered spring semesters.
PCOL:6225 Growth Factor Receptor Signaling 1 s.h.
Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling and relevance of these signaling processes to various human diseases. Offered fall semesters.

## PCOL:6250 Advanced Problem Solving in Pharmacological

 Sciences1 s.h.
Discussion of methodologies, strategies, and approaches commonly used to solve pharmacological sciences problems; use of interpersonal problem-solving skills to develop experimental study plans for solving contemporary scientific problems in pharmacology. Offered fall and spring semesters.

## Neurosurgery

## Chair

- Matthew A. Howard

Faculty: https://medicine.uiowa.edu/neurosurgery/profile/
Website: https://medicine.uiowa.edu/neurosurgery/
The Department of Neurosurgery provides an experience oriented toward patient care and basic research concerning diseases and physiology of the nervous system. Students develop awareness of neurosurgery's role in treating head and spine trauma, vascular disorders, brain and spinal cord tumors, pain and peripheral nerve abnormalities, degenerative spine pathology, and surgical treatment of epilepsy and movement disorders.

Clinical courses are designed around patient-centered discussions interwoven with operating room experiences. Lectures and conferences are scheduled on specific topics.

## Faculty

Neurosurgery faculty strengths are centered in physiology of spinal cord trauma, epilepsy, auditory brain function and pain, primary brain tumor genetics, central nervous system tissue culture, spinal column biomechanics, and movement disorders. The department has expertise in clinical management across the spectrum of central nervous system diseases.

## MD Training

The department provides third- and fourth-year MD students with access to special expertise in selected topics of investigation regarding the central nervous system and to a clinical course through special arrangements with the faculty.

## Facilities

Multiple, fully equipped laboratory space is available to support scientific research of the central nervous system. Faculty and technical assistance is available in all laboratories.

## Courses

Neurosurgery courses are open only to MD and qualified associated health sciences students.

## Neurosurgery Courses

NSG:8401 Subinternship in Neurosurgery 4 s.h.
Advanced clinical clerkship in neurological surgery; emphasis on diagnosis and operative management of surgical neurological disease.

NSG:8497 Research in Neurological Surgery arr.
Laboratory investigation of spinal cord injury, spinal column
biomechanics and instrumentation, electrophysiology of pain, epilepsy and hearing, molecular genetics and physiology of brain tumors.

NSG:8498 Neurosurgery On Campus arr.
Clinical clerkship; individually arranged by student with departmental approval.

# Nuclear Medicine Technology 

## Director

- Jay J. Smith

## Director, Medical

- Yusuf Menda

## Director, Technical

- Daniel Petersen

Undergraduate major: nuclear medicine technology (BS)
Website: https://medicine.uiowa.edu/radsci/programs/nuclear-medicine-technology

Nuclear medicine technologists are professionals in a medical specialty that uses radioactive tracers for diagnostic, therapeutic, and research purposes. Technologists generally are employed in hospitals and clinics. They work hand in hand with nuclear medicine physicians, health physicists, radiopharmacists, and radiochemists as an integral part of a highly trained specialty team.

In addition to using sophisticated detectors and computers to trace the movement and localization of radioactive tracers in the human body, nuclear medicine technologists have responsibilities that include radiation safety, quality control testing, radiopharmaceutical preparation and administration, and general patient care.

The Nuclear Medicine Technology Program is fully accredited by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT). Nuclear medicine technology is one of two undergraduate majors in the field of medical imaging offered by the Carver College of Medicine; see Radiation Sciences [p. 1846] in the catalog.
The Carver College of Medicine is located on the University of Iowa health sciences campus, which includes University of Iowa Hospitals \& Clinics, one of the nation's largest university-owned teaching hospitals. For information about the college's academic programs and resources, see Carver College of Medicine [p. 1729] in the catalog.

## Programs

Undergraduate Program of Study
Major

- Major in Nuclear Medicine Technology (Bachelor of Science) [p. 1806]

## Courses

## Nuclear Medicine Technology Courses

RSNM:3120 Fundamentals of Nuclear Medicine and PET 3 s.h. Introduction to medical specialty of nuclear medicine and molecular imaging; basic theories of radiation protection, radiation physics and nuclear medicine instrumentation, radiopharmacy, nuclear medicine and positron emission tomography (PET) clinical procedures, professional standards of nuclear medicine technologist. Requirements: Nuclear Medicine Technology Program enrollment.

## RSNM:3121 Nuclear Medicine Technology Clinical Internship

 I3 s.h.
Hands-on clinical experience working with patients and performing routine nuclear medicine diagnostic imaging procedures under direct supervision of qualified clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3131 Radiopharmaceuticals
3 s.h.
Introduction to radiopharmaceuticals; emphasis on physical, chemical, and biologic properties and their clinical use; fundamental aspects of radiopharmaceuticals including characteristics, preparation, quality control, and clinical use. Requirements: Nuclear Medicine Technology Program enrollment.
RSNM:3220 Nuclear Medicine and PET Clinical Procedures 3 s.h. Proper execution of nuclear medicine and PET procedures from a technical point of view; published protocols and procedures specific to University of Iowa Hospitals \& Clinics; routine set up, common errors, artifact identification, computer processing protocols, and patient care concerns identified for each procedure; review of human anatomy, physiology, and pathology germane to understanding and proper execution of nuclear medicine procedures. Requirements: Nuclear Medicine Technology Program enrollment.

## RSNM:3221 Nuclear Medicine Technology Clinical Internship II

Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.
RSNM:3231 Nuclear Medicine Instrumentation 3 s.h. Instruments used in medical imaging to generate and detect ionizing radiation (i.e., SPECT/CT and PET/CT scanners, dose calibrators, well counters, survey meters); focus on instrument quality control testing. Requirements: Nuclear Medicine Technology Program enrollment.

## RSNM:3321 Nuclear Medicine Technology Clinical Internship

 III6 s.h.
Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.

## RSNM:4121 Nuclear Medicine Technology Clinical Internship IV

Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.

## RSNM:4221 Nuclear Medicine Technology Clinical Internship

 VProgressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.
RSNM:4222 Nuclear Medicine Technology Capstone and Certification Exam Preparation

6 s.h.
Students in final semester of program work together to organize and deliver capstone and certification exam preparation course; review of specific topics and oral presentations by each student; preparation and distribution of detailed written outlines of exam content; series of content-specific quizzes, midterm, and final "Mock Board" exam to evaluate student learning and preparedness for taking the NMTCB and ARRT national certification exams; preparation and submission of capstone portfolios that provide evidence of scholarly and professional progress. Requirements: Nuclear Medicine Technology Program enrollment.

# Nuclear Medicine Technology, BS 

Undergraduate study in nuclear medicine technology is guided by the academic rules and procedures outlined under Undergraduate Rules and Procedures [ $p .1730$ ] in the Carver College of Medicine section of the catalog.

## Requirements

The Bachelor of Science with a major in nuclear medicine technology requires a minimum of $120 \mathrm{~s} . \mathrm{h}$. of credit. Work for the degree includes a set of courses that are prerequisite to entering the major, 61 s.h. of coursework in the major, and elective coursework sufficient to complete the minimum of 120 s.h. required for graduation. Students must maintain a cumulative grade-point average (GPA) of at least 2.00 and a grade of C or higher in each course required for the major (61 s.h.).

Students who plan to complete all requirements for the degree at the University of Iowa enter the university as students in the College of Liberal Arts and Sciences (CLAS) with a nuclear medicine technology interest. As CLAS students, they complete the coursework that is prerequisite to entering the major.

Admission to the major is competitive; the program accepts a maximum of eight students per year. Students must apply to the major by Jan. 15 of the year in which they wish to enter the program. Personal interviews with qualified applicants are scheduled in February, and the class is selected by March 15. The program begins the following fall semester and lasts two years.
Applicants for admission to the University of Iowa whose first language is not English are strongly encouraged to complete the University of Iowa English Proficiency Evaluation and satisfy the university's English Proficiency Requirements before they apply to a professional program. Students must have permission to register for a full academic load before they may be admitted to the Nuclear Medicine Technology Program.
The nuclear medicine technology major requires students to complete a minimum of two years of a high school world language, or collegelevel coursework deemed by the university as equivalent, prior to admission.
Students who are admitted to the major become Carver College of Medicine students. Upon completing the program successfully, they are granted a Bachelor of Science degree. Graduates are eligible to apply for the nuclear medicine technology national certification examinations.
The program strongly advises students entering the university to pursue a course of study that is applicable to another major, most commonly biochemistry, biology, chemistry, or microbiology, so that if they are not admitted to the Nuclear Medicine Technology Program, they still may complete a major and receive a bachelor's degree.
The Bachelor of Science with a major in nuclear medicine technology requires the following work.

## Prerequisites to the Nuclear Medicine Technology Major

Students must complete the following prerequisite courses and must have earned 60 s.h. of college credit with a cumulative GPA of at least 2.50 before they may enter the nuclear medicine technology major. In addition to providing a foundation for the major, the prerequisite courses are good preparation for other majors.

## Rhetoric

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| RHET:1030 | Rhetoric | $4-5$ |

## Culture, Society, and the Arts

See GE CLAS Core [p. 19] (College of Liberal Arts and Sciences) in the catalog for approved courses in the culture, society, and the arts areas.

Students complete two courses for 3 s.h. each in two of these areas (total of 6 s.h.).

- Diversity and Inclusion approved coursework.
- Historical Perspectives approved coursework.
- International and Global Issues approved coursework.
- Literary, Visual, and Performing Arts approved coursework.
- Values and Culture approved coursework.

## Mathematics

| RSP:4110 | Research Methodology for Radiation Sciences | 3 |
| Total Hours |  | 61 |
| Career Advancement |  |  |

The Nuclear Medicine Technology Program has a stellar record of job placement. Graduates typically work as nuclear medicine technologists, beginning as entry-level staff at hospitals or clinics. With experience, many earn advanced degrees in areas such as radiation biology, health physics, or medicine. Some work in the private sector as sales or marketing specialists in nuclear medicine.
Graduates also find career opportunities in education as instructors, coordinators, or program directors; and in administration, industry, or research and development. Those pursuing government-related jobs might find positions as regulatory agency inspectors or radiation safety officers. See the Occupational Outlook Handbook for nuclear medicine technologists on the United States Department of Labor Bureau of Labor Statistics website for career information and outlook.
The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Students must earn a grade of C or higher in each course required for the major.
The following coursework is required.

## Academic Plans <br> Sample Plan of Study

Sample plans represent one way to complete a program of study Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a The Academic Advising Center advises Nuclear Medicine Technology Interest students on prerequisite course planning. Students are advised for success, based on academic strength, not necessarily for a four year plan. Prerequisites may take more than two years to complete.
b One of these courses is strongly recommended to prepare for the anatomy and physiology courses.
c This course is recommended not required.
d Students must complete 6 s.h. by taking 3 s.h. courses from two of the following areas: Diversity and Inclusion, Historical Perspectives, International and Global Issues, Literary, Visual, and Performing Arts, or Values and Culture.
e Please see the Radiation Sciences Programs' website and your academic advisor for detailed application instructions and deadlines.
f Choose from HHP:3115, HHP: 1100 and HHP:1110, ACB:3110 and HHP:1110.
g Enrollment in math courses requires completion of a placement exam.
h Enrollment in chemistry courses requires completion of a placement exam.
i Choose from HHP:3550, HHP:1300 and HHP:1310, HHP:3500 and HHP:1310.
j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Obstetrics and Gynecology 

## Interim Chair

- Brad VanVoorhis

## Professional degree: MM

Faculty: https://medicine.uiowa.edu/obgyn/profile/? appointment=PRIMARY\&category=\&query=\&page= $=1 \& s i z e=10$

Website: https://medicine.uiowa.edu/obgyn/
Faculty in the Department of Obstetrics and Gynecology contribute to a wide spectrum of educational programs. A six-week core clerkship is taken by all Carver College of Medicine medical students. Subinternships are offered in high risk obstetrics (maternal fetal medicine) and gynecologic oncology. Advanced electives are offered in reproductive endocrinology and infertility, family planning, night float, and urogynecology. Approximately 12 physician assistant (PA) students also complete a one month rotation within the department as part of their training.
The Accreditation Council for Graduate Medical Education (ACGME) accredited fellowship programs are urogyn (urogynecology), gynecologic oncology, maternal fetal medicine (high risk obstetrics), and reproductive endocrinology and infertility.

## MD Training

Courses supported by the Department of Obstetrics and Gynecology are designed to give medical students a comprehensive survey of female reproductive medicine. This is accomplished through a variety of didactic lectures, outpatient clinical assignments, inpatient experiences, and surgery.

The clerkship OBG:8301 Clinical Obstetrics and Gynecology supports students in developing the core knowledge, skills, and attitudes needed to provide basic obstetric, gynecology, and/or primary health care to female patients.

The department offers medical students a variety of advanced electives that provide training in specialty areas of obstetrics and gynecology.

## Residency

The department also offers a four-year obstetrics and gynecology residency. Upon completion, graduates are eligible to register and take the written and oral examinations leading to certification by the American Board of Obstetrics and Gynecology.

Residents are assigned to the various subspecialty divisions and clinical services of the department. They care for hospital inpatients and outpatients with training in normal and abnormal obstetrics, gynecologic surgery, office gynecology, ultrasound, reproductive endocrinology, gynecologic oncology, urogynecology, and family planning, as well as a variety of minimally invasive and endoscopic procedures.

Courses

## Obstetrics and Gynecology Courses

OBG:8301 Clinical Obstetrics and Gynecology
Proficiency in evaluation and management of core women's health care relating to reproductive tract; history taking, physical examination, laboratory and imaging assessment of obstetric and/ or gynecological patients; application of current concepts to well women's health care and to management of diseases and pathologies; outpatient and inpatient obstetrics and gynecology; family planning, screening, and early detection of cancer and other diseases.
OBG:8401 Advanced Inpatient Subinternship in High Risk Antepartum Obstetrics
Experience in evaluating new patients in a high-risk obstetric clinic; continuing antepartum care; ordering diagnostic studies and following the course of complicated patients admitted to obstetric ward; assisting in diagnostic and therapeutic procedures (e.g., fetal heart rate testing, amniocentesis, ultrasonography, intrauterine fetal transfusion).
OBG:8402 Advanced Inpatient Subinternship in Gynecologic Oncology
arr.
Experience on a gynecologic oncology service, including operating room, inpatient and outpatient care; team management approach to gynecologic cancer patients, treatment and follow-up of invasive gynecologic malignancies, etiology and risk factors for gynecologic neoplasias, pre- and postoperative evaluation and treatment of surgical management of gynecologic neoplasis.

## OBG:8403 Reproductive Endocrinology

 arr. Experience evaluating new and returning patients in the Reproductive Endocrinology and Infertility Clinic; participation in preoperative, operative, and inpatient postoperative care; advanced gynecologic ultrasonography and in vitro fertilization services.OBG:8405 Urogynecology Advanced Elective
Experience as active member of urogynecology clinical team, participating in clinical care activities including outpatient clinic, outpatient procedures, inpatient surgery, hospital care; presentation to team on topic chosen by student.
OBG:8407 Family Planning
4 s.h.
Experience with family planning clinical activities at several different local sites, including outpatient procedures. Requirements: MD enrollment.

OBG:8409 Obstetrics and Gynecology Night Float
Four week rotation; students are paired with a night resident with primary responsibility for inpatients on gynecology services; when not actively engaged, students participate in resident team work on labor/delivery/recovery (LDR), gaining obstetrics (OB) procedural competency as well as assisting with management of inpatients and consultations as delegated by night chief and/or staff call physician; students and night resident generally perform initial assessment of emergency department or inpatient consults/admissions under immediate supervision of the fellow and/or faculty; students carry out plans discussed at evening sign-out for inpatient gynecology services. Requirements: MD enrollment.

OBG:8410 Translational Science in Reproductive Health 4 s.h. Exposure to and education in basic and applied translational research in reproductive sciences, obstetrics, gynecology, and developmental biology/perinatal programming; direct involvement with Department of Obstetrics and Gynecology ongoing research efforts. Requirements: MD enrollment.

OBG:8450 Continuity of Care in Outpatient Obstetrics and
Gynecology
Experience with gynecologist in longitudinal clinical experience
for the academic year; students paired with faculty member to see patients in weekly clinic and provide clinical care to defined patient population.

OBG:8451 Obstetrics and Gynecology Scientific Writing 4 s.h.
Advanced medical students gain experience with the process
of scientific publication; manuscript preparation, scientific communication, editorial duties, and publication process through the lens of journal editor and manuscript author. Requirements: MD enrollment.

OBG:8497 Research in Obstetrics and Gynecology arr.
Medical research, clinical or laboratory projects; individual study.
OBG:8498 Obstetrics and Gynecology On Campus arr.
OBG:8499 Obstetrics and Gynecology Off Campus arr.

## Master of Midwifery, MM

The Master of Midwifery (MM) program of study is under development. More information is forthcoming.

# Ophthalmology and Visual Sciences 

## Chair

- Keith D. Carter

Professional certificate: orthoptics
Faculty: https://medicine.uiowa.edu/eye/people/
Website: https://medicine.uiowa.edu/eye/
Ophthalmology is a medical and surgical specialty concerned with the diagnosis and treatment of diseases of the eye and its surrounding structures. The Department of Ophthalmology and Visual Sciences combines postgraduate training with research and patient care in all aspects of the visual sciences. Subspecialties represented in the department include cataract surgery, comprehensive ophthalmology, cornea and external diseases, contact lens and refraction services, genetics and molecular biology, glaucoma, laser refractive surgery, neuro-ophthalmology, oculoplastic surgery, ocular echography, ocular pathology, ocular vascular diseases, optometric services, pediatric ophthalmology and adult strabismus, vitreoretinal disorders, and vision rehabilitation.

## Continuing Education

The department sponsors clinical conferences open to community ophthalmologists in Iowa and surrounding states where physicians can earn continuing medical education credits. The department also sponsors an annual alumni meeting with participation by nationally and internationally recognized ophthalmologists and vision scientists.

## Programs

## Professional Program of Study

## Certificate

- Certificate in Orthoptics [p. 1814]

## MD Training

## MD Student Training, Graduate

## Education

The department offers clinical and research training to MD students. A three-year residency program with clinical experience in the ophthalmic subspecialties is offered to physician trainees. Graduates qualify for the written and oral examinations leading to certification by the American Board of Ophthalmology. Postgraduate fellowships of one to two years are available for qualified ophthalmologists in most subspecialty areas.

## Facilities

The department maintains research laboratories for cell biology, biochemistry, morphology, tumor diagnosis, pathology, electrophysiology, pupillography, molecular biology, and vascular disease. Clinical facilities in ophthalmology are available at University of Iowa Hospitals \& Clinics in the Pomerantz Family Pavilion, the University of Iowa Stead Family Children's Hospital in the Pediatric Specialty Clinic, the Iowa River Landing, the VA Iowa City Health Care, and the VA Central Iowa Health Care in Des Moines. The department also manages outreach programs in other communities. The John and Marcia Carver Nonprofit Genetic Testing Laboratory,
dedicated to providing affordable testing for rare eye diseases, is associated with the department.

## Courses

## Ophthalmology and Visual Sciences Courses

OPHT:8008 Corneal Medical Student Research Fellowship 0 s.h. One-year, full-time membership in established research laboratory in the Department of Ophthalmology or collaborating laboratory. Requirements: MD enrollment.

OPHT:8301 Clinical Ophthalmology
2 s.h.
All aspects of clinical ophthalmology; clinical experience, lectures, case presentations; clinical duties with staff, residents, and faculty in University of Iowa Hospitals \& Clinics and VA Iowa City Health Care ophthalmology clinics. Requirements: MD enrollment.
OPHT:8401 Cornea and Anterior Segment of the Eye 4 s.h. Common diseases of eyelid, conjunctiva, and cornea.
OPHT:8402 Elective in Neuro-Ophthalmology 4 s.h.
Visual, ocular motor dysfunction due to neurologic disease; patient work-up, readings, neuro-ophthalmology rounds.
OPHT:8403 Molecular Ophthalmology 4 s.h.
Use of recombinant DNA, tissue culture, protein electrophoresis in study of inherited eye diseases.
OPHT:8404 Elective in Ocular Pathology 4 s.h.
Pathophysiology of eye disease.
OPHT:8405 Advanced Ophthalmology - Veterans Affairs 4 s.h.
Opportunity for in-depth clinical experience in assessment and management of ophthalmology patients; students serve on the VA Iowa City Health Care ophthalmology team and see outpatients and emergency room visits alongside residents and faculty.
OPHT:8406 Plastic and Reconstructive Surgery
4 s.h.
Topics in ophthalmic plastic and reconstructive surgery.
OPHT:8497 Research in Ophthalmology arr.
Medical research, clinical or laboratory projects; individual study.
OPHT:8498 Ophthalmology On Campus
arr.
OPHT:8499 Ophthalmology Off Campus
arr.

## Orthoptics, Professional <br> Certificate

## Requirements

The professional Certificate in Orthoptics is a postgraduate certificate program. The orthoptic fellowship is offered by the Department of Ophthalmology and Visual Sciences. A prerequisite baccalaureate degree is required for application.
Orthoptics is an allied health profession and clinical science pertaining to the study of eye movements, visual function, and binocular cooperation. An orthoptist is an eye muscle specialist who works under the supervision of an ophthalmologist.

The majority of the 24 -month training period is spent in a clinical setting. At the completion of the training period, candidates take written and practical board examinations administered by the American Orthoptic Council.

The first four to six weeks are spent reviewing general anatomy and physiology, and learning the basic anatomy, physiology, and terminology of the eye. Students are introduced to patient examination initially by observation of physicians and orthoptists, and gradually build up their exam skills as each new technique is learned. Over the first six months, optics and principles of strabismus (eye misalignment) and amblyopia (lazy eye) are taught in depth.

In the second six months of training, students expand their knowledge of basic orthoptic and ophthalmologic principles and apply them to a more complete patient examination and diagnostic skills.
The remaining months are spent examining patients in clinic, mastering examination techniques, and differential diagnosis as well as becoming proficient in the interpretation of diagnostic tests. At this stage, orthoptic students participate in the prescription of specific types of nonsurgical therapy. Each week, time is reserved for ophthalmic and orthoptic lectures, personal study time, or testing.

Contact the Department of Ophthalmology and Visual Sciences for information about the Certificate in Orthoptics.

# Orthopedics and Rehabilitation 

## Chair

- J. Lawrence Marsh

Graduate degree: MS in athletic training
Faculty: https://medicine.uiowa.edu/orthopedics/leadership
Website: https://medicine.uiowa.edu/orthopedics/
The Department of Orthopedics and Rehabilitation offers a Master of Science degree in athletic training as well as a training program for residents. The department offers multiple education programs that include medical student education, orthopedic resident education, postgraduate education, and graduate athletic trainer education.

## Programs

## Graduate Program of Study

## Major

- Master of Science in Athletic Training [p. 1819]

## Residency

The department offers a five-year integrated clinical program for postgraduate trainees, in which interns and residents participate simultaneously in inpatient and outpatient care, surgery, and sciences related to the neuromusculoskeletal system.

Trainees enter this program directly from medical school through the National Residency Matching Program.

During the first year, trainees gain experience not only in clinical orthopedics but also in surgical specialties, intensive care, radiology, and surgical skills.
During years two through five, residents gain experience in the diagnosis and management of adult and pediatric orthopedic disorders, including joint reconstruction; trauma, including multisystem trauma; surgery of the spine, including disk surgery, spinal trauma and deformities; hand and foot surgeries; athletic injuries and orthopedic rehabilitation; orthopedic oncology, including metastatic disease; and amputations as well as post-amputation care and nonoperative outpatient diagnosis and care, including all orthopedic anatomic areas.

## Facilities

The Department of Orthopedics and Rehabilitation is housed in the John Pappajohn Pavilion of University of Iowa Hospitals \& Clinics and has an active service in the VA Iowa City Health Care. The department's facilities include 48 orthopedic beds, ten outpatient clinics, inpatient and outpatient operating rooms, a specialty library, a specialty radiology unit, and physical therapy and rehabilitation facilities. Its specialty clinics deal with virtually every orthopedic disorder known, including, but not limited to scoliosis, club feet, congenital dislocated hip, neuromuscular disease, metabolic disease, amputation, neoplasm, trauma, and neck, back, hip, foot, knee, and hand problems. Physicians in the outpatient clinic see approximately 280 patients per day and over 70,000 patients per year. Approximately 7,000 surgeries are performed each year.

The department's Sports Medicine Clinic provides MRI, X-ray, and physical therapy services, and a full range of nonoperative orthopedic ambulatory care services.

## Laboratories

The orthopedics laboratories deal with problems in these major subject areas.

## Biochemistry

The biochemistry of proteoglycans, collagens, and matrix proteins, both normal and altered in musculoskeletal disorders.

## Biomechanics

Problems of the upper extremity; biomechanics of the spine, hip, and gait; total joint replacements (in conjunction with the College of Engineering [p. 1436]).

## Bone Healing

Provides research toward better ways to heal bones.

## Cell and Molecular Biology

Studies of normal bone, cartilage, tendon, muscle, and tissues altered by experiment and disease.

## Courses

- Orthopedics and Rehabilitation Courses [p. 1815]
- Athletic Training Courses [p. 1816]

## Orthopedics and Rehabilitation Courses

ORTH:8301 Clinical Orthopedics

arr.
ORTH:8401 Advanced Clinical Orthopedics 2,4 s.h.
Requirements: fourth-year MD enrollment.

## ORTH:8402 Advanced Inpatient Subinternship in Orthopedics: Trauma <br> Requirements: fourth-year MD enrollment.

## ORTH:8403 Advanced Inpatient Subinternship in Orthopedics:

 Adult Hip/Knee ReconstructionOpportunity to enhance clinical skills by taking intern-level responsibility for management of a limited number of orthopedic patients; proficiency in perioperative patient assessment and management, including assisting in procedures and using laboratory diagnosis and radiologic studies pertinent to one faculty member's clinical practice.

## ORTH:8404 Introduction to Physical Medicine and

 RehabilitationManagement of a wide range of common acute and chronic neuromusculoskeletal pain conditions (shoulder, back, knee pain) to more devastating neuromuscular injuries (spinal cord injuries, brain injury, strokes, amputations). Requirements: MD enrollment.
ORTH:8405 Advanced Physical Medicine and Rehabilitation 4 s.h. Management of a wide range of common acute and chronic neuromusculoskeletal pain conditions (shoulder, back, or knee pain) to more devastating neuromuscular injuries (spinal cord injuries, brain injury, strokes, amputations); students work-up individual patients in outpatient clinics and perform inpatient consultations at subintern level. Prerequisites: ORTH:8404. Requirements: MD enrollment.
ORTH:8406 Physical Medicine and Rehabilitation Acute Inpatient Rehab, Cedar Rapids
Physical medicine and rehabilitation clerkship; participation in daily clinical activities including inpatient rounds, interdisciplinary team meetings, observing a variety of therapy sessions, and inpatient consults.

ORTH:8407 Orthopedics: Adult Hip/Knee Reconstruction 4 s.h. Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.
ORTH:8408 Orthopedics: Trauma
4 s.h.
Development of in-depth skills in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

## ORTH:8409 Orthopedics: Pediatrics

4 s.h.
Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.
ORTH:8410 Orthopedics: Sports Medicine
4 s.h.
Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

## ORTH:8411 Orthopedics: Hand/Wrist/Elbow

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

## ORTH:8412 Orthopedics: Spine

4 s.h.
Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

## ORTH:8413 Orthopedics: Oncology/Tumor

4 s.h.
Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

## ORTH:8414 Orthopedics: Veterans Affairs

Participation in the Veterans Affairs service general orthopedics; development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

## ORTH:8415 Orthopedics: Foot/Ankle

4 s.h.
Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

## ORTH:8416 Physical Medicine and Rehabilitation Acute Inpatient Rehab, Iowa Rehabilitation Hospital

2 s.h.
Physical medicine and rehabilitation clerkship; participation in daily clinical activities including inpatient rounds, interdisciplinary team meetings, observation of a variety of therapy sessions, and inpatient consults.

## ORTH:8417 Orthopedics: Shoulder

4 s.h.
Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems, recommend appropriate solutions to each problem, and assist in the management of problems and solutions. Requirements: MD enrollment.
ORTH:8497 Research in Orthopedics
arr.
Medical research, clinical or laboratory projects; individual study.
ORTH:8498 Orthopedics On Campus
arr.
Requirements: fourth-year MD enrollment.

ORTH:8499 Orthopedics Off Campus
arr.
Requirements: fourth-year MD enrollment.

## Athletic Training Courses

## AT:1010 Exploring Athletic Training

1 s.h.
Exploration of professional preparation for athletic trainers; application, career opportunities, professional organizations, awareness of basic athletic training principles; topics include emergency care, preventative strategies, injury evaluation, and rehabilitation techniques; for students interested in applying to the MS in athletic training program. Requirements: undergraduate major in health and human physiology or enrollment in pre-athletic training program.

AT:1200 CPR and First Aid for Health Care Professions 2 s.h. Advanced CPR and first aid with automated external defibrillator (AED); opportunity for certification at Basic Life Support (BLS) level through the American Heart Association; satisfies first aid and CPR requirement for athletic training program application; for pre-health care professions majors.

## AT:3060 Advanced Anatomy for Athletic Training

4 s.h.
Extremities and relevant body cavity anatomy; anatomical terminology, anatomical relationships of human body, 3D view of anatomy, clinical relevance of anatomy; basic science lectures, radiologic imaging discussions, introduction to clinically relevant anatomy, gross anatomy dissection laboratories, small group learning and teaching, and computer-assisted resources.

AT:4000 Foundations of Athletic Training Practice 3 s.h. Introduction to athletic training; basic components of a prevention program; injury/illness assessment process including general injury classifications, medical terminology, and patient documentation skills); anatomical basis and technical aspects of applying clinical proficiencies relating to orthopedic applications in the care and prevention of injuries relating to physically active individuals including taping, wrapping, and pad fabrication; basic evaluation skills including goniometric measurements, manual muscle testing, and anatomical palpations.
AT:4075 Medical Emergency Techniques
2 s.h.
Educational competencies and clinical proficiencies; focus on emergency medical practice in athletic training using current evidence-based interventions for medical, orthopedic, and environmental emergencies; knowledge of Emergency Medical Service (EMS) system and role athletic trainers play in the acute-care process; emergency pharmacological interventions and other advanced care skills.

## AT:4125 Clinical Experience I

3 s.h.
Integration of clinical competencies through a supervised field experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; first in a four-part series.
AT:4200 Orthopedic Pathology and Clinical Examination I 4 s.h. Pathomechanics, clinical examination, diagnosis, and appropriate basic treatment plans for orthopedic injuries to the lower extremity and spine; application of theories and skill practice through realpatient interactions and documentation; surgical observation and physician interactions; first in a two-part series.
AT:4250 Orthopedic Pathology and Clinical Examination II 4 s.h. Pathomechanics, clinical examination, diagnosis, and appropriate basic treatment plans for orthopedic injuries to the upper extremity, head, and C-spine; application of theories and skill practice through real-patient interactions and documentation; surgical observation and physician interactions; second in a two-part series. Prerequisites: AT:4200.

## AT:4300 Therapeutic Interventions

Introduction to theory, application, and treatment of orthopedic conditions using common therapeutic modalities; application of evidence-based research in planning, implementation, documentation, and evaluation of the efficacy of each therapeutic modality in treatment of injuries and illnesses of patients involved in physical activity; emphasis on indications, contraindications, and precautions; integration of patient-based outcome measures to aid in appropriate clinical decision-making.

## AT:4375 Nutrition for Athletic Training

Interaction between nutrition, exercise, and athletic performance; biomechanical and physiological aspects of nutrition and exercise; nutrition for training and competition; impact of nutrition on healing processes, nutritional supplements, and ergogenic aids; nutritional aspects of body composition and weight control; demonstration of ability to plan and implement proper sport nutrition.

## AT:4400 Rehabilitation Techniques

3 s.h.
Rehabilitation for athletic trainers based on theory and principles of therapeutic exercise using current evidence-based concepts; focus on pathology and mechanics of exercise therapy in treatment of musculoskeletal injuries; use of mechanical exercise equipment, stressing safety and use of proper body mechanics during exercise, as well as indications and contraindications for different exercises.

## AT:4450 Applied Rehabilitation Concepts <br> 3 s.h.

Functional, scientific approach to designing strength and conditioning programs for various populations; testing protocols used for measuring fitness, body composition, flexibility, strength, power, speed, and endurance; evaluation of posture and workplace ergonomics; manual therapy theory and techniques for orthopedic injuries, indications and contradictions, skill development in soft tissue assessment, application of manual and tool-assisted techniques; review of resistance training and program prescription based on literature. Prerequisites: AT:4400.

## AT:4525 Clinical Experience II

Integration of clinical competencies through a supervised field experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; second of a four-part series. Prerequisites: AT:4125.

## AT:5000 Pathology and Assessment of Non-Orthopedic Conditions

3 s.h.
Introduction to recognition, assessment, and appropriate intervention or referral strategies for non-orthopedic conditions and disabilities; pathophysiology at cellular, organ, and total body levels applied in each organ system; systems may include cardiovascular, pulmonary, renal, dermatologic, reproductive, endocrine, neurologic, and gastrointestinal; additional topics include gender and pediatric pathology, ENT/ophthalmology, abdominal evaluation, and common contagious illnesses.
AT:5075 Diagnostic Imaging and Lab Studies 1 s.h.
Common diagnostic tests and radiological techniques used commonly by medical community in assessment and diagnosis of common orthopedic and non-orthopedic conditions; students gain knowledge and skills to identify anatomy, pathology, and proper terminology used by health care professionals when discussing diagnostic tests/ results; coverage of multiple biological systems and organs of the human body to understand indications, contraindications, and clinical implications for each technique.

3 s.h. AT:5200 Pathophysiology and Pharmacology in Sports Medicine 2 s.h.
Pharmacologic applications for injury/illness sustained by various physically active populations; therapeutic drug classifications, indications, contraindications, interactions of medications, drug testing in sport, and relevant governing regulations; emphasis on drugs commonly used for orthopedic injuries, common conditions and illnesses, mental health and their effects on sport performance, and tissue healing.

AT:6100 Research in Athletic Training
2 s.h.
Identification of an athletic training problem/issue and examination through theories and research; analysis of literature and derivation of evidence-based concepts for clinical decision-making and datainformed practice; use of appropriate academic writing style; differentiation between quantitative and qualitative research; critically responding to research dilemma in a way that aligns professional ethics and values; first in a two-part series.

AT:6125 Clinical Experience III 6 s.h.
Complete professional immersive clinical experience; integration of basic and complex clinical competencies through a supervised clinical experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; third in a four-part series. Prerequisites: AT:4525.

## AT:6200 Administration and Leadership

2 s.h.
Overview of organization and administration of athletic training services; topics include organizational structures, human resources, information management, budget and finance, risk management, legal and ethical considerations in health care, purchasing and maintenance of equipment and facilities, and development of policies and procedures for daily operation of athletic training services.
AT:6250 Applied Research in Athletic Training 1 s.h.
Application of research models to athletic training topics; use of appropriate academic writing style; application of basic statistical measures to address clinical problems; continuation and completion of research projects from AT:6100; culminates with dissemination of research findings; second in a two-part series. Prerequisites: AT:6100.
AT:6300 Psychosocial Recognition and Referral 2 s.h.
Psychological factors relative to injury, rehabilitation, and performance; strategies for identifying problems, intervening, and making referrals especially related to psychological disorders, decreased performance, and health/substance abuse; exploration of various theories and models of cultural competence through the lens of sports medicine; students examine and analyze roles of cultural differences including cultural attitudes, beliefs, and expectations as they pertain to effective health care in diverse settings.

## AT:6400 Seminar in Athletic Training

2 s.h.
Review of knowledge, skills, and abilities for successful pursuit of athletic training Board of Certification (BOC) credential and processes to obtain employment; résumé development and interviewing skills; emphasis on regulation of practice; professional and ethical responsibilities contributing to practice of athletic training; creation of a professional development plan.
AT:6450 Advanced Topics in Athletic Training 1 s.h.
Investigation and discussion of current events and advanced topics in athletic training and related health professions; evaluation of current professional and legislative issues in athletic training; discussions vary depending on current relevant topics.

AT:6525 Clinical Experience IV 5 s.h.
Integration of clinical competencies through a supervised clinical experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; last in a four-part series.
Prerequisites: AT:6125.

## Athletic Training, MS

Athletics trainers are health care professionals who render service or treatment under the direction of, or in collaboration with, a physician in accordance with their education and training and the states' statutes, rules, and regulations. Services provided by athletic trainers include injury and illness prevention, wellness promotion and education, emergent care, examination and clinical diagnosis, therapeutic intervention, and rehabilitation of injuries and medical conditions.

Students who want to become certified athletic trainers may earn the MS or pursue the combined program as they earn the BS in exercise science and the MS in athletic training. See the BS in exercise science [p. 596] (College of Liberal Arts and Sciences) in the catalog.
The University of Iowa is accredited by the Commission on Accreditation of Athletic Training Education (CAATE).

## Learning Outcomes

Upon graduation, students will:

- communicate effectively among health care providers, patients, and all other stakeholders in their delivery of health care;
- practice with professionalism and integrity adhering to the Code of Ethics outlined by the National Athletic Trainers' Association (NATA) and the Code of Professional Responsibility by the Board of Certification (BOC);
- demonstrate cognitive and psychomotor competence and clinical proficiency based on clinically relevant research in the following BOC Practice Analysis content areas-injury and illness prevention and wellness promotion; examination, assessment, and diagnosis; immediate and emergency care; therapeutic Intervention; and health care administration and professional responsibility;
- demonstrate critical thinking to effectively solve problems in a variety of dynamic athletic training environments;
- demonstrate growth in cultural competence among health care providers, patients, and all other stakeholders in their delivery of health care; and
- demonstrate a Kaizen philosophy in their learning and professional practice.

## Requirements

The Master of Science program in athletic training requires 62 s.h. of coursework. Students must maintain a cumulative grade-point average of at least 3.00 and must earn a grade of C-minus or higher in all major coursework

The program involves two full years, including summer sessions, of concentrated didactic and clinical experiences that lead to eligibility for the Board of Certification examination.

The MS with a major in athletic training requires the following work.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| AT:3060 | Advanced Anatomy for Athletic <br> Training | 4 |
| AT:4000 | Foundations of Athletic <br> Training Practice | 3 |

## Admission

Admission to the Master of Science program is competitive with a limited number of students admitted for each cohort. Applicants are expected to meet technical standards, pass a background check, and comply with health and safety standards, including vaccination requirements. Students are required to provide their own transportation to all clinical experiences and are responsible for all costs they incur during travel, including parking and gas.
To be considered for the Master of Science program in athletic training, applicants must:

- have completed a BA or BS degree at an accredited institution in the United States, or have completed a Bachelor's degree from a Board of Certification for the Athletic Trainer International Arrangement (IA) institution;
- have completed 30 s.h. at the University of Iowa if a transfer student;
- complete 80 s.h. of undergraduate coursework at the University of Iowa if an Undergraduate to Graduate (U2G) student;
- submit a Test of English as a Foreign Language (TOEFL) score (only the iBT-Internet-Based Test is accepted with a total score of 93 and a speaking score of 26) and the test must have been taken within the last two years, or submit a current acceptable score from the International English Language Testing System (IELTS) or from the Duolingo English Test (DET) if an international applicant and if English is not student's first language;
- have a cumulative undergraduate grade-point average (GPA) of at least 3.00 or a cumulative GPA of at least 3.25 in the Undergraduate to Graduate (U2G) combined program; and
- complete or be in progress with required prerequisite coursework with a grade of C or higher in biology, chemistry, physics, human anatomy, human physiology, exercise physiology, general psychology, biomechanics or kinesiology, nutrition, and statistics (see list below).

To apply, submit the following to the Athletic Training Centralized Application Service (ATCAS):

- official and unofficial transcripts;
- contact information of two references, one from a medical professional and one from an academic professional;
- statement of purpose and career goals; and
- current CPR certification obtained within one year-must be Basic Life Support (BLS or professional rescuer level.

Recommended materials:

- Coursework in medical terminology, introductory coursework in athletic training, public health, motor learning, or additional psychology coursework.
- Observation hours under an athletic trainer.

Community college coursework is accepted as well as online coursework from accredited universities. AP and CLEP coursework may satisfy course requirements if listed on a college transcript.
Students must earn a grade of C or higher in these prerequisite courses.

| Course \# $\quad$ Title | Hours |
| :--- | ---: |
| Biology (preferred human biology; with or without lab) | 3 |
| Biomechanics or kinesiology | 3 |
| Chemistry (with or without lab) | 3 |
| Exercise physiology | 3 |
| Human anatomy (may be taken combined with human | 3 |
| physiology; two semesters minimum, if combined) | 3 |
| Human physiology (may be taken combined with |  |
| human anatomy; two semesters minimum, if combined) | 3 |
| Nutrition (general or sport) | 3 |
| Physics (with or without lab) | 3 |
| Psychology (general psychology is required; additional |  |
| psychology coursework recommended) | 3 |
| Statistics |  |

Applications will be forwarded to the Graduate College by the program director. Students will be notified to set up a University of Iowa account and pay the supplemental fee (\$60 if offered an interview; \$100 for international students).

All application materials are due by Feb. 1. Following the Feb. 1 deadline, applications will be accepted on a continuing basis until program capacity is met. A virtual interview is required. Coursework begins during the summer session.
Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

If formally admitted, students must:

- submit to a background check;
- complete HIPAA and BBP training;
- complete the program technical standards form;
- submit current vaccination records;
- submit current physical examination; and
- provide final course grades and GPA.

These additional forms will be sent directly to the program director upon acceptance.

## Career Advancement

Athletic trainers have opportunities for employment in many areas. They include career options in:

- public and private secondary schools, colleges and universities, professional and Olympic sports;
- youth leagues, municipal and independently owned youth sports facilities;
- physician offices;
- rural and urban hospitals, hospital emergency rooms, urgent and ambulatory care centers;
- clinics with specialties in sports medicine, cardiac rehabilitation, medical fitness, wellness, and physical therapy;
- occupational health departments in commercial settings, which include manufacturing, distribution, and offices to assist with ergonomics;
- police and fire departments, academies, municipal departments, and branches of the military; and
- performing arts areas, including professional and collegiate-level dance and music settings.

# Otolaryngology-Head and Neck Surgery 

## Chair

- Marlan R. Hansen

Faculty: https://medicine.uiowa.edu/oto/profile
Website: https://medicine.uiowa.edu/oto/
The Department of Otolaryngology-Head and Neck Surgery is one of the most comprehensive otolaryngology departments in the world. Founded in 1922, it is among the oldest in the United States. U.S. News \& World Report has consistently ranked the department's program among the top 10 in the nation.

The department's chief focus areas are education and training, patient care, and research. MD students in the Carver College of Medicine, residents, and fellows benefit from a faculty dedicated to providing thorough training in all aspects of otolaryngology and patient care. Patients in the otolaryngology clinic enjoy access to comprehensive care in any of five subspecialties: pediatric otolaryngology, otology/ neurotology, general otolaryngology and rhinology, head and neck oncology, and facial plastic and reconstructive surgery. University of Iowa faculty members from ophthalmology and visual sciences and radiation oncology hold joint appointments in otolaryngology, adding depth to the department's resources.
The department is home to prominent research programs in cleft palate and other craniofacial defects, head and neck oncology, cochlear implants, and molecular genetics. It also offers fellowships in otology/neurotology, pediatric otolaryngology, and head and neck oncology.

The department is located at University of Iowa Hospitals \& Clinics.

## Fellowships

The Department of Otolaryngology-Head and Neck Surgery offers a two-year fellowship in otology/neurotology and a one-year fellowship in pediatric otolaryngology, which are accredited by the Accreditation Council for Graduate Medical Education. It also offers a one-year fellowship in head and neck oncology accredited by the Advanced Training Council of the American Head and Neck Society.

The otology/neurotology fellowship program accepts one applicant every two years. Otology fellows spend a minimum of 20 months in clinical service. They attend all otology/neurotology clinics and neurotology cases in the operating room and are responsible for inpatient service. They also have one day of dedicated research time each week.

The pediatric otolaryngology fellowship program accepts one applicant each year. Fellows spend a year in clinical service, where they have the opportunity to train with all pediatric otolaryngology faculty members.

One applicant is accepted as a head and neck oncology fellow each year. Training is largely clinical, allowing fellows the opportunity to participate in a variety of procedures, ranging from skull base resection to laryngeal rehabilitation. Fellows routinely perform 35 to 45 free-tissue transfers during one year of training. They also complete a clinical and/or basic science research project relating to head and neck oncology.

## Residency

The Department of Otolaryngology-Head and Neck Surgery offers a residency program accredited by the Accreditation Council for Graduate Medical Education. The program has two tracks: a five-
year clinical track and a seven-year research track. Five applicants are accepted each year, three to the clinical track and two to the research track.

The clinical track provides five years of concentrated clinical study and application in all aspects of otolaryngology. Residents begin their training with a five-week intensive basic science course divided into an anatomy component and a 100-hour lecture series. The anatomy component includes a supervised cadaver dissection, and the lecture series details the study of otolaryngology and related disciplines. Residents also complete two research rotations in order to explore research areas that interest them.

The research track is a combined clinical-research program designed for residents interested in an otolaryngology research career. After an internship year, residents complete two years of research followed by four years of clinical training. The interaction of clinicians and basic scientists from several departments affords residents the opportunity for involvement in a wide spectrum of current research in areas such as electrophysiology of the auditory system, the genetics of head and neck cancer, and gene therapy.

## Otolaryngology-Head and Neck Surgery Courses

OTO:8199 Foundations of Otolaryngology
arr.
Supervised cadaver head and neck dissection, with 14 areas in detail. Two weeks.

## OTO:8301 Clinical Otolaryngology 2 s.h.

OTO:8401 Subinternship in Otolaryngology
arr.
OTO:8402 Advanced Otolaryngology
4 s.h.
Students become proficient in physical examination of the head and neck; increase their ability to diagnose, evaluate, and manage common disorders of the ears, nose, and throat; and work in outpatient clinic, on inpatient services, and in operating room.

OTO:8497 Research in Otolaryngology arr. Medical research, clinical or laboratory projects; individual study.

## OTO:8498 Otolaryngology On Campus

arr.
OTO:8499 Otolaryngology Off Campus arr.

Arranged by student with department approval.

## Pathology

## Chair

- Nitin J. Karandikar

## Director, Clinical Functions

- Brad Seaton

Graduate degree: MS in pathology
Faculty: https://medicine.uiowa.edu/pathology/people
Website: https://medicine.uiowa.edu/pathology/
The Department of Pathology offers education and training for a broad range of students, from undergraduates through postgraduate fellows and researchers. It provides basic pathology courses to health sciences students, a clinical training program for medical laboratory scientists, a Master of Science program in pathology, residency training programs leading to American Board of Pathology certification in anatomic pathology and clinical pathology, fellowship training in pathology subspecialties, and postdoctoral research training in cellular and molecular pathology.

## Undergraduate Education

Pathology courses are a major component of the university's program in Medical Laboratory Science, a Bachelor of Science program that trains medical laboratory scientists; see Medical Laboratory Science [ p . 1781] in the catalog.

## Postgraduate Training

The Department of Pathology offers postgraduate clinical fellowship programs in hematopathology, transfusion medicine, clinical microbiology, cytopathology, molecular genetic pathology, and surgical pathology for physicians who have completed residency training in pathology. These fellowships consist of one to two years of diagnostic work and research.

The department provides postdoctoral research training in immunology, neuropathology, apoptosis, cancer biology, and clinical microbiology as well as in other areas of cellular and molecular pathology. These positions are open to individuals who have earned a PhD or an MD degree.

## Programs

## Graduate Programs of Study

## Majors

- Master of Science in Pathology [p. 1824]
- Experimental pathology subprogram for the Doctor of Philosophy in Biomedical Science

Students interested in doctoral studies in experimental pathology should apply under the umbrella program in Biomedical Science [p. 1603] (select experimental pathology subprogram).

## MD Training

The department provides five to seven 12-month fellowships for MD students (pathology externship), for students interested in careers as pathologists, and the Emory Warner Fellowship, a full-time research position in a facet of experimental pathology. It also offers clerkships for MD students in all areas of anatomical and clinical pathology.

## Residency

The department offers 20 residency positions in pathology, which provide up to four years of training. Patients at University of Iowa Hospitals \& Clinics and the VA Iowa City Health Care are integral to the residency programs.

Residents gain experience in systematic rotation through the varied laboratory services, including surgical pathology, autopsy pathology, neuropathology, dermatopathology, cytology, clinical chemistry, clinical microbiology, hematology, immunopathology, molecular pathology, and transfusion medicine. They also have the opportunity to pursue one or two years of additional fellowship training in many pathology subspecialties. To learn more, see Education on the Department of Pathology website.

## Facilities

The Department of Pathology is well-equipped to carry out the sophisticated technology of modern cellular and molecular pathology. It administers more than 90,000 square feet of clinical laboratories at University of Iowa Hospitals \& Clinics and has individual research and core facility laboratories, including histopathology and laser capture microscopy for cellular and molecular pathology research, in the Medical Research Center, Medical Laboratories, and at the VA Iowa City Health Care. Also available are Carver College of Medicine research facilities for nucleic acid chemistry, hybridoma production, flow cytometry, ultrastructural studies, protein structure, image analysis, electron spin resonance, mass spectroscopy, nuclear magnetic resonance, and laboratory animal care.

## Courses

## Pathology Courses

## PATH:4151 MLS Program Registration <br> 0 s.h.

Requirements: admission to Medical Laboratory Science Program.

## PATH:5270 Pathogenesis of Major Human Diseases <br> 3 s.h.

Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Offered spring semesters of even years. Same as IGPI:5270, MMED:5270.

PATH:5461 Introduction to Morphology in Research
Introduction to the histologic examination of organs and tissues utilizing human and/or animal examples; organ identification, comparative morphology, use of histologic techniques (e.g., stains).
PATH:6220 Seminar in Pathology
1 s.h.
Current research and literature. Requirements: pathology graduate standing.

PATH:7001 Molecular and Cellular Biology of Cancer 3 s.h.
Fundamental aspects of oncology at cellular and molecular levels; mechanisms of cancer initiation and progression, oncogene action, DNA damage and repair, carcinogenesis by radiation, chemicals, viruses; tumor immunology, anticancer therapies. Offered spring semesters. Requirements: strong basic science background. Same as FRRB:7001.
PATH:7211 Research in Pathology
arr.
Basic aspects of pathology or clinical patient material; emphasis on experimental design, methods, literature review, obtaining formal answers to specific questions. Requirements: MD enrollment or graduate standing.

PATH:8007 Medical Student Fellowships in Pathology
(Externships) 0 s.h.
First-hand experience in autopsy, surgical and clinical pathology,
teaching, and research to further understanding of disease
mechanisms, normal and pathologic anatomy, laboratory use.
PATH:8008 Warner Fellowship in Experimental Pathology 0 s.h.
One-year, full-time membership in established research laboratory in the Department of Pathology or collaborating laboratory.
Requirements: MD enrollment.
PATH:8133 Introduction to Human Pathology for Graduate Students

3-4 s.h.
Human disease; basic disease processes, organ-related and multisystem diseases; case analysis. Offered fall semesters.
PATH:8401 Autopsy Pathology Clerkship arr.
PATH:8402 Hematopathology Clerkship arr.
PATH:8403 Surgical Pathology Clerkship arr.
PATH:8404 Transfusion Medicine arr.
PATH:8405 Clinical Microbiology 2,4 s.h.
Students rotate through bacteriology, molecular microbiology,
mycology, mycobacteriology, and virology while participating in clinical and technical activities.

PATH:8497 Research in Pathology
arr.
Medical research, clinical or laboratory projects; individual study with department approval.

PATH:8498 Pathology On Campus
arr.
PATH:8499 Pathology Off Campus
arr.

## Pathology, MS

The MS program in pathology prepares postbaccalaureate science majors for a range of biomedical careers. Graduate-level coursework provides students with a foundation in cellular and molecular biology, as well as specialized knowledge in pathobiology. A laboratory intensive thesis project equips trainees with cutting edge research skills. Students typically complete the program in two and one-half years.

## Learning Outcomes

Graduates will be able to:

- demonstrate subject matter expertise in basic cell and molecular biology, biostatistics, and pathobiology/mechanisms of human disease;
- understand and apply scientific method allowing for the appropriate development and testing of hypotheses, problem solving, and utilization of current literature and contemporary laboratory approaches;
- understand and apply the need to conduct research using a team-based approach, including ongoing input from the thesis mentor and committee as well as peers within the laboratory and departmental environment;
- understand and apply the key principles of carrying out research and interpreting results using the highest ethical standards; and
- acquire the ability to effectively communicate research goals, approaches, and results using both written and oral means.

## Requirements

The Master of Science program in pathology requires a minimum of 30 s.h. of graduate credit, including 21 s.h. of coursework and 9 s.h. of research leading up to the thesis. Students must maintain a program grade-point average of at least 2.75 .
The MS with a major in pathology requires the following coursework.

## Required Coursework

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| All of these: |  | 3 |
| PATH:5270/ | Pathogenesis of Major Human | 3 |
| MMED:5270 | Diseases |  |
| PATH:6220 | Seminar in Pathology (taken <br> two semesters for 1 s.h. each) | 2 |
| BIOS:4120 | Introduction to Biostatistics | 3 |
| BMED:5207 | Principles of Molecular and <br> Cellular Biology | 3 |
| BMED:7270 | Scholarly Integrity/Responsible <br> Conduct of Research I | 0 |
| BMED:7271 | Scholarly Integrity/Responsible <br> Conduct of Research II | 0 |

Required coursework results in:

- a basic understanding of molecular and cellular biology,
- a basic understanding of biostatistics, and
- an advanced understanding of pathobiology and mechanisms of human disease.

## Electives

Remaining graduate-level coursework consists of electives focused on the area or topic related to a student's thesis project. The elective
courses are offered by a range of departments on the biomedical campus.

## Thesis

The thesis project is carried out under the guidance of the mentor and thesis committee. The committee is composed of a student's mentor and two additional faculty members. In general, the thesis consists of four chapters with the first being a concise review of the literature; the second, materials and methods; and the last two, a scholarly description of the project results. The thesis must be defended before the committee prior to final approval.

For more information, view the Master of Science in Pathology on the Department of Pathology website.

## Admission

Applicants must have a bachelor's degree in a science discipline from a regionally accredited American college or university, or an equivalent degree from another country as determined by the Office of Admissions. Applicants also must have a minimum grade-point average of 3.00 on a 4.00 scale, or the international equivalent as determined by the Office of Admissions. In addition, laboratory-based research experience is highly desired. Graduate Record Examination (GRE) General Test scores are not required to apply.

International students must submit English proficiency test scores that meet institutional requirements. For more information on English proficiency requirements, visit English Proficiency Requirements on the Iowa Graduate Admissions website.

A subset of applicants will be selected for interviews, conducted either in person or virtually. Admission decisions are determined based on academic performance, research experience, letters of recommendation, personal statement and interviews.

Students who are applying must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

All pathology graduate students receive full stipend and tuition support until they complete the program. Stipend amounts are at the same level as other graduate programs on the biomedical campus. The program also pays most of the costs for health and dental insurance.

## Career Advancement

The MS program in pathology is designed for graduates to advance into research assistant or research scientist positions in academic and private sector laboratories, or to be competitive for advanced degree programs such as the $\mathrm{PhD}, \mathrm{MBA}$, or MD .

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Must include 21 s.h. of graduate level coursework, including electives focused on the area or topic related to a student's thesis project, and 9 s.h. of research leading to thesis; graduate transfer credits allowed upon approval.
b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
d Work with faculty advisor to determine appropriate graduate elective coursework and sequence.
e Thesis defense.

# Physical Therapy and Rehabilitation Science 

## Chair

- Richard K. Shields

Graduate degrees: DPT; MA in physical rehabilitation science; PhD in physical rehabilitation science

Faculty: https://medicine.uiowa.edu/pt/profile/? appointment=PRIMARY\&category=\&query=\&page=1\&size=10
Website: https://medicine.uiowa.edu/pt/
Physical therapists provide services to patients and clients who have impairments, functional limitations, disabilities, pain, or changes in physical function resulting from injury, disease, or other causes. Physical therapists practice and collaborate with a variety of health professionals. In the area of health promotion and wellness, they provide screening examinations, prescribe fitness programs, and educate the public regarding healthy lifestyles. Research, teaching, consultation, and administration also are parts of a physical therapist's professional role.

The Department of Physical Therapy and Rehabilitation Science is located in the Carver College of Medicine on the University of Iowa health sciences campus, which includes University of Iowa Hospitals \& Clinics, one of the nation's largest university-owned teaching hospitals. Students have access to faculty members in the basic sciences and medicine, basic sciences courses, clinical specialty expertise, and innovative learning experiences associated with a medical college environment.

## Programs

## Graduate Programs of Study

## Majors

- Doctor of Physical Therapy [p. 1831]
- Master of Arts in Physical Rehabilitation Science [p. 1830]
- Doctor of Philosophy in Physical Rehabilitation Science [p. 1834]

## Facilities

The department has state-of-the-art independent research laboratories and is well equipped for classroom and laboratory instruction and innovative research. The department's state-of-the-art research facilities include the Movement and Rehabilitation Laboratory and a spinal cord research laboratory at University Hospitals \& Clinics, the Human Movement Control/Performance Laboratory, the Neurobiology of Pain Laboratory, the Neuromuscular Biomechanics Laboratory, the Human Integrative and Cardiovascular Physiology Laboratory, the Applied Neuroplasticity Laboratory, the Human Performance and Clinical Outcomes Laboratory, and the Movement, Imaging, and Rehabilitation Laboratory.

## Courses

## Physical Therapy and Rehabilitation Science Courses

PTRS:5100 Professional Issues and Ethics
1 s.h.
Contemporary issues in clinical practice and professional development; legal and ethical perspectives on human rights, ethical theory and principles for analyzing and acting on ethical problems; professional and peer relationships.
PTRS:5101 Introduction to Physical Therapy Practice 2 s.h. Professional development of physical therapists; evolution of profession; analysis of current role in health care and public health with respect to societal health challenges; patient management terminology including medical terminology and language utilized in the Guide to Physical Therapist Practice; concepts of enablement models and disablement models, including World Health Organization's International Classification of Functioning, Disability and Health model in the biopsychosocial model of health; introduction to evidence-based practice principles.

PTRS:5102 Principles of Physical Therapy I
Patient management skills: fostering therapeutic alliance, history taking, systems review, positioning, draping, transfers, body mechanics, assisted gait, wheelchairs, and negotiation of architectural barriers.
PTRS:5103 Principles of Physical Therapy II 2 s.h.
Continuation of PTRS:5102; expansion of existing skills and provides new learning experiences in documentation, assessment of joint range of motion/goniometry, manual muscle testing, preambulatory intervention strategies, gait analysis; musculoskeletal, neuromuscular, and integumentary systems review. Prerequisites: PTRS:5102.
PTRS:5131 Therapeutic Physical Agents
2 s.h.
Theoretical and practical applications for safe, effective use of physical agents (superficial and deep heat, cold, hydrotherapy), electrotherapeutic modalities (biofeedback, NMES, TENS, iontophoresis); massage and soft tissue mobilization; emphasis on problem solving, clinical decision-making.
PTRS:5144 Interprofessional Education I: Team-Based Approach to Health Care

1 s.h.
Development and interaction within small group of interprofessional students from physical therapy, medicine, pharmacy, dentistry, nursing, and public health; deans and faculty from each college facilitate; three-hour initial session for all disciplines followed by informal monthly electronic scenarios, second formal meeting followed by informal monthly electronic discussions.

## PTRS:5201 Musculoskeletal Therapeutics I

3 s.h.
Musculoskeletal techniques and biomechanical principles applied to assessment and evaluation of common orthopedic problems of the spine; problem solving, case-study approach to clinical methods, skill acquisition.

## PTRS:5205 Health Promotion and Wellness

Overview of health promotion, fitness, and wellness strategies, including information on levels of health promotion, risk assessment, applied physiology (skeletal muscle, energy metabolism, and physiological responses to exercise), exercise testing and training guidelines, body composition assessment, and development of individual weight management and exercise training programs; classroom and laboratory experiences.
PTRS:5206 Cardiopulmonary Therapeutics
Cardiorespiratory anatomy, physiology, and application of basic concepts, techniques in management of patients with acute and chronic cardiac, pulmonary disorders; laboratories.

PTRS:5209 Surface Anatomy
1 s.h.
Laboratory teaching activities that parallel the human anatomy course; observation, palpation, and problem solving skills; upper- and lowerlimb, head and neck, thorax, and abdomen.
PTRS:5210 Kinesiology and Pathomechanics
4 s.h.
Normal and pathological movement based on understanding of muscle mechanics, segment and joint mechanics, muscle function; instructor- and student-centered learning experiences; integrative human movement system laboratories.
PTRS:5212 Human Pathology for the Physical Therapist 3 s.h. Students gain a cursory understanding of the physiologic mechanisms of human health and pathologic mechanisms of disease; emphasis on morphologic changes of cells and tissues, identification of causes of change (etiology), mechanisms of development (pathogenesis), and clinical manifestations of specific disease processes; influence of disease and medical diagnosis on physical therapy practice and physical therapy diagnosis.

## PTRS:5215 Applied Clinical Medicine

2 s.h.
Pathological disorders frequently encountered by physical therapists in clinical practice, addressed by physicians and health professionals who are not physical therapists; physical therapy management.

## PTRS:5235 Case-Based Learning I <br> 1 s.h.

Small group case study seminars and simulated patient instructor learning experiences; clinical problems coordinated with concurrent courses; student-centered, problem-based learning format with emphasis on evidence-based practice objectives. First in a two-course sequence.

## PTRS:5236 Case-Based Learning II

Small-group case study seminars and simulated patient instructor learning experiences; clinical problems coordinated with concurrent courses taken in curriculum; student centered, problem-based learning format; emphasis on evidence-based practice objectives. Second in a two-part series of integrated courses. Prerequisites: PTRS:5235.

## PTRS:5790 Integrated Clinical Education in Physical Therapy

 IIntegrated clinical experiences in area physical therapy clinics; overview of diverse nature of practice through half-day experiences; basic skills in examination, intervention, and documentation.

## PTRS:5791 Integrated Clinical Education in Physical Therapy

 IIContinuation of PTRS:5790; integrated clinical experiences in area physical therapy clinics; overview of diverse nature of practice through full-day clinical experiences; basic skills in examination, intervention, and documentation. Prerequisites: PTRS:5790.
Requirements: Doctor of Physical Therapy program enrollment.

## PTRS:6120 Physical Therapy Management and Administration

 IThe changing U.S. health care system; physical therapy services across continuum of care, reimbursement to health care providers, mechanisms for controlling costs while providing quality care; clinical vignettes, small group problem solving.

## PTRS:6121 Physical Therapy Management and Administration

 IIPrinciples of management in physical therapy practice; historical perspective, current health care environment; business principles; marketing, managing risk, medical/legal concerns, professional and personal growth and development.
PTRS:6122 Psychosocial Aspects of Patient Care 1 s.h.
Emotional reactions to illness/trauma; social determinants of health; recognition of mental illness in physical therapy examination and intervention; psychosocial aspects of disability as they relate to patient-physical therapist interaction; effective communication strategies; cultural competence in professional behavior and patient care.

PTRS:6133 Pain Mechanisms and Treatment
Introduction to basic science mechanisms, assessment, and management of pain; basic science mechanism involved in transmission and perception of painful stimuli after tissue injury, assessment and physical therapy management of pain; emphasis on scientific principles and published literature to support treatment techniques.

## PTRS:6134 Physical Therapy Management of Integumentary

 SystemOverview of physical therapy examination and management of the integumentary system; wound pathology, diagnosis associated with the integumentary system, inflammation and repair, examination and reexamination techniques, documentation, clinical decision-making, lecture and laboratory formats; interventions, including patient/client information, physical agents, electrotherapy, wound dressing.
PTRS:6143 Selected Topics in Physical Therapy Practice
2 s.h. Specialty area of practice including wheelchair seating and prescription, pelvic health, home assessment, durable medical equipment (DME) recommendations, and geriatrics; topics dictated by changing needs of health care and the profession; emphasis on clinical decision-making, synthesis and evaluation of information with respect to first-year physical therapy curriculum.
PTRS:6145 Interprofessional Education II: Teaching Neural and Musculoskeletal Evaluation Principles
Active involvement in integrating anatomy, kinesiology, and movement control principles as applied to a select group of pathologies with the goal of being able to teach content area; preassigned student group leaders; emphasis on student as active learner; opportunity to teach academic areas previously studied in first and second years of curriculum; may include teaching several of these musculoskeletal principles in a first-year medical student anatomy course.
PTRS:6170 Management of People with Prosthetic and Orthotic Needs 2 s.h.
Physical therapy management and assessment of patients in need of prosthetic and orthotic devices; principles and components of prosthetic and orthotic design and use.
PTRS:6172 Radiology/Imaging for Physical Therapists 2 s.h.
Basic principles and procedures for acquisition and interpretation of radiology and imaging in clinical practice and research; plain film radiographs, CT, MRI, other common imaging modalities; case-based, multidisciplinary approach.
PTRS:6173 Differential Diagnosis in Physical Therapy 2 s.h. Use of physical therapy examination and evaluation skills to diagnose physical therapy problems; focus on use of good clinical decisionmaking skills when analyzing a patient's history and administering physical therapy tests and measures to confirm or rule out differential diagnoses; components of the medical examination; importance of collaboration between therapists and other health professionals; interactive case studies presented by clinical experts.
PTRS:6176 Pharmacology for Physical Therapists 3 s.h.
Contemporary pharmacology; overview of basic pharmokinetic and pharmacodynamic principles; relation of drug therapy to therapeutic interventions provided by physical therapists; small group clinical case presentations.

## PTRS:6200 Pediatric Physical Therapy

Preparation for physical therapy practice in pediatric settings using interdisciplinary family-centered practice; normal and abnormal development, standardized assessment, service-delivery settings, interventions, management strategies specific to pediatrics.

## PTRS:6202 Musculoskeletal Therapeutics II

Pathology, assessment, management of orthopedic disorders of the upper quarter; problem-solving approach to evaluation and management of patients with musculoskeletal conditions. Prerequisites: PTRS:5201.

## PTRS:6203 Musculoskeletal Therapeutics III

Pathology, assessment, management of orthopedic disorders of the lower quarter; problem-solving approach to evaluation and management of patients with musculoskeletal conditions. Prerequisites: PTRS:6202.

PTRS:6204 Progressive Functional Exercise 2 s.h.
Therapeutic exercise options (e.g., isometrics, isotonics, isokinetics, plyometrics, endurance exercises, stretching exercises) and training principles; application to functional activities, including those of daily living, work, recreation, and sport; laboratory component.
PTRS:6224 Activity-Based Neural and Musculoskeletal Plasticity in Health Care 4 s.h.
Examination of neural, muscular, and skeletal plasticity to increased and decreased use in normal and pathological states (chronic inactivity, obesity, metabolic syndromes, orthopedic and neurological injuries); principles of genetic regulation with physical activity including underlying mechanisms contributing to acute and chronic adaptations of muscle, spinal circuitry, and supra-spinal centers; integration of movement control concepts through contemporary papers evaluating short and long latency reflexes, posture and balance control, spasticity, and motor learning in individuals with acute and chronic perturbations to the nervous system.
PTRS:6225 Neuromuscular Therapeutics 3 s.h.
Evidence-based application of clinical neuroscience, motor control, and learning principles to practice of neurological physical therapy; approaches to evaluation and therapeutic intervention for clients with adult-onset neurological conditions, with emphasis on examination, developing a diagnosis, clinical decision-making, and prescribing interventions that help clients accomplish goals. Prerequisites: PTRS:6224.

PTRS:6237 Community Outreach and Engagement I 1 s.h. Outreach and engagement activities with individuals and organizations in the community; students select service learning experiences from current community partners, or may suggest their own idea, and develop their individual learning goals for these experiences; discussion and written assignments focus on reflection of student experiences with persons who are different than themselves, and on social responsibility, advocacy, and professionalism in the field of physical therapy; first in a two-course series.
PTRS:6238 Community Outreach and Engagement II 1 s.h. Outreach and engagement activities with individuals and organizations in the community; students select from current community partners, or may suggest their own idea, and develop their individual learning goals for these experiences; discussion and written assignments focus on reflection about student experiences with persons who are different than themselves, and on social responsibility, advocacy, and professionalism in the field of physical therapy; second in a twocourse series. Prerequisites: PTRS:6237.

PTRS:6250 Critical Inquiry I: Evidence-Based Practice 2 s.h
Topics relevant to evidence-based practice and research design; identification of appropriate questions for research and clinical applications, location and evaluation of available evidence, identification of issues that affect validity of research designs, interpretation of basic statistical analyses.

## PTRS:6251 Critical Inquiry II: Rehabilitation Research 2 s.h.

Experience conducting group research projects under faculty supervision; data collection and analysis, manuscript preparation, oral defense of research findings during a formal poster presentation. Prerequisites: PTRS:6250.

3 s.h. PTRS:6252 Critical Inquiry III: Clinical Application 1 s.h.
Principles and procedures learned in PTRS:6250 and PTRS:6251 applied to a clinical setting; students write and present a case report with an evidence-based practice focus, using a clinical case from their final internships. Prerequisites: PTRS:6251. Requirements: Physical Therapy and Rehabilitation Science program enrollment.

PTRS:6253 Functional Neuroanatomy arr.
Basic principles of neuroanatomy and neurophysiology; emphasis on human central nervous system; laboratory emphasis on anatomical study of spinal cord and brain. Offered spring semesters. Requirements: physical therapy and rehabilitation science enrollment or graduate standing. Same as ACB:6252.

## PTRS:6792 Integrated Clinical Education in Physical Therapy

 IV1 s.h.
Two-week, full-time clinical experience in physical therapy clinics under guidance of physical therapists; theory and practice of physical therapy procedures, competence building in basic skills. Prerequisites: PTRS:6793. Requirements: Doctor of Physical Therapy Program enrollment.

PTRS:6793 Integrated Clinical Education in Physical Therapy III
Six-week, full-time clinical education experience in a rural health environment. Prerequisites: PTRS:5791. Requirements: Doctor of Physical Therapy program enrollment.
PTRS:6794 Terminal Clinical Education in Physical Therapy I 4 s.h.
Nine week, full-time clinical education experience divided among various settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty. Prerequisites: PTRS:6792. Requirements: Doctor of Physical Therapy program enrollment.

## PTRS:6795 Terminal Clinical Education in Physical Therapy

 IINine-week, full-time clinical education experience divided among various settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty. Prerequisites: PTRS:6794. Requirements: Doctor of Physical Therapy program enrollment.

## PTRS:6796 Terminal Clinical Education in Physical Therapy III

Nine-week, full-time clinical education experience divided among various settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty. Prerequisites: PTRS:6795. Requirements: Doctor of Physical Therapy program enrollment.
PTRS:7812 Biomedical Instrumentation and Measurement 3 s.h. Introduction to biomedical instrumentation and measurement; understanding sources of error and noise in biomedical research applications; basic circuit analysis, calibration of measurement tools, A/D conversion, digital filtering; lab components. Offered fall semesters of even years.
PTRS:7820 Seminar in Rehabilitation Science 1 s.h.
Exploration of research related to rehabilitation science; lectures by faculty, graduate students, and guest scholars with expertise in areas relevant to rehabilitation science (e.g., neuroscience, physiology, medicine, engineering, pharmacology, integrated physiology).
PTRS:7826 Scientific Writing in Rehabilitation Science 2 s.h.
Knowledge of and experience related to scientific writing, critical review of scientific literature, publication in the biomedical sciences, thesis/dissertation writing, grant writing, scientific presentation, writing used in academic and scientific careers.

## PTRS:7875 Analysis of Activity-Based Neural and

 Musculoskeletal Plasticity3 s.h.
Examination of neural, muscular, and skeletal plasticity to increased/ decreased use in normal and pathological states (chronic inactivity, obesity, metabolic syndromes, orthopedic and neurological injuries); genetic regulation with physical activity and underlying mechanisms contributing to acute and chronic adaptations of muscle, spinal circuitry, and supra-spinal centers; integration of movement control concepts through contemporary papers evaluating short and long latency reflexes, posture and balance control, spasticity, and motor learning in individuals with acute and chronic perturbations to the nervous system; individual research projects.

## PTRS:7880 Teaching Practicum

Individual instruction, observation, experimentation in teaching, guidance, analysis of evaluation processes in Physical Therapy and Rehabilitation Science.

## PTRS:7884 Practicum in Research

arr.
Laboratory experiences connected with investigative process; individual instruction, observation, activities in methodological development, data acquisition, data analysis aspects of research.
PTRS:7895 Advanced Seminar in Rehabilitation Science arr.
Current status of research for biological, mechanical, psychological components pertinent to cardiopulmonary, musculoskeletal, neuromuscular areas of rehabilitation science; preparation for comprehensive exam.
PTRS:7899 Introduction to Pain: Overview of Theories, Concepts,
and Mechanisms 1 s.h. 1 s.h.
Overview of pain concepts and mechanisms; general overview of pain, models of pain, peripheral and central mechanisms, and pain inhibition. Requirements: prior neuroscience course.

## PTRS:7900 Rehabilitation Research Capstone Project arr

Specific phases of the research process; development of a research question and associated hypotheses, collection and analysis of data, interpretation and discussion of the information's meaning; presentation to sponsoring mentor's laboratory/program, and written document.

## PTRS:7901 Clinical Correlates of Pain: Syndromes and

## Management

1 s.h.
Common pain conditions and management of pain using an interdisciplinary focus; lectures by University of Iowa Hospitals and Clinics clinicians on a variety of acute and chronic pain conditions and management approaches. Requirements: prior neuroscience course.
PTRS:7902 Molecular, Cellular, and Neural Mechanisms of Pain
Basic science mechanisms of pain and pain modulation; understanding molecular basis for pain in nociceptive afferents (peripheral sensitization), underlying molecular and neuronal mechanisms of central processing of pain (central sensitization), cortical pain processing, animal and human experimental pain models; readings from past and current literature. Prerequisites: PTRS:7899. Requirements: prior neuroscience course.
PTRS:7903 Rehabilitation Management of Pain 1 s.h.
Basic principles of rehabilitation for pain control including education, exercise, and electrophysical modalities; evidence-based approach to rehabilitation covering mechanisms of action and clinical effectiveness; case studies. Prerequisites: PTRS:7899 and PTRS:7901.

PTRS:7925 Independent Study arr.
Problem-solving experience in physical therapy; commensurate with student's interest, ability.
PTRS:7927 Research in Rehabilitation Science
arr.
Placement of physical therapy on sound scientific base; therapy; initiation, refinement, establishment of methods in physical therapy evaluation, treatment; direct clinical and laboratory approach, philosophical treatise, or research proposal.

PTRS:7930 Critical Thinking in Neuro-Mechanical Systems arr. Problem solving experience in neuro-mechanical systems, commensurate with student interest, ability.

PTRS:7931 Critical Thinking in Pain
arr.
Problem solving experience in pain, commensurate with student interest, ability.
PTRS:7932 Critical Thinking in Biomechanics and Human Performance Assessment
arr.
Problem solving experience in biomechanics and human performance assessment, commensurate with student interest, ability.
PTRS:7933 Critical Thinking in Activity-Based Plasticity arr. Problem solving experience in movement control/human performance, commensurate with student interest, ability.

PTRS:7934 Critical Thinking in Neural Plasticity arr.
Problem solving experience in neural plasticity, commensurate with student interest, ability.
PTRS:7935 Critical Thinking in Movement Science arr.
Problem solving experience in movement science, commensurate with student interest; ability.

PTRS:7936 Critical Thinking in Cardiovascular Physiology arr. Problem solving experience in cardiovascular physiology, commensurate with student interest, ability.
PTRS:7990 Thesis: Rehabilitation Science
arr.
Investigative process: formulation of problem, literature search and analysis, procedure for collecting data, data analysis, organization and writing of thesis proposal, thesis.

## Physical Rehabilitation <br> Science, MA

The Master of Arts program in physical rehabilitation science is granted to students working toward the Doctor of Philosophy in physical rehabilitation science.

## Learning Outcomes

Graduates will be prepared for research appointments that emphasize research in rehabilitation science. They will possess:

- theoretical and scientific knowledge to perform basic, applied, or clinical-level original research that leads to scientific presentations, publication in peer-reviewed journals, and competition for extramural funding through scientific grant writing; and
- breadth of knowledge in exercise physiology, biomechanic, neuroscience, or motor control specialty areas as they relate to impairment, functional limitation, and disability.

## Requirements

The Master of Arts with a major in physical rehabilitation science is awarded to students pursuing knowledge about the underlying science of rehabilitation. The MA degree does not prepare students to practice physical therapy. Students often work toward the Doctor of Philosophy in physical rehabilitation science with the goal to promote scholarship in the field. See the PhD in physical rehabilitation science [p. 1834] in this section of the catalog.

## Doctor of Physical Therapy, DPT

The Doctor of Physical Therapy (DPT) is the entry-level professional degree for physical therapists. Based on the number of outstanding applicants, approximately 48 students are annually enrolled in the DPT program.

## Technical Standards

Physical therapy is a profession that requires physical, mental, and emotional fitness. In the program, students obtain the foundation of knowledge, skills, attitudes, and behaviors that are necessary for a successful career as a physical therapist. Technical standards reflect the abilities that a physical therapist must possess for safe and effective clinical practice. Prospective and current students must meet the following technical standards.

## General Abilities

Students are expected to possess the intellectual ability to learn, integrate, analyze, and synthesize data. They must have functional use of the senses of vision, hearing, and smell, as well as unimpaired equilibrium. Their exteroceptive senses (touch, movement, stereognosis, and vibratory) must be sufficiently intact to perform activities required for a complete physical therapy education. Students must have motor function capabilities, physical endurance, and the emotional health to meet the demands of entry-level physical therapy education and the demands of total patient care, which may include extended hours of instruction and time in clinic (evenings, nights, and weekends). Students must be capable of punctual, consistent, and reliable attendance in the didactic and clinical education component of the curriculum.

## Observation

The ability to observe is required for demonstrations, visual presentations in lectures, and laboratories. Observation requires the functional use of vision, hearing, smell, somatic sensations, and the use of common sense. Students must be able to observe patients accurately and completely, both at a distance and up close, attending to both verbal and nonverbal communication.

## Communication

Students must be able to speak and listen to patients in order to elicit information, perceive nonverbal communication, describe changes in mood, communicate effectively and sensitively with patients and their families, as well as instruct patients and their families. Communication in oral, written, and electronic form with the health care team must be effective, efficient, and timely.

## Motor/Psychomotor Function

Students are required to have sufficient motor function to ascertain information from patients by auscultation, percussion, palpation, and movement facilitation. Intervention methods may include exercising, lifting, transferring of patients, and assisting during ambulation. These methods must be completed in a manner that assures the safety of a patient as well as the safety of the student. Students must have motor function sufficient to perform the movements required to provide both nonurgent and emergent treatment. Such skills require coordination of gross and fine muscular movements, equilibrium, sensation, and muscle strength.

## Intellectual—Conceptual, Integrative, and Qualitative Abilities

Problem solving is a critical skill demanded of physical therapists, and requires conceptual, integrative, and qualitative thinking abilities. Students must be able to synthesize knowledge and integrate the relevant aspects of a patient's history, laboratory results, and physical examination to provide an explanation for intervention by recalling and retaining information in an efficient and timely manner. They must have the ability to incorporate new information from peers, teachers, and research to formulate intervention plans. Students must be able to comprehend three-dimensional relationships, the spatial and functional relationships of structures, and analyze and apply this information for problem-solving and decision-making purposes. They must be able to organize, prioritize, analyze, and evaluate detailed and complex information individually, in small groups, and in clinical settings, and do so within a limited time frame.

## Behavioral/Interpersonal Skills/ Professionalism

It is necessary that students have the emotional health to maximize their intellectual ability, exercise good judgment, and complete all responsibilities required for the evaluation and treatment of patients. They must be able to self-assess, accept criticism, and assume responsibility for maintaining professional behavior. Students must be able to develop mature, sensitive, and effective relationships with patients, families, caregivers, and colleagues. They must be able to tolerate physical and emotional stress and continue to function effectively. Students must possess qualities of adaptability and flexibility and be able to function in an atmosphere of uncertainty. They must be motivated to serve and demonstrate a high level of compassion for others. Students are required to demonstrate integrity and act in a manner that demonstrates consciousness of the profession's core values. They must possess sufficient interpersonal skills to interact positively with people from all levels of society, ethnic backgrounds, and belief systems.

## Learning Outcomes

Graduates will be prepared to:

- examine, evaluate, treat, and prevent impairments, functional limitations, and disabilities;
- maintain and promote fitness, health, and quality of life; and
- ensure availability, accessibility, and excellence in the delivery of physical therapy services to patients/clients.
As essential participants in the health care delivery system, graduates will be:
- prepared to assume leadership roles in prevention and health maintenance programs, in the provision of rehabilitation services, and in professional and community organizations; and
- able to play important roles in developing health policy and appropriate standards as well as assessing clinical outcomes for the various elements of physical therapy practice.

## Requirements

The Doctor of Physical Therapy requires a minimum of 104 s.h. and is completed in two and a half years. Students must maintain a program grade-point average of at least 3.00.
The program is fully accredited by the Commission on Accreditation in Physical Therapy Education. Satisfactory completion of the professional program qualifies candidates to take the National Physical Therapy Exam for licensure to practice. The minimum passing score on the exam is the same in all jurisdictions.

The Doctor of Physical Therapy degree requires the following coursework.

| First Year, Summer |  |  |
| :--- | :--- | ---: |
| Course \# | Title | Hours |
| PTRS:5101 | Introduction to Physical | 2 |
|  | Therapy Practice |  |
| PTRS:5102 | Principles of Physical Therapy I | 2 |
| PTRS:5205 | Health Promotion and Wellness | 3 |

## First Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PTRS:5100 | Professional Issues and Ethics | 1 |
| PTRS:5103 | Principles of Physical Therapy | 2 |
|  | II | 1 |
| PTRS:5144 | Interprofessional Education <br> I: Team-Based Approach to | 1 |
|  | Health Care |  |
| PTRS:5209 | Surface Anatomy | 1 |
| PTRS:5210 | Kinesiology and <br> Pathomechanics |  |
| PTRS:5212 | Human Pathology for the <br> Physical Therapist | 4 |
| PTRS:5235 | Case-Based Learning I | 3 |
| PTRS:5790 | Integrated Clinical Education in <br> Physical Therapy I | 1 |
| ACB:5108 | Human Anatomy | 1 |

## First Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PTRS:5131 | Therapeutic Physical Agents | 2 |
| PTRS:5201 | Musculoskeletal Therapeutics I | 3 |
| PTRS:5206 | Cardiopulmonary Therapeutics | 3 |
| PTRS:5215 | Applied Clinical Medicine | 2 |
| PTRS:5236 | Case-Based Learning II | 1 |
| PTRS:5791 | Integrated Clinical Education in | 1 |
|  | Physical Therapy II |  |
| PTRS:6253 | Functional Neuroanatomy | 4 |

| Second Year, Summer |  |  |
| :--- | :--- | ---: |
| Course \# | Title | Hours |
| PTRS:6120 | Physical Therapy Management <br> and Administration I | 2 |
| PTRS:6143 | Selected Topics in Physical <br> Therapy Practice | 2 |
| PTRS:6176 | Pharmacology for Physical <br> Therapists | 3 |
| PTRS:6793 | Integrated Clinical Education in <br> Physical Therapy III | 3 |

## Second Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PTRS:6122 | Psychosocial Aspects of Patient <br> Care | 1 |
| PTRS:6134 | Physical Therapy Management <br> of Integumentary System | 2 |
| PTRS:6145 | Interprofessional Education <br> II: Teaching Neural and | 1 |
|  | Musculoskeletal Evaluation <br> Principles |  |

| PTRS:6170 | Management of People with <br> Prosthetic and Orthotic Needs | 2 |
| :---: | :--- | ---: |
| PTRS:6200 | Pediatric Physical Therapy | 2 |
| PTRS:6202 | Musculoskeletal Therapeutics II | 3 |
| PTRS:6224 | Activity-Based Neural and <br> Musculoskeletal Plasticity in <br> Health Care | 4 |
| PTRS:6237 | Community Outreach and <br> Engagement I |  |
| PTRS:6250 | Critical Inquiry I: Evidence- <br> Based Practice | 1 |
| One of these (with advisor approval): | 2 |  |
| PTRS:7930 | Critical Thinking in Neuro- <br> Mechanical Systems | 1 |
| PTRS:7931 | Critical Thinking in Pain <br> PTRS:7932Critical Thinking in <br> Biomechanics and Human <br> Performance Assessment |  |
| PTRS:7933 | Critical Thinking in Activity- <br> Based Plasticity |  |
| PTRS:7934 | Critical Thinking in Neural <br> Plasticity |  |
| PTRS:7935 | Critical Thinking in Movement <br> Science |  |
| PTRS:7936 | Critical Thinking in <br> Cardiovascular Physiology |  |

## Second Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PTRS:6121 | Physical Therapy Management <br> and Administration II | 1 |
| PTRS:6133 | Pain Mechanisms and <br> Treatment | 2 |
| PTRS:6172 | Radiology/Imaging for Physical <br> Therapists | 2 |
| PTRS:6173 | Differential Diagnosis in <br> Physical Therapy | 2 |
| PTRS:6203 | Musculoskeletal Therapeutics <br> III | 2 |
| PTRS:6204 | Progressive Functional Exercise | 4 |
| PTRS:6225 | Neuromuscular Therapeutics | 2 |
| PTRS:6238 | Community Outreach and <br> PTRS:6251 | Engagement II <br> Critical Inquiry II: |
|  | Rehabilitation Research | 1 |
| PTRS:6792 | Integrated Clinical Education in | 2 |
|  | Physical Therapy IV | 1 |

Third Year, Summer

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PTRS:6794 | Terminal Clinical Education in | 4 |
|  | Physical Therapy I |  |

Third Year, Fall

| Course \# | Title | Hours |

|  | Application |  |
| PTRS:6795 | Terminal Clinical Education in | 4 |

| PTRS:6796 | Terminal Clinical Education in <br> Physical Therapy III | 4 |
| :--- | :--- | :--- |

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They must have completed a baccalaureate degree and all prerequisite coursework from an accredited institution in the United States, or anticipate completing the degree before enrolling in the DPT program. They must have a cumulative grade-point average (GPA) of at least 3.00 and must have completed the following prerequisite coursework, preferably with a GPA of at least 3.00.

All applicants must take the Graduate Record Examination (GRE) General Test. They must take the test early enough for their scores to be received prior to the application deadline.

## Prerequisite Science Courses

All science courses must include the appropriate laboratory instruction. The prerequisite courses must have been taken for a letter grade. Credit awarded through advanced placement testing may be applied only to the mathematics requirement.

## Biological Sciences

A complete introductory series of courses in principles of general biology or zoology and advanced coursework in biology or zoology (for which an introductory course is prerequisite) equivalent to 12 s.h.

## Anatomy

Human or comparative vertebrate anatomy, preferably with a lab component, equivalent to 3 s.h.

## Physiology

A systemic human physiology course equivalent to 3 s.h.
A two-course sequence of anatomy and physiology equivalent to 6 s.h., preferably with a lab component, can fulfill the physiology and anatomy prerequisites.

## Physics

A complete introductory series equivalent to 8 s.h.

## Chemistry

A complete introductory series equivalent to 8 s.h.

## Psychology

Courses equivalent to 6 s.h.

## Mathematics

A college-level mathematics course, at the level of trigonometry or higher, equivalent to $3 \mathrm{~s} . \mathrm{h}$.

## Statistics

A statistical methods course equivalent to 3 s.h.

## Applications

Applications are submitted online through the Physical Therapist Centralized Application Service (PTCAS). PTCAS allows applicants to use a single application and one set of materials to apply to multiple physical therapy programs. Once the application portfolio is complete with PTCAS, they will forward it to the University of Iowa.
Applications are accepted beginning June 15 for entry into the DPT program the following summer. Applicants who apply early and by Sept. 15 will be given priority status in the admissions process. It is
to an applicant's benefit to apply as soon as possible after June 15 as the admissions committee will begin the application review process to select those for interviews. Priority status application deadline is Sept. 15, mid-application deadline is Oct. 1, and final application deadline is Dec. 1.
The physical therapy admissions committee requires personal, oncampus interviews. Since the number of students admitted into each class is limited, not all who apply for admission are invited for an interview.

## Background Checks

Enrollment in the Doctor of Physical Therapy program is contingent on a successful criminal background check. Drug screening may be required for some clinical rotations.

## Expenses

Applicants admitted to the DPT program must make an advance tuition payment which is forfeited if the applicant does not enroll. In addition to paying University of Iowa tuition and fees plus departmental fees, students are assessed laboratory fees for the human anatomy and neuroanatomy courses and are responsible for purchasing supplies, such as lab coats. Students also are responsible for all costs associated with professional development and clinical experiences.
All students are required to comply with the pre-entry and periodic health screening program developed by Student Health in cooperation with University of Iowa Hospitals \& Clinics. All costs incurred for the health screenings are the student's responsibility. Students also are required to have health insurance.

## Financial Support

Many academic and professional development scholarship opportunities are available to DPT students matriculating within the department; view the awards on the Department of Physical Therapy and Rehabilitation Science website.
Entering physical therapy students are eligible for financial aid as determined on the Free Application for Federal Student Aid (FAFSA). Students must sustain a strong academic performance in order to qualify for funds.

## Career Advancement

The employment outlook for physical therapy graduates is strong. Opportunities exist for professional practice in inpatient, outpatient, and community-based organizations. These include general or specialized hospitals, programs for children with disabilities, private physical therapy clinics, extended care facilities, nursing homes, community and governmental agencies, rehabilitation centers, the armed forces, foreign service, home health agencies, school systems, fitness centers, and athletic facilities. Teaching and research positions also are available as well as options for successful self-employment.
Physical therapists report a very high level of job satisfaction, driven both by prevalent employment opportunities and social interaction.

## Physical Rehabilitation Science, PhD

Through coursework and participation in research, the Doctor of Philosophy program in physical rehabilitation science emphasizes the development of an individual's expertise as a researcher in rehabilitation science. Approximately 20 students are enrolled in the PhD program each year.

## Learning Outcomes

Graduates who complete the program are prepared for academic appointments that emphasize research, scholarship, and teaching. They possess:

- theoretical and scientific knowledge to perform basic, applied, or clinical-level original research that leads to scientific presentations, publication in peer-reviewed journals, and competition for extramural funding through scientific grant writing;
- breadth of knowledge in exercise physiology, biomechanic, neuroscience, or motor control specialty areas as they relate to impairment, functional limitation, and disability; and
- theoretical and practical skills required for college or university teaching at the professional entry and advanced graduate levels.

## Requirements

The Doctor of Philosophy with a major in physical rehabilitation science requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00.

The program is designed to advance a student's ability to independently develop and carry out research that establishes the scientific basis for prevention, evaluation, and treatment of impairments, functional limitations, and disability. The curriculum is flexible enough to accommodate research focusing on basic, applied, or clinical studies in the rehabilitation sciences. Students have access to the program's research laboratories (see Facilities [p. 1826] in this section of the catalog).

## Curriculum

Students and their faculty advisor develop an individualized study plan. A preliminary study plan is developed within the first 9 s.h. of graduate study; a final plan is submitted to the Graduate College when the PhD comprehensive examination is scheduled.

To ensure breadth of knowledge, all students complete specific core, research, and scientific specialty area content courses. Elective courses are selected to provide in-depth study of the specialty; they are complemented by an advanced seminar course specific to a student's specialty and taken in preparation for the comprehensive examination.

Students must satisfactorily complete the comprehensive examination, which is taken after all required coursework is completed. Doctoral study culminates with 12 s.h. of thesis research and an oral examination.

## General Core Requirement

PhD students must complete the following core requirements. In addition to the courses below, the Collaborative Institutional Training Initiative (CITI)—online, web-based training-must be completed before a student enrolls in BMED:7270 and BMED:7271.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| PTRS:7812 | Biomedical Instrumentation and Measurement | 3 |
| PTRS:7820 | Seminar in Rehabilitation Science (taken twice for 1 s.h. each) | 2 |
| PTRS:7880 | Teaching Practicum | arr. |
| BIOS:5120/ <br> IGPI:5120/ <br> STAT:5610 | Regression Modeling and ANOVA in the Health Sciences | 3 |
| BMED:7270 | Scholarly Integrity/Responsible Conduct of Research I | 0 |
| BMED:7271 | Scholarly Integrity/Responsible Conduct of Research II | 0 |
| PSQF:7385/ <br> CSED:7385/ <br> EDTL:7385/ <br> EPLS:7385/ <br> GRAD:7385 | Teaching and Learning in Higher Education | 3 |
| One of these: |  |  |
| BIOS:4120 | Introduction to Biostatistics | 3 |
| STAT:4143/ PSQF:4143 | Introduction to Statistical Methods | 3 |

## Research Requirement

Students complete at least 27 s.h. from the following. The capstone course PTRS:7900 is recommended but not required for students who enter the program with a master's or doctoral-level degree; however, it is required for students who enter with a bachelor's degree.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| PTRS:7826 | Scientific Writing in Rehabilitation Science | 2 |
| PTRS:7884 | Practicum in Research | arr. |
| PTRS:7895 | Advanced Seminar in Rehabilitation Science | arr. |
| PTRS:7900 | Rehabilitation Research Capstone Project | arr. |
| PTRS:7927 | Research in Rehabilitation Science | arr. |
| PTRS:7930 | Critical Thinking in NeuroMechanical Systems | arr. |
| PTRS:7931 | Critical Thinking in Pain | arr. |
| PTRS:7932 | Critical Thinking in Biomechanics and Human Performance Assessment | arr. |
| PTRS:7933 | Critical Thinking in ActivityBased Plasticity | arr. |
| PTRS:7934 | Critical Thinking in Neural Plasticity | arr. |
| PTRS:7935 | Critical Thinking in Movement Science | arr. |
| PTRS:7936 | Critical Thinking in Cardiovascular Physiology | arr. |
| PTRS:7990 | Thesis: Rehabilitation Science | arr. |

## Specialty Content Requirement

Students must complete at least 9 s.h. in their scientific specialty area. Students may choose courses from the following list, but other courses suited to a student's background knowledge and interest area are considered.

| Course \# | Title | Hours | average of at least 3.00 and scores at or above |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Anatomy and Cell Biology |  |  | the 50th percenti | for each section of the Graduate |  |
| ACB:8401 | Advanced Human Anatomy | arr. | (GRE) General Test. A minimum of two years of clinical experience may be considered highly desirable, depending on the research interest area. |  |  |
| Epidemiology |  |  |  |  |  |
| EPID:6900 | Design of Intervention and Clinical Trials | 3 | Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL). Acceptable scores for the International English Language Testing System (IELTS) and the Duolingo English Test (DET) also may be submitted. |  |  |
| Health and Human Physiology |  |  |  |  |  |
| HHP:6130 | Advanced Skeletal Muscle Physiology | 1,3 |  |  |  |
| HHP:6150 | Advanced Clinical Exercise Physiology | 1,3 | Application materials must include a complete Graduate College application form, test scores, transcripts, three letters of |  |  |
| HHP:6300 | Motor Control Seminar | 1 |  |  |  |
| HHP:6410 | Advanced Integrative Physiology of Exercise | 1,3 | Personal interviews are required of all applicants selected for consideration by the admissions committee. On-campus interviews are preferred, but telephone interviews may be substituted when necessary. |  |  |
| HHP:6460 | Advanced Cardiovascular Physiology | 1,3 |  |  |  |
| HHP:6470 | Advanced Physiology of Aging | 1,3 | Application deadlines are Oct. 15 for spring semester entry (notification by Dec. 15); March 15 for summer entry (notification by May 15); and May 15 for fall semester entry (notification by July 15). |  |  |
| HHP:6480 | Advanced Human Pharmacology | 1,3 |  |  |  |
| Neuroscience |  |  |  |  |  |
| NSCI:7235/ <br> NEUR:7235 | Neurobiology of Disease | 3 | Financial Support |  |  |
| Nursing |  |  | A number of assistantships are available for PhD students. Faculty advisors provide guidance for students seeking external scholarship support through foundations and federal programs that support PhD training. |  |  |
| NURS:3460 | Professional Role II: Research | 3 |  |  |  |
| Occupational and Environmental Health |  |  |  |  |  |
| OEH:4310 | Occupational Ergonomics: | 3 |  |  |  |
|  | Principles |  | Career Advancement |  |  |
| Pharmacology |  |  |  |  |  |
| PCOL:5137 | Neurotransmitters | 1 | The PhD program trains students to obtain positions as professors and researchers in rehabilitation science. |  |  |
| PCOL:6207 | Ion Channel Pharmacology | 1 |  |  |  |
| PCOL:6250 | Advanced Problem Solving in Pharmacological Sciences | 1 | Academic Plans |  |  |
| Physical Therapy |  |  |  |  |  |
| PTRS:5210 | Kinesiology and Pathomechanics | 4 | Sample Plan of Study |  |  |
| PTRS:5206 | Cardiopulmonary Therapeutics | 3 | Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI. |  |  |
| PTRS:6224 | Activity-Based Neural and Musculoskeletal Plasticity in Health Care | 4 |  |  |  |
| PTRS:6250 | Critical Inquiry I: EvidenceBased Practice | 2 | Physical Rehabilitation Science, PhD |  |  |

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Online, web-based training on the Collaborative Institutional Training Initiative (CITI) must be completed before enrolling in BMED:7270 and BMED:7271.
c Typically offered during fall semesters of even years.
d Take twice for a total of 2 s.h.
e At least 27 s.h. of research content courses are required, but students typically take more to fulfill degree requirements. The capstone course PTRS:7900 is recommended but not required for students who enter the program with a master's or doctoral-level degree; however, it is required for students who enter with a bachelor's degree. Work with faculty advisor to determine appropriate research coursework and sequence.
f Students must complete at least 9 s.h. in their scientific specialty area; work with faculty advisor to determine appropriate graduate coursework and sequence.
g Dissertation defense.

Website: https://medicine.uiowa.edu/pa/
The physician assistant profession is one of the newest and most exciting in health care. Physician assistants (PAs) are licensed to practice medicine with physician supervision. They are responsible for making medical decisions and providing a broad range of diagnostic and therapeutic services.

In the traditional office setting, PAs see patients, obtain histories, perform physical examinations, and order necessary laboratory and/ or radiological studies. Based on this information, the PA establishes a diagnosis, develops an appropriate management plan, and initiates treatment that may include prescribing medications. The physician is consulted as needed and remains ultimately responsible for the care provided by the physician/PA team. PAs also are involved in both patient and community health education.
The Department of Physician Assistant Studies and Services is located on the University of Iowa health sciences campus, which includes University of Iowa Hospitals \& Clinics, one of the nation's largest university-owned teaching hospitals.

## Programs

## Graduate Program of Study

## Major

- Master of Physician Assistant Studies [p. 1840]

## Physician Assistant Studies and Services Courses

[^6]PA:8213 Fundamentals of Radiology for Physician Assistant Students

1 s.h.
Theory and practice for interpretation of radiographs including general radiology, body, chest, musculoskeletal, pediatrics, and neurology. Requirements: enrollment in physician assistant studies and services.
PA:8214 Fundamentals of Clinical Laboratory Medicine for Physician Assistant Students
Theory and practice of selected clinical laboratory techniques and procedures; emphasis on effective utilization of clinical laboratory in diagnosis and management of disease states. Requirements: enrollment in physician assistant studies and services.
PA:8301 Seminar for Physician Assistant Students 1 s.h.
Professional issues that affect the physician assistant's practice of medicine.

PA:8302 Physician Assistant Professional and Clinical Skills 1 s.h. Hands-on experience and activities; suturing, injections, prescription and order writing, medical records, patient confidentiality, Iowa Law governing physician assistant practice, motivational interviewing, toddler and disability exams.
PA:8303 Physician Assistant Senior Capstone 1 s.h.
Demonstration of strong clinical knowledge base and proficiency in basic clinical problem solving; focus on student's ability to think logically and critically, integrate and synthesize knowledge, access evidence-based medical resources, document patient care appropriately, apply clinical knowledge, and demonstrate professional behavior. Requirements: enrollment in physician assistant studies and services.

## PA:8304 Emergency Medicine for Physician Assistant

 Studentsarr.
Obtaining and recording pertinent historical data, obtaining indicated laboratory studies, assessing the results, arriving at a diagnosis, formulating a treatment plan, implementing appropriate therapy.
PA:8305 Gynecology for Physician Assistant Students 4 s.h. Opportunity to develop proficiency in history and physical exams of gynecological patients; outpatient, family planning, gynecological cancer, concepts of diagnostic techniques and therapy.
PA:8306 Family Practice I for Physician Assistant Students 4 s.h. Obtaining and recording complete history and physical exams; formulation of differential diagnosis and problem list; ordering, obtaining, and interpreting lab and diagnostic studies; implementation of therapeutic procedures and treatment plans.
PA:8307 Family Practice II for Physician Assistant Students 4 s.h. Opportunity to participate in delivery of ambulatory primary care; at a different site from PA:8306.
PA:8308 General Surgery for Physician Assistant Students 4-6 s.h. Preparation for work as an assistant to the generalist; outpatient and inpatient surgical services, including surgical procedures and management of postoperative course.

## PA:8309 Internal Medicine for Physician Assistant

 StudentsEliciting a medical history, doing a pertinent physical exam, obtaining indicated lab studies, assessment of results, formulation of management plan, and implementation of appropriate therapy for common internal medicine problems.

PA:8310 Pediatrics for Physician Assistant Students arr.
Knowledge and skills required for providing appropriate medical care to infants, children, and adolescents; initiation and promotion of interpersonal relationships.
PA:8311 Psychiatry for Physician Assistant Students 4 s.h. Training in history and physical exams of psychiatry patients, including individual and family therapy, vocational testing and guidance, development of interviewing skills.

PA:8312 Long-Term Care for Physician Assistant Students arr. Development of clinical knowledge and skill in diagnosing, treating, and performing procedures for patients of long-term care settings; knowledge of relevant conditions.

## PA:8320 Dermatology Elective for Physician Assistant

 Studentsarr. PA:8335 Internal Medicine Elective for Physician Assistant Students
Training in varied internal medicine problems; recognition, appropriate treatment.
PA:8336 Internal Medicine (Cardiology) Elective for Physician Assistant Students
arr. Cardiovascular assessment and problem management; experience with wide range of acute, chronic, common, and rare diseases.
PA:8322 Obstetrics for Physician Assistant Students
arr. PA:8337 Internal Medicine (EKG) Elective for Physician Assistant Students
arr.
Experience reading electrocardiograms, interpreting cardiac arrhythmias, performing and evaluating EKG stress tests.
PA:8338 Internal Medicine (Gastroenterology) Elective for Physician Assistant Students arr. Experience with a wide range of gastrointestinal pathology; history and physical exams of gastrointestinal diagnostic procedures, followup care of patients through outpatient clinics.
PA:8339 Internal Medicine (Oncology) Elective for Physician Assistant Students
Experience to develop diagnostic skills in clinical oncology and gain familiarity with methods of staging common cancers; assistance in therapy and outpatient management of cancer patients.

## PA:8340 Internal Medicine (Geriatrics) Elective for Physician

 Assistant StudentsFamiliarity with broad spectrum of medical conditions among the elderly; experience in history and physical exams, diagnosis of geriatric patients along with follow-up visits.

## PA:8341 Internal Medicine (Pulmonary) Elective for Physician Assistant Students <br> arr. Development of basic clinical knowledge and skills for diagnosis, treatment, and management of pulmonary diseases. <br> PA:8342 Internal Medicine (Pallative Care/Hospice) Elective for Physician Assistant Students

Work on a hospice care team performing evaluation, treatment, and education of patients with terminal illnesses; dealing with the prospect of death.

## PA:8343 Internal Medicine (Infectious Disease) Elective for Physician Assistant Students <br> arr.

Development of basic clinical knowledge and skills for diagnoses, treatment, and management of infectious diseases.

PA:8345 Urology Elective for Physician Assistant Students arr Proficiency in managing patients with urologic conditions; skill in taking a urologic history, performing physical exams, interpreting laboratory studies and data.
PA:8346 Family Practice Elective for Physician Assistant Students
arr.
Proficiency in delivering ambulatory primary care.

## PA:8347 Gynecology Elective (Women's Health) for Physician

Assistant Students
arr.
Experience in annual gynecologic exams, PAP screening, gynecology problems, contraception issues, STD screening and counseling, common gynecologic procedures.
PA:8348 Migrant Health Elective for Physician Assistant Students
arr.
Basic clinical knowledge and skills for diagnosis, treatment, and prevention of diseases, injuries, and conditions related to environmental exposure in migrant worker populations.

PA:8349 Occupational Medicine Elective for Physician Assistant

## Students

arr.
Basic clinical knowledge and skills for diagnosis, treatment, and prevention of work-related diseases, injuries, and conditions related to environmental exposure.
PA:8350 Pediatrics (Neonatology) Elective for Physician Assistant Students arr.
Basic clinical knowledge and skill for diagnosis, treatment, and management of critically ill infants.
PA:8351 Internal Medicine (Rheumatology) for Physician Assistant Students
arr.
Basic clinical knowledge and skills for diagnosis, treatment, and management of rheumatologic diseases.
PA:8352 Medical Intensive Care for Physician Assistant Students
arr.
Basic clinical knowledge and skills for diagnosis, treatment, and management of critically ill patients.
PA:8353 International Medicine for Physician Assistant Students
arr.
Basic clinical knowledge and skills for diagnosis, treatment, and prevention of diseases, injuries, and conditions relevant to international medicine.

PA:8355 Gynecologic Oncology Elective for Physician Assistant

## Students

arr.
Experience developing diagnostic skills in clinical gynecologic oncology, learning methods of staging specific cancers; and assisting in therapy and outpatient management of patients with varied cancers.

## PA:8357 Physician Assistant Transitions to Clinical

Rotations 1 s.h.

Additional didactic and hands-on skills essential for preparation prior to core and elective clinical rotations. Requirements: enrollment in physician assistant studies and services.
PA:8358 Internal Medicine (Endocrinology) Elective for Physician Assistant Students arr.
Basic clinical knowledge and skills for diagnosis treatment and management for common endocrinology diseases.
PA:8360 Physician Assistant Summer Clinicals 6 s.h. Clinical course for physician assistant students during their second summer session.

PA:8361 Physician Assistant Remediation and Self Study arr. Completion of remediation or self-study program requirements.
PA:8362 Independent Study for Physician Assistant Students arr. Students work on alternative experiences to supplement coursework and/or clinical experiences throughout various areas of the physician assistant program; self-guided experiences with faculty supervision.
PA:8363 Primary Care Academic Rotation
arr.
Additional academic opportunities that enhance previous experiences gained in a clinical setting; emphasis on student participation in direct activities to supplement primary care experiences with observation and simulation activities as needed to provide a balanced experience in meeting course objectives.
PA:8364 Emergency Medicine Elective for Physician Assistant Students $\quad \mathbf{2 , 4 , 6 , 8 , 1 0}$ s.h.
Training in varied emergency medicine problems; recognition and appropriate treatments.

# Master of Physician Assistant Studies, MPA 

#### Abstract

The Master of Physician Assistant Studies (MPA) program emphasizes primary care medicine, particularly family medicine. It also offers elective clinical rotations in selected medical subspecialties. Students who complete the program are eligible to take the National Certifying Examination for Primary Care Physician Assistants, which they must complete successfully in order to register as physician assistants in the United States.

The Department of Physician Assistant Studies and Services is accredited by the Accreditation Review Commission on Education for the Physician Assistant and is a member of the Physician Assistant Education Association.

## Requirements

The Master of Physician Assistant Studies (MPA) requires a minimum of 114 s.h. of credit. The curriculum spans 28 months and consists of a didactic phase and a clinical phase. The program begins in August.
The Master of Physician Assistant Studies requires the following work.

## Didactic Curriculum

The MPA program's didactic phase is built on a triple-helix model whose three strands consist of clinical and professional skills (CAPS), mechanisms of health and disease (MOHD), and medicine and society (MAS). The strands are interwoven, assuring that their material is integrated and revisited throughout the didactic phase, so that students' understanding and mastery of the material deepens progressively.

The didactic curriculum consists of the following courses.

## Human Anatomy and Foundations of Life

ACB:8101 Medical Gross Human Anatomy involves complete dissection of the human body. Students learn to identify the human body's components and learn how their structures and locations relate to their functions. They also learn much of the language they will need in order to communicate accurately and specifically with patients and other physicians.
MED:8123 Foundations of Cellular Life covers genetics, embryology, molecular biology, biochemistry, cell biology, and histology. Students learn the molecular events required for cellular life and how cells grow and interact to form the basic tissues of the human body. This course provides the necessary framework students will need in order to begin the mechanisms of health and disease series.

## Clinical and Professional Skills

The clinical and professional skills (CAPS) strand provides students with the knowledge, skills, and attitudes required for professional development and clinical excellence, including the sense of inquiry and lifelong habits of skill acquisition, self-assessment, and reflective practice. CAPS features developmental learning through increasingly challenging experiences across the curriculum, repeated practice opportunities, observation and feedback, and self-directed learning and reflection. CAPS requires the following three courses.
MED:8121 Clinical and Professional Skills I introduces students to concepts of clinical reasoning, communication, physical examination, and evidence-based clinical practice as well as the principles of biomedical ethics. The Longitudinal Clinical Mentor (LCM) program allows early clinical interactions and helps place classroom experiences into the context of patient care. Through interactions with
students from other health sciences colleges, MPA students begin to explore the interprofessional approach to caring for patients.
MED:8131 Clinical and Professional Skills II reinforces clinical reasoning concepts from MED:8121 and introduces additional elements of clinical reasoning, which are practiced through interactions with standardized patients and through Longitudinal Clinical Mentor clinical visits. The varied experiences help students gain a deeper appreciation for issues in biomedical ethics. As part of interprofessional education, students focus on the strengths and barriers involved in providing comprehensive interdisciplinary patient care.

MED:8221 Clinical and Professional Skills III develops advanced clinical reasoning skills through focused patient encounters and interactions with special patient populations. Emphasis is on students' ability to integrate and use concepts from the other curricular strands that are required for cost-conscious, patient-centered, interdisciplinary care.

## Mechanisms of Health and Disease

The mechanisms of health and disease (MOHD) strand focuses on multisystem mechanisms. MOHD requires the following five courses.

MED:8124 Mechanisms of Health and Disease I covers normal and healthy processes within and among the mechanisms of oxygenation, metabolism, and genetics/development.

MED:8133 Mechanisms of Health and Disease II covers normal and healthy processes within and among the mechanisms of immunology/ inflammation, locomotion/integument, and neuropsychiatry.
MED:8134 Mechanisms of Health and Disease III covers abnormalities or disruptions leading to disease within and among the mechanisms of oxygenation, metabolism, and genetics/development.

MED:8223 Mechanisms of Health and Disease IV covers abnormalities or disruptions leading to disease within and among the mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

MED:8224 Mechanisms of Health and Disease
Keystone provides a transition from classroom instruction in MED:8124, MED:8133, MED:8134, and MED:8223 to clinical practice. Foundational information from those courses is approached from the perspective of common clinic encounters. Students make diagnostic and management decisions about common important clinical problems using the foundational knowledge they gained from those courses.

## Medicine and Society

The medicine and society (MAS) strand teaches students about disease prevention, health promotion services, public health, epidemiology, health services organizations and delivery, and community dimensions of medical practice. MAS requires the following three courses.
MED:8122 Medicine and Society I introduces social determinants of health. Students investigate the influence and impact of culture and the community on health care, learn about community resources, and apply health and risk assessment to individual patients and to themselves.
MED:8132 Medicine and Society II focuses on public health and epidemiology, with attention to screening, global health, and environmental hazards.

MED:8222 Medicine and Society III focuses on health services organization and delivery, with emphasis on community dimensions of medical practice and patient safety.

## Summer Curriculum

Summer curriculum consists of a six-week summer session that includes didactic workshop material in cardiology and radiology. Students complete a two-week introduction to clinical medicine before beginning the clinical rotations. Summer curriculum requires the following five courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PA:8212 | Fundamentals of EKG and <br> ACLS for Physician Assistant | 2 |
| PA:8213 | Students |  |
| PA:8214 | Fundamentals of Radiology for <br> Physician Assistant Students | 1 |
| PA:8301 | Fundamentals of Clinical <br> Laboratory Medicine for <br> Physician Assistant Students | 1 |
| PA:8302 | Seminar for Physician Assistant <br> Students | 1 |
|  | Physician Assistant Professional <br> and Clinical Skills | 1 |

## Clinical Curriculum

The program's second phase concentrates on clinical education. Students complete four weeks of didactic workshops and rotations and a 36-week core of required primary care clinical rotations, including general internal medicine, surgery, family medicine, pediatrics, emergency medicine, gynecology, and psychiatry in affiliated hospitals throughout the United States and select international locations. Students then select eight weeks of electives which may include rotations such as geriatrics, cardiology, dermatology, and orthopedics.

The primary care clinical rotations are designed to provide instruction and experience in caring for patients in a way that enables students to integrate the knowledge, skills, behaviors, and attitudes they learned in the program's didactic phase. Clinical training is provided at University of Iowa Hospitals \& Clinics, the VA Iowa City Health Care, the VA Central Iowa Health Care System and Broadlawns Medical Center in Des Moines, and other affiliated hospitals throughout Iowa. In elective rotations, students gain additional clinical experience through placement with selected preceptors involved in office-based practices, typically in medically underserved rural areas.

Students also complete a master's degree project as part of the clinical curriculum.

## Required Clinical Rotation

The following clinical rotations are required.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PA:8304 | Emergency Medicine for <br> Physician Assistant Students | 4 |
| PA:8305 | Gynecology for Physician <br> Assistant Students | 4 |
| PA:8306 | Family Practice I for Physician <br> Assistant Students | 4 |
| PA:8307 | Family Practice II for Physician <br> Assistant Students | 4 |
| PA:8309 | General Surgery for Physician <br> Assistant Students | 6 |
| PA:8310 | Internal Medicine for Physician <br> Assistant Students <br> Pediatrics for Physician <br> Assistant Students | 6 |

Psychiatry for Physician Assistant Students

## Elective Clinical Rotations

Students select elective clinical rotations from one of the general categories listed below. Subspecialties for the clinical rotations are included under each general category. Registration in the subspecialty area may vary based on availability from year to year.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PA:8325 | Pediatric Elective for Physician <br> Assistant Students | arr. |
| Subspecialty areas in pediatrics may include, but <br> are not limited to allergy, bone marrow transplant, <br> cardiology, gastroenterology, genetics, neonatal <br> intensive care (NICU), neonatology, orthopedics, <br> pulmonary, and psychiatry <br> Radiology Elective for <br> Physician Assistant Students |  |  |
| PA:8326 8329 | Psychiatry Elective for <br> Physician Assistant Students | arr. |
| PA:8330 | Surgery Elective for <br> Physician Assistant Students <br> (Subspeciality areas: burn, <br> cardiothoracic, neurology, <br> surgical neonatal intensive care <br> (SNICU), transplant and organ <br> retrieval) | arr. |

Subspecialty areas in surgery may include, but are not limited to burn, cardiothoracic, neurology, surgical neonatal intensive care (SNICU), and transplant and organ retrieval

| PA:8335 | Internal Medicine Elective for <br> Physician Assistant Students |
| :--- | :--- |

Subspecialty areas in internal medicine include, but are not limited to alternative medicine, cardiology, correctional medicine, dermatology, endocrinology, gastroenterology, genetics, gynecological oncology, hospice, infectious disease, interventional radiology, medical intensive care unit (MICU), migrant health, nephrology, neurology, obstetrics, ophthalmology, oncology, orthopedics, otolaryngology/ear, nose, throat, palliative care, pulmonary, rheumatology, and urology

| PA:8337 | Internal Medicine (EKG) Elective for Physician Assistant Students | arr. |
| :---: | :---: | :---: |
| PA:8346 | Family Practice Elective for Physician Assistant Students | arr. |
| PA:8347 | Gynecology Elective (Women's Health) for Physician Assistant Students | arr. |
| PA:8353 | International Medicine for Physician Assistant Students | arr. |
| PA:8364 | Emergency Medicine Elective for Physician Assistant Students | 2,4,6,8,10 |

Subspecialty areas in emergency medicine may include, but are not limited to occupational health, toxicology, urgent care, and wilderness medicine

## Admission

Applicants must:

- be citizens or permanent residents of the United States;
- hold a baccalaureate degree from an accredited institution in the United States (the degree does not have to be completed at the time of admission, but must be conferred prior to the start of the program) ${ }^{1}$;
- have a minimum cumulative grade-point average (GPA) of 3.00 on a 4.00 scale;
- have a minimum overall science GPA of 3.20 on a 4.00 scale or a science GPA of at least 3.20 on a 4.00 scale on the most recent 40 s.h. of college-level, science-based coursework (science courses are subject to department approval);
- have completed the prerequisite courses no more than 10 years before they apply and all courses must be taken for letter grades (see "Prerequisite Science Courses" below);
- have taken the Graduate Record Examination (GRE) General Test no more than 10 years before they apply (must score at the 25th percentile or higher in each of the individual sections -quantitative, verbal, and analytical) or the Medical College Admission Test (MCAT) no more than 10 years before they apply (no minimum MCAT score is required at this time);
- have completed a minimum of 1,000 hours of direct patient health care experience by Dec. 31 of the application year (hours subject to departmental approval and applicants can be awarded between $0-100 \%$ of hours completed);
- submit three letters of recommendation (one must be from a collegiate academic reference and one must be from a health care supervisor (shadowing experience does not count, but may be used for the third recommendation letter);
- meet the admission requirements of the Graduate College (see the Manual of Rules and Regulations on the Graduate College website);
- have taken the Test of English as a Foreign Language (TOEFL) if English is not their native language (only the internet-based test is accepted and applicants must have a total score of at least 93 with a speaking score of at least 26) or have an acceptable score on the International English Language Testing System (IELTS) or the Duolingo English Test (DET) ${ }^{2}$; and
- be able to meet the program's technical standards (see "Technical Standards" below).
${ }^{1}$ International applicants will have their credentials reviewed for degree completion and equivalency.
2 International applicants who do not speak English as their native language should have TOEFL scores sent from the Educational Testing Service (ETS) to the Department of Physician Assistant Studies and Services or have their acceptable IELTS or DET scores mailed to the University of Iowa. This requirement may be waived for applicants with a master's or doctoral degree from an accredited U.S. institution.

## Prerequisite Science Courses

Applicants must have completed preparatory science courses in biological, chemical, and statistical sciences. Prerequisite courses can be in progress at the time of admission unless stated below. Science-based courses are subject to the approval by the Department of Physician Assistant Studies and Services.

## Biological Science

These courses are required.

- An introductory biology or zoology course sequence (minimum of a two semester sequence unless otherwise approved).
- An animal, exercise, or human physiology course.
- A minimum of three additional upper-level biological science courses. To qualify as upper level, the biological science courses must require a prerequisite course to enroll. Courses that have been used to satisfy this requirement include cell biology, cell physiology, endocrinology, genetics, histology, immunology, microbiology, molecular biology, neurobiology, pharmacology, and other related disciplines.

## Chemical Science

These courses are required.

- An introductory chemistry course sequence (a minimum of a twosemester sequence, unless otherwise approved).
- At least one semester of organic chemistry (must be at a higher level than a survey of organic chemistry course).
- At least one semester of biochemistry (must be at a higher level than a survey of biochemistry course and be completed at the time of application).

## Statistical Science

This course is required.

- Any course with a statistical focus, such as a general, introductory, psychological, or business statistics course; or biostatistics; or a qualitative research methods course.

Satisfaction of the basic admission requirements does not ensure acceptance to the program. The admission committee selects the applicants it considers best qualified. The admission committee requests interviews with the most qualified applicants.

## Technical Standards

Individuals admitted to the Department of Physician Assistant Studies and Services must possess the capability to complete the entire curriculum and earn the Master of Physician Assistant Studies degree. The curriculum requires demonstrated proficiency in a variety of cognitive, problem-solving, manipulative, communicative, and interpersonal skills. For more information, view the University of Iowa Carver College of Medicine Technical Standards for Admission and Retention on the Department of Physician Assistant Studies and Services website

## Application Timeline and Process

Applications are accepted from the end of April to Oct. 1 for entry into the program the following August. Applicants must apply through the Central Application Service for Physician Assistants (CASPA).

The admission committee prefers that the majority of prerequisite course requirements be completed by the Oct. 1 application deadline date.

All materials must be received and verified by CASPA, and all additional information requested by the Physician Assistant Studies and Services Program submitted by the Oct. 1 deadline.

All final decisions related to admission deadlines, process, and decisions regarding admission are up to the department administrator, in collaboration with the admission committee.

## Career Advancement

Physician assistants work in a variety of settings, including medical offices, hospital emergency rooms, nursing homes, rural satellite clinics, health maintenance organizations, and patients' homes.

## Psychiatry

## Chair

\author{

- Peggy C. Nopoulos
}

Faculty: https://medicine.uiowa.edu/psychiatry/profile/
Website: https://medicine.uiowa.edu/psychiatry/
The Department of Psychiatry teaches MD students, principally during their third year, and trains resident physicians for academic and clinical careers in psychiatry.

## Research

Department of Psychiatry staff members are involved in genetic and family studies of psychiatric disorders and research in genetic and biological psychiatry, neurochemistry, neuroimaging, neurophysiology, neuropsychiatry, psychosocial aspects of behavior, and neuroinvasive brain stimulation.

The department's students and residents have many research opportunities in psychiatry and in the basic science areas of neurochemistry, neurophysiology, and electrophysiology. The clinical areas of psychology, child psychiatry, and psychotherapy also offer opportunities for research and further study to a limited number of students.

## Residency

The department offers a four-year training program approved by the Residency Review Committee of the American Medical Association. Training experiences are available at University of Iowa Hospitals \& Clinics and at the VA Iowa City Health Care. Additional experiences are available at affiliated institutions: Broadlawns Medical Center in Des Moines, the Iowa Medical and Classification Center at Oakdale, the Mid-Eastern Iowa Community Mental Health Center in Iowa City, and the Independence Mental Health Institute (Iowa Department of Human Services).

The department also offers an approved two-year residency in child psychiatry. Fellowships in consult/liaison psychiatry and addiction medicine are available after residency training.

## Psychiatry Courses

## PSYC:8301 Clinical Psychiatry

Requirements: third-year MD enrollment.
PSYC:8401 Adult Psychiatry
Requirements: MD enrollment.
PSYC:8402 Child Psychiatry
arr.
Roles of child psychiatry as a consultation service. Requirements: MD enrollment.

## PSYC:8403 Adult Outpatient Psychiatry and

## Psychotherapy

2,4 s.h.
Diagnostic assessment, evaluation, treatment of psychiatric patients; exposure to both psychotherapeutic, psychopharmacologic treatments. Requirements: MD enrollment.

PSYC:8404 Women's Wellness and Counseling Service 4 s.h.
Experience evaluating and treating women with mental illness, with some emphasis on practitioner's autonomy; four-week rotation. Requirements: psychiatry clerkship.

PSYC:8405 Advanced Inpatient Subinternship in Medical Psychiatry
Hands-on experience in evaluation and treatment of patients with combined medical and psychiatric disease; decisions regarding appropriate consultations, diagnostic tests, treatment; etiology and pathophysiology. Requirements: MD enrollment.

## PSYC:8408 Advanced Inpatient Subinternship in Mood/Psychotic

4 s.h.
Subinternship in adult psychiatry; experiences that maximize autonomy and responsibility; inpatient rotation focuses on one subspecialty area (psychotic disorders or mood disorders); emphasis on substantial medical comorbidity; assess and address medical and psychiatric needs of assigned patients in a collaborative and integrative fashion; assess and manage patients independently at the level of a psychiatry intern, reporting directly to the attending; call is required; didactic curriculum focuses on critical appraisal of medical literature. Prerequisites: PSYC:8301. Requirements: fourth-year MD enrollment.

## PSYC:8409 Eating Disorders

2,4 s.h.
Inpatient rotation; emphasis on co-occurring psychiatric and comorbid medical conditions associated with eating disorders; patient assessment and management at an advanced level; direct patient care and engagement in clinical decision-making for complex patients with substantial comorbidity; call is required; student experience maximizes autonomy and responsibility; didactic curriculum; focus on critical appraisal of relevant medical literature. Prerequisites: PSYC:8301. Requirements: fourth-year MD enrollment.

## PSYC:8410 Intellectual Disability

2,4 s.h.
In-depth two week clinical experience in the interdisciplinary approach to assessment and management of individuals with intellectual disability. Requirements: MD enrollment.

## PSYC:8411 Substance Use

2,4 s.h.
In-depth clinical experience in assessment and management of individuals with alcohol and drug abuse. Requirements: MD enrollment.

PSYC:8412 Emergency Psychiatry
2,4 s.h.
In-depth clinical experience in assessment and management of acute psychiatric illness under supervision of faculty with expertise in care within this setting; clinical experiences centered in emergency department at University of Iowa Hospitals \& Clinics. Prerequisites: PSYC:8301. Requirements: third- or fourth-year MD enrollment.
PSYC:8413 The Thriving Physician
2 s.h.
Two-week elective for medical students in their clinical years; designed to promote awareness, wellbeing, compassion, and career satisfaction through contemplative practices and the integration of concepts of positive psychology into daily living; through readings, discussions, and experiential activities, physicians-in-training will learn how to engage in reflective personal and professional self-care; classes will be half-day in length with time outside of class dedicated to practicing and incorporating skills into everyday activities. Requirements: MD enrollment.

## PSYC:8414 Consultation Psychiatry

2,4 s.h.
Opportunity for in-depth clinical experience in psychiatric assessment and management of general medical and surgical patients; elective clerks serve on consultation-liaison psychiatry teams at University of Iowa Hospitals \& Clinics and the VA Iowa City Health Care; may include opportunities for outpatient work in relevant settings (e.g., emergency psychiatry, outpatient clinics providing integrated psychiatric and medical care). Requirements: MD enrollment.
PSYC:8415 Geriatric Inpatient Psychiatry
4 s.h.
Rotation in Department of Psychiatry specialized inpatient geriatric psychiatry unit; students work under faculty and resident supervision.

PSYC:8417 Advanced Psychiatry, Des Moines, IA
4 s.h.
Medical students choose from several different options to become familiar with the practice of psychiatry in community hospital settings in the Des Moines area; evaluation and management of patients across lifespan and in subspecialty settings. Requirements: MD enrollment.
PSYC:8450 Continuity of Care in Psychiatry
4 s.h.
Experience in Psychiatry Continuity of Care Clinic; maximizes autonomy and responsibility in an outpatient continuous care setting. Requirements: fourth-year MD enrollment.
PSYC:8497 Research in Psychiatry
arr.
Experience and training in practical application of scientific methodology; work with research project at psychiatric service or affiliated cooperating research centers.
PSYC:8498 Psychiatry On Campus
arr.
Arranged by student with departmental approval. Requirements: MD enrollment.

PSYC:8499 Psychiatry Off Campus arr.
Requirements: MD enrollment.

## Radiation Oncology

## Chair

- John M. Buatti

Director, Medical Physics Residency Program<br>- Joël J. St-Aubin

## Director, Physician Residency Program

- Carryn M. Anderson

Associate Director, Physician Residency Program

- Kristin A. Plichta

Faculty: https://medicine.uiowa.edu/radiationoncology/profile/? appointment=PRIMARY\&category=\&query=\&page=1\&size=10
Website: https://medicine.uiowa.edu/radiationoncology/
Radiation oncology specializes in the delivery of radiation treatments for cancer patients. It includes treatments with linear accelerators as well as isotopes and temporary and permanent surgically implanted sources. Radiation oncologists also use these methods to treat some benign diseases, such as Graves' ophthalmopathy and trigeminal neuralgia. Treatments often employ stereotactic CT-image guided and MR-image guided techniques.

The Department of Radiation Oncology is dedicated to educating undergraduate and graduate students, MD and other health professions students, and residents. Its faculty members provide instruction for Doctor of Philosophy students in the Free Radical and Radiation Biology Program [p. 1774] through their participation in FRRB:3110 Medical Physics I, FRRB:3215 Medical Physics II, FRRB:5000 Radiation Biology, FRRB:7000 Redox Biology and Medicine, and FRRB:7001 Molecular and Cellular Biology of Cancer.
The department's professional staff provides training in radiation therapy technology for undergraduate students in the Radiation Sciences Program [p. 1846] by teaching courses RSTH:3120 Radiation Therapy Clinical Internship I, RSTH:3225 Radiation Therapy Clinical Internship II, RSTH:3325 Radiation Therapy Clinical Internship III, RSTH:4125 Radiation Therapy Clinical Internship IV, and RSTH:4225 Radiation Therapy Clinical Internship V.

The department also offers specialized research projects and sponsors postdoctoral students in biology, physics, and clinical disciplines by arrangement with the instructor or mentor. Frequently, students from the departments of Biomedical Engineering and Electrical and Computer Engineering are involved.

## Residency

The department provides a four-year physician residency training program in radiation oncology that includes clinical care and education. It also has a two-year residency program in medical physics.
MD students can elect a four-week radiation oncology rotation and/or a two-week multidisciplinary cancer care elective. Nursing students, dental residents, and fellows in gynecologic oncology, breast cancer, and in adult and pediatric hematology and oncology complete rotations in the department.

## Courses

## Radiation Oncology Courses

RADO:8401 Radiation Oncology for Medical Students 4 s.h. Integration of clinical oncology, physics, and cancer biology; clinical work with faculty mentors; experience in clinical evaluation, technical physics, biological application.
RADO:8491 Introduction to Radiation Oncology 2 s.h.
Role of radiation therapy in the management cancer patients; exposure to a variety of radiation oncology topics including basic principles of radiation oncology, radiation physics, radiation/cancer biology, oncologic work-up and management, and radiation treatment planning; for advanced medical students with an interest in radiation oncology or oncology related specialties.

## RADO:8497 Research in Radiation Oncology <br> arr. <br> Medical research, clinical or laboratory projects; individual study.

RADO:8498 Radiation Oncology On Campus
Arranged by student with department approval.
arr.
Arranged by student with department approval.
RADO:8499 Radiation Oncology Off Campus
arr.
Arranged by student with department approval.

## Radiation Sciences

# Director, Baccalaureate Degrees in the Radiation Sciences 

- Stephanie Ellingson

Director, Diagnostic Medical Sonography

- Stephanie Ellingson

Director, Radiation Therapy

- Jared L. Stiles

Director, Radiologic Technology

- Holly Bonfig-Becker

Director, Student Affairs

- Jennifer J. Maiers

Undergraduate major: radiation sciences (BS)
Website: https://medicine.uiowa.edu/radsci/
Radiation sciences professionals work with physicians to gather accurate patient information for diagnosis, treatment, and/or research of disease and injury. They provide direct patient care, produce quality images, and deliver treatment using a variety of radiation sources. The radiation sciences professional must apply knowledge, skill, and mature judgment while operating complex equipment safely and efficiently. Strong communication, organizational, and patient care skills are essential for a successful career in radiation sciences.

The University of Iowa's radiation sciences educational programs are designed to provide students with opportunities for intellectual, professional, and social growth. Students learn with faculty members and instructors who are committed to radiation sciences education.

Radiation sciences is one of two undergraduate majors in the field of medical imaging offered by the Carver College of Medicine. It encompasses radiologic technology, breast imaging, computed tomography, magnetic resonance imaging, cardiovascular interventional, diagnostic medical sonography, and radiation therapy programs. The other undergraduate major in medical imaging is nuclear medicine technology; see Nuclear Medicine Technology [p. 1805] in the catalog.

The Carver College of Medicine is located on the University of Iowa health sciences campus, which includes University of Iowa Hospitals \& Clinics, one of the nation's largest university-owned teaching hospitals. For information about the college's academic programs and resources, see Carver College of Medicine [p. 1729] in the catalog.
UI Health Care and the Carver College of Medicine have a proud academic tradition of preparing students for successful careers in the radiation sciences. Today, that tradition continues through its strong curriculum, quality clinical experience, and commitment to undergraduate education in the creation of images and treatment of patients using highly sophisticated equipment and techniques.

The Carver College of Medicine, in partnership with the Department of Radiology, shares the university's commitment to equal access, and consistent with its academic mission and standards, strives to achieve excellence through the advancement of diversity, equity, and inclusion. The college is mindful of all aspects of human difference and defines diversity in the broadest sense to mean inclusion of all persons. The programs it offers strive to create a welcoming and inclusive culture.

## Programs

## Undergraduate Program of Study Major

- Major in Radiation Sciences (Bachelor of Science) [p. 1854]

## Courses

- Breast Imaging Courses [p. 1846]
- Cardiovascular Interventional Courses [p. 1847]
- Computed Tomography Courses [p. 1847]
- Diagnostic Medical Sonography Courses [p. 1848]
- Magnetic Resonance Courses [p. 1850]
- Radiation Sciences Courses [p. 1850]
- Radiation Therapy Courses [p. 1851]
- Radiologic Technology Courses [p. 1851]

## Breast Imaging Courses

RSBI:3310 Patient Care for Breast Imaging 3 s.h. Foundation for providing high-quality patient care during breast imaging exams and procedures; patient communication, assessment, and treatment options including surgical, nonsurgical, and reconstruction. Requirements: acceptance to radiation sciences RT degree track or ARRT primary certification in radiography.

## RSBI:3315 Breast Imaging Clinical Internship I

Breast imaging clinical internship practicum at UI Health Care; rotation through department imaging rooms; competency and objective-based education with required clinical performance evaluations; participation in routine and advanced breast imaging exams; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:3225. Requirements: radiation sciences major.
RSBI:4110 Breast Imaging Procedures and Analysis 3 s.h. Breast imaging exams including technique, image evaluation, and positioning. Prerequisites: RSBI:3310. Requirements: acceptance to radiation sciences RT/BI track or ARRT primary certification in radiography.
RSBI:4115 Breast Imaging Clinical Internship II 4 s.h.
Breast imaging clinical internship scheduled at University of Iowa Hospital \& Clinics; rotation through department imaging rooms; competency and objective-based education with required clinical performance evaluations; experience facilitated by breast imaging technologists, radiologists, residents, and clinical coordinator; participation in routine and advanced breast imaging exams; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSBI:3315. Requirements: radiation sciences major.
RSBI:4120 Anatomy and Pathology for Breast Imaging 2 s.h Anatomy, localization terminology, histology, and cytology; pathology including mammographic appearance and reporting terminology; benign, high risk, and malignant conditions and their mammographic appearances.
RSBI:4130 Breast Imaging Acquisitions and Principles 2 s.h. Physics and hardware used in obtaining exams in breast imaging; equipment operations including design characteristics of mammography units, digital acquisition, display, and informatics.

## RSBI:4210 Breast Imaging Advanced Procedures and

## Analysis

Advanced breast imaging modalities including breast sonography, breast MRI, sentinel node mapping, and interventional procedures Prerequisites: RSBI:4110.

## RSBI: 4215 Breast Imaging Clinical Internship III 4 s.h.

Breast imaging clinical internship scheduled at University of Iowa Hospital \& Clinics; rotation through department imaging rooms; competency and objective-based education with required clinical performance evaluations; experience facilitated by breast imaging technologists, radiologists, residents, and clinical coordinator; participation in routine and advanced breast imaging exams; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSBI:4115.
RSBI:4220 Quality Control in Breast Imaging
Quality control aspects related to breast imaging; quality assurance and evaluation including accreditation, certification, and Mammography Quality Standards Act (MQSA) regulations; quality control including mammographers tests and digital quality control tests; medical physicist test including general quality control tests and quality control tests specific to digital imaging and tomosynthesis. Prerequisites: RSBI:4130.

## Cardiovascular Interventional Courses

## RSCI:4110 Vascular Anatomy

Normal arterial and venous anatomy of the circulatory system illustrated through angiographic, magnetic resonance imaging (MRI), and computed tomography (CG) images; common variants. Prerequisites: ACB:3110 or HHP:1100 or HHP: 1150 or HHP:3105 or HHP:3115.

## RSCI:4120 CVI Principles

4 s.h.
Imaging and accessory equipment for vascular interventional and cardiac interventional procedures; imaging equipment quality control; fundamental principles of vascular and cardiac procedures; patient preparation and care, radiation safety, contrast medium, pharmacology, and sedation. Corequisites: RSCI:4110. Requirements: acceptance to BS radiation science RT/CVI track or ARRT primary RT certification.

## RSCI:4130 Electrocardiogram and Hemodynamics 3 s.h.

ECG analysis, hemodynamic principles and waveform analysis, cardiac output, vascular resistance, calculations of stenotic valves. Prerequisites: ACB:3110 or HHP:1100.

## RSCI:4140 CVI Peripheral Procedures and Pathology <br> 3 s.h.

Angiographic and interventional procedures of the abdomen, thorax, and upper and lower extremities; associated pathologies. Prerequisites: RSCI:4110. Corequisites: RSCI:4120, if not taken as a prerequisite. Requirements: RSCI:4110 or three months CVI experience.

## RSCI:4150 CVI Neurology and Nonvascular Procedures and

## Pathology

Angiographic and interventional procedures of the head and neck; associated pathologies. Prerequisites: RSCI:4110. Corequisites:
RSCI:4120, if not taken as a prerequisite. Requirements: RSCI:4110 or three months CVI experience.
RSCI:4160 CVI Cardiac Procedures and Pathology 4 s.h. Cardiac diagnostic and interventional procedures; associated pathologies. Prerequisites: RSCI:4110. Corequisites: RSCI:4120 and RSCI:4130, if not taken as prerequisites. Requirements: RSCI:4110 or three months CVI experience.

RSCI:4170 CVI Clinical Internship III
4 s.h.
3 s.h. Cardiac-interventional clinical time scheduled at University of Iowa Hospitals \& Clinics and Mercy Hospital, Iowa City; rotations in adult cardiac, electrophysiology, and pediatric catheterization; competency and objective-based education provided with clinical performance evaluations and constructive feedback from CI staff and clinical coordinator; clinical coordinator facilitates schedules, rotations, learning objectives, evaluations, and competencies. Prerequisites: RSCI:4180. Corequisites: RSCI:4130 and RSCI:4160, if not taken as prerequisites. Requirements: acceptance to BS radiation sciences RT/ CVI track.

## RSCI:4180 CVI Clinical Internship II

 4 s.h.Vascular-interventional clinical time scheduled at University of Iowa Hospitals \& Clinics; labs specialize in peripheral, neuroand non-vascular procedures; competency and objective-based education; clinical performance evaluations providing constructive feedback from VI staff and clinical coordinator; clinical coordinator facilitates schedules, rotations, learning objectives, evaluations, and competencies. Prerequisites: RSCI:4190. Corequisites: RSCI:4140 and RSCI:4150, if not taken as prerequisites. Requirements: acceptance to BS radiation sciences RT/CVI track.
RSCI:4190 CVI Clinical Internship I 2 s.h.
Introduction to VI and CI labs including basic set up, equipment, and procedures; preparation to spend more concentrated time in each area for future internships; provides 192 hours of clinical experience over a 12-week period. Prerequisites: RSRT:3225. Requirements: acceptance to radiation sciences RT/CVI degree track or CVI clinical internship.

## Computed Tomography Courses

RSCT:4100 Sectional Anatomy for Imaging Sciences $\mathbf{3}$ s.h. Sectional anatomy identifiable on computed tomography and magnetic resonance imaging, including transverse, coronal, and sagittal planes. Prerequisites: ACB:3110 or HHP:1100 or HHP:1150 or HHP:3105 or HHP:3115.

RSCT:4105 Computed Tomography Clinical Internship I 2 s.h. Clinical internship scheduled at University of Iowa Hospitals \& Clinics; rotation through CT scanners, 3D lab, and radiation therapy departments; competency and objective-based education with required clinical performance evaluations; clinical coordinator facilitates schedules, rotations, learning objectives, evaluations, and competencies; experience facilitated by CT technologists, radiologists, residents, and coordinator; participation in routine and advanced CT scans; performance expectations become progressively higher as student gains experience and skills. Prerequisites: RSRT:3225. Requirements: acceptance to BS radiation sciences RT/CT track.

RSCT:4115 Computed Tomography Clinical Internship II 4 s.h. CT scanners, 3D lab, and radiation therapy department rotation at University of Iowa Hospitals \& Clinics; competency and objectivebased education with required clinical performance evaluations; clinical coordinator facilitates schedule, rotations, learning objectives, evaluations, and competencies; experience facilitated by CT technologists, radiologists, residents, and coordinator; participation in routine and advanced CT scans; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSCT:4105.
RSCT:4120 Computed Tomography Procedures I 4 s.h. Computed tomography procedures of the head, neck, thorax, mediastinum, abdomen, and pelvis; positioning techniques, patient preparation, monitoring and care, indications and contraindications for procedures; contrast media usage; basic protocol information with adjustments to tailor procedures for patient's indications; brief units on patient care relevant to CT; CT parameters and equipment. Corequisites: RSCT:4100. Requirements: acceptance to BS radiation sciences RT/CT track or ARRT primary certification in radiologic technology, nuclear medicine, or radiation therapy.

RSCT:4125 Computed Tomography Procedures II 4 s.h. Imaging information in musculoskeletal exams, 3D reconstruction, CTAs; cardiac; CT arthrography, PET/CT, SPECT/CT, virtual colonoscopy; procedure indications and contraindications, patient and room preparation, positioning techniques, contrast media usage, and scan parameters; basic protocol information and how to tailor procedures to a patient's indications; information in common pathological conditions found in CT images and protocol appearance variations. Prerequisites: RSCT:4120. Corequisites: RSCI:4110, if not taken as a prerequisite.

## RSCT:4130 Computed Tomography Physical Principles and

 QCPhysical principles and instrumentation; historical development and evolution of CT; characteristics of radiation, beam attenuation, linear attenuation coefficients, tissue characteristics, Hounsfield numbers, data acquisition, image manipulation techniques, tube configuration, collimation design and function, detectors, image quality factors, functions of CT computer and array processor; image processing and display examined from data acquisition through postprocessing and archiving; radiation protection practices and QC. Requirements: acceptance to BS radiation sciences RT/CT degree track or ARRT primary certification in radiologic technology, nuclear medicine, or radiation therapy.
RSCT:4215 Computed Tomography Clinical Internship III 4 s.h. CT scanners, 3D lab, and radiation therapy department rotation at University of Iowa Hospitals \& Clinics; competency and objectivebased education with required clinical performance evaluations; clinical coordinator facilitates schedule, rotations, learning objectives, evaluations, and competencies; experience facilitated by CT technologists, radiologists, residents, and coordinator; participation in routine and advanced CT scans; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSCT:4115.

## Diagnostic Medical Sonography Courses

RSMS:3100 Cardiac Sonography I
Anatomy and physiology of cardiovascular system imaged sonographically; proper sonographic imaging techniques, normal anatomy, exam protocol, and proper instrument settings; pathology and pathophysiology of common conditions related to adult cardiovascular system. Prerequisites: RSMS:3110 with a minimum grade of C .

## RSMS:3101 Cardiac Sonography I Lab <br> 2 s.h.

Laboratory-based learning and simulation experience involving basic sonographic adult cardiac imaging and clinical history analysis; students perform sonographic exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plane orientation, transducer manipulation, instrumentation, and exam protocols. Prerequisites: RSMS:3111 with a minimum grade of C. Corequisites: RSMS:3100.

## RSMS:3110 Foundations of Sonography

Sonography history, ergonomics, terminology, image orientation; basic theories of sound waves, echo production, transducers, equipment operation, body imaging, Doppler, hemodynamics.
RSMS:3111 Foundations of Sonography Lab
Sonography history, ergonomics, terminology, image orientation; basic theories of sound waves, echo production, transducers, equipment operation, body imaging, Doppler, and hemodynamics. Corequisites: RSMS:3110.

RSMS:3115 Diagnostic Medical Sonography Clinical Internship I

2 s.h.
Introductory clinical experience in health care setting developing a basic understanding of sonography clinical environment and professional practice standards; applying patient care techniques and developing professional communication skills. Prerequisites: RSP:2120.
RSMS:3120 Abdominal Sonography I
Embryology, anatomy, and physiology of various abdominal structures imaged sonographically; abdominal vasculature, hepatobiliary system, pancreas, urinary system, adrenals, spleen, male anatomy; proper sonographic imaging techniques, including appearance of normal anatomy, imaging protocol, proper instrument settings. Prerequisites: RSMS:3110 with a minimum grade of C.
RSMS:3121 Abdominal Sonography I Lab
1 s.h.
Laboratory-based learning and simulation experience in sonographic abdominal imaging; students perform exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plane orientation, transducer manipulation, instrumentation, and exam protocols. Prerequisites: RSMS:3111 with a minimum grade of C . Corequisites: RSMS:3120.
RSMS:3130 Obstetrical and Gynecological Sonography I 3 s.h. Embryology, anatomy, and physiology of the female reproductive system and developing fetus; proper sonographic imaging techniques, including appearance of normal anatomy, imaging protocol, proper instrument settings. Prerequisites: RSMS:3110 with a minimum grade of C.

RSMS:3131 Obstetrical and Gynecological Sonography I Lab

1 s.h. Laboratory-based learning and simulation experience involving basic sonographic obstetrical and gynecological imaging and clinical history analysis; students perform sonographic exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plan orientation, transducer manipulation, instrumentation, and exam protocols. Prerequisites: RSMS:3111 with a minimum grade of C. Corequisites: RSMS:3130.
3 s.h. RSMS:3140 Vascular Sonography I 3 s.h.
Anatomy and physiology of peripheral and cerebral vascular systems; analysis of hemodynamics, Doppler waveforms, pressure measurements, plethysmography, sonographic appearance, scanning techniques; evaluation of pathology and pathophysiology common to the lower extremity arterial and venous systems, and cerebrovascular system. Prerequisites: RSMS:3110 with a minimum grade of C.
RSMS:3141 Vascular Sonography I Lab
1 s.h.
Laboratory-based learning and simulation experience involving basic vascular sonographic imaging and clinical history analysis; students perform non-imaging vascular physiologic tests and sonographic exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plane orientation, transducer manipulation, instrumentation, and exam protocols. Prerequisites: RSMS:3111 with a minimum grade of C. Corequisites: RSMS:3140.
RSMS:3150 Cardiac Physiology and Hemodynamics 3 s.h.
Analysis of cardiac physiology and hemodynamics related to sonography; correlation with Doppler application in cardiovascular imaging, ECG, auscultation, cardiac catheterization; advanced and developing imaging techniques.
RSMS:3205 Cardiac Sonography II
3 s.h.
Sonographic evaluation of advanced pathophysiology of human heart; sonographic appearance, imaging techniques, and exam modification. Prerequisites: RSMS:3100.

## RSMS:3206 Cardiac Sonography II Lab

Laboratory-based learning and simulation experience involving the application of advanced sonographic cardiac imaging and clinical history analysis. Prerequisites: RSMS:3101. Corequisites: RSMS:3205.

## RSMS:3215 Diagnostic Medical Sonography Clinical Internship

 IIApplication of basic skills of sonographic imaging and physiologic vascular testing in the health care setting.

## RSMS:3230 Sonography Principles, Physics, and Instrumentation <br> 3 s.h.

Physical principles of sound waves, their applications to imaging of the human body, operation and physical characteristics of various ultrasound transducers, method by which the sound wave is converted into a visual image, instrumentation components and their functions, Doppler principles, image artifacts, advanced hemodynamics, and spectral Doppler waveform analysis. Prerequisites: RSMS:3110.

## RSMS:3231 Sonography Principles, Physics, and Instrumentation

 LabLaboratory-based learning and simulation experience in the application of sonographic imaging emphasizing physics principles, instrumentation, and quality assurance testing. Corequisites: RSMS:3230.

## RSMS:3240 Abdominal Sonography II

Pathology and pathophysiology of abdominal and superficial structures imaged sonographically; interventional sonographic procedures; post-procedure protocol; associated clinical and laboratory findings; imaging techniques, analysis of findings, and documentation of pathology. Prerequisites: RSMS:3120.
RSMS:3250 Obstetrical and Gynecological Sonography II
Sonographically related pathological and abnormal congenital conditions of gynecology and obstetrics, infertility, assisted reproductive therapy, invasive procedures in obstetrics and gynecology, postpartum complications and maternal-fetal bonding; clinical findings, laboratory studies, and prognosis correlated with sonographic findings; appropriate image analysis and documentation of pathology. Prerequisites: RSMS:3130.

## RSMS:3260 Breast Sonography

Embryology, anatomy, physiology, and pathophysiology of the breast as it relates to sonographic imaging; proper sonographic imaging techniques, including appearance of normal anatomy, imaging protocol, proper instrument settings; sonographic findings of diseases involving the breast.

## RSMS:3270 Vascular Sonography II

Pathology and pathophysiology of complex diseases of the peripheral, cerebral, and abdominal vascular systems evaluated sonographically; associated clinical findings; techniques in physiologic, nonimaging tests, and duplex sonography; analysis of findings and documentation of pathology. Prerequisites: RSMS:3140.

## RSMS:3300 Pediatric Sonography

Anatomy, sonographic anatomy, pathophysiology, sonographic appearance, and Doppler correlation of disorders affecting the pediatric population, including abdominal, musculoskeletal, peripheral vascular, and cerebrovascular systems, neonatal brain and spinal cord.

## RSMS:3305 Pediatric Cardiac Sonography

Anatomy, sonographic anatomy, pathophysiology, sonographic appearance, and Doppler correlation of disorders affecting the pediatric cardiac population; associated clinical findings; techniques in sonographic imaging, analysis of findings, and documentation of pathology. Requirements: completion of or current enrollment in a diagnostic medical sonography program.

3 s.h.

2 s.h.

3 s.h.
1 s.h. RSMS:3306 Pediatric Cardiac Sonography Laboratory 1 s.h. Laboratory-based learning and simulation experience involving basic sonographic pediatric cardiac imaging and clinical history analysis; students perform sonographic exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plane orientation, transducer manipulation, instrumentation, and exam protocols. Corequisites: RSMS:3305. Recommendations: completion of or current enrollment in a diagnostic medical sonography program.

## RSMS:3315 Diagnostic Medical Sonography Clinical Internship

 III 4 s.h.Application of sonographic imaging and physiologic vascular testing skills in health care setting; students develop competency in basic exams.

## RSMS:3325 Abdominal Sonography II Lab

1 s.h.
Laboratory-based learning and simulation utilizing computer-aided learning and scanning simulation to develop skills in interventional sonographic procedures with real-time ultrasound guidance; advanced abdominal and superficial structure imaging; exploring case studies; image analysis in identifying pathologies and differential diagnoses. Prerequisites: RSMS:3121.
RSMS:3376 Vascular Sonography II Lab
1 s.h.
Laboratory-based learning and simulation experience to develop skills in advanced sonographic imaging of the vascular system and performance of advanced nonimaging vascular physiologic tests; analysis of findings and documentation of pathology. Prerequisites: RSMS:3141.

## RSMS:4110 Advanced Sonography

3 s.h.
Exploration of advanced sonographic imaging techniques and new technologies. Prerequisites: (RSMS:3240 with a minimum grade of C and RSMS: 3250 with a minimum grade of C and RSMS: 3270 with a minimum grade of C ) or (RSMS:3205 with a minimum grade of C and RSMS:3270 with a minimum grade of C).

RSMS:4111 Advanced Sonography Lab 1 s.h.
Laboratory-based learning and simulated application of advanced sonographic imaging techniques and new technologies. Prerequisites: (RSMS:3325 with a minimum grade of C and RSMS:3376 with a minimum grade of C ) or (RSMS:3206 with a minimum grade of C and RSMS:3376 with a minimum grade of C). Corequisites: RSMS:4110.

## RSMS:4115 Diagnostic Medical Sonography Clinical Internship

 IV 5 s.h.Application of sonographic imaging and physiologic vascular testing skills in the health care setting; students develop competency in highlevel procedures. Prerequisites: RSMS:3315 with a minimum grade of C and RSMS:3376 with a minimum grade of C .
RSMS:4120 Advanced Cardiac Sonography 3 s.h.
Advanced cardiac sonographic imaging techniques, quantifications, and new technologies; analysis of applications and limitations of imaging techniques. Prerequisites: RSMS:3205 with a minimum grade of C and RSMS:3270 with a minimum grade of C.
3 s.h. RSMS:4121 Advanced Cardiac Sonography Lab 1 s.h. Laboratory-based learning and simulated application of advanced cardiac sonographic imaging techniques, quantifications, and new technologies. Prerequisites: RSMS:3206 with a minimum grade of C. Corequisites: RSMS:4120.

## RSMS:4215 Diagnostic Medical Sonography Clinical Internship

 V 5 s.h.Application of sonographic imaging and physiologic vascular testing skills in health care setting; students develop advanced skills. Prerequisites: RSMS: 4115 with a minimum grade of C and RSMS:4110 with a minimum grade of C and RSMS:4111 with a minimum grade of C .

RSMS:4220 Multidisciplinary Capstone Seminar
Case-based learning; students analyze and synthesize data, determine proper course of action, and evaluate outcomes; preparation for professional work environment. Prerequisites: RSMS:4110.

## Magnetic Resonance Imaging Courses

## RSMR:4110 Fundamentals for the MRI Technologist 3 s.h.

Caregiving skills specific to patients undergoing MRI examinations, including techniques in effectively communicating for safety and comfort; maintaining patient and personnel safety; patient preparation, monitoring, and venipuncture; technologist's role in a wide variety of MRI examinations and patient conditions. Requirements: acceptance to BS radiation sciences RT/MRI track or ARRT primary certification in radiologic technology, nuclear medicine, sonography, or radiation therapy.

## RSMR:4120 MRI Procedures I

## Imaging techniques related to central nervous and musculoskeletal

 systems; specific clinical applications; available coils and their use; considerations in imaging parameters; specific choices in protocols and positioning criteria; anatomical structures and the plane that best demonstrates anatomy; signal characteristics of normal and abnormal structures; information on common pathological conditions found in MRI images and protocol appearance variations. Prerequisites: RSCT:4100 and RSMR:4110. Requirements: concurrent registration in RSMR:4110, if not taken as a prerequisite; or three months MRI experience.
## RSMR:4130 MRI Procedures II

MRI techniques related to neck, thorax, breast, abdomen, and pelvis; specific clinical applications; available coils and their use; considerations in imaging parameters; specific choices in protocols and positioning criteria; information on common pathological conditions found in MRI images and protocol appearance variations. Prerequisites: RSMR:4120.

## RSMR:4140 MRI Acquisition and Principles I <br> 3 s.h.

Physics and hardware used in obtaining a magnetic resonance signal, including magnetism, NMR signal production, tissue characteristics, spatial localization, pulse sequencing, imaging parameters and options, and special applications; exploration of skills useful in maximizing MR image quality. Prerequisites: RSMR:4110. Requirements: concurrent registration in RSMR:4110, if not taken as a prerequisite; or three months MRI experience.

## RSMR:4150 MRI Acquisition and Principles II

3 s.h.
Advanced MRI techniques; MR angiography and further investigation of fast image acquisition sequences; overview of MR magnets, installation, operation, and facility design; computers and digital image acquisition as they apply to MR; outline of quality assurance procedures. Prerequisites: RSMR:4140.

## RSMR:4160 MRI Clinical Internship I

Application of magnetic resonance imaging skills in health care setting; development of competency in high-level procedures and protocols. Prerequisites: RSMR:4110 and RSRT:3225. Corequisites: RSMR:4120 and RSMR:4140, if not taken as prerequisites. Requirements: acceptance to BS radiation sciences RT/MRI track.

## RSMR:4170 MRI Clinical Internship II

 4 s.h.MRI clinical internship scheduled at University of Iowa Hospitals \& Clinics; rotation through each MRI department scanning room; competency and objective-based education with required clinical performance evaluations; clinical preceptor facilitates schedules, rotations, learning objectives, evaluations, and competencies; experience facilitated by MRI technologists, radiologists, residents, and preceptor; participation in routine and advanced MRI scans; performance expectations become progressively higher as student gains experience and skills. Prerequisites: RSMR:4160. Corequisites: RSMR:4140, if not taken as a prerequisite. Requirements: acceptance to BS radiation sciences RT/MRI track.

RSMR:4175 MRI Clinical Internship III
4 s.h.
Rotation through MRI department scanning rooms at University of Iowa Hospitals \& Clinics; competency and objective-based education with required clinical performance evaluations; clinical preceptor facilitates schedules, rotations, learning objectives, evaluations, and competencies; experience facilitated by MRI technologists, radiologists, residents, and preceptor; participation in routine and advanced MRI scans; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSMR:4170.

## Radiation Sciences Courses

RSP:1100 Introduction to the Radiation Sciences 1 s.h.
Exploration of radiation sciences field (radiologic technology, nuclear medicine and PET, diagnostic medical sonography, radiation therapy, computed tomography, magnetic resonance imaging, cardiovascular interventional); introduction to basic principles and modalities associated with the field in preparation for application to radiation sciences or nuclear medicine technology major.

## RSP:2110 Pathology for Radiation Sciences <br> 2 s.h.

General pathologic processes; introduction to imaging modalities; pathological terms that describe the body's response to stress and disease; how the body responds to and forms pathological diseases (e.g., infectious and parasitic diseases, inflammation and repair, immunopathology, neoplasia, genetic disorders, dietary deficiencies and excesses, hemodynamic disorders, trauma and emergencies). Requirements: acceptance to radiation science degree track.

RSP:2120 Patient Care for the Radiation Sciences 3 s.h. Foundation for providing care to clients during radiographic examinations; taking medical histories, basic life support, medical emergencies, vital sign assessment, body mechanics, infection control, sterile techniques, intravenous equipment, administration; advance concepts in client assessment and monitoring, including evaluation and monitoring of clients in pain, and clients in acute and chronic states of illness; communication techniques, role playing. Requirements: acceptance to radiation science degree track.

RSP:3130 Radiation Safety and Radiobiology
2 s.h.
Instruction on safe operation of radiation producing equipment and handling of radioactive materials; origin and/or derivation of certain formulae and techniques useful in radiation protection programs; regulatory agencies, regulations, and regulatory guides pertinent to student's field; emphasis on applied aspects of radiation protection; characteristics and biological effects of ionizing radiations, properties and uses of radioisotopes, medical applications, and biological basis for protection procedures. Requirements: enrollment in radiation sciences or nuclear medicine technology program. Same as FRRB:3130.

RSP:3210 Medical Ethics and Law
Introduction to ethical reasoning and problem solving; integration of knowledge about patient care and ethical/legal issues which occur in process of providing care; ethical principles of autonomy, beneficence, justice, nonmaleficence, paternalism, Patient's Bill of Rights, resolving moral dilemmas; legal principles of malpractice, intentional torts, negligence. Requirements: radiation science or nuclear medicine technology major.

## RSP:3220 Radiation Sciences Quality Management and Health

 Care Administration 2 s.h Introduction to health care administration; quality management, safety, and patient satisfaction concepts for the radiation sciences professional. Requirements: radiation sciences or nuclear medicine technology major.RSP:4110 Research Methodology for Radiation Sciences
Introduction to research concepts and methods for the radiation science professional. Requirements: radiation sciences or nuclear medicine technology major.

## Radiation Therapy Courses

RSTH:3100 Introduction to Radiation Therapy 3 s.h.
Introduction to cancer as a disease; defining methods to treat cancer with emphasis on radiation therapy; simulation, planning, and treatment delivery of radiation therapy. Requirements: acceptance to radiation sciences therapy program.

## RSTH:3110 Medical Physics I

1-3 s.h.
Introduction to radiation used in clinical setting; fundamental physical units, measurements, principles, atomic structure and types of radiation; X-ray generating equipment, X-ray production, and its interaction with matter. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program, and maxillofacial or radiation oncology resident. Same as FRRB:3110.

RSTH:3120 Radiation Therapy Clinical Internship I 3 s.h. Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Requirements: acceptance to radiation sciences therapy program.

## RSTH:3205 Principles of Radiation Therapy I

3 s.h.
Didactic and laboratory work in principles of radiation therapy; historic and current aspects of cancer treatment; role of radiation therapist; patient care, treatment delivery accessories, tumor localization treatment delivery protocols. Prerequisites: RSTH:3100. Requirements: enrollment in radiation sciences therapy program.

## RSTH:3215 Medical Physics II

0-3 s.h.
Treatment units used in external radiation therapy; beam calculations, isodose distributions, brachytherapy, quality assurance and quality management, protection and safety. Prerequisites: RSTH:3110.
Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program. Same as FRRB:3215.
RSTH:3225 Radiation Therapy Clinical Internship II 3 s.h. Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSTH:3120. Requirements: acceptance to radiation sciences therapy program.
RSTH:3325 Radiation Therapy Clinical Internship III 4 s.h. Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSTH:3225. Requirements: acceptance to radiation sciences therapy program.

RSTH:4105 Principles of Radiation Therapy II 2 s.h. Evaluation and management of neoplastic disease using knowledge in arts and sciences; critical thinking and basis of ethical clinical decision-making; epidemiology, etiology, detection, diagnosis, patient condition, treatment and prognosis of neoplastic disease. Prerequisites: RSTH:3205. Requirements: enrollment in radiation sciences therapy program.
RSTH:4125 Radiation Therapy Clinical Internship IV 4 s.h. Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSTH:3325. Requirements: acceptance to radiation sciences therapy program.
RSTH:4225 Radiation Therapy Clinical Internship V 5 s.h.
Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSTH:4125. Requirements: acceptance to radiation sciences therapy program.

## RSTH:4230 Radiation Therapy Capstone

3 s.h.
Professional development; review of concepts. Requirements: acceptance to radiation sciences therapy program.

## Radiologic Technology Courses

RSRT:2110 Radiographic Procedures and Analysis I 4 s.h. Introduction to radiographic positioning principles; technical, positioning, and analysis information needed to perform and evaluate images of chest and abdomen on adult and pediatric patients; emphasis on quality patient care and adaptation to a variety of client conditions; labs. Requirements: acceptance to radiation sciences RT/ CT, CVI, or MRI degree track.
RSRT:2120 Radiologic Technology Clinical Internship I
Student rotations through different radiography-related areas of University of Iowa Hospitals \& Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Requirements: acceptance to radiation sciences RT/CT, CVI, or MRI degree track.

## RSRT:2130 Radiographic Procedures I

Introduction to radiographic positioning principles; technical and positioning information needed to perform radiographic imaging of chest and abdomen on adult and pediatric patients; emphasis on quality patient care and adaptation to a variety of client conditions. Corequisites: RSRT:2140 and RSRT:2141.
RSRT:2140 Radiographic Analysis I
1 s.h.
Introduction to radiographic analysis principles; technical, positioning, and analysis information needed to evaluate images of chest and abdomen on adult and pediatric patients; emphasis on quality patient care and adaptation to a variety of client conditions. Corequisites: RSRT:2130 and RSRT:2141.

RSRT:2141 Radiographic Procedures and Analysis I Lab 1 s.h. Introduction to radiographic procedures and analysis principles; technical, positioning, and analysis information needed to evaluate images of the chest and abdomen on adult and pediatric patients; emphasis on quality patient care and adaptation to a variety of client conditions; lab bridges didactic and clinical learning. Corequisites: RSRT:2130 and RSRT:2140.
RSRT:2225 Radiologic Technology Clinical Internship II 3 s.h. Student rotation through different radiography-related areas of University of Iowa Hospitals \& Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:2120.
RSRT:2230 Radiographic Procedures II $\quad \mathbf{3}$ s.h.
Technical and radiographic positioning information needed to perform images of upper and lower extremity; emphasis on quality patient care and adaptation to a variety of client conditions. Prerequisites: RSRT:2110.

## RSRT:2240 Radiographic Analysis II

2 s.h.
Radiographic procedure and image analysis information needed to evaluate images of upper and lower extremity and shoulder; emphasis on quality patient care and adaptation to a variety of client conditions; labs. Prerequisites: RSRT:2110.
RSRT:2241 Radiographic Procedures and Analysis II Lab 1 s.h. Introduction to radiographic procedures and analysis principles; technical, positioning, and analysis information needed to evaluate images of upper and lower extremity and skull on adult and pediatric patients; emphasis on quality patient care and adaptation to a variety of client conditions; lab bridges didactic and clinical learning. Corequisites: RSRT:2230 and RSRT:2240.

## RSRT:2250 Radiographic Fluoroscopic Procedures 2 s.h.

Technical, radiographic positioning, and analysis information needed to perform radiographic procedures that utilize fluoroscopy; emphasis on quality patient care and adaptation to a variety of client conditions. Prerequisites: RSRT:2110.
RSRT:2251 Radiographic Fluoroscopic Procedures Lab 1 s.h. Introduction to technical, radiographic positioning, and analysis information needed to perform radiographic procedures that utilize fluoroscopy; emphasis on quality patient care and adaptation to a variety of client conditions; lab bridges didactic and clinical learning. Corequisites: RSRT:2250.
RSRT:2325 Radiologic Technology Clinical Internship III 3 s.h. Student rotation through different radiography-related areas of University of Iowa Hospitals \& Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:2225.
RSRT:3110 Radiographic Analysis III
1 s.h.
Introduction to radiographic analysis principles; technical, positioning, and analysis information needed to evaluate images of hip, pelvis, spine, thorax, and skull on adult and pediatric patients; emphasis on quality patient care and adaptation to a variety of client conditions. Corequisites: RSRT:3111 and RSRT:3120.
RSRT:3111 Radiographic Procedures and Analysis III Lab 1 s.h. Introduction to radiographic procedures and analysis principles; technical, positioning, and analysis information needed to evaluate images of hip, pelvis, spine, thorax, and skull on adult and pediatric patients; emphasis on quality patient care and adaptation to a variety of client conditions; lab bridges didactic and clinical learning. Corequisites: RSRT:3110 and RSRT:3120.

RSRT:3115 Radiographic Procedures and Analysis III 4 s.h.
Technical, positioning, and analysis information needed to perform and evaluate images of hip, pelvis, spine, thorax, skull, and GU system radiographic procedures; emphasis on quality patient care and adaptation to a variety of client conditions; labs.
RSRT:3120 Radiographic Procedures III
Introduction to radiographic positioning principles; technical and positioning information needed to perform radiographic imaging of hip, pelvis, spine, thorax, and skull on adult and pediatric patients; emphasis on quality patient care and adaptation to a variety of client conditions. Prerequisites: RSRT:2230 and RSRT:2240. Corequisites: RSRT:3110 and RSRT:3111.

RSRT:3125 Radiologic Technology Clinical Internship IV 4 s.h. Student rotation through different radiography-related areas of University of Iowa Hospitals \& Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:2325.

## RSRT:3140 Radiographic and Digital Imaging

4 s.h.
Factors that govern and influence production of radiographic image; X-ray and scatter production; patient interactions; function of kVp , mAs , and distance as applied to contrast and spatial resolution; practical issues concerning automatic exposure control and grid usage; labs to practice and apply theoretical principles associated with production of quality images. Requirements: acceptance to radiation sciences RT/CT, CVI or MRI degree track.

## RSRT:3141 Radiographic and Digital Imaging Lab <br> 1 s.h.

 Introduction to factors that govern and influence production of radiographic image; X-ray and scatter production; patient interactions; function of kilovoltage peak ( kVp ), milli-ampere-second ( mAs ), and distance as applied to contrast and spatial resolution; practical issues concerning automatic exposure control and grid usage; labs for practice and application of theoretical principles associated with production of quality images. Corequisites: RSRT:3140.RSRT:3220 Emotional Intelligence for the Health Care Professional
Introduction to emotional intelligence; scientific background for why emotional intelligence exists and exploring its applications to the health care setting; connection of emotional intelligence to interactions that occur between health care professional and their patients, patient families, and coworkers.
RSRT:3225 Radiologic Technology Clinical Internship V 3 s.h.
Student rotation through different radiography-related areas of University of Iowa Hospitals \& Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:3125.
RSRT:3230 Radiographic Physics and Imaging Equipment 3 s.h. Characteristics of atomic structure, electricity, and X-ray machines; properties of X-rays and their interaction with matter; measurement of radiation exposure; construction principles and theories of operation of specialized imaging equipment, including fundamentals of acquisition for imaging intensification, geometric tomography, mobile/portable radiography, and magnification principles.

## RSRT:3231 Radiographic Physics and Imaging Equipment

## Lab

1 s.h.
Introduction to characteristics of atomic structure, electricity, and X-
ray machines; properties of X-rays and their interaction with matter; measurement of radiation exposure; construction principles and theories of operation of specialized imaging equipment including fundamentals of acquisition for imaging intensification, geometric tomography, mobile/portable radiography, and magnification principles; labs for practice and application of theoretical principles. Corequisites: RSRT:3230.
RSRT:3325 Radiologic Technology Clinical Internship VI 2 s.h. Student rotation through different radiography-related areas of University of Iowa Hospitals \& Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:3225.
RSRT:4125 Radiologic Technology Clinical Internship VII 1 s.h. Student rotation through different radiography-related areas of University of Iowa Hospitals \& Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:3325.
RSRT:4225 Radiologic Technology Clinical Internship VIII 1 s.h.
Student rotation through different radiography-related areas of University of Iowa Hospitals \& Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:4125.

## RSRT:4230 Radiologic Technology Capstone and Certification

## Exam Preparation

1 s.h.
Certification exam preparation; preparation and distribution of detailed written outlines of exam content; series of content-specific quizzes, midterm, and final "mock board" exam to evaluate student learning and preparedness for taking the American Registry of Radiologic Technologists (ARRT) national certification exams; professional preparation; for students in final semester of program. Requirements: enrollment in radiation sciences RT/BI, CT, CVI, or MRI program.

## Radiation Sciences, BS

The Radiation Sciences Program offers two paths toward completing the major:

- an on-campus program in radiologic technology, diagnostic medical sonography, or radiation therapy for students who have not completed a radiation sciences modality; or
- an online program for registered radiologic technologists and nuclear medicine technologists who would like to earn a Bachelor of Science degree by distance education

Undergraduate study in radiation sciences is guided by the academic rules and procedures outlined under Undergraduate Rules and Procedures [p. 1730] in the Carver College of Medicine section of the catalog.

## Requirements

The Bachelor of Science with a major in radiation sciences requires a minimum of 120 s.h. Work for the on-campus degree includes a set of courses that are prerequisite to entering the radiation sciences major, completion of one of eight radiation sciences professional programs, and elective coursework sufficient to complete the minimum of 120 s.h. required for graduation. Students must complete the radiation sciences professional program at the University of Iowa. Registered radiologic technologists interested in earning the degree by distance education should see RT to BS (Online) [p. 1862] in this section of the catalog.

Admission to the radiation sciences major is competitive and selective; acceptance into a professional program or the major is not guaranteed. Students who wish to enter the major must first be admitted to the University of Iowa as College of Liberal Arts and Sciences (CLAS) students with a radiation sciences interest. As CLAS students, they must apply to the radiation sciences professional program of their choice by Jan. 15 of the year in which they wish to enter; see Apply on the Radiation Sciences Program website. Transfer students are encouraged to apply in early December to allow for time for transfer course articulation. Accepted students enter a professional program, the radiation sciences major, and the Carver College of Medicine the following fall semester.
Applicants for admission to the University of Iowa whose first language is not English are strongly encouraged to complete the University of Iowa English Proficiency Evaluation and satisfy the university's English Proficiency Requirements before they apply to a professional program. Students must have permission to register for a full academic load before they may be admitted to a radiation sciences professional program.
The radiation sciences major requires students to complete a minimum of two years of a high school world language prior to admission.

For additional information on UI admission requirements, contact the University of Iowa Office of Admissions.

First-year and transfer applicants admitted to the College of Liberal Arts and Sciences as radiation sciences interest students must complete all courses that are prerequisite to the radiation sciences major (including approved transfer equivalents) by June 1 before they may begin one of the radiation sciences professional programs and enter the major. The only exception to this deadline is that the physics course required for the diagnostic medical sonography program may be completed in the summer session. Prerequisite courses vary slightly depending on which professional program a student wishes to enter.
Students who have declared a radiation sciences interest but have not yet applied and been accepted to a professional program are advised at the University of Iowa Academic Advising Center. After they have
been accepted to a professional program, they are advised by the Radiation Sciences Program.

Upon successful completion of the professional program, students are eligible to apply for national certification exams for their program's specialty area(s). Once they have completed the professional program and all other requirements for graduation, they are granted a Bachelor of Science degree.

The Bachelor of Science with a major in radiation sciences requires the following work.

## Prerequisites to the Radiation Sciences Major

Students must complete the following prerequisite courses (28-33 s.h.) before they may enter the program and the major. Students who wish to enter either of the two-year professional programs (radiologic technology or radiation therapy) must complete a total of 60 s.h. of college coursework, including the following prerequisites, before they may enter the program and the major. Students are advised for success, based on academic strength, not necessarily for a four-year plan. Prerequisite courses for the three-year professional programs (multi-credentialed radiologic technology and diagnostic medical sonography) may take more than one year to complete. Prerequisite courses for the radiologic technology and radiation therapy professional programs may take more than two years to complete.

## Rhetoric

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  | 4 |
| RHET:1030 | Rhetoric | 4 |

Anatomy

## Physics

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Students interested in diagnostic medical sonography or <br> radiation therapy programs complete one of these: |  |  |
| PHYS:1400 | Basic Physics | $3-4$ |
| PHYS:1511 | College Physics I | 4 |

## Quantitative or Formal Reasoning

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| MATH:1020 | Elementary Functions | 4 |

| MATH:1440 | Mathematics for the Biological <br> Sciences |  |
| :--- | :--- | ---: |
| Psychology | Title | 4 |
| Course \# |  |  |
| This course: | Elementary Psychology |  |
| PSY:1001 | Hours |  |
| Medical Terminology | 3 |  |
| Course \# | Title | Hours |
| This course: | Medical and Technical |  |
| CLSA:3750 | Terminology | 2 |

## Culture, Society, and the Arts

Two courses for 3 s.h. each in two of these areas.

- Diversity and Inclusion.
- Historical Perspectives.
- International and Global Issues.
- Literary, Visual, and Performing Arts.
- Values and Culture.

See GE CLAS Core [p. 19] (College of Liberal Arts and Sciences) in the catalog for approved courses in the areas listed above.

## Recommended Pre-Major Work

The Radiation Sciences Program recommends that before students submit an application to a radiation sciences professional program and the major, they job-shadow a professional who works in their area of interest and gain hands-on patient care experience. Each professional program lists recommended courses that may be completed in addition to the required courses listed above.

## Electives

In order to earn the minimum of 120 s.h. required for graduation, students may need to complete elective coursework in addition to the prerequisite coursework listed above and one of the professional programs in medical imaging. They should plan their elective courses in consultation with their advisor.

## Radiation Sciences Professional Programs

Students must complete one of the following on-campus radiation sciences professional programs at University of Iowa Hospitals \& Clinics (UIHC):

- radiologic technology [p. 1857],
- radiologic technology and breast imaging [p. 1857],
- radiologic technology and cardiovascular interventional [p. 1857],
- radiologic technology and computed tomography [p. 1857],
- radiologic technology and magnetic resonance imaging [p. 1857],
- diagnostic medical sonography and cardiac/vascular [p. 1855],
- diagnostic medical sonography and general/vascular [p. 1855], or
- radiation therapy [p. 1861].

Each program offers modality-specific didactic and supervised clinical education courses. Graduates of the professional programs and associated internships are eligible to apply for one or more certification exams.

The diagnostic medical sonography programs span three years, the radiation therapy program spans two years, and the radiologic technology programs span two or three years. Each program begins in the fall.

Students must apply to the program of their choice by Jan. 15 of the year in which they intend to enter the program. Students must first apply to the College of Liberal Arts and Sciences as a radiation sciences interest major and complete all prerequisite coursework. Students with transfer credit are encouraged to apply to CLAS by early December to allow time for transcript course articulation.

Admission to all radiation sciences professional programs is competitive; each program accepts a limited number of students and acceptance is not guaranteed. In addition to the prerequisite courses listed above, students must have earned a cumulative college gradepoint average of at least 2.50 prior to professional program admission.
Students participating in clinical rotations at non-UIHC facilities as part of their professional program are required to meet the immunization and testing requirements of those facilities in addition to those required at UIHC locations.

## Diagnostic Medical Sonography

A diagnostic medical sonographer is a skilled professional who uses high-frequency sound wave equipment to create diagnostic images and data that assist health care professionals in their diagnosis of patients with disease. Ultrasound imaging is used on many parts of the body, including the abdomen, heart, blood vessels, and the developing fetus of a pregnant woman. When determining normal and abnormal findings, the sonographer must demonstrate sectional anatomy through transducer manipulation. The sonographer uses independent judgment in recognizing the need to extend the scope of the study according to the diagnostic findings. The sonographer spends extended time with the patient obtaining a thorough history of symptoms, explaining the exam, answering questions, and performing the exam.
Each of the radiation sciences diagnostic medical sonography (DMS) degree tracks consist of two professional programs-DMS and cardiac and vascular sonography or DMS and general and vascular sonography. Each of these three-year programs is selective and competitive; acceptance is not guaranteed. Students must satisfy all UI admission requirements, complete all prerequisites, and be accepted into the diagnostic medical sonography professional program following an application and selection process; see Diagnostic Medical Sonography on the Radiation Sciences Program website.

## Diagnostic Medical Sonography and Cardiac and Vascular Sonography

The diagnostic medical sonography program in cardiac and vascular sonography provides a multispecialty education in cardiac (echocardiography) and vascular sonography (ultrasound imaging). Students learn about sonographic imaging and evaluation, hemodynamics and Doppler evaluation, sonography equipment, sectional anatomy, pathology, patient care, medical ethics, emotional intelligence, and quality assurance methods. They become proficient in using sonographic imaging equipment and in performing cardiac and vascular sonographic procedures, including invasive procedures, emergency exams, and 3D imaging. They also participate in supervised clinical education. An elective course and lab in pediatric cardiac sonography is available.
Upon completing the program, graduates are eligible to apply for the national certification exams in diagnostic medical sonography in the specialty areas of cardiac (echocardiography) and vascular technology.

Students who have completed all prerequisite courses by June 1 (except physics, which may be completed in the summer session) are eligible to apply to this three-year program. Application deadline is Jan. 15. Up to eight students are accepted into this track each year, which begins in the fall.

## DMS and Cardiac and Vascular Sonography: Required Courses

Upon acceptance into the diagnostic medical sonography and cardiac and vascular professional program, students will complete required courses and internships during their second, third, and fourth years.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| RSCI:4110 | Vascular Anatomy (online) | 3 |

## Diagnostic Medical Sonography and General and Vascular Sonography

The diagnostic medical sonography program in general and vascular sonography provides a multispecialty education in obstetrical, abdominal, and vascular sonography (ultrasound imaging). Students learn about sonographic imaging and evaluation, hemodynamics and Doppler evaluation, sonography equipment, sectional anatomy, pathology, patient care, medical ethics, emotional intelligence, and quality assurance methods. They become proficient in using sonographic imaging equipment and in performing obstetrical and gynecological, abdominal, and vascular sonographic procedures, including invasive procedures, emergency exams, pediatric sonography, and 3D imaging. They also participate in supervised clinical education. An elective course in breast sonography is available.

Upon completing the program, graduates are eligible to apply for the national certification exams in diagnostic medical sonography in the specialty areas of obstetrics and gynecology, abdomen, and vascular technology.

Students who will have completed all prerequisite courses by June 1 (except physics, which may be completed in the summer session) are eligible to apply to this three-year program. Application deadline is Jan. 15. Up to 12 students are accepted into this track each year, which begins in the fall.

## DMS and General and Vascular Sonography: Required Courses

Upon acceptance into the diagnostic medical sonography and general and vascular professional program, students will complete required courses and internships during their second, third, and fourth years.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |

## DMS Recommended Pre-Major Work

In addition to the prerequisite courses listed under Requirements in this section of the catalog, the program recommends the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| All of these: | Introduction to the Radiation <br> Sciences | 1 |
| RSP:1100 | Your Brain Unlocked: Learning <br> About Learning | 1 |
| PSY:1010 | Elementary Statistics and <br> Inference | 3 |
| One of these: | Human Biology: Nonmajors | 3 |
| BIOL:1140 | Human Anatomy and <br> HHP:1400 | Physiology |
| One of these: Business Computing Essentials |  |  |
| BAIS:1500 Principles of Computing | 3 |  |
| CS:1020 |  | 2 |

## Radiologic Technology

A radiologic technologist is a professional, qualified by education and clinical experience, who provides radiological (x-ray) services using a variety of exams and procedures. While utilizing excellent patient care skills, the technologist operates radiological equipment so that optimum radiographic quality is achieved with the minimum radiation exposure to the patient. Radiographers are employed primarily in hospitals, clinics, and doctors' offices, where they work closely with other members of the health care team to help diagnose and treat patients.

The radiation sciences radiologic technology degree tracks consist of five professional programs.

- Radiologic Technology [p. 1857].
- Radiologic Technology and Breast Imaging [p. 1858].
- Radiologic Technology and Cardiovascular Interventional [p. 1859].
- Radiologic Technology and Computed Tomography [p. 1860].
- Radiologic Technology and Magnetic Resonance Imaging [p. 1860].

Each of these two- or three-year programs is selective and competitive; acceptance is not guaranteed. Students must satisfy all UI admission requirements, complete all prerequisites, and be accepted into a radiologic technology professional program following an application and selection process; see Radiologic Technology on the Radiation Sciences Program website.

## Radiologic Technology

The radiologic technology (RT) program provides education in pathology, radiation biology, radiation protection, patient care, sectional anatomy, emotional intelligence, medical ethics, medical research, quality management, and health care administration. Students learn about radiographic procedures and positioning, digital imaging, and evaluation. Students become proficient in using a variety of different types of imaging equipment and participate in supervised clinical education in diagnostic radiography.
Upon completion of the program, graduates are eligible to apply for the national certification exam in radiography.
Students who will have completed a total of 60 s.h., including prerequisite courses by June 1, are eligible to apply to this program. Students typically apply to this two-year program during their second year and begin in fall of their junior year. Application deadline is Jan. 15. Up to four students are accepted into this track each year.

## RT: Required Courses

Upon acceptance into this radiologic technology professional program, students will complete required courses and internships during their third and fourth years.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| RSCT:4100 | Sectional Anatomy for Imaging Sciences (online) | 3 |
| RSP:1100 | Introduction to the Radiation Sciences (online) | 1 |

| RSRT:4230 | Radiologic Technology Capstone and Certification Exam Preparation | 1 |

## Radiologic Technology and Breast Imaging

Students participate in the radiologic technology curriculum as stated above for the first two years.
The breast imaging (BI) component offers intensive study and practice in breast imaging, including patient care procedures, pathology, anatomy, imaging procedures and analysis, Mammography Quality Standards Act (MQSA) quality control, and image acquisition principles. Students become acquainted with imaging equipment, study quality assurance, and participate in supervised clinical education in radiography and breast imaging.
Upon completion of the program, graduates are eligible to apply for the national certification exams in radiography and mammography.
Students who will have completed all prerequisite courses by June 1 are eligible to apply to this program. Students typically apply to this
three-year program during their first year and begin in the fall of their sophomore year. Application deadline is Jan. 15. Up to two students are accepted into this track each year.

## RT and Breast Imaging: Required Courses

Upon acceptance into the radiologic technology and breast imaging professional program, students will complete required courses and internships during their second, third, and fourth years.

| Course \# | Title | Hours |
| :---: | :---: | :---: |

| RSRT:4125 | Radiologic Technology Clinical <br> Internship VIII | 1 |
| RSRT:4225 | Radiologic Technology <br> Capstone and Certification <br> Exam Preparation | 1 |
| RSRT:4230 |  | 1 |

## Radiologic Technology and Cardiovascular Interventional

Students participate in the radiologic technology curriculum as stated above for the first two years.
The cardiovascular interventional (CVI) component concentrates on imaging equipment, pharmacology, sterile techniques, cardiac monitoring, vascular anatomy and physiology; cardiovascular, peripheral, and neurological procedures and pathology; therapeutic intervention techniques; and digital angiography. Students become acquainted with imaging equipment, study quality assurance, and participate in supervised clinical education in radiography, cardiac interventional, and peripheral and neurological interventional.

Upon completion of the program, graduates are eligible to apply for the national certification exams in radiography, vascular interventional technology, and cardiac interventional technology.
Students who will have completed all prerequisite courses by June 1 are eligible to apply to this program. Students typically apply to this three-year program during their first year and begin in fall of their sophomore year. Application deadline is Jan. 15. Up to two students are accepted into this track each year.

## RT and Cardiovascular Interventional: Required Courses

Upon acceptance into the radiologic technology and cardiovascular interventional professional program, students will complete required courses and internships during their second, third, and fourth years.

| Course \# | Title | Hours |
| :--- | :--- | ---: |

## Radiologic Technology and Magnetic Resonance Imaging

Students participate in the radiologic technology curriculum as stated above for the first two years.
3 The magnetic resonance imaging (MRI) component offers intensive study and practice in MRI, including patient care procedures,
pathophysiology, physics, sectional anatomy, and instrumentation. Students become acquainted with imaging equipment, study quality assurance, and participate in supervised clinical education in radiography and magnetic resonance imaging.

Upon completion of the program, graduates are eligible to apply for the national certification exams in radiography and magnetic resonance imaging.
Students who will have completed all prerequisite courses by June 1 are eligible to apply to this program. Students typically apply to this three-year program during their first year and begin in fall of their sophomore year. Application deadline is Jan. 15. Up to six students are accepted into this track each year.

## RT and Magnetic Resonance Imaging: Required Courses

Upon acceptance into the radiologic technology and magnetic resonance imaging professional program, students will complete required courses and internships during their second, third, and fourth years.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |

| RSRT:2241 | Radiographic Procedures and Analysis II Lab | 1 |

A radiation therapist functions as a member of a team with physicians (radiation oncologist), physicists, dosimetrists, and nurses to provide treatment using ionizing radiation sources for patients with malignant
and some benign diseases. The radiation therapist is responsible for the daily delivery of the prescribed treatment according to the treatment plan prepared by their physician in consultation with the medical physicist. The therapist works with the oncology nurse in the daily assessment of the patient's status and needs during their course of therapy. Radiation therapists are employed in radiation therapy facilities located in hospitals and freestanding centers.
Students completing the radiation therapy program are trained to deliver therapeutic radiation. This two-year program is selective and competitive; acceptance is not guaranteed. Since the program duration is two years, students must have completed a total of 60 s.h., including prerequisite courses by June 1, prior to the start of the program. Students must satisfy all UI admission requirements, complete all prerequisites, and be accepted into the radiation therapy professional program following an application and selection process; see Radiation Therapy on the Radiation Sciences Program website. Clinical and didactic education is provided by University of Iowa Hospitals \& Clinics faculty in the Department of Radiation Oncology, with a hands-on component under the close guidance of licensed radiation therapists.

## Radiation Therapy

The radiation therapy professional program teaches theory and techniques of radiation therapy technology, with emphasis on competence in areas of oncology treatment planning, treatment delivery, dosimetry, and use of megavoltage radiation-producing equipment to administer treatment. Students participate in clinical education in radiation therapy. Radiation therapy students also complete coursework in sectional anatomy, computed tomography (CT) procedures and physics, and magnetic resonance imaging (MRI) fundamentals.
Upon completing the program, graduates are eligible to apply for the national certification exam in radiation therapy. Students will have completed the coursework but not the clinical component to be eligible to apply for the national certification exam in computed tomography and/or magnetic resonance imaging.
Students who have completed a total of 60 s.h., including prerequisite courses by June 1, are eligible to apply to this program. Students typically apply to this two-year program during their second year and begin it in fall of their junior year. Application deadline is Jan. 15. Eight students are accepted into this track each year.

## Radiation Therapy: Required Courses

Upon acceptance into the radiation therapy professional program, students will complete required courses and internships during their third and fourth years.

| BAIS:1500 | CS:1020 |  |

## RT to BS (Online)

The RT to BS is an online program designed for registered radiologic technologists and nuclear medicine technologists who wish to earn a Bachelor of Science degree with a major in radiation sciences by distance education. The program requires a minimum of 120 s.h. Students who successfully complete a radiologic technology (RT) or a nuclear medicine technology (NMT) program are awarded 60 s.h. of credit. They also are awarded credit for equivalent coursework that is prerequisite to entering the major. Upon admission to the major, students complete an online modality, multidisciplinary courses, and electives for graduation.

Students choose one of five online modality options: breast imaging (BI), cardiovascular interventional (CVI), computed tomography
(CT), magnetic resonance imaging (MRI), or a multi-modality option. The modalities do not require an internship.

In order to be admitted to the radiation sciences major, students must pass the American Registry of Radiologic Technologists (ARRT) radiography, ARRT nuclear medicine technology, or Nuclear Medicine Technology Certification Board (NMTCB) exam. They also must have completed all coursework prerequisite to entering the major with a grade-point average of at least 2.50 , not including RT or NMT program courses. Students may count approved transfer credit toward the required prerequisites; learn more by visiting Transfer Courses on the University of Iowa's MyUI website.

Applicants for admission to the University of Iowa whose first language is not English are strongly encouraged to complete the university's English Proficiency Evaluation and satisfy the university's English Proficiency Requirements.

The radiation sciences major requires students to complete a minimum of two years of a high school world language prior to admission.

For additional information on UI admission requirements, contact the University of Iowa Office of Admissions.

## Prerequisites to the Radiation Sciences Major

In addition to the completion of an RT or NMT program, students must complete the following prerequisite courses (25-29 s.h.) before they may enter the radiation sciences major.

## Rhetoric

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| RHET:1030 | Rhetoric | 4 |

## Anatomy

| Course \# | Title | Hours |
| :--- | :--- | ---: |

| CLSA:3750 | Medical and Technical | 2 |
|  | Terminology |  |

## Culture, Society, and the Arts

Two courses for 3 s.h. each in two of these areas.

- Diversity and Inclusion.
- Historical Perspectives.
- International and Global Issues.
- Literary, Visual, and Performing Arts.
- Values and Society.

See GE CLAS Core [p. 19] (College of Liberal Arts and Sciences) in the catalog for approved courses in the areas listed above.
Once students are admitted to the Carver College of Medicine and the radiation sciences major, they must at least complete their final consecutive 30 s.h. at the University of Iowa, including an online modality ( $21-23$ s.h.), two multidisciplinary courses ( 6 s.h.), and sufficient elective coursework to complete the minimum 120 s.h. and the final consecutive 30 s.h. required for graduation.

## Online Modality

Students complete one of the following online modalities.

## Breast Imaging

The breast imaging online modality requires the following coursework (22 s.h.).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| RSBI:3310 | Patient Care for Breast Imaging | 3 |
| RSBI:4110 | Breast Imaging Procedures and <br> Analysis | 3 |
| RSBI:4120 | Anatomy and Pathology for <br> Breast Imaging | 2 |
| RSBI:4130 | Breast Imaging Acquisitions <br> and Principles | 2 |
| RSBI:4210 | Breast Imaging Advanced <br> Procedures and Analysis | 3 |
| RSBI:4220 | Quality Control in Breast <br> Imaging | 3 |
| RSCI:4110 | Vascular Anatomy |  |
| RSCT:4100 | Sectional Anatomy for Imaging <br> Sciences | 3 |
|  | Ren | 3 |

## Cardiovascular Interventional

The cardiovascular interventional online modality requires the following coursework (23 s.h.).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| RSCI:4110 | Vascular Anatomy | 3 |
| RSCI:4120 | CVI Principles | 4 |
| RSCI:4130 | Electrocardiogram and | 3 |
| RSCI:4140 | Hemodynamics | 3 |

| RSCI:4150 | CVI Neurology and <br> Nonvascular Procedures and <br> Pathology | 3 |
| :--- | :--- | :---: |
| RSCI:4160 | CVI Cardiac Procedures and <br> Pathology | 4 |
| RSCT:4100 | Sectional Anatomy for Imaging <br> Sciences | 3 |

## Computed Tomography

The computed tomography online modality requires the following coursework (21 s.h.).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| RSCI:4110 | Vascular Anatomy | 3 |
| RSCI:4130 | Electrocardiogram and <br> Hemodynamics | 3 |
| RSCT:4100 | Sectional Anatomy for Imaging <br> Sciences | 3 |
| RSCT:4120 | Computed Tomography <br> Procedures I | 4 |
| RSCT:4125 | Computed Tomography <br> Procedures II | 4 |
| RSCT:4130 | Computed Tomography <br> Physical Principles and QC | 4 |

## Magnetic Resonance Imaging

The magnetic resonance imaging online modality requires the following coursework ( 23 s.h.).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| RSCI:4110 | Vascular Anatomy | 3 |
| RSCT:4100 | Sectional Anatomy for Imaging | 3 |
|  | Sciences | 3 |
| RSMR:4110 | Fundamentals for the MRI |  |
|  | Technologist | 4 |
| RSMR:4120 | MRI Procedures I | 4 |
| RSMR:4130 | MRI Procedures II | 3 |
| RSMR:4140 | MRI Acquisition and Principles |  |
|  | I | 3 |
| RSMR:4150 | MRI Acquisition and Principles |  |

## Multi-Modality Option

The multi-modality online modality requires the following coursework (21 s.h.).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| RSCT:4100 | Sectional Anatomy for Imaging | 3 |
|  | Sciences |  |
| RSCI:4110 | Vascular Anatomy | 3 |
| Additional breast <br> tomagraphy (RSCT), cardiovascular interventional <br> (RSCI), or magnetic resonance imaging (RSMR) |  |  |
| coursework |  |  |

Course schedules can be found on the Online RT to BS page of the Radiation Sciences Program website.

## Multidisciplinary Courses

Students complete two multidisciplinary courses (6 s.h.) from the list below.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: | Aging Matters: Introduction to | 3 |
| ASP:1800 | Gerontology |  |
| ASP:3150 | Psychology of Aging | 3 |
| CPH:1400 | Fundamentals of Public Health | 3 |
| CSED:4111 | Building Leadership and <br> Success at Work | 3 |
| CSED:4140 | Foundations of Leadership for <br> Community Agencies | 3 |
| CSED:4194 | Interpersonal Effectiveness |  |
| CSED:4197 | Citizenship in a Multicultural <br> Society | 3 |
| ECON:1200 | Principles of Macroeconomics | 3 |
| GHS:3850 | Promoting Health Globally | 4 |
| HHP:2130 | Human Development Through <br> the Life Span | 3 |
| MGMT:2100 | Introduction to Management | 3 |
| MGMT:3500 | Nonprofit Organizational <br> Effectiveness I | 3 |
| PSQF:1075 | Educational Psychology and <br> Measurement | 3 |
| PSQF:3700 | Introduction to Understanding | 3 |
| RHET:2135 | Trauma and Resilience | 3 |
| Rhetorics of Diversity and | 3 |  |
| Inclusion |  |  |

## Electives

Students choose elective coursework to complete the minimum 120 s.h. required and the final consecutive 30 s.h. necessary to qualify for graduation.

## Career Advancement

The majority of radiation sciences graduates are employed shortly after graduation. Graduates generally find jobs in hospitals, clinics, imaging centers, and physicians' offices. With experience, and sometimes additional education, they may find related jobs in management, sales, education, or as application specialists. Some students choose to continue their education in a master's, physician assistant, or other related medical program.

Most radiation sciences professionals with full-time jobs work 40 hours a week and may have holiday, weekend, evening, night, and oncall hours.

Students who complete Iowa's professional radiation sciences programs are eligible to apply for national certification exams administered by the appropriate agency in order to practice.

Licensure laws for radiographers, sonographers, and radiation therapists vary from state to state. Iowa is a licensing state, requiring radiographers to have a permit to practice. Passing the national exam is a criterion used to issue a permit to practice.

More information on radiation sciences careers and outcomes may be found on the Radiation Sciences Program website. The Pomerantz Career Center offers multiple resources to help students find jobs.

## Academic Plans

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Radiation Sciences, BS

- Diagnostic Medical Sonography and Cardiac/Vascular Professional Program [p. 1865]
- Diagnostic Medical Sonography and General/Vascular Professional Program [p. 1866]
- Radiation Therapy Professional Program [p. 1867]
- Radiologic Technology Professional Program [p. 1869]
- Radiologic Technology and Breast Imaging Professional Program [p. 1870]
- Radiologic Technology and Cardiovascular Interventional Professional Program [p. 1871]
- Radiologic Technology and Computed Tomography Professional Program [p. 1873]
- Radiologic Technology and Magnetic Resonance Imaging Professional Program [p. 1874]

## Diagnostic Medical Sonography and Cardiac/ Vascular Professional Program

| Course Title | Hours |
| :---: | :---: |
| Academic Career |  |
| Any Semester |  |
| Students apply to the Radiation Sciences B.S. program through a selective process. Acceptance is not guaranteed. a |  |
| Students must earn a grade of C or higher in all RS** courses. |  |
| The Diagnostic Medical Sonography and Cardiac/Vascular professional program is three years in duration. |  |

|  | Total Hours |  |

a The Academic Advising Center advises Radiation Sciences Interest students on prerequisite course planning. Students are advised for success, based on academic strength, not necessarily for a four year plan. Prerequisites may take more than one year to complete.
b BIOL: 1140 or HHP: 1400 is recommended not required. Most students will need to complete BIOL:1140 or HHP:1400 prior to Human Anatomy (based on academic strength).
c Enrollment in math courses requires completion of a placement exam.
d This course is recommended not required.
e Students must complete 6 s.h. by taking 3 s.h. courses from two of the following areas: Diversity and Inclusion, Historical Perspectives, International and Global Issues, Literary, Visual, and Performing Arts, or Values and Culture.
f Please see the Radiation Sciences Programs' website and your academic advisor for detailed application instructions and deadlines.
g Choose from HHP:1100, HHP:3105, HHP:3115.
h Choose from HHP:1300, HHP:3500, HHP:3550.
i PHYS:1400 may be completed in the spring or summer semester. Summer is recommended if both anatomy and physiology are taken in the spring.
j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

a The Academic Advising Center advises Radiation Sciences Interest students on prerequisite course planning. Students are advised for success, based on academic strength, not necessarily for a four year plan. Prerequisites may take more than two years to complete.
b BIOL:1140 or HHP:1400 is recommended not required. Most students will need to complete BIOL:1140 or HHP:1400 prior to Human Anatomy (based on academic strength).
c Enrollment in math courses requires completion of a placement exam
d Students must complete 6 s.h. by taking 3 s.h. courses from two of the following areas: Diversity and Inclusion, Historical Perspectives, International and Global Issues, Literary, Visual, and Performing Arts, or Values and Culture
e If not previously completed.
f Choose from HHP:1100, HHP:3105, HHP:3115.
g Choose from HHP:1300, HHP:3500, HHP:3550.
$h$ This course is recommended not required.
i Please see the Radiation Sciences Programs' website and your academic advisor for detailed application instructions and deadlines.
j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Radiologic Technology and Breast Imaging Professional Program

Course Title Hours

## Academic Career

## Any Semester

Students apply to the Radiation Sciences B.S. program through a selective process. Acceptance is not guaranteed.

Students must earn a grade of C or higher in all RS** courses.
The Radiologic Technology and Breast Imaging
professional program is four years in duration.

## First Year

## Any Semester

Recommended: health care experience (e.g. CNA), job shadowing in radiologic technology, computed tomography, magnetic resonance imaging, cardiovascular interventional, and breast imaging.

| :--- | :--- | ---: |
| Total Hours | $\mathbf{1 2 3 - 1 2 8}$ |

a The Academic Advising Center advises Radiation Sciences Interest students on prerequisite course planning. Students are advised for success, based on academic strength, not necessarily for a four year plan. Prerequisites may take more than one year to complete.
b BIOL:1140 or HHP:1400 is recommended not required. Most students will need to complete BIOL:1140 or HHP:1400 prior to Human Anatomy (based on academic strength).
c Enrollment in math courses requires completion of a placement exam.
d This course is recommended not required.
e Students must complete 6 s.h. by taking 3 s.h. courses from two of the following areas: Diversity and Inclusion, Historical Perspectives, International and Global Issues, Literary, Visual, and Performing Arts, or Values and Culture.
f Please see the Radiation Sciences Programs' website and your academic advisor for detailed application instructions and deadlines.
g Choose from HHP:1100, HHP:3105, HHP:3115.
h If not previously completed.
i Choose from HHP:1300, HHP:3500, HHP:3550.
j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Radiology

## Chair

- Colin P. Derdeyn

Faculty: https://medicine.uiowa.edu/radiology/our-people
Website: https://medicine.uiowa.edu/radiology/
The Department of Radiology has a three-fold mission of education, research, and patient care. It trains Doctor of Medicine students, residents, and fellows and offers programs for medical professionals. It is a leader in innovative research relating to diagnosis and treatment across the clinical subspecialties, including MRI, PET, breast imaging, cardiac and pulmonary imaging, and imaging informatics. Residents, fellows, medical students, and graduate students have opportunities to participate in research projects in the department. The radiology library provides varied resources and services for department faculty and staff.

The department also provides diagnostic and therapeutic radiology services for patients and families in Iowa and surrounding states through its clinical services at University of Iowa Hospitals \& Clinics. Visit the Department of Radiology website to learn more about the department's activities and resources.

## Undergraduate Education

The Department of Radiology offers clinical education to students in the Nuclear Medicine Technology [p. 1805] and Radiation Sciences [p. 1846] Programs.

## MD Training

The Department of Radiology offers a clerkship for Doctor of Medicine students and provides additional courses, research experiences, and externships for students interested in learning more about radiology. Several of the department's programs are open to medical students from other institutions. See Medical Student Training and Externship Program on the Department of Radiology website.

## Residency

The department offers three residency programs in diagnostic radiology, interventional radiology, and nuclear medicine; see Education on the Department of Radiology website.
Fellowships are available in these specialties: body imaging, breast imaging, endovascular surgical neuroradiology, interventional radiology, musculoskeletal radiology, neuroradiology, pediatric radiology, molecular imaging, theranostics, and cardiothoracic imaging. Practicing radiologists have access to several departmental traineeships that provide category 1 continuing medical education credit through the Carver College of Medicine.

## Courses

## Radiology Courses

## RAD:8007 Medical Student Fellowships in Radiology

## (Externships)

0 s.h.
Students work directly with on-call radiology residents; respond to pages, communication with clinicians and consults, facilitate communication with technologists; involves a large amount of medical thinking with emphasis on indications for diagnostic imaging, study protocols, and contrast utilization. Requirements: MD standing in radiology externship.

RAD:8301 Clinical Radiology 2 s.h.
Two-week clerkship. Requirements: MD enrollment.
RAD:8401 Advanced Clinical Radiology arr. Requirements: MD enrollment.
RAD:8402 Vascular and Interventional Radiology arr. Requirements: MD enrollment.

RAD:8497 Research in Radiology
arr. Medical research, clinical or laboratory projects; individual study.

RAD:8498 Radiology On Campus arr. Requirements: MD enrollment.
RAD:8499 Radiology Off Campus arr.

# Stead Family Department of Pediatrics 

## Chair

- Alexander G. Bassuk

## Website: https://medicine.uiowa.edu/pediatrics/

The Stead Family Department of Pediatrics provides a solid foundation for MD students and postgraduate trainees. It offers extensive opportunities for general pediatrics and subspecialties training.

Affiliated programs add depth to the educational program in community pediatrics and primary care. The department is affiliated with the child and maternal health programs of the Bureau of Family Health, Iowa Department of Public Health, University of Iowa Stead Family Children's Hospital, the Center for Disabilities and Development, the Blank Children's Hospital in Des Moines, and community sites.

## MD Training

Didactic lectures and physical examination of newborns, toddlers, and older children provide MD students with their initial pediatric patient contact. This experience includes taking a history, performing a physical examination, appraisal of growth and development, nutrition, and symptomatology of newborns, toddlers, and adolescents.

For core and advanced medical students, the inpatient service provides training in the complex problems of disease and critical illness. Students participate in daily rounds involving general pediatrics and all subspecialties. Challenging and interesting cases are presented for discussion of diagnosis and treatment.

Outpatient experience, available in the core clerkship and advanced electives, stresses principles and practices required for the maintenance of children's health, treatment of common general pediatric disorders, and the diagnosis and treatment of subspecialty ambulatory patients.

## Residency, Fellowships

The department offers an accredited three-year residency program designed to prepare trainees for professional careers in general pediatrics or for further fellowship training. The program meets the eligibility requirements of the American Board of Pediatrics (ABP) and is approved for 15 residents and one child neurology resident per year by the Accreditation Council for Graduate Medical Education (ACGME).

Fellowships are available in multiple pediatrics subspecialties. Fellowship programs encourage development of knowledge and skill through research and clinical experiences in the chosen discipline. Upon satisfactory completion of the program, fellows meet the ABP eligibility requirements in their subspecialty.

## Facilities

The Stead Family Department of Pediatrics has inpatient and outpatient facilities in the University of Iowa Stead Family Children's Hospital. Additional outpatient facilities are located at Iowa River Landing in Coralville, UI Heath Care-North Liberty, UI Health Care -Scott Boulevard, and Cedar Rapids Pediatrics.

The pediatric inpatient service has approximately 189 beds, and more than 60,000 patients are seen each year in the general, specialty, continuity care, and field clinics and in University of Iowa Hospitals
\& Clinics Emergency Medicine. The Center for Disabilities and Development provides resources for children with intellectual or developmental disabilities and cerebral palsy.

The department maintains a number of laboratories that perform both clinical and research studies.

## Courses

## Pediatrics (Stead Family Department of Pediatrics) Courses

## PEDS:6101 Primary Care: Infants, Children, and Adolescents

## II

Enhancement of clinical knowledge and skills for infant, child, adolescent care; development and refinement of knowledge and skills in primary health care delivery. Prerequisites: NURS:6100. Corequisites: NURS:6702. Same as NURS:6101.
PEDS:7264 Clinical Applications of Applied Behavior Analysis $1-3$ s.h.
Experience behavioral observations, consultation, and/or conducting behavioral assessments (including preference assessments and functional analyses), matched treatments; interviews with care providers, collect behavioral data, conduct behavioral assessments, matched treatments; follow-up with care providers.

## PEDS:8301 Clinical Pediatrics <br> 6 s.h.

Principles, practices of health maintenance and treatment of acute and chronic illnesses in children; emphasis on diagnosis and evaluation, nutrition, behavior problems, disorders affecting children; patient care, daily rounds, ward work. Requirements: third-year MD enrollment.

## PEDS:8401 Advanced Inpatient Subinternship in Pediatric

 CareExperience on pediatric inpatient team caring for patients ranging from infants through adolescents; evaluation, formulation of differential diagnoses, diagnostic workups, appropriate therapy programs. Requirements: fourth-year MD enrollment.
PEDS:8402 Advanced Inpatient Subinternship in Pediatrics:

## Blank Children's Hospital, Des Moines

arr.
Experience in the care of general pediatric inpatients; daily rounds and teaching by senior residents and faculty members; daily didactic conferences. Requirements: fourth-year MD enrollment.
PEDS:8403 Neonatology (NICU)
arr.
Experience caring for ill neonates, proficiency in using diagnostic tests and procedures; responsibility for care of several infants; reference and literature review, conferences, teaching, clinical rounds. Requirements: fourth-year MD enrollment.
PEDS:8404 Critical Care (PICU) 4 s.h.
Direct care of critically ill children in a multidisciplinary medical/ surgical/cardiac intensive care unit, under supervision of pediatric residents and staff; participation in educational activities and formal clinical rounds. Requirements: fourth-year MD enrollment.
PEDS:8405 Emergency Room Blank Children's Hospital, Des Moines
Pediatric emergencies and urgent care, proficiency in pediatric medicine procedures; expansion of basic knowledge. Requirements: fourth-year MD enrollment.
PEDS:8406 Pediatric Pulmonary
4 s.h.
Extensive opportunity to learn clinical assessment of respiratory diseases and complaints including physical exam, history taking, and interpretation of ancillary study (e.g., lung functions, allergy testing, blood gases); diagnosis, management, and follow-up for common chronic respiratory conditions in pediatric population. Requirements: fourth-year MD enrollment.

## PEDS:8407 Pediatric Cardiology

Participation in clinical activities; observation of cardiac catheterization; experience in cardiac auscultation, ECG, radiography emphasis on physical diagnosis, approach to heart disease and murmurs in children. Requirements: fourth-year MD enrollment

## PEDS:8408 Pediatric Gastroenterology

Diagnosis, management, treatment of diseases of gastrointestinal tract, liver, pancreas in children; ward rounds, consultations, clinics, diagnostic procedures, conferences. Requirements: fourth-year MD enrollment.

## PEDS:8409 Pediatric Hematology/Oncology

Basic concepts of clinical approach to hematologic and oncologic problems in children and adolescents; primarily outpatient experience. Requirements: fourth-year MD enrollment.

## PEDS:8410 Pediatric Neurology

Participation in outpatient and inpatient activities, teaching, morning ward rounds. Requirements: fourth-year MD enrollment.
PEDS:8412 Developmental and Behavioral Pediatrics 2,4 s.h. Normal developmental sequence of gestation and early childhood, impact of environmental influences; antecedents of developmental disabilities; methods to detect cognitive and motor delays in preschool children; long-term consequences of developmental disabilities for children, their families; advantages of interdisciplinary teamwork. Requirements: fourth-year MD enrollment.
PEDS:8415 Medical Genetics for the Senior Student
Participation in diagnostic, therapeutic problems; techniques for evaluation, appropriate counseling in genetic cases; conferences. Requirements: fourth-year MD enrollment.
PEDS:8416 Neonatal Intensive Care Unit, Blank Children's Hospital 4 s.h.
Experience equivalent to intern on neonatal intensive care unit teaching service at Blank Children's Hospital, Des Moines; four-week rotation.

## PEDS:8417 Community Pediatric Outpatient Elective 2 s.h

Opportunity to participate as active members of a community-based general pediatric office; work directly with community-based faculty and non-physician team members; build on clinical skills developed in M3 pediatric clerkship. Requirements: MD enrollment.

## PEDS:8418 Pediatric Intensive Care Unit, Blank Children's

 Hospital 4 s.h.Development of knowledge and clinical skills in recognition of critical illness in children; basic strategies of initial resuscitation and management
PEDS:8419 Pediatric Rheumatology, Allergy, and Immunology

4 s.h.
Introduction to fields of rheumatology and allergy/immunology; utilization of self-reflection to guide self-directed learning; identification of knowledge and performance gaps and address those gaps; demonstration of ability to use evidence-based medicine in production of an evidence-based project; understand how socioeconomic factors affect patient populations through observed patient interactions. Requirements: MD enrollment.
PEDS:8420 Pediatric Palliative Care
Palliative medicine as a specialty which enhances quality of life, reduces suffering for patients with serious illnesses, and provides education and support for their families; interdisciplinary consult teamwork with patient's primary medical providers for inpatient or outpatient management of symptoms, goal setting, and decisionmaking; introduction to pediatric palliative care with option to be involved in adult palliative care and local hospice services. Requirements: MD enrollment.
arr.
arr. PEDS:8421 Pediatric Endocrinology 2,4 s.h.
Diagnosis, management, and treatment of pediatric endocrine diseases: growth disorders (short stature, tall stature, delayed puberty, precocious puberty), thyroid disorders (hypothyroidism, hyperthyroidism, thyroid nodules), diabetes mellitus, diabetes insipidus, dysgenetic syndromes, ambiguous genitalia, adrenal insufficiency or adrenal steroid excess, and hypopituitarism. Requirements: MD enrollment.

## PEDS:8431 Pediatric Nephrology <br> 2,4 s.h.

Introduction to general pediatric nephrology cases and management. Requirements: MD enrollment.

## PEDS:8450 Continuity of Care in Outpatient General

 PediatricsWork with experienced general pediatrician in a longitudinal clinical experience for the academic year; paired with faculty pediatrician to see patients in a weekly clinic, provide clinical care to a defined patient population; growth and development, health supervision, and management of common acute and chronic clinical problems. Requirements: fourth-year MD enrollment.

PEDS:8495 Pediatric Intensive Care Off Campus arr.
Arranged by student and department. Requirements: fourth-year MD enrollment.

PEDS:8497 Research in Pediatrics arr
Medical research, clinical or laboratory projects; individual study.
arr. PEDS:8498 Pediatrics On Campus arr
Requirements: fourth-year MD enrollment.
PEDS:8499 Pediatrics Off Campus
arr.
Requirements: fourth-year MD enrollment

## Surgery

## Chair

- Ronald Weigel

Faculty: https://medicine.uiowa.edu/surgery/profile/? appointment=PRIMARY\&category=\&query=\&page=1\&size=10

Website: https://medicine.uiowa.edu/surgery/
The Department of Surgery offers didactic instruction as well as clinical and other practical experiences for medical students. It also hosts a wide spectrum of clinical and scientific research.

## Faculty

The faculty's strengths center in pathophysiology and problems of severe burns, trauma, organ transplantation, surgical control of morbid obesity, surgical oncology, bowel disease, biliary tract disease, pediatric surgery, endocrine disease, plastic surgery, diseases of the esophagus, artificial organs, transplantation, and vascular surgery. Research also is underway in the sequence of mutations and in localization of genes predisposed to cancer.

## MD Training

Department of Surgery courses provide a unique combination of experience oriented toward patient care and understanding of surgery's place among a physician's skills. Surgery courses are open only to MD students and qualified students in associated health sciences.

Students develop an awareness of surgery's role in the treatment of disease. Emphasis is placed on general surgery, basic emergency surgery, trauma, oncology, burns, gastrointestinal and biliary tract disease, endocrine disease, pediatric surgery, transplantation, plastic and reconstructive surgery, and peripheral vascular surgery.

The majority of surgery courses involve patient-centered discussions and practical exercises interwoven with operating room experience. Lectures and conferences are scheduled regularly on specific topics.

The department offers independent study courses in selected surgery topics and clinical experiences; some are available to fourth-year MD students by arrangement with the faculty.

## Facilities

Abundant patient contact provides education in a wide variety of surgical diseases. The Department of Surgery provides training in the only burn unit in Iowa approved by the American College of Surgeons and in the Level I Trauma Center at University of Iowa Hospitals \& Clinics.
Laboratories provide equipment, space, and technical expertise to support teaching and a wide spectrum of clinical and scientific research. Projects are available in gastrointestinal surgery, surgical microbiology, peripheral vascular surgery, transplantation, wound healing, organ preservation, vascular surgery, pediatric surgery, and surgical oncology.

The laboratories also are used for supervised teaching exercises in surgical technique for medical students and junior residents, and for refinement of technique for senior residents and faculty members.

Courses

## Surgery Courses

SURG:8301 Clinical Surgery 6 s.h.
Experience as active member of surgical team; work on inpatient units, in clinics and operating room; assist in elective and emergency patient care.
SURG:8401 Advanced General Surgery
4 s.h.
Opportunity to strengthen clinical skills through experiences in the operating rooms, clinics, wards, and intensive care units of University of Iowa Hospitals \& Clinics.
SURG:8402 Advanced Inpatient Subinternship in General
Surgery 4 s.h.

Responsibility for management of selected surgical inpatients, on a surgical service. Prerequisites: SURG:8301.
SURG:8406 General Surgery, Des Moines, IA
4 s.h.
Care of general surgery patients in private hospital setting. Prerequisites: SURG:8301.
SURG:8407 Intensive Care Unit - Trauma, Iowa Methodist 4 s.h. Subinternship on trauma service team; evaluation and management of critically ill patients in the emergency room, operating room, intensive care unit. Prerequisites: SURG:8301. Requirements: fourth-year MD enrollment.

SURG:8409 General Surgery, Davenport, IA
4 s.h.
Participation in diagnosis and management of general surgical patients under supervision of attending surgeons from Davenport Surgical Group, Genesis Medical Center. Prerequisites: SURG:8301. Requirements: fourth-year MD enrollment.
SURG:8411 Multidisciplinary Breast Elective
2,4 s.h.
Evaluation and management of benign and malignant breast diseases; focus on multidisciplinary nature of treatment of breast disease; for students who plan to pursue residency in general surgery, obstetrics and gynecology, family practice, or other field with focus on women's health. Requirements: MD enrollment.
SURG:8419 Advanced Inpatient Subinternship in Plastic Surgery

4 s.h.
Exposure to a wide range of educational opportunities and to the complexity and diversity of health care in the plastic surgery setting related to policies, environment, cultural, socioeconomic, and financial considerations; provides experience in all areas of plastic surgery; for students with an interest in plastic and reconstructive surgery. Requirements: MD enrollment.
SURG:8460 Surgical Residency Preparation
4 s.h.
Preparation for surgical residency; focus on application of knowledge and skills accumulated through medical school to surgical patient care; development of an advanced understanding of preoperative, intraoperative, and postoperative care of patients, critical care knowledge, communication skills, and technical skills necessary for surgical specialties. Requirements: MD enrollment.
SURG:8497 Research in Surgery
arr.
Medical research, clinical or laboratory projects; individual study.
SURG:8498 Surgery On Campus
arr.
Surgery on campus; individually arranged. Prerequisites: SURG:8301.
SURG:8499 Surgery Off Campus
arr.
Prerequisites: SURG:8301.

## Urology

## Chair

## - Karl Kreder

Faculty: https://medicine.uiowa.edu/urology/profile/
Website: https://medicine.uiowa.edu/urology/
Urology encompasses the subspecialty areas of urologic nephrology, oncology, and endocrinology; male reproductive physiology; erectile dysfunction; neurourology; pediatric urology; urinary tract stone and infection, including endourology; laparoscopic and robotic urology; trauma and reconstructive urology; urodynamics and female urology; diagnostic urology; and urinary tract obstruction.

The Department of Urology offers instruction in all of these areas to MD and graduate students and provides continuing education for the delivery of urologic care.

## Continuing Education

The department offers continuing education activities throughout the year for urologic and family practitioners. These activities are conducted by the faculty, whose interests include pediatric urology, reproductive physiology and male infertility, urologic oncology, urinary tract stone (including endourology/laparoscopy), robotic surgical procedures, trauma and reconstructive urology, female urology, and prostatic diseases.

## Research

The department has earned international recognition for its studies of prostatic diseases. The urological laboratories conduct research and offer instruction in experimental oncology, cellular immunology, and infertility.

## MD Training

The Department of Urology cooperates with several University of Iowa basic science departments to educate first-year MD students in the relationship between urology and the basic sciences. It collaborates with the Department of Microbiology and Immunology [p. 1786] in teaching and research concerning immunology of genitourinary cancers and renal transplantation.

In the first-year MD course, MED:8134 Mechanisms of Health and Disease III, and the second-year courses, MED:8221 Clinical and Professional Skills III and MED:8224 Mechanisms of Health and Disease Keystone, the department presents illustrative lectures and demonstrations related to diagnosis and treatment of genitourinary tract diseases.

Second-, third-, and fourth-year MD students take Department of Urology courses that provide experience in all areas of urology. The department's selective two-week clerkship covers the fundamentals of these areas through experience in outpatient clinics, surgical settings, and inpatient units at University of Iowa Hospitals \& Clinics, the Iowa River Landing, and the VA Iowa City Health Care. MD students can take advanced elective courses of intensive study in any of the urologic subspecialties after completion of URO:8301 Clinical Urology.

## Courses

## Urology Courses

URO:8301 Clinical Urology 2 s.h.
Work in urology unit, clinic; responsibility for patient care, working with residents.
URO:8401 Advanced Urology
Experience as integral member of urological staff, junior resident level. Requirements: MD enrollment.

URO:8402 Pediatric Urology 2,4 s.h.
In-depth study of pediatric urology topics. Requirements: MD enrollment.

URO:8403 Urologic Oncology 2,4 s.h.
Multispecialty exposure to diagnosis and treatment of patients with current and newly diagnosed urologic malignancies. Requirements: MD enrollment.

URO:8404 Female Pelvic Floor Dysfunction 2,4 s.h. Requirements: MD enrollment.
URO:8497 Research in Urology
arr.
Medical research, clinical or laboratory projects; individual study.
URO:8498 Urology On Campus arr.
Clinical clerkship; individually arranged by student with departmental approval.

URO:8499 Urology Off Campus
arr.
Individually arranged by students with department approval.

# College of Nursing 

## Dean

- Julie Zerwic

## Executive Associate Dean

- Sandra Daack-Hirsch

## Associate Dean for Faculty

- Keela Herr

## Associate Dean for Research

- Barbara Rakel

## Interim Associate Dean for Undergraduate/RN Programs

- Sarah McVeigh

## Associate Dean for Graduate Practice Programs

- Sandra Daack-Hirsch

## Director, PhD Program

- Stephanie Gilbertson-White

## Division Head, Acute and Critical Care

- Sue E. Gardner

Division Head, Community and Primary Care

- Lisa S. Segre

Undergraduate degree: BSN
Graduate degrees: MSN; DNP; PhD in nursing
Graduate certificates: adult gerontology acute care nurse practitioner; adult gerontology primary care nurse practitioner; family nurse practitioner; health systems; pediatric nurse practitioner-acute care; pediatric nurse practitioner-primary care; psychiatric/mental health nurse practitioner

Faculty: https://nursing.uiowa.edu/faculty-staff/faculty-directory
Website: https://nursing.uiowa.edu/
The College of Nursing is an integral part of the University of Iowa health science campus, sharing in and contributing to teaching, research, and patient care resources that have earned international recognition. The university provides a robust setting for nursing preparation because the educational and clinical resources vital to educating nurses are evidence based, diverse, and available on or near the campus. Faculty and students participate fully in university life and contribute their time, interests, and abilities to the many general and special activities of a major research university.

The college's Bachelor of Science in Nursing (BSN), the Clinical Nurse Leader (CNL) and Nursing Systems Administration (NSA) subprograms for the Master of Science in Nursing (MSN) as well as the MSN Entry into Practice subprogram and the Doctor of Nursing Practice (DNP) program, are accredited by the Commission on Collegiate Nursing Education (CCNE), an autonomous accrediting arm of the American Association of Colleges of Nursing (AACN). They also are approved by the Iowa Board of Nursing. The anesthesia nursing program (in the Doctor of Nursing Practice) is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs.

Graduates of the prelicensure BSN qualify to take the National Council Licensure Examination (NCLEX) required for practice as registered nurses (RN). Graduates of advanced practice majors in the
graduate program are eligible to take certification examinations and apply for Advanced Registered Nurse Practitioner (ARNP) licensure.

## Related Minor and Certificates

## Aging and Longevity Studies

College of Nursing students may participate in the Aging and Longevity Studies Program, which provides undergraduate students with a multidisciplinary approach to gerontology. The program offers a certificate and a minor. Students plan their course of study with their academic advisor in close cooperation with the Aging and Longevity Studies Program coordinator. The Aging and Longevity Studies Program is administered by the School of Social Work (College of Liberal Arts and Sciences). For more information, see Aging and Longevity Studies [p. 42] (College of Liberal Arts and Sciences) in the catalog.

## Informatics (Health Informatics Subprogram)

The Graduate College offers the Certificate in Informatics with a health informatics subprogram. The subprogram emphasizes the organization, management, and use of health care information; health care research, education, and practice; and information technology developments in the socioeconomic context of health care.

College of Nursing students working toward the certificate complete IGPI:5110 Introduction to Informatics, which explores decisionmaking processes and technological tools to support health care administration, management, and practice; and EPID:5200 Principles of Public Health Informatics, which focuses on systematic applications of information science, computer science, and technology to public health practice, research, and learning; methods of disease surveillance, data collection, analysis, and reporting with health informatics.

Students earn additional credit in foundational informatics coursework, including one elective chosen in consultation with their major program advisor and their certificate advisor. Students who earn credit for a thesis, project, or independent study in their major program of study may apply the credit as an elective if the certificate advisor determines that the subject matter is pertinent.

To learn more, see the Certificate in Informatics [p. 1660] (Graduate College) in the catalog. For additional information, see Health Informatics on the Graduate College website.

## Professional Improvement

Registered nurses who wish to take University of Iowa coursework to fulfill professional or personal improvement objectives may request admission in the professional improvement (PI) category. This admission status allows students to take some graduate courses at the university without committing to a degree objective.
Admission as a nursing professional improvement student requires a formal application, including submission of three current written recommendations and all academic transcripts. Graduate Record Examination (GRE) General Test scores, required by the university, must be submitted before the end of first semester registration.

Application deadlines are July 15 for fall semester admission, Dec. 1 for spring semester admission, and May 1 for summer session admission.

Since acceptance as a PI student does not influence acceptance to the college's graduate degree programs, PI students interested in earning a graduate degree in nursing must apply for admission to the degree program (see Programs [p. 1882] and then "Admission" under each graduate program of study in this section of the catalog). Students may count a maximum of 6 s.h. or two required nursing core courses that
they complete as PI students toward MSN requirements. Professional improvement students may not enroll in PhD courses.

## Continuing Education

The college offers nonacademic, short-term continuing education programs for nurses. Contact hours are awarded for these programs. The College of Nursing is an Iowa Board of Nursing approved provider of continuing education (Provider Number 1).

## Student Organizations

All College of Nursing BSN prelicensure students are members of the National Student Nurses Association and its local chapter, the Iowa Association of Nursing Students (IANS). The Student Nurse Association at the University of Iowa (SNAUI) provides opportunities for professional growth and development in nursing. SNAUI representatives are members of the Undergraduate Student Government (USG).

The UI Multicultural Nursing Association (MNA) provides support, network opportunities for leadership and professional growth, and development for underrepresented students who are undergraduate nursing interest and nursing majors, graduate nursing students, and underrepresented nursing professionals in the region.

University of Iowa Men in Nursing (UI MiN) provides opportunities for nurses to meet, to recruit, to talk, and to influence the environment for men in nursing. It is open to all nursing students.
The college's Association of Graduate Nursing Students (AGNS) provides opportunities for professional growth, sharing of research, and representation on varied college and university committees.

See Student Life-Nursing Student Organizations on the College of Nursing website.

## Programs

## Undergraduate Program of Study

## Major

- Bachelor of Science in Nursing [p. 1892]

## Graduate Programs of Study

## Majors

- Master of Science in Nursing [p. 1898]
- Doctor of Nursing Practice [p. 1903]
- Doctor of Philosophy in Nursing [p. 1917]

## Certificates

- Adult Gerontology Acute Care Nurse Practitioner [p. 1919]
- Adult Gerontology Primary Care Nurse Practitioner [p. 1920]
- Family Nurse Practitioner [p. 1921]
- Health Systems [p. 1922]
- Pediatric Nurse Practitioner-Acute Care [p. 1923]
- Pediatric Nurse Practitioner-Primary Care [p. 1924]
- Psychiatric/Mental Health Nurse Practitioner [p. 1925]

## Facilities

The College of Nursing Building is centrally located on the university's main campus, in close proximity to the Carver College of Medicine, the College of Dentistry, the College of Pharmacy, the College of Public Health, University of Iowa Hospitals \& Clinics, and the Hardin Library for the Health Sciences.

The renovated College of Nursing Building boasts collaborative spaces, flexible learning spaces, and state-of-art classroom technology. The renovated spaces include two 84 -seat flexible classrooms, two 42-seat flexible classrooms, and an Instructional Technology Services (ITS) computer lab on the ground floor; collaboration rooms for quiet study and group learning, student commons, and graduate student space are on the first floor; five seminar seating classrooms on the third floor; and flexible conference room and office space on the fourth floor.

The Nursing Clinical Education Center (NCEC), located at University of Iowa Hospitals \& Clinics (UIHC), provides hands-on simulation and laboratory experiences for both undergraduate and graduate nursing students. The center also is a training hub for the university's Department of Nursing Services and Patient Care. The NCEC houses state of the art health care simulation technology. It has multiple classrooms, a resource library, a lobby with ample seating, and gathering spaces for private meetings. The center is codirected by the College of Nursing and the UIHC Department of Nursing Services and Patient Care.

## Courses

## College of Nursing Courses

NURS:1020 First-Year Seminar
1 s.h.
Introduces first-year undergraduate students to the intellectual life of the University of Iowa; provides an opportunity to work closely with a faculty member or senior administrator; seminars help students make the transition to college-level learning through active participation in their own learning.
NURS:1030 Human Development and Behavior
Normal developmental transitions experienced by individuals and family systems throughout the lifespan, including physical, cognitive, and social-emotional development. Requirements: nursing or nursinginterest major.
NURS:1800 Aging Matters: Introduction to Gerontology 3 s.h. Overview of the field of gerontology from a bio-psycho-social framework; how the human body and brain age, effects of these biological changes on physical and cognitive functions, and interaction of these individual factors with societal contexts; broad perspective to give students a foundation in gerontology, paving the way for more advanced courses in biology of aging, psychology of aging, and global aging; for students from a wide range of disciplines and levels, no prior knowledge of aging required. GE: Social Sciences. Same as ASP:1800, CSD:1800, SSW:1800, TR:1800.
NURS:3099 Leadership U 1-3 s.h.
Development of leadership in nursing; application of leadership theory in practice by participating in activities such as attending professional organization meetings, acting as a delegate, writing legislation, holding a board position, or being part of a multidisciplinary or international team to organize events for community involvement. Requirements: nursing major.
NURS:3110 Healthcare Finance 3 s.h.
Basic structure of U.S. health care system and how it is funded; tools for making decisions about available financial resources.

NURS:3111 Diversity, Equity, and Inclusion for Health Professions
Introduction to basic concepts of diversity, equity, inclusion, and social justice related to the health of marginalized populations; topics include bias along many lines of difference, discrimination in health care and structural racism from a historical context, systemic inequities in health care delivery and outcomes, and social determinants of health; exploration of strategies to advance health equity and improve health for all.

## NURS:3128 Health Assessment and Communication Across the Lifespan 3 s.h.

Assessment and communication skills; development and application of cognitive skills to perform systematic, holistic, and culturally competent health assessments; emphasis on application of clinical reasoning involving assessment, nursing diagnoses, interventions, and outcomes. Corequisites: NURS:3138 and NURS:3160 and NURS:3518. Requirements: admission to the College of Nursing.
NURS:3138 Nursing and Pharmacological Interventions I 5 s.h. First of a two-part series focusing on basic biophysical concepts that inform nursing and pharmacological interventions, including sleep, immobility, skin care, wound healing, infection, and human response to illness; selected disorders and/or diseases, including GI disease, disorders of bowel and urine elimination, diabetes, and cancer; introduction to health literacy and principles of health education. Prerequisites: CHEM:1070 and MATH:1440 and BIOL:1141 and ACB:3110 and MICR:3164 and (HHP:1300 or HHP:3500) and CHEM:1080. Corequisites: NURS:3128 and NURS:3160 and NURS:3518. Requirements: 64 s.h. of undergraduate coursework, including successful completion of required science courses and general education liberal arts and sciences requirements and electives.
NURS:3151 Introduction to Clinical Concepts for Nursing 2 s.h. Introduction to aspects of nursing care including physical exam, health assessment, and psychomotor nursing interventions; students practice strategies to promote safe care of patients, including calculation of medications prior to administration; emphasis on effective patient communication, education, and integration of medical terminology; application of nursing interventions, psychomotor skills, and medication dosages and calculation; health, physical, and psychosocial assessment; first of a three-part laboratory and simulation series. Corequisites: NURS:3128 and NURS:3138 and NURS:3160 and NURS:3518. Requirements: admission to College of Nursing.

## NURS:3160 Professional Role I: Professionalism and Patient

 Safety3 s.h.
Introduction to inherent nursing values, history, theories, and scope of professional nursing; concepts of safety, risk identification, and clinical decision-making; information technologies that promote quality and safety. Requirements: admission to the College of Nursing.
NURS:3198 Distance Education: Independent Study 1-3 s.h. Supervised study designed for individual undergraduate students.

## NURS:3199 Independent Study <br> 1-3 s.h.

Supervised study designed for individual undergraduate students.
NURS:3438 Nursing and Pharmacological Interventions II 5 s.h. Second of a two-part series focusing on complex biophysical concepts that inform nursing and pharmacological interventions, including fluids and electrolytes, shock, and perioperative care; focus on selected disorders and/or diseases, including neurological, immune, musculoskeletal, cardiovascular, respiratory, renal, and endocrine disorders. Prerequisites: NURS:3518 and NURS:3138 and NURS:3128 and NURS:3160. Corequisites: NURS:3460 and NURS:3620 and NURS:3625.
NURS:3451 Basic Clinical Concepts for Nursing 1 s.h. Caring for the adult patient with diverse disease processes through experiential learning; emphasis on complex physical and psychosocial assessment, clinical reasoning, team building, interprofessional education and communication, and application of the nursing process to provide safe and effective nursing care; second of a three-part laboratory and simulation series. Prerequisites: NURS:3128 and NURS:3138 and NURS:3151 and NURS:3160 and NURS:3518. Corequisites: NURS:3438 and NURS:3460 and NURS:3615 and NURS:3620 and NURS:3625.

NURS:3460 Professional Role II: Research 3 s.h.
Introduction to concepts and process of research in nursing; primary focus on understanding research and its foundation for nursing practice. Requirements: basic statistics. Recommendations: upperlevel statistics.
NURS:3518 Pathology 3 s.h.
Introduction to abnormal functioning of cells, tissues, organs, and systems over the human lifespan; focus on hematological, immune, neurological, musculoskeletal, cardiovascular, respiratory, renal, gastrointestinal, endocrine, and reproductive system; alterations in metabolic processes and alterations in homeostatic mechanisms impacting the internal milieu; emphasis on critical thinking. Prerequisites: (CHEM:1080 and ACB:3110 and BIOL:1141 and MICR:3164 and CHEM:1070 and (HHP:1300 or HHP:3500)) or NURS:3734. Requirements: admission to the College of Nursing.
NURS:3595 Nonprofit Organizational Effectiveness I 3 s.h. Operational and financial aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as ENTR:3595, MGMT:3500, MUSM:3500, RELS:3700, SSW:3500.
NURS:3600 Nonprofit Organizational Effectiveness II $\mathbf{3}$ s.h. Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as MGMT:3600, RELS:3701, SSW:3600.
NURS:3615 Adult Medical/Surgical Nursing Practicum 3 s.h. In-depth clinical experience; application of basic and complex concepts of nursing care for adults of all ages in a variety of settings, focus on older adults; development and application of critical thinking skills necessary to understand disease process, associated signs and symptoms; emphasis on interventions and outcomes. Prerequisites: NURS:3128 and NURS:3138 and NURS:3160 and NURS:3518. Corequisites: NURS:3438 and NURS:3460 and NURS:3620 and NURS:3625.

## NURS:3620 Gerontological Nursing

3 s.h.
Nurse's role in promoting, maintaining, and restoring the health of aging adults; internal and external influences on older adults, application of nursing science to the care of older adults in diverse settings. Prerequisites: NURS:3128 and NURS:3138 and NURS:3518 and NURS:3160. Corequisites: NURS:3438 and NURS:3460 and NURS:3625.
NURS:3625 Gerontological Nursing Practicum
2 s.h.
In-depth clinical experience designed to apply basic and complex concepts of nursing care for adults of all ages in a variety of settings; focus on older adults; development and application of critical thinking skills necessary to understand disease process and the associated signs and symptoms, interventions, and outcomes. Prerequisites: NURS:3160 and NURS:3138 and NURS:3128 and NURS:3518. Corequisites: NURS:3438 and NURS:3460 and NURS:3615 and NURS:3620.
NURS:3631 Nursing Care of Children and Families 2 s.h.
Promoting, maintaining, and restoring the health of parents, infants, children, and adolescents in childbearing families; examination of nursing care of newborns, well children, and children with acute and chronic illness within the context of family and community. Prerequisites: NURS:3438 and NURS:3451 and NURS:3460 and NURS:3615 and NURS:3620 and NURS:3625. Corequisites: NURS:3632 and NURS:3635 and NURS:3640 and NURS:3645 and NURS:3651 and NURS:3660.

NURS:3632 Nursing Care of Childbearing Families Promoting, maintaining, and restoring health for women of reproductive age, childbearing families, and newborns; examination of nursing care for family planning, preconception health, prenatal care, childbirth, newborn care, and maternal and neonatal complications within the context of family and community. Prerequisites: NURS:3438 and NURS:3451 and NURS:3460 and NURS:3615 and NURS:3620 and NURS:3625. Corequisites: NURS:3631 and NURS:3635 and NURS:3640 and NURS:3645 and NURS:3651 and NURS:3660.

## NURS:3635 Parent Child Nursing Practicum 2 s.h.

Application of nursing knowledge to promote, maintain, and restore health; vulnerable populations of interest including persons with mental health disorders, infants, children, adolescents, their families; processes of childbearing and childrearing within context of families. Prerequisites: NURS:3625 and NURS:3620 and NURS:3438 and NURS:3615 and NURS:3460. Corequisites: NURS:3640 and NURS:3645 and NURS:3660. Requirements: successful completion of two semesters in BSN curriculum.
NURS:3640 Psychiatric/Mental Health Nursing 3 s.h. General principles and practices of psychiatric/mental health nursing; psychiatric disorders, populations at risk, continuity of care, and problems in daily living; unique needs of diverse populations. Prerequisites: NURS:3438 and NURS:3620 and NURS:3615 and NURS:3625 and NURS:3460. Corequisites: NURS:3645 and NURS:3660.

## NURS:3645 Mental Health Nursing Practicum <br> 2 s.h.

Application of nursing knowledge to promote, maintain, and restore health; vulnerable populations of interest including persons with mental health disorders, infants, children, adolescents, their families; processes of childbearing and childrearing within context of families. Prerequisites: NURS:3625 and NURS:3438 and NURS:3620 and NURS:3615 and NURS:3460. Corequisites: NURS:3635 and NURS:3640 and NURS:3660. Requirements: successful completion of two semesters in BSN curriculum.

NURS:3650 Community and Public Health Nursing 3 s.h. Role of nursing in the relationship between community conditions and public health; emphasis on principles of public health combined with nursing knowledge and skills to address health needs of individuals, families, communities, and populations. Prerequisites: (NURS:3660 and NURS:3640 and NURS:3635 and NURS:3645) or NURS:3460. Corequisites: NURS:3655. Requirements: for prelicensure BSN student-successful completion of NURS:3620, NURS:3625, NURS:3640, and NURS:3645, and concurrent enrollment in NURS:4155 and NURS:4160; for post-licensure RN-BSN student-successful completion of NURS:4160, 6 s.h. of required nursing elective courses, and completion of general education electives.
NURS:3651 Advanced Clinical Concepts for Nursing 1 s.h. Advanced and specialty nursing skills; focus on pediatric and obstetric simulation as well as advanced, medical-surgical skills; opportunity for ongoing development of essential clinical skills including team communication, clinical reasoning, patient safety, evidence-based practice, incorporation of the nursing process, patient education, and nursing care across the lifespan; third of a three-part laboratory and simulation series. Prerequisites: NURS:3438 and NURS:3451 and NURS:3460 and NURS:3615 and NURS:3620 and NURS:3625. Corequisites: NURS:3631 and NURS:3632 and NURS:3635 and NURS:3640 and NURS:3645 and NURS:3660.

NURS:3655 Community and Public Health Nursing Practicum 2 s.h. Learning opportunities to apply principles of public health with nursing knowledge and skills to address health promotion, disease and injury prevention, and nursing management of infectious disease and chronic health conditions; nursing activities focus on improvement of health outcomes at individual, family, community, and global levels within the context of population-focused practice. Prerequisites: (NURS:3645 and NURS:3635 and NURS:3640 and NURS:3660) or NURS:3460. Corequisites: NURS:3650. Requirements: for prelicensure BSN student-successful completion of NURS:3625 and NURS:3645, and concurrent enrollment in NURS:4155 and NURS:4160; for post-licensure RN-BSN student-successful completion of NURS:3110 and NURS:3160 and NURS:3460 and NURS:3518 and NURS:3660 and NURS:3734 and NURS:4160, 6 s.h. of required nursing electives, completion of general education electives, RN licensure in state of practicum, and concurrent enrollment in NURS:3734, if not taken as a prerequisite.
NURS:3660 Professional Role III: Improving Health Systems

2-3 s.h.
Legal and regulatory processes that impact health care, how disparities influence health care, and evidence-based approaches for improving quality of care; strategies for working effectively in intra and interdisciplinary teams; integration of a culture of safety. Prerequisites: (NURS:3615 and NURS:3625 and NURS:3620 and NURS:3460 and NURS:3438) or (NURS:3160 and NURS:3460).
NURS:3712 Human Sexuality, Diversity, and Society 1-3 s.h. Introduction to human sexuality from a biopsychosocial, sex-positive perspective; sexuality as a normal and essential component of human existence and expression throughout the life span; influence of gender, class, religion, race, ethnicity, sexual orientation, ability status, age, and culture on sexuality interwoven and highlighted; diversity of perspectives and experiences shared through active participation and respectful dialogue. Same as SSW:3712.

## NURS:3731 Healthier Living for Well-Being

1 s.h.
Strategies to reduce stress and promote healthy resilience; overall well-being and academic performance support; evidence-based, skills-building assignments focus on cognitive behavioral and coping techniques. Requirements: nursing interest or admission to the College of Nursing.

## NURS:3732 Global Health Nursing

Complexity of health and nursing in a global context; overview of biological, social, epigenetic, and environmental contributors to health and diseases in populations around the world and nursing's role in improving health; includes case studies of various global organizational and educational structures and systems relative to population health, selected infectious diseases, nutritional deficiencies, and health effects of environmental change. Same as GHS:3732.
NURS:3734 Introduction to Human Genetics
3 s.h.
Introduction to organization of the human genome and basic principles of inheritance in humans; cells and development, chromosome structure and function, gene structure and function, genes in pedigrees and populations, implications of genetic variation on health.
NURS:3736 Legal Issues for Health Care Providers 3 s.h.
Legal issues faced by health care providers, counselors, and social services providers; administrative and regulatory requirements, civil lawsuits, issues that affect students as providers, advocates, and individuals.

NURS:3737 Care of the Patient in Pain
3 s.h.
Foundational and advanced content in the area of pain management across populations, the lifespan, and settings of care; content and learning focus on core competencies for pain management recommended of all health care professionals; emphasis on development of interdisciplinary team, including nurses, as an advocate for quality and safe pain management; content areas include type of pain, pain therapies, assessment and measurement, treatment, self-management, evaluation/monitoring, disparities, and bioethics; no clinical component. Requirements: upper-division standing. Recommendations: pharmacology and pathophysiology.
NURS:3739 Women and Their Bodies in Health and Illness 3 s.h. Basic facts about structure and functioning of female body; particular attention to adjustments the body makes during normal physiological events (menstruation, sexuality, reproduction, menopause) and during illness processes; women's mental and physical health issues in relation to women's lives and roles in society; relationship of women as consumers, practitioners, and activists to health system; achievements and limitations of women's health movements; antioppression, intersectionalities, and cross-cultural perspectives. Same as GWSS:3177.

NURS:3740 End-of-Life Care for Adults and Families 3 s.h. End-of-life issues in care of adults, older adults, and their families. Same as ASP:3740, MED:3740.

NURS:3741 Nurse Residency Role Transition Seminar 3 s.h. New graduate nurses entering practice are enrolled in transition-to-practice programs focused on integration of knowledge, skills, and professional behaviors necessary to provide safe, quality care; associate degree nurses evaluate how they achieved mastery of core knowledge and competencies and discuss Commission on Collegiate Nursing Education (CCNE) Entry-to-Practice Competencies; students examine transition-to-practice experience and document ways in which knowledge, skills, and attitudes are impacted and improved; engage in group discussion and reflective writing assignments to evaluate professional growth during transition-to-practice. Requirements: associate degree nurse graduate currently enrolled in or recent completion of a nurse residency program accredited by Commission on Collegiate Nursing Education (CCNE) or UI online nurse residency program (nurse residency program completed within two years or current enrollment with completion in a minimum of five months).

## NURS:3742 Selected Topics in Nursing

1-2 s.h.
In-depth study of topics in professional nursing practice and health care; workshop format.
NURS:3744 Critical Care Nursing 3 s.h.
Provides nursing students with the knowledge required to safely and competently care for critically ill or injured patients; builds upon foundational courses in medical/surgical acute care. Prerequisites: NURS:3615. Requirements: prerequisite course or RN licensure.

NURS:4096 Distance Education: Honors Independent Study 3 s.h. Building on honors seminar, students implement the project they designed in the seminar with guidance from the student's contracted honors faculty mentor; honors project is expected to apply current professional evidence and result in a rigorous scholarly product; the specific type of product is negotiated with honors faculty mentor; while a minimum of 90 hours is required for honors project, honors faculty mentor and student work together to determine the specific schedule commitments. Prerequisites: NURS:4098.

NURS:4098 Honors Seminar 1 s.h.
Crafting a meaningful honors project; structured steps for development of a project idea, measurable learning objectives, GANTT chart timeline, beginning literature review related to the independent study subject; identification/completion of organizational requirements such as approval processes, access to electronic systems, and training.

NURS:4099 Honors Independent Study 3 s.h.
Building on honors seminar, students implement the project they designed in the seminar with guidance from the student's contracted honors faculty mentor; honors project is expected to apply current professional evidence and result in a rigorous scholarly product; specific type of product negotiated with honors faculty mentor; while a minimum of 90 hours is required for honors project, honors faculty mentor and student work together to determine specific schedule commitments. Prerequisites: NURS:4098.
NURS:4155 Senior Nursing Internship
5 s.h.
Immersion capstone experience to engage in practice under direct supervision of a professional registered nurse mentor; design, provide, coordinate, and evaluate care; work with teams to deliver evidence-based care; improve quality, patient safety, and outcomes. Prerequisites: NURS:3640 and NURS:3660 and NURS:3635 and NURS:3645. Corequisites: NURS:3650 and NURS:3655 and NURS:4160.

## NURS:4160 Professional Role IV: Leadership and Professional Engagement 3,5 s.h.

Concepts of leadership, followership, management, informatics, and professional engagement; quality improvement strategies and skills; professional development, career trajectory, and role transitions. Prerequisites: (NURS:3660 and NURS:3645 and NURS:3635 and NURS:3640) or (NURS:3460 and NURS:3160 and NURS:3660). Corequisites: NURS:3660, if not taken as a prerequisite.

## NURS:4170 Baccalaureate Seminar

1 s.h.
Examination of didactic and clinical learning experiences; documentation of changes in knowledge, skills, and attitudes to demonstrate achievement of relevant competencies; group discussion and reflective writing assignments to evaluate professional growth that has occurred during the BSN program.

NURS:5002 Leadership and Management Essentials 3 s.h.
Roles and strategies for leading and managing others in health care environments to influence health care delivery and provide a healthy, innovative working environment; focus on selected leadership and organizational concepts essential to leaders in health care.
NURS:5007 Applied Epidemiology
3 s.h.
Introduction to basic principles and methods of epidemiology and demonstration of applicability in field of nursing and nursing research; topics include historical perspectives of epidemiology, epidemiological models of health and disease, measures of disease occurrence and association, disease screening, causal inference, study design and application of epidemiological approaches to clinical practice, program planning and evaluation.

NURS:5009 Evaluating Evidence for Practice 3 s.h. Opportunity for clinicians to develop proficiency in use of researchand evidence-based practice; essentials of the research process, qualitative and quantitative research, components of evidence-based practice; acquisition of knowledge and skills necessary for research (knowledge) utilization initiatives and application of evidence-based practice principles in clinical settings; identification of appropriate research questions, synthesis of knowledge base for evidence-based practice, revision of clinical practice guidelines, and evaluation of research utilization and evidence-based practice initiatives.

## NURS:5010 Clinical Data Management and Evaluation

 Clinical data management essential for evaluating evidence-based practice/performance improvement projects; a high caliber data management plan will provide key stakeholders with information necessary to make decisions and includes components of identified processes and outcomes linked to variables and data sources, adequate statistical power, data cleaning and manipulation techniques, statistical methods, and a meaningful presentation of variables that addresses the concerns and questions of key stakeholders; knowledge and skills necessary to develop and execute data management plan for final project. Prerequisites: NURS:5009. Requirements: master's or doctoral standing.NURS:5014 Graduate Physiology for Advanced Practice 3 s.h. In-depth study of physiologic processes across the lifespan; cellular, organ, and systems functions; physiological responses to the internal milieu; interrelationships between body systems and cellular and body-wide defense mechanisms; synthesis of evidence-based information from various sources related to selected physiological phenomena. Requirements: admittance to a graduate healthcare practice program.

NURS:5015 Health Systems, Finance, and Economics 3 s.h.
Global, economic, organizational, legal, political, and technological contexts in advanced nursing practice; knowledge and skills necessary for understanding the evolution of health services organizations, financing of health care, and relationships among socioeconomic systems influencing health care and nursing practice; impact of macrosystems on distribution, acquisition, and use of financial and economic principles in delivery of health care services. Prerequisites: NURS:5002.

NURS:5016 Health Care Infrastructure and Informatics 3 s.h.
Health care infrastructure with a focus on the United States; role of information and technology in its development and implementation; role of data sets, information technology, and emerging technologies in supporting providers in managing patient care and population health of vulnerable groups. Prerequisites: NURS:5002 and NURS:5015.
NURS:5017 Quality and Safety
Foundation for understanding concepts of safety and quality across health care settings; focus on providing a safe environment, elevating staff performance and clinical outcomes related to safety and quality, and methods for continuous improvement.

NURS:5018 Clinical Education in the Care Environment 3 s.h. Preparation to assume role of educator with individuals, groups, and communities, including staff and students; teaching/learning process for providing client education; knowledge and skills needed to effectively fill role of preceptor/mentor.

## NURS:5019 Role Development: Educator in a Practice Discipline

Becoming an educator in a practice discipline; unique knowledge, skills, approaches to didactic and clinical teaching; overview of curriculum development process that affects revision/development; faculty role in curriculum development and evaluation; knowledge and skills to create a learner-centered environment for professional students; key facilitation and evaluation strategies; application of concepts during field experience working directly with experienced faculty.
NURS:5020 Application of Educator Role Competencies 1-3 s.h. Individually designed activities to strengthen performance as an educator in a practice discipline; meet with experienced instructor to develop specific objectives and related activities to be completed during a 45 -hour field experience. Prerequisites: NURS:5019.

NURS:5021 Physiology, Pathophysiology, and Pharmacology I for the Clinical Nurse Leader

3 s.h.
Basic scientific concepts required for BSN and clinical nursing experience; matches physiology and pathophysiology with pharmacological treatments as combined core elements; focus on regulation of cellular, organ, and system functions; regulation of internal milieu; functional interrelationships among body systems; cellular and body-wide defense mechanisms; synthesis of information related to pathophysiological phenomena; pharmacokinetic and pharmacodynamics principles essential for general practice; specific drug classes used in management of clinical conditions. Two semesters.

## NURS:5022 Physiology, Pathophysiology, and Pharmacology II

 for the Clinical Nurse LeaderBasic scientific concepts required for BSN and clinical nursing experience; matches physiology and pathophysiology with pharmacological treatments as combined core elements; focus on regulation of cellular, organ, and system functions; regulation of internal milieu; functional interrelationships among body systems; cellular and body-wide defense mechanisms; synthesis of information related to pathophysiological phenomena; pharmacokinetic and pharmacodynamics principles essential for general practice; specific drug classes used in management of clinical conditions. Two semesters. Prerequisites: NURS:5021.
NURS:5023 Pathophysiology for Advanced Clinical Practice 4 s.h. In-depth study of pathophysiologic processes across the lifespan; emphasis on dysregulation of cellular, organ, and system functions; clinical manifestations of common disease states; resultant physiological responses to internal milieu; interrelationships among body system; cellular and body-wide defense mechanisms; synthesis of evidence-based information from a variety of sources related to selected pathophysiological phenomena. Requirements: graduate-level physiology course.

## NURS:5031 Health Promotion and Assessment for Advanced Clinical Practice <br> 3-4 s.h.

Emphasis on health promotion and advanced health assessment; didactic and clinical laboratory instruction allows students to develop and demonstrate mastery of advanced knowledge and skills in health assessment; content related to promotion of health and prevention of disease; focus on application of content with individuals within the student's respective population-based scope of practice. Requirements: admission to post-BSN DNP program.
NURS:5032 Mental Disorders in Advanced Practice 3 s.h.
Foundation for advanced practice nurse to provide care for common mental health disorders; presentation of neurophysiological, genomic, environmental/social, and developmental theories to understand etiology and presentation of common mental health conditions; psychopharmacological and nonpharmacological principles and modalities for treatment of common mental health problems.

## NURS:5033 Pharmacotherapeutics for Advanced Practice

 Nursing3 s.h.
Examination of pharmacotherapeutic principles essential for advanced clinical practice nursing and prescribing; specific drug classes frequently used in management of clinical conditions experienced by various patient populations; legal considerations related to prescriptive authority and prescribing patterns. Prerequisites: NURS:5023.
NURS:5035 Graduate Pharmacology Specialty 3 s.h. Principles of pharmacology learned in NURS:5033; principles and practices necessary for safe prescribing and medication management of a specialty population (e.g., pediatrics, geriatrics, acute care, mental health). Prerequisites: NURS:5033.

## NURS:5036 Psychopharmacology for Advanced Clinical Practice

3 s.h.
Scientific knowledge of psychopharmacology and its application to treatment of clients with psychiatric disorders across the lifespan; advanced concepts in neuroscience, neurobiology of mental disorders, pharmacokinetics and pharmacodynamics of psychotherapeutic medications in the management of targeted symptoms of psychiatric disorders in clients across the lifespan. Prerequisites: NURS:5023 and NURS:5033.

## NURS:5037 Health Promotion and Assessment for Clinical Nurse Leaders <br> 3-4 s.h.

Emphasis on health promotion and advanced health assessment; didactic and clinical laboratory instruction allows students to develop and demonstrate mastery of advanced knowledge and skills in health assessment; content related to promotion of health and prevention of disease; focus on application of course content with individuals across the lifespan. Requirements: admission to MSN-CNL program.
NURS:5038 Advanced Diagnostic and Therapeutic Procedures for Acute Care

1 s.h.
Introduction to use of advanced diagnostic and therapeutic techniques commonly encountered in acute and critical care; students are provided opportunities to interpret and incorporate technologically derived data; discussion of practices to protect patients, such as informed consent, risk benefit analysis, infection control, and pain management; laboratory experiences allow students to practice techniques used to perform invasive procedures. Prerequisites: NURS:5023 and NURS:5031 and NURS:5033. Requirements: graduate-level physiology course.
NURS:5039 Advanced Diagnostic and Therapeutic Procedures for Primary Care 1 s.h. Introduction to use of advanced diagnostic and therapeutic techniques commonly encountered in primary care; selected laboratory experiences designed to enhance familiarity with use of technologies and interpretation of technologically derived data; discussion of practices used to protect patients (e.g., informed consent, risk benefit analysis, infection control, pain management). Prerequisites: NURS:5023 and NURS:5031 and NURS:5033. Requirements: graduate-level physiology course.

## NURS:5040 Genetics/Genomics for Advanced Nursing

## Practice

2 s.h.
Essential content for understanding the role genetics/genomics plays in health and disease; focus on the core competencies of American Nurses Association (ANA), which provides a framework for advanced nursing practice preparation to incorporate genetics/genomics knowledge for development of prevention, diagnosis, and treatment options in order to optimize health outcomes relevant to clinical role and specialty. Requirements: master's or doctoral standing.

## NURS:5041 Psychotherapeutics for Advanced Practice Nursing

 Across the Lifespan I2 s.h.
Scientific knowledge of psychotherapies and its application to treatment of clients with psychiatric disorders across the lifespan; focus on advanced concepts of effective communication and utilizing evidenced-based psychotherapy theories in the management of targeted symptoms of psychiatric disorders in clients across the lifespan.

## NURS:5042 Psychotherapeutics for Advanced Practice Nursing

 Across the Lifespan IIScientific knowledge of psychotherapies and its application to treatment of clients with psychiatric disorders across the lifespan from NURS:5041; students identify two forms of evidenced-based psychotherapy theories and prepare a pathway to certification in each form of psychotherapy. Prerequisites: NURS:5041.

NURS:5210 Foundations of Professional Nursing
1 s.h.
Introduction to professional nursing practice and exploration of nursing discipline, history, and interprofessional partnerships; examination of nursing theories and professional identity of the nurse. Requirements: admission to MSN Entry into Practice program.
NURS:5215 Medical Surgical Care of Chronically Ill Adults $\mathbf{3}$ s.h. Chronic disease management and reinforcement of clinical judgment, prioritization, psychomotor skills, and professional behavior with diverse patient populations in a variety of health care settings; application of evidence-based nursing practice and safe personcentered practice in the nursing process to adult patients with chronic health care needs; clinical focus includes activities of daily living, positioning, mobility, nutrition, therapeutic communication, asepsis, medication administration, elimination management, interprofessional collaboration, and transition of care. Prerequisites: NURS:3645. Corequisites: NURS:3138.
NURS:5220 Medical Surgical Care of Acutely Ill Adults 3 s.h.
Acute disease management and reinforcement of clinical judgment, prioritization, psychomotor skills, and professional behavior with diverse patient populations in a variety of health care settings; application of evidence-based nursing practice and safe personcentered practice in the nursing process to adult patients with acute health care needs; emphasis on building leadership skills, independent decision-making, interprofessional collaboration, person-centered education, and prioritization with adult patients who have acute health care needs. Prerequisites: NURS:5215. Corequisites: NURS:3438.

## NURS:5225 Community Health Across the Lifespan

## Practicum

4 s.h.
Integration of specialty populations knowledge in providing care to individuals and communities of diverse backgrounds; experiences take place in community, pediatric/mother/baby/family, and geriatric settings; students use nursing process to deliver person-centered care within spheres of disease prevention/promotion of health and well-being, and hospice/palliative and supportive care in a variety of population settings; focus on improvement of health outcomes at individual, family, and community level within context of population-focused practice. Prerequisites: NURS:5220. Corequisites: NURS:3620 and NURS:3631 and NURS:3632.

## NURS:5401 The Care of the Frail Elderly

3 s.h.
Clinical management of the elderly; emphasis on economic considerations, principles of gerontological care, common syndromes, ethical issues; clinical application experience in a long-term care setting. Prerequisites: NURS:5035. Corequisites: NURS:6200 and NURS:6701. Same as ASP:5401.
NURS:5636 Clinical Nurse Leader Seminar 2-3 s.h.
Evolution of clinical nurse leader (CNL) role, eight core role functions, and the process of integration of CNL role into health care system. Requirements: admission to MSN-CNL program.
NURS:5666 Leadership in the Microsystem 3 s.h. Assessment of the microsystem of practice, clinical nurse leader role as leader embedded in a microsystem, and identification of opportunities to enhance care delivery in the microsystem.

## NURS:5696 Clinical Nurse Leader Capstone Clinical

 Immersion6 s.h.
Intensive immersion in role and practice expectations of the clinical nurse leader (CNL); experienced leaders within the microsystem, who are experts in the provision of clinical services at the point of care/ services, serve as mentors. Requirements: enrollment in final semester of MSN-CNL program.

## NURS:5697 Specialty Practice in Nursing Systems

Practice in nursing and health care leadership; interventions that influence health care outcomes for individuals, populations, or systems; final capstone concepts and experiences prepare students to deliver and manage safe, effective, and quality care to diverse populations in a variety of settings and roles, and master nursing and health care leadership principles; 165 -hour guided capstone program implementation and practicum is the centerpiece of learning experience.

## NURS:5800 Independent Study

arr.
Supervised study and/or clinical practice adjusted to needs of master's degree students.
NURS:5801 Master's Project 2-3 s.h.
Opportunity for in-depth analysis and synthesis of a chosen topic that contributes to some aspect of nursing practice.

## NURS:5802 Master's Portfolio <br> 0 s.h.

Opportunity for clear and cohesive synthesis of clinical or professional experiences and competencies, including those gained in graduate study, that portray students' clinical or professional strengths and career goals.
NURS:5803 Distance Education: Master's Independent Study arr. Supervised study and/or clinical practice adjusted to needs of master's degree students.

## NURS:5804 Distance Education: Master's Portfolio 0 s.h.

Clear and cohesive synthesis of clinical or professional experiences and competencies, including those gained in graduate study; students' clinical or professional strengths and career goals.
NURS:5806 Distance Education: Master's Project 2-3 s.h. In-depth analysis and synthesis of a chosen topic that contributes to some aspect of nursing practice.
NURS:6000 Human Anatomy for Advanced Practice 4 s.h. Integrated study of interrelationships between anatomic structure and physiological function in health and disease at various points in the lifespan; mechanisms governing and supporting cellular, organ, and system function; internal milieu; relationship of study to clinical assessment of functional integrity of individual organ systems utilizing pertinent objective and subjective data; implications of pathophysiology for anesthesia and implications of anesthesia for pathophysiology; foundation for clinical practicums and courses in nurse anesthesia. Requirements: completion of an undergraduate human anatomy and physiology course and admission to anesthesia nursing program. Same as ACB:6000.

NURS:6004 Scientific Principles for Anesthesia Practice 4 s.h. Applicable chemical and physical properties of molecules important in anesthesia; technological principles and equipment used to safely deliver those molecules to patients and monitor patients during anesthesia; topics include basic chemical and physical calculations, properties of substances in solution, measurement, behavior of gases and other fluids, effects of heat transfer, and the specific chemistry of inhaled and intravenous anesthetics and adjuvant drugs. Corequisites: NURS:6006. Same as ANES:6004.

## NURS:6006 Pharmacology of Anesthesia Practice 3 s.h. <br> Builds on content from foundational graduate pharmacology course;

 focus on safe prescribing, administration, and management of medications used to provide general, regional, or local anesthesia and analgesia for all patient populations across lifespan undergoing varied surgical, obstetrical, or other procedures in any health care setting. Prerequisites: PCOL:6204 with a minimum grade of B-. Requirements: enrollment in anesthesia nursing program. Same as ANES:6006.4 s.h. NURS:6007 Basic Principles of Anesthesia Practice 5 s.h.
Overview and integration of anesthetic agents and techniques; patient assessment, preoperative airway evaluation, anesthetic planning, principles of fluid management, and arterial blood gas interpretation; principles of general and regional anesthesia and techniques as they pertain to each surgical specialty; Occupational, Safety and Health Administration (OSHA), The Joint Commission (TJC), and institutional regulations and requirements pertinent to anesthesia practice. Prerequisites: NURS:6004 with a minimum grade of B- and NURS:6006 with a minimum grade of B-. Same as ANES:6007.
NURS:6010 Advanced Principles of Anesthesia Practice I 4 s.h. Special needs and intraoperative anesthetic management of complex patient populations and those with advanced pathologic states; anesthetic techniques for specific surgical subspecialties including pediatrics, obstetrics, neurosurgery, cardiac, vascular, thoracic, transplant, trauma, EENT, dental, and aesthetic or reconstructive procedures; pertinent pathophysiology and anesthetic monitoring and management techniques; clinical case conferences provide opportunities to discuss perianesthetic complications and challenges. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as ANES:6010.
NURS:6012 Advanced Principles of Anesthesia Practice II 1 s.h. Acute and chronic pain treatment modalities for all patients presenting for a variety of medical or surgical procedures across the lifespan. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as ANES:6012.
NURS:6050 Introductory Clinical Anesthesia
Initial mentorship in clinical anesthesia; development of basic clinical skills needed for a career as nurse anesthetist; application and integration of theoretical knowledge in clinical setting. Prerequisites: NURS:6004 and NURS:6006. Corequisites: NURS:6007. Same as ANES:6050.
NURS:6051 Clinical Anesthesia I
2 s.h.
Mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialities including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6050 or ANES:6050. Corequisites: NURS:6010. Same as ANES:6051.
NURS:6052 Clinical Anesthesia II 2 s.h.
Additional mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialities including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6051 or ANES:6051. Same as ANES:6052.

NURS:6053 Advanced Clinical Anesthesia 2 s.h.
Mentored clinical anesthesia at selected sites; development of advanced clinical skills and critical thinking by providing anesthesia for all surgical specialties and invasive diagnostic procedures in all anesthetizing locations; providing anesthesia for all patients in all settings, including on call emergency surgeries. Prerequisites: NURS:6052. Same as ANES:6053.
NURS:6054 Obstetrical Anesthesia 2 s.h.
Experience delivering analgesia and anesthesia for parturients during labor and delivery process. Prerequisites: NURS:6052. Same as ANES:6054.

NURS:6055 Rural Anesthesia settings. Prerequisites: NURS:6052. Same as ANES:6055.

## NURS:6100 Primary Care: Infants, Children, and Adolescents

 IEnhancement of clinical knowledge and skills for infant, child, adolescent care. Prerequisites: NURS:5035. Corequisites:
NURS:6701.

## NURS:6101 Primary Care: Infants, Children, and Adolescents

 IIEnhancement of clinical knowledge and skills for infant, child, adolescent care; development and refinement of knowledge and skills in primary health care delivery. Prerequisites: NURS:6100. Corequisites: NURS:6702. Same as PEDS:6101.

## NURS:6104 Essentials of Pediatric Primary Care: Infants, Children, and Adolescents

Builds on prior graduate coursework to enhance foundational knowledge and skills in infant, child, and adolescent population; application of essential concepts of pediatric primary care to identify, diagnose, and manage health issues; emphasis on concepts (e.g., growth and development, anticipatory guidance, common pediatric health concerns) managed in ambulatory health care systems. Prerequisites: NURS:5031. Corequisites: NURS:5035.
NURS:6200 Primary Care: Adults and Older Individuals I $\mathbf{3}$ s.h. Pathophysiologic alterations and clinical management of associated health care problems in adults, the elderly. Prerequisites: NURS:5035. Corequisites: NURS:6701.
NURS:6201 Primary Care: Adults and Older Individuals II 3 s.h. Continuation of NURS:6200. Prerequisites: NURS:6200. Corequisites: NURS:6702.

NURS:6400 Pediatric Acute Care I 3 s.h.
First of two courses exploring management of complex acute, critical, and chronically ill patients with urgent and emergent conditions; focus on alterations in pathophysiology, advanced assessment, diagnosis, and collaborative management of infants, children and adolescents with selected episodic/chronic health problems in acute/critical care. Prerequisites: NURS:5035. Corequisites: NURS:6701.

## NURS:6401 Pediatric Acute Care II

3 s.h.
Second of two courses exploring management of complex acute, critical, and chronically ill patients with urgent and emergent conditions; focus on alterations in pathophysiology, advanced assessment, diagnosis, and collaborative management of infants, children and adolescents with selected episodic/chronic health problems in acute/critical care. Prerequisites: NURS:6400. Corequisites: NURS:6702.
NURS:6410 Adult-Gerontology Acute Care I
3 s.h.
First of two courses exploring management of complex acute, critical, and chronically ill patients with urgent and emergent conditions; focus on alterations in pathophysiology, advanced assessment, diagnosis, and collaborative management of adults and older adults with selected episodic/chronic health problems in acute/critical care. Prerequisites: NURS:5035. Corequisites: NURS:6701.
NURS:6411 Adult-Gerontology Acute Care II
3 s.h.
Second of two courses building on prior acute care content and focusing on critical, complex, and end of life care; emphasis on evidence-based strategies to stabilize patient's condition, assessment of risk for and prevention of complications, restoration and maintenance of optimal health and functioning, and/or provision of palliative care in context of patient's physical and psychosocial environment. Prerequisites: NURS:6410. Corequisites: NURS:6702.

3 s.h.

NURS:6500 Psychiatric/Mental Health Nursing for Advanced Practice Didactic I
Introduction to psychological principles and theories as they relate to mental health across the lifespan, intersections between physical and mental health, and role of advanced practice nurse in psychiatric/ mental health care; examination of psychological theory within a life span developmental framework from infancy to older adult; introduction to role of cultural diversity in mental health; emphasis on assessment, diagnosis, and management of mental disorders that are common in adults. Prerequisites: NURS:5032 and NURS:5036. Corequisites: NURS:6701.

## NURS:6501 Psychiatric/Mental Health Nursing for Advanced

## Practice Didactic II

Builds on prior lifespan content with specific focus on selected populations, families, and groups; students further define and expand their practice of psychiatric/mental health nursing based on the integration of theory, standardized languages, and research; exploration of a variety of approaches and issues of service delivery; emphasis on methods and skills for completing a comprehensive mental health assessment and managing common psychiatric illness in childhood/adolescence and late life. Prerequisites: NURS:6500. Corequisites: NURS:6702.
NURS:6550 Advanced Leadership and Management 3-4 s.h. Leadership and management concepts and theories; application to roles unique to executive nurse leader in health care organizations in institutional and community settings; emphasis on advanced leadership roles for facilitating, integrating, and coordinating complex structures, processes, and outcomes in health care systems.
NURS:6551 Financial Management 3-4 s.h.
Preparation for nurse leaders and practitioners to use techniques for financial analysis and decision-making for patient care programs across the health care continuum; focus on efficient and effective management of resources for delivery of quality health care services.
NURS:6552 Executive Management in the Organization 3-4 s.h.
Manage operations of patient care services across health care continuum within the framework of an established health care organization; focus on efficient and effective management of the structure, governance, patient care delivery system of care, and outcomes of care.
NURS:6553 Seminar on Innovations 4 s.h.
Strategizing about taking meaningful action, disrupting stable processes, diffusing innovation, and sustaining change; emerging innovations in nursing and health care systems that impact the functions and responsibilities of nurse leaders.

## NURS:6554 Seminar on Healthy Work Environments 3 s.h.

Application of leadership and management knowledge specific to creating and sustaining healthy work environments in health care; current and emerging issues focused on health care work environments.
NURS:6555 Care Coordination Across Professional and Organizational Boundaries 3-4 s.h.
Structures, processes, concepts, tools and experience that leads to effective coordination of patient care, case and population health management as well as information, management and financial systems supporting care coordination; knowledge and skills for understanding structures, processes, challenges, solutions and innovations in coordinating patient care across professional disciplines and organizational boundaries; impacts of care coordination issues on patient experience, care quality and costs; evaluate interventions for informed and effective care processes in field experience.

## NURS:6556 Marketing and Communications for Health Care

 LeadersPreparation to strategically plan, establish, and manage a customercentric marketing strategy; focus on marketing frameworks and theories, and development of a strategic marketing approach with appropriate leadership strategy and positioning to ensure customer value; health care leaders' role in the marketing mix, mobilization of partners, crisis management, and crisis communication planning and response skills.

## NURS:6557 Clinical Practice Management and Leadership for Advanced Practice Providers

Overview of key aspects for health care provider leadership in clinical practice management and health care enterprise; advanced practice providers are expected to deliver health care services, lead to deliver value, achieve maximum reimbursement, and meet the Institute for Healthcare Improvement's quadruple aims; focus on value management, revenue cycle management, professional leadership, provider leadership, and clinical practice management; students read, discuss, explore, critique, and practice skills related to course topics.
NURS:6701 Advanced Practice Clinical Practicum I 3-4 s.h. Application of advanced physical assessment, pathophysiology, and diagnostic reasoning in a clinical setting appropriate to a specific population. Prerequisites: NURS:5035 or NURS:5036. Corequisites: NURS:6100 or NURS:6400 or NURS:6410 or NURS:6500 or (NURS:5401 and NURS:6200) or (NURS:6100 and NURS:6200).
NURS:6702 Advanced Practice Clinical Practicum II 3-4 s.h. Continuation of NURS:6701; emphasis on diagnostic reasoning and formulation of treatment plans. Prerequisites: NURS:6701. Corequisites: NURS:6101 or NURS:6201 or NURS:6401 or NURS:6411 or NURS:6501 or (NURS:6101 and NURS:6201).
NURS:6703 Advanced Practice Clinical Practicum III 2-4 s.h.
Synthesis of role expectations for advanced practice with focus on clinical competencies appropriate to the specialization. Prerequisites: NURS:6702.

## NURS:6704 Practicum in Executive Leadership and Management

Immersion experience in application of principles and methods of leadership, management, and evaluation to facilitate health care operations in various settings; student collaboration with a preceptor for mentored in-depth immersion in systems practice.

## NURS:6802 Health Policy, Law, and Advocacy

Issues that shape health care economics and policy development; framework for understanding work of legislators and other policy makers; emphasis on state and national level; health issues in developing countries; health care system, its economics, financing, role of government, not-for-profit entities, and nongovernmental organizations.
NURS:6808 Population Health for Advanced Practice 3 s.h.
Coordination and integration of care delivery for population health and clinical effectiveness across the continuum of care; management of optimized outcomes; emphasis on informatics infrastructure and translation of evidence-based practice to managing care provision and achieving desired outcomes as a result of care provision.
NURS:6809 Advanced Practice Role I: Introduction 2-3 s.h. Introduction to competencies necessary for advanced nursing practice at the doctoral level; introduction to topics related to knowledge, skills, and abilities that enable doctorate of nursing practice graduates to function as leaders in a health care and nursing practice; topics may include advanced nursing practice role development, communication, collaboration, leadership, ethics, finance, organizational structure, and scope of practice and regulatory issues; first in a two-course sequence. Requirements: doctoral standing.

NURS:6810 Advanced Practice Role II: Integration 2-3 s.h.
Focus on transition to leadership roles that nurses prepared with a Doctor of Nursing Practice degree are expected to fill in practice; students are called upon to demonstrate synthesis of content from previous DNP program courses; discussion of topics pertinent to advanced roles in nursing practice including challenges and opportunities, leadership in health systems and the profession, interprofessional communication and collaboration, conflict management, dissemination of evidence and expertise to improve health care, advocacy and ethical decision-making. Prerequisites: NURS:6809.

## NURS:6811 Social Determinants of Health and Health System Inequities

Social determinants of health outcomes and inequities; social and economic forces that shape them using various perspectives and lenses; conceptualization and measurement of variables representing risk and inequities that serve as the organizing framework for course discussions, including individual and social factors; critical analysis of research studies for social bias.
NURS:6826 Doctor of Nursing Practice Project I 2 s.h. Identification and analysis of a practice, system, or policy problem related to advanced nursing practice; development of an evidencebased proposal to improve outcomes for a group, population, or community; project will reflect student's independent scholarship and includes 370 minimum cumulative hours in the Doctor of Nursing Practice project series; first in a four-course sequence. Requirements: doctoral standing.
NURS:6827 Doctor of Nursing Practice Project II 1-2 s.h. Students finalize their proposal, obtain project site approvals, complete human subjects review, begin implementation once approved, and prepare for project evaluation; project reflects student's independent scholarship; Doctor of Nursing Practice project series; second in a four-course sequence. Prerequisites: NURS:6826. Requirements: doctoral standing.
NURS:6828 Doctor of Nursing Practice Project III 1-2 s.h.
Students continue implementation, begin to evaluate outcomes of their chosen project, and prepare a rough draft of documents for defense of the project; project will reflect the student's independent scholarship; Doctor of Nursing Practice project series; third in a fourcourse sequence. Prerequisites: NURS:6827. Requirements: doctoral standing.
NURS:6829 Doctor of Nursing Practice Project IV 1-2 s.h. Students finish evaluation; prepare and defend their project to faculty, peers, and the community; and give a final report to the project site; project will reflect student's independent scholarship; Doctor of Nursing Practice project series; fourth in a four-course sequence. Prerequisites: NURS:6828. Requirements: doctoral standing.

## NURS:6900 Computational Intelligence

Concepts, models, algorithms, and tools for development of intelligent systems; data mining, expert systems, neural networks for engineering, medical and systems applications. Same as ISE:6350.
NURS:7000 Philosophy and Sociology of Nursing Science 3 s.h. Introduction to philosophical, historical, and
sociological underpinnings of contemporary science and traces history of nursing as scientific and applied discipline; exploration of the nature of knowledge, different ways of knowing, history of science, various philosophical approaches, goals of knowledge generation; analysis of sociology of science to identify the norms, cultural and political influences, differences among scientific disciplines; emphasis on interdisciplinary science; identification of concepts and conceptual definitions, especially as these differ across disciplines. Requirements: PhD standing.

NURS:7001 Qualitative Research
Provides a foundation in the design of qualitative and mixed methods research and analysis of qualitative and mixed methods data; emphasis on interactions among research purpose, question, aims, and interaction of that triad with sampling, setting, data collection, and analysis; using interpretive description as an exemplar, students design and conduct a small qualitative study relevant to their own interests; College of Nursing faculty present overviews of methods in which they have expertise, such as feminist research, ethnography, and narrative. Prerequisites: NURS:7000 and NURS:7002 and NURS:7006. Requirements: PhD standing.

NURS:7002 Designing Research 3 s.h.
Introduction to designing research studies; identifying a problem and determining overall goal of the study; research goal subsequently leading to purpose, specific aims, and choice of a specific design; focus on issues related to maintaining continuity throughout the design of a study. Prerequisites: NURS:7000 and NURS:7006. Requirements: PhD standing.
NURS:7003 Quantitative Research
4 s.h.
Refinement of student's understanding of the application of scientific logic; discussion of various quantitative methods; sampling theory and approaches to sample selection, recruitment, and methods to avoid bias; issues related to study validity, intervention development and evaluation, instrument selection, management of large data sets, and maintenance of data integrity; lab is designed as a workshop using guided exercises, peer sharing, and collaborative work groups to provide experiences integrated with content covered in didactic section of the course. Prerequisites: NURS:7002 and NURS:7006.
NURS:7006 Theory and Model Development 3 s.h.
Critical role of theories in science and the importance of continuous refinement of theory throughout a program of research; focus on theory construction and model building; examination of relationships linking concepts; analysis of structure, scope, and forms of theories/ models; construction of micro- or mid-range theories/models using positivistic and inductive approaches; emphasis on critical analysis of literature. Prerequisites: NURS:7000. Requirements: PhD standing.

## NURS:7310 Measurement in Health Research

3 s.h.
How to develop and employ measures that are operationalized within the context of theories and conceptual models; sound measurement principles and practices, as well as adequate testing for reliability and validity using appropriate methods and procedures. Prerequisites: NURS:7006.

NURS:7404 Biological Markers in Health Research 3 s.h.
Use of biomarkers as surrogate clinical endpoints, measure of behavior, and measures of exposures; judicious integration of biomarkers into an overall program of health research in light of pertinent considerations, including validity and reliability, feasibility and cost. Prerequisites: NURS:6811 and NURS:7002 and NURS:7003.

## NURS:7509 Research Residency

 1-3 s.h.Participation in a research project based on an individualized plan of study, under guidance of an experienced researcher; students register with the respective faculty member for a residency that takes place at the University of Iowa, or register with their advisor for a residency that takes place outside the University of Iowa. Requirements: admission to the PhD in nursing.

## NURS:7800 Independent Study

arr.

Supervised study adjusted to needs of doctoral degree students. Requirements: doctoral enrollment.

NURS:7801 Seminar: Research Scholarship Role Development

2 s.h.
Preparation for successful completion of doctoral coursework, comprehensive examination, and dissertation; faculty-guided structure provides opportunities for students to assimilate knowledge and behavior of a scholar and activities that facilitate and optimize socialization and success as nurse scientists and academic faculty. Requirements: PhD standing.

## NURS:7803 Research Practicum I

 2 s.h.First of two practicums that serve as a system of apprenticeship by which students are mentored through selected aspects of scientific processes, methodologies, analysis, and dissemination of results; projects relevant to student's area of study. Requirements: PhD standing.

## NURS:7804 Research Practicum II <br> 2 s.h.

Second of two practicums that serve as a system of apprenticeship by which students are mentored through selected aspects of scientific processes, methodologies, analysis, and dissemination of results; project relevant to student's area of study. Requirements: PhD standing.
NURS:7805 Dissertation Research arr.

## Bachelor of Science in Nursing, BSN

The College of Nursing offers two paths to the Bachelor of Science in Nursing (BSN): a prelicensure program for students who do not hold a nursing license (see the Bachelor of Science in Nursing [p. 1892] in this section of the catalog) and a program for registered nurses (see Nursing-RN [p. 1894] in this section of the catalog).

The BSN programs prepare students for careers caring for patients in hospitals and in community agencies such as public health services, schools, homes, and industries. They also provide a base for graduate study in nursing.

In addition to combining general education with specialized career preparation, the University of Iowa programs in nursing offer the advantage of full participation in the social, cultural, and recreational activities of a highly diverse campus community. A university education enables students to prepare for a career as well as a life of thought and action informed by knowledge, introspection, and contemplation.

The BSN programs provide a basis for nurses' roles in wellness and health promotion, in acute care, and in long-term care for chronic illness. The professional nurse may provide care to individuals, families, groups, and communities along a continuum of health, illness, and disability in any sector of the health care system.

In addition to providing care, the nurse serves as a coordinator of health care by organizing and facilitating the delivery of comprehensive, efficient, and appropriate service to individuals, families, groups, and communities. The nurse demonstrates the ability to conceptualize the total continuing health needs of the patient, including legal and ethical aspects of care. The University of Iowa programs' goal is to produce graduates who are competent, committed, creative, and compassionate.

## Expenses and Insurance

Students pay University of Iowa student fees throughout the BSN program. They must purchase uniforms, shoes, a stethoscope, and a watch with a full-sweep second hand, and they must pay the cost of computer testing, supplies, and materials for required nursing courses. All nursing students arrange and pay for their own health screening requirements, health insurance, and transportation once they are enrolled in clinical nursing courses. They also pay fees that cover the cost of criminal background checks, laboratory equipment, professional liability insurance, and simulation.

## Mandatory Health Insurance

BSN prelicensure students upon admission to the College of Nursing and each August afterward must provide verification that they have obtained and currently hold health insurance that satisfies the following minimal standards of coverage (or an equivalent alternative health care plan):

- \$250,000 lifetime benefit;
- coverage for hospitalization, including coverage for room and board, physician visits, surgeon services, X-ray, and lab services;
- inpatient deductible under an individual policy not exceeding $\$ 500$ per admission and a $20 \%$ copayment/coinsurance requirement; and
- coverage for medically necessary care, including physician services, X-ray, and lab services for the treatment of emergencies, illness, accident, and injury.

## Professional Liability Insurance

All students in the College of Nursing are required to carry professional liability insurance throughout the duration of their program. Agencies that provide clinical practicums for College of Nursing programs require that students have insurance coverage. BSN prelicensure students and nursing-RN students are covered by a group policy supported by student fees.

## Learning Outcomes

Graduates of the Bachelor of Science in Nursing (BSN) will be able to:

- ensure delivery of safe, quality nursing care to diverse individuals, families, groups, communities, and populations throughout the lifespan and across systems of care;
- integrate theoretical and scientific knowledge gained from natural and social sciences, and culture, society, and the liberal arts into nursing;
- demonstrate leadership and teamwork skills across systems of care to promote quality health outcomes;
- use the best evidence from multiple ways of knowing to inform practice to make clinical judgments, solve problems, and address system improvements;
- use effective interprofessional communication and collaboration strategies to promote quality health outcomes;
- apply health promotion and disease prevention strategies to diverse individuals, families, groups, communities, and populations to promote quality health outcomes; and
- demonstrate professional values fundamental to the discipline of nursing.

## Bachelor of Science in Nursing

The Bachelor of Science in Nursing prelicensure program of study requires a minimum of $128 \mathrm{~s} . \mathrm{h}$., including $64 \mathrm{~s} . \mathrm{h}$. in the nursing major and 64 s.h. in supporting coursework that is a prerequisite to the nursing major. The program is intended for students beginning their education in nursing. A BSN program for registered nurses is described under Nursing-RN [p. 1894] in this section of the catalog. All students must earn a grade-point average (GPA) of at least 2.00 to earn the degree.
BSN students may complete their entire program at Iowa, enrolling in the College of Liberal Arts and Sciences to complete courses that are prerequisites to the nursing major, or they may transfer from an institution that offers comparable prerequisite courses that are approved by the University of Iowa and the College of Nursing.
They must earn standard admission to the College of Nursing once they have completed the prerequisite coursework. Highly qualified applicants may be admitted to the College of Nursing directly from high school under the BSN direct admission program; see Admission [p. 1895] in this section of the catalog.
Students who are part of the BSN direct admission program spend their first four semesters (two years) on prerequisite coursework and complete the requirements for the nursing major during the next four semesters (their third and fourth years), earning the BSN in a total of four academic years. Students who earn standard admission to the College of Nursing have five semesters to complete prerequisite coursework. They begin work for the nursing major in the spring of their third year and complete the major in four semesters, earning the BSN degree.
University of Iowa students who have declared an interest in the prelicensure nursing program are advised at the university's Academic Advising Center until they are admitted to the College of Nursing.

After admission to the college, each student is assigned a professional advisor in the college's Felton Student Success Center.

Nursing courses are based on concepts of health, deviations from health, and nursing intervention. Coursework progresses in complexity across the curriculum. The curriculum reflects the current trend in health care delivery toward an emphasis on nursing as a service provided both inside and outside hospitals. Students have access to clinical experiences selected from a multitude of agencies in Iowa and around the country.
The following coursework is required for BSN students.

| Requirements | Hours |
| :--- | :--- |
| General Education Prerequisites | 13 |
| Natural Science Prerequisites | 23 |
| Social Science Prerequisites | $9-10$ |
| Other Prerequisites | 19 |
| Courses Required for the Major | 64 |

The BSN prelicensure program requires the following coursework. Students must complete the prerequisite coursework before beginning the work required for the major in nursing.

## Prerequisite Courses

All of the following prerequisites must be completed prior to enrolling in the nursing major courses. Any high school deficiencies must be completed or satisfied with collegiate coursework. Students work with their academic advisor to ensure these requirements are complete.
General Education Prerequisites

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| RHET:1030 | Rhetoric | 4 |
| International and Global Issues course | 3 |  |
| Literary, Visual, and Performing Arts course | 3 |  |
| Values and Culture or Diversity and Inclusion course | 3 |  |

Natural Science Prerequisites

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| ACB:3110 | Principles of Human Anatomy | 3 |
| BIOL:1141 | Human Biology: Health <br> Professions | 4 |
| CHEM:1070 | General Chemistry I | 3 |
| CHEM:1080 | General Chemistry II | 3 |
| HHP:1300 | Fundamentals of Human | 3 |
| HHP:2310 | Physiology | 3 |
| MICR:3164 | Nutrition and Health | 3 |
|  | Microbiology and Human | 4 |

## Social Science Prerequisites

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Human Development and <br> Behavior | 3 |
| NURS:1030 | Elementary Psychology | 3 |
| PSY:1001 | Introduction to Sociology | $3-4$ |
| And one of these: | Contemporary Social Problems | $3-4$ |

## Other Prerequisites

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Diversity, Equity, and Inclusion |  |
| NURS:3111 | Elementary Statistics and | 3 |
| STAT:1020/ Inference | 3 |  |
| PSQF:1020 |  | 13 |

## Courses Required for the Major

Direct and standard admission students complete the following courses for the major in nursing.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| NURS:3128 | Health Assessment and Communication Across the Lifespan | 3 |
| NURS:3138 | Nursing and Pharmacological Interventions I | 5 |
| NURS:3151 | Introduction to Clinical Concepts for Nursing | 2 |
| NURS:3160 | Professional Role I: Professionalism and Patient Safety | 3 |
| NURS:3438 | Nursing and Pharmacological Interventions II | 5 |
| NURS:3451 | Basic Clinical Concepts for Nursing | 1 |
| NURS:3460 | Professional Role II: Research | 3 |
| NURS:3518 | Pathology | 3 |
| NURS:3615 | Adult Medical/Surgical Nursing Practicum | 3 |
| NURS:3620 | Gerontological Nursing | 3 |
| NURS:3625 | Gerontological Nursing Practicum | 2 |
| NURS:3631 | Nursing Care of Children and Families | 2 |
| NURS:3632 | Nursing Care of Childbearing Families | 2 |
| NURS:3635 | Parent Child Nursing Practicum | 2 |
| NURS:3640 | Psychiatric/Mental Health Nursing | 3 |
| NURS:3645 | Mental Health Nursing Practicum | 2 |
| NURS:3650 | Community and Public Health Nursing | 3 |
| NURS:3651 | Advanced Clinical Concepts for Nursing | 1 |
| NURS:3655 | Community and Public Health Nursing Practicum | 2 |
| NURS:3660 | Professional Role III: Improving Health Systems | 3 |
| NURS:4155 | Senior Nursing Internship | 5 |
| NURS:4160 | Professional Role IV: <br> Leadership and Professional Engagement | 3 |
| Electives |  | 3 |
| Total Hours |  | 64 |

See BSN-Plans of Study and Prerequisite Information on the College of Nursing website for semester-by-semester study plans for direct and standard admission students.

## Honors in Nursing

The College of Nursing Honors Program provides seminars and independent study experience for qualified students. In order to pursue honors studies in nursing, students must maintain a University of Iowa GPA and a nursing major GPA of at least 3.50 .
The honors program in nursing enables students to explore subject matter based on individual interests, needs, and goals. It provides opportunities for self-initiative, research experience, scholarly writing, and intellectual and personal development, and it challenges students to grow and excel. Students who fulfill the requirements of the program graduate with honors in nursing.

In addition to honors in their majors, prelicensure BSN students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the university's honors program.

## Nursing-RN

The nursing-RN program of study requires 32 s.h. of credit. Students must hold a valid Iowa nursing license (RN) and an Associate Degree in Nursing or Diploma in Nursing. They must earn a grade-point average (GPA) of at least 2.00 to earn the degree.

The program is designed to offer registered nurses the opportunity to build on their nursing knowledge and experience by earning a Bachelor of Science in Nursing. Students take courses that focus on professionalism and patient safety, research, improvement of health systems, leadership, professional engagement, and community and public health.
Students may transfer coursework completed at other colleges and universities to satisfy the prerequisites, general education requirements, and electives for admission to the College of Nursing (see "Admission to the Nursing-RN Program" under Admission [p. 1895] in this section of the catalog). Once a student is admitted to the program, the student has the option of completing the required 32 s.h. in three semesters, four semesters, or in five semesters.

The program is delivered online, with limited face-to-face meetings for the community health practicum experience and leadership project. Students must complete a practicum experience in Iowa or an immersion experience in Eswatini, Africa, and may be required to drive up to 100 miles to a regional practicum setting.

The College of Nursing participates as a receiving institution in the Iowa Statewide Articulation Plan for Nursing Education: RN to Baccalaureate.

The nursing-RN program requires the following College of Nursing coursework.

## Courses Required for the Major

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NURS:3111 | Diversity, Equity, and Inclusion <br> for Health Professions | 3 |
| NURS:3160 | Professional Role I: <br> Professionalism and Patient | 3 |
|  | Safety |  |
| NURS:3460 | Professional Role II: Research | 3 |
| NURS:3518 | Pathology | 3 |
| NURS:3650 | Community and Public Health | 3 |
|  | Nursing |  |

| NURS:3655 | Community and Public Health <br> Nursing Practicum | 2 |
| :--- | :--- | ---: |
| NURS:3660 | Professional Role III: Improving <br> Health Systems | 3 |
|  | Introduction to Human Genetics | 3 |
| NURS:3734 | Professional Role IV: |  |
| NURS:4160 | Leadership and Professional | 5 |
|  | Engagement |  |
| NURS:4170 | Baccalaureate Seminar |  |
| Nursing electives |  | 1 |
| Total Hours |  | $\mathbf{3 2}$ |

See RN-B.S.N. Plans of Study on the College of Nursing website for semester-by-semester views of required coursework for full-time (three semesters) and part-time (four or five semesters) study for fall and spring entry.

## Honors in Nursing

The College of Nursing Honors Program provides seminars and independent study experience for qualified students. In order to pursue honors studies in nursing, students must maintain a University of Iowa GPA and a nursing major GPA of at least 3.50.

The honors program in nursing enables students to explore subject matter based on individual interests, needs, and goals. It provides opportunities for self-initiative, research experience, scholarly writing, intellectual and personal development, and challenges students to grow and excel. Students who fulfill the requirements of the program graduate with honors in nursing.

## Nursing-RN/3+1 Agreements

## Agreements with Area Community Colleges in Iowa

The nursing-RN program at the College of Nursing has RN to BSN $3+1$ agreements with area community colleges in Iowa for qualifying nursing graduates to seamlessly transfer to the UI College of Nursing to finish their Bachelor of Science in Nursing (BSN) degree in one year. Under the $3+1$ structure, nursing students stay in their three-year program at a community college and then complete the BSN degree in one year (three semesters).

The nursing-RN program at the College of Nursing provides access to baccalaureate education for nurses throughout the state. The $3+1$ partnership provides enhanced opportunities for unparalleled leadership experience while allowing students to continue working in their communities as they complete their degree.
See RN to BSN 3+1 on the College of Nursing website for the agreements with multiple higher education institutions around the state of Iowa.

## Combined Programs Nursing-RN/DNP

Students in the RN subprogram of the BSN who are interested in earning a Doctor of Nursing Practice degree with an adult gerontology primary care nurse practitioner, family nurse practitioner, health systems, or pediatric nurse practitioner-primary care subprogram may apply to the combined program offered by the College of Nursing. For information about the DNP degree, see the Doctor of Nursing Practice, DNP [p. 1903] in the catalog.
See RN-BSN Plans of Study on the College of Nursing website for semester-by-semester views of required coursework for Undergraduate to Graduate (U2G) Nursing-RN/DNP study for fall and spring entry.

## Admission

Students entering the university who are not licensed registered nurses (RN) apply to the BSN prelicensure program. Registered nurses apply to the RN-BSN program.

All entering first-year and undergraduate transfer students who have earned fewer than 24 s.h. when they apply for admission to the University of Iowa must complete the American College Test (ACT) or the Scholastic Aptitude Test (SAT). For information about the American College Test, visit the ACT website; for information about the Scholastic Aptitude Test, visit the College Board website.

Applicants to the BSN and RN-BSN programs whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL). Registered nurses educated outside the United States are required to present verification of having passed the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination and specified Excelsior baccalaureate nursing examinations.

Applicants admitted to the College of Nursing are expected to be able to meet the curriculum's performance standards; see "Technical Standards" below.

A criminal background check is conducted for all prelicensure and undergraduate students before they begin the nursing major. Admission to all programs is conditional pending successful review of criminal background and abuse registry.

## Admission to the BSN Prelicensure Program

All applicants to the BSN prelicensure program (direct and standard admission applicants) must have satisfied the following minimum high school course requirements.

- English: four years.
- Mathematics: three years, including algebra I, algebra II, and geometry.
- Science: one year of biology, one year of chemistry, and one year of physics.
- Social science: three years.
- World languages: four years (fourth-level proficiency) of the same world language; or two years (second-level proficiency) in two different world languages; or two years of the same world language plus one 3 s.h. course from the GE CLAS Core [p. 19] International and Global Issues, Values and Culture, or Diversity and Inclusion.

## BSN Direct Admission

A select group of highly qualified students is admitted to the College of Nursing directly from high school through the BSN Direct Admission Program. To be considered for direct admission, students must meet the following requirements:

- a grade-point average (GPA) of at least 3.80, and
- completion of all the minimum high school course requirements listed under "Admission to the BSN Prelicensure Program" above.
High school requirements must be satisfied prior to enrollment at the University of Iowa.
Students admitted through the Direct Admission Program must maintain a cumulative GPA of at least 3.00 and have clean criminal and student life records during their first four semesters in the program. Students who fail to meet these requirements may be subject to probation or dismissal from the College of Nursing.

## BSN Standard Admission

In order to apply for standard admission to the College of Nursing, students must:

- have a cumulative GPA of at least 3.00;
- have a minimum of $48 \mathrm{~s} . \mathrm{h}$. of college credit;
- have completed the minimum high school course requirements listed under "Admission to the BSN Prelicensure Program" above, with any deficiencies satisfied through college coursework;
- have completed all BSN prerequisite coursework listed under the Bachelor of Science in Nursing [p. 1892] (a maximum of two natural science prerequisites and two social science prerequisites may be in progress or planned at the time of application); and
- must have a grade of $C(2.00)$ or higher on all prerequisite coursework.

In order to enter the College of Nursing, successful standard competitive admission applicants must:

- maintain a cumulative GPA of at least 3.00;
- have a minimum of 64 s.h. of college credit; and
- have completed any remaining prerequisite coursework listed under the Bachelor of Science in Nursing [p. 1892], including any remaining natural science and/or social science prerequisites.
Successful standard admission students must complete any remaining natural science prerequisite no more than 10 years before they enter the College of Nursing and enroll in coursework for the nursing major.

## Admission to the Nursing-RN Program

Applicants to the program must hold an RN license and an Associate Degree in Nursing or Diploma in Nursing. They must have a cumulative GPA of at least 3.00. Admission is highly competitive, with emphasis on the natural sciences (anatomy, biology, chemistry, microbiology, physiology), writing (composition I and II), and mathematics (statistics). World language is not an admission requirement.

## Technical Standards

Applicants to the College of Nursing are expected to be capable of completing the entire nursing curriculum and earning a BSN degree. Nursing is a practice discipline with cognitive, sensory, affective, and psychomotor performance requirements. The college's technical standards provide an objective measure on which to base informed decisions about whether individual students will be able to participate in the nursing program. Technical standards also help students determine whether they will need accommodations or modifications in order to participate.

The technical standards are provided to all students before matriculation and are available online in the Bachelor of Science in Nursing Handbook; see Section VIII: Clinical Course and Health Science Student Requirements. Students with disabilities who believe that they may need assistance in meeting the core performance standards should contact Student Disability Services.

## Selection

The college's admission committee recommends to the dean the applicants who appear to be best qualified. Fulfillment of minimum admission requirements does not guarantee admission to the College of Nursing. The committee may require personal interviews. A physical examination report and specific health screening requirements must be on file at University of Iowa Student Health 10 days before the class opens for the first clinical nursing course.

## Application Deadlines

- BSN prelicensure direct admission: Jan. 15.
- BSN prelicensure standard admission: March 1
- Nursing-RN (RN to BSN) program: March 1 for fall entry; Sept. 1 for spring entry.

## Financial Support

In addition to general assistance available to university students, there are assistance programs specifically for nursing students. Information about financial aid is available from the university's Office of Student Financial Aid.

## Career Advancement

The University of Iowa's BSN program provides broad preparation in clinical, scientific, community health, and patient education skills, and promises outstanding career options. With a BSN degree, students are eligible to work as a staff nurse; flight nurse; a nurse on medical, oncology, surgical, pediatric, emergency, or intensive care units; a nurse in outpatient or neighborhood clinics; or a home health care nurse.

The U.S. Bureau of Labor Statistics projects that employment for registered nurses to be among the top occupations in terms of job growth through 2029.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

For any questions on appropriate timing, contact your academic advisor or Graduation Services. |  |  |

## Master of Science in Nursing, MSN

The College of Nursing offers the Master of Science in Nursing (MSN) with three subprogram focus areas: entry into practice, clinical nurse leader (CNL), and nursing systems administration (NSA).

## Learning Outcomes

## Clinical Nurse Leader and Nursing Systems Administration

Graduates will be able to:

- lead change to improve quality outcomes;
- advance a culture of excellence through lifelong learning;
- build and lead collaborative interprofessional care teams;
- navigate and integrate care services across the health care system;
- design innovative nursing practices; and
- translate evidence into practice.

## Entry into Practice

Graduates will be able to:

- ensure delivery of safe quality nursing care to diverse individuals, families, groups, communities, and populations throughout the lifespan and across systems of care;
- integrate theoretical and scientific knowledge gained from natural and social sciences and culture, society, and the liberal arts into nursing;
- use leadership skills across systems of care to promote equitable, safe, and quality health care outcomes;
- use the best evidence from multiple ways of knowing to inform practice to make clinical judgments, solve problems, and address systems improvements;
- analyze how health care policy, regulation, technology, and economics impact nursing practice and the delivery of care;
- use effective interprofessional communication and collaboration strategies to promote quality health outcomes;
- apply health promotion and disease prevention strategies to diverse individuals, families, groups, communities, and populations to promote quality health outcomes;
- demonstrate professional values fundamental to the discipline of nursing; and
- apply evidence-based, person-centered care services across the health care continuum.

## Requirements

The Master of Science in Nursing (MSN) requires 33, 39, or 66 s.h., depending on the subprogram students choose to complete. Students maintain a grade-point average of at least 2.75 in coursework for the MSN degree.

Graduate students in the College of Nursing must adhere to all Graduate College policies regarding academic standing, probation, and dismissal. Transfer credit applicable to the MSN is limited and must be approved by the College of Nursing executive associate dean for academic affairs. Coursework taken 10 years or more before the MSN final examination must be updated according to university policy.

## MSN Subprograms

- Clinical Nurse Leader (CNL) [p. 1898]
- Entry into Practice [p. 1899]
- Nursing Systems Administration (NSA) [p. 1899]

## Clinical Nurse Leader (CNL)

The Master of Science in Nursing with a clinical nurse leader subprogram requires 39 s.h. of credit, including a core component of 21 s.h., which students take with College of Nursing doctoral students, and a specialization component of 18 s.h. that centers on the clinical nurse leader role. The clinical nurse leader subprogram focuses on improving the quality of patient care and helping professional nurses to thrive in the health care system. The clinical nurse leader role has demonstrated effectiveness in improving outcomes, elevating current evidence-based practice, enhancing quality, and providing continuous leadership in the microsystem.
Students must successfully complete a capstone project.

## Two-Year Plan

The MSN with a clinical nurse leader subprogram requires the following coursework for a two-year plan.

## First Year, Two-Year Plan

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| NURS:5009 | Evaluating Evidence for Practice | 3 |
| NURS:5017 | Quality and Safety | 3 |
| NURS:5018 | Clinical Education in the Care Environment | 3 |
| NURS:5021 | Physiology, Pathophysiology, and Pharmacology I for the Clinical Nurse Leader | 3 |
| NURS:5022 | Physiology, Pathophysiology, and Pharmacology II for the Clinical Nurse Leader | 3 |
| NURS:5636 | Clinical Nurse Leader Seminar | 3 |
| NURS:5666 | Leadership in the Microsystem | 3 |
| Total Hours |  | 21 |

Second Year, Two-Year Plan

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NURS:5007 | Applied Epidemiology | 3 |
| NURS:5010 | Clinical Data Management and <br> Evaluation | 3 |
| NURS:5016 | Health Care Infrastructure and <br> Informatics | 3 |
| NURS:5037 | Health Promotion and <br> Assessment for Clinical Nurse <br> Leaders | 3 |
| NURS:5696 | Clinical Nurse Leader Capstone <br> Clinical Immersion | 6 |
| Total Hours |  | $\mathbf{1 8}$ |

## Three-Year Plan

The MSN with a clinical nurse leader subprogram requires the following coursework for a three-year plan.

## First Year, Three-Year Plan

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NURS:5009 | Evaluating Evidence for | 3 |
|  | Practice |  |

| NURS:5018 | Clinical Education in the Care Environment | 3 |
| :---: | :---: | :---: |
| NURS:5021 | Physiology, Pathophysiology, and Pharmacology I for the Clinical Nurse Leader | 3 |
| NURS:5022 | Physiology, Pathophysiology, and Pharmacology II for the Clinical Nurse Leader | 3 |
| NURS:5636 | Clinical Nurse Leader Seminar | 3 |
| Total Hours |  | 15 |
| Second Year, Three-Year Plan |  |  |
| Course \# | Title | Hours |
| NURS:5007 | Applied Epidemiology | 3 |
| NURS:5017 | Quality and Safety | 3 |
| NURS:5037 | Health Promotion and Assessment for Clinical Nurse Leaders | 3 |
| NURS:5666 | Leadership in the Microsystem | 3 |
| Total Hours |  | 12 |

## Third Year, Three-Year Plan

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NURS:5010 | Clinical Data Management and | 3 |
| NURS:5016 | Evaluation | Health Care Infrastructure and <br> Informatics |
| NURS:5696 | Clinical Nurse Leader Capstone <br> Clinical Immersion | 6 |
| Total Hours |  | $\mathbf{1 2}$ |

See the MSN course plan on the College of Nursing website for a semester-by-semester course schedule.

## Entry into Practice

The Master of Science in Nursing with an entry into practice subprogram requires 66 s.h. of credit. The subprogram is an innovative program located on the Iowa City campus. It can be completed on a one-and-one-half year plan (five semesters). The entry into practice subprogram leads to a MSN degree that prepares students who do not currently have a nursing degree an opportunity to enter the health care workforce quickly. Class sizes are small and offer unparalleled educational excellence and clinical practice.
The MSN with an entry into practice subprogram requires the following coursework.

## First Year, Entry into Practice

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NURS:3128 | Health Assessment and <br> Communication Across the | 3 |
|  | Lifespan |  |
| NURS:3138 | Nursing and Pharmacological <br> Interventions I | 5 |
| NURS:3151 | Introduction to Clinical <br> Concepts for Nursing | 2 |
| NURS:3438 | Nursing and Pharmacological <br> Interventions II | 5 |
| NURS:3451 | Basic Clinical Concepts for <br> Nursing | 1 |
| NURS:3640 | Psychiatric/Mental Health <br> Nursing | 3 |
| NURS:3645 | Mental Health Nursing <br> Practicum | 2 |

| NURS:3650 | Community and Public Health Nursing | 3 |
| :---: | :---: | :---: |
| NURS:3651 | Advanced Clinical Concepts for Nursing | 1 |
| NURS:5017 | Quality and Safety | 3 |
| NURS:5210 | Foundations of Professional Nursing | 1 |
| NURS:5215 | Medical Surgical Care of Chronically Ill Adults | 3 |
| NURS:5220 | Medical Surgical Care of Acutely Ill Adults | 3 |
| NURS:6808 | Population Health for Advanced Practice | 3 |
| NURS:6811 | Social Determinants of Health and Health System Inequities | 3 |
| Total Hours |  | 41 |
| Second Year, Entry into Practice |  |  |
| Course \# | Title | Hours |
| NURS:3620 | Gerontological Nursing | 3 |
| NURS:3631 | Nursing Care of Children and Families | 2 |
| NURS:3632 | Nursing Care of Childbearing Families | 2 |
| NURS:4155 | Senior Nursing Internship | 5 |
| NURS:5002 | Leadership and Management Essentials | 3 |
| NURS:5009 | Evaluating Evidence for Practice | 3 |
| NURS:5015 | Health Systems, Finance, and Economics | 3 |
| NURS:5225 | Community Health Across the Lifespan Practicum | 4 |

See the MSN course plan on the College of Nursing website for a semester-by-semester course schedule.

## Nursing Systems Administration (NSA)

The Master of Science in Nursing with a nursing systems administration subprogram requires 33 s.h. of credit. It can be completed on a two-and-a-half year plan (five semesters). The subprogram focuses on preparing nurse leaders to serve in a variety of managerial and leadership capacities in all practice environments. The program focuses on graduate-level practice in nursing and health care leadership and the interventions that influence health care outcomes for individuals, populations, or systems.

Students must successfully complete a graduate-level guided capstone program implementation project.

The MSN with a nursing systems administration subprogram requires the following coursework.

## First Year, NSA

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NURS:5002 | Leadership and Management <br> Essentials | 3 |
| NURS:5009 | Evaluating Evidence for <br> Practice | 3 |
| NURS:6550 | Advanced Leadership and <br> Management | 3 |

| NURS:6553 | Seminar on Innovations | 4 |
| :--- | :--- | ---: |
| Total Hours |  | $\mathbf{1 3}$ |
| Second Year, | NSA |  |
| Course | Title | Hours |
| NURS:5010 | Clinical Data Management and | 3 |
|  | Evaluation |  |
| NURS:5017 | Quality and Safety | 3 |
| NURS:6551 | Financial Management | 4 |
| NURS:6808 | Population Health for Advanced | 3 |
| Practice |  |  |
| Total Hours |  | $\mathbf{1 3}$ |
| Third Year, | NSA |  |
| Course \# | Title | Hours |
| NURS:5016 | Health Care Infrastructure and | 3 |
| NURS:5697 | Informatics |  |
|  | Specialty Practice in Nursing | 4 |

## Total Hours

See the MSN course plan on the College of Nursing website for a semester-by-semester course schedule.

## Admission

Applicants to College of Nursing graduate programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must have a grade-point average of at least 3.00. A criminal background check is required for all students upon admission. The College of Nursing has additional application requirements, as follows.

## Admission to the MSN Program

Application requirements specific to the MSN program are:

- transcripts from institutions for all undergraduate and graduate coursework; and
- completion of an upper-level statistics course within five years of the application deadline (acceptable University of Iowa courses include BIOS:4120 Introduction to Biostatistics, PSQF:4143 Introduction to Statistical Methods, STAT:3510 Biostatistics, and STAT:4143 Introduction to Statistical Methods).

Applications are reviewed once a year. To be reviewed, the application must be complete with all materials submitted.

Due to the level of web-based coursework required, international students in the MSN subprograms are not eligible for $\mathrm{F}-1$ or $\mathrm{J}-1$ student immigration status. Questions regarding visas and immigration documentation should be directed to International Student and Scholar Services (ISSS).

## Additional Application Requirements

- Admission to the Clinical Nurse Leader Subprogram [p. 1900]
- Admission to the Entry into Nursing Practice Subprogram [p. 1900]
- Admission to the Nursing Systems Administration Subprogram [p. 1901]

## Admission to the Clinical Nurse Leader Subprogram

Additional application requirements specific to the MSN with a clinical nurse leader subprogram are:

- a bachelor's or advanced degree with a major in nursing from an accredited program;
- approximately one year of experience;
- satisfaction of the legal requirements for the practice of nursing;
- current written recommendations from three persons knowledgeable about the applicant's competence in the practice of nursing and potential for leadership and scholarship (forms required); and
- a current résumé, goal statement (statement of purpose), statement of disclosure, and supplemental/information form.

Applicant interviews are required, and in some cases, virtual interviews may be arranged.

## Admission to the Entry into Nursing Practice Subprogram

Additional application requirements specific to the MSN with an entry into practice subprogram are:

- a bachelor's or advanced degree in a discipline other than nursing from an accredited college or university;
- completion of natural sciences courses within 10 years and/or a combination of related experience and training which provides the knowledge and abilities necessary to meet the objectives of the courses;
- completion of prerequisite coursework at the time of application (statistics coursework, six of eight natural sciences courses, and two of three social sciences courses);
- successful background and abuse checks;
- current written recommendations from three persons knowledgeable about the applicant's potential for the practice of nursing and leadership and scholarship (required forms provided at the time of application by the Graduate College); and
- other forms including a leadership and experiences form, a statement of purpose form (two essay questions), a statement of disclosure form, and a justification form (if applicable).
Applicant interviews are required, and in some cases, virtual interviews may be arranged.
Applicants to the MSN entry into practice subprogram whose first language is not English and who do not meet the requirements for a waiver are required to submit English proficiency scores. For a complete list of accepted English proficiency exams, score requirements, and waiver eligibility, please refer to the English Proficiency Requirements on the Graduate Admissions website.

## Prerequisites for Natural and Social Sciences

To be considered for admission, a maximum of two natural sciences courses and one social science course can be incomplete at the application deadline; all must be completed prior to enrollment in the MSN entry into practice subprogram.

## Natural Science Prerequisites

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| These are the courses that are considered prerequisites; <br> applicants need equivalent coursework to these UI <br> courses: |  |  |
| BIOL:1141 | Human Biology: Health <br> Professions | 4 |
| CHEM:1070 | General Chemistry I | 3 |

| CHEM:1080 | General Chemistry II | 3 |
| :--- | :--- | ---: |

## Social Science Prerequisites

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| These are the courses that are considered prerequisites; <br> applicants need equivalent coursework to these UI <br> courses: |  |  |
| NURS:1030 | Human Development and <br> Behavior | 3 |
| And any two of these: | Cultural Anthropology |  |
| ANTH:1101/IS:1101 | Elementary Psychology |  |
| PSY:1001 | Introduction to Sociology | 3 |
| SOC:1010 | Contemporary Social Problems | $3-4$ |
| SOC:1030 |  | $3-4$ |

## Admission to the Nursing Systems Administration Subprogram

Additional application requirements specific to the MSN with a nursing systems administration subprogram are:

- a bachelor's or advanced degree with a major in nursing from an accredited program;
- approximately one year of experience;
- satisfaction of the legal requirements for the practice of nursing;
- current written recommendations from three persons knowledgeable about the applicant's competence in the practice of nursing and potential for leadership and scholarship (forms required); and
- a current résumé, goal statement (statement of purpose), statement of disclosure, and supplemental/information form.
Applicant interviews are required, and in some cases, virtual interviews may be arranged.

## Application Deadlines

Application deadlines for the MSN subprograms are:

- MSN with clinical nurse leader subprogram: Feb. 1 for fall entry.
- MSN with entry into practice subprogram: March 15 for spring entry.
- MSN with nursing systems administration subprogram: Feb. 1 for fall entry.

## Career Advancement

The MSN clinical nurse leader and nursing systems administration subprograms prepare nurses to be equipped with knowledge and skills to lead change, promote health, and elevate care in various roles and settings. Graduates of these subprograms are prepared for critical action with complex, changing systems, including health, educational, and organizational systems.

The MSN entry into practice subprogram prepares non-nurse college graduates of all academic backgrounds to become practicing nurses.

Upon graduation, students will be prepared to take the NCLEX-RN nursing licensure exam to be licensed as a registered nurse.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

|  | Hours | 11 |
|  | Total Hours | 66 |

a In addition, students complete 120 lab/sim hours and 765 clinical hours over the course of this five semester program of study
b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
d 8 weeks.
e Program director assigned sections.
f Schedule will be based upon preceptor schedule.

## Doctor of Nursing Practice, DNP

The Doctor of Nursing Practice (DNP) program is designed to prepare clinicians with the knowledge and skills to provide the highest standard of care for individuals, families, and communities and navigate today's complex health care systems. Nurse managers and administrators will gain the knowledge and skills necessary to develop, implement, and monitor programs of care and policies in complex organizations.

## Learning Outcomes

Graduates will be able to:

- utilize scientific underpinnings for nursing practice;
- demonstrate organizational and systems leadership;
- evaluate clinical scholarship and analytical methods for evidencebased practice;
- evaluate information systems and patient care technology for the improvement and transformation of health care;
- influence health care policy for advocacy in health care;
- collaborate interprofessionally to improve patient and population health outcomes;
- design clinical prevention and population health interventions; and
- demonstrate expertise in advanced nursing practice.

## Requirements

The Doctor of Nursing Practice (DNP) requires a minimum of 73 s.h. of graduate credit. Students may complete the program in three to five years, depending on their focus area. Students must maintain a cumulative grade-point average of at least 3.00.

Those who enter the program with a master's degree must complete a minimum of 72 s.h., although some coursework from the master's degree program may count toward the DNP degree. Students who enter with a non-nursing master's degree who are interested in pursuing a focus in health administration can complete DNP degree requirements in health systems. Individuals who have been granted an MSN/APRN may complete the DNP with a minimum of 29 s.h. of graduate credit earned at the University of Iowa after DNP program admission and with a minimum of 43 s.h. of transfer credit previously earned from the UI or elsewhere.
A dual certification program is available that allows students to combine two of the nurse practitioner specialties, except for anesthesia nursing or health systems. In addition, a combined program is available for BSN students with the nursing-RN subprogram who are interested in earning the DNP degree with an adult gerontology primary care nurse practitioner, health systems, or pediatric nurse practitioner-primary care subprogram.
Students choose from a number of specialties, including adult gerontology acute care nurse practitioner, adult gerontology primary care nurse practitioner, anesthesia nursing, family nurse practitioner, pediatric nurse practitioner-acute care, pediatric nurse practitioner-primary care, psychiatric/mental health nurse practitioner; and health systems. For yearly plans that detail coursework in these specialty areas, see "Plans of Study" below. Visit DNP Plans of Study on the College of Nursing website for a semester-by-semester view of required coursework for each DNP specialty.

DNP students complete basic graduate core courses, specialty courses, advanced core courses, and practicums. In didactic coursework, they explore clinical leadership, public policy and advocacy, specialty
systems, change theory, finance and business, and entrepreneurial tools.

Students must complete a minimum of 1,000 practice experience hours. Individuals who enter the program having completed an MSN may transfer approved clinical hours from their MSN program to the DNP program. The clinical hours requirement is evaluated for each student who has completed an MSN with a specialty program. Students who completed more than 1,000 practice experience hours in an MSN advanced practice program still must complete the number of DNP practicum and project hours determined in consultation with their advisor and the DNP program director.
Transfer credit applicable to the DNP is limited and must be approved by the College of Nursing assistant dean for graduate practice programs. Transcripts for individuals who have completed an MSN are evaluated individually.

Students must adhere to all Graduate College policies regarding academic standing, probation, and dismissal. Coursework taken 10 or more years before a student plans to graduate from the DNP program must be updated according to university policy.

## Pediatric Nurse Practitioner-Primary Care Subprogram

Three-Year Plan, Pediatric Nurse Primary Care
The following coursework (77 s.h.) is required for a three-year plan.
First Year, Pediatric Nurse Primary Care Three-Year Plan

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| NURS:5002 | Leadership and Management Essentials | 3 |
| NURS:5007 | Applied Epidemiology | 3 |
| NURS:5009 | Evaluating Evidence for Practice | 3 |
| NURS:5010 | Clinical Data Management and Evaluation | 3 |
| NURS:5014 | Graduate Physiology for Advanced Practice | 3 |
| NURS:5015 | Health Systems, Finance, and Economics | 3 |

| NURS:5040 | Genetics/Genomics for Advanced Nursing Practice | 2 |
| :---: | :---: | :---: |
| NURS:6808 | Population Health for Advanced Practice | 3 |
| NURS:6809 | Advanced Practice Role I: Introduction | 3 |
| NURS:6811 | Social Determinants of Health and Health System Inequities | 3 |
| Total Hours |  | 29 |
| Second Year, Pediatric Nurse Primary Care Three-Year Plan |  |  |
| Course \# | Title | Hours |
| NURS:5017 | Quality and Safety | 3 |
| NURS:5023 | Pathophysiology for Advanced Clinical Practice | 4 |
| NURS:5031 | Health Promotion and Assessment for Advanced Clinical Practice | 4 |
| NURS:5032 | Mental Disorders in Advanced Practice | 3 |
| NURS:5033 | Pharmacotherapeutics for Advanced Practice Nursing | 3 |
| NURS:5035 | Graduate Pharmacology Specialty | 3 |
| NURS:5039 | Advanced Diagnostic and Therapeutic Procedures for Primary Care | 1 |
| NURS:6826 | Doctor of Nursing Practice Project I | 2 |
| NURS:6827 | Doctor of Nursing Practice Project II | 1 |
| Total Hours |  | 24 |

Third Year, Pediatric Nurse Primary Care Three-Year Plan

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NURS:6100 | Primary Care: Infants, Children, <br> and Adolescents I | 3 |
| NURS:6101/ | Primary Care: Infants, Children, <br> and Adolescents II | 3 |
| PEDS:6101 | Advanced Practice Clinical <br> Practicum I | 3 |
| NURS:6701 | Advanced Practice Clinical <br> Practicum II | 4 |
| NURS:6702 | Advanced Practice Clinical <br> Practicum III | 3 |
| NURS:6703 | Health Policy, Law, and <br> Advocacy <br> Advanced Practice Role II: | 3 |
| NURS:6802 | Integration | 3 |
| NURS:6810 | Doctor of Nursing Practice <br> Project III | 1 |
| NURS:6828 | Doctor of Nursing Practice <br> Project IV | 1 |
| Total Hours | 24 | 24 |

## Four-Year Plan, Pediatric Nurse Primary Care

The following coursework ( 77 s.h.) is required for a four-year plan.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| NURS:5002 | Leadership and Management Essentials | 3 |
| NURS:5007 | Applied Epidemiology | 3 |
| NURS:5009 | Evaluating Evidence for Practice | 3 |
| NURS:5015 | Health Systems, Finance, and Economics | 3 |
| NURS:5040 | Genetics/Genomics for Advanced Nursing Practice | 2 |
| NURS:6809 | Advanced Practice Role I: Introduction | 3 |
| NURS:6811 | Social Determinants of Health and Health System Inequities | 3 |
| Total Hours |  | 20 |

Second Year, Pediatric Nurse Primary Care Four-Year Plan

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| NURS:5010 | Clinical Data Management and Evaluation | 3 |
| NURS:5014 | Graduate Physiology for Advanced Practice | 3 |
| NURS:5017 | Quality and Safety |  |
| NURS:5032 | Mental Disorders in Advanced Practice | 3 |
| NURS:6808 | Population Health for Advanced Practice | 3 |
| Total Hours |  | 15 |
| Third Year, Pediatric Nurse Primary Care Four-Year Plan |  |  |
| Course \# | Title | Hours |
| NURS:5023 | Pathophysiology for Advanced Clinical Practice |  |
| NURS:5031 | Health Promotion and Assessment for Advanced Clinical Practice |  |
| NURS:5033 | Pharmacotherapeutics for Advanced Practice Nursing | 3 |
| NURS:5035 | Graduate Pharmacology Specialty | 3 |
| NURS:5039 | Advanced Diagnostic and Therapeutic Procedures for Primary Care | 1 |
| NURS:6802 | Health Policy, Law, and Advocacy | 3 |
| NURS:6826 | Doctor of Nursing Practice Project I | 2 |
| NURS:6827 | Doctor of Nursing Practice Project II | 1 |

## Total Hours

21

## Fourth Year, Pediatric Nurse Primary Care Four-Year Plan

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NURS:6100 | Primary Care: Infants, Children, <br> and Adolescents I | 3 |

| NURS:6101/ | Primary Care: Infants, Children, <br> and Adolescents II | 3 |
| :--- | :--- | ---: |
| PEDS:6101 | AURS:6701 | Advanced Practice Clinical <br> Practicum I |
| NURS:6702 | Advanced Practice Clinical <br> Practicum II | 3 |
| NURS:6703 | Advanced Practice Clinical <br> Practicum III | 4 |
| NURS:6810 | Advanced Practice Role II: <br> Integration | 3 |
| NURS:6828 | Doctor of Nursing Practice <br> Project III | 3 |
| NURS:6829 | Doctor of Nursing Practice <br> Project IV | 1 |
| Total Hours |  | 1 |

## Psychiatric/Mental Health Nurse Practitioner Subprogram

## Three-Year Plan, Psychiatric/Mental Health

The following coursework (76 s.h.) is required for a three-year plan.
First Year, Psychiatric/Mental Health Three-Year Plan

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NURS:5002 | Leadership and Management <br> Essentials | 3 |
| NURS:5007 | Applied Epidemiology | 3 |
| NURS:5009 | Evaluating Evidence for <br> Practice | 3 |
| NURS:5014 | Graduate Physiology for <br> Advanced Practice | 3 |
| NURS:5015 | Health Systems, Finance, and <br> Economics | 3 |
| NURS:5017 | Quality and Safety <br> Genetics/Genomics for <br> Advanced Nursing Practice | 3 |
| NURS:5040 | Population Health for Advanced <br> Practice | 3 |
| NURS:6808 | Advanced Practice Role I: | 3 |
| NURS:6809 | Introduction |  |
| NURS:6811 | Social Determinants of Health <br> and Health System Inequities | 3 |
| Total Hours | 39 |  |

Second Year, Psychiatric/Mental Health Three-Year Plan

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NURS:5010 | Clinical Data Management and <br> Evaluation | 3 |
| NURS:5023 | Pathophysiology for Advanced <br> Clinical Practice | 4 |
| NURS:5031 | Health Promotion and <br> Assessment for Advanced <br> Clinical Practice | 4 |
| NURS:5033 | Pharmacotherapeutics for <br> Advanced Practice Nursing | 3 |
| NURS:5036 | Psychopharmacology for <br> Advanced Clinical Practice | 3 |
| NURS:6826 | Doctor of Nursing Practice <br> Project I | 2 |

| NURS:6827 | Doctor of Nursing Practice <br> Project II | 1 |

## Admission

Applicants to College of Nursing graduate programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must have a grade-point average (GPA) of at least 3.00; applicants for the dual certification programs must have a minimum GPA of at least 3.50. A criminal background check is required for all students upon admission. The College of Nursing has additional application requirements, as follows.

## Admission to the DNP Program

Application requirements specific to the DNP program are:

- a bachelor's or advanced degree with a major in nursing from a Commission on Collegiate Nursing Education (CCNE) or National League for Nursing Accrediting Commission (NLNAC) accredited nursing program;
- satisfaction of the legal requirements for the practice of nursing;
- current written recommendations from three persons knowledgeable about the applicant's competence in the practice of nursing and potential for leadership and scholarship (forms required);
- a current résumé, goal statement (statement of purpose), statement of disclosure, and supplemental/information form;
- transcripts from all undergraduate and graduate coursework;
- DNP applicants to the direct care programs with master's degrees in nursing from other schools must provide verification of completed clinical hours from their institution's graduate director or must submit appropriate course syllabi;
- additional application requirements for post-APRN MSN to DNP applicants include providing verification of an MSN in a recognized ARNP specialty and proof of certification; and
- an upper-level statistics course (undergraduate course at junior/senior level) completed within five years of application deadline except for post-APRN MSN to DNP applicants; acceptable University of Iowa courses are STAT:3510 Biostatistics, PSQF:4143 Introduction to Statistical Methods, STAT:4143 Introduction to Statistical Methods, or BIOS:4120 Introduction to Biostatistics (equivalent courses from other
colleges also are accepted; see below for additional details), and the upper-level statistics course must have a letter grade of C minus or higher.

For statistics courses taken at another institution, refer to that institution's catalog or registrar's office to verify course numbering scheme. Community college courses are considered to be at a lower level (first-year/sophomore) and are not acceptable as an admission prerequisite statistics course. For further questions, regarding the admission upper-level statistics course requirement contact the graduate programs office.

Additional application requirements for post-graduate certificate applicants includes providing proof of APRN certification.

Application deadline for the DNP program is Feb. 1 for all specialties except anesthesia nursing, which has a June 1 application deadline

Applications are reviewed once a year. In order to be reviewed, the application must be complete, with all materials submitted.

Applicant interviews are required for the DNP program; in some cases, virtual interviews such as through Zoom may be arranged.

Due to the level of web-based coursework required, international students in the DNP program of study are not eligible for $\mathrm{F}-1, \mathrm{~F}-$ 2 , or $\mathrm{J}-1$ student immigration status. Questions regarding visas and immigration documentation should be directed to International Student and Scholar Services (ISSS).

## Career Advancement

The DNP program prepares nurses for leadership and advanced practice roles within today's complex health care system. Graduates acquire the knowledge and skills to provide the highest standard of care for individuals, families, and communities.

## Nursing, PhD

## Learning Outcomes

The Doctor of Philosophy (PhD) program prepares scholars to advance nursing science and contribute to transdisciplinary efforts to improve health outcomes. Graduates of the program are prepared to be leaders who engage in the three roles highlighted by the American Association of Colleges of Nursing (AACN): develop the science, steward the discipline, and educate the next generation of nurses.
Graduates will:

- master in-depth knowledge in a substantive area of nursing;
- conduct original research that generates new knowledge;
- disseminate research results and articulate implications for policy, practice, and the profession; and
- assimilate evolving roles and responsibilities of a nurse scholar.

## Requirements

The Doctor of Philosophy program in nursing requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative gradepoint average of at least 3.00.

The program prepares students to advance nursing science and contribute to the body of nursing knowledge. It emphasizes student participation with faculty members on research teams; focused coursework; presentation and publication of research-based knowledge; and interdisciplinary learning experiences.

Graduate students in the College of Nursing must adhere to all Graduate College policies regarding academic standing, probation, and dismissal. Coursework taken 10 or more years before a student plans to graduate from the PhD program must be updated according to university policy.
The PhD with a major in nursing requires the following work.

## Required Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| NURS:6802 | Health Policy, Law, and Advocacy | 3 |
| NURS:6811 | Social Determinants of Health and Health System Inequities | 3 |
| NURS:7000 | Philosophy and Sociology of Nursing Science | 3 |
| NURS:7001 | Qualitative Research | 4 |
| NURS:7002 | Designing Research | 3 |
| NURS:7003 | Quantitative Research | 4 |
| NURS:7006 | Theory and Model Development | 3 |
| NURS:7310 | Measurement in Health Research | 3 |
| NURS:7404 | Biological Markers in Health Research | 3 |
| NURS:7801 | Seminar: Research Scholarship Role Development | 2 |
| NURS:7803 | Research Practicum I | 2 |
| NURS:7804 | Research Practicum II | 2 |
| CPH:7270 | Principles of Scholarly Integrity: Public Health | 0, 1 |
| Specialization courses (BSN-PhD only) |  | 6 |
| Intermediate statistics |  | 3 |
| Advanced statistics |  | 3-4 |

## Cognate Area

| Course \# | Title | Hours |
| :--- | ---: | ---: |
| Cognate courses (BSN-PhD only) | 6 |  |

## Comprehensive Exam and Dissertation

Students must complete a written and oral comprehensive examination before they begin work on the dissertation. They must write the dissertation and defend it orally.

## Dissertation

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course (minimum of 11 s.h.): |  |  |
| NURS:7805 | Dissertation Research | arr. |

## Admission

Applicants to College of Nursing graduate programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
The program is open to individuals who have earned a bachelor's degree in nursing, an associate's degree in nursing with a bachelor's or advanced degree in any field, an advanced degree in nursing, or an advanced degree in a health-related field.
A criminal background check is required for all students upon admission. The College of Nursing has additional application requirements, as follows.

## Admission to the PhD Program

PhD applicants who have completed an accredited basic nursing program must hold a current license to practice nursing.
Applicants must have a grade-point average of at least 3.00. They also must have successfully completed an upper-level statistics course within five years prior to the application deadline.

Applicants must submit along with their application:

- a two-to-three-page statement describing their educational objectives, career goals, and an area of research for their doctoral study;
- three recommendations from nursing professionals that speak to the applicant's potential as a scholar;
- a current résumé or curriculum vitae; and
- a complete transcript of all college programs and courses.

Applicants whose first language is not English must score at least 81 (internet-based) on the Test of English as a Foreign Language (TOEFL); at least 7.0 on the International English Language Testing System (IELTS), with no subscore less than 6; or at least 105 on the Duolingo English Test (DET).

Application deadline for the PhD program is Jan. 15. In order to be reviewed, the applicant's file must be complete, with all materials submitted.

## Career Advancement

The PhD program prepares scholars to move nursing and health science forward. Graduates are prepared for careers as faculty members in college and university settings as well as researchers, consultants, and leaders in military, academic, or industry venues, and in other nonacademic settings.

## Academic Plans <br> Sample Plan of Study

Sample plans represent one way to complete a program of study Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Online training modules to be completed during first semester.
c Other coursework includes the following: electives, additional methods courses, Research Practicum, or Research Residency. Work with faculty advisor to determine courses and sequence.
d For students admitted fall 2017 or later, the Comprehensive Exam must be completed no later than the end of the fall semester of year three.
e Or take an advanced/specific methods course, third statistics course, or an elective.
f Minimum of $11 \mathrm{~s} . \mathrm{h}$. of Dissertation Research required, generally distributed over multiple semesters until degree completion.

# Adult Gerontology Acute Care Nurse Practitioner, Graduate Certificate 

## Learning Outcomes

Graduates will be able to:

- demonstrate high quality, evidence-based clinical competence in the advanced practice care of a new patient population focus;
- utilize scientific underpinnings for the advanced practice care of a new patient population focus; and
- incorporate principles of inclusive, compassionate, personcentered care into the delivery of health care.

## Requirements

The graduate Certificate in Adult Gerontology Acute Care Nurse Practitioner requires 21 s.h. of credit. Students must maintain a cumulative grade-point average of at least 2.50 in coursework for the certificate. The certificate is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty.
The curriculum includes didactic and clinical core courses as well as specialty courses, as determined by the director of the program. Coursework and clinical hours are determined by a gap analysis.

The Certificate in Adult Gerontology Acute Care Nurse Practitioner requires the following work.

## Family Nurse Practitioner, Graduate Certificate

## Learning Outcomes

Graduates will be able to:

- demonstrate high quality, evidence-based clinical competence in the advanced practice care of a new patient population focus;
- utilize scientific underpinnings for the advanced practice care of a new patient population focus; and
- incorporate principles of inclusive, compassionate, personcentered care into the delivery of health care.

## Requirements

The graduate Certificate in Family Nurse Practitioner requires 26 s.h. of credit. Students must maintain a cumulative grade-point average of at least 2.50 in coursework for the certificate. The certificate is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty.

The curriculum includes didactic and clinical core courses as well as specialty courses, as determined by the director of the program. Coursework and clinical hours are determined by a gap analysis.
The Certificate in Family Nurse Practitioner requires the following work.

Visit the Post-Graduate Certificate Programs plans of study on the College of Nursing website for information about certificate program requirements.

## Health Systems, Graduate Certificate

## Learning Outcomes

## Focus in Administration and in Administration with Practice Management

Graduates will be able to:

- demonstrate organizational and systems leadership to innovate, influence, and transform health care delivery and health equity;
- foster interprofessional partnerships to impact inclusive, person-centered care for sustainable outcomes at the individual, community, or population level; and
- design advanced leadership opportunities to collaborate with health care leaders that impact professional growth for self, the workforce, and health outcomes.

## Requirements

The graduate Certificate in Health Systems is built on the foundational courses from the Doctor of Nursing Practice (DNP) with a health systems subprogram. The certificate requires $19 \mathrm{~s} . \mathrm{h}$. of credit. Students must maintain a cumulative grade-point average of at least 2.50 in coursework for the certificate. The certificate is available to post-master's degree students seeking additional preparation in the area of health systems with a focus in administration or health systems and in administration with practice management.

The Certificate in Health Systems requires the following work.

## Focus in Administration Coursework

Students who want to complete the certificate with a focus in administration complete the following.

## First Year, Administration

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NURS:6550 | Advanced Leadership and | 4 |
|  | Management |  |
| NURS:6551 | Financial Management | 4 |
| NURS:6554 | Seminar on Healthy Work | 3 |

## Second Year, Administration

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NURS:6552 | Executive Management in the | 4 |
|  | Organization |  |
| NURS:6553 | Seminar on Innovations |  |

## Focus in Administration with Practice Management Coursework

Students who want to complete the certificate with a focus in administration with practice management complete the following.

## First Year, Administration with Practice

 Management| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NURS:6550 | Advanced Leadership and | 4 |
|  | Management | 4 |

## Second Year, Administration with Practice Management

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NURS:6553 | Seminar on Innovations | 4 |
| NURS:6557 | Clinical Practice Management | 4 |
|  | and Leadership for Advanced |  |
|  | Practice Providers |  |

Visit the Post-Graduate Certificate Programs plans of study on the College of Nursing website for a semester-by-semester view of required coursework.

# Pediatric Nurse Practitioner <br> -Acute Care, Graduate <br> <br> Certificate 

 <br> <br> Certificate}

## Learning Outcomes

Graduates will be able to:

## Managing Director, University of Iowa

 Pharmaceuticals- Dennis M. Erb

Professional degree: PharmD
Professional certificate: palliative care
Graduate degrees: MS in pharmacy; PhD in pharmacy
Faculty: https://pharmacy.uiowa.edu/people
Website: https://pharmacy.uiowa.edu/
The hallmarks of a University of Iowa pharmacy degree are patientcentered practice, strong grounding in science and evidence-based practice, exploration of career choices through required and elective courses, and exposure to leadership opportunities within the college, the university, and the profession. Career options may include community and/or hospital pharmacy, public service, consulting and long-term care, teaching and research in academia, managed care, pharmaceutical industry, or research careers.

The University of Iowa's PharmD program synthesizes basic scientific principles and practice through caring and communication in an integrated professional program. The role of a pharmacist ranges from managing medication for individuals to shaping national health care policy. Students learn to manage aspects of practice, to solve problems, make clinical decisions, clearly communicate ideas,
practice ethically, and become leaders in their communities and profession. Students study with professors who, in many cases, are pioneering the development of new drugs and defining the appropriate use of others to solve chronic health problems.

The College of Pharmacy PhD program offers three areas of graduate study: drug discovery and experimental therapeutics, health services research, and pharmaceutics. The major emphasis of these graduate programs is on research and coursework.

The College of Pharmacy collaborates with the College of Public Health to offer the combined Doctor of Pharmacy/MPH degree, and with the Graduate College to offer the Doctor of Pharmacy/MS in informatics degree. In addition, the College of Pharmacy offers a professional Certificate in Palliative Care.

## College Organization

The College of Pharmacy's faculty and programs are organized in two academic units. These units provide coursework for the Doctor of Pharmacy curriculum and for the college's graduate programs.

## Pharmacy Practice and Science

Faculty in Pharmacy Practice and Science (PPS) provide expertise and education in the professional practice of pharmacy. They specialize in a wide variety of clinical pharmacy practices; conduct research on patient and population outcomes related to medication therapy; contribute to the scholarship of teaching and learning in pharmacy education; and provide instruction in the pharmacist's professional role and the safe, effective use of medications.

This unit offers Master of Science and Doctor of Philosophy curricula in health services research, which encompasses the behavioral, economic, social, and administrative sciences; and elements of pharmacy practice. It offers coursework through its Applied Clinical Sciences Division and its Health Services Research Division.

## Applied Clinical Sciences (ACS) Division

Teaching and research in this division focus on the delivery of care and related services to patients and the education of student and resident pharmacists in practice settings. Courses are offered in pharmacotherapy, communication and practice skill development, clinical problem solving, and patient care. Professional practice mentoring and education are provided in introductory and advanced pharmacy practice experiences.

## Health Services Research (HSR) Division

Teaching and research in this division involve economic, social, behavioral, and administrative components of pharmacy practice and medication use. Courses are offered on the health care system, practice management, the professional and business aspects of pharmacy practice, and on learning and applying economic and social psychological theories to the study of health services and medication use.

To learn more about the department and its two divisions, visit Pharmacy Practice and Science on the College of Pharmacy website.

## Pharmaceutical Sciences and Experimental Therapeutics

Faculty in Pharmaceutical Sciences and Experimental Therapeutics (PSET) provide expertise and education in areas that include the fundamental basis for drug therapy outcomes in patients, factors responsible for specific drug actions in individual patients and larger patient populations, drug metabolism, pharmaceutical toxicology, organic synthesis, structure-activity relationships, drug design, computer-aided drug discovery, bioanalytical chemistry, biopolymeric drugs, molecular pharmacology, dosage form development and performance, pharmaceutical applications of nanotechnology,
industrial and manufacturing pharmacy, pharmacokinetics, and pharmacodynamics.
In addition to its educational roles in the Doctor of Pharmacy program, PSET offers PhD and MS degrees in two graduate areas: drug discovery and experimental therapeutics and pharmaceutics. Drug discovery and experimental therapeutics is for students interested in drug discovery and the development of novel therapeutics. It includes interdisciplinary research experiences in medicinal chemistry, biotherapetuics, pharmacogenetics/ genomics, and basic pharmacology/toxicology. Pharmaceutics focuses on characterization of pharmaceuticals and their component materials, development of new dosage forms and drug delivery systems, pharmaceutical applications of nanotechnology, and the pharmacokinetic and pharmacodynamic evaluation of drug actions and interactions.

The department offers interdisciplinary research opportunities with programs in medicine, chemistry, biochemistry, pharmacology, engineering, dentistry, and public health. Its national and international collaborations further enhance the breadth of research activities available to students.

To learn more, visit Pharmaceutical Sciences and Experimental Therapeutics on the College of Pharmacy website.

## Programs

## Facilities

## Pharmacy Building

A new, state-of-the-art building has set the stage for advancements in science and discovery, and for world-class pharmacy education to continue to grow and thrive. Classroom space is designed for collaborative and hands-on learning. The building boasts 16 collaborative research spaces and 23 learning spaces-centers and team rooms with aspects of universal design. In addition, the college has added 16,000 square feet of manufacturing space with a sterile products processing facility.
The original facility, now called the Pharmaceutical Sciences Research Building, continues to house classrooms, labs, offices, and a manufacturing facility.
The College of Pharmacy is located on the university's health sciences campus in close proximity to five professional schools. Students collaborate with expert health care providers at the Carver College of Medicine, and at the colleges of Dentistry [p. 1236], Nursing [p. 1881], and Public Health [p. 1946]. The College of Pharmacy is located in close proximity to University of Iowa Hospitals \& Clinics, the Bowen Science Building, and the Hardin Library for the Health Sciences.

For more than 125 years, the University of Iowa College of Pharmacy has led the way in educating pharmacists and pharmaceutical scientists. The college is well known for its high quality pharmacy education, advanced practice models, patient care, drug discovery, product development, and contract manufacturing.

## University of Iowa Pharmaceuticals

University of Iowa Pharmaceuticals is a pharmaceutical manufacturing facility registered with the U.S. Food and Drug Administration that develops pharmaceutical dosage forms and has manufactured clinical supplies in compliance with Good Manufacturing Practices since 1974. University of Iowa Pharmaceuticals has clients worldwide, including pharmaceutical companies, biotechnology firms, medical departments, and government agencies. Its staff works closely with clients and pharmaceutics faculty members to produce virtually every type of pharmaceutical dosage form, supplying new pharmaceutical agents for use in clinical trials and other research. For more information, visit the UI Pharmaceuticals website.

## Courses

Students must be enrolled in the College of Pharmacy to enroll in professional-level (PharmD) coursework numbered 8000-9999. Students who meet prerequisite requirements may register for the college's undergraduate- and graduate-level courses numbered 11007999.

## College of Pharmacy Courses

## PHAR:1000 First-Year Seminar

 1 s.h.Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).
PHAR: 1100 Introduction to Pharmaceutical Sciences: Drug
Development
$\mathbf{1 - 2}$ s.h.
Introduction to drug discovery, development, and approval pathways used in the United States; specific focus on career pathways related to pharmaceutical development including the natural and biomedical sciences, clinical, regulatory and legal affairs, sales and marketing, and business development.

PHAR:1111 Need a New Drug?
1 s.h.
Introduction to drug discovery, development, and approval process in the United States; focus on preclinical and clinical development activities and role of the FDA and other regulatory bodies in approval and oversight of available drug products.
PHAR:1200 Medicines That Changed the World 1 s.h.
Herbal remedies and ancient traditional medicines have led to the discovery of life-saving drug therapies; as science has evolved, how the discovery of other important medicines have come about through advances in chemistry and biology and now through advances in computer science and informatics; students learn about the discovery history of some of the most important drug therapies of the 20th and 21 st centuries and how those discoveries are leading to even more important, life-saving treatments.
PHAR:1300 Drugs and American Pop Culture
1 s.h.
Humans have used and misused drugs for thousands of years. Religious, cultural, and social experiences have been influenced by drugs. Review the roles of drugs in visual arts, literature, music, and film. Explore drug use and culture from the 1960s through the present day including the war on drugs and the social programs to combat addictions in America. Discuss the glamorization of drug use versus real-life impact of addictions. Drug names, chemical structure, classification, regulation, medicinal and recreational uses, and medications to assist with recovery will be reviewed.

PHAR:1812 What's in My Medicine Cabinet? An Introduction to Over-the-Counter Medications and Self Care 2 s.h.
Introduction to nonprescription medications for treatment of minor illness and health maintenance; causes, signs, and symptoms of common ailments with information about selection of appropriate over-the-counter therapies and considerations for the need for further care; self-care strategies for disease prevention and wellness.
PHAR:3994 Undergraduate Research in Pharmaceutical Sciences

1-4 s.h.
Individual scientific research conducted under the guidance of a faculty member.
PHAR:3995 Undergraduate Independent Study 1-4 s.h.
Supervised study. Requirements: enrollment in College of Pharmacy undergraduate certificate program.
PHAR:4146 Drug Disposition and Pharmacokinetics
Introduction to drug absorption, distribution, and elimination processes controlling overall drug exposure in humans; basic quantitative measurements presented and used to demonstrate the influence of drug properties and physiologic action on drug disposition. Prerequisites: (MATH:1380 or MATH:1460 or
MATH:1550 or MATH:1850) and (BIOL:1140 or BIOL:1141 or BIOL:1411 or BIOL:1412) and (STAT:1020 or PSQF:1020 or STAT:1030 or STAT:2010).

PHAR:4501 Basic Principles of Toxicology 3 s.h.
Basic principles and mechanisms of toxicology as it relates to drugs and environmental agents. Prerequisites: BMB:3110.

## PHAR:4512 Principles of Drug Discovery

3 s.h.
Focus on understanding drug targets as receptors, receptor theory, drug discovery, and new drug approval processes; areas of novel drug target identification, pharmacological characterization of new drugs, G protein coupled receptors as targets, and analysis of drugreceptor interactions. Prerequisites: BMB:3110. Recommendations: one semester of pharmacology.

## PHAR:4537 Principles of Drug Metabolism

Principles of drug metabolism based on current knowledge of involved enzymes. Prerequisites: (CHEM:2220 or CHEM:2240) and (BMB:3120 or BMB:3110).

## PHAR:4736 Properties of Dosage Forms I

3 s.h.
Introduction to principles of physical and chemical sciences important in drug product development; solubility, colligative properties, and partitioning behavior, as well as ionic equilibria, pH control, and chemical stability are evaluated in context of their importance in liquid dosage forms; emphasis on issues impacting drug product quality. Prerequisites: (CHEM:2220 or CHEM:2240) and (MATH:1460 or MATH:1380 or MATH:1550 or MATH:1850).

## PHAR:4737 Properties of Dosage Forms II <br> 3 s.h.

Physical and chemical properties and measurements of materials used in pharmaceuticals; introduction to material properties of drugs and excipients used in development of semi-solid and solid pharmaceuticals; emphasis on material selection, dosage form performance characteristics, and evaluation of drug product quality. Prerequisites: PHAR:4736.
PHAR:4741 Immunology and Immunotherapies 2 s.h.
Introduction to basics of the immune system and how it protects against infection and disease; in-depth lectures on vaccines against infectious diseases and cancer in terms of their formulations and how they work; focus on past seminal findings, current treatment modalities, and cutting-edge technologies likely to impact future immunotherapeutic strategies.
PHAR:4799 Special Topics in Pharmaceutics
Current topics in pharmaceutics. Prerequisites: MATH:2560 and CHEM:4431.
arr.

PHAR:4800 Chemical and Biophysical Properties of Drugs 1 s.h. Introduction to design of drug molecules based on an understanding of drug-like properties including chemical reactivity and structural optimization; minimization of potentially toxic biotransformations; optimization of absorption; screening methods for selection and classification of optimized molecules. Prerequisites: ((CHEM:2220 or CHEM:2240) and BMB:3110) or (BMB:3120 and BMB:3130).

## PHAR:4850 Upstream Biotechnology Processes 2 s.h.

Introduction to fermentation, fermenter preparation, cell growth and medium requirements, inoculation, sampling, process termination, separation of cells, fermentation case study, enzyme activity, and biocatalysis. Same as CHEM:4850.
PHAR:4851 Radiopharmaceuticals in Diagnostics and Therapy

2 s.h.
Use of radionuclides for diagnosis and monitoring of disease and in development of new therapeutic agents; strategies for provision of effective agents, regulatory processes, and safe handling and administration. Prerequisites: CHEM:2220 or CHEM:2240. Recommendations: one semester of physics, one semester of biology, one semester of anatomy or physiology, and one semester of pharmacology.
PHAR:5310 Health Services Research Seminar 1-2 s.h. Recent research in pharmacy administration.
PHAR:5350 Introduction to Research Methods 3 s.h.
Scientific inquiry, experimental design, data collection, statistical methods used in the study of health services and clinical investigations; focus on understanding the research process and evaluating published studies. Recommendations: introductory statistics.
PHAR:5360 Applied Research Methods: Primary Data 2 s.h.
Advanced topics in research methods; focus on primary data collection and analysis; qualitative, mixed, survey, and intervention research methods with focus on applying these methods to topics in pharmacy health services research. Prerequisites: PHAR:5350.
PHAR:5365 Applied Research Methods: Secondary Data 2 s.h. Advanced topics in research methods applicable to common sources of secondary data; hands-on experience writing programs to prepare and analyze various health-related data using common statistical software packages (e.g., SAS, STATA, R). Prerequisites: PHAR:5350.
PHAR:5400 Principles of Pharmacogenomics
Fundamental knowledge of molecular biology and relationship to pharmacological agents; working knowledge of DNA, RNA, and protein changes that occur to influence gene expression; how pharmacological agents can impact biological mechanisms and how this can impact treatment response; requirements to design and carry out an experiment in human and animal models to study specific biological mechanisms; critical evaluation of published scientific literature to describe cutting-edge pharmacological findings in this field. Requirements: graduate standing in pharmacy (clinical pharmaceutical sciences, pharmaceutics, medicinal chemistry), neuroscience, pharmacology, or toxicology.

## PHAR:5510 Pharmaceutical Sciences and Experimental

 Therapeutics Seminar1-2 s.h.
PHAR:5512 Drug Discovery and Mechanisms 3 s.h.
Process of modern drug discovery, focus on high throughput screening strategies, target validation, pharmacological characterization of new compounds; mechanism of drugs targeting G protein coupled receptors, ion channels and transporters, targets in biological systems.
PHAR:5515 Perspectives in MNPC Research 2 s.h.
Contemporary research in medicinal chemistry and natural products.
PHAR:5520 Medicinal and Natural Products Chemistry
Research
arr.

PHAR:5521 High Throughput Screening for Pharmaceutical and Biomedical Sciences

## 1 s.h.

Broad introduction to high throughput screening (HTS) and its application in pharmaceutical and biomedical sciences; HTS as a modern technology platform integrated with robust detection systems and robotic liquid handling instruments; use of HTS platforms to identify biologically active small organic molecules to validate drug targets, screen compound libraries; identification of biologically active small molecules for use as probes, tool compounds, drug leads; systematic, unbiased, and/or focused hypothesis-based approaches for mechanistic studies in biological and medical sciences. Recommendations: bachelor degree in biochemistry, chemistry, molecular biology, pharmacology, or equivalent.

## PHAR:5530 Pharmaceutical Sciences and Experimental Therapeutics Seminar

1-2 s.h.

## PHAR:5537 Enzymatic Basis of Drug Metabolism

Current literature on catalytic and physical properties, distribution, and substrate specificity of enzymes involved in mammalian drug metabolism. Prerequisites: CHEM:2220.

PHAR:5541 Total Synthesis of Biologically Active Natural Products
Total synthesis of natural products; use of strategies and tactics for synthetic maneuvering; selectivity of important and complex medicinal compounds; modern chemical methods for construction of carbon-carbon bonds.

## PHAR:5542 Molecular Recognition

1 s.h.
Focus on determinants in protein small molecule binding, particularly involving pharmaceutically relevant enzymes and receptors; how modern structure-based drug discovery is greatly aided by ability to employ protein structures in discovery and design of certain classes of drugs; structural approaches for predicting and improving drug affinity and selectivity, which have made a lasting impact across a number of diseases; important contemporary topics include in-depth lectures on fragment based drug discovery (FBDD), use and pitfalls of in silico docking and other screening methods, and emergence of covalent drugs. Requirements: introductory course in biochemistry. Same as BMB:5244.

PHAR:5545 Current Medicinal Chemistry 3 s.
Modern techniques used in drug discovery; important drug classes, their chemical mechanism of action.

## PHAR:5549 Analytical Biochemistry

3 s.h.
Application of modern chromatographic and detection methods used to isolate, characterize, and quantify drugs and macromolecules.

PHAR:5700 Quantitative Research Methods in Pharmacy I3-4 s.h. Collection and interpretation of analytical data; instrumental analysis and separation techniques.
PHAR:5720 Pharmaceutical Materials and Analysis 3 s.h. Strong working knowledge in pharmaceutical solids; different types of solid phases, preparation, and methods of characterization in context of optimizing phase selection with respect to solubility, stability, and processability.
PHAR:5745 Drug Delivery: Principles and Applications I
Advanced design and development of drug delivery systems with emphasis on selection of materials and designs suitable for specific applications; comparison and evaluation of available and emerging technologies. Prerequisites: (BMB:3110 or BMB:3120) and (MATH:3600 or MATH:2560) and (CHEM:2220 or CHEM:2240) and PHAR:4737. Corequisites: PHAR:4146 (if not taken as a prerequisite). Requirements: one semester of human anatomy and physiology.

PHAR:5800 Concepts in Preclinical Drug Development 1 s.h. Topics relevant to preclinical phase and early clinical stage of drug development; role of drug transporters in drug absorption, distribution, elimination; use of in vitro systems to evaluate drug metabolism, how to use in vitro metabolism data to predict drug clearance in humans; use of animal rule in drug development; biopharmaceutical classification system (BCS) and bioequivalence; biosimilar; use of minimum anticipated biological effect level (MABEL) to determine first-in-human (FIH) dose of protein drugs; drug-drug interaction including basic enzyme kinetics and inhibition (competitive, noncompetitive, uncompetitive); for students seeking to work in pharmaceutical industry.
PHAR:5875 Perspectives in Biotechnology
1 s.h.
Topics related to careers in biotechnology with an emphasis on preparing graduate students for careers outside of academia; discussions led by a series of guest speakers from leading biotech industries; understanding the societal impact of basic research; participation in round-table discussions; and presentation of student research findings. Requirements: graduate standing and good academic standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BMB:5875, CBE:5875, CEE:5875, CHEM:5875, MICR:5875.

## PHAR:5880 Protein Pharmaceuticals

2 s.h.
Understanding the differences between proteins and small molecule therapeutics, protein structure and its characterization, manufacturing processes used for biological products, formulation and drug product development, stability issues, and more.

## PHAR:6120 Clinical Pharmaceutical Sciences Research <br> arr.

PHAR:6305 Foundation Literature in Health Services Research
arr.
Issues related to pharmacy administration, social and behavioral pharmacy, pharmacy education.

## PHAR:6320 Health Services Research

arr.
PHAR:6330 Models of Patient Behavior and Choice
3 s.h.
Theoretical models used to describe behavior and choice in pharmaceutical socioeconomic research; models from economics, health services research, health behavior, clinical decision-making.

PHAR:6331 Models of Provider Behavior and Choice 3 s.h. Theoretical background for study of provider decision-making and behavior; models based on a classic economic approach, models used to study provider behavior.

## PHAR:6501 Principles and Mechanisms of Chemical

 Toxicology3 s.h.
General principles and basic mechanisms of chemical and pharmaceutical toxicology; drug/toxicant disposition, including biotransformation and bioactivation to electrophiles.

PHAR:6504 Mastering Reproducible Science
1 s.h.
Training in methods for conducting rigorous and reproducible science; features an array of faculty who provide lectures and discussions based on their areas of expertise (i.e., research with animals, synthetic chemistry, high throughput screening, etc.) to provide broad exposure and training in these areas; critical evaluation of literature outside of student's own specific field of study.

PHAR:6515 Perspectives in Drug Discovery
2 s.h.
Contemporary research in drug discovery and experimental
therapeutics.
PHAR:6700 Advanced Pharmacokinetcs and Pharmacodynamics
Application of pharmacokinetics and pharmacodynamics principles in pharmaceutical research. Prerequisites: PHAR:4146. Requirements: two semesters of calculus and one semester of statistics.

## PHAR:6706 Equilibria Processes

Equilibria pertaining to ionic systems, complexation, partitioning, solubility. Prerequisites: CHEM:2220 or CHEM:2240.

## PHAR:6710 Pharmaceutics Graduate Seminar

## PHAR:6720 Pharmaceutics Research

PHAR:6820 Drug Discovery and Experimental Therapeutics Research
Participation in a variety of independent and supervised research projects required for doctoral degree in pharmacy.
PHAR:7101 Principles of Experimental Therapeutics
Introduction to key principles and concepts for research in experimental therapeutics; basic principles related to drug disposition, toxicity, and efficacy.
PHAR:7102 Applied Clinical and Translational Science 3 s.h. Application of clinical and translational science in a multidisciplinary collaborative environment to develop, conduct, and report research.

PHAR:7331 Analytic Issues in Health Services Research II 3 s.h. Continuation of HMP:7960; advanced applications, including panel data and qualitative response models. Prerequisites: HMP:7960. Same as HMP:7965.

## PHAR:7703 Transport Phenomena 3 s.h

Diffusion and mass transport phenomena related to pharmaceutical systems.
PHAR:8130 Foundations of Pharmacy Practice I 4 s.h. Introduction to contemporary pharmacy practice; small-group discussion, application of core concepts through active hands-on learning approaches; for first-year student pharmacists. Requirements: P1 standing.

PHAR:8131 Engagement: Professional Skills and Values 1 s.h. Opportunity for student engagement in the College of Pharmacy prior to Professionalism Ceremony; development as a responsible partner in learning process by nurturing collaboration, leadership, service, compassion, community, self development, and social enrichment among students, faculty, and staff. Requirements: P1 standing.
PHAR:8132 Continuing Professional Development 1 s.h.
Engagement with profession of pharmacy and community through service and leadership activities, reflection; use of Continuous Professional Development Cycle (CPD) approach to learning. Requirements: P3 standing.

## PHAR:8133 Introductory Pharmacy Practice Experience Career

## Exploration

1 s.h.
Hands-on exposure to various pharmacist career opportunities in four different pharmacy practice patient care settings; settings include practice areas and rotation types required for P4 Advanced Pharmacy Practice Experience (APPE) sites in community pharmacy, hospital pharmacy, ambulatory care/family practice, acute care medicine, and other elective practice settings; work with faculty mentor. Requirements: P1 standing.

## PHAR:8134 Foundations of Health Services 3 s.h.

Foundation issues for pharmacist practice related to social, cultural, behavioral, economic, and organization design components of pharmacy care. Requirements: P1 standing.
PHAR:8135 Health Information Retrieval and Informatics 3 s.h. Introduction and overview of health care information retrieval, organization, and dissemination; retrieval and organization of health information from pharmacy and medical primary and tertiary literature using secondary resources; knowledge and skills to manage, analyze, and legally share health information in electronic health records, pharmacy information systems, and automated systems. Requirements: P1 standing.

## Principles of pharmacology and toxicology.

PHAR:8150 Foundations of Health, Wellness, and Disease 2 s.h. Overview of basic processes of good health and practices that promote wellness; emphasis on mechanistic causes of human disease.
PHAR:8151 Discovery I: Introduction and Background $\mathbf{3}$ s.h.
Creation and dissemination of new knowledge related to pharmacy or health care; broadly based scholarly effort with topics ranging from patient case studies, literature reviews, and analysis of pharmacy practice problems or basic research.
PHAR:8152 Fundamentals of Compounding 1 s.h. Introduction to personalized drug delivery systems through the art of compounding. Requirements: P1 standing.

## PHAR:8153 Integrated Pharmacotherapy: Dermatology and

 Sensory2 s.h.
Key elements of science and practice of pharmacy presented in an integrated manner and focused on particular organ systems or disease states. Requirements: P1 standing.

PHAR:8207 Introductory Pharmacy Practice Experiences Community

3 s.h.
Exposure to the provision of care in a community pharmacy setting; activities focus on those experiences related to the community pharmacy environment, medication distribution, special products and populations, and related professional activities; delivered in set time blocks over winter break and during summer session before or after the P2 year.
PHAR:8209 Introductory Pharmacy Practice Experiences Hospital Exposure to the provision of care in a hospital pharmacy setting; activities focus on those experiences related to the hospital pharmacy environment, medication distribution, special products and populations, and related professional activities.
PHAR:8250 Applications of Pharmacy Practice I 2 s.h.
Expands on skills and concepts taught in the foundations of pharmacy practice course series and includes skills relevant to the disease states in the specific aligned component courses; taught using a variety of classroom methods including small-group, discussion-based, and active hands-on learning approaches where students will apply core concepts. Requirements: P2 standing.
PHAR:8252 Integrated Pharmacotherapy: Musculoskeletal 4 s.h.
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
PHAR:8253 Integrated Pharmacotherapy: Genitourinary and Reproductive 3 s.h Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8254 Integrated Pharmacotherapy: Endocrine 3 s.h.
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8255 Discovery II: Design and Methods
arr.
Create and disseminate new knowledge related to pharmacy or health care with emphasis on design methods and data collection.

PHAR:8256 Integrated Pharmacotherapy: Renal, Fluids, and Electrolytes

2 s.h.
Key elements of the science and practice of pharmacy presented in an integrated manner; focus on particular organ systems or disease states.

PHAR:8260 Integrated Pharmacotherapy: Cardiovascular 4 s.h. Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

## PHAR:8261 Integrated Pharmacotherapy: Neurology and

## Psychiatry

4 s.h.
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
PHAR:8263 Integrated Pharmacotherapy: Infectious
Diseases 4 s.h.

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
PHAR:8264 Discovery III: Data Collection and Results 1 s.h. Create and disseminate new knowledge related to pharmacy or health care with emphasis on data collection and results.
PHAR:8265 Applications of Pharmacy Practice II 2 s.h.
Expands on skills and concepts taught in the foundations of pharmacy practice course series and includes skills relevant to the disease states in the specific integrated pharmacotherapy courses; taught using a variety of classroom methods including small group, discussion-based, and active hands-on learning approaches where students apply core concepts.
PHAR:8275 Advanced Health Services 2 s.h.
Exploration of advanced topics in health service. Requirements: P2 standing.

## PHAR:8301 Introductory Pharmacy Practice Experience

## Clinical

This third IPPE clinical is completed as an introduction to the Advanced Pharmacy Practice Experiences (APPE) to which student pharmacists are exposed during their P4 year; the IPPE clinical involves a P3 student observing and participating with a P4 student currently on an APPE rotation.
PHAR:8370 Integrated Pharmacotherapy: Respiratory and Allergy 2 s.h.
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
PHAR:8371 Integrated Pharmacotherapy: Oncology and Hematology
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
PHAR:8372 Integrated Pharmacotherapy: Gastroenterology and Nutrition 3 s.h.
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.
PHAR:8373 Integrated Pharmacotherapy: Renal, Fluids, and Electrolytes 2 s.h.
Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8374 Applications of Pharmacy Practice III 2 s.h. Expands on skills and concepts taught in the foundations of pharmacy practice course series and includes skills relevant to the disease states in the specific aligned component courses; taught using a variety of classroom methods including small group, discussion-based, and active hands-on learning approaches where students apply core concepts.
PHAR:8375 Advanced Topics in Health Services 2 s.h. Exploration of advanced topics in health service.
PHAR:8376 Discovery IV: Presentation of Results
1 s.h.
Dissemination and presentation of new knowledge related to pharmacy or health care with emphasis on design methods and data collection.

PHAR:8377 Integrated Pharmacotherapy: Capstone 4 s.h.
Capstone serves as a culminating academic and research project for students and mentors, integrating all areas of professional discovery.

## PHAR:8378 Pharmacy Law and Ethics

2 s.h.
Topics include ethical behavior for pharmacists and student of pharmacy law.
PHAR:8379 Advanced Pharmacy Practice Experiences

## Preparation

1 s.h.
Guidance provided for advanced pharmacy practice experiences.
PHAR:8402 PharmD Learning Portfolio II
Students continue to demonstrate and document mastery of
experiential and didactic coursework and assignments, as well as selfassessment of progression. Requirements: P4 standing.
PHAR:8500 Advanced Drug Literature Evaluation and Application

2 s.h.
Critical evaluation, utilization, and clinical application of drug literature.
PHAR:8501 Introduction to Nuclear Pharmacy 2 s.h.
Nuclear pharmacy as a specialty area of pharmacy practice that involves preparation of radioactive materials for patient administration.
PHAR:8502 Advanced Pharmacopalliation of Pain 2 s.h.
Exploration of symptom management across the trajectory of serious illness through a series of longitudinal patient cases.
PHAR:8503 Advanced Pharmacopalliation of Non-Pain Symptoms

3 s.h.
Terminal extubation, terminal agitation, discontinuing life sustaining therapies, and pharmacokinetic and pharmaceutic issues in advanced illness.

PHAR:8505 Advanced Topics in Infectious Disease, HIV, and Antimicrobial Therapy

2 s.h.
Topics in antimicrobial treatment of infectious diseases beyond those in the required pharmacy curriculum, including topics covered in the infectious disease therapeutics course; lectures, case discussion, class participation, and summary presentations of an uncommon organism or antimicrobial agent.

## PHAR:8506 Health Informatics Essentials

2 s.h.
Health informatics as a multidisciplinary field that uses health information technology to improve health care services for patients.

PHAR:8508 Interprofessional Case Studies
2 s.h.
Interdisciplinary collaboration to formulate pharmacologic treatments of common diseases; case-based learning utilized with peer teaching; medical and pharmacy students revisit and share foundational science concepts from their disciplines, including mechanisms of health and disease and principles of pharmacokinetics and pharmacodynamics; discussions led by students and facilitated with a Carver College of Medicine clinician and a College of Pharmacy clinical pharmacist; students formulate treatment plans using the World Health Organization's six step approach to good prescribing. Requirements: P3 standing.

PHAR:8509 Leaders Read: A Book Club Elective 2 s.h. Introduction to concepts from The Five Practices for Exemplary Leaders by Kouzes and Posner; overview of all five practices with focus on first practice of "Modeling the Way;" values and skills of servant leadership through reading, reflection, and discussion; servant leadership philosophy where the main goal of the leader is to serve, and exploration of why servant leadership is critical; students articulate their own "why" and the importance of service in leadership.

## PHAR:8510 Pediatric Elective

Overview of pediatric developmental differences, disease state medication issues, and clinical decision skills specific to pediatric population. Requirements: P3 standing.
PHAR:8511 Introduction to Specialty Pharmacy
Introduction to the rapidly growing field of specialty pharmacy; weekly interactive classes; students spend time in a specialty pharmacy environment and specialty clinic with a clinical pharmacy specialist to gain knowledge and understanding of clinical, business, distributive, and managed care aspects of specialty pharmacy. Requirements: P2 or P3 standing.

## PHAR:8512 Advanced Drug Literature I: Study Design,

 Evaluation, and Interpretation1 s.h.
Expansion of concepts introduced in the first pharmacy discovery course; improvement of knowledge and skills for practical evaluation of drug literature; emphasis on understanding advanced concepts in study designs which aid in applied interpretation and application of study findings to patient care.

## PHAR:8513 Advanced Drug Literature II: Evaluation and Clinical Application

1 s.h.
Expansion of concepts introduced in first professional discovery course; improvement of knowledge and skills in practical evaluation of drug literature; emphasis on applied interpretation and application of study findings to patient care through active student journal club presentations and facilitation by faculty content experts. Prerequisites: PHAR:8512.

## PHAR:8706 Pharmacy Projects

Basic and applied research problems of pharmaceutical interest.

## PHAR:8708 Substances of Misuse

Emphasis on the most important themes and concepts in the field of substance use and treatment; drugs of misuse including stimulants, opioids, sedative-hypnotics, alcohol, hallucinogens, marijuana, and performance enhancing compounds; drug use prevention and treatment; depiction of substance use in modern culture.

## PHAR:8709 Pharmacist Role in Health Coaching and Nutrition

Exploration of pharmacist role in health coaching and nutrition.
PHAR:8712 Nonprescription Pharmacotherapy and Self-

## Care

2 s.h.
Introduction to nonprescription medications; development of patient assessment and consultation skills; understanding of pharmacist's role in patient self-care. Requirements: P3 standing.

PHAR:8717 Ambulatory Care Pharmacy
Additional experience in the practice of clinical pharmacy; focus on key therapeutic areas where ambulatory care clinical pharmacists currently have a significant impact improving patient care, including anticoagulation management, hyperlipidemia management, and diabetes management; opportunity to develop expertise in clinical decision-making, improve problem solving abilities, and continued development in writing and oral presentation skills. Requirements: P3 standing.
PHAR:8718 Special Topics in Acute Care 2 s.h.
Pharmacotherapy for common but varied inpatient medicine topics; review of disorder, therapeutic goals, treatment plans, patient education, monitoring; lecture or case-based classes; anticoagulation, hemostasis, diabetic ketoacidosis, ICU overview, hepatic failure, renal replacement therapies, ACLS, antimicrobial and antifungal selection, septic shock, cardiogenic shock, neurogenic shock and neuro/neurosurgical emergencies, burns, sedation.

PHAR:8721 Leadership and Political Advocacy
arr.
Contemporary issues in pharmacy; role of leadership and advocacy in shaping profession; becoming effective advocates within political and policy making process; development of advocacy and leadership skills essential to improve self, profession, and community. Requirements: P1 or P2 standing.

PHAR:8722 Current Topics in Health Policy
Legislative process and broad range of current issues in health policy; general- and pharmacy-specific health policy topics at state and federal levels. Requirements: P1, P2, P3, or graduate standing.

PHAR:8724 Health System Pharmacy Practice Management 2 s.h. Organizational structure of pharmacy departments in hospitals and health care systems; models for delivery of pharmaceutical care; pharmacy's role in drug policy decision-making; provision of drug information; clinical and distributive pharmacy services; control of pharmacy and pharmacy costs; use of information technology and automation for service delivery; supervisory management; quality improvement. Requirements: P3 standing.

PHAR:8725 Career Pathways in Pharmacy
Career preparation through writing, speaking, reading, and listening; writing résumés, curricula vitae, cover letters; interviewing techniques; electronic portfolios; web-based career information; guest speakers from pharmacy associations, major chains; workshop approach. Requirements: P2 or P3 standing.

PHAR:8790 Sustainable Clinical Pharmacy Services: Leadership,
Management, and Implementation Management, and Implementation

2 s.h.
Practical knowledge and understanding of how to implement and sustain clinical pharmacy services in a variety of practice settings; how to identify outcomes to evaluate the success of ongoing services; students explore the perspective of leadership and management as it pertains to clinical pharmacy services.

PHAR:8793 Introduction to Global Health Studies 1 s.h. Overview of topics pertaining to international health and cultural diversity in relation to pharmacy and global health; preparation for student pharmacists to become health care practitioners who optimize the health of patients and society; inspires students to advance the profession by fostering collaboration, global and public health leadership, professionalism and civic engagement; introduction and discussion of important topics in global health, focusing specifically on care of the underserved in a global context.

PHAR:8794 Emergency Medicine and Toxicology 2 s.h
Pharmacology in the world of emergency medicine and toxicology; students learn through lecture, case discussion, class participation, and evaluation of evidence-based medicine literature in emergency medicine and toxicology.

## PHAR:8795 More than Medications: Healthcare for the Whole

## Patient

Explore the principles and practice of providing whole-person healthcare. Whole-person care is the integration of a variety of resources to support a patient's mind, body, and spirit in their healthcare journey. Additional topics to be covered include interprofessional care teams, palliative care as a public health need, communication strategies, and self-care.

PHAR:8796 Introduction to Travel Medicine 1 s.h.
Overview of services provided to travelers to prevent and management conditions that may arise prior to, during, and after international travel; students learn about topics pertaining to each of these areas.
PHAR:8797 Ethics and Spirituality in Health Care
Case-based examination of ethical issues in caring for patients with serious illness; exploration of suffering, spirituality, death, and dying. Requirements: P2 or P3 standing.
PHAR:8798 Continuing Professional Development in Palliative

## Care

Self-directed learning and development in palliative care; creation and implementation of a professional development plan including activities in service, scholarship and education, leadership and advocacy, and self-care and personal resilience.
PHAR:8799 Active Residency Preparation
2 s.h.
Students develop the best understanding of what a residency is, what programs exist, the usual qualifications for placement, and the necessary pathway and components of residency attainment; hands-on experience with preparation process; for pharmacy students interested in pursuing residency training following graduation. Requirements: P3 standing.
PHAR:9401 Ambulatory Care Rotation 6 s.h.
Clinical experience in providing pharmaceutical care in outpatient clinic settings. Requirements: P4 standing.

## PHAR:9402 Elective Ambulatory Care Rotation

6 s.h.
Clinical experience providing pharmaceutical care in specialty outpatient settings. Requirements: P4 standing.
PHAR:9403 Elective Nuclear Pharmacy Rotation
Practical experience in the handling and clinical use of radiopharmaceuticals. Requirements: P4 standing.

## PHAR:9404 Community Clinical Rotation

6 s.h.
Clinical experience in the community setting; emphasis on delivery of pharmaceutical care. Requirements: P4 standing.

PHAR:9405 Elective Hospice and Palliative Care Rotation 6 s.h. Clinical experience providing pharmacotherapy for end-of-life care. Requirements: P4 standing.
PHAR:9406 Elective: Drug Information Rotation 6 s.h. Practice experience applying drug information knowledge to service and research projects. Requirements: P4 standing.

PHAR:9407 Elective Family Medicine Rotation 6 s.h.
Clinical practice experience applying primary care therapeutics in family medicine practice settings. Requirements: P4 standing.
PHAR:9408 Elective Hematology/Oncology Rotation 6 s.h.
Drug therapy management of oncology patients and patients with hematologic malignancies, aplastic anemia, sickle cell disease, hemophilia. Requirements: P4 standing.
PHAR:9409 Elective Home Health Care Rotation 6 s.h.
Clinical experience in the team approach to health care delivery, including total parenteral nutrition, chemotherapy, intravenous antibiotics, lab analysis, hospice care, and pain management. Requirements: P4 standing.

PHAR:9410 Hospital Pharmacy Rotation
6 s.h.
Instruction and practical experience in various components of hospital pharmacy; emphasis on hospital organization, inpatient and outpatient services, IV admixtures, unit dose, and clinical services. Requirements: P4 standing.

## PHAR:9411 Elective Long Term Care Rotation

6 s.h.
Practice in consulting and providing services to varied long-term patient care environments. Requirements: P4 standing.
PHAR:9412 Elective Managed Care Rotation 6 s.h.
Practice experience in providing pharmaceutical care or pharmacyrelated services in a managed care organization. Requirements: P4 standing.

PHAR:9413 Acute Care Medicine Rotation
6 s.h.
Clinical experience applying therapeutic skills for the
pharmacotherapeutic management of patients on general medicine or specialty inpatient areas. Requirements: P4 standing.

## PHAR:9415 Elective: Pediatrics Rotation

6 s.h.
Clinical experience in drug therapy management of general and specialty pediatric patients. Requirements: P4 standing.
PHAR:9416 Elective: Pharmacy Rotation 6 s.h.
Selected practice experiences in various pharmacy practice settings. Requirements: P4 standing.
PHAR:9417 Elective Psychiatry Rotation
6 s.h.
Clinical experience in the rational use of drugs in psychiatric
disorders. Requirements: P4 standing.
PHAR:9418 Elective Research Rotation
6 s.h.
Practice experience in basic pharmaceutical or clinical research; proposal, study design, data collection and analysis, presentation of results. Requirements: P4 standing.
PHAR:9419 Elective: Surgery Rotation
6 s.h.
Clinical experience in drug therapy management on a surgery unit. Requirements: P4 standing.
PHAR:9420 Elective Pharmacy Practice Underserved Population Rotation

6 s.h.
Opportunity to learn the best practices for pharmaceutical
management; approaches to enhance access to and appropriate use
of medicines in underserved and resource-limited environments.
Requirements: P4 standing.
PHAR:9421 Elective Community Management Rotation 6 s.h. Practice exposure to community pharmacy operations and
management at the store, district, or corporate level. Requirements: P4 standing.

PHAR:9422 Elective: Compounding/Complementary Alternative Medicine Rotation

6 s.h.
Clinical work in a community setting with focus on team approach; experience developing extemporaneous compounds to optimize patient care and/or integrating traditional and nontraditional medicine. Requirements: P4 standing.
PHAR:9423 Elective: Critical Care Medicine Rotation 6 s.h.
Practice experience providing pharmaceutical services to intensive care unit patients. Requirements: P4 standing.
PHAR:9424 Elective Emergency Medicine Rotation 6 s.h.
Clinical experience providing pharmaceutical care for patients treated in the emergency department. Requirements: P4 standing.
PHAR:9425 Elective Hospital Management Rotation 6 s.h.
Practice experience in hospital pharmacy operations and management. Requirements: P4 standing.
PHAR:9426 Elective Infectious Disease Rotation
6 s.h.
Clinical experience providing pharmacotherapeutic management of patients receiving antimicrobial medications. Requirements: P4 standing.

PHAR:9427 Elective Medication Use Evaluation Rotation
6 s.h.
Practical experience in drug use evaluation to improve patient outcomes. Requirements: P4 standing.

PHAR:9428 Elective Pharmacy Industry Rotation
Practice experience in an area of the pharmaceutical or related industries. Requirements: P4 standing.
PHAR:9429 Elective: Pharmacy Regulatory Rotation 6 s.h. Practice experience with a pharmacy regulatory body. Requirements: P4 standing.

PHAR:9430 Elective: Professional Association Rotation 6 s.h. Practice experience in professional association management environment at the state or national level. Requirements: P4 standing.
PHAR:9431 Elective: Veterinary Pharmacy Rotation 6 s.h.
Practice experience in managing drug therapy for animals. Requirements: P4 standing.

PHAR:9432 Elective Community Rotation 6 s.h.
Community pharmacy experience emphasizing patient-centered care. Requirements: P4 standing.
PHAR:9433 Elective Academic Rotation 6 s.h.
Practice experience delivering pharmacy education with a College of Pharmacy faculty member. Requirements: P4 standing.
PHAR:9434 Elective International Pharmacy Non-Patient Care Rotation 6 s.h Practice experiences in pharmacy practice outside the United States with a focus on research, health care policy, and/or pharmacy education. Requirements: P4 standing.
PHAR:9435 Administrative Bye Rotation 6 s.h.

PHAR:9436 Elective Transitions of Care Rotation 6 s.h.
Practice experience consulting and providing services to patients transitioning through different patient care environments.

PHAR:9437 Elective Informatics Rotation
Practice experience in informatics in health care setting.
PHAR:9438 Elective International Pharmacy Patient Care Rotation

6 s.h.
Practice experiences in pharmacy practice outside the United States with a patient care focus.

PHAR:9440 Elective Virtual Rotation 6 s.h.
Experience with disease state management and board preparation; students examine medical literature to answer drug information questions, reflect on current issues facing the medical community, and identify potential solutions to problems for individual patients and populations; activities are intended to guide students toward professional competency. Requirements: P4 standing.

PHAR:9441 Elective Neurology Rotation
6 s.h.
Clinical experience in pharmacotherapeutic and pathophysiologic considerations of neurological disorders. Requirements: P4 standing.
PHAR:9450 Elective: Patient Care Rotation 6 s.h.
Elective pharmacy practice experiences providing direct patientcentered care in a variety of settings aimed at personalizing student educational interests and career goals. Requirements: P4 standing.
PHAR:9451 Elective: Non-Patient Care Rotation 6 s.h.
Elective pharmacy practice experiences in unique nonpatient-facing practice settings aimed at personalizing student educational interests and career goals. Requirements: P4 standing.

## Doctor of Pharmacy, PharmD

## Requirements

The Doctor of Pharmacy (PharmD) program provides professional education in a number of areas, including pharmaceutical technology, biopharmaceutics, medicinal chemistry and natural products, pharmaceutical socioeconomics, pharmacotherapy, patient care, clinical and hospital pharmacy, and aspects of biotechnology. Graduates of the program are qualified to take the Iowa Board of Pharmacy examination that is required for licensure as a pharmacist.
The program requires four years of full-time pharmacy study preceded by at least two years of pre-pharmacy study in the College of Liberal Arts and Sciences at the University of Iowa or at an accredited community or liberal arts college in the United States or Canada. During pre-pharmacy study, students complete the prerequisites for admission to the PharmD program (see Admission [p. 1937] in this section of the catalog for a list of prerequisite coursework). If possible, students should complete all 20 s.h. of their general education work before they enter the PharmD program. Courses in moral reasoning or ethics, communication, computer science, business, behavioral and social sciences, and the humanities are recommended. Courses in physical education skills, applied music, and studio art do not count toward the general education electives requirement. Students must maintain a pharmacy and cumulative grade-point average of at least 2.00.

For rules and regulations concerning academic probation, pass/ nonpass, credit by examination, maximum schedule, second-gradeonly option, waiver or substitution of courses, cancellation of registration, and drop date, see PharmD Student Resources on the College of Pharmacy website.
The College of Pharmacy provides students with the highest possible quality in the professional experiential program. Faculty and adjunct faculty serve as preceptors, providing introductory and advanced practice experience at institutions and pharmacies in Iowa, nationwide, and around the world.

## Professional Curriculum

The PharmD degree requires the coursework listed below, including at least 6 s.h. of professional electives. In addition, students must complete all prerequisites for admission to the PharmD program, including a minimum of 16 s .h. of general education courses chosen from behavioral, social, humanistic, and business disciplines (see Admission [p. 1937] in this section of the catalog). They also must complete an additional 8 s.h. of general education coursework either before or after admission to the PharmD program.

## First Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PHAR:8130 | Foundations of Pharmacy <br> Practice I | 4 |
| PHAR:8131 | Engagement: Professional Skills <br> and Values | 1 |
| PHAR:8133 | Introductory Pharmacy Practice <br> Experience Career Exploration <br> (unless taken spring semester) | 1 |
| PHAR:8134 | Foundations of Health Services | 3 |
| PHAR:8135 | Health Information Retrieval <br> and Informatics | 3 |
| PHAR:8136 | Foundations of Pharmaceutical <br> Sciences | 6 |
| PHAR:8152 | Fundamentals of Compounding | 1 |

## First Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PHAR:8133 | Introductory Pharmacy Practice <br> Experience Career Exploration <br> (unless taken first semester) | 1 |
| PHAR:8140 | Foundations of Pharmacy <br> Practice II | 4 |
| PHAR:8148 | Pharmacokinetics and Dose <br> Optimization | 2 |
| PHAR:8149 | Foundations of Pharmacology <br> and Toxicology | 3 |
| PHAR:8150 | Foundations of Health, <br> Wellness, and Disease | 2 |
| PHAR:8151 | Discovery I: Introduction and <br> Background | 3 |
| PHAR:8153 | Integrated Pharmacotherapy: <br> Dermatology and Sensory | 2 |

## Second Professional Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PHAR:8207 | Introductory Pharmacy Practice <br> Experiences Community (may <br> be taken in a different semester) | 3 |
| PHAR:8209 | Introductory Pharmacy Practice <br> Experiences Hospital (may be <br> taken in first or second semester <br> of second year) | 3 |
| PHAR:8250 | Applications of Pharmacy <br> Practice I | 2 |
| PHAR:8254 | Integrated Pharmacotherapy: <br> Endocrine | 3 |
| PHAR:8255 | Discovery II: Design and <br> Methods | 1 |
| PHAR:8256 | Integrated Pharmacotherapy: <br> Renal, Fluids, and Electrolytes | 2 |
| PHAR:8260 | Integrated Pharmacotherapy: <br> Cardiovascular | 4 |
| PHAR:8275 | Advanced Health Services | 2 |

## Second Professional Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PHAR:8207 | Introductory Pharmacy Practice <br> Experiences Community (may <br> be taken in a different semester) | 3 |
| PHAR:8260 | Integrated Pharmacotherapy: <br> Cardiovascular | 4 |
| PHAR:8261 | Integrated Pharmacotherapy: <br> Neurology and Psychiatry | 4 |
| PHAR:8263 | Integrated Pharmacotherapy: <br> Infectious Diseases | 4 |
| PHAR:8264 | Discovery III: Data Collection <br> and Results | 1 |
| PHAR:8265 | Applications of Pharmacy <br> Practice II | 2 |

## Third Professional Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PHAR:8301 | Introductory Pharmacy Practice | 1 |
|  | Experience Clinical |  |
| PHAR:8370 | Integrated Pharmacotherapy: | 2 |
|  | Respiratory and Allergy |  |

| PHAR:8371 | Integrated Pharmacotherapy: <br> Oncology and Hematology | 2 |
| :--- | :--- | :--- |
| PHAR:8372 | Integrated Pharmacotherapy: <br> Gastroenterology and Nutrition | 3 |
| PHAR:8373 | Integrated Pharmacotherapy: <br> Renal, Fluids, and Electrolytes | 2 |
| PHAR:8374 | Applications of Pharmacy <br> Practice III | 2 |
| PHAR:8375 | Advanced Topics in Health <br> Services | 2 |
| PHAR:8376 | Discovery IV: Presentation of <br> Results | 1 |

## Third Professional Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PHAR:8132 | Continuing Professional <br> Development | 1 |
| PHAR:8377 | Integrated Pharmacotherapy: <br> Capstone | 4 |
| PHAR:8378 | Pharmacy Law and Ethics | 2 |
| PHAR:8379 | Advanced Pharmacy Practice <br> Experiences Preparation | 1 |

## Third Year Spring Semester and Fourth Year: Advanced Pharmacy Practice Rotations

During the spring semester of the third year, students may choose to complete one or two rotations in addition to the eight rotations required during the fourth year. During the fourth year, students must complete eight advanced pharmacy practice rotations. All students must complete the first four rotations listed below ( 24 s.h.); the remaining rotations may be selected by each student.

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| All of these: | Ambulatory Care Rotation | 6 |
| PHAR:9401 | Community Clinical Rotation | 6 |
| PHAR:9404 | Hospital Pharmacy Rotation | 6 |
| PHAR:9410 | Acute Care Medicine Rotation | 6 |
| PHAR:9413 | Elective Ambulatory Care | 6 |
| Four of these: | Rotation |  |
| PHAR:9402 | Elective Nuclear Pharmacy <br> Rotation | 6 |
| PHAR:9403 | Elective: Drug Information <br> Rotation | 6 |
| PHAR:9407 | Elective Family Medicine <br> Rotation | 6 |
| PHAR:9408 | Elective Hematology/Oncology <br> Rotation | 6 |
| PHAR:9409 | Elective Home Health Care <br> Rotation | 6 |
| PHAR:9411 | Elective Long Term Care <br> Rotation | 6 |
| PHAR:9412 | Elective Managed Care Rotation | 6 |
| PHAR:9415 | Elective: Pediatrics Rotation | 6 |
| PHAR:9416 | Elective: Pharmacy Rotation 6 <br> PHAR:9417 Elective Psychiatry Rotation | 6 |
| PHAR:9418 | Elective Research Rotation | 6 |
| PHAR:9419 | Elective: Surgery Rotation | 6 |

| PHAR:9420 | Elective Pharmacy Practice <br> Underserved Population <br> Rotation | 6 |
| :--- | :--- | :--- |
| PHAR:9422 | Elective: Compounding/ <br> Complementary Alternative <br> Medicine Rotation | 6 |
| PHAR:9423 | Elective: Critical Care Medicine <br> Rotation <br> Elective Emergency Medicine <br> Rotation | 6 |
| PHAR:9424 | Elective Hospital Management <br> Rotation | 6 |
| PHAR:9425 | Elective Infectious Disease <br> Rotation | 6 |
| PHAR:9426 | Elective Medication Use <br> Evaluation Rotation | 6 |
| PHAR:9427 | Elective Pharmacy Industry <br> Rotation | 6 |
| PHAR:9428 | Elective: Pharmacy Regulatory <br> Rotation <br> Elective: Professional | 6 |
| PHAR:9429 | Association Rotation | 6 |
| PHAR:9430 | Elective: Veterinary Pharmacy <br> Rotation | 6 |
| PHAR:9431 | Elective Community Rotation | 6 |
| PHAR:9432 | Elective Academic Rotation <br> Elective Virtual Rotation | 6 |
| PHAR:9433 9440 | Elective Neurology Rotation | 6 |
| PHAR:9441 | 6 | 6 |

## Professional Electives

PharmD students must complete at least 6 s.h. of professional electives, which they may choose from the following list.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| PHAR:4741 | Immunology and Immunotherapies | 2 |
| PHAR:8500 | Advanced Drug Literature Evaluation and Application | 2 |
| PHAR:8501 | Introduction to Nuclear Pharmacy | 2 |
| PHAR:8502 | Advanced Pharmacopalliation of Pain | 2 |
| PHAR:8503 | Advanced Pharmacopalliation of Non-Pain Symptoms | 3 |
| PHAR:8505 | Advanced Topics in Infectious Disease, HIV, and Antimicrobial Therapy | 2 |
| PHAR:8506 | Health Informatics Essentials | 2 |
| PHAR:8508 | Interprofessional Case Studies | 2 |
| PHAR:8509 | Leaders Read: A Book Club Elective | 2 |
| PHAR:8510 | Pediatric Elective | 1 |
| PHAR:8511 | Introduction to Specialty Pharmacy | 2 |
| PHAR:8512 | Advanced Drug Literature I: Study Design, Evaluation, and Interpretation | 1 |
| PHAR:8513 | Advanced Drug Literature II: Evaluation and Clinical Application | 1 |
| PHAR:8706 | Pharmacy Projects | 1-3 |
| PHAR:8708 | Substances of Misuse | 2 |

| PHAR:8709 | Pharmacist Role in Health <br> Coaching and Nutrition | 2 |
| :--- | :--- | ---: |
| PHAR:8712 | Nonprescription <br> Pharmacotherapy and Self-Care | 2 |
| PHAR:8717 | Ambulatory Care Pharmacy | 2 |
| PHAR:8718 | Special Topics in Acute Care | 2 |
| PHAR:8721 | Leadership and Political <br> Advocacy | arr. |
| PHAR:8722 | Current Topics in Health Policy | 2 |
| PHAR:8724 | Health System Pharmacy <br> Practice Management | 2 |
| PHAR:8725 | Career Pathways in Pharmacy | 1 |
| PHAR:8790 | Sustainable Clinical <br> Pharmacy Services: <br> Leadership, Management, and <br> Implementation | 2 |
| PHAR:8793 | Introduction to Global Health <br> Studies | 1 |
| PHAR:8794 | Emergency Medicine and <br> Toxicology | 2 |
| PHAR:8795 | More than Medications: <br> Healthcare for the Whole <br> Patient | 2 |
| PHAR:8796 | Introduction to Travel Medicine | 1 |
| PHAR:8797 | Ethics and Spirituality in Health <br> Care | 3 |
| PHAR:8798 | Continuing Professional <br> Development in Palliative Care | 1 |
| PHAR:8799 | Active Residency Preparation | 2 |

## Combined Programs

## PharmD/MPH

The College of Pharmacy and the College of Public Health offer the combined Doctor of Pharmacy/Master of Public Health program. The combined program requires 42 s.h. of graduate credit in addition to the requirements of the PharmD degree. Students who complete the program are granted both degrees.
The PharmD/MPH program helps students develop expertise in public health related to pharmacotherapy, health promotion, disease prevention, and medication safety. Its graduates may work in areas of interest common to pharmacy and public health, such as spread and treatment of disease, community health, and immunology; bioterrorism, terrorism, and preparedness; genetics; insurance; managed care; family and juvenile health; and protection of special populations. Employment opportunities are available in hospitals and clinics and with health care providers; private practice; insurance and managed care organizations; local, county, state, and federal government; public health governmental agencies; and colleges and universities.

Separate admission to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program.

See the Master of Public Health, MPH [p. 1964] (College of Public Health) in the catalog to learn about curriculum and admission requirements.

## PharmD/MS in Informatics (Health Informatics Subprogram)

The College of Pharmacy and the Graduate College offer the combined Doctor of Pharmacy/Master of Science in informatics with
apply to the Graduate College for admission to the MS program before entering the spring semester of their first year in the pharmacy program.

For information about the Master of Science degree, see the MS in informatics [p. 1653] (Graduate College) in the catalog.

## Admission

Individuals apply to the PharmD program using PharmCAS, the American Association of College of Pharmacy application service. Applicants also must submit a supplemental application, including the application fee, to the University of Iowa College of Pharmacy; see Doctor of Pharmacy on the University of Iowa Graduate Admissions website for more information.

By selecting the University of Iowa College of Pharmacy, students choose to be part of the legacy of leaders for which the College of Pharmacy has become well known. Iowa pharmacy shapes pharmacy practice nationally and internationally with evidence-based practice models and collaborative pharmacy care innovations.
As aspiring Doctor of Pharmacy students, the first two years are spent completing general education and prerequisite courses to prepare candidates for the PharmD degree. Just before they complete their required courses, they apply to the program itself, which is comprised of an additional four years of integrated courses, hands-on research involvement, and practical experiences.
Applicants must complete the college-level work listed under "Prerequisites for Admission" below. They also must have an overall cumulative grade-point average of at least 2.50 and must submit two letters of recommendation and a personal statement. Applicants considered for admission must have a personal interview; the college contacts applicants to arrange interview appointments.
Fulfillment of the admission requirements listed above does not ensure admission to the College of Pharmacy. The admissions committee considers applicants who meet these requirements and selects individuals who, in their judgment, are the best qualified for the study and practice of pharmacy.
Applicants who are accepted for admission are required to submit to a criminal background check and pay an admission acceptance fee. The fee is applied to tuition for the student's first semester of enrollment in the college. The deposit is not refunded to applicants who do not enroll in the College of Pharmacy.
Entering health sciences students are required to have an annual tuberculin skin test (TST) and proof of immunization against mumps, measles and rubella (two MMRs), tetanus, diphtheria and varicella before classes begin. The usual regimen of three doses of Hepatitis B vaccine and a Hepatitis B titre must be completed by the second semester of the first year. All students are required to have hospitalization and health insurance.

## Prerequisites for Admission

Applicants to the PharmD program must have completed the following college-level work with a C-minus or higher.

- Rhetoric: 4 s.h. (RHET:1030 Rhetoric) or 6 s.h. of transfer credit in English composition and rhetoric and 3 s.h. in speech.
- Biochemistry: 3 s.h. (BMB:3110 Biochemistry).
- General biology: 8 s.h. (BIOL:1411 Foundations of Biology and BIOL:1412 Diversity of Form and Function).
- General chemistry: 8 s.h. (CHEM:1110 Principles of Chemistry I and CHEM: 1120 Principles of Chemistry II).
- Human anatomy: 3 s.h. (ACB:3110 Principles of Human Anatomy).
- Human physiology: 3 s.h. (HHP:3500 Human Physiology).
- Organic chemistry: 6 s.h. (CHEM:2210 Organic Chemistry I and CHEM:2220 Organic Chemistry II).
- Mathematics: 3-4 s.h. of a satisfactory differential and integral calculus course (MATH:1460 Calculus for the Biological Sciences).
- Physics: one year of high school physics or one semester of college-level physics with a lab (PHYS: 1400 Basic Physics).
- Statistics: 3 s.h.
- General education electives: a minimum of 12 s.h.

Courses in moral reasoning or ethics, communications, computer science, and business, behavioral and social sciences, and the humanities are accepted. Courses in physical education skills, applied music, and studio art do not count toward the general education requirement.

## Financial Support

Each year the College of Pharmacy awards scholarships to student pharmacists through a variety of awards. In 2020, the college awarded over $\$ 1.2$ million to help cover the cost of education. Around half of the student body receives a scholarship, with 235 scholarships given out in 2020.

For more information, visit Scholarship Opportunities on the College of Pharmacy website.

## Career Advancement

The College of Pharmacy has had nearly a $100 \%$ placement rate for its graduates for many years. Pharmacists often choose to practice in a community pharmacy or a hospital setting. They hold positions in government, independent businesses, home health care, consulting, clinical pharmacy, managed care facilities, higher education, or the pharmaceutical industry.

## Palliative Care, Professional

## Certificate

## Requirements

The professional Certificate in Palliative Care requires 17 s.h. of credit. Students must maintain a pharmacy and cumulative grade-point average of at least 3.00 in work for the certificate.

The certificate program prepares students to practice as palliative care generalists or champions upon graduation from the Doctor of Pharmacy (PharmD) program. Students who complete the certificate will possess the knowledge, skills, and attitudes to serve patients living with serious illnesses across the trajectory of life in a variety of general pharmacy practice environments and non-palliative pharmacy specialties, including critical care, emergency medicine, geriatrics, and cardiology. The program addresses the educational needs of pharmacy students who may provide pharmaceutical care in a community pharmacy setting, a long-term care pharmacy, oncology, cardiology, infectious disease, critical care, transplant, and emergency medicine. The certificate also prepares graduates to pursue advanced postgraduate clinical training in palliative care and hospice, including palliative care residencies and fellowships.

The Certificate in Palliative Care requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| All of these: | More than Medications: |  |
| PHAR:8795 | Healthcare for the Whole <br> Patient | 2 |
| PHAR:8797 | Ethics and Spirituality in Health <br> Care | 3 |
| PHAR:8798 | Continuing Professional <br> Development in Palliative Care | 1 |
| PHAR:8502 | Advanced Pharmacopalliation <br> of Pain | 2 |
| PHAR:8503 | Advanced Pharmacopalliation <br> of Non-Pain Symptoms | 3 |
| One of these: | Ambulatory Care Rotation (at | 6 |
| PHAR:9401 | UIHC Palliative Care Clinic) | 6 |
| PHAR:9405 | Elective Hospice and Palliative <br> Care Rotation | 6 |

## Admission

Students may apply in their fall P2 semester to begin the program and then take the longitudinal course, PHAR:8798 Continuing Professional Development in Palliative Care, in their spring P2 semester.

Applicants must be in good academic standing, as defined in the Student Handbook, and have a College of Pharmacy cumulative grade-point average of at least 2.70. The Certificate in Palliative Care Admission Committee reviews all applications holistically.

## Admitted students demonstrate:

- preparedness to engage in a challenging certificate curriculum without compromising their success in the PharmD program, and
- an understanding of what palliative care is and of the program's requirements.

## Pharmacy, MS

## Learning Outcomes

Graduates will exhibit the ability to:

- demonstrate both subject matter expertise and the ability to critically evaluate the current state of knowledge in that area of expertise;
- understand the fundamental concepts and applications of current methodology and techniques for the conduct and evaluation of research in their area of expertise;
- demonstrate the ability to conduct research under the direction of a faculty member and interact successfully with other members of a research team;
- effectively communicate research findings in both written and oral formats;
- know and apply the highest ethical standards in research and in communication of the results of that research; and
- be prepared for career options in academia, industry, government, or other relevant fields.

## Requirements

The College of Pharmacy is not admitting students to the master's program at this time

The Master of Science in pharmacy requires at least 30 s.h. of credit, which may include 9 s.h. of research. At least 24 s.h. must be completed at the University of Iowa after admission to a graduate program. Requirements for the master's degree include a final examination which, at the discretion of department, may be written or oral or both. The final examination will not duplicate course examinations. Various forms of extramural registration may qualify toward the 24 s.h. residence requirement. A master's degree can typically be earned in 3-4 semesters.

The Master of Science in pharmacy requires mastery of methodologies and practices of research and scholarship of the discipline. MS degrees may be designed to provide advanced study and accomplishment that serves a variety of career and other purposes. A thesis describing original scholarship or research may be required. No more than 9 s.h. of credit for thesis research and writing is counted toward the 30 s.h. requirement.

Programs are offered in three areas: drug discovery and experimental therapeutics, health services research, and pharmaceutics.

The drug discovery and experimental therapeutics curriculum provides a strong foundational base of knowledge along with options for a tailored experience for students. The thesis requirement provides an opportunity for engagement in cutting-edge scholarship, ongoing mentorship, and collaborative research interactions with multiple labs.

The health services research area provides an innovative approach to studying the challenges facing the health care system and provides evidence to support policy-based solutions. The program combines ideas across several distinct scientific paradigms (sociology, economics, psychology, business, and anthropology) to better understand the factors leading to decisions in health care and the consequences of these decisions. Students gain broad knowledge of health and pharmaceutical care, informed by theories from economics and social psychology. The program teaches intellectual and practical skills to investigate research questions dealing with current issues.
The pharmaceutics area is a multidisciplinary science that examines the development, production, and characterization of dosage forms, as well as the disposition and action of drugs in the body. As pharmaceutical scientists have been engaged in the development of
novel biomaterials for sophisticated drug delivery systems, they also have expanded into research with applications in the development of medical devices and tissue engineering.

For more information about graduate study, visit the College of Pharmacy website.

## Admission

The graduate program in pharmacy at the University of Iowa is mainly a PhD program with admission preference going to applicants with a PhD degree objective. Admission to the MS in pharmacy will be granted under special circumstances only, which may include the following: international government funding requirement, a Fulbright scholarship or some other scholarship source that specifies a master's degree, or a person working in the industry seeking a specific set of knowledge or skills for the purpose of enhancing their value to that employer. A master's degree is not required to be eligible to apply to the PhD program.
Applicants must meet the admission requirements of the Graduate College. They must:

- hold a bachelor's degree from a U.S. institution or an equivalent degree from another country as determined by the University of Iowa Office of Admissions;
- have a grade-point average of at least 3.00;
- submit a Graduate Record Examination (GRE) General Test score; and
- if an international applicant, receive a Test of English as a Foreign Language (TOEFL) minimum score of 81, an International English Language Testing System (IELTS) minimum overall score of 7.0 with no individual score below 6.0 , or a Duolingo English Test (DET) minimum score of 105 ; however, if an applicant has a master's degree from a U.S. institution, this requirement is waived.

Visit Graduate Degree: How to Apply on the College of Pharmacy website for a list of program requirements and application deadlines. Academic requirements for maintaining graduate registration are determined by the Graduate College and by the individual divisions in the College of Pharmacy.

## Career Advancement

Advanced study in the pharmaceutical sciences prepares students for research, teaching, and administrative positions in the pharmaceutical industry, in colleges and universities, in government agencies, and in health-related institutions and organizations.

## Pharmacy, PhD

The College of Pharmacy offers a Doctor of Philosophy degree in pharmacy with subprograms in three areas: drug discovery and experimental therapeutics, health services research, and pharmaceutics.
The drug discovery and experimental therapeutics subprogram offers a unique educational opportunity for students interested in drug discovery and the development of novel therapeutics. The changing landscape of drug discovery has created a need for scientists with interdisciplinary training to navigate the complex landscape of medicinal chemistry, biotherapeutics, pharmacogenetics/genomics, and basic pharmacology/toxicology.
The health services research subprogram provides an innovative approach to studying the challenges facing the health care system and provides evidence to support policy-based solutions. It combines ideas across several distinct scientific paradigms (sociology, economics, psychology, business, and anthropology) to better understand the factors leading to decisions in health care and the consequences of these decisions. Students gain broad knowledge of health and pharmaceutical care, informed by theories from economics and social psychology. The subprogram teaches intellectual and practical skills to investigate research questions dealing with current issues.
The pharmaceutics subprogram provides a multidisciplinary science focus that examines the development, production, and characterization of dosage forms, as well as the disposition and action of drugs in the body. As pharmaceutical scientists have been engaged in the development of novel biomaterials for sophisticated drug delivery systems, they also have expanded into research with applications in the development of medical devices and tissue engineering.
For more information about graduate study, visit the College of Pharmacy website.

## Learning Outcomes

Graduates will demonstrate the ability to:

- identify important research problems through development of subject matter expertise and critical evaluation of the current state of knowledge in that area of expertise;
- develop testable hypotheses and/or research questions, and then utilize sound methodology to design research approaches to address them;
- conduct, analyze, and interpret independent original research that contributes new knowledge to the field of study;
- effectively communicate research results to a range of audiences in both written and oral formats;
- conduct all aspects of research and communication of results with the highest ethical standards; and
- be prepared for a diversity of career options in academia, industry, government, or other relevant fields.

## Health Services Research

The Doctor of Philosophy in pharmacy with a subprogram in health services research requires 74 s.h. of credit. Students must maintain a cumulative grade-point average of at least 3.00.
In the first two years in the program, students participate in ongoing research and complete coursework. In the third year, emphasis is placed on developing a dissertation topic. The following two years are spent on research and writing of the dissertation.

The Doctor of Philosophy in pharmacy with a subprogram in health services research requires the following work.

## Core Competencies

Students complete the following coursework before they take the Core Competency Qualifying Exam.

## Health Services Research

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Health Services Research | arr. |
| PHAR:6320 | Models of Patient Behavior and <br> Choice | 3 |
| PHAR:6331 | Models of Provider Behavior <br> and Choice | 3 |
| HMP:4000 | Introduction to the U.S. Health <br> Care System (or equivalent as <br> approved by advisor) | 3 |

## Research Methods and Statistics

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Introduction to Research <br> Methods | 3 |
| PHAR:5350 | Applied Research Methods: <br> Primary Data | 2 |
| PHAR:5365 | Applied Research Methods: <br> Secondary Data | 2 |
| BIOS:4120 | Introduction to Biostatistics |  |
| BIOS:5120/ Regression Modeling and <br> ANOVA in the Health Sciences <br> STAT:5610 3 <br> Additional statistics coursework (biostatistics,  <br> economics, education, psychology, mathematics, or  <br> sociobiology)  | 3 |  |

## Specialty

The specialty area requires at least 24 s.h. of coursework. With the guidance of their faculty advisor, students develop a plan of study that encompasses an area of expertise or specialty.

## Additional Requirements

Students are expected to participate in specific aspects of ongoing research. These research activities are often paid graduate research assistantships; course credit is not available for paid assistantships. By the end of their third year, students are expected to present the results from one completed research project at a regional or national meeting.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PHAR:5310 | Health Services Research <br> Seminar (students enroll in the <br> seminar for 1 s.h. each semester <br> they are on campus, excluding <br> summer session) | 1 |
| BMED:7270 | Scholarly Integrity/Responsible <br> Conduct of Research I (taken in <br> second year) | 0 |
| BMED:7271 | Scholarly Integrity/Responsible <br> Conduct of Research II (taken in <br> second year) | 0 |

## Drug Discovery and Experimental Therapeutics

The Doctor of Philosophy in pharmacy with a subprogram in drug discovery and experimental therapeutics requires 72 s.h. of credit.

The degree requires 24 s.h. of didactic coursework, including 14 s.h. of required courses and a minimum of 10 s.h. of interdisciplinary electives. The remaining hours may be fulfilled by research, seminars, additional electives, and the doctoral dissertation. Typical time to complete the degree is five years. Students must maintain a cumulative grade-point average of at least 3.00 .

The curriculum provides a strong foundational base of knowledge along with options for a tailored experience for students. The program prepares scientists capable of bridging the complex landscape of medicinal chemistry, biotherapeutics, pharmacogenetics/genomics, and basic pharmacology/toxicology.

The Doctor of Philosophy in pharmacy with a subprogram in drug discovery and experimental therapeutics requires the following work.

## Required Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| PHAR:4146 | Drug Disposition and Pharmacokinetics | 2 |
| PHAR:5530 | Pharmaceutical Sciences and Experimental Therapeutics Seminar | 1-2 |
| PHAR:5545 | Current Medicinal Chemistry | 3 |
| PHAR:6515 | Perspectives in Drug Discovery | 2 |
| PHAR:6820 | Drug Discovery and Experimental Therapeutics Research | . |
| BIOS:4120 | Introduction to Biostatistics | 3 |
| $\begin{aligned} & \text { PCOL:4130 } \\ & \text { or PHAR:7101 } \end{aligned}$ | Drug Mechanisms and Actions <br> Principles of Experimental Therapeutics | 3 |

## Interdisciplinary Electives

Students select a minimum of 10 s.h. of electives chosen from the courses listed below. Additional electives can be selected from
biochemistry, chemistry, genetics, neuroscience, and pharmacology at the discretion of the advisor.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| 3-6 s.h., taken every fall and spring semester, from these: |  |  |
| PHAR:5512 | Drug Discovery and Mechanisms | 3 |
| PHAR:5537 | Enzymatic Basis of Drug Metabolism | 3 |
| PHAR:5541 | Total Synthesis of Biologically Active Natural Products | 3 |
| PHAR:5549 | Analytical Biochemistry | 3 |
| PHAR:6501 | Principles and Mechanisms of Chemical Toxicology | 3 |
| PHAR:6504 | Mastering Reproducible Science | 1 |
| PHAR:6700 | Advanced Pharmacokinetcs and Pharmacodynamics | 3 |
| PHAR:7101 | Principles of Experimental Therapeutics | 3 |
| PHAR:7102 | Applied Clinical and Translational Science | 3 |
| BIOL:5512 | Readings in Genetics | 2 |
| BIOS:5120/ <br> IGPI:5120/ <br> STAT:5610 | Regression Modeling and ANOVA in the Health Sciences | 3 |
| CHEM:5321 | Spectroscopic Methods in Organic Chemistry | 3-4 |

## Comprehensive Examination

Students take the comprehensive examination between the beginning and end of their third year of graduate study.

## Dissertation

The dissertation is defended in an final oral examination.

## Pharmaceutics

The Doctor of Philosophy in pharmacy with a subprogram in pharmaceutics requires 72 s.h. of credit. The degree requires 30 s.h. in didactic coursework, including a minimum of 15 s.h. in divisional courses and 15 s.h. of pharmacy or elective coursework. The remaining 42 s.h. can be fulfilled with research or electives. Students must maintain a cumulative grade-point average of at least 3.00 .

Entering students who do not have basic knowledge in all subjects follow a plan of study in order to complete divisional requirements during their first and second years.
The Doctor of Philosophy in pharmacy with a subprogram in pharmaceutics requires the following work.
Core Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| PHAR:4146 | Drug Disposition and Pharmacokinetics | 2 |
| PHAR:4736 | Properties of Dosage Forms I (or equivalent) | 3 |
| PHAR:4737 | Properties of Dosage Forms II | 3 |
| PHAR:4800 | Chemical and Biophysical Properties of Drugs | 1 |
| PHAR:5700 | Quantitative Research Methods in Pharmacy I | 3-4 |
| PHAR:5720 | Pharmaceutical Materials and Analysis | 3 |
| PHAR:5745 | Drug Delivery: Principles and Applications I | arr. |
| PHAR:5880 | Protein Pharmaceuticals | 2 |
| PHAR:6700 | Advanced Pharmacokinetcs and Pharmacodynamics | 3 |
| PHAR:6706 | Equilibria Processes | 3 |
| PHAR:6710 | Pharmaceutics Graduate Seminar (enrollment required each semester until completion of comprehensive exam) | 1 |
| PHAR:6720 | Pharmaceutics Research | arr. |
| BMED:7270 | Scholarly Integrity/Responsible Conduct of Research I (taken in second year) | 0 |
| BMED:7271 | Scholarly Integrity/Responsible Conduct of Research II (taken in second year) | 0 |

## Elective Courses

Students choose appropriate electives for individual research objectives.

## Comprehensive Examination

Students take the comprehensive examination between the beginning and end of their third year of graduate study.

## Dissertation

The dissertation is defended in a final oral examination.

## Admission

Applicants must meet the admission requirements of the Graduate College. They must:

- hold a bachelor's degree from a U.S. institution or an equivalent degree from another country as determined by the University of Iowa Office of Admissions;
- have a minimum grade-point average of at least 3.00;
- if an international applicant, receive a Test of English as a Foreign Language (TOEFL) minimum score of 81, an International English Language Testing System (IELTS) minimum overall score of 7.0 with no individual score below 6.0 , or a Duolingo English Test (DET) minimum score of 105 ; however, if an applicant has a master's degree from a U.S. institution, this requirement is waived.

Students may submit a Graduate Record Examination (GRE) General Test score, but that is optional.

Visit Graduate Degree: How to Apply on the College of Pharmacy website for a list of program requirements and application deadlines. Academic requirements for maintaining graduate registration are determined by the Graduate College and by the individual divisions in the College of Pharmacy.

## Career Advancement

Advanced study in the pharmaceutical sciences prepares students for research, teaching, and administrative positions in the pharmaceutical industry, in colleges and universities, in government agencies, and in health-related institutions and organizations.

## Academic Plans

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- Brandi Janssen

Undergraduate major: public health (BA, BS)
Undergraduate certificate: public health
Graduate degrees: MHA; MPH; MS; PhD
Graduate certificates: agricultural safety and health; biostatistics; emerging infectious disease epidemiology; healthcare management; public health; translational and clinical investigation

Website: https://www.public-health.uiowa.edu/
The College of Public Health, established in 1999, is a partner with the Carver College of Medicine and the Colleges of Dentistry, Nursing, and Pharmacy in striving to improve human health and well-being. Consistent with the interdisciplinary traditions of public health, the college also collaborates with non-health science colleges across the university and with other Board of Regents, State of Iowa institutions, state and local agencies, and the private sector.

Public health is the science of protecting and improving the health of communities. Professionals in this field use specialized knowledge and skills to better understand the root causes of diseases and injuries and, whenever possible, develop strategies to prevent them.
A population-based approach to health is a distinguishing feature of public health and of the college. For public health practitioners-a wide range of professionals including physicians, nurses, dentists, pharmacists, social workers, nutritionists, environmental scientists, health educators, and health service administrators-the primary focus is on the health of entire communities rather than individual patients. Tools that public health professionals use to improve and enhance quality of life include analytical methods to identify, describe, and monitor the health of communities and populations at risk; education and prevention programs, methods of assuring access to appropriate and cost-effective care; and formulation of sound public policies.

The public health approach has led to many important health improvements over the past century. Vaccination campaigns, improved sanitation, fluoridation of drinking water, and efforts to reduce tobacco use are among the most recognizable public health initiatives. Public health programs also have led to safer workplaces, reduction of deaths from coronary heart disease and stroke, improved motor vehicle safety, and creation of effective health systems to provide care to those who need it. Today, public health professionals play an important role worldwide in seeking better approaches to complex issues such as quality of life for the elderly, drug and alcohol
abuse, teen pregnancy, new and reemerging infectious diseases, bioterrorism, health literacy, nutrition, and food safety.

The College of Public Health provides educational opportunities to students campuswide. In addition to training and educating public health students, the college welcomes students from the Tippie College of Business, the Carver College of Medicine, the Graduate College, and the Colleges of Dentistry, Education, Engineering, Law, Nursing, and Pharmacy who enroll in public health courses. Undergraduate students in the College of Liberal Arts and Sciences and graduate students from programs such as anthropology, microbiology, and statistics also register for public health courses. The college's faculty members, staff members, and graduate and postdoctoral students contribute to teaching and research activities throughout the health sciences campus and provide services to Iowa and the nation. Partnerships for teaching and research extend across the campus. This background provides a rich array of educational opportunities.

The college includes the Departments of Biostatistics [p. 1979], Community and Behavioral Health [p. 1989], Epidemiology [p. 1996], Health Management and Policy [p. 2010], and Occupational and Environmental Health [p. 2025]. It offers programs leading to two undergraduate degrees: Bachelor of Arts (BA) and Bachelor of Science (BS). It also offers programs leading to four graduate degrees: Master of Health Administration (MHA), Master of Public Health (MPH), Master of Science (MS), and Doctor of Philosophy (PhD). In addition, it offers the Certificate in Agricultural Safety and Health [p. 1978], the Certificate in Biostatistics [p. 1988], the Certificate in Emerging Infectious Disease Epidemiology [p. 1995], the Certificate in Healthcare Management [p. 2024], the undergraduate Certificate in Public Health [p. 1963], the graduate Certificate in Public Health [p. 1976], and the Certificate in Translational and Clinical Investigation [p. 2037].

The undergraduate and graduate programs of the college are accredited by the Council on Education for Public Health (CEPH), the accrediting body for schools and programs of public health. Three programs in the college also are accredited: the industrial hygiene MS training program is accredited by the Accreditation Board for Engineering and Technology (ABET), the Master of Health Administration is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME), and the Occupational Medicine Residency is accredited by the Accreditation Council for Graduate Medical Education (ACGME).

## Faculty

The college's faculty includes members with single appointments in the College of Public Health as well as secondary and adjunct appointments. See the Faculty A-to-Z List on the college's website for more information.

## Programs

## Undergraduate Programs of Study

The College of Public Health offers the Bachelor of Arts (BA) and the Bachelor of Science (BS); see the BA in public health [p. 1953] and the BS in public health [p. 1958] in the catalog for more information. The college also offers the undergraduate Certificate in Public Health [p. 1963].

## Graduate Programs of Study

The College of Public Health offers the Master of Public Health [p. 1964] (MPH); the Master of Health Administration [p. 2013] (MHA), the Master of Science (MS), and the Doctor of Philosophy (PhD); see the Biostatistics [p. 1979], Community and Behavioral

Health [p. 1989], Epidemiology [p. 1996], Health Management and Policy [p. 2010], and Occupational and Environmental Health [p. 2025] departmental sections of the catalog for more information.

The College of Public Health also offers graduate Certificates in Public Health [p. 1976], Agricultural Safety and Health [p. 1978], Biostatistics [p. 1988], Emerging Infectious Disease Epidemiology [p. 1995], Healthcare Management [p. 2024], and Translational and Clinical Investigation [p. 2037].

## Undergraduate Rules and Procedures

## Academic Advising

First-year students directly admitted to the College of Public Health major are advised by undergraduate program staff at the College of Public Health. First-year College of Liberal Arts and Sciences (CLAS) public health interest students are advised at the university's Academic Advising Center. CLAS public health interest students who apply and are admitted to the College of Public Health are advised at the College of Public Health by undergraduate program staff. All students are required to have a conference with their advisor before registering for classes each semester.

## Application for Degree

Students who wish to be considered for graduation must submit an Application for Degree through MyUI the session before they are eligible to graduate or before the deadline date during the session in which they expect to graduate.
Students who do not graduate in the session they submitted their Application for Degree must submit another application through MyUI for the next applicable session. Students do not need to be registered to apply for a degree.
See Degree Application on the Office of the Registrar website.

## Academic Recognition

## Dean's List

Undergraduate students in the College of Public Health who achieve a grade-point average (GPA) of 3.50 or higher on 12 s.h. or more of University of Iowa graded coursework during a given semester or summer session and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean's List for that semester.

## President's List

Undergraduate students in the College of Public Health who achieve a GPA of 4.00 on 12 s.h. or more of University of Iowa graded coursework and who have no semester hours of I (incomplete) or O (no grade reported) for two consecutive semesters (excluding summer sessions) are recognized by inclusion on the President's List.

## Graduation with Distinction

Graduation with distinction recognizes high academic achievement based on grades. The Office of the Registrar certifies to the dean of the College of Public Health the names of students eligible to graduate with distinction. To be eligible for consideration, the graduate must complete the public health major at the University of Iowa. The grade-point average upon which distinction is determined includes all college-level work (cumulative UI and total) undertaken prior to the opening of the final session.

- To graduate with highest distinction, the cumulative GPA must be 3.90 to 4.00 .
- To graduate with high distinction, the cumulative GPA must be 3.80 to 3.89 .
- To graduate with distinction, the cumulative GPA must be 3.75 to 3.79.

## Graduation with Honors

Graduation with honors recognizes high academic achievement based on both grades and exceptional accomplishment.

## Honors in the Major

Students majoring in public health have the opportunity to graduate with honors in the major. To graduate with honors in public health, students must successfully complete all college requirements with a GPA of at least 3.33 in all courses for the major, in all college coursework, and in all UI coursework.

In addition, students must complete an honors thesis in CPH:4990 Mentored Independent Undergraduate Research in Public Health, where they must write a brief research proposal summarizing background and goals of honors research, defend their research proposal to a honors project faculty member and a honors advisor, conduct research, submit their honors thesis, and conclude with an oral and/or poster presentation.

Outstanding undergraduate students in the college have an opportunity to undertake independent study and to work closely with faculty members. Completion of requirements for honors in the major also will satisfy the experiential learning requirement.

## Academic Standards

## Maximum Schedule

Course schedules of more than 19 s.h. for a semester, 12 s.h. for a summer session, or 3 s.h. for a winter session require approval of the advising staff in the undergraduate program office.

## Classification of Students

Students are classified by the number of semester hours of credit they have earned toward the bachelor's degree.

| Requirements | Hours |
| :--- | :--- |
| First year | $0-29$ s.h. |
| Second year | $30-59$ s.h. |
| Junior | $60-89$ s.h. |
| Senior | 90 s.h. or |
|  | more |

## Credit and Grading

## Credit by Examination

Students may earn up to 30 s.h. of credit by examination by taking selected tests from the College Level Examination Program (CLEP) and the Advanced Placement Program (AP) of the College Board, the Cambridge Assessment International Education (CAIE), or the International Baccalaureate Program (IB). For information about when and how to take the CLEP and AP examinations, contact the university's Office of Teaching, Learning, and Technology.
The College of Public Health has information on scores, credit, and course duplicates for all CLEP, AP, and IB tests accepted by the college. Ordinarily, credit earned through examination is applied first to the General Education Requirements. Credit also may be applied to requirements of a major, minor, or certificate, or as elective credit.

## Credit From Other Colleges

Students who have taken courses at another institution that are similar to those approved for the public health major or the General Education Requirements may request that these courses be evaluated for transfer credit. When students apply for admission to the College of Public Health, they must submit official transcripts from each college
attended along with their application for admission. After the credit has been certified by the Office of Admissions as college-level work from an accredited institution and after admission has been granted, the credit is evaluated by the undergraduate program either before or during the student's first semester of enrollment in the college.

## Grading System

The college uses a letter grading system. A denotes superior performance, B denotes above average, C denotes average, D denotes below average, and F denotes failure of the course. Plus and minus designate gradations of performance between letter grades. Letter grades and their numerical equivalents are as follows.

| A+ | 4.33 |
| :--- | :--- |
| A (superior) | 4.00 |
| A- | 3.67 |
| B+ | 3.33 |
| B (above average) | 3.00 |
| B- | 2.67 |
| C+ | 2.33 |
| C (average) | 2.00 |
| C- | 1.67 |
| D+ | 1.33 |
| D (below average) | 1.00 |
| D- | 0.67 |
| F (failing) | 0 |

## Adding and Dropping Courses

Students may drop courses, except College of Law courses, any time before the deadline published in the university's academic deadline calendar. Deadlines are different for regular and off-cycle courses. See Academic Calendar on the Office of the Registrar website.

Students must obtain approval from the college that offers the course in order to request permission to add or drop a course after these deadlines.

## Auditing Courses

College of Public Health students may choose to take courses without earning credit for them (audit) with the permission of the course instructor and their advisor. Students are still charged for auditing courses. The mark of AUS (audit successful) is assigned to students registered for zero credit if attendance and performance in the course are satisfactory; if unsatisfactory, the mark of AUU (audit unsuccessful) is assigned. Courses completed with a mark of AUS do not meet any requirements nor do they carry any credit toward graduation. Auditing may not be used as a second-grade-only option.

To register for a course on an audit basis, students must obtain the instructor's authorizing signature and their advisor's signature and must register for 0 s.h. To change registration from audit to credit or from credit to audit, a change in registration form is used. These changes must be made during the period when adding courses is allowed.

## Pass/Nonpass Courses

Undergraduate students in the College of Public Health may not use courses taken P/N (pass/nonpass) to satisfy General Education Requirements, high school course requirements, prerequisite or major public health course requirements, or any course in the College of Public Health. Major public health requirements include any course that fulfills the major course requirements (including public health electives), regardless of the college offering the course. The College accepts a maximum of $15 \mathrm{~s} . \mathrm{h}$. of P (pass) credit from the University of Iowa toward the bachelor's degree and a maximum of 30 s.h. of
$P$ (pass) and S (satisfactory) grades from all sources (UI as well as transfer work) toward the bachelor's degree.
Pass/nonpass registration must be completed during the first 10 days of a fall or spring semester or the first one-and-one-half weeks of a summer session, and it requires the approval of the advisor and the instructor. For courses taken pass/nonpass, an earned grade of Cminus or higher is recorded as a P; an earned grade of D-plus or lower is recorded as an N . Pass/nonpass credit is not included in grade-point average calculations.

## Satisfactory/Fail Courses

The College of Public Health Direct Admit Seminar, Second Year Undergraduate Public Health Seminar, and Third Year Undergraduate Public Health Seminar are offered only satisfactory/fail (S/F). A grade of F (fail) earned for these seminars does not satisfy any portion of the professional development seminar requirement.

Certain other College of Public Health courses are offered satisfactory/fail (S/F). All students registered for these courses receive one of these marks.

Semester hours of $S$ graded coursework are not used in computing grade-point averages, but hours of F graded coursework are used. Semester hours of S graded coursework are counted as semester hours earned toward graduation; semester hours of F graded coursework do not count as semester hours earned toward graduation.

College of Public Health undergraduates may not use $S$ graded coursework to fulfill General Education Requirements.
The college accepts a maximum of 15 s.h. of $S$ credit from the University of Iowa toward the bachelor's degree and a maximum of 30 s.h. of S and P grades from all sources (UI as well as transfer work) toward the bachelor's degree.

## Incomplete Grades

Instructors may report a mark of I (incomplete) only if the unfinished part of a student's work in a course other than research, thesis, or independent study is small; if the work is unfinished for reasons acceptable to the instructor; and if a student's standing in the course is satisfactory.

Students should not re-enroll in a course for which they have an incomplete. Incomplete grades must be removed by completing the unfinished part of the work. Faculty and students are encouraged to state clearly in a written agreement how the incomplete is to be completed and the due date for the remaining work. Both the faculty member and the student should keep a record of the written agreement.

Failure to remove the incomplete before the end of the next full semester, excluding summer and winter sessions, results in replacement of the I with a grade of F , regardless of whether a student is enrolled during that semester. A grade change may be submitted to convert a grade of F to another letter grade, with the instructor's approval.
Students cannot graduate with an I mark on their record. They must either complete the course for a passing grade, or allow the Incomplete to lapse to a grade of F .

## Second-Grade-Only Option for CLAS Public Health Interest Students

Public health interest students must follow the rules established by the College of Liberal Arts and Sciences (CLAS). Contact the CLAS Undergraduate Programs office or consult the CLAS Academic Policies Handbook for more information.

## Second-Grade-Only Option

College of Public Health students may repeat up to three courses taken at the University of Iowa regardless of the grade originally earned in the course and may only be used once per class. A course may not be repeated under the second-grade-only option once it has been used as a prerequisite for a more advanced course that the student has completed successfully. The second-grade-only option cannot be used to remove a grade of incomplete, which must be removed in the usual manner.

The second-grade-only option may be used only for University of Iowa courses. A course taken at another college or university may not be repeated at the University of Iowa under the second-grade-only option, nor may a UI course be repeated at another institution under the second-grade-only option.
Any second-grade-only options used before entry to the College of Public Health count toward the maximum of three second-grade-only options allowed.

If the course was taken for a grade the first time, it must be taken for a grade the second time.
If the course was taken satisfactory/fail the first time, a student may choose to take the course for a grade or as satisfactory/fail the second time.

Any University of Iowa course taken in any mode of deliveryduring a regular semester, a summer session, an intensive session, through distance education, or through Distance and Online Education [p. 2061]-may be repeated in the same mode of delivery or in any other mode of delivery.
Students who have been awarded a degree from the University of Iowa may not use the second-grade-only option on a course taken before the degree was awarded.

Students must register as usual for the course that is to be repeated. After the session in which the course is being repeated has begun, students must request the second-grade-only option by completing the Second-Grade-Only Option Request Form. Students must follow this procedure or both grades will be counted in their University of Iowa grade-point average.
The permanent record is adjusted by placing a pound symbol (\#) next to the first grade to indicate that it is no longer being included in the grade-point-average calculation, and only the semester hours from the second registration have been counted as semester hours earned. Once placed on the record, the option may not be retracted. Graduate or professional colleges may recalculate grade-point averages using all grades visible on the permanent record.

## Student Academic Misconduct

Policies regarding cases of cheating or plagiarism are outlined in the Undergraduate Student Handbook; see Examples of Academic Misconduct on the College of Public Health website.

## Academic Probation and Dismissal

College of Public Health students are expected to meet academic standards set by the college and to demonstrate reasonable progress toward a degree. To be considered in good academic standing, students must earn a minimum cumulative public health major GPA, a minimum UI cumulative GPA, and a minimum cumulative GPA for all college work of at least 2.00 , and a required University of Iowa session GPA of 1.50 or higher during any spring, summer, or fall enrollment. If a student does not meet all grade-point average conditions, then the student is placed on academic probation.

Students usually are allowed only one session to return to good academic standing. They are required to meet with an academic
advisor. Students on academic probation who withdraw registration after the deadline for dropping courses may be dismissed.

The college reviews academic records for all students at the end of the fall and spring semesters. There is no review at the end of the summer session. Students are placed on probation, dismissed for unsatisfactory progress (with or without previous probationary status), or restored to good standing only at the end of the fall and spring semesters.
Students who do not make satisfactory progress may be dismissed from the college without an intervening probationary period. Students who are dismissed from the college for unsatisfactory academic progress due to circumstances beyond their control, such as a death in their immediate family or extended personal illness, may appeal for a revocation of the dismissal. A student dismissed in January must submit a written appeal by the second day of spring semester classes. A student dismissed in May must submit the written appeal by June 15.

Students dismissed from the college for poor scholarship may appeal to re-enroll after an interval of at least one calendar year following the end of the term in which they were dismissed. A written appeal for reinstatement must be submitted to the Undergraduate Program Office. Appeals must be submitted before June 15 for reinstatement in a fall semester or before Dec. 1 for reinstatement in a spring semester.

For details, see the Undergraduate Student Handbook on the college's website.

## Reinstatement

Students dismissed for unsatisfactory scholarship for the first time are not permitted to register again for one year. Students dismissed for the second time may or may not be granted a second reinstatement. Requests for reinstatement must be made in writing and should be addressed to the Associate Dean for Academic Affairs, College of Public Health. Arrangements for a reinstatement interview must be made with the associate dean for academic affairs. The interview must take place between March 1 and July 1 for reinstatement for fall semester, or between Oct. 1 and Dec. 1 for reinstatement to spring semester. Late requests are deferred to the following semester.
Students who are permitted to register following dismissal are registered on academic probation and ordinarily are allowed two semesters to achieve good standing. Most reinstatements include a limit on the number of semester hours the student may take upon reinstatement. Very poor academic work in the first semester of a reinstatement, however, may result in dismissal at the close of that semester.

## Facilities

The College of Public Health Building, a state-of-the-art facility that opened in 2012 on the university's health sciences campus, houses the college's administrative, departmental, and faculty offices. The college's research centers, institutes, and specialized laboratories are located in Westlawn, on the health sciences campus; in University Capitol Centre, on the main campus east; and at the University of Iowa Research Park.

Four student computer laboratories are housed at the college. More than 55 software packages are available for student use, most without charge. Software includes Microsoft Office products, SAS, and S+. Some specialty labs are equipped with RedHat Linux and are loaded with R, Macanova, Xlispstat, Mathematica, and other software.
Students, faculty, and staff draw on extensive library resources available across campus. Hardin Library for the Health Sciences serves as a central resource for all of the health sciences colleges. Hardin Library's Information Commons, a state-of-the-art health sciences educational technology facility, provides central support and delivery for courseware development, classroom instruction,
health-related research, and independent learning. It offers highend multimedia development workstations, networked electronic classrooms, a case-based learning and conference room, and information research workstations for searching health-related databases and the internet.

## Research Centers and Institutes

The College of Public Health is home to 24 centers and institutes that conduct research and provide public service. These multidisciplinary centers and institutes-most of which are supported by federal grants -focus their investigative efforts on important public health topics. They conduct an array of outreach, service, and policy activities through which the College of Public Health engages with agencies, communities, and organizations throughout Iowa, the Midwest, the nation, and the world. Students are encouraged to explore opportunities for involvement with any of the college's centers and institutes.
For more information, see Research Centers and Programs on the college's website.

## Courses

## College of Public Health Courses

## CPH:1000 First-Year Seminar <br> 1 s.h.

Small discussion class taught by faculty member; topics chosen by instructor; may include outside activities (e.g., films, readings, visits to research facilities).

CPH:1050 College of Public Health Direct Admit Seminar 1 s.h. Introduction for first-year students to student life and the public health profession; tips for student success, resources on campus, coping with adversity, advising responsibilities, curriculum choices and career objectives, and community building events.

## CPH:1400 Fundamentals of Public Health

Introduction to public health; emphasis on issues, challenges, achievements, careers; historical events that serve as a foundation for public health practice. GE: Social Sciences.

## CPH:1600 Public Health Science: Inquiry and Investigation in Public Health

Introduction to epidemiology, biostatistics, and the interdisciplinary nature of public health research and practice; how public policy and population-based interventions are subsequently shaped by public health evidence. GE: Quantitative or Formal Reasoning.

## CPH:1800 Social and Psychological Determinants of Health:

## Changing Behavior, Improving Health

Study of the social and psychological aspects of health, including understanding behavior change to improve health.

## CPH:2050 Second Year Undergraduate Public Health

 SeminarPreparation for experiential learning opportunities, including development of interpersonal, teamwork, leadership, and communication skills; ethical decision-making; understanding the cultural contexts in which professionals work; working with communities and the role of advocacy; professionalism.

CPH:2200 Climageddon: Understanding Climate Change and Associated Impacts on Health
Discovery, underlying principles, and impacts of global climate change; scientific evidence, global climate models, international treaties, ethics, advocacy and denial of climate change; strategies for climate adaptation and mitigation of unsustainable practices.

CPH:2220 Building a Healthier Tomorrow: Public Health
Methods to Minimize Disease and Pollutant Exposures 3 s.h. Introduction to historical public health practices developed to prevent exposures to environmental contaminants; major sources of those contaminants that adversely affect natural waters and air are evaluated relative to methods used to provide safe drinking water and clean air; in-class exercises involve critical thinking and creativity to understand concepts and tools needed to utilize prior public health successes and application to current and future environmental health events.

## CPH:2230 Finding Patient Zero: The Exploration of Infectious

 Disease Transmission and Pandemic Threats 3 s.h. Exploration of lay and scientific literature, pandemic infection games, and popular culture television programming to evaluate past and fictional pandemics-are these pandemics rooted in fact or fiction?CPH:2240 Health, Intersectionality, and Diversity
3 s.h.
Exploration of intersectionality related to gender and health
disparities, particularly as they impact diverse populations in the United States. Same as GWSS:2400, LATS:2400.
CPH:2400 The U.S. Health System in a Global Context 3 s.h.
Fundamental organizational structures of the U.S. health system and the difference between systems globally; basic concepts of legal, ethical, economic, and regulatory dimensions of health care and policy and roles, influences, and responsibilities of government agencies.

## CPH:2600 Introduction to Public Health Methods

3 s.h.
Introductory quantitative and qualitative methods used in public health practice and research. Prerequisites: CPH:1600 with a minimum grade of C-.

## CPH:3050 Third Year Undergraduate Public Health

 SeminarDevelopment and preparation for post-college plans, including how to conduct a job search, write a résumé and cover letter, interview, and apply to graduate programs in public health and related fields.

## CPH:3100 Health Economics

Introduction to microeconomic theory and applications to health and health care, including demand for health and health services, health insurance coverage, health care markets, behavior of health care providers, and role of government.
CPH:3200 Death at Work: Case Studies of Workplace Safety and Health 3 s.h.
Case-study approach to understanding the rights of workers to a safe and healthful workplace; relevant risk factors (physical, economic, social) among several working environments.

CPH:3210 Nutrition in Public Health
Concepts and methods of obtaining and using food and nutrition information from federal databases and research publications; how food and nutrition knowledge, policy, and research are used for improvement of the health of populations.
CPH:3220 Public Health as a Public Good: Economics and Decision Making in Public Health Systems
Role of government in the economy from a public health perspective; emphasis on the importance of public goods, behavioral economics in public health solutions, and key methods for evaluation of public programs.

CPH:3230 Human Genetics and Public Health
Introduction to human genome and its impact on public health; students learn about public health initiatives and policies that include genetics (e.g., newborn screening, birth defects surveillance, cancer screening). Prerequisites: BIOL:1140 or BIOL:1141 or BIOL:1411.
CPH:3240 Global Health Today
Attendance at diverse on-campus, local, and regional global health events. Same as GHS:3030.

## CPH:3300 Undergraduate Independent Study in Public Health

In-depth pursuit of an area of special interest in public health.
CPH:3400 Health, Work, and the Environment 3 s.h.
Survey of environmental and occupational health hazards and the associated health risks of exposure; how public health protects society from these hazards; how public health policy can be influenced by science. Same as GEOG:3210.

## CPH:3500 Global Public Health

3 s.h.
Exploration of historical, current, and forecasted trends in global public health, the factors influencing health demographics in human populations, sources of health inequalities, and appropriate policy and intervention approaches for addressing global public health challenges. Same as GHS:3500.
CPH:3600 Applied Public Health Methods 3 s.h.
Application of quantitative and qualitative methods used in public health practice and research. Prerequisites: $\mathrm{CPH}: 1600$ with a minimum grade of C- and CPH:2600 with a minimum grade of C-.

## CPH:3700 Methods for Program Implementation and Evaluation

3 s.h.
Introduction of theory and practice of program implementation and evaluation for health care and public health interventions focusing on programs implemented at the community level, including projects in government and nonprofit organizations. Prerequisites: CPH:1600 and CPH:2600.
CPH:3750 Undergraduate Service Learning in Public Health arr. Community service learning experience directly related to goals and objectives of a specific public health course for undergraduate students; faculty-guided planning and reflection; satisfies the experiential learning public health degree requirement for undergraduate public health majors. Recommendations: CPH:2050 strongly recommended.
CPH:3800 Public Health Theories and Society 3 s.h.
Examination of public health and social science theories as they relate to socioeconomics, policy, institutions, communities, individual decision-making, behavior, and health. Prerequisites: CPH:1400 and CPH:2600.

## CPH:3900 Fundamentals in Public Health Emergency Preparedness and Response

Basic concepts and principles used in emergency prevention, preparedness, response, and recovery at the local, state, and national levels with emphasis on roles and responsibilities of public health that align with policies, laws, and systems. Prerequisites: CPH:1400.

## CPH:3999 Undergraduate Research Experience in Public

## Health

Hands-on involvement in scholarly public health research activities under the supervision of faculty or research staff; satisfies the experiential learning degree requirement for undergraduate public health majors. Recommendations: CPH:2050 strongly recommended.

## CPH:4200 Agriculture, Food Systems, and Sustainability 3 s.h.

 Identification and development of tools to measure environmental and social sustainability of global agricultural practices, including interactions with the environment, social considerations, and the ability of agriculture to support farmers' livelihoods.
## CPH:4210 Making a Difference: Public Health Policy and Advocacy

Important role of policy in health, including policy structures, implementation, advocacy, and evaluation; students focus their work on a policy of their specific interest.

CPH:4220 Global Road Safety
3 s.h.
arr. Road safety problem, data sources, research methods used in field, and how intervention and prevention programs are developed
and evaluated; lecture, hands-on approaches. Same as GHS:4530, OEH:4530.
CPH:4230 Injury and Violence Prevention 3 s.h.
Theory, research, and practice of injury control; unintentional and intentional injuries; local, national, international injury issues. Same as EPID:4510, OEH:4510.
CPH:4240 Special Topics
arr.
Didactic material in public health; may include tutorial, seminar, or faculty-directed work; may be a special topic or experience taught one time or on a first-time basis.

## CPH:4250 Field Experiences in Public Health <br> 1 s.h.

Direct involvement in actions being taken at local community level; topics include environmental health, infectious diseases, chronic diseases, and pediatric health; practical examples and hands-on experiences during site visits for topic-specific field investigations. Offered spring semesters. Prerequisites: BIOL:1140 or BIOL:1141 or BIOL:1411. Requirements: biology or microbiology coursework. Same as EPID:4314.
CPH:4260 College of Public Health Strike Force 0 s.h. Provide support to public health organizations, health care systems, and nonprofit organizations throughout Iowa, nationally, and globally; students deploy to assist with diverse public health related projects; use of surge capacity, service learning, and just-in-time training models; hands-on learning opportunities that transition theory into practice while addressing real-life situations.
CPH:4750 Undergraduate Global Learning in Public Health arr. Global public health experience; satisfies the experiential learning public health degree requirement for undergraduate public health majors. Recommendations: CPH:2050 strongly recommended.
CPH:4755 International Perspectives: Xicotepec 2 s.h.
Interdisciplinary service-learning course to enrich understanding of Mexican culture and history; students hone teamwork, leadership, cultural sensitivity, cultural humility, and project management skills while developing and carrying out public health projects that address community-identified needs; coordinated with the support of Rotary International.
CPH:4850 Undergraduate Public Health Internship arr.
Public health internship experience; satisfies the experiential learning public health degree requirement for undergraduate public health majors. Recommendations: CPH:2050 strongly recommended.
CPH:4990 Mentored Independent Undergraduate Research in arr. Public Health

Independent student research project under the supervision of a faculty mentor; satisfies the experiential learning degree requirement for undergraduate public health majors. Corequisites: $\mathrm{CPH}: 3600$. Recommendations: CPH:2050 strongly recommended.

## CPH:4999 Public Health Capstone: Practice of Evidence-Based

 Public HealthStudents in their final year synthesize and apply knowledge through cumulative and integrative activities that serve as a capstone to their educational experience. Prerequisites: CPH:1800 and CPH:2400 and CPH:3050 and CPH:3400 and CPH:3500 and CPH:3600 and CPH:3700.
CPH:5100 Introduction to Public Health 3 s.h.
Concepts, structures, and activities in public health practice. Offered fall semesters and summer sessions.

## CPH:5201 Interprofessional Education and Practice for MPH

 Students I0 s.h.
Students gain knowledge and skills in interprofessional practice between health professionals including medicine, pharmacy, dentistry, physical therapy, nursing, health administration, and public health; understanding roles/responsibilities, values, and ethics across health professions; development of teamwork skills.
CPH:5202 Interprofessional Education and Practice for MPH Students II
Students gain knowledge and skills in interprofessional practice between health professionals including medicine, pharmacy, dentistry, physical therapy, nursing, health administration, and public health; understanding roles/responsibilities, values, and ethics across health professions; development of teamwork skills.

## CPH:5203 Interprofessional Education and Practice for MPH

 Students III 0 s.h. Students gain knowledge and skills in interprofessional practice between health professionals including medicine, pharmacy, dentistry, physical therapy, nursing, health administration, and public health; understanding roles/responsibilities, values, and ethics across health professions; development of teamwork skills.
## CPH:6100 Essentials of Public Health <br> 2 s.h.

Introduction and overview of the scope of public health; emphasis on history, definitions, issues, achievements, and future challenges; examples of public health research and practice.

## CPH:6500 Independent Study in Public Health

 arr.In-depth pursuit of an area of special interest in public health. Requirements: approval from the College of Public Health.
CPH:6600 Service-Learning in Public Health arr.
Community service learning experience directly related to goals and objectives of a specific public health course; faculty-guided planning and reflection.
CPH:6700 Public Health Emergency Preparedness for Veterinarians and Other Public Health Disciplines 3 s.h. Introduction to public health emergency preparedness from a one health perspective; emergency preparedness from federal, state, and local perspectives; important elements for preparing responders; preparedness information systems and communication techniques.

## CPH:7000 MPH Practicum Experience <br> 0-6 s.h.

Comprehensive and integrated application of knowledge acquired in the MPH program in a practice setting; demonstration of professional competence in public health practice. Prerequisites: CBH:4105 and (HMP:5005 or HMP:4000) and EPID:4400 and BIOS:4120 and OEH:4240 and CPH:5100. Requirements: an approved practicum proposal.
CPH:7200 MPH Capstone Experience 1 s.h. Students gain knowledge and skills in public health practice by working on an interdisciplinary team to solve a real-world public health issue; each student has the opportunity to apply classroom and practical experience received throughout their MPH coursework into an integrative experience; students particularly gain skills in advocacy, communication with diverse audiences on public health issues, and the role of different public health disciplines in solving health issues in the community. Prerequisites: CBH:4105 and (HMP:5005 or HMP:4000) and EPID:4400 and BIOS:4120 and OEH:4240 and CPH:5100.
CPH:7270 Principles of Scholarly Integrity: Public Health 0-1 s.h.
Training in the responsible conduct of research and scholarly activities; discussion of student/mentor responsibilities in pursuit of scholarly work and intellectual dialogues; responsibilities to the institution/scholarly community/society; public health core discipline examples are utilized.

CPH:7500 MPH Applied Practice Experience 1-2 s.h.
Comprehensive and integrated application of knowledge acquired in the MPH program in a practice setting; demonstration of professional competence in public health practice. Prerequisites: CBH:4105 and (HMP:5005 or HMP:4000) and EPID:4400 and BIOS:4120 and OEH:4240 and CPH:5100.

CPH:7604 Principles of Scholarly Integrity: Public Health Postdoc/K Awardees 0 s.h.
Training in the responsible conduct of research and scholarly activities; discussion of student/mentor responsibilities in pursuit of scholarly work and intellectual dialogues; responsibilities to institution/scholarly community/society; utilization of public health core discipline examples; for public health postdoc/K awardees.

## Public Health, BA

The Bachelor of Arts (BA) degree provides students with a basic understanding of the five core public health knowledge areas: biostatistics, social and behavioral sciences, epidemiology, health policy and management, and occupational and environmental health sciences. Students will be prepared to enter the workforce or continue their education.

A public health core provides the degree with breadth in the biological, social, economic, quantitative, geographic, and educational components of health and health disparities within and across populations. Students complete a cumulative capstone experience during which they will integrate, apply, and synthesize public health knowledge. As an integral part of their education, students also are exposed to public health professionals and agencies.

## Requirements

The Bachelor of Arts with a major in public health requires a minimum of 120 s.h., including at least 61 s.h. of work for the major. Students must have a cumulative grade-point average (GPA) of at least 2.00 in all courses for the major and in all UI courses for the major; in all college coursework and in all UI coursework; and in all college coursework in public health and in all UI public health coursework, including any courses administered by the College of Public Health in the Departments of Biostatistics, Community and Behavioral Health, Epidemiology, Health Management and Policy, and Occupational and Environmental Health. Students are required to earn a minimum of 30 s.h. in public health coursework at the University of Iowa.

The BA with a major in public health requires the following coursework.

## College Success Requirement

All students are required to complete CSI:1600 Success at Iowa during the fall semester; students complete part one before participating in an orientation program. The course is designed to help students successfully transition to college life. The course covers information about online tools that are specific to the university, such as MyUI and Iowa Courses Online (ICON), and also discusses resources for navigating life on campus. Additional content includes financial aid literacy, strategies for making healthy behavior choices, sexual assault awareness and prevention, and the comprehensive transitional survey known as MAP-Works.

## General Education Requirements

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| RHET:1030 | Rhetoric | 4 |
| ENGL:1200 | The Interpretation of Literature | 3 |
| World Languages | $0-10$ |  |
| Natural Sciences | 7 |  |
| Quantitative or Formal Reasoning | 3 |  |
| Social Sciences | 3 |  |
| Historical Perspectives | 3 |  |
| Diversity and Inclusion | 3 |  |
| International and Global Issues | 3 |  |
| Literary, Visual, and Performing Arts | 3 |  |
| Values and Culture | 3 |  |
| Sustainability 1 | 0 |  |
| 1 Sustainability courses will count for two core requirements (i.e., for |  |  |
| sustainability and one other approved general education core course |  |  |

in natural, quantitative, and social sciences, or culture, society, and the arts.

## World Languages

Students may complete the world languages requirement using one of the following three options. One year of high school language study is generally equivalent to one semester of college language study.

## Option One

Attain fourth-level proficiency in a single world language, usually by completing four years of that language in high school or four semesters in college or an equivalent combination of high school and college coursework; or pass an achievement test or evaluation at fourth-level proficiency.

## Option Two

Attain second-level proficiency in each of two world languages, usually by completing two years of each language in high school or two semesters of each language in college or an equivalent combination of high school and college coursework; or pass achievement tests and/or evaluations at second-level proficiency in each language. Option two does not fulfill the World Languages requirement for the College of Liberal Arts and Sciences or qualify students to earn credit under the Furthering Language Incentive Program (FLIP).

## Option Three

Attain second-level proficiency in a single world language, usually by completing two years of that language in high school or two semesters of that language in college plus one 3 s.h. course from the GE CLAS Core [p. 19] in International and Global Issues, Values and Culture, or Diversity and Inclusion. Option three does not fulfill the World Languages requirement for the College of Liberal Arts and Sciences or qualify students to earn credit under the Furthering Language Incentive Program (FLIP).

Students may count courses taken to fulfill General Education Requirements toward other requirements for the BA degree.

## Prerequisites for Admission to the College

Students who wish to enter the major in public health after declaring the public health interest through the College of Liberal Arts and Sciences must complete the following by the end of the semester in which they apply before they may enter the major:

- completion of at least $12 \mathrm{~s} . \mathrm{h}$. at the University of Iowa; and
- a cumulative GPA of at least 2.75 in all courses taken at the University of Iowa and in all college-level coursework attempted.

## Public Health Core Courses

Students must complete the following (29-30 s.h.). Only direct admission students complete $\mathrm{CPH}: 1050$ whereas standard admission students do not.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CPH:1050 | College of Public Health Direct <br> Admit Seminar (only direct <br> admission students complete <br> this course) | 1 |
| $\mathrm{CPH}: 1400$ | Fundamentals of Public Health | 3 |
| $\mathrm{CPH}: 1600$ | Public Health Science: Inquiry <br> and Investigation in Public | 3 |
|  | Health |  |

| CPH:1800 | Social and Psychological <br> Determinants of Health: <br> Changing Behavior, Improving <br> Health | 3 |
| :--- | :--- | :---: |
| CPH:2050 | Second Year Undergraduate <br> Public Health Seminar | 1 |
| CPH:2400 | The U.S. Health System in a <br> Global Context | 3 |
| CPH:2600 | Introduction to Public Health <br> Methods | 3 |
| CPH:3050 | Third Year Undergraduate <br> Public Health Seminar | 1 |
| CPH:3400 | Health, Work, and the <br> Environment | 3 |
| CPH:3500 | Global Public Health |  |
| CPH:3700 | Methods for Program <br> Implementation and Evaluation | 3 |
| CPH:4999 | Public Health Capstone: <br> Practice of Evidence-Based <br> Public Health | 3 |

## Requirements

Students complete 19 s.h. as indicated from the following.

| Course \# <br> One of these: | Title | Hours |
| :--- | :--- | ---: |
| BIOL:1140 | Human Biology: Nonmajors | 4 |
| BIOL:1141 | Human Biology: Health <br> Professions | 4 |
| BIOL:1411 | Foundations of Biology | 4 |
| All of these: | Health Economics <br> CPH:3100 <br> Applied Public Health Methods <br> (section 1) | 3 |
| CPH:3600 3800 | Public Health Theories and <br> Society <br> Fundamentals in Public Health <br> Emergency Preparedness and <br> Response | 3 |
|  | Res | 3 |

| One of these: |  | 3 |
| :--- | :--- | :---: |
| ANTH:2100 | Anthropology and <br> Contemporary World Problems | 3 |
| ANTH:2164 | Culture and Healing: An <br> Introduction to Medical <br> Anthropology |  |

| GEOG:3110 | Geography of Health | 3 |
| :--- | :--- | :--- |
| GEOG:4770 | Environmental Justice | 3 |

IS:2000 Introduction to International 3
Studies
JMC:3116 Media and Global Cultures 3
JMC:3150 Media and Health 3
PHIL:2402 Introduction to Ethics 3
POLI:3111 American Public Policy 3
SOC:1022 Social Justice and Social 3

Welfare in the United States
SOC:2810 Social Inequality 3

## Electives

Students complete a minimum of five College of Public Health courses from the following.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| CPH:2200 | Climageddon: Understanding Climate Change and Associated Impacts on Health | 3 |
| CPH:2220 | Building a Healthier Tomorrow: Public Health Methods to Minimize Disease and Pollutant Exposures | 3 |
| CPH:2230 | Finding Patient Zero: The Exploration of Infectious Disease Transmission and Pandemic Threats | 3 |
| CPH:3200 | Death at Work: Case Studies of Workplace Safety and Health | 3 |
| CPH:3210 | Nutrition in Public Health | 3 |
| CPH:3220 | Public Health as a Public Good: Economics and Decision Making in Public Health Systems | 3 |
| CPH:3230 | Human Genetics and Public Health | 3 |
| CPH:3240 | Global Health Today | 1 |
| CPH:4200 | Agriculture, Food Systems, and Sustainability | 3 |
| CPH:4210 | Making a Difference: Public Health Policy and Advocacy | 3 |
| CPH:4220 | Global Road Safety | 3 |
| CPH:4230 | Injury and Violence Prevention | 3 |
| CPH:4250 | Field Experiences in Public Health | 1 |

## Experiential Learning Requirement

Students must successfully complete at least one of these experiences from the following. Second Year Undergraduate Public Health
Seminar (CPH:2050) is strongly recommended prior to enrollment in any of these courses. Contact the undergraduate program office for specific details.

## Research

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CPH:3999 | Undergraduate Research | $0-3$ |
|  | Experience in Public Health |  |
| CPH:4990 | Mentored Independent <br> Undergraduate Research in <br> Public Health | 3 |

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CPH:4750 | Undergraduate Global Learning | $0-3$ |
|  | in Public Health |  |

## Service Learning

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CPH:3750 | Undergraduate Service Learning | 0 |

## BA/CLAS Undergraduate Degree

Students admitted to or enrolled in the BA in public health program may pursue an additional degree in the College of Liberal Arts and Sciences (CLAS). Students pursuing an additional degree outside the College of Public Health are:

- expected to meet all degree requirements, General Education Requirements, and GE CLAS Core requirements for both degree programs;
- required to satisfy the collegiate residence requirements of both colleges;
- assigned two advisors, one in each college; and
- assessed tuition for the primary program of study in accordance with the rules of the Registrar's Office.

Additional considerations:

- Students may be awarded degrees in the two colleges simultaneously or separately without requiring additional coursework beyond the degree requirements.
- Current students enrolled in the College of Public Health who want to add a CLAS major should use the Change of College Application found in MyUI.
- Students who wish to discontinue the additional degree program will need to file a Discontinuation of Combined Degree Program form in the collegiate office of the program of study they are dropping.
Students may change majors with either college in the college academic programs office and still remain in the additional degree program.

## Combined Programs

## BA/Graduate Degree

Combined undergraduate to graduate programs provide an opportunity for students to earn both their BA and a master's degree in five years by beginning to earn graduate credit during their fourth year of undergraduate study.
Students in the combined programs must complete all requirements for each degree. Students apply for admission to the combined program during their third year as undergraduates and enter the program at the beginning of their fourth year.

Applicants also must apply for admission to the master's degree program and must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. For more information, see Undergraduate to Graduate (U2G) on the College of Public Health website.

Public health majors intending to pursue the Undergraduate to Graduate (U2G) combined degree program in public health must complete 120 s.h. Up to 15 s.h. may be earned in graduate credit by the end of a student's fourth year.

Public health majors must complete all of the following requirements in addition to the 15 s.h. of graduate coursework.

## Public Health Major Degree Requirements

Coursework for the following requirements total approximately 60 s.h.:

- public health core courses;
- BA coursework;
- public health elective coursework;
- experiential learning requirement; and
- General Education Requirement courses.

## General Electives

University of Iowa (nonmajor) coursework to total 120 s.h. by end of the fourth year; this could include up to 15 s.h. of graduate credit in public health coursework taken as an undergraduate student.

Graduate courses taken during the fourth year do not count toward major requirements (including public health electives) for the undergraduate public health major. However, these semester hours may count as general elective credits needed to complete the 120 s.h. required for a bachelor's degree.

## Honors

## Honors in the Major

Students majoring in public health have the opportunity to graduate with honors in the major. To graduate with honors in public health, students must successfully complete all college requirements with a grade-point average of at least 3.33 in all courses for the major, in all college coursework, and in all UI coursework.
In addition, students must complete an honors thesis in CPH:4990 Mentored Independent Undergraduate Research in Public Health, where they must write a brief research proposal summarizing background and goals of honors research, defend their research proposal to a honors project faculty member and a honors advisor, conduct research, submit their honors thesis, and conclude with an oral and/or poster presentation.
Outstanding undergraduate students in the college have an opportunity to undertake independent study and to work closely with faculty members. Completion of requirements for honors in the major also will satisfy the experiential learning requirement. Consult the College of Public Health undergraduate program office for more information.

## University of Iowa Honors Program

Public health interest students interested in honors study are encouraged to participate in the University of Iowa Honors Program until they are admitted to the College of Public Health. Visit Honors at Iowa to learn about the university's honors program.
Membership in the UI Honors Program is not a requirement for applying to or graduating with honors in the public health major.

## Admission

Students may be admitted to the College of Public Health either through direct admission or standard admission.

## Direct Admission

Direct admission is designed for students applying to the university as first-year students for the fall semester. Applicants who meet the high school course requirements and present a Regent Admission Index (RAI) of 265 or higher, and a high school grade-point average (GPA) of at least 3.33 are directly admitted to the college. Applicants who meet course requirements and either the RAI or GPA requirement are carefully considered. Students who are denied direct admission may file an online petition for direct admission to the College of Public Health.
Students granted direct admission to the college are eligible to apply for first-year scholarships. The scholarship application process is competitive and is based on high school record and short essay responses.
First-year students not admitted directly to the College of Public Health may be admitted to the College of Liberal Arts and Sciences as a public health interest student.

## Standard and Transfer Admission

University of Iowa students are eligible to apply for standard admission to the College of Public Health, typically after their first year, once they complete prerequisite courses and earn the required GPA.

Application deadline for fall admission is May 1. Application deadline for spring admission is Dec. 1. Students should meet the following requirements by the end of the semester in which they apply:

- completion of at least $12 \mathrm{~s} . \mathrm{h}$. at the University of Iowa; and
- a minimum GPA of 2.75 in all University of Iowa coursework and in all college coursework.

Students who are denied standard admission may file an online appeal for denial of admission to the College of Public Health if they can provide documentation of extenuating circumstances that affected their academic performance.

Transfer students who meet the GPA requirement may apply directly to the College of Public Health through standard admission.

## Career Advancement

The BA program provides knowledge of the community and behavioral aspects of public health for students interested in working in health education, health communication, public health program development, or public health policy in local, federal, or international governmental or nongovernmental agencies. Students will be prepared for advanced education in the social sciences, communication studies, social and community health, health policy and management, and other fields.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

The Four-Year Graduation Plan applies only to students who are directly admitted to the College of Public Health or students who meet the prerequisites and submit an application for standard admission before the third semester begins (including public health interest students).

Before the second semester begins: CPH:1050 College of Public Health Direct Admit Seminar (for direct admits only).

Before the third semester begins: CPH:1400 Fundamentals of Public Health, CPH: 1600 Public Health Science: Inquiry and Investigation in Public Health, and at least one-quarter of the semester hours required for graduation.

Before the fourth semester begins: CPH:2050 Second Year Undergraduate Public Health Seminar and CPH:2600 Introduction to Public Health Methods.

Before the fifth semester begins: one-half of the semester hours required for graduation.

Before the sixth semester begins: CPH:3050 Third Year Undergraduate Public Health Seminar and CPH:3600 Applied Public Health Methods.

Before the seventh semester begins: CPH:3700 Methods for Program Implementation and Evaluation and at least three-quarters of the semester hours required for graduation.

Before the eighth semester begins: all public health core courses, except CPH:4999 Public Health Capstone: Practice of Evidence-Based Public Health, and the experiential learning requirement.

During the eighth semester: all remaining General Education Requirement courses, enrollment in all remaining coursework in the major, including CPH:4999 Public Health Capstone: Practice of Evidence-Based Public Health, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

| a Students complete the experiential learning requirement by choosing an approved option. CPH:2050 is strongly recommended prior to enrollment in experiential learning. |  |  |
| b Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture. |  |  |

c Prerequisite for admission to the College of Public Health.
d Fulfills a major requirement and may fulfill a GE requirement.
e GE courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
f Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
g Choose from: ANTH:2100, ANTH:2164, GEOG:3110, GEOG:4770, IS:2000, JMC:3116, JMC:3150, PHIL:2402, POLI:3111, SOC:1022, SOC:2810.
h Students must complete one of three options: (1) fourth-level proficiency in a single world language, (2) second-level proficiency in two different world languages, or (3) second-level proficiency in a single world language plus an additional 3 s.h. course from the GE CLAS Core in International and Global Issues, Values and Culture, or Diversity and Inclusion.
i Students must complete at least five electives by choosing from approved CPH courses.
j Choose from: CPH:3999, CPH:4990, CPH:4850, CPH:4750, CPH:3750. A completed application and approval by the College of Public Health undergraduate program office are required.
k All core courses must be complete prior to enrollment in CPH:4999.
1 Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Public Health, BS

The Bachelor of Science (BS) degree provides students with a basic understanding of the five core public health knowledge areas: biostatistics, social and behavioral sciences, epidemiology, health policy and management, and occupational and environmental health sciences. Students will be prepared to enter the workforce or continue their education.

A public health core provides the degree with breadth in the biological, social, economic, quantitative, geographic, and educational components of health and health disparities within and across populations. Students complete a cumulative capstone experience during which they will integrate, apply, and synthesize public health knowledge. As an integral part of their education, students also are exposed to public health professionals and agencies.

## Requirements

The Bachelor of Science with a major in public health requires a minimum of 120 s.h., including at least 62 s.h. of work for the major. Students must have a cumulative grade-point average (GPA) of at least 2.00 in all courses for the major and in all UI courses for the major; in all college coursework and in all UI coursework; and in all college coursework in public health and in all UI public health coursework, including any courses administered by the College of Public Health in the Departments of Biostatistics, Community and Behavioral Health, Epidemiology, Health Management and Policy, and Occupational and Environmental Health. Students are required to earn a minimum of 30 s.h. in public health coursework at the University of Iowa.

The BS with a major in public health requires the following coursework.

## College Success Requirement

All students are required to complete CSI:1600 Success at Iowa during the fall semester; students complete part one before participating in an orientation program. The course is designed to help students successfully transition to college life. The course covers information about online tools that are specific to the university, such as MyUI and Iowa Courses Online (ICON), and also discusses resources for navigating life on campus. Additional content includes financial aid literacy, strategies for making healthy behavior choices, sexual assault awareness and prevention, and the comprehensive transitional survey known as MAP-Works.

## General Education Requirements

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| RHET:1030 | Rhetoric | 4 |
| ENGL:1200 | The Interpretation of Literature | 3 |
| World Languages |  | $0-10$ |
| Natural Sciences | 7 |  |
| Quantitative or Formal Reasoning | 3 |  |
| Social Sciences | 3 |  |
| Historical Perspectives | 3 |  |
| Diversity and Inclusion | 3 |  |
| International and Global Issues | 3 |  |
| Literary, Visual, and Performing Arts | 3 |  |
| Values and Culture | 3 |  |
| Sustainability 1 | 0 |  |
| 1 Sustainability courses will count for two core requirements (i.e., for |  |  |
| sustainability and one other approved general education core course |  |  |

in natural, quantitative, and social sciences, or culture, society, and the arts.

## World Languages

Students may complete the world languages requirement using one of the following three options. One year of high school language study is generally equivalent to one semester of college language study.

## Option One

Attain fourth-level proficiency in a single world language, usually by completing four years of that language in high school or four semesters in college or an equivalent combination of high school and college coursework; or pass an achievement test or evaluation at fourth-level proficiency.

## Option Two

Attain second-level proficiency in each of two world languages, usually by completing two years of each language in high school or two semesters of each language in college or an equivalent combination of high school and college coursework; or pass achievement tests and/or evaluations at second-level proficiency in each language. Option two does not fulfill the World Languages requirement for the College of Liberal Arts and Sciences or qualify students to earn credit under the Furthering Language Incentive Program (FLIP).

## Option Three

Attain second-level proficiency in a single world language, usually by completing two years of that language in high school or two semesters of that language in college plus one 3 s.h. course from the GE CLAS Core [p. 19] in International and Global Issues, Values and Culture, or Diversity and Inclusion. Option three does not fulfill the World Languages requirement for the College of Liberal Arts and Sciences or qualify students to earn credit under the Furthering Language Incentive Program (FLIP).

Students may count courses taken to fulfill General Education Requirements toward other requirements for the BS.

## Prerequisites for Admission to the College

Students who wish to enter the major in public health after declaring the public health interest through the College of Liberal Arts and Sciences must complete the following by the end of the semester in which they apply before they may enter the major:

- completion of at least $12 \mathrm{~s} . \mathrm{h}$. at the University of Iowa; and
- a cumulative GPA of at least 2.75 in all courses taken at the University of Iowa and in all college-level coursework attempted.

## Public Health Core Courses

Students must complete the following (29-30 s.h.). Only direct admission students complete $\mathrm{CPH}: 1050$ whereas standard admission students do not.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CPH:1050 | College of Public Health Direct <br> Admit Seminar (only direct <br> admission students complete <br> this course) | 1 |
| $\mathrm{CPH}: 1400$ | Fundamentals of Public Health | 3 |
| $\mathrm{CPH}: 1600$ | Public Health Science: Inquiry <br> and Investigation in Public | 3 |

$\left.\begin{array}{llr}\text { CPH:1800 } & \begin{array}{l}\text { Social and Psychological } \\ \text { Determinants of Health: } \\ \text { Changing Behavior, Improving }\end{array} & 3 \\ \text { Health }\end{array} \quad 1 \begin{array}{l} \\ \text { CPH:2050 }\end{array} \begin{array}{l}\text { Second Year Undergraduate } \\ \text { Public Health Seminar }\end{array}\right) 3$

## Requirements

Students complete 22-23 s.h. as indicated from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| BIOL:1411 | Foundations of Biology | 4 |
| BIOL:1412 | Diversity of Form and Function | 4 |

## BS/CLAS Undergraduate Degree

Students admitted to or enrolled in the BS in public health program may pursue an additional degree in the College of Liberal Arts and Sciences (CLAS). Students pursuing an additional degree outside the College of Public Health are:

- expected to meet all degree requirements, General Education Requirements, and GE CLAS Core requirements for both degree programs;
- required to satisfy the collegiate residence requirements of both colleges;
- assigned two advisors, one in each college; and
- assessed tuition for the primary program of study in accordance with the rules of the Registrar's Office.

Additional considerations:

- Students may be awarded degrees in the two colleges simultaneously or separately without requiring additional coursework beyond the degree requirements.
- Current students enrolled in the College of Public Health who want to add a CLAS major should use the Change of College Application found in MyUI.
- Students who wish to discontinue the additional degree program will need to file a Discontinuation of Combined Degree Program form in the collegiate office of the program of study they are dropping.

Students may change majors with either college in the college academic programs office and still remain in the additional degree program.

## Combined Programs

## BS/Graduate Degree

Combined undergraduate to graduate programs provide an opportunity for students to earn both their BS and a master's degree in five years by beginning to earn graduate credit during their fourth year of undergraduate study.
Students in the combined programs must complete all requirements for each degree. Students apply for admission to the combined program during their third year as undergraduates and enter the program at the beginning of their fourth year.
Applicants also must apply for admission to the master's degree program and must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. For more information, visit Undergraduate to Graduate (U2G) on the College of Public Health website.

Public health majors intending to pursue the U2G combined degree program in public health must complete 120 s.h. Up to 15 s.h. may be earned in graduate credit by the end of a student's fourth year.

Public health majors must complete all of the following requirements in addition to the $15 \mathrm{~s} . \mathrm{h}$. of graduate coursework.

## Public Health Major Degree Requirements

- Public health core courses;
- BS coursework;
- public health elective coursework;
- experiential learning requirement; and
- General Education Requirement courses.

## General Electives

University of Iowa (nonmajor) coursework to total 120 s.h. by end of the fourth year; this could include up to 15 s.h. of graduate credit in public health coursework taken as an undergraduate student.
Graduate courses taken during the fourth year do not count toward major requirements (including public health electives) for the undergraduate public health major. However, these semester hours may count as general elective credits needed to complete the 120 s.h. required for a bachelor's degree.

## Honors

## Honors in the Major

Students majoring in public health have the opportunity to graduate with honors in the major. To graduate with honors in public health, students must successfully complete all college requirements with a
grade-point average of at least 3.33 in all courses for the major, in all college coursework, and in all UI coursework.

In addition, students must complete an honors thesis in CPH:4990 Mentored Independent Undergraduate Research in Public Health, where they must write a brief research proposal summarizing background and goals of honors research, defend their research proposal to a honors project faculty member and a honors advisor, conduct research, submit their honors thesis, and conclude with an oral and/or poster presentation.

Outstanding undergraduate students in the college have an opportunity to undertake independent study and to work closely with faculty members. Completion of requirements for honors in the major also will satisfy the experiential learning requirement. Consult the College of Public Health undergraduate program office for more information.

## University of Iowa Honors Program

Public health interest students interested in honors study are encouraged to participate in the University of Iowa Honors Program until they are admitted to the College of Public Health. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not a requirement for applying to or graduating with honors in the public health major.

## Admission

Students may be admitted to the College of Public Health either through direct admission or standard admission.

## Direct Admission

Direct admission is designed for students applying to the university as first-year students for the fall semester. Applicants who meet the high school course requirements and present a Regent Admission Index (RAI) of 265 or higher, and a high school grade-point average (GPA) of at least 3.33 are directly admitted to the college. Applicants who meet course requirements and either the RAI or GPA requirement are carefully considered. Students who are denied direct admission may file an online petition for direct admission to the College of Public Health.

Students granted direct admission to the college are eligible to apply for first-year scholarships. The scholarship application process is competitive and is based on high school record and short essay responses.

First-year students not admitted directly to the College of Public Health may be admitted to the College of Liberal Arts and Sciences as a public health interest student.

## Standard and Transfer Admission

University of Iowa students are eligible to apply for standard admission to the College of Public Health, typically after their first year, once they complete prerequisite courses and earn the required GPA.

Application deadline for fall admission is May 1. Application deadline for spring admission is Dec. 1. Students should meet the following requirements by the end of the semester in which they apply:

- completion of at least $12 \mathrm{~s} . \mathrm{h}$. at the University of Iowa; and
- a minimum GPA of 2.75 in all University of Iowa coursework and in all college coursework.

Students who are denied standard admission may file an online appeal for denial of admission to the College of Public Health if they can provide documentation of extenuating circumstances that affected their academic performance.

Transfer students who meet the GPA requirement may apply directly to the College of Public Health through standard admission.

## Career Advancement

The BS program provides knowledge of the natural sciences for students interested in working in a research setting or preparing for advanced study in programs such as biostatistics, dentistry, environmental health, epidemiology, medicine, nursing, occupational health, pharmacy, or veterinary medicine.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

The Four-Year Graduation Plan applies only to students who are directly admitted to the College of Public Health or students who meet the prerequisites and submit an application for standard admission before the third semester begins (including public health interest students).

Before the second semester begins: CPH:1050 College of Public Health Direct Admit Seminar (for direct admits only).

Before the third semester begins: CPH:1400 Fundamentals of Public Health, CPH: 1600 Public Health Science: Inquiry and Investigation in Public Health, and at least one-quarter of the semester hours required for graduation.
Before the fourth semester begins: CPH:2050 Second Year Undergraduate Public Health Seminar and CPH:2600 Introduction to Public Health Methods.

Before the fifth semester begins: one-half of the semester hours required for graduation.
Before the sixth semester begins: CPH:3050 Third Year Undergraduate Public Health Seminar and CPH:3600 Applied Public Health Methods.

Before the seventh semester begins: CPH:3700 Methods for Program Implementation and Evaluation and at least three-quarters of the semester hours required for graduation.

Before the eighth semester begins: all public health core courses, except CPH:4999 Public Health Capstone: Practice of Evidence-Based Public Health, and the experiential learning requirement.
During the eighth semester: all remaining General Education Requirement courses, enrollment in all remaining coursework in the major, including CPH:4999 Public Health Capstone: Practice of Evidence-Based Public Health, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students complete the experiential learning requirement by choosing an approved option. CPH:2050 is strongly recommended prior to enrollment in experiential learning.
b Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture. c Prerequisite for admission to the College of Public Health.
d Fulfills a major requirement and may fulfill a GE requirement.
e Enrollment in chemistry courses requires completion of a placement exam.
f GE courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
g Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
h Enrollment in math courses requires completion of a placement exam.
i Students must complete one of three options: (1) fourth-level proficiency in a single world language, (2) second-level proficiency
in two different world languages, or (3) second-level proficiency in a single world language plus an additional 3 s.h. course from the GE CLAS Core in International and Global Issues, Values and Culture, or Diversity and Inclusion.
j Students must complete at least four electives by choosing from approved CPH courses.
k Choose from: CPH:3999, CPH:4990, CPH:4850, CPH:4750, CPH:3750. A completed application and approval by the College of Public Health undergraduate program office are required.
1 All core courses must be complete prior to enrollment in CPH:4999. mPlease see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Public Health, Undergraduate Certificate

## Requirements

The undergraduate Certificate in Public Health requires 18 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in work for the certificate. They should contact the certificate coordinator to complete a plan of study before they begin certificate coursework.

The certificate is intended for non-public health majors and anyone interested in obtaining knowledge about public health concepts to enhance their ability to succeed in their chosen field. Students completing the certificate will have an understanding of emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, and the changing health care system in the United States.

The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a graduate or professional degree program, except for those students who are earning a BA or BS with a major in public health or by those who have received one of those degrees.

The undergraduate Certificate in Public Health requires the following coursework. Fundamentals of Public Health (CPH:1400) must be taken prior to or concurrent with other certificate courses.

## Core Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Fundamentals of Public Health | 3 |
| CPH:1400 | Public Health Science: Inquiry <br> and Investigation in Public <br> CPH:1600 | 3 |

## Master of Public Health, MPH

The Master of Public Health (MPH) is recognized as the primary professional degree in public health. The objective of Iowa's MPH program is to provide education and practical training in public health to students who will be leaders in their respective communities. The program is appropriate for individuals who already have professional experience and/or training in public health as well as for those whose expertise lies outside of public health.

Students may earn the Master of Public Health (MPH) as a single degree, or they may pursue one of several combined degree programs. The College of Public Health offers combined MPH/professional degree programs with the Carver College of Medicine and the Colleges of Law and Pharmacy. It also offers two programs in collaboration with the College of Veterinary Medicine at Iowa State University. See "MPH/DVM (Iowa State University)" and descriptions of the combined degree programs under Combined Programs [p. 1969] in this section of the catalog.

Undergraduate students can pursue an MPH degree in the following subprograms: biostatistics, community and behavioral health, epidemiology, occupational and environmental health, or policy. Undergraduate students work with their undergraduate advisor and the College of Public Health Undergraduate to Graduate (U2G) coordinator to determine eligibility. In addition, the College of Public Health collaborates with other private colleges in Iowa to offer bachelor's degrees and Master of Public Health programs for undergraduate students who would like to earn an MPH degree.

The Master of Public Health program is offered by the College of Public Health; the degree is awarded by the Graduate College.

## Learning Outcomes

For further information regarding MPH subprogram learning outcomes, visit MPH Programs of Study on the Master of Public Health website.

## MPH Foundational Public Health Knowledge

Students will be able to:

- explain public health history, philosophy, and values;
- identify the core functions of public health and the 10 essential services;
- explain the role of quantitative and qualitative methods and sciences in describing and assessing a population's health;
- list major causes and trends of morbidity and mortality in the United States or other community relevant to the school or program;
- discuss the science of primary, secondary, and tertiary prevention in population health, including health promotion, screening, etc.;
- explain the critical importance of evidence in advancing public health knowledge;
- explain effects of environmental factors on a population's health;
- explain biological and genetic factors that affect a population's health;
- explain behavioral and psychological factors that affect a population's health;
- explain the social, political, and economic determinants of health and how they contribute to population health and health inequities;
- explain how globalization affects global burdens of disease; and
- explain an ecological perspective on the connections among human health, animal health, and ecosystem health (e.g., One Health).

## MPH Foundational Competencies

Students will be able to:

- apply epidemiological methods to the breadth of settings and situations in public health practice;
- select quantitative and qualitative data collection methods appropriate for a given public health context;
- analyze quantitative and qualitative data using biostatistics, informatics, computer-based programming, and software, as appropriate;
- interpret results of data analysis for public health research, policy, or practice;
- compare the organization, structure, and function of health care, public health, and regulatory systems across national and international settings;
- discuss the means by which structural bias, social inequities, and racism undermine health and create challenges to achieving health equity at organizational, community, and societal levels;
- assess population needs, assets, and capacities that affect communities' health;
- apply awareness of cultural values and practices to the design or implementation of public health policies or programs;
- design a population-based policy, program, project, or intervention;
- explain basic principles and tools of budget and resource management;
- select methods to evaluate public health programs;
- discuss multiple dimensions of the policy-making process, including the roles of ethics and evidence;
- propose strategies to identify stakeholders and build coalitions and partnerships for influencing public health outcomes;
- advocate for political, social, or economic policies and programs that will improve health in diverse populations;
- evaluate policies for their impact on public health and health equity;
- apply principles of leadership, governance, and management, which include creating a vision, empowering others, fostering collaboration, and guiding decision-making;
- apply negotiation and mediation skills to address organizational or community challenges;
- select communication strategies for different audiences and sectors;
- communicate audience-appropriate public health content, both in writing and through oral presentation;
- describe the importance of cultural competence in communicating public health content;
- perform effectively on interprofessional teams; and
- apply systems-thinking tools to a public health issue.

## Requirements

The Master of Public Health requires 42 s.h. of graduate credit. Students must choose one of the following subprograms: biostatistics [p. 1965], community and behavioral health [p. 1966], epidemiology [p. 1966], occupational and environmental health [p. 1967], policy [p. 1968], practicing veterinarians [p. 1968], or professional [p. 1968].
Degree requirements include a core course in public health practice and in each of the five core disciplines of public health (biostatistics, epidemiology, environmental health, health policy and management, and social and behavioral sciences), a set of content-specific required courses and electives, one interprofessional education course, an
applied practice experience, and a capstone experience. Students in the epidemiology subprogram must complete a bioscience course.
All MPH students complete the coursework listed under "Common Requirements." In addition, students complete the coursework listed for their chosen subprogram.

## Common Requirements

The following coursework is required for all MPH students. Students must earn a B-minus or higher in each core course. Students may repeat courses to achieve this standard.

## Core Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these (18 s.h.): |  | 3 |
| CPH:5100 | Introduction to Public Health | 3 |
| BIOS:4120 | Introduction to Biostatistics <br> (students in the biostatistics <br> subprogram may substitute <br> BIOS:5710) | 3 |
| CBH:4105 | Introduction to Health <br> Promotion and Disease <br> Prevention | Epidemiology I: Principles |
| HMP:4000 | Introduction to the U.S. Health <br> Care System (students in <br> the policy subprogram may <br> substitute HMP:5005) | 3 |
| OEH:4240 | Global Environmental Health |  |

## Interprofessional Education Course

This course is required for all MPH students. Students in a combined degree program (i.e., MPH/MD, MPH/PharmD, MPH/DVM) or the professional subprogram will have this requirement waived since the content is covered in pharmacy, medicine, or veterinary courses, or professional experience prior to enrollment in the MPH program.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| This course: |  |  |
| CPH:5203 | Interprofessional Education and | 0 |

## Applied Practice Experience

This requirement is a fieldwork experience in which students show proficiency in applying academic principles in community settings.
There are many applied practice opportunities for MPH students locally, nationally, and internationally.
Before students register for and begin the applied practice experience, they choose an approved topic. A final written report with an oral presentation or a poster presentation is required.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | MPH Applied Practice <br> Experience | 2 |

## Capstone Experience

Students are required to complete the capstone experience in their final semester.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| CPH:7200 | MPH Capstone Experience | 1 |

## Subprograms

## Biostatistics Subprogram

The Master of Public Health with the biostatistics subprogram requires 42 s.h. of graduate credit. The subprogram is offered by the Department of Biostatistics [p. 1979].
The subprogram is designed to train public health professionals who can provide leadership in the analysis of public health data and the design of studies for public health investigations. It is intended for individuals who are interested in public health and who have quantitative ability but not advanced mathematics training.

Applicants to the subprogram must meet all MPH admission requirements; see Admission [p. 1970] in this section of the catalog. They also should have a cumulative grade-point average of at least 3.00 and should have completed the following math and computer science coursework: single variable calculus and matrix algebra, satisfied by one semester of calculus equivalent to AP Calculus AB and a high school algebra course involving matrices; and elementary computer programming instruction in any commonly used modern programming language (e.g., Python, Java, C++). Individuals who are admitted to the subprogram without having met all of these requirements must satisfy unmet requirements during their first semester of enrollment in the program.

In addition to the MPH coursework listed under "Common Requirements" above, the biostatistics subprogram requires the following courses.

## Biostatistics Subprogram Core

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these (8 s.h.): | Data Science Foundations in R | 2 |
| BIOS:4510 | Regression Modeling and <br> ANOVA in the Health Sciences | 3 |
| BIOS:5130 | Applied Categorical Data <br> Analysis | 3 |

Students with sufficient mathematical background can substitute BIOS:5710 Biostatistical Methods I, BIOS:5720 Biostatistical Methods II, and BIOS:5730 Biostatistical Methods in Categorical Data in place of BIOS:4120 Introduction to Biostatistics, BIOS:5120 Regression Modeling and ANOVA in the Health Sciences, and BIOS:5130 Applied Categorical Data Analysis. The advanced sequence requires 2 s.h. of fewer elective credits.

## Biostatistics Electives

Electives ( $13 \mathrm{~s} . \mathrm{h}$.) may be chosen from the following list and may include any related course approved by the student's advisor.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BIOL:4213 | Bioinformatics | 4 |
| BIOS:6210 | Applied Survival Analysis | 3 |
| BIOS:6310 | Introductory Longitudinal Data | 3 |
|  | Analysis |  |
| BIOS:6420 | Survey Design and Analysis | 3 |
| BIOS:6610 | Statistical Methods in Clinical | 3 |
|  | Trials |  |
| BIOS:6650 | Causal Inference | 3 |
| BIOS:6720 | Statistical Machine Learning for | 3 |
|  | Biomedical and Public Health |  |
| BIOS:6810 | Data | 3 |
| BIOS:7270 | Bayesian Methods and Design | 1 |

| BIOS:7600 | Advanced Biostatistics Seminar | $0-3$ |
| :--- | :--- | ---: |
| CS:4470 | Health Data Analytics | 3 |
| CS:4740 | Large Data Analysis | 3 |
| CS:5110 | Introduction to Informatics | 3 |
| DATA:6200 | Predictive Analytics | 3 |
| EPID:5200 | Principles of Public Health | 3 |
|  | Informatics | 2 |
| EPID:6920 | Applied Administrative Data |  |
|  | Analysis | 3 |
| ISE:4172 | Big Data Analytics | 3 |
| STAT:3100 | Introduction to Mathematical |  |
|  | Statistics I | 3 |
| STAT:3101 | Introduction to Mathematical |  |
|  | Statistics II | 3 |
| STAT:3210 | Experimental Design and |  |
|  | Analysis | 3 |
| STAT:4100 | Mathematical Statistics I | 3 |
| STAT:4101 | Mathematical Statistics II | 3 |

| STAT:4540 | Statistical Learning | 3 |
| STAT:4580 | Data Visualization and Data |  |
|  | Technologies |  |

## Community and Behavioral Health Subprogram

The Master of Public Health with the community and behavioral health subprogram requires 42 s.h. of graduate credit. The subprogram is offered by the Department of Community and Behavioral Health [p. 1989].

The subprogram prepares public health practitioners for a variety of positions related to community development, health program implementation, and health education. Students learn how to design, implement, and evaluate evidence-based interventions directed toward identified public health problems in populations.

A bachelor's degree in the social and behavioral sciences is good preparation for this program, but students come from a variety of educational backgrounds. Preference is given to applicants who have professional experience.

In addition to the MPH coursework listed under "Common Requirements" above, the community and behavioral health subprogram requires the following courses.

## Community and Behavioral Health Subprogram Core

Students earn 18 s.h. in the required subprogram core.

## Theory

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Health Behavior and Health <br> EBH:5220 | Education |

## Community and Society

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Health Equity, Disparities, and | 3 |
| CBH:6230 | Social Justice |  |

## Intervention

| Course \# <br> One of these: | Title | Hours |
| :--- | :--- | ---: |
| CBH:6205 | Designing and Implementing <br> Interventions | 3 |
| CBH:6220 | Health Communication <br> Campaigns | 3 |
| Methods | Title | Hours |
| Course \# |  |  |
| Both of these: <br> CBH:5305 | Evaluation: Approaches and <br> Applications | 3 |
| CBH:6335 | Research Methods in <br> Community and Behavioral <br> Health | 3 |
| One of these: | Community-Based Participatory <br> CBH:5235 | Research |
| CBH:5310 | Qualitative Research for Public <br> Health | 3 |

## Community and Behavioral Health Electives

Students must take an additional 3 s.h. of elective community and behavioral health coursework or, with the approval of their advisor, they can select coursework in another area. In addition, once the 18 s.h. of required community and behavioral health credit is met, students may take any of the other courses as electives.

The following is a list of suggested elective courses.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| CBH:4140 | Feminist Activism and Global Health | 3 |
| CBH:5350 | Foundations of Maternal and Child Health | 3 |
| CBH:5435 | Substance Abuse Prevention and Early Intervention | 3 |
| CBH:5440 | Prevention and Early Intervention of Mental Health Disorders | 3 |
| CBH:6115 | Ethnographic Field Methods | 3 |
| CBH:6405 | Global Maternal, Newborn, and Child Health | 3 |
| CBH:6415 | Independent Study in Community and Behavioral Health | arr. |
| HMP:6360 | Nonprofit Organizational Effectiveness I | 3 |
| SOC:6420 | Seminar: Selected Topics in Deviance and Control | 3 |
| URP:6253 | Designing Sustainable and Healthy Cities | 1-3 |
| URP:6260 | Transportation Policy and Planning | 3 |

## Epidemiology Subprogram

The Master of Public Health with the epidemiology subprogram requires 42 s.h. of graduate credit. The subprogram is offered by the Department of Epidemiology [p. 1996].

The subprogram focuses on fundamental epidemiological concepts and methods and provides training in the use of public health data and methods for disease assessment and in methods for evaluating
the need and outcome of programs and interventions. Graduates of the program work in public health departments and other health care settings.

Epidemiology subprogram students are required to attend departmental seminars and journal club. They also must present one scientific poster at an international, national, regional, state, university, or departmental poster session.
In addition to the MPH coursework listed under "Common Requirements" above, the epidemiology subprogram requires the following courses.
Epidemiology Subprogram Core

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these (15 s.h.): |  |  |
| EPID:5241 | Statistical Methods in Epidemiology | 4 |
| EPID:5925 | Epidemiology Journal Club: Evaluating the Literature (taken three times) | 0 |
| EPID:5540 | Public Health Surveillance Mechanisms, Applications, and Data | 3 |
| EPID:5580 | Public Health Laboratory Techniques | 1 |
| EPID:5600 | Introduction to Epidemiology Data Management and Analysis | 3 |
| EPID:6400 | Epidemiology II: Advanced Methods | 4 |
| Bioscience-one of these (3-4 s.h.): |  |  |
| PATH:5270 | Pathogenesis of Major Human Diseases | 3 |
| PATH:8133 | Introduction to Human Pathology for Graduate Students | 3-4 |

Students who already have completed a course equivalent to one of the bioscience courses, PATH:5270 Pathogenesis of Major Human Diseases or PATH:8133 Introduction to Human Pathology for Graduate Students, may substitute an additional elective.

## Epidemiology Electives

Additional approved elective coursework must be taken to complete the 42 s.h. total required for the MPH. At least 3 s.h. of elective credit must be earned in courses offered by the Department of Epidemiology (prefix EPID) or in one of the following biostatistics courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BIOS:6210 | Applied Survival Analysis | 3 |
| BIOS:6310 | Introductory Longitudinal Data | 3 |

## Epidemiology Other Requirements

Department of Epidemiology Seminar
Every week during the academic year, the Department of Epidemiology seminar provides a forum for speakers to present information or research pertaining to diverse topics in epidemiology. Contact information for the seminar coordinators is located on the Department of Epidemiology website under Preceptorship, Journal Club, and Seminar Contacts. Information about the schedule is distributed weekly each semester. Students are expected to achieve at least $80 \%$ attendance at the seminar during each semester of enrollment.

## Journal Club for First-Year Students

Journal Club for first-year students is for those who are new to the department and is offered in the fall semester. The focus is for
students to gain experience in reading, interpreting, and critically evaluating recently published journal articles. Students should register for section 1 of EPID:5925 Epidemiology Journal Club: Evaluating the Literature.

## Journal Club

Every other week during the academic year, the Journal Club meets to discuss articles of interest in the field. Contact information for the Journal Club coordinators can be found on the Department of Epidemiology website under Preceptorship, Journal Club, and Seminar Contacts. Information about the schedule is distributed to students each semester. Students are required to achieve at least $80 \%$ attendance at Journal Club for three semesters during their time in the program.

## Occupational and Environmental Health Subprogram

The Master of Public Health with the occupational and environmental health subprogram requires 42 s.h. of graduate credit. The subprogram is offered by the Department of Occupational and Environmental Health [p. 2025].
The subprogram provides students with a broad perspective on public health and career preparation for a variety of professional positions in occupational and environmental health. Public health experience provides desirable background for this subprogram.
In addition to the MPH coursework listed under "Common Requirements" above, the occupational and environmental health subprogram requires the following courses.

## Occupational and Environmental Health Subprogram Core

Students earn 13 s.h. in the required subprogram core.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these (4 s.h.): |  | $0-1$ |
| OEH:5010 | Occupational and <br> Environmental Health Seminar <br> (taken three times; twice for 0 <br> s.h. and once for 1 s.h.) |  |
| OEH:5620 | Occupational Health | 3 |
| Three of these (9 s.h.): | Global Water and Health | 3 |
| OEH:4260 | Injury and Violence Prevention | 3 |
| OEH:4510 | Occupational Safety | 3 |
| OEH:5410 6110 | Rural Health and Agricultural <br> Medicine | 3 |
| OEH:6710 | Human Toxicology and Risk <br> Assessment | 3 |

## Occupational and Environmental Health Electives

Students can earn the remainder of credit for their degree in elective courses ( $8 \mathrm{~s} . \mathrm{h}$.) offered by a department in the College of Public Health.

The following is a list of suggested elective courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| OEH:4260 | Global Water and Health | 3 |
| OEH:4310 | Occupational Ergonomics: | 3 |
| OEH:4510 | Principles | 3 |
| OEH:4530 | Injury and Violence Prevention | 3 |
| OEH:5410 | Global Road Safety | 3 |

| OEH:6110 | Rural Health and Agricultural <br> Medicine | 3 |
| :--- | :--- | ---: |
| OEH:6120 | Current Topics in Agriculture <br> and Rural Health | $0-1$ |
| OEH:6420 | Methods in Exposure Science | 3 |
| OEH:6431 | Assessing Noise Hazards | 1 |
| OEH:6432 | Assessing Nonionizing <br> Radiation Hazards | 1 |
| OEH:6433 | Assessing Ionizing Radiation <br> Hazards | 1 |
| OEH:6520 | Injury Epidemiology | 3 |
| OEH:6710 | Human Toxicology and Risk <br> Assessment | 3 |

## Policy Subprogram

The Master of Public Health with the policy subprogram requires 42 s.h. of graduate credit. The subprogram is offered by the Department of Health Management and Policy [p. 2010].

The subprogram offers coursework and applied learning experiences that prepare students for careers in health policy analysis, system and organizational planning, and program evaluation. Graduates of the program find positions in federal, state, and local government; professional associations; and private agencies. Varied academic backgrounds are appropriate preparation for this program, including business, liberal arts and sciences, and the health professions.

In addition to the MPH coursework listed under "Common Requirements" above, the policy and administration subprogram requires the following courses. Policy subprogram students may count either HMP:5005 Introduction to Healthcare Organization and Policy or HMP:4000 Introduction to the U.S. Health Care System for the "Common Requirements."

## Policy Subprogram Core

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| HMP:5610 | Health Policy | 3 |
| HMP:5650 | Health Policy Analysis | 3 |
| HMP:6610 | Legal Aspects of Healthcare | $2-3$ |
| HMP:6750 | Seminar in Health Policy | 3 |

## Policy Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least 9 s.h. chosen | from these: |  |
| HMP:5310 | Healthcare Quality Management | $2-3$ |
| HMP:5410 | Health Economics I | 3 |
| HMP:5450 | Health Insurance and Managed | 3 |
|  | Care |  |
| HMP:5750 | Medicare and Medicaid Policy | 3 |
| HMP:6710 | Federalism and Health Policy | 3 |
| LAW:8562 | Health Law | 3 |
| HMP:6850 | Independent Study and | arr. |
|  | Research |  |
| POLI:3100 | American State Politics | 3 |

## Practicing Veterinarians Subprogram

The Master of Public Health with the practicing veterinarians subprogram requires a minimum of 42 s.h. of graduate credit. The program is presented through a collaboration between the University of Iowa College of Public Health and the College of Veterinary Medicine at Iowa State University and is offered primarily by distance learning. It enables students to prepare for new career opportunities and equips them to respond to public health challenges such as
zoonotic diseases, food security and foodborne illnesses, bioterrorism, and environmental health.

Students participate in two summer institutes, one on each campus during consecutive summers (two weeks in May or June); the rest of the program is online and students may complete requirements at times that fit their schedules. Specific courses are required each semester of the program.
In addition to the MPH coursework listed under "Common Requirements" above, the practicing veterinarians subprogram requires the following courses.

## Practicing Veterinarians Subprogram Core

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these (21 s.h.): |  | 3 |
| CPH:6700 | Public Health Emergency <br> Preparedness for Veterinarians <br> and Other Public Health <br> Disciplines |  |
| EPID:5300 | Food Safety | 3 |
| EPID:5470 | Applied Veterinary <br> Epidemiology/Biostatistics | 3 |
| EPID:5540 | Public Health Surveillance <br> Mechanisms, Applications, and | 3 |
| EPID:5550 | Data |  |
| EPID:5570 | Diagnostic Microbiology for <br> Epidemiology <br> OEH:6110 | Zoonotic Diseases |
|  | Rural Health and Agricultural <br> Medicine | 3 |
|  |  | 3 |

## Professional Subprogram

The Master of Public Health with the professional subprogram is an individually defined concentration. Students and their advisor(s) identify courses to expand on foundational knowledge and skills, and define a set of competencies and corresponding assessments for the individual student's plan of study. The professional subprogram includes the following student populations: individuals who have already earned a professional degree and students enrolled in a combined program (MPH/MD or MPH/PharmD) [p. 1969].

Individuals who have already earned a professional degree may choose to complete the MPH professional subprogram, allowing greater flexibility in elective course selection. Typically, students who pick this subprogram are fellows, medical residents, practicing nurses, or physicians. Completion of the subprogram can enhance physicians' ability to receive primary certification from the American Board of Preventive Medicine. Physicians who are considering this certification should review the Become Certified requirements on the American Board of Preventive Medicine website. Students may take core courses on campus or online, accommodating a variety of schedules. Students work closely with their advisor to develop a plan of study that is tailored to their specific background and goals.

In addition to the MPH coursework listed under "Common Requirements" above, the professional subprogram requires the following courses.

## Professional Subprogram Core

The professional subprogram core requires 9 s.h. of coursework that expands on foundational knowledge and skills. Courses must be approved after discussion with the student's advisor.

## Professional Electives

Students earn the remainder of credit for their degree ( 12 s.h.) in elective courses offered by the College of Public Health. Additional
graduate courses may be eligible to count as electives but must be preapproved.

## Combined Programs <br> MPH (Policy Subprogram)/JD

The combined Master of Public Health with a policy subprogram/Juris Doctor requires a minimum of 30 s.h. of graduate credit in addition to the requirements for the JD degree. A total of 12 s.h. from the JD degree will count toward the 42 s.h. required to earn the MPH degree. The program helps students develop special expertise in public health legal issues. It is designed to train qualified students for leadership roles in both the public and private sectors.

Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the combined degree program.

The combined MPH (policy subprogram)/JD requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| HMP:5610 | Health Policy | $1-3$ |
| HMP:5650 | Health Policy Analysis | 3 |
| HMP:6610 | Legal Aspects of Healthcare | $2-3$ |
| HMP:6750 | Seminar in Health Policy | $2-3$ |

These courses count toward both degrees.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| LAW:8467 | Family Law | 3 |
| LAW:8562 | Health Law | 3 |
| LAW:8753 | Nonprofit Organizations: | 3 |
|  | Structure, Governance, and |  |
| LAW:8755 | Strategy | 3 |
|  | Nonprofit Organizations: <br> Advocacy, Collaboration, and <br> Fundraising |  |

## MPH (Policy Subprogram)/JD Common Requirements

Students must complete courses listed as "Common
Requirements" (core courses and practicum) under Master of Public Health Requirements [p. 1964] in this section of the catalog.

## JD Requirements

Students in the combined MPH (policy subprogram)/JD degree program must complete the curriculum of the JD program; see Juris Doctor, JD [p. 1720] (College of Law) in the catalog. Students must be enrolled in the College of Law to take College of Law courses.

## MPH/MD

The combined Master of Public Health/Doctor of Medicine requires a minimum of 30 s.h. of graduate credit in addition to the requirements for the MD degree. A total of $12 \mathrm{~s} . \mathrm{h}$. from the MD degree will count toward the 42 s.h. required to earn the MPH degree. Students who complete the program enjoy expanded career opportunities and are well prepared to apply the principles of medicine and public health in their work.

Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the combined program.

The combined MPH/MD requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Public Health Emergency <br> Preparedness for Veterinarians <br> and Other Public Health <br> Disciplines | 3 |
| OEH:6700 | Rural Health and Agricultural <br> Medicine | 3 |
| One of these: | Introduction to Clinical <br> EPidemiology <br> EPID | Pharmacoepidemiology and <br> Comparative Effectiveness <br> Research |

All of the following courses count toward the MD degree; 12 s.h. from these count toward the MPH degree.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| MED:8121 | Clinical and Professional Skills | 3 |
|  | I |  |
| MED:8122 | Medicine and Society I | 3 |
| MED:8132 | Medicine and Society II | 4 |
| MED:8222 | Medicine and Society III | 4 |

## MPH/MD Common Requirements

Students must complete courses listed as "Common
Requirements" (core courses and practicum) under Master of Public Health Requirements [p. 1964] in this section of the catalog.

## MD Requirements

Students in the combined MPH/MD program must complete the curriculum of the MD program; see Doctor of Medicine, MD [p. 1767] (Carver College of Medicine) in the catalog.

## MPH/PharmD

The combined Master of Public Health/Doctor of Pharmacy requires 42 s.h. of graduate credit in addition to the requirements of the PharmD degree. The program helps students develop expertise in public health related to pharmacotherapy, health promotion, disease prevention, and medication safety.
Graduates of the program may work in areas of interest common to pharmacy and public health, such as spread and treatment of disease, community health, and immunology; bioterrorism, terrorism, and preparedness; genetics; insurance; managed care; family and juvenile health; and protection of special populations. Employment opportunities are available in hospitals and clinics and with health care providers; private practice; insurance and managed care organizations; local, county, state, and federal government; public health governmental agencies; and colleges and universities.

Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the combined degree program.
The combined MPH/PharmD requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Public Health Emergency <br> Preparedness for Veterinarians <br> and Other Public Health <br> Disciplines | 3 |
| OEH:6700 | Rural Health and Agricultural <br> Medicine | 3 |

One of these:

| EPID:5500 | Introduction to Clinical <br>  <br> Epidemiology |
| :--- | :--- |
| EPID:6910 | Pharmacoepidemiology and <br>  <br>  <br>  <br> Comparative Effectiveness <br> Research |

All of the following courses count toward the PharmD degree; 12 s.h. from these count toward the MPH degree.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PHAR:8250 | Applications of Pharmacy <br> Practice I | 2 |
| PHAR:8263 | Integrated Pharmacotherapy: <br> Infectious Diseases | 4 |
| PHAR:8265 | Applications of Pharmacy <br> Practice II | 2 |
| PHAR:8374 | Applications of Pharmacy <br> Practice III | 2 |
| PHAR:8375 | Advanced Topics in Health <br> Services | 2 |
| PHAR:8377 | Integrated Pharmacotherapy: <br> Capstone <br> Pharmacy Law and Ethics | 4 |

## MPH/PharmD Common Requirements

Students must complete courses listed as "Common
Requirements" (core courses and practicum) under Master of Public Health Requirements [p. 1964] in this section of the catalog.

## PharmD Requirements

Students in the combined MPH/PharmD program must complete the curriculum of the PharmD program; see Doctor of Pharmacy, PharmD [p. 1935](College of Pharmacy) in the catalog. Students must be enrolled in the College of Pharmacy in order to take College of Pharmacy courses.

## MPH/DVM (Iowa State University)

The Master of Public Health/Doctor of Veterinary Medicine is offered by the University of Iowa College of Public Health and the College of Veterinary Medicine at Iowa State University. It requires a minimum of 30 s.h. in addition to the requirements for the DVM degree (see College of Veterinary Medicine in the Iowa State University Catalog). A total of 12 s.h. from the DVM degree will count toward the 42 s.h. required to earn the MPH degree. The program prepares students for work as state veterinarians, as college and university faculty members, in local and state departments of public health, in the Public Health Service Commissioned Corps, in state agricultural departments, and for public health positions in the military.
Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the MPH/DVM degree program. For MPH admission requirements, see Admission [p. 1970] in this section of the catalog.
The MPH/DVM requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | 3 |
| EPID:5300 | Food Safety | 3 |
| EPID:5470 | Applied Veterinary <br> Epidemiology/Biostatistics | 3 |
| EPID:5570 | Zoonotic Diseases |  |

## MPH/DVM Common Requirements

Students must complete courses listed as "Common
Requirements" (core courses and practicum) under Master of Public Health Requirements [p. 1964] in this section of the catalog.

## MPH/DVM Electives

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| At least 9 s.h. from these: | Public Health Emergency <br> Preparedness for Veterinarians <br> and Other Public Health <br> Disciplines | 3 |
| EPID:5200 | Principles of Public Health <br> Informatics | 3 |
| EPID:5550 | Diagnostic Microbiology <br> for Epidemiology (distance <br> education course) <br> Rural Health and Agricultural <br> Medicine | 3 |
| AEH:6110 | Admission | 3 |

Applicants to the MPH program must apply through the Schools of Public Health Application Service (SOPHAS) and then set up a University of Iowa account and pay the UI supplemental fee. For detailed application information, visit Prospective Graduate Students on the Master of Public Health website.

Applicants to the MPH program must have successfully completed one semester each of college algebra and biology.
Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or another assessment approved by the Graduate College.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
Students may enter the MPH program in fall and summer. Application deadline for fall or summer entrance to the MPH program is April 15.
Application deadline for the MPH for practicing veterinarians is March 1.

Application deadline for the Undergraduate to Graduate (U2G) program is Feb. 1.
Students may enter the MPH combined programs in fall, spring, and summer. Contact the individual combined programs for deadline information.

## Financial Support

A limited number of tuition scholarship awards are available each year for MPH students. For information on financing education through jobs, grants, and loans, contact the university's Office of Student Financial Aid.

## Career Advancement

For more information about careers in public health, visit Career Services in Public Health on the College of Public Health website or This is Public Health online.

## Academic Plans

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Public Health, Graduate Certificate

## Requirements

The graduate Certificate in Public Health requires 18 s.h. of credit Students must complete the certificate's required coursework within five years of entering the program and must maintain a grade-point average of at least 2.75 in work for the certificate. All certificate courses are offered online at least once a year, and all courses are offered on campus. Students who are only enrolled in the Certificate in Public Health program may not register for courses other than those required for the certificate.

The certificate program is designed to improve public health practice and public health workforce capacity in Iowa and the upper Midwest. It is intended primarily for individuals in public health practice, those in the workforce, and those interested in strengthening their knowledge and skills in basic public health competencies.

The graduate Certificate in Public Health requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| CPH:5100 | Introduction to Public Health | 3 |
| BIOS:4120 | Introduction to Biostatistics | 3 |
| CBH:4105 | Introduction to Health | 3 |
|  | Promotion and Disease |  |
|  | Prevention | 3 |
| EPID:4400 | Epidemiology I: Principles | 3 |
| HMP:4000 | Introduction to the U.S. Health |  |
|  | Care System | 3 |

For more information about the program, visit Graduate Certificate in Public Health on the College of Public Health website.

## Admission

Applicants to the certificate program must hold a bachelor's degree and must have a cumulative grade-point average of at least 2.75 . They must submit official transcript(s), a statement of purpose, two reference letters, a résumé, and an online application.

For more information about how to apply, visit Graduate Certificate in Public Health on the College of Public Health website.

## Agricultural Safety and Health

## Interim Head, Department of Occupational and Environmental Health

- Thomas M. Peters

## Director

- Diane Rohlman (Occupational and Environmental Health)

Graduate certificate: agricultural safety and health
Website: https://www.public-health.uiowa.edu/certificate-ash/
The certificate program in agricultural safety and health trains students to detect safety and illness hazards, and treat and prevent farmrelated illnesses and injuries. The program is available for students in related health science, environmental science, or occupational health and safety programs who want to supplement other training with agricultural health information.

The certificate may enhance employment opportunities in health care delivery, government, and the private sector.

The Certificate in Agricultural Safety and Health is administered by the Department of Occupational and Environmental Health [p. 2025]. The Graduate College grants the certificate.

## Programs

## Graduate Program of Study

## Certificate

- Certificate in Agricultural Safety and Health [p. 1978]

## Agricultural Safety and Health, Graduate Certificate

## Requirements

The graduate Certificate in Agricultural Safety and Health requires 12 s.h. of credit.

The Certificate in Agricultural Safety and Health requires the following coursework.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| OEH:5410 | Occupational Safety | 3 |
| OEH:5620 | Occupational Health | 3 |
| OEH:6110 | Rural Health and Agricultural Medicine | 3 |
| OEH:6120 | Current Topics in Agriculture and Rural Health (taken three times for 1 s.h. each) | 3 |

For more information, visit Graduate Certificate in Agricultural Safety and Health on the College of Public Health website.

## Admission

Admission requirements include:

- a bachelor's degree with a grade-point average of at least 2.50 from an accredited university or equivalent experience and education,
- a letter of interest that explains the applicant's current position and educational objectives,
- a résumé, and
- completion of the application form.

For more information, and how to apply, visit Graduate Certificate in Agricultural Safety and Health on the College of Public Health website.

## Biostatistics

## Head

- Joseph E. Cavanaugh

Graduate degrees: MS in biostatistics; PhD in biostatistics Graduate certificate: biostatistics

Faculty: https://www.public-health.uiowa.edu/biostatistics-facultylist/

Website: https://www.public-health.uiowa.edu/biostat/
The Department of Biostatistics prepares students for professional and academic careers in biostatistics. Graduates find positions in pharmaceutical, health care, and research companies and institutions; in universities and government agencies; and as consultants. The department also provides training for non-biostatistics students.
Biostatistics faculty members work closely with both clinical and basic science investigators on the University of Iowa health sciences campus in the design and analysis of research projects. The department has research expertise representing a broad array of methodological areas of statistics and biostatistics, including clinical trials, computational statistics, Bayesian modeling and inference, high-dimensional data analysis, statistical genetics and genomics, bioinformatics, informatics, statistical and machine learning, spatial and spatio-temporal modeling, time series analysis, survival data analysis, longitudinal data analysis, network analysis, causal inference, comparative effectiveness studies, model selection, epidemic modeling, and syndromic surveillance. Many of these areas represent current, cutting-edge areas of disciplinary focus in a rapidly evolving field.

In addition to the MS and the PhD degrees in biostatistics, the department offers a subprogram for the Master of Public Health (MPH) degree in biostatistics. See "MPH Subprogram" below.

## MPH Subprogram

The Department of Biostatistics offers the biostatistics subprogram for the Master of Public Health degree. The subprogram is designed to train public health professionals for leadership in the analysis of public health data and the design of studies for public health investigations. See the Master of Public Health, MPH [p. 1964] in the catalog.

## Programs

## Graduate Programs of Study

## Majors

- Biostatistics subprogram for the Master of Public Health [p. 1964] degree
- Master of Science in Biostatistics [p. 1982]
- Doctor of Philosophy in Biostatistics [p. 1985]

## Certificate

- Certificate in Biostatistics [p. 1988]

## Facilities

Department of Biostatistics resources and activities include three centers. The Biostatistics Consulting Center provides opportunities for students to gain valuable experience working with faculty and staff in the health sciences at the University of Iowa. The Clinical Trials Statistical and Data Management Center serves the statistical design,
data management, and analysis needs of a variety of multicenter clinical trials, and among those are Acute to Chronic Pain Signatures (A2CPS) Consortium, Network of Excellence in Neuroscience Clinical Trials (NeuroNEXT), and the Parkinson's Progression Markers Initiative (PPMI). The Center for Public Health Statistics facilitates the collection, analysis, and dissemination of health data in support of the research, teaching, and service missions of the College of Public Health. This includes collaborative relationships in the area of public health statistics including data management and statistical analysis services.

## Courses

## Biostatistics Courses

## BIOS:4110 General Biostatistics

Biostatistics and biostatistical computation; biostatistical aspects of health-related problems; clinical trials; statistical issues in big data problems; disease modeling; disease mapping; genetics and epidemiology; brief introduction to survival and longitudinal analyses.
BIOS:4120 Introduction to Biostatistics
Application of statistical techniques to biological data including descriptive statistics, probability and distributions, sampling distributions, nonparametric methods, hypothesis tests, confidence intervals, analysis of categorical data, and simple linear regression; designed for non-biostatistics majors and MPH students.
Requirements: college algebra or ALEKS score of $65 \%$ or higher.
BIOS:4510 Data Science Foundations in $R$
Introduction to use of R tools for data wrangling and communication tasks commonly encountered in biostatistics; topics include preparation and manipulation of analytic datasets, data visualization, tabular summaries, and reporting. Offered spring semesters.
BIOS:5120 Regression Modeling and ANOVA in the Health

## Sciences

Continuation of BIOS:4120; correlation, simple and multiple linear regression, confounding, interactions, model selection, single and multiple factor ANOVA (analysis of variance) models, contrasts, multiple comparisons, nested and block designs; introduction to mixed models; for non-biostatistics majors. Offered spring semesters. Prerequisites: BIOS:4120. Same as IGPI:5120, STAT:5610.

## BIOS:5130 Applied Categorical Data Analysis

3 s.h.
Analysis of proportions, risk measures, and measures of association; Mantel-Haenszel method; logistic regression for binary responses and for matched data; logistic regression for multi-category responses; analysis of count data (Poisson regression and negative binomial regression); analysis of clustered data (generalized estimating equations and generalized linear mixed effects model); special topics include the application of propensity score methods; designed for nonbiostatistics majors. Offered fall semesters. Prerequisites: BIOS:5120. Same as IGPI:5130.

BIOS:5310 Research Data Management
3 s.h.
Introduction to data management techniques and problems encountered in gathering and processing data from biomedical investigations; introduction to SAS, techniques taught in SAS; designed for non-biostatistics majors. Offered fall and spring semesters. Recommendations: prior programming experience with C , C++, Python, Java, or other. Same as IGPI:5310, STAT:5810.

BIOS:5510 Biostatistical Computing 2 s.h.
Introduction to computer programming using SAS and R statistical software packages; programming language syntax, constructs, procedures, and techniques for data management, data analysis, and statistical programming commonly encountered in biostatistics; designed for first-year biostatistics majors. Offered fall semesters. Corequisites: BIOS:5710. Same as IGPI:5510.

## BIOS:5710 Biostatistical Methods I

Probability distributions, moments, estimation, parametric and nonparametric inference for one-sample and two-sample problems, analysis of frequency data; emphasis on use of computers; designed for first-year biostatistics majors. Offered fall semesters. Requirements: two semesters of calculus. Same as IGPI:5710.

## BIOS:5720 Biostatistical Methods II

4 s.h.
Continuation of BIOS:5710; multi-factor ANOVA (analysis of variance), multiple comparisons, orthogonal contrasts, linear regression and correlation, regression diagnostics and remedial measures, model selection, and mixed models; designed for firstyear biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5710. Requirements: one semester of linear algebra. Same as IGPI:5720.
BIOS:5730 Biostatistical Methods in Categorical Data 3 s.h. Estimation of proportions, rates, risks, relative risks, and odds ratios; Mantel-Haenszel method; logistic regression (including ordinal logistic regression and multi-category nominal logistic regression); Poisson regression and negative binomial regression; methods for correlated or clustered data (conditional logistic regression, generalized estimating equations, and mixed effects models); special topics include an introduction to generalized linear models and likelihood-based inferential techniques in this framework; designed for first-year biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5510 and BIOS:5710. Corequisites: BIOS:5720. Same as IGPI:5730.
BIOS:6210 Applied Survival Analysis 3 s.h.
Nonparametric, parametric, and semi-parametric methods for time-to-event data; types of censoring; Kaplan-Meier estimation; Cox proportional hazards models, including methods for assessing adequacy of the proportional hazards assumption; time varying covariates; sample size calculations for comparison of two or more groups; focus on analysis of real data sets and examples using statistical software. Offered spring semesters. Prerequisites: BIOS:5120 or BIOS:5720. Same as IGPI:6210.

## BIOS:6234 Basic Biostatistical Methods with Genetics Applications

Introduction to terminology, fundamental concepts, and methods of biostatistics as applied to genetic research; genetic investigation examples used to illustrate statistical approaches. Same as GENE: 6234.
BIOS:6310 Introductory Longitudinal Data Analysis 3 s.h. Introduction to statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; focus on applications and computer software methods for ANOVA based methods, hierarchical linear models, linear mixed models, correlated regression models, generalized estimating equations, and generalized linear mixed models. Offered fall semesters. Prerequisites: BIOS:5120 or STAT:3200. Same as IGPI:6310, STAT:6550.

## BIOS:6420 Survey Design and Analysis

3 s.h.
Methodological issues regarding design, sampling approach, implementation, analysis, and interpretation of surveys and questionnaires in public health research. Offered spring semesters of even years. Prerequisites: EPID:4400 and BIOS:5120. Same as EPID:6420.

## BIOS:6610 Statistical Methods in Clinical Trials

3 s.h.
Survey of statistical methods commonly used in clinical trials; primary focus on methodologic perspective for the design, conduct, analysis, and interpretation of all phases of clinical trials; logistical and operational aspects of conducting multisite clinical trials; designed for biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5720. Requirements: familiarity with SAS and R programming. Same as IGPI:6610.

4 s.h. BIOS:6650 Causal Inference 3 s.h.
Causal inference overview, emphasis on inference in observational research; conceptual issues (e.g., counterfactuals, causal graphs, timevarying treatments/confounding), methods (e.g., inverse probability weighting, doubly robust estimators), and related applications (e.g., causal mediation analysis, quantitative bias analysis); for advanced biostatistics or epidemiology students. Prerequisites: (BIOS:5720 and BIOS:5730) or (EPID:6400 and EPID:5241 and EPID:5610). Same as EPID:6655, IGPI:6650.

## BIOS:6720 Statistical Machine Learning for Biomedical and Public Health Data <br> 3 s.h.

Statistical machine learning techniques for analysis of biomedical and public health data; methodology and application of unsupervised learning, supervised learning for regression and classification, ensemble learning, model assessment, feature selection, and highdimensional inference. Prerequisites: BIOS:5510 and BIOS:5720 and (STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101). Requirements: BIOS:5510 with topic of programming with R.
BIOS:6810 Bayesian Methods and Design
3 s.h.
Theory and application of Bayesian methods in biomedical research; foundations of Bayesian statistics including decision theory, study design, model development, inference and implementation of computational algorithms; designed for biostatistics majors. Offered fall semesters of even years. Prerequisites: BIOS:5510 and BIOS:5720 and BIOS:5730 and STAT:4100 and STAT:4101.
BIOS:7110 Likelihood Theory and Extensions 4 s.h.
Theoretical foundations of inferential methods based on likelihood and its extensions (e.g., profile, conditional, partial, marginal, pseudo likelihood). Prerequisites: (BIOS:5720 and STAT:5100 and STAT:5101) or (STAT:4100 and STAT:4101).

BIOS:7210 Survival Data Analysis
Types of censoring and truncation; survival function estimation; parametric inference using exponential, Weibull, and accelerated failure time models; nonparametric tests; sample size calculation; Cox regression with stratification and time-dependent covariates; regression diagnostics; competing risks; topics may include analysis of correlated survival data and/or recurrent events; designed for biostatistics and statistics majors. Offered fall semesters of odd years. Prerequisites: BIOS:5720 and ((STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101)). Same as IGPI:7210, STAT:7570.

BIOS:7230 Advanced Clinical Trials 3 s.h.
Modules that address advanced topics and issues encountered when conducting a clinical trial; discussions of recent publications and FDA guidance documents dealing with current topics in clinical trials. Prerequisites: (STAT:4101 or STAT:5101) and BIOS:6610. Requirements: familiarity with SAS and R programming.

BIOS:7240 High-Dimensional Data Analysis 3 s.h. Analysis of high-dimensional data with emphasis on use of penalized regression models such as lasso, elastic net, minimax concave penalty (MCP), smoothly clipped absolute deviation (SCAD), and group lasso; large-scale hypothesis testing and false discovery rate estimation; inference for penalized likelihoods. Prerequisites: (STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101) and BIOS:5510 and BIOS:5720. Requirements: BIOS:5510 with section subtitle of programming with R.

BIOS:7250 Theory of Linear and Generalized Linear Models 4 s.h. Theoretical foundations of traditional linear models and generalized linear models; emphasis on modeling structures, estimability and identifiability, estimation and testing. Prerequisites: STAT:5100 and STAT:5101 and BIOS:5720.

BIOS:7270 Scholarly Integrity in Biostatistics
1 s.h.
Responsible conduct of research training; emphasis on issues of particular relevance to biostatisticians including authorship, communication, student/mentor relationships, plagiarism, fabrication and falsification of data, bias, Type I/II errors, reproducible research, data confidentiality and security, conflicts of interest, and human/ animal subjects. Requirements: graduate standing in biostatistics.
BIOS:7310 Longitudinal Data Analysis
3 s.h.
Statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; includes ANOVA based methods, hierarchical linear models, linear mixed models, error structures, generalized estimating equations, and generalized linear mixed models; may include Bayesian approaches; designed for biostatistics and statistics majors. Offered spring semesters of odd years. Prerequisites: (BIOS:5720 and STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101). Same as IGPI:7310.

BIOS:7330 Advanced Biostatistical Computing 3 s.h.
Advanced topics in biostatistical computing and large or complicated data/models; matrix decomposition, optimization, Bayesian computing, parallel programming, working with campus high performance computing (HPC) resources; topics are explored in R, including package development and efficient R code. Prerequisites: MATH:2700 and BIOS:5510 and STAT:4101. Requirements: BIOS:5510 with section subtitle of programming with R.
BIOS:7410 Analysis of Categorical Data
3 s.h.
Distributions and inference for categorical data; descriptive and inferential methods for contingency tables; theory and application of generalized linear models including methods for parameter estimation and testing, model selection and assessment of model adequacy; models for binary, count, and multi-category outcomes; loglinear models for contingency tables; generalized additive models; generalized linear models for longitudinal and clustered data. Offered spring semesters of even years. Prerequisites: (BIOS:5720 or STAT:5200) and (STAT:5101 or STAT:4101). Same as STAT:7510.

BIOS:7500 Preceptorship in Biostatistics arr.
Work experience using knowledge and skill acquired in classroom; arranged in conjunction with ongoing departmental or collegiate activities or with governmental agencies or private industry; preparation of prospectus and presentation of research results in a department seminar.
BIOS:7600 Advanced Biostatistics Seminar 0-3 s.h.
Current topics; supervised experience in reading and interpreting biostatistical literature. Same as IGPI:7600.

BIOS:7604 Scholarly Integrity in Biostatistics for Postdocs 0 s.h. Responsible conduct of research training; emphasis on issues of particular relevance to biostatisticians and statisticians including authorship, communication, student/mentor relationships, plagiarism, fabrication and falsification of data, bias, Type I/II errors, reproducible research, data confidentiality and security, conflicts of interest, human/animal subjects. Requirements: postdoctoral research scholar/fellow standing in biostatistics or statistics.
BIOS:7700 Problems/Special Topics in Biostatistics arr.
Didactic material in biostatistics; may include tutorials, seminars, faculty-directed independent work (e.g. literature search, project, short research project).
BIOS:7800 Independent Study in Biostatistics arr. In-depth pursuit of an area of special interest in biostatistics requiring substantial creativity and independence.

## BIOS:7850 Research in Biostatistics

arr.
Research that may lead to a dissertation.

## Biostatistics, MS

## Learning Outcomes

Students will

- demonstrate a broad knowledge and understanding of current statistical theory, methods, and practices in the health sciences;
- effectively collaborate on a research team;
- develop statistical designs and implement analyses for health science investigations;
- develop computer programs for the management and analysis of data sets;
- prepare reports and publications resulting from health science studies; and
- effectively communicate key statistical principles to a nonstatistical audience.

## Requirements

The Master of Science program in biostatistics requires a minimum of 38 s.h. of graduate credit. Students must maintain a cumulative gradepoint average of at least 3.00 . Those who receive a grade of C on 7 s.h. of coursework may be dismissed from the program.

The program provides training in the design of experiments and in analysis of data related to biomedical or public health problems. It emphasizes mathematical, statistical, and computer methods for dealing with quantitative information and provides opportunities for students to gain statistical consulting experience with a variety of problems.

MS students are required to complete an in-depth preceptorship under the direction of a departmental faculty member and a final comprehensive-style examination.
The MS with a major in biostatistics requires the following coursework.

## Core Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| BIOS:5510 | Biostatistical Computing (taken twice for 2 s.h. each; topics should be programming with $R$ and programming with SAS) | 4 |
|  <br> BIOS:5720 | Biostatistical Methods I-II | 8 |
| BIOS:5730 | Biostatistical Methods in Categorical Data | 3 |
| BIOS:6610 | Statistical Methods in Clinical Trials | 3 |
| BIOS:7500 | Preceptorship in Biostatistics | 3 |
| EPID:4400 | Epidemiology I: Principles | 3 |
| One of these sequences: |  |  |
| $\begin{aligned} & \text { STAT:4100- } \\ & \text { STAT:4101 } \end{aligned}$ | Mathematical Statistics I-II | 6 |
| STAT:5100- <br> STAT:5101 | Statistical Inference I-II (required for students who intend to earn a PhD) | 6 |

| BIOS:7270 | Biostatistics |  |

## Electives

Students complete a minimum of 5-6 s.h. of electives with at least 3 s.h. in quantitative coursework (statistics or biostatistics). It is recommended that students consider a biology/public health course as the other elective, particularly for those who have not had prior exposure to these areas. Electives must be approved by the advisor and the director of graduate studies.

| Course \# | Title | Hours |

## Admission

Applicants to the MS program in biostatistics must apply through the Schools of Public Health Application Service (SOPHAS). After the SOPHAS application is verified, the applicant pays a supplemental Graduate College admission fee to the University of Iowa Office of Admissions. For detailed application information, visit Requirements and How to Apply to Biostatistics on the Department of Biostatistics website.

The biostatistics faculty considers several factors when evaluating applications for admission, including grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests.

All applicants must hold a bachelor's degree and have a cumulative grade-point average of at least 3.00 .

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). They must score at least 100 (internet-based) on the TOEFL. Applicants with lower scores are not considered for admission. In place of TOEFL scores, the department accepts IELTS scores of 7.0 or higher, with no subscore below 6.0, and the Duolingo English Test (DET) with a score of at least 105. See English Proficiency Requirements on the Graduate Admissions website for waiver eligibility.
All biostatistics applicants are required to have strong written and oral communication skills.
All applicants must be competent in at least one computer programming language. They also must have mathematical sciences training in methods and techniques of single variable and multivariable differential and integral calculus, and in linear algebra. Previous coursework or experience in statistical methods or data analysis is preferred.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
Students may enter in the fall; the priority application deadline is Dec. 1.

## Financial Support

A limited number of teaching and research assistantships are available. Assistantships offer financial support and tuition assessed at the resident tuition rate along with a tuition scholarship. They also provide valuable on-the-job training experience.

For information on financing education through jobs, grants, and loans, contact the university's Office of Student Financial Aid.

## Career Advancement

Graduates find career opportunities in many areas, including pharmaceutics, health care, research companies and institutions, consulting firms, universities, and government agencies.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

e Required for Graduate Research Assistants (GRA) or potential GRAs.
f Work with faculty advisor to select appropriate graduate elective coursework. More information can be found in the General Catalog and department website.

## Biostatistics, PhD

## Learning Outcomes

Students will:

- describe current statistical theory, methods, and practices used in health sciences;
- analyze data from experimental and observational studies;
- design new statistical methods;
- communicate research findings to various audiences in writing and though oral presentation; and
- Interpret analytical results from health science studies.

## Requirements

The Doctor of Philosophy program in biostatistics requires a minimum of 79 s.h. of graduate credit, including credit from a master's degree. Students must maintain a cumulative grade-point average of at least 3.00. Those who receive a grade of C on 7 s s.h. of coursework may be dismissed from the program.

All students must successfully complete a comprehensive examination and a dissertation. The research topic and content, which vary depending on the program of study, must be approved by a student's dissertation committee. Other degree requirements include approved electives chosen from Department of Biostatistics and other University of Iowa courses.

The PhD with a major in biostatistics requires the following work.

## Master of Science Background

PhD students must take the following courses required for the Master of Science in biostatistics. Students who have completed equivalent coursework at other institutions may request waivers and/or transfers of credit. Students who earned a Master of Science with a major in biostatistics at the University of Iowa automatically receive credit for these courses.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| This sequence: |  |  |
| STAT:5100- <br> STAT:5101 | Statistical Inference I-II | 6 |
| All of these: |  |  |
| BIOS:5510 | Biostatistical Computing (taken twice for 2 s.h. each; topics should be programming with $R$ and programming with SAS) | 4 |

## Electives

With approval of their advisor, students choose 16-23 s.h. of courses according to their interest in biostatistics, statistics, genetics, computing, public health, or in other areas. No more than 5 s.h. in nonquantitative courses (e.g., epidemiology, environmental health) may count toward the electives requirement. Courses required for the MS that are not listed above also may be used to satisfy the electives requirement, although BIOS:7800 Independent Study in Biostatistics does not generally count as an elective. At least 6 s.h. of elective coursework must be taken with grades awarded.

These courses are recommended, but other coursework may be selected; students should consult their advisor.

| Course \# | Title | Hours |
| :--- | :--- | ---: |

| STAT:6560 | Applied Time Series Analysis | 3 |
| STAT:7400 | Computer Intensive Statistics | 3 |
| DiSSertation |  | 3 |

Students must enroll in the following dissertation course for at least two semesters in residence.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BIOS:7900 | Thesis/Dissertation | $6-13$ |

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biostatistics in a combined degree program offered by the Carver College of Medicine and the College of Public Health. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Admission

Applicants to the PhD program in biostatistics must apply through the Schools of Public Health Application Service (SOPHAS). After the SOPHAS application is verified, the applicant pays a supplemental Graduate College admission fee to the University of Iowa Office of Admissions. For detailed application information, visit Requirements and How to Apply to Biostatistics on the Department of Biostatistics website.

The biostatistics faculty considers several factors when evaluating applications for admission, including grade-point averages, letters of recommendation, intent, and motivation for graduate study, and research interests.

All applicants must hold a bachelor's degree and have a cumulative grade-point average of at least 3.00

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). They must score at least 100 (internet-based) on the TOEFL. Applicants with lower scores are not considered for admission. In place of TOEFL scores, the department accepts IELTS scores of 7.0 or higher, with no subscore below 6.0 , and the Duolingo English Test (DET) with a score of at least 105. For waiver eligibility of this requirement, visit English Proficiency Requirements on the Graduate Admissions website.

All biostatistics applicants are required to have strong written and oral communication skills.

Completion of an MS program in statistics or biostatistics generally is required for admission to the PhD program. However, full consideration is given to baccalaureate degree recipients.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

PhD application deadlines are posted on the Department of Biostatistics website. Application deadline is Dec. 1. Visit Requirements and How to Apply to Biostatistics on the department's website.

## Financial Support

A limited number of teaching and research assistantships are available. Assistantships offer financial support and tuition assessed at the resident tuition rate along with a tuition scholarship. They also provide valuable on-the-job training experience.
For information on financing education through jobs, grants, and loans, contact the university's Office of Student Financial Aid.

## Career Advancement

applying statistical methodology to solve important biological and public health problems.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Biostatistics, Graduate Certificate

## Learning Outcomes

- Propose and defend good statistical design as a collaborator on a public health project.
- Promote the use of sound statistical methods to answer open questions in public health science.
- Interpret results of data analysis for public health research, policy, or practice.
- Develop computer programs for the management and analysis of datasets.

## Requirements

The graduate Certificate in Biostatistics requires a minimum of 15 s.h. of graduate credit. Students must earn a grade of at least B-minus in each certificate course and must maintain a cumulative grade-point average of at least 3.00 in order to earn the certificate. The certificate is designed for students who would like to add a formal biostatistics emphasis to their graduate programs.

The program is open to students enrolled in a University of Iowa graduate degree program outside the Department of Biostatistics. It is also open to individuals who hold graduate degrees in science disciplines or professional degrees in the health sciences and are admitted to the Graduate College as nondegree students.

The certificate requires two core courses ( 6 s.h.) and three electives ( 9 s.h.). Students should work with an advisor to plan their coursework carefully, since some certificate courses have prerequisites, require permission for enrollment, or are not offered every year. They must complete at least 6 s.h. of the required coursework after being admitted to the certificate program, and may count a maximum of 6 s.h. of certificate credit toward a degree or another certificate earned at the university. At least 6 s.h. of the certificate plan of study must be exclusively applied to the certificate.

The Certificate in Biostatistics requires the following coursework.

## Core Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: |  | 3 |
| BIOS: 4120 | Introduction to Biostatistics | 3 |
| BIOS:5120/ | Regression Modeling and |  |
| STAT:5610 | ANOVA in the Health Sciences |  |

## Electives

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| Three of these (total of 9 s.h.): | 3 |  |
| BIOS:5130 | Applied Categorical Data <br> Analysis |  |
| BIOS:6210 | Applied Survival Analysis | 3 |
| BIOS:6310/ | Introductory Longitudinal Data | 3 |
| STAT:6550 | Analysis |  |
| BIOS:6420 | Survey Design and Analysis | 3 |

Other courses may be approved as electives by the Department of Biostatistics director of graduate studies. Contact the Department of Biostatistics for more information.

## Admission

Enrollment is limited; applicants who have completed at least one of the certificate's required courses and whose research will be advanced by biostatistics training are given priority for admission. Visit the Certificate in Biostatistics on the department's website for an application form.

# Community and Behavioral Health 

## Head

- Mark W. Vander Weg

Graduate degree: PhD in community and behavioral health
Faculty: https://www.public-health.uiowa.edu/cbh-faculty-list/
Website: https://www.public-health.uiowa.edu/cbh/
The Department of Community and Behavioral Health examines the relationship between human behavior and community health and focuses on creating effective strategies for change. Community and behavioral health students learn how to design, implement, and evaluate interventions directed toward identified public health problems in communities.

The Department of Community and Behavioral Health advances teaching, research, and practice in four strategic areas: rural health; community engagement and participatory approaches; theory-based culturally informed intervention development, implementation, and evaluation; and social justice, health equity, and health disparities.

Department faculty members come from a variety of disciplines within the social and health sciences, drawn together by an interest in health behavior and promoting healthy communities.
In addition to the PhD in community and behavioral health, the department offers a subprogram for the Master of Public Health (MPH). See "MPH Subprogram" below.

## MPH Subprogram

The Department of Community and Behavioral Health offers a subprogram for the Master of Public Health degree.

The MPH subprogram in community and behavioral health prepares public health practitioners for a variety of positions related to intervention development, implementation, and evaluation using community participatory approaches with a focus on decreasing health disparities and inequities.

For detailed information about the MPH, see the Master of Public Health, MPH [p. 1964] in the catalog.

## Programs

Graduate Programs of Study

## Majors

- Community and behavioral health subprogram for the Master of Public Health [p. 1964] degree
- Doctor of Philosophy in Community and Behavioral Health [p. 1991]

## Facilities

The department houses two centers. The Prevention Research Center focuses on improving the health of rural Iowans. The National American Indian and Alaska Native Addiction Technology Transfer Center disseminates culturally legitimate evidence-based practice in substance abuse and behavioral health, and provides technical assistance, training, and systems change assistance to urban as well as tribal providers across the country.

Graduate students may have opportunities to work with ongoing research projects in the centers.

## Courses

## Community and Behavioral Health Courses

## CBH:3150 Media and Health

Potential and limits of mass media's ability to educate the public about health; research and theory on the influence of information and entertainment media; theories, models, assumptions of mass communication in relation to public health issues. Same as GHS:3150, JMC:3150.

## CBH:4105 Introduction to Health Promotion and Disease

 PreventionBasic concepts, strategies, and methods of health promotion and disease prevention; health promotion in the context of public health, theories and principles that underpin health promotion; overview of policy formation and health promotion planning, implementation, evaluation.

## CBH:4140 Feminist Activism and Global Health 3 s.h.

How female gender intersects with culture, environment, and political economy to shape health and illness; reproductive health, violence, drug use, cancer; readings in anthropology, public health. Prerequisites: ANTH:1101 or GWSS:1001 or CPH:1400 or GHS:2000. Same as ANTH:4140, GHS:4140, GWSS:4140.

## CBH:4350 Maternal and Child Health Seminar 1 s.h.

Historical and applied perspective on maternal and child health problems and programs aimed at reducing morbidity, mortality, and health disparities across the life span. Same as EPID:4350.

CBH:5220 Health Behavior and Health Education 3 s.h.
Common theories of health behavior and health education and their application to varied public health problems and settings.
CBH:5235 Community-Based Participatory Research 3 s.h.
How community-based participatory research (CBPR) has emerged as a critical approach to conduct research and produce scholarship; opportunities, challenges, needed skills, and methods by which researchers and community members partner to conduct research that leads to community well-being and health; students share their experiences, explore, and learn through case studies, guest lectures, and interactive activities; application of research methods through a CBPR approach.
CBH:5305 Evaluation: Approaches and Applications 3 s.h. Focus on program evaluation methods for use in public health and related educational and social service programs; exploration of methods and approaches, as well as planning strategies for conducting program evaluations; exposure to all components of evaluation from planning to dissemination of findings. Prerequisites: $\mathrm{CBH}: 5220$ and BIOS:4120 and EPID:4400. Requirements: enrollment in College of Public Health.

CBH:5310 Qualitative Research for Public Health 3 s.h. Introduction to methods and theories of qualitative research that facilitate description and explanation of social phenomena related to health behavior, illness, prevention, and treatment in the public health domain.

CBH:5350 Foundations of Maternal and Child Health 3 s.h. Life course approach to understanding determinants, mechanisms, and systems that promote and maintain health, safety, and well-being of mothers and their children. Prerequisites: EPID:4350. Same as EPID:5350.

## CBH:5435 Substance Abuse Prevention and Early

Intervention 3 s.h.

Prevalence and characteristics of several substance use disorders and the impact of such disorders on the individual, the community, and public health workers; how prevalence of substance use disorders varies among different ethnic and cultural groups, between men and women, across the life span, and through different socio-economic levels; how outcomes of substance abuse disorders vary at both the individual and community level as a function of these factors.
CBH:5440 Prevention and Early Intervention of Mental Health Disorders 3 s.h.
Prevalence and characteristics of mental health disorders; differences between ethnicity and culture, gender, age, and socioeconomic background; primary and secondary prevention; assessment and tertiary treatment approaches to mental health disorders.

## CBH:6115 Ethnographic Field Methods 3 s.h.

Basic data-gathering techniques for field research in sociocultural anthropology. Same as ANTH:6115.
CBH:6205 Designing and Implementing Interventions 3 s.h. Theoretical foundations, phases, and skills necessary to plan, design, and implement a public health intervention program; techniques and strategies for designing and implementing public health interventions; emphasis on community engagement; evidence-based, culturally and contextually situated methods and skills to plan, design, and implement public health intervention program; analysis of case studies, individual and small group work on assignments and development of a data-driven program. Prerequisites: CBH:5220. Requirements: admission to College of Public Health.

## CBH:6220 Health Communication Campaigns 3 s.h.

Intervention design and analysis of health campaigns; theory, practice, methods; mass media, community, organization, and interpersonal approaches. Same as COMM:6220.
CBH:6230 Health Equity, Disparities, and Social Justice 3 s.h.
Introduction to the concept of health equity and an overview of U.S. health disparities; students gain a better understanding of research and interventions through readings, lectures, reflection papers, in-class exercises, and research assignments. Same as EPID:6075.
CBH:6335 Research Methods in Community and Behavioral Health 3 s.h.
Overview of quantitative and qualitative research methods for community and behavioral health; major elements of behavioral and social science research, critical evaluation of research related to community and behavioral health, application of research methods in public health practice; opportunities for students to build skills for evaluation of research and application of quantitative and qualitative research methods.

## CBH:6405 Global Maternal, Newborn, and Child Health 3 s.h.

 Overview of global demographic trends in maternal, newborn, and child health; focus on low- and middle-income countries as well as programs, interventions, and policies that have successfully improved the health of women and children around the globe.
## CBH:6410 Special Topics

arr.
Didactic material in community and behavioral health that may include tutorial, seminar, or faculty-directed independent work (e.g., literature search, project, short research project).

## CBH:6415 Independent Study in Community and Behavioral

## Health

 arr.Pursuit of an interest in community and behavioral health requiring substantial creativity and independence.

## CBH:7100 Community and Behavioral Health Doctoral

## Seminar

1 s.h.
Introduction to the Department of Community and Behavioral Health; essential skills for success in academia, individual faculty member's work, and doctoral program requirements; for incoming PhD students.

CBH:7200 Advanced Intervention Research
3 s.h.
Intervention research development and implementation including conceptualization, design, development of research team and intervention approaches, statistical power, and research ethics. Prerequisites: CBH:6205.
CBH:7300 Advanced Behavioral Theories 3 s.h.
Seminar on behavioral theory in public health; builds on student's previous training in theory with an emphasis on applications to guide research and thereby ensuring skills necessary to function as an independent scientist; examination of general principles of behavioral theory and several behavioral theories at different ecological levels; current state of theory development (i.e., gaps, future directions for research); emphasis on critical analysis and application of theory; students gain a better understanding of the role of behavioral theory in population health research. Prerequisites: $\mathrm{CBH}: 5220$. Requirements: doctoral standing.
CBH:7505 CBH Thesis/Dissertation
arr
Work on MS thesis or PhD dissertation in community and behavioral health, with thesis/dissertation advisor.

## Community and Behavioral Health, PhD

## Learning Outcomes

Graduates will be able to:

- apply social and behavioral science theories in public health research;
- produce effective scientific writing;
- demonstrate grant-writing skills;
- participate in interdisciplinary research;
- communicate research findings to various audiences, including policy makers and community members;
- design a research study that incorporates knowledge of pertinent cultural, social, behavioral, and biological factors;
- design a theory-informed, community-based intervention research project;
- design an implementation and evaluation plan for a theoryinformed, community-based intervention;
- formulate focused research questions to address gaps in community and behavioral health knowledge;
- evaluate social and behavioral science research design, methodology, and analysis related to public health; and
- evaluate how structural bias, social inequities, and racism undermine health and create challenges to achieving health equity at organizational, community, and societal levels.

## Requirements

The PhD program in community and behavioral health requires at least 75 s.h. of graduate credit, including approved credit earned from a master's degree. Students must maintain a cumulative grade-point average of at least 3.00.
Students must successfully complete a qualifying exam, a comprehensive exam, and a dissertation. The research topic must be approved by a student's dissertation committee.

During the first semester, students work with their academic advisor to develop a plan of study that satisfies their interests and professional goals as well as the program's requirements.

## College of Public Health Core

Students complete the following (13 s.h.).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CBH:4105 | Introduction to Health |  |
|  | Promotion and Disease <br> Prevention | 3 |
| CBH:7100 | Community and Behavioral <br> Bealth Doctoral Seminar | 1 |
| CPH:6100 4120 | Introduction to Biostatistics | 3 |
| CPH:7270 | Essentials of Public Health | 2 |
| EPID:4400 | Principles of Scholarly | 1 |
|  | Integrity: Public Health | 3 |

## Behavioral and Social Sciences Core

Students complete the following (21 s.h.).

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| All of these: | Health Behavior and Health |  |
| CBH:5220 | Education <br> Community-Based Participatory <br> Research | 3 |
| CBH:5235 | Designing and Implementing <br> Interventions | 3 |
| CBH:6205 | Health Communication <br> Campaigns | 3 |
| CBH:6220 | Health Equity, Disparities, and <br> Social Justice | 3 |
| CBH:7200 | Advanced Intervention <br> Research | 3 |
| $\mathrm{CBH}: 7300$ | Advanced Behavioral Theories | 3 |

## Research Methods Core

Students complete the following (15 s.h.).

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Both of these: |  |  |
| CBH:5305 | Evaluation: Approaches and Applications | 3 |
| CBH:5310 | Qualitative Research for Public Health | 3 |
| 9 s.h. from these: |  |  |
| CBH:6115 | Ethnographic Field Methods | 3 |
| CBH:6335 | Research Methods in Community and Behavioral Health | 3 |
| BIOS:5120 | Regression Modeling and ANOVA in the Health Sciences | 3 |
| BIOS:5130 | Applied Categorical Data Analysis | 3 |
| EPLS:6209 | Survey Research and Design | 3 |
| EPLS:6370 | Quantitative Methods for Policy Analysis | 3 |
| HMP:7940 | Primary Data and Mixed Methods | 3 |
| PSQF:6243 | Intermediate Statistical Methods | 3 |
| PSQF:6244 | Correlation and Regression | 4 |
| PSQF:6249 | Factor Analysis and Structural Equation Models | 3 |
| PSQF:6252 | Introduction to Multivariate Statistical Methods | 3 |
| PSQF:7375 | Topics in Educational Measurement and Statistics | 1-3 |
| SOC:5160 | Research Design and Methods | 3 |
| SOC:6170 | Introduction to Sociological Data Analysis | 3 |
| SOC:6180 | Linear Models in Sociological Research | 3 |
| SOC:7170 | Advanced Statistical Modeling of Data | 3 |
| SOC:7180 | Structural Equation Modeling | 3 |

## Content Area Electives

Students complete $14 \mathrm{~s} . \mathrm{h}$. of elective coursework in consultation with their advisor. The following is a list of suggested coursework; however, other courses may be approved with consent of the advisor.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CBH:4140 | Feminist Activism and Global <br> Health | 3 |
| CBH:5350 | Foundations of Maternal and <br> Child Health | 3 |
| CBH:5435 | Substance Abuse Prevention <br> and Early Intervention | 3 |
| CBH:5440 | Prevention and Early <br> Intervention of Mental Health <br> Disorders | 3 |
| CBH:6405 | Global Maternal, Newborn, and <br> Child Health | 3 |
| CBH:6410 | Special Topics |  |
| CBH:6415 | Independent Study in <br> Community and Behavioral | arr. |
| GEOG:4150 | Health | arr. |
| Health and Environment: GIS |  |  |
| Applications |  |  |
| Introduction to Healthcare |  |  |
| Organization and Policy |  |  |$\quad 3$

## Dissertation

Students complete 12 s.h. in the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CBH:7505 | CBH Thesis/Dissertation | 12 |

## Admission

PhD applicants must apply through the Schools of Public Health Application Service (SOPHAS). Applications must include academic transcripts, three letters of recommendation, statement of purpose, and a writing sample. International transcripts should be evaluated by the World Education Service (WES) and submitted to SOPHAS. For detailed application information, visit How to Apply to the PhD in Community and Behavioral Health on the Department of Community and Behavioral Health website.

The community and behavioral health admission committee considers several factors when evaluating applications for admission, including grade-point averages, letters of recommendation, intent, and motivation for graduate study, and research interests. Students with deficiencies in one area may be admitted if all other components of their application are very strong.

Applicants must have a graduate grade-point average of at least 3.40 and have earned a graduate degree from an accredited college or university in a related public health, social science, or clinical health field. Applicants who do not hold a graduate degree should apply to a master's program prior to application for the PhD program. PhD program applicants also must submit their master's thesis, or if no thesis is available, a sample of their scholarly writing.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or DuoLingo. An acceptable

TOEFL score is a minimum of 600 ( 250 computer-based test or 100 internet-based test), a minimum IELTS score of 7.0 (with no subscore lower than 6.0) or a DuoLingo score over 105. Automatic waivers of this requirement are granted for persons who have, or will have, completed a bachelor's degree or more advanced degree at an accredited university in the United States, United Kingdom, Canada (excluding French Quebec), Africa (English speaking), Australia, or New Zealand.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

The application deadline is Jan. 15 for the fall semester. Applications are not accepted for spring or summer semesters.

## Financial Support

The graduate program coordinator and advisor works with admitted students to explore funding opportunities. A limited number of teaching and research assistantships are available. Assistantships offer financial support and tuition assessed at the resident tuition rate along with a tuition scholarship. They also provide valuable on the job training experience.
For more information on financing education through jobs, grants, and loans, contact the university's Office of Student Financial Aid.

## Career Advancement

The program prepares individuals for academic, research, and policymaking work in the social and behavioral health sciences. This academic specialty offers many career opportunities in academic and research institutions.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b See General Catalog and website for list of suggested courses and specifics; work with faculty advisor to determine appropriate coursework and sequence.
c Taken at the end of first year second semester if entering with a relevant master's degree; taken at the end of second year first semester if entering without a relevant master's degree or enrolled part-time. See General Catalog and website for specifics.
d See General Catalog and website for list of approved methods courses; work with faculty advisor to determine appropriate coursework and sequence.
e Usually completed after most required coursework has been completed; see General Catalog and website for specifics. f Oral dissertation defense.

# Emerging Infectious Disease Epidemiology 

Head, Department of Epidemiology

- Elizabeth A. Chrischilles

Graduate certificate: emerging infectious disease epidemiology
Website: https://www.public-health.uiowa.edu/certificate-in-emerging-infectious-disease-epidemiology/

Emerging infectious diseases increasingly are recognized as global and regional issues. Some infectious diseases are controlled effectively with the help of modern technology. But new diseases -such as SARS, West Nile, and avian influenza virus infectionsappear frequently, and older ones, including malaria, tuberculosis, and bacterial pneumonia, are now appearing in forms that are resistant to drug treatments. All of them have the potential to seriously affect human and animal health as well as economies locally and worldwide. They pose novel and unceasing challenges for professionals in health care, government, and private agencies.

The Certificate in Emerging Infectious Disease Epidemiology is administered by the Department of Epidemiology [p. 1996]. The Graduate College grants the certificate.

## Programs

Graduate Program of Study

## Certificate

- Certificate in Emerging Infectious Disease Epidemiology

## Emerging Infectious Disease Epidemiology, Graduate <br> Certificate

## Requirements

The graduate Certificate in Emerging Infectious Disease Epidemiology requires $12-13$ s.h. of graduate credit. Students must complete the certificate's required coursework within five years of entering the program and must maintain a grade-point average of at least 2.75 in work toward the certificate. Three of the required courses must be completed on campus: EPID:5570 Zoonotic Diseases, EPID:5580 Public Health Laboratory Techniques, and EPID:5590 Applied Infectious Disease Epidemiology or EPID:6550 Epidemiology of Infectious Diseases. The remaining courses may be completed on campus or by distance education.

The certificate program provides basic information and training related to infectious diseases. It is designed for a broad range of individuals, including graduate students, international public health professionals, laboratory professionals, physicians, nurses, veterinarians, and medical technologists.

The Certificate in Emerging Infectious Disease Epidemiology requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Zoonotic Diseases |  |
| EPID:5570 | Public Health Laboratory <br> Techniques | 3 |
| EPID:5580 | Applied Infectious Disease <br> Epidemiology (when offered) | 2 |
| EPID:5590 | Epidemiology of Infectious <br> Diseases (offered fall semesters) | 3 |
| EPID:6550 | Introduction to Biostatistics |  |
| Two of these: | Epidemiology I: Principles | 3 |
| BIOS:4120 | Diagnostic Microbiology for <br> EPID:4400 | Epidemiology |
| EPID:5550 | Global Environmental Health | 3 |
| OEH:4240 |  |  |

For more information about the program, visit the Certificate in Emerging Infectious Disease Epidemiology on the Department of Epidemiology website.

## Admission

Applications are only being accepted from current University of Iowa degree-seeking graduate students.

Applicants to the certificate program must hold a baccalaureate degree from an accredited college or university and must have a grade-point average of at least 2.75 (or international equivalent). For more information about how to apply, visit Certificate in Emerging Infectious Disease Epidemiology on the Department of Epidemiology website.

## Epidemiology

## Head

- Elizabeth A. Chrischilles

Graduate degrees: MS in clinical investigation; MS in epidemiology; PhD in epidemiology
Faculty: https://www.public-health.uiowa.edu/epi-faculty-list/
Website: https://www.public-health.uiowa.edu/epi/
The Department of Epidemiology strives to improve public and personal health by conducting innovative research addressing the magnitude, determinants, prevention and management of disease and its consequences; educating researchers and public health practitioners; and collaboration with clinicians, communities, and public health agencies in the measurement and evaluation of health status and prevention effectiveness.
Students are guided by faculty members whose research interests include pharmacoepidemiology, cancer epidemiology, infectious disease epidemiology, antimicrobial resistance, immunology, adverse reproductive outcome epidemiology, genetics, cardiovascular disease, nutrition, maternal and child health, clinical epidemiology, socioenvironmental determinants, occupational and environmental epidemiology, psychiatric epidemiology, social epidemiology, neuroepidemiology, injury and violence prevention, road traffic safety, substance use disorders, mental health, intervention trials, diabetes, global health, and effects of aging.
In addition to the MS in epidemiology, the MS in clinical investigation, and the PhD in epidemiology, the department offers the epidemiology subprogram for the Master of Public Health degree; see Master of Public Health, MPH [p. 1964] in the catalog. The subprogram focuses on fundamental concepts and methods, and provides training in the use of data and methods for disease assessment and for evaluation of programs and interventions.

The MS in epidemiology and the MPH with an epidemiology subprogram are offered as part of the Undergraduate to Graduate (U2G) program which provides an opportunity for University of Iowa students interested in health science to earn both their undergraduate and graduate degrees in five years. For more information about the U2G program that combines an undergraduate degree with the MS in epidemiology or the MPH (epidemiology subprogram), visit MS in Epidemiology-Undergraduate to Graduate on the Department of Epidemiology website or MPH in Epidemiology-Undergraduate to Graduate on the College of Public Health website.

## Certificates

## Emerging Infectious Disease Epidemiology

The Department of Epidemiology offers the graduate Certificate in Emerging Infectious Disease Epidemiology. The certificate program provides basic information and training related to infectious diseases. It is designed for a broad range of individuals, including graduate students, international public health professionals, laboratory professionals, physicians, nurses, veterinarians, and medical technologists. To learn more, see the Certificate in Emerging Infectious Disease Epidemiology [p. 1995] in the catalog.

## Translational and Clinical Investigation

The Department of Epidemiology and the Institute for Clinical and Translational Science offer the graduate certificate program in translational and clinical investigation; see the Certificate in Translational and Clinical Investigation [p. 2037] in the catalog.

## Programs

## Graduate Programs of Study

## Majors

- Epidemiology subprogram for the Master of Public Health [p. 1964] degree
- Master of Science in Clinical Investigation [p. 2000]
- Master of Science in Epidemiology [p. 2003]
- Doctor of Philosophy in Epidemiology [p. 2006]

## Facilities and Resources

## Clinical and Health Services and Chronic Disease Epidemiology

- The Iowa Cancer Registry (ICR), a component of the State Health Registries of Iowa in cooperation with the Iowa Department of Public Health, collects medical data on every Iowan diagnosed with cancer and compiles survival and mortality data. The Iowa Cancer Registry is one of 18 registries nationwide reporting data to the National Cancer Institute
- The Iowa Registry for Congenital and Inherited Disorders is a component of the State Health Registries of Iowa that monitors the occurrence etiology of birth defects for the State of Iowa.
- The Holden Comprehensive Cancer Center, including faculty leadership in the Cancer Epidemiology Program and the Population Science Core.
- The Health Effectiveness Research Center (HERCe) is a collaborative research enterprise between the Department of Epidemiology and the College of Pharmacy which studies whether particular health care treatments or services are over- or underutilized in practice. HERCe researchers study variation in practice patterns and associate outcome differences with this variation.
- The Preventive Intervention Center conducts population-based intervention trials to prevent occurrence and recurrence of disease and to promote wellness and health. Trials have focused on major health problems, particularly in elderly men and women, including the Fracture Intervention Trial, the Hormone Estrogen Replacement Study, and the Women's Health Initiative.
- The Nutrition Center provides expertise in nutrition and dietary assessment, dietary interventions, and nutrition lifestyle change strategies with a focus on the research, teaching, and service missions of the Department of Epidemiology and the College of Public Health.
- The Institute for Clinical and Translational Science.

## Infectious Disease Epidemiology

- The UI Center for Emerging Infectious Diseases (CEID) research projects study infectious diseases, often zoonotic, whose incidence in humans has increased over the past two decades or threatens to increase in the near future.

## Injury Epidemiology

- University of Iowa Injury Prevention Research Center.
- Heartland Center for Occupational Health and Safety.

## Courses <br> Epidemiology Courses

## EPID:4314 Field Experiences in Public Health

Direct involvement in actions being taken at local community level; topics include environmental health, infectious diseases, chronic diseases, and pediatric health; practical examples and hands-on experiences during site visits for topic-specific field investigations. Offered spring semesters. Prerequisites: BIOL:1140 or BIOL:1141 or BIOL:1411. Requirements: biology or microbiology coursework. Same as CPH:4250.

## EPID:4350 Maternal and Child Health Seminar

1 s.h.
Historical and applied perspective on maternal and child health problems and programs aimed at reducing morbidity, mortality, and health disparities across the life span. Same as CBH:4350.

## EPID:4400 Epidemiology I: Principles

Epidemiological concepts and methods; design of descriptive and analytic studies, such as aggregate, case series, cross-sectional, casecontrol, cohort studies, clinical trials; application of epidemiology to public health practice; communication and dissemination of epidemiological findings.

## EPID:4510 Injury and Violence Prevention

Theory, research, and practice of injury control; unintentional and intentional injuries; local, national, international injury issues. Same as CPH:4230, OEH:4510.

## EPID:5200 Principles of Public Health Informatics

3 s.h.
Systematic applications of information science, computer science, and technology to public health practice, research, and learning; methods of disease surveillance, data collection, analysis, and reporting with health informatics. Offered fall semesters. Same as IGPI:5220

## EPID:5214 Meta-Analysis of Epidemiologic Studies <br> 3 s.h.

Methods for quantitative pooling of analytic study associations (cohort and case-control) between exposure and a dichotomous outcome; literature searches, data abstraction, test of homogeneity, publication bias and consideration of adjusted risk ratios (effects of confounding). Offered spring semesters of odd years. Prerequisites: BIOS:5120 and EPID:4400.

EPID:5241 Statistical Methods in Epidemiology 4 s.h.
Overview of methods to analyze data from epidemiologic investigations; estimation of relative measures of risk, attributable risk, stratified analysis; model-fitting approaches using linear, logistic, and Poisson regression analysis; confounding and effect modification; analysis of epidemiologic data sets. Offered spring semesters.

## EPID:5300 Food Safety

3 s.h.
Current issues and concepts of food safety in the United States, from plant to table; foodborne illness from microbial agents, food toxins, adulterants; disease investigation, risk analysis, risk mitigation, prevention. Offered summer sessions.
EPID:5350 Foundations of Maternal and Child Health 3 s.h. Life course approach to understanding determinants, mechanisms, and systems that promote and maintain health, safety, and well-being of mothers and their children. Prerequisites: EPID:4350. Same as CBH:5350.

EPID:5470 Applied Veterinary Epidemiology/Biostatistics 3 s.h. Epidemiology and biostatistics applied to veterinary public health; outbreak investigations, surveillance, analyzing and evaluating diagnostic tests, translation methodology, risk assessment, data analysis software programs. Offered summer sessions. Prerequisites: EPID:4400.

EPID:5500 Introduction to Clinical Epidemiology 3 s.h.
Epidemiologic applications and methods used in clinical settings to evaluate clinical medicine and other health profession disciplines including health measurement, health outcome determination, diagnostic process, risk assessment and communication, prognosis, study design, patient surveys, clinical trials, decision analysis and meta-analysis, health services research. Offered fall semesters. Corequisites: EPID:4400, if not taken as a prerequisite.
EPID:5540 Public Health Surveillance Mechanisms, Applications, and Data 3 s.h.
Introduction to fundamentals of public health surveillance with emphasis on cancer registration; use of resulting surveillancebased databases and information systems available to public health practitioners and researchers. Offered fall semesters. Prerequisites: EPID:4400.

EPID:5550 Diagnostic Microbiology for Epidemiology 3 s.h. Introduction to microbiological culture, antigen detection, immunological and molecular amplification laboratory techniques for bacteria, viruses, parasites, fungi. Offered spring semesters. Prerequisites: MICR:2157 or MICR:3164.
EPID:5560 Biomarkers in Epidemiology
3 s.h.
Introduction to basic techniques of molecular biology (DNA, RNA, protein techniques) and their use in epidemiological research (e.g., diagnosis of disease, biomarker discovery, validation). Offered spring semesters of odd years. Corequisites: EPID:4400, if not taken as a prerequisite.

EPID:5570 Zoonotic Diseases
3 s.h.
Introduction to epidemiology and control of zoonotic diseases; zoonoses endemic to the midwestern United States. Offered summer sessions. Prerequisites: EPID:5550 or EPID:6550 or MICR:2157 or MICR:3164.
EPID:5580 Public Health Laboratory Techniques 1 s.h.
Common laboratory techniques in emerging infectious respiratory disease research and epidemiologic surveillance laboratories; emphasis on techniques for culturing, characterization, and serological surveillance of exposure to influenza viruses. Offered spring semesters. Requirements: completion of online Basic Biological Safety and Blood-Borne Pathogens courses; completed certificates must be brought to class.
EPID:5590 Applied Infectious Disease Epidemiology 2 s.h. Introduction to infectious disease surveillance, outbreak investigations, interventions, biodefense, emerging infectious diseases, subject recruitment, mathematical modeling, and analytic approaches pertaining to infectious disease prevention and control; emphasis on practical knowledge and how to apply basic infectious disease epidemiology to real-life scenarios and research projects.
EPID:5600 Introduction to Epidemiology Data Management and Analysis
Organization, collection, management, and analysis of epidemiological data using computer programs. Offered fall semesters. Corequisites: EPID:4400, if not taken as a prerequisite.
EPID:5610 Intermediate Epidemiology Data Analysis with SAS and R

3 s.h.
Basic principles of data analysis and collaborative research; SAS fundamentals; data manipulation and interpretation techniques. Offered spring semesters.
EPID:5900 Problems and Special Topics in Epidemiology arr. Didactic material in epidemiology; may include tutorial, seminar, faculty-directed independent work (e.g. literature search, project, short research project); topics may include comparative effectiveness and patient-centered outcomes, neuroepidemiology, and epidemiology of aging.

## EPID:5925 Epidemiology Journal Club: Evaluating the Literature

0-1 s.h.
Critical evaluation of primary epidemiologic methods and research papers; informative, challenging, and current topics from scientific literature. Requirements: epidemiology MS, MPH, or PhD standing.

## EPID:5950 Preceptorship in Epidemiology

arr.
Quantitative research-oriented project performed with a preceptor; preparation of prospectus, presentation of research results in a publication-quality report and a scientific poster session.

## EPID:6000 Independent Study in Epidemiology

In-depth pursuit of an area of special interest in epidemiology requiring substantial creativity and independence.

## EPID:6050 Research in Epidemiology

arr.
Research that may lead to a dissertation.
EPID:6071 Theory and Methods in Social Epidemiology
3 s.h.
Application of social theory and methodological approaches to investigate relationships between social factors and health. Prerequisites: EPID:4400.
EPID:6075 Health Equity, Disparities, and Social Justice 3 s.h. Introduction to the concept of health equity and an overview of U.S. health disparities; students gain a better understanding of research and interventions through readings, lectures, reflection papers, in-class exercises, and research assignments. Same as CBH:6230.

## EPID:6100 Writing a Grant Proposal <br> 3 s.h.

Small group projects to develop grant proposals using epidemiological study designs; presentation and defense of proposals before faculty site visitors. Offered fall semesters.
EPID:6150 Writing for Medical Journals 1 s.h. Skill development in writing medical journal articles for publication. Offered spring semesters.

EPID:6200 Environmental and Occupational Epidemiology 3 s.h. Overview of methods to interpret and perform environmental and occupational epidemiologic studies with focus on exposure assessment; valuable insights into identifying regional, national, global environmental, and occupational health-related issues. Prerequisites: EPID:4400. Same as OEH:6510.

EPID:6250 Genetics and Epidemiology 3 s.h.
Basic human molecular genetics and population genetics principles; methods of integrating genetic principles into epidemiological studies; advancing genomic technologies, hot topics in genetics research. Offered fall semesters of odd years. Prerequisites: EPID:4400.
EPID:6330 Global Nutrition Policy 2-3 s.h.
Concepts and methods used in setting public health nutrition policy; evidence-based aspects of nutrition policy formation in public health settings; evaluation of nutritional public health policy implementation and ways of changing policy in China, Korea, Micronesia, Hawaii, Italy, and the United States. Offered spring semesters.

## EPID:6350 Nutritional Epidemiology

Application of epidemiology study designs to nutrition variables and chronic disease; analysis of nutrition epidemiology studies; research protocol design. Offered spring semesters. Recommendations: a basic nutrition course.

## EPID:6360 Nutrition Intervention in Clinical Trials

## Research

2 s.h.
Nutrition interventions in clinical trials; disease related to nutrition variables; research that links effects of diet on chronic diseases.
Offered fall semesters. Recommendations: a basic nutrition course.
EPID:6370 Nutrition Intervention in Research Lab 3 s.h. Development and demonstration of group counseling skills in ongoing nutrition research projects at the University of Iowa. Offered fall semesters. Corequisites: EPID:6360, if not taken as a prerequisite.

EPID:6400 Epidemiology II: Advanced Methods
4 s.h.
Epidemiologic study design and analysis; bias, confounding, and effect modification; case-control studies; cohort studies; field methods; measurement principles; exposure and disease classification; acute and chronic disease examples. Offered spring semesters. Prerequisites: EPID:4400 and EPID:5600.

EPID:6420 Survey Design and Analysis 3 s.h.
Methodological issues regarding design, sampling approach,
implementation, analysis, and interpretation of surveys and questionnaires in public health research. Offered spring semesters of even years. Prerequisites: EPID:4400 and BIOS:5120. Same as BIOS:6420.

EPID:6510 Injury Epidemiology 3 s.h.
How epidemiology can be applied to injury prevention and control: epidemiology literature, specific methodological problems involved in the epidemiology of injuries, critical evaluation of research articles. Offered spring semesters of odd years. Prerequisites: EPID:4400. Same as OEH:6520.
EPID:6550 Epidemiology of Infectious Diseases
Underlying epidemiological concepts of infection disease, including causation and surveillance; prevention and control; case studies. Offered fall semesters. Prerequisites: EPID:4400. Same as GHS:6550.
EPID:6560 Hospital Epidemiology
2 s.h.
Health care associated infections; surveillance, investigative methods, resistant organisms, and molecular epidemiology; methods for preventing spread of pathogens, including isolation precautions; environmental issues, construction, and sterilization; interactive exercises. Offered spring semesters of odd years. Prerequisites: EPID:4400.

## EPID:6570 Infectious Causes of Chronic Disease 3 s.h.

Evidence linking various infectious agents with the development of different types of chronic disease. Offered spring semesters of even years. Corequisites: EPID:4400, if not taken as a prerequisite.
EPID:6600 Epidemiology of Chronic Diseases
3 s.h.
Chronic disease epidemiology; survey of leading chronic diseases including measurement of disease, lifestyle, nutrition, occupation, and family history. Offered spring semesters of even years. Prerequisites: EPID:4400.

EPID:6620 Neuroepidemiology 2 s.h.
Basic epidemiologic concepts of neurologic disease; concepts, methods, examples of neuroepidemiology; varied diseases, methods. Prerequisites: EPID:4400 and EPID:5600.
EPID:6655 Causal Inference
3 s.h.
Causal inference overview, emphasis on inference in observational research; conceptual issues (e.g., counterfactuals, causal graphs, timevarying treatments/confounding), methods (e.g., inverse probability weighting, doubly robust estimators), and related applications (e.g., causal mediation analysis, quantitative bias analysis); for advanced biostatistics or epidemiology students. Prerequisites: (BIOS:5720 and BIOS:5730) or (EPID:6400 and EPID:5241 and EPID:5610). Same as BIOS:6650, IGPI:6650.
EPID:6900 Design of Intervention and Clinical Trials 3 s.h.
Methodologic introduction to rationale and design of clinical trials; basics of clinical trial design, variety of designs, and examples from clinical trials. Offered fall semesters.

EPID:6910 Pharmacoepidemiology and Comparative Effectiveness Research
Drug approval process, methods for identification and attribution of adverse drug events, and current understanding of the epidemiology of adverse drug events; study designs and data sources for pharmacoepidemiology and pharmacoeconomics. Offered fall semesters of even years. Prerequisites: EPID:4400.

## EPID:6920 Applied Administrative Data Analysis <br> 2 s.h.

Concepts and methods for analysis of administrative health insurance claims data; focus on understanding types and sources of data, useful resources for classifying data, and applying SAS programming skills and common analytic approaches to studies using such data. Offered fall semesters. Prerequisites: EPID:5610 or BIOS:5310 or BIOS:5510. Requirements: EPID:5610 or BIOS:5310 or BIOS:5510 or SAS programming experience; and (concurrent or prior enrollment in BIOS:5120 and BIOS:5730) or (EPID:5241 and EPID:5610) or prior equivalent biostatistical coursework or experience.

## EPID:6950 Clinical Research Ethics

2-3 s.h.
Ethical and regulatory aspects of clinical research; historical background, current regulations, and Institutional Review Board (IRB) requirements related to human subjects protection issues. Offered spring semesters. Requirements: K30 training grant or enrollment in degree program with clinical research project.

## EPID:7000 Thesis/Dissertation arr.

EPID:7200 Teaching in Epidemiology 3 s.h.
Teaching methods in epidemiology; guided practicum experience in teaching epidemiology, in preparation for academic careers. Prerequisites: EPID:4400 and EPID:5600 and EPID:6400.

EPID:7400 Epidemiology III: Theories
3 s.h.
How epidemiology fits into the wider context of scientific inquiry.
Offered fall semesters of odd years. Prerequisites: EPID:4400 and EPID:5241 and EPID:6400.

## Clinical Investigation, MS

## Learning Outcomes

Graduates will be able to:

- discuss issues related to biomedical informatics impacting clinical research;
- summarize requirements for building and maintaining a multidisciplinary research team;
- describe health and disease measurement in clinical and community populations;
- describe how to implement a clinical research study;
- develop a clinical research question;
- apply principles of responsible research and clinical research ethics to a research project;
- use computers to collect, manage, and analyze data for evaluation of hypotheses;
- determine a study aim, objectives, and appropriate design to address a hypothesis;
- analyze data using appropriate statistical techniques;
- analyze literature to identify gaps in knowledge; and
- communicate clinical research findings effectively in writing and oral presentation.

## Requirements

The Master of Science program in clinical investigation requires 37 s.h. of graduate credit. In addition to completing the program's required coursework, students must write a thesis in the form of a manuscript, or a grant proposal for a National Institutes of Health (NIH) career award or its equivalent, with oral defense. Graduate students must maintain a cumulative grade-point average of at least 3.00. Those who receive a grade of C in 7 s.h. of coursework may be dismissed from the program.
The program, which is offered in collaboration with the university's Institute for Clinical and Translational Science, is designed for clinicians interested in pursuing careers in clinical research. It includes in-depth training in biostatistics, epidemiology, research ethics, and academic survival skills as well as didactic training applicable to clinical research careers. Graduates of the program are able to critically evaluate clinical literature, write competitive grant proposals, design and conduct clinical research projects, work effectively with other researchers and support staff, and disseminate research results through manuscripts and presentations.

## Prerequisites

The MS program requires at least 6 s.h. of prerequisite coursework in the disciplines of pathology, physiology, and/or pharmacology. Students accepted into the degree program who have not completed at least 6 s.h. from those disciplines may meet the requirement while they are enrolled.
The MS with a major in clinical investigation requires the following coursework.

## Core Courses

Students must take CPH:7270 Principles of Scholarly Integrity: Public Health during their first year in the fall semester (enroll for 0 s.h.) and in the spring semester (enroll for 1 s.h.). They must retake CPH:7270 if they completed the course more than four years ago or if they have changed degree programs.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| EPID:4400 | Epidemiology I: Principles | 4 |
| EPID:5241 | Statistical Methods in <br> Epidemiology | 3 |
| EPID:5500 | Introduction to Clinical <br> Epidemiology | 3 |
| EPID:5610 | Intermediate Epidemiology <br> Data Analysis with SAS and R | 3 |
| EPID:6150 | Writing for Medical Journals | 1 |
| EPID:6400 | Epidemiology II: Advanced <br> Methods | 4 |
| EPID:6950 | Clinical Research Ethics |  |
| Introduction to Biostatistics  <br> CPH:6100 Essentials of Public Health | 2 |  |
| CPH:7270 | Principles of Scholarly | 3 |
|  | Integrity: Public Health (taken <br> first year in the fall and spring | 1 |
|  | semesters for 0 s.h. and 1 s.h. <br> respectively) |  |
|  |  |  |

## Capstone Requirement

While a student does not take a final examination of courses, the evaluation of the student for graduation is based upon a positive review of a mentored K or R grant or a mentored publishable research paper. The grant or paper is completed in the second year of the program and based on the area of focus. The capstone is a mentored activity that requires approval by a clinical mentor and a Department of Epidemiology primary faculty member. Successful completion of the course is denoted with a satisfactory (S) grade. The complete grant or paper will be due no later than one month prior to graduation for review.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EPID:6000 | Independent Study in | 2 |
|  | Epidemiology |  |

## Electives

Students must earn a minimum of 9 s.h. in elective coursework, including at least 6 s.h. in a research interest area. The following elective courses are recommended.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EPID:5214 | Meta-Analysis of |  |
| Epidemiologic Studies | 3 |  |
| EPID:6100 | Writing a Grant Proposal | 3 |
| EPID:6900 | Design of Intervention and <br> Clinical Trials | 3 |
| EPID:6910 | Pharmacoepidemiology and <br> Comparative Effectiveness <br> Research | 3 |
|  |  |  |

## Research Interest Areas

Community Studies

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CBH:5235 | Community-Based Participatory <br> Research | 3 |
| CBH:5305 | Evaluation: Approaches and <br> Applications | 3 |
| CBH:6205 | Designing and Implementing <br> Interventions | 3 |

Introduction to Program and Project Evaluation

## Epidemiology

| Course \# | Title | Hours |

| BIOS:6310 | Introductory Longitudinal Data | 3 |

## Translational Biomedicine

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| TBM:5001 | Introduction to Translational <br> Biomedicine | 3 |
| Admission |  |  |

Applicants must apply through the Schools of Public Health Application Service (SOPHAS); they also must pay the required application fee to the Graduate College through the University of Iowa Office of Admissions when prompted. For detailed application information, visit How to Apply to the Department of Epidemiology on the department's website.
Applicants must hold a doctoral-level degree in a clinical discipline (e.g., MD, DO, DDS, PhD, PharmD, DVM) or be enrolled in the Medical Scientist Training Program [p. 1784] (Carver College of Medicine). They must hold a baccalaureate degree with a cumulative grade-point average of at least 3.00; internationally-trained applicants must have an outstanding doctoral training record evidenced by research publications.
Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).
Applicants are considered based on their credentials, prior training, and research training plans. Applicants with deficiencies in one area may be admitted if all other components of their application are strong. Individuals must have a sponsoring department.
Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
Application deadlines for fall admission are June 1 for U.S. citizens, April 15 for international applicants. For summer admission, the deadline is April 1; for spring admission, Dec. 1.

## Financial Support

A limited number of graduate research assistantships are available for advanced students; for information, consult the department. For information on financing education through jobs, grants, and loans, contact the university's Office of Student Financial Aid.

Opportunities for funded predoctoral fellowships are available. Funded positions sponsored by federal agencies are available only to U.S. citizens.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Clinical Investigation, MS

## Course Title Hours

## Academic Career

## Any Semester

37 s.h. of graduate level coursework must be completed; graduate transfer credits allowed upon approval. More information is included in the General Catalog and on department website. ${ }^{\text {a }}$
A program GPA of at least 3.00 is required.

|  | Hours | $\mathbf{0}$ |
| :--- | :--- | ---: |
| First Year |  |  |
| Fall | Introduction to Biostatistics |  |
| BIOS:4120 | Epidemiology I: Principles | 3 |
| EPID:4400 | Introduction to Clinical Epidemiology | 3 |
| EPID:5500 | Essentials of Public Health |  |

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Taken in the fall and spring of first year for 0 s.h. and 1 s.h., respectively.
c A minimum of 9 s.h. of graduate level coursework is required with at least 6 s.h. in a research interest area; see General Catalog and website for coursework and specifics. Work with faculty advisor to select appropriate coursework and to determine sequence.
d While no final examination of courses will be taken, the evaluation of the student for graduation is based upon a positive review by the student's faculty mentor of 1 ) a mentored K or R grant, or 2 ) a mentored publishable paper.
e The Capstone Requirement is completed under the Independent Study mentorship; work with faculty advisor for approval.

## Epidemiology, MS

## Learning Outcomes

Graduates will be able to:

- define the concepts and content of epidemiology;
- formulate a research hypothesis;
- determine a study aim, objectives, and appropriate design to address a hypothesis;
- apply concepts of ethics to research practice;
- develop study procedures and data collection instruments for conducting a study;
- collect data and manage data quality;
- use existing databases to provide supportive data to address a research question;
- analyze data for a research study; and
- compose an understandable and presentable report of research results.

## Requirements

The Master of Science program in epidemiology requires at least 39 s.h. of graduate credit and is offered with or without thesis. Students who choose to complete the degree without thesis are required to pass a comprehensive examination. All students must maintain a cumulative grade-point average (GPA) of at least 3.00. Those who receive a grade of C in $7 \mathrm{~s} . \mathrm{h}$. of coursework may be dismissed from the program.

## Students are required to attend $80 \%$ of all Department of

 Epidemiology seminar meetings and journal club meetings for three semesters. They must present one scientific poster at the departmental level before they may graduate, and the department recommends that they present at the international, national, regional, state, or university level before graduating.The Master of Science with a major in epidemiology requires the following coursework.

## Core Courses

Students must take CPH:7270 Principles of Scholarly Integrity: Public Health during their first year in the fall semester (enroll for 0 s.h.) and in the spring semester (enroll for 1 s.h.). They must retake CPH:7270 if they completed the course more than four years ago or if they have changed degree programs.

Students enrolled part time (less than 9 s.h.) who have a graduate research assistantship appointment may choose to register in EPID:5925 Epidemiology Journal Club: Evaluating the Literature for $1 \mathrm{~s} . \mathrm{h}$.; however, the credit earned for this course will not be applied toward the minimum semester hours required for the MS in epidemiology.

Students with a strong biosciences background may choose to substitute PATH:5270 Pathogenesis of Major Human Diseases in place of PATH:8133 Introduction to Human Pathology for Graduate Students if it better complements their training plan. This is an advanced course that requires a strong foundation in molecular biology and related disciplines, but may be suitable for some students.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| EPID:4400 | Epidemiology I: Principles | 3 |
| EPID:5241 | Statistical Methods in | 4 |

| EPID:5600 | Introduction to Epidemiology Data Management and Analysis | 3 |
| :---: | :---: | :---: |
| EPID:5610 | Intermediate Epidemiology Data Analysis with SAS and R | 3 |
| EPID:5925 | Epidemiology Journal Club: Evaluating the Literature | 0-1 |
| EPID:6400 | Epidemiology II: Advanced Methods | 4 |
| BIOS:4120 | Introduction to Biostatistics | 3 |
| CPH:6100 | Essentials of Public Health | 2 |
| CPH:7270 | Principles of Scholarly Integrity: Public Health (taken first year in the fall semester for 0 s.h. and in the spring semester for 1 s.h.) | 0-1 |
| One of these: |  |  |
| PATH:5270 | Pathogenesis of Major Human Diseases | 3 |
| PATH:8133 | Introduction to Human Pathology for Graduate Students | 3-4 |
| One of these: |  |  |
| EPID:6550 | Epidemiology of Infectious Diseases | 3 |
| EPID:6600 | Epidemiology of Chronic Diseases | 3 |
| One of these: |  |  |
| EPID:5950 | Preceptorship in Epidemiology (for nonthesis students) | 3 |
| EPID:7000 | Thesis/Dissertation (for thesis students; may be taken twice) | 3 |

## Electives

Students must earn a minimum of 5 s.h. in elective coursework from Department of Epidemiology courses (prefix EPID) and 2 s.h. in additional graduate coursework pertinent to a student's educational goals and background (the additional 2 s.h. may be earned in an epidemiology course or in another graduate course, with the advisor's approval). The following courses are recommended.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BIOS:6210 | Applied Survival Analysis | 3 |
| BIOS:6310 | Introductory Longitudinal Data | 3 |
| CBH:5220 | Analysis | 3 |
| HMP:4000 | Health Behavior and Health | 3 |
| Education | Introduction to the U.S. Health | 3 |
| OEH:4240 | Care System | 3 |

Students may need additional elective coursework in order to complete the minimum 39 s.h. required for the degree.

## Other Requirements

## Department of Epidemiology Seminar

Every week during the academic year, the Department of Epidemiology seminar provides a forum for speakers to present information or research pertaining to diverse topics in epidemiology. Contact information for the seminar coordinators is located on the Department of Epidemiology website under Preceptorship, Journal Club, and Seminar Contacts. Information about the schedule is distributed each semester and also is available on the University of

Iowa Events Calendar. Students are expected to achieve at least $80 \%$ attendance at the seminar during each semester of enrollment.

## Journal Club for First-Year Students

Journal Club for first-year students is for those who are new to the department and is offered in the fall semester. The focus is for students to gain experience in reading, interpreting, and critically evaluating recently published journal articles. Students should register in EPID:5925 Epidemiology Journal Club: Evaluating the Literature, section 1.

## Journal Club

Every other week during the academic year, the Journal Club meets to discuss articles of interest in the field. Contact information for the Journal Club coordinators can be found on the Department of Epidemiology website under Preceptorship, Journal Club, and Seminar Contacts. Information about the schedule is distributed to students each semester. Students are required to achieve at least $80 \%$ attendance at Journal Club for three semesters during their time in the program.

## Scientific Poster Requirement

Every student is required to present at least one scientific poster at the department level, and is encouraged to present at the international, national, regional, state, or university level at some point prior to graduation. A student's advisor or thesis/preceptorship mentor can help determine the suitability and timeline for the poster presentation.

For nonthesis students, this poster requirement takes the place of an oral seminar presentation as part of the preceptorship requirement. Nonthesis students would typically formulate preceptorship research into a poster presentation, though the requirement may be met by a poster presentation of other research, such as from an independent study or research related to employment.
For thesis students, the poster requirement is in addition to the oral seminar presentation requirement for the thesis. Thesis students would typically formulate thesis research into a poster presentation, though the requirement may be met by a poster presentation of other research, such as from an independent study or research related to employment. The poster must be submitted for review to the student's advisor or thesis/preceptorship mentor a minimum of 10 days before the poster session. A Department of Epidemiology poster session is held at the end of the fall and spring semesters.

## Master's Final Examination for the MS Without Thesis

The master's examination is a written in-class exam that measures learning of epidemiological concepts and knowledge of epidemiological thoughts as presented in required courses. This exam is offered twice per year.

## Master's Thesis Defense for the MS with Thesis

The master's thesis defense is an oral presentation of the purpose, methods, and results of the thesis research. A specially formed committee thoroughly examines a student's area of knowledge associated with the context of the work. The goal of the thesis is a document that is publishable in a peer-reviewed journal.

## Seminar Presentation for the MS with Thesis

In addition to the thesis defense, students are strongly encouraged and may be required by the thesis committee chair, to make a presentation at a Department of Epidemiology seminar. It is recommended that students complete the seminar presentation and dissertation defense in the same semester, with the seminar presentation scheduled before the
master's thesis defense so the seminar can serve as preparation for the defense.

## Combined Programs

## Undergraduate Degree/MS

The Undergraduate to Graduate (U2G) program provides an opportunity for University of Iowa students interested in health science to earn their undergraduate and graduate degrees in five years. Undergraduate students should apply to the program by Feb. 1 of their junior year.

For additional information, visit MS in Epidemiology-
Undergraduate to Graduate on the Department of Epidemiology website.

## Admission

Applicants must apply through the Schools of Public Health Application Service (SOPHAS); they also must pay the required application fee to the Graduate College through the University of Iowa Office of Admissions when prompted. For detailed application information, visit How to Apply to the Department of Epidemiology on the department's website.
The epidemiology faculty considers several factors when evaluating applications for admission, including Graduate Record Exam (GRE) General Test scores, grade-point average, letters of recommendation, intent and motivation for graduate study, and research interests. Students with deficiencies in one area may be admitted if all other components of their application are very strong.
All applicants must hold a baccalaureate degree and have a cumulative grade-point average of at least 3.00. Undergraduate preparation must include two semesters of biological sciences and mathematics through algebra. Coursework in statistics is highly recommended.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).
All applicants and students are required to have strong written and oral communication skills.
Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
Application deadlines for fall admission are June 1 for U.S. citizens, April 15 for international applicants.

## Financial Support

A limited number of graduate research assistantships are available for advanced students; for information, consult the department. For information on financing education through jobs, grants, and loans, contact the university's Office of Student Financial Aid.

Opportunities for funded predoctoral fellowships are available. Funded positions sponsored by federal agencies are available only to U.S. citizens.

## Career Advancement

The program prepares graduate students for professional careers in which specialized knowledge of epidemiological methods and analytic techniques are essential. Graduates find employment in local, state, and federal health agencies; academic institutions; and private
enterprise, such as hospitals, pharmaceutical and device companies, insurance companies, and foundations.

## Academic Plans <br> Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
c Taken in the fall and spring of first year for 0 s.h. and 1 s.h., respectively.
d If taken for 1 s.h., the credit will not be applied toward the minimum semester hours required for the MS in Epidemiology.
e Students are required to take either EPID:6550 or EPID:6600. EPID:6550 is offered every fall semester, and EPID:6600 is offered in the spring semesters of even numbered years.
f Students with a strong biosciences background may choose to substitute PATH:5270 for PATH:8133 if it fits better with their training plan. PATH:5270 is an advanced course that requires a strong foundation in molecular biology and related disciplines, but may be suitable for some students.
g A minimum of $5 \mathrm{~s} . \mathrm{h}$. of electives must be selected from Department of Epidemiology courses (prefix EPID); see General Catalog and website for coursework and specifics. Work with faculty advisor to select at least $2 \mathrm{~s} . \mathrm{h}$. of additional graduate coursework pertinent to educational goals and background.
h Written in-class exam that measures learning of epidemiological concepts and knowledge of epidemiological thoughts as presented in required courses; offered twice per year.

## Epidemiology, PhD

## Learning Outcomes

Graduates will be able to:

- summarize specific risk factor and disease processes in a specialized area;
- describe methods for primary data collection including quality assurance and quality control;
- use advanced statistical analysis methods appropriate for the study design and controlling for confounding variables;
- develop data collection instruments for research purposes;
- develop hypotheses that build upon literature and theoretical models of disease and causation;
- conduct an independent research project;
- compose a proposal for grant funding;
- communicate epidemiological concepts and methods in both writing and orally; and
- defend the methods, results, and implications of a research study.

## Requirements

The Doctor of Philosophy program in epidemiology requires a minimum of 78 s.h. of graduate credit. Graduate students in epidemiology must maintain a cumulative grade-point average of at least 3.00 . Those who receive a grade of C in 7 s.h. of coursework may be dismissed from the program.

The Doctor of Philosophy with a major in epidemiology requires the following coursework.

## Core Courses

Students must take CPH:7270 Principles of Scholarly Integrity: Public Health during their first year in the fall semester (enroll for 0 s.h.) and in the spring semester (enroll for 1 s.h.). They must retake CPH:7270 if they completed the course more than four years ago or if they have changed degree programs.

Students enrolled part time (less than 9 s.h.) who have a graduate research assistantship appointment may choose to register in EPID:5925 Epidemiology Journal Club: Evaluating the Literature for 1 s.h.; however, the credit earned for this course will not be applied toward the minimum semester hours required for the PhD in epidemiology.
Students with a strong biosciences background may choose to substitute PATH:5270 Pathogenesis of Major Human Diseases in place of PATH:8133 Introduction to Human Pathology for Graduate Students if it better complements their training plan. This is an advanced course that requires a strong foundation in molecular biology and related disciplines, but may be suitable for some students.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Epidemiology I: Principles | 3 |
| EPID:4400 | Statistical Methods in <br> Epidemiology | 4 |
| EPID:5241 | Introduction to Epidemiology <br> Data Management and Analysis | 3 |
| EPID:5600 | Intermediate Epidemiology <br> Data Analysis with SAS and R | 3 |
| EPID:5610 | Epidemiology Journal Club: <br> Evaluating the Literature | $0-1$ |
| EPID:5925 | Research in Epidemiology | 3 |
| EPID:6050 |  |  |

| EPID:6100 | Writing a Grant Proposal | 3 |
| :---: | :---: | :---: |
| EPID:6400 | Epidemiology II: Advanced Methods | 4 |
| EPID:7400 | Epidemiology III: Theories | 3 |
| BIOS:4120 | Introduction to Biostatistics | 3 |
| CPH:6100 | Essentials of Public Health | 2 |
| CPH:7270 | Principles of Scholarly Integrity: Public Health (taken first year in the fall semester for 0 s.h. and in the spring semester for 1 s.h.) | 0-1 |
| One of these: |  |  |
| PATH:5270 | Pathogenesis of Major Human Diseases | 3 |
| PATH:8133 | Introduction to Human Pathology for Graduate Students | 3-4 |
| One of these: |  |  |
| BIOS:6210 | Applied Survival Analysis | 3 |
| BIOS:6310 | Introductory Longitudinal Data Analysis | 3 |
| One of these: |  |  |
| HHP:3500 | Human Physiology | 3 |
| MPB:5153 | Graduate Physiology | 4 |

## Electives

## Research Interest Area Electives

Students are encouraged to choose a recommended Epidemiology Research Interest Area to fulfill the research interest area elective requirement ( $23-25$ s.h.). This curricular requirement encompasses student-selected coursework that demonstrates knowledge in an advanced research interest area. Students may select courses from a recommended interest area plan of study from the department's preapproved curricula or they may, in consultation with their faculty advisor and after the approval of the department's plan of study committee, propose a series of courses (23-25 s.h.) that form a customized research interest area. The department's pre-approved plans of study feature areas in clinical and health services, chronic disease/life course, injury, infectious disease, and molecular and genetic epidemiology.

## Additional Epidemiology Electives

In addition, students must select at least 3 s.h. from Department of Epidemiology courses (prefix EPID) outside their research interest area.

## Dissertation

Students must successfully complete a PhD thesis.

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| EPID:7000 | Thesis/Dissertation | $10-18$ |

## Other Requirements

## Preceptorship Requirement

Doctoral students who did not complete the MS program in epidemiology at the University of Iowa are required to take EPID:5950 Preceptorship in Epidemiology or demonstrate that an equivalent course has been completed, such as a completed master's thesis at another institution. This requirement must be fulfilled within one year of admission to the PhD program.

## Department of Epidemiology Seminar

Every week during fall and spring semesters, the Department of Epidemiology seminar provides a forum for speakers to present information or research pertaining to diverse topics in epidemiology. Students are expected to achieve at least $80 \%$ attendance at the seminar during each semester of enrollment.

## Journal Club for First-Year Students

Journal Club for first-year students is for those who are new to the department. The focus is for students to gain experience in reading, interpreting, and critically evaluating recently published journal articles. Students should register in EPID:5925 Epidemiology Journal Club: Evaluating the Literature. PhD students who have experience with journal reviews, or who have already completed EPID:4400 Epidemiology I: Principles or received a waiver for EPID:4400, may enroll in the full-year section of Journal Club during their first semester.

## Journal Club

Every other week during the academic year, the Journal Club meets to discuss articles of interest in the field. Contact information for the Journal Club coordinators can be found on the Department of Epidemiology website under Preceptorship, Journal Club, and Seminar Contacts. Information about the schedule is distributed to students each semester. Students are required to achieve at least $80 \%$ attendance at Journal Club for five semesters during their time in the program. Attendance earned while enrolled as an MS student does not count toward the required five semesters.

## Scientific Poster Requirement

Every student is required to present at least one scientific poster at the department level and one poster at the international, national, regional, state, or university level, at some point prior to graduation. A student's advisor or dissertation mentor can help determine the suitability and timeline for the poster presentation.

## Seminar Presentation

In addition to the dissertation defense, students are required to make a presentation at a Department of Epidemiology seminar. It is recommended that students complete the seminar presentation and dissertation defense in the same semester, with the seminar presentation scheduled before the defense so the seminar can serve as preparation for the defense.

## Human Subjects Protections (IRB) Certification

Students are required to provide evidence that they have completed an approved education program in human subjects protections. This should be done at the time of appointment to a graduate research assistantship position, at the start of the preceptorship, or at the start of thesis/dissertation research. More information is available about the human subjects protections certification on the University of Iowa's Human Subjects Office website.

## Examinations

All doctoral students must successfully complete a qualifying examination, a comprehensive examination, a dissertation prospectus, and a dissertation. The research topic and content, which vary depending on the program of study, must be approved by a student's dissertation committee.

Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in epidemiology in a combined degree program offered by the Carver College of Medicine and the College of Public Health. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Admission

Applicants must apply through the Schools of Public Health Application Service (SOPHAS); they also must pay the required application fee to the Graduate College through the University of Iowa Office of Admissions when prompted. For detailed application information, visit How to Apply to the Department of Epidemiology on the department's website.

The epidemiology faculty considers several factors when evaluating applications for admission, including Graduate Record Exam (GRE) General Test scores, grade-point average, letters of recommendation, intent and motivation for graduate study, and research interests. Students with deficiencies in one area may be admitted if all other components of their application are very strong.

All applicants must hold a baccalaureate degree (an MS or MPH usually is required) and must have a cumulative grade-point average of at least 3.00. Courses in the biological, physical, and mathematical sciences provide important background; one semester of calculus, one semester of statistics or biostatistics, and two semesters of biological sciences are highly recommended. Computing skills also are desirable.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

All applicants and students are required to have strong written and oral communication skills.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
The application deadline for fall admission is April 1.

## Financial Support

A limited number of graduate research assistantships are available for advanced students; for information, consult the department. For information on financing education through jobs, grants, and loans, contact the university's Office of Student Financial Aid.
Scholarships for incoming students are available; for information, visit the Department of Epidemiology website.
Opportunities for funded predoctoral fellowships are available. Funded positions sponsored by federal agencies are available only to U.S. citizens.

## Career Advancement

The program prepares graduate students for careers as scientists, teachers, and practitioners of epidemiologic methods. Employment opportunities exist in academic institutions; local, state, and federal health agencies; and in private enterprises.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Students who did not complete the Epidemiology MS program at UI are required to take EPID:5950 Preceptorship or receive program approval to substitute a previously completed equivalent course; must be completed by end of the first year.
c Taken during spring semester of the first year (or after completion of epidemiology core coursework); same as the MS final examination with the addition of an essay exam.
d Students must attend the Epidemiology department seminar and are expected to achieve at least $80 \%$ attendance during each semester of enrollment; PhD students are required to make one presentation at Department Seminar preferably during the semester of the dissertation defense.
e Taken in the fall and spring of first year for 0 s.h. and 1 s.h., respectively.
f PhD students are required to achieve at least $80 \%$ attendance for five semesters; prior MS attendance does not count. If taken for 1 s.h., the credit will not be applied toward the minimum semesters hours required for the PhD in Epidemiology.
g Students with a strong biosciences background may substitute PATH:5270 for PATH:8133 if it fits better with their training plan. PATH:5270 is an a advanced course that requires a strong foundation in molecular biology and related disciplines, but may be suitable for some students.
h Students must complete either BIOS:6210 (typically during second year fall semester) or BIOS:6310 (typically during third year fall semester).
i At least 3 s.h. of electives must be from the Epidemiology department (prefix EPID) and outside of Research Interest Area; see General Catalog and website for coursework and specifics. Work with faculty advisor to select appropriate graduate elective coursework in Research Interest Area.
j Taken after the majority of coursework for the PhD degree has been completed.
k Dissertation defense.

# Health Management and Policy 

## Head

- George L. Wehby

Graduate degrees: MHA; MS in health services and policy research; PhD in health services and policy

Faculty: https://www.public-health.uiowa.edu/hmp-faculty-list/
Website: https://www.public-health.uiowa.edu/hmp/
The Department of Health Management and Policy educates health care professionals for leadership roles in an increasingly complex and dynamic health care system. Graduates hold key executive, academic, research, government, and consulting positions in all areas of health management and policy, both in the United States and abroad.

The department offers the MHA in a traditional program track and an executive track. It also collaborates with the Tippie College of Business and the College of Law to provide concurrent and combined MHA/graduate and professional degree programs. In addition, the MS in health services and policy research, the policy subprogram for the Master of Public Health (MPH), the PhD in health services and policy, and the graduate Certificate in Healthcare Management [p. 2024] are offered.

The department's degree programs rank among the foremost in the field. The MHA is accredited by the Commission on Accreditation of Healthcare Management Education. The PhD program, established in 1950, was the nation's first doctoral program in health care management.

## MPH Subprogram

The subprogram prepares individuals for careers in health policy analysis, system and organizational planning, and program evaluation. Graduates find positions in federal, state, and local government as well as in professional associations and private agencies. See the Master of Public Health, MPH [p. 1964] in the catalog.

## Alumni Relations

An active alumni association with more than 1,000 members supports the MHA program in a number of ways including scholarships, consultation on curriculum, continuing education, research, and fund development. Alumni serve as visiting faculty, consultants, mentors, and preceptors for summer internships, residencies, and fellowships. The alumni association also provides a network for graduates entering the profession.

Graduates maintain their Iowa connection and learn about news of their classmates, the department, and faculty members and students through the website and social media.

## Samuel Levey Healthcare Leadership Symposium

The Department of Health Management and Policy and its alumni association jointly sponsor the annual Samuel Levey Healthcare Leadership Symposium, which is held in the spring. Renowned speakers from across the country present a variety of symposium topics. Health care leaders, alumni, educators, students, and friends of the department attend the symposium, which offers students a high quality educational experience in addition to the opportunity to network with faculty and alumni.

Programs

# Graduate Programs of Study 

## Majors

- Master of Health Administration [p. 2013]
- Master of Science in Health Services and Policy Research [p. 2017]
- Doctor of Philosophy in Health Services and Policy [p. 2019]

## Facilities

The Center for Health Policy and Research, the research arm of the Department of Health Management and Policy, is a universitywide interdisciplinary research facility. Faculty members from the Carver College of Medicine, the Tippie College of Business, and the Colleges of Dentistry, Liberal Arts and Sciences, Nursing, Pharmacy, and Public Health serve as investigators in a variety of studies at the center. Graduate students assist with ongoing research projects.

Primary project funding for the center comes from the National Institutes of Health, the State of Iowa, the Agency for Healthcare Research and Quality, and the Patient-Centered Outcomes Research Initiative, as well as from foundations and private organizations.

The center also sponsors educational activities and promotes collaboration among health organizations through frequent exchanges with professional and provider associations, policy and planning groups, insurance organizations, health delivery institutions, and other members of the health services research community.

## Courses

## Health Management and Policy Courses

HMP:4000 Introduction to the U.S. Health Care System 3 s.h. The U.S. health care system; socioeconomic, political, and environmental forces that influence the organization, financing, and delivery of personal and public health services; health services, policy, concepts, terminology.

## HMP:5000 Professional Development Seminar <br> 0-1 s.h.

Development of critical foundational management skills: business writing, personal presentation, teamwork, providing feedback, selfassessment, engaging other professionals, and organizational ethics.
HMP:5001 Interprofessional Health Care Administration I 3 s.h. Concepts and methods related to developing and leading interprofessional teams; emphasis on roles and responsibilities in health care teams, communication, and conflict management; team development.
HMP:5002 Interprofessional Health Care Administration II 3 s.h. Concepts and methods related to developing and leading interprofessional teams with an emphasis on values and ethics, including human resources concepts and skills, and building an organizational culture that supports interprofessional collaborative practice. Prerequisites: HMP:5001.
HMP:5005 Introduction to Healthcare Organization and Policy

$$
3 \text { s.h. }
$$

Organization of U.S. healthcare system, health policies that shape its development; historical, socioeconomic, political, environmental forces that influence the organization, financing, and delivery of personal and public health services; health services, policy concepts, and terminology, including health determinants, access to care, system integration, policy development, federalism.

HMP:5200 Healthcare Management
Application of basic management principles such as leadership, goal setting, decision-making, and human resource management to healthcare organizations.

## HMP:5230 Population Health

1,3 s.h.
Relationship between health care needs and utilization; emphasis on epidemiological concepts related to presence of disease and health care needs in a community; approaches to forecasting need and utilization of services.
HMP:5291 Performance Improvement in Healthcare 1-2 s.h.
General lean and six sigma principles; application to health care solutions; examples from University of Iowa Hospitals \& Clinics, other institutions.
HMP:5310 Healthcare Quality Management 2-3 s.h.
Fundamentals of patient safety, quality improvement techniques, performance measurement approaches, and analytical tools including data collection methodologies used by managers in healthcare and public health settings.

## HMP:5315 Health Information Systems

Conceptual, practical aspects of analysis, development, and use of computer-based information systems; emphasis on application to the health sciences environment.

## HMP:5320 Analytics for Healthcare Management 3 s.h.

 Introduction to analytical techniques for making business decisions with emphasis on health care; using Excel and associated tools in practical problem solving; probability and statistical concepts and applications in strategic settings.
## HMP:5342 Lean Six Sigma in Health Care

2-3 s.h.
Managerial approach combining Six Sigma methods and tools with lean manufacturing enterprise philosophy; eliminating waste of physical resources, time, effort, and talent while assuring quality in production and organizational processes; provides basic understanding of Six Sigma and Lean and DMAIC process (Six Sigma structure); application of basic tools to reduce waste while augmenting satisfaction among health care customers.
HMP:5350 Hospital Organization and Management 2-3 s.h. Role of hospitals, governance, organizational structure, medical staff organization, departmental operations. Prerequisites: HMP:5005 and HMP:5200.

## HMP:5402 Corporate Financial Reporting

arr.
Introduction to accounting concepts, principles, and analyses; contemporary financial reporting practices with emphasis on preparation, analysis, and use of financial statement information for management decisions; fundamentals of accounting measurement and disclosure.
HMP:5410 Health Economics I 3 s.h.
Microeconomic principles applied to health care, health insurance, information and uncertainty, models of physician and hospital behavior, theory of the firm, market structure, regulation, competitive reform, managed care.
HMP:5450 Health Insurance and Managed Care 3 s.h.
History and theory of insurance, comparative health systems, health systems and networks, HMOs, public health insurance, care for uninsured; emphasis on public policy. Prerequisites: HMP:5005. Corequisites: PHAR:6330 or HMP:5410. Same as GHS:5455.

## HMP:5610 Health Policy

1-3 s.h.
Policy process, policies and programs that shape provision of health care in the United States; health policies such as Medicare, Medicaid, Older Americans Act.

HMP:5650 Health Policy Analysis 3 s.h.
Introduction to analysis of contemporary health policy issues; frameworks for conducting analysis of health policy process and content; qualitative and quantitative methods for policy analysis; how to present policy-relevant information effectively. Prerequisites: HMP:5005.

HMP:5750 Medicare and Medicaid Policy 3 s.h.
Health policies most pertinent to Americans over age of 65. Same as ASP:5750.

HMP:5810 MHA Internship
arr.
HMP:6055 Topics in Health Administration 1-3 s.h.
Topics related to contemporary problems that concern health care students, administrators.

HMP:6110 Strategic Planning and Marketing 3-4 s.h. Strategy in health care including role of mission, vision, values, environmental analysis, strategic alternatives, organizational design, and evaluation of strategic decisions. Prerequisites: HMP:5200.

HMP:6150 MHA Integrative Capstone $\mathbf{2 - 3}$ s.h.
Integration and application of theories, concepts, principles; case studies. Prerequisites: HMP:5200 and HMP:6110.
HMP:6310 Human Resources Management in Healthcare 1-3 s.h. Overview of human resource management theories and practices for health care organizations; strategic human resource management, equal employment, staffing, training and development, appraisal, compensation. Prerequisites: HMP:5200.

## HMP:6315 Healthcare Ethics

1-2 s.h.
Biomedical and organization ethics in the contemporary healthcare environment; ethical concepts and principles, ethical issues that confront executive, clinical, and governance leaders in context of complex health organizations.

## HMP:6350 Medical Practice Administration

3 s.h.
Survey of medical practice culture, operations, governance, financials, role(s) in health care system, and future. Prerequisites: HMP:5005 and HMP:5200.
HMP:6355 Leadership of Healthcare Organizations 2-3 s.h. Management and leadership concepts and their application in healthcare organizations. Prerequisites: HMP:5200.
HMP:6360 Nonprofit Organizational Effectiveness I 3 s.h.
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fundraising. Same as MGMT:9150, PBAF:6278, RELS:6070, SPST:6010, SSW:6247, URP:6278.
HMP:6365 Nonprofit Organizational Effectiveness II
3 s.h.
Qualities for leadership of nonprofit organizations, including
relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: for HMP:6365-HMP:6360 or
MGMT:9150. Same as MGMT:9160, PBAF:6279, RELS:6075, SPST:6020, SSW:6248, URP:6279.
HMP:6410 Healthcare Financial Management 3 s.h.
Issues in working capital management, capital financing, cost analysis and rate setting, budgeting, reimbursement, managed care contracting and health reform initiatives; emphasis on use of information from accounting, financial management systems.

HMP:6610 Legal Aspects of Healthcare 2-3 s.h.
Statutory and common law frameworks applicable to healthcare system; court decisions that illustrate applications of general legal doctrines in hospital and health settings.

HMP:6710 Federalism and Health Policy 3 s.h.
How American government's organization shapes development and implementation of health policy, programs, services.

Contemporary health policy issues; theoretical and applied perspectives; social justice and health care for vulnerable populations
(e.g., mental health, nursing homes); readings, discussion.

Prerequisites: HMP:5610.
HMP:6850 Independent Study and Research
arr.
Supervised tutorial.
HMP:6855 Administrative Practicum 2-3 s.h.
Experience with operational and planning matters in a health care setting. Requirements: second-year standing and GPA of at least 3.00 for two consecutive semesters.

HMP:6860 Administrative Residency/Fellowship arr.
HMP:7250 Organizational Behavior and Theory in Health
Care 3 s.h.

Key concepts of organizational behavior and organizational theory and their application to health care organizations and health services; perspectives from theoretical writings and empirical studies.
Requirements: PhD standing and knowledge of human services organizations.
HMP:7550 Cost Effectiveness and Decision Analysis 3 s.h.
Methods of cost-effectiveness analysis and decision analysis; applications to resource allocation decisions in public health and medicine.
HMP:7910 Seminar in Contemporary Health Issues 0 s.h.
Review of relevant literature on methodological substantive issues in health care, presentations by researchers on health services and policy research.
HMP:7930 PhD Independent Research
1-3 s.h.
Experience in empirical research through one or more substantive research experiences, with faculty mentor; authorship or coauthorship of at least one manuscript suitable for publication in peer review journal. Requirements: PhD in health services and policy and satisfactory completion of PhD preliminary exams.

## HMP:7940 Primary Data and Mixed Methods

3 s.h.
Overview of research design and methods used to address health services research questions; collection of primary data and use of qualitative and mixed methods approaches.
HMP:7950 Design Issues in Health Service Research 3 s.h. Design and causal inference reliability and validity in measurement; rules of evidence; research design for randomized-control trials, observational studies, meta-analysis.
HMP:7960 Analytic Issues in Health Services Research I 3 s.h. Analytic tools used in health services research; focus on applications in nonexperimental research settings, such as analyses using administrative claims data or preexisting public use data sets.
HMP:7965 Analytic Issues in Health Services Research II 3 s.h. Continuation of HMP:7960; advanced applications, including panel data and qualitative response models. Prerequisites: HMP:7960. Same as PHAR:7331.

## HMP:7970 Seminar in Instruction and Professional

## Development

1-3 s.h.
Opportunity for PhD students to develop research and teaching skills through presentations, readings, and workshops on professional development topics. Requirements: satisfactory completion of PhD preliminary exams.

HMP:7990 Thesis/Dissertation
arr.
Research for preparation of dissertation; seminar presentation.

## Master of Health

## Administration, MHA

## Learning Outcomes

The MHA program prepares graduates for their initial positions as health care managers and provides a solid foundation for executive career development in a variety of health organizations.

## Core Competencies

## Leading People

## Professionalism

- Demonstrate effective verbal communication, including but not limited to formal individual and team presentations; and prepare effective written business communications.
- Think critically and assess the potential impact and consequences of decisions in a broad variety of situations.
- Commit to ethical professional behavior.
- Commit to the personal pursuit of professional development.

## Team Development

- Use leadership practices that support team effectiveness.
- Perform effectively on teams and in different team roles as appropriate to the situation.
- Support effective conflict management approaches in interpersonal and team situations.
- Integrate the knowledge and experiences of other professions, as appropriate, to inform and implement decisions.

## Managing Resources

## Finances

- Interpret balance sheets and income statements.
- Compile and analyze financial information to develop a business plan for a new service or program.
- Explain revenue cycle and its impact on financial stability.
- Summarize the process for strategic capital formation.

## Operations

- Distinguish different approaches to organizational design for the organization and delivery of health care.
- Use various improvement tools to address quality, safety, and efficiency goals, including lean techniques and performance monitoring tools.
- Develop an evaluation plan based on operational or strategic goals.
- Use organizational behavior concepts to solve problems and make decisions in the day-to-day management of health care organizations.
- Apply concepts and techniques related to the management of human resources in health care organizations.
- Interpret ethical issues and legal concerns and use appropriate approaches to analyze and resolve them, including recognizing when to seek counsel.

## Information

- Explain the roles of, and relationship between, electronic medical records and financial data systems for clinical and strategic decision-making and for evaluating the quality and efficiency of care.
- Analyze data and use the results to address strategic, operational, financial, and quality performance indicators for health care organizations.

## Setting Strategic Direction

- Value the roles and relationships of governance, executive leadership, and external stakeholders in strategically addressing the health needs of a community or target population.
- Conduct an environmental assessment to identify changing needs/ demands of a community, including an analysis of demographics, epidemiological data, organizational capacity, competitor strategies, technological changes, regulatory issues, and payment methods.
- Develop a business plan to propose a new service or program, addressing strategic objectives, financial analysis, structural and staffing implications, and evaluation.

## Improving Population Health

- Appreciate the impact of social and behavioral determinants of health and their interrelationships on health and health care delivery.
- Distinguish and compare the major settings for, and types of, health care services, including individual and population health, and payers.
- Explain the process for developing and implementing new policies and regulations at the state and federal levels.
- Analyze new health care regulations/laws to determine the likely impact on different stakeholders, including care delivery organizations, payers, and individuals.
- Analyze the impact of changes to payment mechanisms on health care delivery and health outcomes using economic and insurance concepts.
- Relate the roles of health care and public health in contributing to the health of a defined population.
- Assess health care workforce need projections and critical issues related to workforce needs for the future.

## Requirements

The Master of Health Administration (MHA) requires 60 s.h. of graduate credit earned in two academic years of full-time study. Transfer credit and course waivers may be accepted, but all students are expected to complete a minimum of 54 s.h. at the University of Iowa during their course of study. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree.
The program prepares students for a wide variety of positions in health care management. It is designed to provide a comprehensive understanding of issues encountered by health care delivery organizations and strong business skills. Graduates are well prepared to advance to senior executive roles in a variety of health care organizations.

Students work with their advisors to create a plan of study that incorporates required and elective coursework that supports their career goals in areas such as operations management, managed care, or financial management. Required courses in management, economics, law, managerial finance, and financial accounting focus on health care applications. Students also may take coursework in other University of Iowa departments and programs, such as business, planning and public affairs, and aging and longevity studies.
During the first year, students are introduced to the social, political, economic, and financial environments of health care organizations. The concepts, tools, and techniques necessary for effective management also are presented. During the second year, courses focus on in-depth health care applications of management concepts
that integrate prior coursework and develop skills in areas relating to students' special interests and career objectives.

The Master of Health Administration requires the following coursework.

## Core Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| HMP:5000 | Professional Development Seminar (taken four times for 1 s.h. each) | 4 |
| HMP:5005 | Introduction to Healthcare Organization and Policy | 3 |
| HMP:5200 | Healthcare Management | 3 |
| HMP:5230 | Population Health | 3 |
| HMP:5310 | Healthcare Quality Management | 3 |
| HMP:5315 | Health Information Systems | 3 |
| HMP:5320 | Analytics for Healthcare Management | 3 |
| HMP:5402 | Corporate Financial Reporting | 3 |
| HMP:5410 | Health Economics I | 3 |
| HMP:5610 | Health Policy | 3 |
| HMP:5810 | MHA Internship | 1 |
| HMP:6055 | Topics in Health Administration (when topic is health care payment methods) | 3 |
| HMP:6110 | Strategic Planning and Marketing | 3 |
| HMP:6150 | MHA Integrative Capstone | 3 |
| HMP:6310 | Human Resources Management in Healthcare | 3 |
| HMP:6355 | Leadership of Healthcare Organizations | 2 |
| HMP:6410 | Healthcare Financial Management | 3 |
| HMP:6610 | Legal Aspects of Healthcare | 3 |
| CPH:6100 | Essentials of Public Health | 2 |
| Total Hours |  | 54 |

## Electives

Students choose 6 s.h. of elective coursework; they may count a maximum of 6 s.h. of elective credit earned outside the Department of Health Management and Policy toward the MHA degree.

## Summer Internships, Fellowships, Residencies

The department facilitates placement of MHA students in required summer internships between the first and second years of study. Internships offer opportunities for practical experience interacting with executives in a health care setting. Internships are full-time positions that usually last $10-12$ weeks. Students normally receive a salary or stipend, and in some cases, assistance with living arrangements.

Most MHA students complement their academic training with a postgraduate fellowship or residency. Such experiences provide opportunities to observe, develop, and demonstrate management skills and to develop connections with colleagues. The department takes an active role in helping students identify and secure fellowship and residency positions.

## Executive MHA Subprogram

The executive Master of Health Administration subprogram (EMHA) requires 45 s.h. of graduate credit and typically is completed in two years. The plan of study is designed for working professionals who wish to advance their knowledge and skills in order to become effective health care administrators. The EMHA objectives are to:

- provide working professionals with advanced knowledge and skills in health care management;
- position experienced professionals to become effective health care administrators; and
- meet the need for leadership in transforming health care financing and delivery in dynamic environments.

The EMHA's curricular emphases are administrative skills specific to health care, population health administration, and interprofessional health care administration.

Students complete three courses each fall and spring semester and one course in each of two summer sessions. Courses are taught in person on Iowa City and Des Moines campuses by combinations of expert executives and faculty. Instruction is case- and team-focused.

The Master of Health Administration (executive MHA subprogram) requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Interprofessional Health Care |  |
| HMP:5001 | Administration I |  |
| HMP:5002 | Interprofessional Health Care <br>  <br>  <br>  <br> Administration II | 3 |
| HMP:5200 | Healthcare Management |  |
| HMP:5230 | Population Health | 3 |
| HMP:5310 | Healthcare Quality Management | 1 |
| HMP:5315 | Health Information Systems | 2 |
| HMP:5320 | Analytics for Healthcare | 2 |
| HMP:5342 | Management | 3 |
| HMP:5402 | Corporate Financial Reporting | 3 |
| HMP:5410 | Health Economics I | 3 |
| HMP:5610 | Health Policy | 3 |
| HMP:6110 | Strategic Planning and | 3 |
| HMP:6150 | Marketing | 3 |
| HMP:6355 | MHA Integrative Capstone | 2 |
| HMP:6410 | Leadership of Healthcare | 3 |
| HMP:6610 | Organizations | 3 |
| CPH:6100 | Healthcare Financial | 3 |
| Total Hours | Management | 3 |
|  | Legal Aspects of Healthcare | 3 |
|  | Essentials of Public Health | 3 |

For more information, visit Executive MHA Track on the College of Public Health website.

## Combined Programs

Students interested in combining an MHA with a master's or professional degree in another field should discuss their plans with both academic units and indicate their interest when they apply to the MHA program.

## MHA (Law Subprogram)/JD

The combined Master of Health Administration with a law subprogram/Juris Doctor requires 123 s.h. of postbaccalaureate credit. The program allows students to gain training in both health care management and law. Students typically complete the program in four years; they enroll only in law courses during the first year.
Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the JD, see Juris Doctor, JD [p. 1720] (College of Law) in the catalog.

## Admission

Applicants must apply through the Schools of Public Health Application Service (SOPHAS) or the Health Administration, Management, and Policy Centralized Application Service (HAMPCAS). All applicants also must submit the supplemental University of Iowa application fee. For detailed application information, visit HMP Degree Programs on the Department of Health Management and Policy website.
Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
Students begin the program in fall semester. Personal interviews are required before admission; the admissions committee conducts Skype interviews with applicants unable to visit campus.

## Financial Support

A variety of financial assistance is available, including scholarships and awards, student loans, and graduate research assistantships. Every effort is made to provide financial support to students who demonstrate need and maintain satisfactory academic standards. Some awards are offered in recognition of outstanding academic performance and experience, regardless of need.
Graduate research assistantships generally are awarded on the basis of student merit and the department's need. Assistantships afford valuable experience in health services research and management projects. Graduate research assistants work 10 hours per week and must apply for reappointment each year. Assistantships provide a stipend, some tuition assistance, and entitle students to the resident tuition rate.

Opportunities also exist for part-time employment both on and off campus. For information and financial aid application forms, contact the university's Office of Student Financial Aid.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Minimum of 54 s.h. must be completed at UI; up to 6 s.h. of graduate transfer credits from an accredited institution or other units at UI may be allowed upon approval.
b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
d Registration required each semester.
e See the department website for list of approved courses; maximum of 6 s.h. may be earned outside the department. Work with faculty advisor to determine elective courses and sequence

## Health Services and Policy

## Research, MS

## Learning Outcomes

Upon completion of the MS in health services and policy research, students will be able to:

- evaluate the organization, financing, and delivery of U.S. health services;
- evaluate policies for their impact on public health and health equity;
- analyze the behavior of health care market stakeholders using the principles of health economics
- select the appropriate study design and statistical models for health services research questions and outcomes;
- use statistical computing programs to analyze quantitative data; and
- conduct a study using health services research methods.

## Requirements

The Master of Science program in health services and policy research requires a minimum of 30 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree.

Students are provided with content knowledge and methodological skills pertaining to the practice of health services research. Evaluating the organization, delivery, and outcomes of health services and the impacts of health policies on health services use and health outcomes is intrinsically interdisciplinary. As such, students will acquire both theoretical knowledge of U.S. health policy, health economics, and the organization and delivery of health services as well as a range of analytic skills that will allow them to design and execute health services research studies.

The MS includes coursework in health services research design, statistical methods, health policy, health economics, and the organization and delivery of health care services. Additionally, students will be required to complete a final research project. Students have the opportunity to work with faculty mentors on research projects and participate in cocurricular learning opportunities that focus on health services research, such as seminars, journal clubs, and conferences. The MS will be a pathway to the PhD in health services and policy.

The MS with a major in health services and policy research requires the following coursework.

## Core Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these (21 s.h.): |  | 3 |
| HMP:5005 | Introduction to Healthcare <br> Organization and Policy | 3 |
| or HMP:4000 | Introduction to the U.S. Health Care System |  |
| HMP:5410 | Health Economics I | 3 |
| HMP:5610 | Health Policy | 3 |
| HMP:7950 | Design Issues in Health Service <br> Research | 3 |
| BIOS:4120 | Introduction to Biostatistics | 3 |
| BIOS:5120 | Regression Modeling and <br> ANOVA in the Health Sciences | 3 |
| CPH:6100 | Essentials of Public Health | 3 |

Principles of Scholarly
1
Integrity: Public Health (taken in the fall and spring semesters for 0 s.h. and 1 s.h.)

## Electives

Students choose 6 s.h. of elective coursework. The following are possible elective choices.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| HMP:5650 | Health Policy Analysis | 3 |
| HMP:6610 | Legal Aspects of Healthcare | $2-3$ |
| HMP:6710 | Federalism and Health Policy | 3 |
| HMP:6750 | Seminar in Health Policy | 3 |
| HMP:7550 | Cost Effectiveness and Decision | 3 |
| HMP:7940 | Analysis |  |
| HMP:7950 | Methods |  |

## Independent Research

Students complete 3 s.h. of independent research work in the following course.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| HMP:6850 | Independent Study and | 3 |
|  | Research |  |

## Admission

Applicants must apply through the Schools of Public Health Application Service (SOPHAS). All applicants also must submit the supplemental University of Iowa application fee. For detailed application information, visit HMP Degree Programs on the Department of Health Management and Policy website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Students begin the program in fall semester. Campus visits are encouraged.

## Financial Support

A variety of financial assistance is available, including scholarships and awards, student loans, and graduate research assistantships. Every effort is made to provide financial support to students who demonstrate need and maintain satisfactory academic standards. Some awards are offered in recognition of outstanding academic performance and experience, regardless of need.
Graduate research assistantships generally are awarded on the basis of student merit and the department's need. Assistantships afford valuable experience in health policy research and management projects. Graduate research assistants work 10 hours per week and must apply for reappointment each year. Assistantships provide a stipend, some tuition assistance, and entitle students to the resident tuition rate.

Opportunities also exist for part-time employment both on and off campus. For information and financial aid application forms, contact the university's Office of Student Financial Aid.

## Career Advancement

The MS in health services and policy research prepares graduates for research careers in a variety of applied settings including academia, think tanks, government agencies, private sector organizations and other settings where health services research skills are sought.
The program is designed to provide clinicians with the skills needed to work as health services researchers in a wide variety of settings. Given the program's strong emphasis on research design, evaluation, and quantitative methods, it is a pathway for students who desire to prepare themselves to be competitive applicants for doctoral studies in health services research, health policy, health economics, and other closely related fields at the University of Iowa or other leading institutions.

The program also is designed in a way that allows students in the department's PhD in health services and policy program to earn the MS degree as they complete coursework and exam requirements for the PhD program en passant.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Health Services and Policy, PhD

## Learning Outcomes

Students will be able to:

- demonstrate breadth of health services research theoretical and conceptual knowledge by applying alternative models from a range of relevant disciplines;
- apply in-depth disciplinary knowledge and skills relevant to health services research;
- apply knowledge of the structures, performance, quality, policy, and environmental context of health and health care to formulate solutions for health policy problems;
- pose innovative and important health service research questions, informed by systematic reviews of the literature, stakeholder needs, and relevant theoretical and conceptual models;
- select appropriate interventional, observational, or qualitative study designs to address specific health services research questions;
- know how to collect primary health and health care data obtained by survey, qualitative, or mixed methods;
- know how to assemble secondary data from existing public and private sources;
- use conceptual models and operational measures to specify study constructs for a health services research question and develop variables that reliably and validly measure these constructs;
- implement research protocols with standardized procedures that ensure reproducibility of the science;
- use appropriate analytical methods to clarify associations between variables and to delineate causal inferences;
- ensure the ethical and responsible conduct of research in the design, implementation, and dissemination of health services research;
- work collaboratively in multidisciplinary teams;
- effectively communicate the findings and implications of health services research through multiple modalities to technical and lay audiences;
- understand the importance of collaborating with stakeholders, such as policymakers, organizations, and communities to plan, conduct, and translate health services research into policy and practice; and
- demonstrate hands-on teaching experience.

## Requirements

The Doctor of Philosophy program in health services and policy requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.25 to earn the degree. Those who enter with a master's degree can apply to use transfer credit toward their doctorate degree with approval of the health services and policy program.

The PhD program is oriented toward applied, interdisciplinary research and scholarly inquiry. Students develop mastery of theories and research methodologies necessary to study the complex American health system. They work closely with faculty mentors on research projects and develop research design and methodology skills through coursework and an apprenticeship model of training.

Individual plans of study allow students to prepare for specific careers, and small class size encourages frequent student-faculty interaction,
including participation in research projects as well as scholarly publications.
The PhD program provides students flexibility to create a plan of study that allows them to either specialize in one of three research interest areas-health economics, health management and organization, or health policy - or to create a plan of study that includes elective courses from multiple research interest areas. Students work with a faculty advisor and a mentorship team of faculty members from their interest area(s). The advisor and mentorship team participate in initial planning with students during orientation and in annual professional development reviews. Students conduct required independent study and thesis research in their interest area(s); their comprehensive exam and dissertation committees include faculty members from their chose research interest area(s).

## Research Interest Areas

The health economics research interest area provides students with in-depth training in economic theory and its applications to health and health care. Students in this area acquire advanced theoretical knowledge and state-of-the-art analytical and econometric skills that enable them to build careers as health economists in academic departments, research organizations, and health care industries. The health economics interest area provides comprehensive coursework covering all main areas in health and health care economics, including demand for health and health care, economic determinants and consequences of health behaviors, health insurance, economic organization of health care markets, impact of government policy and regulation, econometric methods, and economic evaluation methods.

The health management and organization research interest area prepares students to conduct research on organizational, strategic, and operational issues that confront health institutions and systems. Emphasis is placed on health care applications of theories, concepts, and models from the fields of organizational theory (macro), organizational behavior (micro), strategic management, and operations management. Students in this area may conduct research on topics such as effectiveness of health care organizations; improving the organization and management of health delivery processes; measuring performance and productivity of health care organizations; examining the relative influence of mission, culture, and financial incentives in hospitals and health organizations; and management of professional groups. Graduates of the health management and organization research interest area should find employment in academic and research organizations, integrated delivery systems, and governmental units that are interested in the impact of organizational structures and managerial practices on performance.

The health policy research interest area prepares students to undertake health services and policy research aimed at improving care and management of illness and disability and enhancing individual and community health outcomes. Students develop the skills necessary to conduct health services and policy research. They take courses in the basic disciplines that contribute to the fields of public and social policy (e.g., law, political science, public affairs) and courses that focus on the structure and organization of health policy making in the United States. They study the formation and implementation of health policies; the effect of health policies on the organization, financing, and delivery of health services; the effect of health policies on access to, use of, and costs of health services; and approaches to improve access and effectiveness of care for vulnerable populations. Students who complete the health policy research interest area are prepared for employment in academic research institutions, policy organizations, and governmental agencies and departments.
The PhD with a major in health services and policy requires the following.

## Coursework

Students take coursework in core content areas covering health care systems, health economics, health management and organizations, and health policy and courses in research design and statistical analysis. Credit may be awarded for guided and independent research project work. Students may waive specific courses, depending on their background. For more detailed information about PhD and focus area curricula, see the PhD in Health Services and Policy on the Department of Health Management and Policy website.

## Electives

Students take elective coursework so that they are exposed to other areas or to gain greater depth within their area of interest.

## Examinations

Students must pass a preliminary examination that tests mastery of core material covered during the first year in the department, including American health systems, health services research methods, and foundation courses in their research interest area.

Students take the comprehensive examination at or near the end of their formal coursework. The comprehensive exam focuses on a student's specific area of research and theoretical interest.

## Dissertation

Doctoral candidates prepare dissertations based on original research that tests, extends, or applies concepts or principles to a health care problem related to their chosen research interest area(s). Students may complete a traditional dissertation or a dissertation based on three publishable papers.

## Admission

Applicants must apply through the Schools of Public Health Application Service (SOPHAS). All applicants also must submit the supplement University of Iowa application fee. For detailed application information, visit HMP Degree Programs on the Department of Health Management and Policy website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Students begin the program in fall semester. Personal interviews are required before admission; the admissions committee conducts video interviews with applicants.

## Financial Support

A variety of financial assistance is available, including scholarships and awards, student loans, and graduate research assistantships. Every effort is made to provide financial support to students who demonstrate need and maintain satisfactory academic standards. Some awards are offered in recognition of outstanding academic performance and experience, regardless of need.

Graduate research assistantships generally are awarded on the basis of student merit and the department's need. Assistantships afford valuable experience in health services research and management projects. Graduate research assistants work 10-20 hours per week and must apply for reappointment each year. Assistantships provide a stipend, some tuition assistance, and entitle students to the resident tuition rate.

Opportunities also exist for part-time employment both on and off campus. For information and financial aid application forms, contact the university's Office of Student Financial Aid.

## Career Advancement

The program prepares students for careers in health services research, education, and policy leadership in universities, government agencies, and health organizations.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
c Usually completed by the end of the first year.
d Must be taken during the first year of the PhD program.
e No formal registration required.
f See the General Catalog for list of approved courses.
g Work with faculty advisor to select appropriate elective coursework.
h Written and oral examination; usually completed by fourth year fall semester if entering with a master's degree or by fifth year fall semester if entering without a master's degree. See the General Catalog and department website for specifics.
i Typically completed within a year after passing the Comprehensive Exam.
j Dissertation defense.

## Healthcare Management

## Head, Department of Health Management and Policy

- George L. Wehby

Graduate certificate: healthcare management
Website: https://www.public-health.uiowa.edu/healthcare-management-certificate/

The graduate Certificate in Healthcare Management provides physicians, nurses, other clinicians, and managers the foundational business and leadership skills specific to health care. The certificate is administered by the Department of Health Management and Policy [p. 2010]. The Graduate College grants the certificate.

Programs
Graduate Program of Study

## Certificate

- Certificate in Healthcare Management [p. 2024]

## Healthcare Management, Graduate Certificate

## Requirements

The graduate Certificate in Healthcare Management requires a minimum of 15 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 in order to earn the certificate. Enrollment is limited to 10 students.

The required courses provide foundational business and leadership skills specific to health care. They are offered in five-week blocks at University of Iowa campuses in Iowa City and Des Moines. Students complete the five health care courses over a period of 15 months; all 15 s.h. earned in the certificate program may be used toward degree requirements for the Master of Health Administration, MHA [p. 2013] executive subprogram (EMHA).
The Certificate in Healthcare Management requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| HMP:5200 | Healthcare Management | 3 |
| HMP:5402 | Corporate Financial Reporting | 3 |
| HMP:5610 | Health Policy | 3 |
| HMP:6355 | Leadership of Healthcare | 3 |
|  | Organizations |  |
| HMP:6410 | Healthcare Financial | 3 |
|  | Management |  |

For more information, visit Graduate Certificate in Healthcare Management on the Department of Health Management and Policy website.

# Occupational and Environmental Health 

Interim Head

- Thomas M. Peters

Graduate degrees: MS in occupational and environmental health; PhD in occupational and environmental health

Faculty: https://www.public-health.uiowa.edu/oeh-faculty-list/
Website: https://www.public-health.uiowa.edu/oeh/
The Department of Occupational and Environmental Health focuses on assessment of risk factors in the physical environment and their relationship to disease-particularly health problems of agricultural and industrial workers. Students are guided by faculty members whose research interests include rural health care delivery, agricultural health, environmental health, occupational medicine, occupational lung disease, mammalian toxicology, inhalation toxicology, ergonomics, indoor air quality, occupational injury, injury epidemiology, injury prevention programs, aerosol physics, air and water quality, environmental chemistry, analytical toxicology, and environmental health in developing countries.
In addition to the MS and PhD degrees in occupational and environmental health, the department offers a subprogram for the Master of Public Health (MPH) degree in occupational and environmental health. The subprogram provides students with a broad perspective on public health and career preparation for a variety of professional positions in occupational and environmental health. Students have the option of selecting focused coursework in the following areas: global environmental health, occupational health, rural health and safety, and injury and violence prevention. For more information, see the Master of Public Health [p. 1964] in the catalog.
The department also offers the College of Public Health's graduate Certificate in Agricultural Safety and Health; see Agricultural Safety and Health [p. 1977] in the catalog.

## Programs

Graduate Programs of Study

## Majors

- Occupational and environmental health subprogram for the Master of Public Health [p. 1964] degree
- Master of Science in Occupational and Environmental Health [p. 2028]
- Doctor of Philosophy in Occupational and Environmental Health [p. 2033]

## Facilities

The Department of Occupational and Environmental Health is housed in the College of Public Health Building, on the University's health sciences campus, and at the Institute for Rural and Environmental Health, at the University of Iowa Research Park. College of Public Health-based laboratory facilities give researchers and students access to cutting-edge technologies for the study of occupational and environmental health.

## Pulmonary Toxicology Facility

The Pulmonary Toxicology Facility provides a full array of inhalation toxicology, aerosol science, and bioaerosol assay services. A primary focus of the facility is the study of toxicants found in
the agricultural environment and related exposure situations. The facility is particularly well-equipped for studying organic dusts and bioaerosols.

## Industrial Hygiene Laboratory

The Industrial Hygiene Laboratory provides expertise and equipment for exposure assessment in occupational settings. The laboratory offers a range of sample collection capabilities and an extensive inventory of sampling equipment. Field and laboratory services are available through laboratory support exposure-response studies and control technology development studies in a variety of occupational arenas, including agriculture, construction, and indoor environments (home and office).

## Heartland Center for Occupational Health and Safety

The Heartland Center for Occupational Health and Safety, one of 18 education and research centers funded by the National Institute of Occupational Safety and Health, provides training, education, and outreach. Its program areas are industrial hygiene, occupational safety, ergonomics, agricultural safety and health, occupational injury prevention, and continuing education.

## Courses

## Occupational and Environmental Health Courses

OEH:4240 Global Environmental Health
3 s.h.
Environmental health comprised of aspects of human health determined by interactions with physical, chemical, biological, and social factors in global environment; worldview and survey; focus on issues most relevant today; sustainability; air, water, and soil pollution and remediation; occupational health; injury prevention; food safety and security; risk assessment; environmental health policy.

## OEH:4260 Global Water and Health <br> 3 s.h.

Overview of global water and health; microbial and toxicant identification, water-related adverse health effects, risk assessment, approaches to reduce water-related disease, distal water-related influences (e.g., global warming), and historic cases. Same as GHS:4260.
OEH:4310 Occupational Ergonomics: Principles 3 s.h. Fundamental topics of occupational ergonomics important to future industrial hygienists, engineers, and other occupational safety and health practitioners; introduction to principles of ergonomics with focus on physiological and anatomical capabilities of the worker and interaction of workers with their environments; topics include anthropometry, physiological and biomechanical basis of work, occupational musculoskeletal disorders, risk factors for musculoskeletal disorders, workplace and tool design, manual materials handling, workplace environment, job analysis, and elements of ergonomics process to improve job design.
OEH:4510 Injury and Violence Prevention 3 s.h. Theory, research, and practice of injury control; unintentional and intentional injuries; local, national, international injury issues. Same as CPH:4230, EPID:4510.

OEH:4530 Global Road Safety
3 s.h.
Road safety problem, data sources, research methods used in field, and how intervention and prevention programs are developed and evaluated; lecture, hands-on approaches. Same as CPH:4220, GHS:4530.

## OEH:4540 Statistics for Experimenters

Application of statistical techniques to evaluate data derived from experimental samples designs; use of spreadsheets, statistical software; design and analysis of experiments; regression analysis; model building; practical applications. Same as CEE:4187.

## OEH:4920 Solid and Hazardous Wastes 3 s.h.

Sources, characteristics, collection, disposal of solid and hazardous wastes; environmental impacts of hazardous waste management; resource recovery systems. Requirements: for OEH:4920-
OEH:4240. Same as CEE:4158.

## OEH:5010 Occupational and Environmental Health

 Seminar0-1 s.h.
Contemporary topics in occupational health, agricultural and comparative medicine, environmental health.

OEH:5110 Managing and Sharing Your Research Data
Overview of essential practices in managing the data you collect and generate during research. Topics include file organization; documenting your work and lab notebooks; optimizing spreadsheet data and cleanup tools; reproducibility; funder and publisher requirements; and conclude with how and where to share and publish data, from choosing a repository to creating a data record, including licensing, ownership, preservation of access, reuse, and citation. Applicable for any student currently doing research, or planning to do so. Same as CEE:5110.

## OEH:5410 Occupational Safety

Principles and practices of occupational safety; applications in industrial and other occupational settings; interactions with other disciplines.
OEH:5620 Occupational Health
3 s.h.
Introduction to occupational health and safety; for graduate students in agricultural health and safety, environmental health, ergonomics, industrial hygiene, injury prevention, occupational epidemiology, and occupational medicine.
OEH:6110 Rural Health and Agricultural Medicine 3 s.h. Clinical orientation of specific health problems of rural residents, agricultural workers; rural health care delivery, socioeconomic issues in agriculture and their effects on health and safety of the agricultural population; occupational health problems, environmental health hazards in rural areas.

## OEH:6120 Current Topics in Agriculture and Rural

 Health0-1 s.h.
Current issues that affect the health of rural populations including agricultural hazards, pesticide exposure, mental health, global agricultural health, and food safety.
OEH:6420 Methods in Exposure Science 3 s.h.
Principles, with emphasis on recognition of chemical health hazards, physical health hazards at work. Corequisites: OEH:5620, if not taken as a prerequisite.
OEH:6431 Assessing Noise Hazards 1 s.h.
Scientific methods to measure noise, assess human noise exposure, and implement technology to control noise exposure.
OEH:6432 Assessing Nonionizing Radiation Hazards 1 s.h. Scientific methods to measure nonionizing, assess human nonionizing exposure, and implement technology to control nonionizing exposure.

## OEH:6433 Assessing Ionizing Radiation Hazards

1 s.h.
Scientific methods to measure ionizing radiation, assess human ionizing radiation exposure, and implement technology to control ionizing radiation exposure.

## OEH:6440 Control of Occupational Hazards 3 s.h.

Physical science concepts applied to control of occupational hazards ranging from dusts to mists to vapors; strategies, management issues, personal protective equipment, implementation skills; in-depth instruction on local exhaust ventilation system design.

OEH:6450 Aerosol Technology
Particle statistics and physics of aerosols, including inertia, diffusion, nucleation, evaporation, condensation, optics, electrical properties; relationship to fields such as agriculture, nanotechnology, environmental and occupational health, atmospheric chemistry, drug delivery.
OEH:6460 Quantitative Exposure Assessment: Study Design and Evaluation

1,3 s.h.
Principles of designing occupational and environmental exposure assessment studies, analyzing exposure data, and conducting exposure-response evaluations. Requirements: prior experience in statistics.

OEH:6510 Environmental and Occupational Epidemiology 3 s.h. Overview of methods to interpret and perform environmental and occupational epidemiologic studies with focus on exposure assessment; valuable insights into identifying regional, national, global environmental, and occupational health-related issues. Prerequisites: EPID:4400. Same as EPID:6200.

## OEH:6520 Injury Epidemiology 3 s.h.

How epidemiology can be applied to injury prevention and control: epidemiology literature, specific methodological problems involved in the epidemiology of injuries, critical evaluation of research articles. Offered spring semesters of odd years. Prerequisites: EPID:4400. Same as EPID:6510.
OEH:6710 Human Toxicology and Risk Assessment 3 s.h. Sources, routes of absorption, effects of environmental toxicants affecting man; pathophysiology of toxicant actions, including those of air and water pollutants, metals, pesticides, solvents, food toxicants, chemicals. Requirements: college chemistry and biology.
OEH:6720 Advanced Toxicology
4 s.h.
Hepatic metabolism and toxification mechanisms, pulmonary and immunotoxicology, nervous system poisons and their mechanisms of action, general and molecular concepts of chemical carcinogenesis. Prerequisites: OEH:6710 or PHAR:6501.

OEH:7000 Thesis/Dissertation arr.
OEH:7010 Problems in Occupational and Environmental Health
arr.
Didactic material in occupational and environmental health; may include tutorial, seminar, faculty-directed independent work (e.g., literature search, project, short research project).
OEH:7020 Independent Study in Occupational and Environmental Health
In-depth pursuit of an area in occupational and environmental health requiring substantial creativity and independence.
OEH:7040 Preceptorship in Occupational and Environmental arr.
Health
Work experience using knowledge and skills acquired in the
classroom; arranged in conjunction with departmental or collegiate
activities or with governmental agencies or private industry. acivites or with governe.

OEH:7050 Occupational and Environmental Health Internship

0,3 s.h.
Comprehensive and integrated application of knowledge acquired in a workplace setting; structured approach to demonstrate skills and knowledge obtained through a workplace experience. Corequisites: OEH:5620 or OEH:4240, if not taken as a prerequisite.
OEH:7060 Research Design in Occupational and Environmental Health

3 s.h.
Development of a research grant proposal based on student's independent research aims and hypotheses, preparation of accompanying documents for a grant proposal submission, and development of a comprehensive dissemination plan that articulates how academic and lay audiences will be reached with research findings.

## OEH:7070 Interpreting Occupational and Environmental Health

## Research

3 s.h.
Systematic evaluation of methodological strengths and weaknesses of published research studies in occupational and environmental health. Prerequisites: (OEH:5620 or OEH:4240) and (BIOS:4120 or OEH:4540) and EPID:4400.

## Occupational and <br> Environmental Health, MS

An MS in occupational and environmental health (OEH) is offered with optional subprograms in agricultural safety and health and industrial hygiene.

## Learning Outcomes

## Occupational and Environmental Health General Outcomes

Students will be able to:

- describe major environmental hazards that adversely affect human health,
- demonstrate the use of regulatory guidelines that seek to control occupational health and injury issues,
- apply epidemiological principles used to assess associations between exposure to occupational health and injury hazards on health outcomes,
- use computer software and statistical methods to test a hypothesis, and
- use intervention and evaluation theory to prevent occupational health and injury hazards.

## MS in OEH Outcomes (Agricultural Safety and Health Subprogram)

Students will be able to:

- describe the basic concepts of agricultural safety and health,
- summarize epidemiological principles that can be used to determine health outcomes associated with exposure to occupational hazards,
- explain appropriate research design and methodology related to the field of agricultural safety and health,
- communicate agricultural safety and health concepts both orally and in writing,
- interpret the significance of occupationally derived data relative to an exposure or health outcome,
- analyze agricultural safety and health intervention programs, and
- design and implement a research project relative to peer-reviewed literature in agricultural safety and health.

## MS in OEH Outcomes (Industrial Hygiene Subprogram)

- anticipate and recognize occupational and environmental hazards (i.e., physical, chemical, and biological agents, factors, and stressors) generated by or associated with defined sources, unit operations, and/or processes;
- describe qualitative and quantitative aspects of generation of hazards;
- apply scientific principles, instrumentation, and methods to adequately assess exposures to hazards;
- organize and interpret exposure data using qualitative and quantitative methods in the context of physiological, epidemiological, and toxicological knowledge of the response of the human body to hazards;
- recommend and evaluate controls to reduce or eliminate hazards with regard to traditional hierarchy considerations;
- understand applicable business, managerial, and leadership practices with emphasis on program and project management;
- communicate effectively and appropriately to advocate for continuous improvement in worker health and safety to pertinent audiences, including workforce, management, the public, and professional peers;
- interpret and apply applicable and emerging regulations, consensus standards, and best practices affecting occupational and environmental health;
- demonstrate an understanding of the professional code of ethics; and
- understand the value of and path to attain professional certification in industrial hygiene and allied fields.

## Requirements

The Master of Science in occupational and environmental health requires $38-43 \mathrm{~s} . \mathrm{h}$. of graduate credit. The degree program is offered with three options-the MS in occupational and environmental health (38 s.h.) without a subprogram, the MS with an agricultural safety and health subprogram (42 s.h.), or the MS with an industrial hygiene subprogram (43 s.h.).

## MS Without Subprogram

The Master of Science with a major in occupational and environmental health without a subprogram requires a minimum of 38 s.h. and includes the following coursework.

## Core Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these (16 s.h.): |  | 3 |
| OEH:4240 | Global Environmental Health | 1 |
| OEH:5010 | Occupational and <br> Environmental Health Seminar | 3 |
| OEH:5620 | Occupational Health | 3 |
| BIOS:4120 | Introduction to Biostatistics | 2 |
| CPH:6100 | Essentials of Public Health | 1 |
| CPH:7270 | Principles of Scholarly |  |
| EPID:4400 | Integrity: Public Health | 3 |
| At least 6 s.h. from these: |  |  |
| OEH:4260 | Epidemiology I: Principles | 3 |
| OEH:4310 | Occupational Ergonomics: <br> OEH:4510 | Principles |
| OEH:5410 | Injury and Violence Prevention | 3 |
| OEH:6110 | Occupational Safety | 3 |
| OEH:6710 | Rural Health and Agricultural <br> Medicine | 3 |
|  | Human Toxicology and Risk <br> Assessment | 3 |

## Electives

Credit earned in elective coursework and the thesis completes the 38 s.h. required for the degree. Students work with their advisor to select courses appropriate for their professional goals.

## Thesis

A thesis is required. Students may earn a maximum of 6 s.h. for the thesis.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| OEH:7000 | Thesis/Dissertation | arr. |

## MS With Agricultural Safety and Health Subprogram

The program prepares students for careers in education, health care, insurance, and agribusiness as specialists in agricultural safety and health.

The Master of Science with a major in occupational and environmental health with an agricultural safety and health subprogram requires a minimum of 42 s.h. and includes the following coursework.

Core Courses, Agricultural Safety and Health Subprogram

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these (29 s.h.): |  |  |
| OEH:4240 | Global Environmental Health | 3 |
| OEH:5010 | Occupational and Environmental Health Seminar | 1 |
| OEH:5410 | Occupational Safety | 3 |
| OEH:5620 | Occupational Health | 3 |
| OEH:6110 | Rural Health and Agricultural Medicine | 3 |
| OEH:6120 | Current Topics in Agriculture and Rural Health (taken three times for 1 s.h. each) | 3 |
| OEH:6710 | Human Toxicology and Risk Assessment | 3 |
| OEH:7040 | Preceptorship in Occupational and Environmental Health | 1 |
| BIOS:4120 | Introduction to Biostatistics | 3 |
| CPH:6100 | Essentials of Public Health | 2 |
| CPH:7270 | Principles of Scholarly Integrity: Public Health | 1 |
| EPID:4400 | Epidemiology I: Principles | 3 |

## Electives, Agricultural Safety and Health Subprogram

Credit earned in elective coursework and the thesis completes the 42 s.h. required for the degree. Students work with their advisor to select courses appropriate for their professional goals.

## Recommended Elective Courses

This is a recommended list of elective coursework; however, any occupational and environmental health course (prefix OEH) may be taken as an elective.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| OEH:4260 | Global Water and Health | 3 |
| OEH:4310 | Occupational Ergonomics: | 3 |
|  | Principles | 3 |
| OEH:4510 | Injury and Violence Prevention | 3 |
| OEH:6420 | Methods in Exposure Science | 1 |
| OEH:6431 | Assessing Noise Hazards | 1 |
| OEH:6432 | Assessing Nonionizing |  |
|  | Radiation Hazards | 1 |
| OEH:6433 | Assessing Ionizing Radiation | 3 |
| OEH:6440 | Hazards |  |
|  | Control of Occupational | 3 |
| OEH:6520 | Hazards | 4 |

CPH:4200
Agriculture, Food Systems, and Sustainability

## Approved Elective Courses From Other Departments

Courses not on this list may be used as elective credit with advisor approval.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CBH:4105 | Introduction to Health <br> Promotion and Disease <br> Prevention | 3 |
| CBH:5235 | Community-Based Participatory <br> Research | 3 |
| CBH:5305 | Evaluation: Approaches and <br> Applications | 3 |
| CBH:6220 | Health Communication <br> Campaigns | 3 |
| EPID:5600 | Introduction to Epidemiology <br> Data Management and Analysis | 3 |
| EPID:6400 | Epidemiology II: Advanced <br> Methods | 4 |
| ISE:3400 | Human Factors | 3 |

\section*{Thesis, Agricultural Safety and Health Subprogram <br> A thesis is required. Students may earn a maximum of $4 \mathrm{~s} . \mathrm{h}$. for the thesis. <br> | Course \# | Title | Hours |
| :--- | :--- | ---: |
| OEH:7000 | Thesis/Dissertation | arr. |}

## MS With Industrial Hygiene Subprogram

The program prepares students for careers in industrial hygiene as well as the broad field of occupational and environmental health. Career opportunities are available in health and safety departments of industries; in consulting firms; in academic institutions; and in local, state, and federal public health agencies.

Students choose either the thesis (research option) or nonthesis (internship option). Those that select the thesis option conduct a research project and write a thesis. Those that select the nonthesis option complete an internship.

The Master of Science with a major in occupational and environmental health with an industrial hygiene subprogram requires a minimum of 43 s.h. and includes the following coursework.

## Required Courses, Industrial Hygiene Subprogram

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these (22 s.h.): |  |  |
| OEH:5010 | Occupational and |  |
|  | Environmental Health Seminar | 1 |
| OEH:5620 | Occupational Health | 3 |
| OEH:6420 | Methods in Exposure Science | 3 |
| OEH:6440 | Control of Occupational | 3 |
| OEH:6710 | Hazards | 3 |
| BIOS:4120 | Human Toxicology and Risk | 3 |
| CPH:6100 | Assessment | 3 |
|  | Introduction to Biostatistics | 3 |

| CPH:7270 | Principles of Scholarly <br> Integrity: Public Health | 1 |
| :--- | :--- | :--- |
| EPID:4400 | Epidemiology I: Principles | 3 |
| At least 12 s.h. from | these: | 3 |
| OEH:4240 | Global Environmental Health |  |
| OEH:4310 | Occupational Ergonomics: <br> Principles | 3 |
| OEH:4510 | Injury and Violence Prevention | 3 |
| OEH:5410 | Occupational Safety | 3 |
| OEH:6431 | Assessing Noise Hazards | 1 |
| OEH:6432 | Assessing Nonionizing | 1 |
| OEH:6433 | Radiation Hazards | 1 |
| OEH:6450 | Assessing Ionizing Radiation | 3 |
| OEH:6520 | Hazards | Aerosol Technology |

## Thesis or Nonthesis Option, Industrial Hygiene Subprogram

## Thesis (Research Option)

## Research Project and Thesis

Completion of a research project and thesis is required. A maximum of 6 s.h. is allowed for thesis credit in OEH:7000.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| OEH:7000 | Thesis/Dissertation | arr. |

## Electives, Industrial Hygiene Subprogram

Thesis option students complete additional elective coursework to earn at least 43 s.h. required for the major. Students work with their advisor to select courses most appropriate for their professional goals.

## Nonthesis (Internship Option)

## Internship and Internship Report

Completion of an internship and an internship report is required. A maximum of 3 s.h. is allowed for internship credit in OEH:7050. Students are required to complete a minimum 150-hour internship.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| OEH:7050 | Occupational and | 0,3 |
|  | Environmental Health |  |
|  | Internship |  |

## Electives, Nonthesis

Nonthesis option students complete additional elective coursework to earn at least 43 s.h. required for the major. Students work with their advisor to select courses most appropriate for their professional goals.

## Combined Programs <br> MS/MS in Urban and Regional Planning

The combined Master of Science in occupational and environmental health/Master of Science in urban and regional planning program requires 65 s.h. of graduate credit. For information about the graduate program in urban and regional planning, see the MS in urban and regional planning [p. 1689] (Graduate College) in the catalog.

Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the combined degree program.

## Admission

Applicants must apply through the Schools of Public Health Application Service (SOPHAS); they also must apply for admission to the Graduate College through the University of Iowa Office of Admissions. For detailed application information and admission requirements, visit How to Apply to Occupational and Environmental Health on the department's website.

The occupational and environmental health faculty takes several factors into consideration when evaluating applications for admission, including grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests. Students with deficiencies in one area may be admitted if all other components of their application are very strong.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET).
MS applicants must hold a bachelor's degree and have a cumulative grade-point average of at least 3.00. Undergraduate preparation for applicants should include coursework in mathematics, biology, chemistry, and either physical sciences or engineering, depending on the applicant's chosen specialty area.
Students may enter in the fall. May 1 is the final application deadline.

## Financial Support

Most students receive financial support through traineeships, graduate research assistantships, and teaching assistantships.

Students accepted to programs with a focus on occupational health and safety, including agricultural safety and health, ergonomics, industrial hygiene, and occupational injury prevention, may receive traineeships and financial support in the form of fully paid tuition and a monthly stipend. These traineeships are offered through the Heartland Center for Occupational Health and Safety, and are only available for U.S. citizens and U.S. permanent residents.

Students with a focus on environmental health, global health, or environmental toxicology are generally funded by graduate research assistantships or teaching assistantships.

## Career Advancement

The program prepares students for professional and academic careers in environmental and occupational health. Graduates will be qualified for a career in a range of private, public, and academic positions; consulting firms; state and federal occupational and environmental agencies; chemical and consumer products areas; pharmaceutical industries; and universities.

## Academic Plans

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

e Complete OEH:7050 twice, first for 0 s.h. and then for 3 s.h.
f Complete at least $12 \mathrm{~s} . \mathrm{h}$. of electives from the list of approved courses in the General Catalog, and then complete additional elective coursework to earn at least 43 s.h. required for the major. Students work with their advisor to select courses most appropriate for their professional goals.
g Typically this course is offered in spring semesters of even years only. Check MyUI for course availability since offerings are subject to change.

## Occupational and

Environmental Health, PhD
A PhD in occupational and environmental health (OEH) is an advanced research degree that emphasizes depth of knowledge and original research skills. The degree is designed to develop leaders in environmental and occupational health research and practice.
Students work with their faculty advisor to design a specialized curriculum of coursework and research projects in the following areas:

- agricultural safety and health;
- environmental health;
- environmental toxicology;
- ergonomics;
- industrial hygiene; and
- occupational injury prevention.

## Learning Outcomes

Students will:

- develop a proposal for grant funding;
- use appropriate analytic methods to interpret data relevant to the field of occupational and environmental health;
- develop a plan to communicate research findings to various audiences;
- design a research study in the field of occupational and environmental health; and
- evaluate the strengths and limitations of peer-reviewed studies in the field of occupational and environmental health.

## Requirements

The Doctor of Philosophy program in occupational and environmental health requires 72 s.h. of graduate credit. All students must complete a dissertation.
The Doctor of Philosophy with a major in occupational and environmental health requires the following work.

## Required Courses

Students may use a course only once to fulfill a requirement.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| OEH:4240 | Global Environmental Health | 3 |
| OEH:5010 | Occupational and <br> Environmental Health Seminar | 1 |
| OEH:5620 | Occupational Health | 3 |
| OEH:7060 | Research Design in Occupational and Environmental Health | 3 |
| OEH:7070 | Interpreting Occupational and Environmental Health Research | 3 |
| BIOS:4120 | Introduction to Biostatistics | 3 |
| CPH:6100 | Essentials of Public Health | 2 |
| CPH:7270 | Principles of Scholarly Integrity: Public Health | 1 |
| EPID:4400 | Epidemiology I: Principles | 3 |
| One of these: |  |  |
| OEH:6460 | Quantitative Exposure <br> Assessment: Study Design and <br> Evaluation | 1,3 |

| OEH:6520 | Injury Epidemiology | 3 |
| :---: | :---: | :---: |
| At least 9 s.h. from these: |  |  |
| OEH:6110 | Rural Health and Agricultural Medicine | 3 |
| OEH:6420 | Methods in Exposure Science | 3 |
| OEH:6431 | Assessing Noise Hazards | 1 |
| OEH:6432 | Assessing Nonionizing Radiation Hazards | 1 |
| OEH:6433 | Assessing Ionizing Radiation Hazards | 1 |
| OEH:6440 | Control of Occupational Hazards | 3 |
| OEH:6450 | Aerosol Technology | 3 |
| OEH:6460 | Quantitative Exposure <br> Assessment: Study Design and Evaluation | 3 |
| OEH:6520 | Injury Epidemiology | 3 |
| OEH:6710 | Human Toxicology and Risk Assessment | 3 |
| OEH:6720 | Advanced Toxicology | 4 |
| BIOS:5120 | Regression Modeling and ANOVA in the Health Sciences | 3 |
| BIOS:5130 | Applied Categorical Data Analysis | 3 |
| BIOS:6310 | Introductory Longitudinal Data Analysis | 3 |
| EPID:6400 | Epidemiology II: Advanced Methods | 4 |
| STAT:6516 | Design of Experiments | 3 |

## Electives

Students must earn a minimum of 18 s.h. in non-research-related courses, including classroom courses or equivalent web-based courses. Students work with their advisor to select courses appropriate for their professional goals.

## Research Credit

Students earn the remaining credit for the PhD by completing any combination of the following courses or other classroom courses. All students must complete a dissertation.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| OEH:7000 | Thesis/Dissertation | arr. |
| OEH:7020 | Independent Study | arr. |
|  | in Occupational and |  |
|  | Environmental Health |  |

## Admission

Applicants must apply through the Schools of Public Health Application Service (SOPHAS); they also must apply for admission to the Graduate College through the University of Iowa Office of Admissions. For detailed application information and admission requirements, visit the How to Apply to Occupational and Environmental Health on the department's website.
The occupational and environmental health faculty takes several factors into consideration when evaluating applications for admission, including grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests. Students with deficiencies in one area may be admitted if all other components of their application are very strong.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET).
PhD applicants must hold a bachelor's degree and have a cumulative grade-point average of at least 3.25 . Completion of a master's program before beginning PhD study is recommended.

Students may enter in the fall. May 1 is the final application deadline.

## Financial Support

Most students receive financial support through traineeships, graduate research assistantships, and teaching assistantships.

Students accepted to programs with a focus on occupational health and safety, including agricultural safety and health, ergonomics, industrial hygiene, and occupational injury prevention, may receive traineeships and financial support in the form of fully paid tuition and a monthly stipend. These traineeships are offered through the Heartland Center for Occupational Health and Safety, and are only available for U.S. citizens and U.S. permanent residents.

Students with a focus on environmental health, global health, or environmental toxicology are generally funded by graduate research assistantships or teaching assistantships.

## Postdoctoral Positions

The College of Public Health's Environmental Health Sciences Training Program offers postdoctoral positions in environmental health/toxicology. Appointments are for two years with the possibility of an additional year. Applicants must be U.S. citizens or permanent residents.

## Career Advancement

The program prepares students for professional and academic careers in environmental and occupational health. Graduates will be qualified for a career in a range of private, public, and academic positions; consulting firms; state and federal occupational and environmental agencies; chemical and consumer products areas; pharmaceutical industries; and universities.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Complete OEH:5010 three times, twice for 0 s.h. and then once for 1 s.h.
c Take during the first semester of the program; not required if student has earned an MPH degree.
d Complete CPH:7270 twice, first for 0 s.h. and then for 1 s.h.
e Students must earn a minimum of 18 s.h. in non-research-related courses, including classroom courses or equivalent web-based courses. Students work with their advisor to select courses appropriate for their professional goals.
f Complete by the end of the third semester.
g Or take OEH:6520 during second year spring semester.
h See the General Catalog for list of approved courses; work with faculty advisor to determine appropriate graduate coursework and sequence.
i Complete prior to semester in which the dissertation defense takes place.
$j$ Consists of a written and oral component; complete by the end of the fifth semester.
k Research credits may also be earned by taking any combination of OEH:7000, OEH:7020, and additional classroom courses. Work with faculty advisor to determine appropriate coursework and sequence.
1 Dissertation defense.

# Translational and Clinical Investigation 

Head, Department of Epidemiology

- Elizabeth A. Chrischilles

Graduate certificate: translational and clinical investigation
Website: https://www.public-health.uiowa.edu/certificate-in-translational-and-clinical-investigation/

The Department of Epidemiology [p. 1996] and the Institute for Clinical and Translational Science (ICTS) offer the Certificate in Translational and Clinical Investigation to practicing academic clinicians who have completed doctoral training.

Programs
Graduate Program of Study

## Certificate

- Certificate in Translational and Clinical Investigation [p. 2037]

## Translational and Clinical Investigation, Graduate Certificate

## Requirements

The graduate Certificate in Translational and Clinical Investigation requires $17 \mathrm{~s} . \mathrm{h}$. of graduate credit and may be completed in one year. Certificate requirements include didactic coursework, clinical research preceptorships, and clinical research seminar participation.
The Department of Epidemiology [p. 1996] and the Institute for Clinical and Translational Science (ICTS) offer the certificate for clinicians who seek advanced training in clinical methodology and applied patient-oriented research skills. The certificate program is open to individuals who hold a doctoral-level degree in a clinical discipline (e.g., MD, DO, DDS, PhD, PharmD, DVM), are practicing academic clinicians, and are admitted as graduate students to the College of Public Health or are enrolled in a basic or health science doctoral program at the University of Iowa. Other admission requirements are similar to those for the MS program in epidemiology.

The Certificate in Translational and Clinical Investigation requires the following work.

# University College 

## Dean

- Tanya M. Uden-Holman

## Associate Deans

- Andrew Beckett, Anne W. Zalenski

Website: https://uc.uiowa.edu
University College (UC) is home to a wide range of programs for University of Iowa students and precollege students. An overview of the many programs that are housed in University College is provided below.

## Undergraduate Degrees

Two online degree programs, the Bachelor of Applied Studies [p. 2043] (BAS) and the Bachelor of Liberal Studies [p. 2046] (BLS), are administered through University College. Both programs enable students to complete a bachelor's degree through Distance and Online Education [p. 2061]. The BAS, designed for graduates of community college technical programs, provides alternatives to traditional academic majors, permitting students to plan their own emphasis areas in consultation with their advisors. The BLS is an interdisciplinary undergraduate degree program without a traditional academic major; students select a track and work with their advisors to enroll in courses that meet their individual objectives.

## Undergraduate Certificates, Minors, Training, and Coursework

The college offers undergraduate Certificates in Clinical and Translational Science [p. 2056], Leadership Studies [p. 2066], Nonprofit Leadership and Philanthropy [p. 2077], and Sustainability [p. 2101]. University College also is home to many undergraduate research opportunities in the science, technology, engineering, and mathematics (STEM) fields as well as in microbiology and medical scientist training.
An affiliated program, Lifetime Leisure Skills [p. 2071], offers a broad range of sports and fitness activities, while the Reserve Officer Training Corps programs, Aerospace Studies (Air Force ROTC) [p. 2040], and Military Science (Army ROTC) [p. 2074] prepare undergraduate students for commissions as officers and offer minors. An undergraduate minor is offered in Urban Studies [p. 2114] that allows students to understand and address urban issues. Public Policy [p. 2080] offers a minor so that students are able to analyze public policies and the process of policymaking. In addition, there are major college-level programs such as the University of Iowa Honors Program [p. 2108], Study Abroad, [p. 2083] and Career Center Programs [p. 2053].
Students from the University of Iowa, Iowa State University, and the University of Northern Iowa may take courses at Iowa Lakeside Laboratory [p. 2063], and Summer Research Experiences for Undergraduates [p. 2100] develops research skills in students led by UI faculty members.

University College offers courses in several K-12 programs as well: the Center for [p. 2055]Inclusive Academic Excellence, the Secondary Student Training Program [p. 2082], and University of Iowa Upward Bound [p. 2113].

## Student Success and Outreach

[^8]Many University College programs serve the entire undergraduate population (particularly first-year students) and are designed to smooth entering students' transition to college life. Students begin their connection to the University College when they take their first online course, CSI: 1600 Success at Iowa, at around the same time they attend Orientation. When they arrive on campus, they experience campus life for the first time with the On Iowa! program.
Other programs that promote success include Excelling @ Iowa, Tutor Iowa, and the Academic Resource Center (ARC). These direct service programs support students when they need support in their college career.

## Academic Support and Retention

Co-Directors: Danielle Martinez, Stephanie Preschel

Website: https://newstudents.uiowa.edu/success-iowa-online-course

## Distance and Online Education

Associate Dean: Anne W. Zalenski
Website: https://distance.uiowa.edu
Distance and Online Education [p. 2061] combines leading-edge technology and support with nationally recognized faculty to provide the best educational experience possible-online and on location. In partnership with University of Iowa colleges and departments, online and on location coursework provide degree and certificate opportunities for students looking to complete their degree from a highly ranked public institution. Courses offered through University College are taught by University of Iowa faculty and staff members.

# Aerospace Studies (Air Force ROTC) 

## Director

- Lt Col Matthew E. Youmans

Undergraduate minor: aerospace studies
Website: https://veterans.uiowa.edu/our-offices/air-force-rotc
The Aerospace Studies Program administers the Air Force Reserve Officer Training Corps (AFROTC) at the University of Iowa. AFROTC prepares highly qualified undergraduate students for commissions as officers in the United States Air Force.

While AFROTC is structured primarily for students pursuing activeduty Air Force commissions, any undergraduate or graduate student may take aerospace studies courses for academic credit, with the exception of the leadership laboratories. The amount of credit that may be applied toward a degree varies from college to college at the University of Iowa. The College of Liberal Arts and Sciences, for example, accepts a maximum of 20 s.h. of aerospace studies credit. Additionally, any undergraduate student may apply the courses toward the minor in aerospace studies.
In order to receive a commission, AFROTC cadets must satisfactorily complete all University of Iowa degree requirements as well as courses specified by the U.S. Air Force.

## Undergraduate and Graduate Programs

AFROTC offers programs lasting two, three, or four years. Joining early gives students the opportunity to try AFROTC without obligation. It also can give them an advantage in the scholarship selection process.
The AFROTC program's three main components are the general military course (GMC), the professional officer course (POC), and the Field Training (FT) program.

## General Military Course

The general military course (GMC) consists of one AFROTC course (1 s.h.) and a leadership laboratory taken each semester for two years. Any student who meets AFROTC qualifications and is in good academic standing is eligible to participate in the GMC. Students normally apply for the GMC up to the time they earn 60 s.h. Students who have earned more than 60 s.h. may enroll in the GMC if they are willing to extend their academic plan by a semester or more.

## Professional Officer Course

The professional officer course (POC) consists of one AFROTC course ( 3 s.h.) and a leadership laboratory taken each semester for two years. Students accepted into the POC make a commitment to serve a minimum of four years as U.S. Air Force officers. To enter the POC, students must be selected to attend and must successfully complete field training. Students generally take the POC during their last 60 s.h.

## Field Training

All POC applicants must successfully complete Field Training (FT) at a U.S. Air Force base. Selection to attend FT is competitive; if selected to attend, students experience an intensive, two-week program generally completed the summer after the sophomore year. It provides a first-hand look at the active duty Air Force and develops military leadership and discipline. Students participate in junior officer education, marksmanship, hand-to-hand combat training, physical fitness training, and expeditionary skills training in a simulated
environment. After completing FT, cadets are ready to return to school and assume leadership positions in the AFROTC program.

## Activities

Students may compete for acceptance to a variety of optional AFROTC summer training programs. If selected, a student may return to Field Training as a cadet training assistant (CTA), travel to another country for a cultural immersion program, or compete for other Air Force immersion programs as available. The Air Force provides transportation, meals, lodging, and a daily expense allowance for all summer programs.
The AFROTC cadet corps also sponsors community service projects, intramural athletics, and social events, including formal and informal dinners.

## Educational Delay

Cadets may request an educational delay to postpone entry to active duty until after completion of an advanced degree or professional training program. Selection for an educational delay is highly competitive.

## Financial Aid

Merit scholarships are available on a competitive basis for two and three years of study. They provide varying awards for tuition and fees, a stipend for books, and a monthly tax-free subsistence allowance. Applicants are selected based on objective and subjective factors. Students should apply to the director of the Aerospace Studies Program.

Nonscholarship cadets in the professional officer course receive some financial assistance. Junior-level cadets receive a $\$ 450$ tax-free subsistence allowance per month and senior-level cadets receive a $\$ 500$ tax-free subsistence allowance per month.

All uniforms and required AFROTC textbooks are furnished free of charge.

## Programs

## Undergraduate Program of Study

## Minor

- Minor in Aerospace Studies [p. 2042]

## Courses

## Aerospace Studies Courses

AERO:1100 Air Force Heritage and Values I 1 s.h. Introduction to the United States Air Force and Air Force Reserve Officer Training Corps (AFROTC); featured topics include structure of the U.S. Air Force, the Air Force's capabilities, career opportunities, benefits, Air Force installations, core values, leadership, teambuilding, and communication skills. Requirements: first-year or sophomore standing.
AERO:1119 Crosstown Air Force Mentoring 0 s.h. Mentoring opportunity from an Air Force Officer as needed to provide guidance on the Air Force way of life; for crosstown enrolled Air Force ROTC students. Requirements: crosstown enrollment as AFROTC cadet.

## AERO:1150 AFROTC Leadership Laboratory (LLAB) AS 100-

 FA1 s.h.
A progression of experiences designed to develop leadership ability; military customs and courtesies, drill and ceremonies, military professional development, the life and work of a junior officer; leadership skills in a practical, supervised military lab setting. Offered fall semesters. Corequisites: AERO:1100. Requirements: first-year or sophomore standing.
AERO:1159 Crosstown Air Force Lab 0 s.h.
A progression of experiences designed to develop leadership ability; military customs and courtesies, drill and ceremonies, and military professional development. Requirements: crosstown enrollment as AFROTC cadet.
AERO:1200 Air Force Heritage and Values II
Introduction to the United States Air Force (USAF) and Air Force Reserve Officer Training Corps (AFROTC); featured topics include evolution of the U.S. Air Force/Air Force history, principles of war/tenets of air power, what the Air Force brings to the joint fight, Department of the Air Force, and Air Force major commands; leadership concepts including ethical decisionmaking, communication, and professional speaking opportunities. Requirements: first-year or sophomore standing.
AERO:1250 AFROTC Leadership Laboratory (LLAB) AS 100-
SP 1 s.h. A progression of experiences designed to develop leadership ability; military customs and courtesies, drill and ceremonies, military professional development, the life and work of a junior officer; leadership skills in a practical, supervised military lab setting. Offered spring semesters. Corequisites: AERO:1200. Requirements: first-year or sophomore standing.
AERO:2100 Team and Leadership Fundamentals I 1 s.h.
Foundation for leadership and team building; concepts applied in team-building activities and class discussion, including demonstration of basic verbal and written communication; featured topics include listening, followership, and problem solving efficiently.

## AERO:2150 AFROTC Leadership Laboratory (LLAB) AS 200FA

See AERO:1150. Offered fall semesters. Corequisites: AERO:2100.

## AERO:2200 Team and Leadership Fundamentals II 1 s.h.

 Foundation for leadership and team building; concepts applied in team building activities and class discussion, including demonstration of basic verbal and written communication; featured topics include conflict management, comprehensive airman fitness, and a leadership capstone.AERO:2250 AFROTC Leadership Laboratory (LLAB) AS 200-
SP 1 s.h.
See AERO:1150. Offered spring semesters. Corequisites:
AERO:2200.
AERO:3100 Leadership Studies: Leading People and Effective Communication I 3 s.h.
Builds on leadership fundamentals taught in AERO:2100 and
AERO:2200; students study leadership and leadership skills to use in their future Air Force environment; profession of arms, communications skills, and ethics; case studies used to examine Air Force leadership situations and demonstrate and exercise practical application of the concepts studied. Requirements: junior or higher standing.
AERO:3150 AFROTC Leadership Laboratory (LLAB) AS 300FA 1 s.h.
See AERO:1150. Offered fall semesters. Corequisites: AERO:3100.

AERO:3200 Leadership Studies: Leading People and Effective Communication II 3 s.
Leadership and leadership skills used in the Air Force environment; continued study of the profession of arms, communication skills, and ethics taught in AERO:3100; creating a vision, mentoring, and other leadership fundamentals; students continue to hone their reading, writing, and speaking skills via several communication studies applications; case studies used to examine Air Force leadership situations, and to demonstrate and exercise practical application of the concepts studied; goal is to instill a more in-depth understanding of how to effectively lead people and organizations. Requirements: junior or higher standing.

## AERO:3250 AFROTC Leadership Laboratory (LLAB) AS 300-

## SP

 1 s.h.See AERO:1150. Offered spring semesters. Corequisites: AERO:3200.
AERO:4100 National Security/Leadership Responsibilities and Commissioning Preparation I 3 s.h. Introduction to the national security process, regional studies, advanced leadership ethics, and Air Force doctrine; focus specifically on current Air Force organization, leadership, and practical knowledge needed for a student's future as an Air Force officer; students improve oral and written communication skills and delve into military professionalism and ethics. Requirements: junior or higher standing.
AERO:4150 AFROTC Leadership Laboratory (LLAB) AS 400FA
See AERO:1150. Offered fall semesters. Corequisites: AERO:4100.
AERO:4200 National Security/Leadership Responsibilities and Commissioning Preparation II 3 s.h.
Continuation of AERO:4100 which introduced the national security
process, regional studies, advanced leadership ethics, and Air Force doctrine; students expand their knowledge to comprehend the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system; designed to prepare cadets for life as a second lieutenant; students continue to improve oral and written communication skills. Requirements: junior or higher standing.
AERO:4250 AFROTC Leadership Laboratory (LLAB) AS 400-
SP
1 s.h.
See AERO:1150. Offered spring semesters. Corequisites: AERO:4200.

## Aerospace Studies, Minor

## Requirements

The undergraduate minor in aerospace studies requires a minimum of 16 s.h. in aerospace studies program courses. Students must maintain a grade-point average of at least 2.50 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass. In order to count transfer coursework taken at other institutions toward the minor, students must have approval from the director of the Aerospace Studies Program.
The minor in aerospace studies requires the following coursework.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| AERO:1100 | Air Force Heritage and Values I | 1 |
| AERO:1200 | Air Force Heritage and Values II | 1 |
| AERO:2100 | Team and Leadership Fundamentals I | 1 |
| AERO:2200 | Team and Leadership Fundamentals II | 1 |
| AERO:3100 | Leadership Studies: Leading People and Effective Communication I | 3 |
| AERO:3200 | Leadership Studies: Leading People and Effective Communication II | 3 |
| AERO:4100 | National Security/Leadership <br> Responsibilities and Commissioning Preparation I | 3 |
| AERO:4200 | National Security/Leadership Responsibilities and Commissioning Preparation II | 3 |

## Bachelor of Applied Studies

## Associate Dean

- Anne W. Zalenski

## Program Director

- Dawn Freerks

## Undergraduate major: BAS

Website: https://basbls.uc.uiowa.edu/degree-requirements/bachelor-applied-studies

The Bachelor of Applied Studies (BAS) is designed for graduates of community colleges who wish to complete a bachelor's degree by distance education. The degree may be completed completely online or through a combination of on-site and online coursework. Students may earn credit toward the degree with a selection of several types of courses, including semester-based online courses, on-site courses at off-campus locations throughout Iowa, and regular session on-campus courses.
The BAS is a general undergraduate degree without a traditional academic major. Students can design an individual program or select from four optional emphasis areas: creative writing, human relations, justice studies, and political science. BAS students may complete multiple emphasis areas and earn undergraduate certificates offered by the University of Iowa. They may not enroll in a second college at the University of Iowa while completing the BAS degree.
Working with their academic advisors, BAS students may plan programs designed to advance their careers, begin new careers, or prepare for graduate or professional study. Students who have specific career goals or advanced degree programs in mind should determine what educational background they will need in order to achieve their goals, and they should include appropriate coursework in their BAS programs.
The BAS is awarded by University College [p. 2038] and is administered by Distance and Online Education [p. 2061].

## Programs

## Undergraduate Program of Study

## Major

- Bachelor of Applied Studies [p. 2044]

## Bachelor of Applied Studies, BAS

## Requirements

The Bachelor of Applied Studies requires a minimum of 120 s.h. and is intended to be completed entirely by distance education. Students must maintain a cumulative grade-point average of 2.00 or higher in all coursework attempted, all coursework taken at the University of Iowa, and all upper-level coursework.
After admission to the University of Iowa, one of the following residence requirements must be met-at least 90 s.h. completed at the University of Iowa, or 45 of the final 60 s.h. completed at the University of Iowa, or the final 30 s.h. completed at the University of Iowa.

Students must earn at least 60 s.h. of the minimum 120 s.h. required for the degree at four-year colleges, including 45 s.h. in upper-level coursework. University of Iowa upper-level courses are numbered from 3000 to 4999 . Some courses numbered below 3000 may be considered upper level for the BAS; for details, see BAS Upper-level Coursework on the Bachelor of Applied Studies website.
BAS students who earn the creative writing emphasis may not earn the Certificate in Writing (College of Liberal Arts and Sciences).
Students also must complete the following core requirements and a set of distribution areas; see BAS Core Requirements and Distribution Areas on the Bachelor of Applied Studies website for more information.

## Core Requirements

- Rhetoric coursework equivalent to composition II and speech.
- Quantitative or formal reasoning-3 s.h.
- Social sciences-3 s.h.
- Values, society, and diversity-3 s.h.
- Business/management-6 s.h.

## Distribution Areas

Students must complete 12 s.h. in three of the following five distribution areas (total of 36 s.h.). In each distribution area, 6 of the required 12 s.h. must be earned in upper-level courses.

- Communication and arts (e.g., journalism, communication studies, creative writing, art, music).
- Humanities (e.g., literature, history, philosophy, religion).
- Natural sciences and mathematics (e.g., mathematics, biology, statistics, computer science).
- Professional fields (e.g., business, education, nursing, social work, aging and longevity studies).
- Social sciences (e.g., sociology, psychology, economics, political science, anthropology).

All University College policies regarding grading, course drops, withdrawals, academic standards, and so forth apply to BAS students. For more information, see Taking University College Courses on the University College website.

## Optional Emphasis Area

Students may include an emphasis area in their BAS program.

## Creative Writing Emphasis Area

The creative writing emphasis area requires 18 s.h. It provides students with an understanding of the multiple facets of written communication. The emphasis area requires the following coursework.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| CLSA:3742/ | Word Power: Building English | 3 |
| WRIT:3742 | Vocabulary |  |
| CW:2100 | Creative Writing | 3 |
| CW:4897 | Novel Writing | 3 |
| At least three of these: |  |  |
| CINE:1150 | Introduction to Screenwriting for Nonmajors | 3 |
| CNW:1620 | Introduction to Creative Nonfiction | 3 |
| CW:2870 | Fiction Writing | 3 |
| CW:2875 | Poetry Writing | 3 |
| CW:3005/INTD:3005/ | Professional and Creative | 3 |
| WRIT:3005 | Business Communication |  |
| CW:3870 | Advanced Fiction Writing | 3 |
| CW:3875 | Advanced Poetry Writing | 3 |
| CW:4745/WRIT:4745 | The Sentence: Strategies for Writing | 3 |
| CW:4760/WRIT:4760 | The Art of Revision: Rewriting Prose for Clarity and Impact | 3 |
| WRIT:1500 | Writing Commons: A Community of Writers | 3 |

For additional details about the emphasis area and related careers, see Creative Writing Emphasis Area on the Bachelor of Applied Studies website. Students who earn the creative writing emphasis may not earn the Certificate in Writing (College of Liberal Arts and Sciences).

## Human Relations Emphasis Area

The human relations emphasis area requires 18 s.h. It focuses on human development, personality theory, interpersonal and group communication, multiculturalism, professional ethics, and the development of helping skills. The emphasis area requires the following coursework.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| CSED:4194 | Interpersonal Effectiveness | 3 |
| CSED:4197 | Citizenship in a Multicultural Society | 3 |
| CSED:4199 | Counseling for Related Professions | 3 |
| At least three of these: |  |  |
| CSED:4131 | Loss, Death, and Bereavement | 3 |
| $\begin{aligned} & \text { CSED:4162/ } \\ & \text { PSQF:4162 } \end{aligned}$ | Introduction to Couple and Family Therapy | 3 |
| CSED:4174 | Positive Psychology | 3 |
| CSED:4176 | Child Abuse: Assessment, Intervention, and Advocacy | 3 |
| CSED:4178 | Microcounseling | 3 |
| CSED:4179 | Sexuality Within the Helping Professions | 3 |
| CSED:4185 | Introduction to Substance Abuse | 3 |
| CSED:4195 | Ethics in Human Relations and Counseling | 3 |

For additional details about the emphasis area and related careers, see Human Relations Emphasis Area on the Bachelor of Applied Studies website.

## Justice Studies Emphasis Area

The justice studies emphasis area requires 18 s.h. It is a good choice for students who hold associate degrees in disciplines such as community service, corrections, criminal justice, law enforcement, police science, or public safety. The emphasis area requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: |  |  |
| CRIM:1410 | Introduction to Criminology | 3 |
| CSED:4197 | Citizenship in a Multicultural | 3 |
|  | Society | 3 |
| POLI:3111 | American Public Policy | $3-4$ |
| SOC:1030 | Contemporary Social Problems | 3 |
| SOC:4225 | The Social Psychology of |  |
|  | Leadership | 3 |
| At least four of these: | Treatment Interventions in |  |
| CRIM:4410 | Corrections |  |
|  | Criminal Punishment | 3 |
| CRIM:4420 | Child Abuse: Assessment, | 3 |
| CSED:4176 | Intervention, and Advocacy | 3 |
|  | Introduction to Substance Abuse | 3 |
| CSED:4185 | Interpersonal Effectiveness | 3 |
| CSED:4194 | Introduction to Human Rights | 3 |
| HRTS:2115/IS:2115 | Introduction to Law | 3 |
| MGMT:2000 | Politics of Terrorism | 3 |
| POLI:3503 | Social Inequality | 3 |
| SOC:2810 | Child Welfare Policy and |  |
| SSW:3797 | Practice | 3 |
| SSW:4100 | Social Work in the Criminal |  |
|  | Justice System |  |

For additional details about the emphasis area and related careers, see Justice Studies Emphasis Area on the Bachelor of Applied Studies website.

## Political Science Emphasis Area

The political science emphasis area requires 18 s.h. It focuses on the political role of the United States in shaping social and public policy worldwide and on the interplay between foreign and domestic politics. The emphasis area requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| Two of these: | Introduction to American | 3 |
| POLI:1100 | Politics |  |
| POLI:1200 | Introduction to Political <br> Behavior | 3 |
| POLI:1400 | Introduction to Comparative <br> Politics | 3 |
| POLI:1500 | Introduction to International <br> Relations | 3 |
| POLI:1501 | Introduction to American |  |
| At least four of these: | Foreign Policy | 3 |
| POLI:3100 | American State Politics |  |

| POLI:3102 | The U.S. Congress | 3 |
| :--- | :--- | :--- |
| POLI:3110 | Local Politics | 3 |
| POLI:3111 | American Public Policy | 3 |
| POLI:3116 | The Presidency | 3 |
| POLI:3202 | Political Psychology | 3 |
| POLI:3203 | Campaigns, Elections, and | 3 |
|  | Voting Behavior |  |
| POLI:3405 | Authoritarian Politics |  |
| POLI:3503 | Politics of Terrorism | 3 |
| POLI:3506 | Consequences of War | 3 |
| POLI:3519/ASP:3519 | Politics of Aging | 3 |

For additional details about the emphasis area and related careers, see Political Science Emphasis Area on the Bachelor of Applied Studies website.

## Admission

Individuals who wish to earn a BAS must apply for admission to the program by completing an application through the Office of Admissions. Additional information on the BAS program may be found on the Bachelor of Applied Studies website.
Applicants to the BAS program must have earned an associate degree from a regionally accredited institution. They must have a minimum of 60 s.h. of approved transfer credit, which includes career-technical credit.
Students who have an AA degree from a two-year institution participating in articulation agreements with the University of Iowa are considered to have satisfied the BAS core requirements, except for the business/management courses. Additional information on articulation agreements can be found on the Office of Admissions website.

Applicants who graduated from an Iowa community college or Waldorf College must have a cumulative grade-point average (GPA) of at least 2.00; those who graduated from Black Hawk College in Illinois must have a cumulative GPA of at least 2.25 ; those who graduated from other institutions outside Iowa must have a cumulative GPA of at least 2.50.

## Bachelor of Liberal Studies

## Associate Dean

- Anne W. Zalenski

## Program Director

- Dawn Freerks

## Undergraduate major: BLS

Website: https://basbls.uc.uiowa.edu/degree-requirements/bachelor-liberal-studies

The Bachelor of Liberal Studies (BLS) is designed for students who have earned college credit at a regionally accredited institution and would like to complete a bachelor's degree by distance education. The degree may be completed completely online or through a combination of on-site and online coursework. Students may earn credit toward the degree with a selection of several types of courses, including semester-based online courses, off-campus courses at sites throughout Iowa, and regular session on-campus courses.
The BLS emphasizes workplace and leadership skills. Students must select at least one track from the following six options: expression in writing and arts; family, community, and social support; global studies; health and human studies; justice and ethics; and organizational studies. BLS students may complete multiple tracks and earn undergraduate certificates offered by the University of Iowa. They may not enroll in a second college at the University of Iowa while completing the BLS degree.

The BLS is awarded by University College and is administered by Distance and Online Education [p. 2061].

## Programs

Undergraduate Program of Study

## Major

- Bachelor of Liberal Studies [p. 2047]

## Bachelor of Liberal Studies, BLS

## Requirements

The Bachelor of Liberal Studies (BLS) requires a minimum of 120 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in all coursework for the degree, all University of Iowa coursework, and all coursework for the BLS track.

After admission to the University of Iowa, one of the following residence requirements must be met-at least 90 s.h. completed at the University of Iowa, or 45 of the final 60 s.h. completed at the University of Iowa, or the final 30 s.h. completed at the University of Iowa.

Students must earn at least 60 s.h. of the minimum 120 s.h. required for the degree at four-year colleges, including 30 s.h. in upper-level coursework. University of Iowa upper-level courses are numbered from 3000 to 4999.

BLS students must complete a required set of common core courses and a BLS track, as part of the total number of semester hours required for the degree. Students select at least one track from six options: expression in writing and arts; family, community, and social support; global studies; health and human studies; justice and ethics; and organizational studies. Students may complete more than one track.

All University College policies regarding grading, course drops, withdrawals, academic standards, and so forth apply to BLS students. For more information, see the For Students section on the University College website.

The following coursework is required for all BLS students.

## BLS Common Core

Common core courses develop fundamental skills in writing, critical thinking, information literacy, and leadership and give students the opportunity to explore ideas from multiple perspectives.

Some courses in the common core are part of the College of Liberal Arts and Sciences (CLAS) General Education Program Two, as indicated below. Students should contact the BLS advisor for information about additional courses that will fulfill their common core requirements.

## Rhetoric

Rhetoric courses help students develop speaking, writing, listening, and critical reading skills. Courses approved for the Rhetoric area of the CLAS General Education Program satisfy the BLS Rhetoric requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| RHET:1030 | Rhetoric | $4-5$ |

Students who have transfer credit in composition, speech, and argumentation may instead be held to one of the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| RHET:1040 | Writing and Reading | 3 |
| RHET:1060 | Speaking and Reading | 3 |

Students should contact a BLS advisor about which rhetoric course they may need to fulfill the rhetoric requirement.

See Rhetoric courses offered by distance education on the MyUI website.

## Interpretation of Literature

This area, which focuses on the major genres of literature, improves students' abilities to read and analyze a variety of texts. Students must complete one approved course (3 s.h.) in this area. They may use any 3 s.h. course approved for the Interpretation of Literature area of the CLAS General Education Program Two
See Interpretation of Literature courses offered by distance education on the MyUI website.

## Natural Sciences

Natural sciences courses explore the scope and major concepts of a scientific discipline. Students must complete one approved course ( 3 s.h.) in this area. They may use any 3 s.h. course approved for the Natural Sciences area of the CLAS General Education Program Two.
See Natural Sciences courses offered by distance education on the MyUI website.

## Global Perspectives

Global perspectives courses encourage students to understand issues from an international perspective. Students must complete one approved course ( 3 s.h.) in this area. They may use any 3 s.h. course approved for the International and Global Issues area of the CLAS General Education Program Two.

See International and Global Issues courses offered by distance education on the MyUI website.

## Domestic Diversity

Students must complete one approved course (3 s.h.) that addresses diversity and domestic perspectives on current issues. They may use any 3 s.h. course approved for the Values, Society, and Diversity area of the CLAS General Education Program Two.

See Values, Society, and Diversity courses offered by distance education on the MyUI website.

Students also may use one of these distance education courses, which are not part of the CLAS General Education Program, to satisfy the BLS Domestic Diversity requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CSED:4187/ | Introduction to Assistive | 3 |
| EDTL:4987 | Technology |  |
| CSED:4197 | Citizenship in a Multicultural |  |
| GWSS:3154 | Society | 3 |
| SSW:3712/ | Sexuality in the United States | 3 |
| NURS:3712 | Human Sexuality, Diversity, <br> and Society | 3 |

## Statistics

Students must complete one approved statistics course (3-4 s.h.).
They may use any 3-4 s.h. course offered by the Department of
Statistics and Actuarial Science (prefix STAT) except STAT:1000 First-Year Seminar.

See statistics courses (prefix STAT) offered through distance education on the MyUI website.

Students also may use any 3 s.h. course approved for the Quantitative or Formal Reasoning area of the CLAS General Education Program Two.
See Quantitative or Formal Reasoning courses offered through distance education on the MyUI website.

## Information Literacy

Students must complete one approved course (2-3 s.h.) focusing on information literacy. The following courses are offered by distance education.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BAIS:1500 | Business Computing Essentials | 2 |
| CCP:3106 | Career Computing Skills | 2 |

Students also may use one of these courses, which are not offered by distance education, to satisfy the B.L.S. Information Literacy requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CS:1020 | Principles of Computing | 3 |
| CS:1110 | Introduction to Computer | 3 |
|  | Science |  |

## Critical Thinking

Students must complete one approved course (3 s.h.) focusing on critical thinking. The following courses are offered by distance education.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| COMM:2070 | Social Media and Society | 3 |
| HRTS:2115/IS:2115 | Introduction to Human Rights | 3 |
| JMC:1100 | Introduction to Media Effects | 3 |
| JMC:2700 | Media Ethics and Diversity | 3 |
| PHIL:1033 | The Meaning of Life | 3 |
| RELS:1015 | Global Religious Conflict and | 3 |
| RHET:2135/ | Diversity |  |
| SJUS:2135 | Inclusion | 3 |
| RELS:2260/ | Hard Cases in Healthcare at the | 3 |
| GHS:2260 | Beginning of Life |  |
| RELS:2775 | The Bible and the Holocaust | 3 |
| SRM:2065 | The Experience Economy | 3 |

Students also may use one of these courses, which are not offered by distance education, to satisfy the BLS Critical Thinking requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| LING:1050 | Language and Formal <br> Reasoning | 3 |
| PHIL:1034 | Liberty and the Pursuit of <br> Happiness | 3 |
| PHIL:1636 | Principles of Reasoning: <br> Argument and Debate | 3 |

## Leadership and Career Development

Students must complete two or more approved courses (total of 6 s.h.) focusing on leadership and career development, chosen from the following list of distance education courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CCP:2001 | Graduate Admissions 101 | 1 |
| CCP:3102 | Job Search Essentials | $1-3$ |
| CCP:3104 | Defining Your Career Path | 2 |
| CCP:3107 | Social Media for Your Job | 1 |
| COMM:1818 | Search | 3 |
|  | Communication Skills for |  |

## Professional Studies Track

More information related to the professional studies track will be provided at a later date.

## Admission

Individuals who would like to earn the Bachelor of Liberal Studies degree must apply for admission to the program.

Applicants to the BLS program must meet one of the following sets of requirements:

- they must have at least 24 s.h. of graded college-level transfer credit with a grade-point average (GPA) of 2.00 or higher and must have been granted a high school diploma at least three years before being admitted to the BLS program; or
- they must hold an associate degree with a GPA of 2.00 or higher in all college-level transfer credit.

## Career Center Programs

## Director

- Angi McKie

## Website: https://careers.uiowa.edu/

The University of Iowa Marvin A. and Rose Lee Pomerantz Career Center administers the university's Career Center Programs. Students may use the Pomerantz Career Center's services at any time during their academic careers. The center encourages entering first-year and transfer students to visit after they arrive on campus and to make use of all of the center's services throughout their study at Iowa.

The center offers tailored professional career coaching for students who are deciding on majors that connect with career interests, résumé and cover letter help, job and internship strategies, ways to gain hands-on experience, interview strategies, preparing for graduate school, and other career-related topics. Students also can drop in daily for assistance from career peer advisors. Workshops and programs are presented to students across campus on career and professional development-related topics each semester.

Academic courses in career-related topics, such as career exploration and job search skills, are available each semester for academic credit ranging from $1-3$ s.h. per course. See "Professional Development Courses" below for more information. Other courses are offered through the Leadership Studies Program [p. 2066].

The center hosts several career fairs and events each fall and spring, offering students the opportunity to talk with and learn about prospective employers.
The Pomerantz Career Center facilitates job and internship interviewing with a wide range of employers: regional, national, and international; profit and nonprofit; state and federal government. Employers conduct on-campus interviews at specific times during the year, and many post immediate openings year-round for internships and for full-time positions. On-campus recruiting and job, internship, and student employment postings are available online; visit Handshake on the Pomerantz Career Center website.

The center helps students find internships in Iowa, the Midwest, nationwide, and sometimes in other countries. For internship course options through the Career Center, see Courses in this section of the catalog.

For more information about the center's services and facilities, contact the Pomerantz Career Center.

## Professional Development Courses

Professional development courses give students the opportunity to engage in practical, hands-on, skills-based instruction relevant to careers and leadership development. The topics and curricula for the following courses incorporate input from employers, who were surveyed about their experiences, real-world examples, guidance, and the skills they most often seek when hiring new graduates.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CCP:1301 | Communication for the | 1 |
| CCP:1302 | Workplace |  |$\quad 1$

| CCP:3105 | Transitioning from Campus to <br> the Workplace | 1 |
| :--- | :--- | :--- |
| CCP:3106 | Career Computing Skills | 2 |

## Courses

## Career Center Programs Courses

CCP:1005 Internship in Liberal Arts and Sciences

Recognition of practical work experience and internships.

## CCP:1006 Internship in Business

Recognition of practical work experience and internships.

0 s.h.

Recognition of practical work experience and internships.
Requirements: admission to Teacher Education Program for undergraduates.
CCP:1010 Internship in Nursing 0 s.h.
Recognition of practical work experience and internships. Requirements: admission to College of Nursing.
CCP:1015 Internship
0 s.h.
Recognition of practical work experience and internships.
CCP:1017 Winterim Externship 0 s.h.
Recognition of practical work experience for career exploration; externships are shorter in duration and can include job shadowing, small projects, and informational meetings under the mentorship of a supervising professional; experiential education course that provides students with an opportunity to expand on their externship by reflecting on their experience through a self-assessment and evaluation; does not meet the Tippie RISE requirement for business students or CPT/Academic Training requirements for students on an F-1 or J-1 visa.

CCP:1018 Hawkeye Experience Grant 0 s.h.
Opportunity to expand on internship, research/creative scholarship, service, or community-engagement experience by developing learning objectives, reflecting on experience, and networking with fellow awardees; students relate experiences to academic coursework and career goals; for students who have been awarded the Hawkeye Experience Grant. Requirements: Hawkeye Experience Grant awarded for the semester of registration, and at least 50 s.h. of university credit earned prior to this semester.
CCP:1091 Internship in Law 0 s.h.
Recognition of practical work experience and internships.
CCP:1170 Internship in Public Health 0 s.h.
Recognition of practical work experience and internships. Requirements: admission to the College of Public Health.
CCP:1201 Academic Internship 1-3 s.h.
Opportunity for students to expand on internship experiences by developing learning objectives and reflecting on experience; how internship experience relates to academic coursework and future career goals. Prerequisites: a minimum g.p.a. of 2.00. Requirements: secured internship, cumulative GPA of at least 2.00 , and completion of 24 s.h. of UI coursework ( 12 s.h. for transfer students).
CCP:1300 Major and Career Explorations
1 s.h.
Helps students identify their interests, skills, and values relative to majors and careers; self-assessment, informational interviews, research on majors and careers.

## CCP:1301 Communication for the Workplace

1 s.h. CCP:2021 Washington Center Seminar
Combined classroom instruction, faculty-led discussions, and experiential work opportunities; usually offered in Washington, D.C., occasionally at other locations tied to an event (e.g., political convention); one or two weeks.

## CCP:2202 International Student Full-Time Academic Internship 9 s.h.

## CCP:1302 Office Etiquette for the Workplace

How professionalism and work ethic is demonstrated in the workplace; time management and organization skills relevant to fulltime employment; succeeding in multigenerational workplaces; handson, skills-based learning environment. Requirements: sophomore or higher standing.

## CCP:1303 Successful Teamwork for the Workplace

Demonstration of problem solving and self-awareness skills relevant to the workplace; application of listening and critical thinking skills; how to perform with a global mindset in the workplace; hands-on, skills-based learning environment. Requirements: sophomore or higher standing.

## CCP:1306 UI STEP: Student to Employed Professional

Career foundation supplementing classroom learning along with campus job and activities (i.e., job, volunteer work, organizations, etc.); analysis of current university experiences through selfassessment activities; development of a personal action plan for each career development topic; expectations of entry-level employees and graduate school applicants for résumé, interview, and on-thejob performance. Requirements: student hourly or work-study employment.

## CCP:2001 Graduate Admissions 101

Preparation for graduate school application and admissions process; graduate entrance examinations, how to select a graduate program, graduate school applications and personal statements, securing a graduate assistantship, and graduate school interviews. Recommendations: junior standing or one-to-two years before start of graduate school for an intentional and less stressful application process.
CCP:2004 Internships: Search, Secure, and Succeed 1 s.h.
Types of internships; how to find and succeed at an internship; identifying internship priorities; creating résumés; interviewing skills; successful networking; tips for professionalism.

## CCP:2005 Pursuing Purpose: Preparing for Experiential

 EducationPreparation for students to find and apply for experiential education opportunities that fit their interests, strengths, abilities, and values —pursuing career development purposefully; experiential education may include internships, co-ops, service learning, employment, study abroad, research, and practicums; ways that students can experience areas of career that allow for exploration and development of future career goals.

## CCP:2020 Washington Center Internship Program

Internship placements for all UI majors; sample internships include United Way Worldwide, U.S. Department of Education, Federal Trade Commission, Financial Services Roundtable, Congressional offices, Urban Institute, Pan American Health Organization, U.S. Department of the Interior, Peace Corps, C-SPAN, Voice of America, U.S. Marshals Service, Federal courts, and law offices; in addition to the internship, program includes the LEAD Colloquium (Leadership, Civic Engagement, Achievement, and Career Development), an academic course with professional networking, participation in Presidential Lecture Series, and Congressional Breakfast Series.

1 s.h.

1 s.h.

1 s.h.
Academic credit for full time internship (minimum of 40 hours per week) that relates to student's major field. Requirements: occupies an academic term (fall or spring) and must participate in the internship and the course during the same semester, F-1 or J-1 visa international student, undergraduate standing in the Tippie College of Business, minimum 3.00 GPA, must be approved by International Student and Scholar Services (ISSS) for F-1 Curricular Practical Training (CPT) or J-1 Academic Training (AT), and concurrent registration in approved singular 3 s.h. distance education course to reach full-time (12 s.h.) student standing.

## CCP:3102 Job Search Essentials <br> 1-3 s.h.

Essential skills for finding full-time employment; creating and polishing a résumé, techniques for interviewing and networking, and developing a personal job search plan; for students thinking about graduation and wanting to get serious about a job search. Recommendations: junior or higher standing.

## CCP:3103 MoneyWise 1-2 s.h.

Basics of personal finance for success at work and in life; savings, debt, mortgages, loans, employer benefits, insurance and student loans; may include investment basics (e.g., stocks, bonds, mutual funds, 401 Ks , IRAs).

CCP:3104 Defining Your Career Path
Transitioning between career fields; understanding personal interests, values, and abilities; methods of researching information on careers; career development models and student preferences in making careerrelated decisions; preparation for making career-related decisions through participation in class and individual activities; balancing current responsibilities such as finances and family during a career transition. Requirements: 60 s.h. completed.
CCP:3105 Transitioning from Campus to the Workplace
Essential skills for transitioning from college life to successful career; tools for professional and personal success-networking, professionalism, workplace communication, managing personal image, and financial planning. Recommendations: junior or higher standing.

CCP:3106 Career Computing Skills 2 s.h.
Students learn to use a variety of software to complete projects that will be relevant in advancing their careers (i.e., improving résumés, creating job search documents, utilizing various tools for meetings, developing professional presentations); email etiquette and efficiency; effective file storage.

CCP:3107 Social Media for Your Job Search
1 s.h.
Effective use of social media for networking as part of preparing for a job search; efficient identification and utilization of online tools (e.g., Linkedin, Twitter); building a professional online presence; creating a plan for utilizing social networks for an entry-level job search.

## CCP:3169 Internship in Graduate Studies

0 s.h.
Recognition of practical work experience and internships.
Requirements: admission to Graduate College.
CCP:3203 Investment Wise: Personal Investment Basics 2 s.h. Basic understanding of general principles of personal investing; topics may include compounding, stocks, bonds, mutual funds, 401K/403B, IRAs, diversification, and asset allocation.

# Center for Inclusive Academic Excellence 

## Director

- Tabitha N. Wiggins

Website: https://diversity.uiowa.edu/division/CIAE
The Center for Inclusive Academic Excellence offers the Iowa First Nations summer program for high school students and the Iowa Edge program for students entering the University of Iowa.

## Precollege Program of Study

## Iowa First Nations

The Iowa First Nations program enables high school students to explore the educational opportunities offered on the University of Iowa campus and by the higher education field. Iowa First Nations students live on campus for a week (Monday through Friday), spending five nights in one of the university's residence halls. They go on structured field trips to campus departments, participate in handson classroom experiences, and take part in activities on campus and in the community.

## Undergraduate Programs

## The Iowa Edge

The Iowa Edge Program strives to cultivate a community of leaders and future professionals among students of color, LQBTQ students, and first-generation college students. The program achieves this by connecting participants with faculty and staff, campus resources, and transformative career and leadership development activities.

## Advantage Iowa

Advantage Iowa is a merit-based scholarship for incoming eligible first-year students. It is renewable for up to four years. The center provides support to Advantage Iowa scholars through academic coaching, connection to faculty and academic support, experiential learning, and through a first-year experience course taught by academic coaches.

## Courses

## Center for Inclusive Academic Excellence Courses

CIAE:0023 Iowa First Nations 0 s.h.
CIAE:1050 The Iowa Edge
1 s.h.
Preparation for academic success; students engage and participate in a series of interactive presentations, discussions, and activities; introduction to campus resources; connect with support staff; opportunities to question faculty from various departments; students build community with other participants, take part in team-building activities, and learn leadership skills that will serve them throughout their college careers; for first-year students accepted to the Iowa Edge program. Requirements: offer and acceptance to the Iowa Edge program.

CIAE:1080 Advantage Iowa: Exploring Our Identities 1 s.h.
Reflection on identity development, cultural wealth, and awareness of self and understanding of the many new people around us; engagement in interactive experiences that support personal and academic development; students have the chance to meet faculty and staff of similar backgrounds and begin to learn about themselves and how they can become successful college students; highlight of services provided by the Center for Inclusive Academic Excellence and integrates the Advantage Iowa Scholarship.
CIAE:2013 Iowa Edge New Peer Leader Training 1 s.h.
Preparation for role of Iowa Edge Peer Leader; working with African American, Alaskan Native, American Indian, Asian American, Pacific Islander, Latino/a, and first generation college students; development of leadership, group facilitation, presentation, and peer mentoring skills.

CIAE:2033 Iowa Edge Returning Peer Leader Training 1 s.h.
Preparation for returning Iowa Edge Peer Leaders; working with African American, Alaskan Native, American Indian, Asian American, Pacific Islander, Latino/a, and first generation college students; development of leadership, group facilitation, presentation, and peer mentoring skills.

## Clinical and Translational

## Science

## Coordinator

- Donna A. Santillan (Obstetrics and Gynecology)

## Committee Members

- Lori Adams (Biology), Vincent G. Rodgers (Physics and Astronomy)

## Undergraduate certificate: clinical and translational science

Website: https://icts.uiowa.edu/workforce-development/ undergraduate-certificate-clinical-and-translational-science

Translational science focuses on applying biomedical discoveries to health care. It requires team-based interdisciplinary approaches to move research-generated discoveries into clinical trials and to facilitate the adoption of best practices in clinical and community settings. Investigators in translational science understand principles involved in foundational research and how such research relates to epidemiology, behavioral medicine, and patient-oriented research.

Opportunities for training in translational science are available through graduate and professional study in medicine, public health, nursing, dentistry, pharmacy, and other allied health professions, including biostatistics, behavioral medicine, clinical pharmacology, and epidemiology.

The certificate program in clinical and translational science provides undergraduates with opportunities to connect their research activities to translational science and to begin training in the discipline.

The Certificate in Clinical and Translational Science is presented by the Institute for Clinical and Translational Science and Iowa Sciences Academy; it is administered by University College.

## Programs

## Undergraduate Program of Study

## Certificate

- Certificate in Clinical and Translational Science [p. 2057]

# Clinical and Translational Science, Certificate 

## Requirements

The undergraduate Certificate in Clinical and Translational Science requires 16 s.h. of credit. Students must maintain a grade-point average of at least 3.00 in the certificate's core courses. Work for the certificate includes core courses and electives. Students must complete all coursework for the certificate within three years of entering the program.

The Certificate in Clinical and Translational Science requires the following coursework.

## Core Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these (10 s.h.): |  |  |
| EPID:4400 | Epidemiology I: Principles | 3 |
| STAT:3510/ <br> IGPI:3510 | Biostatistics (or an equivalent course) | 3 |
| URES:3001 | Introduction to Translational Research (must take EPID:4400 before or at the same time as this course) | 2 |
| URES:3002 | Practicum in Clinical and Translational Science (capstone course; must take URES:3001 before this course) | 2 |

## Electives

Students must earn a total of 6 s.h. in courses chosen from the following lists.
Creative Writing

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CNW:3664 | Writing About Science | 3 |
| Life Sciences |  |  |
| Course \# | Title | Hours |
| BIOL:2254 | Endocrinology | 3 |
| BIOL:2723 | Cell Biology | 3 |
| BIOL:2753 | Introduction to Neurobiology | 3 |
| BIOL:3233 | Introduction to Developmental | 3 |
| BIOL:3253 | Biology |  |
| BIOL:3713 | Neurobiology I | 4 |
| BIOL:4213/ | Miolecular Genetics | 4 |
| GENE:4213/ | Bioinformatics | 2,4 |
| IGPI:4213 |  |  |
| BIOL:4333 | Genes and Development | 3 |
| BMB:3110 | Biochemistry | 3 |
| BMB:3120 | Biochemistry and Molecular | 3 |
| BMB:3130 | Biology I |  |
|  | Biochemistry and Molecular | 3 |
| MICR:2157 | Biology II |  |
| MICR:3147 | General Microbiology | 3 |
|  | Immunology and Human | 3 |
|  | Disease |  |

## Global Health

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| GHS:3010/IGPI:3011 | Identifying and Developing a Global Health Project (when topic is research design in global health) | 3 |
| $\begin{aligned} & \text { GHS:3111/ } \\ & \text { GEOG:3110 } \end{aligned}$ | Geography of Health | 3 |
| GHS:3720 | Contemporary Issues in Global Health | 3 |

## Health and Human Physiology

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ACB:3110 | Principles of Human Anatomy | 3 |
| HHP:1100 | Human Anatomy | 3 |
| HHP:1300 | Fundamentals of Human <br> Physiology | 3 |
| HHP:2130 | Human Development Through <br> the Life Span | 3 |
| HHP:2200 | Physical Activity and Health | 3 |
| HHP:2310 | Nutrition and Health | 3 |
| HHP:3500 | Human Physiology | 3 |
| HHP:3850/GHS:3850 | Promoting Health Globally | 3 |
| NURS:1030 | Human Development and <br> Behavior | 3 |
| SRM:3020/ | Nutrition in Health and <br> INTD:3027 | Performance |

Psychological and Brain Sciences

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PSY:2301 | Introduction to Clinical <br> Psychology | 3 |
| PSY:2401 | Introduction to Developmental <br> Science | 3 |
| PSY:2501 | Introduction to Social <br> Psychology | 3 |
| PSY:2601 | Introduction to Cognitive <br> Psychology | 3 |
| PSY:2701 | Introduction to Behavioral <br> Neuroscience | 4 |
| PSY:3010 | Health Psychology | 3 |
| Public Health |  | Hours |
| Course \# | Title | 3 |
| CBH:4105 | Introduction to Health <br> Promotion and Disease <br> Prevention | 3 |
| CPH:1400 | Fundamentals of Public Health |  |
| CPH:3400/  <br> GEOG:3210 Environment | 3 |  |
| CPH:3500/GHS:3500 | Global Public Health | 3 |
| HMP:4000 | Introduction to the U.S. Health | 3 |
| OEH:4240 | Care System | Global Environmental Health |

## Admission

Admission to the certificate program is selective. Applicants must fulfill the following requirements by the end of the semester in which they apply:

- have a cumulative grade-point average of at least 3.00 ;
- have earned a minimum of 45 s.h. of college-level credit;
- have been engaged in mentored scientific research at the University of Iowa;
- have completed BIOL:1411 Foundations of Biology or BIOL:1141 Human Biology: Health Professions; and
- have completed MATH:1380 Calculus and Matrix Algebra for Business or MATH:1460 Calculus for the Biological Sciences or MATH:1550 Engineering Mathematics I: Single Variable Calculus or MATH: 1850 Calculus I.

## Application

Interested students should apply on the certificate program's student application system. Applications are accepted on a rolling basis and are reviewed by the Certificate in Clinical and Translational Science Steering Committee. Students will receive an email after an admissions decision has been made. Consult the Undergraduate Certificate in Clinical and Translational Science website for more information.

Applications should include the following:

- a description of the student's undergraduate research (maximum of 1,000 words), including the approximate number of hours per week the student spends conducting the research and the name and email address of the student's research mentor;
- a personal statement outlining the student's professional and career goals;
- a copy of the student's grade report from MyUI; and
- a letter of recommendation from the student's research mentor.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# College Success Initiatives 

## Coordinator

\author{

- Maureen M. Schafer
}

College Success Initiatives (CSI) courses are designed to support new first year and transfer students in their transition to the University of Iowa. In addition, CSI courses enrich students' experiences, develop their academic skills, and prepare them for college-level learning.
College Success Initiatives courses are administered by the associate provost for undergraduate education through the Academic Advising Center and University College.

## Courses <br> College Success Initiatives Courses

## CSI:1020 Academic Seminar I <br> 3 s.h.

Development of knowledge and skills essential for academic success at college level; reading, writing, and communication skills; focus on reading comprehension, class discussion, and development of writing process; various narratives including published collections of essays and peers' texts; writing process and techniques, and components that bring each piece together. Requirements: IowaLink participant.

## CSI:1021 Academic Seminar II

Continued development of knowledge and skills necessary for academic success; reading, writing, and communication skills; experimentation with ethnographic research methods, exploration of cultures and subcultures; writing about findings in various experimental forms, using as a model, short ethnographic essays, excerpts from a graphic novel; focus on reading comprehension strategies, class discussion, and development of writing process. Requirements: IowaLink participant. Recommendations: CSI:1020.

## CSI:1100 College Transition Seminar

College culture, University of Iowa resources, refinement of study skills, test taking, identification of personal values, self-motivation, goal setting; taught in small sections with emphasis on classroom discussion. Requirements: entering first-year student.

## CSI:1150 College Transition Workshop

1 s.h.
Preparation for affiliated lecture course; practical context to apply, evaluate, and refine study skills strategies explored in CSI:1100; expand study strategies, enhance grasp of affiliated course material, and apply study skills to future coursework. Corequisites: CSI:1100.
Requirements: concurrent enrollment in a CIC affiliated lecture course.

## CSI:1200 First-Year Seminar <br> 1 s.h.

Introduction to the intellectual life of the university; opportunity to work closely with a faculty member or senior administrator; active participation that eases the transition to college-level learning.
CSI:1210 Peer Led Undergraduate Study (PLUS) 0 s.h.
Peer guided and facilitated academic support focusing on quantitative problem-solving skills; students discuss course material, address multiple course concepts, and develop tools and skills for effective study habits. Corequisites: CHEM:1070 and MATH:1005.
CSI:1213 Special Topics I 0-6 s.h.
Special topics offered through University College.
CSI:1214 Special Topics II
Special topics offered through University College.

CSI:1250 Introduction to Law Study and Legal Careers 1 s.h. Introduction to legal education and careers; exploration of role of law in society, nature of legal education, careers in law, and current legal issues; opportunity for students to begin reflecting on their own interest in this field.
CSI:1270 Strategies for Veteran Success
1 s.h.
Promotion of academic success, improve retention of student veterans, and assist in cultivating a systematic approach to career planning and decision-making; primary focus on available resources, identification of individual goals and strengths, development and application of study skills and time management strategies, and problem solving related to personal issues or barriers that could impede student transition and academic performance; for student veterans and service members in academic transition from active duty military or guard/ reserve status to the University of Iowa. Requirements: veteran status.
CSI:1280 Steps to Success for TRIO: Step I 1 s.h.
Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; first in a series of courses.
CSI: 1281 Steps to Success for TRIO: Step I 1 s.h.
Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; second in a series of courses.
CSI:1290 Steps to Success for TRIO: Step II 1 s.h.
Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; third in a series of courses.
CSI:1291 Steps to Success for TRIO: Step II
Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; fourth in a series of courses.
CSI:1380 Steps to Success for TRIO: Step III 1 s.h.
Learning about and adjusting to the University of Iowa for TRIO
Student Support Services (SSS) students; fifth in a series of courses.
CSI:1381 Steps to Success for TRIO: Step III
Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; sixth in a series of courses.
CSI:1390 Steps to Success for TRIO: Step IV
Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; seventh in a series of courses.
CSI:1391 Steps to Success for TRIO: Step IV
1 s.h.
Learning about and adjusting to the University of Iowa for TRIO Student Support Services (SSS) students; eighth in a series of courses.
CSI:1400 Explore Iowa, Explore You: Scientific Strategies for Success 2 s.h.
Introduction to the Three Ms for Effective Learning (mindset, metacognition, and memory); provide the practical tools to apply these concepts to life in college and beyond.
CSI:1410 Life Design
2 s.h.
Students discover what they are innately drawn to do through stories, lectures, assigned readings, guest speakers, and reflective writing; integration of worldview and professional life; practical skills and exercises for investigating different career paths; cultivating mentors; relationship between ambition, drive, and success; role of happiness in achieving excellence and success.
CSI: 1420 Life Design II: A Better World
2 s.h.
Once you start unraveling who you are, the next matter becomes what world do you want to live in? Readings, structured experiments, and written reflections provide generalizable knowledge about the science of empathy, passion, and perseverance; students apply these insights to efforts "bigger than themselves" and a deliberate path to become agents of social and environmental change.

## CSI:1450 Explore Iowa Colloquium

Opportunities for peer mentors involved in CSI:1400; activities include short readings and media screenings related to innovative and best practices in learning and teaching; emphasis on multimodal writing online for peers; informal presentations and reflections; may include work with Passport Projects students, collaboration on development of guidelines and handouts for best practices in writing, and supplemental writing reflections.

## CSI:1460 Athletic Transition Seminar

Overview of the Hawkeye Life Program for new student athletes; foundational pillars for all student athletes at the UI; application of skills in leadership, community engagement, academic success, career development, health and well-being, diversity and inclusion through exploration and application of these pillars; students further examine their academic, personal, and career goals.

## CSI:1470 The Hawkeye Life Experience

 1 s.h. Students increase their understanding and awareness of mental health and wellness in an emotionally safe environment; opportunities for students to examine who they are outside of their identities as athletes, identify personal mental health concerns and challenges, gain healthy coping strategies, and learn about early warning signs of mental illness and mental health resources; exploration of relevant topics regarding athlete mental health in today's society.
## CSI:1500 College Success Seminar

 1 s.h.Skills, habits, and mindsets essential for college success: goal setting, motivation, resiliency, time management, preparing for exams, working with instructors, and using campus resources including academic advisors, the Pomerantz Career Center, and University Counseling Service; emphasis on class participation and completion of assignments related to course topics. Requirements: selected students with first-year standing in the College of Liberal Arts and Sciences.

## CSI:1550 Strategies for Academic Success

1 s.h.
Designed for second-year students; focus on academic strategies to help students improve their academic performance; topics include organization, goal setting, motivation, time management, study skills, test preparation, and campus resources; requires class participation and completion of assignments related to course topics. Requirements: second-year standing in the College of Liberal Arts and Sciences and no prior credit earned for CSI:1500.

## CSI:1600 Success at Iowa

0-2 s.h.
Online course designed to help students transition successfully to the University of Iowa; required of all new undergraduate first-year and transfer students.

## CSI:1650 College Success for International Students 1 s.h

 Skills and resources to help international students achieve academic success; reflection on academic habits and experiences; exploration of study skills and strategies; cultural expectations in U.S. academic settings including academic integrity; culture shock and immigration issues that can impact international students at the UI; development of techniques for time management and goal setting; techniques to stay motivated and manage stress; overcoming barriers to student success; discussions and assignments emphasize self-reflection on class topics including time management, study skills, and cultural identity. Same as CLAS:1650, ESL:1650.
## CSI:2021 First Gen Hawks Seminar

Opportunity to be part of a class planned specifically for First Gen Hawks; students connect with the UI in a meaningful way through one of three learning track areas-civic engagement and leadership, on-campus student employment, or undergraduate research; course format includes small class size with lots of classroom discussion; assignments emphasize self-reflection; content areas equip students with information and skills they need to thrive at the University of Iowa. Requirements: participation in First Gen Hawks program.

3 s.h. CSI:2100 The Transfer Transition
1 s.h.
Adjustment to university life and academics; strategies for academic success including study and test-taking skills, time management, utilization of campus resources for success in courses; planning a major and learning about Career Center services; exposure to university culture; opportunities to reflect on adjustment to the university. Requirements: entering transfer student standing.

## CSI:2150 Open Minded

1 s.h.
Focus on self-reflection and use of resources to research majors; topics include values, strengths, goals, identity, managing uncertainty, critical reading and thinking skills, recognizing transferable skills cultivated by majors; class participation and assignments related to course topics; for students with open majors.

## Distance and Online Education

## Associate Dean

- Anne W. Zalenski

Website: https://distance.uiowa.edu/
Distance and Online Education (DOE) increases access to the services and resources at the University of Iowa to students and other constituents across the state. In partnership with the university's colleges and departments, DOE provides high-quality credit coursework, degrees, and certificate programs to traditional and nontraditional learners. Using a variety of locations, schedules, and technologies, DOE helps provide a University of Iowa learning environment beyond the physical borders of the Iowa City campus. In addition, many on-campus students enjoy the flexibility that online coursework affords them. Courses offered through Distance and Online Education are taught by University of Iowa faculty and staff members.

## Programs of Study Online or on Location in Iowa

There are over 30 undergraduate, graduate, and professional degrees and certificates available either online or on location in Iowa. DOE consistently offers over 600 online or on location courses during the academic year.

For additional information on a particular program, see the program finder on the DOE website.

## Resource Centers

Distance and Online Education partners with resource centers across the state of Iowa. The primary goal of the centers is to increase access to high-quality undergraduate and graduate educational opportunities to students in the region where they live. These opportunities are delivered in a variety of formats including online and on location. Community partnerships also have been created through the centers which further benefit Iowans.

## Western Iowa Regents Resource Center

Director: Steve Warnstadt
Website: https://wirrc.org
Western Iowa Regents Resource Center (WIRRC) works with community colleges in their service areas to provide access to quality education to students in western Iowa. Offices are located in Council Bluffs, Sioux City, and Sheldon. Coursework and degree programs are provided by the three state universities.

## Iowa Lakeside Laboratory and Regents Resource Center

Executive Director: Mary P. Skopec
Website: https://iowalakesidelab.org
This center is located near Milford, Iowa, on scenic West Okoboji Lake on Little Miller's Bay. Iowa Lakeside Laboratory is a field station run cooperatively by the University of Iowa, Iowa State University, and the University of Northern Iowa, and administered by the University of Iowa. The laboratory offers summer courses and research opportunities for undergraduate and graduate students. Courses focus on the ecology, taxonomy, and conservation of northern plains animals, plants, microorganisms, and ecosystems.

## Des Moines Programs

Contact: Anne W. Zalenski

## Website: https://desmoines.uiowa.edu

The Master of Social Work (MSW) program, graduate degrees, and certificates are offered at the John and Mary Pappajohn Education Center (JMPEC), located in downtown Des Moines, Iowa. Close to many corporate businesses and government offices, JMPEC is an ideal location for a variety of students who want to further their education.

# Intercollegiate Athletic <br> Participation 

## Director

- Elizabeth A. Tovar

Faculty: https://academics.athletics.uiowa.edu/staff
Website: https://academics.athletics.uiowa.edu/

## Associated Courses

Students who are members of University of Iowa intercollegiate athletics teams may register for CSI: 1460 Athletic Transition Seminar and CSI: 1470 The Hawkeye Life Experience.

First-semester student-athletes who enroll in CSI:1460 Athletic Transition Seminar receive 1 s.h. of graded credit. The course provides new student-athletes with an overview of the athletics department, Hawkeye Life student development programs, and helps with their transition to college.

Continuing students may enroll in CSI:1470 The Hawkeye Life Experience and receive $1 \mathrm{~s} . \mathrm{h}$. of graded credit. This special topics class is designed to improve student-athletes' professional development awareness.

Registration for CSI:1460 and CSI:1470 requires permission from Student-Athlete Academic Services. Members of University of Iowa sport clubs are not eligible to enroll in CSI:1460 or CSI:1470.

# Iowa Lakeside Laboratory 

## Director

- Mary P. Skopec (Geographical and Sustainability Sciences)

## Iowa State University Participating Faculty

- Lori Biederman (Ecology, Evolution, and Organismal Biology), Alexander Braidwood (College of Design), Brianna Burke (English and American Indian Studies), James Colbert (Ecology, Evolution, and Organismal Biology), Elizabeth Swanner (Geological and Atmospherical Sciences)

## University of Iowa Participating Faculty

- Matthew P. Dannenberg (Geographical and Sustainability Sciences), John F. Doershuk (Anthropology), Andrew A. Forbes (Biology), Marc A. Linderman (Geographical and Sustainability Sciences), Corey D. Markfort (Civil and Environmental Engineering/Mechanical Engineering), Susan Meerdink (Geographical and Sustainability Sciences), Silvia Secchi (Geographical and Sustainability Sciences), Adam Skibbe (University College)

## University of Northern Iowa Participating Faculty

- Laura Jackson (Biology), Mark Meyers (Biology), Patrick Pease (Geography/Social Science and History Education), Daryl D. Smith (Biology)

Website: https://iowalakesidelab.org/
Iowa Lakeside Laboratory is a field station run cooperatively by the University of Iowa, Iowa State University, and the University of Northern Iowa. Students at all three institutions, as well as visiting students, nationally and internationally, may take Iowa Lakeside Laboratory courses for credit through their home institution.
Iowa Lakeside Laboratory was established in 1909 for the conservation and study of the rich flora and fauna of northwest Iowa, especially the numerous lakes, wetlands, and prairies of the Iowa Great Lakes region. The campus is located on approximately 140 acres of restored prairie, wetland, and gallery forest along the west shore of West Okoboji Lake. Teaching and research facilities include eight laboratory buildings, a library, and a lecture hall. Living accommodations include cottages, motel-style units, and a large mess hall. All students are encouraged to stay at Lakeside while they are taking courses to derive full advantage of its educational, professional, and social life.

## Mission

Lakeside's mission is to provide undergraduate and graduate students an opportunity for hands-on experience in a variety of natural and human environments through its field-oriented courses, and to provide research facilities and support for graduate students and faculty members working on research projects in northwestern Iowa.

## Summer Session

Each summer Iowa Lakeside Laboratory offers students a unique educational experience-small, inquiry-based, full-immersion, field-oriented courses in the natural sciences (archaeology, botany, ecology, hydrology, soils, zoology) and related areas, such as sustainability and the health sciences. Courses are taught at the sophomore/junior level and the senior/graduate level. Enrollment usually is limited to 10 or fewer students per course. Most courses meet all day Monday through Friday, last four weeks, and offer 1 s.h. of credit for each week ( 40 clock hours) in class. One- and two-week courses also are available, including courses designed especially for teachers and professionals.

Not all courses are offered every year; visit the Course Catalog on the Iowa Lakeside Laboratory website or consult summer course offerings at the University of Iowa or the other public universities in Iowa to learn which courses will be offered during a particular summer session. Students should check with their advisors to determine whether specific courses count toward requirements for their majors or minors or toward other requirements.

## Research

Research projects by undergraduates, graduate students, and faculty members can be completed either on the Iowa Lakeside Laboratory campus or at many nearby natural areas. Undergraduate and graduate students are strongly encouraged to work on independent projects at the laboratory, and graduate students are welcome to use Lakeside as a base for their thesis and dissertation research. Laboratory space and other facilities are available for long- or short-term research projects.

## Registration

Students may enroll in Iowa Lakeside Laboratory courses by submitting an online registration and housing form on the Iowa Lakeside Laboratory website. Information about scholarships, tuition, and housing also can be found on this website under the Student Resources section.
Registration usually opens in early January. Enrollment is limited, so students should register early. When they register, they must apply for housing or indicate that they plan to live off campus.

## Financial Support

Financial support is available for undergraduate and graduate students. The Friends of Lakeside Lab organization provides a merit scholarship that is equivalent to the cost of room and board. Additional financial support may be available from Iowa Lakeside Laboratory and from other sources. Consult the Office of Student Financial Aid for information about support, including work-study and loan programs.

## Courses

## Iowa Lakeside Laboratory Courses

IALL:1010 Earth, Air, and Sky 1-4 s.h. Essentials of earth science, including astronomy, meteorology, geology, and paleontology; includes laboratory and fieldwork.

## IALL:1030 Natural History Workshop

1-2 s.h.
A specific aspect of the upper Midwest's natural history, or techniques for studying natural history; amphibians and reptiles, birds and birding, nature photography, mushrooms and other fungi, Iowa's trees and forests, fish biology, prairies, common algae, common insects, aquatic plants, life in rivers, life in lakes, mosses and liverworts, natural history of Iowa Great Lakes region, field archaeology, scuba diving, astronomy, nature sketching; five-day, nontechnical introductions.

## IALL:1040 Field Archaeology <br> 3-4 s.h.

Nature of cultural and environmental evidence in archaeology, how such evidence is used to model past human behavior and land use; emphasis on Iowa prehistory; basic reconnaissance surveying, excavation techniques.

IALL:1045 Illustrating Nature: Photography 1-2 s.h.
Beginning/intermediate technique and composition in color photography of natural areas, their plants and animals.

IALL:3034 Topics in Ecology and Sustainability 1-4 s.h.
Scientific introduction at intermediate level to ecology and evolution of important groups of organisms: algae to vertebrates, different ecological phenomena (e.g., fire and climate change), varying landforms, different ecosystems (e.g., prairies and aquatic systems); emphasis on sustainability with introduction to concepts, issues, and practices; ability to communicate environmental information through a variety of means. Requirements: one general biology course.

## IALL:3099 Earth and Environmental Science for

## Educators

1-4 s.h.
How to introduce, explore, and understand Earth systems, processes, and environment; use of experiential, immersive, and place-based approaches to build confidence with subject matter and deepen understanding of landforms, landscapes, climate, geology, and geologic time; for in-service teachers, pre-service teachers, and informal educators.

## IALL:3101 Science Teaching Methods

1-3 s.h.
Development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology, geology, and environmental courses; exercises built around common organisms and ecosystems in Iowa; animal biology, plant biology, fungi and lichens, aquatic ecology, prairie ecology, wetland ecology, limnology, animal behavior, insect ecology, biology of invertebrates, noninvasive use of living organisms, Project WET; field trips.

## IALL:3103 Aquatic Ecology

2,4 s.h.
Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals. Requirements: ecology course.

## IALL:3106 Plant Taxonomy 2-4 s.h.

Principles of classification and evolution of vascular plants; taxonomic tools and collection techniques; use of keys; emphasis on field and laboratory studies to identify local flowering plants; recognition of major plant families.
IALL:3109 Ecology and Systematics of Algae 2,4 s.h.
Ecology, morphological structure, phylogeny, and taxonomy of freshwater algae based on field material collected; emphasis on genuslevel identifications, biodiversity, ecology; habitat visits to lakes, fens, streams, rivers; algal ecology.

## IALL:3113 Undergraduate Independent Study

1-4 s.h.
Requirements: junior or senior standing.

## IALL:3114 Field Mycology

Identification and classification of common fungi; techniques for identification, preservation, and culture practiced with members of various fungi groups.

## IALL:3117 Ecology and Systematics of Diatoms 2,4 s.h.

Field and laboratory study of freshwater diatoms; techniques in collection, preparation, and identification of diatom samples; study of environmental factors affecting growth, distribution, taxonomic characters; project design and execution, including construction of reference and voucher collections; data organization and analysis.

## IALL:3122 Prairie Ecology

4 s.h.
Basic patterns, underlying physical and biotic causes of regional and local distributions of North American prairie plants and animals; field and laboratory analysis and projects. Requirements: familiarity with basic principles of biology and ecology.

## IALL:3123 Prairie Ecology I

2 s.h.
Recognition of Iowa prairie plants and understanding the systems in which they exist; emphasis on identification of tallgrass prairie flora by sight recognition, family, genus, species, and common names. Requirements: basic familiarity with biology and ecology.

IALL:3125 Prairie Ecology II
2 s.h.
Hands-on learning experiences demonstrating dynamic, humaninfluenced (anthropogenic) systems which have impacted prairie ecosystems for the past 10,000 years or more; emphasis on identification of tallgrass prairie flora by sight recognition, family, genus, species, and common names. Requirements: general familiarity with biology and ecology.
IALL:3126 Ornithology
2-4 s.h.
Biology, ecology, and behavior of birds; emphasis on field studies of local avifauna; group projects with focus on techniques of population analysis and methodology for population studies.

## IALL:3131 Ecology

Introduction to the principles of ecology at the population, community, ecosystem levels; field studies of local lakes, wetlands, and prairies used to examine factors that control distributions, interactions, and roles of plants and animals in native ecosystems. Requirements: two semesters of introductory biology.
IALL:3141 Environmental Policy
3 s.h.
Theory and practice of environmental policies, including the study of U.S. federal environmental policies with direct and indirect bearings on water issues; focus on policy history, implementation, and effectiveness; how policies interact with each other, how local stakeholders perceive their pros and cons, and linkages between local implementation efforts and regional and large-scale impacts.
IALL:3162 Restoration Ecology
2 s.h.
Ecological principles for restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations; emphasis on prairie restoration and wetland vegetation. Requirements: ecology course.

## IALL:3164 Animal Behavior

2 s.h.
Examination of ecological and evolutionary theories of animal behavior through field studies of animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care. Requirements: two biology courses.
IALL:3175 Soil Formation and Landscape Relationships 2-4 s.h. Relationships between soil formation, geomorphology, environment; soil description, classification, geography, mapping, interpretation for land use.
IALL:3176 Glacial Geomorphology 2,4 s.h.
Field-based introduction to glacial environments and processes including the origin of sediments, landforms, and landscapes produced in glacial and associated environments; aeolian (wind) processes, river and lacustrine systems, and mechanisms and chronologies of climate change.
IALL:3200 Introduction to Research and Inquiry 1-3 s.h. How data transforms to information and ultimately knowledge through scientific investigations; examinations and applications include steps formulating the scientific method using 21st-century data, conditions, and related challenges; deliverables include a thoroughly documented scientific experiment beginning with research questions and hypotheses, recommended methods, and concluding with anticipated results.

## IALL:5113 Literature and Multispecies Kinship: Making Kin With(in) Place 1-3 s.h.

 Exploration of what it means to build kin within a place, while in a place (specifically NW Iowa); human impact on the planet and inherent demand from climate change to abandon anthropocentrism and fundamentally alter human relationship with environments, places, and species therein; interdisciplinary; readings include texts by ecologists, botanists, climatologists, indigenous writers and theorists, fiction writers and playwrights, poets, and podcasters.IALL:5164 Animal Behavior
Examination of ecological and evolutionary theories of animal behavior through field studies of animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care. Requirements: two biology courses.
IALL:5213 Graduate Independent Study
IALL:5217 Ecology and Systematics of Diatoms
2,4 s.h.

## Leadership Studies

## Director

- Matthew Augeri

## Undergraduate certificate: leadership studies

Website: https://careers.uiowa.edu/alp
Leadership studies is a multidisciplinary academic field that draws upon theories and applications from a wide variety of related disciplines, such as the social sciences (e.g., psychology, sociology, political science, and anthropology) and the humanities (e.g., philosophy and history), as well as professional fields, including management and education. The Leadership Studies Program examines ethical issues, principles, theories, and styles of leadership; the dynamics of interactions between leaders, followers, and group members; leaders' impact on organizations and communities; and leadership skills such as goal setting, communicating effectively, creating a vision, and empowering others.

The Leadership Studies Program offers the undergraduate Certificate in Leadership Studies as well as the Career Leadership Academy, a two-course sequence designed to help undergraduate students develop leadership and employment skills. The program also offers professional development courses.

## Certificate in Leadership Studies

The Certificate in Leadership Studies is an interdisciplinary program coordinated by the Pomerantz Career Center and supported by the Tippie College of Business, the College of Education, the College of Liberal Arts and Sciences, and the Office of Leadership, Service, and Civic Engagement.

## Career Leadership Academy

The Career Leadership Academy is a two-semester sequence of courses designed to help undergraduate students develop vital skills for leadership and career development: communication, interpersonal, and presentation skills and the ability to work well with others. This highly interactive program consists of weekly seminars, activities, and events. Participants also engage in career exploration opportunities, professional networking, and leadership development experiences.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| LS:2002 | Career Leadership Academy | 3 |
| LS:3002 | Part 1: Leadership in Practice |  |
|  | Career Leadership Academy <br> Part 2: Leadership in Action | 3 |

For more information, see Career Leadership Academy on the Pomerantz Career Center website.

## Professional Development

Professional development courses provide students with opportunities to engage in practical, hands-on, skills-based instruction relevant to careers and leadership development. The topics and curricula for the following courses incorporate input from employers, who were surveyed about their experiences, real-world examples, guidance, and which skills they most often seek when hiring new graduates.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| LS:2013 | Strengths-Based Leadership | 1 |
| LS:3003 | Culturally Intelligent | 1 |
|  | Leadership |  |

Programs

# Undergraduate Program of Study 

Certificate

- Certificate in Leadership Studies [p. 2068]

## Courses

## Leadership Studies Courses

## LS:1009 Mock Trial <br> Opportunity to learn legal analysis and argumentation, public performance; participation in University of Iowa Mock Trial Club; mock trial role preparation, tournament competition, and staging an annual club tournament. <br> LS:1014 Pedagogy: Creating Collaborative Learning <br> Environments <br> 0-3 s.h. <br> Enhancement of skills that lead to success in facilitating collaborative learning; helping skills, knowledge, and peer support to promote deeper reflection, learning, and application of content; use of collaborative activities and discussions to highlight concepts and skills, and individual reflection assignments to promote metacognition; led by UI Academic Support and Retention; for learning assistants in first semester of role.

## LS:1015 Learning Assistant Advanced Practicum 0-2 s.h

 Opportunity to continue to develop skills in facilitating collaborative learning environments; application of pedagogy concepts to learning assistant experience; students facilitate activities in assigned lecture courses and reflect on their experience in advanced practicum sessions; topics include helping skills, metacognition, study strategies, diversity, equity, inclusion, and motivation in learning environments; exploration of problem solving and personal growth. Requirements: LS:1014 and acceptance to learning assistant program as a returning learning assistant.LS:1017 Orientation and Transition Leader Training 0-3 s.h. Preparation for a leadership role in the Office of Orientation Services.
LS:1018 Issues in College Residence Halls I 0-1 s.h.
Development of knowledge and skills required for work as a resident assistant; creating community, handling crises and emergencies; leadership.
LS:1020 Introduction to Leadership 3 s.h.
Examination of leadership behaviors and actions that turn challenging opportunities into remarkable success; the Five Practices of Exemplary Leadership; discussions with campus leaders; development of a plan to improve leadership skills; exploration of the experience of present-day leaders and movements with a common reading selected annually; for emerging student leaders.

## LS:1021 Current Issues and Leadership in Fraternity and Sorority Life <br> Current issues facing leaders (alcohol and hazing education, conflict management, lasting impact of organizations on members); lifetime membership and values based decision-making; for leaders of fraternity and sorority community.

LS:1022 President's Leadership Class
3 s.h.
Inside look at the University of Iowa; focus on development of student leadership through team and campus projects; opportunity to interact with campus leaders, including the University of Iowa president. Requirements: sophomore standing and application.

## LS:1024 Hawkeye Service Breaks

arr.
Introduction to theoretical approaches to service learning and shared experiential learning; concepts of intersectionality of varied social and community issues, reflection and reciprocity, active citizenship and community building, practical implementation of skills from student's academic disciplines, leadership development; includes overnight service immersion experience during spring break in a designated team location where students complete approximately 24 total hours of direct service with nonprofit partners and participate in critical reflection; emphasis on stretch and serve components of the IOWA Challenge.

## LS:2002 Career Leadership Academy Part 1: Leadership in Practice

3 s.h.
How to become a successful leader; opportunity to increase understanding of self, others, and the skills sought by employers; work and lead effectively in teams; creation of a group presentation focused on community needs; career components of résumé writing, LinkedIn profile development, and networking; first in a two-course series.

## LS:2013 Strengths-Based Leadership

1 s.h.
Examination and evaluation of personal unique talents, be more engaged, and gain better understanding of leadership from a "Strengths" perspective; how to maximize strengths to stand out from the crowd; how society encourages people to be well-rounded (according to Gallup Organization's Strengths research) and how this pursuit of many goals can actually result in mediocrity.

## LS:2020 Women in Leadership

3 s.h.
Overview of relevant history, theory, and practice of women in effective leadership; women leaders from historical to modern times; focus on exploring obstacles and challenges faced by women in leadership and how people of all genders can work to overcome these barriers.

## LS:2022 Leading from the Margins

3 s.h.
Examination of those with historically marginalized identities who rise to prominence as leaders; demonstration of knowledge and ability to analyze key issues and events through an intersectional leadership lens; focus on developing tools to assemble pathways and structures that foster diverse and equitable leadership.
LS:2024 Hawkeye Service Breaks Leadership 0,2 s.h.
Focus on techniques for planning trip logistics, education on social issues, and facilitation of critical reflection; development in theoretical approaches to service learning specifically connected to service immersion leadership; varied concepts including intersectionality of varied social and community issues, reflection and reciprocity, active citizenship and community building, practical implementation of skills from student's academic disciplines, leadership development, and other related areas. Requirements: LS:1024, and application and acceptance to leadership position.

## LS:3002 Career Leadership Academy Part 2: Leadership in

## Action

3 s.h.
Leadership development and career readiness; application of strengths, building effective teams, motivation, and delegation skills to a service-learning project designed by the class through engagement with a community partner; explore interviewing, personal branding, job searching, professional etiquette, salary negotiation, and transitioning successfully into the workplace; second in a two-course series. Prerequisites: LS:2002.

## LS:3003 Culturally Intelligent Leadership

1 s.h.
Knowledge and skills for leadership in an increasingly diverse and global workplace; highly interactive and relational experience; students gain a greater understanding of their leadership in various environments and learn how to develop tools for establishing and maintaining interpersonal relationships for professional success.

LS:3004 Perspectives on Leadership: Principles and Practices

3 s.h.
Broad foundation of leadership knowledge representing diverse approaches to studying and practicing leadership; core course for students pursuing the leadership certificate. Requirements: sophomore or higher standing.

LS:3011 Leadership Certificate Capstone
0,2 s.h.
Registration of practical work experience (internship or career position) with leadership components, or meaningful and educational cocurricular experience in on-campus leadership position (i.e., student organization leader, student government leader, residence assistant, student orientation advisor, peer educator, fraternity/ sorority leader) with active leadership roles and responsibilities (i.e., executive leadership position, initiating and organizing a major event); application of leadership models and theories to practical experiences; for students completing the leadership certificate. Prerequisites: LS:3004. Requirements: an additional 6 s.h. of approved leadership coursework and meet with instructor prior to enrollment.
LS:3012 Leadership Theory to Practice
3 s.h.
How the world is changing at an accelerating rate; leadership effectiveness and demand of a high-level ability to work with others and respond to change; foundational concepts of major theories and behaviors of leadership models; practical challenges of leadership analyzed through use of experiential projects, discussion, presentations, exercises; development of self-awareness through use of behavioral instruments, group exercises, individual reflection; major approaches to leadership, authentic leadership, team leadership, gender issues in leadership, emotional intelligence, virtual leadership.

## Leadership Studies, Certificate

## Requirements

The undergraduate Certificate in Leadership Studies requires 20 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in work for the certificate.

The certificate may be earned by any student admitted to the University of Iowa who is not enrolled in a UI graduate or professional degree program. Undergraduate to Graduate (U2G) students may earn the certificate when the undergraduate classification is primary.

Students must declare their intent to earn the certificate to a leadership studies advisor in the Pomerantz Career Center; see Leadership Studies Certificate on the center's website for information on how to enter the certificate program.

The certificate program provides a structure for involvement and commitment to leadership. It introduces students to leadership concepts and offers them hands-on leadership experiences they will need in order to begin the lifelong development of these skills. Certificate students complete two interdisciplinary core courses (6 s.h.), area electives ( 12 s.h.), and an experiential learning course (2 s.h.). A course may not be used to satisfy more than one certificate requirement. Students also have the opportunity to complete the certificate online.

The Certificate in Leadership Studies requires the following coursework

## Interdisciplinary Core Courses

All certificate students are required to complete two interdisciplinary core courses. In order to enroll in either course, students must have sophomore or higher standing and be in good academic standing as defined by the College of Liberal Arts and Sciences (cumulative GPA of at least 2.00).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| LS:3004 | Perspectives on Leadership: <br> Principles and Practices | 3 |
| LS:3012 | Leadership Theory to Practice | 3 |

Perspectives on Leadership: Principles and Practices (LS:3004) provides students with a broad foundation of leadership knowledge. It introduces diverse approaches to studying and practicing leadership and gives students a structure for organizing knowledge and skills from other leadership courses and experiences. The course features presentations by guest instructors from across the university, offering students an interdisciplinary perspective on leadership.
With the world changing at an accelerating rate, Leadership Theory to Practice (LS:3012) examines leadership effectiveness and the demand of a high-level ability to work with others and respond to change. Foundational concepts of major theories and behaviors of leadership models are covered, and practical challenges of leadership are analyzed.

## Area Electives

Area electives are drawn from four developmental areas central to effective leadership: self and group leadership, communication, cultural competence, and ethics and integrity. Students must complete 3 s.h. from each of these areas (total of 12 s.h.).

## Self and Group Leadership

| Course \# | Title | Hours |

| SRM:3700 | Ethics in Sport |  |

## Experiential Learning

Certificate students must earn at least 2 s.h. in a course focused on experiential or hands-on learning. An experiential learning course may take different forms, such as a service learning experience, an internship, or an on-campus leadership practicum. To satisfy the experiential learning requirement, they must complete one of these options: LS:1024 or LS:3002 or LS:3011.

## Service Learning Courses

Service learning courses incorporate community engagement with academic coursework. They allow students to gain hands-on experience along with a deeper understanding of course content while responding to real community needs.

Students may satisfy the certificate's experiential learning requirement by earning a minimum of $2 \mathrm{~s} . \mathrm{h}$. in service learning courses from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| May select one of these two options: |  |  |
| Option A |  | arr. |
| LS:1024 | Hawkeye Service Breaks |  |
| Option B |  | 3 |
| LS:3002 | Career Leadership Academy <br> Part 2: Leadership in Action |  |

## Internship or On-Campus Leadership Practicum

Students may register for the following course earning a minimum of 2 s.h. in order to receive certificate credit for the internship or oncampus leadership practicum. Certificate students must complete LS:3004 Perspectives on Leadership: Principles and Practices and at least 6 s.h. of additional leadership coursework in the certificate before they may enroll in LS:3011. They must complete all course assignments in order to fulfill the experiential learning requirement. Students who want to count LS:3011 toward the Tippie RISE requirement must register for an internship; registering with an oncampus leadership practicum will not satisfy Tippie RISE.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| LS:3011 | Leadership Certificate Capstone | 2 |

Internships consist of preapproved, supervised on-the-job learning; they may be paid or unpaid.

To meet the certificate's experiential learning requirement, an internship must consist of professional experience that relates to a student's major field of study or career interest area and allows the student to build on the academic coursework already completed in the certificate program. At least $80 \%$ of a student's internship duties must be professional-level work, and a student must receive continuous supervision by a professional (not a student) in the internship field. The internship must last a minimum of 15 weeks in fall or spring semester or six weeks in the summer and requires 150 hours of work.
Internships that fulfill the certificate's experiential learning requirement must be approved in advance by one of the certificate program's advisors, and the internship site supervisor must agree to the terms of the internship and must complete the required form before
the internship may be approved. Students may work with staff at the Pomerantz Career Center to find an approved internship opportunity, or they may secure their own internship.

For more information about internships, see Jobs and Internships on the Pomerantz Career Center website.

Students who wish to fulfill the experiential learning requirement with an on-campus leadership practicum must engage in a formal, approved experience that is meaningful, educational, and cocurricular. It requires a student to take initiative and pursue active leadership roles and responsibilities. Examples include positions as student organization leaders, student government leaders, University Housing resident assistants, student orientation advisors, peer educators, and fraternity and sorority leaders. Practicums may be paid or unpaid.

To meet the certificate's experiential learning requirement, a practicum must last a minimum of 15 weeks in fall or spring semester or six weeks in the summer and requires 150 hours of work.
Practicums that fulfill the certificate's experiential learning requirement must be approved in advance by one of the certificate program's advisors. Students must submit a list of goals and assignments and/or duties they will complete during the practicum in order to demonstrate that the practicum provides substantive work assignments and opportunities to build on the academic coursework they have completed in the certificate program.
Each student also must identify a practicum mentor and demonstrate that the mentor is willing to guide and evaluate the student's work and development of leadership skills, and intends to participate in reviewing the student's goal-setting assignment and the final review of the student's performance.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Leadership Studies, Certificate

| Course | Title | Hours |

|  | Hours | $\mathbf{3}$ |
|  | Total Hours | $\mathbf{2 1}$ |

a A required core course for the Leadership Studies Certificate.
Students must declare the certificate in order to enroll in this course.
b Satisfies "Self and Group Leadership" category requirement.
c Satisfies "Cultural Competence" category requirement.
d Satisfies "Experiential Learning" category requirement.
e Satisfies "Ethics and Integrity" category requirement.
f Satisfies "Communication" category requirement.

# Lifetime Leisure Skills 

## Director

- Steve J. Campbell

## Website: https://recserv.uiowa.edu/lifetime-leisure-skills

Lifetime Leisure Skills (LLS) courses are designed to engage students in fun and healthy recreational activities that can be continued beyond college and throughout their lives. Courses range from outdoor recreation activities such as rock climbing, canoeing, kayaking, backpacking, biking, and camping to indoor activities that include kickboxing, Brazilian jiu-jitsu, salsa dancing, and ballroom dancing. LLS courses are appropriate for students at all skill levels.

LLS courses are open to University of Iowa undergraduate and graduate students. Undergraduate students in the College of Liberal Arts and Sciences may count credit earned in LLS courses toward the total number of semester hours required for their degree. Students should consult their academic advisor.

While the majority of courses are on campus or in the Iowa City area, several off-campus courses are held in locations that include Grand Canyon National Park, Canyonlands National Park, Arches National Park, Zion National Park, Big Bend National Park, Voyageurs National Park, Grand Staircase-Escalante National Monument, Glen Canyon National Recreation Area, Effigy Mounds National Monument, Loess Hills State Forest, Yellow River State Forest, Maquoketa Caves State Park, Devil's Lake State Park, Pictured Rocks County Park, and the Upper Iowa River.

## Courses

## Lifetime Leisure Skills Courses

## LLS:1100 Introduction to Camping

Introduction to the wonderful world of camping; focus on development of skills and knowledge pertaining to camping equipment, campsite selection and setup, outdoor cooking, useful knots, and minimum impact principles; overnight camping required.

## LLS:1110 Exploring Iowa's Natural Wonders

 1 s.h.Natural history of the Loess Hills of western Iowa, Maquoketa Caves of eastern Iowa, or Effigy Mounds National Monument and Yellow River State Forest of northeastern Iowa; overnight camping required.

## LLS: 1115 Hiking

1 s.h.
Beginner-level hiking skills; safety and planning; proper care and use of equipment; physically strenuous; overnight camping required.

## LLS:1120 Backpacking

1 s.h.
Beginner-level backpacking skills; basic map reading, proper packing and planning, equipment and clothing selection; physically strenuous; overnight camping required.

## LLS: 1121 Expedition Backpacking

1 s.h.
Remote, multiday, backcountry camping skills; proper packing and planning; backcountry nutrition; topographic map reading; equipment and clothing selection; very physically strenuous; overnight camping required.
LLS:1130 Basic Orienteering 1 s.h.
Basics of orienteering, including map and compass skills. Taught at Macbride Nature Recreation Area.

## LLS:1131 Expedition Orienteering

1 s.h.
Extensive navigation and camping skills in a remote wilderness; focus on map and compass skills including declination, bearings, triangulation, topographical map reading, situational awareness; backcountry camping skills; very physically strenuous.

LLS:1140 Challenge Course: Team Building
1 s.h.
Exploration of various methods of team building and common characteristics of successful teams through the use of UI Challenge Course; strong emphasis on cooperative group work and discussions.
LLS:1150 Leadership in the Outdoors 4 s.h.
Leadership theories, group dynamics, expedition logistics, outdoor leadership skills, risk management; indoor and outdoor classroom sessions, overnight camping required; technical skill development may include backpacking, canoeing, kayaking, rock climbing, mountain biking, bike touring, general camping.

LLS:1200 Introduction to Rock Climbing
1 s.h.
Utilization of indoor and outdoor climbing classrooms; comprehensive introduction to physical techniques of rock climbing, mechanical skills of belaying, proper usage of personal protective equipment, and common climbing terminology.
LLS: 1201 Intermediate Rock Climbing
1 s.h.
Expands on skills learned in LLS:1200; requires current belay card for UI Campus Recreation and Wellness Center climbing wall; overnight camping required. Prerequisites: LLS: 1200.
LLS:1202 Expedition Rock Climbing
1 s.h.
Multiday climbing expedition; physically strenuous; overnight camping required.

LLS:1205 Anchor Systems for Top Rope Climbing 1 s.h.
Development of basic skills for climbing anchors; understanding setting top-rope anchors; use of bolts, trees, and passive and mechanical chocks for anchor setting; equalization of anchors; basic knots for rope, webbing, and cordelettes; basic understanding of the structural integrity and frictional forces important to anchor setting.
LLS: 1206 Movement Technique for Rock Climbing 1 s.h.
Multiweek program for improving rock climbing skills; warming up and stretching, movement technique, breathing, mental fitness, endurance, and goal setting. Prerequisites: LLS:1200. Requirements: must have a current belay card at UI climbing wall.

LLS:1210 Introduction to Lead Climbing: Sport 2 s.h.
Fundamentals of single-pitch sport climbing on lead; belaying a leader; use of 52.5 foot tall climbing wall at UI Campus Recreation and Wellness Center; eligible to obtain lead climbing approval after successful completion of course. Prerequisites: LLS:1200. Requirements: must have a current belay card at UI climbing wall.
LLS:1212 Expedition Lead Climbing: Sport 1 s.h.
Multiday single-pitch sport lead climbing expedition; requires current lead climbing approval for UI Campus Recreation and Wellness Center climbing wall; overnight camping required.

## LLS:1231 Introduction to Bouldering <br> 1 s.h.

Basic skills, safety, and techniques for bouldering.
LLS:1232 Expedition Bouldering
1 s.h.
Multiday bouldering expedition; overnight camping required.
LLS:1240 Introduction to Ice Climbing
1 s.h.
Basics of ice climbing.

## LLS:1300 Bicycle Touring

1 s.h.
Basics of bicycle touring for recreation; riding techniques, basic bicycle maintenance, rules of the road; students must already know how to ride a bike; moderately strenuous. Taught on Johnson County area roads and bike trail systems.

## LLS: 1301 Urban Cycling

1 s.h.
How to safely navigate urban areas by bicycle; traffic laws, situational awareness, basic maintenance, planning and route considerations.

## LLS:1310 Bikepacking

1 s.h.
Planning and packing for self-supported, overnight bicycle camping trips; proper care and use of equipment; physically strenuous; overnight camping required.

LLS:1311 Expedition Bicycle Touring
1 s.h. LLS:1611 Intermediate Kickboxing
1 s.h.
Multiday self-supported bicycle touring expedition; camp while exploring iconic touring routes of the United States; very physically strenuous; overnight camping required.

## LLS: 1320 Mountain Biking

Basics of mountain bicycling; riding techniques, basic bicycle maintenance, trail etiquette. Taught on Sugar Bottom recreation trail system.
LLS:1322 Expedition Mountain Biking 1 s.h.
Multiday mountain bicycling expedition; very physically strenuous; overnight camping required.

## LLS:1360 Trail Running

Techniques of off-road running; local running trails in and around Iowa City; emphasis on proper training, clothing, equipment, and nutrition; physically strenuous; no experience required.

## LLS:1400 Flat Water Canoeing 1 s.h.

Basics of flat water tandem canoeing; paddle strokes, canoe anatomy, water safety. Taught at Macbride Nature Recreation Area.

## LLS:1401 River Canoeing

Fundamentals of tandem canoeing on moving water; basic paddling strokes, canoe anatomy, hydrology, river safety; overnight camping required.

## LLS:1403 Expedition Canoeing

How to plan and pack for multiday canoeing expeditions; Leave No Trace primitive camping; paddling skills in loaded canoes; reading river/lake maps; portaging techniques; rescue techniques; overnight camping required.
LLS:1410 Sea Kayaking
Basics of sea kayaking using solo and tandem boats. Taught at Macbride Nature Recreation Area.

LLS:1411 Expedition Sea Kayaking
Multiday sea kayaking expedition; primitive camping; paddling skills in loaded kayaks, reading river/lake maps, rescue techniques.

## LLS:1423 Expedition Whitewater Kayaking 1 s.h.

Multiday whitewater kayaking expedition; class I-III rapids, rolling and bracing, safety and rescue techniques; overnight camping required.

## LLS: 1430 Stand Up Paddleboarding <br> Introduction to paddleboarding skills on flat, calm water; paddling environment, board and paddle control, standing and balancing, personal preparation and safety.

## LLS:1440 Scuba

Basics of Scuba diving. Seven weeks.

## LLS:1441 Advanced Open Water Scuba

Participation in five scuba diving specialty activities. Prerequisites: LLS:1440. Requirements: certification as open water scuba diver.

## LLS:1500 Winter Camping

How to successfully and comfortably camp in cold, harsh conditions; snow shelters, hydration, meal preparation, clothing needs; snowshoe/ ski travel with sleds (as conditions permit).

## LLS:1510 Snowshoeing

Basics of snowshoeing; physically strenuous.
LLS:1520 Cross-Country Skiing
Basics of cross-country skiing; physically strenuous.
LLS:1530 Alpine Skiing 1 s.h.
Basics of downhill skiing; physically strenuous.
LLS:1610 Kickboxing
Basics of kickboxing.

1 s.h.

1 s.h.

1 s.h.

1 s.h.

1 s.h.

1 s.h.

1 s.h.
Aggressive workout utilizing heavy bags, coach's mitts, and other equipment; conducted at moderate to intense pace using competitive kickboxing techniques, training methods, and equipment; kickboxing as a conditioning tool with self-defense as a byproduct; not designed to prepare for competition. Prerequisites: LLS:1610.
LLS:1630 Brazilian Jiu-Jitsu 1 s.h. Introduction to the sport of Brazilian Jiu Jitsu; basic self-defense, positional grappling, submissions, submission defense; no martial arts experience required.

LLS:1650 Ballroom Dancing 1 s.h.
Basics of ballroom dancing; overview of several figures; beginner level.
LLS:1651 Ballroom Dancing: Waltz 1 s.h.
Beginning through intermediate-level waltz figures; performing a beautiful waltz routine; skills and knowledge to dance with confidence at any formal dance occasion; for all skill levels.
LLS:1652 Ballroom Dancing: Foxtrot and Tango 1 s.h.
Beginning to intermediate-level figures in two of the most beautiful and popular dances in the world-foxtrot and tango; for all skill levels.
LLS:1653 Ballroom Dancing: Rhumba, Cha Cha, Merengue 1 s.h. Beginner- to intermediate-level figures in three of the most popular and energy-charged Latin dances of today-Rhumba, Cha Cha, and Merengue; for all skill levels.
LLS:1654 Ballroom Dancing: Nightclub Series 1 s.h.
Salsa, the Hustle, Nightclub Two-Step, Argentine tango; for all skill levels.
LLS:1655 Ballroom Dancing: Rhythm and Smooth 1 s.h. Mambo, samba, waltz, Viennese waltz; for all skill levels.

Fundamentals of Latin/Salsa dancing; musical rhythms, cultural history, postures, technique, basic movements; techniques for developing strength, stamina, balance, poise, and partner dancing skills; traditional social behaviors in salsa's cultural context.
LLS:1671 Beginner Knitting: Mindfulness and Patience 1 s.h.
Basics of knitting while exploring mindfulness and patience.
LLS:1675 Yoga
Emphasis on mindfulness, breath awareness, and attention to alignment.

## LLS:1680 Golf

1 s.h.
Basic principles and fundamentals of golf swing (e.g., full swing, pitching, chipping, putting); opportunity to practice skills at various facilities; history, basic rules, proper golf etiquette, evolution of golf related to technology.
LLS:1690 Gardening: Vegetables and Herbs 1 s.h.
Fundamental skills for successfully growing vegetables and herbs outdoors and in containers.

LLS:1691 Gardening: Designing Edible Forests
Fundamental skills for successfully designing and establishing fruit trees, berry bushes, and perennial herbs in ways that emulate a healthy woodland ecosystem and enrich our interaction with nature.

## LLS:1801 Wilderness First Responder

Skills necessary for providing critical medical care and making evacuation decisions in remote wilderness locations; interactive lectures, case studies, and hands-on practice through realistic scenarios help master material; 80-hour certification course.
1 s.h.
LLS:1850 Service Learning
Service learning project in an urban or wilderness setting; learn about local community, environment; projects depend on location, season.

## LLS:4000 Independent Study

Individual study in an area of interest to students; coursework
determined by faculty supervisor.
arr.

# Military Science (Army ROTC) 

## Director

- Kevin A. Salge

## Undergraduate minor: military science

Website: https://veterans.uiowa.edu/our-offices/army-rotc
The Military Science Program is synonymous with the Iowa Army Reserve Officers' Training Corps (ROTC). It gives students who wish to serve on active or reserve status in the U.S. Army the opportunity to earn commissions as Army officers. It also administers merit scholarships from the United States government to qualified students.

Although the Military Science Program does not offer degrees, students can earn a minor in military science. ROTC courses provide education in the military's role and instruction in leadership and management. The program's courses are an essential part of the University of Iowa ROTC program.

Military science courses are open to all students. Course credit that counts toward graduation varies by college. Students in the College of Liberal Arts and Sciences may count up to 20 s.h. earned in military science courses toward graduation.

## Undergraduate and Graduate Programs

## Basic Course

The ROTC Basic Course is designed primarily for first- and secondyear students. It provides the fundamentals of leadership and management and introduces the roles of the military as influenced by national and foreign policy. Students incur no obligation to the military for participation in the Basic Course.
The following four courses satisfy the Basic Course requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| MILS:1010 | Leadership and Personal | 1 |
| Development MSL101 |  |  |
| MILS:1020 | Introduction to Tactical | 1 |
| MILS:2010 | Leadership MSL102 | 2 |
|  | Innovative Team Leadership | 2 |
| MILS:2020 | MSL201 | 2 |
|  | Foundations of Tactical |  |

Students can take Basic Course requirements over a one- or twoyear period or during Basic Camp, held at Fort Knox, Kentucky. Students with prior military training normally are exempt from the Basic Course and Basic Camp requirements.

Basic Camp takes place in the summer, typically between a cadet's first and second years. Similar to basic training, Basic Camp trains cadets on many basic soldier skills ensuring cadets across the country have the same foundation of knowledge to be successful with the remainder of their Army ROTC training.

## Advanced Course

The ROTC Advanced Course is for cadets who wish to pursue a commission as a lieutenant in the U.S. Army upon graduation. It is open to both undergraduate and graduate students. Most cadets in the Advanced Course incur an obligation to the Army that can be satisfied in the Active Army, Army Reserve, or Army National Guard.

To enter the Advanced Course, students must satisfy the Basic Course requirement, earn at least 54 s.h., and have a cumulative grade-point average of at least 2.00. In order to become U.S. Army officers, cadets must complete the Advanced Camp, held at Fort Knox, Kentucky.
Cadets normally attend Advanced Camp during the summer between their third and fourth years.

The following courses are the academic requirements for completion of the Advanced Course.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| MILS:3010 | Adaptive Tactical Leadership | 3 |
| MILS:3020 | MSL301 |  |
|  | Leadership in Changing <br> MILS:4010 | Environments MSL302 <br> Meveloping Adaptive Leaders <br> MSL401 |
| MILS:4020 | Leadership in a Complex World | 3 |
|  | MSL402 |  |

## Additional Coursework

Cadets whose aim is a commission must satisfy a Professional Military Education (PME) requirement. They must complete at least one course in military history from the following list. Cadets may use other courses to meet the additional coursework requirement, with the military science professor's approval.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| HIST:1261 | American History to 1877 | 3 |
| HIST:1262 | American History 1877-Present | 3 |
| HIST:3271 | American Revolutionary Period | 3 |

## Scholarship Opportunities

The Military Science Program offers two-, three-, and four-year ROTC scholarships for students who enter the ROTC program. These scholarships pay full tuition at the University of Iowa, an allotment for books and supplies each semester, mandatory educational fees, and a tax-free monthly stipend during the academic year. The tax-free monthly stipend is provided to non-scholarship cadets who enter a contractual agreement with ROTC to serve in the Army. Additional financial assistance may be provided through scholarships.

## Programs

## Undergraduate Program of Study <br> Minor

- Minor in Military Science [p. 2076]

## Courses

## Military Science Courses

MILS:1010 Leadership and Personal Development MSL101 1 s.h. Introduction to the personal challenges and competencies critical for effective leadership; how skills such as critical thinking, goal setting, time management, physical fitness, and stress management relate to leadership, officership, and the army as a profession; dimensions of army leadership; understanding of the ROTC program, its purpose in the army, its advantages for students. Offered fall semesters.

MILS: 1020 Introduction to Tactical Leadership MSL102 1 s.h.
Leadership fundamentals such as setting direction, problem solving, listening, presenting briefs, providing feedback, using effective writing skills; leadership values, attributes, skills, and actions explored through hands-on, interactive exercises; cadre role models, development of strong relationships among students through common experience, practical interaction. Offered spring semesters.

## MILS:1090 Leadership Laboratory

0 s.h.
Hands-on training in basic soldier skills, such as customs and courtesies, drill and ceremony, first aid, weapons employment, troop movement techniques; leadership training for U.S. army officership. Offered fall and spring semesters.
MILS:1095 Advanced Military Fitness Training 1 s.h.
Aerobics and running, muscular strength and endurance, flexibility, and nutrition through exercise and classroom instruction; how to evaluate and measure fitness improvement; developed around Army physical fitness training program. Offered fall and spring semesters.

## MILS:2010 Innovative Team Leadership MSL201 <br> 2 s.h.

Dimensions of creative, innovative tactical leadership strategies and styles explored through team dynamics and historical leadership theories (trait and behavior) central to the Army leadership framework; personal motivation and team building through planning, executing, and assessing team exercises and participating in leadership labs; continued development of leadership values and attributes through understanding army rank, structure, duties, basic aspects of land navigation and squad tactics; case studies on soldier's creed and warrior ethos in the contemporary operating environment. Offered fall semesters.

MILS:2020 Foundations of Tactical Leadership MSL202 2 s.h. Challenges of leading tactical teams in the complex contemporary operating environment; dimensions of terrain analysis, patrolling, operation orders; theoretical basis of the army leadership framework, dynamics of adaptive leadership in the context of military operations; self-assessment of cadet leadership styles, practice in communication and team building skills; case studies on importance and practice of teamwork and tactics in real-world scenarios. Offered spring semesters.
MILS:3010 Adaptive Tactical Leadership MSL301 3 s.h.
Study, practice, and evaluation of adaptive leadership skills in challenging scenarios related to squad tactical operations; feedback on cadets' leadership attributes and actions, continued development of leadership and critical thinking abilities; development of tactical leadership abilities in preparation for Leadership Development and Assessment Course (LDAC). Offered fall semesters. Corequisites: MILS:1090 and MILS:1095. Requirements: MILS:1010 and MILS:1020 and MILS:2010 and MILS:2020; or completion of army basic training or Leader's Training Course.
MILS:3020 Leadership in Changing Environments MSL302 3 s.h.
Development of cadet awareness and tactical leadership to platoon level, through increasingly intense situational leadership challenges; experience reviewing combat, stability, and support operations, conducting military briefings, developing proficiency in garrison operation orders; focus on exploring, evaluating, and developing skills in decision-making, persuasion, and motivation of team members in a contemporary operating environment; preparation for summer Leader Development Assessment Course. Offered spring semesters. Prerequisites: MILS:3010. Corequisites: MILS:1090 and MILS:1095. Requirements: MILS:1010 and MILS:1020 and MILS:2010 and MILS:2020; or completion of army basic training or Leader's Training Course.

MILS:3121 Readings in Contemporary Military Issues 1-3 s.h.
Preparation of book reviews from a reading list provided by the instructor, with topics ranging from historical battles and campaigns to global impact of U.S. political policies; or writing of an operations order relating to an ROTC event or similar project of historical significance (work in conjunction with instructor). Requirements: MILS:1010 and MILS:1020 and MILS:2010 and MILS:2020; or completion of army basic training or Leader's Training Course. MILS:4010 Developing Adaptive Leaders MSL401 3 s.h. Development of proficiency in planning, executing, and assessing complex operations, functioning as member of a staff, providing performance feedback to subordinates; experience assessing risk, making ethical decisions, leading fellow cadets; military justice and personnel processes in preparation for officership; identification of key staff responsibilities, coordination of staff roles, use of situational opportunities to teach, train, and develop subordinates. Offered fall semesters. Prerequisites: MILS:3020 and MILS:3010. Corequisites: MILS:1090 and MILS:1095.
MILS:4020 Leadership in a Complex World MSL402 3 s.h. Leadership dynamics in complex military operations of the contemporary operating environment; differences in customs and courtesies, military law, principles of war, rules of engagement in the face of international terrorism; interaction with nongovernmental organizations, civilians on the battlefield, host nation support; ethical and practical demands on army commissioned officers; preparation for first unit assignment through case studies, scenarios, exercises. Offered spring semesters. Prerequisites: MILS:3010 and MILS:4010 and MILS:3020. Corequisites: MILS:1090 and MILS:1095.

## Military Science, Minor

## Requirements

The undergraduate minor in military science requires a minimum of 20 s.h. of coursework taken at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass. In order to count coursework taken at other institutions toward the minor, students must have the military science professor's approval.
The minor in military science requires the following coursework.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| MILS:1010 | Leadership and Personal Development MSL101 | 1 |
| MILS:1020 | Introduction to Tactical Leadership MSL102 | 1 |
| MILS:2010 | Innovative Team Leadership MSL201 | 2 |
| MILS:2020 | Foundations of Tactical Leadership MSL202 | 2 |
| MILS:3010 | Adaptive Tactical Leadership MSL301 | 3 |
| MILS:3020 | Leadership in Changing Environments MSL302 | 3 |
| MILS:4010 | Developing Adaptive Leaders MSL401 | 3 |
| MILS:4020 | Leadership in a Complex World MSL402 | 3 |
| One of these: |  |  |
| MILS:3121 | Readings in Contemporary Military Issues (taken with a qualified IMHIC instructor) | 2-3 |
| HIST:1261 | American History to 1877 | 3 |
| HIST:1262 | American History 1877-Present | 3 |
| HIST:3271 | American Revolutionary Period | 3 |

## Nonprofit Leadership and <br> Philanthropy

## Codirectors

- Deborah Dunkhase (Management and Entrepreneurship), Jenifer
A. Vick (Journalism and Mass Communication)

Undergraduate certificate: nonprofit leadership and philanthropy
Website: https://nlp.uiowa.edu/
Nonprofit organizations play vital roles in our communities and contribute to our quality of life. These organizations have unique management, funding, and finance issues that require specialized training. The Certificate in Nonprofit Leadership and Philanthropy meets the needs of students who have a desire to prepare for a career in a nonprofit role or to impact the nonprofit sector through volunteering on a board, committee, or project.

The certificate provides students with the knowledge, skills, and mindset to participate effectively in the growing world of nonprofits. It gives students the tools to do good in the world, choosing a career in the nonprofit sector or by making a difference through volunteerism.

Core courses cover essentials in nonprofit leadership, fundraising, communication strategies, and nonprofit ethics and governance. The program provides a balance of academic principles and real-world experience, as well as a fundamental understanding of how nonprofit organizations participate in building communities. Courses are offered on campus and online, which allows distance and online students the opportunity to earn the certificate.

The Certificate in Nonprofit Leadership and Philanthropy is administered by the School of Journalism and Mass Communication [p. 708] (College of Liberal Arts and Sciences) and the Department of Management and Entrepreneurship [p. 1198] (Tippie College of Business). It is awarded by University College.

## Programs

## Undergraduate Program of Study

## Certificate

- Certificate in Nonprofit Leadership and Philanthropy [p. 2078]

## Nonprofit Leadership and Philanthropy, Certificate

## Requirements

The undergraduate Certificate in Nonprofit Leadership and Philanthropy requires a minimum of 21 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in work for the certificate.

The certificate may be earned by any student admitted to the University of Iowa who is not enrolled in a UI graduate or professional degree program. Undergraduate to Graduate (U2G) students may earn the certificate when the undergraduate classification is primary.
Courses are offered on campus and online, allowing distance and online students the opportunity to earn the certificate.
Bachelor of Applied Studies [p. 2043] and Bachelor of Liberal Studies [p. 2046] students may be able to incorporate certificate courses into their degree programs; students should consult with their advisors.

The Certificate in Nonprofit Leadership and Philanthropy requires the following coursework.

## Foundation Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| JMC:3710 | Fundraising Fundamentals | 3 |
| MGMT:3500/ | Nonprofit Organizational | 3 |

[^9]b Students must take at least one of JMC:3720 or MGMT:3600, but may take both to count toward the certificate.
c Students select elective coursework to total at least 21 s.h. for the certificate. See General Catalog for list of approved courses.

## Public Policy

## Director, School of Planning and Public Affairs

- Lucie Laurian

Coordinator, Public Policy

- Anne M. Barber (Planning and Public Affairs)

Undergraduate minor: public policy
Faculty: https://sppa.uiowa.edu/faculty-staff
Website: https://sppa.uiowa.edu/
The minor in public policy is offered for undergraduate students who seek to understand how and why public policies are adopted; how they impact the economy, society, and communities; and how innovative public policies are developed to improve economic prosperity, social justice and well-being, and environmental sustainability at the local, state, national, and global levels.

Students who earn the minor will be able to analyze the impact of past and current public policies, understand the institutions and process of policy making, and develop new public policies to tackle pressing challenges faced by our society. They will be prepared to enter policymaking fields in their areas of interest, and to make communities, states, and nations more resilient, inclusive, and prosperous.
The minor is awarded by University College.

## Programs

Undergraduate Program of Study

## Minor

- Minor in Public Policy [p. 2081]

## Public Policy, Minor

The minor in public policy is well-suited for students majoring in economics, political science, education, sociology, criminology, pre-law, human rights, social justice, social work, geography, sustainability, environmental policy and planning, civil and environmental engineering, health and public health, business, anthropology, history, journalism and mass communication, African American studies, and Native American and Indigenous studies among other areas.

## Requirements

The undergraduate minor in public policy requires 15 s.h. of coursework taken at the University of Iowa. Students must maintain a grade-point average of at least 3.00 in work for the minor. Coursework in the minor may not be taken pass/nonpass.
The minor in public policy requires the following coursework.

## Core Courses

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| Two of these: |  | 3 |
| PBAF:3117/ | Bureaucratic Politics and Public |  |
| POLI:3117 | Administration | 3 |
| PBAF:3560/ | Public Policy and Persuasion |  |

|  | Social Inequality | 3 |

## Admission

## Declaring the Minor

Students may declare the minor in MyUI as soon as they are enrolled in any of the public policy minor courses.

Those interested in pursuing the minor must meet with the minor advisor, be briefed on the minor expectations for performance, and complete a plan of study that must be approved by the minor advisor.

For more information, contact the School of Planning and Public Affairs.

# Secondary Student Training <br> <br> Program 

 <br> <br> Program}

Director

- Ashlee Donithan

Website: https://belinblank.education.uiowa.edu/students/sstp/

## Precollege Program

Students who are currently in grades 10-11 may apply to the Secondary Student Training Program (SSTP), a multi-week summer research program at the University of Iowa. There are online and residential sections of SSTP. Students conduct original research under the guidance of a faculty mentor. They also produce a research brief and an academic poster as a part of the program. Students earn 3 s.h. of university credit for successful program completion.

The Secondary Student Training Program is administered by the Belin-Blank Center for Gifted Education and Talent Development. For more information, contact the Belin-Blank Center.

## Courses

Secondary Student Training Program
Course
SSTP:1001 Secondary Student Training Program 3 s.h.
Experience conducting research under the guidance of a faculty mentor; presentation of research findings at concluding seminar.

# Study Abroad 

# Assistant Provost, International Programs

## Associate Directors

- Autumn Tallman, Elizabeth Wildenberg de Hernandez

## Website: https://international.uiowa.edu/study-abroad

The University of Iowa sponsors a wide variety of study abroad programs in approximately 50 countries throughout the world. Students may choose from summer, fall, or spring semester, academic year, spring break, and winter session programs that complement and extend the university's academic programs across the curriculum.

Study Abroad offers programs to appeal to a broad range of majors and interests. Major Advising Pages (MAPs) are created to help students better understand how study abroad can fit into their programs of study. The program search engine, Search UI Study Abroad Programs, allows students to browse information about study abroad programs.

Students also can participate in study abroad programs sponsored by other accredited U.S. and international institutions. They should obtain advance approval of all transfer credit by completing a Study Abroad Credit Approval Form.
Additionally, Study Abroad offers some virtual global courses that take place entirely online but are internationally focused and make connections in host countries around the world.

Information on University of Iowa study abroad programs is available from Study Abroad.

## Facilities

Study Abroad is located in the International Programs suite in the University Capitol Centre (UCC). Students can meet with their assigned study abroad advisor in the Study Abroad office or virtually via Zoom.

## Courses

- Study Abroad Courses [p. 2083]
- International Activities Courses [p. 2098]

## Study Abroad Courses

ABRD:3010 Iowa Regents in Wales: Swansea University arr. Swansea University in Wales, UK; students take regular university coursework in humanities, social sciences, physical sciences, business, and engineering. Semester or academic year. Requirements: 3.00 minimum GPA, good academic and disciplinary standing, and sophomore or higher standing.

## ABRD:3011 Iowa at Oxford

arr.
Unique opportunity to spend an academic year fully matriculated at the University of Oxford; students enroll in a wide range of courses at Mansfield College, one of 38 colleges that make up the University of Oxford; as an Oxford student, participants take part in Oxford's personalized tutorial system, attend lectures, share accommodations with local students, and become fully immersed in the social and academic culture of one of the mostly highly regarded academic institutions in the world. Requirements: 3.70 GPA, sophomore standing, and good academic and disciplinary standing.

## ABRD:3012 Iowa Regents in Scotland: University of Edinburgh

arr. Advanced undergraduate study at the University of Edinburgh; humanities, social sciences, science, engineering. Fall and/or spring. Requirements: GPA of at least 3.00.

ABRD:3013 IES London: Study London
arr.
Coursework in international economics, finance, management, creative and performing arts, literature, communications, cultural studies, and political science, as well as a huge variety of creditbearing internship and service learning opportunities; option to enroll directly in a local British university; the IES Study London program provides a unique opportunity to engage in all aspects of contemporary British society; students combine coursework with study outside the classroom to explore the rich heritage of the United Kingdom, as well as its contemporary social, economic, and political culture. Requirements: 2.75 GPA and good academic and disciplinary standing.

## ABRD:3014 IES London and Jamaica Health Practice and

 Policy arr. Opportunity to study global health issues in the United Kingdom and Jamaica; students enroll in courses in public health, social welfare, and comparative health care in London, and spend their final ten days of the program completing a capstone experience in Mona, Jamaica hosted by the University of West Indies in Mona; ideal for students focusing on preprofessional medical studies, public health, anthropology, economics, political science, and sociology. Semester. Requirements: 3.00 GPA and good academic and disciplinary standing.
## ABRD:3016 IES London, United Kingdom Today

Unique opportunity to engage in all aspects of contemporary British society; courses in international business, management, literature, communications, cultural studies, film studies, political science, and sociology; students combine coursework with study outside the classroom, and explore the rich heritage of the United Kingdom as well as its contemporary social, economic, and political culture. Requirements: 2.75 GPA and good academic and disciplinary standing.
ABRD:3017 IES London: University College London arr.
Unique opportunity to directly enroll at the University College London, one of the top-ranking universities in the world; students live and study with their British peers in the heart of London while choosing from a huge variety of courses in biology, chemistry, engineering, economics, English, fine art, global health, history, management, and many other popular majors; students are fully immersed in British culture and truly learn what it's like to be a Londoner through engagement with locals and taking advantage of IES field trips around the country. Semester or academic year. Requirements: good academic and disciplinary standing, GPA of at least 3.30 ( 3.70 to enroll in economics courses, 3.50 to enroll in English or management courses); and junior or senior standing.

ABRD:3018 Creativity, Imagination, and Play in London arr. Students learn about art, culture, and human development through an exploration of London and nearby sites; use of rich museums, galleries, architecture, food, and community organizations of Britain to investigate how art and culture are produced through tours, making, visual journaling, and site-specific play; for preservice teachers, artists, and designers who want to incorporate global perspectives into their practices. Requirements: 3.00 GPA , and good academic and disciplinary standing. Recommendations: enrollment in teacher education, education studies and human relations, or art/design program.
ABRD:3020 London Performance Study arr.
Selected theater productions, lectures, performances, discussions, written exercises, workshops, cultural activities. Credit may be applied toward a University of Iowa major in English or theatre arts. Summer.

ABRD:3025 International Business in London
arr.
Study of the international business environment in one of the world's financial capitals; may count toward undergraduate business major or Certificate in International Business. Winter. Prerequisites vary depending on classes being offered. Requirements: junior standing.
ABRD:3026 IES Internships London arr.
Real-world experience combined with professional skill building and cultural immersion; interning full time in student's chosen field. Eight weeks in summer. Requirements: 2.50 GPA , junior or higher standing, and good academic and disciplinary standing.

## ABRD:3028 Shakespeare's England

 arr.Students go out into the streets, museums, theatres, and even forests of London to see the way the city inspired and continues to inspire some of the greatest writing in English; London is a center of modern film industry and a capital of international finance and technology, yet Shakespeare and Chaucer would still be able to recognize the shape of many of its winding streets; students get to know Shakespeare's England through readings, writings, and performances. Requirements: 2.75 GPA, and good academic and disciplinary standing.

ABRD:3030 Iowa Regents in Ireland: University College Cork arr. Regular coursework in all disciplines at University College Cork in Ireland. Fall and spring semesters. Requirements: sophomore standing and GPA of at least 3.00.

## ABRD:3031 IES Internships Dublin

arr.
Real-world experience combined with professional skill building and cultural immersion; interning full time in chosen field. Eight weeks in summer.

## ABRD:3034 STEM and Irish Studies in Dublin

arr.
Science, technology, engineering, and mathematics (STEM) students from Big Ten schools study together in Dublin; courses include introductory physics II with lab, and a course on Irish history and culture. Requirements: major in a STEM field, 3.00 GPA, good academic and disciplinary standing, and completion of MATH:1550, MATH:1560, and 4 s.h. of PHYS:1611.

## ABRD:3035 Irish Writing Program

arr.
Dublin, Ireland; writing workshops directed by Irish writers, literature courses taught by faculty. Summer.

## ABRD:3036 IES Dublin Irish Studies

arr.
Offering coursework in economics, entrepreneurship, management, creative writing and literature, communications, cultural studies, and political science, as well as a huge variety of credit-bearing internship and service learning opportunities, the IES Dublin Irish Studies program addresses all aspects of contemporary Irish society; students combine coursework with study outside the classroom for the opportunity to discover the rich heritage of Ireland and its contemporary, social, economic, and political culture. Requirements: 2.75 GPA and good academic and disciplinary standing.

## ABRD:3037 IES Dublin: Trinity College Dublin <br> arr.

Unique opportunity to enroll at Trinity College Dublin; students live and study with their Irish peers while choosing from a huge variety of courses in biology, business, chemistry, drama and film, English, engineering, economics, Irish language, psychology, and many other popular majors; students are fully immersed in Irish culture and truly learn what it's like to be a Dubliner through engagement with locals, taking advantage of IES field trips around the country, and enrolling in one of Ireland's oldest and finest institutions. Semester or academic year. Requirements: 3.30 GPA , good academic and disciplinary standing, second-semester sophomore or higher standing at time of participation, and at least one year of successful coursework at the UI or another bachelor's-degree granting institution.

ABRD:3038 IES Dublin: Gaiety School of Acting arr.
Unique opportunity to directly enroll at the National Theatre School of Ireland's Gaiety School of Acting; students become engaged in intensive, conservatory-like training in acting for theatre, film, and television at Ireland's premier acting school; situated in the heart of Dublin and offers a rare chance to be fully immersed in Irish social and academic culture at a world-class institution focusing specifically on performance art. Semester or academic year. Recommendations: 2.75 GPA , theatre arts major or minor, and good academic and disciplinary standing.

## ABRD:3039 IES Dublin Writers Program

arr.
Study of contemporary Irish authors, as well as those of the past, this writers program is designed to inspire and challenge writers to elevate their skills to the next level; Dublin is a city that caters to the lovers of all things literary with vibrant and varied literary and visual arts scene, an abundance of eclectic bookshops, and quirky cafés; managed by the Institute for the International Education of Students (IES) Abroad. Requirements: clear interest and commitment, demonstrated preparedness/maturity, minimum 2.75 GPA , good academic and disciplinary standing, and completion of at least one semester of college-level study.
ABRD:3040 IES Dublin: Dublin City University arr.
Dublin City University (DCU) offers a wide variety of challenging courses; the program appeals primarily to students who are ready for the challenge of adapting to an entirely new academic culture that requires significant independent work. Requirements: clear interest and commitment, demonstrated preparedness/maturity, minimum 3.00 GPA, good academic and disciplinary standing, completion of at least one semester of college-level study, and 18 years of age.

ABRD:3044 IES Internships Vienna arr.
Real-world experience combined with professional skill building and cultural immersion; full-time internship in student's chosen field in Vienna, Austria. Requirements: 2.50 GPA, junior or higher standing, and good academic and disciplinary standing.
ABRD:3045 Academic Year in Freiburg
arr.
Combination of special program classes, German for foreigners, and regular degree coursework in most liberal arts subjects at Albert-Ludwigs University, Freiburg, Germany. Academic year. Requirements: at least four semesters college German with GPA of at least 3.00

## ABRD:3046 IES Internships Berlin

Real-world experience combined with professional skill building and cultural immersion; eight weeks over the summer interning full time in the student's chosen field. Requirements: two semesters of collegelevel German, 2.50 GPA, junior or higher standing, good academic and disciplinary standing; non-U.S. passport holders should verify eligibility for German visa prior to application.

## ABRD:3047 Global Engineering: Berlin

arr.
Students enroll in a basic engineering course taught according to syllabi developed by the University of Iowa College of Engineering; visits and excursions to observe practical applications of engineering principles discussed in class. Four-weeks in summer. Requirements: 2.75 GPA and good academic and disciplinary standing; may require additional prerequisites depending on specific course offered.

## ABRD:3048 USAC Luneburg Program

arr.
The Lüneburg program is ideal for students interested in learning German language and focus on European Studies-specifically Germany's role within the European Union; students greatly expand their language skills and knowledge of German society through formal coursework and personal interaction with host culture. Requirements: good academic and disciplinary standing at time of application and through departure, and minimum UI and cumulative GPA of 2.50.

ABRD:3049 Sustainable Chemistry
Chemistry topics central to questions and research of sustainability (e.g., urbanization, biodiversity, conservation and climate change, adaptation and mitigation) and the Rhine region of Germany, Switzerland, and France recognized as being at the forefront of advancement in these areas; the Rhine River Valley at the heart of industrial and urban sustainability efforts in Europe provides an ideal opportunity to collaborate with industry and academic leaders in sustainable chemistry. Requirements: 2.75 GPA, and good academic and disciplinary standing. Recommendations: completion of CHEM: 1120 with a minimum grade of C-

## ABRD:3050 IES Freiburg European Union

 arr.Students live and learn about European politics, economics, business, and international relations; courses taught in English (e.g., global leadership, political science); exposure to the European Union and beyond. Requirements: 2.75 GPA and good academic and disciplinary standing.

## ABRD:3055 SIT Switzerland International Studies and

 Multilateral Diplomacyarr.
Opportunity to gain language proficiency and learn how to conduct undergraduate field research abroad; concentration on exploration of a specific critical global issue. Requirements: good academic and disciplinary standing, 2.50 GPA, and emotional maturity due to subject matter.

## ABRD:3062 CIEE Paris Critical Studies Program

Analysis of literature, film, and other forms of visual expression through use of contemporary critical theory; interaction among fields of literature, aesthetics, and psychoanalysis; examination of problems involved in such analysis; administered by the Council on International Educational Exchange (CIEE) on behalf of a consortium of which the University of Iowa is a member; for students with advanced French language skills. Requirements: 3.00 cumulative GPA, five semesters of college-level French, and previous coursework in relevant fields.

## ABRD:3063 CIEE Paris Open Campus

arr.
Combines an interdisciplinary academic program on contemporary French society and culture (taught in French or English) with opportunity to develop strong language skills; contemporary social issues in politics, Francophone cultures, and Muslim communities in Europe; administered by the Council on International Educational Exchange (CIEE) on behalf of a consortium of which the University of Iowa is a member; for intermediate-level French students. Requirements: 2.75 cumulative GPA and good academic and disciplinary standing.

## ABRD:3064 CIEE Rennes Liberal Arts Program

Increase language ability and knowledge of France and French culture; opportunity to take regular university classes alongside French students; intensive language and humanities coursework; cultural activities; administered by the Council on International Educational Exchange (CIEE) on behalf of a consortium of which the University of Iowa is a member; for intermediate or advanced intermediate students. Requirements: 2.75 cumulative GPA, 3.00 GPA in French language, and four semesters of college-level French.

## ABRD:3066 CIEE Paris Global Institute Summer Program arr.

 Students take courses in several different disciplines; administered by the Council on International Educational Exchange (CIEE) on behalf of a consortium of which the University of Iowa is a member. One, two, or three four-week summer sessions. Requirements: 2.75 GPA and four semesters of college-level French.
## ABRD:3069 USAC Lyon Program

arr.
Intensive French language beginning with second-year French; additional courses in French culture, history, art, politics, and other disciplines are taught in both French and English. Requirements: GPA of at least 2.50 , good academic and disciplinary standing, and completion of two semesters of college-level French or equivalent.
arr. ABRD:3070 USAC Pau arr.
Beginning through advanced French language study at the University of Pau; additional courses in French culture, literature, politics, history, and other disciplines. Taught in English and French; no previous study of French required. Requirements: GPA of at least 2.50 .

ABRD:3071 Study Abroad in Montpellier arr.
Special courses for international students or regular courses with French students at University of Montpellier; taught in French. Semester or academic year. Requirements: four semesters of French.

## ABRD:3072 Montpellier Summer Language Program arr.

Advanced French language and course on contemporary France that explores current perspectives on immigration; visits to local organizations dedicated to naturalization services; public housing; immigrants' rights, nonviolence, antiracism, and antidiscrimination; excursions around Montpellier and other social activities; option to take accelerated language track in either four- or eight-week program; development of language skills in various contexts depending on level (beginning through advanced) and prescribed curriculum at each level. Six weeks. Requirements: 2.50 GPA and average grade of B in French coursework.

## ABRD:3074 IES Internships Paris

arr.
Real-world experience combined with professional skill building and cultural immersion; interning full time in student's chosen field.
Eight weeks in summer. Requirements: four semesters of college-level French, 2.50 GPA, junior or higher standing, and good academic and disciplinary standing.
ABRD:3075 CEA Paris: Summer Internship
arr.
Students spend a summer immersed in Parisian culture and gain valuable hands-on skills in an international internship in one of Central Europe's economic and cultural capitals; placement in an organization or company that aligns with professional and academic goals; building a network of contacts while gaining hands-on international experience that employers value; CEA internship program includes personalized internship placement and academic courses; internship work schedules may vary depending on industry standards in career field. Requirements: minimum 2.75 GPA, firstyear or higher standing at time of application, and good academic and disciplinary standing. Recommendations: French language skills encouraged but not required.

## ABRD:3083 USAC Torino Program

arr.
Academic coursework, practical learning, tours, site visits, and integrated cultural experience; content in diverse academic areas of business, architecture, and Italian studies; Italian language courses; administered by the University Studies Abroad Consortium (USAC) of which the University of Iowa is a member. Semester, summer, or academic year. Requirements: 2.50 GPA and appointment with Italy study abroad advisor prior to application.
ABRD:3084 USAC Viterbo Program arr.
Academic coursework at Viterbo's historical Tuscia University of Viterbo; practical learning, tours, site visits, and integrated cultural experience; high-quality educational experience in art history and Italian studies; Italian language course; administered by the University Studies Abroad Consortium (USAC) of which the University of Iowa is a member. Semester, academic year, or five-week summer session. Requirements: 2.50 GPA , good academic standing, and appointment with Italy study abroad advisor prior to application.
ABRD:3086 USAC Verona Program
arr.
Language study and additional coursework in English or Italian; administered by the University Studies Abroad Consortium (USAC) of which the University of Iowa is a member. Summer, semester, or academic year. Requirements: 2.50 GPA and good academic and disciplinary standing.

## ABRD:3087 USAC Reggio Emilia Program

Language study and additional coursework in English or Italian; administered by the University Studies Abroad Consortium (USAC) of which the University of Iowa is a member. Summer, semester, or academic year. Requirements: 2.50 GPA and good academic and disciplinary standing.

## ABRD:3088 CIMBA Italy Program

arr.
Coursework in business and related disciplines in the Veneto region of Italy, taught in English. Four weeks in summer or 13-week semesters.

## ABRD:3089 IES Internships Rome

Real-world experience combined with professional skill building and cultural immersion; interning full time in the student's chosen field. Eight weeks in summer. Recommendations: 2.50 GPA, junior or higher standing, and good academic and disciplinary standing.

## ABRD:3090 IES Internships Milan <br> arr.

Real-world experience combined with professional skill building and cultural immersion; interning full time in student's chosen field. Eight weeks in summer. Requirements: 2.50 GPA , junior or higher standing, and good academic and disciplinary standing.
ABRD:3091 IES Milan Business Studies and Italy Today
arr.
Offering coursework in liberal arts, social sciences, business, and music, the IES Abroad Milan program addresses all aspects of contemporary Italian society; students have the opportunity to take classes at one of six local partner universities or enroll in a part-time internship for credit. Requirements: 2.75 GPA and good academic and disciplinary standing.

## ABRD:3092 IES Rome

Offering courses in art history, history, religious studies, and Italian, the IES Abroad Rome program focuses on full language immersion; students have the opportunity to take advantage of a part-time internship for credit. Requirements: 2.75 GPA and good academic and disciplinary standing.

## ABRD:3093 IES Rome Tourism and Cultural Heritage

 ManagementCourse offerings in tourism and cultural management; students utilize Rome as their classroom while learning how to balance a thriving tourist industry with a sustainable cultural heritage emphasis. Requirements: 2.75 GPA and good academic and disciplinary standing.
ABRD:3094 Wells College Florence: Lorenzo de Medici arr. Unique opportunity to study and live in Florence, Italy; Wells College Florence study abroad program offers a rich and varied curriculum in English with more than 250 courses through Lorenzo de Medici. Requirements: 2.80 GPA and good academic and disciplinary standing.

## ABRD:3095 CEA Florence: Santa Reparata International School

arr.
Students are challenged to transform their Italian experience into art through printmaking, fashion design, painting, drawing, and more; close instruction by practicing artists encourage contemporary work in response to Florentine traditions; designed for art and non-art majors. Requirements: 2.50 GPA and good academic and disciplinary standing.

ABRD:3096 International Business in Italy arr.
Italy is used as the local environment to learn about the history of the European Union, development of the eurozone, and financial and political challenges being addressed therein; students explore how current economic and political decisions in Europe will drive the future of the worldwide economy. Requirements: 2.75 minimum UI and cumulative GPA, minimum of 30 s.h. completed prior to the program; sophomore or higher standing, and completion of FIN:3000.

ABRD:3097 European Ceramics Studio arr.
Students gain experience working in international studio settings in Europe; travel to designated sites, completion of original artwork, attendance at lectures, visits to relevant historic and contemporary sites, and working collaboratively with a studio team of peers and mentors to learn fabrication methods relevant to production of original works of ceramic art. Requirements: cumulative GPA of 2.50 .

## ABRD:4438 Business and Culture in China <br> 3 s.h.

Exploration of business and cultural environment through a University of Iowa faculty-led study program in China; lectures, readings, case studies, company visits, and immersion in cultural experiences; development of greater awareness of Chinese history, politics, business, economics, and culture; topics may include Chinese business culture and relationships, local companies going global; business strategies of multinational companies in Chinese market; United States-China trade relations; entrepreneurship, Chinese consumer, sustainability, and social responsibility. Requirements: 2.75 cumulative and UI GPA, and minimum of 30 s.h. completed prior to program.
ABRD:4439 Chinese University of Hong Kong Exchange 12 s.h. The Chinese University of Hong Kong (CUHK) Accounting Exchange Program provides University of Iowa accounting students the ability to integrate a unique international experience with their academic program. Semester. Requirements: 3.00 UI and cumulative GPA, completion of one semester toward UI accounting major, and good academic standing.

## ABRD:4444 Hong Kong University of Science and Technology

## Business Exchange

arr.
The Hong Kong University of Science and Technology (HKUST) Business Exchange program HKUST is consistently ranked as one of the top schools in both Asia and in the world, and offers UI students the opportunity to study while paying UI tuition rates; designed specifically for business and management students. Semester or academic year. Summer. Requirements: undergraduate standing, GPA of 2.70 or higher, and good academic and disciplinary standing.

## ABRD:4445 Kyung Hee University Exchange arr

Reciprocal exchange program between the University of Iowa and Kyung Hee University in Seoul, South Korea; wide range of Englishtaught courses in various disciplines including business, humanities, natural sciences, social sciences, engineering, and applied sciences. Summer, semester, or year. Requirements: 3.00 cumulative GPA and good academic and disciplinary standing.
ABRD:4446 East China Normal University Exchange arr. Students take Chinese language courses and English language courses on a variety of topics, most of which pertain to China's culture, philosophy, history, and business landscape. Requirements: 3.00 GPA and good academic and disciplinary standing.
ABRD:4447 Korea University Exchange
arr.
Korea University Exchange program offers many courses in English in various disciplines, including studies on Asia and Korea; undergraduates study for one of two semesters in Seoul and take classes alongside Korean students. Requirements: 3.00 GPA, good academic and disciplinary standing, and completion of at least two full-time semesters at the University of Iowa before application to program.

## ABRD:4510 International Student Exchange Program arr.

 Study on reciprocal exchange at foreign universities worldwide; some instruction in English. Year-long, one semester, and summer options. Requirements: 40 s.h. of credit, GPA of at least 3.00 , and in some cases, command of a world language.
## ABRD:6064 Erasmus/Rotterdam School of Management

 ExchangeReciprocal exchange program between the University of Iowa and Erasmus University Rotterdam; full-time students in MBA and MAc programs study for a semester in Rotterdam, The Netherlands; students from Tippie School of Management take courses in Rotterdam School of Management during fall semester, students from MAc program take courses offered through Rotterdam School of Management's Master Programme in Accounting and Control during spring semester. Requirements: completion of at least one year of graduate study prior to participation in exchange and good academic standing; at least three years of work experience and non-Dutch citizen for MBA student.

## International Activities Courses

## INTL:3001 Public Health Activities Abroad

## Volunteering, noncredit service learning, noncredit internships,

 academic competitions, or other noncredit academic-related work completed abroad. Requirements: good academic and disciplinary standing, and approval and nomination from the College of Public Health.INTL:3005 Entrepreneurship Activities Abroad 0 s.h. Volunteering, noncredit service learning, and noncredit internships, academic competitions, or other noncredit academic-related work completed abroad. Requirements: good academic and disciplinary standing, and approval and nomination from the John Pappajohn Entrepreneurial Center.

## INTL:3015 College of Liberal Arts and Sciences Activities

 AbroadVolunteering, noncredit service learning, noncredit internships, academic competitions, or other noncredit academic-related work completed abroad. Requirements: good academic and disciplinary standing, and approval and nomination from the College of Liberal Arts and Sciences.

## INTL:3020 Education Activities Abroad

Volunteering, noncredit service learning, noncredit internships, academic competitions, or other noncredit academic-related work completed abroad. Requirements: good academic and disciplinary standing, and approval and nomination from the College of Education.

## INTL:3500 Virtual Global Courses

Participation in virtual global courses at other United States or international universities while maintaining student status at the University of Iowa. Requirements: good academic and disciplinary standing.

## INTL:3511 Virtual Abroad Experience: Cultures of Spain

 arr. Overview of Spain's cultural diversity through an interdisciplinary approach; how it defined history and shaped the present; direct interaction between students and guests-a representative group of Spaniards who are prominent in fields including politics, education, and the arts; special attention to the study of conflict between two antagonistic national projects-one that understands Spain as a homogeneous entity and one that advocates for a more pluralistic, inclusive view. Taught in Spanish. Requirements: minimum of four semesters of college-level Spanish and good academic and disciplinary standing.
## INTL:3513 Virtual Abroad Experience: Shakespeare's England arr.

 Shakespeare's England discovered through performances, readings, and livestreamed interviews and presentations with actors, directors, and scholars in London as well as Shakespeare's home town of Stratford-Upon-Avon; readings, writing; virtual format. Requirements: minimum 2.75 GPA and good academic and disciplinary standing.INTL:3517 Virtual Women's Empowerment in the Dominican Republic
While progress on women's empowerment in the Dominican Republic has been achieved, greater efforts are needed for further elimination of gender-related violence, discrimination, and other inequalities; exploration of the many services provided to women in two cities, Santo Domingo and Boca Chica; understanding and addressing issues around women's empowerment, dealing with cross-culture issues, working with marginalized and at-risk young women; engagement with the most respected nonprofit and government organizations serving women in the Dominican Republic; exploration of geographic and sociocultural context. Requirements: minimum 2.50 GPA and good academic and disciplinary standing.

INTL:3525 Virtual Global Experiences
Online courses; dynamic global learning environments. Requirements: 2.50 GPA or higher, and good academic and disciplinary standing.

INTL:3535 Travel Writing from Home
arr.
Students explore the purpose and possibility of travel writing and develop their own personal "armchair travelogue" writing skills; classic examples of travel writing; virtual explorations of sites in and around Athens, Greece. Requirements: 2.75 GPA or higher and good academic and disciplinary standing.

## INTL:3536 Virtual International Medicine

Opportunity to interact virtually with medical staff and patients at hospitals and other health centers in host country; clinical anatomy and pathophysiological aspects of relevant diseases; virtual visitations of patients in various health care settings; how to take patient histories, observe health care professionals, and provide daily reports to peers and course director/instructors regarding patient interactions. Requirements: 3.25 GPA and good academic and disciplinary standing.

## INTL:3537 Virtual International Business in Italy

arr.
Unique look at current regional business and culture in Northern Italy; exploration of financial implications of pandemics, as well as culture and education in Northern Italy; interactive experience involving live lectures, networking with partners in Italy, and hands-on elements. Requirements: good academic and disciplinary standing, minimum 2.75 UI and cumulative GPA, sophomore or higher standing, minimum of 30 s.h. completed prior to program, and completion of FIN:3000 or approval of program director.

## INTL:3538 Virtual International Business and Consulting

 ProjectInternational business in the Asia Pacific Region; introduction to basic concepts of international business and rise of globalization; issues confronting enterprises in the Asia-Pacific region; virtual business briefings from companies in each country; students apply what they have learned in a virtual consulting project with a company in Australia, New Zealand, Singapore, or Hong Kong. Requirements: 2.75 UI and cumulative GPA, MKTG:3000 or consent of program director, and good academic and disciplinary standing.

INTL:3539 Virtual Brazilian Carnival: Music and Dance
Exposure to all dynamic aspects of carnival parades in Rio de Janiero through literature, videos, drumming, zoom presentations by experts in Brazil, and practice of samba; dance, music, historical and social contexts, production, critical theories of performance, religious backgrounds, theater making; current and centuriesold traditions; students interact, explore, critique, practice, and share their experiences as online visitors to this world-famous city. Requirements: minimum 2.50 GPA and good academic and disciplinary standing.

## INTL:3542 Virtual Introduction to Global Business

Virtual study abroad experience; exploration of the business atmosphere and particular considerations of a region, including briefings from leading businesses in the region and cultural activities; specific region varies. Requirements: 2.75 UI and cumulative GPA, and good academic and disciplinary standing. Recommendations: completion of ECON:1100.

## INTL:4515 USAC Global Virtual Internship

arr.
Exploration of future career interests by working online with businesses and organizations based at locations around the world; includes an online course component to learn how culture is reflected in workplace and develop skills necessary for success in the global workforce; virtual internships arranged with local companies, nongovernmental organizations (NGOs), and governmental organizations based abroad; administered by the University Studies Abroad Consortium (USAC) of which the University of Iowa is a member. Requirements: minimum 2.50 GPA and good academic and disciplinary standing.
INTL:4525 SIT Virtual Global Internship arr.
Distance learning that centers around a theme and includes an online internship with a community organization, research or medical organization, business, government agency, or nongovernmental organization (NGO) based outside of the United States; students gain valuable experience and enhance their skills in a professional environment related to core program themes; students are responsible for making optimal use of resources available at the organization and being proactive in engaging with experts to achieve internship objectives. Requirements: minimum 2.50 GPA and good academic and disciplinary standing.

## INTL:4530 CEA Virtual Internships Abroad Program

 arr.Placement with an organization or company based abroad while working remotely from student's home base in the United States; individualized placements based on student's interests and proposed career field; students complete an online seminar independently and through check-ins at their virtual internship placement. Requirements: minimum 2.50 GPA and good academic standing.
INTL:4535 TEAN Global Remote Internship
Real-world, international work experience in a variety of fields without travelling; four- or eight-week individual or group internship; students work on a project from start to finish for a company located in Australia or Asia and participate in an online seminar course; students learn about unique challenges and flexibility that being part of a remote team provides, as well as cultural information about the location where organization is based. Requirements: minimum 2.50 GPA and good academic and disciplinary standing.
arr.
arr. INTL:4540 IES Virtual Global Internships arr.
Exploration of future career interests working online with businesses and organizations based in locations around the world; virtual internships arranged by the University of Iowa's partner provider, International Education for Students (IES), with local companies, nonprofit governmental organizations (NGOs), and governmental organizations based abroad; virtual internships include an online course component to learn how culture is reflected in the workplace and develop skills necessary for success in the global workforce. Requirements: 2.50 GPA , sophomore or higher standing at time of application, and good academic and disciplinary standing.

# Summer Research Experiences for Undergraduates 

## Director

- Robert F. Kirby

## Website: https://our.research.uiowa.edu/

The University of Iowa hosts a variety of summer research experiences for undergraduates, both from the UI and from other institutions, to enhance students' understanding of research in a variety of disciplines. Acceptance into these programs is based on a competitive application system.
Participants develop research skills under the mentorship of University of Iowa faculty members. They also become part of a research community with access to programming, workshops, and professional development. These programs highlight career opportunities and provide guidance on applying to graduate and professional schools.

Programs typically last 8-10 weeks and include a competitive stipend. Housing, food, and travel expenses are commonly covered by the programs. Interested students should refer to the individual programs for additional information on applications, timelines, research areas, and compensation. Many of these programs offer a 0 s.h. course enrollment for transcript recognition of participation.

## Summer Programs at the University of Iowa

Summer programs that students may enroll in include the following.

- National Science Foundation (NSF) Summer Research Experience for Undergraduates (REU) in Microbiology
- NSF REU in Interdisciplinary Evolutionary Sciences
- NSF REU in Interdisciplinary Geospatial Approaches to Watershed Science (I-GAWS)
- NSF REU in Nanoscience and Nanotechnology
- NSF REU in Computing for Health and Well-Being
- NSF REU in Computational Bioengineering
- Summer Research Opportunities Program
- Summer Undergraduate MSTP Research (SUMR) Program
- Biochemistry Summer Undergraduate Research Fellowship (BSURF)
- Biomedical Scholars Summer Undergraduate Research Program
- Iowa Summer Institute in Biostatistics
- Iowa Neuroscience Institute (INI) Summer Scholars Program
- Continuing Umbrella of Research Experiences (CURE)—Iowa Summer Training Program in Cancer Research
- Fostering Undergraduate Talent-Uniting Research and Education: FUTURE in Biomedicine Program
- UI Premed Student Summer Research Internship

## Sustainability

## Coordinator

- Jennifer Stacy-Adams

## Advisory Committee

- David Bennett (Geographical and Sustainability Sciences), Bradley D. Cramer (Earth and Environmental Sciences), Stratis Giannakouros (Geographical and Sustainability Sciences), Eric Gidal (English), Kylah Hedding (Journalism and Mass Communication), Corey D. Markfort (Civil and Environmental Engineering/Mechanical Engineering), Jessica R. Meyer (Earth and Environmental Sciences), Louise Seamster (African American Studies/Law/Sociology and Criminology), Ion Bogdan Vasi (Management and Entrepreneurship/Sociology and Criminology)

## Undergraduate certificate: sustainability

Website: https://sustainability.uiowa.edu/academics/certificatesustainability

For decades, world leaders have defined sustainability as the implementation of policies, processes, and practices that meet the needs of the present without compromising the ability of future generations to meet their own needs. Working toward sustainability requires an understanding of human and environmental systems and the complex interactions between them. Students who understand the concept of sustainability can make a positive difference in the world.

The Certificate in Sustainability provides students with the knowledge and skills they need to contribute to the development of sustainable outcomes through interdisciplinary coursework in areas such as society and culture, economics, the environment, energy, public health, and public policy. The program helps students become effective leaders and agents of change for sustainability in a wide range of vocations, such as academic researcher, teacher, environmental specialist, sustainability coordinator, corporate officer, policy analyst, grassroots advocate, or government official.

The Certificate in Sustainability is administered by University College.

## Programs

## Undergraduate Program of Study

## Certificate

- Certificate in Sustainability [p. 2102]

For information about the Sustainability, BS [p. 539] visit the Department of Geographical and Sustainability Sciences [p. 518] catalog page.

## Sustainability, Certificate

## Requirements

The undergraduate Certificate in Sustainability requires 24 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in work for the certificate.

The certificate may be earned by any student admitted to the University of Iowa who is not enrolled in a UI graduate or professional degree program. Undergraduate to Graduate (U2G) students may earn the certificate when the undergraduate classification is primary.

Work for the certificate includes four introductory core courses, three courses from preapproved breadth area electives, and one project/ integrative systems course. Students may be able to count certificate courses toward requirements for other majors, minors, or other certificates. They may count a maximum of three courses in a single department or program toward the certificate. A maximum of 6 s.h. of approved transfer credit may be counted toward the certificate. Certificate courses may not be taken pass/nonpass. A course may be used to satisfy only one certificate requirement.

Individuals must declare their intent to earn the certificate; see the Certificate in Sustainability website for details.

Sustainability embraces many disciplines, methodologies, and institutional practices. Certificate students must have knowledge of the interdisciplinary nature of the field, which is represented by the program's breadth electives: dynamics of natural systems; dynamics of human systems; and communication, ethics, and interpretation. They also must have experience with analyzing real-life problems in and outside of the classroom and in working collaboratively to solve such problems.

The Certificate in Sustainability requires the following coursework.

## Introductory Core

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Both of these: |  |  |
| GEOG:1070 | Contemporary Environmental Issues | 3 |
| GEOG:2013/ <br> BUS:2013/ <br> SUST:2013/ <br> URP:2013 | Introduction to Sustainability | 3 |
| One of these: |  |  |
| ENGL:1510 | Introduction to Environmental Literature | 3 |
| JMC:1800 | Twenty-first-Century Science: Environmental Communication in the Digital Age | 3 |
| One of these: |  |  |
| $\begin{aligned} & \text { EES:1080/ } \\ & \text { ENVS:1080 } \end{aligned}$ | Introduction to Environmental Science | 3-4 |
| EES:1085/ | Fundamentals of Environmental Science | 4 |

## Breadth Electives

Students complete at least 3 s.h. in each of the following three breadth areas.

## Dynamics of Natural Systems

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| At least 3 s.h. from these: |  |  |
| BIOL:1260 | Plants and Human Affairs | 3 |
| $\begin{aligned} & \text { BIOL:2374/ } \\ & \text { GEOG:2374 } \end{aligned}$ | Biogeography | 3 |
| BIOL:2673/ <br> ENVS:2673 | Ecology | 3 |
| CBE:2040 | Environment, Energy, and Climate Change | 3 |
| CBE:2050/CEE:2050 | Severe and Unusual Weather | 3 |
| CBE:5405 | Green Chemical and Energy Technologies | 3 |
| CBE:5425/CEE:5115 | Atmospheric Chemistry and Physics | 3 |
| CEE:4102 | Groundwater | 3 |
| CHEM:4873 | Atmospheric and Environmental Chemistry | 3 |
| EES:1040 | Evolution and the History of Life | 3-4 |
| EES:1290 | Energy and the Environment | 3 |
| EES:1400 | Natural Disasters | 3 |
| $\begin{aligned} & \text { EES:2310/ } \\ & \text { GEOG:2310 } \end{aligned}$ | Introduction to Climatology | 3 |
| EES:3070 | Marine Ecosystems and Conservation | 3 |
| EES:4630 | Hydrogeology | 4 |
| GEOG:1020 | The Global Environment | 3 |
| GEOG:2950 | Environmental Conservation | 4 |
| GEOG:3340 | Ecosystem Services | 3 |
| IALL:3131 | Ecology | 4 |
| Or both of these: |  |  |
| EES:2010/ <br> ENVS:2010/ <br> GEOG:2010 | Interdisciplinary Environmental Seminar | 1 |
| EES:3080 | Introduction to Oceanography | 2 |
| Dynamics of Hu | uman Systems |  |

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| At least 3 s.h. from these: |  |  |
| AMST:1154 | Food in America | 3 |
| ANTH:1046/ <br> GEOG:1046/ <br> GWSS:1046/ <br> SJUS:1046 | Environmental Politics in India | 3 |
| ANTH:2100 | Anthropology and Contemporary World Problems | 3 |
| ANTH:2261 | Human Impacts on the Environment | 3 |

# Undergraduate Research Experiences 

## Director

- Robert F. Kirby

Website: https://our.research.uiowa.edu/
Undergraduate Research Experiences (URES) courses enhance research and creative scholarship experiences for undergraduate students. These courses are administered through the Office of Undergraduate Research (OUR), which seeks to provide a broad range of research and professional development opportunities for undergraduates and their mentors.

## URES Independent Study Courses

URES independent study courses provide opportunities for students to earn academic credit or transcript recognition for their research/ creative scholarship involvement. These courses are intended to promote recognition of ongoing research participation. They are available to all undergraduates in any academic session other than winter session.

Collegiate and department-based research courses also may be available. Students are encouraged to consult their mentors or academic advisors regarding which option is most suited to their circumstances.

## First-Year Seminars

First-Year Seminars (FYS) designated as research focused are offered through URES. Research-focused FYS introduce students to research in an instructor's field. These courses often involve visits to research sites, hands-on projects, and exposure to disciplinary-based research. These are typically 10 -week courses that meet for 75 minutes per week. An optional poster session is held during the last week of the course for students to display what they have learned during the semester.

## Summer Research Programs

Many University of Iowa summer research programs enroll students for 0 s.h. in courses that provide transcript recognition of participation in the program. These are available to both current University of Iowa students and students who visit from other institutions to develop their research skills; see Summer Research Experiences for Undergraduates [p. 2100] in the catalog for more information.

## Courses <br> Undergraduate Research Experiences Courses

## URES:1000 First-Year Seminar

1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities); research focus allows students to actively discover new information with guidance from instructor, pursue research in small groups, learn the "how to" of a field, and share their findings; no prior research knowledge or experience required. Requirements: first- or second-semester standing.

URES:2100 Louis Stokes Alliances for Minority Participation STEM Scholars
Preparation for success in transferring into a STEM major at UI; exposure to undergraduate research opportunities; develop skills of scientific inquiry and communication; presentation of products; connect with current transfer students, active research faculty, campus support services, and program staff members. Requirements: application and acceptance to UI LSAMP program.

URES:2200 Discover Research 1 s.h.
Introduction to research at the University of Iowa; exploration of life as a researcher through a mixture of lecture, faculty and student guest speakers, and virtual lab tours; process of finding and contacting potential research mentors, interviewing for research positions, and making the most out of a research experience; for first-year undergraduates.

URES:3001 Introduction to Translational Research 0-3 s.h.
Array of scientific studies translated into clinical solutions, creative ideas balanced with practical strategies for implementation at bedside, and expansive number of career opportunities becoming available in translational sciences; opportunity to learn how translational research is conceived and developed; interpreting student research in a translational paradigm; survey of translational biomedicine research program covering the scope of interdisciplinary teams and breadth of T1 to T4 research applications. Requirements: enrollment in clinical and translational science certificate program, and engagement in mentored research activity. Recommendations: successful completion of EPID:4400 highly recommended.

## URES:3002 Practicum in Clinical and Translational

 ScienceHow research experience translates into clinical practice; translational impact of independent research; summary of research accomplishments; outline of a translational paper that is mutually acceptable to student, preceptor, and faculty; submission of paper and completion of poster presentation describing research project and translational application of research. Prerequisites: URES:3001.
Requirements: enrollment in clinical and translational science certificate program.
URES:3100 Undergraduate Research Ambassador 0-1 s.h. Promotion of undergraduate research from all disciplines within campus community; hosting various on-campus events, leading workshops, and presenting at student organization meetings and in class; leadership and public speaking; regular meetings with the Office of Undergraduate Research staff.

## URES:3500 Skill Development for Undergraduate

## Researchers

0-2 s.h.
Introduction to research across disciplines, research communication (i.e., poster preparation, research presentation), curriculum vitae and résumé development, letters of recommendation, institutional structure, and more; focus on soft skill development for undergraduates currently involved in mentored research and creative scholarship.

URES:3992 Undergraduate Research and Creative Projects 0 s.h. Independent research or pursuit of a creative project under mentorship of a faculty supervisor.
URES:3993 Undergraduate Research and Creative Projects 1-4 s.h.
Independent research or pursuit of a creative project under mentorship of a faculty supervisor.

## URES:3994 Undergraduate Research and Creative

Projects
1-4 s.h.
Independent research or pursuit of a creative project under mentorship of a faculty supervisor.

URES:3995 Undergraduate Research Fellow
Recognition of undergraduates involved in scholarly efforts of UI faculty and research staff; work on specific research and/or creative projects under selected mentors; funded annually by the Office of Undergraduate Research (OUR) through a competitive application process. Requirements: selection as OUR Fellow.

URES:3996 Research Fellow
Involvement in scholarly efforts of UI faculty and research staff; students work on specific research and/or creative projects under selected mentors; funded by various strategic initiatives through competitive application processes. Requirements: selection by department or faculty mentor.

## URES:4100 Undergraduate Research Ambassador

## Leadership

Work with professional staff in the undergraduate research office to develop and provide outreach and events for undergraduate researchers on campus; hold recruitment events to engage K-12 students in discovery through research and creative efforts.
Prerequisites: URES:3100. Requirements: be selected by the Office of the Undergraduate Research staff to serve in this role.

## URES:4110 Computational Bioengineering Summer Research Experience for Undergraduates 0 s.h.

 Immersive research experience focused on fundamental concepts of computational bioengineering and application of concepts to solve challenging biomedical problems; work on mentored research projects and showcase research at a university-wide presentation opportunity.
## URES:4120 Research Experience for Undergraduates: Computing for Health and Well-Being 0 s.h.

 Research experience in using computer science methods to study and solve current problems in health, well-being, and health care systems; work on mentored research projects and showcase research at a UI presentation opportunity.URES:4130 Research Experience for Undergraduates in Microbiology
URES:4140 Research Experiences for Undergraduates in Evolutionary Biology

0 s.h.
Intensive hands-on experience in a research lab; students create digital exhibits in collaboration with the UI Museum of Natural History and present their research at a university-wide poster presentation.
URES:4150 Undergraduate Medical Scientist Training Program Research 0 s.h.
URES:4160 Research Experiences for Undergraduates in Geospatial Approaches to Watershed Science 0 s.h. Intensive hands-on experience in research for students in environmental fields.
URES:4170 Research Experience for Undergraduates in Nanoscience and Nanotechnology
URES:4180 Edge of Space Academy
Summer research experience centered around space-based instrumentation for observing Earth and space; students build small instrument payloads that are integrated onto drone and high-altitude aerial platforms to take measurements of the Earth below and the atmosphere and space environment above; hands-on experience for students who have an interest in Earth, atmospheric, solar, and space science. Requirements: application and acceptance to program.

## URES:4220 University of Iowa Premed Student Summer

## Research Internship

Immersive medical research experience with focus on gathering, analyzing, and interpreting health data; writing a manuscript for publication.

0 s.h. URES:4240 Fostering Undergraduate Talent: Uniting Research and Education (FUTURE) in Biomedicine
Mentored research experience to create new discoveries in biomedicine; preparation to pursue careers in science and clinical practice; translation of current knowledge into new educational materials; discussions, conferences, workshops, training sessions, lectures; university-wide presentation opportunity and a FUTURE in biomedicine symposium.

URES:4260 Cancer Summer Undergraduate Research 0 s.h.
Holden Comprehensive Cancer Center faculty-mentored cancer biology research; cancer research education; lectures and seminars; oral poster presentation experience; career counseling; extended mentoring.

## URES:4500 Summer Policy Research Institute

1 s.h.
Exposure and enhancement of fluency with policy research through mentored, team-based experience; students choose between two tracks depending on their experience level.

URES:4900 Topics in Engagement
1 s.h.
Exploration of topics in undergraduate research, academic, social, and community engagement; small discussion class; topics selected by instructor.

## University Libraries

## Director

- John P. Culshaw

Website: https://www.lib.uiowa.edu/instruction/
University Libraries offers these courses intended for undergraduates: ULIB:1001 Library Research in Context, ULIB:2001 Being Responsible Online: From Facebook to Academic Research, ULIB:2022 Special Topics in Library Research, and ULIB:3011 Global Research: Strategies and Skills.
Library Research in Context (ULIB:1001) is an activity-based course that helps students integrate information skills and concepts into their academic tool kit, enabling them to develop habits of critical inquiry and to accomplish course goals. The course uses active learning to introduce students to the basic research process and helps them formulate research questions and evaluate information. It also touches on the social and ethical contexts of information. Subject-specialist librarians teach the course using in-class activities, assignments, and class discussions. Most sections of the course are offered online.

Being Responsible Online: From Facebook to Academic Research (ULIB:2001) introduces students to ethical issues that surround online information, especially in the context of social media. Discussion topics include issues of privacy, security, free versus fee-based information, censorship, one's digital footprint, and academic integrity.
Special Topics in Library Research (ULIB:2022) meets the varying needs of students. The course may address a current or timely topic, focus on a particular content area not currently addressed by course offerings from the University Libraries, or serve as a pilot/trial offering for a course prior to becoming part of the permanent course offerings.

Global Research: Strategies and Skills (ULIB:3011) teaches skills for gathering and using information that are required for international jobs, for upper-level international studies coursework, and for individual international research. Students develop a familiarity with a variety of research and popular materials (such as government information or human rights resources); become experts in at least one academic research database (such as journal, newspaper, or statistical databases); and enhance their critical thinking skills. The class features small group activities, short student presentations, and an individual research consultation with the instructor.

## Courses

## University Libraries Courses

## ULIB:1001 Library Research in Context

1 s.h.
Academic research, effective use of the library and its resources, basic research methods, process of scholarly communication; content may be keyed to a discipline-specific course; students apply concepts and processes to their research projects; transferable skills.

## ULIB:2001 Being Responsible Online: From Facebook to

 Academic ResearchIntroduction to ethical issues surrounding online information; using information as researchers or creating information on a social networking site; issues of privacy, reliability, and intellectual property; skills to navigate online information responsibly and knowledgeably.

ULIB:2022 Special Topics in Library Research 1 s.h.
Activity-based course that explores specialized content, selected research areas, or current/emerging issues in the context of information literacy and library resources; designed for sophomores and juniors; introduces students to the basic research process, helps them to develop critical thinking skills and evaluate information; topics may vary by semester.
ULIB:3011 Global Research: Strategies and Skills 1 s.h. Skill development in international research; academic projects; work with research librarian; activity-based introduction to article, statistical, and governmental databases; research and popular materials; information discovery process (tools and search strategies); enhancement of critical thinking skills. Same as GHS:3011, IS:3011.
ULIB:3022 Advanced Special Topics in Library Research 1 s.h. Activity-based exploration of specialized content, selected research areas, or current/emerging issues in context of information literacy and library resources; introduction to basic research process, development of critical thinking skills, and evaluation of information; topics vary.
ULIB:6313 Studio Summer Fellowship 1 s.h.
Investigation of and reflection on digital scholarly collaboration, production, and promotion. Same as GRAD:6313.

# University of Iowa Honors Program 

## Director

- Shaun P. Vecera

## Website: https://honors.uiowa.edu/

The University of Iowa Honors Program is an open and welcoming community, and staff members help students tailor the honors experience to their particular circumstances and goals. The program's general objective is to enrich the undergraduate experience by cultivating intellectual curiosity and practical skill through challenging coursework, creative engagement, and experiential learning to nurture a deeper understanding of one's discipline and self.

What is especially unique about Honors at Iowa? It gives students the space and opportunities to make connections and develop selfauthorship through self-discovery. For example, because honors classes are usually smaller than non-honors sections, honors students have the opportunity to form closer connections with their professors on campus. Such working relationships can change careers and lives through mutual discovery. Iowa honors students also make lasting connections and learn from each other through the unique fall semester workshop, HONR:1100 Honors Primetime, their honors first-year seminars, and through the honors residential community in the Honors House at Daum Hall.

The UI Honors Program is also unique in the strong emphasis it puts on experiential learning (learning by doing), which comprises half the program's curricular requirements. Experiential learning takes the form of undergraduate research, study abroad, internships, teaching practica, being an honors ambassador or an Honors Writing Fellow (or both), and other opportunities. Learning by doing, besides being the most effective way of acquiring knowledge, also helps with selfdiscovery.

In general, students who are serious about their education and making a meaningful contribution to the world with their particular capabilities and gifts can be assured that the University of Iowa Honors Program will help them in their journey.

## Unique Honors Academic Activities

## Honors Outreach Ambassadors

Ambassadors earn academic credit for acquiring and then sharing knowledge of honors opportunities by organizing events around campus and meeting with prospective students and their families.

## Honors Writing Fellows

Fellows are trained and paid to assist in undergraduate courses by mentoring a dozen students each semester on major writing assignments.

## The Iowa Policy Research Organization

This organization selects honors students each year to earn academic credit by learning how to conduct policy analysis and then writing policy papers for Iowa communities and the Iowa Legislature.

## Study Abroad and Internships

These opportunities with a reflective component or embedded project enable students to earn honors academic credit for their experience.
Learn more about honors activities and Experiential Learning on the honors program website.

## Cocurricular Programs

Honors at Iowa offers students a rich variety of activities outside the classroom. Many honors students find cocurricular programming a good way to meet people, get involved, and learn more about themselves and the world around them. Some of the programs are volunteer-based, some offer pay, and some award honors credit.
These opportunities provide peak educational experiences, especially extensive and intensive interactions with faculty mentors and other honors students.

- Honors newsletters, which are written by honors student editors, inform readers on and beyond the campus about honors at the University of Iowa.
- Honors student staff earn pay by staffing the UI Honors Program reception area and other duties as assigned.
- Honors Peer Mentors earn pay by mentoring honors students.
- The Iowa City Foreign Relations Council (ICFRC) hosts luncheon dialogues on current international issues. Past speakers include award-winning journalists, Nobel Peace Prize laureates, seasoned diplomats, prominent politicians, and policy analysts. Listening to and talking with these expert speakers allow honors students to become better informed about world affairs.
- The Presidential Scholars Program (PSP) engages recipients of the Presidential Fellowship in shared classes, opportunities for prestigious fellowships, and unique programming. Presidential Fellows participate in events with faculty and key administrators, scholarship and fellowship mentoring programs, and volunteer projects.

To learn more, visit Opportunities on the honors program website.

## Programs

## Undergraduate Program of Study

## University Honors

Honors at Iowa helps students tailor opportunities to different educational needs and goals. Honors students may take honors courses each semester that they are enrolled at the university. Honors courses are generally small and interactive. They connect students with distinguished professors and offer new topics each semester. Honors courses also are part of the GE CLAS Core curriculum and do not add requirements for graduation.

Students are encouraged to begin honors work early. In HONR:1100 Honors Primetime, entering students earn 1 s.h. of honors credit by taking a short course the week before fall classes begin. Students who enter the honors program directly from high school take HONR:1300 Honors First-Year Seminar with selected professors on current topics, earning $1 \mathrm{~s} . \mathrm{h}$. in the fall semester. Honors students may fulfill GE CLAS Core requirements by completing honors sections such as RHET: 1030 Rhetoric, ENGL: 1200 The Interpretation of Literature, and CHEM:1110 Principles of Chemistry I.

Upper-level students may take honors courses in their majors or pursue individual instruction with faculty members through honors courses such as HONR:3994 Honors Research Practicum. Students also may earn honors credit for a non-honors course by developing an honors contract with the course instructor; the student and instructor negotiate a unique project for the course and develop the honors contract around the project.
Additional academic opportunities include honors advanced seminars, honors independent studies, and honors practica in teaching and service.

Students learn about honors opportunities in weekly emails from the UI Honors Program. Honors professional staff members and
honors peer mentors offer guidance in personal meetings and group presentations. In addition, the honors staff helps students design individualized curricula for their special interests. To learn more, visit Honors Requirements on the program's website.

## Joining the Honors Program

Students may apply to the University of Iowa Honors Program as entering first-year, entering transfer, or current University of Iowa students. Current students are encouraged to apply prior to earning 60 s.h. in coursework. Those who join the UI Honors Program must attend an honors orientation.
To remain in the honors program and to graduate with University Honors, students must maintain a University of Iowa cumulative grade-point average of at least 3.33 and complete the honors program curricular requirements; see "University Honors Curriculum" below. For more information about joining the University of Iowa Honors Program, see Join on the program's website.

## Graduation with University Honors

Students who graduate with University Honors through the UI Honors Program are recognized at commencement. University honors is noted on a student's diploma and transcript. UI Honors Program students completing any undergraduate degree program may graduate with University Honors.

## University Honors Curriculum

Students earning bachelor's degrees at the University of Iowa complete honors coursework and experiential learning in order to graduate with University Honors. Students are not required to complete all honors coursework requirements before they begin experiential learning.

## Honors Coursework

Students complete 12 s.h. of honors coursework during their first four full semesters in the program. Students may count a maximum of two honors contract courses toward the coursework requirement.
The following honors coursework must be completed.

- An honors first-year seminar during the first semester at the University of Iowa (for students who enter the UI Honors Program directly from high school). Students who must take a specific first-year seminar required by their major or living learning community may substitute another honors class for the honors first-year seminar requirement.
- An honors course or an honors contract course during the first full semester in the program.
- Additional honors coursework to total at least 12 s.h. within the first four full semesters in the program.

## Experiential Learning

Students complete 12 s.h. of honors credit in approved experiential learning activities. Students may satisfy the requirement with one or more of the following options: honors in the major (this option fulfills the entire 12 s.h. experiential learning requirement), research, study abroad, internships, teaching assistantships/learning assistantships, Honors Writing Fellows, Iowa Policy Research Organization, experiential honors coursework, and/or service learning.

See more information about these experiential learning opportunities and others by visiting Experiential Learning on the Honors at Iowa website.

## Facilities

## Blank Honors Center

Honors at Iowa has its home in the Blank Honors Center (BHC), a facility that helps foster community among honors students. The Blank Honors Center is located near the center of the University of Iowa main campus, next to residence halls and classroom buildings. It offers social areas, quiet study areas, wireless internet access, computer stations, and classrooms for students. The center also houses the honors staff and has rooms for meetings, events, presentations, and conversation.

## Honors Residential Community

Honors housing is available for first-year honors students in Daum Hall, which is connected by a skywalk to the Blank Honors Center.

Students must apply to live in the honors residential community. See Housing on the Iowa Division of Student Life website for information about how to apply. Visit Honors House on the UI Honors Program website to learn more about the honors housing community.

## Financial Support

Honors at Iowa has scholarship opportunities for current honors students selected from academic programs throughout the university. Some scholarship opportunities exist for incoming first-year honors students as well as current honors students. Scholarship possibilities are announced annually.
In addition, visit Scholarships and Awards on the UI Honors Program website.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Please see the Honors at Iowa website at https://honors.uiowa.edu/ join for further details and application instructions.
b Required except for students whose majors or programs require a different first-year seminar, e.g. Tippie Direct Admits.
c An Honors course must be completed in the first semester of Honors membership.
d To earn honors credit for study abroad students complete questionnaires and a narrative piece. See details on the Experiential Learning pages on the Honors at Iowa website.
e Typically advertised in Honorable Messenger or email honorsadvisor@uiowa.edu for more information.
f Submit by deadline which is typically early in the spring semester. Successful recipients in the past have consulted web resources at https://honors.uiowa.edu/honors-scholarships.
g Consult OUR Ambassadors or visit our.research.uiowa.edu.
h Eligibility is determined by GPA and class ranking. Membership is by invitation.
i See Student Employment page on Honors at Iowa website. Usually advertised early in the spring semester.
j Optional for students who have completed the 12 s.h. University Honors coursework requirement.
k Students must complete the 12 s.h. University Honors coursework requirement by the end of second year spring semester.
1 Report missing honors credit to the Honors Assessment Manager.
mStudents must complete the experiential learning requirement by graduation.

## Courses

## University of Iowa Honors Program Courses

## HONR:1100 Honors Primetime

1 s.h.
Preparation for honors opportunities, especially activities and courses; teamwork on projects that develop skills of invention and communication; presentation of products and performances; connect honors students, honors teachers, and staff members.
HONR:1300 Honors First-Year Seminar
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

## HONR:1310 Honors Research First-Year Seminar

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities); research focus allows students to actively discover new information with guidance from instructor, pursue research in small groups, learn the "how to" of a field, and share their findings; no prior research knowledge or experience required.

## HONR:1350 Honors Seminar for Presidential Scholars 1 s.h.

Through self-discovery, students learn to know themselves and one another better while participating in selected events and structured experiences (e.g., readings, in-class discussion, small-group work, guest presentations, event attendance); students take time to reflect on interests, experiences, and knowledge, and have an opportunity to explore and integrate skills and resources in a way that helps develop the personal and academic self while also considering knowledge and experience of other individuals and groups; students are provided with tools to seek out academics and activities related to their interests and pursuits to better connect with development resources. Requirements: Presidential Scholarship award received when admitted to the University of Iowa.
HONR:1360 Honors Seminar for Presidential Scholars II 1 s.h. Through self-discovery, students learn to know themselves and one another better while participating in selected events and structured experiences (e.g., readings, in-class discussion, small-group work, guest presentations, event attendance); students take time to reflect on interests, experiences, and knowledge, and have an opportunity to explore and integrate skills and resources in a way that helps develop the personal and academic self while also considering knowledge and experience of other individuals and groups; students are provided with tools to seek out academics and activities related to their interests and pursuits to better connect with development resources. Prerequisites: HONR:1350.
HONR:1610 Honors Seminar in Historical Perspectives 3 s.h. Small-class learning with a faculty member to explore and explain historical developments. GE: Historical Perspectives.

## HONR:1670 Values and Culture

 3 s.h.Asking fundamental questions about human experience and its meaning while becoming more aware of what, exactly, defines culture and values; students have a chance to consider their own values and beliefs, and the importance to their lifelong goals. GE: Values and Culture.

## HONR:2050 Honors Contract Project

1 s.h.
Individual or group project arranged with faculty; students and faculty develop and complete an honors contract study plan or project for a non-honors UI course.
HONR:2100 Honors Colloquium 1 s.h.
Attendance at talks, performances, and other events across campus.
HONR:2600 Honors Special Topics
1-3 s.h.
Small-class learning with a faculty member on special topics.

## HONR:2700 Seminar for University of Iowa Honors Program

 Fellows1 s.h.
Scholar development that challenges students to develop selfknowledge that enriches their intellectual life, increases their academic engagement, and deepen their sense of community. Requirements: second-year UI Honors Program fellowship recipient.

1 s.h. HONR:2900 Honors Publications: From Pitch to Print 1-2 s.h.
Students develop and hone writing skills as they create content for UI Honors Program publications from start to finish—envisioning themes, interviewing, writing, securing photos and captions, workshopping, and editing pieces; topics related to student body, professional staff, alumni, and current events relevant to honors program; completion of up to three major projects published in Honors Newsletter, Alumni Connection, honors program blog, or other social media; discussion posts and workshops.
HONR:2990 Experiential Learning Orientation 2 s.h.
Experiential learning requirements for the UI Honors Program.
HONR:2991 Honors Students and Wellness 3 s.h.
How high ability and wellness interact with one another; focus on mental health and touching on various areas-impostor syndrome, existential depression, and intersectionality of giftedness, mental health, gender, and race; holistic wellness (e.g., physical, nutritional, emotional, social, spiritual, intellectual, financial, environmental) and what strengths and challenges high-ability individuals may encounter beyond their college careers.

HONR:2992 Classic Cult Cinema 3 s.h.
Have you ever wondered why certain films reach cult status and others do not? What makes us want to go to repeated midnight showings of the same film and even dress up like the characters? What is a cult classic and who are the great masters of these films? And most importantly, how do these films add social and political commentary about the culture around them? Students explore these questions while watching, discussing, and reading about what puts the "cult" into cult cinema. GE: Literary, Visual, and Performing Arts.

HONR:3050 Honors Studies
arr.
Independent studies arranged with faculty members who certify satisfactory completion of study plans and performance for topics not covered by other UI courses.
HONR:3100 Honors Teaching Practicum 0-4 s.h.
Teaching internship in first- and second-year courses; may include providing tutorial assistance, conducting review sessions, aiding course organization.

HONR:3150 Honors Service Learning arr.
Service learning projects arranged with faculty members who certify satisfactory completion of study plans and service.
HONR:3160 Honors Internship 0-3 s.h.
Independent service internship arranged with faculty members, who certify satisfactory performance and completion of project.

HONR:3170 Honors Outreach Ambassadors 1-2 s.h. Experience sharing knowledge and experiences of the honors program with other students in meetings during office hours, online chats, other venues; outreach ambassadors; answer questions, provide information, help students find honors opportunities in and out of class.
HONR:3210 Honors Policy Research Practicum
1 s.h.
Theory and practice of public policy research; development of policyresearch skills; production of policy-research papers. Requirements: sophomore or junior standing.
HONR:3994 Honors Research Practicum 1-4 s.h.
Individual research performed in conjunction with a faculty member's research.

HONR:4990 Honors Thesis or Project 1-3 s.h.
Culminating project of research or artistic creation; preparation and completion of the final product associated with graduation with honors in the student's major. Requirements: member of the University of Iowa Honors Program and junior or senior standing.

# University of Iowa Upward Bound 

## Director, Center for Inclusive Academic Excellence

- Tabitha N. Wiggins

## Director, Upward Bound

- Jennifer Lynch

## Precollege Program of Study

The University of Iowa TRIO Upward Bound Project is a federally funded college preparatory program for income qualified and/or firstgeneration college students who are motivated to pursue a college degree. The program serves eligible high school students from three southeastern Iowa community high schools: Columbus Community High School, Muscatine High School, and West Liberty High School.

Students participate during the academic year in weekly after school programming at their local high school. They participate in science, technology, engineering, and math (STEM) related educational opportunities, American College Testing (ACT) preparation, community service, cultural programs, field trips, and college visits.

During the summer, students attend a six-week residential program on the University of Iowa campus from mid-June through July. Participants take mathematics, science, language arts, and world language courses to prepare them for classes they will take at their local high school in the fall. In addition, students take STEM workshops to expose them to a broader range of career opportunities and an ACT preparation course to ready them for college admissions exams.

Upward Bound Bridge students (those who will enter college in the fall) enroll in a University of Iowa course during the six-week summer session. Bridge students participate in an on-campus job shadow and take a college transition seminar.
Upward Bound provides services to students during high school through enrollment in postsecondary education. All services received are at no cost to students.

Other postsecondary institutions in Iowa and across the nation sponsor Upward Bound programs. High school students who do not attend schools served by the University of Iowa program should ask their counselors whether an Upward Bound program serves their area.
For more information, contact the TRIO Upward Bound Project.

## Admission

For admission:

- participants must reside in the target area and attend a target school;
- students must be in grades 9 through 11 ;
- family income must meet U.S. Department of Education lowincome guidelines; and
- students are potential first-generation college students.

## Courses

## University of Iowa Upward Bound Course

UIUB:1010 Upward Bound Project - Bridge Seminar 1-2 s.h.
Six-week academic summer program component that provides students with an intensive experience of taking college courses through the University of Iowa; aids in transition to college, preparation for college-level learning, and introduction to topics specific to higher education; for Bridge high-school graduates in the University of Iowa Upward Bound Program.

## Urban Studies

## Director, School of Planning and Public Affairs

- Lucie Laurian

## Coordinator, Urban Studies

- Anne M. Barber (Planning and Public Affairs)

Undergraduate minor: urban studies
Faculty: https://sppa.uiowa.edu/faculty-staff
Website: https://sppa.uiowa.edu/
The minor in urban studies is offered for undergraduate students who seek to understand and address urban issues; want to work in urban communities; and are interested in community well-being, social justice, sustainable development, climate change, mobility and access, public health, and economic prosperity.

It is well suited for students in a wide range of majors, including but not limited to education, political science, sociology, economics, criminology, pre-law, human rights, social justice, social work, geography, sustainability, environmental policy and planning, civil and environmental engineering, health and public health, business, anthropology, history, journalism and mass communication, African American studies, Native American and Indigenous studies, international studies, and gender, women's, and sexuality studies.

Students who complete the minor will have an understanding of urban issues, urban policies, and innovative urban practices. They will be prepared to improve the quality and sustainability of the built and natural environments, to promote equity and justice, and to make communities more resilient, inclusive, and prosperous.

The minor in urban studies is awarded by University College.

## Programs

Undergraduate Program of Study

## Minor

- Minor in Urban Studies [p. 2115]

## Urban Studies, Minor

The minor in urban studies is highly relevant to students interested in addressing emerging and persistent issues of the 21st century, including social justice, climate change, environmental conservation, sustainable development, mobility and access, public health, and economic prosperity-each of which has local, urban, and regional dimensions.

## Requirements

The undergraduate minor in urban studies requires 15 s.h. of coursework taken at the University of Iowa. Students must maintain a grade-point average of at least 3.00 in work for the minor. Coursework in the minor may not be taken pass/nonpass.

The minor in urban studies requires the following coursework.

## Core Course

The core course provides an introduction to urban studies, policies, and practices.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| URP:3001/ | Planning Livable Cities | 3 |
| GEOG:3920 |  |  |

## Electives

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| At least 12 s.h. from these: |  |  |
| PBAF:3560/ <br> POLI:3560/ <br> RHET:3560/ <br> SJUS:3560 | Public Policy and Persuasion | 3 |
| $\begin{aligned} & \text { PBAF:3570/ } \\ & \text { GHS:3570 } \end{aligned}$ | Poverty Policy | 3 |
| URP:2020/ <br> PBAF:2020 | Environment and Society: Sustainability, Policy, and Politics | 3 |
| URP:4170 | Megacities Seminar (3 s.h. recommended) | 1-3 |
| URP:4225 | Applied GIS for Planning and Policy Making | 3 |
| URP:4245 | Growth Management | 3 |
| URP:4253 | Designing Sustainable and Healthy Cities (3 s.h. recommended) | 1-3 |
| URP:4256 | Environmental Policy | 3 |
| URP:4260 | Transportation Policy and Planning | 3 |
| URP:4266 | Transportation, Urban Form, and Sustainability | 3 |
| URP:4271 | Housing Policy | 3 |
| URP:4273 | Community Development Through Creative Placemaking | 3 |
| URP:4280 | Planning for Disaster <br> Mitigation and Recovery (3 s.h. recommended) | 2-3 |
| URP:4295 | Economic Development Policy | 3 |
| URP:4297 | Financing Economic Development for Poverty Alleviation | 3 |

| URP:4752 | Eight Generation Planning: <br> Envisioning Regenerative Cities | 3 |
| :--- | :--- | :--- |
| CRIM:4120 | Environmental Criminology | 3 |

## Admission

## Declaring the Minor

Students may declare the minor in MyUI as soon as they are enrolled in URP:3001 Planning Livable Cities.
Those interested in pursuing the minor must meet with the minor advisor, be briefed on the minor expectations for performance, and complete a plan of study that must be approved by the minor advisor.

For more information, contact the School of Planning and Public Affairs.

## University Calendar

Some university calendar dates may change; see Calendars and Deadlines on the Office of the Registrar website for the most up-todate academic calendar.

## 2023 Fall Semester

| Aug. 21 | Opening of classes |
| :--- | :--- |
| Sept. 4 | University holiday, no classes, offices closed |
| Nov. 19-26 | Fall break (consult Dentistry and Medicine <br> collegiate offices for break dates) |
| Nov. 23-24 | University holidays, offices closed |
| Nov. 27 | Classes resume |
| Dec. 8 | Close of classes |
| Dec. 11-15 | Final examination week |
| Dec. 14-17 | Commencement ceremonies* |
| Dec. 25 | Federal holiday, offices closed |
| Dec. 25-26 | University holidays, offices closed |
| *Fall commencement ceremonies: dates vary by college; see |  |
| Commencement on the Office of the Registrar website. |  |

## 2023-24 Winter Session

| Dec. 18 | Opening of classes |
| :--- | :--- |
| Dec. 25 | Federal holiday, no classes, offices closed |
| Dec. 25-26 | University holidays, no classes, offices closed |
| Jan. 1 | Federal holiday, no classes, offices closed |
| Jan. 12 | Close of classes |

## 2024 Spring Semester

| Jan. 15 | Martin Luther King, Jr. Day, no classes, offices <br> closed |
| :--- | :--- |
| Jan. 16 | Opening of classes |
| March 10-17 | Spring break |
| March 18 | Classes resume |
| May 3 | Close of classes |
| May 6-10 | Final examination week |
| May 9-12 | Commencement ceremonies** |
| **Spring commencement ceremonies: dates vary by college; see |  |
| Commencement on the Office of the Registrar website. |  |

## 2024 Summer Sessions

The University of Iowa offers several summer sub-sessions: one 12week sub-session, one 8 -week sub-session, two 6 -week sub-sessions, and one 4 -week sub-session. Each sub-session is listed below in order by its starting date.

| May 13-June 6 | Four-week sub-session (final examination day: June <br> 7) |
| :--- | :--- |
| May 13-June 20 | Six-week sub-session I (final examination day: June <br> 21) |
| May 13-Aug. 1 | Twelve-week sub-session (final examination day: <br> Aug. 2) |
| May 27 | University holiday, no classes, offices closed |
| June 10-Aug. 1 | Eight-week sub-session (final examination day: <br> Aug. 2) |
| June 24-Aug. 1 | Six-week sub-session II (final examination day: <br> Aug. 2) |
| July 4 | Federal holiday, no classes, offices closed |

## Office of the Registrar Calendars

The Office of the Registrar provides additional calendars that list detailed academic deadlines, final exam schedules, and university holidays. Please see these calendars for the most current dates and deadlines. It also publishes a five-year academic calendar.

## Individual College Calendars

Some University of Iowa colleges have academic year schedules that vary from the one listed above. Contact the individual colleges or visit their websites; use the A-Z List or the Directory Search on the University of Iowa home page.

## Campus Visits

Each year the University of Iowa is the destination for visitors with wide-ranging interests. Prospective and new students and their parents, new faculty and staff members, fans of intercollegiate athletics, University of Iowa health care patients, audiences for the visual and performing arts, museum visitors, and conference and continuing education participants are among those drawn to the campus.

## Prospective and New Students

Prospective and new students should contact the Admission Visitors Center if they are interested in a campus visit. The Admission Visitors Center hosts a variety of programs for future students and their families, including large group events and individual visits tailored to specific interests. It is best to visit the campus on weekdays when classes are in session and when other university offices are open. See Visit Campus on the Office of Admissions website to arrange for a campus visit.

## Attractions, Campus Maps, Parking

The University of Iowa website has links to campus maps, walking tours, how to arrange visits to varied attractions, and where to park on campus.

## Iowa Administrative Code

## Code of Iowa

The Code of Iowa contains information about admission and residency rules common to Iowa's three state universities-the University of Iowa, Iowa State University, and the University of Northern Iowa. It also provides supplemental information about application to the University of Iowa. Visit Iowa Code on the Iowa Legislature website to search and read the Iowa Administrative Code.

## Administrative Officers

## Board of Regents, State of Iowa

The Board of Regents, State of Iowa, governs the University of Iowa, Iowa State University of Science and Technology, the University of Northern Iowa, the Iowa Braille and Sight-Saving School, and the Iowa School for the Deaf.

President: Michael Richards, West Des Moines
President pro tem: Sherry Bates, Scranton
David Barker, Iowa City
Nancy Boettger, Harlan
Abby Crow, Tiffin
Nancy Dunkel, Dyersville
Jim Lindenmayer, Ottumwa
JC Risewick, Johnston
Greta Rouse, Emmetsburg
Executive director: Mark Braun

## The University of Iowa

## Central Administration

President: Barbara J. Wilson
Executive vice president and provost: Kevin C. Kregel
Vice president for medical affairs and dean of the Carver College of Medicine: J. Brooks Jackson

Chief human resources officer and associate vice president: Cheryl Reardon

Chief financial officer and treasurer: Terry Johnson
Senior vice president for finance and operations: Rod Lehnertz
Senior advisor to the president and vice president for external relations: Peter Matthes

Senior advisor to the president and associate vice president for administrative affairs: Laura McLeran

Vice president for legal affairs and general counsel: James D. Jorgensen

Associate vice president and chief information officer: Steve Fleagle
Vice president for student life: Sarah Hansen
Vice president for research: J. Martin Scholtz
University ombudspersons: Meenakshi Gigi Durham, Chanelle Reese

## Office of the Provost

Executive vice president and provost: Kevin C. Kregel
Executive officer for diversity, equity, and inclusion, and associate vice president: Elizabeth A. Tovar

Associate provost for graduate and professional education: Amanda H. Thein

Associate provost for undergraduate education: Tanya M. UdenHolman

Associate provost for faculty: Lois Geist
Associate provost and dean of international programs: Russell Ganim Associate vice president for enrollment management: Brent Gage

Associate vice president and director of administration and planning: Don J. Szeszycki

Assistant provost and director of admissions: Kirk R. Kluver

## Assistant provost and executive director of the career center: Angi McKie

Assistant provost and director of student financial aid: Brenda C. L. Buzynski
Assistant provost and university registrar: Julie A. Fell
Assistant provost and director of academic advising: Maureen M. Schafer

Henry B. Tippie College of Business
Dean: Amy L. Kristof-Brown

## College of Dentistry

Dean: Clark Stanford
College of Education
Dean: Daniel L. Clay

## College of Engineering

Dean: Ann F. McKenna
Graduate College
Dean: Amanda H. Thein

## College of Law

Dean: Kevin K. Washburn

## College of Liberal Arts and Sciences

Dean: Sara Sanders
Roy J. and Lucille A. Carver College of Medicine
Vice president for medical affairs and dean: Denise J. Jamieson
College of Nursing
Dean: Julie Zerwic
College of Pharmacy
Dean: Donald E. Letendre

## College of Public Health

Dean: Edith A. Parker
University College
Dean: Tanya M. Uden-Holman

## Libraries

University librarian: John P. Culshaw
Stanley Museum of Art
Director: Lauren Lessing

## Finance and Operations

Senior vice president and university architect: Rod Lehnertz
Associate vice president and director, purchasing and business services: Deborah J. Zumbach

Associate vice president and director, facilities management: Lynne Finn
Assistant vice president, public safety: Mark Bullock
Assistant vice president and university controller: Rachel McGuire
Assistant vice president, director of treasury operations \& financial management, and university secretary: Susan Klatt
University chief financial officer and treasurer: Terry L. Johnson
University business manager: David Kieft

UI REACH ..... 1433

[^0]:    The University of Iowa is accredited by the Higher Learning Commission. The university is a member of the Association of American Universities and is associated with Indiana, Michigan State, Northwestern, Ohio State, Pennsylvania State, Purdue, and Rutgers Universities and the Universities of Illinois, Maryland, Michigan, Minnesota, Nebraska-Lincoln, and Wisconsin-Madison in the Big Ten Conference. The Big Ten institutions are members of the Big Ten Academic Alliance.

[^1]:    12 s.h. in advanced production courses from these:

[^2]:    - Master of Science in Data Science [p. 359]

[^3]:    HIST:7275 Readings in the History of Women and Gender in the U.S.A.

    Same as GWSS:7275.

[^4]:    Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

[^5]:    - Major in Microbiology (Bachelor of Science) [p. 1789]

[^6]:    PA:8212 Fundamentals of EKG and ACLS for Physician Assistant Students

    2 s.h.
    Theory and practice with basic analysis of EKG strips and interpretation, including rhythm disturbances; completion of American Heart Association's Advanced Cardiac Life Support (ACLS) program.

[^7]:    a Students must complete specific requirements in the University

[^8]:    Associate Dean: Andrew Beckett

[^9]:    a It is recommended that students complete at least 9 s.h. in foundation courses before taking the nonprofit internship course.
