## The University of Iowa 2023-24 General Catalog

The General Catalog provides information about academic programs at the University of Iowa, one of three universities governed by the Board of Regents, State of Iowa. The catalog also provides links to supporting offices at the university, a list of administrative officers, an A-Z list of University of Iowa faculty members, a university calendar, and a link to the Code of Iowa for information regarding admission requirements and Iowa resident/nonresident standing.

The General Catalog is published for informational purposes and should not be construed as the basis of a contract between a student and the University of Iowa. Every effort is made to provide information that is accurate at the time of publication. However, information on courses, curricula, policies, regulations, and other matters is subject to change any time during the period for which the catalog is in effect.

For PDF versions of archived back editions, visit Archive on the catalog website.
The General Catalog is produced by the Office of the Registrar. Your comments and suggestions are welcome. Questions concerning the catalog may be directed to the Office of the Registrar at registrarpublications@uiowa.edu.

[^0]The University of Iowa prohibits discrimination in employment, educational programs, and activities on the basis of race, creed, color, religion, national origin, age, sex, pregnancy (including childbirth and related conditions), disability, genetic information, status as a U.S. veteran, service in the U.S. military, sexual orientation, gender identity, or associational preferences. The university also affirms its commitment to providing equal opportunities and equal access to university facilities. For additional information on nondiscrimination policies, contact the Director, Office of Institutional Equity, the University of Iowa, 202 Jessup Hall, Iowa City, IA 52242-1316, (319) 335-0705, oie-ui@uiowa.edu.
Table of Contents
Academics at Iowa ..... 11
Course Numbering ..... 12
Grading ..... 15
Supporting Offices ..... 16
College of Liberal Arts and Sciences ..... 17
GE CLAS Core ..... 19
African American Studies ..... 31
African American Studies, BA ..... 35
African American Studies, Minor ..... 39
African American Studies, Graduate Certificate ..... 41
Aging and Longevity Studies ..... 42
Aging and Longevity Studies, Minor ..... 44
Aging and Longevity Studies, Certificate ..... 45
Aging and Longevity Studies, Graduate Certificate ..... 47
American Sign Language ..... 48
American Sign Language, Minor ..... 50
American Studies ..... 51
American Studies, BA ..... 57
American Studies, Minor ..... 59
American Studies, MA ..... 60
American Studies, PhD ..... 62
Anthropology ..... 65
Anthropology, BA ..... 72
Anthropology, BS ..... 78
Anthropology, Minor ..... 84
Anthropology, MA ..... 85
Anthropology, PhD ..... 88
Art and Art History ..... 90
Art, BA ..... 103
Art History, BA ..... 106
Art, BFA. ..... 112
Art, Minor ..... 126
Art History, Minor ..... 127
Art, MA ..... 128
Art History, MA ..... 131
Art, MFA ..... 134
Art History, PhD ..... 137
Asian and Slavic Languages and Literatures ..... 141
Asian Languages and Literature, BA ..... 151
Russian, BA ..... 156
Asian Languages and Literature, Minor ..... 159
Korean Studies, Minor ..... 162
Russian, Minor ..... 164
Russian and Eastern European Studies, Minor ..... 165
Asian Civilizations, MA ..... 166
Biology ..... 167
Biology, BA ..... 172
Biology, BS ..... 177
Biology, Minor ..... 187
Integrated Biology, MS ..... 188
Integrated Biology, PhD ..... 190
Biomedical Sciences ..... 193
Biomedical Sciences, BS ..... 194
Chemistry ..... 198
Chemistry, BA ..... 203
Chemistry, BS ..... 207
Chemistry, Minor ..... 211
Chemistry, MS ..... 212
Chemistry, PhD ..... 213
Cinematic Arts ..... 215
Cinema, BA ..... 219
Screenwriting Arts, BA ..... 222
Cinema, Minor ..... 226
Film Studies, MA ..... 227
Film and Video Production, MFA ..... 229
Film Studies, PhD ..... 231
Classics ..... 233
Ancient Civilization, BA ..... 239
Classical Languages, BA ..... 244
Ancient Civilization, Minor ..... 247
Classical Languages, Minor ..... 248
Greek, Minor ..... 249
Health and the Human Condition, Minor ..... 251
Latin, Minor ..... 252
Classics, Postbaccalaureate Certificate ..... 254
Classics, MA ..... 255
Greek, MA ..... 256
Latin, MA ..... 257
Classics, PhD ..... 258
Communication Sciences and Disorders ..... 260
Speech and Hearing Science, BA ..... 265
Communication Sciences and Disorders, Minor ..... 268
Speech Pathology and Audiology, MA ..... 269
Doctor of Audiology, AuD ..... 272
Speech and Hearing Science, PhD ..... 274
Multilingualism and Culturally Responsive Practice in SLP, Graduate Certificate ..... 276
Communication Studies ..... 277
Communication Studies, BA ..... 285
Communication Studies, Minor ..... 289
Communication Studies, MA ..... 291
Communication Studies, PhD ..... 293
Computer Science ..... 296
Computer Science, BA ..... 301
Informatics, BA ..... 305
Computer Science, BS ..... 311
Informatics, BS ..... 316
Computer Science, Minor ..... 321
Informatics, Minor ..... 322
Master of Computer Science, MCS ..... 323
Computer Science, MS ..... 325
Computer Science, PhD ..... 326
Creative Writing (Iowa Writers' Workshop) ..... 329
English, MFA ..... 330
Critical Cultural Competence ..... 331
Critical Cultural Competence, Certificate ..... 332
Dance ..... 333
Dance, BA ..... 341
Dance, BFA ..... 345
Dance, Minor ..... 350
Dance, MFA ..... 352
Data Science ..... 355
Data Science, BS ..... 356
Data Science, MS ..... 359
Disability Studies ..... 361
Disability Studies, Certificate ..... 362
Division of Interdisciplinary Programs ..... 364
Division of World Languages, Literatures and Cultures ..... 365
Earth and Environmental Sciences ..... 369
Geoscience, BA ..... 375
Geoscience, BS ..... 379
Geoscience, Minor ..... 383
Geoscience, MS ..... 384
Geoscience, PhD ..... 386
English ..... 388
English, BA ..... 402
English and Creative Writing, BA ..... 411
English, Minor ..... 416
English, MA ..... 417
English (creative writing), MFA ..... 419
English (nonfiction writing), MFA ..... 420
English, PhD ..... 422
English as a Second Language ..... 425
Enterprise Leadership ..... 429
Enterprise Leadership, BA ..... 430
Environmental Policy and Planning ..... 434
Environmental Policy and Planning, BA ..... 435
Environmental Policy and Planning, BS ..... 440
Environmental Policy and Planning, Minor ..... 445
Environmental Sciences ..... 447
Environmental Sciences, BA ..... 449
Environmental Sciences, BS ..... 453
Environmental Sciences, Minor ..... 462
Ethics and Public Policy ..... 464
Ethics and Public Policy, BA ..... 465
Event Management ..... 469
Event Management, Certificate ..... 470
French and Italian ..... 472
French, BA ..... 479
Italian, BA ..... 483
Arabic Studies, Minor ..... 486
French, Minor ..... 487
Italian, Minor ..... 488
French and Francophone World Studies, MA ..... 489
French and Francophone World Studies, PhD ..... 491
Gender, Women's, and Sexuality Studies ..... 493
Gender, Women's, and Sexuality Studies, BA ..... 502
Social Justice, BA ..... 506
Gender, Health, and Healthcare Equity, Minor ..... 512
Gender, Women's, and Sexuality Studies, Minor ..... 513
Social Justice, Minor ..... 514
Gender, Women's, and Sexuality Studies, Graduate Certificate ..... 517
Geographical and Sustainability Sciences ..... 518
Geography, BA ..... 524
Geography, BS ..... 531
Sustainability Science, BS ..... 539
Geographic Information Science, Minor ..... 543
Geography, Minor ..... 544
Geographic Information Science, Certificate ..... 545
Geography, MA ..... 547
Geography, PhD ..... 549
German ..... 551
German, BA ..... 555
German, Minor ..... 559
German, MA ..... 561
Global Health Studies ..... 562
Global Health Studies, BA ..... 568
Global Health Studies, BS ..... 573
Global Health Studies, Minor ..... 578
Global Health Studies, Graduate Certificate ..... 579
Health and Human Physiology ..... 581
Health Studies, BA ..... 593
Exercise Science, BS ..... 596
Health Promotion, BS ..... 599
Human Physiology, BS ..... 602
Sport and Recreation Management, BS ..... 606
Therapeutic Recreation, BS ..... 613
Human Physiology, Minor ..... 618
Inclusive Recreation, Minor ..... 619
Lifestyle Medicine, Minor ..... 620
Sport and Recreation Management, Minor ..... 621
Interscholastic Athletic/Activities Administration, Certificate622
Sport and Recreation Management, MA ..... 624
Health and Human Physiology, MS ..... 626
Health and Human Physiology, PhD ..... 631
History ..... 634
History, BA ..... 646
History, Minor ..... 650
History, MA ..... 651
History, PhD ..... 653
Interdepartmental Studies ..... 656
Interdepartmental Studies, BA ..... 657

International Relations, BA ..... 676
International Relations, BS ..... 682
International Relations, Minor ..... 689
International Studies ..... 690
International Studies, BA ..... 693
International Studies, Minor ..... 705
Iowa Sciences Academy ..... 706
Journalism and Mass Communication ..... 708
Journalism and Mass Communication, BA ..... 715
Sport Media and Culture, BA ..... 725
Media Management, Minor ..... 728
News and Media Literacy, Minor ..... 730
Sport Media and Culture, Minor ..... 731
Mass Communication, MA ..... 732
Strategic Communication, MA ..... 734
Mass Communication, PhD ..... 736
Latham Science Engagement Initiative ..... 738
Latin American Studies ..... 739
Latin American Studies, Minor ..... 743
Latin American Studies, Certificate ..... 744
Latina/o/x Studies ..... 745
Latina/o/x Studies, Minor ..... 747
Linguistics ..... 748
Linguistics, BA ..... 752
Linguistics, Minor ..... 756
Linguistics, MA ..... 757
Linguistics, PhD ..... 759
Magid Center for Writing ..... 762
Writing, Certificate ..... 765
Mathematics ..... 770
Mathematics, BA ..... 777
Mathematics, BS ..... 783
Mathematics, Minor ..... 788
Mathematics, MS ..... 789
Mathematics, PhD ..... 791
Medieval Studies ..... 792
Medieval Studies, Certificate ..... 793
Museum Studies ..... 795
Museum Studies, Certificate ..... 797
Music ..... 799
Music, BA ..... 815
Music, BM ..... 825
Music, Minor ..... 836
Music, MA ..... 838
Music, PhD ..... 840
Doctor of Musical Arts, DMA ..... 844
Theory Pedagogy, Graduate Minor ..... 845
Native American and Indigenous Studies ..... 846
Native American and Indigenous Studies, Minor ..... 848
Native American and Indigenous Studies, Certificate ..... 849
Native American and Indigenous Studies, Graduate Certificate ..... 850
Neuroscience ..... 851
Neuroscience, BS ..... 852
Philosophy ..... 855
Philosophy, BA ..... 859
Philosophy, Minor ..... 863
Philosophy, MA ..... 864
Philosophy, PhD ..... 866
Physics and Astronomy ..... 868
Physics, BA ..... 873
Astronomy, BA ..... 876
Physics, BS ..... 879
Applied Physics, BS ..... 882
Astronomy, BS ..... 886
Physics, Minor ..... 889
Astronomy, Minor ..... 890
Physics, MS ..... 891
Astronomy, MS ..... 893
Physics, PhD ..... 895
Political Risk Analysis ..... 897
Political Risk Analysis, Certificate ..... 898
Political Science ..... 900
Political Science, BA ..... 907
Political Science, BS ..... 910
Political Science, Minor ..... 914
Political Science, MA ..... 915
Political Science, PhD ..... 916
Psychological and Brain Sciences ..... 919
Psychology, BA ..... 925
Psychology, BS ..... 929
Psychology, Minor ..... 933
Psychology, MA ..... 934
Psychology, PhD ..... 936
Public Digital Arts ..... 938
Public Digital Arts, Certificate ..... 940
Religious Studies ..... 943
Religious Studies, BA ..... 949
Religion and Media, Minor ..... 952
Religious Studies, Minor ..... 953
Religious Studies, MA ..... 955
Religious Studies, PhD ..... 957
Resilience and Trauma-Informed Perspectives ..... 960
Resilience and Trauma-Informed Perspectives, Certificate ..... 961
Rhetoric ..... 962
Rhetoric and Persuasion, Minor ..... 965
Second Language Acquisition ..... 967
Second Language Acquisition, PhD ..... 969
Social Science Analytics ..... 971
Social Science Analytics, Certificate ..... 972
Social Justice and the Performing Arts ..... 974
Social Justice and the Performing Arts, Certificate ..... 975
Social Work ..... 977
Social Work, BA ..... 983
Social Work, Minor ..... 987
Master of Social Work, MSW ..... 988
Social Work, PhD ..... 994
Sociology and Criminology ..... 996
Sociology, BA ..... 1003
Criminology, Law and Justice, BA ..... 1007
Sociology, Minor ..... 1011
Criminology, Law and Justice, Minor ..... 1012
Sociology, MA ..... 1013
Criminology, PhD ..... 1014
Sociology, PhD ..... 1016
Spanish and Portuguese ..... 1018
Spanish, BA ..... 1027
Portuguese, BA ..... 1032
Spanish, Minor ..... 1035
Portuguese, Minor ..... 1037
Spanish, MA ..... 1038
Spanish Creative Writing, MFA ..... 1040
Spanish, PhD ..... 1042
Statistics and Actuarial Science ..... 1047
Statistics, BS ..... 1054
Actuarial Science, BS ..... 1060
Statistics, Minor ..... 1063
Statistics, MS ..... 1064
Actuarial Science, MS ..... 1066
Statistics, PhD ..... 1068
Theatre Arts ..... 1073
Theatre Arts, BA ..... 1080
Theatre Arts, Minor ..... 1085
Theatre Arts, MFA ..... 1086
Translation ..... 1093
Translation, BA ..... 1096
Translation for Global Literacy, Minor ..... 1100
Literary Translation, MFA ..... 1102
Literary Translation, Graduate Certificate ..... 1105
Tippie College of Business ..... 1106
Accounting ..... 1112
Accounting, BBA ..... 1115
Master of Accountancy, MAc ..... 1118
Doctor of Philosophy ..... 1121
Bachelor of Business Administration ..... 1122
Business Administration, BBA ..... 1126
Business Administration ..... 1131
Business Administration, Minor ..... 1132
Business Analytics ..... 1134
Business Analytics and Information Systems, BBA ..... 1139
Business Analytics (career), MS ..... 1141
Business Analytics (professional), MS ..... 1145
Doctor of Philosophy ..... 1148
Business Analytics, Graduate Certificate ..... 1149
Doctor of Philosophy ..... 1150
Business Administration, PhD ..... 1151
Economics ..... 1157
Economics, BA ..... 1161
Economics, BS ..... 1164
Economics, BBA ..... 1167
Economics, Minor ..... 1171
Economics, MA ..... 1172
Economics, PhD ..... 1173
Entrepreneurial Management ..... 1175
Entrepreneurial Management, Certificate ..... 1179
Finance ..... 1181
Finance, BBA ..... 1185
Finance, MS ..... 1187
Doctor of Philosophy ..... 1190
International Business ..... 1191
International Business, Certificate ..... 1192
Management and Entrepreneurship ..... 1198
Management, BBA ..... 1202
Doctor of Philosophy ..... 1207
Marketing ..... 1208
Marketing, BBA ..... 1212
Doctor of Philosophy ..... 1214
Master of Business Administration Program ..... 1215
Master of Business Administration, MBA ..... 1217
Business Fundamentals, Professional Certificate ..... 1221
Corporate Finance, Professional Certificate ..... 1222
Finance, Professional Certificate ..... 1223
Financial Decision-Making, Professional Certificate ..... 1224
Innovation, Professional Certificate ..... 1225
Investment Management, Professional Certificate ..... 1226
Leadership, Professional Certificate ..... 1227
Marketing, Professional Certificate ..... 1228
Responsible Resource Management, Professional Certificate ..... 1229
Risk Management and Insurance, Professional Certificate1230
Risk Management and Insurance ..... 1231
Risk Management and Insurance, BBA ..... 1232
Risk Management and Insurance, Certificate ..... 1234
College of Dentistry ..... 1236
Doctor of Dental Surgery ..... 1239
Doctor of Dental Surgery, DDS ..... 1240
Endodontics ..... 1244
Endodontics, Professional Certificate ..... 1245
Family Dentistry ..... 1246
Geriatric and Special Needs Dentistry ..... 1247
Geriatric and Special Needs Dentistry, Professional Certificate ..... 1248
Hospital Dentistry ..... 1249
Operative Dentistry ..... 1250
Operative Dentistry, Professional Certificate ..... 1251
Oral and Maxillofacial Surgery ..... 1252
Oral and Maxillofacial Surgery, Professional Certificate ..... 1253
Oral Pathology, Radiology, and Medicine ..... 1254
Oral and Maxillofacial Pathology, Professional Certificate ..... 1256
Oral and Maxillofacial Radiology, Professional Certificate1257
Oral Science ..... 1258
Oral Science, MS ..... 1259
Oral Science, PhD ..... 1260
Orthodontics ..... 1261
Orthodontics, Professional Certificate ..... 1262
Orthodontics, MS ..... 1263
Pediatric Dentistry ..... 1264
Pediatric Dentistry, Professional Certificate ..... 1265
Periodontics ..... 1266
Periodontics, Professional Certificate ..... 1267
Preventive and Community Dentistry ..... 1268
Dental Public Health, MS ..... 1270
Prosthodontics ..... 1272
Prosthodontics, Professional Certificate ..... 1274
College of Education ..... 1275
Education Studies and Human Relations, BA ..... 1285
Belin-Blank Center for Gifted Education ..... 1290
Applied Behavior Analysis ..... 1292
Applied Behavior Analysis, Graduate Certificate ..... 1293
Counselor Education ..... 1294
Human Relations, Minor ..... 1299
Counselor Education, MA ..... 1300
Counselor Education, PhD ..... 1306
Educational Policy and Leadership Studies ..... 1309
Educational Policy and Leadership Studies, MA ..... 1315
Educational Policy and Leadership Studies, EdS ..... 1318
Educational Policy and Leadership Studies, EdD ..... 1321
Educational Policy and Leadership Studies, PhD ..... 1324
Institutional Research and Effectiveness ..... 1328
Institutional Research and Effectiveness, Graduate Certificate1329
K-12 Equity and Inclusion ..... 1330
K-12 Equity and Inclusion, Graduate Certificate ..... 1331
Online Teaching ..... 1332
Online Teaching, Graduate Certificate ..... 1333
Psychological and Quantitative Foundations ..... 1334
Educational Psychology, Minor ..... 1342
Psychological and Quantitative Foundations, MA ..... 1343
Psychological and Quantitative Foundations, EdS ..... 1347
Psychological and Quantitative Foundations, PhD ..... 1348
Talent Development ..... 1360
Talent Development, Graduate Certificate ..... 1361
Teaching and Learning ..... 1362
Art Education, BA ..... 1376
Elementary Education, BA ..... 1378

Mathematics Education, BA ..... 1387
Music Education, BA ..... 1390
Science Education, BA ..... 1394
Social Studies Education, BA ..... 1397
World Language Education, BA ..... 1400
Science Studies, BS ..... 1403
Teaching and Learning, MA ..... 1411
Teaching and Learning, MAT ..... 1416
Teaching and Learning, MS ..... 1424
Teaching and Learning, PhD ..... 1427
UI REACH ..... 1433
College of Engineering ..... 1436
Engineering and Information Technology, MS ..... 1442
Artificial Intelligence, Modeling and Simulation in Engineering ..... 1443
Artificial Intelligence, Modeling and Simulation in Engineering,Certificate1444
Artificial Intelligence, Modeling and Simulation in Engineering, Graduate Certificate ..... 1445
Bachelor of Science in Engineering ..... 1446
Bachelor of Science in Engineering, BSE ..... 1448
Roy J. Carver Department of Biomedical Engineering ..... 1453
Biomedical Engineering, BSE ..... 1459
Biomedical Engineering, MS ..... 1465
Biomedical Engineering, PhD ..... 1467
Chemical and Biochemical Engineering ..... 1470
Chemical Engineering, BSE ..... 1476
Chemical and Biochemical Engineering, MS ..... 1486
Chemical and Biochemical Engineering, PhD ..... 1489
Civil and Environmental Engineering ..... 1492
Civil Engineering, BSE ..... 1500
Environmental Engineering, BSE ..... 1507
Civil and Environmental Engineering, MS ..... 1511
Civil and Environmental Engineering, PhD ..... 1516
Electrical and Computer Engineering ..... 1525
Computer Science and Engineering, BSE ..... 1531
Electrical Engineering, BSE ..... 1535
Electrical and Computer Engineering, MS ..... 1541
Electrical and Computer Engineering, PhD ..... 1543
Industrial and Systems Engineering ..... 1545
Industrial Engineering, BSE ..... 1550
Industrial Engineering, MS ..... 1556
Industrial Engineering, PhD ..... 1559
Mechanical Engineering ..... 1563
Mechanical Engineering, BSE ..... 1570
Mechanical Engineering, MS ..... 1576
Mechanical Engineering, PhD ..... 1579
Naval Science and Technology ..... 1582
Naval Science and Technology, Certificate ..... 1583
Sustainable Water Development ..... 1584
Sustainable Water Development, Graduate Certificate ..... 1585
Technological Entrepreneurship ..... 1587
Technological Entrepreneurship, Certificate ..... 1588
Graduate College ..... 1589
Applied Mathematical and Computational Sciences ..... 1600
Applied Mathematical and Computational Sciences, PhD ..... 1601
Biomedical Science ..... 1603
Biomedical Science, MS ..... 1605
Biomedical Science, PhD ..... 1606
Center for the Book ..... 1624
Book Arts, MFA ..... 1627
Book Studies/Book Arts and Technologies, Graduate Certificate ..... 1629
Cognitive Science of Language ..... 1630
Cognitive Science of Language, Graduate Certificate ..... 1631
College Teaching ..... 1632
College Teaching, Graduate Certificate ..... 1633
Genetics ..... 1634
Genetics, PhD ..... 1635
Human Toxicology ..... 1638
Human Toxicology, MS ..... 1639
Human Toxicology, PhD ..... 1641
Immunology ..... 1643
Immunology, PhD ..... 1644
Informatics ..... 1647
Informatics, MS ..... 1653
Informatics, PhD ..... 1657
Informatics, Graduate Certificate ..... 1660
International Writing Program ..... 1661
Library and Information Science ..... 1662
Library and Information Science, MA ..... 1666
Special Collections Librarianship, Graduate Certificate ..... 1671
Molecular Medicine ..... 1672
Neuroscience ..... 1674
Neuroscience, PhD ..... 1675
Planning and Public Affairs ..... 1678
Master of Public Affairs, MPAff ..... 1685
Urban and Regional Planning, MS ..... 1689
Public Digital Humanities ..... 1693
Public Digital Humanities, Graduate Certificate ..... 1694
Sustainable Development ..... 1695
Sustainable Development, MS ..... 1696
Translational Biomedicine ..... 1699
Translational Biomedicine, MS ..... 1700
Transportation Planning ..... 1703
Transportation Planning, Graduate Certificate ..... 1704
College of Law ..... 1705
Juris Doctor, JD ..... 1720
Master of Laws, LLM ..... 1723
Master of Studies in Law, MSL ..... 1724
Doctor of Juridical Science, SJD ..... 1725
University of Iowa Center for Human Rights ..... 1726
Human Rights, Certificate ..... 1727
Carver College of Medicine ..... 1729
Anatomy and Cell Biology ..... 1739
Master of Clinical Anatomy, MCA ..... 1742
Anesthesia ..... 1744
Biochemistry and Molecular Biology ..... 1746
Biochemistry and Molecular Biology, BA ..... 1749
Biochemistry and Molecular Biology, BS ..... 1752
Biochemistry and Molecular Biology, MS ..... 1755
Biochemistry and Molecular Biology, PhD ..... 1756
Cardiothoracic Surgery ..... 1759
Perfusion Technology, Certificate ..... 1761
Dermatology ..... 1762
Dietary ..... 1763
Master of Clinical Nutrition, MCN ..... 1764
Doctor of Medicine ..... 1766
Doctor of Medicine, MD ..... 1767
Emergency Medicine ..... 1770
Family Medicine ..... 1772
Free Radical and Radiation Biology ..... 1774
Internal Medicine ..... 1776
Medical Education Program ..... 1778
Master in Medical Education, MME ..... 1779
Medical Education, Graduate Certificate ..... 1780
Medical Laboratory Science ..... 1781
Medical Laboratory Science, BS ..... 1782
Medical Scientist Training Program ..... 1784
Microbiology and Immunology ..... 1786
Microbiology, BS ..... 1789
Microbiology, Minor ..... 1794
Microbiology, MS ..... 1795
Microbiology, PhD ..... 1796
Molecular Physiology and Biophysics ..... 1799
Neurology ..... 1801
Neuroscience and Pharmacology ..... 1802
Neurosurgery ..... 1804
Nuclear Medicine Technology ..... 1805
Nuclear Medicine Technology, BS ..... 1806
Obstetrics and Gynecology ..... 1810
Master of Midwifery, MM ..... 1812
Ophthalmology and Visual Sciences ..... 1813
Orthoptics, Professional Certificate ..... 1814
Orthopedics and Rehabilitation ..... 1815
Athletic Training, MS ..... 1819
Otolaryngology—Head and Neck Surgery ..... 1821
Pathology ..... 1822
Pathology, MS ..... 1824
Physical Therapy and Rehabilitation Science ..... 1826
Physical Rehabilitation Science, MA ..... 1830
Doctor of Physical Therapy, DPT ..... 1831
Physical Rehabilitation Science, PhD ..... 1834
Physician Assistant Studies and Services ..... 1837
Master of Physician Assistant Studies, MPA ..... 1840
Psychiatry ..... 1843
Radiation Oncology ..... 1845
Radiation Sciences ..... 1846
Radiation Sciences, BS ..... 1854
Radiology ..... 1876
Stead Family Department of Pediatrics ..... 1877
Surgery ..... 1879
Urology ..... 1880
College of Nursing ..... 1881
Bachelor of Science in Nursing, BSN ..... 1892
Master of Science in Nursing, MSN ..... 1898
Doctor of Nursing Practice, DNP ..... 1903
Nursing, PhD ..... 1917
Adult Gerontology Acute Care Nurse Practitioner, Graduate Certificate ..... 1919
Adult Gerontology Primary Care Nurse Practitioner, Graduate Certificate ..... 1920
Family Nurse Practitioner, Graduate Certificate ..... 1921
Health Systems, Graduate Certificate ..... 1922
Pediatric Nurse Practitioner-Acute Care, Graduate Certificate ..... 1923
Pediatric Nurse Practitioner-Primary Care, Graduate Certificate ..... 1924
Psychiatric/Mental Health Nurse Practitioner, Graduate Certificate ..... 1925
College of Pharmacy ..... 1926
Doctor of Pharmacy, PharmD ..... 1935
Palliative Care, Professional Certificate ..... 1939
Pharmacy, MS ..... 1940
Pharmacy, PhD ..... 1941
College of Public Health ..... 1946
Public Health, BA ..... 1953
Public Health, BS ..... 1958
Public Health, Undergraduate Certificate ..... 1963
Master of Public Health, MPH ..... 1964
Public Health, Graduate Certificate ..... 1976
Agricultural Safety and Health ..... 1977
Agricultural Safety and Health, Graduate Certificate ..... 1978
Biostatistics ..... 1979
Biostatistics, MS ..... 1982
Biostatistics, PhD ..... 1985
Biostatistics, Graduate Certificate ..... 1988
Community and Behavioral Health ..... 1989
Community and Behavioral Health, PhD ..... 1991
Emerging Infectious Disease Epidemiology ..... 1994
Emerging Infectious Disease Epidemiology, Graduate Certificate ..... 1995
Epidemiology ..... 1996
Clinical Investigation, MS ..... 2000
Epidemiology, MS ..... 2003
Epidemiology, PhD ..... 2006
Health Management and Policy ..... 2010
Master of Health Administration, MHA ..... 2013
Health Services and Policy Research, MS ..... 2017
Health Services and Policy, PhD ..... 2019
Healthcare Management ..... 2023
Healthcare Management, Graduate Certificate ..... 2024
Occupational and Environmental Health ..... 2025
Occupational and Environmental Health, MS ..... 2028

## Academics at Iowa

## Degree and Nondegree Programs

The University of Iowa offers academic degree and nondegree programs at the undergraduate and graduate levels. It also offers professional degrees, postdoctoral study, and other opportunities for nondegree study and research. The General Catalog describes the university's degree and nondegree programs at the undergraduate and graduate levels.

The following pages provide global information about undergraduate, graduate, and professional study across the university. They include all undergraduate and graduate majors, minors, and certificate programs with links to the relevant catalog sections; descriptions of the university's Course Numbering [p. 12] and Grading [p. 15] systems; and contact information for Supporting Offices [p. 16].

## Searching for Programs

There are more options to search for information on programs of study by using the black bar above. The A-Z Directory lists information in alphabetical order. Catalog Contents allows a user to search by department or unit for the majors, minors or certificates offered, and for information about each university program. Find Your Program provides users the ability to search by undergraduate, graduate, and professional program options, as well as additional learning opportunities in college or precollege programs by selecting choices with the Filter Options drop-down list. UI Courses lists all the university courses by academic unit.

Explore what the University of Iowa has to offer!

## Course Numbering

## Courses at the University of Iowa

Course numbers at the University of Iowa consist of an alphabetical prefix (up to four letters) showing the college, department, or program, followed by a colon and a four-digit numerical suffix for the individual course. For example, SOC:2810 identifies the course numbered 2810 in the Department of Sociology and Criminology (SOC), titled Social Inequality.

Course suffix numbers:

- 0000-0999 designate prelower-level courses;
- 1000-2999 designate lower-level undergraduate courses;
- 3000-4999 designate courses for upper-level undergraduate and graduate students (except in the College of Engineering, where numbers 3000-5999 designate courses for undergraduate and graduate students);
- 5000-7999 designate graduate-level courses; and
- 8000-9999 designate professional-level courses.

## Grading

## Grading System

The University of Iowa uses a letter grading system for individual courses, except for the College of Law, which uses a numeric system for course grading. In order to compute grade-point average, letter grades are converted according to the following numerical scale. Grade-point averages are displayed at the bottom of students' grade reports. All of the following marks appear on the permanent record.

## Grades and Points for Semester Hours

| A+ | 4.33 |
| :--- | :--- |
| A | 4.00 |
| A- | 3.67 |
| B+ | 3.33 |
| B | 3.00 |
| B- | 2.67 |
| C+ | 2.33 |
| C | 2.00 |
| C- | 1.67 |
| D+ | 1.33 |
| D | 1.00 |
| D- | 0.67 |
| F | 0 |

Not Used in Computing Grade-Point Average

| AUS | Audit Successful |
| :--- | :--- |
| AUU | Audit Unsuccessful |
| H | Honors |
| H- | Near Honors |
| IP | In Progress |
| N | Nonpass |
| P | Pass |
| S | Satisfactory |
| U | Unsatisfactory |

Other Marks on the Permanent Record

| H | Undergraduate honors section |
| :--- | :--- |
| HC | Individual undergraduate honors <br> earned |
| I | Incomplete |
| IP | In progress |
| O | No grade reported |
| R | Registered, no grade required |
| W | Withdrawn |
| X | Excused |
| = | Changed grade |
| \# | Grade not included in grade-point |
| * | average |

## Supporting Offices

Prospective undergraduate, graduate, and professional students should apply to the University of Iowa through the Office of Admissions. Several other University of Iowa offices provide major services to entering and continuing students.

## Office of Admissions

Application for admission (undergraduate, graduate, and professional programs).
The University of Iowa
100 Pomerantz Center
Iowa City, IA 52242-1396

## Undergraduate

Undergraduate majors: BA; BS; BFA; BM
Graduate degrees: programs leading to DMA; MA; MFA; MS; MSW; PhD (degrees conferred by the Graduate College)
Website: https://clas.uiowa.edu
The College of Liberal Arts and Sciences (CLAS), established in 1900, is the largest of the 11 colleges that comprise the University of Iowa, with 37 departments spanning the visual, performing, literary, and cinematic arts; humanities; natural and mathematical sciences; social and behavioral sciences; and communication disciplines.
Throughout CLAS departments and programs, faculty are at the forefront of their disciplines. They bring their world-class research and artistry into their classrooms, studios, and labs, giving students the unparalleled opportunity to learn right from the source of the latest innovations in knowledge and practice.
Graduate students and many undergraduates work side-by-side with faculty members, conducting breakthrough research that advances understanding of ourselves and the complex, ever-changing world in which we live.

Faculty members help students discover their individual talents and passions, mentoring students about research opportunities, internships, and career choices. Professional academic advisors encourage students to create unique academic portfolios that help them stand out among their peers, with students developing creative strategies to combine majors, minors, and certificates-a common practice in CLAS, where all work together to support students' diverse interests and goals.

CLAS students can choose from almost 70 undergraduate majors, 70 minors, and 27 undergraduate interdisciplinary certificate programs, with choices that particularly focus on applied skills helpful in a chosen profession that encourage students to pursue intellectual and artistic interests along with pragmatic preparation for a first career. Students in CLAS have many opportunities to engage beyond the classroom: for example, faculty-mentored research, study abroad, honors, community engagement, and internships.

## CLAS Undergraduate Programs

Located in Schaeffer Hall and at the center of campus on the Pentacrest, CLAS Undergraduate Programs (CLAS UP) is an integral
part of the College of Liberal Arts and Sciences. Under the direction of the Associate Dean for Undergraduate Education, CLAS UP oversees academic advising in the College; the development of the undergraduate curriculum, including the General Education CLAS Core; and the collegiate academic standards.
Academic staff in CLAS UP meet with students about requirements, collegiate policies that affect students, and a range of other issues, including successful completion of a degree. CLAS UP staff strive to promote the success of every student, maintain the academic integrity of CLAS, and to impart the value of a liberal arts education.

## GE CLAS Core

Students entering the College of Liberal Arts and Sciences who wish to earn a Bachelor of Arts (BA), Bachelor of Science (BS), Bachelor of Fine Arts (BFA), or Bachelor of Music (BM) degree must complete the requirements of the General Education CLAS Core in addition to the requirements of a major and other UI and CLAS graduation requirements.

The GE CLAS Core encourages students to explore beyond familiar topics, helping students to discover intriguing majors, minors, and certificates while challenging students to embrace personal transformation by expanding their core knowledge and perspectives. For this reason, the GE CLAS Core is framed by the overall concept that general education (GE) courses also teach students how to learn, thereby fostering success in the major and life-long learning.
For GE CLAS Core requirements, related academic policies, and lists of approved courses, see the GE CLAS Core [p. 19] and related GE courses in the catalog.

## Programs

## CLAS Units and Academic Programs

## Undergraduate Majors, Minors, and Certificates

The College of Liberal Arts and Sciences (CLAS) has 37 departments and offers about 70 undergraduate majors, 70 minors, and 18 undergraduate certificates.
In addition, CLAS collaborates with other University of Iowa colleges to award degrees in the following majors: economics (BA and BS) and enterprise leadership (BA) with Tippie College of Business; biochemistry (BA and BS) and microbiology (BS) with Carver College of Medicine; and science studies (BS) with the College of Education. For descriptions of these majors and their requirements, view those programs in the catalog. CLAS also offers three majors both on campus and online: enterprise leadership, political science, and sport and recreation management.

CLAS also works closely with the College of Education, which offers a Teacher Education Program that requires a major in a related area of education (BA) designed to lead to licensure at the secondary level. These students also must complete a related CLAS major to earn the education degree, such as a major in art, English, mathematics, the sciences and social sciences, and in various world languages. Students must apply for admission to the Teacher Education Program; contact the College of Education's Office of Student Services.
Students who begin their study in CLAS may apply to degree programs in other colleges at the University of Iowa. If they are accepted, they may earn undergraduate degrees in business (BBA), education (BA), engineering (BSE), nursing (BSN), or public health (BA or BS); a BS with a major in medical laboratory science, nuclear medicine technology, or radiation sciences; or a professional degree in
pharmacy (PharmD). Use the General Catalog's Catalog Contents page to link to these programs.

Students who are interested in earning a professional or graduate degree in addition to a bachelor's degree may apply for early admission or to combined degree programs offered through partnerships between CLAS and other UI colleges. Students admitted to these programs may count a limited amount of credit toward both degrees. CLAS has early admission programs with the College of Dentistry [p. 1236] (DDS) and the College of Law [p. 1705] (JD), for example. Combined bachelor's/graduate degree programs are available in several disciplines; see Combined Programs [p. 1590] in the Graduate College section of the catalog.
CLAS offers a wide selection of undergraduate certificates and minors. CLAS students also may earn undergraduate certificates and minors offered by other colleges. For lists of all undergraduate certificates and minors offered by the university, see Find Your Program in the catalog and select those programs of study.

## Graduate Degrees and Certificates

The College of Liberal Arts and Sciences offers graduate programs in most of its disciplines, with degrees conferred by the Graduate College. Students may earn degrees at the master's and doctoral levels; graduate certificates are available in some areas of study. See the Graduate [p. 1589] College section of the catalog for a complete list of graduate degrees offered by the university.

For information about CLAS graduate programs, consult the specific academic programs.

## Courses

Most College of Liberal Arts and Sciences courses are offered by the college's departments, programs, and schools. They are listed and described in the corresponding General Catalog sections.
The college also offers the following nondepartmental courses.

## Liberal Arts and Sciences Nondepartmental Courses

CLAS:1000 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

## CLAS: 1005 ESL Special Topics

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings). Same as ESL:1005.
CLAS: 1650 College Success for International Students 1 s.h. Skills and resources to help international students achieve academic success; reflection on academic habits and experiences; exploration of study skills and strategies; cultural expectations in U.S. academic settings including academic integrity; culture shock and immigration issues that can impact international students at the UI; development of techniques for time management and goal setting; techniques to stay motivated and manage stress; overcoming barriers to student success; discussions and assignments emphasize self-reflection on class topics including time management, study skills, and cultural identity. Same as CSI:1650, ESL:1650.
CLAS: 1800 The Art of Active Learning 1 s.h.
Case studies, individual assessments, video, class discussions, and short readings to encourage understanding of academic standards and active engagement in the learning process; examination of behaviors, study skills, habits, and attitudes that can affect success in the classroom and in life.

CLAS:4100 Peer Assistant
1-2 s.h.
Opportunities to participate in classroom and course activities; work with students as an assistant to course instructor.

CLAS:5100 Practicum: College Teaching and Professional Development for Teaching Assistants

## arr.

Guidance for teaching assistants seeking introduction to teaching at college level; focus on practical pedagogical concerns, including how to structure a course, devise learning outcomes, develop a syllabus and a calendar of assignments, evaluate student work, and create a student-centered classroom with collaborate learning experiences; pre-semester intensive training session, weekly meetings during first month of semester, periodic meetings to address midterm and late-semester issues; concurrent with TA teaching assistantships. Recommendations: interest in teacher training and preparation. Same as RHET:5100.

CLAS:6290 Interdisciplinary Humanities Seminar 3 s.h
Examination of interdisciplinary topics related to the humanities; topics vary.
CLAS:7290 Digital Humanities Theory and Practice
3 s.h.
Overview of theories and use of technology to preserve, deploy, visualize, map, and analyze concepts; discussions with practicing digital public scholars; assignments consist of a digital portfolio tailored to student research; introductory course in public digital humanities certificate.

## GE CLAS Core

Website: https://clas.uiowa.edu/clas-core/requirements
The College of Liberal Arts and Sciences GE CLAS Core requirements provide students with a broad foundation of knowledge and a focused practice of transferable skills necessary for a lifetime of learning.

GE CLAS Core courses are particularly valuable for students making the transition into the University of Iowa. They help students understand the academic expectations of the College of Liberal Arts and Sciences while providing the knowledge and skills needed for more advanced work in the major.

All students in the College of Liberal Arts and Sciences who wish to earn an undergraduate degree-Bachelor of Arts (BA), Bachelor of Science (BS), Bachelor of Fine Arts (BFA), or Bachelor of Music (BM)—must complete the requirements of the GE CLAS Core.

## GE CLAS Core Areas and <br> Requirements

The GE CLAS Core has 11 required areas, grouped into three categories. Students must fulfill the requirements in each GE CLAS Core area. The requirements below are for students who entered the University of Iowa during summer 2023 or after. Students who entered during a previous semester are held to different requirements as indicated on a student's degree audit.

## Communication and Literacy:

- Diversity and Inclusion [p. 19]: a minimum of 3 s.h.
- Interpretation of Literature [p. 20]: a minimum of 3 s.h.
- Rhetoric [p. 21]: a minimum of 4 s.h.
- World Languages [p. 21]: required credit varies by language (see "World Languages" below)

## Sustainability:

Students complete this requirement by choosing an approved GE CLAS Core course that integrates Sustainability [p. 24] (with no additional semester hours) with a course from the Natural, Quantitative, and Social Sciences category or the Culture, Society, and the Arts category.

## Natural, Quantitative, and Social Sciences:

- Natural Sciences [p. 24]: a minimum of 7 s.h.; must include one lab
- Quantitative or Formal Reasoning [p. 25]: a minimum of 3 s.h.
- Social Sciences [p. 25]: a minimum of 3 s.h.

## Culture, Society, and the Arts:

- Historical Perspectives [p. 26]: a minimum of 3 s.h.
- International and Global Issues [p. 27]: a minimum of 3 s.h.
- Literary, Visual, and Performing Arts [p. 28]: a minimum of 3 s.h.
- Values and Culture [p. 29]: a minimum of 3 s.h.

Students may count transfer credit and/or credit by exam toward some GE CLAS Core requirements. See CLAS Core Policies for details regarding use of transfer credit, credit by exam, and other policies for how GE CLAS Core requirements may be fulfilled.

## Communication and Literacy

## Diversity and Inclusion

Courses in the Diversity and Inclusion area help to develop students' recognition of their positions in an increasingly pluralistic world while fostering an understanding of social and cultural differences. Students reflect critically on their own social and cultural perspectives while increasing their ability to engage with people who have backgrounds or ideas different from their own. Students also explore the historical and structural bases of inequality and the benefits and challenges of diversity.

Transfer credit is not accepted for the Diversity and Inclusion requirement; students must complete this requirement with coursework taken at the University of Iowa.

All students must complete at least 3 s.h. of coursework in the Diversity and Inclusion area. The following courses are approved for the area.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| AFAM:1020/ | Introduction to African | 3 |
| AMST:1030 | American Culture |  |
| AFAM:1030 | Introduction to African | 3 |
|  | American Society |  |
| AFAM:1130 | The History of African | 3 |
|  | American Film |  |
| AFAM:1241/ | The Soundtrack of Black | 3 |
| MUS:1741 | America |  |
| AFAM:2064/ | African American Families: | 3 |
| SOC:2064 | Urban and Suburban |  |
| AFAM:2070/ | Black Television Culture | 3 |
| COMM:2069 |  |  |
| AFAM:2500 | Black Culture and Experience: | 3 |
|  | Contemporary Issues |  |
| AMST:2025 | Diversity in American Culture | 3 |
| ANTH:2151/ | Global Migration in the | 3 |
| GWSS:2151/IS:2151 | Contemporary World |  |
| ANTH:2165/ | Native Peoples of North | 3 |
| AMST:2165/ | America |  |
| NAIS:2165 |  |  |
| ARTS:2100 | Printmaking and Politics of | 3 |
|  | Protest |  |
| ASIA:2222/ | Women in Premodern East | 3 |
| GWSS:2222/ | Asian Literature |  |
| WLLC:2222 |  |  |
| CCCC:2220 | Foundations of Critical Cultural | 3 |
|  | Competence |  |
| CINE:1195 | Video Games and Identity | 3 |
| CINE:1625 | Race, Gender, and Sexuality on | 3 |
|  | Screen |  |
| CLSA:1415 | Ancient Origins of Religious | 3 |
|  | Conflict |  |
| CLSA:2620/ | Sex and the Bible | 3 |
| RELS:2620 |  |  |
| CLSA:2800 | Race and Ethnicity in the | 3 |
|  | Ancient Mediterranean World |  |
| COMM:1168 | Music and Social Change | 3 |
| COMM:1898/ | Introduction to Latina/o/x | 3 |
| LATS:1898 | Communication and Culture |  |
| DANC:2065 | Performing Power/Performing | 3 |
|  | Protest: The Body, Identity, and the Image |  |

## Rhetoric

Rhetoric courses develop speaking, writing, listening, and critical reading skills and build competence in research, analysis, and argumentation.

All entering first-year students are required to complete RHET:1030 Rhetoric. Because rhetorical skills lay the foundation for further study at the University, most students register for RHET:1030 during their first year at Iowa.
Students who must enroll in English as a Second Language (ESL) courses as determined by their English proficiency evaluation must complete all ESL courses before they may register for RHET:1030 Rhetoric.
Students who have transfer credit in composition, speech, and argumentation but have not been granted an AA degree must complete the equivalent of RHET:1030 Rhetoric and often must take RHET: 1040 Writing and Reading or RHET: 1060 Speaking and Reading in addition to their transfer courses in composition and/or speech.

Each entering student's degree audit shows the course(s) that must be completed in order to fulfill the Rhetoric requirement.
The following courses are approved for the Rhetoric area.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| RHET:1030 | Rhetoric | $4-5$ |
| RHET:1040 | Writing and Reading | 3 |
| RHET:1060 | Speaking and Reading | 3 |

## Transfer of Credit for Rhetoric

Transfer students who have been granted an Associate of Arts (AA) degree from an Iowa or Illinois community college or Waldorf College in Iowa have satisfied the Rhetoric requirement.
Transfer credit for students without an AA degree is evaluated as follows:

- transfer students who have completed composition I, composition II, and speech at another institution have satisfied the GE CLAS Core Rhetoric requirement of RHET:1030 Rhetoric;
- transfer students who have completed only composition I must complete RHET: 1030 Rhetoric at the University of Iowa;
- transfer students who have completed composition I and speech must complete RHET:1040 Writing and Reading at the University of Iowa;
- transfer students who have completed only speech must complete RHET:1040 Writing and Reading at the University of Iowa;
- transfer students who have completed composition I and II or only composition II must complete RHET:1060 Speaking and Reading at the University of Iowa;
- for transfer students who have completed any other course at another institution that may be equivalent to RHET:1030 Rhetoric, the University of Iowa Office of Admissions examines the content of the course and decides on equivalency based on the content of that course, conferring with the Department of Rhetoric on the correct equivalency, if necessary.

## World Languages

GE CLAS Core courses in World Languages provide the practice of important communication skills in a second language as well as the knowledge of the cultures in which the language is spoken. This indepth study allows students to better understand how languages as a whole function, encouraging students to learn more about their own first language, including how it creates both inclusion and diversity. To fulfill the GE CLAS Core requirement in World Languages, students may choose one of the following options:

- complete four years of a single world language in high school; or
- achieve the fourth level of proficiency in a world language by completing the appropriate sequence of courses offered at the University of Iowa; or
- achieve the fourth level of proficiency by completing appropriate courses at another college or university or through approved study abroad courses; or
- achieve an equivalent score on a related Advanced Placement, International Baccalaureate, or other approved college-level examination accepted by the University of Iowa and the College of Liberal Arts and Sciences (see Credit By Exam Options on the Office of Admissions website); or
- earn an equivalent score on both a UI written placement test and on a UI oral proficiency exam in a language taught at the University of Iowa (see World Languages Placement Test (WLPT) on the New Student Services website); or
- earn an equivalent score on a proficiency exam in a language that is not taught at the University of Iowa (see Proficiency Examinations for Languages Not Taught at UI on the College of Liberal Arts and Sciences website).
A fourth level of proficiency is equivalent to the successful completion of an intermediate II language course (or of a secondyear second semester course, for example) as taught at the University of Iowa. Depending on a student's placement test results and the language taken, a student may need to take four semesters of a language, starting with a beginning course and ending with a second semester intermediate course. Other students may be able to start elsewhere in the language sequence and complete the GE World Language requirement by taking two or three courses. See "World Languages Placement Tests" under Placement Tests on the College of Liberal Arts and Sciences website.
Semester hours earned for these courses vary by language. Students should be sure to take the placement test for the language of interest and should be aware of the course sequence required to fulfill the GE requirement in World Languages for that particular language.
Once the World Languages requirement is completed, a student may earn up to an additional 8 s.h. of college credit while studying a world language. See Furthering Language Incentive Program (FLIP) on the College of Liberal Arts and Sciences website.
Students may use the following language course sequences to fulfill the World Languages requirement. To avoid duplication or regression, consult the appropriate language department before registering for courses.

## American Sign Language

Courses in American Sign Language (ASL) are offered by the American Sign Language [p. 48] Program. The following sequence fulfills the GE CLAS Core World Languages requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ASL:1001 | American Sign Language I | 4 |
| ASL:1002 | American Sign Language II | 4 |
| ASL:2001 | American Sign Language III | 4 |
| ASL:2002 | American Sign Language IV | 4 |

Students with previous knowledge of American Sign Language should consult the ASL program for placement.

## Arabic

Courses in Arabic are offered by the Department of French and Italian [p. 472]. The following sequence fulfills the GE CLAS Core World Languages requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ARAB:1001 | Elementary Modern Standard <br> Arabic I | 5 |
| ARAB:1002 | Elementary Modern Standard <br> Arabic II | 5 |
| ARAB:2001 | Intermediate Modern Standard <br> Arabic I | 5 |
| ARAB:2002 | Intermediate Modern Standard <br> Arabic II | 5 |
|  | AR |  |

Students with previous knowledge of Arabic should consult the department for appropriate placement.

## Chinese

Courses in Chinese are offered by the Department of Asian and Slavic Languages and Literatures [p. 141]. For students without previous knowledge of Chinese, the department recommends the following sequence to fulfill the GE CLAS Core World Languages requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CHIN:1111 | First-Year Chinese: First <br> Semester | 5 |
| CHIN:1112 | First-Year Chinese: Second <br> Semester | 5 |
| CHIN:2101 | Second-Year Chinese: First <br> Semester | 5 |
| CHIN:2102 | Second-Year Chinese: Second <br> Semester | 5 |

Students may use varied combinations of Chinese language courses approved to fulfill the GE CLAS Core World Languages requirement. Heritage learners and students who have studied Chinese abroad may be able to fulfill the requirement by substituting CHIN:2103 Accelerated Second-Year Chinese: First Semester and CHIN:2104 Accelerated Second-Year Chinese: Second Semester for CHIN:2101 and CHIN:2102. Consult the department for more information.

## French

Courses in French are offered by the Department of French and Italian [p. 472]. For students without previous knowledge of French, the department recommends the following sequence to fulfill the GE CLAS Core World Languages requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| FREN:1001 | Elementary French I | 5 |
| FREN:1002 | Elementary French II | 5 |
| FREN:2001 | Intermediate French I | 5 |
| FREN:2002 | Intermediate French II | 5 |

Students may use varied combinations of French language courses approved to fulfill the GE CLAS Core World Languages requirement. Those with previous knowledge of French may be able to fulfill the requirement by substituting FREN: 1010 First-Year French Review for FREN:1001 and FREN:1002 in the sequence above. Some students may be evaluated as ready for FREN:2001 or FREN:2002. Consult the department for appropriate placement.

## German

Courses in German are offered by the Department of German [p. 551]. For students without previous knowledge of German, the department recommends the following sequence to fulfill the GE CLAS Core World Languages requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| GRMN:1001 | Elementary German I | 4 |
| GRMN:1002 | Elementary German II | 4 |

| GRMN:2001 | Intermediate German I | 4 |
| :--- | :--- | :--- |
| GRMN:2002 | Intermediate German II | 4 |

Students may use varied combinations of German language courses approved to fulfill the GE CLAS Core World Languages requirement. Those with previous knowledge of German may be able to fulfill the requirement by substituting GRMN: 1010 First-Year German Review for GRMN: 1001 and GRMN:1002 in the sequence above. Some students may be evaluated as ready for GRMN:2001 or GRMN:2002. Consult the department for appropriate placement.
The department also offers GRMN:2020 Intensive Intermediate German, which may be appropriate for students with strong language learning abilities or experience. The intensive course may be combined with other courses to create other sequences that may be used to fulfill the GE CLAS Core World Languages requirement. Consult the department to identify an appropriate course sequence.

## Greek

Courses in Greek are offered by the Department of Classics
[p. 233]. Students without previous knowledge of Greek should fulfill the GE CLAS Core World Languages requirement with the following sequence.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CLSG:1001 | Classical and New Testament <br> Greek I | 5 |
| CLSG:1002 | Classical and New Testament <br> Greek II | 5 |
| CLSG:2001 | Second-Year Greek I | 3 |
| CLSG:2002 | Second-Year Greek II | 3 |

Students with previous knowledge of Greek should consult the department for appropriate placement.

## Italian

Courses in Italian are offered by the Department of French and Italian [p. 472]. Students without previous knowledge of Italian should fulfill the GE CLAS Core World Languages requirement with the following sequence.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ITAL:1101 | Elementary Italian I | 5 |
| ITAL:1102 | Elementary Italian II | 5 |
| ITAL:2203 | Intermediate Italian I | 4 |
| ITAL:2204 | Intermediate Italian II | 4 |
| Students with strong language learning abilities or a background in |  |  |
| another Romance language may be able to complete the requirement |  |  |
| by substituting ITAL:1103 Intensive Elementary Italian for |  |  |
| ITAL:1101 and ITAL:1102 in the sequence above. Consult the |  |  |
| department for appropriate placement. |  |  |

## Japanese

Courses in Japanese are offered by the Department of Asian and Slavic Languages and Literatures [p. 141]. For students without previous knowledge of Japanese, the department recommends the following sequence to fulfill the GE CLAS Core World Languages requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| JPNS:1001 | First-Year Japanese: First | 5 |
| JPNS:1002 | Semester | 5 |
| JPNS:2001 | First-Year Japanese: Second <br> Semester | 5 |
|  | Second-Year Japanese: First <br> Semester | 5 |

Second-Year Japanese: Second Semester

Students may use varied combinations of Japanese language courses approved to fulfill the GE CLAS Core World Languages requirement. Those with previous knowledge of Japanese should consult the department for appropriate placement.

## Korean

Courses in Korean are offered by the Department of Asian and Slavic Languages and Literatures [p. 141]. For students without previous knowledge of Korean, the department recommends the following sequence to fulfill the GE CLAS Core World Languages requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| KORE:1101 | First-Year Korean: First | 4 |
| KORE:1102 | Semester | 4 |
| KORE:2101 | First-Year Korean: Second <br> Semester | 4 |
| KORE:2102 | Second-Year Korean: First <br> Semester | 4 |
|  | Second-Year Korean: Second <br> Semester | 4 |

Students with previous knowledge of Korean should consult the department for appropriate placement.

## Latin

Courses in Latin are offered by the Department of Classics [p. 233]. Students without previous knowledge of Latin should fulfill the GE CLAS Core World Languages requirement with the following sequence. Students must take both CLSL:2001 and CLSL:2002 in order to fulfill the World Languages requirement. These courses require a similar knowledge of Latin, but one focuses on poetry and the other on prose. Other world languages permit a student to complete the last courses in the sequence to meet the GE CLAS Core requirement since the final course is more difficult than the previous ones. This is not true with the Latin sequence, and thus, both courses must be successfully completed.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CLSL:1001 | Elementary Latin I | 5 |
| CLSL:1002 | Elementary Latin II | 5 |
| CLSL:2001 | World of Cicero | 3 |
| CLSL:2002 | Golden Age of Roman Poetry | 3 |

Students with previous knowledge of Latin should consult the department for appropriate placement.

## Portuguese

Courses in Portuguese are offered by the Department of Spanish and Portuguese [p. 1018]. Two sequences in Portuguese are approved to fulfill the GE CLAS Core World Languages requirement. All courses are open to entering first-year students.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PORT:2000 | Accelerated Elementary | 5 |
| PORT:2500 | Portuguese |  |

Students may also substitute PORT:2010 Elementary Portuguese I and PORT:2015 Elementary Portuguese II for PORT:2000 in the sequence above.

Students with previous knowledge of Portuguese should consult the department for appropriate placement.

## 5 Russian

Courses in Russian are offered by the Department of Asian and Slavic Languages and Literatures [p. 141]. Students without previous knowledge of Russian should fulfill the GE CLAS Core World Languages requirement with the following sequence.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| RUSS:1111 | First-Year Russian I | 5 |
| RUSS:1112 | First-Year Russian II | 5 |
| RUSS:2111 | Second-Year Russian I | 4 |
| RUSS:2112 | Second-Year Russian II | 4 |

Students with previous knowledge of Russian should consult the department for appropriate placement.

## Spanish

Courses in Spanish are offered by the Department of Spanish and Portuguese [p. 1018]. For students without previous knowledge of Spanish, the department recommends the following sequence to fulfill the GE CLAS Core World Languages requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| SPAN:1001 | Elementary Spanish I | 4 |
| SPAN:1002 | Elementary Spanish II | 4 |
| SPAN:1501 | Intermediate Spanish I | 4 |
| SPAN:1502 | Intermediate Spanish II | 4 |

Students may use varied combinations of Spanish language courses to fulfill the GE CLAS Core World Languages requirement. Those with previous knowledge of Spanish may be able to fulfill the requirement by substituting SPAN: 1003 Elementary Spanish Review for SPAN: 1001 and SPAN:1002 in the sequence above.
The accelerated course SPAN: 1503 Accelerated Intermediate Spanish, which combines SPAN: 1501 and SPAN:1502, may be appropriate for some students.

The accelerated course SPAN: 1505 Intermediate Spanish for Heritage Speakers may be appropriate for other students.

Students with previous knowledge of Spanish should take the language placement test in Spanish to help determine proper placement.

## Swahili

3 Courses in Swahili are offered by the Department of French and Italian [p. 472]. The following sequence fulfills the GE CLAS Core World Languages requirement. Each of these courses is open to entering first-year students.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| SWAH:1001 | Elementary Swahili I | 4 |
| SWAH:1002 | Elementary Swahili II | 4 |
| SWAH:2001 | Intermediate Swahili I | 4 |
| SWAH:2002 | Intermediate Swahili II | 4 |

Students with previous knowledge of Swahili should consult the department for appropriate placement.

## Other Course Sequences

A student who successfully completes a four-semester world language sequence that has not been approved for the GE CLAS Core may have the sequence substituted for a proficiency test to fulfill the GE CLAS Core requirement.
Students who complete a world language sequence this way should notify the department that offers the sequence; the department will contact Graduation Analysis in the Office of the Registrar, which
will update a student's degree audit to show fulfillment of the World Languages requirement.

## Sustainability

Courses in the Sustainability area focus on identifying concepts and terminology associated with sustainability and systems-thinking, investigating the interconnectedness of human and natural systems, and evaluating how students' own actions affect and are affected by society's ability to meet sustainability goals. Students also investigate institutional and/or cultural processes or natural systems processes.

Sustainability learning outcomes are integrated with the outcomes for another GE CLAS Core area so that one approved course satisfies this requirement without adding semester hours. Students complete this requirement by choosing one of the following courses that have been approved for Sustainability and another GE CLAS Core area.

## Sustainability and Natural Sciences

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EES:1080/ | Introduction to Environmental | $3-4$ |
| ENVS:1080 | Science |  |
| EES:1085/ | Fundamentals of Environmental | 4 |
| ENVS:1085 | Science |  |
| EES:1400 | Natural Disasters | 3 |
| GEOG:1020 | The Global Environment | 3 |
| GEOG:1030 | Our Digital Earth | 3 |

## Sustainability and Social Sciences

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ANTH:2261 | Human Impacts on the <br> Environment | 3 |
| GEOG:2013/ | Introduction to Sustainability | 3 |
| BUS:2013/ |  |  |
| SUST:2013/ |  | 3 |
| URP:2013 | Energy, Sustainability, and |  |
| SOC:1040 | Society |  |
| URP:2020/ | Environment and Society: <br> Sustainability, Policy, and | 3 |
| PBAF:2020 | Politics |  |
| Sustainability | and Historical Perspectives |  |

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EES:1115/ | The History of Oil | 3 |
| ENVS:1115/ |  |  |
| GEOG:1115/ |  |  |
| HIST:1115 |  |  |

Sustainability and International and Global Issues

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| GEOG:1070 | Contemporary Environmental | 3 |
|  | Issues | 3 |
| POLI:1510 | International Politics of | 3 |
|  | Environmental Issues | 3 |

## Sustainability and Literary, Visual, and Performing Arts

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| TDSN:2210 | Introduction to 3D Design | 3 |

## Natural, Quantitative, and Social Sciences

## Natural Sciences

Courses in the Natural Sciences area explore the scope and major concepts of a scientific discipline. Students learn the attitudes and practices of scientific investigators: logic, precision, experimentation, tentativeness, and objectivity. In courses with a laboratory component, students gain experience in the methods of scientific inquiry.

All students must complete at least 7 s.h. of coursework in the Natural Sciences area, including at least one natural science lab component. The following courses are approved for the area; courses with a lab component are noted "(lab)."

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| ANTH:1301 | Human Origins | 3 |
| ASTR:1060/ | Big Ideas: Origins of the | 3 |
| BIOL:1060/EES:1060 | Universe, Earth, and Life |  |
| ASTR:1070 | Stars, Galaxies, and the Universe (with lab 4 s.h.; without lab 3 s.h.) | 3-4 |
| ASTR:1079 | Introductory Astronomy Laboratory (lab only) | 1 |
| ASTR:1080 | Exploration of the Solar System (lab) | 4 |
| ASTR:1085 | Citizen Astronomy | 3 |
| ASTR:1771 | Fundamental Astronomy I: The Solar System and Exoplanets (lab) | 4 |
| ASTR:1772 | Fundamental Astronomy II: Evolution of Stars, Galaxies, and the Universe (lab) | 4 |
| BIOL:1140 | Human Biology: Nonmajors (lab) | 4 |
| BIOL:1141 | Human Biology: Health Professions (lab) | 4 |
| BIOL:1251 | How the Brain Works (and Why it Doesn't) | 3-4 |
| BIOL:1260 | Plants and Human Affairs | 2-3 |
| BIOL:1261 | Introduction to Botany (lab) | 4 |
| BIOL:1370 | Understanding Evolution (formerly Ecology and Evolution) | 3 |
| BIOL:1411 | Foundations of Biology (lab) | 4 |
| BIOL:1412 | Diversity of Form and Function (lab) | 4 |
| BIOL:2120 | Good Genes Gone Bad: Genetic Disorders of Notable Celebrities | 3 |
| CHEM:1050 | Chemistry of Our World | 3 |
| CHEM:1060 | Technology and Society Laboratory (lab only) | 1 |
| CHEM:1070 | General Chemistry I | 3 |
| CHEM:1080 | General Chemistry II | 3 |
| CHEM:1100 | Chemistry in Industry and the Economy | 3 |
| CHEM:1110 | Principles of Chemistry I (lab) | 4 |
| CHEM:1120 | Principles of Chemistry II (lab) | 4 |
| CHEM:1160 | Principles of Chemistry Lab (lab only) | 2 |

| EES:1030/CEE:1030 | Introduction to Earth Science (with lab 4 s.h.; without lab 3 s.h.) | 3-4 |
| :---: | :---: | :---: |
| EES:1031/CEE:1031 | Introduction to Earth Science Laboratory (lab only; students must have previously completed EES:1030/CEE:1030 without the lab) | 1 |
| EES:1040 | Evolution and the History of Life (with lab 4 s.h.; without lab 3 s.h.) | 3-4 |
| EES:1050 | Introduction to Geology (lab) | 4 |
| EES:1070 | Age of Dinosaurs (lab) | 4 |
| EES:1080/ <br> ENVS:1080 | Introduction to Environmental Science (with lab 4 s.h.; without lab 3 s.h.; not for students who have taken EES: 1085 or ENVS:1085) | 3-4 |
| EES:1081/ <br> ENVS:1081 | Introduction to Environmental Sciences Laboratory (lab only) | 1 |
| EES:1085/ <br> ENVS:1085 | Fundamentals of Environmental Science (lab; not for students who have taken EES:1080 or ENVS:1080) | 4 |
| EES:1290 | Energy and the Environment | 3 |
| EES:1400 | Natural Disasters | 3 |
| GEOG:1020 | The Global Environment | 3 |
| GEOG:1021 | The Global Environment Lab (lab only) | 1 |
| HHP: 1100 | Human Anatomy | 3 |
| HHP:1110 | Human Anatomy Laboratory (lab only) | 1 |
| HHP:1300 | Fundamentals of Human Physiology | 3 |
| HHP:1400 | Human Anatomy and Physiology | 3 |
| HHP:2310 | Nutrition and Health | 3 |
| PCOL:2220 | Drug Use and Abuse | 3 |
| PHYS:1200 | Physics of Everyday Experience | 3 |
| PHYS:1400 | Basic Physics (with lab 4 s.h.; without lab 3 s.h.) | 3-4 |
| PHYS:1409 | Basic Physics Lab (lab only) | 1 |
| PHYS:1410 | Physics of Sound (with lab 4 s.h.; without lab 3 s.h.) | 3-4 |
| PHYS:1511 | College Physics I (lab) | 4 |
| PHYS:1512 | College Physics II (lab) | 4 |
| PHYS:1611 | Introductory Physics I (lab) | 4 |
| PHYS:1612 | Introductory Physics II (lab) | 4 |
| PHYS:1619 | Introductory Physics II Lab (lab only) | 1 |
| PHYS:1701 | Physics I (lab) | 4 |
| PHYS:1702 | Physics II (lab) | 4 |

## Quantitative or Formal Reasoning

Courses in the Quantitative or Formal Reasoning area help develop analytical skills through the practice of quantitative or formal symbolic reasoning. Courses focus on presentation and evaluation of evidence and argument; understanding the use and misuse of data; and organization of information in quantitative or other formal symbolic systems, including those used in computer science, linguistics, mathematics, philosophy, and statistics.

3-4 All students must complete at least 3 s.h. of coursework in the Quantitative or Formal Reasoning area. Students also may fulfill this GE CLAS Core requirement by completing a course that lists
courses are approved for the area.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| COMM:1117 | Advocacy and Argument | 3 |
| CPH:1600 | Public Health Science: Inquiry and Investigation in Public Health | 3 |
| CS:1020 | Principles of Computing | 3 |
| CS:1110 | Introduction to Computer Science | 3 |
| CS:1210 | Computer Science I: Fundamentals | 4 |
| GEOG:1030 | Our Digital Earth | 3 |
| LING:1050 | Language and Formal Reasoning | 3 |
| MATH:1020 | Elementary Functions | 4 |
| MATH:1120 | Logic of Arithmetic | 4 |
| MATH:1250 | Mathematics for Arts and Humanities | 3 |
| MATH:1260 | PokeMath: The Mathematics of Pokemon Go | 3 |
| MATH:1340 | Mathematics for Business | 4 |
| MATH:1350 | Quantitative Reasoning for Business | 4 |
| MATH:1380 | Calculus and Matrix Algebra for Business | 4 |
| MATH:1440 | Mathematics for the Biological Sciences | 4 |
| MATH:1460 | Calculus for the Biological Sciences | 4 |
| MATH:1550 | Engineering Mathematics I: Single Variable Calculus | 4 |
| MATH:1850 | Calculus I | 4 |
| PHIL:1636 | Principles of Reasoning: Argument and Debate | 3 |

# African American Studies 

## Chair

- Deborah E. Whaley

Undergraduate major: African American studies (BA)
Undergraduate minor: African American studies
Graduate degree: MA in African American world studies
Graduate certificate: African American studies
Faculty: https://africanamericanstudies.uiowa.edu/people
Website: https://africanamericanstudies.uiowa.edu/
African American studies (AAS) examines the unique experiences of African-descended people throughout the diaspora, drawing on a rich tradition of civic engagement, scholarship, and teaching. The faculty introduce students to the foundations of African American studies and collaborate with them to understand new intellectual perspectives. Courses and research revolve around three core areas of study: history, religion, and the diaspora; literature and performing arts; and media, politics, and society. Within these areas, students carefully consider the construction of race, ethnicity, and identity and the performance of class, gender, and sexuality. Students who take courses in African American studies acquire a special skill set that enables them to critically interrogate their own culture and other cultures in the world around them.

## Cocurricular Activities

## Afro-American Cultural Center

African American studies encourages students to use the AfroAmerican Cultural Center (Afro House). The center serves as a museum housing educational artifacts. Offering enrichment for the University of Iowa and promoting diversity among all members of the Iowa City community, the center also provides a cultural hub for African American students.

## African American Studies Student Association

The African American Studies Student Association aims to promote knowledge about Black life in the United States by hosting speakers, publicizing artistic performances, and sponsoring relevant programs with various campus collaborators. The association is primarily designed for AAS majors and minors; however, any University of Iowa student interested in African American studies is eligible to become a member.

## Seminar and Lecture Series

The African American Studies Seminar Series and the Darwin Turner Lecture bring important scholars and creative artists to the University of Iowa campus. Guests of the lecture and seminar series have included Amiri Baraka, Trudier Harris, Ta-Nehisi Coates, Michelle Wallace, Mary Patillo, J. Lorand Matory, Paul Butler, Gabrielle Forman, and Valerie Smith.

## African American Studies Annual Awards Program

Each spring, the African American Studies Program honors AAS majors and minors, along with exceptional University of Iowa students and organizations. Scholarships are awarded by the Marie Nesbitt Foundation, the African American Studies Program, the National Association of Black Journalists, and the Iowa Black Alumni Association. Awards are offered that recognize student efforts in community service, leadership, creative arts, graduate research, cultural appreciation, and academic achievement.

## Graduate Student Mentoring and Advising

The African American Studies Program sponsors several intellectual and social gatherings for graduate students across multiple disciplines. During these events, the Society of Black Graduate and Professional Students (BGAPS) and other graduate students connect with others interested in African American studies and receive advice about becoming faculty members, being productive members of the academic profession, and career options outside of academia.

## Iowa Black Alumni Association

The Iowa Black Alumni Association (IBAA) promotes the general mission of the University of Iowa. The group enhances the career connections of prospective, current, and former Black University of Iowa students. It also recognizes these individuals for their service. The IBAA also supports the African American Studies Program in various ways, such as with fundraising and the advisory board.

## Programs

## Undergraduate Programs of Study

## Major

- Major in African American Studies (Bachelor of Arts) [p. 35]

## Minor

- Minor in African American Studies [p. 39]

Graduate Programs of Study
Major

- Master of Arts in African American World Studies

The African American Studies Program is not accepting graduate students at this time.

## Certificate

- Certificate in African American Studies [p. 41]

## Courses

## African American Studies Courses

## AFAM:1000 First-Year Seminar

1 s.h.
Small discussion class; topics chosen by instructor. Requirements: first-year standing.
AFAM:1020 Introduction to African American Culture 3 s.h. Examination of Black cultural experiences in the United States and the African diaspora; focus on literature, music, film, comics, anime, popular culture, and visual/performing arts. GE: Diversity and Inclusion. Same as AMST:1030.

AFAM:1030 Introduction to African American Society 3 s.h. Examination of Black social and historical institutions in the United States and the African diaspora; focus on education, sports, political science, religion, health, criminal justice, history, sociology, and other disciplines. GE: Diversity and Inclusion.

## AFAM:1041 African American Religion and Popular

 Culture
## 3 s.h.

Examination of the role African American religions play in shaping 20th century and contemporary popular culture in the United States; students explore recent histories of Black Christianity, American Islam, and African diaspora religions; gender and race; cultural production in hip hop, jazz, rhythm and blues, literature, poetry, film, sports, cuisine, visual art, and style. Same as RELS:1041.

## AFAM: 1130 The History of African American Film 3 s.h.

History of African American cinema; examination of various cycles of Black movie fare between 1912-1999. GE: Diversity and Inclusion.

AFAM:1140 Introduction to African American Art 3 s.h. Introduction to African American art in the United States; exploration of major art events (i.e., Harlem Renaissance, Black Arts Movement); study of specific African American artists and their work; influence of race on artistic expression. Same as ARTS:1140.

## AFAM:1240 The Art of Listening to Jazz

3 s.h.
What is jazz and its importance; guided introduction to jazz music, anatomy of jazz music, cultural context; development of skills to become an informed listener; process of performing jazz music, its connection with Black culture; focused listening/analysis of prominent jazz artists' work from past and present, including intersection between jazz and hip hop; formal music experience or training not required. GE: Literary, Visual, and Performing Arts. Same as MUS:1740.

AFAM:1241 The Soundtrack of Black America 3 s.h.
Linkage of African American culture and music; Black musical innovations that shaped mainstream American musical tastes over the last century; exploration of relationship between Black music and culture; examples of blues, jazz, gospel, hip hop; artists including Bessie Smith (blues), Mahalia Jackson (gospel), Miles Davis (jazz), Nas and Talib Kweli (hip hop). GE: Diversity and Inclusion. Same as MUS:1741.

AFAM:1250 Introduction to African American Religions GE: Values and Culture. Same as RELS:1350.

AFAM:1900 Diverse Topics in African American Studies 3 s.h. Examination of African American experience based on a range of topics covering history and contemporary themes; significant contributions by African Americans to American society and around the world in the arts, literature, politics, music, religion, science, and other areas; evolution of African American culture and critical evaluation of issues, including intersectionality and inequality within specific subjects; social, cultural, and historical resources that challenge assumptions and biases when it comes to racial backgrounds and perspectives; key elements within each selected environment, along with meaningful events and individuals.

## AFAM:2064 African American Families: Urban and Suburban

Racial inequality and experiences of African American families in the United States during the 20th and 21st centuries; historical context for contemporary research on African American family; relative impact of structural and cultural factors on various aspects of African American family life, declining marriage rates, family formation patterns; intersections of race and class in family life; research methods used to examine dynamics of African American family life, including quantitative analysis, structured qualitative interviews, and ethnography. GE: Diversity and Inclusion. Same as SOC:2064.

## AFAM:2070 Black Television Culture

3 s.h.
Social and political impact of television dramas featuring people of African descent in the West; examination of production, reception, representation, and industry as it relates to the African American images that are granted tenure on television screens. GE: Diversity and Inclusion. Same as COMM:2069.
AFAM:2072 African American Popular Culture 3 s.h. Examination of global popularity and impact of African American popular culture. Same as COMM:2072.

AFAM:2076 Race, Ethnicity, and Media 3 s.h. Introduction to debates about media portrayals of race and ethnicity; focus primarily on entertainment media; use of general analytic perspectives (stereotype analysis, aesthetic analysis, history) applied to real-world examples; address one or more racial/ethnic groups in the United States. Same as COMM:2076.

AFAM:2079 Race and Ethnicity in Sport
Structural and ideological barriers to racial and ethnic equality in sport, with focus on African American sport experiences; historical and contemporary issues, media representations. Same as SPST:2079.
AFAM:2266 Civil War and Emancipation 3 s.h.
160 years later, what can we learn about American history from studying a war that both killed and liberated an unprecedented number of people? Why did it take a war to end slavery? How did emancipation occur and how did enslaved people accelerate the destruction of U.S. slavery during the war? Same as HIST:2266.

AFAM:2267 African American History to 1877: From Slave Cabin to Senate Floor 3 s.h. Experiences of African and African American people in the American colonies and the states of the new nation; history of Africans and African Americans as early settlers, enslaved and free, in places such as Detroit, Chicago, New York, and New Orleans; interactions with Indigenous people; role in the war for American independence; long history of resistance to slavery and racial discrimination; exploration of the rich history of community building, creation of significant Black social and cultural institutions, and formation of Black political thought and political activism. GE: Diversity and Inclusion. Same as HIST:2267.

AFAM:2268 African American History Since the Civil War 3 s.h. Exploration of racial oppression of African Americans and multiracial struggles against that oppression since the Civil War era; students examine the history of racism at individualized and systematic levels; historical efforts made by individuals and collective movements in service of the long Black freedom struggle; and the ways these twinned histories have shaped modern America. GE: Diversity and Inclusion. Same as HIST:2268.
AFAM:2463 Topics in African American Literature 3 s.h. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th/21st-Century
Literature. English and Creative Writing majors may apply this course to the Multiethnic American Literature and Culture requirement. Same as ENGL:2463.
AFAM:2465 Selected African American Authors 3 s.h. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th/21st-Century Literature. English and Creative Writing majors may apply this course to the Multiethnic American Literature and Culture requirement. Same as ENGL:2465.

AFAM:2500 Black Culture and Experience: Contemporary Issues
Exploration of various contemporary social topics (e.g., education, religion, literature, theater, media, politics, sports, criminal justice, health, economics); use of readings, interactive experiences, course assignments (reading essays, interview/profile, observation analysis, case study, final paper), and unit quizzes to understand Black life in the 21 st century. GE: Diversity and Inclusion.

## AFAM:2700 The Black Image in Sequential Art: Comics, Graphic

 Novels, and Anime3 s.h.
Provides a foundation to critically interpret the representation of people of African descent in sequential art; primary focus on serial comic strips, gags, comic books, graphic novels, video games, animation, anime, Manga, film, zines, and televisual examples of Blackness; emphasis of readings and viewing materials on gender, sexualities, economics, ethnicity, the transnational circulation and commodification of the Black image, fandom communities, independent and mainstream sequential art producers. Same as AMST:2700.

AFAM:2770 Black and White Community Politics 3 s.h.
Students study the movement for environmental justice within the broader context of U.S. land use and development to understand environmental racism's prevalence and how it can be addressed; topics include pollution, health, food access, transportation and agricultural practice to land loss, public space, and infrastructure; exploration of perspectives on the environment and environmentalism. Same as GHS:2770, SOC:2770.

## AFAM:2800 African American Women, Health, Hair, and Sexuality

From the exotic to the erotic, African American women's bodies have been constructed to fulfill a variety of personal and cultural fantasies as well as social functions that are "killing us softly"; how cultural icons and myths of Black women-Jezebel, Mammy, Tragic Mulatto, Aunt Jemima, Sapphire, Matriarch, Welfare Queen, and more recently, the overachieving Black woman-shape and create restrictions and visions of the self that contribute to health disparities; engaging Black feminist/womanist theory to explore how larger images influence everyday acts of self-care and pleasure, such as hair and sexuality, on the health of African American women. Same as GWSS:2800.
AFAM:3053 The Civil Rights Movement
3 s.h.
History of the American civil rights movement. Same as AMST:3053, HIST:3253.

## AFAM:3100 Critical Race Theory: Culture, Power, and

 SocietyExamination of the historical context of race and racism in U.S. history; focus on how social structures perpetuate longstanding patterns of racial inequality. Same as AMST:3100, SOC:3100.

## AFAM:3110 Race, Organizations, and Workplace

Examination of racial discrimination in the American workplace and organizations; historical context for development of complex organizations; various forms of racial discrimination; longstanding patterns of racial inequality central to American organizations. Same as SOC:3110.
AFAM:3245 Twentieth- and Twenty-first-Century African American Religion: Civil Rights to Black Lives Matter 3 s.h. Twentieth- and twenty-first-century African American religious history; major political and cultural movements including civil rights, Black power, Black feminism/womanism, hip hop, and Black Lives Matter; their impact on Black Christianity and Islam in the United States. Same as RELS:3745.

AFAM:3256 The Great Migration(s) in the Midwest 3 s.h. Investigation of African American migration to and within the Midwest; first and second Great Migrations (1910-1940, 1940-1970); focus on reaction to and social, cultural, political, and economic impact of newcomers arrival; class time devoted to actual practice of historical research; students work on a collaborative project focused on the history of racial discrimination, housing segregation, and resistance to that oppression in Iowa's six metropolitan areas. Same as HIST:3256.

## AFAM:3257 Civil Rights and Racial Justice: A Tour Through the South 1-3 s.h.

Exploration of the history of modern civil rights movement through lectures, shared readings, videos, and discussion; includes preparation and two-week tour of civil rights sites in the South. Prerequisites: SJUS:1001 or SJUS:2250 or GWSS:1002 or CCCC:2220 or AFAM:1030 or AFAM:2268 or HIST:2268 or AFAM:3053 or AMST:3053 or HIST:3253 or HIST:3232 or HIST:4260 or AFAM:3100 or HIST:3160 or HIST:3260 or AFAM:3260 or HIST:3282 or GWSS:3282 or HIST:4130 or HIST:4260. Same as GWSS:3257, HIST:3257, SJUS:3257.

AFAM:3260 Violence in Black America
3 s.h.
Examination of violence-physical, structural, gendered, and psychological—and its impact of shaping Black American experience through resistance, cultural production, and community development. Same as HIST:3260.

## AFAM:3262 The Black Midwest: History, Literature, and

 CultureExploration of history, culture, and art of the Black Midwest using literature and scholarly readings, poems, music, and film; modern issues impacting Black Midwesterners; cultural, social, and political contributions of Black Midwesterners to the region and nation. Same as HIST:3262.
AFAM:3275 History of Slavery in the U.S.A. 3-4 s.h.
Beginning, expansion, and ending of American slavery; how our national memory of slavery in popular culture (in high school history, in historical landmarks and museums) helps or hinders our understanding of history of slavery in the U.S. Same as HIST:3275.

AFAM:3459 African American Literature Before 1900 3 s.h. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th/19th-Century Literature. English and Creative Writing majors may apply this course to the Multiethnic American Literature and Culture requirement. Same as ENGL:3459.

AFAM:3460 African American Literature After $1900 \quad 3$ s.h. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th/21st-Century Literature. English majors may apply this course to the Multiethnic American Literature and Culture requirement. Same as ENGL:3460.

## AFAM:3461 Twenty-First Century African American

## Literature

3 s.h.
African American literature from 20th- and 21st-century writers; African American experience(s) of race, sexuality, gender, class, and privilege in contemporary era; various ways poets, rappers, authors tackle these themes within literary forms (i.e., fiction, creative nonfiction, autobiography, poems, songs); societal structures of power. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th/21st-Century Literature. English majors and English and Creative Writing majors may apply this course to the Multiethnic American Literature and Culture requirement. Same as ENGL:3461.
AFAM:3462 African American Drama
3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: Varies by semester. English and Creative Writing majors may apply this course to the Multiethnic American Literature and Culture requirement. Same as ENGL:3462, THTR:3462.

AFAM:3465 African American Autobiography
3 s.h. AFAM:4910 Special Topics
3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th/21st-Century Literature. English and Creative Writing majors may apply this course to the Multiethnic American Literature and Culture requirement. Same as ENGL:3465.
AFAM:3500 Malcolm X, King, and Human Rights 3 s.h. Religion and politics of Malcolm X and Martin Luther King, Jr. in the context of U.S. civil rights and international human rights in West Africa and the Muslim world; emphasis on civil rights connections to Gandhi, the Nobel Peace prize, and other international experiences that have impacted Pan Africanists, such as Stokely Carmichael, who worked on human rights. Recommendations: international studies major or undergraduate standing. Same as HIST:3160, RELS:3808.

## AFAM:3550 African Literature

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature. Same as ENGL:3550.

AFAM:3555 Topics in African Cinema 3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature. Same as ENGL:3555.

## AFAM:3600 Digitizing Blackness

Examination of Black cultural experiences in digital spheres, including digital humanities and new information technologies; focus on Afrofuturism, gaming, augmented reality, digital mapping, podcasting, social media, and digital cultures; exposure to digital tools and methods. Same as AMST:3600.

## AFAM:3630 The Racial Wealth Gap: Black Debt, White

 Debt3 s.h.
Exploration of extent, historical origins, and contemporary factors of the racial wealth gap with special attention to role of debt in U.S. race relations; potential topics include education debt, monetary sanctions in criminal justice, redlining, recession, bankruptcy, and reparations. Same as SOC:3630.
AFAM:3758 The Ancient African Past
3 s.h.
Africa to 1880; oral tradition and other sources; political development, ecological change, slavery and slave trade. Same as HIST:3758.
AFAM:3760 The Making of Modern Africa
Africa in colonial and postcolonial period; economics, political structures of colonialism; social change, political life in the 20th century. Same as HIST:3760.

## AFAM:3900 Topics in African American Studies

 Different topic each semester.AFAM:3925 African Americans and the Media 3 s.h.
Exploration of the theoretical notion of racialism in various genres of mass communication (i.e., music, print media, television/cable, film, social media); analysis and discussion of contemporary images and messages in media related to African American culture with close attention to impact of stereotypes, historical myths, stigmas, problematic representations, biased framing, and traditional racism. Same as JMC:3165.
AFAM:4770 Environmental Justice 3 s.h.
Introduction to the field of environmental justice; understanding and addressing the processes that lead poor and marginalized communities to face a disproportionate degree of environmental risks and hazards. Same as GEOG:4770, GHS:4770.

Selected topics, issues, and debates about various components of African American culture including literature, sociology, psychology, media, history, rhetoric, theater, sports, health, and education.
AFAM:4980 Independent Study
arr.
Topics vary.
AFAM:4990 Honors Project
arr.
Independent research and writing on interdisciplinary topic.
AFAM:5900 Advanced Readings in African American Studies: Historic and Contemporary Debates
arr.
Weekly readings and discussions of scholarly book chapters and articles related to key topics; students synthesize, debate, and critically evaluate all course material; topic areas include African American history, culture, politics, Black feminist criticism, critical race theory, intersectionality, and more; introduction to current research of African American studies faculty members; for students interested in conducting research about African American culture.
AFAM:6500 Critical Readings in Cultural Studies: Stuart Hall's Legacy and Influences 3 s.h. Exploration of the scholarship of Stuart Hall along with theories, methods, and history of cultural studies; focus on major areas of Hall's work including Marxist thought and the political economy, diasporas and globalization, cultural production and popular culture, film and cinema studies, race, ethnicity, identity, and differánce; key theorists that influenced Stuart Hall (e.g., Marx, Foucault, Fanon, Gramsci, Althusser) and scholars in cultural studies that have made appropriate use of Hall's writings and theories in their own work; role of theory in everyday life and the critical role of public intellectuals. Same as AMST:6500, ENGL:6050.
AFAM:6580 Seminar: Religion and Society
3 s.h.
Same as RELS:6580.
AFAM:6635 Crossing Borders Seminar
2-3 s.h.
Taught in English. Same as ANTH:6635, COMM:6635, ENGL:6635, FREN:6142, GEOG:6635, GRMN:6635, HIST:6135, IWP:6635, POLI:6635, SPAN:6904.
AFAM:7205 New Histories: U.S. Slavery arr.
Our approach to study of slavery and discipline of history have been upended by recent works by and about women; exploration of that scholarship and consideration of where it takes us in grappling with systems and subjectivity of slavery. Same as GWSS:7205, HIST:7205.
AFAM:7210 The Long Civil Rights Movement
Exploration of the history and historiography of the modern Black freedom struggle in the United States, with particular attention to how historians in recent years have reconsidered traditional framings of that struggle's chronology, geography, gender politics, political aspirations, and achievements. Same as HIST:7210.
AFAM:7214 Readings: African American Women's History arr. Same as GWSS:7214, HIST:7214.

AFAM:7710 Seminar: Interpreting Oral Histories arr. Interpretations and methods applied by historians in various world regions to different forms of oral history, from old oral traditions to contemporary autobiographical testimony. Same as HIST:7710.

## African American Studies, BA

## Learning Outcomes

Students will:

- understand basic facts, principles, key figures, and events related to African American experience in American society, plus recognize the significant contributions of African Americans in the United States and abroad;
- become familiar with the foundations of the discipline of African American studies and the development of the field, specifically conceptual ideas that shape the academic study of African American life;
- acquire the tools for contextualizing and understanding the intersectionality of race, class, gender, and/or sexual orientation in an effort to identify relevant challenges and solve human problems related to the African American community;
- learn to critically analyze cultural issues shaping the lives and conditions of African Americans through curriculum, community service, and service learning as they confirm the value of diversity in the 21st century; and
- be prepared for potential careers or postbaccalaureate work in African American studies and related fields through the development of skills in critical thinking, oral and written communication, and research.

## Requirements

The Bachelor of Arts with a major in African American studies requires a minimum of 120 s.h., including at least 30 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. Transfer credit is evaluated individually and is limited to a maximum of $9 \mathrm{~s} . \mathrm{h}$.

The BA with a major in African American studies requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Introductory Courses | 6 |
| African American Studies Core | 18 |
| Electives | 6 |

## Introductory Courses

Students are required to complete the following introductory courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| AFAM:1020/ | Introduction to African | 3 |
| AMST:1030 | American Culture |  |
| AFAM:1030 | Introduction to African | 3 |

Introduction to African American Culture (AFAM:1020) examines the evolution of cultural experiences and developments in the United States and the African diaspora (e.g. the Harlem Renaissance, graphic novels, blues, hip hop, soul, and gospel). The course includes readings in literature, music, film, comics, anime, popular culture events, plus the visual and performing arts.
Introduction to African American Society (AFAM:1030) examines the construction of social and historical institutions in the United States and the African diaspora (e.g., Black church, Black family, Black traditions, and social movements). The course includes readings in education, sports, political science, religion, health, criminal justice, history, sociology, and other disciplines.

## African American Studies Core

In addition to the two required introductory courses, all students must complete at least two courses from each of the three topical areas below (minimum of 18 s.h.). Other courses may be approved for the topical areas; consult with an African American studies advisor.

## History, Religion, and the Diaspora

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Two of these: |  |  |
| AFAM:1041/ RELS:1041 | African American Religion and Popular Culture | 3 |
| AFAM:1250/ <br> RELS:1350 | Introduction to African American Religions | 3 |
| AFAM:1900 | Diverse Topics in African American Studies (when topic is history, religion, or the diaspora) | 3 |
| AFAM:2266/ HIST:2266 | Civil War and Emancipation | 3 |
| AFAM:2267/ HIST:2267 | African American History to 1877: From Slave Cabin to Senate Floor | 3 |
| AFAM:2268/ HIST:2268 | African American History Since the Civil War | 3 |
| AFAM:2500 | Black Culture and Experience: Contemporary Issues (when topic is history, religion, or the diaspora) | 3 |
| AFAM:3245/ <br> RELS:3745 | Twentieth- and Twenty-firstCentury African American Religion: Civil Rights to Black Lives Matter | 3 |
| AFAM:3260/ HIST:3260 | Violence in Black America | 3 |
| AFAM:3262/ <br> HIST:3262 | The Black Midwest: History, Literature, and Culture | 3 |
| AFAM:3275/ HIST:3275 | History of Slavery in the U.S.A. | 3-4 |
| AFAM:3555/ ENGL:3555 | Topics in African Cinema | 3 |
| AFAM:3758/ HIST:3758 | The Ancient African Past | 3 |
| AFAM:3760/ HIST:3760 | The Making of Modern Africa | 3 |
| AFAM:3900 | Topics in African American Studies (when topic is history, religion, or the diaspora) | arr. |
| AFAM:7205/ <br> GWSS:7205/ <br> HIST:7205 | New Histories: U.S. Slavery | arr. |
| EPLS:5126 | Twentieth-Century Educational Movements | 2-3 |

## Literature and Performing Arts

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: | The History of African | 3 |
| AFAM:1130 | American Film | 3 |
| AFAM:1140/ | Introduction to African | 3 |
| ARTS:1140 | American Art | 3 |

| AFAM:1241/ MUS:1741 | The Soundtrack of Black America | 3 |

| AFAM:3900 | Topics in African American Studies (when topic is media, politics, or social institutions) | arr. |
| AFAM:3925/ JMC:3165 | African Americans and the Media | 3 |
| AFAM:4770/ | Environmental Justice | 3 |

GHS:4770

## Electives

Students also must take two elective courses (minimum of 6 s.h.) selected from the three topical areas listed above. One of the two elective courses may be substituted with AFAM:4980 Independent Study or AFAM:4990 Honors Project. With the approval of an African American studies advisor, students may also substitute relevant courses offered by other departments for one or both electives; the substituted courses may not be cross-referenced with African American studies. Students must gain the advisor's approval before enrolling in a substitute course.

| Course \# Title | Hours |
| :--- | ---: |
| Two electives selected from the three topical areas | 6 |
| above, or approved substitutes |  |

## Language Requirement

The language requirement for the African American studies major is the same as the World Languages requirement of the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. Students are encouraged, but not required, to take African language courses (Swahili is currently offered) or Spanish language courses to fulfill the World Languages requirement.

## Honors

## Honors in the Major

Students majoring in African American studies have the opportunity to graduate with honors in the major. Honors in the major offers students the opportunity to pursue special interests and individual indepth research.

Honors students must complete all required coursework for the major while maintaining a University of Iowa grade-point average (GPA) of at least 3.33 and a GPA of at least 3.33 for courses in the major (30 s.h.). Students must register for up to 6 s.h. of AFAM: 4990 Honors Project, which enhances a student's ability to complete honors projects under the guidance of the supervising faculty member. Students enroll in AFAM:4990 with the approval of an African American studies faculty member, who will supervise the course. They may count up to 6 s.h. earned in AFAM:4990 toward the 30 s.h. required for the major.

Under the guidance of the African American studies faculty member, an honors student defines a research project (thesis) using primary, secondary, or archival sources. Students submit a project proposal by the end of their junior year. They complete a thesis under the guidance of a supervising faculty member and present the results as a senior essay to a committee of three, including the supervising African American studies faculty member, one other African American studies faculty member, and the African American studies chair. A student's
committee may choose to hear an oral defense of the honors thesis, usually during the student's last semester.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the African American studies major.

## Career Advancement

The African American studies major provides valuable background for careers in a diverse society, in areas such as community work, public school teaching, religion, government, political science, and law. Some graduates go on to advanced study, many preparing for work as teachers and administrators at colleges and universities.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.
During the first year of study, students should focus on completing the GE CLAS Core [p. 19], perhaps including Swahili or Spanish coursework to begin satisfying the World Languages requirement.

Before the fifth semester begins: at least three courses in the major, including AFAM:1020 Introduction to African American Culture and AFAM:1030 Introduction to African American Society.
Before the seventh semester begins: at least seven courses in the major and at least 90 s.h. earned toward the degree.
Before the eighth semester begins: at least nine courses in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues Literary, Visual, and Performing Arts; or Values and Culture.
b Fulfills a major requirement and may fulfill a GE requirement.
c GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
d Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
e Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
f Students are required to complete $6 \mathrm{~s} . \mathrm{h}$. in electives selected from the three topical areas. With the approval of an African American studies advisor, students may substitute relevant courses offered by other departments for one or both electives.
g Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## African American Studies, Minor

## Requirements

The minor in African American studies requires a minimum of 15 s.h., including 12 s.h. taken at the University of Iowa. At least two of the African American studies core courses must be taken at the University of Iowa. Students must maintain a cumulative gradepoint average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass. Coursework completed for another major or minor may not be counted toward the minor in African American studies.

The minor must include the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Introductory Courses | 6 |
| African American Studies Core | 9 |

## Introductory Courses

Students are required to complete the following introductory courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: |  | 3 |
| AFAM:1020/ | Introduction to African |  |
| AMST:1030 | American Culture | 3 |
| AFAM:1030 | Introduction to African | American Society |

## African American Studies Core

Students must complete one course from each of the three topical areas below ( 9 s.h.), with at least two courses taken at the University of Iowa.

## History, Religion, and the Diaspora

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| One of these: |  |  |
| AFAM:1041/ RELS:1041 | African American Religion and Popular Culture | 3 |

# African American Studies, Graduate Certificate 

## Requirements

The graduate Certificate in African American Studies requires a least 12 s.h. of credit. Students must maintain a grade-point average of at least 2.75 in work for the certificate. With civil and corporate work environments taking a distinct interest in the diversity of people, training, and ideas within their respective environments, the certificate provides a means of formally acknowledging cultural and intellectual understanding that is being sought by potential employers.
Students must be enrolled in a graduate degree program of study to earn the certificate. They meet yearly with the certificate advisor to plan their certificate coursework.

The Certificate in African American Studies requires the following work.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| AFAM:5900 | Advanced Readings in African | 3 |
|  | American Studies: Historic and <br> Contemporary Debates |  |
|  |  |  |

Three courses (3 s.h. each) related to African American studies numbered 3000 or above; at least 6 s.h. of these must be taken in a department other than a student's primary area of study (consult advisor)

## Admission

Doctor of Philosophy students are encouraged to apply for the certificate program in their first year of graduate study, and students earning their master's degree in their first semester. Students then have sufficient time to select coursework in an area of African American studies that is most appealing to them. Applicants must have a gradepoint average of at least 2.75 at the time of application.

Applicants who have taken courses that may apply toward the certificate can review a list of acceptable coursework on the Graduate Certificate in African American Studies web page. They should note the courses that may apply toward the certificate on their certificate application in addition to a written justification, or they may meet with the African American studies director of graduate studies as soon as possible to begin the consideration process.

Admission to the certificate program is determined by application. Applications are reviewed by the African American Studies graduate steering committee twice each year. Applications should be received no later than Oct. 15 for spring entry; March 15 for summer or fall entry.

For more information on formal application to the certificate program, contact the African American Studies director of graduate studies or visit Graduate Programs on the African American Studies website.

# Aging and Longevity Studies 

Interim Director, School of Social Work

- Miriam J. Landsman

Coordinator, Aging and Longevity Studies

- Nadia G. Sabbagh Steinberg

Undergraduate minor: aging and longevity studies
Undergraduate certificate: aging and longevity studies
Graduate certificate: aging and longevity studies
Faculty: https://socialwork.uiowa.edu/people
Website: https://socialwork.uiowa.edu/
Aging and Longevity Studies offers undergraduate and graduate programs and a selection of courses open to students in all majors.
Undergraduate students in the College of Liberal Arts and Sciences who would like to focus on aging and longevity studies as their major or as a second major should consider the individualized plan of study track offered by the Interdepartmental Studies Program; see Interdepartmental Studies [p. 656] in the catalog. Entry into the program requires approval of a plan of study.

Undergraduate students working on a Bachelor of Arts degree in the School of Social Work have the option to use some aging-related coursework as an area of focus in their major. Graduate students earning a Master of Social Work degree can declare gerontology/aging as an area of focus by completing coursework in aging. For more information, contact the School of Social Work.

Aging and Longevity Studies is administered by the School of Social Work [p. 977].

## Graduate Program of Study

## Certificate

- Certificate in Aging and Longevity Studies [p. 47]

## Career Advancement

The Aging and Longevity Studies Program minor or undergraduate or graduate certificate is an important asset for employment in any field. Working with an aging population and the issues affecting them will be increasingly important as the population of older adults also rises.
Among the organizations that have hired University of Iowa students and alumni are assisted living centers, retirement communities, senior centers, long-term care organizations, hospice centers, elder services, state government, businesses, advocacy organizations, and athletic clubs.

Areas of employment for individuals with specializations in aging and longevity studies include the following.

- State and local government agencies: State Department on Aging and Area Agency on Aging. All departments will be affected by population aging, even if they do not specialize in working with older adults, such as transportation, energy, housing, human services, small business supports, and veterans services, among others.
- Nonprofit organizations: senior centers; the American Association of Retired Persons (national, regional, and state offices); Exploritas/Elderhostels (travel options for older adults).
- Social service organizations: Meals on Wheels, congregate meal sites, heating assistance programs, and transportation.
- Private corporations: human resources departments.

## Courses

## Aging and Longevity Studies Courses

## ASP:1000 First-Year Seminar

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
ASP:1800 Aging Matters: Introduction to Gerontology 3 s.h.
Overview of the field of gerontology from a bio-psycho-social framework; how the human body and brain age, effects of these biological changes on physical and cognitive functions, and interaction of these individual factors with societal contexts; broad perspective to give students a foundation in gerontology, paving the way for more advanced courses in biology of aging, psychology of aging, and global aging; for students from a wide range of disciplines and levels, no prior knowledge of aging required. GE: Social Sciences. Same as CSD:1800, NURS:1800, SSW:1800, TR:1800.
ASP:2000 Big Ideas: Creativity for a Lifetime $\mathbf{3}$ s.h.
Exploration of what senior artists can teach about creativity and aging; interdisciplinary project-based collaborative learning opportunities that consider role of arts and creativity across a lifespan; essential skills necessary to be professionals in numerous careers including health, social work, education, humanities, and the arts; identification of ways for students to be more creative in their own lives and work. GE: Values and Culture. Same as ARTS:2000, EDTL:2000, RHET:2000.
ASP:2181 The Anthropology of Aging 3 s.h.
Comparative anthropological perspective on aging; ethnographies from diverse contexts used to examine intersections of kinship, religion, health, and medicine in later life. Same as ANTH:2181, GHS:2181.

ASP:2265 Hard Cases in Healthcare at the End of Life 3 s.h.
Preparation for future healthcare providers to make difficult ethical decisions regarding the end of life; interactive course. Same as GHS:2265, RELS:2265.

ASP:3135 Global Aging 3 s.h.
Demographic factors that contribute to the worldwide phenomena of population aging in context of WHO Active Aging and the United Nation's Principles for Older Persons frameworks. Same as GHS:3050, SSW:3135.

ASP:3150 Psychology of Aging
3 s.h.
The later years of human life viewed from perspectives of developmental psychology, biology, sociology.

## ASP:3151 The Anthropology of the Beginnings and Ends of

 Life3 s.h.
Examination of diverse understandings of birth and death, drawing on anthropological analysis of personhood, kinship, ritual, and medicine; how social inequality and new technologies shape human experience at life's margins. Prerequisites: ANTH:1101 or ANTH:2100. Same as ANTH:3151, GHS:3151.
ASP:3152 Anthropology of Caregiving and Health 3 s.h. Diverse understandings and practices of care around the world; focus on relationships between caregiving practices and health across the life course. Same as ANTH:3152, GHS:3152.

## ASP:3160 Biology of Aging

3 s.h.
Biogerontology; definition of aging and senescence, biological theories of aging, demographics, model systems foraging, premature aging syndromes, aging of organ systems in humans.

## ASP:3170 Health and Aging

3 s.h.
Lifespan approach to understanding human biological development with emphasis on the experience of older adulthood and health; key concepts and how they are measured, including health promotion, wellness, and optimal aging. Recommendations: ASP:1800.

## ASP:3400 Film, Media, and Aging

Examination of trends in the way that aging and older adulthood are portrayed in film and other media.
ASP:3519 Politics of Aging
Core concepts and methods related to aging and policies that address the needs of older persons; demographic measures of population health and aging, including incidence and distribution of specific conditions relevant in older age; theories of public policy and involvement of older persons in the political process; key historical and current policies, at both the federal and state/local levels, that influence service provision and the well-being of older persons in the United States. Same as POLI:3519.
ASP:3740 End-of-Life Care for Adults and Families 3 s.h.
End-of-life issues in care of adults, older adults, and their families.
Same as MED:3740, NURS:3740.
ASP:3786 Death/Dying: Issues Across the Life Span 3-4 s.h. Introduction to the field of end-of-life care; examination of student concerns about death, dying, and grieving process; historical, cultural, societal, and personal perspectives of death and dying in modern society. Same as SSW:3786.

## ASP:3900 Independent Study in Gerontology

arr.
Individual projects and/or research.
ASP:3920 Service Learning in Aging Studies 1-3 s.h.
Experiential learning in settings with older adults. Corequisites:
ASP:1800, if not taken as a prerequisite.
ASP:4165 Communication Disorders and Aging 1-2 s.h.
Introduction to speech, language, and hearing processes and disorders among older adults; survey of characteristics of communication and communication breakdown, remediation, and strategies for improving communication with older adults with communication disorders; primarily for majors and other health care service providers. Same as CSD:4165.

## ASP:4190 Aging Studies Internship and Seminar 3 s.h. <br> Opportunities for students in various disciplines to relate their areas

 of study to older adults and aging; interdisciplinary relationships, approaches to meeting needs of older adults; an online seminar that meets regularly is included in this experience. Same as SSW:4190.
## ASP:4470 Physiology of Aging

Aging's effects on cells, tissues, and organs; how aging influences function of major body organ systems and the whole organism; physiological mechanisms that underlie age\#related changes in body function and performance; integrative approach with focus on human aging. Prerequisites: HHP:3500 or HHP:3550. Same as HHP:4470.

ASP:5401 The Care of the Frail Elderly
3 s.h.
Clinical management of the elderly; emphasis on economic considerations, principles of gerontological care, common syndromes, ethical issues; clinical application experience in a long-term care setting. Prerequisites: NURS:5035. Corequisites: NURS:6200 and NURS:6701. Same as NURS:5401.

ASP:5750 Medicare and Medicaid Policy 3 s.h.
Health policies most pertinent to Americans over age of 65. Same as HMP:5750.

ASP:6000 Graduate Gerontology Capstone 3 s.h.
Review of core concepts as identified by the Academy for Gerontology in Higher Education (AGHE) in the form of core competencies; students engage in discussions related to gerontological ethical issues at individual, family, and societal levels; receive guidance in developing and writing a major research paper relevant to their field; and engage in discussions related to uses of their gerontological knowledge in terms of looking for a job or pursuing further education.

## Aging and Longevity Studies, Minor

## Requirements

The undergraduate minor in aging and longevity studies requires a minimum of 15 s.h. in aging-related coursework. Students must maintain a grade-point average of at least 2.00 in all courses for the minor. Coursework in the minor may not be taken pass/nonpass. Courses for the minor must be approved by the Aging and Longevity Studies Program if they are not aging and longevity studies courses (prefix ASP) or are not cross-listed with aging and longevity studies courses. Students earning the minor may not enroll in ASP:4190 Aging Studies Internship and Seminar.
The minor may be earned by undergraduate students in the colleges of Liberal Arts and Sciences, Education, Engineering, Nursing, and the Tippie College of Business.

Students may earn the minor or the undergraduate certificate in aging and longevity studies, but not both.

The minor in aging and longevity studies requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ASP:1800/CSD:1800/ | Aging Matters: Introduction to | 3 |
| NURS:1800/ | Gerontology (recommended as |  |
| SSW:1800/TR:1800 | first course for the minor) | 12 |
| Aging and longevity studies courses with the prefix |  |  |
| ASP (except ASP:4190) or courses cross-listed with |  |  |
| aging and longevity courses; at least 6 s.h. of these <br> must be numbered 3000 or above and must be taken at |  |  |
| the University of Iowa |  |  |

## Aging and Longevity Studies, Certificate

## Requirements

The undergraduate Certificate in Aging and Longevity Studies requires 18 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in work for the certificate.

The certificate may be earned by any student admitted to the University of Iowa who is not enrolled in a UI graduate or professional degree program. Undergraduate to Graduate (U2G) students may earn the certificate when the undergraduate classification is primary.

Undergraduate students may earn the undergraduate certificate or the minor in aging and longevity studies, but not both.

The Certificate in Aging and Longevity Studies takes a multidisciplinary approach to gerontology. Its coursework has been coordinated and sequenced to provide a broad background in aging for students from varied disciplines. Students should speak with the aging and longevity studies coordinator about their intent to earn the certificate and declare the certificate program in MyUI. They work with their academic advisors and the coordinator to develop an individual plan of study that complements their degree program and career interests.

The certificate's required 18 s.h. of credit must be earned in aging and longevity studies courses (prefix ASP) and other courses approved for the program. With permission from the aging and longevity studies coordinator, students also may be able to use other agingrelated courses for the certificate. Students must earn at least 12 s.h. of certificate credit in courses numbered 2000 or above, and they must earn at least 12 s.h. toward the certificate at the University of Iowa.

Certificate requirements include a core curriculum of five courses and an additional 3 s.h. of elective coursework from the list of approved aging-related courses. Students may take core courses before or concurrently with other courses in the program, but they should complete the core courses before they enroll in the internship.

Students who complete an aging-related internship or practicum in their major field may be able to count that experience as their aging and longevity studies internship; consult with the aging and longevity studies coordinator. Transfer credit requests are evaluated individually by the aging and longevity studies coordinator.
The Certificate in Aging and Longevity Studies requires the following coursework.

## Core Courses

All certificate students must complete five core courses.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Both of these: |  |  |
| ASP:1800/CSD:1800/ <br> NURS:1800/ <br> SSW:1800/TR:1800 | Aging Matters: Introduction to Gerontology (recommended as first course for the certificate) | 3 |
| ASP:3150 | Psychology of Aging | 3 |
| One of these: |  |  |
| ASP:2181/ <br> ANTH:2181/ <br> GHS:2181 | The Anthropology of Aging | 3 |
| ASP:3135/GHS:3050/ SSW:3135 | Global Aging | 3 |
| One of these: |  |  |

| ASP:3160 | Biology of Aging | 3 |
| :--- | :--- | ---: |
| ASP:3170 | Health and Aging | 3 |
| ASP:4470/HHP:4470 | Physiology of Aging | 3 |
| NURS:3138 | Nursing and Pharmacological | 5 |
| One of these: | Interventions I |  |
| ASP:4190/SSW:4190 | Aging Studies Internship and <br> Seminar | 3 |
| NURS:3615 | Adult Medical/Surgical Nursing <br> Practicum | 3 |

## Electives

Students must complete an additional 3 s.h. of elective coursework selected from aging and longevity studies courses (prefix ASP), NURS:3620 Gerontological Nursing, and/or from approved agingrelated courses offered by other academic units. Practicum and/or research courses offered by other academic units may be accepted for internship credit if they focus on aging; students who wish to apply coursework from other departments should consult the Aging and Longevity Studies Program.
Courses not used to satisfy the Core Courses requirement can be used to meet the Electives requirement.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a This foundation course is recommended to be taken prior to other required or elective courses, if possible.
b See General Catalog for list of approved electives. Nursing students may also take NURS:3620 to satisfy this requirement.
c Nursing students may also take NURS:3138 to satisfy this requirement.
d ASP:4190 is restricted and requires that the student discuss with the certificate coordinator what required courses have been completed prior to enrollment. It is allowable to be finishing one certificate course while also taking the internship.

# Aging and Longevity Studies, Graduate Certificate 

## Requirements

The graduate Certificate in Aging and Longevity Studies requires 12 s.h. of credit taken at the University of Iowa. Students must maintain a cumulative grade-point average of at least 2.75 in coursework to earn the certificate. The certificate program is open to University of Iowa graduate students with aging-related career interests and needs.

Credit for the certificate must be earned in Aging and Longevity Studies Program courses (prefix ASP) and other courses approved for the program. With permission from the aging and longevity studies coordinator, students may be able to apply other aging-related courses to the certificate.

The Certificate in Aging and Longevity Studies takes a multidisciplinary approach to gerontology. Its coursework is coordinated and sequenced to provide a broad background in aging for students from varied disciplines.
The Certificate in Aging and Longevity Studies requires the following coursework.

## Capstone Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| ASP:6000 | Graduate Gerontology Capstone | 3 |

## Admission

University of Iowa students pursuing a graduate degree in any field who are in good academic standing are eligible to apply to the certificate program. To apply, students should complete the application form.

Domestic or international individuals who are not already enrolled in the Graduate College at the University of Iowa and who do not intend to earn a graduate degree must first apply for admission on the Office of Admissions website as a nondegree graduate student. Prospective students should indicate an intention to pursue the certificate on their application. They will then receive a second application form directly from the program.

# American Sign Language 

## Director, Division of World Languages, Literatures and Cultures

- Jill Beckman (Linguistics)

## Director of Undergraduate Studies, American Sign Language

- Rebecca "Becca" Clark (World Languages, Literatures and Cultures)

Undergraduate minor: American Sign Language
Faculty: https://asl.uiowa.edu/people
Website: https://asl.uiowa.edu/
The American Sign Language Program offers an undergraduate minor. It also offers a number of courses open to all students. They include a four-semester course sequence in American Sign Language (ASL), and courses on fingerspelling, Deaf culture, ASL literature, ASL interpreting, and other topics. The four-course ASL sequence satisfies the World Languages requirement of the GE CLAS Core (see "Language for GE CLAS Core" below). Classroom instruction is supplemented by video materials and interactive software.

The American Sign Language Program is administered by the
Division of World Languages, Literatures and Cultures [p. 365].

## Language for GE CLAS Core

The following four-course sequence satisfies the World Languages requirement of the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. Students must demonstrate proficiency in the expressive and receptive elements of each course in order to register for the next course in the sequence.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ASL:1001 | American Sign Language I | 4 |
| ASL:1002 | American Sign Language II | 4 |
| ASL:2001 | American Sign Language III | 4 |
| ASL:2002 | American Sign Language IV | 4 |

Students taking more than one calendar year off from the American Sign Language (ASL) sequence are required to contact the ASL Program to schedule a placement test which will determine their placement in an American Sign Language I-IV course. Students are strongly advised to complete the ASL sequence without such a gap whenever possible. Students taking the placement test and not placing into the next course in the sequence may be retested before the class begins if they have undertaken a significant experience since the last placement test that might warrant retesting. All retesting is at the discretion of the ASL Program.

## Programs

## Undergraduate Program of Study

## Minor

- Minor in American Sign Language [p. 50]

## Facilities

The Center for Language and Culture Learning provides a wide variety of facilities and services to the Division of World Languages, Literatures and Cultures (DWLLC), including a 24 -computer Instructional Technology Center (ITC), five All-in-One Studios/
small group study rooms equipped with video production and editing software, a Computer Assisted Language Learning Lab with 25 computers integrated with Sanako software for language practice, and virtual reality hardware and development space.

The center provides spaces for quiet study as well as for group meetings. Departments, programs, and student organizations are welcome to host conversation hours, film nights, study groups, workshops, and more. Peer education services include peer tutoring programs in many of the languages taught in DWLLC, with both inperson and online availability, as well as the Directed Independent Language Study, through which faculty, staff, or students can be paired with a tutor to learn a language not taught in the DWLLC. Tutors are trained to use the Three Ms for Effective Learning, which include developing a growth mindset, using memory strategies to retain knowledge, and reflecting on learning gains.

## Courses

- American Sign Language Courses [p. 48]
- American Sign Language in English Courses [p. 49] (language of instruction is English)

## American Sign Language Courses

## ASL:1000 First-Year Seminar

 1 s.h.Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings) and visits to Deaf Awareness Week events. Requirements: first or second semester standing.
ASL:1001 American Sign Language I 4 s.h. Introductory conversational skills and basic American Sign Language grammar; introduction to the ASL cultural community through readings and videos. Taught in American Sign Language. GE: World Languages First Level Proficiency.

ASL:1002 American Sign Language II 4 s.h.
Continuation of ASL:1001; emphasis on ASL grammar and syntax; exploration of Deaf culture through readings and videos. Taught in American Sign Language. Prerequisites: ASL:1001. GE: World Languages Second Level Proficiency.
ASL:1101 Fingerspelling and Numbers I 2 s.h.
Development of expressive and receptive American Sign Language fingerspelling, lexicalized fingerspelling, and number skills based on word, phrase, and number recognition. Taught in American Sign Language. Prerequisites: ASL:1002.
ASL:1500 Introduction to Deaf Studies
Exploration of an overlooked American minority-the Deaf community; students learn to challenge the medical model for deafness with discussions of Deaf experiences, American Sign Language, and Deaf culture. Taught in English.

## ASL:2001 American Sign Language III

Continuation of ASL:1002; emphasis on ASL grammar and the signer's perspective; exploration of Deaf culture through readings and videos. Taught in American Sign Language. Prerequisites: ASL:1002. GE: World Languages Third Level Proficiency.
ASL:2002 American Sign Language IV
Continuation of ASL:2001; emphasis on spatial and depicting verb vocabulary; improvement of conversational fluency and familiarity with American Deaf culture. Taught in American Sign Language. Prerequisites: ASL:2001. GE: World Languages Fourth Level Proficiency.

ASL:3001 American Sign Language V
4 s.h.
Continuation of ASL:2002; introduction to advanced grammatical constructions and vocabulary; improvement of conversational fluency as well as familiarity with American Deaf culture. Taught in American Sign Language. Prerequisites: ASL:2002 with a minimum grade of C.

## ASL:3100 American Sign Language Conversation

 3 s.h.Continuation of ASL:2002; emphasis on receptive and expressive conversational ASL skills through small group discussion and class presentations. Taught in American Sign Language. Prerequisites:
ASL:2002 with a minimum grade of C. Requirements: concurrent enrollment in ASL:2002 if not taken as a prerequisite.

## ASL:3200 Topics in Deaf Studies 3 s.h.

Current topics in Deaf studies; skill development in communicative fluency in ASL. Taught in American Sign Language. Prerequisites: ASL:2002 with a minimum grade of C. Requirements: students who have not completed ASL:2002, but plan to take ASL:2002 concurrent to this course may enroll with consent of the instructor; please contact the ASL program for more information.

## ASL:3300 American Deaf Culture

Cultural practices, beliefs, and values of the American Deaf community. Taught in American Sign Language. Prerequisites: ASL:2002 with a minimum grade of C. Requirements: students who have not completed ASL:2002, but plan to take ASL:2002 concurrent to this course may enroll with consent of the instructor; please contact the ASL program for more information.

## ASL:3400 Issues in ASL and Deaf Studies

3 s.h.
Current issues in American Sign Language and the American Deaf community, such as linguistics, culture, and literacy. Prerequisites:
ASL:2002 with a minimum grade of C. Requirements: students who have not completed ASL:2002, but plan to take ASL:2002 concurrent to this course may enroll with consent of the instructor; please contact the ASL program for more information.

## ASL:3500 Deafness in the Media

3 s.h.
Exploration of various ways Deaf people are constructed and presented for hearing audiences from the silent film era to current mainstream productions (e.g., commercial television, movies, advertisements). Taught in American Sign Language. Prerequisites: ASL:2002 with a minimum grade of C. Requirements: students who have not completed ASL:2002, but plan to take ASL:2002 concurrent to this course may enroll with consent of the instructor; please contact the ASL program for more information.
ASL:3600 American Sign Language Literature 3 s.h. Introduction to the world of ASL literature, as recorded on videotape or film and in live performance; traditional folklore, storytelling, poetry, drama, oratory, jokes, and nonfiction narrative; analysis of genres in their social and cultural contexts as expressions of Deaf experience; how historical and current issues in Deaf culture are represented in literary form. Taught in American Sign Language. Prerequisites: ASL:2002 with a minimum grade of C. Requirements: students who have not completed ASL:2002, but plan to take ASL:2002 concurrent to this course may enroll with consent of the instructor; please contact the ASL program for more information.

## ASL:3700 Deaf Gain: Reframing Deaf People, Cultures, and

 Languages 3 s.h.With advances in genetic research and medical technologies, there may come a point in time when we are asked, "Why should Deaf people and signed languages continue to exist? Introduction to Deaf studies' response to this question-Deaf Gain; students explore the cognitive, cultural, and creative aspects of Deaf Gain to develop an argument for the continued existence of Deaf communities and their signed languages. Taught in American Sign Language. Prerequisites: ASL:2002 with a minimum grade of C. Requirements: students who have not completed ASL:2002, but plan to take ASL:2002 concurrent to this course may enroll with consent of the instructor; please contact the ASL program for more information.

ASL:3800 Independent Study
arr.
American Sign Language/Deaf studies topic; individual study.
ASL:4201 History of the American Deaf Community 3-4 s.h. Students discuss the roots of American Deaf community, exploring the development of a distinct language known today as ASL and the culture of Deaf people in America during 19th and 20th centuries. Taught in American Sign Language. Prerequisites: ASL:2002 with a minimum grade of C. Requirements: students who have not completed ASL:2002, but plan to take ASL:2002 concurrent to this course may enroll with consent of the instructor; please contact the ASL program for more information. Same as HIST:4201.

## American Sign Language in English Courses

The courses listed below are taught in English.

## ASLE:2500 Introduction to Interpreting

3-4 s.h.
Introduction to interpreting; history and current nature of the field,
available opportunities, certification, training, ethics. Taught in spoken English. Requirements: students should have some familiarity with a language not their own (spoken or signed); ASL:2002 is prerequisite for the ASL discussion section.

ASLE:3905 Teaching Deaf and Hard of Hearing Students 3-4 s.h. Issues in d/Deaf education; management techniques, communication strategies, teaching strategies, instructional materials, hands-on activities, assessments, parent involvement; use of technology, ethnic and cultural diversity, classroom management, pre-reading techniques, literacy development, educational program options. Taught in English and/or American Sign Language. Requirements: for 4 s.h. optionconcurrent enrollment in ASL:2002, if not taken as a prerequisite. Same as EDTL:3905.

## American Sign Language, Minor

## Requirements

The undergraduate minor in American Sign Language (ASL) requires 16 s.h. of ASL coursework, including 12 s.h. in advanced courses numbered 2500 or above taken at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

The minor must include ASL:2002 American Sign Language IV or demonstrated equivalent proficiency. Only one American Sign Language in English course (prefix ASLE) may be applied to the minor in ASL; if students choose to apply an ASLE course toward the minor, it must be taken for 4 s.h. All ASLE courses are taught in English.

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on track to graduate in the typical four-year time frame to meet requirements for the ASL minor:

- before the third semester begins, students should have completed ASL:1001 American Sign Language I (this course should be taken as early as possible); and
- before the sixth semester begins, students should have completed ASL:2002 American Sign Language IV.
The minor in American Sign Language requires the following coursework.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| This course: |  |  |
| ASL:2002 | American Sign Language IV | 4 |
| At least 12 s.h. from these: |  |  |
| ASL:3001 | American Sign Language V | 4 |
| ASL:3100 | American Sign Language Conversation | 3 |
| ASL:3200 | Topics in Deaf Studies | 3 |
| ASL:3300 | American Deaf Culture | 3 |
| ASL:3400 | Issues in ASL and Deaf Studies | 3 |
| ASL:3500 | Deafness in the Media | 3 |
| ASL:3600 | American Sign Language Literature | 3 |
| ASL:3700 | Deaf Gain: Reframing Deaf People, Cultures, and Languages | 3 |
| ASL:4201/HIST:4201 | History of the American Deaf Community | 3-4 |
| ASLE:2500 | Introduction to Interpreting | 4 |
| $\begin{aligned} & \text { ASLE:3905/ } \\ & \text { EDTL:3905 } \end{aligned}$ | Teaching Deaf and Hard of Hearing Students | 4 |

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## American Sign Language, Minor

| Course | Title | Hours |

a This course is a prerequisite for the required minor courses.
b Language level placement will be determined by placement exam score and/or interview. Students who place into the 5th semester level of the language will begin coursework at that level and will not be required to take semesters 1-4 of the language.
c Minor must include ASL:2002 or demonstrated equivalent proficiency.
d Choose from: ASL:3001, ASL:3100, ASL:3200, ASL:3300, ASL:3400, ASL:3500, ASL:3600, ASL:3700, ASL:4201/ HIST:4201, ASLE:2500, ASLE:3905/EDTL:3905.
e Only one American Sign Language course taught in English (ASLE) may be applied to the minor in ASL; if students choose to apply an ASLE course toward the minor, it must be taken for 4 s.h.

## American Studies

## Interim Chair

- Thomas P. Oates

Undergraduate major: American studies (BA)
Undergraduate minor: American studies
Graduate degrees: MA in American studies; PhD in American studies

Faculty: https://americanstudies.uiowa.edu/people
Website: https://americanstudies.uiowa.edu/
The Department of American Studies provides an interdisciplinary introduction to American culture, past and present. It helps students acquire a broad familiarity with the dynamics of cultural experience and explore aspects of life in the United States, such as sport, popular and fine arts, institutions, values, gender and ethnic relations, artifacts, and the everyday life of a diverse citizenry.
The department offers undergraduate programs of study in American studies and in sport studies as well as graduate programs of study in American studies, with a sport studies subprogram available in the PhD program of study.

The department also is the administrative home of the Native American and Indigenous Studies Program, which offers an undergraduate minor and undergraduate and graduate certificates; see Native American and Indigenous Studies [p. 846] in the catalog.

Undergraduate Programs of Study

## Major

- Major in American Studies (Bachelor of Arts) [p. 57]

## Minor

- Minor in American Studies [p. 59]

Graduate Programs of Study

## Majors

- Master of Arts in American Studies [p. 60]
- Doctor of Philosophy in American Studies [p. 62]

- American Studies Courses [p. 51]
- Sport Studies Courses [p. 54]

## American Studies Courses

AMST:1000 First-Year Seminar 0-1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, field trips). Requirements: undergraduate first-year standing.
AMST:1010 Understanding American Cultures
3 s.h.
The United States in historical, contemporary, and transnational perspective; social and cultural diversity and conflict in American life; debates on concepts of America, the American Dream, national culture, citizenship. GE: Values and Culture.

AMST:1030 Introduction to African American Culture
3 s.h. Examination of Black cultural experiences in the United States and the African diaspora; focus on literature, music, film, comics, anime, popular culture, and visual/performing arts. GE: Diversity and Inclusion. Same as AFAM:1020.

## AMST:1049 Introduction to Native American and Indigenous

Studies 3 s.
Exploration of past, present, and future of American Indians in the United States and beyond through film, art, music, and comedy. GE: Values and Culture. Same as HIST:1049, NAIS:1049.
AMST:1060 Sex and Popular Culture in America 3 s.h. Critical and historical introduction to representation of human sexuality in American popular culture from World War II to the present. GE: Values and Culture. Same as ENGL:1410, GWSS:1060.
AMST:1074 Inequality in American Sport 3 s.h.
Cultural meanings of sport in contemporary U.S. culture; sport experiences, inclusion, and exclusion as affected by social class, gender and sexuality, age and ability, race and ethnicity, and religion. GE: Diversity and Inclusion. Same as GWSS:1074, SPST:1074.
AMST:1075 American Popular Music: Rock and Roll to 1980
AMST:1076 Rock and Roll 1980 to the Present
From the beginning, rock and roll subcultures have deliberately challenged and changed the values, attitudes, and behaviors of the mainstream (as well as the music itself); during the past 40 years, movements such as punk, hip hop, and electronica have confronted conventional notions of race, gender, sexual identity, social justice, and economic disparities in ways that reveal much about the underlying tensions of American life; using music as a lens, students examine these aspects of the nation's social history from 1980 to the present; materials are drawn from music, films, music videos, popular magazines, newspapers, and books.
AMST:1080 American Political Humor
3 s.h.
How political humor reflects and influences American attitudes regarding government institutions, elected officials, the democratic process; how humor works; examples from Revolutionary War present and from varied media, including cartoons, fiction, film, television, internet.
AMST:1154 Food in America 3 s.h.
Cultural significance of production, distribution, and consumption of food in the United States. GE: Values and Culture.
AMST:1290 Native American Foods and Foodways 3 s.h.
Native Americans as original farmers of $46 \%$ of the world's table vegetables; examination of food as a cultural artifact (e.g., chocolate, tobacco); food as a primary way in which human beings express their identities; environmental, material, and linguistic differences that shape unique food cultures among Native peoples across the Western Hemisphere; close analysis of Indigenous foods, rituals, and gender roles associated with them; how colonization transformed Native American, European, and African American cultures. GE: Diversity and Inclusion. Same as GHS:1290, HIST:1290, NAIS:1290.

AMST:1300 American Popular Culture Abroad 3 s.h.
Exploration of global circulation of American popular culture; how
American popular culture depicts the world outside of U.S. borders.

## AMST:1600 War Stories

3 s.h.
Exploration of the history of U.S. conflicts from Vietnam to the War on Terror through novels, film, and other cultural forms; specific focus on how U.S. social structures influence experiences of war. Same as LATS:1600, SJUS:1600.

## AMST:1700 Fake News: A History of Misinformation in the United States

Fake news is sometimes imagined as a recent phenomenon, but misinformation campaigns have a long history in the United States; students survey some of the most significant instances of misinformation in U.S. history from the 18th century to present, explore the historical context that motivated the attempt at misinformation, consider how people sought to combat it, and reflect on outcomes and implications of these campaigns; tools to effectively identify and combat misinformation in contemporary life. Recommendations: basic knowledge of U.S. history.

AMST:1800 American Gothic: Film, Literature, and Popular Culture
Gothic eruptions of the uncanny in 19th- through 21st-century American literature, film, and mass culture; how ghosts, vampires, and visitants from the dark side call attention to fluid or liminal social space while communicating information and anxieties about repressed histories, economic change, and unstable intersections of gender, sexuality, race, religion, and class identities; special attention given to modernity and post-modernity of American gothic as an artifact of U.S. consumer culture and mass visual media. GE: Literary, Visual, and Performing Arts.
AMST:1847 Hawkeye Nation: On Iowa and Sport 3 s.h
Identity, community, and place explored within local frameworks: the University of Iowa, Iowa City, State of Iowa; how sport, literature, film, other cultural institutions forge connections to community and shape Iowa's image in the public imagination; identity and community as complex and contested issues; local rituals, sites of memorialization, acts of erasure, management and use of public and private space such as UI athletic complex, Field of Dreams, Iowa Writers' Workshop, Iowa Avenue Literary Walk, Blackhawk Park; interdisciplinary approaches grounded in American studies, sport studies, Native American and Indigenous studies, literature, history. Same as SPST: 1847.

AMST:2000 Introduction to American Studies 3 s.h.
Variety of historic and contemporary sources, such as literature, law, photography, painting, film, TV, music, fashions, environments, events of everyday life. GE: Values and Culture.

AMST:2025 Diversity in American Culture 3 s.h.
History and variety of American identities, examined through citizenship, culture, social stratification; conflict and commonalities among groups according to race, ethnicity, gender, class, sexuality; how art, literature, music, film, photography, and other cultural artifacts represent diversity of identities. GE: Diversity and Inclusion.

## AMST:2084 Sport and Film

3 s.h.
Sport films as means of exploring contemporary ideas about sport in the U.S.; focus on narrative structure, characterization, historical, and political contexts; formal aspects of film analysis (e.g., editing, lighting, cinematography). Same as JMC:2084, SPST:2084.
AMST:2100 This is America: The Cultural Politics of Popular
Music 3 s.h.
Cultural politics of U.S. popular music and broader soundscape of Americana; students examine how race, class, gender, and power factor into what sounds "American."
AMST:2150 Money, Capitalism, and Culture 3 s.h.
Investigation of novels, film, and art that represent complicated social and cultural life of money; how money's movement through American society shapes and is shaped by gender, race, and class dynamics; social origins and historical consequences of money, capital, and stock market; how novelists, filmmakers and artists come to terms with capitalism's ever-expanding reach.

AMST:2160 Love and Romance in America
3 s.h. Exploration of the role of love and romance in the American experience; analysis of love and romance in their association with American ideals-pursuit of happiness, upward mobility, and liberation of self, nation, and world; history of romance as a genre; contemplation of picket fences, free love, bromance, valentines, green cards, desperate housewives, break-ups, hook-ups, and (un)happily ever after. Same as GWSS:2160.

AMST:2165 Native Peoples of North America 3 s.h.
History, culture of American Indian peoples; emphasis on North America. GE: Diversity and Inclusion. Same as ANTH:2165, NAIS:2165.

AMST:2230 Fame and Celebrity in U.S. History 3 s.h.
Cultural history of the meanings and implications of fame and celebrity in America; conception of fame in the 18th century as something earned through great deeds and conferred by future generations; rise of a culture of celebrity in 19th- and 20th-century America; focus on theater, sports, movie, and musical stars; use of celebrities to sell products; implications for presidential campaigns; instant and ephemeral celebrity generated by television and the internet. Same as HIST:2230.

AMST:2292 Native American Law and Policy: A History 3 s.h. Native Americans are citizens of governments that predate the U.S.; what it means to be a citizen of a federally recognized tribe within the U.S.; exploration of the peculiar status of Native nations and their citizens since 1789. Same as HIST:2292, NAIS:2292.

AMST:2300 Native Americans in Film 3 s.h
Representations of Native Americans in film from the western to science fiction and animation. Same as NAIS:2300.
AMST:2700 The Black Image in Sequential Art: Comics, Graphic
Novels, and Anime
Provides a foundation to critically interpret the representation of
people of African descent in sequential art; primary focus on serial
comic strips, gags, comic books, graphic novels, video games,
animation, anime, Manga, film, zines, and televisual examples of
Blackness; emphasis of readings and viewing materials on gender,
sexualities, economics, ethnicity, the transnational circulation
and commodification of the Black image, fandom communities,
independent and mainstream sequential art producers. Same as
AFAM:2700.

AMST:3050 Topics in American Cultural Studies 3 s.h.
Special topics in American history, literature, culture.
AMST:3053 The Civil Rights Movement
History of the American civil rights movement. Same as AFAM:3053, HIST:3253.
AMST:3078 Archiving Women's History 3 s.h. Exploration of girls' and women's history in Iowa through collections at the Iowa Women's Archives; introduction to archival research, digital humanities, and Omeka (a digital collection and exhibit platform) with focus on sport-related collections; guided individualized research and exhibit development. Same as GWSS:3078, SPST:3078.
AMST:3100 Critical Race Theory: Culture, Power, and
Society

Examination of the historical context of race and racism in U.S. history; focus on how social structures perpetuate longstanding patterns of racial inequality. Same as AFAM:3100, SOC:3100.
AMST:3171 Baseball in America
Forces that influenced political, economic, and social development of professional baseball in the United States; rise of major league baseball, its relationship to the minor leagues, and development of organized baseball industry. Same as SPST:3171.

## AMST:3178 History of Sport in the United States

Historic development of sport in the United States between 1700 and 2000; economic forces, professionalization, growth of media, increasing opportunities, and ongoing challenges for various sporting populations. Same as SPST:3178.

## AMST:3179 Twentieth-Century American Sport <br> 3 s.h.

Historic development of sport in the United States between 1900 and 2000; economic forces, professionalization, growth of media, and increasing opportunities and ongoing challenges for various sporting populations. Same as SPST:3179.

AMST:3198 Digital Media and the Future of Sport
Emergence and significance of internet blogs, social media, convergence journalism, video games, and fantasy sports; economic, regulatory, and cultural forces that shape new media sport journalism and entertainment. Same as JMC:3135, SPST:3198.

## AMST:3205 American Cultural History

3 s.h.
Nineteenth- and twentieth-century U.S. history from a cultural perspective; culture defined broadly to encompass paintings, sculpture, theater, novels, and newer forms of entertainment made available by lithography, photography, cinema, the phonograph, radio, and television; rather than assume Americans were passive consumers of commercial culture, students examine how Americans expressed themselves through foodways, home decor, clothing fashions, or slang; how Americans drew on these cultural forms in social/political struggles over race, gender, class, and sexuality. Same as HIST:3205.
AMST:3249 Midwestern History
People of Iowa and surrounding Midwestern states-a land where people work hard, are practical, down to earth, and honest; the idea of a place in the heartland as real or simply a myth; history of Midwestern states from Native American occupation to present; how reality, ideas, and images are portrayed. Same as HIST:3249.
AMST:3251 The Office: Business Life in America
3 s.h.
History of business life in America from birth of Wall Street to rise of Silicon Valley; modes of managing and regulating office workers; changing designs of office buildings, furniture, gadgets; corporate response to rise of class inequalities and growing gender and racial diversity in workforce; portrayal of businessperson in novels, movies, television, art, photography. Same as HIST:3251.
AMST:3264 Technology in American Culture and Society $\mathbf{3}$ s.h. Social and cultural history of technology in the United States from cotton gin to smartphone; how technologies have shaped and been shaped by American culture, society, and politics-encompassing technologies of production, communication, transportation, entertainment, warfare, voting, surveillance, and more; economic forces spurring technological innovation and ways in which ordinary users re-appropriate technologies; cultural responses to new technologies (e.g., writers, artists, filmmakers, critics) ranging from fear to celebration; utopian and dystopian imaginings of future technologies. Same as HIST:3264.
AMST:3265 American Monuments
History of public monuments in America from the inception of first major monuments in the 1820s to the latest incarnations (e.g., counter-monuments such as the 9/11 Memorial, spontaneous and temporary monuments, online memorials); how monuments have depicted Indians, Blacks, Southern confederates, women, and other groups; how monuments have commemorated wars, Indian massacres, lynchings, and political movements (e.g., civil rights, women's suffrage); how monuments have been reinterpreted through popular protests and depositing of artifacts; why monuments have attracted so much controversy, culminating in recent events at Charlottesville. Same as HIST:3265.

3 s.h. AMST:3410 Undocumented America: Citizenship, Race, and Immigration 3 s.h.
Examination of how literature and culture responds to and rearticulates culture, history, legal logic, and economic parameters that frame who is "legal" and "illegal" and how undocumented immigrants document and contest their lack of rights; how designations of immigrant's illegal or undocumented status depend on and maintain U.S. discourse about race and ethnicity. Same as LATS:3410.

AMST:3415 Latina/o/x Protest, Movement, Resistance 3 s.h. Examination of history, form, and function of protest, social movement, and resistance by Latina/o/x peoples in the United States. Same as LATS:3415, SJUS:3415.

AMST:3420 Latinas/os/x and the Law 3 s.h. Introduction and survey of Latina/o/x legal history; topics include segregation, educational rights, immigration, voting rights, citizenship, and the criminal justice system. Same as LATS:3420, POLI:3427, SJUS:3420.

## AMST:3430 Women on Stage

3 s.h.
Examination of how and why women in the United States have expressed themselves through theatre and performance from 1776 to present; students study plays as performed events in specific times and places for specific audiences through works by African American, Asian American, European American, Latina, Native American, and lesbian/queer writers; what the theater-as a public, embodied art form-offers female writers; how stakes differ for women of diverse backgrounds in using this often suspect and uniquely powerful medium in particular historical moments; how changing definitions of gender and sexuality come into play; prior background in theater not required. Same as GWSS:3430, THTR:3430.
AMST:3450 Queer Latina/o/x Studies 3 s.h. Relationship of Latina/o/x culture with gender, sexuality, and queerness. Same as LATS:3430, SJUS:3430.
AMST:3600 Digitizing Blackness 3 s.h.
Examination of Black cultural experiences in digital spheres, including digital humanities and new information technologies; focus on Afrofuturism, gaming, augmented reality, digital mapping, podcasting, social media, and digital cultures; exposure to digital tools and methods. Same as AFAM:3600.
AMST:3900 Seminar in American Cultural Studies
3 s.h.
Interdisciplinary perspectives on a single theme or period.
AMST:3994 Independent Study
arr.
AMST:4800 Latina/o/x Popular Culture
3 s.h.
Role of Latina/o/x popular culture as a site of contemporary social practice and cultural politics in both local and global contexts; specific attention to notions of citizenship, identity, and culture. Taught in English. Same as LATS:4800.

AMST:4999 Honors Project arr. Independent interdisciplinary research, writing.
3 s.h. AMST:5000 Interdisciplinary Research in American Cultures

3 s.h.
Research, theories, and methods in the interdisciplinary study of American cultures.

AMST:5002 Critical Theories and Cultural Studies 3 s.h.
Exploration and application of critical theories to contemporary sport; feminism, Marxism, critical race theory, whiteness studies, queer theory, postcolonial theory, postmodernism, and poststructuralism. Same as SPST:5002.
AMST:6050 Seminar: Topics in American Studies
3 s.h.
American cultural history; urbanization, mass media, pluralism, assimilation.

AMST:6074 Seminar in Sport History 3 s.h.
Topics in sport history; theoretical and methodological issues. Same as SPST:6074.

AMST:6140 Engaged Scholarship in the Humanities 0,3 s.h. Survey of literature on community-engaged scholarship (CES) in the humanities; exploration of the pioneering work of engaged scholars in Native American, Latino, and African American studies; students write a research prospectus that is consistent with CES methodologies. Same as HIST:6140.

## AMST:6300 Writing for Learned Journals 1-4 s.h.

Seminar that supports graduate students in bringing written work to publishable form; analysis of target journals' audiences, interests, and citation politics; submission and the publication process; response to reader reports and criticism; best writing and research practices; discussion of knowledge cultures and discourses in disciplines and the contemporary academy. Same as GRAD:6300, GWSS:6300, RHET:6330.

## AMST:6500 Critical Readings in Cultural Studies: Stuart Hall's Legacy and Influences

Exploration of the scholarship of Stuart Hall along with theories, methods, and history of cultural studies; focus on major areas of Hall's work including Marxist thought and the political economy, diasporas and globalization, cultural production and popular culture, film and cinema studies, race, ethnicity, identity, and differánce; key theorists that influenced Stuart Hall (e.g., Marx, Foucault, Fanon, Gramsci, Althusser) and scholars in cultural studies that have made appropriate use of Hall's writings and theories in their own work; role of theory in everyday life and the critical role of public intellectuals. Same as AFAM:6500, ENGL:6050.

## AMST:7077 Sport Studies Workshop

Development of individual research projects for group discussion.
Requirements: graduate standing in American studies or sport studies. Same as SPST:7070.

## AMST:7085 Dissertation Writing Workshop

Dissertation preparatory work with peer and faculty critiques, including preparation of a prospectus, research activities, and chapter writing. Requirements: American studies graduate standing with postcomprehensive examination status.

## AMST:7090 PhD Thesis

AMST:7146 Temporality in History: United States and Beyond
Introduction to growing field of temporal history; how time has been measured, regulated, experienced, and imagined in the West and non-West from antiquity to present with emphasis on 19th-and 20thcentury United States; topics include time discipline (e.g., factory, slave plantation, corporate office), standard time, and deep time; focus on changing technologies of time (e.g., clocks, calendars) and to temporal impact of other technologies (e.g., cinema); application of temporal perspective to political revolution, warfare, nation building, class formation, gender relations, slavery, and urbanization. Same as HIST:7146.
AMST:7559 Race, Science, and Nature in Latin America arr Analysis of the history of United States and Latin America relations in the 20th century through the lens of scientific and agricultural change; how plant breeding, agrochemicals, heavy machinery, and irrigation systems set in motion trends that made the 20th century exceptional; possibility of feeding an unprecedented growing global population and transition of human species from being primarily rural to primarily urban in less than a hundred years; analysis of how a network of scientists, businesses, and governments made proliferation of agribusinesses possible to emphasize Indigenous and Mestizo peasants' role in that process. Same as GEOG:7559, HIST:7559.

1 s.h.
arr.

1,3 s.h.

## Sport Studies Courses

SPST:1000 First-Year Seminar

1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
SPST:1074 Inequality in American Sport
Cultural meanings of sport in contemporary U.S. culture; sport experiences, inclusion, and exclusion as affected by social class, gender and sexuality, age and ability, race and ethnicity, and religion. GE: Diversity and Inclusion. Same as AMST:1074, GWSS:1074.

## SPST:1847 Hawkeye Nation: On Iowa and Sport 3 s.h.

Identity, community, and place explored within local frameworks: the University of Iowa, Iowa City, State of Iowa; how sport, literature, film, other cultural institutions forge connections to community and shape Iowa's image in the public imagination; identity and community as complex and contested issues; local rituals, sites of memorialization, acts of erasure, management and use of public and private space such as UI athletic complex, Field of Dreams, Iowa Writers' Workshop, Iowa Avenue Literary Walk, Blackhawk Park; interdisciplinary approaches grounded in American studies, sport studies, Native American and Indigenous studies, literature, history. Same as AMST:1847.

## SPST:2077 Sport and Religion in America

Sport as a religion; religiosity in sports; examination of religion and sport as connected in important ways in American society. Same as RELS:2877.

## SPST:2078 Women, Sport, and Culture

Feminist analysis of girls' and women's sports experiences, including reproduction of gender through sport, recent changes in women's intercollegiate athletics, media representations of women's sport, feminist critiques, alternatives to sport. Same as GWSS:2078.
SPST:2079 Race and Ethnicity in Sport
Structural and ideological barriers to racial and ethnic equality in sport, with focus on African American sport experiences; historical and contemporary issues, media representations. Same as AFAM:2079.
SPST:2081 Theory and Ethics of Coaching 3 s.h.
Philosophical bases, ethical issues; theoretical, practical applications.
SPST:2084 Sport and Film 3 s.h.
Sport films as means of exploring contemporary ideas about sport in the U.S.; focus on narrative structure, characterization, historical, and political contexts; formal aspects of film analysis (e.g., editing, lighting, cinematography). Same as AMST:2084, JMC:2084.
SPST:2170 Sport and Globalization
3 s.h.
Sport as both a global and local phenomenon; influence of global economic, political, and cultural forces on local sporting expressions, experiences, and identities; global sporting cultures from cricket to capoeira; global sporting spectacles from the Olympics and Paralympics to the FIFA World Cup; global sporting celebrities and athlete migrants from Maria Sharapova and Christiano Rinaldo to Yao Ming and Dominican Republic baseball; global sporting production, consumption, and development from global labor and environmental concerns to sport for development and peace. GE: Sustainability. GE: International and Global Issues.

## SPST:2500 Sport and Technology

3 s.h.
Connections between sport and technology; performance enhancement to Paralympians, sex testing to scientific racism, Fitbits to e-sports, data analytics and journalism; cultural approaches to understanding how science, medicine, and technology impact active bodies, sporting industries, and infrastructure; debates regarding risks and responsibilities; exploration of various roles (e.g., athletes, administrators, architects, engineers, programmers, trainers) in creating and sustaining past, present, and future of sports.

## SPST:3078 Archiving Women's History

3 s.h.
Exploration of girls' and women's history in Iowa through collections at the Iowa Women's Archives; introduction to archival research, digital humanities, and Omeka (a digital collection and exhibit platform) with focus on sport-related collections; guided individualized research and exhibit development. Same as AMST:3078, GWSS:3078.

## SPST:3171 Baseball in America <br> 3 s.h.

Forces that influenced political, economic, and social development of professional baseball in the United States; rise of major league baseball, its relationship to the minor leagues, and development of organized baseball industry. Same as AMST:3171.

## SPST:3172 Football in America 3 s.h.

Forces that influenced political, economic, and cultural development of college and professional football in the United States; rise of the National Football League and its relationship to college football and commercial media interests.
SPST:3173 Cultures of Basketball
3 s.h.
Exploration of different ways basketball has been played, marketed, and celebrated in the United States and globally. Recommendations: background in U.S. history and/or African-American history.
SPST:3175 Sport and the Media 3 s.h.
Examination of sport and media's intimate relationship; aesthetic, cultural, political, economic, and industrial factors that shape it. Same as JMC:3183.

## SPST:3176 Sport and Nationalism

Role of sport in the phenomenon of nationalism; selected theories; case studies on Ireland, Australia, British West Indies, Cold War United States, and fascist Europe.

## SPST:3177 Sport in the Western World

3 s.h.
Development of Western sport; relation to social, political, economic, intellectual factors.

## SPST:3178 History of Sport in the United States

Historic development of sport in the United States between 1700 and 2000; economic forces, professionalization, growth of media, increasing opportunities, and ongoing challenges for various sporting populations. Same as AMST:3178.

SPST:3179 Twentieth-Century American Sport 3 s.h.
Historic development of sport in the United States between 1900 and 2000; economic forces, professionalization, growth of media, and increasing opportunities and ongoing challenges for various sporting populations. Same as AMST:3179.

## SPST:3181 The Business of Sport Communication 3 s.h.

 Critical and practical approach to understanding contemporary sports media and business practices that mark it; focus on sports media industries and institutions; branding, marketing, demographic, public relations, and promotional factors that shape content. Same as JMC:3540.
## SPST:3182 Sport, Scandal, and Strategic Communication in

 Media Culture3 s.h.
Use of sport scandal to consider relationship between sport and media in American and global popular culture; broad range of case studies used to consider what constitutes a sport scandal, how this definition shifts in different circumstances; crucial roles media play in creating, communicating, and diffusing these crises; how phenomenon of sports scandal has intensified along with emergence of cable television, internet, and social media. Same as JMC:3182.
SPST:3184 Narrative Sports Journalism
3 s.h.
Historical review of long-form sports journalism to understand development of subjects, form, and technique of sports coverage and long-form nonfiction writing; students read several long-form articles and books that incorporate reporting about sports, and propose an original long-form work about sports. Same as JMC:3184.

SPST:3193 Independent Study arr. Problem in a specific area.

SPST:3198 Digital Media and the Future of Sport
3 s.h.
Emergence and significance of internet blogs, social media, convergence journalism, video games, and fantasy sports; economic, regulatory, and cultural forces that shape new media sport journalism and entertainment. Same as AMST:3198, JMC:3135.
SPST:3500 The Olympics
3 s.h.
Real-time analysis and evaluation of current Winter or Summer
Olympic and Paralympic Games; cultural history of modern Olympic Games (1896 to present); economics and politics of mega-events
(e.g., cancellations, boycotts, protests); amateurism, professionalism, and athlete migrants; commercialization, broadcasting rights, and branding; nationalism, internationalism, and (post)colonialism; social and cultural impacts and controversies (e.g., social and environmental sustainability); Olympic bids, committees, and hosts; sex, gender, and racial discrimination; doping; technology, television, and social media.

## SPST:4999 Honors Project

1-3 s.h.
SPST:5002 Critical Theories and Cultural Studies 3 s.h.
Exploration and application of critical theories to contemporary sport; feminism, Marxism, critical race theory, whiteness studies, queer theory, postcolonial theory, postmodernism, and poststructuralism. Same as AMST:5002.
SPST:6010 Nonprofit Organizational Effectiveness I 3 s.h.
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fundraising. Same as HMP:6360, MGMT:9150, PBAF:6278, RELS:6070, SSW:6247, URP:6278.

## SPST:6020 Nonprofit Organizational Effectiveness II 3 s.h.

Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: for HMP:6365-HMP:6360 or MGMT:9150. Same as HMP:6365, MGMT:9160, PBAF:6279, RELS:6075, SSW:6248, URP:6279.
SPST:6072 Seminar in Cultural Studies of Sport 3 s.h. Current theoretical debates in sport studies; applications of critical cultural studies theories to critical analysis of sport.

SPST:6074 Seminar in Sport History 3 s.h.
Topics in sport history; theoretical and methodological issues. Same as AMST:6074.
SPST:7070 Sport Studies Workshop
1 s.h.
Development of individual research projects for group discussion.
Requirements: graduate standing in American studies or sport studies. Same as AMST:7077.

## American Studies, BA

American studies majors develop broad training in cultural analysis and communication. Students take courses that make sense of the contemporary world, both nationally and internationally, using a variety of approaches to the study of culture, including film, the digital humanities, art, theater, and literature. Building on the strengths of the faculty, students use a variety of approaches to study culture that includes racial and ethnic studies, gender studies, media studies, the digital humanities, history, art, theater, and literature.

## Learning Outcomes

Upon completion of the BA in American studies, students should have:

- a deepened knowledge and critical understanding of American history, cultures, and society;
- the ability to interpret a range of sources (literature, painting, maps, diaries, music, census data, material objects) and to integrate those sources into a persuasive argument about American culture; and
- the ability to explain one's own perspective on American identity and to place that identity in the diverse, global context of our time.

## Requirements

The Bachelor of Arts with a major in American studies requires a minimum of 120 s.h., including 33 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. At least $24 \mathrm{~s} . \mathrm{h}$. for the major must be earned at the University of Iowa.

The major in American studies stresses broad training in cultural analysis and communication. American studies students may arrange internships ( $1-3$ s.h.) for credit toward their major through the university's Pomerantz Career Center.

Shortly after declaring the major, students should meet with their advisor to explore the range of coursework available and to begin shaping a plan of study. By the second semester in the major, students and their advisor should have agreed upon a plan of study for completing the requirements for the major.

The BA with a major in American studies usually requires the following 11 courses.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| AMST:1010 | Understanding American Cultures | 3 |
| AMST:2000 | Introduction to American Studies | 3 |
| AMST:2025 | Diversity in American Culture | 3 |
| AMST:3900 | Seminar in American Cultural Studies | 3 |
| One additional American studies course numbered 2000 or above |  | 3 |
| One additional American studies course numbered 3000 or above |  | 3 |
| Five additional American studies courses |  | 15 |

## Honors

## Honors in the Major

Students majoring in American studies may graduate with honors in the major. They must maintain a University of Iowa grade-point average (GPA) of at least 3.33 and a GPA of at least 3.33 in the major.

The honors project is usually undertaken in a student's final semester. Students should identify a potential project topic and an advisor from the American studies faculty the semester before. Work for the honors project is done under the supervision of a faculty member with expertise in the topic the student is exploring. Projects typically take the form of traditional scholarly research. However, they also can be organized around public engagement, the digital humanities, or other formats decided on in consultation with the faculty advisor.

Students should enroll in AMST:4999 Honors Project for 3 s.h. The credit counts toward the 33 s.h. of work required for the American studies major.

Students who pursue honors projects in two departments may not submit the same project for both unless special permission is obtained from each department. Such an option would require more substance and depth than projects undertaken in one department. Students should check with honors advisors from both departments before they pursue such projects.

## University of Iowa Honors Program

In addition to honors in the major, students may pursue honors study through the University of Iowa Honors Program. University honors students must maintain a 3.33 GPA, complete 12 s.h. of coursework designated as honors courses, and complete 12 s.h. of an experiential learning project. Visit Honors at Iowa for more details.
Membership in the UI Honors Program is not required to earn honors in the American studies major.

## Career Advancement

American studies provides preparation for careers in business, public relations, marketing, advertising, diversity outreach, tourism, education, politics and government, social service, media and journalism, museums, and the arts. It also provides a good foundation for graduate studies in the humanities, the social sciences, theology, business, or law.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan.

Before the fifth semester begins: declaration of the major and discussion of a plan of study with an American studies advisor.
Before the seventh semester begins: at least six courses from the plan of study and at least 90 s.h. earned toward the degree.
Before the eighth semester begins: at least nine courses from the plan of study.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education as. Natural Sciences; Quantitative and Formal Reasoning; Social

Sciences; Hisual, and Pesperives Intern or Values and Culture.
b Fulfills a major requirement and may fulfill a GE requirement.
c Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages placement exam, unless enrolling in first-semester level course.
d Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, ertificates. advisor about the best sequencing of courses.
f Students are required to complete 15 s.h. of additional American tudies courses. degree for the session in which all requirements will be met. For any Graduation Services

## American Studies, Minor

## Requirements

The undergraduate minor in American studies requires a minimum of 15 s.h. in American studies courses (prefix AMST), including 12 s.h. numbered above AMST:1010 Understanding American Cultures taken at the University of Iowa. Students must maintain a gradepoint average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

Students select courses for the minor according to their interests and the recommendation of their advisor

## American Studies, MA

## Learning Outcomes

Students must demonstrate:

- comprehension of the history, values, and methods of interdisciplinary scholarship in the field of American studies;
- knowledge of the multiple forums that exist for the communication, implementation, and praxis of American studies scholarship in social and institutional contexts where diversity, equity, and inclusion are guiding values;
- proficiency in advanced research and scholarly writing skills in the field of American studies;
- ability to articulate one's own intellectual commitments and professional goals within and in relationship to the field;
- hands-on participation in university certificate programs, community-based projects and internships, or digital humanities projects, training in college teaching pedagogy where consistent with their individual development plan; and
- critical thinking, writing, and speaking skills that are central to being an effective teaching assistant in 1000-level university or college courses, and creation of a teaching portfolio.

## Requirements

The Master of Arts program in American studies requires a minimum of 36 s.h. of graduate credit. Students must maintain a program gradepoint average of at least 3.00 . The degree generally is offered without thesis; students must petition the director of graduate studies for permission to pursue the thesis option.
Each MA student designs an interdisciplinary field of concentration in consultation with the student's American studies advisor.

The MA with a major in American studies requires the following work.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| AMST:5000 | Interdisciplinary Research in <br> American Cultures (taken twice <br> in consecutive years) | 6 |
|  |  |  |
| Two graduate seminars in American studies <br> Five courses in the interdisciplinary field of <br> concentration | 6 |  |
| $\left.\begin{array}{ll}\text { Electives } \\ \text { MA portfolio } & \\ \hline \text { Total Hours } & \mathbf{3 6}\end{array}\right]$ |  |  |

Each student must complete a portfolio or thesis. The portfolio includes a research paper, faculty evaluations for all courses taken during the student's first full year of graduate study, and a selfevaluation essay.

The research paper is a graduate seminar paper that demonstrates a student's skills as a research scholar and writer and represents the student's strongest work. The paper should be 25-30 pages, including a bibliography.

The self-evaluation essay summarizes the American studies methods and materials that have shaped the student's interdisciplinary work in the field and states how the master's degree work in American studies has contributed to, challenged, or complicated the student's goals and ambitions beyond the degree.

Students assemble the MA portfolio under the guidance of their advisors and should submit it no later than Dec. 1 of their third semester in residency. The portfolio is evaluated on a satisfactory/
unsatisfactory (S/U) basis by a three-person American studies faculty committee. Students whose portfolio receives a U may resubmit the portfolio during their fourth semester of residency.
For students who wish to continue their education with doctoral study, the MA portfolio serves as the application for admission to the PhD program in American studies. The department informs applicants whether they have been accepted into the PhD program by the end of the fall semester in which they submit their MA portfolio; admission is contingent upon successful completion of the MA during a student's fourth semester of residency.

## Thesis Option

As an alternative to the portfolio, students may complete a master's thesis. Students planning to write a thesis should inform their advisor as early as possible, and at least one or two semesters in advance of graduation. A thesis involves interdisciplinary research and analysis, and represents an original contribution to knowledge. In most cases, the thesis is a 50-75 page manuscript. However, students may propose alternatives to the traditional form, provided they have the dissertation committee's approval and complete a memorandum of understanding with the director of graduate studies in American studies.

The thesis will be assessed by a committee composed of a student's advisor and two other faculty members. The thesis is distributed to the committee at least two weeks ahead of an oral defense.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Career Advancement

American studies students' career goals are as varied as the topics they study. Graduates are well prepared for careers in a wide range of areas, such as business, education, arts and museum administration, government, journalism, or social services.
The program also provides a good foundation for graduate studies in the humanities, the social sciences, theology, and business as well as for professional studies in law or medicine.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Take twice in consecutive years.
c Each student designs an interdisciplinary field of concentration which consists of at least five courses ( 15 s.h.). Work with faculty advisor to determine appropriate graduate coursework.
d Work with faculty advisor to determine appropriate graduate seminars.
e Work with faculty advisor to determine appropriate graduate elective coursework.
f Completion of an MA portfolio, which includes a research paper, faculty evaluations for all courses taken during the student's first full year of graduate study, and a self-evaluation essay.

## American Studies, PhD

## Learning Outcomes

Students must demonstrate:

- comprehension of the history, values, and methods of interdisciplinary scholarship in the discipline of American studies, and (for sport studies subprogram students) this involves a knowledge of the current and foundational theory and methods in critical sport studies, as well as of the contributions to sport studies to American studies and vice-versa;
- knowledge of the multiple forums that exist for the communication, implementation, and praxis of American studies scholarship in social and institutional contexts, especially where diversity, equity, and inclusion are guiding values;
- ability to articulate one's own values, intellectual commitments, and professional goals within and in relationship to the field;
- proficiency in advanced research and scholarly writing skills in the field;
- hands-on participation in university certificate programs, community-based projects and internships, or digital humanities projects, training in college teaching pedagogy where consistent with the student's individual development plan;
- proficiency at situating and interpreting American social and cultural materials historically, while grasping the diversity and distinctness of historical factors as economic, colonial, racializing, transnational, global, and/or linguistic;
- proficiency and experience in communicating American studies scholarship publicly in at least three professional contexts including conference presentations and/or conference organizing; exhibitions/installations; editorial or curatorial work; invited talks; public engagement or public humanities project; publications; or digital humanities project;
- proficiency in the conceptualization, communication, and organizational skills that are crucial to pedagogy at multiple levels of a university or college curriculum, and creation of a teaching portfolio;
- knowledge of major movements and debates in critical theory and cultural studies, as well as the theoretical and methodological issues and debates in sport history (for sport studies subprogram students); and
- understanding of how historical method, critical theory, and cultural studies concepts are utilized in critical sport studies scholarship, and identify sports studies' place within and contributions to the wider study of culture and power (for sport studies subprogram students).

## Requirements

The Doctor of Philosophy program in American studies requires a minimum of 72 s.h. of graduate credit. Students must maintain a program grade-point average of at least 3.00. They may focus on American studies or choose the sport studies subprogram.
Students work with their faculty advisor to map out a coherent plan of study that reflects their particular interests. Students are permitted considerable flexibility in constructing their study plan, but they must meet certain basic requirements, which include foundation courses, area foundation courses, two interdisciplinary fields of concentration, a research skills course, elective coursework, and a dissertation.

The two fields of concentration may be defined to correspond with a student's strongest intellectual interests, but they must be interdisciplinary in concept and multidisciplinary in scope. Each must include coursework from more than one of the university's
departments and programs. The two concentration areas may, and usually should, have an intellectual relationship with each other.
Students are expected to address the cultural diversity of American life in their coursework and reading.
The PhD with a major in American studies requires the following work. Some course requirements are different for American studies and sports studies.

## Coursework

## Required Foundation Courses

All students complete the required foundation courses and should take them as early as possible.

## Admission to PhD Candidacy

Admission to PhD candidacy signifies that the department judges a doctoral student qualified to take the comprehensive examination. Doctoral students advance to PhD candidacy based on a review conducted during their second year in the PhD program (typically during fall semester); the review assesses a student's readiness to complete studies through the comprehensive examination and the dissertation, which is an original work of scholarship. In addition to judging a student's readiness for PhD candidacy, the review provides a progress report on the student's work and a tentative prognosis for future prospects in the field.

## Comprehensive Examination

The comprehensive examination comprises three written exams and one oral exam.

The first exam is taken under the supervision of an American studies faculty member, who also chairs the comprehensive examination. The candidate takes a timed, take-home written exam of no less than four hours and no longer than two days. The exam details the candidate's approach to American studies (methods and models), including the student's position and critical engagement with models of American studies scholarship.
The remaining two written exams explore the candidate's major fields; these are at least four hours long and may be given on a take-home basis at the examiner's discretion.

The oral exam covers material from the written exams.

## Dissertation

The final requirement for the PhD is the dissertation. A dissertation in American studies is a substantive work of scholarship that involves interdisciplinary research and analysis, and represents an original contribution to knowledge. In most cases, the dissertation takes the form of a book-length manuscript. However, students may propose alternatives to the traditional form, provided they have the dissertation committee's approval and complete a memorandum of understanding with the director of graduate studies in American studies. All dissertations must be approved by a committee of four faculty members, including at least two from the Department of American Studies.

## Internships

Qualified graduate students in American studies can arrange internships with a number of local agencies, including the State Historical Society of Iowa, the Division of Historic Preservation, the University of Iowa Stanley Museum of Art, the Iowa Humanities Board, Brucemore, the Herbert Hoover Presidential Library and Museum, the Englert Theatre, and the Putnam Museum and Science Center. With special permission, candidates conducting research during on-the-job training may receive academic credit through AMST:7994 Independent Study. Other internships with social agencies, government, or business also may be arranged.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Career Advancement

American studies students' career goals are as varied as the topics they study. Graduates are well prepared for careers in a wide range of areas, such as business, education, arts and museum administration, government, journalism, or social services.

The program also provides a good foundation for further graduate studies in the humanities, the social sciences, theology, and business as well as for professional studies in law or medicine.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Undergraduate major: anthropology (BA, BS)
Undergraduate minor: anthropology
Graduate degrees: MA in anthropology; PhD in anthropology
Faculty: https://anthropology.uiowa.edu/people
Website: https://anthropology.uiowa.edu/
Anthropology is the comparative study of peoples and cultures past and present. The discipline's four major subfields-cultural anthropology, biological anthropology, linguistic anthropology, and archaeology-share a holistic, global perspective and commitment to field-based methodologies. Anthropological knowledge constructively contributes these perspectives and methods to work in other social sciences, physical and biological sciences, and the arts and humanities.

Anthropology provides a framework for understanding the relation of human beings to their natural environment and to the social and cultural worlds they create and inhabit. The field provides insight into biological and sociocultural evolution and examines how economic, social, and political processes, symbolic systems, and social structures interact to shape human experience. Fieldwork-based comparative studies of past and present cultures yield information on regularities and differences, and special insight into the diversity of human creativity and cultural change.
Anthropological training provides skills useful in a variety of careers. As the American Anthropological Association points out, "careful record-keeping, attention to details, analytical reading, and clear thinking are taught by anthropological courses. Social ease in strange situations, critical thinking, and strong skills in oral and written expression are cultivated by anthropological training."
For undergraduates, the department offers four tracks within the major -culture and heritage management, environmental anthropology, gender and culture, and medical anthropology-for students with specialized interests in these areas.

The Department of Anthropology also offers numerous courses that undergraduate students in all majors may use to fulfill GE CLAS Core [p. 19] requirements.
At the graduate level, the department grants both MA and PhD degrees in anthropology. Most students enter the PhD program and are awarded an MA after fulfilling program requirements at the end of their second year. The department also offers a terminal MA degree with a focus on cultural resource management (CRM) in archaeology, which provides academic preparation for a professional career in this field. Students work closely with faculty and staff from the Office of the State Archaeologist.
In addition to offering undergraduate and graduate degree programs, the Department of Anthropology administers the university's Museum Studies Program, which offers an undergraduate certificate.

## Faculty

Members of the anthropology faculty work within and across the discipline's four subfields, and conduct both localized and multi-sited field research at locations worldwide, including South and Southeast Asia; Europe; southern Africa; North America (especially the United States); South America; and the Pacific (especially Hawaii and New Zealand).

Current faculty interests include cultural evolution, cultural politics, environmental anthropology, European archaeology, feminist anthropology and sexuality studies, medical anthropology, paleoanthropology, science and technology studies, and Asian studies. For more details, visit People on the Department of Anthropology website.

## Programs

## Undergraduate Programs of Study

## Majors

- Major in Anthropology (Bachelor of Arts) [p. 72]
- Major in Anthropology (Bachelor of Science) [p. 78]

## Minor

- Minor in Anthropology [p. 84]

Graduate Programs of Study

## Majors

- Master of Arts in Anthropology [p. 85]
- Doctor of Philosophy in Anthropology [p. 88]

## Resources, Facilities

The department has well-equipped laboratories for the study of archaeology, biological anthropology, computational genetics, and evolutionary anthropology, and a state-of-the-art multimedia linguistic anthropology laboratory. Resources include a GIS/quantitative analysis laboratory, ground penetrating radar, x-ray fluorescence equipment, and three-dimensional (3D) scanning equipment.

Under the direction of university archaeologists, students acquire skills in data recovery and interpretive techniques. Opportunities are available for students to participate in archaeological field research in Portugal, Sicily, and various sites in the United States.

Individual faculty members maintain field laboratories and conduct research outside the United States, maintaining ties with research institutions in other countries, including Gemeente Nijmegen, Bureau Archeologie, Nijmegen, the Netherlands; the Deutsches Archäologisches Institut of Madrid, Spain; and the National University of Singapore, Singapore.
The department has access to the Iowa Archaeological Collections through the Office of the State Archaeologist and maintains its own archaeological collections (midwestern prehistoric and historical and comparative faunal material).
The department maintains a documented human osteology teaching collection amassed by the University of Iowa Carver College of Medicine and the Department of Anatomy and Cell Biology, and it holds a substantial documented human osteology research collection originally from Stanford University's medical school that is maintained jointly with the Office of the State Archaeologist.

The university is a charter member of the Human Relations Area Files (HRAF), an extensively annotated set of source materials on the peoples of the world-their environments, behavioral patterns,
social lives, and cultures. Through HRAF and other library resources, anthropology students have access to source materials on more than 400 different cultures.

The university's exchange programs for Iowa students provide opportunities and some scholarships for study abroad.

## Courses

## Anthropology Courses

## ANTH:1000 First-Year Seminar

1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g. films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

## ANTH:1001 Issues in Anthropology

3 s.h.
In-depth exploration of methodological and theoretical issues in contemporary anthropology; emphasis on critical reading of primary texts.
ANTH:1040 Language Rights
3 s.h.
Language minorities and linguistic human rights in the United States and worldwide; language and identity, culture, power; case studies of language rights deprivation. GE: International and Global Issues. Same as LING:1040.

## ANTH:1046 Environmental Politics in India

3 s.h.
How resources, commodities, people, and ideas cross borders; examination of globalization through issues of technology, social justice, environment; perspectives from anthropology, gender studies, geography, energy science, and development. GE: International and Global Issues. Same as GEOG:1046, GWSS:1046, SJUS:1046.

## ANTH:1101 Cultural Anthropology

3 s.h.
Comparative study of culture, social organization. GE: Social Sciences; Values and Culture. Same as IS:1101.

## ANTH:1201 World Archaeology 3 s.h.

What do archaeologists know about the past, and how do they know about the past? Evolution of human cultures from ice ages to first cities; archaeological methods used to understand the past. GE: Historical Perspectives.

## ANTH:1301 Human Origins

3 s.h.
Processes, products of human evolution from perspectives of heredity and genetics, evolutionary theory, human biological characteristics, fossil record, artifactual evidence, biocultural behaviors. GE: Natural Sciences without Lab.

## ANTH:1401 Language, Culture, and Communication 3 s.h.

Human language in context of animal communication; development, acquisition of language; biological base; language as a linguistic system in cultural social context. GE: Social Sciences.

## ANTH:2009 Individual Study

1-3 s.h.
Readings in area or subdivision of anthropology in which student has had basic coursework.

## ANTH:2100 Anthropology and Contemporary World

## Problems

3 s.h.
Selected world problems from an anthropological perspective; current dilemmas and those faced by diverse human groups in recent times and distant past. GE: International and Global Issues; Social Sciences.
ANTH:2102 Anthropology of Marriage and Family 3 s.h.
Classic anthropological theories of kinship and marriage, including topics such as cousin marriage and incest; recent work on new reproductive technologies and transnational marriage. Same as GWSS:2102.

ANTH:2103 Introduction to Global Health Studies 3 s.h.
Global health as a study of the dynamic relationship between human health and social, biological, and environmental factors that drive the spread of disease; core areas of global health research that may include health inequalities, maternal and child health, infectious diseases, nutrition, environmental health, and health interventions. GE: International and Global Issues. Same as GHS:2000.
ANTH:2105 Cultural Worlds of Science and Scientists 3 s.h.
Anthropological introduction to science and technology studies (STS) -an interdisciplinary field that examines how production of scientific knowledge and impacts of new technologies are shaped by social and cultural factors; how anthropology takes a constructively critical approach that is neither "anti-" or "pro-" science, but moves beyond this contrast; course materials focus on examples of scientific controversies and portraits of scientists at work in order to more richly understand promises and problems that can accompany how scientific knowledge is produced and applied.
ANTH:2108 Gendering India 3 s.h.
Aspects of Indian culture, including nation, family, sexuality, work, and religion, through the lens of gender; Hindu India, differences in region, caste, and class. Same as GWSS:2108.
ANTH:2136 Race, Place, and Power: Urban Anthropology 3 s.h. Cross-cultural approach to urban anthropology; urbanizing processes, migration and adaptation, aspects of class and ethnicity in urban settings, urban economic relations. GE: International and Global Issues; Social Sciences.

## ANTH:2140 Food, Drink, and Culture

Passion of food, eating, and drinking in our lives; students are challenged to study eating and drinking in all its variety and importance in different contemporary cultures of the world; exploration of how and why food and drink hold the power to bind people together or to set groups apart, how national cuisines are made, and how people connect food and drink to ritual and health care systems; these topics and many more linked with the study of food and drink production and consumption to examine societal processes, such as the construction of identities and symbolic meanings attached to eating and drinking.
ANTH:2151 Global Migration in the Contemporary World $\mathbf{3}$ s.h. Examination of social, economic, and cultural dimensions of global migration in the contemporary world from a transnational and anthropological perspective; primary focus is on Asian migration to the United States, but in comparison to other migration trajectories. Recommendations: an introductory course in cultural anthropology is useful, but not required. GE: Diversity and Inclusion. Same as GWSS:2151, IS:2151.
ANTH:2160 Culture, Health, and Wellness: Southeast Asia in Focus
Exploration of complex cross-cultural interactions between health, wellness, and culture; insights drawn from the culturally diverse region of Southeast Asia including Indonesia, Vietnam, Singapore, Malaysia, Thailand, Cambodia, Burma, and Philippines, among others. Same as GHS:2160.
ANTH:2164 Culture and Healing: An Introduction to Medical Anthropology 3 s.h Health professions are increasingly focused on how to best provide health care to culturally diverse populations; introduction to key cultural and social influences on sickness and healing; worldwide examples. Same as GHS:2164.
ANTH:2165 Native Peoples of North America
3 s.h.
History, culture of American Indian peoples; emphasis on North America. GE: Diversity and Inclusion. Same as AMST:2165, NAIS:2165.

## ANTH:2166 Arts of Native North America

Introduction to Native North American arts and artists including modern, recent, and pre-Columbian work; modern Native artists and their messages within context of recent social and political developments, as well as deeper histories and artistic traditions; prior study of anthropology or art history not required.

## ANTH:2181 The Anthropology of Aging

Comparative anthropological perspective on aging; ethnographies from diverse contexts used to examine intersections of kinship, religion, health, and medicine in later life. Same as ASP:2181, GHS:2181.

## ANTH:2182 Africa: Health and Society

Cultural, political, and economic diversity of African societies from precolonial period to present day; relationship between lived experiences of African people and understanding of their societies from afar; why Africa, more than any other region, is associated with warfare, hunger, and disease; idea of "Africa" in the world today; shared misunderstanding of life on continent contrasted with everyday lives of people who are not so different from ourselves. Same as GHS:2182.

## ANTH:2190 Love Rules: Law and the Family Across

 Cultures3 s.h.
Recent debates over legalizing gay marriage remind us that the law is not an abstract concept, it is a social creation that emphasizes certain cultural norms over others, both powerful and changeable; family law outlines what one cultural vision of relationships-those between lovers, parent and child, and between kin-supposedly should look like in a given society, a vision always marked by gendered, racial, and sexual divisions of power; students consider what happens when legal norms intersect with diverse ways that people make families through topics including marriage, divorce, custody, and surrogacy across the world. Same as GWSS:2190, IS:2190.

## ANTH:2191 Love, Sex, and Money: Sexuality and Exchange Across Cultures

Everything from pop songs to advertisements warn us of the evils of gold diggers, "blingsexuals," or "buyfriends"; in America, money is seen to corrupt the purity and authenticity of love and desire, but money also is an inevitable part of sex, love, and intimacy; crosscultural examination of how relationships between love, money, and sexuality are organized in different places; different ways people form relationships with lovers, spouses, and persons who enable childbearing; rethinking gender roles, work, value, and power. Same as GWSS:2900.

## ANTH:2208 Archaeological Methods

Current theoretical approaches, methods used to investigate the past; site formation processes, taphonomy, sampling and research design, typology and seriation, subsistence-settlement reconstruction, cultural evolution. Prerequisites: ANTH:1201.

## ANTH:2220 The Olmec, Maya, and Aztecs: Archaeology of Mesoamerica

 on Central Mexico, Maya area, Oaxaca. Same as LAS:2220.3 s.h. ANTH:2248 The Invention of Writing: From Cuneiform to Computers
Invention of writing as one of the most momentous events in the history of human civilizations; how the use of written sign systems, notations, maps, graphs, encryptions, and most recently, computer programs have consequences that reach deeply into all aspects of people's lives; how writing fascinates and delights, fosters reflexive thinking and facilitates development of complex societies, and gives rise to institutions of social power and control; students explore the invention of writing and its consequences in broad international and interdisciplinary context. Taught in English. Same as ASIA:2248, CL:2248, CLSA:2048, COMM:2248, GRMN:2248, HIST:2148, 3 s.h. IS:2248, LING:2248, TRNS:2248, WLLC:2248.

## ANTH:2261 Human Impacts on the Environment 3 s.h.

Long-term patterns of human-environment interactions surveyed through archaeological case studies; varied scales of human impacts, including animal extinction, habitat destruction, agricultural practices, urban growth, state-level societies. GE: Sustainability. GE: Social Sciences.

## ANTH:2265 Tools, Treasures, and Trash: Archaeology of the Material World <br> 3 s.h. <br> Different ways that archaeologists study material culture to gain insights into human lifeways and beliefs; consideration given to ways that people make objects and objects make people.

ANTH:2290 Practicum in Archaeology arr. Intensive, hands-on examination of a wide range of materials recently recovered from archaeological sites; pottery, lithics (stone tools and related items), plant remains, animal bones; for students with strong archaeological interests or archaeological field experience.

## ANTH:2320 Origins of Human Infectious Disease

Origin and evolution of important infectious diseases in human history; biological evolution of infectious agents and biocultural responses to emerging infectious diseases; primary focus on viruses and bacteria; selected world problems from an anthropological perspective; current dilemmas and those faced by diverse human groups in recent times and distant past. Same as GHS:2320.
ANTH:2390 Laboratory Methods in Biological Anthropology arr. Specimen preparation, cataloging, molding and casting, photography, computer analyses, library research.

## ANTH:3001 Introduction to Museum Studies 3 s.h

Overview of museum history, function, philosophy, collection, and curatorial practices; governance and funding issues; exhibition evaluation and audience studies; examples from Stanley Museum of Art, Museum of Natural History, Old Capitol Museum, and Medical Museum. GE: Social Sciences. Same as EDTL:3001, MUSM:3001, SIED:3001.

## ANTH:3015 Independent Study

arr.
ANTH:3017 Decolonizing Anthropology in Native North America
Anthropology is coming to terms with its rather strange combination of colonialist origins and anti-colonial/anti-racist themes, and these contradictions have generated well-earned criticism from Indigenous peoples; how Indigenous critiques have constructively called for changes that make anti-colonialism and anti-racism more central to the profession, and examination of how the profession is responding; works by Indigenous activists, artists, and scholars, including anthropologists; examples of ethnographic and archaeological research from regions of Native North America that complement those covered in ANTH:2165. Prerequisites: ANTH:1101 or ANTH:2165 or HIST:1049.

## ANTH:3101 Anthropology of Sexuality

Practice, definition, and regulation of sex in different cultures and times; use of anthropological tools, including cross-cultural comparison and social constructionist analysis; how social and historical forces shape sex; how a range of topics relate to sexuality, including science, love, work, globalization, ethnicity, health, aging, pornography, and deviance; focus on ways that dynamics (i.e., class, race, gender norms) shape people's culturally and historically specific ways of having and thinking about sex. Same as GWSS:3101.

## ANTH:3103 Environment and Culture

3 s.h.
Individual and group responses to scarcities of natural resources such as land, water, food.

## ANTH:3109 Culture, Mind, and Mental Health

Cultural diversity in constructions of self, mind, and emotion; religious experience, altered states of consciousness, behavioral disorders. Prerequisites: ANTH:1101.

ANTH:3110 Colonialism and Indigenous Health Equity 3 s.h. Health problems and services for Indigenous populations worldwide, from perspective of Fourth World postcolonial politics. Prerequisites: ANTH:1101 or ANTH:2165 or GHS:2000 or HIST:1049. Same as GHS:3110, NAIS:3110.

## ANTH:3113 Religion and Healing

3 s.h.
Historical evidence of religious healing in Christian, Hindu, Buddhist,
Native American, and Shaman traditions. Same as ASIA:3561,
GHS:3113, RELS:3580.

## ANTH:3117 Using Ethnographic Methods

3 s.h.
Ethnography, holistic, qualitative research in cultural
context for anthropological and related research and careers involving interpersonal interaction; multiple ethnographic methods and their rationales. Recommendations: desire to interact with others, and prior coursework in fields that employ ethnographic or qualitative research (social sciences, social work, nursing, public health).

## ANTH:3118 Politics of Reproduction <br> 3 s.h.

Examination of reproductive politics from historical, sociological, anthropological, and communicative perspectives; reproductive justice and bodily autonomy as key sites of feminist struggle in the United States and in global contexts; topical issues include abortion and birth control, assisted reproductive technologies, commercial surrogacy industries, LGBTQ family formation, and systems of reproductive violence. Same as COMM:3118, GWSS:3118.

ANTH:3121 Love, Marriage, and Family in India 3 s.h.
Anthropological understandings of love in India and the region of South Asia more broadly; emphasis on contemporary society; filial and motherly love, arranged marriage and romantic love, devotional and artistic expressions, love between siblings. Same as GWSS:3121.

## ANTH:3123 Making a Living: Perspectives on Economic Anthropology

3 s.h.
How different cultures and societies have organized allocation of work and goods; critical reflection of ongoing integration of world's societies into global market system; how it has become commonplace in the U.S. to believe that unemployment and debt are natural, inevitable aspects of human social organization during contemporary era; different approaches to division of work and resources among various groups of people in other societies; different approaches to dividing up society or world resources based on existing socioeconomic models.

## ANTH:3125 Transnational Feminism

3 s.h.
Exploration of feminist perspectives from the United States and outside of the United States; how geopolitics shapes understanding of familiar feminist issues (e.g., reproduction, cultural practices, sexualities, poverty); emphasis on global south regions and populations. Same as GWSS:3350, IS:3350.

How anthropologists and archaeologists study death, dying, mortuary rituals, and notions of the afterlife in contemporary North America and in different places and times. Prerequisites: ANTH:1201 or ANTH:1101. Requirements: ANTH:1101 or ANTH:1201 or graduate standing.

ANTH:3133 Anthropology of Race
3 s.h.
Anthropological perspectives on race: history of race in anthropology; social, cultural, and political dimensions of race; intersections with gender; biology of human diversity. Recommendations: introductory course in social sciences. Same as GWSS:3133, SJUS:3133.

## ANTH:3151 The Anthropology of the Beginnings and Ends of

 Life 3 s.h. Examination of diverse understandings of birth and death, drawing on anthropological analysis of personhood, kinship, ritual, and medicine; how social inequality and new technologies shape human experience at life's margins. Prerequisites: ANTH:1101 or ANTH:2100. Same as ASP:3151, GHS:3151.ANTH:3152 Anthropology of Caregiving and Health 3 s.h. Diverse understandings and practices of care around the world; focus on relationships between caregiving practices and health across the life course. Same as ASP:3152, GHS:3152.
ANTH:3190 Global Debt 3 s.h.
Economies as cultural systems that emphasize the role of worldviews and "meaning-making" in organizing economies; debt as a key mechanism in creation and maintenance of relationships; focus on how exchange, distribution, and obligation serve to shore up or sever various social institutions and links between debt, inequality, and power; debt in various forms, from a round of drinks to student loans, and from the U.S. mortgage crisis to development aid; diverse array of economies-from gift exchange to ceremonial destruction of wealth, and from Melanesia to Wall Street-to evaluate assumptions that undergird different systems of debt and credit. Requirements: introductory course in anthropology or international studies or gender, women's, and sexuality studies. Same as IS:3190, SJUS:3190.

ANTH:3199 Anthropology and Global Health Policy 3 s.h. Global health has grown as an area of practice and study, with wellbeing and livelihoods of increasing numbers of people now deeply influenced by these ideas, practices, and policies; students engage with ways that global health programs have influenced experiences of health and illness by those who participate in these programs, critically analyzing how global health interacts with local dynamics of inequality, race, gender, and power. Same as GHS:3199, IS:3198.

## ANTH:3204 Food in Ancient Mediterranean Society

3 s.h.
Practices and values influenced by consumption and production of food in ancient Mediterranean societies; varied topics, including methods of food production and distribution, hierarchies of status as associated with food, food and ethnic identity, food and health, food and religion; focus on classical Greek and Roman society, Egypt, the ancient Near East, and Persia. Recommendations: familiarity with Greek and Roman civilization and history. Same as CLSA:3836, HIST:3436.

ANTH:3207 Animal Bones in Archaeology 3 s.h. Use of faunal material in interpretation of archaeological remains, including skeletal anatomy, identification, taphonomy, determination of age and sex, seasonality, quantification, sampling, breakage and cutmarks, interpretations; laboratory sessions. Prerequisites: ANTH:1201.

ANTH:3237 Politics of the Archaeological Past
How control over management of material remains of the ancient past, and representations of that past, intersect with the identity of diverse groups, including archaeologists, Indigenous peoples, national governments, collectors, ethnic minorities and majorities, museum curators; struggles for control of the archaeological past at different scales (artifacts, skeletal remains, sites, imagery, narratives) and in different regions of the world. Same as HIST:3137, MUSM:3237.

## ANTH:3239 The Archaeology of the First Europeans

Archaeology of European societies between the Mesolithic and Iron Age; how ideas about Europe's prehistoric past have been used for political purposes.

## ANTH:3240 Cultural Resources Management Archaeology:

 Practice and PracticalitiesCultural Resources Management (CRM) archaeology is the largest sector of archaeological research in the United States in terms of employment, funding, field- and lab-related activity; students investigate the past and navigate complexities of compliance requirements from federal, state, and local regulations concerning historic preservation; introduction to legal, procedural, and practical foundations of CRM archaeology; preparation for employment by acquisition of skills from project planning through dissemination of results. Recommendations: completion of other anthropology, geography, history, or Native American studies courses. Same as NAIS:3240.
ANTH:3241 Lithic Analysis in Archaeology 3 s.h.
Archaeological issues examined and addressed with lithic data; use of lithic data to study the past, specific techniques applied.

ANTH:3243 Archaeology of the American Midcontinent 3 s.h. Survey of the archaeology of the American midcontinent for students interested in the past beyond what historical documents reveal; exploration of Late Pleistocene and Archaic hunter-gatherer adaptations, Woodland and Late Prehistoric horticulturalists, Middle and Upper Mississippian emergent chiefdoms, and historic period first contact, fur trade, and fort sites; how archaeologists utilize regional archaeological data in addressing culture change issues to develop the essential grounding for understanding how people lived in different times and places in the past, and how prehistoric peoples relate to their modern descendants across the midcontinent. Recommendations: ANTH:1201. Same as NAIS:3243.

ANTH:3255 Introduction to Archaeological Ceramics $\mathbf{3}$ s.h.
Introduction to ceramic analysis; focus on ceramics of Native North America; ceramics as an important line of evidence for past human activities (e.g., cooking, eating, feasting, trading, storage); students learn how archaeologists interpret broken ceramics from excavations by practicing various analytical techniques and conducting their own ceramic analysis.

## ANTH:3257 North American Archaeology

3 s.h.
Prehistoric cultural development north of Mexico from initial occupation to European contact and conquest; emphasis on dynamics of culture change. Same as NAIS:3257.

## ANTH:3258 Southwestern Archaeology

3 s.h.
Anthropological overview of prehistoric cultures of the American Southwest; emphasis on understanding archaeological arguments concerning major processes in the past. Same as NAIS:3258.

ANTH:3260 Pleistocene Peopling of the Americas
3 s.h.
Major themes in earliest human settlement of the Americas, including human mobility, subsistence, technology, human impacts on the environment.

## 3 s.h. ANTH:3261 Our Life With Dogs: The Anthropological Study of

 Animals in Human Societies3 s.h. Intricate connections between dogs and our social, economic, political, and spiritual lives; human relationships with dogs that extend back at least 16,000 years; process of dog domestication; roles dogs play in human ideology and past economies; modern interactions with dogs.

## ANTH:3265 Archaeology of the Great Plains 3 s.h

Contrasting lifeways, diets, and technologies that humans used to survive on North America's Great Plains, from Ice Age huntergatherers to Euramerican homesteaders.
ANTH:3275 The Archaeology of Ancient Egypt 3 s.h.
Introduction to the archaeology of ancient Egypt from predynastic times to Roman Egypt, including monumental architecture; patterns of everyday life; social, economic, and demographic considerations; history of archaeology in Egypt. Same as CLSA:3596.
ANTH:3276 Greek Archaeology and Ethnohistory 3 s.h.
Archaeology and ethnology of the Greek world, from end of Bronze Age to late Roman Empire; sociocultural processes that influence development and persistence of Greek civilization. Same as CLSA:3235.

ANTH:3277 Roman Archaeology 3 s.h.
Archaeology and ethnology of Roman civilization from Iron Age eighth-century occupation of the Palatine Hill to the end of the Roman Empire in the West, A.D. 476. Same as CLSA:3240.
ANTH:3278 Archaeology of Ancient Cities
Archaeological exploration of ancient world cities; physical plant, social institutions, regional context, cultural influence; major cities considered include Uruk, Luxor, Athens, Rome, Alexandria, Kyongju, Loyang, Teotihuacan, and Tenochtitlan.
ANTH:3295 Field Research in Archaeology arr
Beginning skills in site surveying and excavation, lab work, record keeping at nearby prehistoric sites.
ANTH:3300 Mothers and Motherhood 3 s.h.
Treatment of motherhood; role of motherhood and devaluation of social status. Same as GWSS:3300.
ANTH:3305 Human Osteology
The human skeletal system; normal and pathologic variation; skeletal measurement and analysis with application to paleoanthropology, forensic, and archaeological investigations.
ANTH:3306 The Neanderthal Enigma 3 s.h. Survey of Neanderthals as the most widely known, yet enigmatic, fossil human lineage; history of discoveries; current interpretations of Neanderthal's origins, anatomy and behavior, relationship to today's people, extinction.
ANTH:3307 Modern Human Origins
3 s.h.
Current data and theories regarding the emergence of Homo sapiens; how human anatomical modernity is defined and recognized in the fossil record; competing models for modern humans' emergence -multiregional evolution, out of Africa, the assimilation model; interpretation of recent developments and discoveries in the human fossil record; contemporary contributions from genetics, developmental biology, evolutionary ecology, paleodemography.
ANTH:3308 Human Variation 3 s.h.
Range and patterning of biological diversity in contemporary human populations; past and present attempts to organize and explain human genetic, morphological variation in light of recent data, theory.

ANTH:3325 Human Evolutionary Genetics 3 s.h.
Application of molecular methods and theory to biological anthropology; how recent advances in genetics have provided insight into the evolution of human and nonhuman primates. Prerequisites: ANTH:1301.

## ANTH:3328 Molecular Genetics of Human Disease

Disease as an unfortunate, but unavoidable, aspect of human condition; genetic nature of disease that reveals origins of inherited disease; variation of disease across the globe. Recommendations: biology or genetics course to provide substantial background knowledge.

ANTH:3821 City of Athens: Bronze Age to Roman World 3 s.h. Athens from Bronze Age to end of Roman period; topics include the city's role in development of political democracy and religion, as well as the art and archaeology of the city. Same as CLSA:3821, HIST:3403.

## ANTH:4080 Anthropology Internship

arr.
Internship opportunity for work experience in student's field of interest; formal internship agreement established between sponsoring institution, student, and UI anthropology faculty that specifies duties and objectives of internship; internship supervisor at sponsoring institution evaluates student performance and reports directly to UI anthropology faculty. Requirements: anthropology major.
ANTH:4140 Feminist Activism and Global Health 3 s.h.
How female gender intersects with culture, environment, and political economy to shape health and illness; reproductive health, violence, drug use, cancer; readings in anthropology, public health. Prerequisites: ANTH:1101 or GWSS:1001 or CPH:1400 or GHS:2000. Same as CBH:4140, GHS:4140, GWSS:4140.
ANTH:4315 Human Evolutionary Anatomy 3 s.h.
Interpretation of skeletal remains as the basis for reconstructing forms, adaptations, lifestyles of prehistoric humans; body size, musculature, stance, activity patterns, brain size, and sexual dimorphism. Prerequisites: ANTH:3305.

## ANTH:4700 Latin American Studies Seminar 3-4 s.h. <br> Examination of past, present, and future of Latin America; interdisciplinary. Taught in English. Same as HIST:4504, LAS:4700, PORT:4700, SPAN:4900.

ANTH:4995 Honors Research Seminar 2-4 s.h. Preparation for writing honors thesis, including project conception and research, proposal writing, oral and written presentations of student research. Corequisites: ANTH:4996, if not taken as a prerequisite. Requirements: honors standing in anthropology.

## ANTH:4996 Honors Research <br> 2-4 s.h.

Project chosen in consultation with honors advisor.

## ANTH:5001 Graduate Teaching Proseminar

Graduate student teaching skills: developing course guidelines, leading discussion, grading, review sessions, dealing with problem students and complaints; development of syllabi and teaching portfolios; mentoring of less-experienced teaching assistants.
ANTH:5101 Seminar Sociocultural Anthropology 3 s.h.
Social institutions in the world's societies; problems in theory, method, interpretation. Requirements: graduate standing or undergraduate anthropology honors standing.
ANTH:5110 Anthropological Data Analysis 3 s.h.
Applied statistics for quantitative analysis of anthropological data, including field notes, library materials, and archaeological information; introduction to elementary statistics and computational methods; discussion of hypothesis testing and correlation; emphasis on proper use and interpretation of statistical methods in anthropological research.
ANTH:5120 Reading Transnational Feminist Theory 3 s.h. Issues in transnational feminist scholarship, including coloniality and globalization as related to domains of gendered work, cultural traditions, and development; interdisciplinary readings-including from qualitative social science-consider connections across the Global North and South. Same as GWSS:5120.

3 s.h. ANTH:5135 Space, Place, and Identity 3 s.h.
Draws on insights from ethnographic inquiry to challenge accepted definitions of space, place, and identity to broaden our understanding of how we are shaping our world.
ANTH:5201 Seminar: Archaeological Theory and Method 3 s.h. Development, current status of theory, method in Americanist archaeology. Requirements: graduate standing or undergraduate anthropology honors standing.
ANTH:5301 Seminar: Biological Anthropology 3 s.h.
Physical anthropology, including heredity and genetics, evolutionary theory, human biological characteristics, primate and human fossil record, primate behavior and ecology, human adaptations. Requirements: graduate standing or undergraduate anthropology honors standing.

ANTH:5401 Seminar: Linguistic Anthropology 3 s.h.
Fundamental concepts and methods employed in the anthropological study of language; principal areas of current research. Requirements: graduate standing or undergraduate anthropology honors standing.

ANTH:6005 Independent Study: Anthropology arr.
ANTH:6010 Research: Anthropology arr.
ANTH:6015 Thesis arr.
ANTH:6020 Seminar: Advanced Theory in Anthropology 3 s.h. Opportunity to engage with advanced readings in anthropology; students enrich their theoretical training beyond the level provided in core/introductory graduate seminars in each subfield; topics and subfields vary. Recommendations: MA or PhD standing, and previous graduate-level coursework in anthropology.

ANTH:6115 Ethnographic Field Methods 3 s.h.
Basic data-gathering techniques for field research in sociocultural anthropology. Same as CBH:6115.
ANTH:6410 Seminar: Semiotics
3 s.h.
Piercian semiotic and Saussurean semiological conceptual frameworks; focus on anthropological, linguistic issues.

ANTH:6415 Seminar: Language, Gender, and Sexuality 3 s.h. Role of language and discourse in cultural constructions of gender identities and relations, including domination and subordination; theoretical perspective and methodological approaches that have shaped thought on the language/gender nexus. Same as GWSS:6415, LING: 6415.

ANTH:6635 Crossing Borders Seminar $\quad \mathbf{2 - 3}$ s.h. Taught in English. Same as AFAM:6635, COMM:6635, ENGL:6635, FREN:6142, GEOG:6635, GRMN:6635, HIST:6135, IWP:6635, POLI:6635, SPAN:6904.

ANTH:7110 Research Design and Proposal Writing 3 s.h.
Anthropological research design; preparation of proposals for fieldwork or laboratory analysis.
ANTH: 7414 Slavery and Social Death: 1200 B.C.E. to 18653 s.h.
C.E. C.E. 3 s.h.
Exploration of various slave systems in antiquity, the middle ages, and modernity in terms of their motivations, utilization, and broader social, economic, and political implications; use of literary sources and archaeological remains to investigate slave cultures in ancient Near East and Egypt, Jewish exploitation of enslaved persons, and use of chattel slavery in Greek, Roman, early Christian, and Islamic societies; antebellum U.S. slavery. Same as CLSA:7114, HIST:7414.

## ANTH:7501 Dissertation Writing Seminar

 1 s.h.Organization of dissertation, setting and meeting deadlines, writing a chapter, and workshopping drafts; seminar group work and consultation with advisors; completion and revision of at least one dissertation chapter; for anthropology graduate students who are beginning, or about to begin, their dissertation writing process. Requirements: anthropology graduate student who passed comprehensive exams (prospectus and essays).

## Anthropology, BA

## Learning Outcomes

Students should be able to:

- describe a broad range of changing and diverse human experiences and practices across time and space;
- demonstrate how diverse cultural backgrounds and structural inequalities, including race, gender, class, and other socially constructed categories of difference, relate to peoples' beliefs, experiences, and practices;
- explain the evolutionary perspective as it pertains to human and nonhuman primates, including origins, behavior, ecology, and biocultural variation;
- apply anthropological research tools to collect and interpret data; and
- communicate anthropological concepts and findings.

## Requirements

The Bachelor of Arts with a major in anthropology requires a minimum of 120 s.h., including 33 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major.

Students also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. Anthropology courses that fulfill GE CLAS Core requirements are located under "Anthropology GE CLAS Core Courses" in the Department of Anthropology [p. 65] section of the catalog.
The BA is designed to offer a comprehensive overview of anthropology's four main subfields and the broadest possible crosscultural background.

Students may choose to complete one of four specialized tracks: gender and culture, cultural resource and heritage management, environmental anthropology, or medical anthropology. See "Optional Undergraduate Tracks" below.

Undergraduates majoring in anthropology, including transfer students, must earn a minimum of 15 s.h. for the major at the University of Iowa. Students may apply credit earned at approved field schools offered by other institutions toward the major, with Department of Anthropology approval.

Students who declare anthropology as their major when they are admitted to the College of Liberal Arts and Sciences are advised at the Academic Advising Center until they have earned 30 s.h. Students who have earned more than 30 s.h. are advised by the departmental undergraduate advisor.

The BA with a major in anthropology requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Common Requirements | 24 |
| Electives | 9 |
| Optional Undergraduate Track |  |

## Common Requirements

Students must complete 11 courses from the lists below: five introductory courses, one course in archaeology or biological anthropology, one course in sociocultural or linguistic anthropology, one course in area studies, and a minimum of 9 s.h. in elective anthropology (prefix ANTH) courses numbered 2000 or above. Several courses are listed in more than one of these categories;
students may not select the same course to fulfill requirements in more than one category.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Introductory Courses |  |  |
| All of these: |  |  |
| ANTH:1001 | Issues in Anthropology | 3 |
| ANTH:1101 | Cultural Anthropology | 3 |
| ANTH:1201 | World Archaeology | 3 |
| ANTH:1301 | Human Origins | 3 |
| ANTH:1401 | Language, Culture, and Communication | 3 |
| Archaeology or Biological Anthropology (Area or Topical) |  |  |
| One of these: |  |  |
| ANTH:2166 | Arts of Native North America | 3 |
| ANTH:2208 | Archaeological Methods | 3 |
| ANTH:2220 | The Olmec, Maya, and Aztecs: Archaeology of Mesoamerica | 3 |
| ANTH:2261 | Human Impacts on the Environment | 3 |
| ANTH:2265 | Tools, Treasures, and Trash: Archaeology of the Material World | 3 |
| ANTH:2290 | Practicum in Archaeology | arr. |
| ANTH:2320 | Origins of Human Infectious Disease | 3 |
| ANTH:2390 | Laboratory Methods in Biological Anthropology | arr. |
| ANTH:3204 | Food in Ancient Mediterranean Society | 3 |
| ANTH:3207 | Animal Bones in Archaeology | 3 |
| ANTH:3237 | Politics of the Archaeological Past | 3 |
| ANTH:3239 | The Archaeology of the First Europeans | 3 |
| ANTH:3240 | Cultural Resources <br> Management Archaeology: <br> Practice and Practicalities | 3 |
| ANTH:3241 | Lithic Analysis in Archaeology | 3 |
| ANTH:3243 | Archaeology of the American Midcontinent | 3 |
| ANTH:3255 | Introduction to Archaeological Ceramics | 3 |
| ANTH:3257 | North American Archaeology | 3 |
| ANTH:3258 | Southwestern Archaeology | 3 |
| ANTH:3260 | Pleistocene Peopling of the Americas | 3 |
| ANTH:3261 | Our Life With Dogs: The Anthropological Study of Animals in Human Societies | 3 |
| ANTH:3265 | Archaeology of the Great Plains | 3 |
| ANTH:3275 | The Archaeology of Ancient Egypt | 3 |
| ANTH:3276 | Greek Archaeology and Ethnohistory | 3 |
| ANTH:3277 | Roman Archaeology | 3 |
| ANTH:3278 | Archaeology of Ancient Cities | 3 |
| ANTH:3295 | Field Research in Archaeology | arr. |
| ANTH:3305 | Human Osteology | 3 |
| ANTH:3306 | The Neanderthal Enigma | 3 |

| ANTH:3307 | Modern Human Origins | 3 |
| :---: | :---: | :---: |
| ANTH:3308 | Human Variation | 3 |
| ANTH:3325 | Human Evolutionary Genetics | 3 |
| ANTH:3328 | Molecular Genetics of Human Disease | 3 |
| ANTH:4080 | Anthropology Internship | rr. |
| ANTH:4315 | Human Evolutionary Anatomy | 3 |
| Sociocultural or Linguistic Anthropology |  |  |
| One of these: |  |  |
| ANTH:2102 | Anthropology of Marriage and Family | 3 |
| ANTH:2103 | Introduction to Global Health Studies | 3 |
| ANTH:2105 | Cultural Worlds of Science and Scientists | 3 |
| ANTH:2108 | Gendering India | 3 |
| ANTH:2136 | Race, Place, and Power: Urban Anthropology | 3 |
| ANTH:2140 | Food, Drink, and Culture | 3 |
| ANTH:2151 | Global Migration in the Contemporary World | 3 |
| ANTH:2160 | Culture, Health, and Wellness: Southeast Asia in Focus | 3 |
| ANTH:2164 | Culture and Healing: An Introduction to Medical Anthropology | 3 |
| ANTH:2165 | Native Peoples of North America | 3 |
| ANTH:2181 | The Anthropology of Aging | 3 |
| ANTH:2182 | Africa: Health and Society | 3 |
| ANTH:2190 | Love Rules: Law and the Family Across Cultures | 3 |
| ANTH:2191 | Love, Sex, and Money: Sexuality and Exchange Across Cultures | 3 |
| ANTH:3017 | Decolonizing Anthropology in Native North America | 3 |
| ANTH:3101 | Anthropology of Sexuality | 3 |
| ANTH:3103 | Environment and Culture | 3 |
| ANTH:3109 | Culture, Mind, and Mental Health | 3 |
| ANTH:3110 | Colonialism and Indigenous Health Equity | 3 |
| ANTH:3113 | Religion and Healing | 3 |
| ANTH:3117 | Using Ethnographic Methods | 3 |
| ANTH:3118 | Politics of Reproduction | 3 |
| ANTH:3121 | Love, Marriage, and Family in India | 3 |
| ANTH:3123 | Making a Living: Perspectives on Economic Anthropology | 3 |
| ANTH:3125 | Transnational Feminism | 3 |
| ANTH:3127 | Anthropology of Death | 3 |
| ANTH:3133 | Anthropology of Race | 3 |
| ANTH:3151 | The Anthropology of the Beginnings and Ends of Life | 3 |
| ANTH:3152 | Anthropology of Caregiving and Health | 3 |
| ANTH:3190 | Global Debt | 3 |
| ANTH:3300 | Mothers and Motherhood | 3 |

| ANTH:4140 | Feminist Activism and Global Health | 3 |
| :---: | :---: | :---: |
| Area Studies |  |  |
| One of these: |  |  |
| ANTH:2108 | Gendering India | 3 |
| ANTH:2160 | Culture, Health, and Wellness: Southeast Asia in Focus | 3 |
| ANTH:2165 | Native Peoples of North America | 3 |
| ANTH:2166 | Arts of Native North America | 3 |
| ANTH:2182 | Africa: Health and Society | 3 |
| ANTH:2220 | The Olmec, Maya, and Aztecs: Archaeology of Mesoamerica | 3 |
| ANTH:3017 | Decolonizing Anthropology in Native North America | 3 |
| ANTH:3121 | Love, Marriage, and Family in India | 3 |
| ANTH:3239 | The Archaeology of the First Europeans | 3 |
| ANTH:3243 | Archaeology of the American Midcontinent | 3 |
| ANTH:3257 | North American Archaeology | 3 |
| ANTH:3258 | Southwestern Archaeology | 3 |
| ANTH:3260 | Pleistocene Peopling of the Americas | 3 |
| ANTH:3265 | Archaeology of the Great Plains | 3 |
| ANTH:3275 | The Archaeology of Ancient Egypt | 3 |
| ANTH:3276 | Greek Archaeology and Ethnohistory | 3 |
| ANTH:3277 | Roman Archaeology | 3 |
| ANTH:3306 | The Neanderthal Enigma | 3 |
| ANTH:4700 | Latin American Studies Seminar | -4 |

## Electives

Anthropology electives offer many options, including courses dealing with environment and culture, expressive culture (art, verbal arts, literature, music, and dance), gender and sexuality, human evolution, human osteology, human prehistory, identity, language and culture, medical anthropology, molecular genetics, primatology, psychological anthropology, religion and ritual, and urban anthropology. Department faculty members offer area studies courses that focus on Europe, South Asia, and Native North America.

| Course \# Title | Hours |
| :--- | :--- |
| A minimum of 9 s.h. in elective anthropology courses |  |
| (prefix ANTH) numbered 2000 or above |  |

## Additional Requirements

Students are strongly encouraged to take courses and participate in archaeological field and laboratory research, biological anthropology laboratory research, ethnographic research methods in sociocultural anthropology, and multimedia research in linguistic anthropology.

## Optional Undergraduate Tracks

Students have the option of adding a particular focus to their study plan by completing a specialized track. They may choose one of four options: gender and culture [p. 74], cultural resource and heritage management [p. 74], environmental anthropology [p. 74], or medical anthropology [p. 75].
The optional tracks reflect broad issues bridging subfields in and outside of anthropology. Completion of a track indicates the
acquisition of considerable expertise and is noted on a student's transcript.

The optional tracks each require 15 s.h. (five courses). By selecting courses carefully, students majoring in anthropology can complete a specialization track without adding to the semester hours required for graduation.

## Gender and Culture Track

Anthropological research regarding gender and sexuality has grown dramatically in recent years, enhancing and drawing from other theoretical and methodological approaches in anthropology. This research contributes a cross-cultural perspective to discussions surrounding these fundamental aspects of human experience, both in academia and in public life.

The gender and culture track requires 15 s.h. (five courses) chosen from the following list. Each course provides an integrated overview of essential theoretical and topical issues in the field.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Five of these: |  |  |
| ANTH:2102 | Anthropology of Marriage and Family | 3 |
| ANTH:2108 | Gendering India | 3 |
| ANTH:2151 | Global Migration in the Contemporary World | 3 |
| ANTH:2190 | Love Rules: Law and the Family Across Cultures | 3 |
| ANTH:2191 | Love, Sex, and Money: Sexuality and Exchange Across Cultures | 3 |
| ANTH:3101 | Anthropology of Sexuality | 3 |
| ANTH:3118 | Politics of Reproduction | 3 |
| ANTH:3121 | Love, Marriage, and Family in India | 3 |
| ANTH:3125 | Transnational Feminism | 3 |
| ANTH:3133 | Anthropology of Race | 3 |
| ANTH:3151 | The Anthropology of the Beginnings and Ends of Life | 3 |
| ANTH:3152 | Anthropology of Caregiving and Health | 3 |
| ANTH:3300 | Mothers and Motherhood | 3 |
| ANTH:4140 | Feminist Activism and Global Health | 3 |

## Cultural Resource and Heritage Management Track

In North America and throughout much of the rest of the world, modern land use continually threatens evidence of past land use. Most archaeological excavations are conducted as cultural resource management (CRM), so it is essential that all researchers who work with archaeological data and individuals committed to site preservation have a basic understanding of CRM. Students who choose this emphasis learn about the field and about how to address related ethical issues as well as technical and theoretical challenges.
The cultural resource and heritage management track requires 15 s.h. (five courses): a fundamental overview course, two area electives, a technical/practical elective, and a field school course. Students may use some of these courses to satisfy requirements for the major, such as the course in archaeology and the electives.

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| Overview |  |  |

## Overview

This course:

| ANTH:3240 | Cultural Resources <br> Management Archaeology: <br> Practice and Practicalities |
| :--- | :--- |

## Area Electives

Two of these (or one of these and one other Department of Anthropology area course):

| ANTH:2165 | Native Peoples of North <br> America | 3 |
| :--- | :--- | :--- |
| ANTH:2166 | Arts of Native North America | 3 |
| ANTH:3243 | Archaeology of the American <br> Midcontinent | 3 |
| ANTH:3257 | North American Archaeology | 3 |
| ANTH:3258 | Southwestern Archaeology | 3 |
| ANTH:3260 | Pleistocene Peopling of the <br> Americas | 3 |
| ANTH:3265 | Archaeology of the Great Plains | 3 |

Technical/Practical Elective

One of these:
ANTH:2208 Archaeological Methods 3
ANTH:2265 Tools, Treasures, and Trash: 3

|  | World |
| :--- | :--- |
| ANTH:2290 | Practicum in Archaeology arr. |

ANTH:3207 Animal Bones in Archaeology 3

ANTH:3237 | Politics of the Archaeological |
| :--- | :--- |
| Past |

ANTH:3241 Lithic Analysis in Archaeology 3
ANTH:3255 Introduction to Archaeological 3
ANTH:3305 Human Osteology 3

Field School
One of these:
ANTH:3295 Field Research in Archaeology arr.

An equivalent course from another university

## Environmental Anthropology Track

The interaction between humans and the environments they inhabit has long been a central issue in anthropology, and environmental degradation is a worldwide concern today. Pollution, loss of biodiversity, and global warming recognize no political boundaries, but attitudes and behaviors involving the natural environment vary widely from culture to culture. The understanding and incorporation of these varied perspectives are vital to the development and successful use of workable solutions.

The environmental anthropology track requires 15 s.h. (five courses): two theory courses, which deal primarily with human-environmental interactions; and three area or topical electives, which deal in part with the environment, ecology, and subsistence technologies. The following are sample courses in each area (courses must be numbered 2000 or above).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Theory Courses |  | 3 |
| Both of these: | Human Impacts on the <br> ANTH:2261 | Environment |

## Area or Topical Electives

Three of these:
ANTH:2140 Food, Drink, and Culture 3

| ANTH:2220 | The Olmec, Maya, and Aztecs: <br> Archaeology of Mesoamerica <br> Making a Living: Perspectives <br> on Economic Anthropology | 3 |
| :--- | :--- | :--- |
| ANTH:3123 | Animal Bones in Archaeology <br> The Archaeology of the First <br> Europeans | 3 |
| ANTH:3207 | 3 |  |
| ANTH:3239 | Archaeology of the American <br> Midcontinent | 3 |
| ANTH:3243 | Our Life With Dogs: The | 3 |
| ANTH:3261 | Anthropological Study of <br> Animals in Human Societies |  |
| ANTH:3265 | Archaeology of the Great Plains | 3 |
| ANTH:3275 | The Archaeology of Ancient | 3 |
| ANTH:3277 | Egypt <br> Roman Archaeology | 3 |
| ANTH:3278 | Archaeology of Ancient Cities | 3 |

## Medical Anthropology Track

Human experiences of sickness and suffering are universal yet profoundly shaped by cultural and historical contexts. Medical anthropology explores cultural and biological diversity in sickness, health, and healing through approaches that include examining individual experiences of disrupted well-being, considering how biological and cultural factors interact to promote health or produce sickness, analyzing political/economic causes of health inequalities, and applying research to improve health research and services in an increasingly global world. Coursework in medical anthropology helps students prepare for a range of health professions and social services careers and for work in diverse settings that increasingly include nongovernmental organizations devoted to improving health. Future health professionals are increasingly called upon to understand how sociocultural and biological factors intersect to produce experiences of health, sickness, and healing.

The medical anthropology track requires 15 s.h. (five courses): an introductory course plus four electives that focus on health-related topics. Electives include 2000- and 3000-level intermediate courses that apply medical anthropology to specific topics, as well as more advanced 4000-level courses that help students to engage with more complex topics in this field. Students can choose to mix intermediate and advanced electives in ways that best meet their interests and goals.

| Course \# | Title |
| :--- | :--- |
| Overview |  |
| This introductory course: |  |
| ANTH:2164 | Culture and Healing: An <br>  <br>  <br>  <br>  <br> Introduction to Medical <br> Anthropology |

## Electives

Four intermediate and advanced courses from these:

| ANTH:2160 | Culture, Health, and Wellness: Southeast Asia in Focus | 3 |
| :---: | :---: | :---: |
| ANTH:2181 | The Anthropology of Aging | 3 |
| ANTH:2182 | Africa: Health and Society | 3 |
| ANTH:2320 | Origins of Human Infectious Disease | 3 |
| ANTH:3101 | Anthropology of Sexuality | 3 |
| ANTH:3109 | Culture, Mind, and Mental Health | 3 |
| ANTH:3110 | Colonialism and Indigenous Health Equity | 3 |
| ANTH:3113 | Religion and Healing | 3 |
| ANTH:3118 | Politics of Reproduction | 3 |

| ANTH:3133 | Anthropology of Race | 3 |
| :--- | :--- | :--- |
| ANTH:3151 | The Anthropology of the <br> Beginnings and Ends of Life | 3 |
| ANTH:3152 | Anthropology of Caregiving and <br> Health | 3 |
| ANTH:3199 | Anthropology and Global <br> ANTH:3325 | Health Policy |
| ANTH:3328 | Molecular Genetics of Human <br> Disease | 3 |
| ANTH:4140 | Feminist Activism and Global <br> Health | 3 |
|  |  | 3 |

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Honors

## Honors in the Major

Students majoring in anthropology have the opportunity to graduate with honors in the major. Departmental honors students must have a grade-point average (GPA) of at least 3.50 in anthropology coursework and a cumulative University of Iowa GPA of at least 3.33. They must conduct an independent research project that culminates in a 30-50 page thesis. The project includes the completion of 6 s.h. divided between ANTH:4995 Honors Research Seminar (offered only in fall semesters) and ANTH:4996 Honors Research, typically taken the next semester. Honors students also must take one of their anthropology courses at the graduate level.

Contact the department's director of undergraduate studies to learn more about honors in anthropology.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the anthropology major.

## Career Advancement

The major in anthropology prepares individuals for advanced training or careers in anthropology, allied fields, and professional programs. Students who complete an anthropology major gain special understanding of human relations and expertise for jobs involving international or cross-cultural work, cultural resource management, and in responding to social and ethnic diversity, whether in the United States or globally.

Upon graduation, anthropology majors embark on careers in government, international affairs, conservation, economic development, public health, cultural resource management, planning and public affairs, social work, museum work, and education. Many go on to help resolve contemporary world problems by working with
international or domestic organizations such as AmeriCorps, the Peace Corps, and Teach for America. Some pursue graduate study in anthropology or related social and natural sciences, while others earn degrees in business, law, or the health professions.

The Pomerantz Career Center also offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan.

Before the fifth semester begins: at least two courses in the major.
Before the seventh semester begins: at least seven courses in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: at least eight courses in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Students may only use three ANTH courses to satisfy GE CLAS Core requirements.
c Fulfills a major requirement and may fulfill a GE requirement.
d Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages
requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
e Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
f GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
g Students have the option to choose one of four tracks in the major: gender and culture, cultural resource and heritage management, environmental anthropology, or medical anthropology. Courses must be numbered 2000 or above.
h Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Anthropology, BS

## Learning Outcomes

Students should be able to:

- describe a broad range of changing and diverse human experiences and practices across time and space;
- demonstrate how diverse cultural backgrounds and structural inequalities, including race, gender, class, and other socially constructed categories of difference, relate to peoples' beliefs, experiences, and practices;
- understand the evolutionary perspective as it pertains to human and nonhuman primates, including origins, behavior, ecology, and biocultural variation;
- apply anthropological research tools to collect and interpret data; and
- communicate anthropological concepts and findings.

## Requirements

The Bachelor of Science with a major in anthropology requires a minimum of 120 s.h., including a minimum of 39 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major.
Students also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. Anthropology courses that fulfill GE CLAS Core requirements are located under "Anthropology GE CLAS Core Courses" in the Department of Anthropology [p. 65] section of the catalog.
The BS is appropriate for students with interests in any of anthropology's subfields; it offers enhanced opportunities to gain experience and develop skills in research methods and scientific reasoning.

Students may choose to complete one of four specialized tracks: gender and culture, cultural resource and heritage management, environmental anthropology, or medical anthropology. See "Optional Undergraduate Tracks" below.

Undergraduates majoring in anthropology, including transfer students, must earn a minimum of 15 s.h. for the major at the University of Iowa. Students may apply credit earned at approved field schools offered by other institutions toward the major, with Department of Anthropology approval.

Students who declare anthropology as their major when they are admitted to the College of Liberal Arts and Sciences are advised at the Academic Advising Center until they have earned 30 s.h. Students who have earned more than 30 s.h. are advised by the departmental undergraduate advisor.
The BS with a major in anthropology requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Common Requirements | 24 |
| Electives | 9 |
| Quantitative, Mathematical, or Formal Reasoning Tool | $3-4$ |
| Directed Laboratory or Field Research | 3 |
| Allied Field |  |
| Optional Undergraduate Track |  |

## Common Requirements

Students must complete 11 courses from the lists below: five introductory courses, one course in archaeology or biological
anthropology, one course in sociocultural or linguistic anthropology, one course in area studies, and a minimum of 9 s.h. of elective anthropology courses (prefix ANTH) numbered 2000 or above. Several courses are listed in more than one of these categories; students may not select the same course to fulfill requirements in more than one category.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Introductory Courses |  |  |
| All of these: |  |  |
| ANTH:1001 | Issues in Anthropology | 3 |
| ANTH:1101 | Cultural Anthropology | 3 |
| ANTH:1201 | World Archaeology | 3 |
| ANTH:1301 | Human Origins | 3 |
| ANTH:1401 | Language, Culture, and Communication | 3 |
| Archaeology or Biological Anthropology (Area or Topical) |  |  |
| One of these: |  |  |
| ANTH:2166 | Arts of Native North America | 3 |
| ANTH:2208 | Archaeological Methods | 3 |
| ANTH:2220 | The Olmec, Maya, and Aztecs: Archaeology of Mesoamerica | 3 |
| ANTH:2261 | Human Impacts on the Environment | 3 |
| ANTH:2265 | Tools, Treasures, and Trash: Archaeology of the Material World | 3 |
| ANTH:2290 | Practicum in Archaeology | arr. |
| ANTH:2320 | Origins of Human Infectious Disease | 3 |
| ANTH:2390 | Laboratory Methods in Biological Anthropology | arr. |
| ANTH:3204 | Food in Ancient Mediterranean Society | 3 |
| ANTH:3207 | Animal Bones in Archaeology | 3 |
| ANTH:3237 | Politics of the Archaeological Past | 3 |
| ANTH:3239 | The Archaeology of the First Europeans | 3 |
| ANTH:3240 | Cultural Resources <br> Management Archaeology: <br> Practice and Practicalities | 3 |
| ANTH:3241 | Lithic Analysis in Archaeology | 3 |
| ANTH:3243 | Archaeology of the American Midcontinent | 3 |

| ANTH:2103 | Introduction to Global Health Studies | 3 |
| ANTH:2105 | Cultural Worlds of Science and Scientists | 3 |
| ANTH:2108 | Gendering India | 3 |
| ANTH:2136 | Race, Place, and Power: Urban Anthropology | 3 |
| ANTH:2140 | Food, Drink, and Culture | 3 |
| ANTH:2151 | Global Migration in the Contemporary World | 3 |
| ANTH:2160 | Culture, Health, and Wellness: <br> Southeast Asia in Focus | 3 |
| ANTH:2164 | Culture and Healing: An Introduction to Medical Anthropology | 3 |
| ANTH:2165 | Native Peoples of North America | 3 |
| ANTH:2181 | The Anthropology of Aging | 3 |
| ANTH:2182 | Africa: Health and Society | 3 |
| ANTH:2190 | Love Rules: Law and the Family Across Cultures | 3 |
| ANTH:2191 | Love, Sex, and Money: Sexuality and Exchange Across Cultures | 3 |
| ANTH:3017 | Decolonizing Anthropology in Native North America | 3 |
| ANTH:3101 | Anthropology of Sexuality | 3 |
| ANTH:3103 | Environment and Culture | 3 |
| ANTH:3109 | Culture, Mind, and Mental Health | 3 |
| ANTH:3110 | Colonialism and Indigenous Health Equity | 3 |
| ANTH:3113 | Religion and Healing | 3 |
| ANTH:3117 | Using Ethnographic Methods | 3 |
| ANTH:3118 | Politics of Reproduction | 3 |
| ANTH:3121 | Love, Marriage, and Family in India | 3 |
| ANTH:3123 | Making a Living: Perspectives on Economic Anthropology | 3 |
| ANTH:3125 | Transnational Feminism | 3 |
| ANTH:3127 | Anthropology of Death | 3 |
| ANTH:3133 | Anthropology of Race | 3 |
| ANTH:3151 | The Anthropology of the Beginnings and Ends of Life | 3 |
| ANTH:3152 | Anthropology of Caregiving and Health | 3 |

| ANTH:3190 | Global Debt | 3 |
| :---: | :---: | :---: |
| ANTH:3300 | Mothers and Motherhood | 3 |
| ANTH:4140 | Feminist Activism and Global Health | 3 |
| Area Studies |  |  |
| One of these: |  |  |
| ANTH:2108 | Gendering India | 3 |
| ANTH:2160 | Culture, Health, and Wellness: <br> Southeast Asia in Focus | 3 |
| ANTH:2165 | Native Peoples of North America | 3 |
| ANTH:2166 | Arts of Native North America | 3 |
| ANTH:2182 | Africa: Health and Society | 3 |
| ANTH:2220 | The Olmec, Maya, and Aztecs: Archaeology of Mesoamerica | 3 |
| ANTH:3017 | Decolonizing Anthropology in Native North America | 3 |
| ANTH:3121 | Love, Marriage, and Family in India | 3 |
| ANTH:3239 | The Archaeology of the First Europeans | 3 |
| ANTH:3243 | Archaeology of the American Midcontinent | 3 |
| ANTH:3257 | North American Archaeology | 3 |
| ANTH:3258 | Southwestern Archaeology | 3 |
| ANTH:3260 | Pleistocene Peopling of the Americas | 3 |
| ANTH:3265 | Archaeology of the Great Plains | 3 |
| ANTH:3275 | The Archaeology of Ancient Egypt | 3 |
| ANTH:3276 | Greek Archaeology and Ethnohistory | 3 |
| ANTH:3277 | Roman Archaeology | 3 |
| ANTH:3306 | The Neanderthal Enigma | 3 |
| ANTH:4700 | Latin American Studies Seminar | 3-4 |

## Electives

Anthropology electives offer many options, including courses dealing with environment and culture, expressive culture (art, verbal arts, literature, music, and dance), gender and sexuality, human evolution, human osteology, human prehistory, identity, language and culture, medical anthropology, molecular genetics, primatology, psychological anthropology, religion and ritual, and urban anthropology. Department faculty members offer area studies courses that focus on Latin America, Europe, Japan, South Asia, and Native North America.

$$
\begin{array}{lll}
\text { Course \# Title } & \text { Hours }
\end{array}
$$

A minimum of 9 s.h. in elective anthropology courses (prefix ANTH) numbered 2000 or above

## Additional Requirements

Students must fulfill additional requirements in the following three areas:

- quantitative, mathematical, or formal reasoning tool;
- directed laboratory or field research; and
- allied topical coursework.

## Quantitative, Mathematical, or Formal Reasoning Tool

Students must complete one course (a minimum of 3 s.h.) in statistics, computing, logic, and/or mathematics in addition to the course they
take to fulfill the GE CLAS Core [p. 19] Quantitative and Formal Reasoning requirement. The department accepts the following courses to fulfill the tool requirement. Students who would like to use other courses should consult their advisors.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| COMM:1117 | Advocacy and Argument |  |
| CS:1110 | Introduction to Computer <br> Science | 3 |
| CS:1210 | Computer Science I: <br> Fundamentals | 4 |
| LING:1050 | Language and Formal <br> Reasoning | 3 |
| MATH:1440 | Mathematics for the Biological <br> Sciences | 4 |
| MATH:1460 | Calculus for the Biological | 4 |
| MATH:1850 | Sciences | 4 |
| PHIL:1636 | Calculus I | 4 |
| STAT:1010 | Principles of Reasoning: <br> Argument and Debate | 4 |
| STAT:1020/ | Statistics and Society | 3 |
| PSQF:1020 | Elementary Statistics and <br> STAT:2010 | Statistical Methods and <br> Computing |
| STAT:3510/ | Biostatistics | 3 |
| IGPI:3510 |  | 3 |

## Directed Laboratory or Field Research

Students complete an approved directed research requirement (minimum of $3 \mathrm{~s} . \mathrm{h}$.) consisting of one of the following:

- a laboratory practicum in anthropology research labs or independent, faculty-guided, laboratory research, including use of the collections of the Office of the State Archaeologist;
- a faculty-advised field research project involving the collection of primary archaeological, biological, ethnographic, and/or linguistic data in a fieldwork setting;
- a University of Iowa field archaeological school program or approved equivalent; and/or
- an approved internship. Internships typically involve work in cultural resource management firms, museums, and public health research or education projects. To receive research credit for an internship, students must make a final report to their faculty advisor, summarizing the work accomplished or presenting materials that document the nature of the work.

## Allied Topical Field

Students complete a topical concentration in one of the following allied fields: biology, chemistry, computer science, earth and environmental sciences, economics, geographical and sustainability sciences, global health studies, health and human physiology, linguistics, mathematics, psychology, science studies, sport studies, or statistics and actuarial science. Minors (or at least five courses) in other fields, chosen in consultation with a student's advisor, also may be applied toward this requirement.

## Optional Undergraduate Tracks

Students have the option of adding a particular focus to their study plan by completing a specialized track. They may choose one of four options: gender and culture [p. 80], cultural resource and heritage management [p. 80], environmental anthropology [p. 81], or medical anthropology [p. 81].

The optional tracks reflect broad issues bridging subfields in and outside of anthropology. Completion of a track indicates the acquisition of considerable expertise and is noted on a student's transcript.

The optional tracks each require 15 s.h. (five courses). By selecting courses carefully, students majoring in anthropology can complete a specialization track without adding to the semester hours required for graduation.

## Gender and Culture Track

Anthropological research regarding gender and sexuality has grown dramatically in recent years, enhancing and drawing from other theoretical and methodological approaches in anthropology. This research contributes a cross-cultural perspective to discussions surrounding these fundamental aspects of human experience, both in academia and in public life.
The gender and culture track requires 15 s.h. (five courses) chosen from the following list. Each course provides an integrated overview of essential theoretical and topical issues in the field.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Five of these: |  |  |
| ANTH:2102 | Anthropology of Marriage and Family | 3 |
| ANTH:2108 | Gendering India | 3 |
| ANTH:2151 | Global Migration in the Contemporary World | 3 |
| ANTH:2190 | Love Rules: Law and the Family Across Cultures | 3 |
| ANTH:2191 | Love, Sex, and Money: <br> Sexuality and Exchange Across Cultures | 3 |
| ANTH:3101 | Anthropology of Sexuality | 3 |
| ANTH:3118 | Politics of Reproduction | 3 |
| ANTH:3121 | Love, Marriage, and Family in India | 3 |
| ANTH:3125 | Transnational Feminism | 3 |
| ANTH:3133 | Anthropology of Race | 3 |
| ANTH:3151 | The Anthropology of the Beginnings and Ends of Life | 3 |
| ANTH:3152 | Anthropology of Caregiving and Health | 3 |
| ANTH:3300 | Mothers and Motherhood | 3 |
| ANTH:4140 | Feminist Activism and Global Health | 3 |

## Cultural Resource and Heritage Management Track

In North America and throughout much of the rest of the world, modern land use continually threatens evidence of past land use. Most archaeological excavations are conducted as cultural resource management (CRM), so it is essential that all researchers who work with archaeological data and individuals committed to site preservation have a basic understanding of CRM. Students who choose this emphasis learn about the field and about how to address related ethical issues as well as technical and theoretical challenges.
The cultural resource and heritage management emphasis requires 15 s.h. (five courses): a fundamental overview course, two area electives, a technical/practical elective, and a field school course. Students may use some of these courses to satisfy requirements for the major, such as the course in archaeology and the electives.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Overview |  |  |
| This course: |  |  |
| ANTH:3240 | Cultural Resources <br> Management Archaeology: <br> Practice and Practicalities | 3 |
| Area Electives |  |  |
| Two of these (or one of these and one other Department of Anthropology area course): |  |  |
| ANTH:2165 | Native Peoples of North America | 3 |
| ANTH:2166 | Arts of Native North America | 3 |
| ANTH:3243 | Archaeology of the American Midcontinent | 3 |
| ANTH:3257 | North American Archaeology | 3 |
| ANTH:3258 | Southwestern Archaeology | 3 |
| ANTH:3260 | Pleistocene Peopling of the Americas | 3 |
| ANTH:3265 | Archaeology of the Great Plains | 3 |

Technical/Practical Elective
One of these:

| ANTH:2208 | Archaeological Methods | 3 |
| :--- | :--- | ---: |
| ANTH:2265 | Tools, Treasures, and Trash: <br> Archaeology of the Material <br> World | 3 |
| ANTH:2290 | Practicum in Archaeology | arr. |
| ANTH:3207 | Animal Bones in Archaeology | 3 |
| ANTH:3237 | Politics of the Archaeological <br> Past | 3 |
| ANTH:3241 | Lithic Analysis in Archaeology <br> ANTH:3255 | Introduction to Archaeological <br> Ceramics |
| ANTH:3305 | Human Osteology | 3 |
| Field School | Field Research in Archaeology | 3 |
| One of these: | ANTH:3295 | arr. |

An equivalent course from another university

## Environmental Anthropology Track

The interaction between humans and the environments they inhabit has long been a central issue in anthropology, and environmental degradation is a worldwide concern today. Pollution, loss of biodiversity, and global warming recognize no political boundaries, but attitudes and behaviors involving the natural environment vary widely from culture to culture. The understanding and incorporation of these varied perspectives are vital to the development and successful use of workable solutions.
The environmental anthropology track requires 15 s.h. (five courses): two theory courses, which deal primarily with human-environmental interactions, and three area or topical electives, which deal in part with the environment, ecology, and subsistence technologies. The following are sample courses in each area (courses must be numbered 2000 or above).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Theory Courses |  |  | Both of these: $\quad$| AnTH:2261 | Human Impacts on the <br> Environment | 3 |
| :--- | :--- | ---: |
| ANTH:3103 | Environment and Culture | 3 |

Area or Topical Electives

| Three of these: <br> ANTH:2140 | Food, Drink, and Culture |  |
| :--- | :--- | :--- |
| ANTH:2220 | The Olmec, Maya, and Aztecs: <br> Archaeology of Mesoamerica | 3 |
| ANTH:3123 | Making a Living: Perspectives <br> on Economic Anthropology | 3 |
| ANTH:3207 | Animal Bones in Archaeology <br> ANTH:3239 | The Archaeology of the First <br> Europeans |
| ANTH:3243 | Archaeology of the American <br> Midcontinent | 3 |
| ANTH:3261 | Our Life With Dogs: The <br> Anthropological Study of <br> Animals in Human Societies | 3 |
| ANTH:3265 | Archaeology of the Great Plains | 3 |
| ANTH:3275 | The Archaeology of Ancient <br> Egypt | 3 |
| ANTH:3277 | Roman Archaeology <br> ANTH:3278 | Archaeology of Ancient Cities |

## Medical Anthropology Track

Human experiences of sickness and suffering are universal yet profoundly shaped by cultural and historical contexts. Medical anthropology explores cultural and biological diversity in sickness, health, and healing through approaches that include examining individual experiences of disrupted well-being, considering how biological and cultural factors interact to promote health or produce sickness, analyzing political-economic causes of health inequalities, and applying research to improve health research and services in an increasingly global world. Coursework in medical anthropology helps students prepare for a range of health professions and social services careers and for work in diverse settings that increasingly include nongovernmental organizations devoted to improving health. Future health professionals are increasingly called upon to understand how sociocultural and biological factors intersect to produce experiences of health, sickness, and healing.
The medical anthropology track requires 15 s.h. (five courses): an introductory course plus four electives that focus on health-related topics. Electives includes 2000- and 3000-level intermediate courses that apply medical anthropology to specific topics, as well as more advanced 4000-level courses that help students to engage with more complex topics in this field. Students can choose to mix intermediate and advanced electives in ways that best meet their interests and goals.
Course \# Title Hours
Overview
This introductory course:

| ANTH:2164 | Culture and Healing: An | 3 |
| :--- | :--- | :--- |
|  | Introduction to Medical |  |
|  | Anthropology |  |

| ANTH:3152 | Anthropology of Caregiving and <br> Health | 3 |
| ANTH:3199 | Anthropology and Global <br> Health Policy | 3 |
| ANTH:3325 | Human Evolutionary Genetics | 3 |
| ANTH:3328 | Molecular Genetics of Human <br> Disease | 3 |
| ANTH:4140 | Feminist Activism and Global <br> Health | 3 |

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Honors

## Honors in the Major

Students majoring in anthropology have the opportunity to graduate with honors in the major. Departmental honors students must have a grade-point average (GPA) of at least 3.50 in anthropology coursework and a cumulative University of Iowa GPA of at least 3.33. To graduate with honors in the major, they must conduct an independent research project that culminates in a 30-50 page thesis. The project includes the completion of 6 s.h. divided between ANTH:4995 Honors Research Seminar (offered only in fall semesters) and ANTH:4996 Honors Research, typically taken the next semester. Honors students also must take one of their anthropology courses at the graduate level.

Students may count their directed research project or laboratory practicum toward the requirements for graduation with honors, but fulfilling the research requirement for the BS degree does not by itself fulfill the honors research requirement. Students must work with their honors thesis advisor to structure their research so that it meets the added requirements of honors work.

Contact the department's director of undergraduate studies to learn more about honors in anthropology.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the anthropology major.

## Career Advancement

The major in anthropology prepares individuals for advanced training or careers in anthropology, allied fields, and professional programs. Students who complete an anthropology major gain special
understanding of human relations and expertise for jobs involving international or cross-cultural work, cultural resource management, and in responding to social and ethnic diversity, whether in the United States or globally.

Upon graduation, anthropology majors embark on careers in government, international affairs, conservation, economic development, public health, cultural resource management, planning and public affairs, social work, museum work, and education. Many go on to help resolve contemporary world problems by working with international or domestic organizations such as AmeriCorps, the Peace Corps, and Teach for America. Some pursue graduate study in anthropology or related social and natural sciences, while others earn degrees in business, law, or the health professions.

The Pomerantz Career Center also offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan.

Before the third semester begins: at least one anthropology course or other course in the major.

Before the fifth semester begins: at least four anthropology courses or other courses in the major, one course in the topical field, and one course for the quantitative or formal reasoning tool requirement.

Before the seventh semester begins: at least seven courses in the major, three courses in the topical field, the second quantitative or formal reasoning tool course, and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: at least nine courses in the major, including the directed research requirement, and four courses in the topical field.
During the eighth semester: enrollment in all remaining coursework in the major (including the topical field), all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Anthropology, BS

| Hours | 15 |
| :--- | ---: | ---: |
| Total Hours | $\mathbf{1 2 3 - 1 2 9}$ |

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Students may only use three ANTH courses to satisfy GE CLAS Core requirements.
c Fulfills a major requirement and may fulfill a GE requirement.
d Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
e Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
f GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
g Students must complete $15 \mathrm{~s} . \mathrm{h}$. in one area of study.
h Students have the option to choose one of four tracks in the major: gender and culture, cultural resource and heritage management, environmental anthropology, or medical anthropology. Courses must be numbered 2000 or above.
i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Anthropology, Minor

## Requirements

The undergraduate minor in anthropology requires a minimum of 15 s.h. in anthropology courses, including 12 s.h. in University of Iowa Department of Anthropology courses numbered 2000 or above Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Courses for the minor may not be taken pass/nonpass.

Students may create a focus for the minor by completing a specialization area; see "Optional Undergraduate Tracks" under the BA or BS anthropology requirements.

## Anthropology, MA

Graduate study in anthropology is open to individuals with varied undergraduate majors and training backgrounds.

Graduate students normally are admitted under the assumption that they intend to pursue the PhD . The department also offers a terminal MA, with a focus on cultural resource management (CRM) in archaeology, which provides academic preparation for a professional career in that field.

PhD students who enter the program with a bachelor's degree are typically awarded a master's degree upon fulfilling program requirements at the end of their second year. The MA portion of the PhD program features coursework across all four subfields of anthropology. Students also are strongly encouraged to conduct independent summer research, which is often supported by departmental and other university-based funding sources.

For additional information, view the Graduate Programs website and the current Graduate Student Guidebook on the Department of Anthropology website.

## Learning Outcomes

## Disciplinary Expertise

Graduate students will gain an in-depth understanding of anthropology and the discipline's contributions to our understanding of people and culture, in the past and present.

## Skills for Independent Research

Graduate students will acquire professional and ethical research, reasoning, methodological, and management skills to identify important research problems. They also will learn how to design and execute a project, productively engage with feedback, and successfully report (via writing and presentations) the results of their independent research to diverse sets of audiences.

## Teaching Contributions

Graduate students will learn how to communicate anthropological concepts and theories effectively and ethically to different audiences.

## Disciplinary, Academic, and Community Contributions

Graduate students will develop service, mentoring, and leadership skills that enable them to advance and support professional, management, academic, and community needs.

## Requirements

The Master of Arts program in anthropology requires 30-36 s.h. of graduate credit, depending on a student's previous anthropological training. Students may count a maximum of 9 s.h. earned in courses outside anthropology toward the MA in anthropology. It is expected that a full-time student will complete all MA requirements by the end of the second year in the program. Students must maintain a cumulative grade-point average of at least 3.00.

Master's degree students who choose to focus on cultural resource management-archaeology normally do not go on to earn a PhD in anthropology.

By the end of their first semester, each student must select an MA committee, consisting of an advisor and two additional professors. Each year, students compile, in consultation with their advisor, the three strongest papers written for anthropology courses, conferences, or journals; an annotated bibliography; their current curriculum vitae;
and a three-page narrative to describe their intellectual trajectory in the MA program to date.

Master's degree students who intend to earn a doctorate should consider taking ANTH:5110 Anthropological Data Analysis or another statistics course during their MA study.

## General Coursework

MA students not pursuing the cultural resource managementarchaeology focus must complete core seminars in all four subfields (total of 12 s.h.).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Seminar Sociocultural <br> Anthropology | 3 |
| ANTH:5101 | Seminar: Archaeological <br> Theory and Method | 3 |
| ANTH:5201 | Seminar: Biological <br> Anthropology | 3 |
| ANTH:5301 | Seminar: Linguistic <br> Anthropology | 3 |

## Electives

In consultation with the advisor and committee members, a student selects a minimum of 18 s.h. of additional coursework to complete the remaining semester hours required for the MA. Elective work may include courses in other disciplines, directed study, and up to 6 s.h. of MA thesis credit for students who choose the thesis option.

## Cultural Resource ManagementArchaeology Focus

Most archaeological excavations and surveys are conducted as cultural resource management (CRM), so it is essential that all researchers who work with archaeological data and individuals committed to site preservation have a basic understanding of CRM. Students who select this focus area learn about the field and how to address related ethical issues as well as technical and theoretical challenges.

Students must complete the archaeological core graduate seminar. They also must complete a research paper, which is an archaeological study with a substantive data analysis directed toward an explicit archaeological research problem, suitable to meet the section three requirement for the Registry of Professional Archaeologists application form.
The cultural resource management-archaeology focus requires a total of 30 s.h., including 24 s.h. of coursework and 6 s.h. of independent research or thesis credit.

## Required Coursework

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Cultural Resources <br> Management Archaeology: <br> ANTH:3240 | Practice and Practicalities |
| ANTH:5201 | Seminar: Archaeological <br> Theory and Method | 3 |

## Area Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: | Archaeology of the American <br> Midcontinent | 3 |
| ANTH:3243 | North American Archaeology | 3 |

| ANTH:3258 | Southwestern Archaeology | 3 |
| :--- | :--- | :--- |
| ANTH:3260 | Pleistocene Peopling of the <br> Americas | 3 |
| ANTH:3265 | Archaeology of the Great Plains | 3 |

## Technical Electives

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| Four of these: |  |  |
| ANTH:3207 | Animal Bones in Archaeology | 3 |
| ANTH:3237 | Politics of the Archaeological <br>  <br>  <br> Past | 3 |
| ANTH:3241 | Lithic Analysis in Archaeology | 3 |
| ANTH:3255 | Introduction to Archaeological | 3 |
|  | Ceramics |  |
| ANTH:3295 | Field Research in Archaeology | 3 |
| ANTH:3305 | Human Osteology | 3 |

Independent Research or Thesis

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| 6 s.h. from these: |  | arr. |
| ANTH:6005 | Independent Study: <br> Anthropology |  |
| ANTH:6010 | Research: Anthropology | arr. |
| ANTH:6015 | Thesis | arr. |

## Admission

Applicants for admission to the graduate program in anthropology are considered regardless of their previous field of training. Students without previous training in anthropology are expected to perform additional work as necessary to achieve competence expected for their degree objective.

Students normally are admitted under the assumption that they intend to pursue the PhD . Students without an MA in anthropology devote the first two years to fulfilling the MA requirements. After those requirements are completed, the student's committee may award the MA with admittance to the PhD program.

Students with an MA in anthropology from another institution may proceed directly into a PhD program organized around their special research interests. If they lack any of the requirements of the graduate program at the University of Iowa, they are informed of those requirements when admitted. Acceptance of credit hours from other institutions will follow UI regulations.
Applicants for admission to the graduate program must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Anthropology graduate program applicants are required to upload the following documentation to the University of Iowa Graduate Admissions online application:

- official academic records/transcripts from previous institutions attended;
- a brief statement of interest or intent regarding why graduate study in the Department of Anthropology is desired;
- three letters of recommendation;
- a writing sample (preferably a research paper); and
- an application for graduate funding.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET).

Once recommended for admission, international students also must complete several additional requirements.
For more information concerning the required application elements, see Graduate Admissions Process on the Department of Anthropology website.

When completing the online Graduate College Application for Admission for Degree, applicants currently without an MA or MS in anthropology should enter "MA" regardless of whether they intend to continue on to the doctoral program. Students at the MA level do not write a thesis, so "MA (thesis)" is not an option. This designation refers to the initial program students enter upon admission and in no way limits prospects for continuing on to the PhD program. For questions about which degree option to choose, contact the Department of Anthropology.

## Financial Support

Financial assistance, usually in the form of teaching and research assistantships, may be offered to doctoral and potential doctoral students in good standing for up to five years. Students making satisfactory and timely progress through the graduate program are in good standing. Eligibility for financial aid is reduced after two years in the MA program. The amount and types of aid depend on departmental needs.

Students are notified in writing of a provisional financial award before the semester or summer session for which the award has been granted. Although awards are made before the end of the previous semester, each award is contingent upon satisfactory completion of that semester's work by the awardee.

## Career Advancement

Graduates establish careers at universities, colleges, museums, healthcare institutions, and a diverse range of governmental and nongovernmental agencies. For more information, see Careers and Opportunities on the Department of Anthropology website.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a A maximum of $9 \mathrm{~s} . \mathrm{h}$. of coursework outside anthropology may count towards the degree requirements.
b Some students may complete up to 36 s.h. of graduate coursework for the degree, depending on their previous anthropological training. Students should consult with their faculty advisor to determine if this is necessary and, if so, which coursework is appropriate.
c Students normally are admitted (whether with a master's or a bachelor's degree) under the assumption that they intend to pursue the PhD degree. The department also offers a terminal MA degree, with a focus on cultural resource management-archaeology (CRM).
d Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
e Composed of three members of the anthropology graduate faculty, one of whom serves as the committee chair, and the student's faculty advisor.
f Students who conduct research involving human subjects (e.g., ethnographic research in the summer months) are required to submit a detailed application about the scope of their study and data collection methods through the HawkIRB system for Institutional Review Board (IRB) approval.
g In consultation with faculty advisor and committee members, students select a minimum of 18 s.h. of additional coursework to complete the remaining semester hours required for the MA; may include courses in other disciplines and up to 9 s.h. of directed study. Students who intend to earn a doctorate should consider taking ANTH:5110 or another statistics course.
h Compile, in consultation with faculty advisor, the three strongest papers written for anthropology courses, conferences, or journals; an annotated bibliography of 3 topical areas with 5 key annotated references in each; current curriculum vitae; and a three-page narrative to describe intellectual trajectory in the MA program to date.
i Compile, in consultation with faculty advisor, the three strongest papers written for anthropology courses, conferences, or journals; an annotated bibliography of 3-4 topical areas with 6-10 key references in each; current curriculum vitae; and a three-page narrative to describe intellectual trajectory in the MA program to date.
j Successful completion of all degree requirements.

## Anthropology, PhD

## Learning Outcomes

## Disciplinary Expertise

Graduate students will gain an in-depth understanding of anthropology and the discipline's contributions to our understanding of people and culture, in the past and present.

## Skills for Independent Research

Graduate students will acquire professional and ethical research, reasoning, methodological, and management skills to identify important research problems. They also will learn how to design and execute a project, productively engage with feedback, and successfully report (via writing and presentations) the results of their independent research to diverse sets of audiences.

## Teaching Contributions

Graduate students will learn how to communicate anthropological concepts and theories effectively and ethically to different audiences.

## Disciplinary, Academic, and Community Contributions

Graduate students will develop service, mentoring, and leadership skills that enable them to advance and support professional, management, academic, and community needs.

## Requirements

The PhD leads to the accomplishment of professional-level skills in conducting independent research, and normally features specialized training in one or two of the discipline's subfields. Doctoral education is guided by a PhD committee composed of members of the faculty competent in the particular areas and topics chosen by a student. Students must maintain a cumulative grade-point average of at least 3.00 .

The doctoral program includes an integrated process of progressively developing and completing reading lists, developing and submitting research proposals to funding agencies, developing and defending a dissertation prospectus, and writing two comprehensive exam essays. Upon successful completion of the comprehensive examination and the dissertation prospectus, a student advances to candidacy for the PhD . To complete the PhD , all doctoral candidates are required to conduct independent anthropological research, write a dissertation, and defend it

For students who enter the doctoral program with an existing MA (in anthropology or a related field), the faculty develop an individualized program of study based on a student's existing coursework and goals.

PhD students also may elect to pursue an optional concentration in either feminist anthropology or paleoanthropology.

For program requirements, refer to the current Graduate Student Guidebook on the Department of Anthropology website.

## Admission

Applicants for admission to the graduate program in anthropology are considered regardless of their previous field of training. Students without previous training in anthropology are expected to perform additional work as necessary to achieve competence expected for their degree objective.

Students normally are admitted under the assumption that they intend to pursue the PhD . Students without an MA in anthropology devote
the first two years to fulfilling the MA requirements. After those requirements are completed, the student's committee may award the MA with admittance to the PhD program.

Students with an MA in anthropology from another institution may proceed directly into a PhD program organized around their special research interests. If they lack any of the requirements of the graduate program at the University of Iowa, they are informed of those requirements when admitted. Acceptance of credit hours from other institutions will follow UI regulations.
Applicants for admission to the graduate program must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Anthropology graduate program applicants are required to upload the following documentation to the University of Iowa Graduate Admissions online application:

- official academic records/transcripts from previous institutions attended;
- a brief statement of interest or intent regarding why graduate study in the Department of Anthropology is desired;
- three letters of recommendation;
- a writing sample (preferably a research paper or MA thesis); and
- an application for graduate funding.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET). Once recommended for admission, international students also must complete several additional requirements.

For more information concerning the required application elements, see Graduate Admissions Process on the Department of Anthropology website.

## Financial Support

Financial assistance, usually in the form of teaching and research assistantships, may be offered to doctoral and potential doctoral students in good standing for up to five years. Students making satisfactory and timely progress through the graduate program are in good standing. The amount and types of aid depend on departmental needs.

Students are notified in writing of a provisional financial award before the semester or summer session for which the award has been granted. Although awards are made before the end of the previous semester, each award is contingent upon satisfactory completion of that semester's work by the awardee.

|  | Hours | $\mathbf{9}$ |
| Spring |  |  |
| ANTH:7501 | Dissertation Writing Seminar | 1 |
| ANTH:6015 | Thesis | 8 |
| Final Exam ${ }^{\text {j }}$ |  |  |
|  | Hours | $\mathbf{9}$ |
|  | Total Hours | $\mathbf{7 2}$ |

a A maximum of 18 s.h. of coursework outside anthropology (this includes and is not in addition to the 9 s.h. allowed at the MA level) may count towards the degree requirements; beyond the MA degree, no more than 9 additional semester hours of ANTH:6005 may count towards the PhD degree.
b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
c Students who conduct research involving human subjects (e.g., ethnographic research in the summer months) are required to submit a detailed application about the scope of their study and data collection methods through the HawkIRB system for Institutional Review Board (IRB) approval.
d Sociocultural Anthropology options: ANTH:5101, ANTH:5135, ANTH:6410; Linguistic Anthropology options: ANTH:5401, ANTH:6410, ANTH:6415; Archaeology options: ANTH:3237, ANTH:5201; Biological Anthropology options: ANTH:3308, ANTH:3310, ANTH:3325, ANTH:4315, ANTH:5301.
e Electives may include courses in other relevant study, a maximum of 18 s.h. of directed study, and dissertation credit. Work with faculty advisor to determine appropriate graduate level elective coursework and sequence.
f Students should consult with their advisor and committee and determine both existing and needed language competencies. A record of the status of, expected training in, and decisions (including waivers) related to language competency must be included in the student's file by the time of candidacy. The Language Competency Report can be found on the department website.
g The student will prepare two comprehensive essays: one in the geographical area of specialization and the other in the primary topical area of specialization. In some subfields and for some projects, a geographical area may not be relevant, and the student will focus on two topical areas. Each paper will address a question posed by the committee in consultation with the student.
h Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
i The dissertation prospectus should present a research question that contributes to ongoing discussions in anthropological scholarship, explain the background and significance of the question, and describe the methods that the student plans to use to answer it. The student publicly defends their prospectus before their PhD committee by the end of the final exam period of that semester
j Dissertation defense.

## Art and Art History

## Director

- Steve McGuire

Undergraduate majors: art (BA, BFA); art history (BA)
Undergraduate minors: art; art history
Graduate degrees: MA in art; MA in art history; MFA in art; PhD in art history

Faculty: https://art.uiowa.edu/people/faculty
Website: https://art.uiowa.edu/
The School of Art and Art History provides a creative, multidisciplinary environment for students of the studio arts and the history of art. Established in 1936, the school is firmly grounded in the College of Liberal Arts and Sciences. It encourages interaction among its diverse faculty as well as collaboration with related disciplines across campus.
Iowa's art and art history graduates enjoy success as practicing professional artists, professors of art history, teachers, museum directors and curators, theater designers, commercial designers, and art administrators.

The School of Art and Art History's Visual Arts Building opened in fall 2016 and is identified by architectural publications as one of the best designed new buildings in the world. The Visual Arts Building is adjacent to the second School of Art and Art History building, Art Building West. Visit the School of Art and Art History website and MyUI for information about studio, office, and classroom sites.

## Studio Art

The School of Art and Art History is committed to students' professional futures. The studio laboratories, some of the finest facilities nationally, are updated annually with leading edge production equipment. Students have the opportunity to develop the visual vocabulary and cross-media literacies required by the rapidly changing contemporary world. The visiting artist series introduces students to national and international leaders in the field, while a varied, diverse, and professionally active faculty ensures that the area is contemporary in its approach and pluralistic in its scope.

Undergraduate and graduate students select their major and minor studio art disciplines from ceramics, drawing, graphic design, intermedia, jewelry and metal arts, painting, photography, printmaking, sculpture, and three-dimensional (3D) design.

## Art History

Art history, a broad intellectual discipline, is central to the humanities. Diverse approaches characterize the school's art history faculty, who have interdisciplinary ties within and beyond the university. Their primary mission is to help students develop skills for exploring issues and problems central to the history of art as a whole as well as to its specialized areas. Because the major in art history stresses the development of critical visual thinking and writing, it prepares students for graduate work in art history and for other professional fields as well.

## Student Organizations

The undergraduate Art History Society and the graduate Art History Society sponsor activities for students. The Faculty/Graduate Student Art History Colloquium meets five times each semester to focus on professional development and issues of broad interest in art. Other student organizations include Students in Design, Children of the Clay (formerly the Ceramics Society), and the Iowa Smith Guild.

## Interdisciplinary Resources

Colloquia, visiting artists and lecturer programs, and graduate workshops bring visitors to the School of Art and Art History and provide open forums for discussion of issues in art and scholarship.
Among the school's major assets is the Project for the Advanced Study of Art and Life in Africa (PASALA), an interdisciplinary program that brings together faculty with international reputations in art history, anthropology, film, history, and literature to offer courses and independent study of art in West, Central, East, and South Africa. The result is a program of unusual breadth and depth of expertise. PASALA offers scholarships and support for research in Africa and dissertation preparation to outstanding students. A major resource for PASALA is the Stanley Collection of African Art. Visit African Art on the Stanley Museum of Art website to learn more.

The School of Art and Art History affiliates with the Department of American Studies [p. 51], giving students opportunities to study not only the history of American art but a variety of interdisciplinary programs in American history, literature, and politics. The school also is linked to the Medieval Studies Program [p. 792], which offers an undergraduate certificate and courses in the history, literature, and culture of the Middle Ages.

## Related Certificate

## Certificate in Book Studies/Book Arts and Technologies

The Center for the Book and the School of Art and Art History enable students to earn the Certificate in Book Studies/Book Arts and Technologies [p. 1629] and the MFA in art. Students may wish to earn the MFA in a studio art area (printmaking, drawing, painting, design, etc.) in combination with the Certificate in Book Studies/ Book Arts and Technologies. If accepted to both programs, students are advised and matriculate through both programs independently. Most, if not all, of the 18 s.h. of elective coursework required for the MFA may be applied toward the Center for the Book certificate. It is possible for students to earn both credentials in the same amount of time required to earn the MFA degree.

Advisors in both areas of study assist interested students in discerning whether the MFA in book arts (Center for the Book), or the MFA in art and the certificate option is most appropriate to a student's background and career goals. In large part, this is determined by the degree to which books and book arts are central to the applicant's chosen path.

## Programs

## Undergraduate Programs of Study

## Majors

- Major in Art (Bachelor of Arts) [p. 103]
- Major in Art History (Bachelor of Arts) [p. 106]
- Major in Art (Bachelor of Fine Arts) [p. 112]

## Minors

- Minor in Art [p. 126]
- Minor in Art History [p. 127]

## Graduate Programs of Study

## Majors

- Master of Arts in Art [p. 128]
- Master of Arts in Art History [p. 131]
- Master of Fine Arts in Art [p. 134]
- Doctor of Philosophy in Art History [p. 137]

## Facilities

## Reference Collections

Focusing on the creation and study of the visual arts, the Art Library has over 150,000 books, journals, and DVDs. It also provides access to digital resources and the major online research databases.
The Office of Visual Materials is the school's collection management service and it manages digital and physical collections. These collections include 650,000 digital images for teaching, the Thesis Rental Gallery, the Iowa Print Archive, and the DeCaso Visual Archive.

## Museum of Art

The University of Iowa Museum of Art has a significant permanent collection that includes major holdings of 20th-century and contemporary art, African and pre-Columbian art, English and American silver, European and American prints, drawings and photographs, and Etruscan, Iranian, and contemporary American ceramics. As well as serving as a resource for research in a wide variety of art history areas, the museum offers a program of exhibitions, lectures, and recitals.

Learn about current exhibitions and events by visiting the University of Iowa Stanley Museum of Art website.

## Art Buildings

The school's administrative center, Art Building West, is home to the school's main office as well as the Office of Visual Materials, the Art Library, an auditorium, art history classrooms, a gallery, a café, and studios for graphic design, painting, animation, and digital photography. Designed by architect Steven Holl, Art Building West has won numerous awards for its innovative design.

The Visual Arts Building has been identified by a number of publications as one of the top new buildings in the world. It also was designed by architect Steven Holl and sits adjacent to Art Building West.

## Courses

- Art History Courses [p. 91]
- Studio Art Courses [p. 95]
- Animation Courses [p. 96]
- General Art Courses [p. 96]
- Ceramics Courses [p. 97]
- Design Courses [p. 98]
- Three-Dimensional Design Courses [p. 98]
- Drawing Courses [p. 99]
- Intermedia Courses [p. 99]
- Jewelry and Metal Arts Courses [p. 99]
- Painting Courses [p. 100]
- Papermaking Courses [p. 100]
- Photography Courses [p. 101]
- Printmaking Courses [p. 101]
- Sculpture Courses [p. 102]
- Art Education Courses [p. 102]

## Art History Courses

An introductory course in the appropriate art history area or consent of instructor is prerequisite for some courses numbered above 3000 . Courses titled "Themes in ..." consider topics of current interest in the field, organized thematically rather than chronologically.
ARTH:1000 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
ARTH:1010 Art and Visual Culture
3 s.h.
Visual analysis, media and techniques, artistic subject matter and aesthetic issues; historical periods and movements from ancient times to present; provides strong orientation to visual aspects of humanities, background for other art history courses, and introduction to visual arts for personal enrichment; for students new to art history. GE: Historical Perspectives; Literary, Visual, and Performing Arts.

## ARTH:1020 Masterpieces: Art in Historical and Cultural

 Perspectives3 s.h.
Masterpieces of Western art—how to look at, think about, and understand some of the worlds' most exciting works of architecture, painting, and sculpture; their construction, hidden meanings,
historical content, and their meanings today. GE: Literary, Visual, and Performing Arts.

## ARTH:1025 Buyer Beware! Fakes, Thefts, and the Global Art Market <br> 3 s.h.

Examination of how manipulated artworks and outright forgeries have been accepted as genuine and sold on the art market to museums and private collectors alike; how the global art market is connected to the theft of art and the looting of archaeological sites; case studies (i.e., Parthenon marbles, Benin bronzes, widespread looting under ISIS in Syria and Iraq) allow for discussions about the relationship between colonialism, geopolitical power, and artwork displayed in museums.
ARTH:1030 Themes in Global Art 3 s.h.
Exploration of how different cultures throughout history and across the globe have expressed their social, political, and religious values in visual form; key themes include social functions of art, the ideal body, art of the divine, funerary art, propaganda and power. GE: Literary, Visual, and Performing Arts; Values and Culture.
ARTH:1040 Arts of Africa
3 s.h.
Arts, artists, and cultures of Africa; sculpture, paintings, pottery, textiles, architecture, human adornment. GE: International and Global Issues; Literary, Visual, and Performing Arts.
ARTH:1045 Race and Art in America 3 s.h.
Chronological development and critical themes of African American visual culture; material culture of slave artists, history of racist imagery in the U.S., most important African American fine artists; slave dwellings, quilts, paintings, sculpture, photography; W.E.B. Du Bois' claim to Egyptian artistic patrimony, controversial work of Kara Walker, hip hop aesthetic of Kehinde Wiley; previous art history experience not required. GE: Values and Culture.
ARTH:1050 From Cave Paintings to Cathedrals: Survey of Western Art I

3 s.h.
Survey to foster development of critical skills in thinking and writing about visual culture, and to familiarize students with broad outlines of artistic development in the Western tradition, from prehistory through later Middle Ages; aesthetic qualities of artworks, relationship between style, function, and meaning. GE: Historical Perspectives; Literary, Visual, and Performing Arts.

## ARTH:1060 From Mona Lisa to Modernism: Survey of Western

 Art II3 s.h.
Survey of the Western world's visual arts from Renaissance (ca. 1400) to present; major movements and principal masters of Western Europe and the United States in their social and historical contexts; focus on stimulation of visual literacy and familiarity with outstanding cultural monuments. GE: Historical Perspectives; Literary, Visual, and Performing Arts.

## ARTH:1070 Asian Art and Culture <br> 3 s.h.

Art from India, China, and Japan in many media and forms, in their cultural and historical contexts; cultural distinctions of these Asian civilizations as seen through the visual arts; chronology used to highlight historical processes and provide perspectives on continuity and change. Taught in English. GE: Historical Perspectives; Literary, Visual, and Performing Arts.
ARTH:1075 Contemporary Art: A Global Perspective 3 s.h. Introduction to contemporary art across globe; exploration of how artists work today and their approaches to pressing issues and questions of current times.

ARTH:1080 How to Write About Art 3 s.h.
Opportunity to develop understanding of and skill in using visual-arts writing conventions and linguistic competencies that are necessary for academic and professional success; formats such as exhibition reviews, art criticism, research writing, artist's statements; experience through exercises, formal essays, revision, workshops. Requirements: fulfillment of GE CLAS Core Rhetoric.

ARTH:1090 Earthly Paradises: A Global History of Gardens 3 s.h. Fundamental and universal question-what is the relationship between humanity and nature; how ornamental garden has functioned as a metaphor for paradise across time and among diverse cultures; basic tools to analyze any landscape design; how artful manipulation of nature has served to express various political, religious, and social ideals across the globe; comprehensive and chronological survey of garden design development. GE: Historical Perspectives.

## ARTH:1095 Native American Art 3 s.h.

Survey of the visual arts of Indigenous peoples in North America with emphasis on regions that have become the United States; exploration of painting, sculpture, ceramics, fiber arts, performance, and architecture as expressions of identity, creativity, resistance, and resilience from ancestral traditions through transformations prompted by non-Native contact to today's vibrant art scene. GE: Literary, Visual, and Performing Arts; Values and Culture. Same as NAIS:1095.

## ARTH:2020 Western Architecture from Prehistory to the Present <br> 3 s.h.

Overview of monuments, Neolithic period to present; aesthetic and structural principles, major styles, architects.

## ARTH:2030 American Architecture: From Log Cabins to Skyscrapers

Characteristics of American public, domestic, and industrial architecture as evolved from Native American contact period to present; visual features of American-built environment and social, political, and economic factors that shaped development; design contributions of individual architects, impact of new technology, and growth of architectural profession.

ARTH:2120 Art and Architecture of the Islamic World 3 s.h.
Introduction to the artistic production of the Islamic world from the 7th century to present day; broad geographical coverage; examination of contributions of Arabia and the Middle East as well as those of Spain, North Africa, India, and Asia; students consider a wide variety of media including ceramics, metalwork, textiles, and calligraphy; emphasis on great buildings (e.g., Dome of the Rock, Alhambra, Taj Mahal); students are challenged to understand these works in their original cultural contexts and in relation to currently ongoing debates about intercultural exchange and religious identity in a globalizing world.
ARTH:2150 Art and Life in Africa
3 s.h.
Historical overview of themes and issues in African art (i.e., aesthetics, form and function, art in religion and the spiritual realm, art and politics, art and the individual); techniques used to create art (i.e., weaving, carving, brass casting, iron smelting and forging, architecture); art in daily life.

## ARTH:2220 Introduction to the Art of China 3 s.h.

Visual arts of China and their history; emphasis on understanding in context of Chinese civilization, history. Same as ASIA:2231.
ARTH:2250 Introduction to the Art of Japan
Chronological survey of Japan's visual arts in their historical and cultural contexts from Neolithic age to present; extensive use of slides, films, other visual materials. Taught in English. Same as JPNS:2250.
ARTH:2320 Ancient Art from the Great Pyramids of Egypt to the Colosseum in Rome

3 s.h.
Art and architecture of the Mediterranean world (ca. 3500 B.C.E.) to death of Constantine ( 337 C.E.); Egyptian, Cycladic, Minoan, Mycenaean, Greek, Etruscan, and Roman cultures; artistic responses to life and death; impact of breakthroughs in technology and engineering on visual culture; role of art in empire building; interrelationships of art, politics, religion. GE: Historical Perspectives. Same as CLSA:2226.
ARTH:2330 Egyptian and Ancient Near Eastern Art 3 s.h.
Art and architecture of Egypt and the Near East (ca. 3500 B.C.E.) to advent of Islam; Egyptian, Sumerian, Assyrian, Babylonian, and Persian cultures; artistic responses to life and death; impact of breakthroughs in technology and engineering on visual culture; role of art in empire building; interrelationships of art, politics, and religion. Same as CLSA:2330.
ARTH:2340 The Power of Art in Greece and Rome 3 s.h.
Art and architecture of Greece and Rome (ca. 3000 B.C.E.) to death of Constantine ( 337 C.E.); Cycladic, Minoan, Mycenaean, Greek, Etruscan, and Roman cultures; artistic responses to life and death; impact of breakthroughs in technology and engineering on visual culture; role of art in empire building; interrelationships of art, politics, and religion. Same as CLSA:2340.
ARTH:2420 Medieval Art from Constantine to Columbus $\mathbf{3}$ s.h.
Comprehensive survey of artistic traditions of Western Europe and Mediterranean Basin from roughly 300 to 1500 ; reign of Roman Emperor Constantine to lifetime of Christopher Columbus; complexity and diversity of cultural and artistic traditions that flourished in these so-called Middle Ages, where blending of Roman and northern legacies created European cultures.
ARTH:2520 Italian Renaissance Art
Consequential works of art by Italian artists of the 14th and 15th centuries; diverse roles played by images in early Renaissance society; analysis of primary sources and seminal research in the field; (re)birth of art theory and advancing social status of the artist in cultural centers of Florence, papal Rome, republican Venice, and the courts of Northern Italy.

## ARTH:2530 High Renaissance Art and Mannerism: Michelangelo to Caravaggio <br> 3 s.h.

Most consequential works of High Renaissance and Mannerist art by late 15 th-century and 16th-century Italian artists; developments in painting, architecture, sculpture, printmaking, and portable arts; Michelangelo, Leonardo da Vinci, Raphael, Giorgione, Titian, Correggio, Lotto, Bronzino, Sonfonisba Anguissola, Palladio, Cellini, Veronese, Carracci, and Caravaggio receive close consideration; particular attention given to materials and techniques employed, creative approach of the artist, and multiple functions of the image in government and statecraft, churches, public spaces, and private homes; constructing social and civic identity.

## ARTH:2730 Transformations in Nineteenth-Century European Art

Major European artists, works, movements, aesthetic theories from late 18th century to 1900; works in their aesthetic, cultural, intellectual, political contexts; boundaries, definitions of movements (i.e., Neo-Classicism, Romanticism, Realism, Impressionism, PostImpressionism, Symbolism).
ARTH:2740 Art of the Northern Renaissance: Jan van Eyck, Hieronymus Bosch, Albrecht Durer, and Beyond
Northern European art between 1350 and 1600; the transition between the late Middle Ages and the Renaissance; artistic output of this period; development of critical thinking skills by exploring ways in which the Northern Renaissance has been defined with respect to Italian Renaissance and northern medieval traditions.

ARTH:2820 Introduction to Twentieth-Century Art 3 s.h.
Modern European and American painting, sculpture, and architecture from 1880 to present; major art movements of modern art history.

## ARTH:2920 Introduction to American Art

3 s.h.
Survey of painting, sculpture, architecture, and photography in the United States from colonial era to mid-20th century; how the new country grappled with creating a visual culture unique to its own character and development; portraits, landscape paintings, sculpture, and architecture in an array of styles and media; circumstances of their creation, aspirations and preconceptions of their makers, perspectives of their audiences. Recommendations: ARTH:1060. GE: Historical Perspectives; Literary, Visual, and Performing Arts.
ARTH:3000 Digital Approaches to the Study of Art
3 s.h.
Digital approaches to study of art history; emphasis on cultural identity.

## ARTH:3010 Fakes, Frauds, and Forgeries: The Dark Side of Art History

How fraudulent artworks have been accepted as genuine and incorporated into the art historical canon, from the famous gold and ivory Minoan snake goddess to paintings purportedly by Rembrandt; the danger frauds pose to our understanding of cultural heritage and historical past, how fakes have impacted the art market, and value of forgeries as indices of contemporary taste and preconceptions about art.

ARTH:3020 Paris and the Art of Urban Life
City of Paris examined in varied historical, artistic, and cultural contexts; interdisciplinary.
ARTH:3090 Contemporary Architecture 3 s.h.
Quality of contemporary-built environments in America, Western
Europe, Asia, and Middle East from 1970 to present; stylistic evolution of postmodern design, new urbanism, sustainable architecture; impact of literary and cultural theory on contemporary practitioners such as Daniel Libeskind, Steven Holl.
ARTH:3160 Themes in African Art
3 s.h.
Themes and topics in African art.
ARTH:3197 Themes in Modern and Contemporary Art
Topics and themes in modern and contemporary art.

ARTH:3225 Modern and Contemporary Art in China 3 s.h.
Introduction to art and culture of 20th- and 21st-century China, covering the period from 1911 to present day; focus on contextualizing art objects, performances, propagandas, and exhibitions produced by government, business sector, curators, avantgarde artists and groups in China; topics include biennales, museums, art districts, luxury brands, and censorship; use of discussions and readings to investigate artworks and events that speak to China's society and economy, as well as its place in globalization and international art market.

## ARTH:3250 Brushwork in Chinese Art 3 s.h.

In-depth study of history, aesthetics, and techniques of brushwork on multiple forms of material culture; hands-on practical experience in Chinese brushwork; analysis of visual elements of brushwork in Chinese paintings, calligraphy, ceramics, and other artistic forms; synthesis of studio art experience and art historical analysis to provide a deeper practical and aesthetic understanding of Chinese fine art techniques.
ARTH:3255 Copy and Paste: Methods of Reproduction in Asian Art
Introduction to methods of reproduction in Asian art that predates photography, encompassing technologies of graphic reproduction (manual, mechanical, and somewhere in between); exploration of themes including piece-mold bronze casting, stamping and seals, rubbing, molding and mass production, woodblock printing, tracecopying calligraphy, and free-hand copying of paintings; overarching concepts across different subjects (e.g., authorship and authenticity, value of copies and impact on canon formation, relationship between technology and style, question of aura in-and before-the age of mechanical reproduction). Same as ASIA:3255.
ARTH:3270 Themes in Asian Art History
3 s.h.
Same as ASIA:3270.
ARTH:3275 Garden Culture in East Asia
3 s.h.
Exploration of the rich tradition of gardens in East Asia with a focus on China and Japan; combination of visual material, translated primary texts, and English-language research to learn about various types of gardens, their major elements, and their artistic representation; examination of garden themes, rocks, flower arrangement, and bonsai, as well as Asian gardens in the West and Western gardens in Asia; students discuss each type of garden in the broader artistic, political, and religious context. Same as ASIA:3275.

## ARTH:3310 Celtic and Viking Art

Art and architecture of Celts and Vikings from prehistory to Middle Ages.

ARTH:3320 Egyptian Art 3 s.h.
Survey of ancient Egypt over 3,500 years with emphasis on art and architecture in context; workshops, patrons, and audiences of Egyptian art; major principles, themes, and meanings of Egyptian art; relationship between writing and artistic representation; connections between art, kingship, and Egyptian view of the world; art and architecture of central elite and other social groups. Same as RELS:3704.

## ARTH:3325 Kings, Gods, and Heroes: Art of the Ancient Near

 East3 s.h.
Arts, kings, and cultures of Mesopotamia, Syria, and Iran; sculpture, seals, pottery, metalworking, architecture.
ARTH:3330 Classical Greek Art
3 s.h.
Art and architecture of classical Greece (ca. 480-323 B.C.); monuments of this period-from Parthenon in Athens to Aphrodite of Knidos—often viewed as embodiments of the highest achievements in Western art and culture; classical Greek art within social, political, religious, and historical contexts; role in ancient Greek society and its impact in the 21st century. Same as CLSA:3227.

## ARTH:3340 Greek Vase Painting

3 s.h.
Greek ceramics as documents of religious beliefs, mythology, and daily life 1000-300 B.C.E. Same as CLSA:3250.

ARTH:3350 Art of Early Rome: Patrons and Politics 3 s.h.
Examination of architecture, sculpture, and painting in central Italy from c. 800 B.C. to the end of the Roman Republic in 27 B.C.; art in the service of social ideology and political propaganda; funerary art and its relationship to the living; artistic interactions between Etruria, Greece, and Rome. Same as CLSA:3232.

ARTH:3360 Art of the Ancient Roman Empire
Major developments in architecture, sculpture, and painting from the ascension of Augustus to sole ruler in 31 B.C. to the death of Constantine in A.D. 337; influence of individual emperors on the development of artistic forms; relationship between public and private art; interdependency of Rome and the provinces. Same as CLSA:3233.
ARTH:3370 Life and Death in Ancient Pompeii 3 s.h.
Art and architecture as documents of ancient life in Pompeii, a town that was destroyed during the eruption of Mount Vesuvius in 79 C.E.; topics include artistic choices and achievements of the city's inhabitants, roles played by men and women inside and outside the family, slavery, political organization and expression, and attitudes towards death. Same as CLSA:3234.
ARTH:3375 The Great Collision 3 s.h.
Major developments in architecture, sculpture, ceramics, and mosaics in Israel, Palestine, Syria, and Arabia from death of Alexander the Great to rise of Islam (4 B.C.E. to 8 C.E.); Greek and Roman influences versus local traditions; Roman Empire; growth of churches, synagogues, and mosques; identity and religion. Same as RELS:3375.
ARTH:3390 Early Medieval Art 3 s.h.
Complex artistic traditions that developed roughly between 300 and 1000 in territories once governed by the Roman Empire and in areas of northern Europe directly influenced by Western Christian tradition; period as not simply a "Dark Age," but a pivotal chapter in history of Western art and culture; group discussion, individual research topics.

## ARTH:3400 Romanesque and Gothic Art

3 s.h.
Art and architecture produced in Western Europe from the year 1000 to the Renaissance, a period when works of boldly original character that continue to define the landscape of Europe were created; histories of Romanesque and Gothic styles; shift from monastic to episcopal, civic, and courtly patronage; intersection between art and devotional practice; flowering of medieval urbanism and building technology; intersection between artistic traditions of later Gothic and emerging Renaissance.

ARTH:3420 Gothic Architecture 3 s.h.
Gothic architecture and its history, from varied perspectives (e.g., formal structural, symbolic, geometric, socioeconomic).
ARTH:3550 Leonardo, Raphael, Michelangelo: Rivalry and the Rise of the Artist in the Italian Renaissance 3 s.h. The arts in Italy 1485-1550.
ARTH:3560 Art in Renaissance Venice 3 s.h.
As a center of trade between East and West, Renaissance Venice became the wealthiest city in Europe and home to many of the greatest artists in the Western tradition; students focus on Venice's revolution in art, as it transformed from depictions of medieval religious imagery to Renaissance subjects and concepts associated with modernity such as image of the reclining nude, psychological portrait, poetic allegory, and the very idea that a visual medium might express an artist's internal feelings or state of mind; exploration and evaluation of workshops including the Bellini, Carpaccio, Giorgione, Titian, Veronese, and Tintoretto from multiple perspectives.

ARTH:3570 The Marginalized in Renaissance Art 3 s.h. Renaissance depictions of women, immigrants, Muslims, Jews, courtesans, the enslaved, the disabled, people of color, people of short stature, and people accused of non-heteronormative sexual acts explored in their social and cultural contexts, from different points of view and using multiple approaches; emphasis on discussion of primary sources and recent scholarship.
ARTH:3580 A Renaissance of Beauty 3 s.h.
Examination of aesthetics in early modern Western art; focus on 15thand 16 th-century Italy, augmented by case studies from different cultures and time periods; students survey ideals of beauty from ancient Egypt through antiquity and the middle ages, explore how the rebirth of these ideals transformed early Renaissance art and culture, consider how artists applied aesthetic theories in the creation of their work, and contemplate whether the Renaissance gave rise to a uniquely modern conception of beauty.
ARTH:3700 Rococo to Realism: Making Art Modern in an Age of Revolution 3 s.h. Developments in French art and culture in a period of artistic, cultural, and political upheavals from the rise of Rococo as a new art style to the innovations of Romanticism and Realism. Topics include the intersections of art with culture and politics, the impact of women artists and patrons, the role of psychology, biology, and the natural sciences in the making of art, the uses of myth, and the rise of modernism. Changes in patronage, the new role of museums and galleries, and innovations in printmaking and book illustration will also be explored. Artists include Watteau, Chardin, Fragonard, VigeeLebrun, David, Ingres, Gericault, and Delacroix, among others.

## ARTH:3710 Fantasy and Seduction in Venice: The Renaissance

 Art of Bellini, Giorgione, and Titian 3 s.h.Exploration of the birth of modern art through three Italian
Renaissance painters essential to its emergence: Bellini, Giorgione, and Titian.

ARTH:3720 The Romantic Revolution $\mathbf{3}$ s.h
Transformations in European art and culture 1750-1850, an age of artistic, political, cultural, intellectual crisis and revolutions; major artists, including David, Ingres, Gericault, Delacroix, Goya, Freidrich, Constable, Turner.
ARTH:3730 Impressionism and the Visual Revolution 3 s.h. Naturalism, Realism, the Impressionist landscape, painting of modern life, new trends in subjectivity and exoticism mid- to late-19th-century European art and culture; Courbet, Manet, Degas, Monet, Renoir, Seurat, Cezanne, Van Gogh, Gauguin, Ensor, Munch.

## ARTH:3740 Manet to Matisse

Development of modernism and the avant-garde in late 19th- and early 20th-century Paris; intersection of innovation and tradition, literature and art; role of theory and criticism in works of Manet, Degas, Seurat, Cezanne, Gauguin, Rodin, Matisse, and Picasso.
ARTH:3750 Muses, Models, Artists, and Patrons: Women in the Visual Arts 3 s.h.
Women in the visual arts from various perspectives: women as subject and inspiration, as patrons and as artists; role of women in the arts from the late 18th through the early 20th centuries, primarily in Europe, a period that witnessed significant female patronage of the arts, the first modern feminist movements that gave impetus to newly independent women artists, and the transformation of ways in which women were represented in art across genres, including history, myth, portraiture, orientalism, and images of contemporary life; impact of the role of women in art and culture will be critically examined.

## ARTH:3820 Modern Art

3 s.h.
Development of modern art from early years of 20th century through 1940s; focus on painting, sculpture, architecture, and photography; progress of Modernism; exploration of major movements including Fauvism, Cubism, and Surrealism.

ARTH:3840 Contemporary Art
Painting, sculpture, architecture, and photography; developments during late 1960s to present; conceptual art, performance art, neoabstraction, and picture/theory art with each approached from a global perspective.

## ARTH:3850 Pop Art

Survey of pop art in America, Britain, Europe; focus on developments in painting and sculpture 1950s to early 1960s; continuing influence of Pop Art.

## ARTH:3860 Minimalism

Survey of Minimalism; focus on developments in painting and sculpture during 1960s; continuing influence.

## ARTH:3870 History of Photography

Survey of photography 1839 to present.
ARTH:3930 American Renaissance and the Gilded Age 3 s.h. Exploration of the great range of visual culture from 1865-1915, including Gilded Age mansions of the Vanderbilts and Rockefellers, to popular prints and photographs of "how the other half lived," and new vistas of the far West; consideration of painting, sculpture, architecture, photography, and popular culture to examine this period and the advent of modernism within a larger social and historical context.
ARTH:3950 Modernism and Early Twentieth-Century American
Art 3 s.h.
Modern trends in visual culture of the United States from 1890-1945 through painting, sculpture, architecture and their interrelationship with larger social context; artists and architects grappled with how to portray the 20th century in visual form, photography took on new importance, and abstract art was changing old paradigms; American artists experimented with new forms, subjects, and ideas and found an array of solutions that paved the way for today's complex visual culture.
ARTH:3955 Art and American National Parks 3 s.h.
Artistic history of American national parks; beginning with painter George Catlin's idea of a nation's park in the 1840s; how art has played a major role in development of and attitudes toward these special places; magazine engravings, tourist guidebooks, government reports, monumental oil paintings, photographs, and recent photomontages; focus on Yellowstone, Niagara, Yosemite, and the Grand Canyon, as well as less well-known sites such as Acadia National Park and the Pictured Rocks National Lakeshore.

## ARTH:3980 American Print Culture

Exploration of a wide range of imagery printed and published in the United States during 19th century (1776-1900); fine art original prints, popular imagery in periodicals and illustrated books, scholarly literature, history of evolving technologies, variety of printed work; shifting reputation of printed art and its makers. Same as UICB:3980.

## ARTH:3985 Honors Research in Art History

Research and preparation of thesis. Requirements: honors standing.

## ARTH:3990 Topics in Art History

Varied topics.
ARTH:3995 Independent Study in Art History arr.
Advanced work in art history.
ARTH:4081 The Art Museum: Theory and Practice 3 s.h. Introduction to different aspects of art museums; emphasis on roles of art historians, especially curatorial practice; current and historical theories and practices of art exhibitions; varying debates of the politics of display; art museum professions; the many facets of art exhibition preparation; the University of Iowa Stanley Museum of Art collections. Same as MUSM:4081.

arr. ARTS:1520 Design Fundamentals are prerequisites for all studio may not be repeated unless noted on MyUI. Some courses numbered
3 s.h. ARTH:4891 Big-Shouldered City: Chicago Architecture 3 s.h. Architectural and urban development of Chicago; how changing visions of this most-American of cities has been influenced by aesthetic, social, political, economic factors; early settlement patterns, impact of the Great Fire of 1871, skyscraper technology, Daniel Burnham's 1909 Plan, Bungalow Belt, park system; larger history of American city in terms of its architectural, urban, and landscape development.
ARTH:4941 American Art and the Environment 3 s.h.
Artists' responses to the American environment across a broad chronological period; analysis of works of art through visual characteristics, landscape theories, ecocriticism, and environmental and cultural history to reveal deeper meanings of this seemingly
"natural" genre, and position it as a preeminent American artistic subject and a critically important art form in our own time as the environment becomes a global concern.
ARTH:4999 Capstone Seminar in Art History 3 s.h.
Critical thinking and research; readings in historical development of the discipline, from Renaissance to present; methodological issues. Offered fall semesters.
ARTH:5000 History and Methods
3 s.h.
Essential foundation of critical thinking and research in the history of art; students survey the historical development of the discipline of art history from Renaissance to present; various methodological paradigms that have been deployed in the field; for beginning graduate students.

ARTH:6020 Art History Colloquium 1 s.h.
Current topics and research in art history. Requirements: art history graduate standing.

ARTH:6040 Directed Studies

arr.

ARTH:6210 Graduate Seminar in Asian Art 3 s.h. Key themes and issues in Asian art.
ARTH:6300 Graduate Seminar in Ancient Art 3 s.h.
Key themes and issues in ancient art. Same as CLSA:6200.
ARTH:6440 Seminar: Problems in Medieval Art 3 s.h. Major issues, methodologies.
ARTH:6545 Graduate Seminar in Renaissance Art 3 s.h.
Key themes and issues in Renaissance art.
ARTH:6740 Graduate Seminar: Nineteenth-Century Art 3 s.h.
ARTH:6840 Seminar: Modern/Contemporary Art 3 s.h.
Major issues, methodologies.
ARTH:6940 Seminar: Problems in American Art 3 s.h.
ARTH:7010 PhD Readings arr.
ARTH:7020 PhD Thesis arr.

## Studio Art Courses

Courses numbered below 3000 are primarily for undergraduates and courses for art majors.

## Animation Courses

## ANIM:2125 Introduction to Animation

Introduction to animation and its role in contemporary creative practice; focus on historical and technical principles of traditional 2D animation, 2D digital animation, and 3D computer animation; creative, conceptual, and technical facets of animation practice; conceptualize and execute animations using processes and methods currently integrated into contemporary time-based art practice. Prerequisites: ARTS:1510 and ARTS:1520. GE: Engineering Be Creative.

## General Art Courses

ARTS:1000 First-Year Seminar
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
ARTS:1002 Colloquium in Visual Art and Design 1 s.h.
School of Art and Art History privileges, expectations, course offerings, and procedures; overview of various studio labs, processes, and equipment; introduction to faculty research; students receive support for development of their studio practice, build community and dialogue within the studio art division among majors, and explore career paths and internships.

## ARTS:1010 Elements of Art

Drawing, composition; selected reading. Requirements: non-art major. GE: Literary, Visual, and Performing Arts.
ARTS:1020 Elements of 3D Design 3 s.h.
Introduction to 3D design using drafting, modeling, and virtual reality software; basic concepts of drafting, planning, and color theory; basic Auto CAD, 3ds Max Studio, Vizard, InDesign software; students design an object to be printed 2D and 3D, and a conceptual space to be printed 2D and experienced virtually; student journal and portfolio. Requirements: non-art major.
ARTS:1030 Elements of Jewelry and Metal Arts 3 s.h.
Fundamental 3D design principles and appreciation of contemporary jewelry and metal artworks; techniques and materials in jewelry and metal arts; experimentation with diverse media. Requirements: non-art major. GE: Literary, Visual, and Performing Arts.

ARTS:1050 Elements of Printmaking 3 s.h.
Introduction to methods, materials, and concepts of printmaking.
Requirements: non-art major. GE: Literary, Visual, and Performing Arts.

ARTS:1060 Elements of Digital Photography 3 s.h.
Introduction to history, aesthetics, and practice of photography as a fine art; includes demonstrations, workshops, critiques, final portfolio; photography time outside of class; digital camera required. Requirements: non-art major. GE: Engineering Be Creative.

## ARTS:1070 Elements of Graphic Design

Introduction to concepts and principles of graphic design and contemporary approaches to effective visual communication; demonstrations, workshops, critiques, final portfolio.

ARTS:1080 Elements of Sculpture
Possibilities and definition of 3D form including time-based, performance, structural, installation, and kinetic sculpture.
Requirements: non-art major. GE: Literary, Visual, and Performing Arts.

ARTS:1140 Introduction to African American Art 3 s.h. Introduction to African American art in the United States; exploration of major art events (i.e., Harlem Renaissance, Black Arts Movement); study of specific African American artists and their work; influence of race on artistic expression. Same as AFAM:1140.

1 s.h.

3 s.h.

3 s.h.

## ARTS:1510 Basic Drawing

3 s.h.
Two-dimensional visual language, media; space, form; color.
3 s.h.
Requirements: art major or art minor. GE: Engineering Be Creative.

## ARTS:1520 Design Fundamentals 3 s.h.

Two- and three-dimensional concepts and their relations; working with basic drawing instruments; problems in visual arts; artists' philosophies and techniques. Requirements: art major. GE: Engineering Be Creative.

## ARTS:1560 Art Student Ambassador Seminar

0-1 s.h.
Ambassadors provide information about the School of Art and Art History to incoming and visiting students, university community, and broader community; conduct tours; meet with students and parents; review curriculum; provide information on opportunities; coordinate events; and develop materials for incoming students. Requirements: art major.

## ARTS:2000 Big Ideas: Creativity for a Lifetime <br> 3 s.h.

Exploration of what senior artists can teach about creativity and aging; interdisciplinary project-based collaborative learning opportunities that consider role of arts and creativity across a lifespan; essential skills necessary to be professionals in numerous careers including health, social work, education, humanities, and the arts; identification of ways for students to be more creative in their own lives and work. GE: Values and Culture. Same as ASP:2000, EDTL:2000, RHET:2000.
ARTS:2100 Printmaking and Politics of Protest 3 s.h.
Examination of historical populace roots of the print. GE: Diversity and Inclusion.

ARTS:2800 Digital Arts: An Introduction 3 s.h.
Introduction to potential of integrating art with technology to provide a foundation of skills and concepts through hands-on experimentation; lectures and demonstrations introduce key concepts and ideas as well as the history of digital arts; students develop skills that form a foundation for future investigation through labs; work may include using an Arduino, programming, and developing an interface to control a software project; final project is shared with the public in some way; critical discourse in the form of writing assignments allows for reflection and evaluation. GE: Engineering Be Creative. Same as CINE:2800, CS:2800, DANC:2800, DIGA:2800, MUS:2800, THTR:2800.

ARTS:2900 Book Design for Publishing
3 s.h.
Introduction to the major aspects of book design, including
typography, layout, standard industry software, discussion of trends in the field. Same as ENGL:2900, UICB:2900, WRIT:2900.

ARTS:3050 Art, Artists, and Institutions 3 s.h.
Expectations of artworks, artists, and institutions that enable artistic production and exhibition from historical and contemporary perspectives; introduction to key institutions that have transformed a shared sense of art, life, and politics; students are invited to contribute to the evolving sense of responsibility of artists, critics, curators, patrons, and institutions.

ARTS:3230 Scene Design I 3 s.h. Development of theatre scenery; how to research, conceptualize, and express ideas in 3D models, simple sketches, and drafting. GE: Engineering Be Creative. Same as THTR:3230.

## ARTS:3250 Art at the End of the World

The world is ending, again, and doomsdayers and apocalyptic prophets have warned of coming calamity for millennia and still humanity persists; today's challenges-staggering economic and social inequality, threat of nuclear annihilation, and climate change -while overwhelming and seemingly insurmountable, are not unprecedented; what the apocalyptic artist's role is; students explore the history of the end of times from ancient prophecy through maleficent technological takeovers of the near future and create new works in response to world endings past and future, curate and execute a public exhibition, and lead a series of public programs.

## ARTS:3400 Grant Writing in the Arts

3 s.h.
ARTS:4190 Honors in Studio Art
0-3 s.h.
Research, preparation, and exhibition of an honors project in studio art. Requirements: studio art major, UI GPA of at least 3.33, and art GPA of at least 3.50.

## ARTS:4195 BFA Exhibition <br> 0 s.h.

BFA students present a show of their work in final semester; use of flyers and other media to advertise show; meetings with faculty and academic advisors to complete required documentation; students planning to graduate with honors in the art major may combine honors project and BFA show; variations require approval by BFA faculty advisor and academic advisors. Requirements: BFA standing in final semester
ARTS:4200 Topics in Studio Arts 1-3 s.h.
Prerequisites: ARTS:1510 and ARTS:1520 and (SCLP:2810 or CERM:2010 or TDSN:2210 or MTLS:2910).

## ARTS:4270 Scenic Art 3 s.h.

Basic techniques in scenic art for the theatre; classical scene painting, color theory, drawing, using nontraditional tools and materials, foam carving, and finishes. Offered every other year. GE: Engineering Be Creative. Same as THTR:4270.

## ARTS:4300 Letterpress I

3 s.h.
Mechanics of letterpress printing, typography, and design as applied to hand set metal type and edition printing; printing on a Vandercook proof press; introduction to photopolymer plates and methods of illustration related to edition printing, historical aspects of printing technology, typecasting, type classification; role of letterpress in modern private press and contemporary artist books. Same as UICB:4300.

ARTS:4340 Digital Design for Artists' Books 3 s.h.
Introduction to concepts, techniques, and technologies used to design and produce artists' books with personal computers and graphic design software. GE: Engineering Be Creative. Same as UICB:4340.

## ARTS:4380 Letterpress II

3 s.h.
Builds on skills acquired in UICB:4300; students produce an editioned letterpress printed chapbook or artist book, a poster for a public event, and an image built from metal type; exploration of hand-set metal, digital typesetting, printing from photopolymer plates, and pressure printing; press mechanics and operation; publication philosophies, manuscript acquisition, and topics specific to literary fine press and artist books; historical and contemporary context for literary fine press publications and artist book work. Prerequisites: UICB:4300. Same as UICB:4380.

## ARTS:4390 Book and Publication Design

Students plan, design, and produce a book using Adobe Creative Suite; page layout software, typography, page layout and design, book formatting, handling of image files, preparation of materials for print and other contemporary book media; history of book design, book design in contemporary publishing; visit to University of Iowa Libraries Special Collections. Prerequisites: DSGN:2600 or UICB:4300. Same as UICB:4390.

## 3 s.h. ARTS:4400 History of Western Letterforms

3 s.h.
History of Western letterforms, with focus on tools, materials, techniques; the major hands, their place in history, their influence on modern times; creation of letterforms using appropriate tools; handson approach with emphasis on understanding rather than mastery. Same as UICB:4400.

ARTS:4415 Introduction to Classical Calligraphy 3 s.h.
Basic calligraphy with focus on the hands modern classic typefaces are inspired by (e.g., Roman capitals, lowercase Roman, italic). GE: Engineering Be Creative. Same as UICB:4415.

ARTS:4490 Advanced Studies in Letter Arts 3 s.h.
Special topics and advanced projects in calligraphy and letter arts. Prerequisites: UICB:4400 or UICB:4415 or UICB:4420. Same as UICB:4490.

## ARTS:5330 Letterpress III: Imagemaking

 arr. Advanced work in alternative and innovative letterpress technologies as they apply to imagemaking processes for fine press printing; topics include pressure printing, photopolymer from nondigital negatives, explorations of type-high surfaces, monoprints on the Vandercook, and applying hand work to editioned prints; students complete a series of print exercises for each process, a small printed book sketch, and a longer format editioned artist book. Prerequisites: UICB:4380. Same as UICB:5330.ARTS:5340 Letterpress III: The Handprinted Book 3 s.h.
Advanced work in fine press book design; exploration of problems in hand-printing books, choice of manuscript, editing, design, typesetting, proofreading, printing and binding; histories of printing and of the book, emphasis on 20th- and 21st-century book design and literature; issues of book design and production related to letterpress printing. Prerequisites: UICB:4380. Same as UICB:5340.

## ARTS:6000 MA Written Thesis <br> 1 s.h. <br> ARTS:6190 Graduate Independent Study arr. <br> Individual instruction by a faculty member. <br> ARTS:7000 MFA Written Thesis <br> 1 s.h.

## Ceramics Courses

CERM:2010 Ceramics I: Handbuilding 3 s.h.
Basic handbuilding methods of forming, firing, glazing clay. GE:
Engineering Be Creative; Literary, Visual, and Performing Arts.
CERM:2020 Ceramics II: Wheel Throwing
3 s.h.
Basic wheel-throwing techniques; clay, glaze formulation and preparation in kiln firing. Prerequisites: ARTS:1510 and ARTS:1520 and CERM:2010.
CERM:3010 Ceramics III: Slip Casting 4 s.h.
Slipcasting and plaster techniques for mass production of ceramic objects. Offered fall semesters. Prerequisites: CERM:2010 and CERM:2020.
CERM:4010 Ceramics IV: Advanced Studio
4 s.h.
Advanced individual projects. Offered spring semesters. Prerequisites: CERM:2020.

CERM:4020 Ceramic Materials and Effects
4 s.h.
Empirical methods of glaze and clay body formulation; effects of various kilns and firing atmospheres on glaze materials and clay bodies. Prerequisites: CERM:2020.
CERM:4030 Advanced Concepts in Ceramics 3-4 s.h.
Advanced studio; lectures and demonstrations cover advanced techniques; content varies. Prerequisites: CERM:2020.
CERM:4041 Kiln Building
4 s.h.
Kiln theory, design, and construction methods; may include participation in kiln construction. Prerequisites: CERM:2020.

## CERM:4050 Installation Concepts in Ceramics

Contemporary installation methods related to production and exhibition of ceramic sculpture. Prerequisites: CERM:2020.

CERM:4099 Undergraduate Individual Instruction 1-3 s.h. Individual instruction in ceramics for advanced students.

## CERM:6075 Ceramics Workshop <br> 3-4 s.h.

Advanced graduate studio; critique of student work; visiting artists, field trips. Prerequisites: CERM:4010. Requirements: CERM:4010 or graduate standing.

CERM:6099 Graduate Individual Instruction in Ceramics arr. Requirements: knowledge of clay and glaze computation, and ability to fire kilns.

## Design Courses

ARTS:1510 Basic Drawing and ARTS:1520 Design Fundamentals are prerequisites for all design courses for art majors; ARTS:1510 Basic Drawing is a prerequisite for nonmajors.

## DSGN:2500 Graphic Design I

Basic concepts and principles that can be applied to all modes of contemporary visual communication. Prerequisites: ARTS:1510 and ARTS:1520. Corequisites: DSGN:2600. GE: Engineering Be Creative.

## DSGN:2600 Graphic Design II <br> 3 s.h.

Fundamentals of typography as a core element in visual communication; introduction to historical typographic practices as well as modern modes of designing with type. Prerequisites:
ARTS:1510 and ARTS:1520. Corequisites: DSGN:2500. Same as UICB:2600.
DSGN: 3500 Graphic Design III 4 s.h.
Focus on browser-based user interfaces and user experiences; builds basic HTML and CSS knowledge base; skills. Prerequisites: ARTS:1510 and ARTS:1520 and DSGN:2500 and DSGN:2600.

## DSGN:3600 Graphic Design IV

Implementing the fundamental knowledge and skills gained in previous design courses to explore the interaction of typography and visual image. Prerequisites: DSGN:2500 and DSGN:2600. Corequisites: DSGN:3500.

## DSGN:4000 Graphic Design V

Critical theory and professional practice of branding and identity design; topics range from icon development to packaging design and prototyping. Prerequisites: DSGN:3500 and DSGN:3600.
Corequisites: DSGN:4700.

## DSGN:4199 Undergraduate Individual Instruction

1-3 s.h.
Individual instruction in design for advanced students.

## DSGN:4700 Graphic Design VI

4 s.h.
Advanced exploration of contemporary and experimental user interface and user experience design methodology; topics include design for mobile devices and wearables, as well as immersive environments. Prerequisites: DSGN:3500 and DSGN:3600.
Corequisites: DSGN:4000.

## DSGN:4800 Graphic Design VII

4 s.h.
Concentrated semester-long opportunity for students to investigate a design project driven by their own personal research interests; projects closely guided by faculty and are critiqued throughout the semester; critical theory readings and discussion. Prerequisites: DSGN:4000 or DSGN:4700.

## DSGN:6175 Graphic Design VIII

4 s.h.
Introduction to complex problems in graphic design; planning, development, and organization of integrated design programs; activities include research and studio assignments, individual presentations, discussions, demonstrations, and critiques.

4 s.h. Three-Dimensional Design Courses
TDSN:2210 Introduction to 3D Design
3 s.h.
Develop conceptual and critical design thinking while solving problems to create 3D structures with sustainable materials, processes, and consumption; discuss, develop, and evaluate composition principles and their relation to aesthetics, modular systems, structure, and sustainable use of material through handmade models and systems that lead to final designs; engage in diverse multidisciplinary collaborations. GE: Sustainability. GE: Engineering Be Creative; Literary, Visual, and Performing Arts.

## TDSN:2240 Digital Drafting with AutoCAD

3 s.h.
Basic principles of 2D and 3D computer-aided drafting; use of AutoCAD software to draw plans, elevations, and sections for objects and interior spaces. Prerequisites: ARTS:1510 and ARTS:1520 and (CERM:2010 or SCLP:2810 or TDSN:2210 or MTLS:2910). Same as CEE:2240.

## TDSN:2250 Digital Prototyping

3 s.h.
Basic knowledge and practical technical skills using 3ds Max studio software; experience creating and manipulating basic forms and working with texture, background, light, and camera viewpoints; basic animation. Corequisites: ARTS:1510 and ARTS:1520 and (ANIM:2125 or CERM:2010 or DSGN:2500 or DRAW:2310 or INTM:2710 or MTLS:2910 or PHTO:2600 or PNTG:2410 or PRNT:2610 or SCLP:2810 or TDSN:2240).
TDSN:3200 Product Design 4 s.h
How objects are designed and structured; modeling, graphic skills necessary for basic project development. Corequisites: TDSN:2250.
TDSN: 3220 Interior Design
4 s.h.
Relationship of interior space to its architecture, environment, human element; color, materials, furnishings, lighting; projects. Prerequisites: TDSN:2250.

## TDSN:3230 Color for Interior Design

4 s.h.
Use of color for interior spaces; principles of color theory reviewed and applied to 3D environments; color as a compositional element and psychological tool. Prerequisites: TDSN:2250.
TDSN:3240 3D Computer-Aided Design
arr.
Three-dimensional computer-aided drafting; use of AutoCAD
software. Prerequisites: ARTS:1510 and ARTS:1520 and
(MTLS:2910 or SCLP:2810 or CERM:2010 or TDSN:2210).
TDSN:3260 Design for Production
4 s.h.
Special issues and topics in design. Prerequisites: TDSN:2240.
Corequisites: TDSN:2250.
TDSN:3280 Forms and Textiles 4 s.h.
Products and seating design with soft materials; students experiment with diverse soft materials and textile construction techniques to design and make unique functional forms. Prerequisites: ARTS:1510 and ARTS:1520 and TDSN:2210. Corequisites: TDSN:2240 and TDSN:2250.
TDSN: 3285 Fabrication and Design: Hand-Built Bicycle
4 s.h.
Building a bicycle frame by hand; use of CAD modeling and development of fabrication skills to create a modern-day work of art. Prerequisites: TDSN:2240.

## TDSN:4010 Furniture Design I

4 s.h.
Introduction to advanced problems of furniture design and manufacturing; students design and fabricate a chair with sustainable methods using computer numerical control (CNC) technologies. Corequisites: TDSN:3200.
TDSN:4020 Furniture Design II
4 s.h.
Continuation of TDSN:4010; design of virtual environments. Prerequisites: TDSN:4010.

TDSN:4050 Site Specific Design
1 s.h.
Art of planning, building, and presenting at real professional design venues; students plan, design, and build an environment to display selected 3D design work at one or two professional design venues. Prerequisites: TDSN:2250. Corequisites: TDSN:3200 or TDSN:3220 or TDSN:3230 or TDSN:3260 or TDSN:3280.

TDSN:4299 Undergraduate Individual Instruction
Individual instruction in 3D design for advanced students.
TDSN: 6299 Individual Instruction in 3D Design
Individual instruction in 3D design for advanced students.

## Drawing Courses

ARTS:1510 Basic Drawing and ARTS:1520 Design Fundamentals are prerequisites for all drawing courses for art majors; ARTS:1510 Basic Drawing is a prerequisite for nonmajors.

DRAW:2310 Life Drawing I
3 s.h.
Observational drawing of form in its spatial contexts; drawing in varied media; figural as well as nonfigural content. Prerequisites: ARTS:1510 and ARTS:1520.
DRAW:3310 Concepts in Drawing 3-4 s.h. Intermediate-level topics; observation, theory, media, form, content; emphasis on personal direction. Prerequisites: DRAW:2310. Same as THTR:3205.

DRAW:4310 Advanced Concepts in Drawing
3-4 s.h.
Advanced-level topics. Prerequisites: DRAW:3310.
DRAW:4399 Undergraduate Individual Instruction
Individual instruction in drawing for advanced students.
DRAW:6399 Individual Instruction in Drawing

## Intermedia Courses

ARTS:1510 Basic Drawing and ARTS:1520 Design Fundamentals are prerequisites for all intermedia courses for art majors; ARTS:1510 Basic Drawing is a prerequisite for nonmajors.

INTM:2710 Introduction to Intermedia 3 s.h. Interdisciplinary focus; emphasis on conceptual, installation, video, time-based media, performance art. Prerequisites: (ARTS:1510 and ARTS:1520) or CINE:1834. Requirements: for CINE:2869_grade of C or higher in CINE:1834. Same as CINE:2869.
INTM:2720 Concepts in Contemporary Art Practice 3 s.h. Interdisciplinary investigation of materials and concepts in relation to time-based media, performance, video, installation; individual and collaborative projects. Prerequisites: INTM:2710. Same as THTR:2720.

## INTM:3700 Topics in Intermedia <br> 4 s.h.

Performance, writing, reading, observation, physical practice, improvisation, and devising methods; development or expansion of physical practices that articulate with current artistic production. Prerequisites: ARTS:1510 and ARTS:1520 and (CERM:2010 or INTM:2710 or MTLS:2910 or PNTG:2410 or PRNT:2610 or SCLP:2810 or TDSN:2210). Same as DANC:3710.

INTM:3799 Undergraduate Individual Instruction 1-3 s.h. Individual instruction in intermedia for advanced students.

INTM:3876 Video for Performance
3 s.h.
Introduction to aesthetics and practical applications of digital media and video design for live performance including content creation, system design, and content optimization for media servers; students create digital video and animations and integrate them into live performance and entertainment events via projections, media servers, and digital displays using QLab Media Server and Adobe Creative Cloud (e.g., Illustrator, Photoshop, Premiere Pro, Audition, After Effects); for those with an interest in designing, creating,
arr. and displaying digital media for theatre, dance, concerts, corporate events, gallery installations, VJ sets, and architectural projections. GE: Engineering Be Creative. Same as CINE:3876, DANC:3876, DIGA:3876, THTR:3876.

## INTM:6799 Individual Instruction in Intermedia and Video

 Art 1-2 s.h.
## Jewelry and Metal Arts Courses

ARTS:1510 Basic Drawing and ARTS:1520 Design Fundamentals are prerequisites for all jewelry and metal arts courses for art majors; ARTS:1510 Basic Drawing is a prerequisite for nonmajors.
MTLS:2910 Introduction to Jewelry and Metal Arts 3 s.h.
Fabrication, hammer forming, hydraulic die forming, soldering, riveting, etching, texturing, anodization of aluminum and titanium, stone setting, and patination techniques; creation of jewelry, flatware, and other functional and nonfunctional sculptural objects using varied metals and other materials; emphasis on creativity, learning, and basic metalworking techniques. Prerequisites: ARTS:1520 and ARTS:1510. GE: Engineering Be Creative.

MTLS:3910 Intermediate Jewelry and Metal Arts 4 s.h. Exploration of different applications with casting (mostly gold, silver, and bronze), enameling, and stone setting; combining all three processes to create artwork; may include introduction to other processes (e.g., photo-etching, 3D computer modeling); historical and current trends in craft. Prerequisites: MTLS:2910.

## MTLS:3915 Fabrication and Finishing in Jewelry and Metal

Arts
Students further their conceptual development with intermediate-level skills in fabrication and surface finishing; builds on introductory skills with techniques in complex and larger-scale soldering and forming, as well as new techniques (e.g., chasing, repousse); exploration of finishing and surface treatments (e.g., aluminum anodization, etching, powder coating). Prerequisites: MTLS:2910.
MTLS:3920 Advanced Jewelry and Metal Arts
4 s.h. Electroforming; production of hollow copper structures through prolonged electroplating on a nonmetallic form (typically wax) with a conductive coating; metal-forming techniques (e.g., raising and fold forming); emphasis on development of personal aesthetics, learning, and refining technical skills in metalworking and jewelry techniques. Prerequisites: MTLS:2910.
MTLS:4910 Mixed Media and Professional Practices 3-4 s.h. Free exploration of all media and materials, including found objects; creation of conceptual and/or functional mixed media objects, jewelry, sculptures, installation pieces; pioneering use of new materials, development of new techniques, creation of diverse innovative artworks. Prerequisites: MTLS:2910. Recommendations: MTLS:2910 and MTLS:3920.
MTLS:4920 Mold Making 4 s.h.
All aspects of mold making, including plaster, rubber, and silicone. Prerequisites: CERM:2010 or TDSN:2210 or MTLS:2910 or SCLP:2810.

MTLS:4930 Experimental Casting with New Technology 4 s.h. Students combine traditional casting techniques with new technology (e.g., ceramic shell, 3D printed models, 3D printed resin sand molds, casting simulation software) in pursuit of their creativity; emphasis is on vessels and hollow objects; examples of historical and current application of casting, especially in mixed media and crossdisciplinary approaches. Prerequisites: SCLP:2810 or MTLS:2910.

## MTLS:4960 Form and Fabrication: The Hand-Built Bicycle

 Frame II4 s.h.
Builds on TDSN:3285; advanced concepts of bicycle frame design and fabrication; concept development, fabrication geometry and design, metal properties and selection, tool selection, brazing and welding including titanium milling and how to build a frame jig; emphasis on applying fabrication skills while situating frame-building project within context of a design problem. Prerequisites: TDSN:3285.

## MTLS:4970 Hand-Built Bicycle III

Builds on MTLS:4960; advanced concepts of bicycle frame design and fabrication; concept development, fabrication geometry and design, metal properties and selection, tool selection; brazing and welding including titanium-milling and how to build a frame jig; emphasis on application of fabrication skills while situating frame building project within context of a design problem. Prerequisites: MTLS:4960.
MTLS:4999 Undergraduate Individual Instruction 1-3 s.h. Individual instruction in metalsmithing and jewelry for advanced students.
MTLS:6999 Individual Instruction in Metalsmithing and Jewelry
arr.

## Painting Courses

ARTS:1510 Basic Drawing and ARTS:1520 Design Fundamentals are prerequisites for all painting courses for art majors; ARTS:1510 Basic Drawing is a prerequisite for nonmajors.

## PNTG:2410 Painting I

Emphasis on observational painting, theory and development of pictorial ideas and skills. Prerequisites: ARTS:1510 and ARTS:1520. GE: Engineering Be Creative.

## PNTG:2420 Painting II

Materials, techniques, beginning of a personal painting language through observation and imagination. Prerequisites: PNTG:2410.

## PNTG:4100 Advanced Painting

Individual projects as they aid the realization of a personal vision. Prerequisites: PNTG:2420.
PNTG:4499 Undergraduate Individual Instruction 1-3 s.h. Individual instruction in painting for advanced students.
PNTG:6475 Graduate Drawing and Painting Workshop 3-4 s.h. Group and individual criticism.

## PNTG:6499 Individual Instruction in Painting

## Papermaking Courses

BKAT:2110 Introduction to Book Arts 3 s.h.
Topics related to artist books, hand bookbinding, letterpress printing, papermaking, and lettering arts. GE: Engineering Be Creative. Same as UICB:2110.
BKAT:3280 Elements of Book Art
3 s.h.
Overview of book art process and techniques for nonmajors; introduction to traditional bookbinding skills, nontraditional book structures, and content development for artist books. GE: Engineering Be Creative. Same as UICB:3280.

BKAT:3380 Letterpress
3 s.h.
Introduction to letterpress printing; metal type, relief printing, page layout, and basic typography; basic use of Vandercook Proof Press; experimentation with diverse letterpress techniques. GE: Engineering Be Creative. Same as UICB:3380.
BKAT:4100 Paperworks
3 s.h.
Conceptual and methodological approaches to 2D and 3D paper works; creation of works that couple unique properties of paper-pulp medium with personal visual ideas and clarity of intent; contemporary issues in paper pulp, medium's relationship to larger art and craft contexts. GE: Engineering Be Creative. Same as UICB:4100.
BKAT:4205 Bookbinding I: Materials and Techniques 3 s.h. Hands-on introduction to materials and techniques commonly used in bookbinding. Same as UICB:4205.

BKAT:4210 Boxes and Enclosures 3 s.h.
Hands-on techniques for a variety of book enclosures;
appropriateness, aesthetic issues concerning box design; Japanese wraparound case, drop-spine box, hinged and lidded boxes, slipcase; technical skill development. Prerequisites: UICB:4205. Same as UICB:4210.

## BKAT:4270 Bookbinding II

Builds on skills acquired in UICB:4205; projects to complete six bindings based on historical and contemporary models; sewing styles, board attachments, endband types; nonadhesive and casebound structures, varied materials and binding styles, their effects on structure, aesthetic considerations, further development of solid binding skills; historical development of particular binding practices.
Prerequisites: UICB:4205. Same as UICB:4270.
BKAT:4280 Artists' Books
3 s.h.
Exploration of the book as a form for artistic expression; emphasis on conceptual development; relationship between content, form, and structure; how a book's structure and design can enhance and integrate part of the work's meaning. Prerequisites: UICB:4205 or BKAT:4205. Same as UICB:4280.

BKAT:5110 Papermaking I: East Asia, Nepal, and Contemporary Practice

3 s.h.
History, technique, and aesthetics of East Asian and Nepalese papermaking, along with their respective contemporary practices. Same as UICB:5110.
BKAT:5120 Papermaking I: Central Asia, Europe, and Contemporary Practice
Foundational papermaking; history, technique, and aesthetics of Central Asian, Islamicate, and European papermaking; respective contemporary practices. Same as UICB:5130.
BKAT:5140 Papermaking II: Contemporary Papermaking 3 s.h.
Contemporary papermaking studio practice and conceptual considerations; focus on nontraditional techniques and crossdisciplinary use of paper fibers and handmade paper; handmade paper as a form of artistic expression. Prerequisites: UICB:4100 or BKAT:4100 or UICB:5110 or BKAT:5110 or UICB:5130 or BKAT:5120. Same as UICB:5140.

BKAT:5170 Papermaking III: The Papermakers 3 s.h. Students hone skills, drawing inspiration from papermaking societies, and conduct hands-on production and research. Prerequisites: UICB:4100 or UICB:5110 or UICB:5130 or UICB:5140 or BKAT:4100 or BKAT:5110 or BKAT:5120. Same as UICB:5170.
BKAT:5180 Advanced Projects in Paper 1-3 s.h. Advanced independent projects undertaken in a classroom setting; collaborative group discussions to plan, implement, troubleshoot, and evaluate student projects. Prerequisites: UICB:5110 or UICB:5130 or BKAT:5110 or BKAT:5120. Same as UICB:5180.

BKAT:5210 Bookbinding III
3 s.h.
Bookbinding structures based on historical and contemporary models; differences in various binding practices, how these differences affect function, why the styles developed; experience choosing appropriate structures for particular uses; emphasis on fine tuning skills and techniques required for advanced binding practices; sewn endbands, rounding and backing, sewing on varied supports, board attachments, and covering methods. Prerequisites: (UICB:4205 or BKAT:4205) and (UICB:4270 or BKAT:4270). Requirements: for UICB:5210 -UICB:4205 and UICB:4270; for BKAT:5210—BKAT:4205 or BKAT:4270 or UICB:4205 or UICB:4270. Same as UICB:5210.

## Photography Courses

ARTS:1510 Basic Drawing and ARTS:1520 Design Fundamentals are prerequisites for all photography courses for art majors; ARTS:1510 Basic Drawing is a prerequisite for nonmajors.

## PHTO:2600 Photography I

Introduction to color theory, lighting, and utilizing color for conceptual concerns; experience operating digital SLR cameras in full manual mode, utilizing Adobe editing software, and producing fine art printed portfolios; requires a digital SLR camera. Prerequisites: ARTS:1510 and ARTS:1520. GE: Engineering Be Creative.

## PHTO:3100 Photography II: Introduction to Darkroom

 Photography4 s.h.
Darkroom techniques including operation of 35 mm film cameras, exposing and developing black-and-white film, and producing fine art darkroom prints. Prerequisites: ARTS:1510 and ARTS:1520. Corequisites: PHTO:2600.
PHTO:3110 Photography III: The Constructed Image 4 s.h. Introduction to industry practices of studio lighting and large format printing; focus on constructed scenes in and out of the studio with emphasis on conceptual development and use of advanced Adobe Photoshop techniques. Prerequisites: PHTO:2600.
PHTO:3200 Photography IV: Special Topics
4 s.h.
Investigation of contemporary themes including alternative processes, social documentary, portraiture, book making, and hybrid forms, among others. Prerequisites: INTM:2710 or (PHTO:2600 and PHTO:3100).
PHTO:3210 Photography IV: Contemporary Video Practices4 s.h. Investigation of contemporary themes pertaining to moving image capture with emphasis placed on conceptual development, technical mastery of software, and innovative installation approaches.
Prerequisites: INTM:2710 or (PHTO:2600 and PHTO:3100).

## PHTO:3220 Photography IV: Alternative Photographic

 ProcessesInvestigation of historical photographic processes including cyanotype, van dyke brown, gum dichromate, and palladium printing among others. Introduction to contemporary artists using these media as well as working knowledge of analog and digital hybrid approaches. Prerequisites: PHTO:2600 and PHTO:3100.

## PHTO:4000 Photography V: Advanced

4 s.h.
Individual portfolio projects with emphasis on conceptual development and craft; regular critiques from faculty, peers, and visiting artists; professional practice advising and mentorship through BFA exhibition. Prerequisites: PHTO:2600 and PHTO:3100 and PHTO:3110.
PHTO:4010 Photography V: Advanced - Risograph Editions 4 s.h. Alternative methods of printed image media, zines, and small collaborative publications using Risograph and print on demand services. Prerequisites: PHTO:2600 and (PHTO:3100 or PHTO:3110 or DSGN:2600).
PHTO:4599 Undergraduate Individual Instruction 1-3 s.h.

4 s.h. PRNT:3665 Frogman's Print Workshop 3 s.h.
PHTO:6575 Graduate Photography Workshop 4 s.h.
Projects; group critiques; readings.

## Printmaking Courses

ARTS:1510 Basic Drawing and ARTS:1520 Design Fundamentals are prerequisites for all printmaking courses for art majors; ARTS:1510 Basic Drawing is a prerequisite for nonmajors.
PRNT:2610 Introduction to Printmaking 3 s.h. Introduction to methods, materials, and concepts of printmaking. Prerequisites: ARTS:1510 and ARTS:1520. Requirements: art major. GE: Engineering Be Creative.
PRNT:3600 Textile Printing and Surface Design
4 s.h.
Introduction to screen printing and block printing on textiles, including image generation and digital techniques from start to finish; effective use of design principles; application of a conceptual approach to work; possibilities of working with textiles. Prerequisites: ARTS:1510 and ARTS:1520 and PRNT:2610.
PRNT:3610 New Media for Printmaking 4 s.h.
New concepts and techniques for contemporary print media, including digital and less toxic applications in relief, intaglio, lithography, and screenprinting. Prerequisites: PRNT:2610.
PRNT:3620 Intaglio
4 s.h.
Concepts, techniques; traditional through contemporary ideas, methods; emphasis on metal plate printing, including etching, drypoint, engraving, softground, aquatint. Prerequisites: PRNT:2610. Requirements: PRNT:2610 or BFA candidacy in any area or graduate standing.
PRNT:3630 Woodcut and Relief 4 s.h.
Concepts and techniques of relief printmaking, including woodcut, linocut, relief etching, black-and-white and color printing methods; traditional and contemporary approaches. Prerequisites: PRNT:2610. Requirements: ARTS:1510, ARTS:1520, and PRNT:2610 for art majors; ARTS:1510 for nonmajors; or BFA candidacy in any area; or graduate standing.
PRNT:3640 Lithography
4 s.h.
Technical, aesthetic characteristics; basic direct drawing, processing, printing of stone and plate images in black and white. Prerequisites: PRNT:2610. Requirements: ARTS:1510, ARTS:1520, and PRNT:2610; or graduate standing.
PRNT:3660 Monoprint 3-4 s.h.
Concepts, techniques in use of traditional and alternative printmaking media to produce unique, matrix-generated prints. Prerequisites: PRNT:2610.

Hands-on experience in printmaking techniques; workshop format. Offered summer session.
PRNT:3675 Foil Workshop in Printmaking 2 s.h.
Hands-on experience creating foil prints; workshop format. One or two weeks. Offered summer session.
PRNT:3680 Silkscreen
4 s.h.
Photographic, nonphotographic stencil techniques for silkscreen printing. Prerequisites: PRNT:2610. Requirements: ARTS:1510, ARTS:1520, and PRNT:2610 for art majors; ARTS:1010 and ARTS:1050 for nonmajors; or BFA candidacy in any area; or graduate standing.
PRNT:4610 Advanced Printmaking
4 s.h.
Print media (i.e., intaglio, lithography, relief, screenprint); emphasis on individual technical and conceptual growth and development of independent studio practices. Prerequisites: PRNT:2610 and (PRNT:3620 or PRNT:3630 or PRNT:3640 or PRNT:3680).

PRNT:4799 Undergraduate Individual Instruction 1-3 s.h. Individual instruction in printmaking; for advanced students.

PRNT:6665 Frogman's Print Workshop
Hands-on experience in printmaking techniques; workshop format Offered summer session.

PRNT:6675 Graduate Print Workshop
Contemporary issues in printmaking; emphasis on development of personal work and independent studio practice through group critiques, special research projects, work in all print media.
PRNT:6699 Individual Instruction in Printmaking

## Sculpture Courses

## SCLP:2810 Undergraduate Sculpture I

Basic sculptural concepts, processes, investigation of materials such as plaster, clay, wood; emphasis on developing formal language, acquiring basic skills; spatial, conceptual, technical issues. GE: Engineering Be Creative; Literary, Visual, and Performing Arts.

SCLP:3840 Robotic Art Studio
Exploration, design, and creation of interactive artworks, kinetic sculpture, robotic art, sound works, light art, and performance environments; application of basic electronics and mechanical techniques; use of programmable micro-controller Arduino. Prerequisites: ARTS:1510 and ARTS:1520 and (SCLP:2810 or CERM:2010 or INTM:2710 or MTLS:2910 or TDSN:2210). GE: Engineering Be Creative. Same as DIGA:3840.
SCLP:3895 Topics in Sculpture
Projects, reading; specialized conceptual forms and issues in contemporary sculpture, such as public art, installation. Prerequisites: ARTS:1510 and ARTS:1520 and (SCLP:2810 or CERM:2010 or INTM:2710 or TDSN:2210 or MTLS:2910).

SCLP:4825 Casting in Hot Metal 4 s.h.
Foundry work, wax working, mold making, and processes. Prerequisites: ARTS:1510 and ARTS:1520 and (SCLP:2810 or MTLS:2910).

## SCLP:4835 Electronic Objects and Spaces <br> 4 s.h.

Aesthetic use of electronics to sequence and control motion, light, and sound; introduction to basic electronics through hands-on workshops and discussions; demonstrations on how to build an Arduino, integrated circuits, power supplies, soldering, prototyping, motors, sensors; projects integrating electronics with objects and spaces; artist screenings and critiques. Prerequisites: ARTS:1510 and ARTS:1520 and (SCLP:2810 or CERM:2010 or INTM:2710 or MTLS:2910 or TDSN:2210). GE: Engineering Be Creative. Same as DIGA:4835.
SCLP:4840 Air, Actuators, and Motors 4 s.h.
Introduction to wide range of motors, actuators, and air devices available for integration in art projects; various forms of motor control and necessary means to power these devices; DC and AC motors, stepper motors, solenoids, electro magnets, relays, pneumatics, inflatables, and other air-driven devices; development of a project utilizing one or more systems; examples and media demonstrations to show how artists and scientists employ these systems. Prerequisites: ARTS:1510 and ARTS:1520 and (SCLP:2810 or CERM:2010 or INTM:2710 or MTLS:2910 or TDSN:2210). GE: Engineering Be Creative. Same as DIGA:4840.
SCLP:4899 Undergraduate Individual Instruction 1-3 s.h. Individual instruction in sculpture for advanced students.
SCLP:6264 Graduate Sculpture and Intermedia Workshop3-4 s.h.
Critique seminar with readings; for sculpture and non-sculpture graduate students.

## Art Education Courses

ARTE:3143 Methods of Elementary Art and Field

## Experiences

3 s.h.
Application of studio methods to teaching children in Saturday
Children's Art Class Program. Same as EDTL:3143.
ARTE:6267 Seminar: Current Issues in Art Education 3-4 s.h.
Analysis of literature in art education and related disciplines. Same as EDTL:6267.

## Art, BA

## Learning Outcomes

Students will:

- acquire breadth of knowledge about the field of art history through coursework in a diversity of areas;
- learn that art embodies historical, cultural, social, and political factors within a diverse range of national, international, and global cultures;
- acquire critical skills in visual analysis and research; and
- develop skills in oral and written communication.

## Requirements

The Bachelor of Arts with a major in art requires a minimum of 120 s.h., including at least 39 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

The major provides a foundation in art history as well as an understanding of the formal traditions and contemporary practices in studio art. Students take courses in the school's studio art programs, including animation, ceramics, graphic design, three-dimensional (3D) design, drawing, intermedia, jewelry and metal arts, painting, photography, printmaking, and sculpture.
Students may count a maximum of 56 s.h. earned in art and art history courses toward the degree; they must earn at least 64 s.h. of credit in courses outside the School of Art and Art History in order to graduate.

BA students who are graduating with a double major in the school (e.g., a major in art and a major in art history) or a major and a minor in the school (e.g., a major in art and a minor in art history) may apply more than 56 s.h. from the School of Art and Art History toward their degree, but they must earn at least 56 s.h. of credit in courses outside the School of Art and Art History in order to graduate.
Students majoring in art begin their study in the Bachelor of Arts program. Those interested in pursuing concentrated work in a specific studio art discipline may apply for admission to the Bachelor of Fine Arts program through a process called "clearance," in which the faculty evaluates a student's readiness for BFA study. Clearance usually takes place during the third year, but it may be conducted earlier or later, depending on the student's readiness.
For more information about teaching art in elementary and/or secondary schools, see "Teacher Licensure" below.

The BA with a major in art requires the following coursework. Not all courses are offered every semester, including required courses. When planning coursework, students should consult their advisors and MyUI to determine when specific courses will be offered.

| Requirements | Hours |
| :--- | :--- |
| Art History Courses | 12 |
| Foundational Studio Art Courses | 6 |
| Studio Art 3D Courses | 6 |
| Studio Art 2D Courses | 6 |
| Upper-Level Studio Art Courses | 6 |
| Required Electives | 3 |

## Art History

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: |  |  |
| ARTH 1040 | Arts of Africa | 3 |

| ARTH:1050 | From Cave Paintings to <br> Cathedrals: Survey of Western <br> Art I | 3 |
| :--- | :--- | :--- |
| ARTH:1060 | From Mona Lisa to Modernism: <br> Survey of Western Art II | 3 |
| ARTH:1070 | Asian Art and Culture | 3 |
| ARTH:1095 | Native American Art | 3 |
| And: |  | 6 |
| Two art history courses not in the list above, excluding |  |  |
| ARTH:1000, ARTH:1080, ARTH 3985, ARTH 3995 |  |  | ARTH:1000, ARTH:1080, ARTH:3985, ARTH:3995, and ARTH:4999

## Foundational Studio Art

Studio art majors are required to complete ARTS:1510 Basic Drawing and ARTS:1520 Design Fundamentals by the end of their first academic year. Majors can enroll in one beginning or introductory studio arts course during the same semester they are enrolled in either ARTS:1510 or ARTS:1520.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: |  |  |
| ARTS:1510 | Basic Drawing | 3 |
| ARTS:1520 | Design Fundamentals | 3 |

Studio Art 3D Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: |  |  |
| CERM:2010 | Ceramics I: Handbuilding | 3 |
| INTM:2710 | Introduction to Intermedia | 3 |
| MTLS:2910 | Introduction to Jewelry and | 3 |
|  | Metal Arts | 3 |
| SCLP:2810 | Undergraduate Sculpture I | 3 |
| TDSN:2210 | Introduction to 3D Design | 3 |

Studio Art 2D Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: |  |  |
| ANIM:2125 | Introduction to Animation | 3 |
| DRAW:2310 | Life Drawing I | 3 |
| DSGN:2500 | Graphic Design I | 3 |
| PHTO:2600 | Photography I | 3 |
| PNTG:2410 | Painting I | 3 |
| PRNT:2610 | Introduction to Printmaking | 3 |

## Upper-Level Studio Art Courses

Students must take two upper-level studio art courses. They may take both upper-level courses in the same studio art discipline or one upper-level course in each of two disciplines. Any course beyond the introductory course in the discipline is considered upper level.

Introductory courses include the following and do not count toward the upper-level studio arts courses requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ANIM:2125 | Introduction to Animation | 3 |
| CERM:2010 | Ceramics I: Handbuilding | 3 |
| DRAW:2310 | Life Drawing I | 3 |
| DSGN:2500 | Graphic Design I | 3 |
| INTM:2710 | Introduction to Intermedia | 3 |
| MTLS:2910 | Introduction to Jewelry and | 3 |

| PHTO:2600 | Photography I | 3 |
| :--- | :--- | :--- |
| PNTG:2410 | Painting I | 3 |
| PRNT:2610 | Introduction to Printmaking | 3 |
| SCLP:2810 | Undergraduate Sculpture I | 3 |
| TDSN:2210 | Introduction to 3D Design | 3 |

## Required Electives

School of Art and Art History elective courses must bring the total credit for the major in art to a minimum of 39 s.h.

## Transfer Students

Transfer students should contact the undergraduate academic advisors for information about transfer portfolio review and specific coursework that satisfies the requirements for the major in art. Students may count a maximum of $12 \mathrm{~s} . \mathrm{h}$. of approved transfer credit toward their major.

## Study Abroad

Students who wish to study abroad must meet with the undergraduate advisor before they depart in order to confirm approval of the courses they plan to take.

Students who take studio art courses abroad must bring their artwork back to campus and must present it in a portfolio review, which determines whether the work satisfies a requirement for their major. The portfolio review is not required if the study abroad course was taught by a School of Art and Art History faculty member who gave the student a grade for the course.
Students who plan to take art history courses abroad must present the course syllabus to their advisor well in advance of their departure. The head of the art history program determines whether the study abroad course is equivalent to a course required for the major; if it is, the student is credited with fulfilling the requirement once the course is completed with a passing grade.

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.
To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

The BA in art education [p. 1376] is offered by the Department of Teaching and Learning, and the degree is awarded by the College of Education. In order to earn the BA in art education, students also must complete the BA in art. For more information, contact the College of Education Academic Advising Office.

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in the major. Honors students must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33 and a GPA of at least 3.50 in their major. They should meet with their academic advisor at the start of their final semester to complete the steps needed to graduate with honors in the major.

Students must complete a studio art research project during the semester in which they plan to graduate. They must select a studio art
faculty member willing to supervise their honors project, display the completed project in a show, complete an abstract, and upload a JPEG image of their project. They earn credit for the project by enrolling in ARTS:4190 Honors in Studio Art.

## University of Iowa Honors Program

In addition to honors in the major, students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the art major.

## Career Advancement

Many graduates pursue careers that match their degree specializations, for example, commercial or graphic designer, conservation or museum curator or administrator, art educator, public artist, or community art center coordinator or instructor. Others go on to graduate study in areas such as art history, art therapy, architecture, design, medical illustration, studio art, or disciplines outside of art.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.
Before the fifth semester begins: at least four courses in the major.
Before the seventh semester begins: at least four more courses in the major (total of eight) and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: at least three more courses in the major (total of 11).
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Studio art majors are required to complete ARTS:1510 and ARTS:1520 by the end of their first academic year.
c GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
d Select art history survey course from ARTH:1040, ARTH:1050, ARTH:1060, ARTH:1070, and ARTH:1095. Some introductorylevel art history courses will fulfill GE CLAS Core requirements; students should consult with their advisor.
e Select introductory-level studio 2D course from ANIM:2125, DRAW:2310, DSGN:2500, PHTO:2600, PNTG:2410, or PRNT:2610.
f Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
g Select introductory-level studio 3D course from CERM:2010, INTM:2710, MTLS:2910, SCLP:2810, or TDSN:2210.
h Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
i Does not include ARTH:1000, ARTH:1040, ARTH:1050, ARTH:1060, ARTH:1070, ARTH:1080, ARTH:1095, ARTH:3985, ARTH:3995, and ARTH:4999.
j Students may select an elective art course until they complete a maximum of 56 s.h. of art courses, or select a non-art elective course.
k The following introductory courses do not count toward the upperlevel studio arts courses requirement: ANIM:2125, CERM:2010, DRAW:2310, DSGN:2500, INTM:2710, MTLS:2910, PHTO:2600, PNTG:2410, PRNT:2610, SCLP:2810, TDSN:2210.
1 Students may fulfill this general education requirement while also fulfilling major requirements.
mPlease see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Art History, BA

The program in art history engages in problems of historical analysis and in interpretation of culture. The major provides students with a strong liberal arts background and prepares them for competitive placement in graduate schools across the country. As students progress through the major, they become familiar with historical relationships between art objects and society, learn techniques of visual analysis, study patterns of patronage, and apply methods for interpreting the meanings of art, architecture, and other forms of visual culture. In the course of their studies, art history majors develop their research abilities and writing skills.

## Learning Outcomes

Students will:

- acquire a breadth of knowledge about the field of art history through coursework in a diversity of areas;
- learn that art embodies historical, cultural, social, and political factors within a diverse range of national, international, and global cultures;
- acquire critical skills in visual analysis and research; and
- develop skills in oral and written communication.

## Requirements

The Bachelor of Arts with a major in art history requires a minimum of 120 s.h., including 39 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

Students may count a maximum of 56 s.h. earned in art and art history courses toward the degree; they must earn at least 64 s.h. of credit in courses outside the School of Art and Art History in order to graduate.

BA students who are graduating with a double major in the school (e.g., a major in art history and a major in art) or a major and a minor in the school (e.g., a major in art history and a minor in art) may apply more than 56 s.h. from the School of Art and Art History toward their degree, but they must earn at least 56 s.h. of credit in courses outside the School of Art and Art History in order to graduate.

Students choose one of these tracks: the global and interdisciplinary connections [p. 106] track or the Iowa idea [p. 108] track.

The BA with a major in art history requires the following coursework.

## Global and Interdisciplinary Connections Track

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Art History C |  | 30 |
| Related Discip | ourses | 9 |
| Total Hours |  | 39 |
| Global and Interdisciplinary Connections: Art History Courses |  |  |
| Course \# | Title | Hours |
| All of these: |  |  |
| ARTH:1030 | Themes in Global Art | 3 |
| ARTH:1060 | From Mona Lisa to Modernism: Survey of Western Art II | 3 |
| ARTH:4999 | Capstone Seminar in Art History | 3 |

## Iowa Idea Track

Courses may count toward more than one requirement; however, students must earn at least 39 s.h. in the track.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Art History Courses |  | 33 |
| Studio Art Courses | 6 |  |
| Total Hours | $\mathbf{3 9}$ |  |

## Iowa Idea Track: Art History Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| ARTH:1050 | From Cave Paintings to Cathedrals: Survey of Western Art I | 3 |
| ARTH:1060 | From Mona Lisa to Modernism: Survey of Western Art II | 3 |
| ARTH:1080 | How to Write About Art | 3 |
| ARTH:4999 | Capstone Seminar in Art History | 3 |
| Seven additional art history courses from these (a course can count toward more than one requirement): |  | 21 |
| At least two art history courses (prefix ARTH) numbered 2000-2999 |  |  |
| At least four art history courses (prefix ARTH) numbered 3000-4998 |  |  |
| At least two art history courses in non-Western areas (e.g., African, Asian, Islamic, Native American) from these: |  |  |
| ARTH:1040 | Arts of Africa | 3 |
| ARTH:1070 | Asian Art and Culture | 3 |
| ARTH:1095 | Native American Art | 3 |
| ARTH:2120 | Art and Architecture of the Islamic World | 3 |
| ARTH:2220 | Introduction to the Art of China | 3 |
| ARTH:2250 | Introduction to the Art of Japan | 3 |
| ARTH:2330 | Egyptian and Ancient Near Eastern Art | 3 |
| ARTH:3160 | Themes in African Art | 3 |
| ARTH:3225 | Modern and Contemporary Art in China | 3 |
| ARTH:3250 | Brushwork in Chinese Art | 3 |
| ARTH:3255 | Copy and Paste: Methods of Reproduction in Asian Art | 3 |
| ARTH:3270 | Themes in Asian Art History | 3 |
| ARTH:3275 | Garden Culture in East Asia | 3 |
| ARTH:3325 | Kings, Gods, and Heroes: Art of the Ancient Near East | 3 |

## Iowa Idea Track: Studio Art Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course (taken before enrollment in another studio <br> art course): |  |  |
| ARTS:1510 | Basic Drawing |  |
| One of these: |  | 3 |
| ARTS:1520 | Design Fundamentals | 3 |
| CERM:2010 | Ceramics I: Handbuilding | 3 |
| DRAW:2310 | Life Drawing I | 3 |
| DSGN:2500 | Graphic Design I | 3 |
| INTM:2710 | Introduction to Intermedia | 3 |
| MTLS:2910 | Introduction to Jewelry and | 3 |
|  | Metal Arts |  |
| PHTO:2600 | Photography I | 3 |Undergraduate Sculpture I3

Transfer Students
Transfer students should meet with the undergraduate advisor to discuss the requirements they may fulfill with transfer courses. Art history transfer courses must be reviewed by the head of the art history area to determine a student's placement in or exemption from required art history courses. Students may count a maximum of 15 s.h. of approved transfer credit toward their major.

## Study Abroad

Students who wish to study abroad must meet with the undergraduate advisor before they depart in order to confirm approval of the courses they plan to take.
Students who take art history courses abroad must present the course syllabus to their advisor well in advance of their departure. The head of the art history program determines whether the study abroad course is equivalent to a course required for the major; if it is, the student is credited with fulfilling the requirement once the course is completed with a passing grade.
Students who take studio art courses abroad must bring their artwork back to campus and present it in a portfolio review, which determines whether the work satisfies a requirement for their major. The portfolio review is not required if the study abroad course was taught by a
School of Art and Art History faculty member who gave the student a grade for the course.

## Teacher Licensure

Majors interested in earning licensure to teach in elementary and/or secondary schools must complete the College of Education's Teacher Education Program (TEP) in addition to the requirements for the art history major and all requirements for graduation with a BA degree. The TEP requires several College of Education courses and student teaching. Students must satisfy all degree requirements and complete Teacher Education Program licensure before degree conferral. Contact the Office of Student Services in the College of Education for details.

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in the major. Honors students must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33 and a GPA of at least 3.50 in their major. They also must complete a departmental application to graduate with honors in the major.
Students must complete an honors project that includes an honors thesis during the semester in which they plan to graduate. Students have two options for completing the honors project.

## Option 1

Students take two upper-division courses with an honors contract and complete an extra project, such as an annotated bibliography, a supplemental paper or presentation, or a comparable project endorsed by the professor. Students then enroll in a third upper-division course, with or without an honors contract, appropriate to their honors paper topic and ARTH:3985 Honors Research in Art History for 1 s.h. credit with the same instructor. Through enrollment in ARTH:3985, students write an honors paper of 3,000 to 5,000 words.

## Option 2

Students research and write an honors paper of 5,000 to 7,500 words under the direction of an art history professor, who agrees to act as their honors advisor. Students earn up to 3 s.h. credit in ARTH:3985 Honors Research in Art History. They must have the approval of their honors advisor before they begin work on their honors paper.
The honors paper should conform to the Graduate College format for theses; see the Manual of Rules and Regulations on the Graduate College website.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.
Membership in the UI Honors Program is not required to earn honors in the art history major.

## Career Advancement

Many graduates go on to careers in academics, museums, or private art galleries. Those who wish to work as professors, museum curators, or museum directors typically pursue graduate study in art history. Some graduates instead pursue advanced study in fields such as architecture, information science, museum studies, and law. Others may begin careers immediately, working in galleries and museums as arts administrators and catalogers, writing art criticism, or applying their skills in writing and visual analysis to disciplines beyond the arts.
The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.
Before the fifth semester begins: at least four courses in the major.
Before the seventh semester begins: at least four more courses in the major (total of eight) and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: at least three more courses in the major (total of 11).
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Fulfills a major requirement and may fulfill a GE requirement.
c GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
d Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
e Select from ARTH:1040, ARTH:1050, ARTH:1070, ARTH:1080, ARTH:1090, or ARTH:1095.
f Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
g Students select three courses from one of eleven disciplines outside of art history. These courses may apply to a second major. See General Catalog for a list of approved courses.
h Students must meet GPA requirements in order to pursue honors in art history. See the School of Art and Art History website and your academic advisor for more information.
i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Fulfills a major requirement and may fulfill a GE requirement.
c GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
d This course is recommended to fulfill both a major requirement (art history course in non-Western area) and the GE CLAS Core International and Global Issues requirement.
e This course should be taken after completing Rhetoric and before enrollment in courses ARTH:3000 and above.
f Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
g Students complete at least two art history courses (6 s.h.) in nonWestern areas (e.g. African, Asian, Islamic, Native American). See General Catalog for list of approved courses.
h Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
i Students complete this requirement by choosing one of these courses: ARTS:1520, CERM:2010, DRAW:2310, DSGN:2500, INTM:2710, MTLS:2910, PHTO:2600, PNTG:2410, PRNT:2610, SCLP:2810, TDSN:2210.
j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Art, BFA

## Learning Outcomes

Students will:

- acquire breadth of knowledge about the field of art history through coursework in a diversity of areas;
- learn that art embodies historical, cultural, social, and political factors within a diverse range of national, international, and global cultures;
- acquire critical skills in visual analysis and research; and
- develop skills in oral and written communication.

## Requirements

The Bachelor of Fine Arts with a major in art requires a minimum of 120 s.h., including 62 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

Bachelor of Fine Arts students majoring in art may count a maximum of 62 s.h. earned in art and art history courses toward the degree; they must earn at least 58 s.h. of credit in courses outside the School of Art and Art History in order to graduate. BFA students who are graduating with a double major in the school (e.g., a major in art history and a major in studio art) or a major and a minor in the school (e.g., a major in studio art and a minor in art history) may apply more than 62 s.h. from the School of Art and Art History toward their degree, but they must earn at least 56 s.h. of credit in courses outside the School of Art and Art History in order to graduate.

The major provides a foundation in art history as well as an understanding of the formal traditions and contemporary practices in studio art. It also includes a concentration in a specific discipline in studio art.

Students select one studio art discipline, choosing from ceramics, graphic design, three-dimensional (3D) design, drawing, intermedia, jewelry and metal arts, painting, photography, printmaking, and sculpture. They may not select bookbinding, calligraphy, or papermaking as their studio art discipline. Although students may choose only one BFA discipline, they gain exposure to other studio areas through the BFA program of study. A BFA degree is currently not offered with a subprogram in animation.
Students majoring in art begin their study in the Bachelor of Arts program. They may apply to the Bachelor of Fine Arts program after consulting with the faculty in the studio discipline of their choice. Students are admitted to the BFA program through a process called "clearance," which is conducted once each semester; they must be admitted to the BFA program at least one semester before they graduate. Students who wish to enter the BFA program should consult the faculty in their major studio art discipline for information about the required portfolio review.

In order to sit for BFA clearance, students must have completed:

- the two studio art foundation courses ARTS:1510 Basic Drawing and ARTS:1520 Design Fundamentals;
- one introductory course in the BFA studio art discipline; and
- two upper-level courses in the BFA studio art discipline (students may be enrolled in the two upper-level courses when they sit for clearance).

BFA students complete all requirements for the BA major in art (required courses) plus additional studio work. They also must present
a show of their work through ARTS:4195 BFA Exhibition before they graduate.
For more information about teaching art in elementary and/or secondary schools, see "Teacher Licensure" below.
The BFA with a major in art requires the following work.

| Requirements | Hours |
| :--- | :--- |
| Required Courses | 39 |
| Additional Studio Arts Courses | 23 |
| BFA Exhibition |  |

## Required Courses

The following coursework is required (39 s.h.).

## Art History

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: | Arts of Africa | 3 |
| ARTH:1040 | From Cave Paintings to <br> Cathedrals: Survey of Western <br> ARTH:1050 | 3 |
| Art I |  |  | ARTH:1000, ARTH:1080, ARTH:3985, ARTH:3995, and ARTH:4999

## Foundational Studio Art

Studio art majors are required to complete ARTS:1510 Basic Drawing and ARTS: 1520 Design Fundamentals by the end of their first academic year. Majors can enroll in one beginning or introductory studio arts course during the same semester they are enrolled in either ARTS:1510 or ARTS:1520.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: |  |  |
| ARTS:1510 | Basic Drawing | 3 |
| ARTS:1520 | Design Fundamentals | 3 |

## Studio Art 3D Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: |  |  |
| CERM:2010 | Ceramics I: Handbuilding | 3 |
| INTM:2710 | Introduction to Intermedia | 3 |
| MTLS:2910 | Introduction to Jewelry and | 3 |
| SCLP:2810 | Metal Arts | 3 |
| TDSN:2210 | Undergraduate Sculpture I | 3 |

## Studio Art 2D Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: |  |  |
| ANIM:2125 | Introduction to Animation | 3 |
| DRAW:2310 | Life Drawing I | 3 |
| DSGN:2500 | Graphic Design I | 3 |
| PHTO:2600 | Photography I | 3 |

| PNTG:2410 | Painting I | 3 |
| :--- | :--- | :--- |
| PRNT:2610 | Introduction to Printmaking | 3 |

## Required Electives

School of Art and Art History elective courses must bring the total credit for the major to a minimum of 62 s.h.

## Additional Studio Art Courses

| Course \# | Title |
| :--- | :--- |
| All of these: |  |

One introductory course and three upper-level courses in the student's studio art discipline
One introductory course and one upper-level course in a second studio art discipline
One introductory course and one upper-level course in a third studio art discipline

## BFA Exhibition

Students must present a show of their work in ARTS:4195 BFA Exhibition during the semester in which they graduate. Variations must be approved by the BFA faculty advisor and academic advisors. The show must be advertised using flyers and other media. Students planning to graduate with honors in the major also are required to participate in a separate Honors in the Major group show. Students must meet with faculty and academic advisors to complete the required documentation before they present their show.

## Transfer Students

Transfer students should contact the undergraduate academic advisors for information about transfer portfolio review and specific coursework that satisfies the requirements for the major in art. Students may count a maximum of 21 s.h. of approved transfer credit toward their major.

## Study Abroad

Students who wish to study abroad must meet with the undergraduate advisor before they depart in order to confirm approval of the courses they plan to take.

Students who take studio art courses abroad must bring their artwork back to campus and present it in a portfolio review, which determines whether the work satisfies a requirement for their major. The portfolio review is not required if the study abroad course was taught by a School of Art and Art History faculty member who gave the student a grade for the course.
Students who plan to take art history courses abroad must present the course syllabus to their advisor well in advance of their departure. The head of the art history program determines whether the study abroad course is equivalent to a course required for the major; if it is, the student is credited with fulfilling the requirement once the course is completed with a passing grade.

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.
To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

The BA in art education [p. 1376] is offered by the Department of Teaching and Learning, and the degree is awarded by the College of Education. In order to earn the BA in art education, students also must complete the BFA in art. For more information, contact the College of Education Academic Advising Office.

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in the major. Honors students must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33 and a GPA of at least 3.50 in their major. They should meet with their academic advisor at the start of their final semester to complete the steps needed to graduate with honors in the major.
Students must complete a studio art research project during the semester in which they plan to graduate. They must select a studio art faculty member willing to supervise their honors project, display the completed project in a show, complete an abstract, and upload a JPEG image of their project. They earn credit for the project by enrolling in ARTS:4190 Honors in Studio Art.

## University of Iowa Honors Program

In addition to honors in the major, undergraduate students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.
Membership in the UI Honors Program is not required to earn honors in the art major.

## Career Advancement

Many graduates pursue careers that match their degree specializations, for example, commercial or graphic designer, conservation or museum curator or administrator, art educator, public artist, or community art center coordinator or instructor. Others go on to graduate study in areas such as art history, art therapy, architecture, design, medical illustration, studio art, or disciplines outside of art.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The Four-Year Graduation Plan is not available for the BFA major in art. Students should work with their advisors to develop individual graduation plans.

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Art, BFA

- Ceramics [p. 114]
- Drawing [p. 115]

a Students majoring in art begin their study in the Bachelor of Arts program. They may apply to the Bachelor of Fine Arts program after consulting with the faculty in the studio discipline of their choice about the required portfolio review. Students are admitted to the BFA program through a process called "clearance," which is
conducted once each semester; they must be admitted to the BFA program at least one semester before they graduate.
b Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
c Studio art majors are required to complete ARTS:1510 and ARTS: 1520 by the end of their first academic year.
d Students may fulfill this general education requirement while also fulfilling major requirements. Up to three major courses can be used to fulfill one GE CLAS Core area each. These areas could include: diversity and inclusion; historical perspectives; international and global issues; literary, visual, and performing arts; or values and culture. Not all courses are available every semester. Students should consult with their advisor.
e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
f For the two introductory-level studio 2D courses, students in the graphic design discipline complete DSGN: 2500 . Select a second course from ANIM:2125, DRAW:2310, PHTO:2600, PNTG:2410, or PRNT:2610.
g Select art history survey course from ARTH:1040, ARTH:1050, ARTH:1060, ARTH:1070, and ARTH:1095. Some introductorylevel art history courses will fulfill GE CLAS Core requirements; students should consult with their advisor.
h Select introductory-level studio 3D course from CERM:2010, INTM:2710, MTLS:2910, SCLP:2810, or TDSN:2210.
i Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
j Does not include ARTH:1000, ARTH:1040, ARTH:1050,
ARTH:1060, ARTH:1070, ARTH:1080, ARTH:1095, ARTH:3985, ARTH:3995, and ARTH:4999.
k Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
1 Students may select an elective art course until they complete a maximum of 62 s.h. of art courses, or select a non-art elective course.
mPlease see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

Not all courses are available every semester. Students should consult with their advisor.
e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
f For the two introductory-level studio 2D courses, students in the photography discipline complete PHTO:2600. Select a second course from ANIM:2125, DRAW:2310, DSGN:2500, PNTG:2410, or PRNT:2610.
g Select art history survey course from ARTH:1040, ARTH:1050, ARTH:1060, ARTH:1070, and ARTH:1095. Some introductorylevel art history courses will fulfill GE CLAS Core requirements; students should consult with their advisor.
h Select introductory-level studio 3D course from CERM:2010, INTM:2710, MTLS:2910, SCLP:2810, or TDSN:2210.
i Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
j Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
k Does not include ARTH:1000, ARTH:1040, ARTH:1050, ARTH:1060, ARTH:1070, ARTH:1080, ARTH:1095, ARTH:3985, ARTH:3995, and ARTH:4999.
1 Students may select an elective art course until they complete a maximum of $62 \mathrm{~s} . \mathrm{h}$. of art courses, or select a non-art elective course.
mPlease see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

a Students majoring in art begin their study in the Bachelor of Arts program. They may apply to the Bachelor of Fine Arts program after consulting with the faculty in the studio discipline of their choice about the required portfolio review. Students are admitted to the BFA program through a process called "clearance," which is conducted once each semester; they must be admitted to the BFA program at least one semester before they graduate.
b Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
c Studio art majors are required to complete ARTS:1510 and ARTS:1520 by the end of their first academic year.
d Students may fulfill this general education requirement while also fulfilling major requirements. Up to three major courses can be used to fulfill one GE CLAS Core area each. These areas could include: diversity and inclusion; historical perspectives; international and global issues; literary, visual, and performing arts; or values and culture. Not all courses are available every semester. Students should consult with their advisor.
e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
f For the two introductory-level studio 2D courses, students in the printmaking discipline complete PRNT:2610. Select a second course from ANIM:2125, DRAW:2310, DSGN:2500, PHTO:2600, or PNTG:2410.
g Select art history survey course from ARTH:1040, ARTH:1050, ARTH:1060, ARTH:1070, and ARTH:1095. Some introductorylevel art history courses will fulfill GE CLAS Core requirements; students should consult with their advisor.
h Select introductory-level studio 3D course from CERM:2010, INTM:2710, MTLS:2910, SCLP:2810, or TDSN:2210.
i Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
j Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
k Does not include ARTH:1000, ARTH:1040, ARTH:1050, ARTH:1060, ARTH:1070, ARTH:1080, ARTH:1095, ARTH:3985, ARTH:3995, and ARTH:4999.
1 Students may select an elective art course until they complete a maximum of 62 s.h. of art courses, or select a non-art elective course.
mPlease see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any
questions on appropriate timing, contact your academic advisor or Graduation Services.

|  |  |
|  |  |

e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
f For the two introductory-level studio 3D courses, students in the three-dimensional design discipline complete TDSN:2210. Select a second course from CERM:2010, INTM:2710, MTLS:2910, or SCLP:2810.
g Select art history survey course from ARTH:1040, ARTH:1050, ARTH:1060, ARTH:1070, and ARTH:1095. Some introductorylevel art history courses will fulfill GE CLAS Core requirements; students should consult with their advisor.
h Select introductory-level studio 2D course from ANIM:2125, DRAW:2310, DSGN:2500, PHTO:2600, PNTG:2410, or PRNT:2610.
i Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
j Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
k Does not include ARTH:1000, ARTH:1040, ARTH:1050, ARTH:1060, ARTH:1070, ARTH:1080, ARTH:1095, ARTH:3985, ARTH:3995, and ARTH:4999.
1 Students may select an elective art course until they complete a maximum of 62 s.h. of art courses, or select a non-art elective course.
mChoose course after consulting with faculty.
n Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Art, Minor

## Requirements

The undergraduate minor in art requires a minimum of 18 s.h. in art courses, including at least 15 s.h. earned in courses taken at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass. Students may not count coursework for the minor in art toward requirements for the major in art history, except ARTS:1510 Basic Drawing.
Art courses that may be taken include animation, ceramics, drawing, intermedia, jewelry and metal arts, painting, photography, printmaking, sculpture, and three-dimensional (3D) design. Graphic design courses do not count for the minor.
The minor in art requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ARTS:1510 | Basic Drawing | 3 |
| ARTS:1520 | Design Fundamentals | 3 |

At least one introductory studio art 3D course
At least one introductory studio art 2D course, except
DSGN:2500
Additional introductory studio art courses or upper-
level courses in the same studio art discipline(s) as the introductory 3D and/or 2D courses required for the minor
May select one art history course from these:
ARTH:1040, ARTH:1050, ARTH:1060, ARTH:1070,
ARTH:1095, or a course numbered ARTH:2000 or above

Before registering for a course, students must complete all of the course's prerequisites.

Contact an undergraduate advisor in the School of Art and Art History for more information about how to meet the requirements for the minor.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Art, Minor

Course
Title
Hours

## Academic Career

## Any Semester

The undergraduate minor in art requires a minimum of 18 s.h. in art courses, including at least 15 s.h. earned in courses taken at the University of Iowa.
Coursework in the minor may not be taken pass/nonpass.
Students may be able to complete the 18 s.h. for the minor more quickly than in the three years shown on this plan, but they should plan to allot three years in case they have problems fitting in the required coursework.
The introductory-level graphic design course (DSGN:2500 Graphic Design I) is not allowed to fulfill a requirement of the minor.

Only 3 s.h. of approved art or art history coursework taken outside of the University of Iowa can be used for the minor.

|  | Hours | $\mathbf{0}$ |
| :--- | :--- | :--- |
| First Year |  |  |
| Fall |  | 3 |
| ARTS:1510 | Basic Drawing | 3 |
| ARTS:1520 | Design Fundamentals | $\mathbf{6}$ |

## Second Year

Fall

| Minor: introductory-level studio 2D course $^{\text {a }}$ | 3 |
| :---: | :---: |
| Hours | $\mathbf{3}$ |

Spring

| :---: | :---: |
| Hours | $\mathbf{3}$ |

## Third Year

Fall

| Minor: art minor elective ${ }^{\text {c }}$ | 3 |
| ---: | ---: |
| Hours | $\mathbf{3}$ |

Spring

| Minor: art minor elective ${ }^{\text {c }}$ | 3 |
| :---: | ---: |
| Hours | $\mathbf{3}$ |
| Total Hours | $\mathbf{1 8}$ |

a Choose from ANIM:2125, DRAW:2310, PHTO:2600, PNTG:2410, or PRNT:2610.
b Choose from CERM:2010, INTM:2710, MTLS:2910, SCLP:2810, or TDSN:2210.
c Students may choose an art minor elective from the introductorylevel courses, or an upper-level course in the same studio art discipline as an introductory-level course that has already been completed. Students may select one art history course (prefix ARTH) for an art minor elective, instead of one of the elective art courses.

## Art History, Minor

## Requirements

The undergraduate minor in art history requires a minimum of 15 s.h. in art history courses, including 12 s.h. earned in advanced courses taken at the University of Iowa. Courses numbered ARTH:2000 or above are considered advanced for the minor. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.
Students earning a major in art and a minor in art history may not count coursework or semester hours for the minor in art history toward requirements for the major in art. But, they may count one art history course required for the art major toward the requirements for the art history minor; students must consult with their advisors.
The minor in art history must include one survey course chosen from the following list.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| One of these: |  |  |
| ARTH:1040 | Arts of Africa | 3 |
| ARTH:1050 | From Cave Paintings to Cathedrals: Survey of Western Art I | 3 |
| ARTH:1060 | From Mona Lisa to Modernism: Survey of Western Art II | 3 |
| ARTH:1070 | Asian Art and Culture | 3 |
| ARTH:1095 | Native American Art | 3 |

Before registering for a course, students must complete all of the course's prerequisites.

Contact an undergraduate advisor in the School of Art and Art History for more information about how to meet the requirements for the minor.

## Art, MA

## Learning Outcomes

Students will:

- demonstrate proficiency in critical thinking and conceptual problem solving within the particular focus and practice of their field;
- demonstrate a personal vocabulary, approach, and vision in creative work;
- demonstrate knowledge of historical, social, and cultural perspectives in relation to visual art and design;
- demonstrate technical proficiency in relation to the tools, techniques, and materials used in their field; and
- develop a professional package that includes a curriculum vitae/ résumé, statement about their work, images of their work, and prepare materials (i.e., teaching and research statement, online portfolio, etc.) for specific careers as a professional emerging artist/designer or in teaching, art, or design-related positions.

## Requirements

The Master of Arts program in art requires a minimum of 38 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00. The degree is offered with emphases in the following studio art disciplines: ceramics, graphic design, threedimensional (3D) design, drawing, intermedia and video art, jewelry and metal arts, painting, photography, printmaking, and sculpture.

MA students must hold a BA or BFA in art equivalent to that offered by the University of Iowa. Undergraduate deficiencies, if any, may be made up concurrently with graduate study but do not count toward the graduate degree requirements.

## Required Courses

The 38 s.h. of credit required for the degree includes at least 16 s.h. in a primary studio art emphasis; 8 s.h. in a secondary studio art emphasis chosen from one of the studio art disciplines listed above; and 6 s.h. in the history and theory of art, excluding readings and directed studies. Students provide five images of their MA work for the Grad Archive.

## Committee Review

Students undergo a division-wide review for MA candidacy by the faculty during their third semester in residence. All those except painting and drawing students must submit a written artist's statement or thesis.

## Thesis

MA students in 3D design are required to write a thesis. They may earn 1 s.h. for writing a technical or substantial thesis by registering for ARTS:6000 MA Written Thesis, with approval of the thesis supervisor. Thesis credit earned in an MA program is not applicable to MFA requirements. MA students in other studio art disciplines choose the thesis or nonthesis option in consultation with their discipline advisor.
The College of Education offers an MA program in art education; see the MA in teaching and learning [p. 1411] in the catalog.

## Admission

Application materials should be uploaded onto a student's admissions profile (see instructions below under "Application Procedures"). All
applicants must meet the admission requirements of the Graduate College and the School of Art and Art History requirements.
The deadline to submit materials to the Office of Graduate Admissions is Feb. 1 for studio art programs; admission is for the following fall.

## School of Art and Art History Requirements

Prospective graduate students must meet the School of Art and Art History's admission requirements for the specific degree program they plan to enter. They must submit application materials to the university's Office of Graduate Admissions and to the specific program they wish to enter. Program-specific application requirements and deadline dates are listed below.

All applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants whose first or official language is not English and whose previous academic degrees were not earned at an English-language institution must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL). All applicants must have a minimum TOEFL iBT speaking score of 26 and a listening score of 25 . An application is not reviewed if scores are lower than the requirements specify. As an alternative to the TOEFL, applicants may take the International English Language Testing System (IELTS).
They must have a total score of 7.0 , with no subscore less than 6.0. In addition, all IELTS test takers, regardless of score, are required to take an on-campus English Proficiency Evaluation. The Duolingo English Test (DET) with a score of at least 105 also is accepted.

All students for whom English is not a first language and who have first-time appointments as teaching assistants (TAs) are required to take a test to assess their effectiveness in speaking English before they are assigned assistantship responsibilities. No applicant is considered for an appointment without an BT speaking score of 26 and a listening score of 25. The English Speaking Proficiency Assessment (ESPA) is the test the University of Iowa uses to assess students' oral language and listening skills. The English Language Performance Test (ELPT) is a supplement to the ESPA test and is designed to measure the ability to communicate in English in a classroom context in one's field of study. The ELPT is given to students who have scored 50 or 55 on the ESPA, and to TAs who teach a world language that have scored 45. To learn more about the ESPA and ELPT, visit the English as a Second Language Program website.

## Application Procedures

Prospective students may apply online through the Office of Admissions website. After submitting an application, applicants will receive email instructions on how to access their admissions profile on MyUI. Applicants then upload the required supplemental documents through a secure portal.

Required documents include transcripts from all colleges and universities an applicant has attended, contact information for three individuals (able to assess applicants' potential for graduate study) designated to provide letters of recommendation, and a statement of purpose.

Applicants should consult the Studio Art Graduate Bulletin on the School of Art and Art History website. No separate application is necessary for scholarships or teaching/research assistantships for studio art applicants.
Studio art applicants' portfolio requirements are listed below. Images in the portfolio should be uploaded pdf files no larger than 72 dpi and 1240 by 1240 pixels. File size must not exceed 18 MB. Images must be numbered according to the order they are to be presented to the
admissions committee, beginning with 01 . Applicants must include an inventory list that includes each image's name, title, medium, size, and approximate date of work, as well as their name and emphasis. They may supply a link to their personal website.

Portfolio contents and submission requirements for each program are as follows.

- Ceramics: 10 to 20 images.
- Three-dimensional (3D) design and jewelry and metal arts: eight images in the primary studio art discipline and two in a second discipline.
- Graphic design: documentation of 15 to 20 projects. Applicants should include a brief description of each work, illustrated with embedded still images and supplemented by links to online media. The precise number of images varies according to the nature of the work. Contact the School of Art and Art History with questions.
- Painting and drawing: eight images in the primary studio art medium (either painting or drawing) and two in a second medium.
- Photography: 15 to 20 images.
- Printmaking: 10 to 20 images.
- Sculpture and intermedia: applicants submit the following depending on their preferred area of emphasis.
- Sculpture: Twenty images in sculpture, including details, and two or three images in a second medium. Video links may be included.
- Intermedia: documentation of five to ten projects, including a brief description of each work illustrated with embedded still images and supplemented by links to online media. The precise number of images varies according to the nature of the work; contact the School of Art and Art History with questions.

The Office of Graduate Admissions notifies all applicants by mail of admission decisions.

## Financial Support

Fellowships, teaching assistantships, research assistantships, and tuition scholarships are awarded to graduate students on the basis of artistic and/or scholarly record.

## Iowa Arts Fellowships

The Graduate College awards Iowa Arts Fellowships to two incoming or first-year studio art graduate students each year. For more information, see Iowa Arts Fellowship on the Graduate College website.

## Teaching and Research Assistantships

Assistantships are awarded to graduate students on the basis of academic record, promise as scholars or artists, and demonstrated ability to do the job. Quality of performance in one's graduate program at Iowa is generally the major criterion for awarding teaching assistantships. The number of hours of work required depends on the amount of the award.

## Scholarships and Fellowships

The School of Art and Art History offers a variety of scholarships and fellowships made possible by contributions from alumni who wish to support promising artists and scholars. These awards are made on the same basis as teaching and research assistantships and a separate application is not necessary.

Information for graduate scholarships and fellowships is included in the admissions package and is available from the School of Art and Art History main office.

Renewal or reappointment for fellowships and assistantships depends on adequate progress toward the degree (students must accumulate at least $18 \mathrm{~s} . \mathrm{h}$. of graduate credit each calendar year and maintain a grade-point average above the required minimum) and satisfactory performance of assistantship duties.
Decisions on assistantships and financial aid generally are made during the latter part of the spring semester for the following academic year.

## Career Advancement

Many graduates pursue careers that match their degree specializations, for example, commercial or graphic designer, conservation or museum curator or administrator, art educator, public artist, or community art center coordinator or instructor.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students provide five images of their MA work for the Graduate Archive.
b The degree is offered with emphases in the following studio art disciplines: ceramics, graphic design, drawing, jewelry and metal arts, painting, photography, printmaking, and sculpture. Note: three-dimensional (3D) design students must complete the Art MA (Thesis) program.
c Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
d Work with faculty advisor to determine appropriate coursework and sequence; see General Catalog and department website for specifics.
e Occurs at the end of the third semester in residence; written abstract of Artist's Statement required unless primary emphasis is painting or drawing.
f Completion of required coursework; provide preliminary Artist's Statement followed by Artist's Statement in the semester of degree completion.

## Art History, MA

The master's degree program in art history is intended for students who wish to acquire a broad knowledge of art history, as well as of the field's theoretical and historical foundations. The MA is intended to prepare students who plan to continue for a PhD in art history as well as for students interested in careers in museums, galleries, and nonprofit organizations.

## Learning Outcomes

Students are expected to demonstrate:

- basic understanding of the development of the history and methodology of art history;
- basic understanding of primary source material in five of the following distribution fields: African, architecture, Asian, ancient, medieval, Renaissance and Baroque, 18th- and 19th-century European, American, and modern/contemporary;
- reading proficiency in either French or German;
- skill in visual analysis;
- skill in contextual analysis based on relevant research;
- sustained critical thinking, writing, and speaking abilities; and
- knowledge and skills necessary to be effective teaching assistants for 1000-level courses.

## Requirements

The Master of Arts program in art history requires a minimum of 30 s.h. of graduate-level coursework and is offered without a thesis. Students are expected to acquire a broad knowledge of art history and to become familiar with major periods and monuments of world art. They also become proficient scholars, receiving training in research methods and theory necessary for subsequent scholarship at the PhD level.

Students must maintain a cumulative grade-point average of at least 3.50. Only one semester of academic probation is allowed. All MA candidates, including transfer students, must complete at least 24 s.h. in residence at the University of Iowa.

Students must earn a grade of B or higher in semester-long courses (3000-level or above) in five of the following distribution fields: African, Asian, ancient Mediterranean, medieval, Renaissance and Baroque, 18th- and 19th-century European, American, and modern/ contemporary. These courses must be taken after completion of the BA degree.

Students must complete a qualifying paper that demonstrates their ability to conduct scholarly research and convey ideas in writing appropriately for the discipline and the student's specialization field.

The College of Education offers an MA program in art education; see Teaching and Learning [p. 1362] in the catalog.

## Required Courses

Students must satisfactorily complete ARTH:4999 Capstone Seminar in Art History during their first fall semester of enrollment and must register for an art history seminar in their first, second, third, and fourth semesters of enrollment.

They also must satisfactorily complete ARTH:6020 Art History Colloquium every semester that they are enrolled for 9 s.h. or more or are serving as teaching or research assistants. Students who are not employed as teaching or research assistants or are registered for less than 9 s.h. are strongly encouraged to attend the colloquium.

Students must attend at least six public lectures by visiting scholars in art history over the course of their enrollment as MA graduate
students. Proof of attendance is provided by short written responses (150-250 words) turned in to the director of graduate studies within two weeks of the lecture. Students should register for an art history seminar each semester during their first four semesters.

Courses outside the curriculum of the School of Art and Art History's art history division do not carry art history credit. Cross-referenced courses not taught by art history faculty members also do not carry art history credit.

## Directed Studies

Directed Studies (ARTH:6040) is designed for graduate students who already have taken one or more advanced courses in a specific art history field. It provides students with an opportunity to work one-toone with a professor to continue specific research interests developed in lecture courses or seminars, or on topics that eventually may be the subject of a thesis or dissertation. ARTH:6040 cannot be substituted for a lecture course already offered in the program. Students must discuss their decision to take this course with the professor involved and obtain the professor's approval. The topic must be within the professor's range of expertise.

Students meet with their professor once a week. The hours of work and written assignments required for the course must be equal to a comparable regularly scheduled course. This course is not available through Distance and Online Education.

## Language Requirement

Students must demonstrate proficiency in French or German by the end of their third semester. Students may demonstrate proficiency by:

- two years of university-level coursework;
- earning a grade of B or higher in a 3000-level advanced language course;
- achieving at least an $80 \%$ proficiency score on the level 5 milestone of the relevant Rosetta Stone language program; or
- scoring 500 or above on the University of Iowa World Languages Placement Test.

In exceptional circumstances, a student could make a direct petition to the faculty upon receiving a recommendation from their advisor. Language courses do not carry degree credit.

## MA Committee

The MA committee consists of a student's advisor and two additional tenured or tenure-track faculty members in art history.

## MA Qualifying Paper

Prior to graduation, each candidate must complete a qualifying paper on a topic that stems from a term paper written for an art history graduate seminar or a course numbered 3000 or above. The paper should be between 5,000 and 7,500 words in length ( 20 to 30 pages excluding bibliography and illustrations). A student chooses an advisor who specializes in the student's field of concentration. In cases where a student wants to focus on a topic that involves more than one field, the art history faculty strongly recommends that the student work closely with faculty members in both fields.

## Final Examination

The final examination constitutes an oral defense of the qualifying paper. The final examination meeting with the MA committee normally takes place toward the end of a student's last semester of coursework.

## Admission

Application materials should be uploaded onto a student's admissions profile (see instructions below under "Application Procedures"). All applicants must meet the admission requirements of the Graduate College and the School of Art and Art History.

The deadline for submission of materials is Dec. 15 for the art history program; admission is for the following fall.

## School of Art and Art History Requirements

Prospective graduate students must meet the School of Art and Art History's admission requirements for the specific degree program they plan to enter. They must submit application materials to the university's Office of Graduate Admissions and to the specific program they wish to enter. Program-specific application requirements and deadline dates are listed below.

All applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Although exceptions may be made when other components of the application are strong, applicants should have an undergraduate gradepoint average of at least 3.25 on a 4.00 scale.
Applicants whose first or official language is not English and whose previous academic degrees were not earned at an English-language institution must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL). All applicants must have a minimum TOEFL iBT speaking score of 26 and a listening score of 25 . An application is not reviewed if scores are lower than the requirements specify. As an alternative to the TOEFL, applicants may take the International English Language Testing System (IELTS). They must have a total score of 7.0 , with no subscore less than 6.0 . In addition, all IELTS test takers, regardless of their score, are required to take an on-campus English Proficiency Evaluation. The Duolingo English Test (DET) with a score of at least 105 also is accepted.
All students for whom English is not a first language and who have first-time appointments as teaching assistants (TAs) are required to take a test to assess their effectiveness in speaking English before they are assigned assistantship responsibilities. No applicant is considered for an appointment without an iBT speaking score of 26 and a listening score of 25. The English Speaking Proficiency Assessment (ESPA) is the test the University of Iowa uses to assess students' oral language and listening skills. The English Language Performance Test (ELPT) is a supplement to the ESPA test and is designed to measure the ability to communicate in English in a classroom context in one's field of study. The ELPT is given to students who have scored 50 or 55 on the ESPA, and to TAs who teach a world language that have scored 45. To learn more about the ESPA and ELPT, visit the English as a Second Language Program website.

## Application Procedures

Prospective students may apply online through the Office of Admissions website. After submitting their application, applicants will receive email instructions on how to access their admissions profile on MyUI. Applicants then upload the required supplemental documents through a secure portal.

Required documents include transcripts from all colleges and universities an applicant has attended, contact information for three individuals (able to assess applicants' potential for graduate study) designated to provide letters of recommendation, a statement of purpose, and the Supplemental Graduate Application Information form.

Art history applicants should also supply a research paper (preferably from an art history course) or thesis that demonstrates potential to undertake graduate-level research in art history, and a personal statement of 1,000 words describing their intellectual development, academic interests, and career goals. The statement must name the University of Iowa faculty member under whose guidance the applicant hopes to work and indicate how that faculty member's area of expertise, or how the art history program is especially suited to the applicant's interests and goals.

Applicants should consult the Art History Graduate Bulletin on the School of Art and Art History website. No separate application is necessary for scholarships or teaching/research assistantships for applicants.

The Office of Graduate Admissions notifies all applicants by mail of admission decisions.

## Financial Support

Fellowships, teaching assistantships, research assistantships, and tuition scholarships are awarded to graduate students on the basis of artistic and/or scholarly record.

## Teaching and Research Assistantships

Assistantships are awarded to graduate students on the basis of academic record, promise as scholars or artists, and demonstrated ability to do the job. Quality of performance in one's graduate program at Iowa is generally the major criterion for awarding teaching assistantships. The number of hours of work required depends on the amount of the award.

## Scholarships and Fellowships

The School of Art and Art History offers a variety of scholarships and fellowships made possible by contributions from alumni who wish to support promising artists and scholars. These awards are made on the same basis as teaching and research assistantships.

Information for graduate scholarships and fellowships is included in the admissions package and is available in the School of Art and Art History main office.
Renewal or reappointment for fellowships and assistantships depends on adequate progress toward the degree (students must accumulate at least 18 s.h. of graduate credit each calendar year and maintain a grade-point average above the required minimum) and satisfactory performance of assistantship duties.
Decisions on assistantships and financial aid generally are made during the latter part of the spring semester for the following academic year. Applications and all relevant materials should be on file by Jan. 15.

## Career Advancement

Many art and art history graduates pursue careers that match their degree specializations, such as commercial or graphic designer, conservation or museum curator or administrator, art educator, public artist, gallery and museum administration, art appraisal, and restoration, or community art center coordinator or instructor.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans <br> Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
c Take each semester when enrolled in 9 s.h. or more or have a research or teaching assistant appointment; all students are encouraged to attend the colloquium.
d Students should register for an art history seminar each semester during their first four semesters. Credit for graduate seminars may be applied toward the five distribution fields requirement.
e Work with faculty advisor to determine appropriate graduate elective coursework and sequence.
f Students must demonstrate proficiency in French or German by the end of their third semester. Proficiency may be determined in several different ways; see the General Catalog and department website for specifics. Credit earned in language courses does not count toward the degree.
g Students must complete a qualifying paper that demonstrates their ability to conduct scholarly research and convey ideas in writing appropriately for the discipline and the student's specialization field; preliminary qualifying paper due to the faculty advisor early in the final semester of the program.
h Oral defense of the qualifying paper.

## Art, MFA

## Learning Outcomes

Students will:

- demonstrate proficiency in critical thinking and conceptual problem solving within the particular focus and practice of their field;
- demonstrate a personal vocabulary, approach, and vision in creative work;
- demonstrate knowledge of historical, social, and cultural perspectives in relation to visual art and design;
- demonstrate technical proficiency in relation to the tools, techniques, and materials used in their field; and
- develop a professional package that includes a curriculum vitae/ résumé, statement about their work, images of their work, and prepare materials (i.e., teaching and research statement, online portfolio, etc.) for specific careers as a professional emerging artist/designer or in teaching, art, or design-related positions.

## Requirements

The Master of Fine Arts program in art requires a minimum of 60 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 . The degree is offered with thesis and with emphases in the following studio art disciplines: ceramics, graphic design, three-dimensional (3D) design, drawing, intermedia and video art, jewelry and metal arts, painting, photography, printmaking, and sculpture. Students must earn at least 24 s.h. of credit for the degree at the University of Iowa, including approved credit earned for the MA in art.

MFA students must hold an MA in art equivalent to that offered by the University of Iowa. Transfer credit is decided by faculty review. Following completion of the MA, students may be invited into the MFA program.

## Required Courses

The 60 s.h. of credit required for the MFA includes at least 24 s.h. in a primary studio art emphasis, at least 12 s.h. in a secondary studio art emphasis chosen from one of those listed above, and 6 s.h. in art history and theory of art (if not already taken). Students must earn 8 s.h. in their primary studio art emphasis and $4 \mathrm{~s} . \mathrm{h}$. in their secondary studio art emphasis after being granted an MA in art. Students provide five images of their MFA work for the Graduate Archive.

## Committee Review

Students must undergo an MFA committee review. They also must complete a written thesis and possibly a studio thesis. Students are reviewed by their committees at the end of the semester prior to the semester they intend to graduate.
Students are responsible for identifying a degree chair by the semester prior to the semester they intend to graduate. Committee members are selected in consultation with the degree chair by Sept. 15 for spring or summer graduation and Feb. 15 for fall graduation. The committee is comprised of the degree committee chair and three members of the graduate faculty at the assistant professor rank or above (two graduate faculty members from a student's primary studio discipline, one graduate faculty member from a student's secondary studio discipline, and an additional member). Adjunct faculty, lecturers, and visiting professors may serve on degree committees with approval of the degree committee chair and a Graduate College petition request (renewable every three years).

MFA students sign up for review through the graduate program coordinator. They obtain a form to be signed by both the degree committee members and a faculty member in the second emphasis studio discipline. These forms must be returned to the office no later than the university's official midterm day by $4: 30$ p.m.

## Thesis

A thesis abstract is given to all degree committee members and is due by Sept. 15 for spring or summer graduation and by Feb. 15 for fall graduation. The thesis chair is responsible for meeting with the student immediately thereafter to direct thesis content and to coordinate meeting with the full committee.
The complete thesis in final form must be given to all committee members at least four weeks prior to the MFA exhibition week. Graduate College regulations covering the specific requirements of the written thesis are found on the Graduate College Thesis and Dissertation website. The thesis must be as complete as possible, including images (may be black and white or color photocopies) of approved figures that are part of the final thesis. The graduate program coordinator provides a student with complete thesis/artist statement procedures, including the Graduate College calendar.
A thesis defense of the MFA work must be scheduled with the candidate's committee during the final semester in residence. The MFA exhibition is considered the final examination and is where the degree committee reviews the thesis and artwork.

The thesis must be submitted by the Graduate College deadline. Committee members receive an email that provides a link to the finalized (post-format review) thesis and prompts them to verify the manuscript electronically; committee verification happens after the Graduate College format review. Any corrections to the thesis required by the graduate examiner or the degree committee should be completed immediately.
Students may earn 1 s.h. for writing a technical or substantial thesis by registering for ARTS:7000 MFA Written Thesis, with approval of the thesis supervisor. Thesis credit earned in an MA program is not applicable to MFA requirements.

## Admission

Application materials should be uploaded onto a student's admissions profile (see instructions below under "Application Procedures"). All applicants must meet the admission requirements of the Graduate College and the School of Art and Art History requirements.
The deadline to submit materials to the Office of Graduate Admissions is Feb. 1 for studio art programs; admission is for the following fall.

## School of Art and Art History Requirements

Prospective graduate students must meet the School of Art and Art History's admission requirements for the specific degree program they plan to enter. They must submit application materials to the university's Office of Graduate Admissions and to the specific program they wish to enter. Program-specific application requirements and deadline dates are listed below.

All applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants whose first or official language is not English and whose previous academic degrees were not earned at an English-language institution must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL). All applicants must have a minimum TOEFL iBT speaking score of 26 and a listening score
of 25 . An application is not reviewed if scores are lower than the requirements specify. As an alternative to the TOEFL, applicants may take the International English Language Testing System (IELTS).
They must have a total score of 7.0 , with no subscore less than 6.0. In addition, all IELTS test takers, regardless of score, are required to take an on-campus English Proficiency Evaluation. The Duolingo English Test (DET) with a score of at least 105 also is accepted.

All students for whom English is not a first language and who have first-time appointments as teaching assistants (TAs) are required to take a test to assess their effectiveness in speaking English before they are assigned assistantship responsibilities. No applicant is considered for an appointment without an iBT speaking score of 26 and a listening score of 25 . The English Speaking Proficiency Assessment (ESPA) is the test the University of Iowa uses to assess students' oral language and listening skills. The English Language Performance Test (ELPT) is a supplement to the ESPA test and is designed to measure the ability to communicate in English in a classroom context in one's field of study. The ELPT is given to students who have scored 50 or 55 on the ESPA, and to TAs who teach a world language that have scored 45 . To learn more about the ESPA and ELPT, visit the English as a Second Language Program website.

## Application Procedures

Prospective students may apply online through the Office of Admissions website. After submitting an application, applicants will receive email instructions on how to access their admissions profile on MyUI. Applicants then upload the required supplemental documents through a secure portal.

Required documents include transcripts from all colleges and universities an applicant has attended, contact information for three individuals (able to assess applicants' potential for graduate study) designated to provide letters of recommendation, and a statement of purpose.

Applicants should consult the Studio Art Graduate Bulletin on the School of Art and Art History website. No separate application is necessary for scholarships or teaching/research assistantships for studio art applicants.

Studio art applicants' portfolio requirements are listed below. Images in the portfolio should be uploaded pdf files no larger than 72 dpi and 1240 by 1240 pixels. File size must not exceed 18 MB . Images must be numbered according to the order they are to be presented to the admissions committee, beginning with 01. Applicants must include an inventory list that includes each image's name, title, medium, size, and approximate date of work, as well as their name and emphasis. They may supply a link to their personal website.

Portfolio contents and submission requirements for each program are as follows.

- Ceramics: 10 to 20 images.
- Three-dimensional (3D) design, and jewelry and metal arts: eight images in the primary studio art discipline and two in a second discipline.
- Graphic design: documentation of 15 to 20 projects. Applicant should include a brief description of each work, illustrated with embedded still images and supplemented by links to online media. The precise number of images varies according to the nature of the work. Contact the School of Art and Art History with questions.
- Painting and drawing: eight images in the primary studio art medium (either painting or drawing) and two in a second medium.
- Photography: 15 to 20 images.
- Printmaking: 10 to 20 images.
- Sculpture and intermedia: applicants submit the following depending on their preferred area of emphasis.
- Sculpture: 20 images in sculpture, including details, and two or three images in a second medium. Video links may be included.
- Intermedia: documentation of 5 to 10 projects, including a brief description of each work illustrated with embedded still images and supplemented by links to online media. The precise number of images varies according to the nature of the work; contact the School of Art and Art History with questions.

The Office of Graduate Admissions notifies all applicants by mail of admission decisions.

## Financial Support

Fellowships, teaching assistantships, research assistantships, and tuition scholarships are awarded to graduate students on the basis of artistic and/or scholarly record.

## Iowa Arts Fellowships

The Graduate College awards Iowa Arts Fellowships to two incoming or first-year studio art graduate students each year. For more information, see Iowa Arts Fellowship on the Graduate College website.

## Teaching and Research Assistantships

Assistantships are awarded to graduate students on the basis of academic record, promise as scholars or artists, and demonstrated ability to do the job. Quality of performance in one's graduate program at Iowa is generally the major criterion for awarding teaching assistantships. The number of hours of work required depends on the amount of the award.

## Scholarships and Fellowships

The School of Art and Art History offers a variety of scholarships and fellowships made possible by contributions from alumni who wish to support promising artists and scholars. These awards are made on the same basis as teaching and research assistantships.
Information for graduate scholarships and fellowships is included in the admissions package and is available from the School of Art and Art History main office.

Renewal or reappointment for fellowships and assistantships depends on adequate progress toward the degree (students must accumulate at least $18 \mathrm{~s} . \mathrm{h}$. of graduate credit each calendar year and maintain a grade-point average above the required minimum) and satisfactory performance of assistantship duties.

Decisions on assistantships and financial aid generally are made during the latter part of the spring semester for the following academic year.

## Career Advancement

Many graduates pursue careers that match their degree specializations, for example, commercial or graphic designer, conservation or museum curator or administrator, art educator, public artist, or community art center coordinator or instructor.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students provide five images of their MFA work for the Graduate Archive.
b The degree is offered with thesis and with emphases in the following studio art disciplines: ceramics, graphic design, three-
dimensional (3D) design, drawing, intermedia and video art, jewelry and metal arts, painting, photography, printmaking, and sculpture.
c Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
d Need only additional $8 \mathrm{~s} . \mathrm{h}$. after completion of MA.
e Work with faculty advisor to determine appropriate coursework and sequence; see General Catalog and department website for specifics.
f If completed for MA, may choose an elective course, excluding readings and directed studies.
g Need only additional 4 s.h. after completion of MA.
h Provide abstract of thesis; typically occurs at the end of the semester prior to degree completion.
i Students may earn 1 s.h. for writing a technical or substantial thesis; counts as elective credit.
j Written thesis.

## Art History, PhD

The PhD program is intended for students who wish to pursue original research in art history. Students should acquire a deep knowledge of art history, as well as the field's theoretical and historical foundations. PhD students are prepared to pursue careers in academia as well as to become museum curators and directors.

## Learning Outcomes

Students are expected to demonstrate many, if not all, of the following:

- understanding of the development of the history and methodology of art history;
- skill in the visual analysis of primary source material;
- skill in contextual analysis and secondary source interpretations;
- productive engagement in the broad and ever-shifting philosophical, scholarly, and institutional debates that determine the structure and content of art history;
- ability to engage in sustained critical thinking;
- ability to write clearly and compellingly;
- deep knowledge of three of the following distribution fields: African, architecture, Asian, ancient, medieval, Renaissance and Baroque, 18th- and 19th-century European, American, and modern/contemporary;
- reading proficiency in French or German as well as a second language of particular relevance to their field of study;
- ability to conduct independent research in museums, archives, and/or libraries;
- knowledge and skills necessary to be effective teaching assistants for 1000-level courses;
- grant-writing skills;
- public speaking skills necessary to present research in professional academic settings;
- capacity to teach as an instructor of record in their area of expertise; and
- critical research and writing skills necessary to publish peerreviewed articles.

## Requirements

The Doctor of Philosophy program in art history requires a minimum of 72 s.h. of graduate credit. Of the 72 s.h., at least 39 s.h. must be earned while registered in the UI Graduate College, after formal program admission. For details, see the Graduate College Manual of Rules and Regulations Section XII C. Students must maintain a cumulative grade-point average of at least 3.50 . They may count a maximum of 38 s.h. of work completed for the MA toward the PhD , excluding credit earned in language courses. Students are allowed only one semester of academic probation.
Students are expected to acquire great breadth and depth of knowledge in the discipline of art history, achieve a high level of expertise in a specialized field, and demonstrate professional speaking and writing skills. The program provides them with scholarly challenges, research skills, and mentoring necessary for professional development and successful careers.

Students major in one of the following distribution fields: Asian, ancient Mediterranean, medieval, Renaissance and Baroque, 18thand 19th-century European, American, and modern/contemporary. In addition, candidates minor in two fields: any of the above plus African. One minor must be in an art history distribution field that is non-contiguous with the major field. The second minor may be in
any art history distribution field, or it may be in a relevant discipline outside of art history, subject to approval from the art history faculty.

For more detailed information, consult the Art History Graduate Bulletin on the School of Art and Art History website.

## Required Courses

Students must satisfactorily complete ARTH:4999 Capstone Seminar in Art History, even if they have completed a similar course at another institution (students who have completed the course for a master's degree or other previous work at the University of Iowa are exempt). They must register for an art history seminar in their first three semesters of PhD coursework (or in their fifth, sixth, and seventh semesters of graduate study), before ARTH:7010 PhD Readings and the comprehensive exam.
Students must register for and satisfactorily complete ARTH:6020 Art History Colloquium for 1 s.h. each semester that they are enrolled for $9 \mathrm{~s} . \mathrm{h}$. or more or have an RA/TA appointment. Students who register for fewer than 9 s.h. are strongly encouraged to attend. Art history colloquium is a monthly series of lectures, panel discussions, or field experience focusing on professional development. Planned in conjunction with the graduate Art History Society, this requirement is integral to the degree program and is an important avenue toward professionalism in the field. Attendance is required (any absence needs to be approved by the head of art history before the missed meeting).

Students must attend at least six lectures by visiting scholars in art history during the course of their enrollment as PhD graduate students (proof of attendance is provided by short written responses of 150250 words turned in to the director of graduate studies within two weeks of the lecture) and must register for an art history seminar in each of the first three semesters of their PhD coursework and prior to both the PhD readings course and comprehensive examinations.

Students may count up to 6 s.h. of credit earned for dissertation research toward the 72 s.h. required for the degree. Courses outside the curriculum of the School of Art and Art History's art history division do not carry art history credit.

## Directed Studies

Normally, a maximum of 6 s.h. earned in ARTH:6040 Directed Studies may be applied toward the semester-hour requirement for the PhD , although doctoral students may petition the art history faculty for permission to apply up to 9 s.h.

## Language Requirement

PhD students must demonstrate proficiency in French or German for admission to the PhD program in art history. They must demonstrate proficiency in a second non-English language, generally one relevant to the chosen area of research, by the end of the third semester in the PhD program. Students may demonstrate proficiency by:

- two years of university-level coursework;
- earning a grade of B or above in a 3000-level advanced language course;
- achieving at least an $80 \%$ proficiency score on the level 5 milestone of the relevant Rosetta Stone language program; or
- scoring 500 or above in the University of Iowa World Languages Placement Test.

In exceptional circumstances, a student may make a direct petition to the faculty upon receiving a recommendation from their advisor. Language courses do not carry degree credit.

## PhD Committee

The PhD committee consists of the student's dissertation advisor, who is responsible for the major field; two members responsible for the two minor fields; and at least two additional members. Of these five, four must be tenured or tenure-track faculty members from the art history division. One must be from outside the division and must be a member of the Graduate College faculty. When appropriate, committees may include additional members.

## Comprehensive Examination

Upon completion of course requirements, the PhD candidate takes three written comprehensive examinations. The major exam consists of six questions and lasts six hours; the two minor exams each consist of three questions and last three hours. The exams are taken on any three days within one week (Monday through Friday).

The scope of the comprehensive exams is determined in consultation with the candidate's degree committee supervisor and the committee members responsible for the two minor fields.

## Oral Comprehensive Examination

Within approximately two weeks of completing the three written exams, the candidate meets with the degree committee for the oral comprehensive examination, which concentrates on questions that arise from the written comprehensive exams.

## Dissertation Proposal

Each student must complete a publishable dissertation that makes an original contribution to the art history discipline and demonstrates evidence of superior understanding of critical issues in the candidate's chosen specialization field. As soon as possible after completing the comprehensive examinations, the candidate submits a dissertation proposal to the degree committee supervisor and subsequently to the degree committee. See the Art History Graduate Bulletin for complete instructions.

The committee meets as a group with the candidate to discuss the dissertation proposal and to offer comments and suggestions. The proposal must be submitted to the committee at least two weeks before the approval meeting. The proposal includes a $1-2$ page abstract, a 10-15 page précis that includes a review of the state of the field, and a bibliography.

After the proposal has been approved by the committee, the candidate circulates an abstract to the entire art history faculty. The candidate must give a public presentation on the dissertation topic no later than the end of the semester following the degree committee's approval. The presentation is scheduled with the head of art history.

## Final Examination

Upon completing a dissertation, the candidate meets with the PhD committee for an oral defense of the dissertation. The oral defense constitutes the final examination for the PhD . The successful completion of this examination normally marks the last stage in the candidate's fulfillment of requirements.

## Admission

Application materials should be uploaded onto a student's admissions profile (see instructions below under "Application Procedures"). All applicants must meet the admission requirements of the Graduate College and the School of Art and Art History.
The deadline to submit materials to the Office of Graduate Admissions is Dec. 15 for the art history program; admission is for the following fall.

## School of Art and Art History Requirements

Prospective graduate students must meet the School of Art and Art History's admission requirements for the specific degree program they plan to enter. They must submit application materials to the university's Office of Graduate Admissions and to the specific program they wish to enter. Program-specific application requirements and deadline dates are listed below.

All applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
Applicants must hold an MA in art history or a related graduate degree and be able to demonstrate proficiency in French or German. Proficiency in a second non-English language relevant to the student's research area is required by the end of the third semester of PhD work.
Applicants whose first or official language is not English and whose previous academic degrees were not earned at an English-language institution must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL). All applicants must have a minimum TOEFL iBT speaking score of 26 and a listening score of 25 . An application is not reviewed if scores are lower than the requirements specify. As an alternative to the TOEFL, applicants may take the International English Language Testing System (IELTS).
They must have a total score of 7.0, with no subscore less than 6.0. In addition, all IELTS test takers, regardless of score, are required to take an on-campus English Proficiency Evaluation. The Duolingo English Test (DET) with a score of at least 105 also is accepted.
All students for whom English is not a first language and who have first-time appointments as teaching assistants (TAs) are required to take a test to assess their effectiveness in speaking English before they are assigned assistantship responsibilities. No applicant is considered for an appointment without an iBT speaking score of 26 and a listening score of 25 . The English Speaking Proficiency Assessment (ESPA) is the test the University of Iowa uses to assess students' oral language and listening skills. The English Language Performance Test (ELPT) is a supplement to the ESPA test and is designed to measure the ability to communicate in English in a classroom context in one's field of study. The ELPT is given to students who have scored 50 or 55 on the ESPA, and to TAs who teach a world language that have scored 45. To learn more about the ESPA and ELPT, visit the English as a Second Language Program website.

## Application Procedures

Prospective students may apply online through the Office of Admissions website. After submitting an application, applicants will receive email instructions on how to access their admissions profile on MyUI. Applicants then upload the required supplemental documents through a secure portal.

Required documents include transcripts from all colleges and universities an applicant has attended, contact information for three individuals (able to assess applicants' potential for graduate study) designated to provide letters of recommendation, a statement of purpose, and the Supplemental Graduate Application Information form.

Art history applicants also should supply a research paper (preferably from an art history course) or thesis that demonstrates potential to undertake graduate-level research in art history, and a personal statement of 1,000 words describing their intellectual development, academic interests, and career goals. The statement must name the University of Iowa faculty member under whose guidance the applicant hopes to work and indicate how that faculty member's area
of expertise, or how the art history program, is especially suited to the applicant's interests and goals.
Students who completed an MA at the University of Iowa and who wish to apply to the PhD program in art history must make a formal application for a change of status through the graduate program coordinator. Applications are evaluated in the context of the entire applicant pool.
Applicants should consult the Art History Graduate Bulletin on the School of Art and Art History website. No separate application is necessary for scholarships or teaching/research assistantships for applicants.
The Office of Graduate Admissions notifies all applicants by mail of admission decisions.

## Financial Support

Fellowships, teaching assistantships, research assistantships, and tuition scholarships are awarded to graduate students on the basis of artistic and/or scholarly record.

## Teaching and Research Assistantships

Assistantships are awarded to graduate students on the basis of academic record, promise as scholars or artists, and demonstrated ability to do the job. Quality of performance in one's graduate program at Iowa is generally the major criterion for awarding teaching assistantships. The number of hours of work required depends on the amount of the award.

## Scholarships and Fellowships

The School of Art and Art History offers a variety of scholarships and fellowships made possible by contributions from alumni who wish to support promising artists and scholars. These awards are made on the same basis as teaching and research assistantships.
Information for graduate scholarships and fellowships is included in the admissions package and is available in the School of Art and Art History main office.

Renewal or reappointment for fellowships and assistantships depends on adequate progress toward the degree (graduate students must accumulate at least $18 \mathrm{~s} . \mathrm{h}$. of graduate credit each calendar year and maintain a grade-point average above the required minimum) and satisfactory performance of assistantship duties.

Decisions on assistantships and financial aid generally are made during the latter part of the spring semester for the following academic year. Applications and all relevant materials should be on file by Jan. 15.

## Career Advancement

Many graduates pursue careers that match their degree specializations, such as commercial or graphic designer, conservation or museum curator or administrator, art educator, public artist, gallery and museum administration, art appraisal, and restoration, or community art center coordinator or instructor.
The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be
discussed with an academic advisor. For additional sample plans, see MyUI.

# Asian and Slavic Languages and Literatures 

Director, Division of World Languages, Literatures and Cultures

- Jill N. Beckman (Linguistics)

## Chair, Department of Asian and Slavic Languages and Literatures

- Kendall Heitzman

## General Education Language Coordinators

- Yumiko Nishi (Japanese), Irina Kostina (Russian), Yuan Lu (Chinese), Sang-Seok Yoon (Korean)

Undergraduate majors: Asian languages and literature (BA); Russian (BA)

Undergraduate minors: Asian languages and literature; Korean studies; Russian; Russian and Eastern European studies

Graduate degree: MA in Asian civilizations
Faculty: https://asian-slavic.uiowa.edu/people
Website: https://asian-slavic.uiowa.edu/
The Department of Asian and Slavic Languages and Literatures offers instruction in languages of Asia and Eastern Europe as well as in the literatures, civilizations, and cultures of the regions. In addition to offering degree programs, the department welcomes undergraduate and graduate students from across the university to enroll in courses that complement their degree programs or satisfy their personal interests.

The department offers language study in Chinese, Japanese, Korean, and Russian.

Undergraduate students in all majors may satisfy the World
Languages requirement of the GE CLAS Core [p. 19] with courses in Chinese, Japanese, Korean, or Russian; see "Language for GE CLAS Core" below. They also may get acquainted with Asia and Eastern Europe by taking any of the department's GE CLAS Core courses on Asian humanities and on Russian and Slavic literature and culture, all taught in English. Entering students may take the department's FirstYear Seminars, one on Asian culture and civilization, the other on Slavic culture and civilization.

The Department of Asian and Slavic Languages and Literatures is one of the academic units in the Division of World Languages, Literatures and Cultures [p. 365].

## Language for GE CLAS Core

Undergraduate students in all majors may satisfy the World Languages requirement of the College of Liberal Arts and Sciences GE CLAS Core [p. 19] with course sequences in Chinese, Japanese, Korean, and Russian.

Students who have had experience with Chinese, Japanese, or Russian should take the appropriate University of Iowa World Languages Placement Test, which helps determine the level at which they should begin study of the language. Students with backgrounds in Korean should contact the general education coordinator to determine the level at which they should begin language study at the University of Iowa.

## Chinese-GE CLAS Core

The following sequence fulfills the GE CLAS Core World Languages requirement and is appropriate for students without previous knowledge of Chinese.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CHIN:1111 | First-Year Chinese: First | 5 |
| Semester | First-Year Chinese: Second | 5 |
| CHIN:2101 | Firsmester <br> Seme | Second-Year Chinese: First <br> Semester |
| CHIN:2102 | Second-Year Chinese: Second <br> Semester | 5 |
|  |  | 5 |

Students who have participated in ABRD:3411 Iowa in
Tianjin after completing CHIN:1111 First-Year Chinese: First
Semester and CHIN:1112 First-Year Chinese: Second Semester, and students from Chinese-speaking families who perform exceptionally well in CHIN: 1111 and CHIN:1112, may fulfill the World Languages requirement with the following sequence.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CHIN:1111 | First-Year Chinese: First | 5 |
| Semester |  |  |$\quad 5$

Students who have taken CHIN:2103 Accelerated Second-Year Chinese: First Semester and/or CHIN:2104 Accelerated SecondYear Chinese: Second Semester should not enroll in CHIN:2101 Second-Year Chinese: First Semester and/or CHIN:2102 Second-Year Chinese: Second Semester.

Additional coursework is available, including advanced Chinese, classical Chinese, and business Chinese. Consult the department for appropriate placement in Chinese language courses.

## Japanese-GE CLAS Core

The following sequence fulfills the GE CLAS Core World Languages requirement and is appropriate for students without previous knowledge of Japanese.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| JPNS:1001 | First-Year Japanese: First | 5 |
| Semester |  |  |$\quad 5$

## Korean-GE CLAS Core

The following sequence fulfills the GE CLAS Core World Languages requirement and leads to elementary/intermediate proficiency in Korean.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| KORE:1101 | First-Year Korean: First | 4 |
|  | Semester |  |
| KORE:1102 | First-Year Korean: Second | 4 |

| KORE:2101 | Second-Year Korean: First <br> Semester | 4 |
| :--- | :--- | :--- |
| KORE:2102 | Second-Year Korean: Second <br> Semester | 4 |

Students interested in Korean language study beyond the GE CLAS Core requirement may take the third- and fourth-year Korean courses.

## Russian—GE CLAS Core

The following sequence fulfills the GE CLAS Core World Languages requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| RUSS:1111 | First-Year Russian I | 5 |
| RUSS:1112 | First-Year Russian II | 5 |
| RUSS:2111 | Second-Year Russian I | 4 |
| RUSS:2112 | Second-Year Russian II | 4 |

Students interested in Russian language study beyond the GE CLAS Core requirement may take the third- and fourth-year Russian courses.

## Related Certificate

## International Business

The College of Liberal Arts and Sciences and the Tippie College of Business offer the Certificate in International Business. The program entails study of international business and economics; international relations and institutions; a language; and the art, literature, culture, and/or politics of a geographic area. Students who major in Chinese, Japanese, or Russian are likely to satisfy the certificate's cultural immersion requirement through major requirements. For more information, see the Certificate in International Business [p. 1192] (Tippie College of Business) in the catalog.

## Study Abroad

The department strongly encourages its students to seek opportunities for summer language study and study abroad to accelerate the language acquisition process. Many students participate in summer, semester, and year-long study abroad programs in China, Japan, India, and Korea offered through other U.S. universities. In many cases credit is transferable, and it is possible for a student to study abroad and still complete the Four-Year Graduation Plan. There are many resources available for funding research and study abroad. It also may be possible for students to apply University of Iowa financial aid to their study abroad programs. Interested students should contact a study abroad advisor at International Programs Study Abroad and the language coordinator in the Department of Asian and Slavic Languages and Literatures.

## Chinese

The Iowa in Tianjin Summer Program is a faculty-led Chinese language and culture study program. This program provides students with a comprehensive and balanced curriculum and combines classroom instruction with field trips, language partnerships, and extracurricular activities.

## Japanese

Students studying Japanese have access to various study abroad possibilities around Japan, including the two UI Exchange Programs (semester or academic year) and other recommended summer programs.

## UI Exchange Semester or Academic Year Programs <br> - Kanda University of International Studies Exchange (Chiba) <br> - Nagoya University of Foreign Studies Exchange (Nagoya, Aichi)

## Recommended Summer Programs

- Hokkaido International Foundation Japanese Language and Japanese Culture Program (Hakodate, Hokkaido)
- Kyoto Consortium for Japanese Studies (Kyoto)
- Nanzan University: Center for Japanese Studies (CJS) Summer Japanese Program (Nagoya, Aichi)

## Korean

The University of Iowa partners with The Education Abroad Network (TEAN) to offer students the opportunity to study at Korea University in Seoul, South Korea. The following institutions offer summer, semester, or academic year study abroad programs for University of Iowa students.

- Korea University Exchange
- Ewha Womans University Exchange

## Russian

Iowa students participate in summer, semester, or academic year programs in Russian under the auspices of the American Council of Teachers of Russian (ACTR). The association directs academic language training programs in the cities of Moscow, St. Petersburg, and Vladimir.

Contact the Department of Asian and Slavic Languages and Literatures or International Programs Study Abroad for more information.

## Summer Internships

Students are encouraged to enrich their programs of study through internships designed to combine work experience in Asia or the United States with study or research projects. The university's Pomerantz Career Center maintains a list of internships.

## Activities

## Student Associations

Students have many opportunities to enrich their studies in Asian languages and literature while living in Iowa City. The university sponsors student associations for students from many Asian countries, including mainland China, Japan, Korea, India, Pakistan, and Taiwan. All University of Iowa students are welcome to join. Various international community groups sponsor cultural events and holiday celebrations throughout the year.

## Programs

## Undergraduate Programs of Study <br> Majors

- Major in Asian Languages and Literature (Bachelor of Arts) [p. 151]
- Major in Russian (Bachelor of Arts) [p. 156]

## Minors

- Minor in Asian Languages and Literature [p. 159]
- Minor in Korean Studies [p. 162]
- Minor in Russian [p. 164]
- Minor in Russian and Eastern European Studies [p. 165]

Graduate Program of Study Major

- Master of Arts in Asian Civilizations [p. 166]

## Facilities

## Center for Language and Culture Learning

The Center for Language and Culture Learning provides a wide variety of facilities and services to the Division of World Languages, Literatures and Cultures (DWLLC), including a 24 -computer Instructional Technology Center (ITC) and five All-in-One Studios/ small group study rooms equipped with video production and editing software, a Computer-Assisted Language Learning Lab with 25 computers integrated with Sanako software for language practice, and virtual reality hardware and development space.
The center provides spaces for quiet study as well as for group meetings. Departments, programs, and student organizations are welcome to host conversation hours, film nights, study groups, workshops, and more. Peer education services include peer tutoring programs in many of the languages taught in DWLLC, with both inperson and online availability, as well as the Directed Independent Language Study, through which faculty, staff, or students can be paired with a tutor to learn a language not taught in the DWLLC. Tutors are trained to use the Three Ms for Effective Learning, which include developing a growth mindset, using memory strategies to retain knowledge, and reflecting on learning gains.

## University of Iowa Libraries

Since 1960 University of Iowa Libraries has routinely acquired most American titles in Asian studies and selected overseas scholarly publications in English and other Western languages. The Main Library's Asian collection includes approximately 80,000 volumes in Asian languages and about 140,000 Western-language volumes on Asian subjects. The university has been a member of the Library of Congress Foreign Currency Exchange Program for Indian books and periodicals since 1975. The library's nonprint media collection includes a growing number of Asian feature films. A Chinese-Japanese-Korean computer terminal gives students and faculty access to the growing Research Libraries Information Network database in Asian languages.

## Courses

- Asian Languages, Literatures and Cultures Courses [p. 143]
- Chinese Courses [p. 145]
- Japanese Courses [p. 147]
- Korean Courses [p. 148]
- Russian Courses [p. 149]
- South Asian Studies Courses [p. 150]

## Asian Languages, Literatures and Cultures Courses

## ASIA:1000 First-Year Seminar

ASIA:1016 Classical Chinese Short Fiction
1 s.h.
Reading and discussion of classical Chinese short fiction in English translation. Taught in English. Recommendations: completion of required ESL courses. Same as WLLC:1016.
ASIA:1040 Introduction to Asian Religions 3 s.h.
Religious beliefs, practices in India, China, Japan. GE: Values and Culture. Same as HIST:1610, RELS:1404.

ASIA:1060 Introduction to Buddhism 3 s.h.
Development of Buddhism in India, its spread across Asia, and arrival in the West; exploration of diverse Buddhist philosophies, practices, and cultures; readings from India, Tibet, China, Japan, Korea, and Southeast Asia. GE: Values and Culture. Same as HIST:1612, RELS:1506.
ASIA:1502 Asian Humanities: India
3 s.h.
Introduction to 4,000 years of South Asian civilization through popular stories. Taught in English. GE: Values and Culture. Same as RELS:1502, SOAS:1502.
ASIA:1510 Ghost Stories and Tales of the Weird in Premodern Chinese Literature
Reading of Chinese literature concerning ghosts, marvels, and supernatural from the first millennium B.C.E. through the 1800s; readings analyzed against changing historical and religious contexts. Taught in English. Recommendations: completion of all required ESL courses. GE: Interpretation of Literature. Same as WLLC:1510.
ASIA:1601 Civilizations of Asia: China from Origins to the 17th Century

3 s.h. Introductory survey of Chinese history and civilization from its origins to 1800; exploration of traditions in politics, social organization, thought, religion, and culture. GE: Historical Perspectives; International and Global Issues. Same as HIST:1601.

## ASIA:1602 Civilizations of Asia: China from the 17th Century to the Present <br> 3 s.h.

Introductory survey of Chinese history from the 17th century to present; exploration of political, social, economics, and culture. GE: Historical Perspectives; International and Global Issues. Same as HIST:1602.
ASIA:1604 Civilizations of Asia: Japan
3-4 s.h.
GE: Historical Perspectives; International and Global Issues. Same as HIST:1604.

ASIA: 1606 Civilizations of Asia: South Asia
3-4 s.h.
Civilization of a vast region that includes India, Pakistan, Bangladesh, Nepal, and Sri Lanka. GE: Historical Perspectives; International and Global Issues. Same as HIST:1606, RELS:1606.
ASIA:1607 Civilizations of Asia: Korea 3-4 s.h.
Introduction to Korean history and culture; how meanings of "Korea" and "Koreans" changed from ancient times to present; relevant issues of politics, society, and culture; events that shaped ancient Korean states-Koryo state (918-1392), the Choson dynasty (1392-1910), Japanese colonization (1910-1945), and the two Koreas (1945present); how present perspectives on Korea have influenced understandings of its past. GE: Historical Perspectives; International and Global Issues. Same as HIST:1607.

## ASIA:1609 India Now! Surveying the World's Largest

 Democracy 3-4 s.h.Introduction to India and its place in global economics, politics, religion, science, and culture since independence in 1947; India's contributions and adaptations to contemporary world, gender roles, changing sexual standards, and new ways India enters American lives-from globalized Bollywood films and music to new foods, fashions, and lifestyles; students examine the quiet revolution of affirmative action that has brought self-respect to millions, and market liberalization that has heightened economic inequality; consideration of ongoing challenges to world's largest democracy and contemporary efforts, both peaceful and violent, to address them. GE: Values and Culture. Same as HIST: 1609 .

## ASIA:1670 Korea in the World

3 s.h.
Comprehensive and critical understanding of Korea's place in the world; emphasis on historical and sociocultural roots of various aspects of life on the contemporary Korean peninsula (both North and South Korea); comprehensive list of topics including cultural production (K-pop and film), religions, economy, gender relations, cuisine, politics, and prospects for reunification. Taught in English. Same as KORE:1670, RELS:1670.

## ASIA:2001 Global Science Fiction

3 s.h.
Science fiction from around the world; spanning poetry, fiction, drama, film, television, comics, mobile phone games, and music; produced on six continents. Taught in English. GE: Diversity and Inclusion. Same as FREN:2010, RUSS:2001, TRNS:2001, WLLC:2001.

## ASIA:2127 Global Manuscript Cultures

Manuscripts and global manuscript cultures from a comparative, interdisciplinary perspective; history of the book in the East and West; diverse material supports, physical formats, and written layouts of manuscripts of the 1st to 19th centuries, including social and cultural contexts; manuscript traditions of particular cultural spheres (Europe, the Middle East and North Africa, India, East Asia) and historical processes of diffusion, remediation, and obsolescence. Taught in English. GE: Historical Perspectives. Same as CLSA:2127, JPNS:2127.
ASIA:2222 Women in Premodern East Asian Literature 3 s.h. Reading of East Asian literature portraying women from the first millennium B.C.E. through the 1800 s ; discussion of issues related to representations of women and conventional social, familial roles in premodern China, Korea, and Japan; cross-cultural comparison of different perceptions and portrayals of women in premodern East Asian literary traditions. Taught in English. Recommendations: completion of all ESL courses. GE: Diversity and Inclusion. Same as GWSS:2222, WLLC:2222.
ASIA:2231 Introduction to the Art of China 3 s.h.
Visual arts of China and their history; emphasis on understanding in context of Chinese civilization, history. Same as ARTH:2220.

## ASIA:2248 The Invention of Writing: From Cuneiform to Computers

3 s.h.
Invention of writing as one of the most momentous events in the history of human civilizations; how the use of written sign systems, notations, maps, graphs, encryptions, and most recently, computer programs have consequences that reach deeply into all aspects of people's lives; how writing fascinates and delights, fosters reflexive thinking and facilitates development of complex societies, and gives rise to institutions of social power and control; students explore the invention of writing and its consequences in broad international and interdisciplinary context. Taught in English. Same as ANTH:2248, CL:2248, CLSA:2048, COMM:2248, GRMN:2248, HIST:2148, IS:2248, LING:2248, TRNS:2248, WLLC:2248.

ASIA:2450 India Beat: The Aesthetics and Politics of India Today 3 s.h.
Ways in which music forms a crucial part of Indian public sphere, reflecting and shaping culture, society, and economy; wide range of genres commonly performed and heard across India and South Asia today (i.e., film music, several folk forms, classical, semiclassical, Indipop, rock) and locating each of them in their respective historical, cultural, and socioeconomic contexts; exploration of themes and questions (i.e., emergence and impact of technologies of mass production, distribution of music in colonial and post-independence India). GE: Values and Culture. Same as MUS:2450.
ASIA:2684 Korean War: Local and Global History 3 s.h. Examination of the Korean War as a local, regional, and global event; major topics of the war including its origins, methods of warfare, refugee question, war crimes, POWs, propaganda, memory, and commemoration from the perspective of multiple nations; discussion and analysis of scholarly works, textbooks, diplomatic documents, memoirs, fiction, visual sources, and film. Same as HIST:2684.
ASIA:2887 Perspectives on Korea
3 s.h.
History of Korea from earliest times to present; changing meanings of Korea and Koreans; relevant issues of politics, society, and culture; events that shaped ancient Korean kingdoms, the Choson dynasty (1392-1910), Japanese occupation, and divided Korean peninsula; how present perspectives on Korea have influenced understandings of its past; placement of Korea within a regional and global context to examine Korea's relationship with the world. Same as HIST:2687.
ASIA:3055 Death, Dying, and Beyond in Asian Religions 3 s.h. Survey of cultural and religious approaches to the dying process, postdeath rituals, and conceptions about the afterlife in different religions in Asia. Same as RELS:3055.

## ASIA: 3208 Classical Chinese Literature Through

## Translation

3 s.h.
Reading of English translations of classical Chinese literature; discussion of special features of classical Chinese as a source language for translation; issues in translation practice and theory with focus on trends in translation of Classical Chinese literary works to English. Taught in English. Recommendations: completion of required ESL courses. Same as TRNS:3208, WLLC:3208.
ASIA: 3210 Comparative Arts 3 s.h.
Cultural and aesthetic issues arising from side-by-side investigation of several art forms, including literature, cinema, painting, music, opera, architecture; periods, schools, styles, and their theories. Taught in English. Same as FREN:3210, IWP:3210, WLLC:3210.

## ASIA: 3255 Copy and Paste: Methods of Reproduction in Asian Art

Introduction to methods of reproduction in Asian art that predates photography, encompassing technologies of graphic reproduction (manual, mechanical, and somewhere in between); exploration of themes including piece-mold bronze casting, stamping and seals, rubbing, molding and mass production, woodblock printing, tracecopying calligraphy, and free-hand copying of paintings; overarching concepts across different subjects (e.g., authorship and authenticity, value of copies and impact on canon formation, relationship between technology and style, question of aura in - and before-the age of mechanical reproduction). Same as ARTH:3255.
ASIA:3270 Themes in Asian Art History
3 s.h.
Same as ARTH:3270.

## ASIA:3275 Garden Culture in East Asia

Exploration of the rich tradition of gardens in East Asia with a focus on China and Japan; combination of visual material, translated primary texts, and English-language research to learn about various types of gardens, their major elements, and their artistic representation; examination of garden themes, rocks, flower arrangement, and bonsai, as well as Asian gardens in the West and Western gardens in Asia; students discuss each type of garden in the broader artistic, political, and religious context. Same as ARTH:3275.
ASIA:3431 Gender and Sexuality in East Asia 3 s.h.
Examination of historical construction of gender and sexuality in East Asia from mid-19th century to present. Same as GWSS:3131, RELS:3431.

ASIA:3561 Religion and Healing
3 s.h.
Historical evidence of religious healing in Christian, Hindu, Buddhist, Native American, and Shaman traditions. Same as ANTH:3113, GHS:3113, RELS:3580.

ASIA:3650 Chinese History from 1600 to 1911
3 s.h.
Chinese history from the 17 th to early 20 th century, history of the Qing dynasty (1644-1911); Qing's role in shaping aspects of today's politics in China and the mentality of Chinese people; foundation of Manchu state in early 17th century, Ming-Qing transition in 1644 , politics and society during the high Qing era, decline of the empire under foreign invasion and inner rebellions in the 19th century, collapse of the dynasty in 1911. Same as HIST:3650.

## ASIA:3652 Twentieth-Century China

Communist revolution from 1920s to founding of People's Republic of China in 1949; Mao Zedong's radical policies, Cultural Revolution; Deng Xiaoping's economic reforms; China today. Same as HIST:3652.

## ASIA:3655 Zen Buddhism

3 s.h.
Same as HIST:3655, RELS:3655.

## ASIA:3685 Modern Korean History

3 s.h.
Transformation of Choson Korea to North and South Koreas; local, regional, and global transformations in Korea from the late 19th century to present; severing of historic ties with China; encounters with the West and Japan; new ideas of civilization and political community; erasure of Choson as a country in 1910; colonial experience; civil war; industrialization; creation of North Korea; democratic movement in South Korea and spread of diasporic communities abroad; Korean peninsula as a laboratory for analyzing compressed communist and capitalist modernities of the 20th century. Same as HIST:3685.

## ASIA:3700 Topics in Global Cinema <br> 3 s.h.

Identification of new models and methods to investigate cinema's relationship to current global issues beyond traditional scholarly focus in Western Europe and the United States; exploration of an emerging field, moving away from the paradigm of national cinema and bringing together shared theoretical frameworks while acknowledging different historical and cultural contexts. Taught in English. Same as JPNS:3700, TRNS:3700, WLLC:3700.
ASIA:4166 Topics in Asian History
3 s.h.
Same as HIST:4666.
ASIA:4301 Honors Tutorial
arr.
ASIA:4506 Senior Honors Thesis
ASIA:4507 Topics in Asian Studies
Topics vary.
arr.

3 s.h. ASIA:6483 Multilingual Education and Applied Linguistics 3 s.h. Introduction to research in language teaching and learning, drawing on theories and research in applied linguistics, sociolinguistics, anthropology, and psychology; students gain understanding of fundamentals in second language acquisition, educational linguistics, applied linguistics, and methods used in teaching and learning second/foreign languages; applications and implications of research considered when reviewing multilingual education policy and practice. Same as EDTL:6483, SLA:6506.
ASIA:6501 MA Thesis
arr.
Offered fall semesters.
ASIA:6502 MA Thesis
arr.
Offered spring semesters.
ASIA:6520 Seminar: South Asian Religion 3 s.h.
Topics in South Asian religions. Same as RELS:6520.
ASIA:7606 Readings in Chinese History
arr.
Same as HIST:7606.

## Chinese Courses

High school students and University of Iowa students who would like to learn Chinese but do not plan to use Chinese to satisfy the World Languages requirement of the College of Liberal Arts and Sciences GE CLAS Core may wish to take the beginning Chinese courses CHIN:1115 and CHIN:1116 in sequence and may follow them with the second-year courses CHIN:2101 and CHIN:2102. See the course descriptions below.
CHIN:1000 First-Year Seminar
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first-semester standing.
CHIN:1030 Introduction to Chinese Ethnic Folk Dance 1 s.h. China has 56 ethnic minorities and each has a unique culture; folk dances of Chinese minorities reflect peculiarities of each ethnic group's religious, cultural, and historical narrative. Taught in English.

## CHIN:1101 Conversational Chinese I

Introduction to modern Chinese, with focus on communication
"survival" skills for discussing oneself, family, daily activities, interests, personal preferences, food, shopping, travel, lodging; situational activities and performance.
CHIN: 1102 Conversational Chinese II
1 s.h.
Continuation of CHIN:1101, with focus on speaking and listening.
CHIN: 1111 First-Year Chinese: First Semester 5 s.h.
Sound system of Mandarin Chinese, basic sentence patterns; aural understanding, speaking, reading, writing. Offered fall semesters. Requirements: undergraduate standing. GE: World Languages First Level Proficiency.
CHIN: 1112 First-Year Chinese: Second Semester 5 s.h.
Continuation of CHIN:1111. Offered spring semesters. Prerequisites:
CHIN:1111. Requirements: undergraduate standing. GE: World
Languages Second Level Proficiency.
CHIN: 1115 Beginning Chinese I 3 s.h.
Introduction to modern standard Chinese; development of students' functional language ability.

CHIN:1116 Beginning Chinese II 3 s.h.
Continuation of CHIN:1115. Requirements: CHIN: 1115 or equivalent as demonstrated in written and oral exams.
CHIN:1121 Beginning Chinese III
3 s.h.
Continuation of CHIN: 1116; instruction in all four language skills of listening, speaking, reading, and writing; students further develop their understanding of Chinese culture through language learning. Prerequisites: CHIN:1116.

## CHIN: 1122 Beginning Chinese IV <br> 3 s.h.

Continuation of CHIN:1121; instruction in all four language skills of listening, speaking, reading, and writing through task-based and tasksupported curriculum; students further develop their understanding of historical and contemporary Chinese culture. Prerequisites: CHIN:1121.

CHIN:1504 Asian Humanities: China 3 s.h.
Literary and philosophical texts of China in English translation. GE: Values and Culture.

## CHIN: 1702 Chinese Popular Culture <br> 3 s.h.

Introduction to popular culture from the People's Republic of China, Taiwan, Hong Kong, and the Chinese diaspora; shifting relationships among cultural production, media and technology, and political thought; influences of Japan, Korea, and the West; materials drawn from film, television shows, music, new media, popular literature, comics, magazines, advertising, fashion, art, and material culture; no previous knowledge of Chinese is required. GE: Literary, Visual, and Performing Arts.
CHIN:1800 Chinese Calligraphy and Culture 3 s.h. Introduction to historical development of Chinese script, Chinese calligraphy theories, representative calligraphers, and writing Chinese script using a Chinese writing brush. GE: Values and Culture.
CHIN:2101 Second-Year Chinese: First Semester 5 s.h.
Continuation of CHIN:1112. Offered fall semesters. Prerequisites: CHIN:1112. Requirements: undergraduate standing. GE: World Languages Third Level Proficiency.
CHIN:2102 Second-Year Chinese: Second Semester 5 s.h.
Continuation of CHIN:2101. Offered spring semesters. Prerequisites: CHIN: 2101. Requirements: undergraduate standing. GE: World Languages Fourth Level Proficiency.
CHIN:2103 Accelerated Second-Year Chinese: First
Semester
Intermediate Chinese. Requirements: grades of C or higher in CHIN: 1111 and CHIN:1112, and one summer of Chinese study in China. GE: World Languages Third Level Proficiency.

## CHIN:2104 Accelerated Second-Year Chinese: Second

## Semester

3 s.h.
Intermediate Chinese. Prerequisites: grade of C or higher in CHIN:2103. GE: World Languages Fourth Level Proficiency.

CHIN:3101 Third-Year Chinese: First Semester 3 s.h.
Reading of advanced modern Chinese texts; speaking, writing.
Offered fall semesters. Prerequisites: CHIN:2102 or CHIN:2104.
CHIN: 3102 Third Year Chinese: Second Semester 3 s.h. Continuation of CHIN:3101. Offered spring semesters. Prerequisites: CHIN:3101.

## CHIN:3103 Business Chinese I 3 s.h.

Skill development in communicating with Chinese counterparts on a number of domains in business translations; first of a two-course sequence. Prerequisites: CHIN:2102 or CHIN:2104.

## CHIN:3104 Business Chinese II 3 s.h.

Skill development in communicating with Chinese counterparts on a number of domains in business translations; second of a two-course sequence. Prerequisites: CHIN:3102 or CHIN:3103.

## CHIN:3201 Workshop in Chinese Literary Translation

Translation from Chinese to English with emphasis on literary translation; issues in theory and practice of translation; special features of Chinese as a source language for translation. Prerequisites: CHIN:3102. Same as TRNS:3202.

CHIN: 3302 Introduction to Chinese Linguistics 3 s.h. Aspects of modern Chinese linguistics, such as Chinese phonology, syntax, pedagogical grammar, history of the language. Taught in English. Same as LING:3302, SLA:3302.

CHIN:3341 Chinese Literature: Poetry
3 s.h.
Readings in classical and modern Chinese poetry in English translation. Taught in English. Recommendations: sophomore or higher standing.
CHIN:4101 Classical Chinese: First Semester 3 s.h.
Introduction to basic knowledge of classical Chinese; appreciation of traditional Chinese culture through reading idiomatic phrases and ancient fables with vivid and interesting plots. Prerequisites: CHIN:2102 or CHIN:2104.

CHIN:4102 Classical Chinese: Second Semester 3 s.h. Continuation of CHIN:4101. Prerequisites: CHIN:4101.

CHIN:4103 Fourth-Year Chinese: First Semester 3 s.h.
Proficiency through oral and written discussions of modern texts. Offered fall semesters. Prerequisites: CHIN:3102.
CHIN:4104 Fourth-Year Chinese: Second Semester 3 s.h.
Offered spring semesters. Prerequisites: CHIN:4103.
CHIN:4150 Advanced Reading and Writing in Chinese 3 s.h.
Essays in aspects of contemporary Chinese society to further understanding of Chinese society and to expand reading and writing skills. Taught in Chinese. Prerequisites: CHIN:4103.
CHIN:4203 Modern Chinese Writers 3 s.h.
Readings in modern and contemporary Chinese fiction; in English translation. Taught in English. Recommendations: sophomore or higher standing.
CHIN:4206 Transnational Chinese Cinemas
Films from Mainland China, Hong Kong, Taiwan, and Chinese diasporic communities, silent era to present; relationship of film to nation-state, cultural interflows, media technologies, ideologies. English subtitles. Recommendations: sophomore or higher standing.
CHIN:4300 Independent Study
arr.
Research, reading, writing, and translation projects for undergraduate students. Prerequisites: CHIN:3102.

## CHIN:5024 Teaching Chinese as a Second Language VII: Pedagogical Grammar 3 s.h.

 Introduction to Chinese grammar system from perspective of teaching Chinese as a foreign language; students teach a unit of Chinese grammar to demonstrate understanding of assigned grammar unit and pedagogical approach involved. Prerequisites: CHIN:4103.CHIN:5101 Fifth-Year Chinese: First Semester 3 s.h.
Major focus is on academic reading and writing; students read selected academic articles and learn to write professional essays.
CHIN:5102 Fifth-Year Chinese: Second Semester 3 s.h.
Continuation of CHIN:5101. Prerequisites: CHIN:5101.
CHIN:5103 Readings in Chinese Society 3 s.h.
Academic texts relating to aspects of Chinese society to develop students' academic reading and writing skills. Requirements:
CHIN:5102 for non-native Chinese student.
CHIN:5106 Individual Chinese for Advanced Students arr.
Research, translation projects. Prerequisites: CHIN:4104.
CHIN:5107 Advanced Classical Chinese 3 s.h.
Readings from classical texts of early China period. Prerequisites: CHIN:4102.
3 s.h. CHIN:5201 Seminar in Chinese Fiction 3 s.h.
Novels, novelettes; 16th to 18th centuries (Ming and Qing periods). Taught in English. Requirements: ability to read original texts.

CHIN:5202 Seminar in Chinese Literature arr.
Taught in English. Requirements: two years of modern Chinese and one year of classical Chinese.

CHIN:6401 Teaching Chinese as a Second Language VI: Research and Pedagogical Projects

3 s.h.
Participation in Chinese second language research and material development projects under instructor's guidance.

## CHIN:7401 Teaching Chinese as a Second Language I: Theories and Research 3 s.h.

Research, theory on acquisition of Chinese as a non-native language. Taught in English. Same as SLA:7406.
CHIN:7403 Teaching Chinese as a Second Language III:

## Instruction and Practicum

3 s.h.
Classroom instructional theories, methodologies, and techniques of teaching Chinese as a second language; teaching practicum.

## CHIN:7404 Teaching Chinese as a Second Language IV: Testing and Assessment

Overview of goals, concepts, principles, research, and issues in assessment and testing of Chinese as a second language; knowledge of Chinese required. Taught in English. Same as SLA:7804.
CHIN:7405 Teaching Chinese as a Second Language V: Seminar in Research and Design 3 s.h.
Qualitative and quantitative research design theories and techniques. Taught in English. Prerequisites: CHIN:7401 and PSQF:4143. Same as SLA:7405.

## Japanese Courses

JPNS:1000 First-Year Seminar
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first-semester standing.

## JPNS:1001 First-Year Japanese: First Semester

Modern Japanese. Offered fall semesters. Requirements: undergraduate standing. GE: World Languages First Level Proficiency.
JPNS:1002 First-Year Japanese: Second Semester 5 s.h. Continuation of JPNS:1001. Offered spring semesters. Prerequisites: JPNS:1001. Requirements: undergraduate standing. GE: World Languages Second Level Proficiency.

## JPNS: 1030 Japanese for Travelers

Basic, practical language and social skills that travelers or visitors need in everyday situations, such as making self introductions, ordering food, asking for directions, and traveling by train; Japanese culture, manners and customs, major cities and tourist attractions; for students with no previous experience of Japanese who plan to travel in Japan or would like a practical introduction to the language and culture.

## JPNS:1506 Ghostly Japan

3 s.h.
Introduction to premodern, modern, and contemporary Japanese culture; special attention given to the relationship of classical texts to contemporary novels, short stories, manga, anime, music, and film; students consider relationships of textual and visual cultures, high art and low art, moments of crisis and the everyday, the sacred and the profane, men and women. Taught in English. GE: Values and Culture.
JPNS:2001 Second-Year Japanese: First Semester 5 s.h.
Continuation of JPNS:1002. Offered fall semesters. Prerequisites:
JPNS:1002. Requirements: undergraduate standing. GE: World Languages Third Level Proficiency.
JPNS:2002 Second-Year Japanese: Second Semester 5 s.h. Continuation of JPNS:2001. Offered spring semesters. Prerequisites: JPNS:2001. Requirements: undergraduate standing. GE: World Languages Fourth Level Proficiency.

JPNS:2127 Global Manuscript Cultures
3 s.h.
Manuscripts and global manuscript cultures from a comparative, interdisciplinary perspective; history of the book in the East and West; diverse material supports, physical formats, and written layouts of manuscripts of the 1 st to 19th centuries, including social and cultural contexts; manuscript traditions of particular cultural spheres (Europe, the Middle East and North Africa, India, East Asia) and historical processes of diffusion, remediation, and obsolescence.
Taught in English. GE: Historical Perspectives. Same as ASIA:2127, CLSA: 2127.

JPNS:2250 Introduction to the Art of Japan
3 s.h.
Chronological survey of Japan's visual arts in their historical and cultural contexts from Neolithic age to present; extensive use of slides, films, other visual materials. Taught in English. Same as ARTH:2250.
JPNS:3001 Third-Year Japanese I
4 s.h.
Modern Japanese; focus on speaking, listening, reading, writing; materials related to everyday life and civilization in Japan. Offered fall semesters. Prerequisites: JPNS:2002 with a minimum grade of C .

JPNS:3002 Third-Year Japanese II 4 s.h.
Continuation of JPNS:3001. Offered spring semesters. Prerequisites:
JPNS:3001 with a minimum grade of C.
JPNS:3107 Classical Japanese: First Semester
3 s.h.
Introduction to vocabulary, grammar, and calligraphic scripts of classical Japanese through readings of primary literary and historic sources; instruction in English, readings in classical and modern Japanese. Prerequisites: JPNS:3002.

JPNS:3128 Introduction to Japanese Linguistics 3 s.h.
Basic structural features of the Japanese language; topics include
typological and historical background, writing system, phonetics, phonology, syntax, semantics, pragmatics, and language variation; recommended for students who wish to have a deeper understanding of the Japanese language as well as non-Indo-European languages. Taught in English. Prerequisites: JPNS:1002.

JPNS:3201 Workshop in Japanese Literary Translation 3 s.h. Workshop in translation from Japanese to English, with emphasis on literary translation; issues in theory and practice of translation; special features of Japanese as a source language for translation. Taught in Japanese. Corequisites: JPNS:3001, if not taken as a prerequisite. Same as TRNS:3201.

JPNS:3202 Traditional Japanese Literature in Translation 3 s.h. Japanese literature and culture from 7th to 19th centuries including tales, folklore, poetry, drama, and visual culture; topics vary and may address traditional literature through manga/anime, gaming and play, foodways, supernatural and the uncanny, animals and humans, nature and disaster, travel and landscape, gender and sexuality, and women's writing. Taught in English.
JPNS:3203 Modern Japanese Fiction in Translation 3 s.h. Introduction to modern Japanese literature from 1868 to present; focus on representative short stories, novels, and manga; the twin advent of modern Japanese language and the modern novel; rise of autobiographical "I-novel"; Japanese bundan (literary establishment), high modernity, and ero guro nansensu (erotic grotesque nonsense); stories of the war and its endless postwar; the neo-traditional and the avant-garde; literature of economic collapse and internationalization. Taught in English.

JPNS:3204 Topics in Japanese Literature in Translation 1-3 s.h. Topics vary. Taught in English.

JPNS:3205 Major Authors in Modern Japanese Literature 3 s.h.
Modern Japanese literary works in English translation; topics vary.
Taught in English.

Images of the warrior in traditional Japanese literature from ancient legendary heroes, medieval warrior monks, and ninja to the unifying generals, masterless samurai, and women revolutionaries of early modern Japan; students discover what is truth and what is fiction when encountering the warrior in popular culture today. Taught in English.

## JPNS:3207 Japan Illuminated: Japanese Literature and Visual

 CultureHow text and image have been used together to tell stories across 1,000 years of Japanese culture; students read and view illustrated handscrolls, calligraphy, maps, mandalas, early board games, woodblock prints, modern print media, manga and anime; emphasis on visual analysis and material culture. Taught in English.

## JPNS:3208 Japanese Film

3 s.h.
History of Japanese cinema with particular attention paid to Japanese conventions and innovations that differ from classical Hollywood or European paradigms (benshi silent-film narrators, jidaigeki period films, wartime propaganda, postwar melodrama, avant-garde Japanese New Wave, rise of Japanese documentary, anime); screenings may include works by world famous directors (Mizoguchi, Ozu, Kurosawa) and recent masters (Nishikawa Miwa, Koreeda Hirokazu, Mitani Koki). Taught in English.
JPNS:3210 Japanese Theater
Major forms of Japanese theater and performance including No and kyogen, the bunraku puppet theater, kabuki, shingeki "Western" theater, benshi film narration, butoh modern dance, counterculture and street theater of the 1960s, Japanese musicals; focus on textual analysis and performance practices; weekly screenings of theatrical performances and student-led staged readings of contemporary performances. Taught in English.

## JPNS:3401 Language in Japanese Society <br> 3 s.h.

Aspects of the Japanese language that reflect culture, social structures of Japan; communication styles and strategies, cross-cultural communication, language in media, metaphors. Prerequisites:
JPNS:1002.
JPNS:3402 Japan: Culture and Communication
3 s.h.
How Japanese-speaking people communicate; what factors determine the way they speak; how they communicate nonverbally; how people convey messages and emotions in various social settings. Taught in English. Prerequisites: JPNS:1002.
JPNS:3500 Japanese for Professional Purposes I 3 s.h.
Introduction to essential linguistic skills and practical knowledge needed to effectively communicate in Japanese in various professional contexts and in socially appropriate manners; recommended for anyone interested in working in Japan or using Japanese at work. Prerequisites: JPNS:2002 with a minimum grade of B-. Corequisites: JPNS:3001.
JPNS:3501 Japanese for Professional Purposes II 3 s.h. Continuation of JPNS:3500; advanced linguistic skills needed to become an effective communicator in various professional settings; develop a deeper understanding of Japanese business culture; improve intercultural communication and problem-solving skills; recommended for students interested in working in Japan or using Japanese at work. Prerequisites: JPNS:3500 with a minimum grade of B-.

## JPNS:3601 Contemporary Japanese Culture <br> 3 s.h.

Japanese media and culture including manga (comics), anime (animation), films, video games, television drama, fashion, music, sports, food, and contemporary art in the 20th and 21st centuries; students explore aspects of Japanese society relating to youth and otaku cultures, technology and humanity, gender and sexuality, power and violence, obscenity and censorship, beauty and fashion, and global consumption of and participation in Japanese pop culture. Taught in English.

JPNS:3700 Topics in Global Cinema 3 s.h.
Identification of new models and methods to investigate cinema's relationship to current global issues beyond traditional scholarly focus in Western Europe and the United States; exploration of an emerging field, moving away from the paradigm of national cinema and bringing together shared theoretical frameworks while acknowledging different historical and cultural contexts. Taught in English. Same as ASIA:3700, TRNS:3700, WLLC:3700.

JPNS:4001 Fourth-Year Japanese I 3 s.h.
Modern Japanese; focus on reading, writing, speaking, listening. Offered fall semesters. Prerequisites: JPNS:3002 with a minimum grade of C .
JPNS:4002 Fourth-Year Japanese II 3 s.h.
Continuation of JPNS:4001. Offered spring semesters. Prerequisites: JPNS:4001 with a minimum grade of C.
JPNS:4201 Genji Lab
3 s.h.
Hands-on examination of traditional Japanese culture through Murasaki Shikibu's classic, Tale of Genji; students discover art, literature, and material culture described in the Tale of Genji through lab-based experimentation with brush and ink, pigments, papermaking and decoration, incense blending, textile matching, music, etc. Taught in English.
JPNS:5301 Japanese Linguistics
3 s.h.
Japanese language as linguistic system; basic linguistic terminology; sound systems, grammar, meanings, usages.
JPNS:5901 Practicum in Teaching Japanese as a Foreign Language

1-3 s.h.
Teaching apprenticeship guided and supervised by a faculty member skilled in university curriculum and instruction.
JPNS:5902 Individual Japanese for Advanced Students arr.
JPNS:7101 Readings in Modern Japanese 3 s.h.
Readings in modern Japanese.

## Korean Courses

KORE:1000 First-Year Seminar
1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first-semester standing.
KORE:1101 First-Year Korean: First Semester
4 s.h. Modern Korean; speaking, listening, reading, writing. Offered fall semesters. GE: World Languages First Level Proficiency.
KORE:1102 First-Year Korean: Second Semester 4 s.h. Continuation of KORE:1101. Offered spring semesters. Prerequisites: KORE:1101. GE: World Languages Second Level Proficiency.

## KORE: 1135 Korean Language and Contemporary Pop

 CultureExplores the general characteristics of Korean culture, language differences between North and South Korea, gender and generational disparities, and the use of English and other languages in Korea. Part of the BTAA Korean e-school program; taught in English.
KORE:1670 Korea in the World
Comprehensive and critical understanding of Korea's place in the world; emphasis on historical and sociocultural roots of various aspects of life on the contemporary Korean peninsula (both North and South Korea); comprehensive list of topics including cultural production (K-pop and film), religions, economy, gender relations, cuisine, politics, and prospects for reunification. Taught in English. Same as ASIA:1670, RELS:1670.

KORE:2101 Second-Year Korean: First Semester Continuation of KORE:1102; conversation and readings in intermediate Korean language; Korean culture. Prerequisites: KORE:1102. GE: World Languages Third Level Proficiency.
KORE:2102 Second-Year Korean: Second Semester
4 s.h.
Continuation of KORE:2101. Prerequisites: KORE:2101. GE: World Languages Fourth Level Proficiency.

## KORE:3070 Topics in Korean Studies

Varied topics in Korean studies.

## KORE:3100 Introduction to Korean Linguistics 3 s.h.

Introduction to various topics in Korean linguistics including sentence structures, sound patterns, word formation, discourse structures, and historical background of Korean language. Taught in English. Recommendations: two years of Korean language study. Same as LING:3101.

KORE:3101 Third-Year Korean: First Semester
Continuation of KORE:2102; advanced intermediate Korean -conversation and grammar skills beyond basic intermediate level; vocabulary expansion with increasingly complex, abstract concepts; how to advance one's opinion and discuss thoughts, ideas. Requirements: KORE:2102 with a minimum grade of C-.
KORE:3102 Third-Year Korean: Second Semester
3 s.h.
Continuation of KORE:3101; conversation and grammar skills beyond basic intermediate level; writing skills for formal occasions; advanced discussion skills-how to advance one's opinion and share thoughts and ideas; traditional and modern Korean culture. Requirements: KORE:3101 with a minimum grade of C-.
KORE:3200 Introduction to Korean-English Translation 3 s.h. Opportunity to develop skills and methods in translating texts from Korean into English; students practice reading and translating various types of Korean texts (e.g., novels, cartoons, movie/drama subtitles, newspaper articles) based on the foundation learned in Korean language courses; students analyze translated works before translation and discussion of how to approach translating various genres depending on targeted audiences, purposes, and circumstances. Taught in English and Korean. Prerequisites: KORE: 2102 with a minimum grade of C .

## KORE:4000 Fourth Year Korean: First Semester

Continuation of KORE:3102; development of intermediate high to advanced-level Korean; enlarging vocabulary, exploring Korean sentence structures, reading various types of texts, listening to authentic Korean materials; Korean society and culture; content-based learning methodology. Requirements: KORE:3102 with a minimum grade of C-

## KORE:4001 Fourth Year Korean: Second Semester 3 s.h.

Continuation of KORE:4000; development of intermediate highto advanced-level Korean speaking ability; enlarging vocabulary, exploring Korean sentence structures, reading various types of texts, and listening to authentic Korean materials; Korean society and culture; materials provided to prepare for Korean standardized tests; content-based learning methodology. Requirements: KORE:4000 with a minimum grade of C-.

## KORE:5102 Individual Korean for Advanced Students arr.

 Korea's modern/traditional culture, history, and current social issues; reading, translating authentic articles. Prerequisites: KORE:3102.
## Russian Courses

## RUSS:1000 First-Year Seminar

1 s.h.

RUSS:1082 Youth Subcultures After Socialism
Examination of youth subculture (i.e., distinct style and identity, beliefs, value system, fashion and favorite music) on the territory of post-communist Europe and its relations with the mainstream culture; how young people of Russia express their individuality after years of dullness and monotony. GE: Values and Culture.

RUSS:1111 First-Year Russian I
5 s.h.
Basic language skills of listening, speaking, reading, and writing Russian; fundamentals of Russian grammar. GE: World Languages First Level Proficiency.

RUSS: 1112 First-Year Russian II
5 s.h. Continuation of RUSS:1111. Requirements: RUSS:1111. GE: World Languages Second Level Proficiency.
RUSS:1131 Introduction to Russian Culture
3 s.h.
Development of cultural history in Russia during the Romanov period (1613-1917); painting, music, architecture, and literature viewed against their political, historical, and social settings. Taught in English. GE: Values and Culture. Same as WLLC:1131.

RUSS:1132 Russia Today 3 s.h.
Contemporary Russia, with focus on prevailing social, political, economic, ethnic, environmental conditions; attention to historical evolution of problems, current factors; what these factors might portend for the future. Taught in English. GE: International and Global Issues; Values and Culture.
RUSS:1500 Ukraine, a Country at the Crossroads: An Interdisciplinary Seminar on Ukrainian History and Culture 3 s.h. Cultural specificity of Ukraine as a large multicultural European country; vital background information for analysis of present-day political events; strategic location between East and West; centurieslong history and culture; all readings in English, no knowledge of Russian or Ukrainian required. Taught in English.
RUSS:1531 Slavic Folklore 3 s.h. Introduction to culture, history, and art of eastern European peoples; pagan, dualistic, and animistic beliefs and their coexistence with Christian faith in eastern Europe. GE: Historical Perspectives; Values and Culture.

## RUSS: 1532 Traces of Ancient Russian Culture (IX-XVII

Centuries): Vikings, Mongols, and Tsars
Early and medieval Slavic history, with focus on Russian art, literature, and religion from 10th through 17th century. Taught in English. GE: Historical Perspectives; Values and Culture.
RUSS:2001 Global Science Fiction
3 s.h.
Science fiction from around the world; spanning poetry, fiction, drama, film, television, comics, mobile phone games, and music; produced on six continents. Taught in English. GE: Diversity and Inclusion. Same as ASIA:2001, FREN:2010, TRNS:2001, WLLC:2001.

## RUSS:2050 Women from an Unknown Land: The Fight for Independence

Exploration of past and current issues related to the Caucasus-a mountainous region located where Europe, the Middle East, and Asia meet-forming a geographical and cultural crossroad; topics include those related to women's rights, causes of poverty and ethnic conflicts, and foreign policy including terrorism in the region, the fight for freedom, and the struggle over natural resources. Taught in English. GE: International and Global Issues. Same as WLLC:2050.
RUSS:2100 Russian Mindset: Sex, Business, and Politics 3 s.h.
Deeper insight of Russian mentality through philosophical, historical, cultural, and practical developments that have shaped Russian behavior and thought. GE: Values and Culture.

RUSS:2110 Russian Sports: Politics, Scandal, Glory
Overview of Russian sports from its beginnings in Slavic tribes through the importance of sports as a political tool during Soviet time to the scandals and glory of modern days; focus on the strong cultural background and rigorous traditions that form the powerhouse known as Russian sports; includes Russian sport celebrities of past and present. Taught in English.

## RUSS:2111 Second-Year Russian I <br> 4 s.h.

Transition to upper-level study through oral practice, grammar exercises, tapes, videos, readings from the Russian press.
Requirements: RUSS:1112. GE: World Languages Third Level Proficiency.
RUSS:2112 Second-Year Russian II 4 s.h.
Continuation of RUSS:2111. Requirements: RUSS:2111. GE: World Languages Fourth Level Proficiency.
RUSS: 3111 Third-Year Russian I
4 s.h.
Advanced Russian grammar, reading, conversation, and written skills through oral reports, compositions, conversation. Requirements: RUSS:2112.
RUSS:3112 Third-Year Russian II 4 s.h.
Advanced Russian grammar, reading, conversation, and written skills through oral reports, compositions, conversation. Requirements: RUSS:3111.
RUSS:3113 Russian Composition and Conversation 4 s.h. Russian oral and aural skills developed through idiomatic usage, stylistics, phonetics, intonation, grammar review; supplemented by short stories, newspaper texts. Taught in Russian. Requirements: RUSS:1112.
RUSS:3122 Tolstoy and Dostoevsky 3-4 s.h.
Tolstoy's War and Peace and Anna Karenina; Dostoevsky's Crime and Punishment, The Demons, and short stories. Taught in English. Same as TRNS:3122, WLLC:3122.
RUSS:3202 Russian Literature in Translation 1860-1917 3 s.h. Survey of major works, figures, and trends of 19th- and early 20thcentury Russian literature; age of the Russian novel; works of Turgenev (Fathers and Sons), Tolstoy (Confession), Dostoevsky (The Idiot, The Brothers Karamazov), and Chekhov (plays). Taught in English. Same as HIST:3492, TRNS:3203, WLLC:3202.
RUSS: 3494 The Russian Revolutions and Their Legacies 3 s.h. The Russian Revolutions of 1905 and 1917 unquestionably changed the fabric of Russian political and social life, transforming Russia from an autocratic imperial power to the first self-proclaimed socialist federation in Europe; students explore sources, nature, and consequences of the revolutions by intensively analyzing politics, society, and culture in late imperial and Bolshevik Russia; students review events and revolutionary movements of late 19th century, changes in political practices extending from late tsarist period, and development of Leninist and Stalinist ideology after the revolutions. Same as HIST:3494.

## RUSS:3990 Special Readings

arr.
Russian-language materials determined by student and instructor. Requirements: 16 s.h. of Russian language instruction.
RUSS:4111 Fourth-Year Russian I 4 s.h.
Perfecting spoken Russian and aural comprehension of native speech. Taught in Russian. Requirements: RUSS:3112 or three years of college-level Russian.

## RUSS:4112 Fourth-Year Russian II

4 s.h.
Perfecting spoken Russian and aural comprehension of native speech. Taught in Russian. Requirements: RUSS:4111 or three years of college-level Russian.
RUSS:4990 Independent Research
arr.

## Asian Languages and Literature, BA

The BA program in Asian languages and literature gives students the opportunity to develop advanced skills in an Asian language while they study the people, literatures, and cultures of Asia. Students choose one of two tracks: Chinese or Japanese.

Many other disciplines work well as second majors for Asian languages and literature students, such as history, art history, political science, religion, sociology, journalism, business, and anthropology.

## Learning Outcomes

## Culture and Literature Knowledge

Students will have:

- knowledge about the target literature and culture, from premodern to modern and contemporary;
- the cultural foundation and critical thinking skills necessary to engage with relevant primary and secondary materials; and
- the ability to communicate their knowledge of Chinese or Japanese culture and language effectively

## Language Competence

Students are able to:

- carry out tasks in various circumstances and interact with others in different social settings and everyday situations in a culturally appropriate manner;
- understand relatively uncomplicated texts that describe events and personal feelings, while they understand the essence of various types of lengthy, more complex written materials; and
- critically assess materials and produce coherent writing based on the acquired information.

## Linguistics Knowledge

## Students will have

- basic knowledge of sociocultural aspects of the language and skills to see through the stereotypes and myths of the target culture in order to have a better understanding of both the target culture and their own.

## Requirements

The Bachelor of Arts with a major in Asian languages and literature requires a minimum of 120 s.h., including 30-32 s.h. of work for the major, depending on the track. Students choose one of two tracks: Chinese or Japanese. Credit required for the major depends on choice of track; requirements for each track are listed below. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. Furthering Language Incentive Program (FLIP) credit may not be counted toward the major.

The amount of approved transfer credit that may be applied to the major varies by track; students should consult their advisors about courses taken at other institutions, including study abroad.

Students may earn the Asian languages and literature major and minor if the minor emphasis language (Chinese or Japanese) differs from the major language track.

The BA with a major in Asian languages and literature requires the following work.

## Tracks

- Chinese Track [p. 151]
- Japanese Track [p. 152]

## Chinese Track

Students in the Chinese track must complete the following coursework.
$\left.\begin{array}{ll}\text { Requirements } & \text { Hours } \\ \text { Prerequisite Chinese Language Courses }\end{array}\right)$

## Prerequisite Chinese Language

Students must successfully complete the prerequisite courses below, or the equivalent, before they enroll in required courses. These courses do not count as credit earned toward track requirements.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| This sequence: |  |  |
| CHIN:2101- | Second-Year Chinese: First | 10 |
| CHIN:2102 | Semester - Second-Year <br>  |  |

## Chinese Language

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Third-Year Chinese: First | 6 |
| CHIN:3101- | Semester - Third Year Chinese: <br> CHIN:3102 | Second Semester |
| CHIN:4101 | Classical Chinese: First <br> Semester | 3 |
| CHIN:4103- | Fourth-Year Chinese: First <br> Semester - Fourth-Year <br> CHIN:4104 | 6 |

## Chinese Literature and Cinema

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| Two of these: |  |  |
| CHIN:3341 | Chinese Literature: Poetry | 3 |
| CHIN:4203 | Modern Chinese Writers | 3 |
| CHIN:4206 | Transnational Chinese Cinemas | 3 |

## Chinese Culture and Society

Courses in this area include those in art, history, literature, linguistics, religion, and translation.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least 9 s.h. from these: |  |  |
| ASIA:1060/ | Introduction to Buddhism | 3 |
| HIST:1612/ |  |  |
| RELS:1506 | Ghost Stories and Tales of the <br> ASIA:1510/ <br> WLLCird in Premodern Chinese <br> Literature | Civilizations of Asia: China <br> from the 17th Century to the |
| ASIA:1602/ | Present <br> HIST:1602 | Women in Premodern East <br> Asian Literature |

| WLLC:3208 |  |  |
| CHIN:1504 | Asian Humanities: China | 3 |
| CHIN:1702 | Chinese Popular Culture | 3 |
| CHIN: 1800 | Chinese Calligraphy and Culture | 3 |
| CHIN:3201/ | Workshop in Chinese Literary | 3 |
| TRNS:3202 | Translation |  |
| CHIN:3302/ | Introduction to Chinese | 3 |
| LING:3302/SLA:3302 | Linguistics |  |
| CHIN:4150 | Advanced Reading and Writing in Chinese | 3 |
| HIST:3650/ ASIA:3650 | Chinese History from 1600 to 1911 | 3 |
| HIST:3652/ | Twentieth-Century China | 3 |

## Electives

Courses and requirements listed above represent the minimum hours required to complete the Chinese track. Students also may choose additional Chinese elective courses (prefix CHIN), but may not exceed a total of 56 s.h. that will apply to the minimum 120 s.h. required to graduate. Elective Chinese courses will not count toward Chinese requirements for the major. Independent studies and arranged hours may be used as elective hours but are not counted toward requirements for the major.

## Japanese Track

Students in the Japanese track must complete the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Prerequisite Japanese Language Courses |  |
| Third- and Fourth-Year Japanese | 14 |
| Literature and Translation Courses | 9 |
| Linguistics and Advanced Language Studies | 6 |
| Cultural Studies Course | 3 |

Students may apply a maximum of 12 s.h. of approved transfer credit toward track requirements. Those who are planning to study abroad should consult with their Japanese track advisors in advance to determine whether their planned coursework abroad will be accepted toward track requirements.

## Prerequisite Japanese Language Courses

Students must successfully complete the prerequisite courses below, or the equivalent, before they enroll in required courses. These courses do not count as credit earned toward track requirements.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | First-Year Japanese: First | 5 |
| JPNS:1001 | Semester |  |
| JPNS:1002 | First-Year Japanese: Second <br> Semester | 5 |
| JPNS:2001 | Second-Year Japanese: First <br> Semester | 5 |
| JPNS:2002 | Second-Year Japanese: Second <br> Semester | 5 |
|  |  |  |

## Third- and Fourth-Year Japanese

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these sequences: |  |  |
| JPNS:3001- | Third-Year Japanese I-II | 8 |
| JPNS:3002 |  | 6 |
| JPNS:4001- | Fourth-Year Japanese I-II |  |

## Literature and Translation

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| 9 s.h. from these: |  |  |
| JPNS:3201/ <br> TRNS:3201 | Workshop in Japanese Literary Translation | 3 |
| JPNS:3202 | Traditional Japanese Literature in Translation | 3 |
| JPNS:3203 | Modern Japanese Fiction in Translation | 3 |
| JPNS:3204 | Topics in Japanese Literature in Translation | 1-3 |
| JPNS:3205 | Major Authors in Modern Japanese Literature | 3 |
| JPNS:3206 | Warriors' Dreams | 3 |

| JPNS:2250/ | Introduction to the Art of Japan |  |

| World Languages, Literatures, and Cultures |  |  |
| :--- | :--- | ---: |
| Course \# | Title | Hours |
| JPNS:3700/ | Topics in Global Cinema | 3 |
| ASIA:3700/ |  |  |
| TRNS:3700/ |  |  |
| WLLC:3700 |  |  |

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

Asian languages and literature majors must complete designated pedagogy and linguistics courses in the department in addition to the coursework required for their major.
To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Honors

## Honors in the Major

Students earning a major in Asian languages and literature with a minimum grade-point average (GPA) of 3.50 in the major and an overall minimum GPA of 3.33 have the opportunity to graduate with honors in the major. Students interested in earning honors in the major should seek the consent of the department chair and a faculty sponsor (an Asian specialist from any department) for departmental honors work. Students must register for ASIA:4301 Honors Tutorial and ASIA:4506 Senior Honors Thesis and must complete an acceptable thesis based on original research.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.
Membership in the UI Honors Program is not required to earn honors in the Asian languages and literature major.

## Financial Support

Undergraduate students have access to financial aid and scholarship resources. Visit Undergraduate Awards and Scholarships on the Department of Asian and Slavic Languages and Literatures website for available scholarships and application information.

## Career Advancement

Asian languages and literature graduates pursue careers in education, government, communication, business, and other fields in the United States and beyond. The programs also provide an excellent background for advanced study in the humanities and social sciences and in professional schools, such as law and business. The number of Americans who can speak Asian languages is relatively small, so many career opportunities exist for individuals trained in these areas.
The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the third semester begins: for students in Chinese and Japanese tracks, language work begun (students in the Sanskrit tracks may begin language work in their sophomore year).
Before the fifth semester begins: at least first-year language competency.
Before the seventh semester begins: at least second-year language competency and at least 90 s.h. earned toward the degree.
Before the eighth semester begins: at least third-year, first-semester language competency and one additional course in the major (for the Japanese track, two additional courses in the major).
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b CHIN:1111, CHIN:1112, CHIN:2101, and CHIN:2102 do not count for credit toward the major. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course. Language level placement will be determined by placement exam score and/or oral interview. Students who place into the 5th semester level of the language will begin major level coursework and not be required to take semesters $1-4$ of the language.
c GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
d Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
e Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

a Students who are planning to study abroad should consult with their Japanese track advisors in advance to determine whether their planned coursework abroad will be accepted toward track requirements.
b Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
c JPNS:1001, JPNS:1002, JPNS:2001, and JPNS:2002 do not count for credit toward the major. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course. Language level placement will be determined by placement exam score and/or oral interview. Students who place into the 5th semester level of the language will begin major level coursework and not be required to take semesters 1-4 of the language.
d GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
e Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
f Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Russian, BA

The Russian major leading to the BA degree trains students in both written and spoken Russian and in Russian literature, culture, and civilization. The department encourages students to pursue a second major (e.g., global health, history, linguistics, political science) and to develop their interests in related or complementary fields. Students interested in focusing on a broader interdisciplinary understanding of the region may earn a second major in international studies; see the BA in international studies [p. 693] in the catalog.

## Learning Outcomes

Russian majors will:

- enhance their language proficiency and cultural awareness of the Russian-speaking world;
- attain skills to engage critically with histories, cultures, literatures, and other arts, and gained knowledge of the diversified Russianspeaking world (Russia, former Republics of the Soviet Union, and Southern and Western Slavs);
- practice interpersonal, interpretative, and presentational communication skills at levels of increasing complexity as indicated by each course number and description;
- engage with multiple perspectives while practicing linguistic skills and analyzing cultural items, such texts, art and other images, or film and music; and
- develop intercultural competence, helping to engage with those whose first language is other than English.

## Study Abroad

Russian is one of the most popular languages on earth. Contact the academic coordinator of the Russian program or International Programs Study Abroad for more information on safe programs abroad where Russian is one of the official languages.

## Requirements

The Bachelor of Arts with a major in Russian requires a minimum of 120 s.h., including 32 s.h. of work for the major earned in Russian courses. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

Students must complete RUSS:2112 Second-Year Russian II or the equivalent before they complete language requirements for the major.

The BA with a major in Russian requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Language Courses | 23 |
| Russian and East European Culture Courses | 9 |

## Language

| Course \# | Title | Hours |
| :--- | :--- | ---: |

| WLLC:3122 | Russian Literature in | 3 |
| RUSS:3202/ | Translation 1860-1917 | 3 |
| HIST:3492/ |  |  |
| TRNS:3203/ |  |  |
| WLLC:3202 |  |  |

Students are urged to choose elective courses in economics, geographical and sustainability sciences, history, political science, global health, and international studies. Nearly every avenue of professional training and employment requires a solid background in Russian area studies. For example, criteria for U.S. government employment include substantive knowledge in history, economics, political science, sociological disciplines, scientific specialties, demography, military-related skills, and in some cases, cultural and religious background. In-depth knowledge of literature or linguistics without other substantive background may be of limited practical use in finding employment.

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

Majors must complete designated pedagogy and linguistics courses in the department in addition to the coursework required for their major.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in the major. They must have junior or senior standing, a grade-point average (GPA) of at least 3.33 in Russian, and a cumulative University of Iowa GPA of at least 3.33 in order to enroll in the honors program.

Honors students must register for RUSS:4995 Honors. They must complete an honors project (e.g., thesis, translation, cultural studies,
or research) in Russian. Students must present their work to a faculty committee as determined by their honors thesis advisor. Contact the department for more information about requirements for graduation with honors in the Russian major.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the Russian major.

## Financial Support

Undergraduate students have access to undergraduate awards and scholarships. Visit the Department of Asian and Slavic Languages and Literatures for available scholarships and application information.

## Career Advancement

Training in Russian is often an important asset to careers in the natural and physical sciences, engineering, medicine, business, journalism, library and information science, and the social and military sciences. It also may be appropriate preparation for study of law or international relations as well as Russian language and literature, translation, and other humanistic disciplines.

Some governmental agencies are interested in job candidates who have advanced training in Russian; these agencies give preference to applicants who combine strong language proficiency with a well-rounded background in area studies. Students who develop an exceptional facility with the Russian language may pursue careers in literary and technical translation and interpretation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.
Before the third semester begins: competence in first-year Russian.
Before the fifth semester begins: competence in second-year Russian.

Before the seventh semester begins: competence in third-year Russian, an additional course in the major, and at least 90 s.h. earned toward the degree.
Before the eighth semester: competence in fourth-year Russian and two more courses in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

e Only 3 s.h. from RUSS:2112 applies toward the major.
f Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Asian Languages and Literature, Minor

## Requirements

The undergraduate minor in Asian languages and literature is offered with two emphases: Chinese or Japanese. The minor requires 15-17 s.h. of credit, depending on the emphasis. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

Students may earn the Asian languages and literature major and minor if the minor emphasis language (Chinese or Japanese) differs from the major language track.

The minor requirements for each emphasis are listed below.

- Chinese Emphasis [p. 159]
- Japanese Emphasis [p. 159]

## Chinese Emphasis

The minor in Asian languages and literature with Chinese emphasis requires $15 \mathrm{~s} . \mathrm{h}$. , including $12 \mathrm{~s} . \mathrm{h}$. earned in courses considered advanced for the minor taken at the University of Iowa. The minor must include the following coursework. Some of these courses have prerequisites; students must complete all of a course's prerequisites before they may register for that course.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these sequences: |  |  |
| CHIN:3101- | Third-Year Chinese: First <br> SHIN:3102 | Semester - Third Year Chinese: <br> Second Semester |
| CHIN:4103- | Fourth-Year Chinese: First <br> Semester - Fourth-Year <br> CHIN:4104 | Chinese: Second Semester |
| One of these: | Introduction to Chinese | 6 |
| CHIN:3302/ | Linguistics |  |
| LING:3302/ | Chinese Literature: Poetry | 3 |
| SLA:3302 | Modern Chinese Writers |  |
| CHIN:3341 | Transnational Chinese Cinemas |  |
| CHIN:4203 |  | $\mathbf{1 5}$ |
| Total Hours |  |  |

## Japanese Emphasis

The minor in Asian languages and literature with Japanese emphasis requires 17 s.h., including 12 s.h. earned in courses considered advanced for the minor taken at the University of Iowa. Furthering Language Incentive Program (FLIP) credit may not be counted toward the Japanese emphasis.
The following courses are prerequisite to the Japanese emphasis; they do not count toward the minor.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| JPNS:1001 | First-Year Japanese: First | 5 |
| JPNS:1002 | Semester | First-Year Japanese: Second |
| Jemester | 5 |  |
| JPNS:2001 | Second-Year Japanese: First <br> Semester | 5 |

The minor with Japanese emphasis must include the following courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| JPNS:3001 | Third-Year Japanese I | 4 |
| JPNS:3002 | Third-Year Japanese II | 4 |
| One course in literature and translation | 3 |  |
| One course in linguistics and advanced language | 3 |  |
| studies |  |  |
| One course in literature and translation, or in linguistics <br> and advanced language studies, or in cultural studies | 3 |  |
| Total Hours | $\mathbf{1 7}$ |  |

Students select courses in literature and translation, linguistics and advanced language studies, and cultural studies from the lists below.

## Literature and Translation

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| JPNS:3201/ | Workshop in Japanese Literary | 3 |
| TRNS:3201 | Translation |  |
| JPNS:3202 | Traditional Japanese Literature <br> in Translation | 3 |
| JPNS:3203 | Modern Japanese Fiction in <br>  <br>  <br>  <br> Translation | 3 |
| JPNS:3204 | Topics in Japanese Literature in | $1-3$ |
|  | Translation |  |
| JPNS:3205 | Major Authors in Modern | 3 |
|  | Japanese Literature | 3 |
| JPNS:3206 | Warriors' Dreams | 3 |
| JPNS:3207 | Japan Illuminated: Japanese | 3 |
| JPNS:3208 | Literature and Visual Culture | 3 |
| JPNS:3210 | Japanese Film | 3 |
| JPNS:3601 | Japanese Theater | 3 |
| JPNS:4201 | Contemporary Japanese Culture | 3 |
|  | Genji Lab | 3 |

## Linguistics and Advanced Language Studies

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| JPNS:3107 | Classical Japanese: First | 3 |
|  | Semester | 3 |
| JPNS:3128 | Introduction to Japanese |  |

## Korean Studies, Minor

## Requirements

The undergraduate minor in Korean studies requires a minimum of 15 s.h., with a minimum of 9 s.h. completed at the University of Iowa Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

A maximum of 6 s.h. in transfer coursework may be selected in approved study abroad coursework. See "Study Abroad" below for details.

## Required Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| One of these: |  |  |
| KORE: 1135 | Korean Language and Contemporary Pop Culture | 3 |

| KORE:4000 | Fourth Year Korean: First Semester | 3 |
| KORE:4001 | Fourth Year Korean: Second Semester | 3 |

## Electives

Students proficient through upper-level Korean language courses (more advanced than third-year Korean or with a Test of Proficiency in Korean [TOPIK] level of 3 or higher) and who have an approved waiver from the Korean program coordinator may substitute 6 s.h. of other coursework from the list below instead of completing the Korean language requirement.
Students proficient through upper-level Korean language courses who do not have a waiver must complete a minimum of $3 \mathrm{~s} . \mathrm{h}$. in a related area elective. They can select a course from the list below or consult with the Korean program coordinator for approval to take a different elective course.

All other students select 6 s.h. from the following (consult the Korean program coordinator for options involving study abroad or waivers).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| KORE:1135 | Korean Language and <br> Contemporary Pop Culture (if <br> not already taken) | 3 |

a This course is a prerequisite for the required minor courses.
b Language level placement will be determined by placement exam score and/or oral interview. Students who place into the 5th semester level of the language will begin coursework at that level and will not be required to take semesters 1-4 of the language.

## Russian and Eastern European Studies, Minor

## Requirements

The undergraduate minor in Russian and Eastern European studies requires a minimum of 15 s.h., including 12 s.h. earned in courses taken at the University of Iowa. Students must maintain a gradepoint average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass. The minor does not require knowledge of the Russian language.

Students select courses from the following.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| RUSS:1131/ <br> WLLC:1131 | Introduction to Russian Culture | 3 |
| RUSS:1132 | Russia Today | 3 |
| RUSS:1531 | Slavic Folklore | 3 |
| RUSS:1532 | Traces of Ancient Russian Culture (IX-XVII Centuries): Vikings, Mongols, and Tsars | 3 |
| RUSS:2050/ WLLC:2050 | Women from an Unknown Land: The Fight for Independence | 3 |
| RUSS:2100 | Russian Mindset: Sex, Business, and Politics | 3 |
| RUSS:2110 | Russian Sports: Politics, Scandal, Glory | 3 |
| RUSS:2111 | Second-Year Russian I | 4 |
| RUSS:2112 | Second-Year Russian II | 4 |
| RUSS:3122/ TRNS:3122/ WLLC:3122 | Tolstoy and Dostoevsky | 3-4 |
| RUSS:3202/ <br> HIST:3492/ <br> TRNS:3203/ <br> WLLC:3202 | Russian Literature in Translation 1860-1917 | 3 |
| POLI:3410 | Russian Foreign Policy | 3 |

## Asian Civilizations, MA

## Requirements

The Master of Arts program in Asian civilizations requires a minimum of 30 s.h. of graduate credit, including 24 s.h. earned in residence at the University of Iowa. Students must maintain a cumulative gradepoint average of at least 3.00.

Detailed information on degree requirements is sent to all applicants. By the end of the first semester in residence, students propose a study plan developed in consultation with their advisor and in accordance with guidelines for specializations within the program.

Currently, the department is not accepting applicants for any track.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. The Department of Asian and Slavic Languages and Literatures requires a grade-point average (GPA) of at least 3.00 for regular admission and a GPA of at least 2.75 for conditional admission.

A BA in Chinese language and literature, teaching Chinese as a second language, or the equivalent is required for study in the MA in teaching Chinese as a second language track. Chinese language proficiency equivalent to third-year Chinese, as determined by examination, is required for the MA in Chinese studies track

All international applicants must submit Test of English as a Foreign Language (TOEFL) iBT scores for reading, listening, speaking, and writing. They must also submit an essay in response to specific questions indicated in the application instructions. Applicants whose first language is not English must score at least 98 on the TOEFL.

Applicants must submit a statement of purpose, a research paper written in English, three letters of recommendation, and scores on the Graduate Record Exam (GRE) General Test.

Both international and U.S. graduate applications requesting financial support for the following academic year are due Feb. 1. All other applications are accepted until April 15 for fall admission and Oct. 1 for spring admission.
Application materials are available from the department.

## Financial Support

Graduate students have access to the following financial aid and scholarship resources. Contact the Department of Asian and Slavic Languages and Literatures for application information and see Graduate Funding on the department's website for details about each funding opportunity.

## Career Advancement

The master's degree program in Asian civilizations prepares students for doctoral study in a variety of disciplines. It also may be a good choice for students planning nonacademic careers in which advanced knowledge of Asian civilizations could be useful. For example, students working toward professional degrees, such as an MD or JD, may decide to earn the MA in Asian civilizations while completing the professional degree. The program also provides an excellent background for advanced study in the humanities.

The number of Americans who can speak Asian languages is relatively small, so many career opportunities exist for individuals trained in these areas.

The Pomerantz Career Center is a great resource for students researching internships and careers.

## Biology

## Chair

Undergraduate major: biology (BA, BS)
Undergraduate minor: biology
Graduate degrees: MS in integrated biology; PhD in integrated biology
Faculty: https://biology.uiowa.edu/people/faculty
Website: https://biology.uiowa.edu/
The Department of Biology offers undergraduate and graduate programs that prepare students for careers in a wide variety of fields such as health science or biological research, technology, and education. It also offers several courses that undergraduate students in all majors may use to satisfy the GE CLAS Core [p. 19] Natural Sciences requirement and other courses on topics of general interest for undergraduate non-biology majors, including a First-Year Seminar course, BIOL:1000 First-Year Seminar, designed for entering students. The department also administers the interdisciplinary biomedical sciences [p. 193] major and the neuroscience [p. 851] major, both leading to a Bachelor of Science degree.

## Programs

## Undergraduate Programs of Study

## Majors

- Major in Biology (Bachelor of Arts) [p. 172]
- Major in Biology (Bachelor of Science) [p. 177]

## Minor

- Minor in Biology [p. 187]

## Graduate Programs of Study

## Majors

- Master of Science in Integrated Biology [p. 188]
- Doctor of Philosophy in Integrated Biology [p. 190]

## Facilities

The department is housed in two contiguous buildings, with modern facilities and equipment for state-of-the-art research.
Facilities include the W.M. Keck Dynamic Image Analysis Facility, which couples sophisticated state-of-the-art microscopy and computerized motion analysis to permit 3D real-time analysis of cell movement in vitro and in situ. The Roy J. Carver Center for Genomics houses the department's DNA sequencing, oligo synthesis, quantitative PCR, functional genomics facilities, and informatics facilities. The Roy J. Carver Center for Imaging is a microscopy and imaging facility; its confocal microscopes are available for teaching and research.
A large greenhouse is used in plant research and education. The department also houses animal-care facilities suitable for mice, rats, rabbits, Xenopus laevis, and zebra fish. These facilities are managed by the university's animal care unit, which is accredited by the Association for Assessment and Accreditation of Laboratory Animal Care (AAALAC). A central university facility provides assistance in the preparation of transgenic mice.

The department is home to the Developmental Studies Hybridoma Bank, which is affiliated with the National Institutes of Health. The hybridoma bank collects and distributes monoclonal antibodies that originate in laboratories all over the world. Its collection now contains more than 3,500 monoclonal antibodies that are distributed to users internationally for a modest fee.

In addition to department facilities, the university offers a genomic sequencing service, a DNA oligonucleotide synthesis and enzyme lab, oligopeptide synthesis and sequencing equipment, and massand NMR spectroscopy facilities. The Center for Biocatalysis and Bioprocessing is available for growing large amounts of microorganisms (e.g., 100 liters) for use in protein isolation.

## Iowa Lakeside Laboratory

The Iowa Lakeside Laboratory is a field station run cooperatively by the University of Iowa, Iowa State University, and the University of Northern Iowa. Located on West Lake Okoboji, in northwestern Iowa, the laboratory affords excellent conditions for summer study in field biology, limnology, phycology, aquatic ecology, pollination biology, and plant taxonomy. It offers a wide variety of summer courses at the undergraduate and graduate levels. Students should check with their advisors to determine whether specific courses may be counted toward requirements for graduation. See Iowa Lakeside Laboratory [p. 2063] (University College) in the catalog or visit the Lakeside Laboratory website.

## Courses

## Biology Courses

Many courses include laboratory, discussion, and/or field components.
The following courses are not open to graduate students and do not provide credit toward a biology major: BIOL:1060 Big Ideas: Origins of the Universe, Earth, and Life; BIOL:1140 Human Biology: Nonmajors; BIOL:1141 Human Biology: Health Professions; BIOL:1251 How the Brain Works (and Why it Doesn't); BIOL:1260 Plants and Human Affairs; BIOL:1261 Introduction to Botany; BIOL:1370 Understanding Evolution; and BIOL:2211 Genes, Genomes, and the Human Condition.

## BIOL:1000 First-Year Seminar

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.
BIOL:1060 Big Ideas: Origins of the Universe, Earth, and Life 3 s.h.
Origin of the universe, the biochemistry of life, and the origin of life on Earth; for non-science majors. Recommendations: first-year or sophomore standing. GE: Natural Sciences without Lab. Same as ASTR:1060, EES:1060.
BIOL:1140 Human Biology: Nonmajors 4 s.h.
Overview of molecular and cellular basis of human life; structure, function of human tissues, organs, organ systems; evolution, reproduction, genetics, impact of molecular biology and genetic engineering; integration of humans and the biosphere; lecture, laboratory. GE: Natural Sciences with Lab.

## BIOL:1141 Human Biology: Health Professions

Molecular and cellular basis of human life; structure, function of human tissues, organs, organ systems; evolution, reproduction, genetics, impact of molecular biology and genetic engineering; integration of humans and the biosphere; lecture, laboratory. Requirements: one year of high school chemistry. Recommendations: CHEM:1070. GE: Natural Sciences with Lab.

BIOL:1251 How the Brain Works (and Why it Doesn't) 3-4 s.h.
Introductory survey of neuroscience; structure and function of the brain; nature of consciousness; brain function in mental illness and degenerative disorders; genes and the mind; perception, sensation, memory, and emotions. Requirements: non-biology major. GE: Natural Sciences without Lab.

## BIOL:1260 Plants and Human Affairs <br> 2-3 s.h.

How plants are useful to people: food, clothing, shelter, medicines, psychoactive agents; plants' social, economic, ecological significance. GE: Natural Sciences without Lab.

## BIOL:1261 Introduction to Botany

4 s.h.
Biology of plant life; emphasis on structure, function, reproduction, inheritance, diversity, evolution. Requirements: one year of high school chemistry. GE: Natural Sciences with Lab.

## BIOL:1295 Career Preparation and Life Design for Biology Majors

Exploration of career paths, employers, graduate programs; preparation for life after college; development of practical skills in job searching, writing, interviewing, and networking; for students who are unsure what they can do after graduation with a bachelor's degree in biology. Requirements: junior or senior standing.

## BIOL:1370 Understanding Evolution

3 s.h.
Evolution and diversity of living things, their patterns on Earth, their organization in ecological systems; dynamics of evolutionary processes. GE: Natural Sciences without Lab.

## BIOL:1411 Foundations of Biology

4 s.h.
Unifying concepts of living systems; emphasis on common properties and processes; chemical and cellular basis of life, genetics, and evolution. Prerequisites: CHEM: 1110 with a minimum grade of C- or CHEM:1070 with a minimum grade of A-. GE: Natural Sciences with Lab.
BIOL:1412 Diversity of Form and Function 4 s.h.
Underlying unifying concepts of life; emphasis on diversity of living systems; the tree of life, cellular evolution, prokaryotic and eukaryotic diversity, plant and animal form and function; interactions among diverse forms of life and their environment. Prerequisites: BIOL:1411 with a minimum grade of C-. GE: Natural Sciences with Lab.

## BIOL:1808 Ways of Knowing Science

1 s.h.
Science as a powerful way of knowing based on experimentation and observation of natural world; introduction to subdisciplines of scientific research; scope and methods of scientific research; questions that scientific research seek answers for; methods that scientists use to obtain answers to their questions; how science affects us personally and how it affects the rest of society; research seminars, discussion, and exploration.

## BIOL:2120 Good Genes Gone Bad: Genetic Disorders of Notable Celebrities

Introduction to a wide range of genetic disorders affecting notable celebrities; relevant genetic pathways in easy-to-understand language; exploration of mechanisms of disease and treatments. GE: Natural Sciences without Lab.
BIOL:2211 Genes, Genomes, and the Human Condition 3 s.h.
Organization, expression, and evolution of genes in context of genomes; focus on human genome; distribution and transmission of variation in human population. Prerequisites: BIOL:1411. Recommendations: BIOL:1412.

BIOL:2246 Entomology Lab
4 s.h.
Insects are the most species-rich and diverse of all animals; introduction to insect biology; emphasis on evolution, diversity, ecology, and morphology with some additional focus on physiology and behavior; students work in lab and field settings; memorization of entomological terms required; hands-on learning including how to employ various tools, techniques, and approaches used by professional entomologists, insect collecting and preservation, DNA extraction and sequencing, and analysis of evolutionary and ecological data. Prerequisites: BIOL:1412.
BIOL:2254 Endocrinology 3 s.h.
Production and effect of hormonal chemical messengers of secretory glands; emphasis on cell signaling in vertebrate systems; actions of hormones in regulating growth, physiology, and reproduction; organ to molecular levels. Prerequisites: BIOL:1411 and (BIOL:1412 or HHP:3500 or PSY:2701). Recommendations: CHEM:2210.
BIOL:2374 Biogeography
3 s.h.
Introduction to processes that lead to the patterns of plant and animal distributions we see across the globe; processes of focus include plate tectonics, climate, and human-ecological interactions; species management and conservation in relationship to climate and change in human patterns of environment. Prerequisites: BIOL:1141 or BIOL:1370 or BIOL:1261 or GEOG:1020 or BIOL:1412. Same as GEOG:2374.

BIOL:2512 Fundamental Genetics
4 s.h.
Nature, function of genetic material: classical, molecular, developmental aspects. Prerequisites: BIOL:1411 with a minimum grade of C- and CHEM:1110. Recommendations: CHEM:2210.
BIOL:2663 Plant Response to the Environment 3 s.h
Mechanisms of plant responses to environmental factors (biotic and abiotic) at organismal and molecular levels. Prerequisites: BIOL:1411 and BIOL:1412.

## BIOL:2673 Ecology

3 s.h.
Adaptations of organisms to their physical and biological environments; organism-environment interactions; population biology; interactions between species; ecology of communities, ecosystems; human impact on ecosystems. Recommendations: a basic statistics or calculus course. Same as ENVS:2673.
BIOL:2723 Cell Biology
3 s.h.
Structures of cells and organelles in relation to their functions at molecular, cellular levels; emphasis on higher eukaryotic cells. Prerequisites: BIOL:1411 and (BIOL:1412 or HHP:3500 or PSY:2701) and CHEM:1120.

BIOL:2753 Introduction to Neurobiology 3 s.h.
Techniques of molecular biology, genomics, neuropharmacology, and functional brain imaging applied to understanding how the brain works. Prerequisites: (BIOL:1412 or HHP:3500) and BIOL:1411.
BIOL:3172 Evolution
4 s.h.
Nature, evidence, analysis, implications, molecular/genetic basis; historical record, phylogeny, speciation, adaptation, investigative methods. Prerequisites: BIOL:1412 with a minimum grade of Cand BIOL:2512 with a minimum grade of C- and (STAT:2010 or STAT:3510 or MATH:1550 or MATH:1850 or MATH:1460).
BIOL:3212 Bioinformatics for Beginners 3 s.h.
Overview of bioinformatics topics including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics, and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BIOL:2512 or BIOL:2211 or BMB:3120 or MICR:3170. Same as IGPI:3212.

## BIOL:3233 Introduction to Developmental Biology

Fundamental mechanisms in differentiation, organogenesis, morphogenesis; and pattern formation; mechanistic approach at molecular, cellular, tissue levels of organizations. Prerequisites:
BIOL:1411 and CHEM:1120 and (BIOL:1412 with a minimum grade of C- or HHP: 3500 with a minimum grade of C-). Recommendations: BIOL:2512.
BIOL:3244 Animal Behavior
3 s.h.
Genetics, sensory physiology, migration, development of behavior, circadian rhythms, foraging strategies, aggression, sexual and parental behavior, group selection, social behavior. Prerequisites: BIOL:1411 and (BIOL:1412 or PSY:2701).
BIOL:3245 Animal Behavior Laboratory 4 s.h.
Behavioral aspects of vertebrate and invertebrate animals under pressure of different genetic background, aggression and competition for a mate, food or security, social behavior. Prerequisites: BIOL:1411 and (BIOL:1412 or PSY:2701).
BIOL:3253 Neurobiology I
4 s.h.
Neurobiology from molecular/cellular to systems levels including cell biology of the neuron; membrane electrophysiology; synaptic transmission and plasticity; functional neuroanatomy; sensory, motor, and autonomic systems; emotion, memory, sleep, language, attention and cognition, neuronal development; focus on systems and developmental neurobiology; first in a two-semester sequence. Prerequisites: BIOL:1411 and (PSY:2701 or BIOL:2753).

## BIOL:3254 Neurobiology II

Neurobiology from molecular/cellular to systems levels including cell biology of the neuron; membrane electrophysiology; synaptic transmission and plasticity; functional neuroanatomy; sensory, motor, and autonomic systems; emotion, memory, sleep, language, attention and cognition, neuronal development; focus on molecular/ cellular neurobiology and neurophysiology; second in a two-semester sequence. Prerequisites: BIOL:3253 and (PHYS:1512 or PHYS:1612).

## BIOL:3314 Genomics

3 s.h.
Major areas of genomics including genome sequencing, assembly, and annotation; evolutionary genomics, metagenomics, functional genomics, and computational genomics; synthetic biology and genome engineering. Prerequisites: BIOL:1412 and (BIOL:2211 or BIOL:2512 or BIOL:2723). Same as IGPI:3314.

## BIOL:3343 Animal Physiology

Principles of cellular and systems physiology; emphasis on quantitative and experimental aspects. Prerequisites: BIOL:1411 and CHEM:1110 and CHEM: 1120 and (MATH:1380 or MATH:1460 or MATH:1550 or MATH:1850). Recommendations: (PHYS:1511 and PHYS:1512) or (PHYS:1611 and PHYS:1612).
BIOL:3363 Plant Developmental Biology 3 s.h.
Developmental processes throughout life cycle of vascular plants; current knowledge of mechanisms, control; emphasis on molecular and genetic approaches to studying development. Prerequisites:
BIOL:1412 and BIOL:2512.
BIOL:3373 Human Population Genetics and Variation 3 s.h.
Principles of evolutionary change of genes and genomes applied to human populations and to comparisons between humans and their closest primate relatives; emphasis on consequences of mutation, natural selection, and demographic changes. Prerequisites: BIOL:2512 with a minimum grade of C - or BIOL: 2211 with a minimum grade of C-.

## BIOL:3603 Mechanisms of Aging

3 s.h.
Evolutionary theories of aging, cellular and genetic basis of aging and repair, disruption of homeostasis in aging; focus on studies of biological and environmental causes of age-related diseases. Prerequisites: BIOL:1411 and (BIOL:1412 or HHP:3500 or PSY:2701). Recommendations: BIOL:2723.

3 s.h. BIOL:3626 Cell Biology Laboratory 4 s.h.
Conceptual understanding and technical skills in fluorescence microscopy and digital imaging, mammalian cell culture, tissue fractionation, centrifugation, electrophoresis, and expression of recombinant proteins. Prerequisites: BIOL:2723.

## BIOL:3655 Neurogenetics Laboratory <br> 4 s.h.

Emphasis on project-oriented training to develop fundamental handson experimental manipulations and techniques, problem-solving skills, and data analysis methodology; students utilize modern genetic, behavioral, and electrophysiological methods to explore how gene and environment influence nervous system function and behavioral expression using genetic model organisms. Prerequisites: BIOL:2512 or BIOL:2211. Recommendations: BIOL:2753 or PSY:2701.

## BIOL:3656 Neurobiology Laboratory

4 s.h.
Principles and practice of neurobiology research, including microscopy and imaging, cellular and molecular neurobiology, and electrophysiology. Prerequisites: (BIOL:1411 and PSY:2701) or BIOL:2753.
BIOL:3663 Plant Response to the Environment 3 s.h.
Mechanisms of plant responses to environmental factors (biotic and abiotic) at organismal and molecular levels. Prerequisites: BIOL:1412 and (BIOL:2512 or BIOL:2723 or BIOL:3716 or BMB:3120).
BIOL:3676 Evolution Lab 4 s.h.
Methods of sampling and describing variation in natural populations; application of molecular genetic, bioinformatic, and computational techniques to describe genetic variation through sequence analysis; use of controlled laboratory experiments and computer simulations to illustrate evolutionary principles. Prerequisites: BIOL:2512 or BIOL:2211. Corequisites: BIOL:3172 or BIOL:3373, if not taken as a prerequisite. Recommendations: grade of C or higher in BIOL:3172.
BIOL:3713 Molecular Genetics
4 s.h.
Mechanism, regulation of RNA, DNA, protein biosynthesis, with emphasis on methods of genetic analysis; application of modern recombinant DNA techniques to basic problems. Prerequisites: BIOL:2512 or BMB:3120 or BMB:3110.
BIOL:3716 Genetics and Biotechnology Lab 4 s.h.
Expansion of genetic concepts introduced in BIOL:2512; introduction to genetic/molecular techniques currently used in genetic analysis and biotechnology. Prerequisites: BIOL:1411. Corequisites: BIOL:2512 or BIOL:2211, if not taken as a prerequisite. Recommendations: grade of C or higher in BIOL:2512.
BIOL:3736 Developmental Biology Lab
4 s.h.
Experimental manipulation of embryos to examine mechanisms of early development, including gametogenesis and fertilization, cleavage, gastrulation, pattern formation and organogenesis; in vivo imaging of development, methods to visualize gene expression and independent research; model organisms including sea urchin, fish, frog, chick, mouse. Prerequisites: BIOL:3233.
BIOL:3994 Introduction to Research
1-3 s.h.
Independent scientific research related to the field of biology.
BIOL:3999 Independent Research in Neuroscience 2-3 s.h.
Independent scientific research related to the field of neuroscience. Same as PSY:3999.

BIOL:4213 Bioinformatics
2,4 s.h.
Overview of bioinformatics topics, including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BMB:3120 or MICR:3170 or BIOL:2512 or BMB:3110. Recommendations: grade of B-plus or higher in BIOL:2512 or graduate standing. Same as GENE:4213, IGPI:4213.

BIOL:4314 Introduction to Synthetic Biology in the Lab Introduction to theory and practice of large-scale design goals of synthetic biology in which various types of DNA instructions, known from decades of research and discovery on specific biological systems, are taken out of context and used to execute various novel tasks designed to solve real-world problems; basic laboratory instruction in standardized construction techniques for stringing together off-the-shelf DNA components that are then introduced into organisms capable of executing the instructional set; controlled experiments to investigate the degree of variability exhibited by engineered genetic constructs. Prerequisites: BIOL:1411. Same as BME:4314.
BIOL:4333 Genes and Development 3 s.h.
Mechanisms by which genes control development of multicellular animals; methodology of scientific research applied to developmental genetics. Prerequisites: BIOL:1412 with a minimum grade of Cand BIOL:2512 with a minimum grade of C-. Recommendations: BIOL:3233.
BIOL:4373 Molecular Evolution: Genes, Genomes, and Organisms
Theory underlying phylogenetic analysis with application of these methods to molecular data sets; analysis of multigene data, organellar, and nuclear genome sequences to reconstruct the history of cells.
Prerequisites: BIOL:3172 with a minimum grade of C-. Same as IGPI:4373.

## BIOL:4386 Introduction to Scientific Computing for

 BiologistsIn modern biological research, computational tools are no longer a luxury but a necessity; introduction to a set of computational tools and best practices in data analysis to prepare for dataintensive research in the field of biomedical sciences; topics include reproducibility in computational projects, version control, command-line interface, remote computing, and general and statistical programming. Prerequisites: BIOL:2512 or BMB:3110 or BMB:3120 or MICR:3170. Recommendations: CS:2110.

## BIOL:4806 Service Learning in Biology

arr.
Credit for community outreach and/or service; service learning projects involve more than just volunteering; preparation of a detailed plan summarizing project goals, activities, and audience; routine meetings with team members and faculty mentor; research and development of educational materials and/or activities focused on a biology topic; plan, promote, support, and assess an event that engages the targeted community.
BIOL:4897 Teaching Internship in Biology
1-3 s.h.
Training and practical experiences in the teaching of biology; includes a weekly training session with a PhD instructor or course supervisor, active assistance of the primary instructor in one or more class meetings each week, and/or providing constructive written feedback on laboratory or classroom exercises; additional experiences may include leading a training session, co-teaching or lead-teaching one or more lab or classroom exercises, and assisting with the development of classroom activities or resources; specific experiences will vary depending on the course and supervisor needs. Prerequisites: BIOL:1411 with a minimum grade of B and BIOL:1412 with a minimum grade of B . Requirements: third- or fourth-year standing and interview with instructor.

BIOL:4898 Communicating Research
Independent, investigative research experience; research process and communication-establishing goals and expectations with a mentor, developing and framing a research hypothesis or question, communicating results in written and oral form to scientist and nonscientist audiences; supportive learning environment to share research experiences and develop identities as scientists, learn skills to become effective independent researchers and science communicators. Requirements: concurrent enrollment in BIOL:4999 or BIOL:3994 or HONR:3994 or URES:3994; or working in a research laboratory as a volunteer or paid research assistant for the semester enrolled.

## BIOL:4995 Honors Research in Neuroscience

arr.
Independent scientific research related to the field of neuroscience. Requirements: honors standing in neuroscience, UI GPA of at least 3.33, and neuroscience GPA of at least 3.33. Same as PSY:4995.

BIOL:4998 Honors Seminar in Biology
Prerequisites: BIOL:1411. Requirements: honors standing.
BIOL:4999 Honors Research in Biology
arr.
Independent scientific research related to the field of biology.
Requirements: honors standing in biology, UI GPA of at least 3.33, and biology GPA of at least 3.33 .

## BIOL:5110 Practicum: College Teaching for Biology Teaching

 Assistants 2 s.hPractical pedagogical concerns including how to structure a course, devise learning outcomes, development of syllabus and calendar of assignments, evaluation of student work, and creation of a studentcentered classroom with collaborative learning experiences; for biology TAs teaching in introductory courses BIOL:1411 and BIOL:1412.

## BIOL:5172 Graduate Studies in Evolution

Nature, evidence, analysis, implications, molecular/genetic basis; historical record, phylogeny, speciation, adaptation, investigative methods. Prerequisites: BIOL:1412 with a minimum grade of Cand BIOL:2512 with a minimum grade of C- and (STAT:2010 or STAT:3510 or MATH:1550 or MATH:1850 or MATH:1460). Corequisites: BIOL:5412 or BIOL:5512 or GENE:6150.
BIOL:5199 Critical Readings in Biology arr.
BIOL:5211 Genes, Genomes, and the Human Condition Graduate Lecture

3 s.h.
Organization, expression, and evolution of genes in context of genomes; focus on human genome; distribution and transmission of variation in human population. Recommendations: BIOL:1411 highly recommended. Same as IGPI:5211.
BIOL:5218 Microscopy for Biomedical Research arr. Basic microscopy methods for research including optics, preparation, and analysis of biomedical specimens; light, fluorescence, confocal, transmitting electron, scanning electron, atomic force microscopes, elemental analysis; immunochemistry and stereology techniques; individualized laboratory instruction. Prerequisites: BIOL:2723. Same as ACB:5218, MICR:5218.
BIOL:5412 Fundamental Genetics - Graduate Lecture
3 s.h.
Nature and function of genetic material; classical, molecular, and developmental aspects. Corequisites: BIOL:5512.

BIOL:5512 Readings in Genetics 2 s.h.
Critical evaluation of classic genetics papers. Requirements: biology graduate standing.

BIOL:5653 Fundamental Neurobiology I
3 s.h.
Neurobiology from molecular/cellular to systems levels, including cell biology of the neuron; membrane electrophysiology; synaptic transmission and plasticity, functional neuroanatomy, sensory, motor and autonomic systems; emotion, memory, sleep, language, attention and cognition, neuronal development; focus on systems and developmental neurobiology; first in a two-semester sequence. Same as NSCI:5653, PSY:5203.

BIOL:5654 Fundamental Neurobiology II 3 s.h.
Neurobiology from molecular/cellular to systems levels, including cell biology of the neuron; membrane electrophysiology; synaptic transmission and plasticity; functional neuroanatomy, sensory, motor and autonomic systems; emotion, memory, sleep, language, attention and cognition, neuronal development; focus on molecular/ cellular neurobiology and neurophysiology; second in a two-semester sequence. Prerequisites: BIOL:5653 or NSCI:5653 or PSY:5203. Same as NSCI:5654, PSY:5205.

BIOL:5658 Fundamental Neurobiology I Discussion 2 s.h.
Discussion of selected papers, including classics from neurobiology literature; coordinated with BIOL:5653 lecture material. Same as NSCI:5658, PSY:5204.

BIOL:5659 Fundamental Neurobiology II Discussion 2 s.h.
Discussion of selected papers, including classics from neurobiology literature; coordinated with BIOL:5654 lecture material. Same as NSCI:5659, PSY:5206.

BIOL:6188 Seminar: Writing in Natural Sciences 2 s.h.
Writing and critiquing skills in the natural sciences.
BIOL:6199 Research: Biology
arr.
BIOL:6265 Neuroscience Seminar 0-1 s.h.
Research presentations. Same as ACB:6265, MPB:6265, NSCI:6265, PSY:6265.

BIOL:6298 Concepts, Models, and Systems in Biology (COSMOS) Seminar
Analysis and presentation of primary research on central biological questions utilizing a full array of model and non-model organisms and analytical approaches; development of effective skills in public speaking, presentation, and scientific writing.

## BIOL:6899 Independent Study in Biology arr.

BIOL:7270 Principles of Scholarly Integrity
Training in responsible conduct of research; student/mentor responsibilities; authorship and reviewing; plagiarism/falsification/ fabrication of data; intellectual property; conflict of interest; fiscal, institutional, societal; treatment of human and animal subjects; data handling. Requirements: enrollment in graduate psychology or biology program. Same as PSY:7270.

BIOL:7604 Principles of Scholarly Integrity 0 s.h.
Training in responsible conduct of research and scholarly activities; student/mentor responsibilities; authorship; plagiarism/falsification/ fabrication of data; intellectual property; conflict of interest; fiscal, institutional, societal; treatment of human and animal subjects; data handling. Requirements: postdoctoral standing in psychology or biology. Same as PSY:7604.

## Biology, BA

All biology majors complete a chemistry/mathematics foundation and the biology core. In addition, BA students choose courses from several breadth menus and have a wide selection of elective courses, while BS students complete physics foundation courses and choose one of four tracks.

The department acquaints undergraduate students with the nature of practicing scientists' work by offering BIOL:3994 Introduction to Research (requires a Department of Biology faculty sponsor), BIOL:4898 Communicating Research (a course supporting students involved in research), and BIOL:4999 Honors Research in Biology (requires membership in the Biology Honors Program). Students associate with one of the department's research groups in experiments, discussion of current research, the study of specialized topics, and attendance at research seminars.

Students interested in field biology, zoology, or botany may take varied courses in those subjects offered during the summer at Iowa Lakeside Laboratory [p. 2063].

## Learning Outcomes

The graduate with a bachelor's degree in biology will be able to demonstrate the following.

## Foundational Knowledge

Comprehension of fundamental principles and concepts of biology.
Graduates will be able to:

- explain fundamental biological principles within and across levels of organization, from molecules to ecosystem;
- apply foundational knowledge and conceptual frameworks to new situations;
- recognize the consequences of evolutionary history in contrasts between living organisms;
- appreciate the historical sequence and diversity of people who have contributed to the achievements of biological discovery; and
- evaluate new information reported in the news and/or in scientific publications against prior knowledge.

## New Discovery

Scientific reasoning and experimental process in biology.
Graduates will be able to:

- perform basic laboratory procedures, including correct operation of devices;
- formulate questions about biological processes based on current knowledge;
- construct a hypothesis to guide experimental inquiry;
- design experiments, identifying variables of analysis and controls for error;
- consider appropriate strategies or technologies applicable to investigate a novel problem;
- collect, organize, summarize, and interpret biological data;
- analyze and evaluate experimental results to inform a hypothesis; and
- distinguish between necessary and sufficient causes.

## Quantitative Skills

Mathematical reasoning and basic numeracy applied to biology.
Graduates will be able to:

- perform essential mathematical operations such as unit conversions, dilutions, and molarity calculations;
- apply mathematical concepts and rules of probability to make predictions;
- select and apply appropriate statistical tests to determine the significance of experimental results; and
- use mathematical and/or statistical expressions to evaluate hypotheses with experimental data.

## Information Literacy

Acquisition, analysis, and summary of published biological information.

Graduates will be able to:

- locate and evaluate the relevance and credibility of information from electronic and print sources;
- navigate and obtain relevant information from public databases;
- recognize and appropriately cite sources of information;
- identify questions addressed and methodologies used; and
- assess findings reported and conclusions drawn in published scientific articles.

## Communication Proficiency

Written and oral presentation of biological information.
Graduates will be able to:

- write concise scientific reports based on findings or literature searches;
- construct visual presentations of results or findings from the scientific literature; and
- orally present findings or results from the literature with appropriate media.

## Requirements

The Bachelor of Arts with a major in biology requires a minimum of 120 s.h., including at least $68-75$ s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].
The major for the Bachelor of Arts prepares students for graduate study in the biological sciences and is especially appropriate for those interested in careers in biological science education at all levels. It also provides suitable preparation for professional positions in industry, laboratory, field research, or for professional study in medicine and other health-related fields.

The BA program is broadly based. It introduces students to key concepts in important areas of biology and, compared to the BS program, provides more flexibility in choosing elective courses. Students working toward a Bachelor of Arts degree must complete the chemistry/math foundation; the biology core; three courses from the breadth menus; one course with a laboratory; and five or six elective courses, which may include one course in the history or philosophy of science.

Students who wish to apply transfer credit toward the biology major should consult their biology advisor.
The BA with a major in biology requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Chemistry/Mathematics Foundation Courses | 18 |
| Biology Core Courses | 19 |
| Breadth Menus | $9-11$ |

| Course with a Laboratory | $4-6$ |
| :--- | :--- |
| Electives | $18-21$ |

## Chemistry/Mathematics Foundation

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
|  <br> CHEM:1120 | Principles of Chemistry I-II | 8 |
| BMB:3110 | Biochemistry | 3 |
| One of these: |  |  |
| MATH:1460 | Calculus for the Biological Sciences | 4 |
| MATH:1850 | Calculus I | 4 |
| One of these: |  |  |
| STAT:2010 | Statistical Methods and Computing | 3 |
| STAT:3510 | Biostatistics | 3 |

## Biology Core

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| BIOL:1411- | Foundations of Biology - | 8 |
| BIOL:1412 | Diversity of Form and Function |  |
| BIOL:2512 | Fundamental Genetics | 4 |
| BIOL:2723 | Cell Biology | 3 |
| BIOL:3172 | Evolution | 4 |

## Breadth Menus

Genes and Genomes

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| BIOL:3212 | Bioinformatics for Beginners | 3 |
| BIOL:3314 | Genomics | 3 |
| BIOL:3373 | Human Population Genetics and | 3 |
| BIOL:3713 | Variation | 4 |
| BIOL:4373 | Molecular Genetics | 3 |
| BIOL:4386 | Molecular Evolution: Genes, <br> Genomes, and Organisms |  |
|  | Introduction to Scientific |  |
| Computing for Biologists | 3 |  |

| Biological Systems |  |  |
| :---: | :---: | :---: |
| Course \# | Title | Hours |
| Two of these: |  |  |
| BIOL:2254 | Endocrinology | 3 |
| BIOL:2673 | Ecology | 3 |
| BIOL:2753 | Introduction to Neurobiology | 3 |
| BIOL:3233 | Introduction to Developmental Biology | 3 |
| BIOL:3244 | Animal Behavior | 3 |
| BIOL:3253 | Neurobiology I | 4 |
| BIOL:3343 | Animal Physiology | 3 |
| BIOL:3363 | Plant Developmental Biology | 3 |
| BIOL:4333 | Genes and Development | 3 |
| May include one of these: |  |  |
| BIOL:2663 | Plant Response to the Environment | 3 |

BIOL:3663 Plant Response to the
Environment

## Course with a Laboratory

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| One of these (must not have been used as a breadth <br> menu course): |  |  |
| BIOL:2246 | Entomology Lab | 4 |
| BIOL:3245 | Animal Behavior Laboratory | 4 |
| BIOL:3626 | Cell Biology Laboratory | 4 |
| BIOL:3655 | Neurogenetics Laboratory | 4 |
| BIOL:3656 | Neurobiology Laboratory | 4 |
| BIOL:3676 | Evolution Lab | 4 |
| BIOL:3716 | Genetics and Biotechnology | 4 |
|  | Lab | 4 |
| BIOL:3736 | Developmental Biology Lab | 4 |
| BIOL:4314 | Introduction to Synthetic |  |
|  | Biology in the Lab | 6 |
| BIOL:4999 | Honors Research in Biology | 5 |
| MICR:2157- | General Microbiology - General | 4 |
| MICR:2158 | Microbiology Laboratory | $4-5$ |
| Iowa Lakeside Laboratory courses (consult advisor) |  |  |

## Electives

Students complete at least two biology elective courses (prefix BIOL) for 6 s.h. plus 12 s.h. of coursework outside the Department of Biology from the list below.

Biology courses may include courses chosen from the "Breadth Menus" list or the "Course with a Laboratory" list above that have not been used to satisfy those requirements; other 2-4 s.h. courses numbered 2000 or above offered by the Department of Biology except for BIOL:2120 Good Genes Gone Bad: Genetic Disorders of Notable Celebrities and BIOL:2211 Genes, Genomes, and the Human Condition; and approved advanced biology courses taught at Iowa Lakeside Laboratory [p. 2063] with approval from the advisor.
Students may count BIOL:3994 Introduction to Research and BIOL:4897 Teaching Internship in Biology only once toward the elective requirement.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Three to four courses from these (12 s.h.): |  |  |
| ANTH:2320 | Origins of Human Infectious Disease | 3 |
| ANTH:3307 | Modern Human Origins | 3 |
| ANTH:3325 | Human Evolutionary Genetics | 3 |
| ANTH:3328 | Molecular Genetics of Human Disease | 3 |
| ASP:3160 | Biology of Aging | 3 |
| CHEM:2210 | Organic Chemistry I | 3 |
| CHEM:2220 | Organic Chemistry II | 3 |
| CPH:2230 | Finding Patient Zero: The Exploration of Infectious Disease Transmission and Pandemic Threats | 3 |
| CPH:3230 | Human Genetics and Public Health | 3 |
| CS:1110 | Introduction to Computer Science | 3 |
| CS:2110 | Programming for Informatics | 4 |
| EES:3070 | Marine Ecosystems and Conservation | 3 |

| EES:3210 | Principles of Paleontology | 3 |
| :---: | :---: | :---: |
| EES:3220 | Evolution of the Vertebrates | 4 |
| ENVS:3095 | Field Ecology | 4 |
| ENVS:3096 | Winter Ecology | 2 |
| ENVS:3097 | Introduction to Bird Study | 2 |
| GEOG:2374 | Biogeography | 3 |
| GEOG:2950 | Environmental Conservation | 4 |
| GEOG:3210 | Health, Work, and the Environment | 3 |
| GEOG:3350 | Urban Ecology | 3 |
| GEOG:4470 | Ecological Climatology | 3 |
| GHS:2415 | Bioethics | 3 |
| GHS:3325 | Global Epidemics | 3 |
| HHP:1100 | Human Anatomy | 3 |
| HHP:1110 | Human Anatomy Laboratory | 1 |
| HHP:3115 | Anatomy for Human Physiology with Lab | 5 |
| MATH:4750 | Introduction to Mathematical Biology | 3 |
| MICR:2157 | General Microbiology | 3 |
| MICR:2158 | General Microbiology Laboratory | 2 |
| MICR:3147 | Immunology and Human Disease | 3 |
| MICR:3168 | Viruses and Human Disease | 3 |
| From the physics courses, students may choose from the following (maximum of two courses); if they select PHYS:1511, they could take PHYS:1512; if they select PHYS:1611, they could take PHYS:1612: |  |  |
| PHYS:1400 | Basic Physics | 3-4 |
| or |  |  |
| PHYS: 1511 or PHYS:1611 | College Physics I <br> Introductory Physics I | 4 |
| PHYS:1512 <br> or PHYS:1612 | College Physics II Introductory Physics II | 4 |
| Only one course from the list below may count toward the elective requirement: |  |  |
| GEOG:3110 | Geography of Health | 3 |
| GHS:3110 | Colonialism and Indigenous Health Equity | 3 |
| GHS:3500 | Global Public Health | 3 |
| HIST:3133 | Science, Technology, and Society in the Modern World | 3 |
| PHIL:3604 | Introduction to Philosophy of Science | 3 |

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Combined Programs

## BA/MAT (Science Education Subprogram)

Students interested in pursuing a graduate degree in teaching may apply to the combined Bachelor of Arts/Master of Arts in Teaching with a science education subprogram offered by the College of Liberal Arts and Sciences and the College of Education. The combined program enables students to earn a BA in biology and an MAT in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 19 s.h. of qualifying credit toward both degrees. For more information, see Science Education [p. 1418] in the Master of Arts in Teaching (College of Education) section of the catalog. Interested students should consult an advisor.

## Honors

## Honors in the Major

Students majoring in biology have the opportunity to graduate with honors in the major. The Biology Honors Program introduces students to the pursuits of practicing scientists. Honors students associate with one of the department's research groups and participate in an independent research project guided by a faculty member (the research supervisor).
Biology honors students write a thesis based on an interesting biological problem, which is usually identified by the research supervisor. The thesis should clearly document that a student has acquired the necessary experimental skills to address specific questions and test specific hypotheses related to the research problem. Throughout undergraduate residence, departmental honors students also may enroll in courses with honors sections offered by the Department of Biology and by other departments and programs.

To graduate with honors in the biology major, students must fulfill the following requirements:

- complete the requirements for a major in biology with a gradepoint average (GPA) of at least 3.33 in all coursework in the major taken at the University of Iowa (including all biology courses and cognates in chemistry, biochemistry, mathematics, and statistics) and a cumulative University of Iowa GPA of at least 3.33;
- complete 2 s.h. in either BIOL:4898 Communicating Research or a related approved course;
- complete a minimum of 6 s.h. (taken over two or more semesters) of BIOL:4999 Honors Research in Biology;
- write a brief research proposal summarizing the background and goals of their proposed honors research;
- upon completion of their research, submit an acceptable honors thesis; and
- give a brief oral presentation of their research findings to other biology honors students.

Students may apply 6 s.h. of BIOL:4999 Honors Research in Biology toward the required course with a laboratory and count the 2 s.h. earned in BIOL:4998 Honors Seminar in Biology toward the elective requirement.

Biology majors interested in graduating with honors in the major should contact the biology advisor as early as possible, preferably during their sophomore or junior year, so that they may be matched with an appropriate lab. Visit Biology Honors Program to learn more about honors study in the department.

Students who are interested in the University of Iowa Honors Program satisfy the level two requirements when they satisfy the biology honors requirements; see "University of Iowa Honors Program" below.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Students who satisfy the requirements for honors in the biology major also satisfy the experiential learning requirement of the university honors curriculum.

Membership in the UI Honors Program is not required to earn honors in the biology major.

## Career Advancement

The major in biology prepares students to enter research or service careers associated with private industry or government programs and for primary and secondary school teaching. It also prepares them to enter advanced degree programs leading to careers in higher education and to independent research in a variety of biological fields, or for practice in health professions such as medicine, dentistry, pharmacy, nursing, veterinary medicine, medical technology, and physical therapy.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.
Before the third semester begins: MATH:1460 Calculus for the Biological Sciences or MATH:1850 Calculus I, CHEM:1110 Principles of Chemistry I, CHEM:1120 Principles of Chemistry II, and BIOL:1411 Foundations of Biology.
Before the fifth semester begins: BIOL:1412 Diversity of Form and Function, STAT:2010 Statistical Methods and Computing or STAT:3510 Biostatistics, and four other courses in the major.

Before the seventh semester begins: BIOL:2512 Fundamental Genetics, BIOL:2723 Cell Biology, BIOL:3172 Evolution, five or six more courses in the major, and at least 90 s.h. earned toward the degree.
Before the eighth semester begins: two or three more courses in the major.

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b After completing BIOL:1412 Diversity of Form \& Function, students are eligible to enroll in Lakeside Laboratory summer field courses. Registration for these courses is in winter of each year.
c Enrollment in chemistry courses requires completion of a placement exam.
d Enrollment in math courses requires completion of a placement exam.
e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
f Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
g Students complete $12 \mathrm{~s} . \mathrm{h}$. of coursework outside the Department of Biology by choosing courses from an approved list
h See General Catalog for list of approved courses.
i Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Biology, BS

All biology majors complete the chemistry/mathematics foundation and the biology core. In addition, BS students complete physics foundation courses and choose one of four tracks, while BA students choose courses from several breadth menus and have a wider selection of elective courses.

The department acquaints undergraduate students with the nature of practicing scientists' work by offering BIOL:3994 Introduction to Research (requires a Department of Biology faculty sponsor), BIOL:4898 Communicating Research (a course supporting students involved in research), and BIOL:4999 Honors Research in Biology (requires membership in the Biology Honors Program). Students associate with one of the department's research groups for experiments, discuss current research, study specialized topics, and attend research seminars.

Students interested in field biology, zoology, or botany may take varied courses in those subjects offered during the summer at Iowa Lakeside Laboratory [p. 2063].

## Learning Outcomes

Graduates with a bachelor's degree in biology will be able to demonstrate the following.

## Foundational Knowledge

Comprehension of fundamental principles and concepts of biology.
Graduates will be able to:

- explain fundamental biological principles within and across levels of organization, from molecules to ecosystem;
- apply foundational knowledge and conceptual frameworks to new situations;
- recognize the consequences of evolutionary history in contrasts between living organisms;
- appreciate the historical sequence and diversity of people who have contributed to the achievements of biological discovery; and
- evaluate new information reported in the news and/or in scientific publications against prior knowledge.

## New Discovery

Scientific reasoning and experimental process in biology.
Graduates will be able to:

- perform basic laboratory procedures, including correct operation of devices;
- formulate questions about biological processes based on current knowledge;
- construct a hypothesis to guide experimental inquiry;
- design experiments, identifying variables of analysis and controls for error;
- consider appropriate strategies or technologies applicable to investigate a novel problem;
- collect, organize, summarize, and interpret biological data;
- analyze and evaluate experimental results to inform a hypothesis; and
- distinguish between necessary and sufficient causes.

## Quantitative Skills

Mathematical reasoning and basic numeracy applied to biology.
Graduates will be able to:

- perform essential mathematical operations such as unit conversions, dilutions, and molarity calculations;
- apply mathematical concepts and rules of probability to make predictions;
- select and apply appropriate statistical tests to determine the significance of experimental results; and
- use mathematical and/or statistical expressions to evaluate hypotheses with experimental data.

## Information Literacy

Acquisition, analysis, and summary of published biological information.

Graduates will be able to:

- locate and evaluate the relevance and credibility of information from electronic and print sources;
- navigate and obtain relevant information from public databases;
- recognize and appropriately cite sources of information;
- identify questions addressed and methodologies used; and
- assess findings reported and conclusions drawn in published scientific articles.

## Communication Proficiency

Written and oral presentation of biological information.

## Graduates will be able to:

- write concise scientific reports based on findings or literature searches;
- construct visual presentations of results or findings from the scientific literature; and
- orally present findings or results from the literature with appropriate media.

## Requirements

The Bachelor of Science with a major in biology requires a minimum of 120 s.h., including at least $69-78$ s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. Students who wish to apply transfer credit toward graduation with a major in biology should consult their biology advisor. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

Students must complete the chemistry/mathematics/physics foundation, the biology core, and one of four tracks. The four tracks emphasize dynamic and active areas in the biological sciences
Three of the tracks-cell and developmental biology, genetics and biotechnology, and neurobiology-emphasize distinct areas. The fourth track-integrative biology-provides highly diverse content.

The BS with a major in biology requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Chemistry/Mathematics/Physics Foundation | 29 |
| Biology Core Courses | 15 |
| Track Courses | $25-34$ |

## Chemistry/Mathematics/Physics Foundation

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| CHEM:1110 \& | Principles of Chemistry I-II | 8 |
| CHEM:1120 | Organic Chemistry I | 3 |

| One of these: |  |  |
| :---: | :---: | :---: |
| BMB:3110 | Biochemistry | 3 |
| BMB:3120 | Biochemistry and Molecular Biology I (students who take BMB:3120 also must take BMB:3130 as one of their track courses) | 3 |
| One of these sequences: |  |  |
| PHYS:1511- <br> PHYS:1512 | College Physics I-II | 8 |
| PHYS:1611PHYS:1612 | Introductory Physics I-II | 8 |
| One of these: |  |  |
| MATH:1460 | Calculus for the Biological Sciences | 4 |
| MATH:1850 | Calculus I | 4 |
| One of these: |  |  |
| STAT:2010 | Statistical Methods and Computing (preferred for evolution track) | 3 |
| STAT:3510 | Biostatistics | 3 |

## Biology Core

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | 8 |
| BIOL:1411- | Foundations of Biology - |  |
| BIOL:1412 | Diversity of Form and Function |  |
| BIOL:2512 | Fundamental Genetics | 4 |
| BIOL:2723 | Cell Biology | 3 |

## Tracks

Bachelor of Science students must select a single track. Each track includes at least eight courses. The experiential elective requirement may be satisfied by taking an appropriate investigative lab for the track, or through several other options. Students who use BIOL:4999 Honors Research in Biology or BIOL:3994 Introduction to Research must complete a minimum of 6 s.h. in those courses. Students who use BIOL:4897 Teaching Internship in Biology must complete a minimum of 4 s.h. in that course.

Additionally, students may satisfy the experiential elective requirement by completing at least 4 s.h. in two different courses from a combination of these courses: BIOL:3994 Introduction to Research, BIOL:4898 Communicating Research, BIOL:4897 Teaching Internship in Biology, BIOL:4999 Honors Research in Biology, LATH:3001 Latham Fellows: Science Outreach Project, and an approved biology-related internship.

- Genetics and Biotechnology Track [p. 179]
- Integrative Biology Track [p. 179]
- Neurobiology Track [p. 180]

## Cell and Developmental Biology Track

The cell and developmental biology track provides education in the structure and function of cells and in the principles of development as they apply to animals and plants. This track is appropriate for students who wish to pursue graduate study in cellular and developmental biology, to prepare for professional study in medicine and other health-related fields, or to take positions in laboratories and companies engaged in cancer research and related fields.

Cell and Developmental Biology Track Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Two of these: |  |  |
| BIOL:3172 | Evolution | 4 |
| BIOL:3233 | Introduction to Developmental Biology | 3 |
| BIOL:3363 | Plant Developmental Biology | 3 |
| One of these: |  |  |
| BIOL:3626 | Cell Biology Laboratory | 4 |
| BIOL:3736 | Developmental Biology Lab | 4 |
| One of these: |  |  |
| BIOL:3212 | Bioinformatics for Beginners | 3 |
| BMB:3130 | Biochemistry and Molecular Biology II (students who take BMB:3120 as a chemistry/ mathematics/physics foundation course must take this course) | 3 |
| CHEM:2220 | Organic Chemistry II | 3 |
| MICR:2157- <br> MICR:2158 | General Microbiology - General Microbiology Laboratory | 5 |

Cell and Developmental Biology Track Experiential Elective

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| One of these 11 options: |  |  |
| BIOL:3245 | Animal Behavior Laboratory | 4 |
| BIOL:3626 | Cell Biology Laboratory (if not taken as a track course) | 4 |
| BIOL:3655 | Neurogenetics Laboratory | 4 |
| BIOL:3656 | Neurobiology Laboratory | 4 |
| BIOL:3676 | Evolution Lab | 4 |
| BIOL:3716 | Genetics and Biotechnology Lab | 4 |
| BIOL:3736 | Developmental Biology Lab (if not taken as a track course) | 4 |
| BIOL:3994 | Introduction to Research (taken twice for 3 s.h. each or three times for 2 s.h. each) | 6 |
| BIOL:4314 | Introduction to Synthetic Biology in the Lab | 4 |
| BIOL:4897 | Teaching Internship in Biology (taken twice for 2 s.h. each) | 4 |
| BIOL:4999 | Honors Research in Biology | 6 |
| or |  |  |
| A combination of at least two different courses for a total of $4 \mathrm{~s} . \mathrm{h}$. from these: |  |  |
| BIOL:3994 | Introduction to Research | 1-3 |
| BIOL:4897 | Teaching Internship in Biology | 1-3 |
| BIOL:4898 | Communicating Research | 2 |
| BIOL:4999 | Honors Research in Biology | arr. |
| LATH:3001 | Latham Fellows: Science Outreach Project | 2 |
| An approved biology-related internship |  |  |
| Cell and Developmental Biology Track Electives |  |  |
| Course \# | Title | Hours |
| At least three of these, with a minimum of one course numbered 3000 or above: |  |  |
| BIOL:2254 | Endocrinology | 3 |

## An approved biology-related internship

## Cell and Developmental Biology Track Electives

At least three of these, with a minimum of one course

| BIOL:3172 | Evolution (if not taken as a track course) | 4 |
| :---: | :---: | :---: |
| BIOL:3233 | Introduction to Developmental Biology (if not taken as a track course) | 3 |
| BIOL:3244 | Animal Behavior | 3 |
| BIOL:3253 | Neurobiology I | 4 |
| BIOL:3254 | Neurobiology II | 4 |
| BIOL:3314 | Genomics | 3 |
| BIOL:3343 | Animal Physiology | 3 |
| BIOL:3363 | Plant Developmental Biology (if not taken as a track course) | 3 |
| BIOL:3713 | Molecular Genetics | 4 |
| BIOL:4333 | Genes and Development | 3 |
| May include one of these: |  |  |
| BIOL:2663 | Plant Response to the Environment | 3 |
| BIOL:3663 | Plant Response to the Environment | 3 |

## Genetics and Biotechnology Track

The genetics and biotechnology track provides education in the key principles of transmission, maintenance, regulation, and manipulation of genes. This track is appropriate for students who wish to pursue graduate study in fields related to genetics or to enter the modern biotechnology industry. It also provides excellent preparation for professional study in medicine and other health-related fields.

## Genetics and Biotechnology Track Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Evolution | 4 |
| BIOL:3172 | Genomics | 3 |

| BIOL:3373 | Human Population Genetics and Variation | 3 |
| BIOL:4333 | Genes and Development | 3 |
| BIOL:4373 | Molecular Evolution: Genes, Genomes, and Organisms | 3 |
| BIOL:4386 | Introduction to Scientific Computing for Biologists | 3 |
| May include one of these: |  |  |
| BIOL:2663 | Plant Response to the Environment | 3 |
| BIOL:3663 | Plant Response to the Environment | 3 |

## Integrative Biology Track

The integrative biology track offers a diverse, well-balanced introduction to the major fields of biology. This track prepares students for graduate study in the biological sciences, in science education, and for work in laboratories that engage in research and applications in many fields of biology. It also provides broadly based preparation for professional study in medicine and other health-related fields.

## Integrative Biology Track Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Ecology | 3 |
| BIOL:2673 | Evolution | 4 |
| BIOL:3172 | Bne of these: | Bioinformatics for Beginners |
| BIOL:3212 | Biochemistry and Molecular <br> Biology II (students who take <br> BMB:3120 as a chemistry/ <br> mathematics/physics foundation <br> course must take this course) | 3 |
|  | corse | 3 |

| CHEM:2220 | Organic Chemistry II | 3 |
| :--- | :--- | :--- |
| MICR:2157- | General Microbiology - General | 5 |
| MICR:2158 | Microbiology Laboratory |  |

Integrative Biology Track Breadth Menus
Genes and Genomes

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| BIOL:3314 | Genomics | 3 |
| BIOL:3373 | Human Population Genetics and <br> Variation | 3 |
| BIOL:3713 | Molecular Genetics | 4 |
| BIOL:4333 | Genes and Development | 3 |
| BIOL:4373 | Molecular Evolution: Genes, <br> Genomes, and Organisms | 3 |
| BIOL:4386 | Introduction to Scientific <br> Computing for Biologists | 3 |

## Biological Systems

| Course \# | Title | Hours |

| BIOL:3343 | Animal Physiology | 3 |

May include one of these:

| BIOL:2663 | Plant Response to the | 3 |
| :--- | :--- | ---: |
| Environment |  |  |

## Investigative Lab

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| BIOL:2246 | Entomology Lab | 4 |
| BIOL:3245 | Animal Behavior Laboratory | 4 |
| BIOL:3626 | Cell Biology Laboratory | 4 |
| BIOL:3655 | Neurogenetics Laboratory | 4 |
| BIOL:3656 | Neurobiology Laboratory | 4 |
| BIOL:3676 | Evolution Lab | 4 |
| BIOL:3716 | Genetics and Biotechnology | 4 |
| BIOL:3736 | Lab |  |

## Integrative Biology Track Experiential Elective

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these 12 options: | 4 |  |
| BIOL:2246 | Entomology Lab (if not used for <br> investigative lab course) | 4 |
| BIOL:3245 | Animal Behavior Laboratory (if <br> not used for investigative lab <br> course) | 4 |

| BIOL:3655 | Neurogenetics Laboratory (if not used for investigative lab course) | 4 |
| :---: | :---: | :---: |
| BIOL:3656 | Neurobiology Laboratory (if not used for investigative lab course) | 4 |
| BIOL:3676 | Evolution Lab (if not used for investigative lab course) | 4 |
| BIOL:3716 | Genetics and Biotechnology Lab (if not used for investigative lab course) | 4 |
| BIOL:3736 | Developmental Biology Lab (if not used for investigative lab course) | 4 |
| BIOL:3994 | Introduction to Research (taken twice for $3 \mathrm{~s} . \mathrm{h}$. each or three times for 2 s.h. each) | 6 |
| BIOL:4897 | Teaching Internship in Biology (taken twice for 2 s.h. each) | 4 |
| BIOL:4999 | Honors Research in Biology | 6 |
| An approved Iowa Lakeside Laboratory course |  | 4 |
| or |  |  |
| A combination of at least two different courses for a total of 4 s.h. from these: |  |  |
| BIOL:3994 | Introduction to Research | 1-3 |
| BIOL:4897 | Teaching Internship in Biology | 1-3 |
| BIOL:4898 | Communicating Research | 2 |
| BIOL:4999 | Honors Research in Biology | r. |
| LATH:3001 | Latham Fellows: Science Outreach Project | 2 |
| An approved biology-related internship |  |  |
| Neurobiology Track |  |  |
| The neurobiology track provides education in nervous system function at all levels, from molecular to systems biology. This track is appropriate for students who wish to pursue graduate study in neurobiology and related areas, including psychology and the social sciences; to enter laboratories that study the therapeutic basis of neurological disorders; or to work in pharmaceutical companies. It also provides good preparation for professional study in medicine and other health-related fields. |  |  |

## Neurobiology Track Courses

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| One of these: |  |  |
| BIOL:2753 Introduction to Neurobiology <br> PSY:2701 Introduction to Behavioral <br> Neuroscience <br> Both of these: Neurobiology I |  |  |

| LATH:3001 | Latham Fellows: Science Outreach Project | 2 |

An approved biology-related internship

## Neurobiology Electives

Course \# Title Hours

At least two of these, with a minimum of one course numbered 3000 or above:
BIOL:2254 Endocrinology 3
BIOL:3172 Evolution 4
BIOL:3233
Introduction to Developmental 3 Biology
BIOL:3244 Animal Behavior 3
BIOL:3343 Animal Physiology 3
BIOL:4333 Genes and Development 3
BIOL:4386 Introduction to Scientific 3

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.
complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Combined Programs

## BS/MAT (Science Education Subprogram)

Students interested in pursuing a graduate degree in teaching may apply to the combined Bachelor of Science/Master of Arts in Teaching with a science education subprogram offered by the College of Liberal Arts and Sciences and the College of Education. The combined program enables students to earn a BS in biology and an MAT in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting qualifying credit toward both degrees. For more information, see Science Education [p. 1418] in the Master of Arts in Teaching (College of Education) section of the catalog. Interested students should consult an advisor.

## Honors

## Honors in the Major

Students majoring in biology have the opportunity to graduate with honors in the major. The Biology Honors Program introduces students to the pursuits of practicing scientists. Honors students associate with one of the department's research groups and participate in an independent research project guided by a faculty member (the research supervisor).

Biology honors students write a thesis based on an interesting biological problem, which is usually identified by the research supervisor. The thesis should clearly document that the student has acquired the necessary experimental skills to address specific questions and test specific hypotheses related to the research problem. Throughout undergraduate residence, departmental honors students also may enroll in courses with honors sections offered by the Department of Biology and by other departments and programs.
To graduate with honors in the biology major, students must fulfill the following requirements:

- complete the requirements for a major in biology with a gradepoint average (GPA) of at least 3.33 in all coursework in the major taken at the University of Iowa (including all biology courses and cognates in chemistry, physics, biochemistry, mathematics, and statistics) and a cumulative University of Iowa GPA of at least 3.33;
- complete 2 s.h. in BIOL:4898 Communicating Research or a related approved course;
- complete a minimum of 6 s.h. (taken over two or more semesters) of BIOL:4999 Honors Research in Biology;
- write a brief research proposal summarizing the background and goals of their proposed honors research;
- upon completion of their research, submit an acceptable honors thesis; and
- give a brief oral presentation of their research findings to other biology honors students.
Students pursuing a BS in biology may apply 6 s.h. of BIOL:4999 toward the experiential elective requirement in an appropriate track.

Biology majors interested in graduating with honors in the major should contact the biology advisor as early as possible, preferably during their sophomore or junior year, so that they may be matched with an appropriate lab. Visit Biology Honors Program to learn more about honors study in the department.

Students who are interested in the University of Iowa Honors Program satisfy the level two requirements when they satisfy the biology honors requirements; see "University of Iowa Honors Program" below.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Students who satisfy the requirements for honors in the biology major also satisfy the experiential learning requirement of the university honors curriculum.

Membership in the UI Honors Program is not required to earn honors in the biology major.

## Career Advancement

The major in biology prepares students to enter research or service careers associated with private industry or government programs and for primary and secondary school teaching. It also prepares them to enter advanced degree programs leading to careers in higher education and to independent research in a variety of biological fields, or for practice in health professions such as medicine, dentistry, pharmacy, nursing, veterinary medicine, medical technology, and physical therapy.
The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the third semester begins: MATH: 1460 Calculus for the Biological Sciences or MATH:1850 Calculus I, CHEM:1110 Principles of Chemistry I, CHEM:1120 Principles of Chemistry II, and BIOL:1411 Foundations of Biology.
Before the fifth semester begins: BIOL:1412 Diversity of Form and Function, CHEM:2210 Organic Chemistry I, STAT:2010 Statistical Methods and Computing or STAT:3510 Biostatistics, and two other courses in the major.
Before the seventh semester begins: BIOL:2512 Fundamental Genetics; PHYS:1511 College Physics I and PHYS:1512 College Physics II, or equivalents; six or seven more courses in the major; and at least 90 s.h. earned toward the degree.
Before the eighth semester begins: two or three more courses in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Enrollment in chemistry courses requires completion of a placement exam.
c Enrollment in math courses requires completion of a placement exam.
d GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
e Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
f Students who take BMB:3120 also must take BMB:3130 as one of their track courses.
g See General Catalog for list of approved courses. Students who took BMB:3120 must take BMB:3130.
h At least one elective in the major must be numbered 3000 or above.
i Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
j See General Catalog for list of approved options; some may require more than one semester.
k Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Biology, Minor

## Requirements

The undergraduate minor in biology requires a minimum of 15 s.h. in biology coursework, including 12 s.h. in courses numbered 2000 or above offered by the Department of Biology at the University of Iowa or in approved Iowa Lakeside Laboratory [p. 2063] courses. Students must maintain a cumulative grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass. Students may not use transfer coursework to count as courses numbered 2000 or above.

Either BIOL:2512 Fundamental Genetics or BIOL:2211 Genes, Genomes, and the Human Condition will count toward the minor, but not both. BIOL:2120 Good Genes Gone Bad: Genetic Disorders of Notable Celebrities and BIOL:4995 Honors Research in Neuroscience do not count toward the minor.

Students may count BIOL:3994 Introduction to Research (maximum of 3 s.h.) and BIOL:4897 Teaching Internship in Biology (maximum of 3 s.h.) only once toward the minor requirement.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

| Course Title | Hours |
| :---: | :---: |
| First Year |  |

a Chemistry does not count toward the biology minor, but CHEM:1110 is a prerequisite to the first biology course and is required for most other biology courses. CHEM: 1120 will be required for some but not all upper-level biology courses.
b Enrollment in chemistry courses requires completion of a placement exam.
c BIOL:1411 and BIOL:1412 are both required before taking upperlevel biology courses.
d Any biology course numbered 2000 or above except BIOL:2120 and BIOL:4995. Either BIOL:2512 or BIOL:2211 will count toward the minor, but not both. Students may count BIOL:3994 (maximum of 3 s.h.) and BIOL:4897 (maximum of 3 s.h.) only once toward the minor. Lakeside Laboratory courses can be approved for the minor.

## Integrated Biology, MS

The Department of Biology's graduate programs in integrated biology (iBio) emphasize original research and developing the skills essential for publishing and communicating research findings to the scientific community. Research programs in the department cover many areas of the biological sciences: cell biology, developmental biology, ecology, evolution, genetics, and neurobiology. Graduate study in the department provides students with a broad understanding of these basic areas.

Newly admitted graduate students are assigned a temporary advisor and together they discuss the student's educational background to formulate a first-semester study plan before registration. The programs allow each student to tailor coursework to their own research interests. Students may be advised to take specific coursework in order to enhance their background in certain areas.

During the first year, students whose preparation in chemistry, genetics, mathematics, or physics is insufficient may need to remedy deficiencies by taking appropriate coursework.

Entering students typically will have taken the following courses: organic chemistry, biochemistry, calculus or physics, and 20 s.h. of coursework in biology including a fundamental genetics course.
Students with bachelor's degrees outside the biological sciences may request modification of certain area requirements. The Graduate Affairs Committee decides whether portions of the requirements may be waived.

## Learning Outcomes

Graduates will:

- master the skill of reading, understanding, and summarizing primary literature across a variety of biology subdisciplines, demonstrating effective scholarly communication in the process;
- explain in writing the experimental rationale, articulate the central hypothesis, and outline the major investigative steps that will be undertaken in a student's primary area of research;
- orally communicate established scientific concepts as well as ongoing research hypotheses, experimental design, and results to a wide array of audiences using established scientific communication norms;
- master in-depth pedagogical concepts through advanced lecture courses and engage in a vertically integrated critical analysis of a single topic over many levels of basic biology;
- learn and implement field-specific experimental processes, techniques, and data analyses in a responsible manner consistent with current bioethical protocols; and
- establish networking connections within the scientific profession, from peers to established, independent researchers.

## Requirements

The Master of Science program in integrated biology requires 30 s.h. of graduate credit with thesis or 34 s.h. of graduate credit without thesis. Students must maintain a cumulative grade-point average of at least 3.00 . Entering students are typically admitted only to the thesis program; however, students who decide not to continue their studies may opt for the nonthesis program.
Students must enroll in at least two advanced lecture courses (or courses approved by the Graduate Affairs Committee). In the first year, students enroll in BIOL:5512 Readings in Genetics in the fall semester and BIOL:6298 Concepts, Models, and Systems in Biology (COSMOS) Seminar in the fall and spring semesters. In subsequent years, students continue to enroll in BIOL:6298 for 1 or 2 s.h.

At the end of the first year, students take a qualifying exam that consists of essay questions based on major themes in biology. Students must perform satisfactorily on this exam in order to continue in the program. In the second year, students take one seminar course ( 2 s.h.) with significant writing and oral presentation components, as well as BIOL:6188 Seminar: Writing in Natural Sciences in the fall and spring semesters.
Thesis students may count a maximum of 9 s.h. of research credit toward the 30 s.h. required for the master's degree with thesis. Remaining coursework is tailored to a student's background and career goals and is selected in consultation with the student's advisory committee. The thesis is based on original research. After the thesis is accepted by the student's supervisor and advisory committee, the student must pass an oral examination based on the thesis research and on related subjects. Nonthesis students must write a library research report for a maximum of $4 \mathrm{~s} . \mathrm{h}$. of credit. They may apply up to 8 s .h. of research credit toward the 34 s.h. required for the master's degree without thesis.

Visit the iBio Graduate Program website for more detailed information about the Master of Science program.

## Admission

Individuals who wish to pursue graduate study in integrated biology may apply to the Master of Science with thesis program. The MS without thesis is an exit program and does not admit entering graduate students.

Application materials for the graduate program must be uploaded to the university's Office of Admissions website. These are reviewed by the Department of Biology Graduate Recruitment and Admissions Committee. For detailed instructions, visit iBio Application on the integrated biology graduate program website.
Applicants must hold a valid BA or BS from an accredited institution. They must supply official transcripts from each undergraduate and graduate institution they have attended. The Graduate Record Examination (GRE) General Test is not required for admission, but if students wish to have their results considered they must include their verbal, quantitative, and analytical writing scores.

Applicants whose first language is not English must score at least 90 (internet-based) on the Test of English as a Foreign Language (TOEFL) or other English proficiency exams approved by the Graduate College; see English Proficiency Requirements on the graduate admissions website. Applicants should have their scores sent to the Office of Admissions. International applicants who received their degrees (either bachelor's or master's) from a U.S. institution are exempt from this requirement. All international students whose first language is not English are required to take the on-campus English Proficiency Evaluation before they first enroll in classes.
Successful applicants for graduate admission typically have a gradepoint average of at least 3.00 (on a 4.00 scale). The admissions committee also considers letters of recommendation, the personal statement, and other appropriate criteria, especially prior research experience.

Although most applicants will have completed undergraduate programs in biology, the department also considers applicants with backgrounds in related sciences, providing they have taken the required coursework.
Students applying for admission to the MS with thesis program should have a bachelor's degree in one of the biological sciences. Students with bachelor's degrees in other areas may need to register as nondegree students and complete the equivalent of the department's bachelor's degree program prior to consideration for admission. Nondegree students must complete chemistry, physics, and calculus requirements in addition to the biology courses listed
in the undergraduate program. Nondegree students should consult the department's graduate program administrator before applying for admission.

Applications are reviewed on a rolling basis prior to Jan. 1; visit the iBio Graduate Program website for updated deadline information.

Applicants must meet the minimum admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

Students generally are supported by available research or teaching assistantships. Offers of admission include information about offers of financial support.

## Career Advancement

The graduate program in integrated biology prepares students for careers in academic research, science education, industry, government, and a variety of other careers in which their scientific expertise can be used.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Integrated Biology, PhD

The Department of Biology's graduate programs in integrated biology (iBio) emphasize original research and developing the skills essential for publishing and communicating research findings to the scientific community. Research programs in the department cover many areas of the biological sciences: cell biology, developmental biology, ecology, evolution, genetics, and neurobiology. Graduate study in the department provides students with a broad understanding of these basic areas.

Newly admitted graduate students are assigned a temporary advisor and together they discuss the student's educational background to formulate a first-semester study plan before registration. The programs allow each student to tailor coursework to their own research interests. Students may be advised to take specific coursework in order to enhance their background in certain areas.

During the first year, students whose preparation in chemistry, genetics, mathematics, or physics is insufficient may need to remedy deficiencies by taking appropriate coursework.

Entering students typically will have taken the following courses: two semesters of organic chemistry, or one semester of organic chemistry and one semester of biochemistry; one semester of calculus; two semesters of college physics; and 20 s.h. of coursework in biology, including genetics.

Students with bachelor's degree outside the biological sciences may request modification of certain area requirements. The Graduate Affairs Committee decides whether portions of the requirements may be waived.

## Learning Outcomes

Graduates will:

- master the skill of reading, understanding, and summarizing primary literature across a variety of biology subdisciplines, demonstrating effective scholarly communication in the process;
- explain in writing the experimental rationale, articulate the central hypothesis, and outline the major investigative steps that will be undertaken in a student's primary area of research;
- orally communicate established scientific concepts as well as ongoing research hypotheses, experimental design, and results to a wide array of audiences using established scientific communication norms;
- master in-depth pedagogical concepts through advanced lecture courses and engage in a vertically integrated critical analysis of a single topic over many levels of basic biology;
- learn and implement field-specific experimental processes, techniques, and data analyses in a responsible manner consistent with current bioethical protocols;
- establish networking connections within the scientific profession, from peers to established, independent researchers; and
- become a research subproject leader (evidenced by publication/ meeting presentation/grant submittal) within the context of a research group.

## Requirements

The Doctor of Philosophy program in integrated biology requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00.
New PhD students go through three laboratory rotations with different faculty during their first semester (August-December). Students consult with their temporary advisor and prospective faculty research sponsors before identifying their preferences for research rotations.

Based on their rotations, they choose a laboratory affiliation for their thesis late in the first semester.

During the first year, students are required to enroll in BIOL:5512 Readings in Genetics in the fall semester and BIOL:6298 Concepts, Models, and Systems in Biology (COSMOS) Seminar in the fall and spring semesters. The course, BIOL:6298, introduces them to multiple levels of biological analysis and provides them with significant opportunities to hone their skills in written and oral communication. At the end of the first year, students take a qualifying exam that consists of essay questions based on major themes in biology. Students must perform satisfactorily on this exam in order to continue in the program.
During the first two years, students must enroll in at least two advanced lecture courses (or courses approved by the Graduate Affairs Committee)-one elective and one approved data informatics or statistics course.

Prior to the comprehensive examination, students also take BIOL:6188 Seminar: Writing in Natural Sciences and a seminar course with significant writing and oral presentation components.

The comprehensive examination is taken in the summer of the second year in residence. Students prepare a National Institutes of Health/National Science Foundation-style grant application on their planned thesis work and orally defend this work in front of a review committee. They must demonstrate knowledge of biology fundamentals and the analytic and synthetic skills necessary to become creative, independent scientists. Once they complete the coursework and proficiency requirements and pass the comprehensive examination, students may be admitted to full candidacy for the PhD .
Following the comprehensive examination, students must take at least two additional seminar courses ( $2 \mathrm{~s} . \mathrm{h}$. each). Seminar courses from other departments may be approved by the Graduate Affairs Committee in consultation with the faculty advisor to satisfy the requirement.

Students must serve as teaching assistants for at least two semesters in order to develop and demonstrate teaching proficiency. The first teaching semester takes place during the spring of a student's first year and is preceded by extensive departmental training in effective teaching skills.

The department also offers career seminars that explore types of employment outside of academic research, including teaching careers and other topics.
The program culminates in students' preparation of a dissertation based on original independent research. Students must pass a final examination that covers the thesis and its specialized field before the PhD is awarded.

Visit the iBio Graduate Program website for more detailed information about the PhD program.

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in integrated biology in a combined degree program offered by the Carver College of Medicine and the Graduate College. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Admission

Application materials for the graduate program must be uploaded to the university's Office of Admissions website. These are reviewed by
the Department of Biology Graduate Recruitment and Admissions Committee. For detailed instructions, visit iBio Application on the integrated biology graduate program website.
Applicants must hold a valid BA or BS from an accredited institution. They should supply official transcripts from each undergraduate and graduate institution they have attended. The Graduate Record Examination (GRE) General Test is not required for admission, but if students wish to have their results considered they must include their verbal, quantitative, and analytical writing scores.
Applicants whose first language is not English must score at least 90 (internet-based test) on the Test of English as a Foreign Language (TOEFL) or other English proficiency exam approved by the Graduate College; see English Proficiency Requirements on the graduate admissions website. Applicants should have their scores sent to the Office of Admissions. International applicants who received their degrees (either bachelor's or master's) from a U.S. institution are exempt from this requirement. All international students whose first language is not English are required to take the on-campus English Proficiency Evaluation before they first enroll for classes or serve as a teaching assistant.

Successful applicants for graduate admission typically have a gradepoint average of at least 3.00 (on a 4.00 scale). The admissions committee also considers letters of recommendation, the personal statement, and other appropriate criteria, especially prior research experience.

Although most applicants will have completed undergraduate programs in biology, the department also considers applicants with backgrounds in related sciences, providing they have taken the required coursework. Students with bachelor's degrees in other areas may need to register as nondegree students and complete the equivalent of the department's bachelor's degree program prior to consideration for admission. Nondegree students may be asked to complete chemistry, physics, and calculus in addition to the biology courses listed in the undergraduate program. Nondegree students should consult the department's graduate program administrator before applying.
Review of applications typically begins by Dec. 1; visit the iBio Graduate Program website for updated application information and instructions. Applications are reviewed on a rolling basis until available slots for the interview weekend (typically held in late February) are filled.

Applicants must meet the minimum admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

All graduate students making satisfactory progress toward the PhD receive stipend and tuition support from non-University of Iowa fellowships and from teaching assistantships or research assistantships available through individual research grants administered by faculty members or by the university. First-year PhD students are supported by department fellowships during the research rotation period and by teaching assistantships during the spring semester. Offers of admission include information about offers of financial support.

## Career Advancement

The graduate program in integrated biology prepares students for careers in academic research, science education, industry, government, and a variety of other careers in which their scientific expertise can be used.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Biomedical Sciences

Chair, Department of Biology

- Jodie M. Plumert

Director, Biomedical Sciences

- Jan S. Fassler (Biology)

Undergraduate major: biomedical sciences (BS)
Website: https://biology.uiowa.edu/
Biomedical sciences is an interdisciplinary major designed for students who plan to attend medical school or conduct biomedical research in graduate school and beyond. The curriculum stretches broadly across scientific and mathematical fields. The major is selective, with a limited number of students admitted, and the curriculum is challenging, requiring dedication by its students, who are mentored by faculty members from the participating disciplines.

The departments of Biology and Chemistry (College of Liberal Arts and Sciences), and the departments of Biochemistry and Molecular Biology, and Microbiology and Immunology (Carver College of Medicine), collaborate to offer the major in biomedical sciences; the major is administered by the Department of Biology [p. 167].

## Programs

## Undergraduate Program of Study

## Major

- Major in Biomedical Sciences (Bachelor of Science) [p. 194]

## Biomedical Sciences, BS

## Learning Outcomes

Graduates of the biomedical sciences program will achieve the following.

## Foundational Knowledge

Comprehension of fundamental principles and concepts in the natural and social sciences.

Graduates will be able to:

- integrate across the natural and social sciences;
- apply foundational knowledge and conceptual frameworks to biomedicine;
- recognize the consequences of evolutionary history in the understanding of human biology and disease; and
- evaluate new information reported in the news and/or in scientific publications against prior knowledge.

## New Discovery

Scientific reasoning and experimental process in biomedicine.
Graduates will be able to:

- perform basic laboratory procedures, including correct operation of devices;
- formulate questions about natural processes based on current knowledge;
- construct a hypothesis to guide experimental inquiry;
- design experiments, identifying variables of analysis and controls for error;
- consider appropriate strategies or technologies applicable to investigate a novel problem;
- collect, organize, summarize, and interpret data;
- analyze and evaluate experimental results to inform a hypothesis; and
- distinguish between necessary and sufficient causes.

## Quantitative Skills

Mathematical reasoning and basic numeracy applied to biomedicine.
Graduates will be able to:

- perform essential mathematical operations such as unit conversions, dilutions, and molarity calculations;
- apply mathematical concepts and rules of probability to make predictions;
- select and apply appropriate statistical tests to determine the significance of experimental results; and
- use mathematical and/or statistical expressions to evaluate hypotheses with experimental data.

## Information Literacy

Acquisition, analysis, and summary of published biomedical information.
Graduates will be able to:

- locate and evaluate the relevance and credibility of information from electronic and print sources;
- navigate and obtain relevant information from public databases;
- recognize and appropriately cite sources of information;
- identify questions addressed and methodologies used; and
- assess findings reported and conclusions drawn in published scientific articles.

## Communication Proficiency

Written and oral presentation of biomedical information.
Graduates will be able to:

- write concise scientific reports based on findings or literature searches;
- construct visual presentations of results or findings from the scientific literature; and
- present findings or results from the literature orally with appropriate media.

## Requirements

The Bachelor of Science with a major in biomedical sciences requires a minimum of 120 s.h., including at least $80-84$ s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

The interdisciplinary major provides an excellent foundation for medical training and for research and/or practice in the chemical, genetic, cellular, and physiological bases of human disease. The curriculum includes required and elective coursework in biochemistry and molecular biology, biology, chemistry, health and human physiology, mathematics, microbiology and immunology, physics, psychology, sociology, and statistics. Students who wish to apply transfer credit toward the major should consult their departmental advisor.
The BS with a major in biomedical sciences requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Required Courses | $65-67$ |
| Elective Courses | $15-17$ |

## Required Courses

Students complete the following coursework (65-67 s.h.).

## Chemistry

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Biochemistry and Molecular | 3 |
| BMB:3120 | Biology I <br> Biochemistry and Molecular <br> BMB:3130 | 3 |
| Biology II |  |  |

## Life Sciences

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| BIOL:1411 | Foundations of Biology | 4 |
| BIOL:3373 | Human Population Genetics and | 3 |
|  | Variation |  |
| HHP:3500 | Human Physiology | 3 |

| MICR:2157- | General Microbiology - General <br> MICR:2158 |
| :--- | :--- |
| Microbiology Laboratory (both <br> courses should be taken in the <br> same semester) |  |

One of these:
BIOL:2211
Genes, Genomes, and the
Human Condition

BIOL:2512
Mathematics

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: | Calculus for the Biological | 4 |
| MATH:1460 | Sciences |  |
| MATH:1550 | Engineering Mathematics I: <br> Single Variable Calculus | 4 |
| MATH:1850 | Calculus I | 4 |
| Statistics | Title | Hours |
| Course \# | Biostatistics |  |
| This course: STAT:3510 |  | 3 |

## Physics

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these sequences: |  |  |
| PHYS:1511- | College Physics I-II | 8 |
| PHYS:1512 |  | 8 |
| PHYS:1611- | Introductory Physics I-II | 8 |
| PHYS:1612 |  |  |

## Social Sciences

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Elementary Psychology |  |
| PSY:1001 | Introduction to Sociology | 3 |
| SOC:1010 | Social and Psychological <br> Determinants of Health: <br> Che of these: <br> CPH:1800 | Health |
| PSY:2130 | Advanced Psychology for Pre- <br> Medical Track <br> Abnormal Psychology: Health | 3 |
| PSY:2930 | Professions | 3 |
|  |  | 3 |

## Elective Courses

Students complete a total of 15-17 s.h. of elective coursework chosen from the following lists.

## Lecture Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: |  |  |
| BIOL:2254 | Endocrinology | 3 |
| BIOL:2723 | Cell Biology | 3 |
| BIOL:3212 | Bioinformatics for Beginners | 3 |
| BIOL:3233 | Introduction to Developmental | 3 |
|  | Biology |  |
| BIOL:3244 | Animal Behavior | 3 |
| BIOL:3314 | Genomics | 3 |

| BIOL:3343 | Animal Physiology | 3 |
| :--- | :--- | :--- |
| MICR:3147 | Immunology and Human | 3 |
|  | Disease | 3 |
| MICR:3159 | Bacteria and Human Disease | 3 |

May include one of these:

| BIOL:2753 | Introduction to Neurobiology | 3 |
| :--- | :--- | :--- |
| PSY:2701 | Introduction to Behavioral | 4 |
|  | Neuroscience |  |

## Investigative Lab

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| BIOL:3626 | Cell Biology Laboratory | 4 |
| BIOL:3245 | Animal Behavior Laboratory | 4 |
| BIOL:3656 | Neurobiology Laboratory | 4 |
| BIOL:3676 | Evolution Lab | 4 |
| BIOL:3716 | Genetics and Biotechnology | 4 |
| BIOL:3736 | Lab |  |
| MICR:3165 | Developmental Biology Lab | 4 |
|  | Genetics of Bacterial Pathogens | 3 |

## Experiential Learning

The objective of this requirement is to enrich the curriculum through efforts on a research project or other academic experience where a student pursues activities in the biomedical sciences.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Communicating Research | 2 |
| BIOL:4898 Introduction to Research (taken <br> BIOL:3994 following:  | 4 |  |
| BIOL:4999 | Honors Research in Biology <br> (taken twice for 2 s.h. each) | 4 |
| An approved research course equivalent, such as | 4 |  |
| HONR:4990. | $0-4$ |  |
| Internships, paid hourly research work, or similar <br> experiences conducted over at least two semesters |  |  |

${ }^{1}$ These activities may be used to satisfy the experiential learning requirement. They also may be used to fulfill the experiential learning requirement for the University of Iowa Honors Program. Students should discuss potential activities with academic advisors and, if necessary, obtain approval from the program director for a personalized plan to satisfy the requirement. A final summary of completed and in-progress experiential learning activities, including courses taken, fellowships received, appointments, presentations, and publications, among others, is required to evaluate completion.

## Honors

## Honors in the Major

Students majoring in biomedical sciences are encouraged to graduate with honors in the major.

Honors students in the major may enroll in courses with honors sections offered by the Department of Biology and by other departments and programs. They also are advised to participate in the

Office of Undergraduate Research (OUR) and to apply for research scholarships.
Students who earn honors in the major must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33, as required by the College of Liberal Arts and Sciences.

To graduate with honors, students additionally must fulfill the following requirements:

- complete the requirements for a major in biomedical sciences with a GPA of at least 3.33 in all University of Iowa coursework in the major;
- complete 2 s.h. in BIOL:4898 Communicating Research;
- complete a minimum of 6 s.h. (taken over two or more semesters) in BIOL:4999 Honors Research in Biology or equivalent research credit approved by the program director;
- write a brief research proposal summarizing the background and goals of their proposed honors research;
- upon completion of their research, submit an acceptable honors thesis; and
- give an oral presentation of their research findings.

Biomedical sciences majors interested in graduating with honors in the major should contact the biomedical sciences advisor as early as possible, preferably during their sophomore or junior year, so that they may be matched with an appropriate lab. Contact the Department of Biology to learn more about honors in the major.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the biomedical sciences major.

## Career Advancement

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the fifth semester begins: CHEM:1110 Principles of Chemistry I, CHEM:1120 Principles of Chemistry II, BIOL:1411 Foundations of Biology, PSY:1001 Elementary Psychology, SOC:1010 Introduction to Sociology, MATH:1460 Calculus for the Biological Sciences or MATH:1550 Engineering Mathematics I: Single Variable Calculus or MATH:1850 Calculus I, CHEM:2210 Organic Chemistry I, CHEM:2220 Organic Chemistry II, MICR:2157 General Microbiology, MICR:2158 General Microbiology Laboratory, PHYS:1511 College Physics I, PHYS: 1512 College Physics II, and HHP:3500 Human Physiology.
Before the seventh semester begins: BMB:3120 Biochemistry and Molecular Biology I, BMB:3130 Biochemistry and Molecular Biology II, CHEM:2410 Organic Chemistry Laboratory, BIOL:2211 Genes, Genomes, and the Human Condition or BIOL:2512 Fundamental Genetics, and STAT:3510 Biostatistics.

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Enrollment in chemistry courses requires completion of a placement exam.
c Enrollment in math courses requires completion of a placement exam.
d Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
e MICR:2157 and MICR:2158 should be taken in the same semester.
f Students complete a total of 15-17 s.h. of elective coursework from approved lists of courses; see General Catalog.
g GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
h Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Chemistry

## Chair

- Renee S. Cole

Undergraduate major: chemistry (BA, BS)
Undergraduate minor: chemistry
Graduate degrees: MS in chemistry; PhD in chemistry
Faculty: https://chem.uiowa.edu/people
Website: https://chem.uiowa.edu/
The Department of Chemistry is committed to providing its undergraduate students with the skills needed to comprehend and confront the scientific challenges of the new century. The department's strong and vibrant undergraduate chemistry program is an environment where students can develop and ultimately find success in their chosen career paths.

The graduate programs in chemistry train scholars to lead efforts in chemistry research and teaching. One of the primary goals is to train students to become independent scientists. The department offers coursework to provide the foundational knowledge that enhances student efforts in the laboratory.

## Student Organizations

A number of organizations are open to undergraduate students for support and enrichment.

Students may join the University of Iowa undergraduate student chapter of the American Chemical Society (ACS). Chapter activities include dinner meetings with guest speakers, field trips to local industries, participation in local and national meetings of the ACS, and participation in chemistry outreach programs. Students in the ACS student chapter develop valuable leadership, organization, and speaking skills during their college experience and throughout their careers.

The department has a chapter of Alpha Chi Sigma, a coed chemistry fraternity. The Alpha Theta Chapter is open to students in chemistry, biochemistry, chemical engineering, and related fields. Alpha Chi Sigma sponsors many social and professional events throughout the year.
The department endorses the National Organization for the Professional Advancement of Black Chemists and Chemical Engineers (NOBCChE), which is committed to discovery, transmittal, and application of knowledge in science and engineering and to increasing the participation of underrepresented populations in these fields. NOBCChE sponsors diverse programs designed to foster professional development and to encourage students to pursue careers in science and technical fields.

The department also supports the activities of Women in STEM Ambassadors (WiSA), whose aim is to increase women's participation and advancement as students, faculty members, and professional staff; promote a supportive study and work environment for women; integrate women's ideas, strengths, and approaches into research, teaching, and service; and inform the public of educational and career opportunities for women in scientific and technical fields. WiSA sponsors a living learning community in a university residence hall for first-year female students majoring in science or engineering, the Student-to-Student Support in Science mentoring program, a service learning program, and the WiSA Discourse and Dining series.

## Programs

# Undergraduate Programs of Study <br> Majors 

- Major in Chemistry (Bachelor of Arts) [p. 203]
- Major in Chemistry (Bachelor of Science) [p. 207]

Minor

- Minor in Chemistry [p. 211]

Graduate Programs of Study

## Majors

- Master of Science in Chemistry [p. 212]
- Doctor of Philosophy in Chemistry [p. 213]

## Facilities

The Department of Chemistry's main office, support facilities, and faculty offices are located in the Chemistry Building, as is laboratory and classroom space dedicated to teaching and research activities. Several faculty members have offices and laboratories in the Iowa Advanced Technology Laboratories across the street from the Chemistry Building. Extensive resources are readily accessible such as nuclear magnetic resonance (NMR), mass spectrometry, and X-ray analysis facilities, advanced computational resources, and complete machine, electronics, and glass shops. See the Department of Chemistry website for information about facilities and advanced instrumentation available for instruction and research.

The Chemistry Center serves all students who take chemistry courses as well as the department's instructors. The center offers assistance with registration, returns examinations and homework assignments, schedules alternative exams, and provides information about all lowerlevel chemistry courses. Information about student organizations and departmental scholarships and awards also is available at the Chemistry Center.

## Courses

## Chemistry Courses

Students planning to take more than one year of chemistry should take CHEM:1110 Principles of Chemistry I and CHEM:1120 Principles of Chemistry II.

Students who require only one year of chemistry with no laboratory component may take CHEM:1070 General Chemistry I and CHEM: 1080 General Chemistry II.
Students who have not had high school chemistry or do not have strong math and/or chemistry preparation should consider taking CHEM:1070 General Chemistry I before CHEM:1110 Principles of Chemistry I; academic advisors and the Chemistry Diagnostic Test can help students determine which of these courses to take first.
CHEM:0500 Review of Chemistry Fundamentals
0 s.h.
Self-paced course to prepare for and improve success in CHEM:1110; students acquire an appropriate mathematics background and a sound understanding of some fundamentals of chemistry; use of ALEKS to test individual chemistry knowledge and then computerized adaptive learning software to fill gaps in knowledge.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

## CHEM:1050 Chemistry of Our World <br> 3 s.h.

Nonmathematical exploration of selected areas of technology; basic science background, current technological applications, implications for society; for non-science majors. GE: Natural Sciences without Lab.

CHEM:1060 Technology and Society Laboratory 1 s.h. Laboratory for CHEM:1050; demonstrations, student experiments. GE: Natural Sciences Lab only.
CHEM:1070 General Chemistry I
Atomic structure, chemical bonds, mole relations, stoichiometry, states of matter, acids and bases, reaction rates, electrochemistry, nuclear chemistry. GE: Natural Sciences without Lab.
CHEM:1080 General Chemistry II 3 s.h.
Organic chemistry and biochemistry. GE: Natural Sciences without Lab.

CHEM:1090 Supplemental Chemistry Lab
1 s.h.
Lab techniques, elementary synthesis, measurement, analysis, casestudy lectures and experiments; safety glasses, appropriate dress, compliance with laboratory safety protocols required.

CHEM:1100 Chemistry in Industry and the Economy $\mathbf{3}$ s.h.
Atomic structure, chemical bonding, acid and bases, polymers, pharmaceutics, DNA, proteins, and basic economics. GE: Natural Sciences without Lab.

## CHEM:1110 Principles of Chemistry I

Chemical bonding and chemical reactions; atomic and molecular structure, chemical equations, stoichiometry, gases, liquids, thermodynamics of phase changes, solutions, equilibrium, acids, bases, pH , elementary organic chemistry; the solid state, including modern materials; lecture, discussion, laboratory. Prerequisites: ALEKS score of 55 or higher or MPT Level 3 score of 9 or higher or MATH:1005 with a minimum grade of C- or MATH:1010 with a minimum grade of C- or MATH: 1020 with a minimum grade of Cor MATH: 1340 with a minimum grade of C- or MATH: 1380 with a minimum grade of C- or MATH:1440 with a minimum grade of Cor MATH:1460 with a minimum grade of C- or MATH:1550 with a minimum grade of C- or MATH: 1850 with a minimum grade of C-. Recommendations: Chemistry Diagnostic Test score of 16. GE: Natural Sciences with Lab.

## CHEM:1120 Principles of Chemistry II

4 s.h.
Continuation of CHEM:1110; colligative properties of solutions, chemical thermodynamics, electrochemistry, chemical kinetics, chemical bonding, aspects of industrial chemistry, nuclear chemistry; lecture, discussion, laboratory. Prerequisites: CHEM:1110 with a minimum grade of C-. GE: Natural Sciences with Lab.
CHEM:1160 Principles of Chemistry Lab 2 s.h. Laboratory techniques. GE: Natural Sciences Lab only.
CHEM:2021 Fundamentals of Chemical Measurements 3 s.h. Introduction to experimental and data analysis techniques used in performing quantitative chemical measurements; topics include titrations, spectrophotometry, potentiometry, chromatography, and statistical techniques for use in data processing and interpretation; laboratory. Prerequisites: CHEM:1120 with a minimum grade of C-. Requirements: chemistry major.
CHEM:2210 Organic Chemistry I
3 s.h.
Carbon-containing compounds; structure, stereochemistry, physical properties, reactivity, reaction mechanisms, synthesis; emphasis on alkanes, alkenes, alkynes, ethers, alcohols, and alkyl halides. Prerequisites: CHEM:1120 with a minimum grade of C-.

CHEM:2220 Organic Chemistry II
3 s.h.
Continuation of CHEM:2210; use of spectroscopic techniques to determine chemical structures; chemistry of carbonyl compounds, amines, aromatics, amino acids, carbohydrates, nucleosides. Prerequisites: CHEM:2210 with a minimum grade of C - or CHEM:2230 with a minimum grade of C-

CHEM:2230 Organic Chemistry I for Majors 3 s.h.
Carbon-containing compounds; structure, stereochemistry, physical properties, reactivity, reaction mechanisms, synthesis; emphasis on alkanes, alkenes, alkynes, alcohols, alkyl halides, aromatics. Prerequisites: CHEM:1120 with a minimum grade of C-. Recommendations: chemistry, biochemistry, or chemical engineering major.
CHEM:2240 Organic Chemistry II for Majors 3 s.h.
Continuation of CHEM:2230; use of spectroscopic techniques to determine chemical structures; chemistry of carbonyl compounds, amines, ethers, amino acids, carbohydrates, and nucleosides. Prerequisites: CHEM:2210 with a minimum grade of C- or CHEM:2230 with a minimum grade of C-. Recommendations: chemistry, biochemistry, or chemical engineering major.

## CHEM:2410 Organic Chemistry Laboratory

Preparation, purification, identification, analysis of chemical compounds, principally organic compounds. Prerequisites: CHEM:1120 with a minimum grade of C- and (CHEM:2210 with a minimum grade of C- or CHEM:2230 with a minimum grade of C-). Corequisites: CHEM:2220 or CHEM:2240.
CHEM:2420 Organic Chemistry Laboratory for Majors $\mathbf{3}$ s.h.
Preparation, purification, identification, analysis of chemical compounds, principally organic compounds. Prerequisites: CHEM:1120 with a minimum grade of C- and (CHEM:2210 with a minimum grade of C- or CHEM:2230 with a minimum grade of C-). Corequisites: CHEM:2220 or CHEM:2240. Recommendations: chemistry, biochemistry, or chemical engineering major.
CHEM:3110 Equilibria and Electrochemistry 3 s.h.
Modern theory and practice; emphasis on chemical equilibria (acidbase chemistry, solubility, complexation) and electroanalytical chemistry (potentiometry, voltammetry, coulometry). Prerequisites: CHEM:1120 with a minimum grade of C-.
CHEM:3120 Spectroscopy and Separations
Modern theory and practice; emphasis on atomic and molecular spectroscopy, mass spectrometry, chemical separations. Prerequisites: CHEM:1120 with a minimum grade of C-.
CHEM:3250 Inorganic Chemistry 3 s.h.
Modern principles; emphasis on descriptive chemistry of the main group and transition elements, ionic and covalent chemical bonding theories, symmetry, inorganic stereochemistry. Prerequisites: CHEM:2210 with a minimum grade of C- or CHEM:2230 with a minimum grade of C-. Corequisites: CHEM:2220 or CHEM:2240.

## CHEM:3430 Analytical Measurements

Modern theory and practice of laboratory methods; emphasis on experimental techniques and data analysis in spectroscopy, chromatography, electrochemistry. Prerequisites: CHEM:2021 with a minimum grade of C - and (CHEM:3110 with a minimum grade of C- or CHEM:3120 with a minimum grade of C-). Recommendations: (PHYS:1511 or PHYS:1611) and (PHYS:1512 or PHYS:1612).
CHEM:3440 Physical Measurements
3 s.h.
Laboratory experience using advanced instrumental and computational methods to generate and analyze data relevant to modern physical chemistry. Prerequisites: CHEM:2021 with a minimum grade of C - and (CHEM: 4431 with a minimum grade of C or CHEM:4432 with a minimum grade of C-).

## CHEM:3530 Inorganic Chemistry Laboratory

Preparation and characterization of a variety of inorganic, organometallic, and coordination compounds of the main group and transition elements; emphasis on synthetic techniques, methods for characterization of inorganic species. Prerequisites: CHEM:3250 with a minimum grade of C- and (CHEM:2410 with a minimum grade of C- or CHEM:2420 with a minimum grade of C-) and CHEM:2021 with a minimum grade of C -.

## CHEM:3560 Advanced Methods in Chemical Research: Special

 TopicsIntroduction to advanced research methods.
CHEM:3994 Undergraduate Research
1-4 s.h.
CHEM:4000 Scientists and Writers
1 s.h.
Science communication and collaborative skills that are highly sought after by employers in STEM firms including pharmaceutical firms, biotech start-ups, and many others; these same skills essential for reporting on, writing about, or translating science in any area; studiostyle format. Same as JMC:4000, WRIT:4002.

## CHEM:4261 Selected Topics in Chemistry <br> 1-3 s.h.

CHEM:4270 Advanced Inorganic Chemistry
Modern principles, including crystal field/ligand field/molecular orbital theory, inorganic reaction mechanisms, coordination chemistry, bioinorganic chemistry, main group and transition metal organometallic chemistry, solid-state inorganic chemistry. Prerequisites: CHEM:3250 with a minimum grade of C-.
CHEM:4372 Advanced Organic Chemistry 3 s.h.
Basic concepts from perspectives of structure, mechanism, synthesis, stereochemistry. Prerequisites: CHEM:2220 with a minimum grade of C- or CHEM: 2240 with a minimum grade of C-.
CHEM:4430 Principles of Physical Chemistry
Kinetics, transport properties, elementary thermodynamics, and selected topics in quantum mechanics and spectroscopy; emphasis on application of chemistry to areas of science including health and biosciences, environmental sciences, and related areas. Prerequisites: CHEM:1120 with a minimum grade of C- and (MATH:1460 with a minimum grade of C- or MATH: 1550 with a minimum grade of Cor MATH: 1850 with a minimum grade of C-). Recommendations: (PHYS:1511 or PHYS:1611) and (PHYS:1512 or PHYS:1612).

## CHEM:4431 Chemical Thermodynamics

Chemical thermodynamics and its application to chemical equilibrium, phase changes and chemical equilibria; ideal and real gases; kinetic theory; surface absorption and electrochemistry; thermodynamics. Prerequisites: CHEM:1120 with a minimum grade of C- and (MATH:1560 with a minimum grade of C- or MATH: 1860 with a minimum grade of $\mathrm{C}-$ ).
CHEM:4432 Quantum Mechanics and Chemical Kinetics 3 s.h. Quantum mechanics and its application to atomic and molecular structure; determination of structure and bonding by various spectroscopic methods; chemical kinetics. Prerequisites: CHEM:1120 with a minimum grade of C- and (MATH: 1560 with a minimum grade of C- or MATH: 1860 with a minimum grade of C-). Recommendations: PHYS:1512 or PHYS:1612.
CHEM:4450 Synthesis and Measurement
Laboratory investigations integrating synthesis and measurement techniques from inorganic, analytical, and physical chemistry; emphasis on modern applications of chemistry in biology, medicine, environmental science, catalysis, and materials science. Prerequisites: (CHEM:4432 with a minimum grade of C- or CHEM:4430 with a minimum grade of C- or CHEM:4431 with a minimum grade of C-) and (CHEM:2420 with a minimum grade of C- or CHEM: 2410 with a minimum grade of C -) and (CHEM:3120 with a minimum grade of Cor CHEM:3110 with a minimum grade of C-) and CHEM:3250 with a minimum grade of C- and CHEM:2021 with a minimum grade of C-.

3 s.h. CHEM:4480 Introduction to Molecular Modeling 3 s.h.
Theory and application of ab initio quantum mechanics, semiempirical molecular orbital theory, and molecular mechanics force fields to chemical research problems; underlying theory of these methods (with emphasis on $a b$ initio theory) and their practical application to chemical problems; computational chemistry projects using modeling software. Prerequisites: CHEM:2220 with a minimum grade of Cor CHEM:2240 with a minimum grade of C-. Recommendations: CHEM:4432.
CHEM:4760 Radiochemistry: Energy, Medicine, and the Environment

3 s.h.
Fundamental theoretical concepts of radiochemistry and their application in energy, medicine, and environmental sectors. Prerequisites: CHEM:2210 with a minimum grade of C- or CHEM:2230 with a minimum grade of C-.

CHEM:4850 Upstream Biotechnology Processes 2 s.h. Introduction to fermentation, fermenter preparation, cell growth and medium requirements, inoculation, sampling, process termination, separation of cells, fermentation case study, enzyme activity, and biocatalysis. Same as PHAR:4850.
CHEM:4873 Atmospheric and Environmental Chemistry 3 s.h.
Fundamental chemical processes of importance in the atmosphere, soil, and water, with emphasis on kinetics and photochemistry of homogeneous and heterogeneous reactions, atmospheric structure and dynamics, global geochemical cycling, chemistry-climate relationships, environmental remediation strategies; experimental methods in field and laboratory studies.
CHEM:5013 Science Writing in Chemistry
1 s.h.
How to providing clear, simple, and direct scientific documents; formulating good scientific questions; developing scientific context; process of writing, critiquing, and rewriting scientific documents; accepting constructive criticism; creating constructive criticism for others; student-created independent scientific proposal suitable as a funding application. Prerequisites: CHEM:5091 and CHEM:7270. Corequisites: CHEM:7999. Requirements: all comprehensive exams completed and passed.
CHEM:5091 Graduate Chemistry Orientation 2-3 s.h.
Pedagogy, safety, and research issues relevant to advanced chemistry careers.
CHEM:5107 Electrochemistry 2-3 s.h.
Fundamental aspects, including mass transport and electron transfer, electrochemical methodology (e.g., voltammetry and potentiometry), determination of homogeneous and heterogeneous reaction mechanisms. Recommendations: CHEM:3110 and CHEM:3120.

## CHEM:5108 Spectroscopy

Principles of atomic and molecular absorption and emission spectroscopy in ultraviolet, visible, and infrared regions of the spectrum, including fluorescence, phosphorescence, Raman spectroscopy; applications to analytical problems, with emphasis on modern instrumentation and methodology. Recommendations: CHEM:3110 and CHEM:3120.
CHEM:5109 Separations
Analytical separations; basic theory, practical applications, instrumentation, modern techniques (extractions, gas and liquid chromatography, capillary electrophoresis), and detection (mass spectrometry). Recommendations: CHEM:3110 and CHEM:3120.
CHEM:5110 Chemical Sensors 2 s.h.
Theory, practical limitations, analytical utility based on immobilized reagents with electrochemical, thermal, optical transduction mechanisms. Recommendations: CHEM:3110 and CHEM:3120.

CHEM:5114 Chemical Systems Modeling
3 s.h.
Basic processes and techniques; these methods applied to systems relevant to students' own research. Recommendations: CHEM:3110 or CHEM:3120.
CHEM:5115 Biophotonics 3 s.h.

Structure, dynamics of biomolecules and their optical spectroscopy; ultrasensitive fluorescence spectroscopy, vibrational spectroscopy, optical activity and circular dichroism, time-resolved spectroscopy. Recommendations: CHEM:3110 and CHEM:3120.

## CHEM:5118 Nanomaterials <br> 3 s.h.

Basic principles associated with nanoscience and nanotechnology; fabrication and synthesis, size dependent properties, characterization, applications of materials at nanometer length scales, recent technological breakthroughs in the field. Requirements: graduate standing or advanced undergraduate standing in engineering and science. Recommendations: knowledge of basic chemistry.

## CHEM:5120 Electrochemistry of Polymer Films

Use of electrochemical methods to characterize polymer and thin films; transport through polymer films and composites, electrochemistry of polymer films. Requirements: physical chemistry course.

## CHEM:5150 Chemometrics

3 s.h.
Mathematical, statistical, and signal processing methods for analytical chemistry; hypothesis testing, experimental design, model building, optimization, digital filtering.

## CHEM:5190 Seminar: Analytical Chemistry

## CHEM:5199 Special Topics in Analytical Chemistry

Content varies.
CHEM:5202 Coordination Chemistry and Spectroscopy 1,3 s.h.
Structure and bonding of d-block metal complexes, theory and application of relevant spectroscopic methods, inorganic reaction mechanisms, transition metals in catalysis. Recommendations: CHEM:4270.
CHEM:5203 Organometallic Chemistry
3 s.h.
Emphasis on organometallic compounds of transition metal elements. Corequisites: CHEM:4270.

CHEM:5204 Physical Methods in Inorganic Chemistry 3 s.h.
Application of physical methods to problems; recent developments; emphasis on magnetic resonance spectroscopy. Recommendations:

## CHEM:4270.

## CHEM:5205 Bioinorganic Chemistry 2-3 s.h.

The role of metal ions in biology from an inorganic chemical perspective; emphasis on structure and mechanism for transition metal-containing metallo-enzymes.
CHEM:5206 Solid-State and Materials Chemistry 3 s.h.
Introduction to the chemical concepts of solid-state chemistry; focus on synthesis and characterization of various inorganic materials; structure/property relationships, real-world examples. Recommendations: CHEM:4270.

## CHEM:5212 Mass Spectrometry

Examination of mass spectrometry in terms of basic theory, instrumentation, qualitative and quantitative analysis, and its application to the environmental and biological sciences. Recommendations: CHEM:3110 or CHEM:3120.
CHEM:5290 Seminar: Inorganic and Chemical Education Research

CHEM:5299 Special Topics in Inorganic Chemistry 1-3 s.h. Recommendations: CHEM:4270.

CHEM:5321 Spectroscopic Methods in Organic Chemistry 3-4 s.h. Methods and techniques of structure determination for organic compounds.

CHEM:5326 Organic Reactions
3 s.h.
Survey of organic reactions used in contemporary organic synthesis; emphasis on C-C bond forming reactions, functional group interconversions, oxidations and reductions; mechanistic details of reaction types; innovations in catalytic and asymmetric organic reactions. Recommendations: CHEM:4372.

CHEM:5328 Mechanisms of Organic Reactions 3 s.h.
Application of basic mechanistic concepts.
CHEM:5329 Advanced Organic Synthesis 1-3 s.h.
Preparation of complex organic compounds. Recommendations: CHEM:4372.

CHEM:5390 Seminar: Organic Chemistry 0-1 s.h.
CHEM:5399 Organic Chemistry Special Topics 1,3 s.h.
Recommendations: CHEM:4372.
CHEM:5431 Statistical Thermodynamics I 3 s.h.
Fundamentals of classical thermodynamics and equilibria; ensembles; noninteracting systems; theory of phase transitions; Monte-Carlo methods; classical fluids; nonequilibrium systems. Recommendations: CHEM:4431.
CHEM:5433 Quantum and Computational Chemistry 3 s.h.
Fundamental principles of quantum chemistry; angular momentum; approximation methods; theory of atomic and molecular electronic structure; applications of computational quantum mechanics to chemical systems. Corequisites: CHEM:4432, if not taken as a prerequisite.

## CHEM:5434 Molecular Spectroscopy

3 s.h.
Quantum mechanical models of atoms, molecules, and chemical oscillators; electrostatics and magnetism; electromagnetic waves; refractive index and polarization; matter waves; symmetry and orbitals; vibronic and spin-orbit coupling; electron correlation and exchange; selection rules. Recommendations: CHEM:5433.

## CHEM:5435 Chemical Kinetics

3 s.h.
Potential energy surfaces, transition state theory, diffusion limited rates, linear free energy relationships, isotope effects, solvent effects, RRKM theory; connection between experiment and various theories in the gas and solution phases; emphasis on assignment of experimental error to derived quantities. Recommendations: CHEM:4432.
CHEM:5436 Electronic Structure and Informatics in Chemistry

3 s.h.
Basic principles of molecular electronic structure theory; molecular structure and reactivity; molecular orbital theory; density functional theory; introduction to informatics and data science; how
calculations can be used to enhance experimental research projects. Recommendations: CHEM:4432. Same as IGPI:5436.
CHEM:5438 Surface Chemistry and Heterogeneous
Processes 3 s.h.
Fundamental and applied aspects of surface chemical processes;
theories of molecular adsorption/desorption and surface complexation; kinetics; surface analysis and instrumentation; applications of surface chemistry in heterogeneous catalysis, heterogeneous environmental/ atmospheric processes, and materials chemistry. Recommendations: CHEM:4431.
CHEM:5490 Seminar: Physical and Environmental Chemistry

0-1 s.h.
CHEM:5499 Physical Chemistry Topics
1-3 s.h.
Advanced topics relevant to modern physical chemistry. Recommendations: CHEM:4432 and MATH:1860.
CHEM:5599 Special Topics in Chemistry Education
3 s.h.

Special topics related to chemistry education; topics vary.

CHEM:5875 Perspectives in Biotechnology 1 s.h.
Topics related to careers in biotechnology with an emphasis on preparing graduate students for careers outside of academia; discussions led by a series of guest speakers from leading biotech industries; understanding the societal impact of basic research; participation in round-table discussions; and presentation of student research findings. Requirements: graduate standing and good academic standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BMB:5875, CBE:5875, CEE:5875, MICR:5875, PHAR:5875.

## CHEM:5890 Research Frontiers in Chemistry

CHEM:5990 Chemistry Colloquium
Presentation and discussion of research by invited presenters.
CHEM:6990 Research Seminar
0-1 s.h.
Presentation and discussion of thesis research for advanced degrees.

## CHEM:7270 Ethics in Chemical Sciences

1 s.h.
Scholarly integrity for being a responsible chemist on graduatelevel research; introduction to infrastructure of scientific scholarship with emphasis on interacting with peers, funding agencies, industrial entities; responsible conduct in research in the context of creation of knowledge, dissemination of scientific findings, intellectual property, and conflict of interest; workshops to study cases in chemical research to illustrate the principles of scholarly integrity.

## CHEM:7604 Ethics in Chemical Sciences for Postdocs 0 s.h.

Introduction to infrastructure of scientific scholarship; emphasis on interacting with peers, funding agencies, industrial entities; scholarly integrity for being a responsible chemist on graduate-level research; responsible conduct in research in context of creation of knowledge, dissemination of scientific findings, intellectual property, conflict of interest; workshop cases in chemical research that illustrate principles of scholarly integrity.

## CHEM:7999 Research in Chemistry

 arr.Thesis work for advanced degrees.

## Chemistry, BA

## Learning Outcomes

The Department of Chemistry is committed to maintaining excellence in teaching and mentoring, and to providing the maximum educational benefit to each chemistry graduate. The desired outcomes will prepare students for success in graduate or professional school, industry or government employment, and a wide variety of career choices.

The graduate with a bachelor's degree in chemistry will be able to use the knowledge and skills obtained in the program to demonstrate the following.

## Knowledge and Understanding of Chemistry

Graduates will be able to demonstrate:

- mastery of major concepts, theoretical principles, and experimental findings in chemistry;
- an understanding of the relationship between molecular structure and physical/chemical properties;
- an understanding of the relationship between the microscopic, macroscopic, and symbolic descriptions of matter and the changes it undergoes; and
- an understanding of the conditions that affect stability and factors that control rates of change.

## Laboratory Skills

Graduates will be able to:

- assess chemical and procedural hazards involved in laboratory work;
- use strategies to minimize the risks associated with laboratory work;
- maintain a clearly organized laboratory notebook;
- use a variety of synthetic techniques;
- use instrumentation and laboratory techniques to separate, purify, identify, quantify, and characterize chemical species; and
- use computers as tools for data acquisition, management, and analysis.

## Scientific Thinking

Graduates will be able to:

- pose scientific questions with a clear hypothesis;
- plan and carry out scientific investigations;
- analyze data in order to make inferences about chemical and physical behavior and properties, and construct scientific arguments to support conclusions;
- use scientific theory and/or interpretations of experimental results to explain chemical phenomena;
- use mathematics and computational thinking to understand and predict chemical behavior;
- identify and quantify uncertainties in measurements and limitations in methods; and
- use graphs, diagrams, and other models to communicate chemical information.

## Chemical Information Skills

Graduates will be able to:

- use modern library search tools to locate and retrieve chemical information;
- read, analyze, and critically evaluate journal articles; and
- reference and cite chemical literature appropriately using designated citation styles.

## Professional Skills

Graduates will be able to:

- report scientific findings in oral presentations in a clear and organized fashion using appropriate visual tools;
- report on experimental work and scientific findings in written reports;
- communicate results of scientific work to nontechnical audiences;
- work collaboratively with peers to plan and conduct experiments, interpret chemical information, and solve problems; and
- engage in responsible and ethical scientific conduct.

## Requirements

The Bachelor of Arts with a major in chemistry requires a minimum of 120 s.h., including 53-54 s.h. of work for the major ( 20 s.h. in foundation chemistry courses, 12 s.h. in advanced chemistry, and 2122 s.h. in supporting coursework). Students must earn at least 11 s.h. in advanced chemistry courses at the University of Iowa. They must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. Students also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

The BA degree is a good choice for students interested in medical or other professional schools, or those interested in a teaching career (see "Teacher Licensure" below). The program provides students with the flexibility to earn a degree in chemistry while they also complete related courses required for medical school, such as biology and biochemistry. Compared to the BS degree, the BA has modified mathematics requirements that include a one-semester physical chemistry course, an analytical chemistry course, and a single, integrated capstone laboratory that incorporates analytical, inorganic, and physical chemistry experiments.

Courses in the chemistry major have prerequisites, so they must be taken in the correct order. Advanced chemistry courses are built on the chemistry foundation courses. Most advanced courses are taught only once a year. Students should consult their academic advisors and plan their course schedules carefully. They should take CHEM:2021
Fundamentals of Chemical Measurements during the first semester of the second year.

Students may not use a course to fulfill more than one requirement.
The BA with a major in chemistry requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Chemistry Foundation Courses | 20 |
| Advanced Chemistry Courses | 12 |
| Mathematics Courses | $7-8$ |
| Introductory Physics Courses | 8 |
| Science Electives | 6 |

## Chemistry Foundation Courses

Students complete the following foundation courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | 8 |
| CHEM: $1110 \&$ | Principles of Chemistry I-II | 8 |
| CHEM:1120 | Fundamentals of Chemical <br> CHEM:2021 | 3 |

One of these sequences:

|  <br> CHEM:2220 | Organic Chemistry I-II | 6 |
| :--- | :--- | :--- |
|  <br> CHEM:2240 | Organic Chemistry I for Majors <br> -Organic Chemistry II for <br> Majors (preferred) | 6 |
| One of these: | Organic Chemistry Laboratory | 3 |
| CHEM:2410 | Organic Chemistry Laboratory <br> for Majors (preferred) | 3 |
| CHEM:2420 |  |  |

## Advanced Chemistry Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: | Equilibria and Electrochemistry | 3 |
| CHEM:3110 | Spectroscopy and Separations <br> (preferred) | 3 |
| CHEM:3120 | Inorganic Chemistry | 3 |
| All of these: | Principles of Physical <br> CHEM:3250 | Chemistry |
| CHEM:4430 | Synthesis and Measurement | 3 |
| CHEM:4450 |  |  |

## Mathematics Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  | 4 |
| MATH:1460 | Calculus for the Biological <br> Sciences (preferred) | 4 |
| MATH:1550 | Engineering Mathematics I: <br> Single Variable Calculus | 4 |
| MATH:1850 | Calculus I | 4 |
| One of these: | Engineering Mathematics II: |  |
| MATH:1560 | Multivariable Calculus <br> Calculus II | 4 |
| MATH:1860 | Statistical Methods and <br> STAT:2010 | 4 |
| STAT:3510/ | Biostatistics (preferred) | 3 |
| IGPI:3510 |  | 3 |

## Introductory Physics Courses

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| One of these sequences: |  |  |
| PHYS:1511- | College Physics I-II (preferred) | 8 |
| PHYS:1512 |  | 8 |
| PHYS:1611- | Introductory Physics I-II | 8 |
| PHYS:1612 |  |  |

## Science Electives

Some of these courses may be used to fulfill other requirements for the major, as listed above; students who have used a course from this list to fulfill another requirement for the major may not use that course as an elective. Students should consult their advisor to gain approval for a course that is not on the list. Undergraduate Research (CHEM:3994) may not be used to satisfy the science electives requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| A total of 6 s.h. from these: |  |  |
| CHEM:3110 | Equilibria and Electrochemistry | 3 |
| CHEM:3120 | Spectroscopy and Separations | 3 |

| CHEM:3430 | Analytical Measurements | 3 |
| :--- | :--- | :--- |
| CHEM:3440 | Physical Measurements | 3 |
| CHEM:3530 | Inorganic Chemistry Laboratory | 3 |
| CHEM:4270 | Advanced Inorganic Chemistry | 3 |
| CHEM:4372 | Advanced Organic Chemistry | 3 |
| CHEM:4431 | Chemical Thermodynamics | 3 |
| CHEM:4432 | Quantum Mechanics and <br> Chemical Kinetics | 3 |
| CHEM:4480 | Introduction to Molecular <br> Modeling | 3 |
| CHEM:4760 | Radiochemistry: Energy, <br> Medicine, and the Environment | 3 |
| CHEM:4873 | Atmospheric and Environmental <br> Chemistry 3110 | Biochemistry <br> BMB:3120 |
| Biochemistry and Molecular | 3 |  |
| BMB:3130 | Biology I | 3 |
| CEE:4150/CBE:4420 | Biochemistry and Molecular | 3 |
| EES:4490 | Elements of Geochemistry | 3 |
| EES:4520 | Isotope Geochemistry | 3 |

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.
To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Combined Programs

## BA/MAT (Science Education Subprogram)

Students who are interested in pursuing a graduate degree in teaching may apply to the combined Bachelor of Arts/Master of Arts in Teaching with a science education subprogram offered by the College of Liberal Arts and Sciences and the College of Education. Designed for undergraduates majoring in biology, chemistry, environmental sciences, or physics, the combined program enables students to earn a BA and MAT in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 19 s.h. of qualifying credit toward both degrees. For more information, see "Combined Program" under Science Education [p. 1418] in the Master of Arts in Teaching (College of Education) section of the catalog. Interested students should consult an advisor.

## Honors

## Honors in the Major

Majors are able to graduate with departmental honors. Students must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33, as required by the College of Liberal Arts and Sciences; additionally, students must maintain a 3.33 cumulative GPA in the major, a GPA set by the Department of Chemistry.

Students also must complete an undergraduate research project acceptable to their research advisor and must write an honors thesis based on their research. Students should register for CHEM:3994 Undergraduate Research or HONR:3994 Honors Research Practicum to earn credit for their research. They are encouraged but not required to present their research at local and regional meetings and to publish their results in professional journals.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.
Membership in the UI Honors Program is not required to earn honors in the chemistry major.

## Financial Support

## Scholarships and Awards

A number of awards and scholarships are available to chemistry majors, including the American Institute of Chemists Award, the Undergraduate Award in Analytical Chemistry, the Chemistry Alumni Awards (one each for a sophomore, a junior, and a senior), the Merck Index Award, and the Viksnins, Harris \& Padys PLLP Award.
Chemistry majors also may apply for the Donald J. and Margaret Burton Scholarship, E. David Cater Scholarship, and Russell K. Simms Scholarship.

For more information, visit Undergraduate Scholarships and Awards on the Department of Chemistry website.

## Career Advancement

The undergraduate major in chemistry provides a strong foundation for success in graduate and professional study and for positions in academic or industrial chemistry.

Students with a chemistry degree can pursue careers or graduate study in a wide range of fields. Learn more about career options for chemistry majors on the American Chemical Society website.
The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Courses in the chemistry major have prerequisites, so they must be taken in the correct order. Most advanced courses are taught only once a year. Students should consult their academic advisors and plan their course schedules carefully. They should take CHEM:2021 Fundamentals of Chemical Measurements during the first semester of the second year. Typical chemistry course schedules and a regression list are available at Undergraduate Program in Chemistry on the Department of Chemistry website.
Before the third semester begins: math through MATH:1460 Calculus for the Biological Sciences, MATH:1550 Engineering Mathematics I: Single Variable Calculus, or MATH: 1850 Calculus

I; CHEM:1110 Principles of Chemistry I and CHEM:1120 Principles of Chemistry II, or equivalent coursework.
Before the fifth semester begins: CHEM:2021 Fundamentals of Chemical Measurements; CHEM:2210 Organic Chemistry I, CHEM:2220 Organic Chemistry II, and CHEM:2410 Organic Chemistry Laboratory, or CHEM:2230 Organic Chemistry I for Majors, CHEM:2240 Organic Chemistry II for Majors, and CHEM:2420 Organic Chemistry Laboratory for Majors; and STAT:2010 Statistical Methods and Computing, STAT:3510 Biostatistics, MATH:1560 Engineering Mathematics II: Multivariable Calculus, or MATH: 1860 Calculus II.

Before the seventh semester begins: two more courses in the major; PHYS:1511 College Physics I-PHYS:1512 College Physics II or PHYS:1611 Introductory Physics I-PHYS:1612 Introductory Physics II; and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: CHEM:4430 Principles of Physical Chemistry and one more course in the major.

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Chemistry, BA

| Course | Title | Hours |
| :---: | :---: | :---: |
| Academic Career |  |  |
| Any Semester |  |  |
| GE CLAS Core: Sustainability ${ }^{\text {a }}$ |  |  |
|  | Hours | 0 |
| First Year |  |  |
| Fall |  |  |
| CHEM:1110 | Principles of Chemistry I ${ }^{\text {b }}$ | 4 |
| $\begin{aligned} & \text { ENGL:1200 } \\ & \text { or RHET:1030 } \end{aligned}$ | The Interpretation of Literature or Rhetoric | 3-4 |
| MATH:1440 | Mathematics for the Biological Sciences ${ }^{\text {c }}$ | 4 |
| GE CLAS Core: D | Diversity and Inclusion ${ }^{\text {d }}$ | 3 |
| CSI:1600 | Success at Iowa | 2 |
|  | Hours | 16-17 |
| Spring |  |  |
| CHEM:1120 | Principles of Chemistry II | 4 |
| MATH:1460 | Calculus for the Biological Sciences | 4 |
| GE CLAS Core: or elective course | World Languages First Level Proficiency | 4-5 |
| Elective course ${ }^{\text {f }}$ |  | 3 |
|  | Hours | 15-16 |
| Second Year |  |  |
| Fall |  |  |
| CHEM:2021 | Fundamentals of Chemical Measurements | 3 |
| CHEM:2230 | Organic Chemistry I for Majors ${ }^{\text {g }}$ | 3 |
| RHET:1030 <br> or ENGL:1200 | Rhetoric or The Interpretation of Literature | 3-4 |
| GE CLAS Core: <br> Proficiency or ele | Vorld Languages Second Level tive course ${ }^{\mathrm{e}}$ | 4-5 |

e Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
f Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
g Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
$h$ Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
i Typically CHEM:3110 is offered in fall semesters only and CHEM:3120 is offered spring semesters only. Check MyUI for course availability since offerings are subject to change.
j Students are required to complete 6 s.h. of science electives chosen from a list of approved courses. Students who have used a course to fulfill another requirement for the major may not use that course as a science elective.
k Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Chemistry, BS

## Learning Outcomes

The Department of Chemistry is committed to maintaining excellence in teaching and mentoring, and to providing the maximum educational benefit to each chemistry graduate. The desired outcomes will prepare students for success in graduate or professional school, industry or government employment, and a wide variety of career choices.

The graduate with a bachelor's degree in chemistry will be able to use the knowledge and skills obtained in the program to demonstrate the following.

## Knowledge and Understanding of Chemistry

Graduates will be able to demonstrate:

- mastery of major concepts, theoretical principles, and experimental findings in chemistry;
- an understanding of the relationship between molecular structure and physical/chemical properties;
- an understanding of the relationship between the microscopic, macroscopic, and symbolic descriptions of matter and the changes it undergoes; and
- an understanding of the conditions that affect stability and factors that control rates of change.

## Laboratory Skills

Graduates will be able to:

- assess chemical and procedural hazards involved in laboratory work;
- use strategies to minimize the risks associated with laboratory work;
- maintain a clearly organized laboratory notebook;
- use a variety of synthetic techniques;
- use instrumentation and laboratory techniques to separate, purify, identify, quantify, and characterize chemical species; and
- use computers as tools for data acquisition, management, and analysis.

## Scientific Thinking

Graduates will be able to:

- pose scientific questions with a clear hypothesis;
- plan and carry out scientific investigations;
- analyze data in order to make inferences about chemical and physical behavior and properties, and construct scientific arguments to support conclusions;
- use scientific theory and/or interpretations of experimental results to explain chemical phenomena;
- use mathematics and computational thinking to understand and predict chemical behavior;
- identify and quantify uncertainties in measurements and limitations in methods; and
- use graphs, diagrams, and other models to communicate chemical information.

## Chemical Information Skills

Graduates will be able to:

- use modern library search tools to locate and retrieve chemical information;
- read, analyze, and critically evaluate journal articles; and
- reference and cite chemical literature appropriately using designated citation styles.

## Professional Skills

Graduates will be able to:

- report scientific findings in oral presentations in a clear and organized fashion using appropriate visual tools;
- report on experimental work and scientific findings in written reports;
- communicate results of scientific work to nontechnical audiences;
- work collaboratively with peers to plan and conduct experiments, interpret chemical information, and solve problems; and
- engage in responsible and ethical scientific conduct.

## Requirements

The Bachelor of Science with a major in chemistry requires a minimum of 120 s.h., including 69 s.h. of work for the major ( 20 s.h. in foundation chemistry courses, 27 s.h. in advanced chemistry, and 22 s.h. in supporting coursework). Students must earn at least 20 s.h. in advanced chemistry courses at the University of Iowa. They must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. Students also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].
The BS degree with a major in chemistry is certified by the American Chemical Society (ACS) when a biochemistry course is included. An ACS-approved program offers a broad-based and rigorous chemistry education that provides students with the intellectual, experimental, and communication skills to become effective scientific professionals in chemical and other related fields. The program also provides all the prerequisites for graduate work in chemistry or biochemistry and in other biomedical areas with a molecular focus.
Courses in the chemistry major have prerequisites, so they must be taken in the correct order. Advanced chemistry courses are built on the chemistry foundation courses. Most advanced courses are taught only once a year. Students should consult their academic advisors and plan their course schedules carefully. They should take CHEM:2021 Fundamentals of Chemical Measurements during the first semester of the second year.
Students may not use a course to fulfill more than one requirement.
The BS with a major in chemistry requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Chemistry Foundation Courses | 20 |
| Advanced Chemistry Courses | 27 |
| Mathematics Courses | 8 |
| Introductory Physics Courses | 8 |
| Science Electives and Research Courses | 6 |

## Chemistry Foundation Courses

Students complete the following foundation courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | 8 |
|  <br> CHEM:1120 | Principles of Chemistry I-II |  |
| CHEM:2021 | Fundamentals of Chemical |  |
| Measurements |  |  |

|  <br> CHEM:2240 | Organic Chemistry I for Majors <br> - Organic Chemistry II for <br> Majors (preferred) | 6 |
| :--- | :--- | :--- |
| One of these: | Organic Chemistry Laboratory | 3 |
| CHEM:2410 Organic Chemistry Laboratory <br> for Majors (preferred) | 3 |  |

## Advanced Chemistry Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| CHEM:3110 \& Equilibria and Electrochemistry <br> CHEM:3120 - Spectroscopy and Separations | 6 |  |
| CHEM:3250 | Inorganic Chemistry | 3 |
| CHEM:3430 | Analytical Measurements | 3 |
| CHEM:3440 | Physical Measurements | 3 |
| CHEM:3530 | Inorganic Chemistry Laboratory | 3 |
| CHEM:4270 | Advanced Inorganic Chemistry | 3 |
| CHEM:4431- | Chemical Thermodynamics | 6 |
| CHEM:4432 | - Quantum Mechanics and |  |
|  | Chemical Kinetics |  |

## Mathematics Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these sequences: |  |  |
| MATH:1550 \& | Engineering Mathematics I: | 8 |
| MATH:1560 | Single Variable Calculus - <br> Engineering Mathematics II: <br> Multivariable Calculus |  |
| MATH:1850 \& | Calculus I-II (preferred) | 8 |
| MATH:1860 |  |  |

## Introductory Physics Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these sequences: | College Physics I-II | 8 |
| PHYS:1511- | Introductory Physics I-II | 8 |
| PHYS:1512 | (preferred) | 8 |
| PHYS:1611- |  |  |

## Science Electives and Research Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| A total of 6 s.h. from these: | $1-4$ |  |
| CHEM:3994 | Undergraduate Research | 3 |
| BMB:3110 | Biochemistry | 3 |
| BMB:3120 | Biochemistry and Molecular <br> Biology I <br> BMB:3130 | Biochemistry and Molecular <br> Biology II |
|  |  | 3 |

Advanced science elective courses

## ACS Certification Requirement

Students who want an ACS-certified degree complete one of these optional courses (also listed above under "Science Electives and Research Courses").

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMB:3110 | Biochemistry | 3 |
| BMB:3120 | Biochemistry and Molecular | 3 |

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.
To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Honors

## Honors in the Major

Majors are able to graduate with departmental honors. Students must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33, as required by the College of Liberal Arts and Sciences; additionally, students must maintain a 3.33 cumulative GPA in the major, a GPA set by the Department of Chemistry.

Students also must complete an undergraduate research project acceptable to their research advisor and must write an honors thesis based on their research. Students should register for CHEM:3994 Undergraduate Research or HONR:3994 Honors Research Practicum to earn credit for their research. They are encouraged but not required to present their research at local and regional meetings and to publish their results in professional journals.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the chemistry major.

## Financial Support

## Scholarships and Awards

A number of awards and scholarships are available to chemistry majors, including the American Institute of Chemists Award, the Undergraduate Award in Analytical Chemistry, the Chemistry Alumni Awards (one each for a sophomore, a junior, and a senior), the Merck Index Award, and the Viksnins, Harris \& Padys PLLP Award.

Chemistry majors also may apply for the Donald J. and Margaret Burton Scholarship, E. David Cater Scholarship, and Russell K. Simms Scholarship.

For more information, visit Undergraduate Scholarships and Awards on the Department of Chemistry website.

## Career Advancement

The undergraduate major in chemistry provides a strong foundation for success in graduate and professional study and for positions in academic or industrial chemistry.

Students with a chemistry degree can pursue careers or graduate study in a wide range of fields. Learn more about career options for chemistry majors on the American Chemical Society website.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Courses in the chemistry major have prerequisites, so they must be taken in the correct order. Most advanced courses are taught only once a year. Students should consult their academic advisors and plan their course schedules carefully. They should take CHEM:2021 Fundamentals of Chemical Measurements during the first semester of the second year. Typical chemistry course schedules and a regression list are available at Undergraduate Program in Chemistry on the Department of Chemistry website.
Before the third semester begins: math through MATH:1550 Engineering Mathematics I: Single Variable Calculus or MATH:1850 Calculus I; CHEM: 1110 Principles of Chemistry I and CHEM:1120 Principles of Chemistry II, or equivalent coursework.

Before the fifth semester begins: CHEM:2021 Fundamentals of Chemical Measurements; CHEM:3250 Inorganic Chemistry; CHEM:2210 Organic Chemistry I, CHEM:2220 Organic Chemistry II, and CHEM:2410 Organic Chemistry Laboratory, or CHEM:2230 Organic Chemistry I for Majors, CHEM:2240 Organic Chemistry II for Majors, and CHEM:2420 Organic Chemistry Laboratory for Majors; MATH:1560 Engineering Mathematics II: Multivariable Calculus or MATH:1860 Calculus II; and PHYS:1511-PHYS:1512 or PHYS:1611-PHYS:1612.

Before the seventh semester begins: six more courses in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: three more courses in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Enrollment in chemistry courses requires completion of a placement exam.
c Enrollment in math courses requires completion of a placement exam.
d GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
e Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
f Students should take CHEM: 2021 during the first semester of the second year.
g Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
h Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
i Students are required to complete 6 s.h. in science electives and research toward the major; refer to the General Catalog for list of approved courses.
j Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
k Students who want an ACS certified degree must complete one of these optional courses: BMB:3110 or BMB:3120.
1 Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Chemistry, Minor

## Requirements

The undergraduate minor in chemistry requires a minimum of 15 s.h. in chemistry courses (prefix CHEM), including 12 s.h. in courses numbered 2210 or above taken in the Department of Chemistry at the University of Iowa. Students must maintain a cumulative gradepoint average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.
The following courses do not count toward the minor.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CHEM:3560 | Advanced Methods in Chemical | $1-3$ |
|  | Research: Special Topics |  |
| CHEM:3994 | Undergraduate Research | $1-4$ |
| CHEM:4000 | Scientists and Writers | 1 |
| CHEM:4261 | Selected Topics in Chemistry | $1-3$ |

## Chemistry, MS

## Learning Outcomes

Students will:

- independently learn new chemical principles and techniques beyond those typical of undergraduate academic training;
- identify original and worthwhile chemical problems stated as research questions and hypotheses;
- design and execute experiments as part of independent chemistry research investigations;
- critically evaluate their data, results, and conclusions and those of others in the chemistry community;
- identify potential problems in the responsible conduct of research and identify strategies for managing those problems;
- articulate standards for laboratory safety in chemical research, assess potential hazards they may encounter in novel chemistry research, and develop effective strategies to mitigate those risks; and
- communicate chemical knowledge, new models, and research results both orally and in writing for both technical and nontechnical audiences.

## Requirements

The Master of Science program in chemistry requires a minimum of 30 s.h. of graduate credit. The degree is offered with or without thesis. MS requirements include proficiency examinations and core courses as necessary in biochemistry; analytical, inorganic, organic, and/or physical chemistry; and additional advanced coursework. Students must have a cumulative grade-point average of at least 2.75 or higher to complete the MS.

## Admission

Applicants for graduate admission should have a bachelor's degree with a major in chemistry or a related field, preferably with a gradepoint average of 3.00 or higher. For application information, contact the Department of Chemistry or visit its website.
Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Career Advancement

Students with a chemistry degree can pursue careers in a wide range of fields. Learn more about career options for chemistry majors on the American Chemical Society website.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Chemistry, PhD

## Learning Outcomes

Students will:

- independently learn new chemical principles and techniques beyond those typical of undergraduate academic training;
- identify original and worthwhile chemical problems stated as research questions and hypotheses;
- design and execute experiments as part of independent chemistry research investigations;
- critically evaluate their data, results, and conclusions and those of others in the chemistry community;
- identify potential problems in the responsible conduct of research and identify strategies for managing those problems;
- articulate standards for laboratory safety in chemical research, assess potential hazards they may encounter in novel chemistry research, and develop effective strategies to mitigate those risks; and
- communicate chemical knowledge, new models, and research results both orally and in writing for both technical and nontechnical audiences.

## Requirements

The Doctor of Philosophy program in chemistry requires a minimum of 72 s.h. of graduate credit. Degree requirements include demonstrating proficiency in core areas of chemistry; completing a minimum of 11 s.h. of advanced coursework, a 1 s.h. ethics course, and a 1 s.h. chemistry proposal writing course; passing a comprehensive examination (see below); giving two public seminars; and producing at least one published or accepted paper in a peerreviewed journal based on a student's dissertation research.
Students who meet proficiency and advanced course requirements with a cumulative grade-point average of 3.00 or higher are admitted to the comprehensive examination. The examination is based on a research progress report and an oral examination with the student's graduate academic committee. Students must take the comprehensive examination no later than the end of their second year of enrollment.
Near the end of the PhD, candidates prepare the dissertation and present it to their graduate committee for review. The final examination consists of an oral defense of the dissertation, which may include the published or accepted paper(s) mentioned above.
For more information and details, please visit the Graduate Program in Chemistry page on the Department of Chemistry website.

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in chemistry in a combined degree program offered by the Carver College of Medicine and the Graduate College. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Admission

Applicants for graduate admission should have a bachelor's degree with a major in chemistry or a related field, preferably with a gradepoint average of 3.00 or higher. Most admitted graduate students
receive financial support. For application information, contact the Department of Chemistry or visit its website.
Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Career Advancement

Students with a chemistry degree can pursue careers in a wide range of fields. Learn more about career options for chemistry majors on the American Chemical Society website.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must demonstrate basic proficiency in three chosen subdisciplines of chemistry(analytical, biochemistry, inorganic, organic, physical). Proficiency is established in one of the following ways: 1) scoring at the 50th percentile level on the proficiency exam; 2) completing a one-semester review course with a grade of $C$ or better; or 3) completing a one-semester graduate-level/advanced course in that sub-discipline of chemistry with a grade of B or better. The proficiency requirement must be fulfilled before the beginning of the student's third semester in the graduate program. b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the

Graduate College website and the Manual of Rules and Regulations for more information.
c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
d May take another course if proficiency requirement has been satisfied; work with faculty advisor to determine appropriate graduate coursework and sequence.
e Students should begin taking research seminar after joining a research group.
f Includes research; work with faculty advisor to determine appropriate graduate coursework and sequence.
g Students must complete the oral comprehensive examination not later than the end of their second year of enrollment.
h First required seminar.
i Students are expected to give a minimum of two acceptable seminars. One seminar must cover the student's research; the other may also deal with the student's research or can be an extensive literature report.
j Can be taken any fall semester after the Doctoral Comprehensive Exam.
k Dissertation defense at which time candidates present at least one published or accepted paper in a peer-reviewed journal based on the publishable portion of the thesis.

# Cinematic Arts 

## Chair

- Michael J. Cowan

Undergraduate majors: cinema (BA); screenwriting arts (BA)
Undergraduate minor: cinema
Graduate degrees: MA in film studies; MFA in film and video production; PhD in film studies
Faculty: https://cinematicarts.uiowa.edu/people
Website: https://cinematicarts.uiowa.edu/
The Department of Cinematic Arts provides students with opportunities to explore and gain insight into cinema as a subject of international and interdisciplinary study as well as creative practice. The curriculum emphasizes film and related media in their historical and cultural contexts as well as film and video production in a variety of modes.

The screenwriting arts major instructs students in the practical skills and knowledge needed to become successful members of the screenwriting industry, in addition to the history and theories related to screenwriting.

The department's faculty offer expertise in film and video production; film history and theory, with emphasis on international film cultures; and the history, theory, and production of documentary media. Students conduct projects using state-of-the-art equipment and software that is updated regularly.
The department offers two majors awarded with a BA degree, an undergraduate minor, and three graduate degree programs (MA, MFA, and PhD ). It also offers courses for all interested students under the Literary, Visual, and Performing Arts area of the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

## Resources

The Department of Cinematic Arts maintains up-to-date film and video equipment and facilities that allow students to acquire professional skills in a range of technical and creative areas, including cinematography, editing, sound design, screenwriting, and animation. The program also draws upon the extensive media holdings, and scholarly and archival resources relevant to the study of cinema held by the University of Iowa Libraries. The department regularly sponsors events, including film screenings, festivals, symposia, and presentations by notable visiting scholars and artists, that extend the study of film beyond the classroom and regular curriculum. Collaborations with Iowa City's independent cinema, FilmScene, and the Bijou, the University of Iowa's long-running student film society, also enhance local opportunities for students to view films outside of the classroom and mainstream venues.

## Programs

Undergraduate Programs of Study

## Majors

- Major in Cinema (Bachelor of Arts) [p. 219]
- Major in Screenwriting Arts (Bachelor of Arts) [p. 222]

## Minor

- Minor in Cinema [p. 226]

## Graduate Programs of Study

## Majors

- Master of Arts in Film Studies [p. 227]
- Master of Fine Arts in Film and Video Production [p. 229]
- Doctor of Philosophy in Film Studies [p. 231]

## Courses

## Cinematic Arts Courses

## CINE:1000 First-Year Seminar

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.
CINE:1100 The Art of Smartphone Filmmaking 3 s.h.
Introduction to filmmaking principles; how to shoot and edit short videos utilizing smartphone technology; methods to produce highquality work without professional equipment. GE: Engineering Be Creative; Literary, Visual, and Performing Arts.

CINE:1150 Introduction to Screenwriting for Nonmajors 3 s.h. Introduction to basic storytelling strategies and principles, writing film treatments, adapting prose to professional screenplay format, story structure for features and short films, workshop original screenplays, critique student work, and analyze professional screenplays. GE: Engineering Be Creative.

CINE:1185 Internship 1-3 s.h.
Opportunity to apply skills; faculty supervision, on or off campus. Requirements: cinema major.
CINE:1195 Video Games and Identity
3 s.h.
Structural and historical problems of representation and inclusion in video games (as text, industry, and culture) along lines of race, gender, sexuality, age, class, and ability; introduction to game studies as a discipline; guidance in learning college-level reading and writing. GE: Diversity and Inclusion.

## CINE:1300 Foundations of Screenwriting

3 s.h.
Ideation and creative research, foundational elements of stories, creation and development of characters and story lines, dialogue writing, screenplay format, analysis of storytelling in professional screenplays, writing and workshopping student's work.
CINE:1560 Cinematic Arts Ambassador Seminar 1 s.h. Ambassadors provide information about the Department of Cinematic Arts to incoming and visiting students, university community, and broader community; conduct tours; meet with students and parents; review curriculum; provide information on opportunities; coordinate events; and update materials for prospective and incoming students. Requirements: cinema major.
CINE:1601 Introduction to Film Analysis 3 s.h.
Formal analysis of film; narrative cinema and approaches to narrative structure; authorship and genre issues, other major topics.
CINE: 1602 Introduction to Film Studies
3 s.h.
Film history, theory, criticism; issues of form, technologies, and cultural functions of cinema; screenings of narrative, documentary, experimental films from varied periods and nations. GE: Literary, Visual, and Performing Arts.
CINE:1610 Contemporary Cinema
3 s.h.
Current cinema; key genres, movements, filmmakers, technological changes; recent cultural contexts, industrial and economic factors, changes in the film viewing experience. GE: Literary, Visual, and Performing Arts.

CINE:1625 Race, Gender, and Sexuality on Screen 3 s.h. Introduction to key issues and debates regarding the representation of gender, race, and sexuality in cinema. GE: Diversity and Inclusion.

## CINE: 1834 Modes of Film and Video Production

Introduction to filmmaking; how to shoot and edit short works of cinematic art; exposure to various working methods including nonfiction, fiction, and experimental modes of video production. Prerequisites: CINE: 1601 with a minimum grade of C. Corequisites: for CINE:1834-CINE:1601, if not taken as a prerequisite. GE: Engineering Be Creative. Same as THTR:1834.

## CINE:2195 Individual Study

## CINE:2600 Writing Film Reviews and Criticism 3 s.h.

Evaluation and analysis of film, from journalistic reviews to academic scholarship; principles and theoretical positions.

## CINE:2615 Introduction to Film Theory

3 s.h.
Classical film theory-formalist and realist theories, authorship, genre; contemporary film theory-semiotics, feminism, psychoanalysis, ideological criticism, postmodernism, queer theory. Prerequisites: CINE:1601 with a minimum grade of C and CINE:1834 with a minimum grade of $C$.

## CINE:2620 U.S. Film

3 s.h.
American film industry; social and artistic perspectives.

## CINE:2623 Introduction to Documentary Film

3 s.h.
Introduction to key issues and topics in the history and practice of nonfiction filmmaking.

## CINE:2627 Film Club

1 s.h.
Theme-based film program comprising a weekly film screening followed by a guided group discussion intended to inspire debate and film literacy.

## CINE:2800 Digital Arts: An Introduction 3 s.h.

Introduction to potential of integrating art with technology to provide a foundation of skills and concepts through hands-on experimentation; lectures and demonstrations introduce key concepts and ideas as well as the history of digital arts; students develop skills that form a foundation for future investigation through labs; work may include using an Arduino, programming, and developing an interface to control a software project; final project is shared with the public in some way; critical discourse in the form of writing assignments allows for reflection and evaluation. GE: Engineering Be Creative. Same as ARTS:2800, CS:2800, DANC:2800, DIGA:2800, MUS:2800, THTR:2800.

## CINE:2863 Film/Video Production: Film Festival 3 s.h.

How to run a film festival; management and orchestration of annual Iowa City International Documentary Festival. Prerequisites: CINE:1834 with a minimum grade of C.

CINE:2864 Film/Video Production: Alternative Forms 3 s.h. Alternative or innovative video/film practices and technologies; varied topics. Prerequisites: CINE:1834 with a minimum grade of C.
CINE:2866 Film/Video Production: Nonfiction
3 s.h.
Individual and small group work to create video projects using nonfiction filmmaking techniques, from camera and lighting to postproduction. Prerequisites: CINE: 1834 with a minimum grade of C.

## CINE:2868 Film/Video Production: Fiction <br> 3 s.h.

Individual and small group work to create video projects using fiction filmmaking techniques, from camera and lighting to postproduction. Prerequisites: CINE: 1834 with a minimum grade of C.

## CINE:2869 Introduction to Intermedia 3 s.h.

Interdisciplinary focus; emphasis on conceptual, installation, video, time-based media, performance art. Prerequisites: (ARTS:1510 and ARTS:1520) or CINE:1834. Requirements: for CINE:2869—grade of C or higher in CINE:1834. Same as INTM:2710.

CINE:3050 Practicum: Teaching Assistant 1 s.h.
Training in a range of skills crucial to media education and teaching while expanding breadth and depth of student's film knowledge; practice-based practicum. Recommendations: junior or senior standing, and cinema BA major.
CINE:3080 Film/Video Production: The Business of
Filmmaking
Introduction to business-related arts production techniques and Introduction to business-related arts production techniques and
strategies; budgeting and basic accounting skills, grant writing, project conceptualization and planning, film producing and location scouting, distribution models, film festival submission, project summation.
Prerequisites: CINE:1601 with a minimum grade of C and CINE:1834 with a minimum grade of C .
CINE:3195 Undergraduate Seminar 3 s.h.
Focus on a significant text or critical problem. Prerequisites: CINE:1601 with a minimum grade of C and CINE: 1834 with a minimum grade of C . Requirements: cinema major, and junior or senior standing.
CINE:3310 Screenwriting Studies
Readings and research projects in history, theory, and analysis of screenwriting; preparation to complete screenplays in other courses; topics may include study of storytelling in sample scripts, literary adaptation, screenwriting in early and classical Hollywood, independent and global art cinema. Prerequisites: CINE: 1300 with a minimum grade of C and CINE: 1601 with a minimum grade of C and CINE: 1834 with a minimum grade of C.

CINE:3315 Topics in Screenwriting 3 s.h.
Diverse specialized topics related to the art, craft, history, and business of screenwriting for film, television, and new media platforms. Prerequisites: CINE: 1300 with a minimum grade of C and CINE: 1601 with a minimum grade of C and CINE: 1834 with a minimum grade of C .

## CINE:3361 Screenwriting: Short Form

3 s.h.
Introduction to basic principles of screenwriting; develop, write, and workshop screenplays for short film/video projects including fiction, nonfiction, and experimental work. Prerequisites: CINE: 1300 with a minimum grade of C and CINE: 1601 with a minimum grade of C and CINE:1834 with a minimum grade of C.
CINE:3367 Screenwriting: Long Form
3 s.h.
Introduction to basic principles of screenwriting; develop, write, and workshop screenplays for longer form film/video projects including fiction, nonfiction, and experimental work. Prerequisites: CINE:3361 with a minimum grade of C .
CINE:3750 Topics in Cinema and Culture 3 s.h.
One or more national cinemas in relation to social, historical, and cultural contexts. Prerequisites: CINE: 1601 with a minimum grade of C.

CINE:3865 Film/Video Production: Material of 16mm Filmmaking

3 s.h.
Individual work to create projects using 16 mm filmmaking techniques including camera operation, editing, lighting for film, found footage, and camera-less filmmaking; introduction to hand processing; production course. Prerequisites: CINE: 1834 with a minimum grade of C .

## CINE:3876 Video for Performance

Introduction to aesthetics and practical applications of digital media and video design for live performance including content creation, system design, and content optimization for media servers; students create digital video and animations and integrate them into live performance and entertainment events via projections, media servers, and digital displays using QLab Media Server and Adobe Creative Cloud (e.g., Illustrator, Photoshop, Premiere Pro, Audition, After Effects); for those with an interest in designing, creating, and displaying digital media for theatre, dance, concerts, corporate events, gallery installations, VJ sets, and architectural projections. GE: Engineering Be Creative. Same as DANC:3876, DIGA:3876, INTM:3876, THTR:3876.

## CINE:3878 Film and Media Practicum

1 s.h.
Research and production-oriented film and media practicum; individual and small-group work on a single film, video, or media production as determined by instructor; independent library and webbased research, group presentations, readings. Requirements: junior or senior standing.
CINE:4198 Honors Project I
3 s.h.
Requirements: standards met for honors in the major for the BA in cinema.
CINE:4199 Honors Project II
3 s.h.
Completion of honors project, working with a designated cinematic arts faculty member; content varies depending on specific projects proposed by the student, approved by the faculty member, in consultation with the director of undergraduate studies and any additional cinematic arts faculty members relevant to the project.
Prerequisites: CINE:4198. Requirements: standards met for honors in the major for the BA in cinema.

## CINE:4377 Advanced Screenwriting I

4 s.h.
Developing, writing, and workshopping screenplays for short film/ video projects including fiction, nonfiction, and experimental work; introduction to preproduction activities; exercises and journal assignments. Prerequisites: CINE: 3367 with a minimum grade of C .

## CINE:4378 Advanced Screenwriting II

4 s.h.
Students write a feature screenplay (105-115 pages) within the industry standard contract guidelines for independent and studio projects; completion of outline, beat sheet, treatment, and first draft; one rewrite. Prerequisites: CINE:4377 with a minimum grade of C.
CINE:4610 Studies in Film and Music
3 s.h.
Critical approaches to historical and contemporary interrelationships between film and music; soundtracks and film scores; popular song and cinema. Prerequisites: CINE: 1601 with a minimum grade of C . Same as MUS:4610.

## CINE:4618 Topics in World Cinemas

Issues in international film history and film theory. Prerequisites: CINE: 1601 with a minimum grade of C .
CINE:4620 Topics in Film Form, Style, and Theory 3 s.h.
Special issues and topics relevant to film form, style, and/or theory. Prerequisites: CINE: 1601 with a minimum grade of C .

## CINE:4705 Chicano Cinema

3 s.h.
History of Chicano independent and industry film and television production since the Chicano political and cultural movement began in the 1960s. Taught in English. Requirements: one Spanish literature or culture course numbered SPAN: 3200 or above, or one film studies course numbered above CINE:2100. Same as LATS:4805, SPAN:4805.

3 s.h. CINE:4821 Film/Video Production: Selected Topics 4 s.h.
Exploration of a particular genre, issue, or process; varied topics; individual work on several video projects. Prerequisites: CINE:2864 with a minimum grade of C or CINE: 2866 with a minimum grade of C or CINE: 2868 with a minimum grade of C or CINE:3865 with a minimum grade of C or CINE: 4841 with a minimum grade of C or CINE:4843 with a minimum grade of C or CINE: 4845 with a minimum grade of C or CINE:4862 with a minimum grade of C .

## CINE:4825 Digital Production: Animation 4 s.h.

Intermediate 3D modeling, motion graphics; student projects culminating in CDR or video presentation. Prerequisites: CINE:1834 with a minimum grade of C .

CINE:4841 Film/Video Production: Sound Design 4 s.h
Exploration of sound design for film and video, from recording to editing and mixing; individual work on several audio and video projects. Prerequisites: CINE:2864 with a minimum grade of C or CINE:2866 with a minimum grade of C or CINE: 2868 with a minimum grade of C or CINE: 3865 with a minimum grade of C or CINE:4821 with a minimum grade of C or CINE: 4841 with a minimum grade of C or CINE:4843 with a minimum grade of C or CINE:4845 with a minimum grade of C or CINE:4862 with a minimum grade of C or CINE: 4864 with a minimum grade of C .
CINE:4843 Film/Video Production: Image Design
Lighting strategies and techniques, camera work, composition, and postproduction; individual work on several video projects. Prerequisites: CINE:2863 with a minimum grade of C or CINE:2864 with a minimum grade of C or CINE: 2866 with a minimum grade of C or CINE: 2868 with a minimum grade of C or CINE: 3865 with a minimum grade of C or CINE: 3876 with a minimum grade of C .
CINE:4845 Film/Video Production: Editing
4 s.h.
Development of editing techniques and strategies; editing for impact, mood, story; individual work on several video projects. Prerequisites: CINE:2864 with a minimum grade of C or CINE: 2866 with a minimum grade of C or CINE:2868 with a minimum grade of C or CINE: 3865 with a minimum grade of C or CINE: 3876 with a minimum grade of C or CINE:4841 with a minimum grade of C or CINE:4843 with a minimum grade of C or CINE:4862 with a minimum grade of C .
CINE:4862 Film/Video Production: Advanced Video 4 s.h. Expanded narrative or nonfiction/documentary topics; individual work on several video projects. Prerequisites: CINE:2864 with a minimum grade of C or CINE:2866 with a minimum grade of C or CINE:2868 with a minimum grade of C or THTR:3876 with a minimum grade of C or CINE: 4821 with a minimum grade of C or CINE: 4841 with a minimum grade of C or CINE:4843 with a minimum grade of C or CINE:4845 with a minimum grade of C.

CINE:4864 Film Production: Advanced 16mm 4 s.h.
Processes and approaches to short 16 mm film; advanced cameras; sync-sound techniques; optical printing; individual work on a single project or several short projects. Prerequisites: CINE:3865 with a minimum grade of C. Requirements: for graduate studentsCINE:3865 or recently shot film. Recommendations: for graduate students-CINE:3865 strongly encouraged.

CINE:4890 Media Production Workshop 4 s.h.
Development, production, and realization of a self-directed project; methods and projects may include film, video, screenwriting, or hybrid forms. Prerequisites: THTR:3876 with a minimum grade of B- or CINE:4821 with a minimum grade of B- or CINE:4841 with a minimum grade of B - or CINE:4843 with a minimum grade of B or CINE:4845 with a minimum grade of B- or CINE:4862 with a minimum grade of B - or CINE:4864 with a minimum grade of B -.

## CINE:5500 Success in Graduate Studies 1-3 s.h.

Introduction to graduate studies in film and media-related areas to maximize student success through a series of workshops devoted to research and writing, professionalization, and information sessions with key graduate-related offices and resources on campus.

## CINE:5673 Advanced Film Theory <br> 3 s.h.

A major figure, issue, or approach in film theory.
CINE:5675 Advanced Film History
3 s.h.
A major period or topic in film history; issues in film historiography, research.

CINE:5890 Colloquium in Film and Video Production 4 s.h.
Projects and critical studies; focus on varied topics including process and theoretical issues; workshop, readings, production. Recommendations: previous experience with video production; prior cinema courses or filmmaking experience helpful, but not required.

## CINE:5900 MA Thesis in Film Studies

3 s.h.
Students research and write their MA thesis essay under close supervision of an advisor; for MA in film studies students in third and fourth semesters.

## CINE:6992 Individual Study

arr.
Opportunity for prearranged independent study with faculty.
Requirements: MA, MFA, or PhD candidate in cinematic arts.
CINE:7615 Film Studies Seminar

$$
3 \text { s.h. }
$$

A major figure, issue, or approach in film theory.
CINE:7700 PhD Comprehensive Exam Preparation
3 s.h.
Students plan and study for their fourth semester comprehensive exams under close supervision of an advisor; for PhD in film studies students in their third semester.
CINE:7992 Thesis

## Cinema, BA

The major in cinema prepares students as engaged participants in the ever-changing media environment by offering them the conceptual and practical tools for analyzing and creating films informed by a dialogue between film studies and film production. Students build a comprehensive knowledge of motion pictures across topics ranging from studies courses focused on major film movements, directors, and critical debates in the history and theory of cinema, and production courses focused on narrative, documentary, and experimental films, using 16 mm and digital technologies.

## Learning Outcomes

Cinema graduates will be able to:

- develop a broad proficiency in cinematic creativity in areas such as editing, cinematography, screenwriting, sound design, and animation as well as the business of filmmaking, while emphasizing their own expressive vision;
- display an understanding of preproduction, production, and postproduction in the filmmaking process; succinctly describe, pitch, and reflect on their own filmmaking practice; benefit from having assessed and evaluated their own and their peers' films in workshops that emphasize constructive critique;
- speak confidently, read critically, and research and write persuasively about the history and theory of cinema as a multifaceted medium with artistic, educational, and cultural implications;
- recognize and critically evaluate the variety of film styles and practices from historical and contemporary, as well as international perspectives;
- demonstrate the mutually beneficial skills developed across film production and film studies courses by making films informed by film studies and by writing essays informed by filmmaking;
- display critical thinking about the relationship between form and content in moving images;
- apply this knowledge and skills to a range of 21st-century careers permeated by media production, whether in the film and culture industries; media, arts, and marketing professions; or higher education and other related areas; and
- understand and use cinema as a powerful tool for learning about the world and creating positive change as an engaged global citizen.

## Requirements

The Bachelor of Arts with a major in cinema requires a minimum of 120 s.h., including 33 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. A maximum of 56 s.h. may be taken in Department of Cinematic Arts courses (prefix CINE). A maximum of 9 s.h. of transfer credit may be counted toward the cinema major.

The major in cinema is an individualized, interdisciplinary study of film and the production of creative work in film, video, and interactive multimedia. It is designed to promote cultural and artistic awareness, to increase speaking and writing skills, and to develop capacities for systematic reasoning and effective production in cinema arts.

All students are expected to gain a perspective on the study and the production of film, video, or digital media while becoming acquainted with the historical, critical, and theoretical issues of the area. In conjunction with an appropriate overall curriculum, the major in cinema can offer effective preparation for continuing study or creative
work in the humanities, arts, and cinema; provide a solid foundation for careers in film, video, television, and digital production; and lead to careers in arts administration, advertising, and business.

Cinema students may earn a screenwriting arts major if the requirements for each major are met. Both majors require CINE: 1601 Introduction to Film Analysis and CINE: 1834 Modes of Film and Video Production. Those two courses are required for both majors and are prerequisites for other key courses in the major. Students must earn a grade of C or higher in each of these courses to advance in the major. Students completing both the cinema and screenwriting arts majors may only double count CINE:1601 (3 s.h.) and CINE:1834 (4 s.h.) for a total of $7 \mathrm{~s} . \mathrm{h}$. A cinema and screenwriting arts double major requires at least $68 \mathrm{~s} . \mathrm{h}$. of coursework in the majors.

The course CINE: 1834 Modes of Film and Video Production is the only production course required for the cinema major. Students may use more advanced production courses to complete the major, but admission to these courses is limited and depends on the student's achievement in prerequisite production courses.

The BA with a major in cinema requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Required Courses | 13 |
| Electives Courses | 20 |

## Required Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Introduction to Film Analysis <br> (with a grade of C or higher) <br> CINE:1601 | Modes of Film and Video <br> Production (with a grade of C or <br> higher) |
| CINE:1834 | Introduction to Film Theory | 4 |
| CINE:2615 | Undergraduate Seminar | 3 |
| CINE:3195 |  | 3 |

## Elective Courses

An additional 20 s.h. in elective cinematic arts (prefix CINE) coursework is required. From the 20 s.h., students must select at least 6 s.h. in advanced film studies courses. Courses CINE: 1100 The Art of Smartphone Filmmaking and CINE: 1602 Introduction to Film Studies will not count toward the 20 s.h. of required elective credit.

## Advanced Film Studies Courses

Advanced film studies courses may be selected from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least 6 s.h. from these: |  |  |
| CINE:3195 | Undergraduate Seminar <br> (students receive advanced <br> film studies credit only if <br> they take this course a second <br> time; the first enrollment is <br> applied toward the capstone <br> requirement) | 3 |
| CINE:3750 | Topics in Cinema and Culture |  |
| CINE:4610 | Studies in Film and Music | 3 |
| CINE:4618 | Topics in World Cinemas | 3 |
| CINE:4620 | Topics in Film Form, Style, and <br> Theory | 3 |
| CINE:4705 | Chicano Cinema | 3 |

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in the major. Departmental honors students must maintain a cumulative grade-point average (GPA) of at least 3.33 in all UI coursework and a cumulative GPA of at least 3.50 in all cinematic arts coursework.

Once a student has earned 75 s.h., the student submits a written proposal for a honors thesis, screenwriting, or production project. The proposal must be approved by the faculty member who heads the student's honors thesis/project committee; the committee must be composed of at least two faculty members from the Department of Cinematic Arts. For more specific honors thesis/project requirements in the cinema major, including required courses, contact the Department of Cinematic Arts or visit the department's Honors in Cinematic Arts website.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the cinema major.

## Career Advancement

Because the film and television industries include a wide array of jobs, the cinema degree is not a direct track to any one specific career, but it does provide a solid foundation for entry into this field.

University of Iowa graduates have found work on sets in Hollywood and New York as location managers, editors, camera assistants, writers, producer's assistants, location managers, casting agents, and more. Graduates also have found work in San Francisco, Chicago, Milwaukee, Seattle, and many other cities, with jobs in distribution, programming, documentary research, and education, among others.
The U.S. Bureau of Labor Statistics notes in the Occupational Outlook Handbook that occupations for film and video editors and camera operators are expected to grow by $18 \%$ over the next decade, which is much higher than average job growth. Related jobs in broadcast and sound engineering are expected to grow by $9 \%$, and film archivists and curatorial jobs are expected to grow $11 \%$, both much higher than average.
In addition to student-run clubs and professional experiencesStudent Video Production (SVP); panels with faculty members, current students, and alumni now in the industry; and a wealth of internship opportunities-cinema students have the option to enroll in CINE:3080 Film/Video Production: The Business of Filmmaking, a course devoted to careers in cinema.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

CINE: 1100 The Art of Smartphone Filmmaking and CINE: 1602 Introduction to Film Studies will not count toward the 20 s.h. of required elective cinematic arts credit.

Students must take CINE:1601 Introduction to Film Analysis before or with CINE: 1834 Modes of Film and Video Production; both courses require grades of C or higher.

Before the fifth semester begins: at least two courses in the major, including CINE:1601 Introduction to Film Analysis and CINE:1834 Modes of Film and Video Production; students must earn grades of C or higher in both courses.

Before the seventh semester begins: at least five more courses in the major (total of seven), including CINE:2615 Introduction to Film Theory, and at least 90 s.h. earned toward the degree.
Before the eighth semester begins: at least three more courses in the major preferably including CINE:3195 Undergraduate Seminar.

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Cinema, BA

| Course Title | Hours |
| :---: | :---: |

f Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
g Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
h Students complete 20 s.h. total of elective cinema arts credit, of which at least 6 s.h. must be selected from CINE:3195, CINE:3750, CINE:4610, CINE:4620, CINE:4705.
i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Screenwriting Arts, BA

The major in screenwriting arts draws on the long and historic creative writing tradition at the University of Iowa by expanding undergraduate offerings to include a program in screenwriting. Students are instructed on practical skills and knowledge needed to become successful members of the screenwriting industry, but they also learn about the history and theories related to screenwriting, encouraging writing and the production of cinema to rise to the level of art.

## Learning Outcomes

Screenwriting arts students achieve nine learning outcomes within three major areas.

## Obtaining Foundational Understanding and Skills

Students will:

- find and form ideas;
- learn research methods to enhance creativity;
- understand the history and genres of narrative forms and styles; and
- learn the history of world cinema and film language.

## Executing, Developing, and Completing Screenplay Projects

Students will:

- engage with step-by-step screenwriting models; and
- edit, workshop, and revise screenwriting drafts.

## Practical Skills and Screen Industry Knowledge

Students will learn:

- oral communication skills;
- filmmaking processes including sound, cinematography, editing, and directing; and
- business and industrial dimensions through networking and building communities.

## Requirements

The Bachelor of Arts with a major in screenwriting arts requires a minimum of 120 s.h., including 42 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They must earn a minimum of 30 s.h. for the major at the University of Iowa, with at least 15 s.h. in cinematic arts courses (prefix CINE) taken at the University of Iowa. A maximum of 56 s.h. may be taken in Department of Cinematic Arts courses (prefix CINE).

Students may earn a minor in cinema. They must complete at least 12 s.h. in courses offered by the Department of Cinematic Arts that are not required for the screenwriting arts major. A maximum of 3 s.h. may count for both the cinema minor and the screenwriting arts major.
Screenwriting arts students may earn a cinema major if the requirements for each major are met. Both majors require CINE: 1601 Introduction to Film Analysis and CINE: 1834 Modes of Film and Video Production. Those two courses are required for both majors and are prerequisites for other key courses in the major. Students must earn a grade of C or higher in each of these courses to advance in the major. Students completing both the screenwriting arts and cinema
majors may only double count CINE:1601 (3 s.h.) and CINE:1834 (4 s.h.) for a total of $7 \mathrm{~s} . \mathrm{h}$. A screenwriting arts and cinema double major requires at least $68 \mathrm{~s} . \mathrm{h}$. of coursework in the majors.

The BA with a major in screenwriting arts requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Foundation Courses | 13 |
| Core Courses | 20 |
| Elective Courses | 9 |

## Foundation Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Foundations of Screenwriting <br> (with a grade of C or higher) | 3 |
| CINE:1300 | Introduction to Film Analysis <br> (with a grade of C or higher) | 3 |
| CINE:1601 | Modes of Film and Video <br> Production (with a grade of C or <br> higher) | 4 |
| One of these: | Fiction Writing |  |
| CW:2870 | Playwriting I | 3 |
| THTR:2301 |  | 3 |

Core Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| CINE:3310 | Screenwriting Studies | 3 |
| CINE:3361 | Screenwriting: Short Form | 3 |
| CINE:3367 | Screenwriting: Long Form | 3 |
| CINE:4377 | Advanced Screenwriting I | 4 |
| CINE:4378 | Advanced Screenwriting II | 4 |
| One of these: | Writing Film Reviews and | 3 |
| CINE:2600 | Criticism |  |
| CINE:2615 | Introduction to Film Theory | 3 |
| CINE:2868 | Film/Video Production: Fiction | 3 |

## Experiential Learning Opportunities

Students may earn up to 6 s.h. of experiential learning credit through the following courses: CINE: 1185 Internship, CINE: 1560 Cinematic Arts Ambassador Seminar, and/or CINE:3050 Practicum: Teaching Assistant.

The major does not require an internship, but an internship (CINE:1185) is an elective course option (see "Elective Courses" below). The Department of Cinematic Arts strongly encourages students to participate in internships and related activities.

## Elective Courses

Students must complete a minimum of 9 s.h. from the following list of electives that includes related courses on writing fiction, nonfiction, poetry, or other genres, and on production, acting, and directing. Many of these courses are repeatable for credit, allowing students to focus on a single genre or production experience if they choose to. Some of these courses have prerequisites; students must complete all of a course's prerequisites before they may register for that course. Students should confer with their advisor before they choose elective coursework.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Cinematic Arts |  |  |
| CINE: 1185 | Internship | 1-3 |

TRNS:3208

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in the major. Departmental honors students must maintain a cumulative grade-point average (GPA) of at least 3.33 in all UI coursework and a cumulative GPA of at least 3.50 in all cinematic arts coursework.
Once a student has earned 75 s.h., the student submits a written proposal for an honors thesis, screenwriting, or production project. The proposal must be approved by the faculty member who heads the student's honors thesis/project committee; the committee must be composed of at least two faculty members from the Department of Cinematic Arts. For more specific honors thesis/project requirements, including required courses, contact the Department of Cinematic Arts or visit the department's Honors in Cinematic Arts website.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.
Membership in the UI Honors Program is not required to earn honors in the screenwriting arts major.

## Career Advancement

Screenwriting arts majors find employment as writers in the entertainment field, including filmmaking as well as television, marketing, advertising, public relations, and other related areas that specialize in communication through words and images. The U.S. Bureau of Labor Statistics notes in the Occupational Outlook Handbook that occupations for writers are expected to grow by $8 \%$ over the next decade. Related occupations such as public relations will grow at around $10 \%$ as well as positions in advertising, promotions, and marketing. Students who study screenwriting will possess the knowledge and skills needed for entry into these related positions.
Screenwriting arts students benefit from the University of Iowa's status as a renowned writing university. The Department of Cinematic Arts organizes panels with faculty members, current students, and alumni working in the industry. In addition to the wealth of internship opportunities at the University of Iowa and surrounding areas, students enroll in CINE:3310 Screenwriting Studies, which addresses career opportunities for screenwriters (e.g., labs, workshops, fellowships) and have the option to enroll in CINE:3080 Film/Video Production: The Business of Filmmaking, a course devoted to careers in cinema.
The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the fifth semester begins: at least five courses in the major, including CINE: 1300 Foundations of Screenwriting (with a grade of C or higher), CINE:1601 Introduction to Film Analysis (with a grade of C or higher), CINE: 1834 Modes of Film and Video Production (with a grade of C or higher), CW:2870 Fiction Writing or THTR:2301 Playwriting I, and one required elective course.

Before the seventh semester begins: at least four more courses in the major (total of nine), including CINE:2600 Writing Film Reviews and Criticism or CINE:2615 Introduction to Film Theory or CINE:2868 Film/Video Production: Fiction, CINE:3310 Screenwriting Studies, CINE:3361 Screenwriting: Short Form, and CINE:3367 Screenwriting: Long Form.
Before the eighth semester begins: at least three more courses in the major, including CINE:4377 Advanced Screenwriting I and one required elective course.

During the eighth semester: enrollment in all remaining coursework in the major, including CINE:4378 Advanced Screenwriting II, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b COMM:2069 fulfills the GE CLAS Core Diversity and Inclusion requirement and also counts as semester hours toward the Screenwriting Arts requirements.
c GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
d THTR:2301 also satisfies the Literary, Visual, and Performing Arts GE requirement.
e Required if taking CW:2870 as the foundation course elective rather than THTR:2301.
f Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
g Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
h Students must complete at least 9 s.h. of related coursework on writing fiction, nonfiction, poetry, or other genres, and on production, acting, and directing; see the General Catalog for list of approved courses.
i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Cinema, Minor

## Requirements

The undergraduate minor in cinema requires a minimum of 15 s.h. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. They may count 3 s.h. in approved transfer credit toward the minor. Coursework in the minor may not be taken pass/nonpass.
A maximum of 3 s.h. may be counted toward the cinema minor and the screenwriting arts major.

## Required Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Introduction to Film Analysis |  |
| CINE:1601 |  | 3 |
| Additional cinema coursework (prefix CINE) <br> numbered 1100 and above with the exception of <br> CINE:1602 | 12 |  |

## Film Studies, MA

## Learning Outcomes

Students will:

- build requisite skills for PhD-level study, including academic research and writing, public presentations, publishing, and grant applications;
- identify and apply concepts of film and media theory in scholarship as well as pedagogical practice;
- identify and apply methods of film historiography, including evaluating and working with archival materials;
- develop a broad understanding of the discipline's history, current status, and potential future;
- acquire knowledge of cinema's historical periods, global variations, and diverse forms; and
- acquire a diverse set of professionalization skills in order to explore film- and media-related career possibilities within and beyond academia.

## Requirements

The Master of Arts program in film studies requires a minimum of 36 s.h. of graduate credit, of which 24 s.h. must be earned at the University of Iowa. Students must earn a minimum program gradepoint average of 3.25 .
The 36 s.h. are typically acquired by taking 12 graduate-level courses that span two years. The program's focus is on advanced film theory and film history in an international context.

Students meet formal degree requirements through coursework, a written MA thesis essay produced in the second year, and followed by an oral examination.
The MA with a major in film studies requires the following.

## Core Requirements

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Success in Graduate Studies <br> (consult advisor about semester <br> hour enrollment) | $1-3$ |
| CINE:5500 | Advanced Film Theory | 3 |
| CINE:5673 | Advanced Film History | 3 |
| CINE:5675 | MA Thesis in Film Studies <br> (taken twice) | 6 |

## Language Study

Up to 6 s.h. in languages and literatures courses numbered 3000 or above in an area other than English may be counted toward the degree.

## Electives

Students are required to enroll in the two graduate courses offered by the Department of Cinematic Arts each semester. This requirement of two per semester does not include the required CINE:5500 Success in Graduate Studies (first semester) or CINE:5900 MA Thesis in Film Studies (third and fourth semesters). Remaining elective hours may be taken in courses selected from other departments; students should consult their advisor.
More information on the program is available on the Department of Cinematic Arts website.

## Admission

A faculty committee chaired by the head of film studies evaluates applications to the MA program. Application materials should include undergraduate and/or graduate transcripts, a personal statement, a writing sample, three letters of recommendation, and samples of creative work when relevant. Admission decisions are based on the full range of an applicant's accomplishments and evidence that the applicant will fit the elements of the program and will thrive in the department.
Minimal admission requirements: Applicants should have a BA in film studies or a related discipline.
All applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. Information about the application process is available on the Department of Cinematic Arts website and the Graduate Admissions website.

## Career Advancement

The Master of Arts degree typically prepares students for continued, advanced graduate work in film studies at the University of Iowa or elsewhere. However, students also have used their MA training in film theory and history to seek careers in other areas, including film criticism or positions at film archives or film festivals, or within various facets of the film industry.

The Graduate College is prepared to help graduates explore careers related to or that build upon their training. In conjunction with the Graduate College, the Department of Cinematic Arts also is committed to helping graduate students explore a range of alternative careers that take advantage of their specific training. In addition, the Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Given the program's emphasis upon the study of film in an international context, foreign language acquisition is considered to be highly advantageous. Up to 6 s.h. in languages and literatures courses numbered 3000 or above in an area other than English may be counted toward the degree.
b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
d Does not count as one of the two Film Studies courses required each semester.
e Must be taken during first year fall semester.
f MA thesis must be submitted to the committee at least two weeks prior to the Graduate College defense deadline for spring.

## Film and Video Production, MFA

## Learning Outcomes

Students will:

- develop an artistic vision that will inform an emerging practice of film and video production, and begin to develop a portfolio;
- learn the advanced technical aspects of production from cinematography and editing to sound design;
- acquire a broad range of knowledge in film and media theories and histories;
- develop skills and experience in academic research and critical writing; and
- develop professionally, including showing work at festivals, applying for grants and residencies, acquiring requisite skills for academic employment, and learning the skills for successful job applications.

## Requirements

The Master of Fine Arts program in film and video production requires 59 s.h. of graduate credit, 24 of which must be earned at the University of Iowa. Students must earn a minimum program gradepoint average of 3.00 .
Graduate credit is typically acquired through advanced production courses, graduate colloquia, and advising-centered thesis courses taken over three years. With a focus on expanded documentary, experimental, hybrid, and narrative media forms, the curriculum combines creative and scholarly coursework with the aim of producing a body of innovative, artistic work in film, digital media, multimedia installation, and/or animation. Degree requirements include advanced coursework in film/media theory or history, annual public presentations and critiques, the development of an artist statement, a thesis paper, and a creative thesis project.
Students may not enroll in cinematic arts courses numbered below CINE:5000 with the exception of the following courses that count toward their degree: CINE:4821, CINE:4841, CINE:4843, CINE:4845, CINE:4862, CINE:4864, and CINE:4890. These courses also count toward the degree if they are taken as electives: CINE:3865 Film/Video Production: Material of 16 mm Filmmaking, CINE:4377 Advanced Screenwriting I, CINE:4378 Advanced Screenwriting II. Candidates may enroll in courses numbered below 5000 from areas outside of cinematic arts but those courses do not count toward their degree.
Students may take CINE:4890 Media Production Workshop and CINE:5890 Colloquium in Film and Video Production as electives in their third year while they complete their thesis requirement.

The MFA with a major in film and video production requires the following coursework.

## Required Courses

This coursework must be taken before thesis clearance.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: |  |  |
| CINE:4890 | Media Production Workshop | 4 |
| CINE:5890 | Colloquium in Film and Video <br> Production (taken twice) | 8 |

[^1]| CINE:4821 | Film/Video Production: <br> Selected Topics | 4 |
| :--- | :--- | :--- |
| CINE:4841 | Film/Video Production: Sound <br> Design | 4 |
| CINE:4843 | Film/Video Production: Image <br> Design | 4 |
| CINE:4845 | Film/Video Production: Editing <br> CINE:4862Film/Video Production: <br> Advanced Video | 4 |
| CINE:4864 | Film Production: Advanced <br> 16mm | 4 |
| All of these: | 4 |  |
| Two mid-level graduate courses in film theory/history <br> Two courses from related areas outside the Department <br> of Cinematic Arts <br> Additional upper-level electives | 6 |  |

## Required Courses After Thesis Clearance

| Course $\#$ | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | 12 |
| CINE:7992 | Thesis | 6 |
| Additional upper-level electives |  |  |

Students should consult their advisor for specific information related to MFA requirements.

## Admission

A faculty committee chaired by the head of film and video production evaluates applications to the MFA program. Application materials should include undergraduate and/or graduate transcripts, a personal statement, three letters of recommendation, samples of creative work, test scores, and writing samples when relevant. Admission decisions are based on the full range of an applicant's accomplishments and evidence that the applicant will thrive in the department's program. Previous academic experience in moving image production is desirable but not required.

All applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. Information about the application process is available on the Department of Cinematic Arts website and the Graduate Admissions website.

## Career Advancement

The film and video production program has a remarkable job placement record, with graduates located in faculty positions at major research universities and prestigious liberal arts colleges throughout the world. Through their creative work and published research, graduates are visible and productive contributors to film and video production and related disciplines.
Within the program, faculty mentor students toward professional careers by supervising their development as both innovative moving-image makers and scholars. Regular one-on-one advising sessions, group critiques, workshops on topics such as film festival submissions, job interviews, and related topics prepare students for academic and artistic careers. Students also are regularly advised on applying for grants and awards to facilitate their advanced research, whether conducted in Iowa or elsewhere.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

f Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
g Completion of all degree requirements including MFA thesis project.

## Film Studies, PhD

## Learning Outcomes

Students will:

- solidify skills for work in the discipline, including researching and writing a book-length study, public presentations, publishing, grant applications, etc.;
- gain confidence and fluency working with concepts of film and media theory and learn to synthesize, adapt, contextualize, and critique theoretical approaches;
- acquire and mobilize advanced primary research skills and deepen their ability to work with models and methods of film historiography, and to articulate historical sources with theoretical approaches;
- acquire and mobilize an advanced understanding of the discipline's history and current status;
- acquire and mobilize advanced discipline-level knowledge in historical periods, global variations, and diverse forms, and learn to take a position in the future development of film and media studies;
- learn the fundamental skills for undergraduate-level teaching in film and media studies; and
- deepen professionalization skills in order to explore film and media-related career possibilities within and beyond academia (for example, in media and arts organizations, publishing, teaching, archives, film programming, and festivals).

## Requirements

The Doctor of Philosophy program in film studies requires a minimum of 72 s.h. of graduate credit, of which 39 s.h. must be earned at the University of Iowa after a student has received their MA degree. Semester hours are earned through coursework, and eventually work focused on the completion of a dissertation. Students must earn a minimum program grade-point average of 3.25 .
The program's coursework is broadly concentrated in film history and film theory, with specific courses offered on a wide range of topics. With the regular consultation and guidance of a faculty advisor and committee, students formulate and pursue a plan of study during their first year in the program; prepare and conduct a written and oral comprehensive examination typically in their second or third year; write and present a dissertation prospectus to a carefully selected committee; and complete a dissertation in an area of advanced, original research that is defended orally in a meeting with the student's committee prior to final deposit. A detailed summary of the requirements for the PhD in film studies is available on the Department of Cinematic Arts website.

The PhD with a major in film studies requires the following coursework.

## Core Requirements

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these (must be taken at the University of Iowa): | (consult advisor) |  |
| CINE:5500 | Success in Graduate Studies <br> (consen | $1-3$ |
| CINE:5673 | Advanced Film Theory (taken <br> twice) | 6 |
| CINE:5675 | Advanced Film History (taken <br> twice) | 6 |
| CINE:7615 | Film Studies Seminar | 3 |

CINE:7700

CINE:7992
Seminar course numbered 7000 or above

## Electives

Students are required to enroll in the two graduate courses offered by the Department of Cinematic Arts each semester. This requirement of two per semester does not include the required CINE:5500 Success in Graduate Studies (first semester) or CINE:7700 PhD Comprehensive Exam Preparation (typically taken in the fourth semester when the student does their comprehensive exams). Remaining elective hours may be taken in courses selected from other departments; students should consult their advisor.

More information on the program is available on the Department of Cinematic Arts website.

## Admission

A faculty committee chaired by the head of film studies evaluates applications to the PhD program. Application materials should include undergraduate and/or graduate transcripts, a personal statement, a writing sample, three letters of recommendation, and samples of creative work when relevant. Admission decisions are based on the full range of an applicant's accomplishments and evidence that the applicant will fit the elements of the program and thrive in the department.
Minimal admission requirements: Applicants should have a BA in film studies or a related discipline and either an MA in film studies or a related discipline, or an MFA in film production with significant experience in film studies.

All applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. Information about the application process is available on the Department of Cinematic Arts website and the Graduate Admissions website.

## Career Advancement

The PhD program in film studies has an impressive job placement record, with graduates located in faculty positions at major research universities and prestigious liberal arts colleges throughout the world. Graduates are, through their published research, visible and productive contributors to film studies and related disciplines, and many have served in leadership positions within professional organizations such as the Society for Cinema and Media Studies.

Within the program, faculty mentor students toward professional careers by supervising their development as both effective teachers and scholars. Regular workshops offered on topics such as journal and conference submissions, job interviews, and related topics help prepare students for careers within and beyond academia. Students also are regularly advised on applying for grants and awards to facilitate their advanced research, whether conducted in Iowa or elsewhere.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

f Must pass prospectus no later than the semester following successful completion of the comprehensive exam.
g Typically satisfied with master's graduate transfer credit.
h Dissertation submission and defense.

## Classics

## Chair

- Craig A. Gibson

Undergraduate majors: ancient civilization (BA); classical languages (BA)
Undergraduate minors: ancient civilization; classical languages; Greek; health and the human condition; Latin

Postbaccalaureate certificate: classics
Graduate degrees: MA in classics; MA in Greek; MA in Latin; PhD in classics

Faculty: https://classics.uiowa.edu/people
Website: https://classics.uiowa.edu/
Classics is the study of ancient languages, literatures, and cultures of the Mediterranean basin from approximately 2000 B.C.E. to 800 C.E. It embraces three civilizations-the Minoan-Mycenaean, Greek, and Roman; two languages-Greek and Latin; and a geographical area including Europe, North Africa, Egypt, and the Near East. The Department of Classics provides a basis for understanding and interpreting the contribution of the ancient world to life in the present and the future.

The department offers a substantial selection of courses taught in English at the undergraduate and graduate levels; several are approved for the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. Undergraduates in all majors may satisfy the World Languages requirement of the GE CLAS Core with courses in Greek or Latin; see "Language for GE CLAS Core" below. The department's First-Year Seminar introduces entering undergraduates to classics
The Department of Classics also administers the interdisciplinary minor in health and the human condition for undergraduates.

## Language for GE CLAS Core

The Department of Classics offers course sequences in Greek and Latin that students in all majors may use to fulfill the World Languages requirement of the College of Liberal Arts and Sciences GE CLAS Core.

Students who have had previous coursework or other experience with Greek or Latin should take the appropriate language placement test, which helps determine the level at which a student should begin Greek or Latin language study at the University of Iowa.

## Greek

Students who wish to fulfill the GE CLAS Core World Languages requirement with Greek should complete the following sequence.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CLSG:1001 | Classical and New Testament | 5 |
|  | Greek I | 5 |
| CLSG:1002 | Classical and New Testament |  |
|  | Greek II | 3 |
| CLSG:2001 | Second-Year Greek I | 3 |

## Latin

Students who wish to fulfill the GE CLAS Core World Languages requirement with Latin should complete the following sequence.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CLSL:1001 | Elementary Latin I | 5 |
| CLSL:1002 | Elementary Latin II | 5 |

| CLSL:2001 | World of Cicero | 3 |
| :--- | :--- | :--- |
| CLSL:2002 | Golden Age of Roman Poetry | 3 |

## Minors

- Minor in Ancient Civilization [p. 247]
- Minor in Classical Languages [p. 248]
- Minor in Greek [p. 249]
- Minor in Health and the Human Condition [p. 251]
- Minor in Latin [p. 252]

## Postbaccalaureate Program of Study

 Certificate- Certificate in Classics [p. 254]

## Graduate Programs of Study

## Majors

- Master of Arts in Classics [p. 255]
- Master of Arts in Greek [p. 256]
- Master of Arts in Latin [p. 257]
- Doctor of Philosophy in Classics [p. 258]

## Facilities

University of Iowa Libraries' Main Library and the Art Library house extensive collections of classical texts and uninterrupted runs of classical periodicals from 1850 that facilitate research in the major areas of Greek and Roman civilization. The Department of Classics has a varied collection of slides on classical subjects and a small library of reference works, texts, and issues of classical and archaeological journals. The department's classical museum contains a small collection of coins, vases, and facsimiles in bronze from Mycenae, Pompeii, and Herculaneum.
The university is a supporting institution of the American School of Classical Studies at Athens, the American Academy in Rome, and the Intercollegiate Center for Classical Studies in Rome. Consult the director of undergraduate studies for more information.

The department offers students the opportunity to participate in an archaeological dig during the summer. Contact the Department of Classics in mid-February for details.

## Courses

- Classics: Ancient Civilizations Courses [p. 233]
- Greek Courses [p. 237]
- Latin Courses [p. 238]

## Classics: Ancient Civilizations Courses

All readings for these courses are in English; previous knowledge of Greek or Latin is not required.

## CLSA:1000 First-Year Seminar

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
CLSA:1010 Hero, God, Mortal: Literature of Greece 3 s.h. Ancient Greek literature and culture as it responded to Homer; may include genre (e.g., epic to tragedy), religion, changing concept of hero, interaction with Mediterranean cultures, myth versus history. GE: Literary, Visual, and Performing Arts.

CLSA:1020 Love and Glory: The Literature of Rome 3 s.h. Main themes and works of ancient Roman literature; works reflecting conflict of personal desire and public self in Rome. GE: Literary, Visual, and Performing Arts.

## CLSA:1040 World Literature in Translation I

Reading and analysis of major literary texts from writing's origins to 1700 in the Mediterranean, Asia, and Africa; interrelationship of literature and history. Taught in English. GE: Literary, Visual, and Performing Arts. Same as TRNS:1240.

## CLSA:1181 Ancient Medicine

3 s.h.
Thematic examination of theories and practices of Greco-Roman physicians, which in turn became the medical tradition of medieval Islamic world and European medicine until mid-19th century; historical medical terms, theories, and practices. GE: Historical Perspectives. Same as GHS:1181.
CLSA:1200 Interpretation of Ancient Literature 3 s.h. Development of skills in literary interpretation through study of ancient Greek and Roman literature in translation; students read dramatic and nondramatic poetry, fictional and nonfictional prose, non-Greco-Roman literature of ancient Mediterranean, and classical reception; 8th century B.C.E. to 4th century C.E. GE: Interpretation of Literature.

## CLSA:1340 Magic in the Ancient World

3 s.h.
Ancient Greek and Roman writings on magic, including ancient spells and charms. GE: Values and Culture.

## CLSA:1400 Biblical Archaeology 1,3 s.h.

Introduction to the science of archaeology and the archaeology of the lands of the Bible to understand historical, cultural, economic, linguistic, and religious backgrounds of the Bible and biblical periods. Same as RELS: 1400 .

## CLSA:1415 Ancient Origins of Religious Conflict 3 s.h.

Examination of ancient origins of the world's modern religions, their diversity, and religious conflict worldwide; ancient Mesopotamian and Mediterranean religions, Judaism, Christianity, and Islam; international events, fundamentalism, and protest movements. GE: Diversity and Inclusion.

CLSA:1454 The Bible in Antiquity I: The Old Testament 3 s.h. Introduction to the Hebrew Bible/Old Testament; examination of individual writings that comprise it within their historical and cultural contexts; analysis of how literary contents of the Bible reflect, reject, or otherwise interact with cultural and historical circumstances of the times.
CLSA: 1455 The Bible in Antiquity II: The New Testament 3 s.h. Historical and systems analysis of the New Testament's creation as part of the Roman Empire.

## CLSA:1740 Writing Strategies: Word Origins and Word

 Choice3 s.h.
Study of words, their meanings, and their origins combined with writing; words and word histories; role of English language in the world. GE: Literary, Visual, and Performing Arts. Same as WRIT:1740.

CLSA:1805 Legends and Heroes of Ancient Rome
Introduction to narratives of Roman heroes from Livy, Ovid, and Plutarch; background information for further study in classics.

CLSA:1809 Ancient World on the Modern Screen 3 s.h. Cinematic depictions of the classical world compared with scholarly views; selected films and primary ancient sources of the same period. GE: Literary, Visual, and Performing Arts.

CLSA:1830 Greek Civilization
3 s.h.
History, literature, art, architecture, religion, social life ca. 3000
B.C.E. to second century B.C.E. GE: Historical Perspectives.

CLSA:1840 Roman Civilization
3 s.h.
History, literature, politics, religion, social structure from eighth century B.C.E. to second century C.E. GE: Historical Perspectives.

CLSA:1875 Ancient Sports and Leisure 3 s.h Sports, games, and hobbies in the ancient world, primarily Greece and Rome, 1500 B.C.E. to 500 C.E.; ancient Olympic games, Roman festival games; anthropology of sport. GE: Values and Culture.

## CLSA:1910 Ancient and Modern Worlds: Common Problems

3 s.h.
Exploration of how many modern world problems can profitably be compared to problems arising in the ancient Mediterranean world and from ancient peoples' responses to those problems.

## CLSA:2016 Classical Mythology

3 s.h.
Introduction to ancient Greek and Roman myths with focus on using these sources as interpretations of culture and human psyche; emphasis on flexibility of myth and its importance for understanding ancient history, art, literature, religion, and philosophy. GE: Literary, Visual, and Performing Arts; Values and Culture.

## CLSA:2048 The Invention of Writing: From Cuneiform to Computers

Invention of writing as one of the most momentous events in the history of human civilizations; how the use of written sign systems, notations, maps, graphs, encryptions, and most recently, computer programs have consequences that reach deeply into all aspects of people's lives; how writing fascinates and delights, fosters reflexive thinking and facilitates development of complex societies, and gives rise to institutions of social power and control; students explore the invention of writing and its consequences in broad international and interdisciplinary context. Taught in English. Same as ANTH:2248, ASIA:2248, CL:2248, COMM:2248, GRMN:2248, HIST:2148, IS:2248, LING:2248, TRNS:2248, WLLC:2248.
CLSA:2127 Global Manuscript Cultures 3 s.h.
Manuscripts and global manuscript cultures from a comparative, interdisciplinary perspective; history of the book in the East and West; diverse material supports, physical formats, and written layouts of manuscripts of the 1st to 19th centuries, including social and cultural contexts; manuscript traditions of particular cultural spheres (Europe, the Middle East and North Africa, India, East Asia) and historical processes of diffusion, remediation, and obsolescence. Taught in English. GE: Historical Perspectives. Same as ASIA:2127, JPNS:2127.

## CLSA:2144 Engineering and Technology in the Ancient

 WorldTechnologies developed and used in the ancient world-primarily in Greece and Rome, also in Egypt and the Ancient Near East; agriculture and food preparation; construction and architecture; technologies related to warfare. Same as HIST:2444.
CLSA:2151 Roman Law, Order, and Crime
Case-based introduction to Roman law; principles of Roman law ranging from standards of evidence to trial procedures to various topics in civil and criminal law, including family law and the law of delict. Same as HIST:2431.

## CLSA:2226 Ancient Art from the Great Pyramids of Egypt to the Colosseum in Rome

Art and architecture of the Mediterranean world (ca. 3500 B.C.E.) to death of Constantine (337 C.E.); Egyptian, Cycladic, Minoan, Mycenaean, Greek, Etruscan, and Roman cultures; artistic responses to life and death; impact of breakthroughs in technology and engineering on visual culture; role of art in empire building; interrelationships of art, politics, religion. GE: Historical Perspectives. Same as ARTH:2320.
CLSA:2330 Egyptian and Ancient Near Eastern Art 3 s.h. Art and architecture of Egypt and the Near East (ca. 3500 B.C.E.) to advent of Islam; Egyptian, Sumerian, Assyrian, Babylonian, and Persian cultures; artistic responses to life and death; impact of breakthroughs in technology and engineering on visual culture; role of art in empire building; interrelationships of art, politics, and religion. Same as ARTH:2330.

## CLSA:2340 The Power of Art in Greece and Rome 3 s.h.

Art and architecture of Greece and Rome (ca. 3000 B.C.E.) to death of Constantine (337 C.E.); Cycladic, Minoan, Mycenaean, Greek, Etruscan, and Roman cultures; artistic responses to life and death; impact of breakthroughs in technology and engineering on visual culture; role of art in empire building; interrelationships of art, politics, and religion. Same as ARTH:2340.

## CLSA:2444 Cities of the Bible <br> 2 s.h.

Survey of the history and archaeology of key biblical cities and the contributions they made to the formation of the Bible. Same as RELS:2444.
CLSA:2461 Middle East and Mediterranean: Alexander to Suleiman
GE: Historical Perspectives. Same as HIST:2461, RELS:2361.
CLSA:2482 Ancient Mediterranean Religions 3 s.h.
Introduction to major religious traditions of ancient Mediterranean world; Mesopotamia, the Levant (Hebrew Bible), Egypt, Greece, and Rome; central aspects of mythology, ritual, and archaeology, individually and in comparative perspective; ancient Judaism and Christianity considered in their various cultural contexts; basic concepts for understanding cultural exchange; fundamental theories in the study of religion. GE: Values and Culture. Same as RELS:2182.

## CLSA:2489 Jerusalem: The Holy City <br> 3 s.h.

Religious, political, and cultural history of Jerusalem over three millennia as a symbolic focus of three faiths-Judaism, Christianity, and Islam; integration of several digital learning technologies, including digital reconstructions and Google Earth tours of Jerusalem. Same as RELS:2289.

CLSA:2620 Sex and the Bible 3 s.h.
Examination and analysis of the role of the Bible in contemporary culture; how different groups can read the exact same passages, yet reach different conclusions about how they and others should live. Recommendations: basic familiarity with the Bible or religion. GE: Diversity and Inclusion. Same as RELS:2620.
CLSA:2651 Gender and Sexuality in the Ancient World 3 s.h. Survey of gender and sexuality issues in the social, political, and religious life of ancient Greece and Rome; evidence from literature, the visual arts, archaeology. Requirements: completion of GE CLAS Core Rhetoric and sophomore standing. GE: Values and Culture. Same as GWSS:2651.

## CLSA:2800 Race and Ethnicity in the Ancient Mediterranean

 WorldExploration of the history of race and ethnicity in the ancient world; how people were defined, stereotyped, and outcast by Greeks and Roman culture. GE: Diversity and Inclusion.

CLSA:2910 Egyptian Hieroglyphs
3 s.h.
Introduction to study of Egyptian hieroglyphs and ancient Egyptian language and culture; basic signs and their sound equivalents; more than four hundred signs which constitute written Egyptian of the Middle Kingdom; students read and construe inscriptions that might be encountered in the Egyptian exhibits of museums.
CLSA:3016 Myth Makers of the Classical World 3 s.h. Continuation of CLSA:2016; emphasis on minor Greek and Roman sources and understanding ancient authors' and artists' motivations for depicting myths; students adapt ancient myths to modern world through writing exercises. Prerequisites: CLSA:2016.
CLSA:3020 Mental Health in the Ancient World 3 s.h.
Exploration of approaches to mental health in ancient Mediterranean world including Mesopotamia, the Levant, Greece, and Rome; examination of nosology, etiology, therapy, and ethics of mental health from ancient medical, philosophical, religious, and literary perspectives; mental health in cultural contexts. Same as GHS:3021.
CLSA:3105 Contraception Across Time and Cultures $\mathbf{3}$ s.h. Methods and history of contraception; issues of unwanted pregnancy and birth control in fiction, film, and media around the world. Same as GHS:3105, GWSS:3105, WLLC:3105.
CLSA:3148 Barbarians and the Fall of Rome 3 s.h.
Did barbarian hordes cause the decline and fall of the Roman Empire? In the span of just a few hundred years, the Roman Empire of the Mediterranean world was transformed in terms of culture, religion, and the peoples that inhabited it, but we can't place all the blame for the so-called fall of Rome on the Huns, Visigoths, Vandals, and other migrating peoples; students explore textual, visual, and archaeological evidence for the spread of these "barbarian" cultures, the sacking of Rome, and the late antique transition to the Middle Ages from 200-800 C.E. Same as HIST:3448.
CLSA:3227 Classical Greek Art
3 s.h.
Art and architecture of classical Greece (ca. 480-323 B.C.); monuments of this period-from Parthenon in Athens to Aphrodite of Knidos-often viewed as embodiments of the highest achievements in Western art and culture; classical Greek art within social, political, religious, and historical contexts; role in ancient Greek society and its impact in the 21st century. Same as ARTH:3330.
CLSA:3232 Art of Early Rome: Patrons and Politics 3 s.h. Examination of architecture, sculpture, and painting in central Italy from c. 800 B.C. to the end of the Roman Republic in 27 B.C.; art in the service of social ideology and political propaganda; funerary art and its relationship to the living; artistic interactions between Etruria, Greece, and Rome. Same as ARTH:3350.
CLSA:3233 Art of the Ancient Roman Empire 3 s.h.
Major developments in architecture, sculpture, and painting from the ascension of Augustus to sole ruler in 31 B.C. to the death of Constantine in A.D. 337; influence of individual emperors on the development of artistic forms; relationship between public and private art; interdependency of Rome and the provinces. Same as ARTH:3360.
CLSA:3234 Life and Death in Ancient Pompeii 3 s.h.
Art and architecture as documents of ancient life in Pompeii, a town that was destroyed during the eruption of Mount Vesuvius in 79 C.E.; topics include artistic choices and achievements of the city's inhabitants, roles played by men and women inside and outside the family, slavery, political organization and expression, and attitudes towards death. Same as ARTH:3370.
CLSA:3235 Greek Archaeology and Ethnohistory 3 s.h. Archaeology and ethnology of the Greek world, from end of Bronze Age to late Roman Empire; sociocultural processes that influence development and persistence of Greek civilization. Same as ANTH:3276.

CLSA:3240 Roman Archaeology 3 s.h.
Archaeology and ethnology of Roman civilization from Iron Age eighth-century occupation of the Palatine Hill to the end of the Roman Empire in the West, A.D. 476. Same as ANTH:3277.
CLSA:3247 Banned from the Bible: Pseudepigrapha and Apocrypha
Introduction to biblical Pseudepigrapha and Apocrypha; writings dating from third century B.C.E. to third century C.E. fictionally attributed to characters in the Hebrew Bible and New Testament, or written as though they originated in the First or Second Temple periods, not included in Jewish or major Christian canons of scripture; English translations of documents from this period; key themes and interpretative techniques common throughout biblical texts that provide tremendous insight into the worlds that produced the Hebrew Bible and New Testament. Same as RELS:3247.

CLSA:3250 Greek Vase Painting 3 s.h.
Greek ceramics as documents of religious beliefs, mythology, and daily life 1000-300 B.C.E. Same as ARTH:3340.
CLSA:3288 Shakespeare's Romans: The Ancient World Meets the Elizabethan Stage
London was a distant outpost of the Roman Empire, but the Romans had an outsized influence on Shakespeare's plays and poems; students explore those works and their sources in classical authors, including Ovid and Plutarch. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century. Same as ENGL:3288.

CLSA:3401 Ancient Egypt and the Ancient Near East 3 s.h. Survey of political, economic, religious, and social change in ancient Egypt from ca. 3000 B.C.E. until its conquest by Persia, and of the ancient Near East from ca. 3000 B.C.E. until Alexander the Great's conquests. Same as HIST:3401.

## CLSA:3404 The World of Ancient Greece

 3 s.h.Survey of Greece history from ca. 2000 B.C. to 300 B.C.; Minoan, Mycenaean, and Greek society and culture; contact between Greek mainland and eastern Mediterranean cultures; development of the polis; political developments throughout the period; readings include a variety of sources in translation as well as modern interpretations; methodological problems in studying ancient Greece including interpretation of ancient historiography and using evidence from art, archaeology, and literature; knowledge of ancient Greek not required. Same as HIST:3404.

## CLSA:3416 Greek Religion and Society

From Bronze Age to the Hellenistic period, in context of Mediterranean culture; evidence such as choral hymn, inscribed prayers, magical curses inscribed on lead, architecture, sculpted offerings to the gods. Same as RELS:3716.

## CLSA:3443 Pagans and Christians: The Church from Jesus to Muhammad <br> 3 s.h.

Introduction to history of early Christianity, from time of Jesus to rise of Islam; focus on major movements, intellectuals, institutions in this period; growth of Christianity in different geographical areas including the Middle East, Greece, Western Europe, Africa; Christian relations with Jews, pagans, Muslims; conversion; orthodoxy, heresy, making of biblical canon; martyrdom; women and gender roles; asceticism, monasticism, sexuality; church and state; theological controversy and schisms; cult of saints; the Holy Land and pilgrimage. Same as RELS:3243.

CLSA:3445 Mythology of Otherworldly Journeys
3 s.h.
Examination of mythology of otherworldly journeys from earliest religions to Hellenistic period; historical context; comparison for common themes in their evolution over time; directed readings of mythological texts dealing with otherworldly journeys; ways in which past cultures confronted larger mysteries of life and death. Same as RELS:3245.
CLSA:3514 Roman Religion and Society 3 s.h.
Roman religion of the Republic, from ca. 753 B.C.E. to 44 B.C.E.; highly organized priesthood of politically powerful men and women in religious colleges in Rome who moderated and interpreted citywide religious practice; how Romans worshipped their gods; Roman theology - what Romans thought about the divine world-and their religious response to crises; evidence from festival calendar, temple architecture, religious art, poetry, inscriptions, plays, and various other texts.
CLSA:3520 Religious Violence and Nationalism
3 s.h.
Study of religious ideologies that lead to violence in the name of nationality throughout history and in modern times. Same as RELS:3520.
CLSA:3596 The Archaeology of Ancient Egypt 3 s.h.
Introduction to the archaeology of ancient Egypt from predynastic times to Roman Egypt, including monumental architecture; patterns of everyday life; social, economic, and demographic considerations; history of archaeology in Egypt. Same as ANTH:3275.
CLSA:3742 Word Power: Building English Vocabulary 3 s.h.
Analysis of unfamiliar English words through knowledge of the history and meaning of word parts. Same as WRIT:3742.
CLSA:3750 Medical and Technical Terminology 2 s.h.
Memorization of word stems and basic medical terms, practice on computer terminal; no formal classes.
CLSA:3821 City of Athens: Bronze Age to Roman World 3 s.h. Athens from Bronze Age to end of Roman period; topics include the city's role in development of political democracy and religion, as well as the art and archaeology of the city. Same as ANTH:3821, HIST:3403.
CLSA:3836 Food in Ancient Mediterranean Society 3 s.h. Practices and values influenced by consumption and production of food in ancient Mediterranean societies; varied topics, including methods of food production and distribution, hierarchies of status as associated with food, food and ethnic identity, food and health, food and religion; focus on classical Greek and Roman society, Egypt, the ancient Near East, and Persia. Recommendations: familiarity with Greek and Roman civilization and history. Same as ANTH:3204, HIST:3436.

## CLSA:3900 Special Topics in Classics

1-3 s.h.
Examination of a specific topic of interest related to classics.
CLSA:3920 Video Games and the Ancient World 3 s.h.
Examination of ancient society, culture, and sources through in-class game play and discussion of video games.
CLSA:3979 Undergraduate Translation Workshop 3 s.h.
Translation exercises, discussion of translation works in progress; alternative strategies for translation projects. Same as ENGL:3850, TRNS:3179.

CLSA:3980 Teaching in the Classics 1,3 s.h. Instructional approaches and issues in teaching ancient language and civilization at secondary and college levels. Prerequisites: CLSG:1002 or CLSL:1002.

CLSA:3982 Graduation Portfolio 0 s.h.
Submission of final graduation portfolio required for classical
languages and ancient civilization majors. Requirements: classical languages or ancient civilization major, and senior standing.

CLSA:4085 Postbaccalaureate Seminar
1 s.h.
Current work of postbaccalaureate students; preparation of writing sample and portfolio. Requirements: postbaccalaureate certificate enrollment.
CLSA:4090 Private Assignments
Readings in classical literature in translation.
CLSA:4095 Honors Readings
Discussion, readings, research for a paper on ancient civilization. Requirements: ancient civilization major.

## CLSA:4106 Warfare in Ancient Mediterranean Society

Same as HIST:4406.
CLSA:4400 The Roman Empire
History of Roman Empire from assassination of Julius Caesar through 5th century A.D.; political, economic, cultural, and social developments from the transition to imperial power to the shift of power from west to east. Same as HIST: 4400 .
CLSA:4403 Alexander the Great 3 s.h.
History of Alexander the Great and the generals who succeeded him in ruling the lands he conquered; military, political, and social history. Same as HIST:4403.

CLSA:4452 The Dead Sea Scrolls
3 s.h.
Introduction to the Dead Sea Scrolls; reading of the scrolls in English translation; examination of Qumran site archaeology; survey of broader sociopolitical context of Second Temple Judaism (586 B.C.E. to 135 C.E.) out of which the scrolls emerged. Same as RELS:4352.

CLSA:4901 Biblical Hebrew I
3-4 s.h.
Same as RELS:4001.
CLSA:4902 Biblical Hebrew II 3 s.h.
Same as RELS:4002.
CLSA:4911 Coptic I
3 s.h.
Introduction to Coptic grammar and literature in several dialects, with introductory readings from the New Testament, monastic authors, and Gnostic and Manichaean texts.

## CLSA:4912 Coptic II

3 s.h.
Continuation of CLSA:4911.

## CLSA:5010 Proseminar in Classics

Texts, techniques, and trends in classical scholarship; areas and subtopics of classical scholarship.

CLSA:5151 Roman Law, Order, and Crime
Case-based introduction to Roman law; principles of Roman law ranging from standards of evidence to trial procedures to various topics in civil and criminal law, including family law and the law of delict. Recommendations: some background in Roman history. Same as HIST:5431.

CLSA:5900 Advanced Special Topics in Classics
Advanced examination of a specific topic of interest related to classics.

CLSA:5903 Biblical Aramaic
This course introduces the basics of Biblical Aramaic grammar and syntax and provides an introduction to the Biblical lexicon. There will be extensive grammatical exercises, both in class and at home, as well as frequent opportunities to apply grammatical and lexical knowledge to the Biblical text. Recommendations: Biblical Hebrew recommended. Same as RELS:5001.
CLSA:5904 Targumic Aramaic
3 s.h.
Language used by Targums-Aramaic translations of the Hebrew
Bible-for use in the study of interpretative traditions of later Jewish groups. Same as RELS:5002.
CLSA:6100 Seminar: Theory and Method
3 s.h.
Exploration of various theories and methods related to the field of classics.

3 s.h.

3 s.h.

3 s.h.

CLSA:6200 Graduate Seminar in Ancient Art 3 s.h. Key themes and issues in ancient art. Same as ARTH:6300.

## CLSA:6910 Graduate Pedagogy

1 s.h.
Pedagogical theories on teaching classics in translation, practical arr. application of those theories; classroom management, grading, syllabus development; university, college, and department regulations. Requirements: graduate standing, and teaching assistant or instructor in classics courses taught in English.

## CLSA:7114 Slavery and Social Death: 1200 B.C.E. to 1865

Exploration of various slave systems in antiquity, the middle ages and modernity in terms of their motivations, utilization, and broader social, economic, and political implications; use of literary sources and archaeological remains to investigate slave cultures in ancient Near East and Egypt, Jewish exploitation of enslaved persons, and use of chattel slavery in Greek, Roman, early Christian, and Islamic societies; antebellum U.S. slavery. Same as ANTH:7414, HIST:7414.

## Greek Courses

Archaic Greece (CLSG:6011), Classical Greece
(CLSG:6012), Hellenistic Greece (CLSG:6013), and Roman Greece (CLSG:6014) cover authors, genres, and topics of the major periods of Greek history. Specific topics are determined by the instructor's expertise and research interests. PhD students are exposed to topics in all major periods at least once in four years of coursework.

CLSG:1001 Classical and New Testament Greek I 5 s.h.
Introduction to ancient Greek; Greek readings from all periods, from Homer and classical Greek poetry and prose to Christian writings and beyond; focus on classical and New Testament works, Greek culture and thought; comprehension, vocabulary, structure of Greek words and sentences; first of two-semester sequence. GE: World Languages First Level Proficiency.
CLSG:1002 Classical and New Testament Greek II 5 s.h.
Continuation of CLSG:1001; focus on classical and New Testament works, Greek culture and thought, comprehension, vocabulary, structure of Greek words and sentences; increased emphasis on original texts. Prerequisites: CLSG:1001. GE: World Languages
1 s.h. Second Level Proficiency.
CLSG:2001 Second-Year Greek I 3 s.h.
Focus on reading Greek prose authors, such as Xenophon and Plato.
3 s.h. Prerequisites: CLSG:1002. GE: World Languages Third Level Proficiency.

CLSG:2002 Second-Year Greek II
3 s.h.
Continuation of CLSG:2001; focus on reading and interpretation of Greek poetry. Prerequisites: CLSG:2001. GE: World Languages Fourth Level Proficiency.

G:3001 Archaic and Classical Periods I 3 s.h.
Readings in major Greek authors of the Archaic and Classical periods. Prerequisites: CLSG:2002.

CLSG:3002 Archaic and Classical Periods II 3 s.h. Continuation of CLSG:3001. Prerequisites: CLSG:2002.

CLSG:3003 Classical and Hellenistic Periods I 3 s.h. Readings in Greek literature of the Classical and Hellenistic periods. Prerequisites: CLSG:2002. Same as RELS:3003.
CLSG:3004 Classical and Hellenistic Periods II
3 s.h.
Continuation of CLSG:3003. Prerequisites: CLSG:2002.
CLSG:3200 Literary Translation Workshop in Ancient Greek and
Latin 3 s.h.

Translation from Greek/Latin to English with emphasis on literary translation; issues in theory and practice of translation in the discipline; special features of ancient languages as a source language for translation. Taught in English. Same as CLSL:3200, TRNS:3205.

CLSG:4076 Greek Composition 2-3 s.h.
Review of Greek morphology, syntax, sentence structure; composition of sentences, short passages in Greek. Prerequisites: CLSG:2002
or CLSG:3001 or CLSG:3002 or CLSG:3003 or CLSG:3004 or CLSG:5001.
CLSG:4090 Private Assignments 1-3 s.h.
Directed reading and study with faculty member.

## CLSG:4095 Honors Readings

arr.
Discussion, readings, research for a paper on Greek literature, history, or civilization. Requirements: classical languages major.
CLSG:5001 Greek Survey I: Archaic to Classical Literature 3 s.h. Introductory survey of Greek literature and language from Homer to end of the fifth century.

CLSG:5002 Greek Survey II: Hellenistic to Late Antique Literature

3 s.h.
Introductory survey of Greek literature and language in and after the fourth century B.C.E.

## CLSG:6000 Advanced Greek Seminar

arr.
Specific Greek authors, genres, and topics from the beginnings of Greek literature through fifth century C.E.
CLSG:6011 Archaic Greece
arr.
Topics chosen from Homer, Hesiod, Homeric hymns or lyric poetry.
CLSG:6012 Classical Greece arr.
Authors, genres, and topics from the fifth and fourth centuries B.C.E.
CLSG:6013 Hellenistic Greece
Authors, genres, and topics from the death of Alexander to the accession of Augustus.
CLSG:6014 Roman Greece
Greek authors of the Second Sophistic, including Plutarch, Lucian, and Philostratus; seminar.

## CLSG:7080 Greek Thesis

For PhD students writing a dissertation. Requirements: PhD candidacy.
CLSG:7090 Advanced Reading
Requirements: classics graduate standing.

## Latin Courses

Republican Rome (CLSL:6011), Augustan Rome
(CLSL:6012), Tiberius to Trajan (CLSL:6013), and Later Empire
(CLSL:6014) cover authors, genres, and topics of the major periods of Roman history. Specific topics are determined by the instructor's expertise and research interests. PhD students are exposed to topics in all major periods at least once in four years of coursework.

CLSL:1001 Elementary Latin I 5 s.h.
Focus on reading Latin and on Roman culture. GE: World Languages First Level Proficiency.
CLSL:1002 Elementary Latin II
5 s.h.
Continuation of CLSL:1001. Prerequisites: CLSL:1001. GE: World Languages Second Level Proficiency.
CLSL:2001 World of Cicero 3 s.h.
Focus on reading Latin prose authors, such as Caesar and Cicero.
Prerequisites: CLSL:1002. GE: World Languages Third Level
Proficiency.
CLSL:2002 Golden Age of Roman Poetry 3 s.h.
Focus on reading and interpretation of Roman poets, such as Vergil
and Catullus. Prerequisites: CLSL:1002. GE: World Languages Third Level Proficiency.
CLSL:3001 Latin Literature of the Republic I
3 s.h.

CLSL:3002 Latin Literature of the Republic II
Continuation of CLSL:3001. Prerequisites: CLSL:2001 and CLSL:2002.

CLSL:3003 Latin Literature of the Empire I 3 s.h.
Prose or poetry by major authors of the empire. Prerequisites:
CLSL:2001 and CLSL:2002.
CLSL:3004 Latin Literature of the Empire II 3 s.h.
Continuation of CLSL:3003. Prerequisites: CLSL:2001 and CLSL:2002.
CLSL:3200 Literary Translation Workshop in Ancient Greek and Latin 3 s.h.
Translation from Greek/Latin to English with emphasis on literary translation; issues in theory and practice of translation in the discipline; special features of ancient languages as a source language for translation. Taught in English. Same as CLSG:3200, TRNS:3205.
CLSL:4076 Latin Composition 2-3 s.h.
Review of Latin morphology, syntax, sentence structure; composition of sentences, short passages in Latin. Prerequisites: CLSL:2002
or CLSL:3001 or CLSL:3002 or CLSL:3003 or CLSL:3004 or CLSL:5001.
CLSL:4090 Private Assignments 1-3 s.h.
Directed reading and study with faculty member for advanced students.
CLSL:4095 Honors Readings 3 s.h.

Discussions, readings, research for a paper on Roman literature, arr. history, or civilization. Requirements: classical languages major.

CLSL:5001 Latin Survey I: Republican Literature 3 s.h. Introductory survey of Latin literature and language from the early Republic to the end of the first century B.C.E.
CLSL:5002 Latin Survey II: Imperial to Late Antique Literature

3 s.h.
Introductory survey of Latin literature and language from the
Augustan age through the second century C.E.
CLSL:6000 Advanced Latin Seminar
arr.
arr. Specific Latin authors, genres, and topics from the beginnings of Roman literature through fifth century C.E.
CLSL:6011 Republican Rome
arr.
Authors and topics from the beginnings of Roman literature to the death of Julius Caesar.

CLSL:6012 Augustan Rome arr.
Authors and topics from the death of Caesar to the accession of Tiberius.
CLSL:6013 Tiberius to Trajan arr.
Authors and topics from the first and second centuries C.E. Same as RELS:6040.

CLSL:6014 Later Empire arr.
Authors and topics from the third through fifth centuries C.E.
CLSL:6910 Graduate Pedagogy 1 s.h.
Pedagogical theories on teaching classical languages, practical
application of those theories; classroom management, grading,
syllabus development; university, college, and department regulations. Requirements: teaching assistant or instructor in Latin.
CLSL:7080 Latin Thesis
arr.
For PhD students writing a dissertation. Requirements: PhD candidacy.

CLSL:7090 Advanced Reading
arr.
Requirements: classics graduate standing.

## Ancient Civilization, BA

The Bachelor of Arts in ancient civilization is a flexible program that allows students to study ancient Greece, Rome, the Near East, and Egypt from 3000 B.C.E. to 800 C.E. Ancient civilization majors work primarily in the English language, with their studies distributed among the areas of literature, history, religion, philosophy, art, and archaeology.

## Learning Outcomes

Students are expected to demonstrate:

- knowledge of major literary works and written sources from the ancient Mediterranean world (either in translation or their original language);
- familiarity with the physical world (both public and private) in which ancient Mediterranean people lived through the study of their art and archaeology;
- appreciation of the religious and ethical mindset of ancient peoples through a broad understanding of mythology, religion, and philosophy; and
- understanding of the impact that the political, intellectual, and social environments of the people from the ancient Mediterranean have on modern cultures.

## Requirements

The Bachelor of Arts with a major in ancient civilization requires a minimum of 120 s.h., including at least 30 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

The major concentrates on the ancient civilization of the Mediterranean world and draws on courses offered by various university departments. This is a flexible major that allows students to concentrate their study in areas such as religion, history, archaeology, Egypt, or the Near East.

The major is sponsored by the School of Art and Art History and the departments of Classics, History, and Religious Studies (College of Liberal Arts and Sciences).
Students choose courses in consultation with their advisors. They must earn at least 9 s.h. in advanced courses, which may include classics in English courses numbered 3000 or above, Greek language courses numbered 2000 or above, and Latin language courses numbered 2000 and above. Transfer credit is evaluated individually.
In addition to completing required coursework, students maintain a required portfolio detailing their progress toward the major, which they must complete before graduation; see "Major Portfolio" below.

A maximum of 9 s.h. of coursework used to satisfy requirements for the BA in classical languages may be applied toward this major. A maximum of $3 \mathrm{~s} . \mathrm{h}$. of coursework used to satisfy requirements for another minor in the Department of Classics (classical languages, Latin, and/or Greek) may be applied toward this major.
A course used to satisfy a requirement in one area cannot be used to satisfy a requirement in another area.
The BA with a major in ancient civilization requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Ancient Art and Archaeology Courses | 3 |

| CLSA:3920 | Video Games and the Ancient <br> World | 3 |
| RELS:2272 | Gods and Superheroes: <br> Mythologies for a Modern <br> World | 3 |

Any courses listed under the areas above-Ancient Art and Archaeology, Ancient History and Society, Ancient Language and Literature, and Ancient Philosophy and Religion
Any course with the prefix CLSA, CLSG, or CLSL

## Major Portfolio

To comply with the Board of Regents, State of Iowa, policy on student outcomes assessment, the Department of Classics has established a method to assess the achievement level of students completing one of the department's majors. Students must maintain a portfolio that details their progress in attaining the objectives of their major. Students must register for and complete the following course.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CLSA:3982 | Graduation Portfolio | 0 |

Students submit the portfolio to their undergraduate advisor by midterm of the semester in which they intend to graduate. Formal approval of the portfolio is required for graduation. Consult the undergraduate advisor for details.

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.
To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in the major. Honors students must maintain a grade-point average (GPA) of at least 3.33 in their major. Additionally, a UI cumulative GPA of at least 3.33 at the time of graduation is required by the College of Liberal Arts and Sciences.

Students must complete two consecutive courses in honors reading, earning 3 s .h. of credit for each course. Honors work may be done in a student's fourth year, or spring of the third year and fall of the fourth year. The readings and discussions must be on an ancient author or a field in ancient history or literature chosen by the student and the instructor. At the end of the second semester, the student presents
a substantial research project, which is evaluated for honors by two members of the department.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the ancient civilization major.

## Career Advancement

Although the ancient civilization major is not preparation for graduate study in classics, it provides a sound basis for preparing individuals to teach at the secondary school and community college levels. It also provides a liberal arts and sciences foundation appropriate for further study in law and medicine. Some graduates go on to complete advanced work in library and information science, museum studies, archaeology, or business. A large proportion of its students pursue advanced degrees.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.
Before the fifth semester begins: at least two courses in the major.
Before the seventh semester begins: at least six courses in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: at least eight courses in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Students must earn at least 9 s.h. in advanced courses, which may include classics in English (CLSA) courses numbered 3000 or above, Greek language (CLSG) courses numbered 2000 or above, and Latin language (CLSL) courses numbered 2000 and above.
c See General Catalog for list of approved courses
d GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
e The major requires six additional courses from an approved list or from any of the required subject areas. See General Catalog for list of approved courses or contact advisor for more information.
f Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
g Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
$h$ Students must maintain a portfolio that details their progress in attaining the objectives of their major. Students submit the portfolio to their undergraduate advisor by midterm of the semester in which they intend to graduate. Formal approval of the portfolio is required for graduation. Consult the undergraduate advisor for details.
i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Classical Languages, BA

The Bachelor of Arts in classical languages cultivates and hones students' skills in ancient Greek and/or Latin. Students may study a wide variety of linguistic and cultural aspects of the ancient civilizations of Greece, Rome, the Near East, and Egypt from 3000 B.C.E. to 800 C.E.

## Learning Outcomes

Students are expected to demonstrate:

- the ability to read the ancient Greek and/or Latin languages at an intermediate to advanced level;
- knowledge of major literary works and written sources of the ancient Mediterranean world;
- transferable linguistic and analytic skills by studying the ancient languages that stand behind the vocabulary and structure of English and the Romance languages; and
- understanding of the impact that the political, intellectual, and social environments of the people from the ancient Mediterranean have on modern cultures.

## Requirements

The Bachelor of Arts with a major in classical languages requires a minimum of 120 s.h., including at least 30 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. Transfer credit is evaluated individually.

The major trains students to read the ancient Greek and/or Latin languages and acquaints them with the major works of Greek and/or Roman literature. Classical languages students learn about the history of ancient Greece of the eighth through the fourth centuries B.C.E., where most of the modern Western notions of political, artistic, and social life are rooted. They also develop an understanding of the Roman Republic and Empire (3 B.C.E. through 5 C.E.), when Rome established its hegemony over the Mediterranean basin, laid the foundation of law for the Western world, and spread Greece's culture to the West, and of the fall of the Empire and the rise of Medieval civilization from the sixth through the ninth centuries C.E.

In addition to completing the required coursework, students maintain a required portfolio detailing their progress toward the major, which they must complete before graduation; see "Major Portfolio" below.

A maximum of 9 s.h. of coursework used to satisfy requirements for the BA in ancient civilization may be applied toward this major. A maximum of $3 \mathrm{~s} . \mathrm{h}$. of coursework used to satisfy requirements for the minor in ancient civilization may be applied toward this major. Students cannot pursue a minor in Latin or Greek while simultaneously enrolled as a classical languages major.

The BA with a major in classical languages requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Required Courses | 30 |

Major Portfolio

## Required Courses

| Course \# $\quad$ Title | Hours |

| CLSL:3003 | II | Latin Literature of the Empire I |

## Major Portfolio

To comply with the Board of Regents, State of Iowa, policy on student outcomes assessment, the Department of Classics has established a method to assess the achievement level of students completing one of the department's majors. Students must maintain a portfolio that details their progress in attaining the objectives of their major. Students must register for and complete the following course.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CLSA:3982 | Graduation Portfolio | 0 |

Students submit the portfolio to the undergraduate advisor by midterm of the semester in which they intend to graduate. Formal approval of the portfolio is required for graduation. Consult the undergraduate advisor for details.

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in the major. Honors students must maintain a grade-point average (GPA) of at least 3.33 in their major. Additionally, a UI cumulative GPA of at
least 3.33 at the time of graduation is required by the College of Liberal Arts and Sciences.

Students also must complete two consecutive courses in honors reading, earning 3 s.h. of credit for each course. Honors work may be done in a student's fourth year, or spring of the third year and fall of the fourth year. The readings and discussions must be on an ancient author or a field in ancient history or literature chosen by the student and the instructor. At the end of the second semester, the student presents a substantial research project, which is evaluated for honors by two members of the department. Students who write an honors thesis in classical languages must be enrolled at the same time in the appropriate advanced language courses.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the classical languages major.

## Career Advancement

The University of Iowa's classical languages major is recognized for the excellent preparation it offers for graduate study in classics. A large proportion of its students pursue advanced degrees. They are admitted to the finest public and private university programs in the country, many with full financial support.

Students who major in classical languages and complete the College of Education's Teacher Education Program may be able to find secondary school teaching positions quickly due to a nationwide shortage of Latin teachers.

Graduates have gone on to become secondary or university teachers, librarians, museum curators, and bankers. The study of Latin and Greek also prepares students for the study of law and medicine; classical languages graduates regularly enter these fields. Others go on to complete advanced work in library and information science, museum studies, religious studies, history, archaeology, or business.
The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

## Classical Languages-Greek and Latin

Before the third semester begins: CLSG:1001 Classical and New Testament Greek I or CLSL: 1001 Elementary Latin I.

Before the fifth semester begins: CLSG:1002 Classical and New Testament Greek II and CLSL:1002 Elementary Latin II.

Before the seventh semester begins: CLSG:2001 Second-Year Greek I, and CLSL:2001 World of Cicero or CLSL:2002 Golden Age of Roman Poetry or CLSG:2002 Second-Year Greek II, and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: 6 s.h. of advanced (3000-level and above) courses with the prefix CLSG or CLSL.

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Classical Languages-Greek Only

Before the third semester begins: CLSG:1001 Classical and New Testament Greek I and CLSG: 1002 Classical and New Testament Greek II.

Before the fifth semester begins: CLSG:2001 Second-Year Greek I and CLSG:2002 Second-Year Greek II.

Before the seventh semester begins: two advanced (numbered 3000 and above) courses with prefix CLSG and at least one additional course with the prefix CLSA at any level.
Before the eighth semester begins: either one advanced (numbered 3000 and above) course with prefix CLSG or one additional course with the prefix CLSA; and at least 90 s.h. earned toward the degree.

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Classical Languages-Latin Only

Before the third semester begins: CLSL:1001 Elementary Latin I and CLSL:1002 Elementary Latin II.
Before the fifth semester begins: CLSL:2001 World of Cicero and CLSL:2002 Golden Age of Roman Poetry.
Before the seventh semester begins: two advanced (numbered 3000 and above) courses with prefix CLSL and at least one additional course with the prefix CLSA at any level; and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: either one advanced (numbered 3000 and above) course with prefix CLSG or one additional course with the prefix CLSA.

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Ancient Civilization, Minor

Because much of modern society is strongly influenced by the past, a minor in ancient civilization is ideal to combine with any major, especially for students focusing on majors in English/creative writing, religious studies, anthropology, history, political science, journalism and mass communication, and psychology, among others. Ancient civilization minors may work entirely in the English language, with their studies distributed in the areas of literature, history, religion, philosophy, art, and archaeology.

## Learning Outcomes

Students are expected to demonstrate:

- knowledge of a variety of literary works and written sources from the ancient Mediterranean world in translation, acquired through coursework in history, culture, mythology, religion, or philosophy;
- familiarity with the physical world (both public and private) in which ancient Mediterranean people lived through the study of their art and archaeology; and
- understanding of the impact that the political, intellectual, and social environments of the people from the ancient Mediterranean have on modern cultures.

## Requirements

The undergraduate minor in ancient civilization requires a minimum of 15 s.h., including at least $9 \mathrm{~s} . \mathrm{h}$. in advanced courses taken at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

A maximum of $3 \mathrm{~s} . \mathrm{h}$. of work for another major, minor, or certificate in the Department of Classics and up to 3 s.h. of lower-level transfer credit may be counted toward the minor.

Department of Classics courses with the prefix CLSA, CLSG, and CLSL and courses cross-referenced with the prefix CLSA count toward the minor. Courses considered advanced for the minor are: Greek courses numbered CLSG:2001 Second-Year Greek I or above, Latin courses numbered CLSL:2001 World of Cicero or above, and classics courses numbered 3000 or above. Appropriate courses in art, religion, history, and philosophy may be counted toward the minor if approved by the undergraduate advisor. Students who have taken high school Greek or Latin should consult the advisor.

## Classical Languages, Minor

A minor in classical languages is an excellent way to solidify skills in the modern English language while expanding a student's interest in ancient Mediterranean cultures. Students gain a solid understanding of both ancient Greek and Latin.

## Learning Outcomes

Students are expected to demonstrate:

- the ability to read the ancient Greek and Latin languages at an intermediate to advanced level;
- knowledge of major literary works and written sources of the ancient Mediterranean world; and
- transferable linguistic and analytic skills by studying the ancient languages that stand behind the vocabulary and structure of English and the Romance languages.

## Requirements

The undergraduate minor in classical languages requires a minimum of 19 s.h., including 6 s.h. in advanced courses taken at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.
The sequences CLSG:2001 Second-Year Greek I and CLSG:2002 Second-Year Greek II, CLSL:2001 World of Cicero and CLSL:2002 Golden Age of Roman Poetry, and Department of Classics courses numbered 3000 or above are considered advanced for the minor.

A maximum of 3 s.h. of work for another major, minor, or certificate in the Department of Classics and up to 3 s.h. of lower-level transfer credit may be counted toward the minor.
Students who earn a minor in classical languages may not earn a minor in Latin or Greek.

## Required Courses

## Greek, Minor

A minor in Greek is an excellent way to pursue the study of ancient Greek beyond the General Education World Languages courses and to explore an interest in reading famous authors and philosophers (Homer, Plato, and others) in their native language.

## Learning Outcomes

Students are expected to demonstrate:

- the ability to read ancient Greek at an intermediate to advanced level;
- knowledge of major literary works and written sources from the ancient Greek world; and
- understanding of the impact that the political, intellectual, and social environments of the people from ancient Greece have on modern cultures.

## Requirements

The undergraduate minor in Greek requires a minimum of 15 s.h. in Greek courses (prefix CLSG), including at least 12 s.h. in courses numbered 2000 and above taken at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.
A maximum of 6 s.h. of work for another University of Iowa major, minor, or certificate and up to 3 s.h. of lower-level transfer credit may be counted toward the minor.

Students who earn a minor in Greek may not earn a major or minor in classical languages; students who are interested in a minor in Latin at the same time as the minor in Greek should consider the minor in classical languages instead.

The sequence CLSG:2001 Second-Year Greek I and CLSG:2002 Second-Year Greek II and Department of Classics courses numbered 3000 or above are considered advanced for the minor. Students may substitute a maximum of $3 \mathrm{~s} . \mathrm{h}$. for the CLSG requirement with one of the relevant advanced-level courses taught in English from the following.

| Course \# | Title | Hours |

a This course is a prerequisite for the required minor courses.
b Language level placement will be determined by placement exam score and/or oral interview. Students who place into the 5th semester level of the language will begin coursework at that level and will not be required to take semesters 1-4 of the language.
c Students may substitute a maximum of $3 \mathrm{~s} . \mathrm{h}$. for the CLSG requirement with one relevant advanced-level course taught in English. See General Catalog or contact academic advisor for course list.

## Health and the Human Condition, Minor

The minor in health and the human condition is an interdisciplinary minor broadly focused on the intersection of the humanities (philosophy, ethics, history, and religion) and health sciences. Students who earn the minor gain an understanding of the medical field through three unique lenses: ethics and values, historical perspectives, and diversity/global perspectives.
The minor is administered by the Department of Classics and draws on courses from several units in the College of Liberal Arts and Sciences, including the departments of Anthropology, History, Philosophy, Religious Studies, and Health and Human Physiology as well as the Global Health Studies and Aging and Longevity Studies Programs.

## Learning Outcomes

Students are expected to demonstrate:

- comprehension of the history and philosophy behind modern medicine and the human body; and
- familiarity with multicultural and temporal perceptions of healing, aging, and approaches to medicine.

## Requirements

The undergraduate minor in health and the human condition requires a minimum of $15 \mathrm{~s} . \mathrm{h}$., including at least $12 \mathrm{~s} . \mathrm{h}$. in courses taken at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.
A maximum of 3 s.h. of work for another University of Iowa major, minor, or certificate may be counted toward the minor.

The minor is interdisciplinary. It is administered by the Department of Classics and draws on courses from several units in the College of Liberal Arts and Sciences.

The minor in health and the human condition requires the following coursework.

## Ethics and Values

These courses focus on moral and ethical issues in the medical field and health care, such as bioethics, patient autonomy, and the role of the state.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least 3 s.h. from these: |  |  |
| PHIL:1034 | Liberty and the Pursuit of <br>  <br>  <br> Happiness | 3 |
| PHIL:1401 | Matters of Life and Death | 3 |
| PHIL:2402 | Introduction to Ethics | 3 |
| PHIL:2415/GHS:2415 Bioethics | 3 |  |
| RELS:2260/ | Hard Cases in Healthcare at the | 3 |
| GHS:2260 | Beginning of Life |  |

## Historical Approaches

These courses focus on the treatment and understanding of health and disease from the ancient world to the 20th century in order to contextualize students' understanding of the medical field today.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| At least 3 s.h. from these: |  |  |
| CLSA:1181/ <br> GHS:1181 | Ancient Medicine | 3 |
| CLSA:3020/ <br> GHS:3021 | Mental Health in the Ancient World | 3 |

## Latin, Minor

A minor in Latin is an excellent way to pursue the study of Latin beyond the General Education World Languages courses and to explore an interest in reading famous authors and philosophers (Ovid, Cicero, and others) in their native language.

## Learning Outcomes

Students are expected to demonstrate:

- the ability to read Latin at an intermediate to advanced level;
- knowledge of major literary works and written sources from the Roman world; and
- understanding of the impact that the political, intellectual, and social environments of the people from ancient Rome have on modern cultures.

## Requirements

The undergraduate minor in Latin requires a minimum of 15 s.h. in Latin courses (prefix CLSL), including at least 12 s.h. in advanced courses numbered 2000 and above taken at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

A maximum of 6 s.h. of work for another University of Iowa major, minor, or certificate and up to 3 s.h. of lower-level transfer credit may be counted toward the minor.

Students who earn the minor in Latin may not earn the BA in classical languages; students who are interested in a minor in Greek at the same time as this minor should consider the minor in classical languages instead. Students who earn a minor in Latin may not earn a minor in classical languages.
The sequence CLSL:2001 World of Cicero and CLSL:2002 Golden Age of Roman Poetry, and Department of Classics courses numbered 3000 or above are considered advanced for the minor. Students may substitute a maximum of $3 \mathrm{~s} . \mathrm{h}$. for the Latin requirement with one of the relevant advanced-level courses taught in English from the following.

| Course \# | Title | Hours |

a Language level placement will be determined by placement exam score and/or oral interview. Students who place into the 3rd
semester level of the language will begin coursework at that level and will not be required to take semesters 1-2 of the language.
b This course is a prerequisite for the required minor courses.
c Students may substitute a maximum of $3 \mathrm{~s} . \mathrm{h}$ for the Latin requirement with one relevant advanced-level course taught in English. See General Catalog or contact academic advisor for course list.

## Classics, Postbaccalaureate Certificate

This program is designed for students who have a BA but do not have sufficient skills in Latin and/or Greek to continue on in graduate school, seminary, or other programs that require multiple years of both languages. Students in the postbaccalaureate program take classes at the University of Iowa in areas that are appropriate for their long-term goals. The program is typically one year in length, but students may continue if deemed appropriate by the faculty.

## Learning Outcomes

Students are expected to demonstrate:

- intermediate to advanced comprehension of classical languages such as ancient Greek and Latin; and
- improvement in writing and communication skills for graduate school applications or other advanced studies focusing on the ancient world.

## Requirements

The Postbaccalaureate Certificate in Classics requires 18 s.h. in Department of Classics courses numbered 2000 or above. Students must maintain a grade-point average of at least 3.00 to remain in good standing and complete the program.
The program is designed for students who have a bachelor's degree and would like further study in Greek and Latin in order to be competitive for admission to a graduate program in classics. Entry to most graduate programs requires the study of both Latin and Greek, normally a minimum of three years in one language and two years in the other. The certificate is designed to be completed in two semesters by students who enter with two years of Latin and one to two years of Greek, or vice versa.

At least 12 s.h. of the required credit must be earned in Greek and Latin language courses; the remaining 6 s.h. may be earned in approved advanced courses taught in English (prefix CLSA). Transfer credit is not accepted toward the certificate.

A suggested plan of study for a student who enters the program with two years of Latin and one year of Greek is as follows.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Fall |  |  |
| CLSA:4085 | Postbaccalaureate Seminar | 1 |
| CLSG:2001 | Second-Year Greek I | 3 |
| CLSL:3001 | Latin Literature of the Republic | 3 |
|  | I |  |
| CLSL:4076 | Latin Composition | $2-3$ |
| One elective with prefix CLSA, CLSG, or CLSL | 3 |  |

numbered 3000 or above

## Spring

| CLSG:2002 | Second-Year Greek II | 3 |
| :--- | :--- | ---: |
| CLSL:3002 | Latin Literature of the Republic | 3 |
|  | II |  |
| CLSL:4076 | Latin Composition | $2-3$ |
| Total Hours |  | $\mathbf{2 0 - 2 2}$ |

A suggested plan of study for a student who enters the program with two years of Latin and two years of Greek is as follows.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Fall |  |  |
| CLSA:4085 | Postbaccalaureate Seminar | 1 |
| CLSG:3001 | Archaic and Classical Periods I | 3 |
| CLSG:4076 | Greek Composition | $2-3$ |
| or CLSL:4076 | Latin Composition |  |
| CLSL:3001 | Latin Literature of the Republic | 3 |
| One elective with prefix CLSA, CLSG, or CLSL |  |  |
| numbered 3000 or above |  |  |
| Spring | Archaic and Classical Periods II | 3 |
| CLSG:3002 | Greek Composition | 3 |
| CLSG:4076 | Latin Composition | $2-3$ |
| or CLSL:4076 | Latin Literature of the Republic | 3 |
| CLSL:3002 | II |  |

## Total Hours

Students who complete the program successfully receive a certificate from the College of Liberal Arts and Sciences and a letter from the Department of Classics.

## Admission

Applicants must have a baccalaureate degree from an accredited college or university and a minimum of two years of language study (two years of Latin or two years of Greek, or one year of each). In unusual circumstances, students with less language preparation may be admitted.

Applicants who are not enrolled in a graduate or professional program may apply to the University of Iowa as undergraduate transfer students; they must state on their application that they are applying to the College of Liberal Arts and Sciences for admission to the classics postbaccalaureate certificate program. They must submit transcripts confirming preparation for certificate language study, a statement of purpose, scores on the Graduate Record Examination (GRE) General Test, a writing sample, and three letters of recommendation from faculty members at their baccalaureate institution.

## Classics, MA

The master's degree in classics is intended for students who wish to advance their understanding of ancient Mediterranean languages, literatures, and cultures. Although it is primarily intended for students who wish to teach classics-Greek, Latin, mythology, Mediterranean archaeology, ancient philosophy, and classical literature-at the high school level or continue on to a PhD program, many students bring their advanced education to such careers as law, counseling, publishing, library science, grant writing, nonprofit organizations, and university administration.

## Learning Outcomes

Students are expected to demonstrate:

- understanding of advanced Greek and Latin vocabulary and grammar;
- broad knowledge of ancient Greek and Latin literature;
- comprehension of ancient Mediterranean states, geography, and history;
- synthesis of the interplay between economics and trade, politics, warfare, class, race, ethnicity, gender, and rhetoric; and
- application of ancient concepts to modern problems.

## Requirements

The Master of Arts program in classics requires a minimum of 30 s.h. in courses numbered 3000 or above. Students may count a maximum of 12 s.h. earned in courses numbered 3000-4999 toward the degree. They must maintain a cumulative grade-point average of at least 3.00 to earn the degree.

Students must pass a sight examination in the language(s) studied and an examination on literature and history.

Courses taken to complete the Postbaccalaureate Certificate in Classics do not count toward the degree.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Greek, MA

The master's degree program in Greek is intended for students who wish to teach Greek language, literature, and history at the high school level. It also is intended for those who wish to transfer to another institution for PhD work.

## Learning Outcomes

Students are expected to demonstrate:

- understanding of advanced Greek vocabulary and grammar;
- broad knowledge of ancient Greek literature;
- comprehension of ancient Greek history, material culture, and cultural cohesion, differentiation, and development over time; and
- application of a knowledge of Greek language and culture to modern educational and civic issues.

## Requirements

The Master of Arts program in Greek requires a minimum of 30 s.h. in courses numbered 3000 or above. Students may count a maximum of 12 s.h. earned in courses numbered 3000-4999 toward the degree. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree.

Students must pass a sight examination in Greek and an examination on Greek literature and history.
Courses taken to complete the Postbaccalaureate Certificate in Classics do not count toward the degree.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

d Written comprehensive examination on Greek history and literature.

## Latin, MA

The master's degree program in Latin is intended for students who wish to teach Latin language, literature, and Roman history at the high school level. It also is intended for those who wish to transfer to another institution for PhD work.

## Learning Outcomes

Students are expected to demonstrate:

- understanding of advanced Latin vocabulary and grammar;
- broad knowledge of ancient Latin literature;
- comprehension of ancient Roman and Italian history, material culture, and cultural cohesion, differentiation, and development over time; and
- application of a knowledge of Latin language and Roman culture to modern educational and civic issues.

## Requirements

The Master of Arts program in Latin requires a minimum of 30 s.h. in courses numbered 3000 or above. Students may count a maximum of $12 \mathrm{~s} . \mathrm{h}$. earned in courses numbered 3000-4999 toward the degree. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree.

Students must pass a sight examination in Latin and an examination on Roman literature and history.

Courses taken to complete the Postbaccalaureate Certificate in Classics do not count toward the degree.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Classics, PhD

The PhD program in classics is intended for students who wish to pursue original research in the wide-ranging field of classicsGreek, Latin, Semitic languages, ancient Mediterranean religions and mythology, Mediterranean archaeology, ancient philosophy, and classical literature from Homer to Plato to the Bible to the Church fathers. Students also are trained to teach languages and literature at the university level. Many students bring their advanced education to such careers as law, counseling, publishing, library science, grant writing, nonprofit organizations, and university administration.

## Learning Outcomes

Students are expected to demonstrate many, if not all of the following:

- understanding of the vocabulary and grammar of the classical languages they have chosen to study (e.g., Greek, Latin, Hebrew, Aramaic, Syriac, Coptic) at an advanced level;
- broad knowledge of the ancient literature corresponding to their chosen languages of study;
- application of ancient concepts learned to modern problems;
- the ability to conduct original research in various subjects within the field of classics;
- the ability to conduct archaeological field research and teach it at the university level;
- facility with the writing skills necessary to publish articles and critical research volumes at the peer-review level, as well as popular articles in trade books, magazines, newspapers, and online publications; and
- facility with the public-speaking skills necessary to present research both in professional academic settings and in popular, public venues.

## Requirements

The Doctor of Philosophy program in classics requires a minimum of $72 \mathrm{~s} . \mathrm{h}$. of graduate credit, including the courses listed below (1618 s.h.). Students may count no more than 12 s.h. earned in courses numbered 3000-4999 toward the degree. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree.
Students also must take precomprehensive and comprehensive examinations and write a dissertation.

Courses taken to complete the Postbaccalaureate Certificate in Classics do not count toward the degree.

## Required Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | $2-3$ |
| CLSG:4076 | Greek Composition | 3 |
| CLSG:5001 | Greek Survey I: Archaic to <br> Classical Literature | 3 |
| CLSG:5002 | Greek Survey II: Hellenistic to <br> Late Antique Literature | 3 |
| CLSL:4076 | Latin Composition | $2-3$ |
| CLSL:5001 | Latin Survey I: Republican | 3 |
| CLSL:5002 | Literature |  |
|  | Latin Survey II: Imperial to Late <br> Antique Literature | 3 |

The remaining coursework is made up of Department of Classics courses and other courses with approval of the graduate advisor.

## PhD Examinations

PhD students must take the foundations exam at the end of their first year. The remaining exams may be taken in any sequence during years two to four. Students must file a request for the fourth-year comprehensive exam at least three weeks before the date of the third and final field exam to be taken. Competence in reading two scholarly languages, such as French, German, or Italian, must be demonstrated by the end of the fourth year of study.

## Foundations Exam

The foundations exam is based on a set reading list of broad themes in ancient Mediterranean history, literature, and culture. It consists entirely of take-home and open-book essay questions, which students have two weeks to complete.

## Translation Exams

Students take two translation exams in either Greek, Latin, Hebrew/ Aramaic, Coptic, or Syriac. Translation exams are scheduled on an individual basis, either one or two per semester, and are based on a set reading list. They are four hours each and taken in the department with dictionary access.

## Field Exams

Students take three field exams in either Greek literature, Latin literature, biblical studies, early Christianity, Mediterranean history, Mediterranean archaeology, or ancient world digital humanities. Field exams are scheduled on an individual basis, either one or two per semester, and are based on a set reading list. They consist entirely of take-home and open-book essay questions, which students have two weeks to complete.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Career Advancement

The Department of Classics is recognized for the excellent program it offers for graduate study in classics. A large proportion of its students pursue advanced degrees and most go on to teach at the college level.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Other modern languages may be substituted with the approval of the student's faculty advisor and the department chair.
c Taken twice in consecutive semesters.
d Choose from CLSG or CLSL courses numbered 6011-6014, or CLSA:6100.
e Taken at the end of the first year, the foundations exam is a set reading list of broad themes exams in ancient Mediterranean history, literature, and culture. It consists entirely of take-home and openbook essay questions, which students have two weeks to complete.
f The doctoral comprehensive exam is the final field or translation exam undertaken by the student prior to the prospectus defense.
g Students take three field exams in either Greek literature, Latin literature, biblical studies, early Christianity, Mediterranean history, Mediterranean archaeology, or ancient world digital humanities. Field exams are scheduled on an individual basis, either one or two per semester, and are based on a set reading list. They consist entirely of take-home and open-book essay questions, which students have two weeks to complete.
h Students take two translation exams in either Greek, Latin, Hebrew/ Aramaic, Coptic, or Syriac. Translation exams are scheduled on an individual basis, either one or two per semester, and are based on a set reading list. They are four hours each and taken in the department with dictionary access.
i Dissertation defense.

# Communication Sciences and Disorders 

## Chair

- Eric J. Hunter

Undergraduate major: speech and hearing science (BA)
Undergraduate minor: communication sciences and disorders
Graduate degrees: MA in speech pathology and audiology; AuD; PhD in speech and hearing science

Graduate certificate: multilingualism and culturally responsive practice in SLP
Faculty: https://csd.uiowa.edu/people
Website: https://csd.uiowa.edu
The courses and degree programs of the Department of Communication Sciences and Disorders are designed to meet the needs of students preparing for careers in clinical service, college and university teaching, and research concerned with speech, language and/or hearing processes and disorders. The department also offers courses for students with vocational and professional goals in other fields-for example, engineering, psychology, education, speech, theatre arts, dentistry, and medicine-whose preparation may be enriched by the study of speech and hearing processes and their disorders.

Advanced degree holders in communication sciences and disorders provide clinical services for people with speech, hearing, or language problems in hospitals, community clinics, rehabilitation facilities, elementary and secondary schools, and private practice. They teach in colleges and universities and conduct research in laboratories concerned with communication processes and disorders.

Graduate Programs of Study

## Majors

- Master of Arts in Speech Pathology and Audiology [p. 269]
- Doctor of Audiology [p. 272]
- Doctor of Philosophy in Speech and Hearing Science [p. 274]

## Certificate

- Certificate in Multilingualism and Culturally Responsive Practice in SLP [p. 276]

## Facilities

## Clinical Facilities

The clinical training program benefits greatly from Iowa City's standing as the most comprehensive health sciences center in Iowa
and from the ready availability of health service facilities for clinical training of students in speech-language pathology and audiology.
The University of Iowa Affiliated Speech and Hearing Services include the Wendell Johnson Speech and Hearing Clinic; the division of speech and hearing in University of Iowa Hospitals \& Clinics (UIHC) Department of Otolaryngology-Head and Neck Surgery; UIHC Consolidated Speech and Swallowing Services, which provides services to the Departments of Neurology and Otolaryngology-Head and Neck Surgery; child psychiatry speech and hearing services in the Center for Disabilities and Development; and the audiology and speech pathology service in the VA Iowa City Health Care.
The Wendell Johnson Speech and Hearing Clinic serves the university and the general public. Included in its services are outpatient evaluation and rehabilitation programs for speech, voice, swallowing, hearing, language problems, and a full range of audiological services that include diagnostic and rehabilitative services. Intensive therapeutic summer programs for children and a variety of clinical programs provide students with supervised clinical experience with a wide variety of speech, hearing, and language disorders.
In addition to the clinical training in the Wendell Johnson Speech and Hearing Clinic, training also may be acquired in supervised clinical practice with elementary school children through various state education agencies and in supervised clinical practice in speech, language, and hearing services provided by University of Iowa Hospitals \& Clinics Consolidated Speech and Swallowing Services, the Regional Child Health Specialty Clinics, Center for Disabilities and Development, and the VA Iowa City Health Care.

Public and private departments and programs in addition to those mentioned above often contribute to the cooperative professional training, research, and service programs.

## Research Facilities

The Wendell Johnson Speech and Hearing Center includes faculty offices, an anechoic chamber, research lab space for individual faculty members, classrooms, and shared lab space used for teaching. It also serves as the home for the Wendell Johnson Speech and Hearing Clinic. Research spaces are equipped with sound booths, computer labs, and a wide variety of equipment used for acoustic, physiologic, and perceptual studies of hearing, balance, speech, voice, language, and swallowing. The Wendell Johnson Speech and Hearing Clinic is a full-service training clinic that is equipped to serve individuals of all ages with speech, language, and hearing concerns. These facilities include multiple fully equipped audiometric testing suites and suites used for diagnosis and evaluation of individuals with speech, language, swallowing, hearing, and balance concerns. Video recording equipment is available, as are rooms designed specifically to allow for group instruction.
Collaboration with departments in the Carver College of Medicine, the Department of Psychological and Brain Sciences, and the University of Iowa DeLTA Center makes additional laboratory facilities available for research on problems in speech and hearing. The participation and cooperation of specialists from varied fields, including psychology, child development, education, engineering, statistics, and medicine, further broaden the scope of research activities in speech, language, and hearing.

## Courses

## Communication Sciences and Disorders Courses

## CSD:1000 First-Year Seminar

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

## CSD:1015 Introduction to Speech and Hearing Processes and

 DisordersIntroduction to communication sciences and disorders field; clinical and research works; wide range of readings; survey course with less emphasis on specific disorders.

CSD:1800 Aging Matters: Introduction to Gerontology 3 s.h. Overview of the field of gerontology from a bio-psycho-social framework; how the human body and brain age, effects of these biological changes on physical and cognitive functions, and interaction of these individual factors with societal contexts; broad perspective to give students a foundation in gerontology, paving the way for more advanced courses in biology of aging, psychology of aging, and global aging; for students from a wide range of disciplines and levels, no prior knowledge of aging required. GE: Social Sciences. Same as ASP:1800, NURS:1800, SSW:1800, TR:1800.

## CSD:2110 Phonetics: Theory and Applications

3 s.h.
Basic concepts: articulatory and acoustic description of speech sound production, dialect variations, and language differences; development of phonetic transcription skills with emphasis on English phonetics and clinical applications to developing and disordered speech.
CSD:2111 Basic Acoustics for Speech and Hearing 3 s.h.
Principles of sound, simple harmonic motion, sound pressure and intensity, decibels, complex waves, Fourier analysis, resonance and filters, distortion, transmission of sound. Requirements: completion of departmental math requirement (MATH:1440 or MATH:1460 or MATH:1850).

## CSD:3097 Honors Seminar

2 s.h.
Research topics and procedures in speech and hearing sciences; ongoing faculty research, research opportunities, possible research projects. Requirements: honors standing with intent to complete an honors thesis.

CSD:3112 Anatomy and Physiology of Speech Production 4 s.h. Normal anatomy and physiology of structures used to produce speech; principles and methods for instrumental study of speech production.

## CSD:3113 Introduction to Hearing Science

4 s.h.
Normal auditory process; anatomy and physiology of auditory system; subjective correlates of auditory stimuli.

CSD:3116 Basic Neuroscience for Speech and Hearing 3 s.h. Basic anatomy, physiology of central nervous system; emphasis on neural systems involved in normal and disordered communication. Offered fall semesters. Requirements: biology, zoology, or physiology course. Same as LING:3116.

## CSD:3117 Psychology of Language

3 s.h.
Introduction to scientific study of language use; language approached from a multidisciplinary perspective, integrating theories and methods of psycholinguistics, neuropsychology, and communication sciences and disorders. GE: Social Sciences. Same as LING:3117.

CSD:3118 Language Acquisition
1-3 s.h.
Models of children's language acquisition; child language/ communication development from infancy through school age, in context of current developmental research. Requirements: for CSD:3118—LING:3001 and PSY:1001; for LING:3118—LING:3001 or LING:3117. GE: Social Sciences. Same as LING:3118.

1 s.h. CSD:3119 Interdisciplinary Science of Sound and Hearing 3 s.h. Introduction to physics of sound, biology/psychology of hearing, and audio technology; theories and experimental methods; music, speech, and environmental sounds. Same as MUS:3055, PSY:3055.

CSD:3185 Hearing Loss and Audiometry 3 s.h. Introduction to profession of audiology; overview of hearing disorders, evaluation, and treatment; basic pure-tone and speech audiometry.

CSD:3187 Early Literacy Instruction for Young Children 3 s.h. Service-learning involving lecture, class discussion, and student participation in an early literacy program for preschoolers; concepts and skills necessary to conduct story time groups with young children that target development of print knowledge; application of learning by reading to small groups of preschool children. Recommendations: CSD:3118. Same as EDTL:3187.

CSD:3993 Research Practicum arr. Individual or small group participation in faculty research projects.
CSD:4029 Experiential Learning in Audiology 1 s.h.
Students build a foundation of skills to develop in advanced degree program; for students interested in obtaining an AuD or learning more about audiology. Prerequisites: CSD:3185. Requirements: third- or fourth-year standing.
CSD:4098 Honors Thesis
1-3 s.h.
Close work with a faculty mentor.
CSD:4114 Introduction to Voice Disorders 2 s.h. Basic foundations for management of voice disorders. Prerequisites: CSD:3112.

CSD:4115 Structural Disorders 2 s.h.
Therapy approaches used to treat speech production and swallowing disorders associated with disorders that affect structure and physiology of the speech and swallowing mechanism; basic knowledge necessary for clinical practice by clinicians who do not specialize in management of patients with head and neck cancer, cleft palate, or neurological disorders.
CSD:4120 Introduction to Clinical Methods and Observation 3 s.h. Observation of the diagnosis and treatment of a wide range of speech, language, or hearing disorders in a variety of settings; basic understanding of evaluation process, goal setting, behavior management, pacing of therapy, shaping of behavior, tracking performance/learning, and professional and ethical behavior through observation of clinical interactions; completion of 25 hours of observation as required by the American Speech-Language-Hearing Association for obtaining national certification. Prerequisites: CSD:4145. Recommendations: senior or graduate standing in communication sciences and disorders.

## CSD:4130 Diversity, Equity, and Inclusion in Communication

 Sciences and DisordersDiscussion of diversity, equity, and inclusion in communication sciences and disorders field; historical perspectives as related to current practices. Recommendations: graduate standing in speech language pathology, or junior or senior standing in speech language pathology or audiology.
CSD:4140 Manual Communication
1 s.h.

Training in use of sign systems in manual communication.

## CSD:4145 Developmental Language Disorders

Nature of developmental disorders; basic concepts including behavioral characteristics, developmental patterns, and etiology theories; assessment and intervention principles in semantics, morphology, and syntax.

## CSD:4148 Developmental Speech Disorders 3 s.h.

Review of typical phonological development in children; introduction to assessment and intervention practices for articulation and phonological disorders in children; may include apraxia, cerebral palsy, and cleft palate.

## CSD:4165 Communication Disorders and Aging

1-2 s.h. Introduction to speech, language, and hearing processes and disorders among older adults; survey of characteristics of communication and communication breakdown, remediation, and strategies for improving communication with older adults with communication disorders; primarily for majors and other health care service providers. Same as ASP:4165.

CSD:4183 Introduction to Stuttering 2 s.h. Theoretical perspectives on the nature of stuttering including onset and development, basic phenomena, and beginning treatment principles.
CSD:4186 Problems: Speech/Hearing Processes and Disorders arr. Independent readings or research experience through mutual arrangement between student and faculty; goals and requirements determined by participating faculty member.

## CSD:4244 Rehabilitative Audiology 3 s.h.

Theory, procedures for assessment, and rehabilitation of speech, hearing, and language deficits of people with hearing impairment. Prerequisites: CSD:3185.
CSD:5104 Language Disorders in School-Aged Children $\mathbf{3}$ s.h. Emphasis on elementary grades; usually taken in conjunction with EDTL:4192, which provides approximately 70 hours of supervised clinical practice in elementary schools. Recommendations: primarily for communication sciences and disorders majors. Same as EDTL:5104.

## CSD:5135 Foundations of Clinical Practice I 2 s.h.

Basic concepts of clinical practice including models of diagnosis, fundamentals of clinical data collection and measurement, treatment planning, and professional writing. Corequisites: CSD:4145.

## CSD:5136 Foundations of Clinical Practice II 1 s.h.

Advanced concepts of clinical practice including professionalism, clinical decision-making, developing client-clinician alliance, examining biases and prejudices in clinical practice, and developing empathy.

## CSD:5137 Foundations of Clinical Practice III 1 s.h.

Advanced principles of clinical practice including risk management, public policy, and models of third-party reimbursement; professional issues.

## CSD:5146 Neurogenic Disorders of Language

Overview of communication disorders secondary to acquired brain damage in adults; focus on aphasia, communication disorders arising from dementia, right-hemisphere stroke, traumatic brain injuries; general principles of diagnosis and intervention.
CSD:5203 Counseling in Communication Disorders 1 s.h.
Development of appropriate intervention plans that meet client/ patient needs in collaboration with client/patient and relevant others; communicating effectively and recognizing needs, values, preferred mode of communication, and cultural linguistic background of client/ patient, family, caregivers, relevant others; providing counseling to clients/patients, family, and caregivers regarding communication and swallowing disorders.

Application of methods of intervention in development, training, rehabilitation of vocal behavior; motor learning, efficacy of treatment strategies, factors affecting compliance with recommended therapy. Offered fall semesters. Prerequisites: CSD:3112 and CSD:4114. Same as MUS:5555.

CSD:5219 Fundamentals of Laboratory Instrumentation 2 s.h. Introduction to instrumentation commonly used in research in speech and hearing sciences; basic audiometric calibration.
CSD:5223 Pediatric Feeding and Swallowing Disorders 1 s.h. Development of anatomy and physiology of feeding and swallowing in infants and children; assessment and treatment of pediatric feeding and swallowing disorders. Prerequisites: CSD:4115.

## CSD:5224 System and Signal Theory for Speech and Hearing Science <br> 3 s.h.

 Introduction to signals and systems with emphasis on their relevance to the fields of audiology and speech-language pathology. Requirements: introductory calculus.
## CSD:5233 Aphasia

2 s.h.
Assessment, diagnosis, and treatment of aphasia and other acquired language and cognition-based communication disorders. Corequisites: CSD:5136. Requirements: CSD:5146 or a course that provides an overview of acquired language disorders.
CSD:5234 Acquired Cognitive-Communication Disorders arr. Cognitive, neuropsychological, and social aspects of communication and the management of acquired cognitive-communication disorders associated with traumatic brain injury, right hemisphere damage, and neurodegenerative diseases.

## CSD:5236 Neurological and Structural Disorders of

Swallowing
3 s.h.
Provides future speech-pathologists with a strong foundation for career-long learning about the nature and classification of neurogenic motor-speech and swallowing disorders, symptomatology, etiology, diagnosis, treatment, and management options.

## CSD:5237 Cleft Palate and Related Disorders 1-2 s.h.

Nature, etiologies, and principles of treatment of common disorders associated with cleft lip and palate, associated disorders.

## CSD:5238 Motor Speech Disorders <br> 2 s.h.

Provides future speech-pathologists with a strong foundation for career-long learning about the nature and classification of neurogenic motor-speech disorders, symptomatology, etiology, diagnosis, treatment, and management options.
CSD:5240 Hearing Aids
3 s.h.
Hearing aids and diagnostic procedures; laboratory emphasis on measurement procedures.
CSD:5246 Advanced Audiology 3 s.h.
Theory and procedures for assessment of hearing loss in adult and pediatric populations; experience in test administration through supervised laboratory sessions.

## CSD:5253 Speech Perception in Listeners with Hearing

Loss 1-2 s.h.
Introduction to study of speech perception in listeners with normal hearing and those with hearing loss; overview of speech acoustics; theories of speech perception; contributions of auditory, visual, and indexical (talker-specific) information in speech signal; assessment techniques; benefits of hearing aid and/or cochlear implant use; factors influencing speech perception by children and adults with hearing loss.

Training in skills necessary for working with school-age population; case management and aural rehabilitation, amplification and classroom hearing technology, identification and assessment practices, federal legislation that affects services. Requirements: CSD:5240 for AuD students.

CSD:5256 Anatomy and Physiology of Hearing 3-4 s.h.
Anatomy of auditory system, cochlear mechanics, and electrophysiology of peripheral and central auditory nervous system; laboratory emphasis on physiological techniques for study of ear.

## CSD:5258 Multilingualism and Culturally Responsive Practice in

 Communication Sciences and Disorders 3 s.h.Trajectories of multilingual language acquisition in typical contexts and in context of communication disorders; connections between language, cognition, culture, and cultural-linguistic experiences to develop and apply culturally responsive speech and language assessment and intervention skills in context of cultural and linguistic diversity.
CSD:5260 Augmentative and Alternative Communication 2 s.h. Theories, assessment, and intervention in augmentative and alternative communication (AAC) for individuals with severe communication disorders resulting from a variety of developmental and acquired conditions.

## CSD:5282 Phonological Development and Disorders 2 s.h.

Advanced topics in phonological development and disorders; current theoretical approaches to phonological analysis and typical phonological acquisition applied to assessment and intervention with children who have phonological disorders.
CSD:5284 Advanced Fluency Disorders 2 s.h.
Fluency disorders and treatment approaches for children and adults.
CSD:5301 Practicum: Speech-Language Pathology
arr.
Supervised clinical practice. Corequisites: CSD:5135. Requirements: MA professional emphasis.

CSD:5304 Speech Pathology Outplacement: School 0-4 s.h. Supervised teaching and observation in speech-language pathology in an elementary school setting.
CSD:5305 Speech Pathology Outplacement: Non-School 0-4 s.h. Supervised clinical work and observation in speech-language pathology in a non-school setting.
CSD:5306 Speech-Language Pathology Multilingual/Multicultural Outplacement: School
arr.
Supervised multilingual and multicultural teaching and observation in speech-language pathology in an elementary school setting.

## CSD:5307 Speech-Language Pathology Multilingual/Multicultural Outplacement: Non-School <br> arr.

Supervised clinical work and observation in speech-language pathology in a multilingual and multicultural non-school setting.
CSD:5308 Practicum: Speech-Language Pathology Multilingual/ Multicultural
arr.
Supervised clinical practice for Multilingualism and Culturally
Responsive Practice in SLP Certificate. Corequisites: CSD:5135.
Requirements: MA professional emphasis.
CSD:5310 Scientific Writing 2 s.h.
Principles of writing for scientific posters, journal articles, grant proposals; effective communication of concepts and data. Requirements: PhD standing.
CSD:5311 Advanced Clinical Topics in Audiology 2 s.h.
Variety of professional issues important to clinical practice; incorporates professional and community engagement as well as service learning; topics directly related to clinical work and covered by clinical faculty and guest speakers with special expertise in each area; student presentations.

CSD:5314 Audiology Student Teaching
Supervised teaching and observation in an area of audiology in the elementary schools. Corequisites: CSD:5315. Requirements: AuD first-, second-, or third-year enrollment.
CSD:5315 Clinical Rotations in Audiology arr.
Supervised clinical practice in audiology. Requirements: AuD first-, second-, or third-year enrollment.

CSD:5317 Advanced Clinical Practice in Audiology 1 s.h
Introduction to business aspects of developing and managing an audiology practice related to compliance, billing, coding, and reimbursement; varied professional issues important to clinical practice; topics covered by clinical faculty and guest speakers with special expertise in each area; student presentations.

## CSD:5320 Applied Statistics and Principles of Evidence-Based

 Practice in AudiologyCombination of applied statistics and principles of evidence-based clinical practice with emphasis on applications in audiology and hearing science; review of statistical techniques widely used in audiology research including nonparametric and descriptive statistics, correlation, regression, and ANOVA; examples taken from studies published in scientific journals in communication sciences and disorders; principles of evidence-based practice that focus on topics and methods of establishing treatment efficacy, meta analyses, levels of evidence, and methods of assessing research quality. Requirements: introductory course in statistics.
CSD:5350 Seminar in Supervision 1 s.h.
Process and procedures in clinical education and supervision in a graduate program.
CSD:5511 Introduction to Doctoral Research 1 s.h.
Topics related to development and execution of research; doctoral program, use of library, human and animal subject issues, philosophy of science, use of common research tools, reading and writing research papers, and research grant preparation.
CSD:6101 Cognitive Science of Language Proseminar I 3 s.h. Survey of five major disciplines within language sciences: formal linguistic, communication disorders, psychological, neuroscience, and computational approaches. Requirements: graduate standing in communication sciences and disorders, linguistics, psychology, or neuroscience. Same as LING:6101, PSY:6101.
CSD:6102 Cognitive Science of Language Proseminar II 3 s.h. Survey of five major disciplines within language sciences: formal linguistic, communication disorders, psychological, neuroscience, and computational approaches. Requirements: graduate standing in communication sciences and disorders, linguistics, psychology, or neuroscience. Same as LING:6102, PSY:6102.
CSD:6202 Vocal Pedagogy
3 s.h.
History of voice pedagogy, various pedagogical techniques of voice training, vocal anatomy, voice classification, critical listening, postural alignment, managing breath, tonal production, connecting registers, articulation, interpretation, vocal health, pharmacological effects on the voice, vocal gadgets, requirements for a professional career, teaching in the 21st century, and teaching practicum; diagnosis and correction of vocal faults. Same as MUS:6520.
CSD:6230 Psychoacoustics 2-3 s.h.
Basic properties of auditory perception or psychoacoustics from material covered in CSD:5256; perception of loudness, masking frequency selectivity, temporal processing, and spatial perception; basic perceptual properties, methods of measurement, and physiological basis for performance; properties of perception in normal ears, hearing impairment, and auditory prostheses (e.g., cochlear implants).
CSD:6240 Seminar in Audiology arr.
Topics vary; for AuD and PhD students.

CSD:6242 Hearing Aids II
Evaluation and verification procedures; emphasis on advanced technologies and strategies.

## CSD:6245 Pediatric Audiology

1,3 s.h.
Theory and procedures for assessment and rehabilitation of pediatric populations; laboratory emphasis on test administration.

## CSD:6247 Medical Audiology

2 s.h.
Review of a wide range of pathologic conditions that have an impact on hearing; focus on understanding the underlying pathophysiology and how the disorder is diagnosed and treated.
CSD:6249 Cochlear Implants
1-3 s.h.
Introduction to cochlear implants; history of cochlear implantation, introduction to cochlear implant technology, basics of device programming and troubleshooting, candidacy issues, outcomes in children and adults; auditory rehabilitation specific to cochlear implant recipients.
CSD:6290 Auditory Evoked Potentials 3 s.h.
Introduction to the wide range of electrophysiologic measures of auditory function used in clinical practice.
CSD:6291 Vestibular Assessment 2 s.h.
Introduction to vestibular anatomy, physiology theory, and testing techniques.
CSD:6292 Advanced Rehabilitative Audiology 1-2 s.h. Current and developing procedures for assessment and habilitation of adults and children with hearing losses.

## CSD:6293 Vestibular Rehabilitation <br> 1 s.h.

Introduction to vestibular management and rehabilitation.
CSD:6311 Professional Issues in Audiology 1 s.h.
Information on a variety of professional issues important to clinical practice; topics directly related to clinical work; written assignments required as a means for students to reflect on and share clinical experiences related to topics. Corequisites: CSD:6316.
CSD:6312 Professional Issues in Audiology II 1 s.h.
Information on a variety of professional issues important to clinical practice; topics directly related to clinical work; presentations, discussions, and written assignments required as a means for students to reflect on and share clinical experiences related to topics. Corequisites: CSD:6316. Requirements: AuD fourth-year enrollment.

## CSD:6316 Advanced Externship in Audiology

arr.
Advanced clinical externship in audiology. Corequisites: CSD:6311 or CSD:6312. Requirements: AuD fourth-year enrollment.
CSD:6317 Audiology Practice: Business Start-Up 1 s.h.
Introduction to business aspects of developing and managing an audiology practice related to business start-up as well as short and long range business planning; presentation of topics by clinical faculty and guest speakers with special expertise in each area; student presentations.
CSD:6318 Occupational Audiology 1 s.h.
Incidence and prevalence of hearing loss; risk factors and assessment; noise exposure guidelines; hearing protection devices; education and motivation.

## CSD:6319 Interprofessional Practice and Community

Engagement in Communication Sciences and Disorders 1 s.h.
Advanced knowledge and experiences related to interprofessional education and practice (IPE/IPP) in communication sciences and disorders; IPE/IPP training focus on students' collaboration with multiple service providers from other professions to improve outcomes for individuals, families, and/or communities; presentation of topics by clinical faculty and guest speakers with special expertise in each area; student presentations.

CSD:6515 Professional Seminar
0 s.h.
Weekly presentation of research projects, ideas, and clinical initiatives by faculty, students, and guests; required for PhD, AuD, and MA-SLP first-year graduate students.
CSD:6519 Evidence-Based Practice 2 s.h.
Introduction to design and conduct of research and evidence-based clinical practice. Offered fall semesters. Recommendations: clinical graduate standing in audiology or speech-language pathology.
CSD:6538 Advanced Topics in Speech, Language, and Hearing Research

1 s.h.
Varied topics related to auditory function, assessment, and rehabilitation; discussion based.

## CSD:7238 Capstone

1 s.h.
Work with a faculty mentor to complete a project that focuses on an area of student's interest.

CSD:7239 Speech-Language Pathology Capstone in
Multilingualism and Culturally Responsive Practice 1-3 s.h. Work with a faculty mentor to complete a project that focuses on multilingualism and/or multiculturalism in speech-language pathology.
CSD:7590 Research arr.
Individual laboratory research training in speech-language pathology or audiology.

## Speech and Hearing Science, BA

The undergraduate major in speech and hearing science emphasizes the normal processes of speech, hearing, and language. Coursework for the major prepares students to enroll in either a master's degree program in speech-language pathology or a clinical doctorate program in audiology (AuD). The undergraduate degree does not qualify an individual to work professionally in the field.

## Learning Outcomes

Graduating BA students in speech and hearing science will have:

- a strong foundational understanding of the physical processes and biological substrates underlying normal audition, normal perception, and production of speech and language;
- a strong foundational understanding of the normal development of speech, language, and hearing;
- finished all prerequisite coursework needed to begin a graduate program in either speech-language pathology or audiology; and
- preparation to begin more advanced graduate coursework focusing on disorders, diagnosis, and treatment.

## Requirements

The Bachelor of Arts with a major in speech and hearing science requires a minimum of 120 s.h., including 63-64 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

Requirements include 12 core courses offered by the department and eight cognate courses offered by other departments. Transfer students must complete a minimum of 15 s.h. toward the major at the University of Iowa.

The BA with a major in speech and hearing science requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Core Courses | 37 |
| Cognate Courses | $26-27$ |
| Clinical Observation |  |

## Core Courses

| Course \# <br> All of these: | Title | Hours |
| :--- | :--- | :---: |
| CSD:1015 | Introduction to Speech <br> and Hearing Processes and <br> Disorders | 2 |
| CSD:2110 | Phonetics: Theory and <br> Applications | 3 |
| CSD:2111 | Basic Acoustics for Speech and <br> Hearing | 3 |
| CSD:3112 | Anatomy and Physiology of | 4 |
| CSD:3113 | Speech Production |  |
| CSD:3116 | Introduction to Hearing Science <br> Basic Neuroscience for Speech | 4 |
| CSD:3117 | Psychology of Language | 3 |
| CSD:3118 | Language Acquisition | 3 |
| CSD:3185 | Hearing Loss and Audiometry | 3 |
|  |  | 3 |

| CSD:4145 | Developmental Language <br> Disorders | 3 |
| :--- | :--- | :--- |
| CSD:4148 | Developmental Speech <br> Disorders | 3 |
| CSD:4244 | Rehabilitative Audiology | 3 |

## Cognate Courses

Students may choose cognate courses that help fulfill the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Both of these: |  |  |
| LING:3001 | Introduction to Linguistics | 3 |
| PSY:1001 | Elementary Psychology | 3 |
| One of these: |  |  |
| PSQF:1020/ <br> STAT:1020 | Elementary Statistics and Inference | 3 |
| $\begin{aligned} & \text { PSQF:4143/ } \\ & \text { STAT:4143 } \end{aligned}$ | Introduction to Statistical Methods | 3 |
| STAT:2010 | Statistical Methods and Computing | 3 |
| STAT:3510/ <br> IGPI:3510 | Biostatistics | 3 |
| One of these: |  |  |
| CHEM:1070 | General Chemistry I | 3 |
| CHEM:1110 | Principles of Chemistry I | 4 |
| PHYS:1400 | Basic Physics (preferably with lab) | 3-4 |
| PHYS:1511 | College Physics I | 4 |
| One of these: |  |  |
| ASP:3150 | Psychology of Aging | 3 |
| PSY:2301 | Introduction to Clinical Psychology | 3 |
| PSY:2930 | Abnormal Psychology: Health Professions | 3 |
| SSW:1800/ <br> ASP:1800/CSD:1800/ <br> NURS:1800/TR:1800 | Aging Matters: Introduction to Gerontology | 3 |
| One of these: |  |  |
| PSQF:4106 | Child Development | 3 |
| PSY:2401 | Introduction to Developmental Science | 3 |
| One of these: |  |  |
| BIOL:1141 | Human Biology: Health Professions (with lab) | 4 |
| BIOL:1411 | Foundations of Biology (with lab) | 4 |
| One of these: |  |  |
| MATH:1440 | Mathematics for the Biological Sciences | 4 |
| MATH:1460 | Calculus for the Biological Sciences | 4 |
| MATH:1850 | Calculus I | 4 |

The cognate requirement in mathematics may be fulfilled through an acceptable score on the Advanced Placement AB or BC Calculus exam; see Credit by Exam Options on the Office of Admissions website. Students without AP credit are encouraged to take MATH:1440 Mathematics for the Biological Sciences (speech interest) or MATH: 1460 Calculus for the Biological Sciences (audiology interest) to satisfy this requirement.

## Clinical Observation

Students have the opportunity and are encouraged to obtain 25 hours of supervised clinical observation, a prerequisite for participation in clinical practicums at the graduate level. This requirement is satisfied by the completion of CSD:4120 Introduction to Clinical Methods and Observation. In some cases, this requirement also can be fulfilled by independent observations.

## Honors

## Honors in the Major

The departmental honors program provides students the opportunity to conduct research in the field of communication sciences and disorders, gain experience presenting research ideas in public settings, and work closely with a faculty mentor.

In order to be eligible, students must have a cumulative and major grade-point average (GPA) of at least 3.60 at the end of the spring semester of their sophomore year, when top-ranking eligible students will be invited to apply for the program. Interested students should complete and return the application. A limited number of spots are available, based on the availability of mentors. Applications will be reviewed, and a select number of students will be admitted to the program.
After entering the departmental honors program, students enroll in CSD:3097 Honors Seminar in the fall semester of their junior year. The seminar provides an introduction to research philosophies, research design and implementation, and a chance for each student to critically evaluate existing research literature. In addition, the seminar provides an introduction to the department's research facilities and potential thesis advisors.

By the beginning of the spring semester of their junior year, students will have selected project areas and thesis advisors. During their final three semesters, honors students register for a total of 4 s.h. of CSD:4098 Honors Thesis and work on their projects/theses with their mentors. During the spring semester of their senior year, honors students present their projects at a university-wide forum (such as the UI Spring Undergraduate Research Festival) and at a departmental event (such as ProSem). Students must maintain a cumulative and major GPA of at least 3.60 in order to graduate with honors in the major. As a final recognition of the completion of the departmental honors program, honors students' diplomas bear a special notation.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.
Membership in the UI Honors Program is not required to earn honors in the speech and hearing science major.

## Career Advancement

The speech and hearing science program provides excellent preparation for study in an advanced degree program that leads to a career as a speech-language pathologist or audiologist. There continues to be a strong demand for professionals in these fields, and both speech pathology and audiology are consistently ranked highly in "best job" surveys.

Advanced degree holders may work as a professor, clinician, and/or researcher in the field of communication sciences and disorders.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

The major requires specific mathematics and science competencies that may be satisfied with courses approved for the GE CLAS Core.

Before the fifth semester begins: three courses in the major.
Before the seventh semester begins: nine courses in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: 12 courses in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Speech and Hearing Science, BA

|  | Hours | 15 |
|  | Total Hours | 125-135 |

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social

Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Students intending to pursue AuD should consider MATH:1460.
c Enrollment in math courses requires completion of a placement exam.
d GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
e Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
f See General Catalog for list of approved courses.
g Students should choose a course that will also fulfill the GE CLAS Core Natural Sciences requirement.
$h$ Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
i Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
j Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
k Students have the opportunity and are encouraged to obtain 25 hours of supervised clinical observation, a prerequisite for participation in clinical practicums at the graduate level. This requirement is satisfied by completion of CSD:4120 Introduction to Clinical Methods and Observation. In some cases, this requirement also can be fulfilled by independent observations.
1 Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Communication Sciences and

## Disorders, Minor

## Requirements

The undergraduate minor in communication sciences and disorders requires a minimum of 15 s sh., including 12 s s.h. in courses taken at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

Students must begin the minor with CSD:1015 Introduction to Speech and Hearing Processes and Disorders, which provides a broad overview of all aspects of the normal communication process and of various disorders. Students complete the minor by choosing from the courses listed below, according to their interests.

The minor in communication sciences and disorders requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| This course: | Introduction to Speech |  |
| CSD:1015 | and Hearing Processes and <br> Disorders | 2 |
| A minimum of 13 s.h. from these: |  |  |
| CSD:2110 | Phonetics: Theory and <br> Applications | 3 |
| CSD:2111 | Basic Acoustics for Speech and <br> Hearing | 3 |
| CSD:3112 | Anatomy and Physiology of <br> Speech Production | 4 |
| CSD:3113 | Introduction to Hearing Science | 4 |
| CSD:3116 | Basic Neuroscience for Speech <br> and Hearing | 3 |
| CSD:3117 | Psychology of Language |  |
| CSD:3118 | Language Acquisition <br> CSD:3185 | Hearing Loss and Audiometry <br> CSD:4140 | | Manual Communication |
| :--- |

## Speech Pathology and Audiology, MA

The Master of Arts program in speech pathology and audiology provides training for individuals who wish to do clinical work in speech-language pathology. Graduates of the MA program meet all academic and practicum requirements for clinical certification by the American Speech-Language-Hearing Association (ASHA) and for licensure by the State of Iowa. Students preparing for clinical positions in public schools must meet school licensure or certification requirements of the states in which they plan to work.

## Learning Outcomes

Graduating MA students in speech pathology and audiology will:

- demonstrate knowledge and skills specified in the Knowledge and Skills Acquisition (KASA) competencies for speech-language pathology professionals;
- behave professionally and ethically, and adhere to the American Speech-Language-Hearing Association (ASHA) Code of Ethics;
- use critical thinking skills to apply theory and knowledge to clinical decision-making; and
- use evidence-based practice and practice-based evidence to make clinical decisions regarding the diagnosis and treatment of persons with communication disorders.

## Requirements

The Master of Arts program in speech pathology and audiology requires a minimum of $44 \mathrm{~s} . \mathrm{h}$. of graduate credit, which may include approved graduate transfer credits. The program prepares clinicians to be able to function independently in a variety of clinical settings. The program is designed to ensure that upon graduation, a student will meet the requirements for immediate professional employment.

MA students usually have a background of undergraduate courses in speech and hearing science, psychology of language, and human behavior that is equivalent to an undergraduate major in speech and hearing science at the University of Iowa.

Before registering in the program, entering MA students receive descriptive materials about basic science core courses considered to be required preparation for the MA program, and required MA clinical core courses for which the department may accept comparable courses taken at the undergraduate level. Decisions about incorporating background coursework in these areas are made by the faculty advisor in consultation with the student and the instructors of the basic science or clinical core courses. Entering students must have completed the following courses or their equivalents.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CSD:2110 | Phonetics: Theory and <br> Applications | 3 |
| CSD:3112 | Anatomy and Physiology of <br> Speech Production | 4 |
| CSD:3113 | Introduction to Hearing Science | 4 |
| CSD:3116 | Basic Neuroscience for Speech <br> and Hearing | 3 |
| CSD:3118 | Language Acquisition | 3 |
| CSD:3185 | Hearing Loss and Audiometry | 3 |
| CSD:4145 | Developmental Language <br> Disorders | 3 |
| CSD:4148 | Developmental Speech <br> Disorders | 3 |

| CSD:4244 | Rehabilitative Audiology | 3 |
| :--- | :--- | :--- |
| PSQF:1020/ | Elementary Statistics and | 3 |
| STAT:1020 | Inference | 3 |
| A biological science course (human or animal biology) | 3 |  |
| A physical science course (physics or chemistry) | 3 |  |
| A social/behavioral science course |  |  |
| 25 hours of observation documented by a practitioner |  |  |
| with ASHA certification |  |  |
| Candidates for an MA with a professional emphasis in speech- <br> language pathology are not required to complete a thesis, although all <br> students demonstrating research aptitude and interest are encouraged |  |  |
| to do so. |  |  |

A typical program takes two calendar years to complete.

## Core Requirements

All students seeking an MA in speech pathology and audiology with a professional emphasis in speech-language pathology must take the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CSD:5104 | Language Disorders in School- <br> Aged Children | 3 |
| CSD:5135 | Foundations of Clinical Practice | 2 |
| CSD:5136 | I | 1 |
|  | Foundations of Clinical Practice | 1 |
| CSD:5137 | II | 1 |
| CSD:5146 | Foundations of Clinical Practice | 1 |
| CSD:5203 | III | 3 |
| CSD:5236 | Language |  |
|  | Counseling in Communication <br> Disorders | 1 |
| CSD:5238 | Neurological and Structural <br> Disorders of Swallowing | 3 |
| CSD:6519 | Motor Speech Disorders | 2 |
|  | Evidence-Based Practice | 2 |

In addition, they must take the following courses unless they completed equivalent courses as undergraduates.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CSD:4114 | Introduction to Voice Disorders | 2 |
| CSD:4115 | Structural Disorders | 2 |
| CSD:4140 | Manual Communication | 1 |
| CSD:4183 | Introduction to Stuttering | 2 |

Also required are additional semester hours (typically 16 s.h.) of practicum registration sufficient to meet supervised, direct clinical experience requirements for the Certificate of Clinical Competence of the American Speech-Language-Hearing Association and the Iowa license, and to provide broad, supervised practicum experience.
In addition to the core requirements listed above, all nonthesis students preparing to be speech-language pathologists must earn a minimum of $10 \mathrm{~s} . \mathrm{h}$. from the following; thesis students must earn a minimum of $6 \mathrm{~s} . \mathrm{h}$. from the following. Thesis students also must enroll in 4 s.h. of research.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CSD:4130 | Diversity, Equity, and Inclusion <br> in Communication Sciences and | 1 |
|  | Disorders |  |
| CSD:5213 | Voice Habilitation | 2 |
| CSD:5223 | Pediatric Feeding and | 1 |
|  | Swallowing Disorders |  |

| CSD:5233 | Aphasia | 2 |
| :--- | :--- | ---: |
| CSD:5234 | Acquired Cognitive- <br> Communication Disorders | arr. |
| CSD:5237 | Cleft Palate and Related <br> Disorders | $1-2$ |
| CSD:5258 | Multilingualism and Culturally <br> Responsive Practice in <br> Communication Sciences and <br> Disorders | 3 |
| CSD:5260 | Augmentative and Alternative <br> Communication | 2 |
| CSD:5282 | Phonological Development and <br> Disorders | 2 |
| CSD:5350 | Seminar in Supervision | 2 |

## Professional Licensure

## State Licensure

A number of states, including Iowa, require a state license in speechlanguage pathology or audiology. Students who meet the requirements listed above for the MA in speech pathology and audiology also meet the academic requirements for the license in Iowa as well as in most other states. For more information, visit Iowa Licensing Requirements for Audiologists and Speech-Language Pathologists on the American Speech-Language-Hearing Association website.

## Public School Licensure

Students preparing for clinical positions in public schools typically must meet school licensure or certification requirements of the states in which they plan to work. The following criteria meet the requirements for endorsement as speech-language pathologists in Iowa and most other states:

- a master's degree with a professional emphasis in speech-language pathology or the equivalent; and
- completion of coursework as described in School Speech Language Pathologist Licensure Preparation/Added Endorsement Program K-12 on the College of Education website.

GE CLAS Core [p. 19] courses (e.g., introduction to psychology, sociology, history, literature, and humanities) do not meet the requirements of the professional education sequence.
Alternatively, speech-language pathologists practicing in Iowa can obtain a Statement of Professional Regulation (SPR). In order to obtain the SPR, they must have a temporary or regular license from the State Board of Speech Pathology and Audiology Examiners, a master's degree in speech-language pathology, and have completed a human relations course. The SPR is valid for five years and does not transfer to other states.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
Admission to the program is competitive; applicants' credentials are considered in relation to those of others in the applicant pool, and a limited number of individuals are admitted to each program.
Applicants whose undergraduate grade-point average is below 3.30 rarely are admitted.
Admission is for fall; the application deadline is Jan. 15. All applications to the MA program must be submitted through the Central Application Service for Communication Science and Disorders (CSDCAS).

For detailed information regarding the evaluation of applicants, application materials and requirements, and other matters, see Graduate Programs on the department's website.

## Financial Support

Financial support is based on merit and dependent on the availability of funds.

## Career Advancement

The speech pathology and audiology program provides excellent preparation for a career as a speech-language pathologist or audiologist. There continues to be a strong demand for professionals in these fields, and both speech pathology and audiology are consistently ranked highly in "best job" surveys.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Doctor of Audiology, AuD

## Learning Outcomes

Graduating AuD students will:

- be able to accurately identify, diagnose, prevent, quantify, and treat hearing and balance disorders affecting both children and adults;
- understand the importance of and be able to implement patientand family-centered, evidence-based approaches to identify, treat, and prevent hearing and balance disorders affecting individuals of all ages; and
- become leaders-nationally and internationally-driving innovation, shaping the future of the profession, and disseminating information about the consequences of untreated hearing and balance disorders as well as the importance of early intervention and prevention.

## Requirements

The Doctor of Audiology (AuD) requires 89 s.h. of graduate credit. The AuD is the entry-level degree for individuals who wish to work as audiologists in the United States.
The four-year AuD program is designed for students with an undergraduate degree in speech and hearing science. AuD students must complete 89 s.h. from the following courses. Students may be excused from taking courses whose equivalents they completed successfully during undergraduate study.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| CSD:3185 | Hearing Loss and Audiometry | 3 |
| CSD:4145 | Developmental Language Disorders | 3 |
| CSD:4244 | Rehabilitative Audiology | 3 |
| CSD:5203 | Counseling in Communication Disorders | 1 |
| CSD:5224 | System and Signal Theory for Speech and Hearing Science | 3 |
| CSD:5240 | Hearing Aids | 3 |
| CSD:5246 | Advanced Audiology | 3 |
| CSD:5253 | Speech Perception in Listeners with Hearing Loss | 1-2 |
| CSD:5255 | Educational Audiology | 2 |
| CSD:5256 | Anatomy and Physiology of Hearing | 3-4 |
| CSD:5311 | Advanced Clinical Topics in Audiology | 2 |
| CSD:5315 | Clinical Rotations in Audiology | arr. |
| CSD:5317 | Advanced Clinical Practice in Audiology | 1 |
| CSD:5320 | Applied Statistics and Principles of Evidence-Based Practice in Audiology | 3 |
| CSD:6230 | Psychoacoustics | 2-3 |
| CSD:6245 | Pediatric Audiology | 1,3 |
| CSD:6247 | Medical Audiology | 2 |
| CSD:6249 | Cochlear Implants | 1-3 |
| CSD:6290 | Auditory Evoked Potentials | 3 |
| CSD:6291 | Vestibular Assessment | 2 |

| CSD:6292 | Advanced Rehabilitative <br> Audiology <br> Vestibular Rehabilitation | $1-2$ |
| :--- | :--- | ---: |
| CSD:6293 | Professional Issues in <br> Audiology | 1 |
| CSD:6311 | Advanced Externship in <br> Audiology |  |
| CSD:6316 | Audiology Practice: Business <br> Start-Up | arr. |
| CSD:6317 | Occupational Audiology |  |
| CSD:6318 | Interprofessional Practice and <br> Community Engagement in <br> Communication Sciences and <br> CSD:6319 | 1 |
| CSD:6515 | Professional Seminar <br> CSD:7238 | 1 |
| May include this course: | 1 |  |
| CSD:6242 | Hearing Aids II | 0 |

## Combined Programs

## AuD/PhD in Speech and Hearing Science

For students who are enrolled in the AuD program but interested in research, the Department of Communication Sciences and Disorders offers a combined Doctor of Audiology/Doctor of Philosophy program. This option is appropriate for students who have more applied research interests but would like to work in academics.
The combined program requires 131 s.h. of coursework. Students must satisfy all the clinical practicum experiences required for the AuD as well as all of the milestones required for the traditional PhD . Completion time for the two degrees varies but is typically seven years. Details on applying for the combined program can be found under Admissions in this section of the catalog. For more information, contact the director of PhD studies.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
Admission to the program is competitive and each applicant's credentials are considered in relation to the credentials of others in the applicant pool. Individuals with an undergraduate grade-point average below 3.00 are rarely admitted.

Students interested in admission to the combined $\mathrm{AuD} / \mathrm{PhD}$ program are required to initially apply to the AuD program and be admitted. At the end of their second year in the AuD program, they may formally request permission to change their degree objective. If the faculty approve and a mentor is available, students transition into the AuD/ PhD program.

The deadline for application is Jan. 15. All applications to the AuD program must be submitted through the Central Application Service for Communication Science and Disorders (CSDCAS).

For detailed information regarding the evaluation of applicants, application materials and requirements, and other matters, see Graduate Programs on the department's website.

## Financial Support

Financial support is based on merit and dependent on the availability of funds.

## Career Advancement

The AuD program provides students with excellent preparation for a career as an audiologist. There continues to be a strong demand for audiologists nationwide and it is consistently ranked highly in "best job" surveys. Graduates are often hired as faculty in positions at universities, in industry and clinical positions, and in research settings.

## Speech and Hearing Science, PhD

The PhD program in speech and hearing science provides flexible, comprehensive training for scholar-researchers interested in communication processes and disorders, allowing students to develop the knowledge and skills necessary for them to become productive researchers, whether in academia or industry. At the University of Iowa, the program reflects the broadly multidisciplinary interests of its faculty, who have expertise in physiology, bioengineering and physical sciences, neuroscience, psychology, linguistics, and multiculturalism across the domains of speech, language, and hearing. Prospective students are encouraged to identify a mentor whose research area aligns with their own interests. Students with diverse backgrounds in the natural and behavioral sciences are encouraged to apply.

## Learning Outcomes

Graduating PhD students in speech pathology and audiology will demonstrate:

- critical thinking through reading, discussing, and writing about relevant scientific literature;
- competence in designing and conducting research, from concept to methodology, and through to data analysis and publication;
- competence in scientific writing;
- competence in developing and delivering oral research presentations; and
- competence in developing and delivering course material to undergraduate and graduate classes.

## Requirements

The Doctor of Philosophy program in speech and hearing science requires a minimum of $72 \mathrm{~s} . \mathrm{h}$. of graduate credit. Although there is no standard curriculum for the PhD , a program of study is developed by each student in consultation with their mentor and a faculty planning committee. The course of study typically includes registration in an introductory course in doctoral research that covers broad issues relevant to research approaches and life in academia, as well as one or more courses in statistical or other research methods. In addition, a range of topical seminars and courses are offered by faculty members in the Department of Communication Sciences and Disorders, as well as by faculty in other departments, including linguistics, psychological and brain sciences, otolaryngologyhead and neck surgery, statistics and actuarial science, molecular physiology and biophysics, engineering, neuroscience, and computer science. Also important to a student's education is registration in CSD:7590 Research, which covers individual readings and research experiences with their mentor and other faculty members.
The stepping stones of the PhD program include a pre-dissertation project, a comprehensive examination, and the dissertation. The pre-dissertation project is a research project conducted jointly between a student and mentor, under the direction of the mentor. Upon completion, students are expected to present their results at the department's weekly professional seminar series. The comprehensive exam typically involves a written exam consisting of several questions broadly related to a student's interests and goals, followed by an oral defense of the responses. Questions are developed and evaluated by the student's mentor and faculty comprehensive committee. Following successful completion of the comprehensive exam, the student can advance to the candidacy stage. This final step requires each student to successfully conduct, write up, and defend an original research project that meets the college requirements for the dissertation.

## Combined Programs

## PhD in Speech and Hearing Science/ AuD

Students interested in research with an emphasis in audiology or hearing science may be interested in obtaining clinical certification, which requires completing the clinical doctorate (AuD). The Department of Communication Sciences and Disorders offers a combined program that allows students to earn both degrees simultaneously. The Doctor of Philosophy/Doctor of Audiology program is especially appropriate for students who have more applied research interests but would like to work in academia.

The program requires $131 \mathrm{~s} . \mathrm{h}$. of coursework, including all of the clinical practicum experiences required for the AuD. Students also must meet all of the milestones required for the traditional PhD . Completion time for the two degrees varies but is typically seven years.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Admission to the PhD program is based on a student's aptitude, as well as their specific area of research interest and the availability of a faculty member to serve as a mentor.
Applicants whose first language is not English must submit official test scores to verify English proficiency. Either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) is acceptable to verify proficiency in English.

Students interested in admission to the combined $\mathrm{PhD} / \mathrm{AuD}$ program are required to initially apply and be admitted to the AuD program. At the end of their second year in the AuD program, they may formally request permission to change their degree objective. If the faculty approve and a mentor is available, transition into the $\mathrm{AuD} / \mathrm{PhD}$ program is approved.
The deadline for application to the PhD program is Jan. 15. Applications must be submitted through the Office of Graduate Admissions.

For more information, see Doctor of Philosophy in Speech and Hearing Science on the Department of Communication Sciences and Disorders website or contact the director of graduate studies.

## Financial Support

While admission to the PhD program is competitive, funding is guaranteed for admitted students for up to four years, which includes tuition, a stipend, and generous benefits. Additional financial support is based on merit and dependent on the availability of funds. No separate application for financial aid is required. Financial support is provided through teaching assistantships and research assistantships. For more information, contact the departmental administrator in the Department of Communication Sciences and Disorders.

## Career Advancement

The PhD program provides excellent preparation for careers in academia, industry, and research. There continues to be a strong demand for graduates with doctoral-level training in speech and hearing sciences. Graduates routinely advance to postdoctoral research positions or are hired as university faculty members, and many
graduates have achieved high-level administrative and research positions in the field.

## Academic Plans Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a There is no standard curriculum for the PhD ; work with faculty advisor to determine appropriate graduate coursework based on research interests. Coursework should include a range of seminars and courses offered by faculty in CSD or other departments (e.g., psychological and brain sciences, statistics, biology, neuroscience, linguistics).
b Up to 33 s.h. of graduate-level transfer credits, taken as part of a graduate program, may be allowed upon approval.
c Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
d Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
e Work with faculty advisor to determine appropriate coursework and sequence.
f Course number varies depending on which department offers the course; consult with the DGS to select a course that will satisfy this requirement.
g Dissertation defense.

# Multilingualism and Culturally Responsive Practice in SLP, Graduate Certificate 

The graduate Certificate in Multilingualism and Culturally Responsive Practice in Speech-Language Pathology (SLP) is new effective fall 2023. More information related to this certificate's requirements will be provided in a future catalog.

This certificate is open to graduate students currently enrolled and in good standing in the Master of Arts in speech pathology and audiology [p. 269].

## Communication Studies

## Chair

- Kembrew McLeod

Undergraduate major: communication studies (BA)
Undergraduate minor: communication studies
Graduate degrees: MA in communication studies; PhD in communication studies

Faculty: https://communicationstudies.uiowa.edu/people/faculty
Website: https://communicationstudies.uiowa.edu/
Communication creates meaning and builds worlds. The mission of the Department of Communication Studies is to explore the central role that communication plays in shaping our relationships, institutions, and societies. The department prepares students to serve as innovative scholars, engaged citizens, effective communicators, and visionary leaders in all of the communities they inhabit.

## Forensics/Debate

Students in the forensics/debate program have the opportunity to participate in on-campus debates, in developmental programs designed to improve speech activities in the state, and as members of competitive intercollegiate debate teams. Forensics scholarships are available. Students interested in debate should enroll in COMM:2813 Practicum in Debate.

## Related Minor and Certificates

## Minor: Religion and Media

The Departments of Communication Studies and Religious Studies collaborate to offer the minor in religion and media that emphasizes the study of religion and the study of media in contemporary culture. It is a course of study for students interested in the importance of religion in public life, the digital humanities, and the shaping role of media in public and religious culture. For more information, see the minor in religion and media [p. 952] in the catalog.

## Certificate: Event Management

The Departments of Communication Studies, Health and Human Physiology, and Marketing, and the School of Journalism and Mass Communication collaborate to offer the undergraduate Certificate in Event Management. Students who earn the certificate will know and be able to demonstrate the basic principles of organizing a successful event. They will gain a robust understanding of the diverse field of event management and careers in the event management industry. For more information, see the Certificate in Event Management [p. 470] in the catalog.

## Certificate: Leadership Studies

The Certificate in Leadership Studies is an interdisciplinary program supported by the Tippie College of Business, the Colleges of Education and Liberal Arts and Sciences, and the Center for Student Involvement and Leadership. The certificate provides a structure for involvement and commitment to leadership. It introduces students to leadership concepts and offers them hands-on leadership experiences. The certificate is coordinated by the Pomerantz Career Center and housed in University College. For more information, see the Certificate in Leadership Studies [p. 2068] in the catalog.

## Programs

## Undergraduate Programs of Study

## Major

- Major in Communication Studies (Bachelor of Arts) [p. 285]

## Minor

- Minor in Communication Studies [p. 289]

Graduate Programs of Study Majors

- Master of Arts in Communication Studies [p. 291]
- Doctor of Philosophy in Communication Studies [p. 293]

## Facilities

The Samuel L. Becker Communication Studies Building is designed to meet the department's research and technological needs.

## Courses

## Communication Studies Courses

Courses numbered below 5000 are intended primarily for undergraduates; those numbered 5000 and above are for graduate students. Graduate students may take courses numbered 3000-4999 for credit, with their committee's approval.
Not all courses are offered each semester.
Registration in COMM:1000 First-Year Seminar is open to first- and second-semester students regardless of grade-point average.

## COMM:1000 First-Year Seminar

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

## COMM:1112 Interpersonal Communication

Introduction to face-to-face communication in social and personal relationships; maximizing communicative effectiveness in relationships with knowledge about how communication functions; analysis of one's own and others' communication practices and experiences.
COMM:1117 Advocacy and Argument
3 s.h.
Public arguments as practiced in law, politics, science, and other public arenas; improvement of skills in researching, constructing, organizing, and presenting arguments on disputed subjects; analyzing and refuting arguments of others; developing a better understanding of how scholars apply tools of formal and informal logic in a variety of disciplines to improve quality of academic argument. GE: Quantitative or Formal Reasoning.

## COMM:1130 The Art of Persuading Others 3 s.h.

Basic theoretical concepts of effective public communication; employ knowledge of concepts in analyzing texts; definition and influence of rhetorical situation, different elements of persuasion (message logic, appeal to feelings, character of speaker), ability of speakers to invent arguments; issues of judgment, public discourse, identity, and agency.

## COMM:1168 Music and Social Change 3 s.h.

What makes popular music important for people; music's power to change culture; production, distribution, reception of popular music in cultural and historical contexts. GE: Diversity and Inclusion.

## COMM:1170 Communication Theory in Everyday Life

General overview of everyday life communication, theories and research techniques used to understand it; sheer depth and complexity of processes in communication that occur in everyday lives and which appear to be trivial; how to observe conversations and identify what is really happening in them; ways in which scholars explain everyday communication and how it works; applications of theoretical thinking to explain processes of everyday communication. GE: Social Sciences.

## COMM:1174 Media and Society

Processes and effects of mass communication; how mass media operate in the United States; how mass communication scholars develop knowledge. GE: Social Sciences; Values and Culture.

## COMM:1305 Understanding Communication: Social Scientific

## Approaches

Social scientific methods used to generate knowledge about communication processes; basic tools necessary to conduct and evaluate communication research; epistemological perspectives, research procedures, and data analysis; readings and hands-on activities.

## COMM:1306 Understanding Communication: Humanistic Approaches

Humanistic methods and theories used to generate knowledge about communication processes; basic tools necessary to conduct and evaluate communication research in humanities subdisciplines; epistemological perspectives, research procedures, and critical practices; readings and hands-on activities.
COMM:1816 Business and Professional Communication 3 s.h. Introduction to business and professional communication at individual and corporate levels; individual-level topics cover organizational communication, business vocabulary, speaking and writing, professionalism and interviewing; corporate-level topics focus on marketing, advertising, public relations, corporate communications, crisis communication management, business and communication plans, proposals; guest speakers from for-profit and not-for-profit organizations.

## COMM:1818 Communication Skills for Leadership

Practice and understanding of essential communication skills for leadership; skills-based curriculum promoting application of knowledge; topics include relationship skills, collaboration skills, presentation skills, and writing skills; emphasis on leadership throughout each section of the course.

## COMM:1819 Organizational Leadership

3 s.h.
Introduction to nature of leadership, styles of leadership that are most effective, and ways in which obstacles may be overcome in groups or organizations; different approaches to qualities of leadership, role of visions and motivation, interpersonal and decision-making skills, meeting preparation and evaluation, and related communication skills.

## COMM:1830 Communication Skills for Community Engagement

Communication at the heart of public problems and solutions; critical 21st-century skills (writing for a general audience, facilitating dialogue); valuable community service experiences as an introduction to the interdisciplinary field of dialogue and deliberation; focus on a complex local issue, such as affordable housing, flood planning, or excessive drinking; partnering with local organizations to research a local problem, plan community-based solutions, and study the art of facilitating public discussions; topics include issue analysis, deliberative inquiry, convening meetings, and community organizing.

COMM:1840 Introduction to Media Production 3 s.h.
Foundation of electronic media and digital television production skills using industry-quality technology; high-definition camera operation, audio recording and editing, digital switcher operation, nonlinear editing, studio lighting techniques, and more; introduction to questions surrounding the impact of media production on artistic expression, audiences, and society.
COMM:1845 Short-Form Media Production
Basics of short-form media creation including public service announcements, commercials, promotional videos, and more; entire production process from creation to production to post-production; assumes basic knowledge of studio and field production techniques, nonlinear editing. Prerequisites: COMM: 1840 .

## COMM:1898 Introduction to Latina/o/x Communication and

 Culture 3 s.h.Introduction to fundamentals of communication by and about Latina/ $\mathrm{o} / \mathrm{x}$ in the U.S.; Latina/o/x as one of the fastest growing demographics; how Latina/o/x history, politics, and culture remain little understood despite a longstanding and growing presence in Iowa and across the nation; historical orientation; Latina/o/x social movement and protest (e.g., Chicana/o/x movements, Young Lords Organization), institutional discourses (e.g., congressional, presidential, legal discourses), and Latina/o/x in popular culture (film, television, music, sports). GE: Diversity and Inclusion. Same as LATS:1898.
COMM:2010 Communication and Organizational Culture 3 s.h. Introduction to nature, construction, and deconstruction of organizational culture from a communication perspective; examination of different approaches for understanding and analyzing organizational culture, including the lens of symbolic performance, narrative reproduction, textual reproduction, management, power and politics, technology, and globalization; prepares students to be change agents in organizations as they learn how to conduct an organizational cultural audit and how to create and implement successful change.

## COMM:2011 Group Communication

Study of relevant theory, research, and application to increase understanding of communication in small groups; critical thinking and communication skills; individual roles in groups, creativity, leadership, decision-making, problem solving, and conflict resolution.

## COMM:2020 Health Communication

How to better understand the intersections of health and communication; health communication is the study of how health information is generated and disseminated, and how that information affects and is affected by individuals, community groups, institutions, and public policy; people who understand the study of communication are in an important role, and their services are in high demand; health communication specialists work in hospital education departments, public relations, marketing, and human resource departments, in healthcare administration, in media organizations covering health issues, and in organizations that educate and support public policy and research.

## COMM:2030 Sexual Communication in Personal Relationships

Exploration of sexual communication as a foundational activity in the development and maintenance of relationships; examination of intersection of sexual communication and personal, relational, cultural, and institutional norms and values; translation of sexual communication research into practical skills.
COMM:2040 Communication and Conflict
Conflict and its management as critical issues that pervade people's personal and professional lives; complexities of conflict; forces that make conflict challenging; skills for thinking about and managing conflict more effectively; central features that define conflict; behaviors, attributions, and emotions that are manifest during conflict; formal models of conflict management and their corresponding recommendations for handling conflict.

COMM:2041 Gender, Communication, and Culture 3 s.h.
Social construction of gender and gendered identities across a range of communicative settings in contemporary U.S. society, including relationships, schools, organizations, media, and social movements; how communication creates, reproduces, sustains, and sometimes challenges and changes the meaning of gender and, with that, cultural structures and practices. Same as GWSS:2041.
COMM:2042 Intercultural Communication
3 s.h.
Culture defined as a system of taken-for-granted assumptions about the world that influence how people think and act; cultural differences that produce challenges and opportunities for understanding and communication; those differences from several theoretical perspectives; opportunities to examine culture and cultural differences in practical, experience-driven ways. Same as IS:2042, SSW:2042.
COMM:2044 Political Communication
Relationship between media, cultural politics, and the American political system; focus on advertising, campaigns, and new media outlets; ways politicians, the press, and intermediaries create and disseminate messages into mainstream culture; how people generate their own discourses of political identity and dissent, creating a robust democratic practice that is both empowering and central to the contemporary political landscape.

COMM:2045 Gender, Sexuality, and Space 3 s.h.
Introduction to feminist and queer theories of social space; material and symbolic construction of gender and sexuality; communicating gender and sexuality in different social spaces and scales in historical and contemporary contexts. Same as GWSS:2046.

## COMM:2048 Transforming Media: From Telegraph to

 InternetHow U.S. electronic media have shaped, and been shaped by, social and cultural transformations since the mid-19th century; examination of public responses to communication revolutions; exploration of questions about media power and influence in specific historical contexts including the emergence and expansion of telegraph, telephone, broadcasting, cable, and internet; readings, discussions, and assignments investigate role of communication media in the rise of the United States as a global power and consumer culture.

## COMM:2050 Politics of Popular Culture 3 s.h.

Overview of theories of culture and critical approaches to the study of popular culture; topics include broadcast television, streaming media, advertising, film, news media, video games, popular music, celebrity culture and how they intersect with race, gender, class, sexuality, and other social categories.

## COMM:2053 Secrets, Confidences, and Lies: Privacy Management in Interpersonal Relationships

How individuals manage private information with regard to their interpersonal relationships; multiple theories of privacy management; how aspects of information, individual, and target of disclosure all contribute to decisions to reveal or conceal private information to friends and family.

## COMM:2054 Movements, Protest, Resistance

3 s.h.
Historical and contemporary study of social movements from a symbolic perspective (e.g., speeches, protests, propaganda, media events); social movements as interpersonal and group communication; relationships between media and social change: efficacy of individual and larger-scale forms of resistance.

COMM:2057 Introduction to Computer-Mediated Communication 3 s.h.
Theoretical and practical introduction to concepts and research in computer-mediated communication; emphasis on study of social effects of communication and information technology; factors that distinguish mediated from face-to-face interaction, theories of mediated communication, self-presentation online; internet-based relationships, online supportive communication, online communities; how the internet influences communication and how to use computermediated communication for self-presentation.
COMM:2060 Public Relations, Publicity Stunts, and Pranks 3 s.h.
General overview of public relations and strategic communication methods; history of deception in communication practices; development of critical thinking strategies used to critique advertising and other forms of persuasion; use of humor in mounting public relations campaigns, publicity stunts, and pranks.
COMM:2064 Media, Advertising, and Society 3 s.h.
Introduction to the critical study of advertising in the United States; advertising contextualized as an industry and as a key part of media and culture; advertising as an institution and as a series of symbols, ideas, and fantasies; how advertising works, role and function of advertising in culture and society.

COMM:2065 Television Criticism
Introduction to scholarly study of television as a social institution; nature of television form and content; role of industry in creation, selection, and presentation of television programs; production conventions and textual conventions in defining the medium; application of genre and narrative theory, semiotics, political economy of media industries, and audience reception study.
COMM:2069 Black Television Culture 3 s.h.
Social and political impact of television dramas featuring people of African descent in the West; examination of production, reception, representation, and industry as it relates to the African American images that are granted tenure on television screens. GE: Diversity and Inclusion. Same as AFAM:2070.

COMM:2070 Social Media and Society
3 s.h.
Introduction to theoretical and critical issues raised by social media for communication; particular emphasis on cultural and political phenomena; topics include various understandings of social media, forms of digital communication, individual and collective identity formations via social media, online communities, and global cultural exchange; recent examples of the "viral" phenomenon and internetborn activism.

## COMM:2072 African American Popular Culture 3 s.h.

Examination of global popularity and impact of African American popular culture. Same as AFAM:2072.
COMM:2075 Gender, Sexuality, and Media 3 s.h.
Mediated representations of gender and sexuality (television, film, and internet) to understand how these complex and complicated codes influence meaning of sex, sexuality, and gender; contemporary and historical examples used to engage texts that illuminate cultural conceptions of femininity, masculinity, heterosexuality, and homosexuality; cases that confuse and trouble the stability of these categories. Same as GWSS:2075.

## COMM:2076 Race, Ethnicity, and Media

3 s.h.
Introduction to debates about media portrayals of race and ethnicity; focus primarily on entertainment media; use of general analytic perspectives (stereotype analysis, aesthetic analysis, history) applied to real-world examples; address one or more racial/ethnic groups in the United States. Same as AFAM:2076.

## COMM:2077 Writing and Producing Television <br> 3 s.h.

Introduction to basics of scripting and producing a conventional, three-camera television series; hands-on experience with production equipment and workshopping television scripts; students create one or more episodes of an original television series.

## COMM:2078 Audio Production/Podcast

Hands-on techniques of audio production, radio production, and podcasting using software and hardware tools; basic concepts of sound from how sound travels to how our brain interprets the sound; sound and mix with audio tools for quality podcast and other sound recordings.
COMM:2079 Digital Media and Religion
3 s.h.
Influences of digital media on religion and spirituality today. GE: Historical Perspectives. Same as RELS:2930.

COMM:2080 Public Life in the U.S.: Religion and Media 3 s.h. Examination of how the U.S. came into being through specific communication practices, how religion has helped and hindered that process; religious roots of the idea of the U.S., intertwined histories of print media and religion, role of religion and secularism in public discourse; U.S. pride as a nation in which diversity thrives in public discourse; communicative acts that created and sustained this country and also mark sites of discord, conflict, and confusion from the very beginnings of the U.S. to today; how religion has been a source of national identity and national division. Same as RELS:2080.
COMM:2083 Privacy and Anonymity on the Internet 3 s.h. Exploration of the influence of new communication technologies on privacy and anonymity; engagement with historical and contemporary readings; reaction papers, comprehensive essay, and group project.

## COMM:2085 Media Industries and Organizations

3 s.h.
Trends in media industries as reflected in changes of ownership, different work conditions, media convergence, and globalization generally; focus on local, network, and cable television; examination of industry structures, business practices, economic fundamentals, and theoretical explanations of media industries in society.
COMM:2086 Global Media Studies 3 s.h.
Key developments in contemporary international communication; impact of deregulation and privatization on ownership and control of global communication infrastructure; spread of American television abroad in terms of production, texts, and reception; cultural concerns surrounding the phenomenon.

## COMM:2088 Media and Democracy

3 s.h.
Exploration of relationship between democracy and mass communication; why controversies regarding mass communication are also controversies about democracy; logical relationship between democracy and mass media; roots and history of ideas of democracy, contemporary obstacles to realization of these ideas, and varied issues of present; latest developments in world of politics and media.

## COMM:2089 Nonverbal Communication

Introduction to theoretical study of nonverbal communication; focus on major principles and research trends; examination of role of nonverbal communication in communication as a whole; perception and interpretation of nonverbal communication (i.e., posture, eye movements, tone of voice); nonverbal behaviors (i.e., facial expression, eye movement) as used to persuade, impress, or deceive someone.

## COMM:2090 Topics in Communication Studies

 3 s.h.Topics vary.

## COMM:2091 Organizational Communication 3 s.h.

Explores nature and function of communication in organizations; theories of organizational communication and scholarly research related to communicating effectively in organizational settings; course will strengthen critical thinking and research skills, deepen understanding of topics related to organizing, and improve ability to communicate successfully as members and leaders of organizations.

COMM: 2248 The Invention of Writing: From Cuneiform to Computers
Invention of writing as one of the most momentous events in the history of human civilizations; how the use of written sign systems, notations, maps, graphs, encryptions, and most recently, computer programs have consequences that reach deeply into all aspects of people's lives; how writing fascinates and delights, fosters reflexive thinking and facilitates development of complex societies, and gives rise to institutions of social power and control; students explore the invention of writing and its consequences in broad international and interdisciplinary context. Taught in English. Same as ANTH:2248, ASIA:2248, CL:2248, CLSA:2048, GRMN:2248, HIST:2148, IS:2248, LING:2248, TRNS:2248, WLLC:2248.

COMM:2800 Introduction to Latin American Studies 3 s.h.
Cultures of Latin American countries with emphasis on cultural
history and cultural production; interdisciplinary survey. Taught in English. Same as IS:2700, LAS:2700, PORT:2700, SPAN:2700.
COMM:2813 Practicum in Debate
1 s.h.
Practice of skills in research, reasoning, argument development, and argumentative performance in debate undertaken by members of the A. Craig Baird Debate Forum in preparation for and participation in intercollegiate debate competition. Requirements: participation in A. Craig Baird Debate Forum.
COMM:2821 Oral Interpretation
Weekly performances to develop and define communication skills for professional careers in teaching and business; poetry, prose, monologue, storytelling, duo interpretation, reader's theatre, and demonstration speeches. Same as EDTL:2821.

## COMM:2828 Experiential Learning in Communication Studies

Structured coursework while student completes a semester-long professional work experience (paid or unpaid, part time or full time, on- or off- campus); professionalization and application of classroom learning to real-world contexts; requires professional supervision and evaluation by a manager in the organization. Requirements: GPA of at least 2.00 , communication studies major, and minimum of 12 s.h. of communication studies coursework.

COMM:2897 Independent Study arr.
Creative or research project under faculty supervision.
COMM:2899 Honors Thesis 3 s.h.
Individual research, writing, or creative production under faculty
supervision. Requirements: GPA of at least 3.33 , honors standing, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level coursework.
COMM:3118 Politics of Reproduction 3 s.h.
Examination of reproductive politics from historical, sociological, anthropological, and communicative perspectives; reproductive justice and bodily autonomy as key sites of feminist struggle in the United States and in global contexts; topical issues include abortion and birth control, assisted reproductive technologies, commercial surrogacy industries, LGBTQ family formation, and systems of reproductive violence. Same as ANTH:3118, GWSS:3118.

## COMM:4040 Practical Research Applications: Communication

 and Community3 s.h.
Apply research methods, design, and analysis to everyday, real-world problems through serving a community, partnering to determine a problem that will be ameliorated using research skills, including asking and answering questions, collecting and analyzing data, and, ideally, using these results to produce a product. Hone oral and written communication, problem-solving, and critical thinking skills, and build a portfolio that demonstrates practical, real-world experience to potential employers. Prerequisites: (4 of the following are required:
(COMM:1112 or COMM:1170), (COMM:1117 or COMM:1130), (COMM:1168 or COMM:1174), COMM:1305, COMM:1306) and ( 2 of the following are required: COMM:1816, COMM:1818, COMM:1819, COMM:1830, COMM:1840, COMM:1845, COMM:1898, COMM:2010, COMM:2011, COMM:2020, COMM:2030, COMM:2040, COMM:2041, COMM:2042, COMM:2044, COMM:2045, COMM:2048, COMM:2053, COMM:2054, COMM:2057, COMM:2060, COMM:2064, COMM:2065, COMM:2069, COMM:2070, COMM:2072, COMM:2075, COMM:2076, COMM:2077, COMM:2078, COMM:2079, COMM:2080, COMM:2083, COMM:2085, COMM:2086, COMM:2088, COMM:2089, COMM:2090, COMM:2091, COMM:2248).

## COMM:4044 Political Marketing: Media, Campaigns, and

 PersuasionRelationship between media, politics, and professional marketing in American political system; representative topics include U.S. presidential campaigns, communication strategies, social media, issue framing, rhetoric, and campaign narratives; focus on critical marketing and how citizens contest efforts at marketing and generate discourses of political identity. Prerequisites: ( 4 of the following are required: (COMM:1112 or COMM:1170), (COMM:1117 or COMM:1130), (COMM:1168 or COMM:1174), COMM:1305, COMM:1306) and (2 of the following are required: COMM:1816, COMM:1818, COMM:1819, COMM:1830, COMM:1840, COMM:1845, COMM:1898, COMM:2010, COMM:2011, COMM:2020, COMM:2030, COMM:2040, COMM:2041, COMM:2042, COMM:2044, COMM:2045, COMM:2048, COMM:2053,
COMM:2054, COMM:2057, COMM:2060, COMM:2064, COMM:2065, COMM:2069, COMM:2070, COMM:2072, COMM:2075, COMM:2076, COMM:2077, COMM:2078, COMM:2079, COMM:2080, COMM:2083, COMM:2085, COMM:2086, COMM:2088, COMM:2089, COMM:2090, COMM:2091, COMM:2248).

## COMM:4111 360 Radio Experience <br> 3 s.h.

Comprehensive 360-degree survey of radio; history and current cultural and business contexts; hands-on experiential learning at the student-run campus radio station to gain a better understanding of different elements that are part of a radio station (e.g., management, programming, production, music, news, marketing, sports, communications, community engagement) and the ins-and-outs of terrestrial broadcasting, online streaming, and web publishing. Prerequisites: (4 of the following are required: (COMM:1112 or COMM:1170), (COMM:1117 or COMM:1130), (COMM:1168 or COMM:1174), COMM:1305, COMM:1306) and ( 2 of the following are required: COMM:1816, COMM:1818, COMM:1819, COMM:1830, COMM:1840, COMM:1845, COMM:1898, COMM:2010, COMM:2011, COMM:2020, COMM:2030, COMM:2040, COMM:2041, COMM:2042, COMM:2044, COMM:2045, COMM:2048, COMM:2053, COMM:2054, COMM:2057, COMM:2060, COMM:2064, COMM:2065, COMM:2069, COMM:2070, COMM:2072, COMM:2075, COMM:2076, COMM:2077, COMM:2078, COMM:2079, COMM:2080, COMM:2083, COMM:2085, COMM:2086, COMM:2088, COMM:2089, COMM:2090, COMM:2091, COMM:2248).

COMM:4131 Globalization and Culture 3 s.h.
How context for everyday experience has increasingly become globally determined (e.g., ever-increasing transnational migration of people, spread of American culture, growth of international corporations and trade, rise of international conflict and transnational activism); range of theoretical and critical readings on globalization; various phenomena and perspectives regarding topic; themes directly relevant to lives of modern youth; how globalization affects opportunities and risks, identities and relationships. Prerequisites: (4 of the following are required: (COMM:1112 or COMM:1170), (COMM:1117 or COMM:1130), (COMM:1168 or COMM:1174), COMM:1305, COMM:1306) and (2 of the following are required: COMM:1816, COMM:1818, COMM:1819, COMM:2020, COMM:2030, COMM:1830, COMM:1840, COMM:1845, COMM:1898, COMM:2010, COMM:2011, COMM:2040, COMM:2041, COMM:2042, COMM:2044, COMM:2045, COMM:2048, COMM:2053, COMM:2054, COMM:2057, COMM:2060, COMM:2064, COMM:2065, COMM:2069, COMM:2070, COMM:2072, COMM:2075, COMM:2076, COMM:2077, COMM:2078, COMM:2079, COMM:2080, COMM:2083, COMM:2085, COMM:2086, COMM:2088, COMM:2089, COMM:2090, COMM:2091, COMM:2248). Same as IS:4131.

## COMM:4140 Communication and Relationships <br> 3 s.h.

 communication functions to initiate, sustain, and dissolve a variety of relationships including friendships, romantic couples, marital pairs, and family relationships. Prerequisites: (4 of the following are required: (COMM:1112 or COMM:1170), (COMM:1117 or COMM:1130), (COMM:1168 or COMM:1174), COMM:1305, COMM:1306) and ( 2 of the following are required: COMM:1816, COMM:1818, COMM:1819, COMM:1830, COMM:1840, COMM:1845, COMM:1898, COMM:2010, COMM:2011, COMM:2020, COMM:2030, COMM:2040, COMM:2041, COMM:2042, COMM:2044, COMM:2045, COMM:2048, COMM:2053, COMM:2054, COMM:2057, COMM:2060, COMM:2064, COMM:2065, COMM:2069, COMM:2070, COMM:2072, COMM:2075, COMM:2076, COMM:2077, COMM:2078, COMM:2079, COMM:2080, COMM:2083, COMM:2085, COMM:2086, COMM:2088, COMM:2089, COMM:2090, COMM:2091, COMM:2248).
COMM:4147 Family Communication
3 s.h.
Family relationships and various ways they develop and change, how they affect those who participate in them; theory and research on family communication; family conceived as a group of persons who share their lives over an extended period of time bound by ties of marriage, blood, or commitment. Prerequisites: (4 of the following are required: (COMM:1112 or COMM:1170), (COMM:1117 or COMM:1130), (COMM:1168 or COMM:1174), COMM:1305, COMM:1306) and ( 2 of the following are required: COMM:1816, COMM:1818, COMM:1819, COMM:1830, COMM:1840, COMM:1845, COMM:1898, COMM:2010, COMM:2011, COMM:2020, COMM:2030, COMM:2040, COMM:2041, COMM:2042, COMM:2044, COMM:2045, COMM:2048, COMM:2053, COMM:2054, COMM:2057, COMM:2060, COMM:2064, COMM:2065, COMM:2069, COMM:2070, COMM:2072, COMM:2075, COMM:2076, COMM:2077, COMM:2078, COMM:2079, COMM:2080, COMM:2083, COMM:2085, COMM:2086, COMM:2088, COMM:2089, COMM:2090, COMM:2091, COMM:2248).

## COMM:4154 Magic Machines: Technology and Social

 ChangeHow media has altered culture, society, and human consciousness throughout history with focus on last two centuries (or modernity); how communication has been shaped by a variety of media (i.e., gesture, language, writing, printing, calendars, clocks, photography, telegraph, telephone, phonograph, film, radio, television, computers); 21st-century questions concerning technology and how few communicate today without aid of some kind of machine or technique. Prerequisites: (4 of the following are required: (COMM:1112 or COMM:1170), (COMM:1117 or COMM:1130), (COMM:1168 or COMM:1174), COMM:1305, COMM:1306) and (2 of the following are required: COMM:1816, COMM:1818, COMM:1819, COMM:1830, COMM:1840, COMM:1845, COMM:1898, COMM:2010, COMM:2011, COMM:2020, COMM:2030, COMM:2040, COMM:2041, COMM:2042, COMM:2044, COMM:2045, COMM:2048, COMM:2053, COMM:2054, COMM:2057, COMM:2060, COMM:2064, COMM:2065, COMM:2069, COMM:2070, COMM:2072, COMM:2075, COMM:2076, COMM:2077, COMM:2078, COMM:2079, COMM:2080, COMM:2083, COMM:2085, COMM:2086, COMM:2088, COMM:2089, COMM:2090, COMM:2091, COMM:2248). Same as RELS:4154.

## COMM:4157 Advanced Topics in Communication Studies 3 s.h.

 Issues or problems in particular communication contexts. Prerequisites: ( 4 of the following are required: (COMM:1112 or COMM:1170), (COMM:1117 or COMM:1130), (COMM:1168 or COMM:1174), COMM:1305, COMM:1306) and (2 of the following are required: COMM:1816, COMM:1818, COMM:1819, COMM:1830, COMM:1840, COMM:1845, COMM:1898, COMM:2010, COMM:2011, COMM:2020, COMM:2030, COMM:2040, COMM:2041, COMM:2042, COMM:2044, COMM:2045, COMM:2048, COMM:2053, COMM:2054, COMM:2057, COMM:2060, COMM:2064, COMM:2065, COMM:2069, COMM:2070, COMM:2072, COMM:2075, COMM:2076, COMM:2077, COMM:2078, COMM:2079, COMM:2080, COMM:2083, COMM:2085, COMM:2086, COMM:2088, COMM:2089, COMM:2090, COMM:2091, COMM:2248).
## COMM:4163 The Dark Side of Interpersonal Communication

3 s.h.
Review of advanced communication theories and research; focus on dark side of interpersonal communication and close relationships; negative or difficult elements of developing and maintaining relationships; expression of difficult emotions; mundane communication that can function in destructive or negative ways. Prerequisites: ( 4 of the following are required: (COMM:1112 or COMM:1170), (COMM:1117 or COMM:1130), (COMM:1168 or COMM:1174), COMM:1305, COMM:1306) and (2 of the following are required: COMM:1816, COMM:1818, COMM:1819, COMM:1830, COMM:1840, COMM:1845, COMM:1898, COMM:2010, COMM:2011, COMM:2020, COMM:2030, COMM:2040, COMM:2041, COMM:2042, COMM:2044, COMM:2045, COMM:2048, COMM:2053, COMM:2054, COMM:2057, COMM:2060, COMM:2064, COMM:2065, COMM:2069, COMM:2070, COMM:2072, COMM:2075, COMM:2076, COMM:2077, COMM:2078, COMM:2079, COMM:2080, COMM:2083, COMM:2085, COMM:2086, COMM:2088, COMM:2089, COMM:2090, COMM:2091, COMM:2248).

COMM:4168 Rhetoric of the Body
3 s.h.
Students survey theories of the body as vehicle for communication of social norms; the philosophy, historical, and contemporary practices of productivity culture; discourses of burnout and overwhelm; theories of care from feminist, disability, LGBTQ, and environmental communities. Prerequisites: ( 4 of the following are required: (COMM:1112 or COMM:1170), (COMM:1117 or COMM:1130), (COMM:1168 or COMM:1174), COMM:1305, COMM:1306) and ( 2 of the following are required: COMM:1816, COMM:1818, COMM:1819, COMM:1830, COMM:1840, COMM:1845, COMM:1898, COMM:2010, COMM:2011, COMM:2020, COMM:2030, COMM:2040, COMM:2041, COMM:2042, COMM:2044, COMM:2045, COMM:2048, COMM:2053, COMM:2054, COMM:2057, COMM:2060, COMM:2064, COMM:2065, COMM:2069, COMM:2070, COMM:2072, COMM:2075, COMM:2076, COMM:2077, COMM:2078, COMM:2079, COMM:2080, COMM:2083, COMM:2085, COMM:2086, COMM:2088, COMM:2089, COMM:2090, COMM:2091, COMM:2248).

## COMM:4169 Feminist Rhetorics

Exploration of multiple, varied, and complex histories of U.S. feminisms from rhetorical perspectives; focus on primary documents, the letters, speeches, essays, and manifesto/as that shaped women's movements and inspire social change from late 18 th century to present; social, political, and personal issues that feminists sought to address and transform, communicative and rhetorical methods utilized, and implications of these efforts for women's lives and broader U.S. American culture. Prerequisites: (4 of the following are required: (COMM:1112 or COMM:1170), (COMM:1117 or COMM:1130), (COMM:1168 or COMM:1174), COMM:1305, COMM:1306) and ( 2 of the following are required: COMM:1816, COMM:1818, COMM:1819, COMM:1830, COMM:1840, COMM:1845, COMM:1898, COMM:2010, COMM:2011, COMM:2020, COMM:2030, COMM:2040, COMM:2041, COMM:2042, COMM:2044, COMM:2045, COMM:2048, COMM:2053, COMM:2054, COMM:2057, COMM:2060, COMM:2064, COMM:2065, COMM:2069, COMM:2070, COMM:2072, COMM:2075, COMM:2076, COMM:2077, COMM:2078, COMM:2079, COMM:2080, COMM:2083, COMM:2085, COMM:2086, COMM:2088, COMM:2089, COMM:2090, COMM:2091, COMM:2248). Same as GWSS:4169.

## COMM:4171 Community Media

3 s.h.
Theory and history of community media as means of cultural expression, political participation, and social change; focus on case studies from Latin America and other global contexts. Prerequisites: (4 of the following are required: (COMM:1112 or COMM:1170), (COMM:1117 or COMM:1130), (COMM:1168 or COMM:1174), COMM:1305, COMM:1306) and ( 2 of the following are required: COMM:1816, COMM:1818, COMM:1819, COMM:1830, COMM:1840, COMM:1845, COMM:1898, COMM:2010, COMM:2011, COMM:2020, COMM:2030, COMM:2040, COMM:2041, COMM:2042, COMM:2044, COMM:2045, COMM:2048, COMM:2053, COMM:2054, COMM:2057, COMM:2060, COMM:2064, COMM:2065, COMM:2069, COMM:2070, COMM:2072, COMM:2075, COMM:2076, COMM:2077, COMM:2078, COMM:2079, COMM:2080, COMM:2083, COMM:2085, COMM:2086, COMM:2088, COMM:2089, COMM:2090, COMM:2091, COMM:2248). Same as LATS:4171.

## COMM:4174 Communication, Technology, and National

 SecurityWhat is the best way to balance the democratic values of the United States and its national security objectives? To answer this question, students consider discussions in three distinct, but overlapping areas of inquiry: surveillance and privacy, cyber war, and Internet governance. Prerequisites: (4 of the following are required: (COMM:1112 or COMM:1170), (COMM:1117 or COMM:1130), (COMM:1168 or COMM:1174), COMM:1305, COMM:1306) and ( 2 of the following are required: COMM:1816, COMM:1818, COMM:1819, COMM:1830, COMM:1840, COMM:1845, COMM:1898, COMM:2010, COMM:2011, COMM:2020, COMM:2030, COMM:2040, COMM:2041, COMM:2042, COMM:2044, COMM:2045, COMM:2048, COMM:2053, COMM:2054, COMM:2057, COMM:2060, COMM:2064, COMM:2065, COMM:2069, COMM:2070, COMM:2072, COMM:2075, COMM:2076, COMM:2077, COMM:2078, COMM:2079, COMM:2080, COMM:2083, COMM:2085, COMM:2086, COMM:2088, COMM:2089, COMM:2090, COMM:2091, COMM:2248).

## COMM:4183 Networking America: The Cultural History of

 BroadcastingExposure to different interpretations of cultural impact and legacy of U.S. broadcasting in 20th century; institutional practices, program genres, and audience formations of 1920s through the 1970s radio and television network eras; how historical contexts shape, and are shaped by, production and reception of broadcasting texts. Prerequisites: (4 of the following are required: (COMM:1112 or COMM:1170), (COMM:1117 or COMM:1130), (COMM:1168 or COMM:1174), COMM:1305, COMM:1306) and (2 of the following are required: COMM:1816, COMM:1818, COMM:1819, COMM:1830, COMM:1840, COMM:1845, COMM:1898, COMM:2010, COMM:2011, COMM:2020, COMM:2030, COMM:2040, COMM:2041, COMM:2042, COMM:2044, COMM:2045, COMM:2048, COMM:2053, COMM:2054, COMM:2057, COMM:2060, COMM:2064, COMM:2065, COMM:2069, COMM:2070, COMM:2072, COMM:2075, COMM:2076, COMM:2077, COMM:2078, COMM:2079, COMM:2080,
COMM:2083, COMM:2085, COMM:2086, COMM:2088, COMM:2089, COMM:2090, COMM:2091, COMM:2248).
COMM:5200 Introduction to Research and Teaching 2 s.h. Introduction to communication studies as a field of scholarship; selection of research problems, major lines of research represented in the department, bibliographical tools for scholarship in the field; issues, practical tasks, and concerns relevant to effective college or university classroom teaching.
COMM:5230 Introduction to Rhetorical Studies 3 s.h.
Introduction to major theories, principles, and practices of rhetorical theory and rhetorical criticism.
COMM:5241 Theories of Mass Communication 3 s.h.
Major concepts, theories, schools of thought in media studies, mass communication.

## COMM:5297 MA Research

Preparation for master's final exam; reading and writing under the supervision of a faculty member.
COMM:5298 MA Thesis 3 s.h.
Research and writing under direction of a faculty member; leads to completion of a master's thesis.

COMM:5299 Graduate Independent Study
arr.

## COMM:5300 Proseminar: Preparing for the Academic Job

Market
1-3 s.h.
Preparation for academic job market; development of a full academic portfolio including cover letter, curriculum vitae, research statement, teaching portfolio, job talk, strong skill set for interviewing, and statement on diversity, equity, and inclusion; includes multiple weeks dedicated to bringing a journal article to publication in an academic outlet; capstone seminar for ABD doctoral students. Requirements: successful completion of comprehensive exams and prospectus, or defense of comprehensive exams completed and prospectus defense scheduled.

COMM:6220 Health Communication Campaigns 3 s.h.
Intervention design and analysis of health campaigns; theory, practice, methods; mass media, community, organization, and interpersonal approaches. Same as CBH:6220.
COMM:6319 Criticism and Public Culture 3 s.h.
Fundamentals of criticism; practice of critical reading to engage various cultural texts (i.e., pop culture, national memorials, social movements, visual rhetoric); contemporary theories/debates that inform the art of critique (i.e., feminist theory, queer theory, critical theory).

## COMM:6324 Rhetoric, Race, and Racism <br> 3 s.h.

Relationships between rhetoric and race/racism; theoretical, critical, and historical perspectives on race/racism with special emphasis on rhetoric and discourse.

## COMM:6335 Proseminar: Contemporary Rhetorical

## Studies

2-4 s.h.
Problems in contemporary rhetorical studies; may include works of Kenneth Burke, Wayne Booth, deconstructionists, feminist theorists and critics, critics of communication technologies.

COMM:6336 Seminar in Rhetorical Theory 1-4 s.h.
Topics in history and development of rhetorical theory; theory construction and application to critical practice.
COMM:6339 Seminar: Rhetoric and Culture 1-4 s.h.
Cultural theories, their utility in accounting for communication practices.
COMM:6341 Topics in Mass Communication Scholarship 1-3 s.h.
Theory and research on problems in mass communication.
COMM:6342 Critical Television Studies 3 s.h.
Introduction to canonical and contemporary readings in critical television studies; primary questions and theories associated with textual, industrial, ethnographic, and integrated approaches to studying television; how technological, economic, and cultural changes have altered television and how it is studied.

COMM:6345 New Materialisms
3 s.h.
Exploration of new strategies for rupturing persistent dichotomies of subject/object, representation/real, culture/nature, and active humans/ passive things offered by theories of the vitality and agency of matter; introduction to origins of and developments in new materialisms; oriented to interdisciplinary inquiry and application to research in the humanities, broadly conceived; particular attention to actor-network theory, feminism, queer theory, infrastructuralism, and materialist theories of media. Same as GWSS:6345, RELS:6345.
COMM:6346 The Public Sphere 3 s.h.
Theories, intellectual history, critics, contemporary issues of the public sphere.
COMM:6350 Seminar: Mass Communication 1-4 s.h.
Topics vary.
COMM:6352 Seminar: Media Theory 3 s.h.
Topics vary.

Theories and processes of globalization and cultural implications of media globalization; local responses to globalizing processes with reference to questions of modernity and national/transnational identity.

## COMM:6365 The Communication of Social Support <br> 3 s.h.

Substantial knowledge base developed by scholars about types, processes, and mechanisms of social support used by humans to comfort one another; in-depth examination of theory and empirical research related to communication of social support; emphasis on types of support, verbal person-centered messages, and various strategies for social support; gender differences and social skills related to comforting; online supportive communication; development of detailed knowledge of this topic, critical assessment of extant research, and synthesis of class readings in written format.
COMM:6371 Communication Theory 3 s.h.
Survey of primary theories of interpersonal, cultural, group, and organizational communication.
COMM:6376 Family Communication
3 s.h.
Theory and research on communication among and between family members (parents, children, marital partners, siblings); quantitative and qualitative research.
COMM:6381 Seminar: Topics in Communication Research 3 s.h. Topics vary.

## COMM:6387 Communication, Cognition, and Emotion 3 s.h.

Theoretical and empirical work that integrates communication, cognition, emotion; role of social cognition in communication, theories of emotion, types of emotional experiences; approaches to understanding emotion from perspectives in psychology, social cognition, communication; emotion-related issues such as influence of gender, effects of mood.

## COMM:6399 PhD Dissertation

arr.
COMM:6635 Crossing Borders Seminar 2-3 s.h. Taught in English. Same as AFAM:6635, ANTH:6635, ENGL:6635, FREN:6142, GEOG:6635, GRMN:6635, HIST:6135, IWP:6635, POLI:6635, SPAN:6904.

## Communication Studies, BA

## Learning Outcomes

Graduating communication studies majors will be able to:

- explain the significance of the communicative process across personal, familial, organizational, civic, and mediated contexts;
- demonstrate effective written, oral, and/or digital communication skills;
- plan, evaluate, and conduct basic communication research using qualitative, quantitative, and critical-cultural methods;
- think critically about the role of communication in the production, maintenance, and transformation of culture;
- apply and reflect upon the skills and theories of communication in communities, professional settings, and a global context; and
- develop the ability to discuss controversial issues of public importance in a way that demonstrates intercultural competence and personal and social responsibility to a dynamic and globalizing world.

## Requirements

The Bachelor of Arts with a major in communication studies requires a minimum of 120 s.h., including at least 39 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

The curriculum is designed to encourage learning that progresses from foundation courses that teach the basics of communication to intermediate and advanced (capstone) courses. Students may choose to build creative combinations of coursework that suit their individual learning and career goals.
Students may count up to 56 s.h. of Department of Communication Studies coursework (prefix COMM) toward credit required for the Bachelor of Arts degree. Transfer courses may be applied toward the requirements of the major, with the department's approval. A maximum of 15 s.h. of transfer credit may be counted toward the major.
Students work with the communication studies academic advisors to develop study plans that meet the requirements of the major. Students may check their progress toward the degree on MyUI.

First-year students interested in completing a major in communication studies are advised at the Academic Advising Center. Students who have earned 30 s.h. or more and have declared the communication studies major are advised in the department by the communication studies academic advisors.

Students are encouraged to discuss their career goals and interests with faculty members.

The semester hours required for the major consist of foundation courses, intermediate courses, a capstone course, and additional coursework which may be earned in courses listed under "Intermediate Courses," "Capstone Experience," and/or "Additional Courses," below. Students may not use a course to satisfy more than one requirement of the major.
The BA with a major in communication studies requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Foundations of Communication Courses | 15 |
| Intermediate Courses | 12 |

Capstone Experience Course 3
Additional Courses 9

## Foundations of Communication

Foundation courses cover introductory concepts in the field of communication. Students must complete five foundation courses ( 15 s.h.) and should take them early in their studies. The following foundation courses are appropriate for first- or second-year students. They do not require a minimum grade-point average for enrollment and most do not have prerequisites. Students complete the first three foundation courses as follows.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| COMM:1112 | Interpersonal Communication | 3 |
| or COMM:1170 | Communication Theory in Everyday Life |  |
| COMM:1117 | Advocacy and Argument | 3 |
| or COMM:1130 | The Art of Persuading Others |  |
| COMM:1168 <br> or COMM:1174 | Music and Social Change | Media and Society |

The fourth and fifth foundation courses are appropriate for first- or second-year students.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| COMM:1305 | Understanding Communication: | 3 |
|  | Social Scientific Approaches |  |
| COMM:1306 | Understanding Communication: | 3 |
|  | Humanistic Approaches |  |

## Intermediate Courses

Intermediate courses cover detailed aspects of the study of communication. Students usually complete these courses during their third and fourth years of study.

| Course \# Title | Hours |
| :--- | ---: |
| At least four of these: |  |
| Communication studies courses (prefix COMM) | 12 |
| numbered from 1800-2799 |  |

## Capstone Experience

Capstone courses (those numbered 3000-4999) provide a facultyled experience in which students participate directly in producing knowledge, research, or creative work about communication. The capstone experience gives students a chance to synthesize what they have learned about the study of communication. Students must complete one capstone course ( 3 s.h.).
In order to enroll in a capstone course, students must have completed at least four of the five foundation courses and at least two intermediate courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| COMM:3118 | Politics of Reproduction | 3 |
| COMM:4040 | Practical Research Applications: | 3 |
|  | Communication and <br> Community |  |
| COMM:4044 | Political Marketing: Media, <br> Campaigns, and Persuasion | 3 |
| COMM:4111 | 360 Radio Experience | 3 |
| COMM:4131 | Globalization and Culture | 3 |
| COMM:4140 | Communication and |  |
| COMM:4147 | Relationships | 3 |
| COMM:4154 | Magily Communication Machines: Technology <br> and Social Change | 3 |
|  | Col | 3 |

$\left.\begin{array}{l|l|l}\text { COMM:4157 } & \text { Advanced Topics in } \\ \text { Communication Studies }\end{array}\right)$

## Additional Courses

Students earn an additional 9 s.h. to complete at least 39 s.h. in communication studies courses required for the major. They may choose from the courses listed below and/or from the intermediate and capstone experience courses. However, students may not use a course to fulfill more than one requirement for the major, so in selecting the additional 9 s.h. of coursework, they may not choose a course they already used to fulfill the intermediate or capstone experience course requirement.

All of the courses listed below, except COMM:2800, have prerequisites, a minimum grade-point average, or other requirements for enrollment.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| COMM:2800 | Introduction to Latin American | 3 |
|  | Studies |  |
| COMM:2813 | Practicum in Debate | 1 |
| COMM:2821 | Oral Interpretation | 3 |
| COMM:2828 | Experiential Learning in | $1-3$ |
|  | Communication Studies |  |
| COMM:2897 | Independent Study | arr. |
| COMM:2899 | Honors Thesis | 3 |

## Internships and Professional Experiences

Internships enable students to supplement their coursework with professional experiences relevant to careers in communicationrelated fields. The department's internship program is open only to communication studies majors.
To earn academic credit for internships, students must obtain approval for their internship experience and site before they register for COMM:2828. Internship academic credit is awarded for an analytical paper and daily $\log$ submitted at the end of the internship and for the number of hours worked. Internships can be completed during fall semester, spring semester, or summer session.

Visit the department's website for information on communication studies internships.

| Course \# | Title | Hours |
| :--- | :--- | ---: | :--- |
| COMM:2828 | Experiential Learning in | $1-3$ |
|  | Communication Studies |  |

## Honors

## Honors in the Major

Students majoring in communication studies have the opportunity to graduate with honors in the major. Students interested in honors in the major should consult the honors advisor as early as possible in their
undergraduate career and work with a faculty member to supervise the honors project.
Students earning honors in the major must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33, a GPA set by the College of Liberal Arts and Sciences; a minimum cumulative GPA of 3.33 in coursework for the major also must be maintained, a standard set by the Department of Communication Studies. Students may be required to complete COMM: 2899 Honors Thesis, depending on their specific project.
Through the Global Engagement, Research, Outreach, and Work Experience (GROW) in Communication Studies initiative, there are a variety of options for honors in the major. Honors students must complete at least two authorized GROW activities and participate in a poster session.
Honors students may add an honors designation to a departmental course by completing an agreement with the course instructor.
Learn more about graduating with honors in the major; visit Honors on the department's website.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University of Iowa Honors Program.

Membership in the UI Honors Program is not required to earn honors in the communication studies major.

## Career Advancement

Communication studies graduates have numerous career options. The major provides solid preparation for employment in almost any job that requires effective critical thinking and communication skills. It also prepares students for graduate school by providing a strong theoretical and methodological foundation in communication research. Graduates find work in fields such as the arts, entertainment, and media industries; consulting; sales and marketing; human resources; public advocacy; and higher education.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Students should consult the department for details.

Before the fifth semester begins: at least two courses in the major.
Before the seventh semester begins: at least six courses in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: at least eight courses in the major.

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Iowa Degree in Three

University of Iowa majors who are strongly motivated can graduate with a degree in three years under the Iowa Degree in Three. The
program is available to students who can complete more semester hours each term than they would on the Four-Year Graduation Plan.

Students sign an agreement during their first semester of enrollment; meet with an advisor at least once a semester to review their plans and progress; take courses during summer sessions, if necessary; meet specific course checkpoints; and maintain the grade-point average required for the major.

Students are allowed to bring Advanced Placement (AP), College Level Examination Program (CLEP), or transfer credit upon admission to reduce the number of semester hours required for their degree. They should consult their advisor about the program.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Students should take foundation courses early in their studies. Foundation courses are appropriate for first- or second-year students.
c Typically COMM:1174 is offered in fall semesters only and COMM:1168 is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
d Fulfills a major requirement and may fulfill a GE requirement.
e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
f Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
g Typically COMM:1117 is offered in spring semesters only and COMM:1130 is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
h Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
i Typically COMM:1170 is offered in spring semesters only and COMM:1112 is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
j Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
k Students who have previously completed COMM:1898 have already satisfied the GE CLAS Core Diversity and Inclusion requirement.
1 Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
mStudents who have previously completed COMM:1117 have already satisfied the GE CLAS Core Quantitative or Formal Reasoning requirement.
n Students who have previously completed COMM:1174 have already satisfied the GE CLAS Core Values and Culture requirement.
o Students who have previously completed COMM:1170 or COMM:1174 have already satisfied the GE CLAS Core Social Sciences requirement.
p Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Communication Studies, Minor

## Requirements

The undergraduate minor in communication studies requires a minimum of 15 s.h. in communication studies courses, including 12 s.h. in courses taken at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

## Foundations of Communication

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: |  |  |
| COMM:1112 <br> or COMM:1170 | Interpersonal Communication | Communication Theory in Everyday Life |$\quad 3$

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Communication Studies, Minor

## Course Titl <br> Hours

Academic Career

## Any Semester

The undergraduate minor in communication studies requires a minimum of 15 s .h. in communication studies courses, including 12 s.h. in courses taken at the University of Iowa.

Students must maintain a GPA of at least 2.00 in all courses for the minor and in all UI courses for the minor.
$\frac{\text { Coursework for the minor may not be taken pass/nonpass. }}{\text { Hours }}$

First Year

a Students choose two courses from COMM:1112 or COMM:1170, COMM:1117 or COMM:1130, COMM:1168 or COMM:1174.
b COMM:1305 is typically offered in fall semesters only and COMM:1306 is typically offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
c Intermediate courses are those with prefix COMM, numbered 1800-2799.
d Choose from COMM:1112, COMM:1117, COMM:1130, COMM:1168, COMM:1170, COMM:1174, COMM:1305, COMM:1306 (if not taken for previous requirements), or courses with prefix COMM numbered 1800-2897.

## Communication Studies, MA

## Specialization Areas

The following are specialization areas available for the MA program in communication studies.

## Interpersonal Communication and Relationships

This area of specialization is centered on theory complemented by strength in quantitative and qualitative research methods. It focuses on scholarly issues that arise from face-to-face, everyday communication practices. It emphasizes personal relationships and family processes, identity construction, persuasion, and culture.
The goal of the program is to produce scholars who possess sophisticated knowledge of theory and methodology, who are careful consumers of theories and methods, and who can develop their own approaches to communication phenomena. The program emphasizes systematic analysis of the forms, functions, and meanings of messages within various contexts. Its broad social-scientific orientation springs from the belief that many methodological approaches are appropriate for studying and building theoretical explanations of communication.

Advisors and committee members work closely with individual students to select courses from the Department of Communication Studies and other university departments, and to plan teaching and research experiences that prepare students for the employment they seek after graduation.

## Media History and Culture

This area of specialization focuses on the interplay of institutions, texts, and audiences in mediated communication systems. Its central aim is to examine modern media-radio, television, advertising, music, new media, and a wide range of other popular cultural expressions-within their historical, social, political, economic, and cultural contexts. It also uses the mass media as a site for asking basic questions about culture, society, politics, and modernity.
Like the department's other graduate programs, media studies has a strong interdisciplinary flavor. Students draw not only on allied areas in the Department of Communication Studies but on fields across the university.

## Rhetoric, Culture, Engagement

This area of specialization is built on foundation courses in classical and 20th-century rhetorical theory and in an overview of 20thcentury rhetorical criticism. Courses from a rhetorical perspective include rhetorical theory, rhetorical criticism, visual rhetoric and politics, public address and public culture, studies in argumentation and freedom of speech, work in science and technology as well as academic inquiry, and historical methods. Cognate work of interest to rhetoricians also can be found in interpersonal communication and relationship studies as well as media studies.

Work in related disciplines-political science, history, sociology, English, cinematic arts, anthropology, American studies, rhetoric, and journalism-complements rhetorical studies course offerings.

## Learning Outcomes

## Research

Learn to interpret and contribute to communication research using qualitative, quantitative, and critical-cultural methods.

## Theory

Evaluate and apply communication theories broadly conceived to a range of social, cultural, interpersonal, and other contextual and communicative settings.

## Scholarship

Demonstrate familiarity with relevant subfields of scholarship in communication studies and related disciplines.

## Teaching and Professional Development

Begin relevant professional training (such as teaching technologies; pedagogy; grant writing; diversity, equity, and inclusion; digital scholarship; media production; or community engagement) to contribute to better and more equitable educational and social outcomes, and to develop transferable skills for employment both inside and outside of academic settings.

## Communication Skills

Cultivate the skills to communicate in writing and orally to both professional and popular audiences in ways that demonstrate intercultural competence and personal and social responsibility.

## Requirements

The Master of Arts program in communication studies requires a minimum of 36 s.h. of graduate credit, including at least 30 s.h. earned at the University of Iowa and in courses numbered above 4999. No more than 6 s.h. that are numbered between 3000 and 4999 may be counted toward the major. Students must earn a program grade-point average of at least 3.00 in major coursework. The degree program includes specializations in interpersonal communication and relationships; media history and culture; and rhetoric, culture, engagement. For further information on the specialization areas, see the Master of Arts overview section.

The MA with a major in communication studies requires the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Introduction to Research |  |
| COMM:5200 |  |  |
| and Teaching (taken the first |  |  |
| semester) |  |  | Introduction to Rhetorical | COMM:5230 | Studies |
| :--- | :--- |
| COMM:5241 | Theories of Mass <br> Communication |
| COMM:6371 | Communication Theory |
| One of these: | MA Research |
| COMM:5297 | MA Thesis (must be taken <br> twice) |

In exceptional circumstances, replacement courses may be approved by the student's advisor and the Graduate Affairs Committee.

Up to 9 s.h. in coursework may be earned in credit outside the department. Students take courses in specific topical areas as determined in their plan of study meeting.

## Thesis or Comprehensive Exam

Students, with the approval of their advisor and the Graduate Affairs Committee, can elect to write a thesis or complete a week-long, seven day take-home written exam which may be completed more quickly if desired or take a four-hour, written master's comprehensive exam near the completion of the required coursework for the master's degree.

The master's comprehensive exam is not a duplicate of previous course examinations, but seeks to examine students on their ability to synthesize, integrate, and apply research and theory.

The master's comprehensive exam committee and the thesis committee are three-person faculty committees selected to reflect the pattern of coursework counted toward the master's degree. One of the three members of the committee must be the student's advisor. The examination or thesis is judged satisfactory or unsatisfactory, with two unsatisfactory votes necessary for a committee judgment of unsatisfactory. The thesis committee conducts an oral defense of the thesis.

The report of the master's comprehensive examination or thesis defense is due in the Graduate College no later than two weeks after the examination and by the deadline date established by the Graduate College. If the department so recommends, students who fail the examination or thesis defense may be eligible for a reexamination. The examination or thesis defense may be repeated only once.

## Admission

Applicants to graduate programs in communication studies must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. For information about applying to the Master of Arts program in communication studies, visit Prospective Graduate Students on the Department of Communication Studies website.

Admission is for fall semester entry. Materials received from applicants by the application deadline of Jan. 1 are considered for admission and financial support.

## Career Advancement

MA communication studies graduates pursue PhD academic work and alternate academic careers. Some pursue careers in the private sector, at nonprofit organizations, and as instructional faculty at postsecondary institutions.
The department is deeply engaged in university- and discipline-wide efforts to train students in both traditional and nontraditional career paths.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Communication Studies, PhD

## Specialization Areas

The following are specialization areas available for the PhD program in communication studies.

## Interpersonal Communication and Relationships

This area of specialization is centered on theory complemented by strength in quantitative and qualitative research methods. It focuses on scholarly issues that arise from face-to-face, everyday communication practices. It emphasizes personal relationships and family processes, identity construction, persuasion, and culture.
The goal of the program is to produce scholars who possess sophisticated knowledge of theory and methodology, who are careful consumers of theories and methods, and who can develop their own approaches to communication phenomena. The program emphasizes systematic analysis of the forms, functions, and meanings of messages within various contexts. Its broad social-scientific orientation springs from the belief that many methodological approaches are appropriate for studying and building theoretical explanations of communication.

Advisors and committee members work closely with individual students to select courses from the Department of Communication Studies and other university departments, and to plan teaching and research experiences that prepare students for the employment they seek after graduation.

## Media History and Culture

This area of specialization focuses on the interplay of institutions, texts, and audiences in mediated communication systems. Its central aim is to examine modern media-radio, television, advertising, music, new media, and a wide range of other popular cultural expressions-within their historical, social, political, economic, and cultural contexts. It also uses the mass media as a site for asking basic questions about culture, society, politics, and modernity.
Like the department's other graduate programs, media studies has a strong interdisciplinary flavor. Students draw not only on allied areas in the Department of Communication Studies but on fields across the university.

## Rhetoric, Culture, Engagement

This area of specialization is built on foundation courses in classical and 20th-century rhetorical theory and in an overview of 20thcentury rhetorical criticism. Courses from a rhetorical perspective include rhetorical theory, rhetorical criticism, visual rhetoric and politics, public address and public culture, studies in argumentation and freedom of speech, work in science and technology as well as academic inquiry, and historical methods. Cognate work of interest to rhetoricians also can be found in interpersonal communication and relationship studies as well as media studies.

The PhD in rhetoric and public advocacy is designed to give students a mature grasp of the specialties and perspectives embraced by the field and to develop research competence essential to a life of productive scholarship.
Work in related disciplines-political science, history, sociology, English, cinematic arts, anthropology, American studies, rhetoric, and journalism-complements rhetorical studies course offerings.

More information is available on the Department of Communication Studies website.

## Learning Outcomes

## Research

Plan, organize, and conduct innovative, ethical, and significant communication research using qualitative, quantitative, and criticalcultural methods.

## Theory

Evaluate and apply communication theories broadly conceived to a range of social, cultural, interpersonal, and other contextual and communicative settings.

## Scholarship

Demonstrate broad-based knowledge of relevant subfields of scholarship in communication studies and related disciplines.

## Teaching and Professional Development

Develop relevant teaching and professional training (such as teaching technologies; pedagogy; grant writing; diversity, equity, and inclusion; digital scholarship; media production; or community engagement) to contribute to better and more equitable educational and social outcomes, and to develop transferable skills for employment both inside and outside of academic settings.

## Communication Skills

Cultivate the skills necessary to publish peer-reviewed articles and communicate in writing and orally to both professional and popular audiences in ways that demonstrate intercultural competence and personal and social responsibility.

## Requirements

The Doctor of Philosophy program in communication studies requires a minimum of $72 \mathrm{~s} . \mathrm{h}$. of graduate credit, including at least 39 s.h. earned at the University of Iowa and in courses numbered above 3000 . Students must maintain a cumulative grade-point average of at least 3.00. The degree program includes specializations in interpersonal communication and relationships; media history and culture; and rhetoric, culture, engagement. For further information, see the Doctor of Philosophy introductory section.

Graduate education in communication studies focuses on the PhD , but doctoral students may choose to earn a Master of Arts on their way toward the Doctor of Philosophy degree. A terminal master's degree may be an option for some students already admitted to the doctoral program.
The PhD with a major in communication studies requires the following.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| This course: |  |  |
| COMM:5200 | Introduction to Research and Teaching (taken the first semester) | 2 |
| One of these in student's primary area of interest: |  |  |
| COMM:5230 | Introduction to Rhetorical Studies | 3 |
| COMM:5241 | Theories of Mass Communication | 3 |
| COMM:6371 | Communication Theory | 3 |
| All of these: |  |  |
| Department of COMM) numb | unication Studies courses (prefix m 5000-7000 | 15 |
| COMM:6399 | PhD Dissertation | 6 |

Students also must complete their plan of study, the PhD comprehensive examination, the dissertation prospectus, and successfully defend their dissertation.
More information is available on the Department of Communication Studies website.

## Admission

Admission decisions are based on undergraduate achievement for a BA applicant and graduate achievement for an MA applicant, letters of reference, the statement of purpose, and samples of scholarly work.

Applicants to graduate programs in communication studies must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. For information about applying to the doctoral program in communication studies, visit Prospective Graduate Students on the Department of Communication Studies website.

Admission is for fall semester entry. Applicants whose materials are received by the application deadline of Jan. 1 will be considered for admission and financial support.

## Career Advancement

Communication studies PhD graduates pursue academic and alternate academic careers. Nearly three-fourths of recent graduates teach in full-time academic positions. Others pursue careers in the private sector, at nonprofit organizations, and as instructional faculty at postsecondary institutions.
The department is deeply engaged in university- and discipline-wide efforts to train students in both traditional and nontraditional career paths.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Director of Honors

- James Garrett Morris

Undergraduate majors: computer science (BA, BS); informatics (BA, BS)

Undergraduate minors: computer science; informatics
Graduate degrees: MCS; MS in computer science; PhD in computer science

Faculty: https://cs.uiowa.edu/people
Website: https://cs.uiowa.edu/
The Department of Computer Science offers undergraduate programs in computer science and in informatics as well as graduate degree programs in computer science. It offers courses that students in all majors may use to satisfy the GE CLAS Core [p. 19] Quantitative or Formal Reasoning requirement and a First-Year Seminar designed for entering undergraduate students. For general information about the department, faculty, and research activities, visit the Department of Computer Science website or the department's office.

## Related Majors

## Computer Science and Engineering

The Computer Science and Engineering major combines the technical content of a computer science degree and a computer engineering degree into a single program that leads to the Bachelor of Science in Engineering (BSE) degree. The curriculum is jointly offered by the Department of Computer Science and the Department of Electrical and Computer Engineering (College of Engineering). The program provides students with a strong theoretical and conceptual understanding of the principles underlying computer software and hardware along with the engineering analysis, design, and multidisciplinary teamwork skills needed to develop large and complex systems containing both software and hardware components.

Computer science majors may not earn a second major in computer science and engineering. See the BSE in computer science and engineering [ p .1531 ] in the catalog.

## Data Science

The BS in data science produces graduates with the sophisticated analytical and computational skills required to thrive in a quantitative world where new problems are encountered at an ever-increasing rate. The major emphasizes the statistical/probabilistic and algorithmic methods that underlie the preparation, analysis, and communication of complex data. With focus on technical foundations, the data science program promotes skills useful for creating and implementing new or special-purpose analysis and visualization tools. It also promotes a fundamental understanding of how to best handle uncertainty when making data-driven decisions.

Computer science majors may not earn a second major in data science. The Department of Statistics and Actuarial Science [p. 1047] and the Department of Computer Science [p. 296] collaborate to offer the major in data science. The BS in data science is administered by the Department of Statistics and Actuarial Science; see the BS in data science [p. 356] in the catalog.

## Courses

## Computer Science Courses

Competence in and exposure to computer science are not only useful, they often are prerequisites to advanced study and research in many disciplines. For most graduate students from other disciplines, an appropriate first course is CS:5110 Introduction to Informatics.

## CS:1000 First-Year Seminar <br> 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
CS:1020 Principles of Computing
3 s.h.
Introduction to computing; broad overview of discipline; necessary skills and concepts for effective application of computing resources in student's profession. GE: Quantitative or Formal Reasoning.
CS:1110 Introduction to Computer Science 3 s.h. Introduction to study of algorithms; how computers work, simple algorithms and their efficiency, networking, databases, artificial intelligence, graphics, simulation, modeling, security, and social impact of computing; hands-on introduction to programming concepts with Python; for students in data-intensive disciplines. GE: Quantitative or Formal Reasoning.

CS: 1210 Computer Science I: Fundamentals
4 s.h.
Introduction to programming using Python; programming constructs, data types, problem-solving strategies, data structures, object-oriented programming. Prerequisites: (MATH:1010 with a minimum grade of C- and MATH: 1340 with a minimum grade of C-) or (ALEKS score of 45 or higher and MATH: 1010 with a minimum grade of C-) or ALEKS score of 75 or higher or MATH: 1020 with a minimum grade of C- or (MATH:1005 with a minimum grade of C- and MATH:1010 with a minimum grade of C-) or MPT Level 3 score of 9 or higher or MATH: 1460 with a minimum grade of C- or MATH: 1350 with a minimum grade of C- or MATH: 1380 with a minimum grade of Cor MATH: 1850 with a minimum grade of C-. GE: Quantitative or Formal Reasoning.

## CS:2110 Programming for Informatics

4 s.h.
Introduction to programming, computing principles, and fundamental aspects of computer science; use of Python programming language for topics including expressions, operators, variables, control structures, basic data structures, functions, data modeling, basic data analysis, object-oriented concepts, and proper documentation. Prerequisites: $\mathrm{CS}: 1110$ with a minimum grade of C-.

## CS:2210 Discrete Structures <br> 3 s.h.

Mathematical methods used in computer science, including logic, proof techniques (with induction), functions, relations, algorithm analysis, recurrence relations, counting methods, combinatorics, graphs, trees. Recommendations: calculus I.

## CS:2230 Computer Science II: Data Structures

4 s.h.
Design, implementation, and application of data structures (e.g., linked lists, stacks, queues, hash tables, trees); complexity analysis; recursion; introduction to object-oriented programming concepts; abstract data types and their realization using generic interfaces and classes; software design patterns (e.g., iterators, comparators). Prerequisites: CS:1210 with a minimum grade of C- or ENGR:2730 with a minimum grade of C -. Recommendations: previous or concurrent enrollment in CS:2210.

## CS:2420 Analyzing Data for Informatics

Introduction to data analytics through an understanding of data analysis pipelines including data extraction and collection, data modeling and organization, and use of tools for data analysis; topics include collection of data from a variety of sources, mapping data to appropriate data structures, basic relational database concepts and use, analysis through probability and statistics, use of basic data mining and machine learning tools, and an understanding of privacy issues. Prerequisites: CS:2110 with a minimum grade of C- and (PSY:2811 with a minimum grade of C- or SOC:2160 with a minimum grade of C- or STAT:1020 with a minimum grade of C- or STAT: 1030 with a minimum grade of C - or STAT:2010 with a minimum grade of C or STAT:2020 with a minimum grade of C- or STAT:3120 with a minimum grade of C - or STAT:3510 with a minimum grade of C - or PSQF:4143 with a minimum grade of C-).
CS:2520 Human-Computer Interaction for Informatics 3 s.h.
Basic theories, principles, and guidelines for design and evaluation of human-computer interactions; topics include usability and user experience, user-centered design, quantitative and qualitative evaluation of user interfaces (e.g., expert reviews, usability testing), societal and ethical issues, and front-end development in HTML and JavaScript. Prerequisites: CS:2110 with a minimum grade of C-

CS:2620 Server-Side Development for Informatics 3 s.h.
Introduction to design, development, testing, and production deployment of data-driven web applications that use cloud/web services; introduction to server-side frameworks, software engineering tools, integration processes, and security mechanisms; topics include representational state transfer (REST) architectural style, key protocols and standards (e.g., HTTP, JSON), use of cloud/web services, data-binding strategies and databases. Prerequisites: CS:2420 with a minimum grade of C - and CS: 2520 with a minimum grade of C-

## CS:2630 Computer Organization

4 s.h.
Computing machinery at various levels of abstraction including digital logic, control units and data paths, the representation of data, computer arithmetic, register operations, memory organization, instruction sets, I/O, and assembly language; how these relate to execution of programs written in a systems-level programming language such as C. Prerequisites: CS:2230 with a minimum grade of C- and CS:2210 with a minimum grade of C-.
CS:2800 Digital Arts: An Introduction
3 s.h.
Introduction to potential of integrating art with technology to provide a foundation of skills and concepts through hands-on experimentation; lectures and demonstrations introduce key concepts and ideas as well as the history of digital arts; students develop skills that form a foundation for future investigation through labs; work may include using an Arduino, programming, and developing an interface to control a software project; final project is shared with the public in some way; critical discourse in the form of writing assignments allows for reflection and evaluation. GE: Engineering Be Creative. Same as ARTS:2800, CINE:2800, DANC:2800, DIGA:2800, MUS:2800, THTR:2800.

## CS:2820 Introduction to Software Development

4 s.h.
Software design and analysis at component and interface levels; implementation of interfaces; refactoring; abstract data types, delegation, polymorphism, and extension; automation and testing; event handling; significant software project that includes reading code written by others. Prerequisites: CS:2210 with a minimum grade of C and CS:2230 with a minimum grade of C-.
CS:3210 Programming Languages and Tools
arr.
Varied programming languages and tools. Prerequisites: CS: 1210 with a minimum grade of C - or $\mathrm{CS}: 2110$ with a minimum grade of C - or ENGR:2730 with a minimum grade of C-. Requirements: no prior enrollment in CS: 3210 with the same subtitle.

## CS:3330 Algorithms

3 s.h.
Algorithm design techniques (e.g., greedy algorithms, divide-andconquer, dynamic programming, randomization); fundamental algorithms (e.g., basic graph algorithms); techniques for efficiency analysis; computational intractability and NP-completeness. Prerequisites: CS:2210 with a minimum grade of C- and CS:2230 with a minimum grade of C-
CS:3620 Operating Systems
Introduction to modern operating systems, including device control, memory management and addressing, process scheduling, interprocess communication, interrupts, synchronization, security. Prerequisites: CS:2210 with a minimum grade of C - and CS:2230 with a minimum grade of C- and (CS:2630 with a minimum grade of C- or ECE: 3350 with a minimum grade of C -).
CS:3640 Introduction to Networks and Their Applications 3 s.h.
Introduction to networks and the development of network applications; basic concepts of network communication common to applications such as simulation and web services. Prerequisites: CS:2210 with a minimum grade of C - and CS:2230 with a minimum grade of C -.

## CS:3700 Introduction to Numerical Methods

Computer arithmetic, root finding, polynomial approximation, numerical integration, numerical linear algebra, numerical solution of differential equations; use of a higher-level computer language such as Matlab, Python, or Julia. Prerequisites: (MATH:2550 or MATH:2700) and (MATH:1560 or MATH:1860). Same as MATH:3800.

CS:3820 Programming Language Concepts $\mathbf{3}$ s.h.
Imperative, functional, and logical programming languages, and differences between them; syntax specification, types, control structures, recursion, data abstraction. Prerequisites: CS:2230 with a minimum grade of C - and CS:2210 with a minimum grade of C - and (CS:2630 with a minimum grade of C- or ECE:3330 with a minimum grade of C- or CS:2820 with a minimum grade of C- or ECE:3350 with a minimum grade of C -).

## CS:3910 Informatics Project

3 s.h.
Students work in small groups to design, implement, document, and test a system using appropriate software tools; or compile, prepare, visualize, and analyze a data set to support a decision-making process; capstone course for informatics majors. Prerequisites: CS:2620 with a minimum grade of C -

## CS:3980 Topics in Computer Science I

Complement to material in other courses; for informatics and noncomputer science majors. Prerequisites: CS:1210 with a minimum grade of C- or CS:2110 with a minimum grade of C- or ENGR:2730 with a minimum grade of C -. Requirements: no prior enrollment in CS:3980 with the same subtitle.

CS:3990 Honors in Computer Science or Informatics arr.
Individual projects. Requirements: computer science or informatics major, and honors standing.
CS:3999 Computer Science or Informatics Honors Cohort 0 s.h. Students complete all requirements for honors in the computer science or informatics major; supervision by computer science honors director. Requirements: final semester prior to graduation with honors.
CS:4310 Design and Implementation of Algorithms 3 s.h.
Algorithm design techniques with emphasis on programming and implementation in the work of students; topics include data structures, graph algorithms, divide-and-conquer, dynamic programming, randomized algorithms, and dealing with intractability; primarily for master's degree students in computer science. Prerequisites: CS:2210 with a minimum grade of C - and CS:2230 with a minimum grade of C-

## CS:4330 Theory of Computation

3 s.h.
Finite automata; regular sets and expressions; context-free and context-sensitive grammars, their properties; push-down automata; standard, universal, and linear-bounded Turing machines; relationships between formal languages and automata; undecidability and its consequences. Prerequisites: CS:3330 with a minimum grade of C-.

## CS:4350 Logic in Computer Science

3 s.h.
Applications of symbolic logic in computer science; symbolic logic as a powerful tool for modeling computation and computational devices and reasoning formally about them; introduction to several logics (i.e., propositional, predicate, temporal, modal) differing in their expressive power and focus, their uses in computer science; how to represent knowledge in these logics, what represents a valid argument, and how to prove or disprove, possibly automatically, the validity of a logical statement. Prerequisites: CS:3330 with a minimum grade of C-. Recommendations: computer science, math, or engineering major.

CS:4420 Artificial Intelligence
Introduction to artificial intelligence covering problem-solving methods, heuristic search, knowledge representation, automated reasoning, planning, game playing, machine learning, and neural networks. Prerequisites: CS:3330 with a minimum grade of C-.

## CS:4440 Web Mining

Core methods underlying development of applications on the Web; examples of relevant applications, including those pertaining to information retrieval, summarization of Web documents, and identifying social networks. Prerequisites: CS:3330 with a minimum grade of C-. Recommendations: CS:4400 strongly recommended.

## CS:4470 Health Data Analytics

3 s.h.
Analysis of different kinds of health care data, such as patient electronic medical records, public health data, biomedical publications, social media pertaining to health, and ontologies in health care; students will read papers exploring different kinds of research and application development involving such data; course will run in distinct modules with each focused on a dataset type and related research; students must be comfortable with programming (e.g., Java, Python, Perl). Prerequisites: CS:3330 with a minimum grade of C-.
CS:4500 Research Methods in Human-Computer Interaction 3 s.h. Introduction to research in the field of human-computer interaction; conducting research experiments; latest research in human-computer interaction. Prerequisites: CS:2520 with a minimum grade of C- or (CS:2210 with a minimum grade of C- and CS:2230 with a minimum grade of C -).

## CS:4510 Human-Computer Interaction for Computer Science

Basic theories, principles, and guidelines for design and evaluation of human-computer interactions; usability and user experience, user-centered design, quantitative and qualitative evaluation of user interfaces (e.g., expert reviews, usability testing), societal and ethical issues; application of topics through a challenging and collaborative software development project. Prerequisites: CS:2230 with a minimum grade of C -.

CS:4630 Mobile Computing
3 s.h.
Building mobile sensing systems requires addressing issues in sensor acquisition, wireless communication, and middleware development; hands-on projects using embedded computers and sensors; includes significant writing and presentation components; a conference-quality research paper on a novel research project in mobile computing is expected; knowledge of Java is assumed. Prerequisites: CS:2210 with a minimum grade of C - and CS:2230 with a minimum grade of C - and CS:2820 with a minimum grade of C-.
CS:4640 Computer Security 3 s.h. Mechanism versus policy; authentication, access control, security domains; perimeter security, defense in depth; cryptographic protocols; key management and distribution; security assessment. Prerequisites: CS:3620 with a minimum grade of C- or CS:3640 with a minimum grade of C- or ECE: 3540 with a minimum grade of C -

## CS:4700 High Performance and Parallel Computing

3 s.h.
Parallel algorithms presented and implemented with different approaches and libraries (e.g., OpenMP, MPI); various platforms including Message Passing Clusters, Multicore and GPUs, MapReduce (Hadoop), and related current topics; scientific computing and large data analysis projects. Prerequisites: (CS:2210 with a minimum grade of C- or MATH:4050) and CS:2230 with a minimum grade of C-. Same as MATH:4860.

CS:4400 Database Systems 3 s.h.
Introduction to database systems including querying using SQL, design using ER diagrams, developing relational databases, programming web applications using PHP or JDBC. Prerequisites: CS:2210 with a minimum grade of C- and CS:2230 with a minimum grade of C- and CS:3330 with a minimum grade of C-.

Basic theory of optimization, use of numerical algorithms in solution of optimization problems; linear and nonlinear programming, sensitivity analysis, convexity, optimal control theory, dynamic programming, calculus of variations. Prerequisites: (MATH:2700 or MATH:2550) and (ME:4111 or MATH:3800 or CS:3700) and (MATH:1560 or MATH:2850). Same as MATH:4820.

## CS:4740 Large Data Analysis

Current areas that deal with problem of big data; techniques from computer science, mathematics, statistics; high performance and parallel computing, matrix techniques, cluster analysis, visualization; variety of applications including Google PageRank, seismology, Netflix-type problems, weather forecasting; fusion of data with simulation; projects. Prerequisites: (CS:1210 with a minimum grade of C- or ENGR:2730 with a minimum grade of C-) and (MATH:3800 or MATH:3800) and (STAT:3200 or STAT:3200 or STAT:3200). Same as IGPI:4740, MATH:4740, STAT:4740.

## CS:4980 Topics in Computer Science II

3 s.h.
Complements material in other courses; for computer science graduate students and advanced undergraduate computer science, computer science and engineering, and data science majors. Prerequisites: CS:2210 with a minimum grade of C - and CS:2230 with a minimum grade of C-. Requirements: no prior enrollment in CS:4980 with the same subtitle.

## CS:5110 Introduction to Informatics

3 s.h.
Fundamentals of computer science: algorithms, complexity, relational databases, systems concepts, programming in Python. Same as IGPI:5110.

## CS:5340 Limits of Computation

Turing machines, undecidability and complexity: reductions, Cook's theorem and NP-completeness, approximation algorithms and randomized algorithms. Prerequisites: CS:3330.

## CS:5350 Design and Analysis of Algorithms <br> 3 s.h.

Review of design and analysis techniques; advanced data structures (binomial and Fibonacci heaps, disjoint sets); graph algorithms (network flows, matching, min-cut); NP-completeness, randomization and approximation algorithms; special topics (string matching, computational geometry, number theoretic algorithms). Prerequisites: CS:3330 or CS:5340.

## CS:5360 Randomized Algorithms

3 s.h.
Use of randomization in the design of algorithms; focus on various fundamental principles in the design of randomized algorithms, such as first and second moment method, random sampling, hashing, probability amplification; tools for analysis, such as the tail bounds of Markov, Chebyshev, Chernoff, and Hoeffding, the Lovasz Local Lemma, Martingale tail bounds, randomized rounding of linear and semi-definite programs; applications to network routing, combinatorial optimization, random walks, social networks, data streaming, and more. Prerequisites: CS:3330.

## CS:5370 Computational Geometry

3 s.h.
Study of data structures for geometric problems such as point location, range searching, finding nearest neighbors, and algorithms for convex hulls, Voronoi diagrams, triangulations, and quad-trees along with their uses; other topics will be determined by student interest; focus on algorithm design and an understanding of the implementation of geometric algorithms; assumes a sound understanding of the material in an undergraduate algorithms course. Prerequisites: CS:3330.

CS:5430 Machine Learning
3 s.h.
Fundamental machine learning techniques as well as hands-on experience applying these techniques and developing new techniques for solving problems from the real world; topics include regression (least square regression, lasso), classification (naive Bayes, nearest neighbor, support vector machines, logistic regression), kernel methods, unsupervised methods (k-means clustering, spectral clustering, dimensionality reduction), stochastic optimization, deep learning, and recent advances in big data analytics. Prerequisites: MATH:1850 and MATH:2700 and (STAT:2020 or STAT:3100 or STAT:3101 or STAT:3120) and (CS:2230 or CS:2110).
CS:5610 High Performance Computer Architecture 3 s.h. Problems involved in designing and analyzing current machine architectures using hardware description language (HDL) simulation and analysis, hierarchical memory design, pipeline processing, vector machines, numerical applications, multiprocessor architectures and parallel algorithm design techniques; evaluation methods to determine relationship between computer design and design goals. Prerequisites: ECE:3350 or CS:3620. Same as ECE:5320.
CS:5620 Distributed Systems and Algorithms
3 s.h.
Models of distributed systems, program correctness-safety and liveness properties, causality, logical and vector clocks, mutual exclusion, distributed snapshot, leader election, distributed algorithms for graph-theoretic problems, fault-tolerance-masking versus nonmasking types, checkpointing, stabilization, consensusbyzantine generals problem, fault-tolerant broadcast and multicast, management of replicated data. Prerequisites: CS:3330 and CS:3620. Requirements: some interest in networking.
CS:5630 Cloud Computing Technology
3 s.h.
Explores infrastructure and programming paradigms of scalable systems and databases; provides experience with popular cluster frameworks (MapReduce, Hadoop, Spark, Flink, or similar) through programming exercises, projects, and experiments; assigned readings and case studies explore themes such as replication, data sharding, looser types of consistency, virtualization, consensus, and barrier synchronization; cloud system stacks developed by Google, Amazon, Facebook, and Microsoft. Prerequisites: CS:2820 and (CS:3620 or CS:3640).

CS:5710 Numerical Methods I
Root finding for nonlinear equations; polynomial interpolation;
Root finding for nonlinear equations; polynomial interpolation;
polynomial approximation of functions; numerical integration.
Prerequisites: MATH:2700 and (MATH:2850 or MATH:3550).
Requirements: knowledge of computer programming. Same as MATH:5800.

## CS:5720 Numerical Methods II <br> 3 s.h.

Numerical methods for initial value problems for ordinary differential equations; direct and iterative methods for linear systems of equations; eigenvalue problems for matrices. Prerequisites: MATH:2700 and MATH:5800 and (MATH:2850 or MATH:3550) and (MATH:3600 or MATH:2560). Requirements: knowledge of computer programming. Same as MATH:5810.
CS:5800 Fundamentals of Software Engineering 3 s.h.
Problem analysis, requirements definition, specification, design, implementation, testing/maintenance, integration, project management; human factors; management, technical communication; design methodologies; software validation, verification; group project experience. Prerequisites: CS:2820 or ECE:3330. Same as ECE:5800.
CS:5810 Formal Methods in Software Engineering
3 s.h.
Models, methods, and their application in all phases of software engineering process; specification methods; verification of consistency, completeness of specifications; verification using tools. Prerequisites: ECE:3330 or CS:2820. Recommendations: CS:4350. Same as ECE:5810.

Modern agile software development practices for cloud and webbased applications, using state-of-the-art software engineering languages, tools, and technologies; agile software development practices, software-as-a-service (SAAS), and the Ruby on Rails Development Framework. Prerequisites: ECE:3330 or CS:2820. Same as ECE:5820.

## CS:5830 Software Engineering Project

Team software development project using concepts and methodologies learned in earlier software engineering classes; practical aspects of large-scale software development. Prerequisites: ECE:5820. Same as ECE:5830.

CS:5850 Programming Language Foundations 3 s.h. Introduction to formal foundations of programming languages using a variety of models, including attribute grammars, operational, axiomatic, denotational, and algebraic techniques; proofs of program equivalence, correctness, termination. Prerequisites: CS:3330 and CS:3820.

CS:5860 Lambda Calculus and Applications
Covers both typed and untyped versions of the lambda calculus in depth, including essential theoretical results like confluence for untyped lambda calculus and normalization for typed lambda calculi, as well as applications in computer science, logic, and linguistics; coursework includes both theoretical exercises and practical problems using software for manipulating lambda-calculus expressions, students devise their own final projects; no prior experience with lambda calculus, programming, logic, or linguistics is required, although ability to grasp definitions of new concepts and to follow detailed arguments is needed. Prerequisites: CS:3820.
CS:5980 Topics in Computer Science III
arr.
Complements material in other courses; for computer science graduate students.

## CS:5990 Individualized Research or Programming Project <br> arr.

Individualized research and/or programming projects in computer science, guided by a faculty member.
CS:6000 Research Seminar: Colloquium Series 1 s.h.
Graduate colloquium. Requirements: graduate standing in computer science.

## CS:6990 Readings for Research

arr.
Requirements: PhD standing in computer science.
CS:7604 Computing Research Ethics for Postdocs
0 s.h.
Review of responsible conduct of research policies specifically tailored to research roles computer science students are likely to play at the University of Iowa and beyond in their professional lives. Requirements: postdoctoral research scholar/fellow standing in computer science.

## CS:7990 Research for Dissertation

arr.
Individualized instruction for PhD candidates in computer science towards thesis requirements. Requirements: PhD candidacy (postcomprehensive exam) in computer science.

## Computer Science, BA

The major in computer science provides students with the necessary training for employment in careers such as software development and information management. It provides good preparation for graduate study in a variety of disciplines.

Students may declare a major in computer science when they are admitted to the university or afterward. They may declare either a Bachelor of Arts or a Bachelor of Science, but if no preference is indicated by a student, the Bachelor of Arts is designated. Students may switch to the Bachelor of Science at any time.

Undergraduates majoring in computer science develop competence in programming principles and methodologies, problem-solving techniques, mathematics, and computer systems. Computer science training is critical for many careers in science, engineering, business, and health care.

Computer science majors are advised at the Academic Advising Center until they have completed 30 s.h., at which point they are assigned a departmental advisor. Students being advised at the Academic Advising Center also can consult with a computer science faculty advisor.

Transfer students who have taken a course approved as equivalent to a required computer science or informatics course are exempt from that course. Transfer course grades are included in the computer science grade-point average

Students should consult the Department of Computer Science website or visit the department's office for information about general policies, elective areas, and internships, scholarships, and student groups, such as the university's chapter of the Association for Computing Machinery (ACM) and Women in Computing Sciences (WiCS).

## Advanced Placement

The Computer Science Advanced Placement Program test may be used to satisfy requirements. See Advanced Placement Credit Policy on the Department of Computer Science website.

## Learning Outcomes

- Students understand the mathematical, logical, and theoretical foundations of computing.
- Students can analyze and compare the relative merits of alternative software designs and develop high-quality software systems.
- Students understand the fundamental principles of computer organization, system software, networks, and security.
- Students understand social, professional, and ethical issues related to computing.

## Requirements

The Bachelor of Arts with a major in computer science requires a minimum of 120 s.h., including at least 41 s.h. of work for the major. Students must maintain a grade-point average (GPA) of at least 2.00 in all courses for the major and in all UI courses for the major. A cumulative GPA of at least 2.00 is required for graduation. Students also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

The computer science major for the Bachelor of Arts is designed for students who would like to gain considerable knowledge in computer science and have flexibility in choosing electives. Students preparing for careers in the computing field are encouraged to supplement the base requirements with additional computer science courses. The
program's flexibility makes it suitable for combination with other majors.

Coursework for the major includes computer science courses as well as courses in mathematics, statistics, and other supporting disciplines. Work for the major may not be taken pass/nonpass.

Bachelor of Arts students considering a switch to the Bachelor of Science program should choose their GE CLAS Core Natural Sciences courses carefully since students may be able to use the same courses to satisfy the computer science major natural science sequences requirement for the BS degree. See "Natural Science Sequences" under Requirements in the BS in computer science [p. 311] section of the catalog.

Students who major in computer science may not also major or minor in computer science and engineering, data science, or informatics.

## Departmental Residency Requirement

Students who earn a BA in computer science must complete at least five courses (minimum of 15 s.h.) at the University of Iowa from the following: CS:2630 Computer Organization or ECE:3350 Computer Architecture and Organization, CS:2820 Introduction to Software Development, CS:3330 Algorithms, and at least two computer science courses numbered CS:3620-CS:5899, but excluding CS:3910 Informatics Project, CS:3980 Topics in Computer Science I, and CS:4310 Design and Implementation of Algorithms; these courses are requirements for the BA in computer science as listed below.

## Program Requirements

The BA with a major in computer science requires the following coursework. Many courses for the major require a minimum grade of C-minus in prerequisite courses.

| Requirements | Hours |
| :--- | :--- |
| Computer Science Core Courses | $27-28$ |
| Mathematics Core Courses | $11-12$ |
| Advanced Computer Science Electives | 3 |

## Computer Science Core

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| CS:1210 | Computer Science I: Fundamentals | 4 |
| CS:2210 | Discrete Structures | 3 |
| CS:2230 | Computer Science II: Data Structures | 4 |
| CS:2820 | Introduction to Software Development | 4 |
| CS:3330 | Algorithms | 3 |
| CS:3820 | Programming Language Concepts | 3 |
| One of these: |  |  |
| CS:2630 | Computer Organization | 4 |
| ECE:3350 | Computer Architecture and Organization | 3 |
| One of these: |  |  |
| CS:3620 | Operating Systems | 3 |
| CS:3640 | Introduction to Networks and Their Applications | 3 |

## Mathematics Core

## Calculus I

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| MATH:1550 | Engineering Mathematics I: | 4 |
| MATH:1850 | Cingle Variable Calculus | 4 |

## Calculus II

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| MATH:1560 | Engineering Mathematics II: <br> Multivariable Calculus | 4 |
| MATH:1860 | Calculus II | 4 |

## Linear Algebra/Probability and Statistics

Students who take MATH:2550 Engineering Mathematics III: Matrix Algebra and MATH:2560 Engineering Mathematics IV: Differential Equations can use these courses together to satisfy the linear algebra requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: | Introduction to Linear Algebra | 4 |
| MATH:2700 | Probability and Statistics for <br> the Engineering and Physical <br> Sciences | 3 |
| STAT:2020 | Probability and Statistics | 4 |

## Advanced Computer Science Electives

Course \# Title<br>Hours

At least 3 s.h. from these:
A computer science course (prefix CS) numbered 3620-5899, except CS:3910, CS:3980, and CS:4310
A computer science course (prefix CS) numbered 5900
or above, with department approval
Students may count a maximum of 3 s.h. earned in CS:3990 Honors in Computer Science or Informatics toward the advanced computer science electives requirement.

## Early Admission to the Graduate College

Undergraduate computer science students who have 6 s.h. or less to earn toward graduation may apply for early admission to the Graduate College. Early admission allows students in their final undergraduate semester to take courses for graduate credit in addition to the courses they need to complete their bachelor's degrees.

## Combined Programs

## BA/MCS

Qualified computer science undergraduate students who plan to earn the Master of Computer Science degree may apply for the combined Bachelor of Arts/Master of Computer Science program. The combined BA/MCS program allows students to earn both degrees in five years. The program requires a total of 140 s.h. Students are granted a BA when they complete all requirements for the undergraduate degree.

Students in the combined program must complete all requirements for each degree, but may count a maximum of 12 s.h. (four courses)
toward both degrees. The four courses must be taken during the fourth year of undergraduate study, after admission to the combined program, and must satisfy degree requirements of both the BA and the MCS.

If students withdraw from the combined program before completing their bachelor's degree, credit earned in the four courses is counted only toward the undergraduate degree.
Students apply for admission to the combined program during their third year as an undergraduate and enter the program at the beginning of their fourth year. They typically complete the combined program in one year after completing BA requirements.
Applicants to the combined program must:

- be enrolled as a BA student majoring in computer science at the University of Iowa;
- have completed a minimum of 80 s.h. at the time of admission to the combined program, with at least 30 s.h. earned at the University of Iowa; and
- have a cumulative University of Iowa grade-point average (GPA) of at least 3.25 and a GPA of at least 3.25 in the computer science major (computed on math prerequisites and core computer science coursework taken at the University of Iowa).

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
Students must submit an application for admission to the program, a statement of purpose, three letters of recommendation, and transcripts from all colleges attended; they also must apply to the Graduate College. Graduate Record Examination (GRE) scores are not required. For more detailed information, see Graduate Programs on the Department of Computer Science website.

## Honors

## Honors in the Major

Students majoring in computer science have the opportunity to graduate with honors in the major. They must maintain a minimum UI cumulative grade-point average (GPA) of 3.33 and a minimum major GPA of 3.50 ; additionally, students complete $4-6$ s.h. of CS:3990 Honors in Computer Science or Informatics and submit an acceptable honors thesis or project. At any time, students can communicate to the computer science professional advisor that they have an honors interest and can have that designation placed on their academic record.

A student is responsible for finding a faculty member willing to supervise the honors project. The student can register for CS:3990 Honors in Computer Science or Informatics under the project supervisor's name once the faculty member approves the proposed project and a timetable for the work. Once that is accomplished, the student must then communicate with the Department of Computer Science faculty honors director, who changes the student's status to denote the student is pursuing honors in the major. It is not necessary to have declared an honors interest before finding a thesis supervisor and beginning to pursue honors in the major, but the student must be coded as pursuing honors prior to completing the application for degree.

An honors project can be completed in one semester, but it usually takes two semesters to complete. In their final semester, a student must register for CS:3999 Computer Science or Informatics Honors Cohort. The honors thesis/project must be approved by the thesis supervisor and then submitted to the faculty honors director who will give initial approval that the student can graduate with honors in the major. Final approval is given after final grades are submitted and all
requirements are met. For more details regarding project requirements, see Honors in Computer Science on the department's website.

Students who pursue honors in the major may count a maximum of 3 s.h. in CS:3990 Honors in Computer Science or Informatics toward the advanced computer science elective requirement. Those in the combined BA/MCS program may register for 4-6 s.h. in CS:5990 Individualized Research or Programming Project instead of CS:3990; this registration allows them to receive graduate credit for the course while satisfying the course requirements to graduate with honors.

## University of Iowa Honors Program

In addition to honors in the major, students can pursue honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the computer science major. However, the semester hours earned in CS:3990 Honors in Computer Science or Informatics or CS:5990 Individualized Research or Programming Project can be used to partially satisfy the UI Honors requirement of 12 s.h. of experiential learning coursework.
For more information, contact the Department of Computer Science honors director.

## Career Advancement

Computer science graduates work primarily in two market sectors. One sector is the software and computer industry where the words computer science are being used-those in Silicon Valley, among other areas, that can range from start-ups to giants like Amazon, Google, Facebook, and Microsoft. The other sector allows computer science students to use their technical expertise in fields beyond computer science. Examples would be working as a user experience (UX) designer for a marketing agency or developing software for a financial group; those are computer science majors working in media, health care, the government, and even in law firms. Computer science skills are needed everywhere so students have ample opportunities to find an environment that fits their interests and strengths.

As many as one-third of computer science graduates go into research or elect to pursue graduate studies in computer science, including the University of Iowa's five-year BA/MCS program, or pursue other areas where computer science provides a strong foundation.

A recent job placement survey indicates that more than $97 \%$ of computer science graduates have a job, are continuing education, or are not seeking employment within six months of graduation.

View post-graduation data on the Pomerantz Career Center website, which uses University of Iowa placement information to explore what recent computer science alumni are doing, including median salaries, job titles, companies of employment, and other facts about UI graduates.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The Four-Year Graduation Plan is not available to BA students majoring in computer science. Students work with their advisors on individual graduation plans.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Computer Science, BA

## Course Title Hours

Academic Career

## Any Semester

Effective fall 2022, computer science majors enrolled full-time and with 60 s.h. or more overall earned hours reflected on the UI grade report will be assessed $\$ 500$ per semester supplemental tuition; the amount is pro-rated for part-time students. For more information see: https:// cs.uiowa.edu/supplemental-tuition-effective-fall-2022.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Enrollment in math courses requires completion of a placement exam.
c GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
d Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
e Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
f Choose from MATH:2700, STAT:2020, or STAT:3120.
g Students may take CS:2820, CS:3330, and CS:3820 in any order after completing CS:1210, CS:2210, and CS:2230.
h Students may choose a computer science course (prefix CS) numbered 3620-5899 (except CS:3910, CS:3980, CS:4310), or a CS course numbered 5900 or above with department approval. A course used to complete a core requirement cannot also be used as a major elective.
i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a
degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Informatics, BA

The major in informatics provides students with the necessary training for employment in careers such as software development, user experience, and data analytics. It provides good preparation for graduate study in a variety of disciplines.
Students may declare a major in informatics when they are admitted to the university or afterward. All students begin the major as Bachelor of Arts students but may switch to the Bachelor of Science programs at any time.

The informatics major combines fundamental and practical computing knowledge with a choice of cognate areas from the liberal arts and sciences, providing students with the necessary background and specialized skills to work at the interface of computing and another discipline. Students may begin the major without a chosen cognate area; they may declare a cognate at any time. Some cognates are available only with the Bachelor of Arts, others are available only with the Bachelor of Science. A student's choice of cognate determines whether the student will earn a BA or a BS.

Informatics majors are advised at the Academic Advising Center until they have completed 30 s.h., at which point they are assigned a departmental advisor. Students being advised at the Academic Advising Center also can consult with an informatics faculty advisor.

Transfer students who have taken a course approved as equivalent to a required informatics or computer science course are exempt from that course. Transfer course grades are included in the informatics gradepoint average.

Students should consult the Department of Computer Science website or visit the department's office for information about general policies, elective areas, and internships, scholarships, and student groups, such as the university's chapter of the Association for Computing Machinery (ACM) and Women in Computing Sciences (WiCS).

Many informatics major courses are offered once per year and have prerequisites that are also only offered annually. Speak with an advisor for more information.

## Advanced Placement

The Computer Science Advanced Placement (AP) exam may be used to satisfy requirements. See Advanced Placement Credit Policy on the Department of Computer Science website.

## Learning Outcomes

- Students can apply computational thinking approaches to solve problems.
- Students can individually and collaboratively develop software using professional tools.
- Students can extract, organize, analyze, and present data from a variety of sources.
- Students can contribute to the development of usable, useful, and enjoyable software applications by using human-centered methods
- Students understand social, professional, and ethical issues related to computing.
- Students have a thorough understanding of a chosen cognate area.

## Requirements

The Bachelor of Arts with a major in informatics requires a minimum of 120 s.h., including at least 43-51 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. A cumulative GPA of at least 2.00 is required for graduation. Students
also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

The program combines foundational informatics coursework with coursework in a cognate area. The major offers the cognate areas of art, economics, geoinformatics, health informatics, humancomputer interaction, linguistics, media, music, social informatics, and individualized cognates. Required credit for the major depends on a student's choice of cognate area.

Coursework for the major includes the informatics core, one elective, a statistics course, and a set of courses in a chosen cognate area. Work for the major may not be taken pass/nonpass. Students are expected to have taken MATH:1005 College Algebra or the equivalent.

Students who major in informatics may not also major in computer science, business analytics and information systems, or computer science and engineering. They may, however, earn a minor in computer science.

## Departmental Residency Requirement

Students must complete at least four courses (minimum of 12 s.h.) at the University of Iowa from the following: CS:3910 Informatics Project and three additional courses numbered CS:2500-CS:4999; these courses are requirements for the BA in informatics as listed below.

## Program Requirements

The BA with a major in informatics requires the following coursework. Many courses for the major require a minimum grade of C -minus in prerequisite courses.

| Requirements | Hours |
| :--- | :--- |
| Informatics Core Courses | 19 |
| Informatics Electives | 3 |
| Statistics Course | $3-4$ |
| Cognate Courses | $18-25$ |

## Informatics Core

The informatics core consists of six required computing courses (19 s.h.) that emphasize data manipulation, databases, and networking. It provides more applications-oriented content than the traditional computer science curriculum yet is designed to offer students a sound basis in underlying computer science themes and techniques.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| CS:1110 | Introduction to Computer | 3 |
| CS:2110 | Science | 4 |
| CS:2420 | Programming for Informatics | 3 |
| CS:2520 | Analyzing Data for Informatics | 3 |
| CS:2620 | for Informatics |  |
|  | Server-Side Development for | 3 |
| CS:3910 | Informatics | 3 |

## Informatics Electives

Students must complete at least one course (3 s.h.) from a list of approved computing informatics electives. Course selection must be approved by an informatics advisor. In addition to the courses listed below, students may have additional choices from the Department of Electrical and Computer Engineering and the Department of Business Analytics; consult an informatics faculty advisor for additional choices.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| BAIS:4220 | Advanced Database <br> Management and Big Data | 3 |
| A computer science course (prefix CS) numbered 3000-4999, including CS:3990 for 3 s.h., but excluding CS:3910 and CS:4510 |  |  |
| Statistics Course |  |  |
| Students must complete one introductory statistics course. Some cognates require a specific statistic course. Students should consult with their advisors to choose a statistics course appropriate for their cognate area. |  |  |
| Course \# | Title | Hours |
| One of these: |  |  |
| PSY:2811 | Research Methods and Data Analysis in Psychology I | 3 |
| SOC:2160 | Applied Statistics for Social Scientists | 3 |
| STAT:1020 | Elementary Statistics and Inference | 3 |
| STAT:1030 | Statistics for Business | 4 |
| STAT:2010 | Statistical Methods and Computing | 3 |
| STAT:2020 | Probability and Statistics for the Engineering and Physical Sciences | 3 |
| STAT:3120 | Probability and Statistics | 4 |
| STAT:3510 | Biostatistics | 3 |
| STAT:4143 | Introduction to Statistical Methods | 3 |

## Cognates

Students must complete all requirements listed under one of the cognate areas below: art, economics, geoinformatics, health informatics, human-computer interaction, linguistics, media, music, social informatics, or an individualized cognate.

## Art

The informatics major with the art cognate requires a minimum of 47 s.h. of work for the major, including 22 s.h. in cognate courses. Students learn about the design and maintenance of web services, applications of modern computerized artistic tools, and benefits and limitations of computers as a digital medium. They also gain insight into computerized tool design that is guided by knowledge of an artist's requirements. The art cognate may lead to careers in web development, technology coordination for artistic productions, development of digital artistic tools, and artistic or technical development for entertainment companies. Cognate courses are primarily in art history, design, elements of art, and photography.

Some courses listed below are open only to students majoring in art, so they are appropriate choices only for students with a double major in art and informatics. Non-art majors should work with an informatics faculty advisor to develop an individual set of art cognate courses.

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| All of these: |  |  |
| ARTS:1510 | Basic Drawing | 3 |
| ARTS:1520 | Design Fundamentals | 3 |
| DSGN:2500 | Graphic Design I | 3 |
| DSGN:2600 | Graphic Design II | 3 |
| DSGN:3500 | Graphic Design III | 4 |

| Any art history course (prefix ARTH) numbered <br> 1010-2999 | 3 |  |
| :--- | :--- | :--- |
| One of these, to complete 22 s.h. for the art cognate: |  |  |
| CS:2800 | Digital Arts: An Introduction | 3 |
| DSGN:3600 | Graphic Design IV | 4 |
| MUSM:3125 | Museums in a Digital World | 3 |
| SCLP:3840 | Robotic Art Studio | 4 |
| SCLP:4835 | Electronic Objects and Spaces | 4 |
| SCLP:4840 | Air, Actuators, and Motors | 4 |

## Economics

The informatics major with the economics cognate requires a minimum of 49 s.h. of work for the major, including 24 s.h. in cognate courses, which are primarily from economics. The economics cognate is intended for students interested in working with economic, financial, or demographic data. It may lead to careers in administration, business, or government or to graduate study in management or policy areas.

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| All of these: |  |  |
| ECON:1100 | Principles of Microeconomics | 4 |
| ECON:1200 | Principles of Macroeconomics | 4 |
| ECON:3100 | Intermediate Microeconomics | 3 |
| ECON:3150 | Intermediate Macroeconomics | 3 |
| MATH:1350 | Quantitative Reasoning for | 4 |
|  | Business |  |
| Additional 6 s.h. in economics courses (prefix ECON) | 6 |  |
| numbered 3000 or above |  |  |

## Geoinformatics

The informatics major with the geoinformatics cognate requires a minimum of 48 s.h. of work for the major, including 23 s.h. in cognate courses, which are primarily from geographical and sustainability sciences. The geoinformatics cognate is intended for students interested in geographic information systems (GIS) and spatial aspects of data. It may lead to careers in business, government, or public health or to graduate study in geography, public health, or policy areas.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| GEOG:1020 | The Global Environment | 3 |
| GEOG:1021 | The Global Environment Lab | 1 |
| GEOG:2050 | Foundations of GIS | 4 |
| Two of these: |  |  |
| GEOG:1070 | Contemporary Environmental Issues | 3 |
| GEOG:2110 | Eight Billion and Counting: Introduction to Population Dynamics | 3 |
| GEOG:2910 | The Global Economy | 3 |
| One of these: |  |  |
| GEOG:3520 | GIS for Environmental Studies | 3 |
| GEOG:3570 | Light Detection and Ranging (LiDAR): Principles and Applications | 3 |
| And: |  |  |
| Two geograph (prefix GEOG | sustainability sciences courses red 3500 or above (at least 6 s.h.) | 6 |

## Health Informatics

The informatics major with the health informatics cognate requires a minimum of 46 s.h. of work for the major, including 21 s.h. in cognate courses. The health informatics cognate is intended for students interested in applications of computing to health care, especially in public health. It may lead to careers in medical or health-related areas or to graduate and professional degree programs in public health, health informatics, and medical informatics. Cognate courses are selected primarily from public health, geography, and global health studies.

Once students complete the required courses in each of the four sets below, they must select additional courses from the sets to complete 21 s.h. of credit for the cognate.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| One of these: |  |  |
| CPH:1400 | Fundamentals of Public Health | 3 |
| GHS:3720 | Contemporary Issues in Global Health | 3 |
| At least two of these: |  |  |
| GEOG:2050 | Foundations of GIS | 4 |
| GEOG:3110 | Geography of Health | 3 |
| GEOG:4150 | Health and Environment: GIS Applications | 3 |
| Any geographical and sustainability sciences course (prefix GEOG) numbered 3500 or above |  | 3-4 |
| At least two of these: |  |  |
| GHS:3720 | Contemporary Issues in Global Health | 3 |
| GHS:3850 | Promoting Health Globally | 3 |
| GHS:4100 | Topics in Global Health | 1-3 |
| JMC:3150 | Media and Health | 3 |
| One of these: |  |  |
| EPID:4400 | Epidemiology I: Principles | 3 |
| HMP:4000 | Introduction to the U.S. Health Care System | 3 |

## Human-Computer Interaction

The informatics major with the human-computer interaction cognate requires a minimum of 46 s.h. of work for the major, including at least 21 s.h. in cognate courses. The human-computer interaction cognate is intended for students interested in designing useful and usable technologies. It can lead to careers in interaction design, web design, implementation of user interfaces, and evaluation of human-computer interactions as well as provide valuable skills for graduate study in human-computer interaction.

The cognate's courses provide an interdisciplinary foundation including psychology, sociology, and studio arts, together with an understanding of research methods in human-computer interaction and relevant software development skills. This cognate requires more advanced courses in computer science than other cognates.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| This course: | Research Methods in Human- <br> Computer Interaction | 3 |
| CS:4500 | Elementary Psychology - |  |
| Either both psychology courses or both sociology <br> courses: | Introduction to Cognitive <br>  | 6 |
| PSY:2601 | Psychology |  |

| SOC:1010 \& | Introduction to Sociology - | $6-7$ |
| :--- | :--- | :--- |
| SOC:2130 | Sociological Theory |  |

One art course from these:
\(\left.$$
\begin{array}{lll}\text { ARTS:1020 } & \text { Elements of 3D Design } & 3 \\
\text { ARTS:1070 } & \begin{array}{l}\text { Elements of Graphic Design } \\
\text { (recommended) }\end{array}
$$ \& 3 <br>
Three of these: \& Human Factors \& 3 <br>
ISE:3400 \& Introduction to Developmental \& 3 <br>

PSY:2401 \& Science\end{array}\right]\)| Introduction to Social |  |
| :--- | :--- |
| PSY:2501 | Psychology |
| PSY:2701 | Introduction to Behavioral <br> Neuroscience |

Any computer science course (prefix CS) numbered
3000 or above, except CS:4510 and CS:5990, with
4000-level human-computer interaction themed courses recommended

Most courses in this list have prerequisites, which students must complete before they may register for the course. Most of the psychological and brain science courses (prefix PSY) require
PSY:1001 Elementary Psychology as a prerequisite. Students should review prerequisites carefully before making their selections.

## Linguistics

The informatics major with the linguistics cognate requires a minimum of 47 s.h. of work for the major, including at least 22 s.h. in cognate courses. Linguistics, the scientific study of human languages, is directly related to psychology, anthropology, and computer science as well as to more applied fields such as second language acquisition or speech and hearing science. The cognate focuses on computational representations of syntax and semantics for processing natural language. Cognate courses are drawn primarily from linguistics.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| All of these: | Anatomy and Physiology of <br> Speech Production | 4 |
| CSD:3112 | Basic Neuroscience for Speech <br> and Hearing | 3 |
| LING:3001 | Introduction to Linguistics | 3 |
| LING:3005 | Articulatory and Acoustic <br> Phonetics | 3 |
| LING:3010 | Syntactic Analysis | 3 |
| LING:3020 | Phonological Analysis | 3 |
| LING:3080 | History of the English Language | 3 |

## Media

The informatics major with the media cognate requires a minimum of 47 s.h. of work for the major, including 22 s.h. in cognate courses. This cognate is intended for students interested in working in media industries. Data-specific occupations in these industries include, but are not limited to, data/communication analyst, data mining expert, strategic analyst, data journalist, web developer, information graphics specialist, app developer, and multimedia journalist.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| JMC:1100 | Introduction to Media Effects | 3 |
| JMC:1200 | Introduction to Media and | 3 |
| JMC:1500 | Culture | 3 |
| All of these: | Introduction to Social Media |  |

| JMC:1300 | Introduction to Journalism and | 3 |
| :--- | :--- | :--- |
|  | Strategic Communication |  |

## Music

The informatics major with the music cognate requires a minimum of 48 s.h. of work for the major, including 23 s.h. in cognate courses. The music cognate is intended for students interested in audio recording, manipulation of sound, and digital media. It may help students prepare for careers in the entertainment industry. Cognate courses are primarily from music, with some from cinematic arts and theatre arts. Entering students must possess basic musicianship skills; an audition may be required for admission.

When students begin work on this cognate, they should enroll in MUS: 1201 Musicianship and Theory I and they must take the Placement Exam A, which is administered online during the summer before fall semester begins, to determine readiness for the Musicianship and Theory course sequence. See Musicianship and Theory Placement on the School of Music website for more information. Advanced placement in School of Music courses does not reduce the number of semester hours required for the cognate.

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| All of these: | Fundamentals of Music for |  |
| MUS:1200 | Majors | 0 |
| Musicianship and Theory I |  |  |
| MUS:1201 | Musicianship and Theory II | 4 |
| MUS:1211 | Group Instruction in Piano I | 4 |
| MUS:1212 | Group Instruction in Piano II | 1 |
| MUS:3780 | Audio Recording I | 1 |
| MUS:3781 | Audio Recording II | 3 |
| One of these: | World Music | 3 |
| MUS:1310 | History of Jazz | 3 |
| MUS:1720 | History of Western Music I | 3 |
| MUS:2301 | History of Western Music II | 3 |
| MUS:2302 | Music of Latin America and the | 3 |
| MUS:2311 | Caribbean | 3 |
| At least one of these, | to complete 23 s.h. for the music | 3 |
| cognate: | Digital Arts: An Introduction | 3 |
| CS:2800 | Film/Video Production: Sound | 3 |
| CINE:4841 | Design | 3 |
| MUS:1007 | Garage Band: The Basics | 3 |
| MUS:1010 | Recital Attendance for | 3 |
| THTR:3260 | Nonmajors | 3 |

## Social Informatics

The informatics major with the social informatics cognate requires a minimum of $45 \mathrm{~s} . \mathrm{h}$. of work for the major, including $20 \mathrm{~s} . \mathrm{h}$. in cognate courses, all from the Department of Sociology and Criminology.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | $3-4$ |
| SOC:1010 | Introduction to Sociology | 3 |
| SOC:2130 | Sociological Theory | 3 |
| SOC:2170 | Research Methods |  |
| At least 11 s.h. from these: | 3 |  |
| CRIM:1410 | Introduction to Criminology | 3 |
| CRIM:3420 | Juvenile Delinquency | 3 |
| CRIM:3450 | Criminal Legal System | 3 |
| CRIM:4400 | Internship in Criminal Justice |  |

Any sociology course (prefix SOC) numbered 1020 or above

## Individualized Cognates

Students interested in developing individualized cognates may work with an informatics faculty advisor. Individualized cognates may be drawn primarily from one department or an appropriate mix of departments; they require an approved set of cognate courses totaling 18-25 s.h.

## Early Admission to the Graduate College

Undergraduate informatics students who have 6 s.h. or less to earn toward graduation may apply for early admission to the Graduate College. Early admission allows students in their final undergraduate semester to take courses for graduate credit in addition to the courses they need to complete their bachelor's degrees.

## Combined Programs

## BA/MS in Informatics (Geoinformatics or Health Informatics or HumanComputer Interaction Subprogram)

Students majoring in informatics who are interested in earning a master's degree in informatics may apply to the combined BA/MS program (geoinformatics or health informatics, or human-computer interaction subprogram) offered by the College of Liberal Arts and Sciences and the Graduate College. The program enables students to begin the study of informatics before they complete their bachelor's degree. Students are able to complete both degrees in less time than if they were to complete the two degrees separately.
Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information about the graduate degree program, see the MS in informatics [p. 1653] (Graduate College) in the catalog.

## Honors

## Honors in the Major

Students majoring in informatics have the opportunity to graduate with honors in the major. They must maintain a minimum UI cumulative grade-point average (GPA) of 3.33 and a minimum major GPA of 3.50; additionally, students complete 4-6 s.h. of CS:3990

Honors in Computer Science or Informatics and submit an acceptable honors thesis or project. At any time, students can communicate to the computer science professional advisor that they have an honors interest and can have that designation placed on their academic record.

A student is responsible for finding a faculty member willing to supervise the honors project. The student can register for CS:3990 Honors in Computer Science or Informatics under the project supervisor's name once the faculty member approves the proposed project and a timetable for the work. Once that is accomplished, the student must then communicate with the Department of Computer Science honors director, who changes the student's status to denote the student is pursuing honors in the major. It is not necessary to have declared an honors interest before finding a thesis supervisor and beginning to pursue honors in the major, but the student must be coded as pursuing honors prior to completing the application for degree.

An honors project can be completed in one semester, but it usually takes two semesters to complete. In the final semester, a student must register for CS:3999 Computer Science or Informatics Honors Cohort. The honors thesis/project must be approved by the thesis supervisor and then submitted to the honors director who will give initial approval that the student can graduate with honors in the major. Final approval is given after final grades are submitted and all requirements are met. For more details regarding project requirements, see Honors in Computer Science on the department's website.

## University of Iowa Honors Program

In addition to honors in the major, students can pursue honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.
Membership in the UI Honors Program is not required to earn honors in the informatics major. However, the semester hours earned in CS:3990 Honors in Computer Science or Informatics can be used to partially satisfy the UI Honors requirement of 12 s.h. of experiential learning coursework.

For more information, contact the Department of Computer Science honors director.

## Career Advancement

Informatics graduates work in a broad range of market sectors, reflecting the interdisciplinary nature of the program and the large number of available cognates. Students will have technical skills along with a specialty area that can help them pursue a specific type of organization or interest field.
Here are just a few of the areas that informatics graduates have pursued: software development, database and/or web administration, data analysis, software support (IT), user interface/user experience web design (the human-computer interaction cognate is useful for this area), and health care information (the health informatics cognate is useful for this area).

A recent job placement survey indicates that more than $90 \%$ of University of Iowa informatics graduates have a job, are continuing education, or are not seeking employment within six months of graduation.

View post-graduation data on the Pomerantz Career Center website, which uses University of Iowa placement information to explore what recent informatics alumni are doing, including median salaries, job titles, companies of employment, and other facts about UI graduates.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The Four-Year Graduation Plan is not available to BA students majoring in informatics. Students work with their advisors on individual graduation plans.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

| c Students must complete all requirements in one of the following cognate areas: art, economics, geoinformatics, health informatics, human-computer interaction, linguistics, media, music, social informatics or an individualized cognate. Students interested in developing individualized cognates (a grouping of 18-25 s.h. of courses drawn primarily from one department) must work with an informatics faculty advisor to create a plan of study and obtain departmental approval for their plan. |  |
| d Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates. |  |
| e See General Catalog for list of approved courses. Students pursuing the human-computer interaction cognate are encouraged to take either PSY:2811 or SOC:2160. |  |
| g Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course. |  |
| h BAIS:4220, or a computer science course (prefix CS) numbered 3000-4999, including CS:3990 for 3 s.h., but excluding CS:3910 and CS:4510. |  |

i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Computer Science, BS

The major in computer science provides students with the necessary training for employment in careers such as software development and information management. It provides good preparation for graduate study in a variety of disciplines.

Students may declare a major in computer science when they are admitted to the university or afterward. They may declare either a Bachelor of Arts or a Bachelor of Science, but if no preference is indicated by a student, the Bachelor of Arts is designated. Students may switch to the Bachelor of Science at any time.

Undergraduates majoring in computer science develop competence in programming principles and methodologies, problem-solving techniques, mathematics, and computer systems. Computer science training is critical for many careers in science, engineering, business, and health care.

Computer science majors are advised at the Academic Advising Center until they have completed 30 s.h., at which point they are assigned a departmental advisor. Students being advised at the Academic Advising Center also can consult with a computer science faculty advisor.

Transfer students who have taken a course approved as equivalent to a required computer science or informatics course are exempt from that course. Transfer course grades are included in the computer science grade-point average.

Students should consult the Department of Computer Science website or visit the department's office for information about general policies, elective areas, and internships, scholarships, and student groups, such as the university's chapter of the Association for Computing Machinery (ACM) and Women in Computing Sciences (WiCS).

## Advanced Placement

The Computer Science Advanced Placement Program test may be used to satisfy requirements. See Advanced Placement Credit Policy on the Department of Computer Science website.

## Learning Outcomes

- Students understand the mathematical, logical, and theoretical foundations of computing.
- Students can analyze and compare the relative merits of alternative software designs and develop high-quality software systems.
- Students understand the fundamental principles of computer organization, system software, networks, and security.
- Students can apply computer science principles to a variety of problems, such as databases, data mining, and various fields of artificial intelligence (AI).
- Students understand social, professional, and ethical issues related to computing.

## Requirements

The Bachelor of Science with a major in computer science requires a minimum of 120 s.h., including at least 63 s.h. of work for the major. Students must maintain a grade-point average (GPA) of at least 2.00 in all courses for the major and in all UI courses for the major. A cumulative GPA of at least 2.00 is required for graduation. Students also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

The Bachelor of Science program is more rigorous than that of the Bachelor of Arts program; it is designed to provide in-depth training for students who would like to acquire strength in math and science in
order to enhance their skills and job prospects. It also is appropriate for those who plan to pursue graduate work in computer science, although it is not required for graduate study at most universities.

Coursework for the major includes computer science courses as well as courses in mathematics, statistics, and other supporting disciplines. Work for the major may not be taken pass/nonpass.

Bachelor of Science students with a computer science major should choose their GE CLAS Core Natural Sciences courses carefully since they may be able to use the same courses to satisfy the computer science major natural science sequences requirement; see "Natural Science Sequences" below.

Students who major in computer science may not also major or minor in computer science and engineering, data science, or informatics.

## Departmental Residency Requirement

Students who earn a BS in computer science must complete at least seven courses (minimum of 21 s.h.) at the University of Iowa from the following: CS:2630 Computer Organization or ECE:3350 Computer Architecture and Organization, CS:2820 Introduction to Software Development, CS:3330 Algorithms, and at least four computer science courses numbered CS:3620-CS:5899, but excluding CS:3910 Informatics Project, CS:3980 Topics in Computer Science I, and CS:4310 Design and Implementation of Algorithms; these courses are requirements for the BS in computer science as listed below.

## Program Requirements

The BS with a major in computer science requires the following coursework. Many courses for the major require a minimum grade of C-minus in the prerequisite courses.

| Requirements | Hours |
| :--- | :--- |
| Computer Science Core Courses | $27-28$ |
| Mathematics Core Courses | $15-16$ |
| Computation Theory Course | 3 |
| Advanced Technical Electives | 12 |
| Natural Sciences Sequences Courses | $6-8$ |

## Computer Science Core

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Computer Science I: | 4 |
| CS:1210 | Fundamentals |  |
| CS:2210 | Discrete Structures | 3 |
| CS:2230 | Computer Science II: Data <br>  <br> Structures | 4 |
| CS:2820 | Introduction to Software <br> Development | 4 |
| CS:3330 | Algorithms |  |
| CS:3820 | Programming Language <br> Concepts | 3 |
| One of these: | Computer Organization | 3 |
| CS:2630 | Computer Architecture and <br> ECE:3350 | Organization |

## Mathematics Core

## Calculus I

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  | 4 |
| MATH:1550 | Engineering Mathematics I: |  |
| Single Variable Calculus | 4 |  |

Calculus II

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  | 4 |
| MATH:1560 | Engineering Mathematics II: | 4 |
| MATH:1860 | Multivariable Calculus | 4 |

## Linear Algebra

Students who take MATH:2550 Engineering Mathematics III: Matrix Algebra and MATH:2560 Engineering Mathematics IV: Differential Equations can use these courses together to satisfy the linear algebra requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| MATH:2700 | Introduction to Linear Algebra | 4 |

Probability and Statistics

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: | Probability and Statistics for |  |
| STAT:2020 | Sciences | 3 |
| STAT:3120 | Probability and Statistics |  |

## Computation Theory

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  | 3 |
| CS:4330 | Theory of Computation | 3 |
| CS:4350 | Logic in Computer Science | 3 |

## Advanced Technical Electives

Students must earn at least 12 s.h. (four courses) in advanced technical electives, as follows.
Course \# Title Hours

At least 6 s.h. from these:
A computer science course (prefix CS) numbered
3620-5899, except CS:3910, CS:3980, and CS:4310;
a maximum of 3 s.h. in CS:3990 will count toward the requirement
A computer science course (prefix CS) numbered 5900
or above, with department approval
Remaining courses may be chosen from advanced technical elective courses in computer science (prefix CS) or in other disciplines with department approval; the following are preapproved technical electives.

## ACTS:3080

## STAT:4100

STAT:4101
Mathematics of Finance I

Natural Science Sequences
Students take two or more courses in a sequence (totaling at least 6 s.h.) in a cognate area of natural science. The natural science sequence is intended to enhance a student's perspective by providing a deeper understanding of the scientific method. Typically, it consists of a sequence of courses taken in the same science department. Students often choose courses that also fulfill the GE CLAS Core [p. 19] Natural Sciences requirement. Some possible choices are listed below; the director of undergraduate studies may approve others.
CLEP/AP credit may be used to satisfy part or all of the natural science requirement only if the appropriate science department at the University of Iowa accepts the credit as equivalent to one or more of the specific courses listed below.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Astronomy | Fundamental Astronomy I: The |  |
| ASTR:1771 | Solar System and Exoplanets | 4 |
| ASTR:1772 | Fundamental Astronomy II: <br> Evolution of Stars, Galaxies, <br> and the Universe | 4 |
| Biology | Foundations of Biology |  |
| BIOL:1411 | Diversity of Form and Function |  |
| BIOL:1412 | Principles of Chemistry I |  |
| Chemistry | Principles of Chemistry II | 4 |
| CHEM:1110 | Introduction to Earth Science | 4 |
| CHEM:1120 | Introduction to Geology | 4 |
| Earth and Environmental Sciences |  |  |
| EES:1030 | Introduction to Environmental <br> or EES:1050 <br> EES:1080 | 4 |
| Science |  |  |

## Early Admission to the Graduate College

Undergraduate computer science students who have 6 s.h. or less to earn toward graduation may apply for early admission to the Graduate College. Early admission allows students in their final undergraduate semester to take courses for graduate credit in addition to the courses they need to complete their bachelor's degrees.

## Combined Programs

## BS/MCS

Qualified computer science undergraduate students who plan to earn the Master of Computer Science degree may apply for the combined Bachelor of Science/Master of Computer Science program. The combined BS/MCS program allows students to earn both degrees
in five years. The program requires a total of 140 s.h. Students are granted a BS when they complete all requirements for the undergraduate degree.

Students in the combined program must complete all requirements for each degree, but may count a maximum of 12 s.h. (four courses) toward both degrees. The four courses must be taken during the fourth year of undergraduate study, after admission to the combined program, and must satisfy degree requirements of both the BS and the MCS.
If students withdraw from the combined program before completing their bachelor's degree, credit earned in the four courses is counted only toward the undergraduate degree.

Students apply for admission to the combined program during their third year as an undergraduate and enter the program at the beginning of their fourth year. They typically complete the combined program comfortably in one year after completing the BS requirements.
Applicants to the combined program must:

- be enrolled as a BS student majoring in computer science at the University of Iowa;
- have completed a minimum of 80 s.h. at the time of admission to the combined program, with at least 30 s.h. earned at the University of Iowa; and
- have a cumulative University of Iowa grade-point average (GPA) of at least 3.25 and a GPA of at least 3.25 in the computer science major (computed on math prerequisites and core computer science coursework taken at the University of Iowa).
Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
Students must submit an application for admission to the program, a statement of purpose, three letters of recommendation, and transcripts from all colleges attended; they also must apply to the Graduate College. Graduate Record Examination (GRE) scores are not required. For more detailed information, see Graduate Programs on the Department of Computer Science website.

## Honors

## Honors in the Major

Students majoring in computer science have the opportunity to graduate with honors in the major. They must maintain a minimum UI cumulative grade-point average (GPA) of 3.33 and a minimum major GPA of 3.50; additionally, students complete 4-6 s.h. of CS:3990 Honors in Computer Science or Informatics and submit an acceptable honors thesis or project. At any time, students can communicate to the computer science professional advisor that they have an honors interest and can have that designation placed on their academic record.
A student is responsible for finding a faculty member willing to supervise the honors project. The student can register for CS:3990 Honors in Computer Science or Informatics under the project supervisor's name once the faculty member approves the proposed project and a timetable for the work. Once that is accomplished, the student must then communicate with the Department of Computer Science honors director, who changes the student's status to denote the student is pursuing honors in the major. It is not necessary to have declared an honors interest before finding a thesis supervisor and beginning to pursue honors in the major, but the student must be coded as pursuing honors prior to completing the application for degree.
An honors project can be completed in one semester, but it usually takes two semesters to complete. In their final semester, a student must register for CS:3999 Computer Science or Informatics Honors

Cohort. The honors thesis/project must be approved by the thesis supervisor and then submitted to the honors director who will give initial approval that the student can graduate with honors in the major. Final approval is given after final grades are submitted and all requirements are met. For more details regarding project requirements, see Honors in Computer Science on the department's website.

Students who pursue honors in the major may count a maximum of 3 s.h. in CS:3990 Honors in Computer Science or Informatics toward the advanced technical elective requirement. Those in the combined BS/MCS program may register for 4-6 s.h. in CS:5990 Individualized Research or Programming Project instead of CS:3990; this registration allows them to receive graduate credit for the course while satisfying the course requirements to graduate with honors.

## University of Iowa Honors Program

In addition to honors in the major, students can pursue honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.
Membership in the UI Honors Program is not required to earn honors in the computer science major. However, the semester hours earned in CS:3990 Honors in Computer Science or Informatics or CS:5990 Individualized Research or Programming Project can be used to partially satisfy the UI Honors requirement of 12 s .h. of experiential learning coursework.

For more information, contact the Department of Computer Science honors director.

## Career Advancement

Computer science graduates work primarily in two market sectors. One sector is the software and computer industry where the words computer science are being used-those in Silicon Valley, among other areas, that can range from start-ups to giants like Amazon, Google, Facebook, and Microsoft. The other sector allows computer science students to use their technical expertise in fields beyond computer science. Examples would be working as a user experience (UX) designer for a marketing agency or developing software for a financial group; there are computer science majors working in media, health care, the government, and even in law firms. Computer science skills are needed everywhere so students have ample opportunities to find an environment that fits their interests and strengths.

As many as one-third of computer science graduates go into research or elect to pursue graduate studies in computer science, including the University of Iowa's five-year BS/MCS program, or pursue other areas where computer science provides a strong foundation.
A recent job placement survey indicates that more than $97 \%$ of computer science graduates have a job, are continuing education, or are not seeking employment within six months of graduation.

View post-graduation data on the Pomerantz Career Center website that uses University of Iowa placement information to explore what recent computer science alumni are doing that includes median salaries, job titles, companies of employment, and other facts about UI graduates.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The Four-Year Graduation Plan is not available to BS students majoring in computer science. Students work with their advisors on individual graduation plans.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Computer Science, BS

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Enrollment in this course requires completion of a placement exam.
c Enrollment in math courses requires completion of a placement exam.
d Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
f Students may take CS:2630, CS:2820 and CS:3330 in any order after completing CS:1210, CS:2210, and CS:2230.
g Required math electives include (1) MATH:2700 and (2) STAT:2020 or STAT:3120
h Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
i Students may choose a computer science course (prefix CS) numbered 3620-5899, except CS:3910, CS:3980 and CS:4310, or a CS course numbered 5900 or above with department approval. A course used to complete a core requirement cannot also be used as a major elective.
j The BS in computer science requires a 6-8 s.h., two-semester sequence science cognate. Select courses approved to meet the major requirement may also be used to meet the GE CLAS Core Natural Science requirement. See your academic advisor for additional information.
k Students may choose a computer science course (prefix CS) numbered 3620-5890, except CS:3910, CS:3980 and CS:4310, or a CS course numbered 5900 or above with department approval. A course used to satisfy a core requirement cannot also be used as an advanced major elective. Alternatively, students may take a course in other disciplines with department approval. See academic advisor for additional information.
1 Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Informatics, BS

The major in informatics provides students with the necessary training for employment in careers such as software development, user experience, and data analytics. It provides good preparation for graduate study in a variety of disciplines.
Students may declare a major in informatics when they are admitted to the university or afterward. All students begin the majors as Bachelor of Arts students but may switch to the Bachelor of Science program at any time.

The informatics major combines fundamental and practical computing knowledge with a choice of cognate areas from the liberal arts and sciences, providing students with the necessary background and specialized skills to work at the interface of computing and another discipline. Students may begin the major without a chosen cognate area; they may declare a cognate at any time. Some cognates are available only with the Bachelor of Arts, others are available only with the Bachelor of Science. A student's choice of cognate determines whether the student will earn a BA or a BS.

Informatics majors are advised at the Academic Advising Center until they have completed 30 s.h., at which point they are assigned a departmental advisor. Students being advised at the Academic Advising Center also can consult with an informatics faculty advisor.

Transfer students who have taken a course approved as equivalent to a required informatics or computer science course are exempt from that course. Transfer course grades are included in the informatics gradepoint average.
Students should consult the Department of Computer Science website or visit the department's office for information about general policies, elective areas, and internships, scholarships, and student groups, such as the university's chapter of the Association for Computing Machinery (ACM) and Women in Computing Sciences (WiCS).

Many informatics major courses are offered once per year and have prerequisites that are also only offered annually. Speak with an advisor for more information.

## Advanced Placement

The Computer Science Advanced Placement (AP) exam may be used to satisfy requirements. See Advanced Placement Credit Policy on the Department of Computer Science website.

## Learning Outcomes

- Students can apply computational thinking approaches to solve problems.
- Students can individually and collaboratively develop software using professional tools.
- Students can extract, organize, analyze, and present data from a variety of sources.
- Students can contribute to the development of usable, useful, and enjoyable software applications by using human-centered methods.
- Students understand social, professional, and ethical issues related to computing.
- Students have a thorough understanding of a chosen cognate area.

## Requirements

The Bachelor of Science with a major in informatics requires a minimum of $120 \mathrm{~s} . \mathrm{h}$., including at least 55-60 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. A cumulative GPA of at least 2.00 is required for graduation. Students
also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].
The program combines foundational informatics coursework with coursework in a cognate area. The major offers the cognate areas of bioinformatics, medical informatics, and individualized cognates. Required credit for the major depends on a student's choice of cognate area.

Students who major in informatics may not also major in computer science, business analytics and information systems, or computer science and engineering. They may, however, earn a minor in computer science.
Coursework for the major includes the informatics core, two electives, a statistics course, and a set of courses in the chosen cognate area. Work for the major may not be taken pass/nonpass. Students are expected to have taken MATH:1005 College Algebra or the equivalent.

## Departmental Residency Requirement

Students must complete at least five courses (minimum of 15 s.h.) at the University of Iowa from the following: CS:3910 Informatics Project and four additional courses numbered CS:2500-CS:4999; these courses are requirements for the BS in informatics as listed below.

## Program Requirements

The BS with a major in informatics requires the following coursework. Many courses for the major require a minimum grade of C-minus in prerequisite courses.

| Requirements | Hours |
| :--- | :--- |
| Informatics Core Courses | 19 |
| Informatics Electives | 6 |
| Statistics Course | $3-4$ |
| Cognate Courses | $27-31$ |

## Informatics Core

The informatics core consists of six required computing courses (19 s.h.) that emphasize data manipulation, databases, and networking. It provides more applications-oriented content than the traditional computer science curriculum yet is designed to offer students a sound basis in underlying computer science themes and techniques.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| All of these: |  |  |
| CS:1110 | Introduction to Computer |  |
| Science | 3 |  |
| $\mathrm{CS}: 2110$ | Programming for Informatics | 4 |
| $\mathrm{CS}: 2420$ | Analyzing Data for Informatics | 3 |
| $\mathrm{CS}: 2520$ | Human-Computer Interaction <br> for Informatics | 3 |
| $\mathrm{CS}: 2620$ | Server-Side Development for <br> Informatics | 3 |
| $\mathrm{CS}: 3910$ | Informatics Project | 3 |

## Informatics Electives

Students must complete at least two courses ( 6 s.h.) from a list of approved computing informatics electives. Course selection must be approved by an informatics advisor. In addition to the courses listed below, students may have additional choices from the Department of Electrical and Computer Engineering and the Department of Business Analytics; consult an informatics faculty advisor for additional choices.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| BAIS:4220 | Advanced Database <br> Management and Big Data | 3 |
| A computer science course (prefix CS) numbered 3000-4999, including CS:3990 for 3 s.h., but excluding CS:3910 and CS:4510 |  |  |
| Statistics Course |  |  |
| Students must complete one introductory statistics course. Some cognates require a specific statistic course. Students should consult with their advisors to choose a statistics course appropriate for their cognate area. |  |  |
| Course \# | Title | Hours |
| One of these: |  |  |
| SOC:2160 | Applied Statistics for Social Scientists | 3 |
| STAT:1020 | Elementary Statistics and Inference | 3 |
| STAT:1030 | Statistics for Business | 4 |
| STAT:2010 | Statistical Methods and Computing | 3 |
| STAT:2020 | Probability and Statistics for the Engineering and Physica Sciences | 3 |
| STAT:3120 | Probability and Statistics | 4 |
| STAT:3510 | Biostatistics | 3 |
| STAT:4143 | Introduction to Statistical Methods | 3 |

## Cognates

Students must complete all requirements listed under one of the cognate areas below: bioinformatics, medical informatics, or an individualized cognate.

## Bioinformatics

The informatics major with the bioinformatics cognate requires a minimum of $58 \mathrm{~s} . \mathrm{h}$. of work for the major, including at least $30 \mathrm{~s} . \mathrm{h}$. in cognate courses. The bioinformatics cognate is intended for students interested in applications of computing to the biological sciences. It may lead to careers in laboratory research, biotechnology, data management, and other related areas. It also may prepare students for graduate programs in bioinformatics or genetics. Cognate courses are drawn primarily from biology and chemistry.

Students who choose the bioinformatics cognate must satisfy the major's statistics requirement with either STAT:2010 Statistical Methods and Computing or STAT:3510 Biostatistics.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| BIOL:1411 | Foundations of Biology | 4 |
| BIOL:1412 | Diversity of Form and Function | 4 |
| CHEM:1110 | Principles of Chemistry I | 4 |
| CHEM:1120 | Principles of Chemistry II | 4 |
| BIOL:2512 | Fundamental Genetics | 4 |
| BIOL:3172 | Evolution | 4 |
| Two of these: |  |  |
| BIOL:2673 | Ecology | 3 |
| BIOL:3212 | Bioinformatics for Beginners | 3 |
| BIOL:3314 | Genomics | 3 |

## Medical Informatics

The informatics major with the medical informatics cognate requires a minimum of 56 s.h. of work for the major, including at least 28 s.h. in cognate courses. The medical informatics cognate is intended for students interested in applications of computing to health care, especially in a clinical setting. It may lead to careers in medical or hospital settings, graduate programs in medical informatics, or professional degree programs in medicine, dentistry, nursing, or other allied health professions. Cognate courses are drawn from biology, chemistry, health and human physiology, and public health.
Students who choose the medical informatics cognate must satisfy the major's statistics requirement with either STAT:2010 Statistical Methods and Computing or STAT:3510 Biostatistics.

## Individualized Cognates

Individualized cognates may be drawn primarily from one department or an appropriate mix of departments; they require an approved set of cognate courses totaling 27-31 s.h. Students interested in developing individualized cognates should contact the Department of Computer Science for the name of an informatics faculty advisor.

## Early Admission to the Graduate College

Undergraduate informatics students who have 6 s.h. or less to earn toward graduation may apply for early admission to the Graduate College. Early admission allows students in their final undergraduate semester to take courses for graduate credit in addition to the courses they need to complete their bachelor's degrees.

## Combined Programs

## BS/MS in Informatics (Geoinformatics or Health Informatics or HumanComputer Interaction Subprogram)

Students majoring in informatics who are interested in earning a master's degree in informatics may apply to the combined BS/MS program (geoinformatics or health informatics or human-computer interaction subprogram) offered by the College of Liberal Arts and Sciences and the Graduate College. The program enables students to begin the study of informatics before they complete their bachelor's degree. Students are able to complete both degrees in less time than if they were to complete the two degrees separately.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information about the graduate
degree program, see the MS in informatics [p. 1653] (Graduate College) in the catalog.

## Honors

## Honors in the Major

Students majoring in informatics have the opportunity to graduate with honors in the major. They must maintain a minimum UI cumulative grade-point average (GPA) of 3.33 and a minimum major GPA of 3.50; additionally, students complete 4-6 s.h. of CS:3990 Honors in Computer Science or Informatics and submit an acceptable honors thesis or project. At any time, students can communicate to the computer science professional advisor that they have an honors interest and can have that designation placed on their academic record.

A student is responsible for finding a faculty member willing to supervise the honors project. The student can register for CS:3990 Honors in Computer Science or Informatics under the project supervisor's name once the faculty member approves the proposed project and a timetable for the work. Once that is accomplished, the student must then communicate with the Department of Computer Science honors director, who changes the student's status to denote the student is pursuing honors in the major. It is not necessary to have declared an honors interest before finding a thesis supervisor and beginning to pursue honors in the major, but the student must be coded as pursuing honors prior to completing the application for degree.

An honors project can be completed in one semester, but it usually takes two semesters to complete. In the final semester, a student must register for CS:3999 Computer Science or Informatics Honors Cohort. The honors thesis/project must be approved by the thesis supervisor and then submitted to the honors director who will give initial approval that the student can graduate with honors in the major. Final approval is given after final grades are submitted and all requirements are met. For more details regarding project requirements, see Honors in Computer Science on the department's website.

## University of Iowa Honors Program

In addition to honors in the major, students can pursue honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.
Membership in the UI Honors Program is not required to earn honors in the informatics major. However, the semester hours earned in CS:3990 Honors in Computer Science or Informatics can be used to partially satisfy the UI Honors requirement of $12 \mathrm{~s} . \mathrm{h}$. of experiential learning coursework.

For more information, contact the Department of Computer Science honors director.

## Career Advancement

Informatics graduates work in a broad range of market sectors, reflecting the interdisciplinary nature of the program and the large number of available cognates. Students will have technical skills along with a specialty area that can help them pursue a specific type of organization or interest field. Here are just a few of the areas that informatics graduates have pursued: software development, database and/or web administration, data analysis, software support (IT), user interface/user experience design (the human-computer interaction cognate is useful for this area), and health care information (the health informatics cognate is useful for this area).
A recent job placement survey indicates that more than $90 \%$ of University of Iowa informatics graduates have a job, are continuing
education, or are not seeking employment within six months of graduation.

View post-graduation data on the Pomerantz Career Center website, which uses University of Iowa placement information to explore what recent informatics alumni are doing, including median salaries, job titles, companies of employment, and other facts about UI graduates.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The Four-Year Graduation Plan is not available to BS students majoring in informatics. Students work with their advisors on individual graduation plans.

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Computer Science, Minor

## Requirements

The undergraduate minor in computer science requires a minimum of 17 s.h. in computer science coursework, including 12 s.h. in courses taken at the University of Iowa. Students must maintain a gradepoint average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass. Students excused from courses required for the minor may substitute other computer science electives. Many of the prerequisite courses that must be taken before registering for minor courses require grades of at least C -minus.

Students who major in informatics may earn a minor in computer science. Students majoring in computer science, computer science and engineering, or data science may not minor in computer science.
The minor in computer science requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| CS:1210 | Computer Science I: | 4 |
| CS:2210 | Fundamentals | 3 |
| CS:2230 | Computer Science II: Data <br> Structures | 4 |
| CS:3330 | Algorithms | 3 |
| One of these: | Programming Languages and |  |
| CS:3210 | Tools | 3 |
| CS:3980 | Topics in Computer Science I | 3 |

Students who have completed ENGR: 1300 Introduction to Engineering Computing and ENGR:2730 Computers in
Engineering are considered to have satisfied the minor's requirement for CS: 1210 Computer Science I: Fundamentals.

Students may declare the computer science minor on MyUI, and they may request an audit for the minor through MyUI.

## Informatics, Minor

## Requirements

The undergraduate minor in informatics requires a minimum of 16 s.h., including at least 12 s.h. in courses taken at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.
Students who major in computer science, data science, computer science and engineering, electrical engineering (computer track), or business analytics and information systems may not earn a minor in informatics.

The minor in informatics requires the following coursework. Many courses for the minor require a minimum grade of C -minus in prerequisite courses.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Both of these: |  |  |
| CS:1110 | Introduction to Computer Science | 3 |
| CS:2110 | Programming for Informatics | 4 |
| Two of these: |  |  |
| CS:2420 | Analyzing Data for Informatics | 3 |
| CS:2520 | Human-Computer Interaction for Informatics | 3 |
| CS:2620 | Server-Side Development for Informatics | 3 |
| One of these: |  |  |
| PSY:2811 | Research Methods and Data Analysis in Psychology I | 3 |
| STAT:1020 | Elementary Statistics and Inference | 3 |
| STAT:1030 | Statistics for Business | 4 |
| STAT:2010 | Statistical Methods and Computing | 3 |
| STAT:2020 | Probability and Statistics for the Engineering and Physical Sciences | 3 |
| STAT:3120 | Probability and Statistics | 4 |
| STAT:3510 | Biostatistics | 3 |
| STAT:4143 | Introduction to Statistical Methods | 3 |

Students may declare the informatics minor on MyUI, and they may request an audit for the minor through MyUI.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Informatics, Minor

Course
Academic Career
Any Semester
The informatics minor requires a minimum of 16 s.h. of coursework, including at least 12 s.h. of courses taken at the University of Iowa.
Students must earn a C-minus minimum grade in prerequisite courses to advance to the subsequent course.
Several informatics courses are offered only in the fall or spring terms.
For assistance sequencing the minor given the irregular course offerings and prerequisite structure, see the computer science departmental advisor.

## Master of Computer Science, MCS

The Master of Computer Science (MCS) is a course-based program for students who wish to enhance their careers with advanced knowledge of computer science. The MCS program does not include a thesis requirement.

Current and prospective graduate students should consult the Computer Science Graduate Handbook, available from the department's office and its website. The handbook provides detailed information about specific degree requirements, such as required courses, examinations, and dissertation requirements.

## Learning Outcomes

Students gain:

- in-depth and up-to-date knowledge of concepts and/or technologies covering a breadth of computer science;
- problem-solving expertise in the context of the areas covered;
- a grounding in theoretical aspects of computer science; and
- exposure to cutting-edge research.

## Requirements

The Master of Computer Science (MCS) requires a minimum of 32 s.h. of graduate credit, including at least 24 s.h. earned at the University of Iowa. Students must maintain a cumulative grade-point average of at least 2.75 . Consult the Computer Science Graduate Handbook for detailed information about MCS requirements and graduate study policies.

The Master of Computer Science requires the following coursework.

## Theory

| Course \# <br> One of these: | Title | Hours |
| :--- | :--- | ---: |
| CS:4330 | Theory of Computation | 3 |
| CS:4350 | Logic in Computer Science | 3 |
| CS:4980 | Topics in Computer Science <br> II (if topic is approved by the | 3 |
|  | director of graduate studies) |  |
| CS:5340 | Limits of Computation | 3 |
| CS:5350 | Design and Analysis of <br> Algorithms | 3 |
| CS:5360 | Randomized Algorithms | 3 |
| CS:5370 | Computational Geometry | 3 |
| CS:5850 | Programming Language | 3 |
| CS:5860 | Foundations |  |
|  | Lambda Calculus and <br> Applications | 3 |

## Algorithms

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Design and Implementation of <br> Algorithms | 3 |
| CS:4310 | Al |  |

## Colloquium

Students are graded on a satisfactory/unsatisfactory (S/U) basis. They must attend at least $80 \%$ of scheduled talks to earn a satisfactory grade in the course.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Research Seminar: Colloquium <br> CS: $: 6000$ | 2 |

## Electives

Students complete their remaining 24 s.h. (eight additional courses) with a combination of computer science graduate courses, research and project courses, and non-computer science graduate courses approved by their advisor. The choice of electives must satisfy the following constraints.

- At least six courses (18 s.h.) must be classroom-based computer science graduate courses numbered 4300 or above, excluding CS:5110 Introduction to Informatics, CS:5990 Individualized Research or Programming Project, CS:6000 Research Seminar: Colloquium Series, CS:6990 Readings for Research, and CS:7990 Research for Dissertation.
- At most, one offering of CS:5990 Individualized Research or Programming Project. This course is an excellent option for students interested in exploring an area in computer science beyond that provided by computer science classroom-based courses. Students interested in pursuing a PhD usually benefit from taking CS:5990.
- At most, two technical courses (approved by the advisor) that are not computer science graduate courses. For students who want to take courses outside the department, those in mathematics, statistics, electrical engineering, industrial engineering, and management sciences are some popular options. Students also may include one computer science course taken during their first year in the MCS program from these: CS:3620 Operating Systems, CS:3640 Introduction to Networks and Their Applications, or CS:3820 Programming Language Concepts.

## Software Engineering Subprogram

The Department of Computer Science, with the Department of Electrical and Computer Engineering, offers an MCS subprogram in software engineering. Students receive a software engineering subprogram designation on their transcript after they complete CS:5800 Fundamentals of Software Engineering, CS:5810 Formal Methods in Software Engineering, CS:5820 Software Engineering Languages and Tools, and CS:5830 Software Engineering Project, and earn their MCS degree. Students should meet with the academic services coordinator to file the appropriate paperwork when they apply for the degree if they did not originally declare their intent to complete the software engineering subprogram.

## Admission

Admission decisions are based on prior academic performance, letters of reference, and the applicant's statement about background and purpose. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

A version of the BA/MCS combined program is now available for Grinnell College undergraduate students pursuing a BA degree in computer science who want to earn the MCS at the University of Iowa.

## Career Advancement

Students pursue software design and development careers in the technology sector, including UIX, mobile, and web development. Recent graduates hold positions at technology giants such as Microsoft, Google, Yahoo, or Intel, while others have taken positions in internationally established organizations whose primary business lies in the consulting, financial, health care, insurance, or media/ entertainment sectors. A few MCS students enter the start-up market or pursue additional graduate education leading to the PhD at the University of Iowa or elsewhere.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Master of Computer Science, MCS

Course Title Hours

Academic Career

## Any Semester

32 s.h. must be graduate level coursework; up to 8 s.h. of graduate transfer credits allowed upon approval. Students choose graduate level coursework from an approved list of courses; more information is included in the General Catalog and on department website. ${ }^{\text {a }}$

| Second Year |  |  |
| :--- | :--- | ---: |
| Fall |  | 3 |
| Elective course (possibly non-CS technical course) ${ }^{\text {c }}$ | 3 |  |
| Elective course ${ }^{\text {c }}$ |  | 3 |
| Elective course ${ }^{\text {c }}$ |  | $\mathbf{9}$ |
|  | Hours |  |
| Spring |  | 1 |
| CS:6000 | Research Seminar: Colloquium Series ${ }^{\text {b }}$ | 3 |
| Elective course ${ }^{\text {c }}$ |  | $\mathbf{4}$ |
| Final Exam ${ }^{\text {e }}$ |  | $\mathbf{3 2}$ |

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the

Graduate College website and the Manual of Rules and Regulations for more information.
b Students must enroll twice for $1 \mathrm{~s} . \mathrm{h}$. each semester and attend at least $80 \%$ of scheduled talks for a satisfactory grade.
c See General Catalog and department website for specifics about elective coursework requirements; at least 18 s.h. must be computer science graduate coursework numbered 4300 or above; remaining 6 s.h. may be a combination of CS or non-CS graduate coursework, research and project courses.
d See General Catalog and department website for list of approved courses.
e Confirm completion of degree requirements

## Computer Science, MS

The Master of Science in computer science is offered only to students working toward the PhD in computer science. Students who are interested primarily in a master's degree and who do not intend to pursue a more advanced degree should apply to the Master of Computer Science [p. 323] (MCS) program. Students are not directly admitted to this degree program. For more information about program admission options, please contact the program.

Current and prospective graduate students should consult the Computer Science Graduate Handbook, available from the department's office and its website. The handbook provides detailed information about specific degree requirements, such as required courses, examinations, and dissertation requirements.

## Learning Outcomes

Students gain:

- broad, up-to-date knowledge of computer science;
- fluency at reading, analyzing, synthesizing, and communicating research;
- a good understanding of a research area, its methods, and major open problems; and
- awareness of computing research ethics.

## Requirements

Students should view the requirements for the PhD in computer science [p. 326] program since the MS is offered only to students working toward the PhD in computer science.

## Admission

The Department of Computer Science does not admit students to the Master of Science degree program; only to the Master of Computer Science (MCS) or Doctor of Philosophy (PhD) degree programs. Students who are interested primarily in a master's degree and who do not intend to pursue a more advanced degree should apply to the Master of Computer Science [p. 323] (MCS) program.

## Computer Science, PhD

The Doctor of Philosophy program in computer science emphasizes preparation for research and teaching in academic settings or for research in private, industrial, or government laboratories.

Current and prospective graduate students should consult the Computer Science Graduate Handbook, available from the department's office and its website. The handbook provides detailed information about specific degree requirements, such as required courses, examinations, and dissertation requirements.

## Learning Outcomes

Students gain:

- broad, up-to-date knowledge of computer science;
- fluency in reading, analyzing, synthesizing, and communicating research;
- a thorough understanding of a research area and its major open problems;
- awareness of computing research ethics; and
- experience performing original research advancing the state of knowledge in an area of computer science.

## Requirements

The Doctor of Philosophy program in computer science requires a minimum of 72 s.h. of graduate credit, four examinations (qualifying, comprehensive, dissertation proposal, and final), and a written dissertation. Students must maintain a cumulative grade-point average of at least 3.00. Consult the Computer Science Graduate Handbook for detailed information about PhD requirements and graduate study policies.
Basic PhD requirements are as follows.

## Core Requirements

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Design and Analysis of <br> Algorithms | 3 |
| CS:5350 | Theory of Computation | 3 |
| And one of these: | Limits of Computation | 3 |

## Breadth

Students must complete at least three of the following courses, with at least one course selected from each area ( 9 s.h.).

## Systems and Software

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CS:4640 | Computer Security | 3 |
| CS:4980 | Topics in Computer Science | 3 |
| CS:5610 | II (section approved by the <br> director of graduate studies) |  |
|  | High Performance Computer <br> Architecture | 3 |

## Networks and Distributed Systems

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CS:4980 | Topics in Computer Science | 3 |
|  | II (section approved by the |  |
|  | director of graduate studies) |  |

Distributed Systems and

Cloud Computing Technology
Programming Languages and Compilers

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CS:4980 | Topics in Computer Science <br> II (section approved by the <br> director of graduate studies) | 3 |
| CS:5810 | Formal Methods in Software <br> Engineering | 3 |
| CS:5850 | Programming Language <br> Foundations | 3 |
| CS:5860 | Lambda Calculus and <br> Applications | 3 |

With departmental approval, new courses or specific section offerings of CS:4980 Topics in Computer Science II also may satisfy a given area requirement.

## Practice

Students must complete at least one 3 s.h. course with significant practical or implementation-oriented content. Each semester the department designates courses that satisfy this requirement. The following are typical selections.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CS:4400 | Database Systems | 3 |
| CS:4420 | Artificial Intelligence | 3 |
| CS:4440 | Web Mining | 3 |
| CS:4470 | Health Data Analytics | 3 |
| CS:4500 | Research Methods in Human- <br> Computer Interaction | 3 |
| CS:4630 | Mobile Computing | 3 |
| CS:4700 | High Performance and Parallel <br> Computing | 3 |
| CS:4720 | Optimization Techniques |  |
| CS:4980 | Topics in Computer Science II <br> (section approved by director of | 3 |
|  | graduate studies) | 3 |
| CS:5800 | Fundamentals of Software <br> Engineering | 3 |
| CS:5990 | Individualized Research or 3 <br>  Programming Project | 3 |
|  |  |  |

## Cognate Area

In consultation with their advisor, students are required to select three courses, totaling 9 s.h. or more, that constitute coherent coverage of an external cognate area; the courses need not be offered by the same department. Choices include, but are not limited to, mathematics, statistics, genetics, biology, and engineering disciplines.

## Colloquium

Students must earn at least 4 s.h. in the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CS:6000 | Research Seminar: Colloquium | 4 |
|  | Series (must enroll at least four <br> times) |  |

## Responsible Conduct of Research Requirement

Students must complete this course within their first two years; it is offered in spring semesters.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| CS:5980 | Topics in Computer Science | 1 s.h. |
|  | III (Responsible Conduct of |  |
|  | Research) |  |
|  |  |  |

## Electives

Students fill their remaining semester hours with a selection of computer science graduate courses numbered 4300 or above and graduate courses outside of the Department of Computer Science, approved by their advisor.

## Qualifying Exam

Students are required to pass a qualifying examination by the end of their second year of graduate study. Once students select a topic in consultation with their advisor, they are assigned a three-member faculty examination panel by the department. Then they prepare a written prospectus for review by the committee, followed by an oral presentation.

## Comprehensive Exam

The comprehensive examination is an evaluation of a student's mastery of a research area near completion of formal coursework, and before the preparation of the dissertation. The exam may be written, oral, or both, at the department's discretion, and is administered by a faculty committee. The comprehensive exam typically should be completed by the end of a student's third year and no later than the end of the fourth year in the PhD program.

## Dissertation Proposal

At least six months prior to the final exam, a student must form a dissertation committee and circulate a formal thesis proposal to the committee. The proposal should describe the research performed to date and related work, and outline the expected thesis results. A student must argue the originality and significance of the expected results to the committee in a manner consistent with the advisor's counsel, which may or may not include an oral presentation.

Possible outcomes of a thesis proposal are that the committee finds the proposal satisfactory; the committee suggests modifications, and within a few weeks after the proposal defense, the student and committee reach a consensus by email or in face-to-face meetings on a modified set of expected thesis results; or the committee asks the student to redo their proposal, likely with a fresh proposal document and oral presentation, giving the student enough time to address the committee's concerns.

## Dissertation

Each student must write a dissertation, a significant, original contribution to the field of computer science. The dissertation must be prepared in accordance with the format specified on the Graduate College Thesis and Dissertation website.

## Final Oral Examination

Once the dissertation is complete and has been reviewed by the student's committee, a final oral examination is administered. This examination must take place no sooner than the semester following the successful completion of the comprehensive examination and no later than five years after completion of the comprehensive exam.

## Admission

Admission decisions are based on prior academic performance, letters of reference, and the applicant's statement about background and purpose. Scores on the Graduate Record Examination (GRE) General Test are considered if applicants choose to include them. Students need not have a master's degree to begin the PhD program. Students admitted without a master's degree may choose to be granted an MS or the MCS while working toward the doctorate.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Career Advancement

Many graduates obtain positions in industry research laboratories, such as Amazon, Disney, Google, Samsung, and Yahoo, or in government research laboratories. Others pursue research and teaching careers in higher education, with some starting their careers in postdoctoral positions at universities before seeking employment in tenure-track positions, and some are employed as faculty with more teaching-oriented positions. A few recent PhD graduates have founded or joined start-up companies.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

| a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information. |  |  |
| b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA. |  |  |
| c Students must enroll four times for 1 s.h. each semester and attend at least $80 \%$ of scheduled talks for a satisfactory grade. <br> d Students must complete at least three courses ( 9 s.h.), with at least one course from each of the following areas: systems and software, networks and distributed systems, programming languages and |  |  |

compilers; see General Catalog and department website for list of approved courses.
e Students must complete this course during first two years; typically offered in spring semesters. Note: this course does not count toward degree requirements.
f Students must complete at least one course (3 s.h.) with significant practical or implementation-oriented content; see General Catalog and department website for list of approved courses.
g Taken before the end of second year; see General Catalog and department website for specifics.
$h$ In consultation with their advisor, students are required to select three courses, totaling 9 s.h. or more, that constitutes coherent coverage of an external cognate area\# the courses need not be offered by the same department. Choices include, but are not limited to, mathematics, statistics, genetics, biology, and engineering disciplines.
i See General Catalog and department website for specifics about elective coursework requirements; may be a combination of thesis hours, directed readings, or CS graduate or non-CS graduate coursework. Work with faculty advisor to determine appropriate graduate coursework and sequence.
j Taken before the end of third year; see General Catalog and department website for specifics.
k Usually takes place six months prior to doctoral final exam. 1 Oral dissertation defense.

## Creative Writing (Iowa Writers' Workshop)

## Director

- Lan Samantha Chang

Graduate degree: MFA in English
Faculty: https://writersworkshop.uiowa.edu/people
Website: https://writersworkshop.uiowa.edu/
The Creative Writing Program (Iowa Writers' Workshop) is a worldrenowned graduate program for fiction writers and poets. Founded in 1936, it was the first creative writing program in the United States to offer a degree, and it became a model for many contemporary writing programs. In addition to its Master of Fine Arts program, it also offers writing courses for undergraduates.

The Iowa Writers' Workshop has been home to thousands of remarkable writers, including Flannery O'Connor, Raymond Carver, Rita Dove, John Irving, James Alan McPherson, Philip Levine, Jane Smiley, Michael Cunningham, Sandra Cisneros, Denis Johnson, Jorie Graham, Ann Patchett, Lan Samantha Chang, D.A. Powell, Nathan Englander, Yiyun Li, Eleanor Catton, Angela Flournoy, Garth Greenwell, Yaa Gyasi, and Jamel Brinkley. The program's faculty and alumni include winners of virtually every major literary award, including seventeen winners of the Pulitzer Prize, six recent U.S. Poets Laureate, and numerous winners of the National Book Award, MacArthur Foundation Fellowships, and other major honors. In 2003, the Iowa Writers' Workshop received a National Humanities Medal from the National Endowment for the Humanities - the first awarded to a university and only the second given to an institution rather than an individual.

The Creative Writing Program offers courses for students from other programs of study; summer courses are open to undergraduate and graduate students.
To learn more about the Creative Writing Program's history and faculty, visit the Iowa Writers' Workshop website.

## Graduate Program of Study

## Major

- Master of Fine Arts in English [p. 330]

## Creative Writing-Writers' Workshop Courses

The Creative Writing Program offers courses for undergraduates as well as graduate students. Enrollment in some graduate-level courses requires admission to the MFA program. See "Courses" in the Department of English [p. 388] section of the catalog for course descriptions and prerequisites to enrollment.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CW:1200 | Creative Writing for Non- <br> Native English Speakers | 3 |
| CW:1800 | Creative Writing Studio |  |
|  | Workshop | 3 |
| CW:2100 | Creative Writing | 3 |

| CW:7890 | Graduate Project in Creative Writing | arr. |
| CW:7895 | MFA Thesis | arr. |

## English, MFA

The Creative Writing Program offers an MFA degree
Occasionally well-qualified PhD students in the Department of English may obtain permission to submit a creative dissertation for the doctoral degree; the Creative Writing Program assumes responsibility for granting permission for the option of the creative dissertation and for approving the dissertation once it is completed. Contact the director of graduate studies in the Department of English for more information.

## Learning Outcomes

Graduates will:

- develop expertise in the art of writing through practical, immersive engagement with techniques and principles of craft in fiction or poetry;
- build deep knowledge and broad appreciation of the literary landscape through immersive engagement with diverse literary traditions;
- gain practical experience teaching literature, rhetoric, and/or creative writing at the college level;
- create and revise a significant body of top-level creative work in fiction or poetry;
- develop a strong individual artistic vision; and
- gain exposure to a wide range of career options in both academic and non-academic literary disciplines.

## Requirements

The Master of Fine Arts degree in English (creative writing) requires $48 \mathrm{~s} . \mathrm{h}$. of graduate credit taken over four semesters in residence at the University of Iowa. Students specialize in fiction or poetry.
The program is flexible and individualized. Up to 18 s.h. of graduate transfer credit may be counted toward the degree; however, students must satisfy the residence requirement.

In addition to taking Creative Writing Program courses, many MFA students can choose courses offered by other University of Iowa departments and programs, such as the interdisciplinary Center for the Book [p. 1624] (Graduate College), and the departments of Theatre Arts [p. 1073] and English [p. 388] (College of Liberal Arts and Sciences).
Students must enroll in CW:7870 Fiction Workshop or CW:7875 Poetry Workshop during each semester of residence in the program. In each course, groups of $10-15$ students read and critique each other's work.
The program's seminars provide students with a thorough knowledge of their chosen literary form and related aspects of craft. Seminars include CW:7810 Form of Fiction, CW:7820 Form of Poetry, CW:7830 Seminar: Problems in Modern Fiction, and CW:7840 Seminar: Problems in Modern Poetry. Each focuses on a single aspect of modern poetry or fiction, such as a single writer's work or a body of work with a common theme or purpose.
During the second year of the program, each student must take the MFA examination, an essay exam that may be written outside of the classroom. Students enroll in CW:7895 MFA Thesis and submit their graduate thesis during the last semester; the thesis is a fiction or poetry manuscript of substantial length.

## Admission

Applicants to the Creative Writing Program (Iowa Writers' Workshop) must meet the program's admission requirements as well as those of
the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

A creative writing manuscript is the most important element of the application for admission to the workshop. Submissions for poetry should include 10-12 poems. Submissions for fiction should include two or three short stories, several sections of a novel, or a combination of those. Submissions are typically 30-80 double-spaced pages, and may not exceed 80 double-spaced pages.

Other application materials include a personal statement, official transcripts from all universities and colleges attended, the graduate application form, three letters of recommendation, an application for graduate awards, and an application to the Graduate College.

For detailed information on application materials and procedures, see How to Apply on the Iowa Writers' Workshop website.

## Financial Support

Financial assistance is available to Creative Writing Program students in the form of teaching assistantships, research assistantships, and fellowships. See Financial Aid on the Iowa Writers' Workshop website.

# Critical Cultural Competence 

Interim Director, School of Social Work

- Miriam J. Landsman

## Coordinator, Critical Cultural Competence

- Yolanda D. Spears (Social Work)

Undergraduate certificate: critical cultural competence
Website: https://socialwork.uiowa.edu/undergraduate/certificate-critical-cultural-competence

The certificate program helps students develop an appreciation for their own cultural identities. It also helps them become critically selfreflective in their orientation to differences in other people's cultural identities as defined by matters such as race, ethnicity, gender, class, abilities, age, and sexual orientation.
Certificate students build the knowledge, skills, and attitudes they will need in order to increase their effectiveness in relating to others across cultural differences and in domestic and international environments that are increasingly diverse.

Students who complete the certificate program develop:

- a greater appreciation of cultural differences;
- increased ability to interact with individuals of diverse backgrounds;
- a philosophy of treating people fairly, equitably, and thoughtfully;
- critical self-reflection and awareness of their own culture;
- ability to assess and understand culture-related privilege and disprivilege;
- concern with issues of power and privilege, and social justice; and
- learn marketable skills that will give them a competitive edge in their future endeavors.

Students can schedule a meeting with their advisor or the coordinator of the certificate to determine how earning the certificate will add vital skillsets to their major/degree.
The Certificate in Critical Cultural Competence is administered by the School of Social Work [p. 977].

## Programs

## Undergraduate Program of Study

## Certificate

- Certificate in Critical Cultural Competence [p. 332]

## Courses

## Critical Cultural Competence Courses

CCCC:2220 Foundations of Critical Cultural Competence 3 s.h.
Experiential and theoretical foundation; cultural competence as a concept and practice; conceptual frameworks and models for understanding cultural differences and similarities within, among, and between groups of people with whom others interact in their professional, personal, public, and private lives; appreciating differences while learning to be self-reflective; adjustment of perceptions, behaviors, styles for effective interaction with people from different ethnic, racial, sexual, gender, age, ability, and class groups. GE: Diversity and Inclusion.

## CCCC:4490 Integrative Seminar in Critical Cultural

 Competence 3 s.h.Capstone course; application of knowledge to one's areas of study; community settings where cultural competence is required; challenges and benefits of behaving in culturally competent ways in varied contexts; review and critique of educational experiences in the certificate program; development of skills in community education related to cultural competence; group project to benefit the university and/or community; development of a plan to integrate critical cultural competence into careers. Requirements: completion of other required certificate courses.

## Critical Cultural Competence, Certificate

## Requirements

The undergraduate Certificate in Critical Cultural Competence requires 18 s.h. of coursework. Students must maintain a grade-point average of at least 2.00 in work for the certificate. Ideally, students begin the certificate during their second year of undergraduate study.
The certificate may be earned by any student admitted to the University of Iowa who is not enrolled in a UI graduate or professional degree program. Undergraduate to Graduate (U2G) students may earn the certificate when the undergraduate classification is primary.
The Certificate in Critical Cultural Competence requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CCCC:2220 | Foundations of Critical Cultural <br> Competence (taken first) | 3 |
| CCCC:4490 | Integrative Seminar in Critical <br> Cultural Competence | 3 |
| One elective course with an immersion-learning or <br> service-learning component | 3 |  |
| Three elective courses that cover at least two diversity <br> categories (two courses can be taken from the same <br> department and two must be numbered 2000 or above) | 9 |  |
| Total Hours | $\mathbf{1 8}$ |  |

Students begin the certificate with CCCC:2220 Foundations of Critical Cultural Competence, which is offered fall and spring semesters and is a prerequisite to the coursework that follows. Students complete the certificate's requirements with the capstone course, CCCC:4490 Integrative Seminar in Critical Cultural Competence, which is offered in spring semesters.
In collaboration with the certificate program's coordinator, students establish study plans while completing the foundation course. The coordinator works with the academic advisor in the student's major to ensure that the study plan complements the student's academic program and career interests. The program coordinator approves the final study plan, recommends the sequence in which coursework should be taken, schedules required courses, and keeps a record of each student's approved program and progress.

For more information, students may contact the School of Social Work, their advisor, or the certificate coordinator to determine how the certificate would contribute to their degree.

## Dance

## Chair

- Rebekah J. Kowal

Undergraduate major: dance (BA, BFA)
Undergraduate minor: dance
Graduate degree: MFA in dance
Faculty: https://dance.uiowa.edu/people
Website: https://dance.uiowa.edu/
The Department of Dance provides comprehensive training in dance technique, performance, choreography, and theoretical studies while approaching scholarship, creative research, and studio-based training in the framework of a liberal arts education at the Bachelor of Arts, Bachelor of Fine Arts, and Master of Fine Arts levels. Integrating dance studies with the liberal arts and sciences, the dance degree programs promote creative and intellectual growth in an environment that develops young artists and advances the art of dance.

The undergraduate major prepares students for careers as performers, choreographers, and educators as well as for graduate studies in dance and related fields. The MFA curriculum broadens and deepens the knowledge and experience of returning professionals seeking to reenter the field or to secure positions in higher education.

The Department of Dance imparts the values and knowledge necessary to empower students as they create unique paths forward. Students develop as young artists, creative thinkers, and problem solvers who may further the arts in society in diverse, urgent, and transformational ways.

The department offers up to 10 concerts each year, providing dance students with numerous opportunities to perform and/or to present their choreography; visit the Performance Opportunities website for more information. The department's annual Dance Gala on campus, performed by dance students, presents original faculty choreography as well as work by a distinguished guest artist. UI Dance Company, the department's student repertory company, performs across Iowa and surrounding states.
All dance faculty members regularly present and/or publish their choreography or scholarship nationally and internationally. Students have ample opportunities to work with faculty on their creative and/or scholarly research. Periodic master classes with noted guest teachers, choreographers, and touring companies introduce students to contemporary artists and provide opportunities for professionalization and networking.

Students have the opportunity to earn a major in dance and a second major in another of the university's programs, including one of the other performing arts units-music or theatre arts. Faculty and advisors guide students in combining their rigorous dance education with many other disciplines. Dance graduates work in the dance profession and also establish careers in a range of professional fields, such as arts administration and production, education, business, the health sciences, law, and engineering.

## Facilities

The Department of Dance houses six technique studios, a movement training lab, a media classroom and library, a media laboratory, an audio recording laboratory, a costume shop, and its own 220-seat theater for dance concerts.

## Courses

## Dance Courses

DANC: 1000 First-Year Seminar
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
DANC:1010 Beginning Tap
3 s.h.
Elementary techniques, steps, and performance skills for rhythm and show tap styles; enhancement of rhythmic ability through exercises, improvisation, and creative activities; concert attendance, reading assignments, reflective and analytical writing; historical origins of dance form. Tap shoes required. GE: Literary, Visual, and Performing Arts.

## DANC:1020 Beginning Jazz

Basic movement fundamentals, terminology, performance skills of jazz dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; warm-up, locomotion, center combinations; concert attendance, reading assignments, reflective and analytical writing; historical origins of dance form. GE: Literary, Visual, and Performing Arts.
DANC:1025 Beginning Hip Hop Dance
Foundations of hip hop dance and street dance culture; movement participation is central to learning; students are challenged and encouraged to understand and apply foundational and historical knowledge of hip hop; concert attendance, reading assignments, reflective and analytical writing; historical origins of dance form. GE: Literary, Visual, and Performing Arts.
DANC:1030 Beginning Ballet
Basic movement fundamentals, terminology, performance skills of ballet; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; barre and center combinations; terminology; concert attendance, reading assignments, reflective and analytical writing; historical origins of dance form. GE: Literary, Visual, and Performing Arts.

## DANC:1040 Beginning Modern Dance

3 s.h.
Basic movement fundamentals, terminology, performance skills of modern dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; warm-up, locomotion, center combinations; concert attendance, reading assignments, reflective and analytical writing; historical origins of dance form. GE: Literary, Visual, and Performing Arts.

## DANC:1055 Creativity in Motion

3 s.h.
Using foundational principles and components of movement, dance, and contact improvisation to explore questions and processes of creativity-What inspires you? How do you uniquely engage with the world? Students use readings and theories of creativity and the rigors of play and imagination to ground explorations, engage in an ongoing process of reflection and response that culminates in a final creative project, and get to know a local community partner in creative ways that are unique to individual participants. GE: Engineering Be Creative.

## DANC:1060 Introduction to Dance Studies <br> 1 s.h.

Introduction to dance studies in the liberal arts; breadth and diversity of contemporary scholarship on dance; dance history, criticism, ethnography, theory, choreography, and technology.

## DANC: 1070 Yoga <br> 2 s.h.

In-depth physical practice of yoga postures; basic yoga philosophy and texts; personal practice of meditation; breathing techniques; for students interested in expanding or beginning yoga practice.

## DANC:1071 Yoga for Dancers and Performers

Yoga practices related specifically to dancers and other active performers; conditioning needs with focus on cross-training and building strength and flexibility; warm-up for technique classes; weekly journal, written assignments.

## DANC:1075 Mat Pilates

Basic movement fundamentals of the Pilates system of exercises benefiting body alignment, flexibility, balance, coordination, strengthening, injury prevention, self-awareness, and efficiency of movement; somatic training techniques that achieve conditioning needs of performing artists, athletes, and students at large.

## DANC:1090 Dance Production 3 s.h.

Scenic design, costuming, lighting, audio/video, publicity; visits by professional guest lecturers, field trips to creative shops; projects.

## DANC:1110 Continuing Tap

3 s.h.
Continuation of performance skills learned in DANC:1010; concert attendance, reading assignments, reflective and analytical writing; historical origins of dance form. GE: Literary, Visual, and Performing Arts.

## DANC:1120 Continuing Jazz 3 s.h.

Continuation of DANC:1020; skills for technique and performance of jazz dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; warm-up, locomotion, center combinations; concert attendance, reading assignments, reflective and analytical writing; historical origins of dance form. GE: Literary, Visual, and Performing Arts.

## DANC: 1125 Continuing Hip Hop Dance

Continuation of DANC:1025; focus on hip hop and street dance foundations and origins through movement participation; students are challenged and encouraged to understand and apply historical and practical knowledge of hip hop; concert attendance, reading assignments, reflective and analytical writing; historical origins of dance form; for advanced beginning students. GE: Literary, Visual, and Performing Arts.

## DANC:1130 Continuing Ballet

Continuation of DANC:1030; skills necessary for technique and performance of ballet; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; barre and center combinations; terminology; concert attendance, reading assignments, reflective and analytical writing; historical origins of dance form. GE: Literary, Visual, and Performing Arts.

DANC:1140 Continuing Modern Dance
3 s.h.
Continuation of DANC:1040; skills necessary for the technique and performance of modern dance; enhancement of flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, personal range of motion, and musicality; warm-up, locomotion, center combinations; concert attendance, reading assignments, reflective and analytical writing; historical origins of dance form. GE: Literary, Visual, and Performing Arts.
DANC:1150 Brazilian Culture and Carnival
3 s.h.
Dance, music, historical, and social contents of Brazilian Carnival production, critical theories of performance, religious backgrounds, and theatre making in carnival parades. GE: Engineering Be Creative; Values and Culture. Same as LAS:1150.
DANC:1170 Functional Anatomy
1 s.h.
Introduction to human anatomy; scientific principles of movement safety and efficiency; survey of somatic practices for better kinesthetic awareness, body organization, and alignment; application of anatomical knowledge to multiple dance techniques.
3 s.h. DANC: 1412 The Arts in Performance 3 s.h.
GE: Literary, Visual, and Performing Arts; Values and Culture. Same as THTR:1412.
DANC:2020 Intermediate Jazz $\quad 3$ s.h.
Low-intermediate technique and performance training in jazz dance; flexibility, strength, body alignment, and coordination as foundation for more advanced dance artistry including mobility, musicality, style; warm-up, locomotion, center combinations; concert attendance, reading assignments, reflective and analytical writing; historical origins of dance form. GE: Literary, Visual, and Performing Arts.

## DANC:2025 Intermediate Hip Hop Dance

3 s.h.
Continuation of DANC:1125; focus on strengthening and adding to foundations and origins of hip hop and street dance culture; the journey to today's current definitions of hip hop and street dance with introduction to freestyling and groove theory; movement participation is central to learning; students are challenged and encouraged to understand and apply historical and practical knowledge of hip hop at an intermediate level; concert attendance, reading assignments, reflective and analytical writing; historical origins of dance form. GE: Literary, Visual, and Performing Arts.
DANC:2029 Intermediate Ballet for Nonmajors
2 s.h.
Low-intermediate technique and performance training in ballet; flexibility, strength, body alignment, and coordination as a foundation for more advanced dance artistry including more difficult steps, musicality, mobility, and balance; basic ballet terminology including steps, head, body, and arm positions; variations in timing, changes of facing. GE: Literary, Visual, and Performing Arts.
DANC:2030 Majors Intermediate Ballet 3 s.h.
Concentrated intermediate-level technical and performance training in ballet; topics include flexibility, strength, body alignment, and coordination as a foundation for more advanced dance artistry including more difficult steps, musicality, mobility, and balance; basic ballet terminology including steps, head, body, and arm positions; variations in timing; changes of facing. Requirements: placement by departmental audition.
DANC:2039 Intermediate Modern Dance for Nonmajors 2 s.h.
Low-intermediate technique and performance training in modern dance; flexibility, strength, body alignment, and breath as a foundation for more advanced dance artistry including musicality, mobility, balance, and improvisation; variations in timing; changes of facing.

## DANC:2040 Majors Intermediate Contemporary Movement

 PracticesConcentrated intermediate-level technical and performance training in contemporary movement practices; topics include flexibility, strength, body alignment, and breath as a foundation for more advanced dance artistry including musicality, mobility, balance, and improvisation; variations in timing; changes of facing. Requirements: placement by departmental audition.
DANC:2050 Introduction to Improvisation and Composition 3 s.h. Introduction to movement as research; experimental process as vehicle for invention, creative freedom, aesthetic range; development of kinesthetic imagination, awareness, creative problem solving; introduction to issues of artistic originality and authenticity; practical integration of improvisation and composition through spontaneous manipulation of time, space, and energy; knowledge of creative process supported by reading and individual research.
DANC:2060 Dance and Society in Global Contexts 3 s.h. Dance and other physical endeavors as embodied forms of knowledge and culture; U.S. dance practices; European and African dance cultures; aesthetic and political issues raised by concert dance (i.e., performance, choreography, spectatorship, criticism); ethnographic methods to examine the function of dance in cultural formation (i.e., spiritual, celebratory, social, political contexts); lecture, discussion, viewing, movement workshops, formal and informal writing, field research, and blog construction. GE: Engineering Be Creative; Literary, Visual, and Performing Arts.

## DANC:2065 Performing Power/Performing Protest: The Body, Identity, and the Image

What is the relationship between Beyoncé, Jesse Owens, and Thích Quang Duc?-Protest! Each of these cultural figures put their body on the line using protest as performance to challenge power structures, address social equity, and influence social change; students examine historical and contemporary issues of power, identity, and inclusion, situating protest and dissent as key parts of civic engagement through study of music and performance videos, readings, blogs and other media; students are asked to place themselves in a historical continuum where intersections of class, race, gender, and sexuality are considered. GE: Diversity and Inclusion.

## DANC:2075 Teaching and Using Creative Dance for Children (K-8) in a Variety of Educational Settings

Practical and creative approach to understanding and using creative dance as the art of learning by doing, involving all the senses and intelligences; language of movement (i.e., scope, possibilities, movement experiences, resources); guidance and practice in developing comprehensive lesson plans for sequencing, progression, successful presentation, objective observation, and evaluation; creative dance for children and its philosophy, theories, sound pedagogical practices, uses, and benefits; in-class teaching experience and resources for K-8 students.

## DANC:2080 Dance and Social Action

3 s.h.
Exploration of dance as a means for civic engagement; readings
that support theory and practice of dance as social action; practicum experience of facilitating a workshop to girls at the Iowa Juvenile Home.

## DANC:2085 Introduction to African Caribbean Dance

Practices
3 s.h.
Introduction to African Caribbean dance with emphasis on ritual, performance, and music; exploration of basic fundamentals of African Caribbean dances from Trinidad and Tobago, Jamaica, Haiti, and Cuba, as well as musical instruments used to accompany these dances; practical dance training; theoretical basis for understanding geographical, historical, sociological, and political contexts in which dances originated. GE: Diversity and Inclusion.

DANC:2090 Lighting Design for Engineers and Dancers
3 s.h.
Introduction to artistic topics that are necessary to produce and enhance dance composition and performance; focus on student exploration of production environment with respect to artistic concerns. GE: Engineering Be Creative.

## DANC:2150 Brazilian Social Dance: The Samba

Unique opportunity to actively experience the Samba de Gafieira and samba rock at a low-intermediate level; detailed information and extensive practice to learn social dance skills and choreograph partnering combinations; exposure to historical, social contents, and critical theories of performance; various performative elements related to Afro-Brazilian diaspora; the origins of samba music and its relevance for Brazilian culture.
DANC:2220 Production Run Crew 1 s.h.
Hands-on experience in production work for live dance performance.
DANC:2800 Digital Arts: An Introduction
3 s.h.
Introduction to potential of integrating art with technology to provide a foundation of skills and concepts through hands-on experimentation; lectures and demonstrations introduce key concepts and ideas as well as the history of digital arts; students develop skills that form a foundation for future investigation through labs; work may include using an Arduino, programming, and developing an interface to control a software project; final project is shared with the public in some way; critical discourse in the form of writing assignments allows for reflection and evaluation. GE: Engineering Be Creative. Same as ARTS:2800, CINE:2800, CS:2800, DIGA:2800, MUS:2800, THTR:2800.
DANC:2880 Installations and Interactive Performance 3 s.h. Introduction to aesthetics, techniques, and practical possibilities of fusing together theatre, dance, music/sound, art, design, cinema, gaming, human computer interaction, and engineering; foundations of creating interactive experiences that use digital photos, video, text, real-world objects, sensor data, live bodies moving in space, Kinect 2 sensors, cameras, and multiple video outputs (e.g., projectors, LED displays); use of Isadora, an interactive, node-based programming software, to create immersive mediated performances, interactive installations, embodied user-based experiences, and user-manipulated virtual environments. GE: Engineering Be Creative. Same as DIGA:2880, THTR:2880.

## DANC:2890 Producing and Directing Digital Video 3 s.h.

 Introduction to basic concepts, theories, and practical applications of digital video production for multiple distribution streams, with focus on aesthetic and technical principles; development of proficiency in contemporary approaches to digital media production by understanding the production pipeline from ideation to preproduction, production, postproduction, and through to distribution. GE: Engineering Be Creative. Same as DIGA:2890, THTR:2890.
## DANC:2981 Dance Repertory and Performance

1 s.h.
Students broaden their exposure to contemporary concert dance forms through participation in restaging of existing works by UI faculty and nationally or internationally renowned choreographers; in-depth study of particular dance compositions from training and rehearsal process to performance, with consideration to preservation and stewardship of the work for future performances; opportunities to engage in many roles of creation and restaging process. Prerequisites: DANC:1000.
DANC:3010 Topics in Global Movement Practices 2 s.h. Beginning, continuing, or advanced technique of global and nonWestern movement practices; topics vary, may include Asia, Latin America, Africa, Pacific Islands, or other regions in historical and cultural context, and classical, folk, traditional, or contemporary forms.

## DANC:3020 Advanced Jazz

Advanced technique and performance training in jazz dance; flexibility, strength, body alignment, and coordination as foundation for more advanced dance artistry including mobility, musicality, style; warm-up, locomotion, center combinations; may include history of jazz dance. Requirements: dance major.
DANC:3030 Major Ballet I 1-3 s.h. Builds on DANC:2030; intermediate technical and performance training in ballet; flexibility, strength, body alignment, and coordination as foundation for introduction of more advanced aspects of dance artistry, including steps, musicality, mobility, balance; terminology related to barre and center vocabulary including steps, head, body, and arm positions; practice of steps and combinations, variations in timing, changes of facing. Requirements: audition or promotion.

DANC:3040 Major Contemporary Movement Practices I 1-3 s.h. Builds on DANC:2040; intermediate technical and performance training in contemporary movement practices; physical and mental skills for transition to more advanced dance-physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing; basic physical concepts underlying clear and efficient movement; assimilation of new movement material; center of gravity and its role in body mobilization and control; personal movement choices and expressive range. Requirements: audition or promotion.

## DANC:3050 Body/Image: Dance and Media in Discourse and

 PracticeIntersection of body, image, and sound in analog and digital media; relationship to critical and practical texts; written and performative assignments that address fundamental concepts of corporeality in related fields including dance for camera, stage and film performance, and artistic, documentary, and publicity filmmaking and photography.

## DANC:3060 Western Concert Dance History: Romantic to Contemporary

3 s.h.
Examination of concert dance practices in the United State and Europe from 19th to 21 st centuries; changes in dance compositional, performance, viewing, technical, and training practices situated within aesthetic, cultural, social, and political contexts including the Industrial Revolution, Russian imperial court, World War I and World War II, movements for social justice, and aesthetic formations (e.g., romanticism, classicism, modernism, postmodernism); students consider the work of the historian and methodological approaches to formulating historiographic ideas, and put them into practice in individual research projects focused on historical or contemporary dance makers. Prerequisites: DANC:2060.

## DANC:3070 Dance Kinesiology

Body science related to demands of dance; structural and muscular analysis for efficient, effective dance training and prevention of injuries; investigation of skeletal and ligamentous structure for working knowledge of how the body produces movement; joint actions and restrictions, common injuries to those sites; attachments of the voluntary muscles, pathways and potential actions; neuromuscular analysis of an action; functional skeletal alignment; how individual differences may affect movement performance. Prerequisites:

## DANC:1170.

## DANC:3075 Yoga Teacher Training I

3 s.h.
Exploration of in-depth knowledge of yoga in preparation for teaching through physical practice of yoga postures, study of basic yoga philosophy and texts, personal practice of meditation, yoga for various populations, anatomy of yoga postures, and practice teaching within class structure; two-semester course that results in a 200-hour yoga teacher certification. Requirements: dance major and sophomore or higher standing. Recommendations: prior yoga experience highly recommended.

DANC:3076 Yoga Teacher Training II
3 s.h.
Continuation of DANC:3075; expansion of yoga and/or teaching knowledge, in-depth physical practice of yoga postures, basic yoga philosophy and texts, personal practice of meditation, yoga for various populations, anatomy of yoga postures, and practice teaching within class structure. Prerequisites: DANC:3075. Corequisites: DANC:3070. Requirements: dance major and sophomore or higher standing. Recommendations: experience and knowledge of yoga practice highly recommended.
DANC:3080 Music Essentials for Dance
3 s.h.
Evolution of music and dance forms from early history times to the present; rhythmic analysis and fundamental music theory for dance students.

## DANC:3150 Choreography I

2 s.h.
Introduction to theories and practices of creating choreography; locating varied sources for movement; elementary considerations of choreographic form; development of ideas, impulses, and initial inspirations into short works; fundamentals of giving and receiving critical feedback; articulation of thoughts and experience as composers and watchers of choreography; exposure to choreographic concerns supported by video and reading. Prerequisites: DANC:2050.
DANC:3250 Choreography II
Continuation of DANC:3150; development of intermediate choreographic skills; emphasis on cultivation of individual choreographic voice through expansion of vocabulary, discovery of complex ways to form and arrange, and use of widening range of methods and types of resources. Prerequisites: DANC:2050 and DANC:3150.

DANC:3530 Major Ballet II 1-2 s.h.
High-intermediate training in ballet technique and performance; physical and mental skills necessary for more advanced workphysical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body. Requirements: audition or promotion to determine placement.
DANC:3540 Major Contemporary Movement Practices II 1-2 s.h. High-intermediate technical and performance training in contemporary movement practices; physical and mental skills necessary for more advanced work-physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing; basic physical concepts underlying clear and efficient movement; capacity to assimilate new movement material; awareness of the center of gravity and its role in mobilization and control of the body; consciousness of personal movement choices and expressive range. Requirements: audition or promotion to determine placement.
DANC:3600 Art, Feminist Practice, and Social Justice 3 s.h. Issues specifically related to gender, women's, and sexuality studies through the arts; exploration of a theme-a broad social issue such as violence, sexual assault, incarceration, reproduction, immigration, labor-and work with community partners to address the theme through social practice in the arts. Recommendations: prior courses in gender, women's, and sexuality studies or social work or art education or studio arts.
DANC:3700 Dance Pedagogy: Theories, Issues, and Perspectives

3 s.h.
Overview of educational practices, ethics, and responsibilities in the dance studio for teaching children and adults; educational histories, philosophies, and methodologies for teaching dance in diverse settings; assignments may include readings, classroom observations, teaching demonstrations, and discussions with leaders in the field.

## DANC:3710 Topics in Intermedia

Performance, writing, reading, observation, physical practice, improvisation, and devising methods; development or expansion of physical practices that articulate with current artistic production. Prerequisites: ARTS:1510 and ARTS:1520 and (CERM:2010 or INTM:2710 or MTLS:2910 or PNTG:2410 or PRNT:2610 or SCLP:2810 or TDSN:2210). Same as INTM:3700.

## DANC:3750 Dance Internship

arr.
Develop skills in a dance or dance-related field. Internships include but are not limited to positions in teaching, administration, production, and performance. Students are tasked with connecting their internship experience to their academic coursework and their future career goals. Requirements: dance major and sophomore standing or higher.

## DANC:3851 Introduction to the Alexander Technique $\mathbf{3}$ s.h.

The Alexander Technique and "self-use"-how movement choices affect results achieved; improvement of physical skills and presence; principles in support of performing arts (e.g., speaking, singing, playing an instrument, dancing, acting); application to skills in daily life, addressing underpinnings of movement; physical participation (e.g., lying down, rolling, sitting, standing, locomotion). Same as MUS:3851.

## DANC:3852 Introduction to the Feldenkrais Method: Posture, Perception, and Pain Relief

Introduction to the Feldenkrais Method of Awareness Through Movement; refinement of physical organization and coordination applied toward ordinary actions and functions, as well as athletics and performing arts; non-repetitive lessons on the floor, sitting in a chair, and standing; lessons communicated via auditory cues, no demonstration and imitation of idealized positions; improving awareness toward uncovering postural habits; expanding options for new and more efficient movement; exploring developmental patterns, joint, muscle and postural relationships; cultivating multiple possibilities for achieving the same action; conscious integration of sensing, feeling, thinking, and action.

## DANC:3853 Introduction to Klein Technique

2 s.h.
Introduction to principles and practice of Klein Technique to reeducate the body and offer tools for aligning bones, accessing the breath, and working with gravity to find more efficiency and articulation in movement; experiential design supplemented with readings and discussions on founder Susan Klein's writings.

DANC:3875 Topics in Digital Performing Arts 3 s.h.
Advanced techniques in performing with established and new technologies including live cameras in performance, controlling digital avatars, motion capture, virtual and augmented reality, and more. Same as THTR:3875.

DANC:3876 Video for Performance
3 s.h.
Introduction to aesthetics and practical applications of digital media and video design for live performance including content creation, system design, and content optimization for media servers; students create digital video and animations and integrate them into live performance and entertainment events via projections, media servers, and digital displays using QLab Media Server and Adobe Creative Cloud (e.g., Illustrator, Photoshop, Premiere Pro, Audition, After Effects); for those with an interest in designing, creating, and displaying digital media for theatre, dance, concerts, corporate events, gallery installations, VJ sets, and architectural projections. GE: Engineering Be Creative. Same as CINE:3876, DIGA:3876, INTM:3876, THTR:3876.

## DANC:3885 Repertory Dance Company

1-3 s.h.
Advanced repertory studies; learning and performing multiple works by professional guest artists, faculty, and invited graduate students; collaborative creation and performing in community outreach lecturedemonstration throughout Iowa and the region. Requirements: audition.

4 s.h. DANC:3895 Performance, Art, and New Technologies in Society

3 s.h.
Students pitch projects and work in interdisciplinary groups to create original live performances and installations based on major technological innovations that have deeply impacted society and live performance in late 20th and early 21 st centuries; daily handson making; examination of theoretical texts and performances that address impact of technology on human condition to contextualize students' own art/technology projects; exploration and adaptation of technologies/aesthetics for live performance and art including telepresence and liveness, artificial intelligence and big data, augmented and virtual reality. Prerequisites: MUS:2800 or THTR:2880 or CS:1110 or CS:1210 or SCLP:4835. Same as DIGA:3895, THTR:3895.

DANC:4030 Major Ballet III
1-2 s.h.
Advanced training in ballet technique and performance; physical and mental skills necessary for professional work-physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body. Requirements: audition or promotion to determine placement.
DANC:4034 Ballet Pointe I
Intermediate/advanced techniques and training for ballet pointe work; barre and center exercises to strengthen feet/legs/back and ensure proper alignment; review of basic ballet vocabulary; pirouettes and turns commonly performed en pointe; learning and performing variations drawn from repertory. Requirements: DANC:2030, or higher placement.

DANC:4035 Ballet Pointe II
1-2 s.h.
Intermediate/advanced techniques and training for ballet pointe work; repetition and analysis of steps and combinations, assimilation of new material; barre and center exercises, pirouettes and turns commonly performed en pointe, learning and performing variations drawn from repertory. Requirements: DANC:3030.
DANC:4040 Major Contemporary Movement Practices III 1-2 s.h. Advanced technical and performance training in contemporary movement practices; physical and mental skills necessary for professional work_physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing; basic physical concepts underlying clear and efficient movement; capacity to assimilate new movement material; awareness of the center of gravity and its role in mobilization and control of the body; consciousness of personal movement choices and expressive range; may include partnering exercises for investigation of weight exchange, timing, and expressivity. Requirements: audition or promotion to determine placement.

## DANC:4060 The Contemporary Dance Scene

Historical, theoretical, and practical elements of contemporary dance; the term "postmodern" and its associations with dance, performing arts, contemporary culture; relationships between process and product, identity and subjectivity, artistic intent and authorship, meaning and intertextuality; possibility of art as a form of dissent; theory and practice placed in a dialectic; analysis and synthesis of previous research.

## DANC:4350 Choreography III

2 s.h.
Continuation of DANC:3250; increased emphasis on invention, clarity, sophistication, and development of complete works; creation of sharply defined mature movement worlds; increasingly thorough consideration of sources and methods, responsibility for applying coursework to self-defined artistic concerns and emerging individual aesthetic; advanced theories and methods through video, reading, choreographic research. Prerequisites: DANC:2050 and DANC:3250.

## DANC:4452 MFA Independent Project Research Lab

Participation in rehearsals, showings, adjudication, concert rehearsals and performances; for undergraduate dancers who have been selected through audition for graduate independent projects conducted by graduate students enrolled in DANC:6990. Requirements: audition and selection by an MFA student creating a piece for adjudication, showing, and/or performances.

## DANC:4453 MFA Thesis Research Lab

Participation in rehearsals, showings, adjudication, and concert rehearsals and performances; for undergraduate dancers who have been selected through audition for roles in MFA thesis concerts conducted by graduate students. Requirements: audition and selection by MFA student creating a piece for thesis concert.

## DANC:4454 Faculty Creative Research Lab

arr.
Participation in rehearsals, showings, and concert rehearsals and performances; for students who have been selected through audition for roles in creative research conducted by faculty members. Requirements: audition or selection by faculty member.
DANC:4535 Elementary Ballet Pedagogy 3 s.h.
Methods, materials, concepts for teaching ballet techniques.
DANC:4540 Major Contemporary Movement Practices IV 1 s.h. Professional technique and performance training in contemporary dance. Requirements: two semesters of DANC:4030 with a minimum grade of A- or two semesters of DANC:4040 with a minimum grade of A-

## DANC:4545 Teaching of Modern and Contemporary Dance Forms

Practices of teaching modern dance; information and experience for developing an individualized approach to teaching; educational methodology for defining essential elements of a modern class, approaches for planning and structuring classes.

DANC:4880 Dance Gala Performance 1-4 s.h.
Rehearsal hours and performance of dance works in produced dance concerts. Requirements: audition and/or concert adjudication.

## DANC:4881 Graduate Concert

1 s.h.
Rehearsal hours and performance of dance works in produced dance concert. Requirements: audition.

## DANC:4882 Undergraduate Concert

1-4 s.h.
Rehearsal hours and performance of dance works in produced dance concert. Requirements: audition and/or concert adjudication.
DANC:4883 Faculty Concert 1-4 s.h.
Rehearsal hours and performance of dance works in produced dance concert. Requirements: selection by audition and/or concert adjudication.

## DANC:4884 Undergraduate Event <br> 1-4 s.h.

Rehearsal hours and performance of dance works in produced dance concert. Requirements: audition and/or concert adjudication.
DANC:4885 MFA Thesis Concert 0-4 s.h.
Rehearsal hours and performance of dance works in produced dance concert.
DANC:4886 BFA Concert 0-4 s.h.
Rehearsal hours and performance of dance works in produced dance concert. Requirements: audition and/or concert adjudication.
DANC:4887 MFA Event
1-3 s.h.
Participation in rehearsals, concert rehearsals, and performances; for graduate dancers who have been selected through audition for roles in the MFA event held during spring semesters. Requirements: selection by audition and/or concert adjudication.

## DANC:4888 Special Project Student Performance

arr.
Rehearsal hours and performance of dance works created by faculty outside of traditional performance cycle. Requirements: audition or selection by faculty member.

DANC:4980 BFA Seminar in Dance
3 s.h.
Transitioning from college to careers in professional dance; creation and performance of a devised ensemble work; résumé building and personal marketing; how to make the most of auditions, internships, and company intensives; artist portfolios, grant writing skills, arts administration strategies, and discussion of opportunities for graduate study. Requirements: BFA major and junior or senior standing.
arr. DANC:4981 BFA Devising Ensemble 1 s.h.
Students create a devised ensemble work to perform in BFA event at end of semester; each student co-creates work with the ensemble and content is derived from personal experiences, interests, and research; rehearsal process includes exercises in improvisation, storytelling, writing, choreographing, and directing; for senior BFA dance students.
DANC:4990 Independent Study arr.
Credit for an individual student-designed project coordinated with a faculty advisor. Requirements: sophomore or higher standing.

## DANC:4991 Independent Choreography

arr.
Credit for creation of independent choreographic project, developed under guidance of faculty advisor, that results in production of a dance work.

DANC:4995 Honors Studies in Dance arr.
Choreography, performance, production, Labanotation, dance history, or pedagogy. Prerequisites: a minimum g.p.a. of 3.33.

## DANC:4998 BFA Senior Project in Dance

Senior year choreographic/performance capstone to complete BFA in dance under supervision of faculty advisor; culminates in public showing or produced concert. Requirements: admitted to BFA program in dance and senior standing.
DANC:4999 Honors Project in Dance arr.
Research, choreographic, reconstruction, or performance project under guidance of a faculty advisor. Requirements: senior standing.
DANC:5050 Graduate Improvisation I 1-2 s.h.
Dance improvisation.
DANC:5055 Embodying Voice/Performing Persona 3 s.h.
Creation and performance of text from body-based perspectives; working in a spectrum from casual conversation to formal presentation, students research verbal and written language habits, personal access to vocal range in volume and tone, communication through body and gesture, performance of personas, how breath relates to the voice, how voice expresses a sense of self, and how listening relates to speaking; projects include creative research presentations, storytelling, solo/group songs, improvisational scene studies, nonverbal physical theater, and personal performative essay writing. Recommendations: junior or higher standing.

DANC:5060 Theories of Dance and the Body 3 s.h. Theoretical trends in studies of dance and physical bodies; performative and choreographic aspects of being. Recommendations: MFA major in dance or advanced dance standing.
DANC:5085 Graduate African Caribbean Dance Practices 3 s.h. Introduction to African Caribbean dance with emphasis on ritual, performance, and music; exploration of basic fundamentals of African Caribbean dances from Trinidad, Tobago, Jamaica, Haiti, and Cuba; musical instruments used to accompany these dances; practical dance training; theoretical basis for understanding geographical, historical, and political sociology contexts in which dances originated.

## DANC:5530 Graduate Majors Ballet II <br> 1-3 s.h.

High intermediate technique and performance training; physical and mental skills necessary for more advanced work-physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body.

## DANC:5540 Graduate Contemporary Movement Practices

 II1-3 s.h.
High intermediate technical and performance training in contemporary movement practices; physical and mental skills necessary for more advanced work-physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body, consciousness of personal movement choices and expressive range.
DANC:5545 Teaching Dance in Higher Education 3 s.h.
Introduction to pedagogical practices of lecture and studio-based dance teaching at collegiate level.

## DANC:5550 Collaborative Performance

3-4 s.h.
Collaborative process with advanced dance artists and creative, design, and technical practitioners from varied disciplines that culminates in a devised performance for the general public; emphasis on sharing and investigating ideas, artistic intent, personal vision, and practical application. Same as THTR:5610.
DANC:5880 Installations and Interactive Performance 3 s.h. Introduction to creating interactive experiences with technology; aesthetics, techniques, and practical possibilities of fusing together theatre, dance, music/sound, art, design, cinema, gaming, humancomputer interaction, and engineering through use of Isadora, an interactive, node-based programming software; students create immersive performances, interactive installations, embodied user experiences, and user-manipulated virtual environments. Same as THTR:5880.

DANC:5890 Producing and Directing Digital Video 3 s.h. Introduction to basic concepts, theories, and practical applications of digital video production for multiple distribution streams with focus on aesthetic and technical principles; development of proficiency in contemporary approaches to digital media production by understanding the production pipeline from ideation to preproduction, production, postproduction, and through to distribution. Same as THTR:5890.
DANC:6030 Graduate Majors Ballet III 1-3 s.h.
Advanced ballet technique and performance training for proficient dancers; physical and mental skills necessary for professional work -physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, understanding of basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body.

## DANC:6040 Graduate Contemporary Movement Practices III <br> $1-3$ s.h.

Advanced technical and performance training in contemporary movement practices; physical and mental skills necessary for professional work-physical stamina, strength, flexibility, articulation, coordination, musicality, phrasing, understanding of basic physical concepts underlying clear and efficient movement, capacity to assimilate new movement material, awareness of the center of gravity and its role in mobilization and control of the body, consciousness of personal movement choices and expressive range.
DANC:6050 Graduate Improvisation II
3 s.h.
Advanced concepts in compositional improvisation; students practice through individual exploration and ensemble collaboration; multiple structures and entry points to develop embodied imagination; diverse materials including movement, text, site, objects, and music; creative process as physical research applied to choreographic thinking and spontaneous performance; integration of conceptual and experiential in dancing and dance-making; examination of aesthetic and political frameworks and harmonies with other spontaneous practices.

DANC:6060 Graduate Seminar in Dance
2 s.h.
Introduction to areas of study in dance to encourage rigorous research; preparation for artistic, academic, administrative, and socially engaged careers; topics address role of dance in society and higher education, issues of dance administration, and areas of concern to dance artists, educators, and audiences; investigation of cultural, economic, political, and historical role of dance and dance artists in Western and other social contexts; brief history of dance in higher education; current issues and trends of dance programs in higher education.
DANC:6080 Graduate Production Practicum 1 s.h.

DANC:6350 Graduate Choreography III
3 s.h.
Advanced choreography as research; students ask and answer questions through a creative process to produce original choreography and address complex concepts, methods, and applications to produce multiple works; experimentation with movement and structure to formulate artistic questions and produce innovative treatments of generic concepts; exploration of choreography as a directorial process; establishment of context and point-of-view to frame developing and editing processes; individual research within larger choreographic, aesthetic, theoretical, and/or sociocultural contexts; practice of advanced critical response. Requirements: MFA major in dance.

## DANC:6450 Graduate Choreography IV

3 s.h.
Advanced theories, practices, directing, and arranging of choreography; collaborative process with performers and cochoreographers utilizing analytical and creative connections with bodies of knowledge across the liberal arts and sciences; theorizing through compositional studies; development of multiple works; advanced practice in critical feedback and articulation of ideas about process and product; students turn assignments into research questions that produce original/innovative treatments of generic concept development; independent research to advance individual goals and utilize course content.
DANC:6540 Graduate Contemporary Movement Practices
IV
IV 1 s.h.
Professional technique and performance training in contemporary movement practices.
DANC:6880 Dance Gala Performance
1-4 s.h.
Rehearsal hours and performance of dance works in produced dance concerts. Requirements: audition and/or concert adjudication.
DANC:6881 Graduate Concert arr.
Rehearsal hours and performance of dance works in produced dance concert. Requirements: audition.

DANC:6882 Undergraduate Concert
1-4 s.h.
Rehearsal hours and performance of dance works in produced dance concert. Requirements: audition and/or concert adjudication.
DANC:6883 Faculty Concert
1-4 s.h.
Rehearsal hours and performance of dance works in produced dance concert. Requirements: selection by audition and/or concert adjudication.
DANC:6884 Undergraduate Event
1-4 s.h.
Rehearsal hours and performance of dance works in produced dance concert. Requirements: audition and/or concert adjudication.

DANC:6885 MFA Thesis Concert 1-4 s.h.
Rehearsal hours and performance of dance works in produced dance concert.
DANC:6887 MFA Event
1-2 s.h.
Participation in rehearsals, concert rehearsals, and performances; for graduate dancers who have been selected through audition for roles in the MFA event held during spring semesters. Requirements: selection by audition and/or concert adjudication.

## DANC:6888 Special Project Student Performance

 arr.Rehearsal hours and performance of dance works created by faculty outside traditional performance cycle. Requirements: graduate standing in dance.

## DANC:6889 Graduate Performance Credit

1-3 s.h.
Credit for performances held outside of the department's regular production calendar; for students not already receiving credit for their project. Requirements: MFA major in dance.

## DANC:6990 Graduate Independent Projects

Creation and presentation of an independent choreographic or performance project; students prepare ideas, write an abstract and a proposal, attend progress showings several times during creative process, participate in feedback sessions, and complete a final paper.
DANC:6991 Graduate Independent Study arr.
Credit for individually designed project coordinated with a faculty advisor.
DANC:6992 Graduate Independent Performance Project arr.
Credit for creative participation as a performer in a chorography project, developed under guidance of a faculty advisor, that results in the performance of a dance work.

DANC:7550 Graduate Contemporary Movement

## Practicum

Advanced, in-depth understanding of teaching dance technique at the college level; emphasis on studio practice of technique through active participation in technique class; individualized research on technical and pedagogical approaches to dance; taken with a faculty member during student's teaching rotation to gain understanding of the teacher's pedagogical approach across three levels of the majors-level technique curriculum. Requirements: completion of one semester of MFA program and good standing.
DANC:7560 Graduate Ballet Technique Practicum 2-3 s.h. Advanced, in-depth understanding of teaching dance technique at the college level; emphasis on studio practice of technique through active participation in technique class; individualized research on technical and pedagogical approaches to dance; taken with a faculty member during student's teaching rotation to gain understanding of the teacher's pedagogical approach across three levels of the majors-level technique curriculum. Requirements: completion of one semester of MFA program and good standing.

## Dance, BA

Integrating studies in dance and the liberal arts, the Bachelor of Arts degree program establishes foundations for creative and intellectual development, and cultivates multiple approaches to dance, career, and citizenship. Students take daily classes in Western classical and concert dance movement practices, complemented by courses in improvisation, choreography, dance history and theory, multicultural movement practices, global dance studies, digital performing arts, kinesiology, pedagogy, and community engagement.

## Auditions for BA Admission

An audition is required for admission to the BA program in order to determine placement in ballet and contemporary movement practices classes and for consideration for scholarships. An online application is required in order to audition; visit Undergraduate Applications on the Department of Dance website. Contact the Department of Dance for more information or questions about auditions.

## Learning Outcomes

Students will:

- achieve proficiency in contemporary concert dance movement practices while developing stylistic versatility, expressive range, and efficient body mechanics;
- learn to think critically about the historical, cultural, and social contexts of dance as an art form and cultural practice while developing strong writing skills and effective oral expression;
- master formal compositional elements and improvisational techniques toward the creation of original choreographic work, and learn to articulate and render their creative intentions with clarity, with opportunities to present these works in public performances;
- acquire performance skills, such as interpretation, expressivity, physical agility, and refinement, by participating in auditions, rehearsals, and studio and public performances;
- acquire knowledge of anatomical and kinesiological principles and injury prevention for effective dance training and career longevity; and
- attain an understanding of digital arts tools currently practiced in contemporary dance.

## Requirements

The Bachelor of Arts with a major in dance requires a minimum of 120 s.h., including at least 58 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. Students also have the opportunity to complete the Dance Pedagogy and Instruction Track [p. 342] while fulfilling the BA requirements.

In planning coursework, especially electives, students may apply a maximum of 61 s.h. in Department of Dance courses (prefix DANC) toward the minimum 120 s.h. required for the BA degree. At least 28 s.h. in major coursework must be earned at the University of Iowa. Any grades earned for coursework are calculated in the grade-point average.
The BA with a major in dance requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Core Courses | 20 |
| Studio Courses | 7 |
| Performance and Creative Research Courses | 2 |
| Movement Practices Courses | 22 |

Distribution Areas ..... 7-9
Dance Electives ..... 0-3
Core Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | 1 |
| DANC:1000 | First-Year Seminar | 1 |
| DANC:1060 | Introduction to Dance Studies | 3 |
| DANC:1090 | Dance Production | 1 |
| DANC:1170 | Functional Anatomy | 3 |
| DANC:2060 | Dance and Society in Global <br> Contexts | 2 |
| DANC:2220 | Production Run Crew (taken <br> twice) | 3 |
| DANC:3060 | Western Concert Dance History: <br> Domantic to Contemporary | 3 |

| DANC:3895/ <br> DIGA:3895/ <br> THTR:3895 | Performance, Art, and New Technologies in Society | 3 |

## Dance Electives

The required number of semester hours in dance electives varies depending on whether a student completes the core with dance courses or with cross-referenced courses from another department, or has a core requirement waived.

## Dance Pedagogy and Instruction Track

Dance majors who have a particular interest in the art and practice of teaching dance as passion and/or profession may complete the dance pedagogy and instruction track at the same time as they are completing their degree requirements. This track tailors the knowledge and skills gained in the pursuit of a major in dance toward the preparation of students for life as active members of their communities and society in professions in dance instruction, studio ownership, and as teaching artists within community and dance company outreach and engagement.
Most of the required courses fulfill the requirements for the dance major and/or GE CLAS Core requirements.
The dance pedagogy and instruction track requires 23-24 s.h. from the following.

## Dance Pedagogy Foundations

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| DANC:3700 | Dance Pedagogy: Theories, <br>  | Issues, and Perspectives |

## Dance Pedagogy Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 5-6 s.h. from these: |  | 2 |
| DANC:2075 | Teaching and Using Creative <br> Dance for Children (K-8) in a <br> Variety of Educational Settings |  |
| DANC:4535 | Elementary Ballet Pedagogy | 3 |

Teaching of Modern and Contemporary Dance Forms

## Education, Learning, and Human Development

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 6 s.h. from these: |  |  |
| EPLS:3000 | Foundations of Education | 3 |
| PSQF:1075 | Educational Psychology and <br> Measurement | 3 |
| PSQF:4133 | The Adolescent and Young <br> Adult | 3 |
| PSY:1001 | Elementary Psychology | 3 |
| PSY:2401 | Introduction to Developmental | 3 |

## Leadership and Entrepreneurship Studies

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 3 s.h. from these: |  | 3 |
| ARTS:3400 | Grant Writing in the Arts | 3 |
| ENTR:1350 | Foundations in |  |

## Social Justice Studies

Students may apply only 3 s.h. of either DANC:3600 or GWSS:3600 to this track.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| 3 s.h. from these: | Performing Power/Performing |  |
| DANC:2065 | Protest: The Body, Identity, and <br> the Image | 3 |
| DANC:3600 | Art, Feminist Practice, and <br> Social Justice | 3 |
| GWSS:3600 | Art, Feminist Practice, and <br> Social Justice | 3 |
| SJUS:1001/ Introduction to Social Justice | 3 |  |

## Electives

Students take additional coursework to earn at least 23-24 s.h. needed to complete track requirements from one of the areas listed above: Education, Learning, and Human Development; Leadership and Entrepreneurship Studies; or Social Justice Studies.

## Honors

## Honors in the Major

Majors who maintain a Department of Dance grade-point average (GPA) of at least 3.50 and a UI GPA of at least 3.33 are encouraged to pursue honors in dance. It is not necessary for students pursuing honors in dance to be members of the University of Iowa Honors Program, although honors in dance does satisfy the experiential learning component ("learning by doing") of the UI Honors Program.

Students who graduate with honors in their major receive special recognition during commencement, and their transcript and diploma reflect honors designations.
Graduation with honors in dance requires successful completion of 8-10 s.h. of University of Iowa honors courses or honors contract courses in the Department of Dance and successful completion of an honors project.

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the dance major.

## Career Advancement

Careers for dance majors include professional work as performers, choreographers, dance educators, and involvement in related areas such as arts management, technical theater, dance scholarship, or dance and physical therapy. Many graduates from the UI dance program are currently working in arts organizations throughout the United States.

The discipline and creative challenges of dance training transfer well to other careers. Students have combined dance with a second major in another field such as business or communication.
The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.
Department of Dance coursework beyond 61 s.h. for BA students does not apply toward semester hours required for graduation.

Before the third semester begins: 12 s.h. of coursework in the major.
Before the fifth semester begins: 24-32 s.h. of coursework in the major.
Before the seventh semester begins: 36-48 s.h. of coursework in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: 42-50 s.h. of coursework in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Students must complete 22 s.h. of movement practices courses, including 10 s.h. of ballet, 10 s s. of contemporary movement practices, and at least two semesters of DANC:3530, DANC:3540, DANC:4030, DANC:4040, or DANC:4540.
c Fulfills a major requirement and may fulfill a GE requirement.
d DANC:2065 meets both the GE CLAS Core Diversity and Inclusion requirement and the global dance studies requirement for the major.
e Recommended course for GE CLAS Core Natural Sciences with Lab, not a major requirement.
f Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
g GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
h See General Catalog for list of approved courses.
i DANC:1150 and DANC: 1412 meet the GE CLAS Core Values and Culture requirement.
j Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
k Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Dance, BFA

The Bachelor of Fine Arts degree program provides students with a conservatory-like studio experience that is enriched by studies in the liberal arts and sciences. Students train daily in Western classical and concert movement practices, and are afforded ample opportunities to perform in faculty and student creative research and to produce their own choreographic works in the department's concert season. A preprofessional degree, the BFA in dance establishes a strong foundation for creative and intellectual development and cultivates multiple approaches to dance, career, and citizenship. Studies in movement practices, performance, and choreography are complemented by courses in improvisation, dance history and theory, multicultural movement practices, global dance studies, digital performing arts, kinesiology, pedagogy, and community engagement.

## Auditions for BFA Admission

An audition is required to be considered for the BFA program, as well as for placement in advanced dance classes. Audition materials required include a BFA audition application, two letters of recommendation (one academic, one dance), and current transcripts; visit Undergraduate Applications on the Department of Dance website.
Students who audition will be required to perform a two-minute solo on audition day; it may be self-choreographed or be choreographed by someone else, usually a teacher or mentor.

Contact the Department of Dance for more information or questions about auditions.

## Learning Outcomes

Students will:

- achieve proficiency in contemporary concert dance movement practices while developing stylistic versatility, expressive range, and efficient body mechanics;
- learn to think critically about the historical, cultural, and social contexts of dance as an art form and cultural practice while developing strong writing skills and effective oral expression;
- master formal compositional elements and improvisational techniques toward the creation of original choreographic work, and learn to articulate and render their creative intentions with clarity, with opportunities to present these works in public performances;
- acquire performance skills, such as interpretation, expressivity, physical agility, and refinement, by participating in auditions, rehearsals, and studio and public performances;
- acquire knowledge of anatomical and kinesiological principles and injury prevention for effective dance training and career longevity; and
- attain an understanding of digital arts tools currently practiced in contemporary dance.

## Requirements

The Bachelor of Fine Arts with a major in dance requires a minimum of 120 s.h., including at least 85 s.h. of work for the major. Students must maintain a grade-point average of at least 3.50 in all courses for the major and in all UI courses for the major. Students must earn at least 42 s.h. in the major at the University of Iowa. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. Students also have the opportunity to complete the Dance Pedagogy and Instruction Track [p. 347] while fulfilling the BFA requirements.

In planning coursework, especially electives, students may apply a maximum of 85 s.h. in Department of Dance courses (prefix DANC) toward the minimum 120 s.h. required for the BFA degree. Any grades earned for coursework are calculated in the grade-point average.
In contrast to the BA in dance, the BFA program emphasizes choreography and performance. It requires an additional $18 \mathrm{~s} . \mathrm{h}$. of choreography, performance, and technique. Students who did not audition for the BFA program prior to entrance to the University of Iowa may subsequently apply for admission to the program during their sophomore year. The strongest candidates are those who have achieved the equivalent of major II technique and show academic and professional promise.

The BFA with a major in dance requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Core Courses | 24 |
| Studio Courses | 9 |
| Performance and Creative Research Courses | 8 |
| Movement Technique Courses | 32 |
| Distribution Areas | $7-9$ |
| Dance Specialization Area | $3-4$ |
| Dance Electives (semester hours could vary depending on <br> previous coursework) | $3-4$ |
| Senior Project (semester hours could vary) | 2 |

## Core Courses

| DANC:4885 | MFA Thesis Concert | $1-4$ |
| DANC:4886 | BFA Concert | $1-4$ |
| DANC:4887 | MFA Event | $1-3$ |
| DANC:4888 | Special Project Student | arr. |

## Movement Technique Courses

Students must complete 32 s.h. of movement technique courses, including two semesters of either DANC:4030 Major Ballet III or DANC:4040 Major Contemporary Movement Practices III, and two semesters of DANC:4540 Major Contemporary Movement Practices IV with a grade of B-plus or higher, 14 s.h. of ballet, and 14 s.h. of contemporary movement practices (eligible students may petition to take either DANC:4030 or DANC:4040 concurrently with DANC:4540 for two semesters during their final two semesters in order to satisfy technique requirements; the petition must originate with a student's advisor and be approved by the assigned course instructors).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 32 s.h. from these: |  |  |
| DANC:3030 | Major Ballet I | $1-3$ |
| DANC:3040 | Major Contemporary Movement <br> Practices I | $1-3$ |
| DANC:3530 | Major Ballet II | $1-2$ |
| DANC:3540 | Major Contemporary Movement <br> Practices II | $1-2$ |
| DANC:4030 | Major Ballet III | $1-2$ |
| DANC:4034 | Ballet Pointe I | 1 |
| DANC:4035 | Ballet Pointe II | $1-2$ |
| DANC:4040 | Major Contemporary Movement | $1-2$ |
| DANC:4540 | Practices III |  |
|  | Major Contemporary Movement | 1 |

## Distribution Areas

Students must complete at least one course from each of the following three areas. These courses may satisfy other requirements for the major.

## Dance Somatics

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| DANC:3851/ | Introduction to the Alexander | 3 |
| MUS:3851 | Technique |  |

| DANC:3852 | Introduction to the Feldenkrais <br> Method: Posture, Perception, <br> and Pain Relief | 3 |
| :--- | :--- | :--- |
| DANC:3853 | Introduction to Klein Technique | 2 |

## Global Dance Studies

| Course \# <br> One of these: <br> DANC:1150/ <br> LAS:1150 | Title | Hours |

| Students choose advan of the following three | ced-level elective coursework by options. | one |

Option 1—Pedagogy

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| DANC:4535 | Elementary Ballet Pedagogy | 3 |
| DANC:4545 | Teaching of Modern and <br> Contemporary Dance Forms | 3 |

## Option 2—Advanced History or Theory

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| DANC:4060 | The Contemporary Dance Scene | 3 |
| DANC:5060 | Theories of Dance and the Body | 3 |

Option 3-Choreography

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: |  |  |
| DANC:4991 | Independent Choreography | 1 |
| DANC:6450 | Graduate Choreography IV | 3 |

## Option 4- Performance

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| DANC:5055 | Embodying Voice/Performing | 3 |
|  | Persona |  |

## Dance Electives

The required number of semester hours in dance electives varies depending on whether a student completes the core with dance courses or with cross-referenced courses from another department, or has a core requirement waived.

## Senior Project

Students culminate their experience with senior projects in choreography or performance. They may earn honors credit for this project by enrolling in DANC:4999 Honors Project in Dance (enrollment requires membership in the University of Iowa Honors Program or special permission from the instructor). Other students must complete DANC:4998 BFA Senior Project in Dance.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| DANC:4998 | BFA Senior Project in Dance | 2 |
| DANC:4999 | Honors Project in Dance | 2 |

## Dance Pedagogy and Instruction Track

Dance majors who have a particular interest in the art and practice of teaching dance as passion and/or profession may complete the dance pedagogy and instruction track at the same time as they are completing their degree requirements. This track tailors the knowledge and skills gained in the pursuit of a major in dance toward the preparation of students for life as active members of their communities and society in professions in dance instruction, studio ownership, and as teaching artists within community and dance company outreach and engagement.

Most of the required courses fulfill the requirements for the dance major and/or GE CLAS Core requirements.
The dance pedagogy and instruction track requires $23-24$ s.h. from the following.

## Dance Pedagogy Foundations

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Dance Pedagogy: Theories, | 3 |
| DANC:3700 | Issues, and Perspectives |  |

## Dance Pedagogy Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 5-6 s.h. from these: |  | 2 |
| DANC:2075 | Teaching and Using Creative <br> Dance for Children (K-8) in a <br> Variety of Educational Settings |  |
| DANC:3075 | Yoga Teacher Training I | 3 |
| DANC:3076 | Yoga Teacher Training II | 3 |
| DANC:4535 | Elementary Ballet Pedagogy | 3 |
| DANC:4545 | Teaching of Modern and <br> Contemporary Dance Forms | 3 |

## Education, Learning, and Human Development

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 6 s.h. from these: |  |  |
| EPLS:3000 | Foundations of Education | 3 |
| PSQF:1075 | Educational Psychology and <br> Measurement | 3 |
| PSQF:4133 | The Adolescent and Young | 3 |
| PSY:1001 | Adult |  |
| PSY:2401 | Elementary Psychology | 3 |
|  | Introduction to Developmental | 3 |

## Leadership and Entrepreneurship Studies

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 3 s.h. from these: |  | 3 |
| ARTS:3400 | Grant Writing in the Arts | 3 |
| ENTR:1350 | Foundations in <br> Entrepreneurship |  |

## Social Justice Studies

Students may apply only 3 s.h. of either DANC:3600 or GWSS:3600 to this track.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 3 s.h. from these: | Performing Power/Performing |  |
| DANC:2065 | Protest: The Body, Identity, and <br> the Image | 3 |
| DANC:3600 | Art, Feminist Practice, and <br> Social Justice | 3 |
| GWSS:3600 | Art, Feminist Practice, and <br> Social Justice | 3 |
| SJUS:1001/ | Introduction to Social Justice | 3 |
| GWSS:1003 |  |  |

## Electives

Students take additional coursework to earn at least 23-24 s.h. to complete track requirements from one of the areas listed above: Education, Learning and Human Development; Leadership and Entrepreneurship Studies; or Social Justice Studies.

## Honors

## Honors in the Major

Majors who maintain a Department of Dance grade-point average (GPA) of at least 3.50 and a UI GPA of at least 3.33 are encouraged to pursue honors in dance. It is not necessary for students pursuing
honors in dance to be members of the University of Iowa Honors Program, although honors in dance does satisfy the experiential learning component ("learning by doing") of the UI Honors Program.

Students who graduate with honors in their major receive special recognition during commencement, and their transcript and diploma reflect honors designations.

Graduation with honors in dance requires successful completion of $8-10$ s.h. of University of Iowa honors courses or honors contract courses in Department of Dance classes and successful completion of an honors project.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.
Membership in the UI Honors Program is not required to earn honors in the dance major.

## Career Advancement

Careers for dance majors include professional work in performing, choreography, education, private teaching, and related areas such as arts management, technical theater, or dance and physical therapy. Many graduates from the UI dance program are currently working in arts organizations throughout the United States.
The discipline and creative challenges of dance training transfer well to other careers. Students have combined dance with a second major in another field such as business or communication.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.
Department of Dance coursework beyond 82 s.h. for BFA students does not apply toward semester hours required for graduation.
Before the third semester begins: 16 s.h. of coursework in the major.
Before the fifth semester begins: 25-40 s.h. of coursework in the major.

Before the seventh semester begins: 45-60 s.h. of coursework in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: 57-75 s.h. of coursework in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Dance, BFA

Course
Title
Hours
Academic Career

## Any Semester

Students must maintain a GPA of at least 3.50 in all courses for the major and in all UI courses for the major.
An audition is required to be considered for the BFA program, as well as for placement in advanced dance classes. Audition materials required include a BFA audition application, two letters of recommendation, and current transcripts.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social

Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Students must complete 32 s.h. of movement technique courses, including two semesters of either DANC:4030 or DANC:4040, and two semesters of DANC:4540 with a grade of B-plus or higher, 14 s.h. of ballet, and $14 \mathrm{~s} . \mathrm{h}$. of contemporary movement practices.
c Students must complete 8 s.h. performance and creative research courses. No more than 3 s.h. of DANC: 3885 will count toward this requirement.
d Fulfills a major requirement and may fulfill a GE requirement.
e Students must complete 2 s.h. of DANC:2220 by the end of the second year.
f The required number of semester hours in dance electives varies depending on whether a student completes the core with dance courses or with cross-referenced courses from another department, or has a core requirement waived.
g Recommended course for GE CLAS Core Natural Sciences with Lab, not a major requirement.
h Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
i DANC:2065 meets both the GE CLAS Core Diversity and Inclusion requirement and the global dance studies requirement for the major.
j GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
k See General Catalog for list of approved courses.
1 DANC: 1150 meets both the GE CLAS Core Values and Culture requirement and the global dance studies requirement for the major.
mTypically this course is offered in spring semesters only. Check
MyUI for course availability since offerings are subject to change.
n Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
o Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Dance, Minor

## Requirements

The undergraduate minor in dance requires a minimum of 15 s.h. in University of Iowa Department of Dance courses. Students must maintain a cumulative grade-point average of 3.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

## Auditions for Admission to the Minor

For incoming first-year students, an audition is required for the minor in order to determine placement in ballet and contemporary movement practices classes. An online application is required in order to audition; visit Undergraduate Applications on the Department of Dance website. Contact the Department of Dance for more information or questions about auditions. Students may be invited to join the dance major after their audition for the minor.
Students who have already matriculated at the University of Iowa may add the minor without an audition by contacting the Department of Dance, but they must audition for placement in ballet and contemporary movement practices if they wish to take majors level courses (numbered 2000 and above) in these genres.

## Required Coursework

The minor in dance requires the following coursework. Students must complete all prerequisites for the courses they choose for the minor. In order to enroll in DANC:3530 Major Ballet II, students must have taken at least two semesters of DANC:3030 Major Ballet I; to enroll in DANC:3540 Major Contemporary Movement Practices II, students must have taken at least two semesters of DANC:3040 Major Contemporary Movement Practices I.

| Course \# | Title | Hours |

## Dance, MFA

The Master of Fine Arts program in dance offers two emphasis areas in choreography or performance. Students must first complete the online application and then be selected to interview and audition to be considered for admission.

## Learning Outcomes

- Movement expertise: achieve professional-level expertise in contemporary movement practices and techniques as a means to advanced, body-based creative research and teaching
- Creative research: establish individualized creative research trajectories that couple dance theories and practices and foster coherent aesthetic points of view in both scholarly and performative contexts.
- Communication: demonstrate skilled communication through artistic process and product, and through verbal, written, digital, pedagogical, and emerging artistic forms.
- Artistic citizenship: understand and develop the combined artistic, social, and organizational skills of the artist-citizen who, in humane ways, contributes to the local, national, and global dialogues about dance and contemporary culture, and to the evolution of the professional field.
- Career readiness and sustainability: understand the diverse and ever-changing nature of the field of dance and develop the relevant agility to hold significant roles in a sustained, lifelong career.

## Requirements

The Master of Fine Arts program in dance requires a minimum of 60 s.h. of graduate credit. The program is designed to be completed in four to six semesters in residence. Students must maintain a cumulative grade-point average of at least 3.00.
Students who demonstrate accomplishment in dance performance and/or choreography may apply for admission to the MFA program. Applicants select the choreography or the performance emphasis before they are admitted.

The MFA with a major in dance requires the following coursework.

## Dance Core

A total of $29 \mathrm{~s} . \mathrm{h}$. of core coursework is required for students in each emphasis area.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| DANC:4060 | The Contemporary Dance Scene | 3 |

| DANC:6080 | Graduate Production Practicum | 1 |
| DANC:6350 | Graduate Choreography III | 3 |
| DANC:7990 | Thesis (8 s.h. required) | 8 |

## Movement Practices

Choreography emphasis students select 8 s.h. and performance emphasis students select 14 s.h. from the following. Students may count only one somatics course (DANC:3851 Introduction to the

Alexander Technique, DANC:3852 Introduction to the Feldenkrais Method: Posture, Perception, and Pain Relief, or DANC:3853 Introduction to Klein Technique) for this requirement. Additional somatics courses would be counted as electives.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| DANC:3030 | Major Ballet I | 1-3 |
| DANC:3040 | Major Contemporary Movement Practices I | 1-3 |
| DANC:3851/ <br> MUS:3851 | Introduction to the Alexander Technique | 3 |
| DANC:3852 | Introduction to the Feldenkrais Method: Posture, Perception, and Pain Relief | 3 |
| DANC:3853 | Introduction to Klein Technique | 2 |
| DANC:4034 | Ballet Pointe I | 1 |
| DANC:4035 | Ballet Pointe II | 1-2 |
| DANC:5085 | Graduate African Caribbean Dance Practices | 3 |
| DANC:5530 | Graduate Majors Ballet II | 1-3 |
| DANC:5540 | Graduate Contemporary Movement Practices II | 1-3 |
| DANC:6030 | Graduate Majors Ballet III | 1-3 |
| DANC:6040 | Graduate Contemporary Movement Practices III | 1-3 |
| DANC:6540 | Graduate Contemporary Movement Practices IV | 1 |
| DANC:7550 | Graduate Contemporary Movement Practicum | 2-3 |
| DANC:7560 | Graduate Ballet Technique Practicum | 2-3 |

## Emphasis Courses

Students select courses from their emphasis area below.

## Choreography Emphasis

Choreography emphasis students complete $11 \mathrm{~s} . \mathrm{h}$. from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Graduate Choreography IV |  |
| DANC:6450 | Graduate Independent Projects <br> (6 s.h. required; 2 s.h. for each <br> project) | 6 |
| DANC:6990 | Dance Gala Performance |  |
| 2 s.h. from these (additional hours may count as |  |  |
| electives): | Undergraduate Concert | $1-4$ |
| DANC:6880 | Faculty Concert | $1-4$ |
| DANC:6882 | Undergraduate Event | $1-4$ |
| DANC:6883 | MFA Thesis Concert | $1-4$ |
| DANC:6884 | MFA Event | $1-4$ |
| DANC:6885 | Special Project Student | $1-2$ |
| DANC:6887 | Performance | arr. |
| DANC:6888 | Graduate Performance Credit | $1-3$ |

## Performance Emphasis

Performance emphasis students complete 14 s.h. from the following.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Both of these: |  |  |
| DANC:5055 | Embodying Voice/Performing Persona | 3 |
| DANC:6990 | Graduate Independent Projects (4 s.h. required, 2 s.h. for each project) | 4 |
| Minimum of 7 s.h. from these: |  |  |
| DANC:3885 | Repertory Dance Company | 1-3 |
| DANC:6880 | Dance Gala Performance | 1-4 |
| DANC:6882 | Undergraduate Concert | 1-4 |
| DANC:6883 | Faculty Concert | 1-4 |
| DANC:6884 | Undergraduate Event | 1-4 |
| DANC:6885 | MFA Thesis Concert | 1-4 |
| DANC:6887 | MFA Event | 1-2 |
| DANC:6888 | Special Project Student Performance | arr. |
| DANC:6889 | Graduate Performance Credit | 1-3 |

## Electives

Choreography emphasis students select 12 s.h. of electives; performance emphasis students select 3 s.h. of electives. Courses may be in dance or other departments and must be numbered 3000 or above. All students should consult their advisor for approval of elective coursework. Any courses in the lists above may count as electives if the requirements of the particular category are already satisfied. For example, choreography emphasis students may count additional courses from the movement practices curriculum as electives after they have completed their required 8 s.h. Additional dance courses that may count as electives are as follows.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| DANC:3050 | Body/Image: Dance and Media in Discourse and Practice | 3 |
| DANC:3060 | Western Concert Dance History: <br> Romantic to Contemporary | 3 |
| DANC:3070 | Dance Kinesiology | 3 |
| DANC:3600 | Art, Feminist Practice, and Social Justice | 3 |
| DANC:3710/ <br> INTM:3700 | Topics in Intermedia | 4 |
| DANC:3875/ <br> THTR:3875 | Topics in Digital Performing Arts | 3 |
| DANC:3895/ DIGA:3895/ THTR:3895 | Performance, Art, and New Technologies in Society | 3 |
| DANC:4452 | MFA Independent Project Research Lab | arr. |
| DANC:4453 | MFA Thesis Research Lab | r. |
| DANC:4454 | Faculty Creative Research Lab | rr. |
| DANC:4535 | Elementary Ballet Pedagogy | 3 |
| DANC:4545 | Teaching of Modern and Contemporary Dance Forms | 3 |
| DANC:5890/ THTR:5890 | Producing and Directing Digital Video | 3 |
| THTR:3876/ CINE:3876/ <br> DANC:3876/ <br> DIGA:3876/ <br> INTM:3876 | Video for Performance | 3 |

## Admission

Admission is based on a review of submitted choreographic and performance work, letters of recommendation, transcripts, teaching application, statement of purpose, and curriculum vitae. Selected applicants participate in an interview and audition which includes a solo dance, a teaching audition, and when possible, an on-campus visit that includes advanced classes in ballet and contemporary movement practices to determine class placement level.

Demonstrated accomplishment in performance or choreography is a prerequisite for admission to the program. For more information, see Graduate Program on the Department of Dance website.
Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Career Advancement

Graduates establish successful, professional careers as professors in higher education and as dance-makers and artistic directors, performers in regional and national companies, writers who contribute to knowledge in the field, and teachers for the next generation of dancers.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Data Science

## Chair, Department of Statistics and Actuarial Science

- Kung-Sik Chan

## Director of Undergraduate Studies, Data Science

- Sanvesh Srivastava

## Director of Graduate Studies

- Aixin Tan

Undergraduate major: data science (BS)
Graduate degree: MS in data science
Faculty: https://stat.uiowa.edu/people
Website: https://stat.uiowa.edu
The BS in data science produces graduates with the sophisticated analytical and computational skills required to thrive in a quantitative world where new problems are encountered at an ever-increasing rate. The major emphasizes the statistical/probabilistic and algorithmic methods that underlie the preparation, analysis, and communication of complex data. With focus on technical foundations, the data science program promotes skills useful for creating and implementing new or special-purpose analysis and visualization tools. It also promotes a fundamental understanding of how to best handle uncertainty when making data-driven decisions.

The MS in data science trains the next generation of data scientists who have the analytical and technical skills to explore, formulate, and solve complex data-driven problems in science, industry, business, and government. The program focuses on the theory, methodology, application, and ethics for working with and learning from data. With an emphasis on statistical thinking and foundations, the program rigorously prepares its graduates with the abilities to develop and implement new or special purpose analysis and visualization tools. It promotes a fundamental understanding of how to quantify uncertainty in data-driven decision-making.

The BS and MS in data science are administered by the Department of Statistics and Actuarial Science [p. 1047].

## Programs

## Undergraduate Program of Study

## Major

- Major in Data Science (Bachelor of Science) [p. 356]

## Graduate Program of Study

## Major

[^2]
## Data Science, BS

## Learning Outcomes

## Data Curation Skills

Graduates will be able to:

- understand issues associated with data collection, management, provenance, storage, merging, sharing, and preparation;
- work with multiple-source, multiple-format data;
- investigate the quality of the data; and
- have a basic understanding of ethical and confidentiality issues associated with data collection, storage, merging, and sharing.

## Computational Skills

Graduates will be able to:

- use critical thinking skills to translate substantive questions into well-defined computational problems and choose appropriate computational techniques for a given problem;
- understand the foundational software skills and associated algorithmic and computational problem-solving methods used in computer science;
- be proficient in computational methods for collecting, managing, storing, preparing, sharing, and describing data numerically and graphically from a variety of sources to design and carry out basic simulation studies; and
- use professional statistical software and understand the principles of programming and algorithmic problem solving that underlie these packages.

## Statistical/Probabilistic Skills

Graduates will be able to:

- use critical thinking skills to translate substantive questions into well-defined statistical or probability problems and choose the appropriate graphical or numerical descriptive and/or inferential statistical techniques for a given problem;
- understand the importance of, and issues related to, the choice of the study design, such as designed experiment versus probability sample versus convenience sample, used to produce data;
- understand that uncertainty, variability, and randomness play significant roles in data-driven decision-making;
- understand how to measure and display uncertainty, the effect of randomness, confidence/credibility, and the likelihood of incorrect inferences;
- understand and be able to explain common misperceptions, paradoxes, and fallacies of probability and statistics; and
- understand basic regression, prediction, simulation, and visualization methods.

## Mathematical Skills

Graduates will:

- have a firm grasp of the mathematical tools underlying statistical and computational methods which are primarily based on ideas in calculus, linear algebra, and discrete mathematics, including distribution theory, uncertainty quantification (e.g., probability theory), the probabilistic basis of formal statistical inference, models, and algorithms, and combinatorial analysis and recursion, which are used for algorithmic analysis, design, and for distribution theory.

## Communication Skills

Graduates will be able to:

- clearly justify and communicate study results to a nontechnical audience;
- write accurate and meaningful reports that describe the statistical and computational analyses and summarize important findings; and
- work effectively as part of a team to address substantive questions that can be handled using statistical and computational methods.

## Requirements

The Bachelor of Science with a major in data science requires a minimum of 120 s.h., including at least 59 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].
Data science majors may not earn a major or minor in computer science or statistics, a major in computer science and engineering, or the Certificate in Social Science Analytics.

The BS with a major in data science requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Prerequisite Courses | $12-16$ |
| Core Courses | 26 |
| Advanced Courses | 9 |
| Advanced Electives | 9 |
| Capstone Courses | 3 |

## Prerequisite Courses

Students choose one of the following sequences.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| These: |  |  |
| MATH:1550 | Engineering Mathematics I: | 4 |
| MATH:1560 | Single Variable Calculus | 4 |
| MATH:2700 | Multivariable Calculus | 4 |
| Or these: | Introduction to Linear Algebra | 4 |
| MATH:1850 |  |  |
| MATH:1860 | Calculus I | 4 |
| MATH:2700 | Calculus II | 4 |
| MATH:2850 | Introduction to Linear Algebra | 4 |

## Core Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | 4 |

| :--- | :--- | ---: |
| Both of these: | Data Science Creative <br> Component | 1 |
| DATA:4880 | Data Science Practicum | 2 |

The Department of Statistics and Actuarial Science [p. 1047] and the Department of Computer Science [p. 296] collaborate to offer the major in data science.

Applied Linear Regression

## requirement for University of Iowa honors students

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the data science major.

## Career Advancement

Today, nearly every business, government, social media platform, and educational institution collects and analyzes data about its users, logistics and operations, and media presence in the hope of extracting valuable insights and utilizing the resulting efficiencies.
As an example, Amazon is the company most closely identified with a data-driven business model. Starting just over 25 years ago as an online book seller with a relatively crude crowdsourced book review platform and simple recommender system technology, it was subsequently augmented with extensive tracking of customer page views, advertising hits, data about prior purchases, and an aggressive emphasis on data-driven operational efficiencies. Amazon has become the major player in U.S. retail and a prime example of the strategic value of big data.

Data science graduates may pursue careers as data scientists. This position allows them to apply their understanding of statistics, as well as algorithm and software design, to create and develop the next generation of data analysis tools.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The Four-Year Graduation Plan is not available to students majoring in data science. Students work with their advisors on individual graduation plans.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Enrollment in math courses requires completion of a placement exam.
c Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
d GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
e Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
f Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
g Typically STAT:4540 is offered in fall semesters only and CS:5430 is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
h Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
i Students should select at least one computer science course and one statistics course for their advanced electives.
j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Data Science, MS

## Learning Outcomes

Graduates will be able to:

- understand the fundamental concepts in probability and statistics that underlie commonly used data science algorithms;
- write efficient Python and R codes for data processing and data wrangling (data storage, access, and management) and computing for data analysis and modeling;
- use visualization techniques to display salient data features;
- use data technologies to process complex data;
- correctly and effectively implement appropriate algorithms for learning with data;
- identify and criticize inappropriate/unethical uses of data and/or algorithms;
- acquire effective communication skills for disseminating findings; and
- work with data stakeholders to help collect and analyze data.

The program aims to train the next generation of data scientists with the analytical and technical skills to explore, formulate, and solve complex data-driven problems in science, industry, business, and government. The program focuses on the theory, methodology, application, and ethics for working with and learning from data. Students acquire the abilities to develop and implement new or special purpose analysis and visualization tools, and a fundamental understanding of how to quantify uncertainty in data-driven decisionmaking.

## Requirements

The Master of Science program in data science requires 30 s.h. of graduate credit. Students must maintain a grade-point average of at least 3.00 in all work toward the degree and in additional relevant course work.

Coursework includes core courses covering the fundamentals of data science including probability and statistics; data storage, access, and management; and data visualization, exploration, modeling, analysis, and uncertainty quantification. Students acquire hands-on experience in solving real-world problems, communication skills, and data ethics via a required capstone project. Students choose electives from a wide variety of courses on specialized data science topics offered by the departments of Statistics and Actuarial Science, Computer Science, Business Analytics, and Biostatistics to enhance their skill sets based on their interests and career goals.

The MS with a major in data science requires the following coursework.

| Course \# | Title | Hours |

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Career Advancement

The program prepares graduates for careers in academia, industry, business, or government that involve data visualization and modeling, managing reproducible data analysis workflows, and collaborating and communicating with scientists and other data stakeholders.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be
discussed with an academic advisor. For additional sample plans, see MyUI.

b Work with faculty advisor to select appropriate coursework.
c Completion of capstone project.

# Disability Studies 

Chair, Department of Health and Human Physiology

- Gary L. Pierce

Coordinator, Disability Studies

- Kristina M. Gordon (Health and Human Physiology)

Undergraduate certificate: disability studies
Website: https://clas.uiowa.edu/hhp/undergraduate/disability-studiescertificate

Disability studies examines disability as a social, cultural, historical, and political phenomenon rather than focusing on its clinical, medical, or therapeutic aspects. It is an interdisciplinary and multidisciplinary field that draws on scholarship from diverse disciplines, including anthropology, architecture, the arts, communication and media studies, cultural studies, economics, gender studies, geography, global studies, history, law, literature, medicine, nursing, philosophy, policy studies, political science, religious studies, social work, and sociology.
The certificate program helps students expand their knowledge and awareness of disability issues and prepare for careers in a variety of fields. Its multidisciplinary nature makes disability studies a good complement to a broad range of undergraduate majors.

Students who complete the certificate develop:

- understanding of the history of disabilities in America;
- awareness of how culture and society define disability;
- the ability to interact with individuals from diverse backgrounds;
- a personal philosophy of treating people fairly, equitably, and thoughtfully; and
- greater understanding of and concern for public policy issues and active citizenship.
The certificate program in disability studies is administered by the Department of Health and Human Physiology [p. 581].

## Programs

## Undergraduate Program of Study

## Certificate

- Certificate in Disability Studies [p. 362]

## Courses

## Disability Studies Courses

## DST:1000 First-Year Seminar

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

## DST:1101 Introduction to Disability Studies 3 s.h.

Introduction and overview of important topics and discussions that pertain to the experience of being disabled; contrast between medical and social models of disability; focus on how disability has been constructed historically, socially, and politically in an effort to distinguish myth and stigma from reality; perspective that disability is part of human experience and touches everyone; interdisciplinary with many academic areas that offer narratives about experience of disability. GE: Diversity and Inclusion.

DST:1200 Disabilities and Inclusion in Writing and Film Around the World
Exploration of human experiences of dis/ability and exclusion/ inclusion. Taught in English. GE: Diversity and Inclusion. Same as GHS:1200, GRMN:1200, WLLC:1200.

DST:3200 Bioethics, Health, and Disability arr.
There is always room for learning to think more carefully about any ethical dilemmas that might be encountered in potential future roles as health care or social service professionals; students take a more fundamental look at issues affecting health care and social services access for people with disabilities than presently occurs.

## DST:3201 Advanced Disability Studies: Contemporary Issues and Research Methods 3 s.h.

Advanced exploration and discussion of contemporary issues, concepts, and research in disability studies; investigation of domains of disability in society (i.e., history, politics, health care, housing, recreation, media); engagement with disability related organizations; application of a global social justice perspective to disability rights and equity; exploration of disability as a culture, identity, and variation on the continuum of human existence. Requirements: DST:1101.

DST:4198 Practicum in Therapeutic Recreation 1-3 s.h.
Educational opportunity in inclusive and therapeutic recreation professional settings; development of skills, techniques, and proficiencies under guidance of experienced professionals and academic supervisors; students gain experience with various populations and differing abilities; academic research, in-class preparation, and off-campus work with designated agency. Same as TR:4197.

## Disability Studies, Certificate

## Requirements

The undergraduate Certificate in Disability Studies requires a minimum of 19 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in work for the certificate.

The certificate may be earned by any student admitted to the University of Iowa who is not enrolled in a UI graduate or professional degree program. Undergraduate to Graduate (U2G) students may earn the certificate when the undergraduate classification is primary.

The Certificate in Disability Studies requires the following coursework.

## Core Courses

Students earn 11-12 s.h. by taking the following four core courses.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Both of these: |  |  |
| DST:1101 | Introduction to Disability Studies | 3 |
| DST:3201 | Advanced Disability Studies: Contemporary Issues and Research Methods | 3 |
| One of these: |  |  |
| EDTL:4940 | Characteristics of Disabilities | 3 |
| TR:3162 | Therapeutic Recreation: Clientele | 3 |
| And one of these: |  |  |
| EDTL:2073 | Finding Your Comfort Zone: Secrets to Success | 3 |
| EDTL:4967 | Integrated Disability Studies Practicum | 2 |

## Focused Elective Courses

Students earn a minimum of $7-8$ s.h. in focused electives to earn a total of at least 19 s.h. for the certificate, which they select from courses in at least two of the following lists (maximum of 6 s.h. from any one list). They may count a maximum of 3 s.h. earned in courses numbered below 3000 toward this requirement.

| Course \# | Title | Hours |

## Division of Interdisciplinary

## Programs

## Director

- Cornelia C. Lang (Physics and Astronomy)

## Website: https://interdisciplinaryprograms.uiowa.edu/

The Division of Interdisciplinary Programs includes four academic units: Enterprise Leadership, Global Health Studies, Interdepartmental Studies, and Latina/o/x Studies.

The academic units within the division offer three BA degrees, one BS degree, two minors, and a certificate.
Enterprise Leadership [p. 429] provides an option for students who want to focus on entrepreneurial business leadership. The major presents a unique blend of skills, theory, and content, encouraging students to apply their knowledge and skills to entrepreneurial and growing organizations. It is designed to prepare students for career success-whether they desire to be an innovator inside a large organization or aspire to be an entrepreneur and launch their own business one day. The program offers a combination of business and liberal arts approaches and allows students to hone their skills in innovation, entrepreneurship, communication, critical thinking, problem solving, and leadership. Enterprise Leadership offers a BA degree.
The Global Health Studies Program [p. 562] builds upon the humanities, social sciences, and health sciences to help students understand underlying forces-such as history, culture, gender and sexuality, economics, politics, race and ethnicity, the environment, law, and technology-which lead to health disparities worldwide. This program offers a BA degree, a BS degree, a minor, and a graduate certificate.

Interdepartmental Studies [p. 656] gives students the opportunity to choose a preapproved plan of study in applied human services, business studies, or health science, or to design an individualized plan of study. Each track includes coursework from a variety of departments. Interdepartmental Studies offers a BA degree.

Latina/o/x Studies [p. 745] offers an interdisciplinary perspective on the history, culture, politics, and experiences of Latina/o/x populations in the United States. Latina/o/x Studies introduces the peoples that have a long-term presence in the United States and in the Midwest and who are increasingly neighbors, classmates, and coworkers. This program offers an undergraduate minor.

# Division of World Languages, Literatures and Cultures 

## Director

- Jill N. Beckman (Linguistics)

Faculty: https://dwllc.uiowa.edu/people
Website: https://dwllc.uiowa.edu/
The Division of World Languages, Literatures and Cultures includes several academic units: the departments of Asian and Slavic Languages and Literatures, French and Italian, German, Linguistics, and Spanish and Portuguese, and the programs in American Sign Language, English as a Second Language, International Studies, Latin American Studies, Second Language Acquisition, and Translation. In addition to providing administrative leadership for all of its units, the division fosters interdisciplinary scholarship in languages, literatures, and cultures. It encourages synergy and collaboration among its faculty and enhances opportunities for cross-cultural course development and research.

Undergraduate and graduate programs in the division serve students with varied interests and career aspirations. Students are educated to become global citizens who understand and are understood by diverse populations. They are trained to be critical thinkers and problem solvers who are also capable scholars, lucid writers, and proficient speakers.

The division offers instruction in numerous fields related to language, literature, and culture.

- American Sign Language Program [p. 48]: American Sign Language
- Department of Asian and Slavic Languages and Literatures [p. 141]: Chinese, Japanese, Korean, Russian
- Department of French and Italian [p. 472]: Arabic, French, Italian, Swahili
- Department of German [p. 551]: German
- Department of Linguistics [p. 748]: Linguistics, English as a Second Language
- Department of Spanish and Portuguese [p. 1018]: Portuguese, Spanish

The Division of World Languages, Literatures and Cultures also serves as the administrative home for International Studies [p. 690], Latin American Studies [p. 739], Second Language Acquisition [p. 967], and Translation [p. 1093].
The Department of Linguistics [p. 748] provides scientific study of familiar languages, as well as less well-known languages. The division's Second Language Acquisition Program [p. 967] brings multidisciplinary resources together to examine the processes that underlie non-native-language learning. The Translation [p. 1093] programs of study explore the literary, cultural, and historical contexts of work and their linguistic, aesthetic, and ideological dimensions while it builds skills for translating works from one language to another.

## Facilities

The Center for Language and Culture Learning provides a wide variety of facilities and services to the Division of World Languages, Literatures and Cultures (DWLLC), including a 24-computer Instructional Technology Center (ITC), five All-In-One Studios/ small group study rooms equipped with video production and editing software, a Computer Assisted Language Learning Lab with 25
computers integrated with Sanako software for language practice, and virtual reality hardware and development space.
The center provides spaces for quiet study as well as for group meetings. Departments, programs, and student organizations are welcome to host conversation hours, film nights, study groups, workshops, and more. Peer education services include peer tutoring programs in many of the languages taught in DWLLC, with both in-person and online availability, as well as Directed Independent Language Study, through which faculty, staff, or students can be paired with a tutor to learn a language not taught in the DWLLC. Tutors are trained to use the Three Ms for Effective Learning, which include developing a growth mindset, using memory strategies to retain knowledge, and reflecting on learning gains.

## Courses

## World Languages, Literatures and Cultures Courses

Most Division of World Languages, Literatures and Cultures courses are offered by the division's departments and programs. They are listed and described in the corresponding General Catalog sections.

## CL:2248 The Invention of Writing: From Cuneiform to Computers

3 s.h.
Invention of writing as one of the most momentous events in the history of human civilizations; how the use of written sign systems, notations, maps, graphs, encryptions, and most recently, computer programs have consequences that reach deeply into all aspects of people's lives; how writing fascinates and delights, fosters reflexive thinking and facilitates development of complex societies, and gives rise to institutions of social power and control; students explore the invention of writing and its consequences in broad international and interdisciplinary context. Taught in English. Same as ANTH:2248, ASIA:2248, CLSA:2048, COMM:2248, GRMN:2248, HIST:2148, IS:2248, LING:2248, TRNS:2248, WLLC:2248.
CL:3222 City as Text/Text as City 3 s.h.
Ways of reading cities: how built environments are shaped by history; how European cities differ from American or postcolonial cities; how to map, inhabit, remember, touch, smell, and experience a city; what is a global city; what is a sustainable city; how city spaces are felt in terms of gender, class, race, and ethnicity; models that architects, planners, politicians, and designers use to create habitable spaces; how to think of texts as cities (i.e., as spaces where people congregate, meet, live); research paper that combines class readings with independent research on a city of students' choice.

## CL:4800 Seminar in Comparative Literature 3 s.h.

Focus on comparative, interdisciplinary, theoretical, and/or interarts topic; topics vary; required for comparative literature major.
Taught in English. Same as GRMN:4800, GWSS:4800, TRNS:4800, WLLC:4801.
CL:4900 Independent Study arr.
WLLC:1000 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first-semester standing.
WLLC:1016 Classical Chinese Short Fiction
1 s.h.
Reading and discussion of classical Chinese short fiction in English translation. Taught in English. Recommendations: completion of required ESL courses. Same as ASIA:1016.

## WLLC:1131 Introduction to Russian Culture

Development of cultural history in Russia during the Romanov period (1613-1917); painting, music, architecture, and literature viewed against their political, historical, and social settings. Taught in English. GE: Values and Culture. Same as RUSS:1131.

## WLLC:1200 Disabilities and Inclusion in Writing and Film Around the World

Exploration of human experiences of dis/ability and exclusion/ inclusion. Taught in English. GE: Diversity and Inclusion. Same as DST:1200, GHS:1200, GRMN:1200.

## WLLC:1510 Ghost Stories and Tales of the Weird in Premodern Chinese Literature

Reading of Chinese literature concerning ghosts, marvels, and supernatural from the first millennium B.C.E. through the 1800s; readings analyzed against changing historical and religious contexts.
Taught in English. Recommendations: completion of all required ESL courses. GE: Interpretation of Literature. Same as ASIA:1510.

## WLLC:1600 Wonder Woman Unleashed: A Hero for Our

## Times

3 s.h.
Development of the woman warrior archetype in mythology (Athena/ Minerva and Artemis/Diana), literature (Camilla from The Aeneid by Virgil), and history (Artemisia and Joan of Arc); focus on the development of Amazon narratives in Metamorphoses by Ovid, The Book of the City of Ladies by Christine de Pizzan, and On Famous Women by Boccaccio; students read Wonder Woman Chronicles and one or two critical studies on the subject, which may include The Secret History of Wonder Woman by Jill Lepore. Same as GWSS:1600.

## WLLC:2001 Global Science Fiction

Science fiction from around the world; spanning poetry, fiction, drama, film, television, comics, mobile phone games, and music; produced on six continents. Taught in English. GE: Diversity and Inclusion. Same as ASIA:2001, FREN:2010, RUSS:2001, TRNS:2001.

## WLLC:2006 Transnational Solidarities 3-4 s.h.

Examination of connections forged by intellectuals, activists, and political thinkers in struggles against systems of colonialism, imperialism, capitalism, and state violence throughout the 20th century; opportunities to make connection with other struggles against racism, supremacy, patriarchy, and domination; optional discussion section taught in Arabic. Taught in English. Requirements: for 4 s.h. option-ARAB:1002. Same as ARAB:2006.

## WLLC:2050 Women from an Unknown Land: The Fight for Independence 3 s.h.

Exploration of past and current issues related to the Caucasus-a mountainous region located where Europe, the Middle East, and Asia meet-forming a geographical and cultural crossroad; topics include those related to women's rights, causes of poverty and ethnic conflicts, and foreign policy including terrorism in the region, the fight for freedom, and the struggle over natural resources. Taught in English. GE: International and Global Issues. Same as RUSS:2050.
WLLC:2222 Women in Premodern East Asian Literature 3 s.h. Reading of East Asian literature portraying women from the first millennium B.C.E. through the 1800s; discussion of issues related to representations of women and conventional social, familial roles in premodern China, Korea, and Japan; cross-cultural comparison of different perceptions and portrayals of women in premodern East Asian literary traditions. Taught in English. Recommendations: completion of all ESL courses. GE: Diversity and Inclusion. Same as ASIA:2222, GWSS:2222.

3 s.h. WLLC:2248 The Invention of Writing: From Cuneiform to Computers
Invention of writing as one of the most momentous events in the history of human civilizations; how the use of written sign systems, notations, maps, graphs, encryptions, and most recently, computer programs have consequences that reach deeply into all aspects of people's lives; how writing fascinates and delights, fosters reflexive thinking and facilitates development of complex societies, and gives rise to institutions of social power and control; students explore the invention of writing and its consequences in broad international and interdisciplinary context. Taught in English. Same as ANTH:2248, ASIA:2248, CL:2248, CLSA:2048, COMM:2248, GRMN:2248, HIST:2148, IS:2248, LING:2248, TRNS:2248.

WLLC:2473 Cinderella 3 s.h. Comparative analysis of Cinderella stories from around the world including Asia, Europe, Africa, South America; readings, discussion, workshops, and writing; consideration of visual and material presentation of Cinderella stories in physical books. Taught in English. Same as FREN:2473, TRNS:2473.
WLLC:2550 Mardi Gras and More: Cultures of Carnival 3-4 s.h. Literature and customs associated with carnival from the Renaissance through present day; readings on theories of carnivalesque; survey of various carnival cultures ranging from Nuremberg carnival plays around 1450 to current traditions in Rio de Janeiro, Trinidad, New Orleans, and elsewhere. Taught in English. GE: Values and Culture. Same as GRMN:2550.

WLLC:2618 Film and Literature of the Holocaust 3-4 s.h. European and American films (e.g., documentaries, feature films); literature of the Holocaust in English translation (e.g., survivor memoirs, testimony, poetry, philosophical essays, graphic novels). Taught in English. GE: Values and Culture. Same as GRMN:2618.

## WLLC:2620 Anne Frank and Her Story 3-4 s.h.

Analysis of the Diary of Anne Frank, its media adaptations, and related materials (e.g., fictionalizations, additional first-hand accounts); examination of Holocaust in the Netherlands, Belgium, and other countries outside Germany; anti-Semitism, discrimination, tolerance, resistance, identity formation, human aspiration and belief. Taught in English. GE: Diversity and Inclusion. Same as GRMN:2620.

WLLC:2666 Pact with the Devil 3-4 s.h.
Pact with the devil has served as a metaphor for humankind's desire to surpass the limits of knowledge and power and engage with the forbidden; students explore a variety of works-mostly from German literature and culture-from early modern time to present, and critique different twists that fascination with the forbidden takes with regard to women. Taught in English. GE: Literary, Visual, and Performing Arts. Same as GRMN:2666.
WLLC:2949 Accountability, War Crimes, and Justice 3-4 s.h. Introduction to current juridical and nonjuridical approaches to hold perpetrators (e.g., states, state actors, individuals) of war crimes accountable in international criminal and humanitarian law; students examine concepts such as universal jurisdiction, which has been successfully deployed in German courts, and corporate accountability through recent case studies. Taught in English. Same as GRMN:2949.
WLLC:3000 Big Ten Academic Alliance CourseShare: LowerLevel Language 0-5 s.h.
Opportunity for students from universities across the Big Ten to participate in language courses together; part of the Big Ten Academic Alliance (BTAA) CourseShare program; not an elementary/ intermediate language sequence.

## WLLC:3001 Big Ten Academic Alliance CourseShare:

 Elementary I1-6 s.h.
Opportunity for students from universities across the Big Ten to participate in courses together; part of the Big Ten Academic Alliance (BTAA) CourseShare program; first in a language sequence.
WLLC:3002 Big Ten Academic Alliance CourseShare: Elementary II

1-6 s.h.
Opportunity for students from universities across the Big Ten to participate in courses together; part of the Big Ten Academic Alliance (BTAA) CourseShare program; second in a language sequence. Requirements: WLLC:3001 or equivalent language background.

## WLLC:3003 Big Ten Academic Alliance CourseShare:

 Intermediate I1-6 s.h.
Opportunity for students from universities across the Big Ten
to participate in courses together; part of the Big Ten Academic
Alliance (BTAA) CourseShare program; third in a language sequence. Requirements: WLLC:3002 or equivalent language background.

WLLC:3004 Big Ten Academic Alliance CourseShare: Intermediate II

1-6 s.h.
Opportunity for students from universities across the Big Ten to participate in courses together; part of the Big Ten Academic Alliance (BTAA) CourseShare program; fourth in a language sequence.
Requirements: WLLC:3003 or equivalent language background.

## WLLC:3005 Big Ten Academic Alliance CourseShare: Upper-

 Level Language1-6 s.h.
Opportunity for students from universities across the Big Ten to participate in language courses together; part of the Big Ten Academic Alliance (BTAA) CourseShare program. Requirements: WLLC:3004 or equivalent language background.
WLLC:3105 Contraception Across Time and Cultures 3 s.h. Methods and history of contraception; issues of unwanted pregnancy and birth control in fiction, film, and media around the world. Same as CLSA:3105, GHS:3105, GWSS:3105.

WLLC:3122 Tolstoy and Dostoevsky 3-4 s.h.
Tolstoy's War and Peace and Anna Karenina; Dostoevsky's Crime and Punishment, The Demons, and short stories. Taught in English. Same as RUSS:3122, TRNS:3122.

## WLLC:3185 Global Women's Cinema

3 s.h.
Introduction to contemporary women's cinema and feminist
filmmaking from around the world; emphasis on post-1968 period and cinema produced outside the United States. Same as GWSS:3185.
WLLC:3191 International Literature Today
1,3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature. Same as ENGL:3595, IWP:3191, TRNS:3191.
WLLC:3202 Russian Literature in Translation 1860-1917 3 s.h. Survey of major works, figures, and trends of 19th- and early 20thcentury Russian literature; age of the Russian novel; works of Turgenev (Fathers and Sons), Tolstoy (Confession), Dostoevsky (The Idiot, The Brothers Karamazov), and Chekhov (plays). Taught in English. Same as HIST:3492, RUSS:3202, TRNS:3203.

## WLLC:3208 Classical Chinese Literature Through

## Translation

3 s.h.
Reading of English translations of classical Chinese literature; discussion of special features of classical Chinese as a source language for translation; issues in translation practice and theory with focus on trends in translation of Classical Chinese literary works to English. Taught in English. Recommendations: completion of required ESL courses. Same as ASIA:3208, TRNS:3208.

WLLC:3210 Comparative Arts
3 s.h.
Cultural and aesthetic issues arising from side-by-side investigation of several art forms, including literature, cinema, painting, music, opera, architecture; periods, schools, styles, and their theories. Taught in English. Same as ASIA:3210, FREN:3210, IWP:3210.

## WLLC:3700 Topics in Global Cinema

3 s.h.
Identification of new models and methods to investigate cinema's relationship to current global issues beyond traditional scholarly focus in Western Europe and the United States; exploration of an emerging field, moving away from the paradigm of national cinema and bringing together shared theoretical frameworks while acknowledging different historical and cultural contexts. Taught in English. Same as ASIA:3700, JPNS:3700, TRNS:3700.
WLLC:3991 Cultural Studies Conference
1 s.h.
Attendance and participation in a conference of importance to world and cultural studies; discussion of preparatory readings in weekly meetings.

## WLLC:4131 Critical Reading

3 s.h.
Analysis of different types of texts-theoretical, cultural, political, philosophical, literary, poetic-and exploration of varying ways to frame and read them. Same as TRNS:4131.

## WLLC:4210 Slavery Museums, Memorials, and Statues in the

 United States, Europe, and the Global South 3-4 s.h.Comparative study of museums, memorials, statues, performances, and artistic works that encapsulate the entangled history and memory of transoceanic slave trades and slavery in the United States, the Caribbean, the Indian Ocean, Sub-Saharan Africa, and Europe (France and the United Kingdom); critical tools to analyze public debates over politically charged monuments; exploration of transnational and political predicaments of the contemporary world; approaches include trauma theories, memory studies, history, postcolonial ecocriticism, cultural anthropology, heritage studies and museology, and Francophone cultural critique. Taught in English. Requirements: for 4 s.h. option—prior enrollment in FREN:3060 and FREN:3300. Same as FREN:4210, MUSM:4310.
WLLC:4801 Seminar in Comparative Literature 3 s.h. Focus on comparative, interdisciplinary, theoretical, and/or inter-arts topic; topics vary; required for comparative literature major. Taught in English. Same as CL:4800, GRMN:4800, GWSS:4800, TRNS:4800.

## WLLC:4990 Independent Study

arr.

3 s.h.

## WLLC:5000 Teaching and Learning Languages

Readings in pedagogical theory and practice, second language acquisition; experience designing activities for teaching and assessment with critiques based on current theories and approaches; development of reflective practices toward one's language teaching. Taught in English. Same as FREN:5000, GRMN:5001, SLA:5000, SPAN:5000.
WLLC:5005 Heritage and Dual Language Teaching 3 s.h. Theoretical issues (e.g., ideological, educational, linguistic) of heritage language teaching and learning; pedagogical issues including curriculum development and assessment for dual language programs in the United Statues; focus on teaching heritage language learners (those who learned a language other than English at home) or dual language education (those who develop academic skills in their native language while building skills in a different language) in the United States. Taught in English. Same as SPAN:5005.
WLLC:6320 Topics in Contemporary Critical Theory 3 s.h.
Focused discussion of critical discourses and paradigms that have contributed to development of contemporary literary and cultural theory.

WLLC:6965 Topics in Second Language Acquisition:

## Writing

3 s.h.
Theory, pedagogy, research, and assessment in second language writing. Taught in English. Same as RHET:6965, SPAN:6965.
WLLC:7001 Language Justice: Multilingual Community

## Engagement and Scholarship 3 s.h.

Application of language justice to lived experiences of multilingual individuals; exploration of how communities can incorporate language justice into shared spaces and interactions within those spaces; engagement with local community groups that support multilingual Iowans whose personal language practices are less valued than the default monolingual English norm. Taught in English. Same as SPAN:7001.

# Earth and Environmental Sciences 

## Chair

- David W. Peate

Undergraduate major: geoscience (BA, BS)
Undergraduate minor: geoscience
Graduate degrees: MS in geoscience; PhD in geoscience
Faculty: https://clas.uiowa.edu/ees/people
Website: https://clas.uiowa.edu/ees/
Faculty and students in the Department of Earth and Environmental Sciences study the physical, chemical, and biological systems of Earth. Using modern observational, analytical, and computational methods, they examine how the planet's interior, surface, hydrosphere, biosphere, and atmosphere have evolved since Earth was born in the solar system 4.6 billion years ago. Topics commonly studied in the department include how plate movements cause earthquakes, volcanoes, and mountain building; global climate change and how climate change and catastrophic events cause changes in biodiversity; mass extinctions and patterns of evolution through Earth's history; how and where economic resources are generated on Earth; and how these resources are located and used in modern society.
The earth and environmental sciences curriculum provides students with hands-on experience analyzing rocks, minerals, fossils, soils, and waters, generally in a small classroom setting. Much of this experience is obtained in laboratory and field courses. Field courses include travel to other states or countries to view Earth's materials and fossils in the context of their natural surroundings.

The department offers a variety of courses appropriate for nonmajors, including several approved for the Natural Sciences requirement of the GE CLAS Core [p. 19]; see "Courses for Nonmajors" below.

## Courses for Nonmajors

Each year more than 1,800 students enroll in Department of Earth and Environmental Sciences introductory courses that are approved for GE CLAS Core; look for courses with the prefix EES under "Natural Sciences" in the GE CLAS Core section of the catalog.

The department also offers the following upper-level courses with few or no prerequisites.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EES:3020 | Earth Surface Processes | 3 |
| EES:3070 | Marine Ecosystems and | 3 |
|  | Conservation | 2 |
| EES:3080 | Introduction to Oceanography | 4 |
| EES:3100 | Earth and Planetary Remote |  |
|  | Sensing | 3 |

## Cooperative Activities

The department does collaborative work with the Iowa Geological Survey and the Office of the State Archaeologist of Iowa. Earth and environmental sciences students sometimes work on projects for the survey.
The departments of Anthropology, Biology, Chemistry, Earth and Environmental Sciences, and Geographical and Sustainability Sciences (College of Liberal Arts and Sciences) and the Department of Civil and Environmental Engineering (College of Engineering)
share services, expertise, joint instruction, and equipment. The Department of Earth and Environmental Sciences is an important participant in the Iowa Quaternary Studies group, an interdisciplinary program that promotes projects combining work in anthropology, biology, geography, geology, and statistics. Coursework, degree programs, and facilities are shared among departments. The Department of Earth and Environmental Sciences and its faculty also support and actively participate in the interdisciplinary Environmental Sciences Program [p. 447], which offers two undergraduate majors and a minor, and a number of the department's courses satisfy requirements of the undergraduate Certificate in Sustainability [p. 2101].

## Field Trips

Field trips are integral parts of several courses in earth and environmental sciences. The geology of the Iowa City region is characterized by Quaternary glacial sediments on a largely Paleozoic sedimentary section a few hundred meters thick, overlying a Precambrian crystalline basement. Marine and terrestrial fossil assemblages, extensive reefs, and unique geode sites are located within a few hours' drive. Numerous Pleistocene glaciations are represented in Iowa, and field studies of landforms, exposures, and cores continue to yield information on sedimentology, stratigraphy, soil formation, paleopedology, and fossil biotas from both glacial and interglacial deposits.

Spring break and summer provide time for longer trips, which are open to all earth and environmental sciences students. In recent years, students have traveled to the southern Appalachians, Arizona, China, Death Valley, the Dominican Republic, the Florida Keys, Hawaii, New Mexico, the Ozarks, Puerto Rico, and Texas. Advanced classes have visited California, Colorado, Kansas, Montana, Oklahoma, Wisconsin, and Ontario, Canada.

## Programs

## Undergraduate Programs of Study

## Majors

- Major in Geoscience (Bachelor of Arts) [p. 375]
- Major in Geoscience (Bachelor of Science) [p. 379]

## Minor

- Minor in Geoscience [p. 383]

## Graduate Programs of Study

## Majors

- Master of Science in Geoscience [p. 384]
- Doctor of Philosophy in Geoscience [p. 386]

## Facilities

Resources and equipment available for research in the Department of Earth and Environmental Sciences include the following.

Computer facilities: three teaching classrooms with 10-12 networked PC workstations; a computing classroom with 20 PCs and 10 Mac workstations with GIS, GMS, remote sensing, image analysis, and specialized computational software packages; a student computer room with six PCs and two Macs; and a number of multiprocessor workstations in research laboratories.

Electron microprobe: JOEL JXA-8230 electron probe microanalyzer with five wavelength-dispersive spectrometers capable of
quantitatively analyzing a full spectrum of elements in solid materials to a spot size as small as one micron.
Environmental and Hydrogeology Laboratory: permeameters and tensionometers; pumping and slug/bail test units with transducers and data-loggers; water-quality analysis facility; advanced groundwater modeling and geostatistics software; advanced data logging systems for field research; 3D sensor arrays (wind and water systems); and facilities for field instrumentation design and construction.

Environmental instrumentation laboratories: storage, testing, and teaching facility focusing on field instrumentation; assembly, housing, and testing of climatic, meteorological, fluvial, water quality and associated environmental instrumentation data recording systems and sampling systems.
Geomorphic Computing Laboratory: high-end visualization, digitizing, remote sensing, and GIS systems; and high-end multiprocessor workstations.
Mineral Separation and Geochronology Preparation Facility: jaw crushers, disk pulverizer, shaker table, electromagnetic separators, and heavy liquid separation equipment for mineral separation; core drill apparatus and saws for removing grains from thin sections and slabs; microscopes and digital imaging for grain selection and characterization; polishing equipment for slabs, thin section stubs, and grain mounts; natural standards for co-mounting with unknowns prior to analysis at a variety of geochronology facilities.

Morphometric laboratories: reflex microscope and microscribe for capturing 3D data; high-resolution digital cameras and microscopes for 2D image analysis; and laboratories for micro- and macro-fossil preparation.
Paleontological Repository: more than a million specimens, including some 25,000 type and referred specimens, with 6,000-7,000 primary types; invertebrate, vertebrate, and plant fossils of all geologic ages, and more than $90 \%$ Paleozoic invertebrates; one of the largest university collections in North America.

Petrology and geochemistry laboratories: laser-ablation inductively coupled plasma mass spectrometer (LA-ICPMS); clean laboratory for preparation of samples for elemental and isotopic analysis; alphaand gamma-spectrometry laboratories; image analysis; petrographic microscopes; photo microscopy; wet-chemistry facilities; rock preparation and mineral separation; UNIX, Windows, and Mac workstations for data analysis and modeling; and one atm gas-mixing furnace for melt inclusion homogenization.
Quaternary Materials Laboratory: pipette grain-size analysis apparatus; chittick apparatus; Sedigraph 5100 X-ray particle-size analyzer; Horiba Camsizer L digital image particle analyzer; wetchemistry facilities; C-H-N element analyzer; a Flotech flotation system; and a Giddings drill rig.
Scanning electron microscope: Hitachi S-3400N, a variablepressure scanning electron microscope (SEM) equipped with a motorized stage, large chamber, and digital image capture; capable of imaging specimens with no metal coating, or specimens that are slightly hydrated or porous, as well as conventionally processed specimens; equipped with a Bruker AXS Quantax 400 X-ray microanalysis system; XFlash silicon drift detector with excellent energy resolution and light element detection, providing ultra-fast acquisition of line scans and elemental maps; and a Gatan ChromaCL cathodoluminescence detector system for imaging grain textures.
Sedimentary geology laboratories: water ion chromatograph; image analysis; Sedigraph X-ray particle-size analyzer; Horiba Camsizer L digital image particle analyzer; and a soil/sediment characterization laboratory.
Thin-Section and Rock Preparation Laboratory: diamond saws and specialized grinding equipment used to prepare ultrathin slices
( 30 microns thick) of rocks and fossils for microscopic and electron microprobe analysis.

## Courses

## Earth and Environmental Sciences Courses

Not all courses are offered every year.

## EES:1000 First-Year Seminar 1-2 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

## EES:1030 Introduction to Earth Science

Relationships between plate tectonics, geologic time, and the rock cycle with volcanoes and igneous, sedimentary, metamorphic rocks; fossils; radioactive isotopes; landscape evolution; mountain building; natural resources; their impacts on civilization. GE: Natural Sciences with Lab; Natural Sciences without Lab. Same as CEE:1030.

EES:1031 Introduction to Earth Science Laboratory 1 s.h. Laboratory component of EES:1030. Requirements: completion of 3 s.h. in EES:1030 or CEE:1030. GE: Natural Sciences Lab only. Same as CEE:1031.

EES:1040 Evolution and the History of Life 3-4 s.h.
Fossils over the past 3.5 billion years, origin and evolution of life, evolutionary radiations and mass extinctions, the invasion of land, dinosaurs, the age of mammals, relationship between biological systems and environmental change in earth history. GE: Natural Sciences with Lab; Natural Sciences without Lab.
EES:1050 Introduction to Geology 4 s.h. Minerals, rocks, and rock-forming processes (including volcanoes and sedimentary environments); surface processes (rivers, groundwater, glaciers, deserts, ocean shorelines), major earth processes (continental drift, plate tectonics, earthquakes, mountain building); impact on civilization. Offered fall semesters. GE: Natural Sciences with Lab.
EES: 1060 Big Ideas: Origins of the Universe, Earth, and Life 3 s.h. Origin of the universe, the biochemistry of life, and the origin of life on Earth; for non-science majors. Recommendations: first-year or sophomore standing. GE: Natural Sciences without Lab. Same as ASTR:1060, BIOL:1060.

## EES:1070 Age of Dinosaurs <br> 4 s.h.

Origin and evolutionary history of dinosaurs; diversity of dinosaurian groups, their geographic distributions and paleoecology; origins of flight among dinosaurs; environmental context, including other animals and plants that lived alongside dinosaurs; the so-called extinction of dinosaurs and radiation of modern forms; the role dinosaurs play in the interaction between science and the popular media. Offered fall semesters. GE: Natural Sciences with Lab.

## EES:1080 Introduction to Environmental Science 3-4 s.h.

Biological and physical character of the Earth; interaction of humans with the environment, including impacts on ecosystems, climate, natural processes, resources; alternative options, including sustainability, waste management, energy, land reform. GE: Sustainability. GE: Natural Sciences with Lab; Natural Sciences without Lab. Same as ENVS:1080.
EES:1081 Introduction to Environmental Sciences Laboratory

1 s.h.
Laboratory component of EES:1080. Requirements: completion of 3 s.h. in EES:1080 or ENVS:1080; or 3 s.h. of transfer equivalent. GE: Natural Sciences Lab only. Same as ENVS:1081.

EES:1085 Fundamentals of Environmental Science
Interdisciplinary study of how Earth's natural systems interact, how these systems affect society, and how they respond to human activity; how environmental problems can be solved and avoided by drawing upon knowledge in disciplines as diverse as ecology, anthropology, economics, chemistry, and political science; blended instructional environment, including traditional lectures, discussions in TILE classrooms, laboratory, online learning, peer-reviewed writing exercises, and service learning. Offered fall semesters. GE: Sustainability. GE: Natural Sciences with Lab. Same as ENVS:1085.

## EES:1115 The History of Oil

3 s.h.
Historical perspective on business, science, geology, technology, politics, environment, and culture of the global oil industry; the rise of oil as the most influential international business of the last 150 years, the material foundation of economies, a major force in world politics, a shaper of daily life, and a guide to understanding Earth's deep history. Offered fall semesters. GE: Sustainability. GE: Historical Perspectives. Same as ENVS:1115, GEOG:1115, HIST:1115.

## EES:1170 Geology of the U.S. National Parks

Geologic features, geologic history, important biological and archaeological characteristics, with emphasis on features that caused certain areas to be included in national park system.

## EES:1179 Geology of National Parks: Preparation and Planning <br> 1 s.h.

Preparation for a national park field trip offered in EES:1180; students learn about locations; basic safety rules; camping skills; administrative work, including defensive driver training; investigation of national parks, national monuments, and protected lands; basic geology.

## EES:1180 Geology of National Parks: Field Trip

Observation, interpretation of prominent geologic, geomorphic, biological features; semester-break or semester-end visits to different parks or groups of parks each year. Offered spring semesters. Prerequisites: EES:1179.

## EES:1290 Energy and the Environment

3 s.h.
Scientific concepts related to potentially significant energy sources of the 21st century; environmental impacts, positive and negative, of each energy source as well as geologic and geographical distributions and applications. GE: Natural Sciences without Lab.
EES:1400 Natural Disasters
3 s.h.
How earth-atmosphere-hydrosphere-space systems produce events catastrophic to humans on the scale of individual lives to civilizations; root causes of earthquakes, landslides, volcanic eruptions, floods, hurricanes, tsunami, tornadoes, and asteroid impact, and their local, national, and global impact; spatial and temporal occurrences of these hazards; methods and processes for hazard preparedness, response, and recovery; social, economic, and policy aspects that affect and compound the magnitude of disasters associated with natural phenomena; case studies drawn from contemporary and ancient societies. GE: Sustainability. GE: Natural Sciences without Lab.

## EES:2001 Second-Year Field Trip for Earth and Environmental Sciences

Opportunity for students to begin developing an appreciation of earth system and earth history scales; application of classroom learning to field-based inquiry; real-world examples of introductory course material in an outdoor classroom setting. Prerequisites: EES:1030 or EES:1050 or EES:1080 or ENVS:1080. Requirements: geoscience or environmental sciences major. Same as ENVS:2001.
EES:2010 Interdisciplinary Environmental Seminar
1 s.h.
Discover research, explore careers, and build connections.
Requirements: first- or second-year standing. Same as ENVS:2010, GEOG:2010.

4 s.h. EES:2020 Earth's Climate System
3 s.h.
Overview of climate science and how we understand Earth's climate system through interconnected relationships between oceans, atmosphere, biosphere, and geosphere; introduction to climate archives, systems science, climate modeling, and mechanisms responsible for ancient and modern climate change. Recommendations: EES:1030, EES:1050, EES:1080, EES:1085, or GEOG:1020. Same as ENVS:2020.

EES:2190 Directed Study arr. Special topics, independent research.

## EES:2200 Historical Geology

4 s.h.
Framework of earth history that is essential to understand how the earth system works; investigation of physical, biological, atmospheric, oceanographic, and chemical history of the earth to prepare for further earth and environmental science courses. Prerequisites: EES:1030 or EES:1050 or EES:1080 or ENVS:1080 or EES:1085 or ENVS:1085. Same as ENVS:2200.

## EES:2310 Introduction to Climatology

3 s.h.
Introduction to atmospheric processes that determine weather and climate; flow of energy through the atmosphere, distribution and movement of moisture and air, and atmospheric disturbances such as cyclones, hurricanes and tornadoes, and climate change. Recommendations: GEOG:1020 or similar earth systems science course. Same as GEOG:2310.

## EES:2410 Mineralogy

4 s.h.
Physical, chemical, and optical properties of minerals; phase relations; structures; associations; diagnostic features for identification. Offered fall semesters. Prerequisites: (CHEM:1110 or CHEM:1070) and (EES:1050 or EES:1030).

## EES:2831 Geologic Field Methods

3 s.h.
Basic methods of geologic fieldwork in southwest Montana using topographic maps and GPS to locate oneself, identifying geologic map units (including superficial deposits), recognizing geologic contacts, constructing stratigraphic sections, measuring planar structures, and making geologic maps complete with a legend and cross-section. Offered summer sessions. Prerequisites: EES:1400 or EES:1080 or EES:1030 or EES:1050.

## EES:3001 Third-Year Field Trip for Earth and Environmental

Sciences
1 s.h.
Opportunity for students to apply their major coursework to real-world problems; field trip to visit parks, mines, and/or quarries in Missouri and Arkansas that illustrate many of the lessons learned in EES:2410 and EES:3500. Prerequisites: EES:1030 or EES:1050 or EES:1080 or ENVS:1080 or EES:2410. Requirements: geoscience or environmental sciences major, and junior standing. Same as ENVS:3001.
EES:3003 Natural History Research Collections 3 s.h.
Techniques, methods, and issues specific to natural history research collections; practice in preparing and cleaning specimens; role of natural history specimens in modern scientific research.
Recommendations: basic understanding of the diversity of plants and animals and natural history museum collections, MUSM:3001 or MUSM:3200, and BIOL:1411 or BIOL:1412; or other experience. Same as MUSM:3003.
EES:3010 Interdisciplinary Environmental Seminar 1 s.h.
Role of sciences in environmental issues and problems; progression from observation to evaluation to design of better questions and experiments. Requirements: third- or fourth-year standing. Same as ENVS:3010, GEOG:3003.

EES:3020 Earth Surface Processes 3 s.h.
Basic geomorphic and environmental processes that shape the earth's surface; emphasis on erosion, transport, deposition by land mass movement (creep, landslides, earth flow), fluid agents (wind, water, ice); methods used to study these processes. Recommendations:
EES:1050 or EES:1080 or ENVS:1080 or GEOG:1020 or EES:1085 or ENVS:1085. Same as ENVS:3020, GEOG:3020.

## EES:3050 Geology of Iowa

2 s.h.
Exploration of geologic history responsible for landscape, soil, rocks, fossils, water, and natural resources of Iowa; background of Iowa's natural history; preparation for K-12 educators to deliver earth and environmental science content in their own classrooms, utilizing natural landscapes in Iowa. Same as ENVS:3050.

## EES:3051 Geology of Iowa Field Trip

Exploration of the geologic history responsible for landscape, soil, rocks, fossils, water, and natural resources of Iowa; fieldbased examples of Iowa's natural history; preparation for K-12 educators to deliver earth and environmental science content in their own classrooms utilizing the natural landscapes in Iowa. Recommendations: EES:3050. Same as ENVS:3051.
EES:3060 Ecology and Natural History of Iowa 3 s.h.
Plant and animal communities, landforms, and geologic history of Iowa; local area fieldwork; students learn identification and survey techniques, and interact with local naturalists.
EES:3070 Marine Ecosystems and Conservation 3 s.h.
Introduction to ocean ecosystems, including coral reefs, mangroves, estuaries and salt marshes, sandy and rocky shores, seagrass and kelp beds, the deep sea, plankton; biodiversity of each ecosystem; interrelationship of biota and physical/chemical environment; interactions among organisms, including food webs and symbiosis; local and global threats such as overfishing, pollution, ocean acidification, global warming, sea level change; ongoing biodiversity crisis, solutions for conservation problems.

## EES:3080 Introduction to Oceanography

2 s.h.
Descriptive, chemical, physical, biological, geological aspects of oceans; impact on weather, climate, shorelines, food supply, other aspects of civilization. Offered spring semesters. Recommendations: knowledge of basic chemistry, biology, physics, earth science.
EES:3100 Earth and Planetary Remote Sensing 4 s.h.
Remote sensing of the earth's surface from aircraft, satellites; aerial photograph interpretation; remote sensing systems, methods, data analysis using electromagnetic spectrum and digital processing techniques, including visible, infrared, microwave radiation; remote sensing applied to geologic and environmental problems. Prerequisites: EES:1030 or EES:1050 or EES:1080 or EES:1085. Same as ENVS:3100.

## EES:3110 Chemical Evolution of the Oceans

Investigation of various physicochemical states oceans have assumed over the past 4 billion years of Earth history; use of isotope geochemistry as a proxy for ancient ocean conditions; focus on integrated Earth system science, paleoceanographic and paleoclimate modeling, role of chemical stratigraphy in deciphering past climate states of ocean-atmosphere system; relationship between chemical changes in ocean/atmosphere and biological systems of the Earth. Same as ENVS:3110.

## EES:3150 Sustainability Project

Individual or collective project related to sustainability under the direction and supervision of a faculty member; involves regularly scheduled meetings, data collection and interpretation, and a final project report.

EES:3160 Field Trip
1-3 s.h.
Field trip to an area of geologic interest, such as localities in the Midwest, Hawaii, Grand Canyon (Arizona), Rio Grande Rift (New Mexico), Death Valley (California, Nevada), Appalachian Mountains (Virginia), as well as international destinations such as the Caribbean and China; preceded by weekly discussions of destination's geology.

## EES:3190 Directed Study

arr.
Special topics, independent research.
EES:3200 Collection Care and Management 3 s.h.
How a museum's management policy relates to its administrative, legal, and ethical obligations to its collections; acquisitions, deaccessions, collection use, data standards, storage environment, health, safety, documentation. Same as MUSM:3200.
EES:3210 Principles of Paleontology
3 s.h.
Patterns of evolution in fossil record; species and analysis of their evolutionary relationships; paleoecology, paleocommunity evolution; evolutionary radiation and mass extinctions; large-scale relationships between biodiversity and climatic change. Offered fall semesters.

EES:3220 Evolution of the Vertebrates
4 s.h.
Evolutionary history of vertebrates revealed by fossils and information from living animals; biogeographic, stratigraphic, paleoecological aspects of selected groups, especially mammals and dinosaurs; transitions from aquatic to terrestrial life, origins of flight, major events in vertebrate history (including mass extinctions and explosive radiations). Requirements: introductory course in geoscience, bioscience, or physical anthropology.
EES:3300 Sedimentary Geology
4 s.h.
Basic concepts of sedimentology, stratigraphy, depositional environments, sedimentary petrology; hands-on analyses of sediments and sedimentary rocks, including thin-section petrography; lecture/ laboratory. Offered fall semesters.

EES:3360 Soil Genesis and Geomorphology
Introduction to soil genesis, soil geomorphology, and classification including the basics of soil profile description and soil-landscape, soil-vegetation, and soil-climate relationships; emphasis on study of soils as the interface between living and non-living Earth systems and the role of soils in sustaining ecosystems and human societies; short field excursions and a weekend field trip. Requirements: college earth science and chemistry. Same as GEOG:3360.

## EES:3380 Fluvial Geomorphology

3 s.h.
Hydrologic principles, stream channel processes, and fluvial geomorphology within drainage basin systems; spatial and temporal variations in water distribution, analysis of hydrological data, flow mechanisms, sediment transport, forecasting procedures, hydrograph construction, modeling. Requirements: EES:3020 or another 3000level geology or hydraulics course. Same as CEE:3328.
EES:3390 Integrated Watershed Analysis
3 s.h
Integration of existing knowledge of physical, hydrological, and environmental processes with management issues and challenges in water resources and environmental management; aspects of water quantity and quality, water use and treatment; basin management issues related to forestry, agriculture, urbanization, floods, droughts.

## EES:3500 Igneous and Metamorphic Petrology

4 s.h.
Nature, origin, and petrography of igneous and metamorphic rocks in hand specimen and thin-section. Offered spring semesters. Prerequisites: (MATH:1010 or MATH:0100 or MATH:1020 or MATH:1850) and (EES:1050 or EES:1030) and (CHEM:1110 or CHEM:1070) and EES:2410.

## EES:3770 Global Stratigraphy

Types of stratigraphy (e.g., biostratigraphy, lithostratigraphy, sequence stratigraphy, chemostratigraphy, magnetostratigraphy, cyclostratigraphy, chronostratigraphy) that share a number of procedures and practices and how differences cloud understanding of Earth history; central role of stratigraphy in modern geoscience pursuits; issue of time in stratigraphic record as an organizing theme for investigation of comparative stratigraphy.

## EES:3840 Structural Geology

Rock deformation; description, classification of geologic structures such as faults and folds; processes that generate geologic structures; solution of structural problems; interpretation of geologic maps. Prerequisites: EES:1030 or EES:1050.

## EES:4001 Fourth-Year Field Trip for Earth and Environmental

 SciencesApplication of core course learning to real-world examples; students develop a broader understanding of interrelated aspects of earth and environmental sciences as truly integrated scientific endeavors; field trip to Big Bend National Park to highlight a wide range of geoscience and environmental science studies and provide students an opportunity to apply all aspects of their training to the amazing geologic landscape of southwest Texas; capstone field experience for students heading into their senior year. Prerequisites: EES:2831. Requirements: geoscience or environmental sciences major, and senior standing. Same as ENVS:4001.
EES:4200 Museum Object Preservation
3 s.h.
Detailed study of specific types of museum objects, their materials, and care; topics include care, storage, and preservation of paper, books, photographs, works of art, electronic media, textiles, furniture, archaeological artifacts, and natural history specimens; students complete a curatorial project and gain hands-on practice in basic object cleaning and making enclosures and supports; for students planning museum careers or taking care of collections as part of their professional responsibilities. Same as MUSM:4200.

## EES:4230 Special Topics

1-3 s.h.
Contemporary issues in earth sciences.
EES:4410 Analytical Methods Seminar
Theory and practice of analyzing chemical, isotopic, and mineralogical compositions of rocks, inorganic materials, and waters; use of modern analytical instruments. Offered spring semesters. Prerequisites: CHEM:1070 or CHEM:1110.

## EES:4490 Elements of Geochemistry

Introduction to application of chemical principles to solution of geologic problems concerning earth and environmental processes; origin of elements, chemical differentiation of Earth and the solar system, geochronology, application of radiogenic and stable isotopes, chemical equilibrium, elementary thermodynamics and kinetics, carbonate and silicate stability relationships, chemical weathering, adsorption, trace element behavior, oxidation-reduction reactions, characterization of surface and ground waters, and ocean chemistry. Prerequisites: (EES:1030 or EES:1050) and (CHEM:1070 or CHEM:1110).
EES:4520 Isotope Geochemistry
3 s.h.
Radiogenic and stable isotope systematics, applications to geological, cosmological, and environmental problems. Prerequisites: (EES:1030 or EES:1050) and (CHEM:1070 or CHEM:1110). Recommendations: EES:2410.

## EES:4630 Hydrogeology

4 s.h.
Foundational concepts of physical hydrogeology including water cycle and hydrologic balance, hydrogeologic properties of porous media and fractured rock, Darcy's law, flow systems, and hydrogeologic characterization methods; students practice quantitatively evaluating groundwater flow problems through regular problem sets and handson labs. Prerequisites: MATH:1850 or MATH:1550.

3 s.h. EES:4640 Contaminant Hydrogeology 3 s.h.
Introduction to controls on contaminant transport in groundwater systems (e.g., advection, dispersion, diffusion, reaction/ transformation); variety of models used to practice quantitatively evaluating contaminant behavior; survey of common contaminants in groundwater through discussion of published case studies; overview of standard and leading edge characterization and remediation methods.

EES:4660 Groundwater Modeling 3 s.h.
Groundwater flow and contaminant transport modeling; numerical methods, applications of groundwater modeling to water supply, groundwater resources evaluation, remediation design using software; GMS (MODFLOW, MODPATH, and MT3D). Prerequisites: MATH:1860 and EES:4630. Same as CEE:4104.

EES:4680 Field Methods in Hydrologic Science
3 s.h.
Collection and interpretation of physical hydrology and hydraulics field measurements; basic data quality assurance and quality control; hands-on experience with field equipment and data collection. Prerequisites: EES:4720 or EES:2831 or EES:3020 or EES:3360 or EES:3300 or EES:3380 or ENGR:2510 or EES:4800 or EES:4630 or CEE:3371 or EES:4790 or EES:3390.

EES:4720 Paleoclimatology 3 s.h.
Introduction to glaciers and glacial and interglacial Earth systems; linkages among glacial, oceanic, and atmospheric systems and their effects on landscapes and biota over the past 2 million years; how oceans, atmosphere, and glaciers interact and landscape effects of past glacial and interglacial cycles. Requirements: physical geology or physical geography or anthropology.

EES:4750 Mineral and Petroleum Exploration Geology 3 s.h.
Fundamentals of resource exploration philosophy and methods, with project-based presentation of techniques and strategies for mineral exploration and petroleum exploration; integration and evaluation of geological, geochemical, and geophysical techniques for mineral exploration; hydrocarbon systems and seismic interpretation for petroleum exploration. Corequisites: EES:3500 and EES:3840.

EES:4790 Applied Environmental Geology
2 s.h. Application of geology, water, and earth processes to civil and environmental engineering practice; physical properties of rock and soil, geologic mapping and surveying, groundwater supplies and wells, stream engineering, watershed management, site investigations for environmental assessment, and geologic hazards. Prerequisites: EES:1030 or EES:1080 or EES:1050.

## EES:4800 Global Geophysics

3 s.h.
Geophysics is the broad geoscience field interested in discovering the unseen characteristics of the Earth and other planets, including the internal structure of the Earth, the current motions of tectonic plates, the sources and causes of geological disasters, and the locations of economic resources; methods to accomplish these goals include seismology, gravity and magnetic studies, geodesy, and measurements of heat; course offers a broad introduction to these topics that is rooted in current and growing fields of active research. Requirements: introductory geology or physics.
EES:4820 Tectonics and Basin Analysis
3 s.h.
Dynamic processes responsible for crustal genesis, plate movements, mountain building; plate boundary zones; sedimentologic, structural, petrologic, geophysical characteristics of major tectonic settings; multidisciplinary approach; week-long field trip. Corequisites: EES:3840.

Structural, stratigraphic, and regional analysis of geology in the Rocky Mountains of Montana; emphasis on making reasonable geologic interpretations from field relationships; mapping projects in vicinity of Dillon, Montana that build on experience gained in EES:2831; capstone experience dedicated to synthesizing the geology of a fold-and-thrust belt near Glacier National Park. Offered summer session. Prerequisites: EES:2831 and EES:3840.
EES:4990 Senior Thesis in Geoscience arr. Independent research resulting in a senior thesis. Requirements: senior standing.
EES:4999 Honors Thesis in Geoscience
arr.
Independent research resulting in an honors thesis. Requirements: honors standing.
EES:5010 Geoscience Seminar Series 1 s.h.
Scholarly work and research in geoscience.
EES:5015 American Association of Petroleum Geologists Fall Field Trip 1 s.h.
Resource-related topics in mineral and hydrocarbon exploration; tectonic settings for resources. Requirements: AAPG student chapter member or graduate standing, and basic understanding of mineralogy, petrology, and structural geology.
EES:5380 Process Geomorphology Seminar

## 1-3 s.h.

Topics in process geomorphology ranging from fluvial dynamics to mass movement to sediment transport and related environmental processes.
EES:5530 Geochronology 3 s.h.
How to evaluate published ages, and assumptions/errors involved; how to select and sample suitable materials for dating, and choose a suitable dating method and analytical technique; opportunity to develop skills for research and professional careers. Prerequisites: EES:4490 or EES:4520.
EES:6190 Directed Study
arr.
Independent research.
EES:6230 Special Topics
1-3 s.h.
Contemporary issues in earth sciences.
EES:6250 Paleontology Seminar
1-3 s.h.
Current controversial issues in paleontology. Recommendations:
EES:3210.
EES:6390 Advanced Watershed Analysis Seminar 1-3 s.h.
Integration of existing knowledge of physical, hydrological, and environmental processes with management issues and challenges in water resources and environmental management; aspects of water quantity and quality, water use and treatment, and basin management issues related to forestry, agriculture, urbanization, floods, droughts.

## EES:6570 Tectonics and Petrology Seminar

1-2 s.h.
Topics in tectonics, structural geology, petrology.
EES:7270 Geologic Orientation, Scholarly Integrity, and Responsible Conduct of Research 1 s.h.
Department degree requirements, programs; field survey of local geology; scholarly integrity; responsible conduct of research; tips for TAs; introduction to specialized facilities; for new graduate students.
EES:7604 Principles of Scholarly Integrity 0 s.h.
Training in responsible conduct of research and scholarly activities; student/mentor responsibilities, authorship, plagiarism/falsification/ fabrication of data, intellectual property, conflict of interest; fiscal, institutional, and societal; data handling. Requirements: postdoctoral standing in geoscience.
EES:7990 Research: Geoscience arr.
Independent research related to theses or dissertations in geoscience.

## Geoscience, BA

The BA in geoscience offers students a background in the Earth sciences and related scientific disciplines and is designed for flexibility in potential career paths. The department focuses training in the areas of environmental geology, geochemistry, geophysics, paleontology, stratigraphy, tectonics, basin analysis, surficial processes, petrology, and volcanology. Students gain field experience along with classroom learning.

## Learning Outcomes

Geoscience BA graduates will:

- understand the structure, composition, and physical processes of Earth;
- understand the coevolution of the Earth-life system;
- have experience interpreting the geologic record in the field;
- understand natural resources and resource sustainability; and
- develop a quantitative analytical skill set to integrate the diverse array of Earth sciences and related disciplines.

## Requirements

The Bachelor of Arts with a major in geoscience requires a minimum of $120 \mathrm{~s} . \mathrm{h}$., including at least $56 \mathrm{~s} . \mathrm{h}$. of work for the major (at least 37 s.h. in earth and environmental sciences courses, at least 16 s.h. in supporting disciplines, and a field requirement course). Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. Transfer students must complete a minimum of $15 \mathrm{~s} . \mathrm{h}$. of coursework in the Department of Earth and Environmental Sciences.

The geoscience major for the BA is designed to provide students with a varied background in geology and a broader choice of electives than is practical in the Bachelor of Science program. It is intended for students who are interested in the fundamentals of geology or earth science teaching (see "Teacher Licensure" below). Completing the minimum requirements for this degree may not adequately prepare a student for an entry-level professional job in geology.

The department recommends that students fulfill the GE CLAS Core World Languages requirement with French, German, Russian, or Spanish and the Social Sciences requirement with approved coursework in economics, geography, or anthropology.

The BA with a major in geoscience requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Earth and Environmental Sciences Courses | $37-40$ |
| Mathematics Course | 10 |
| Chemistry Courses | $6-8$ |
| Field Requirement | $3-4$ |

## Earth and Environmental Sciences Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: |  |  |
| EES:2200 | Historical Geology | 4 |
| EES:2410 | Mineralogy | 4 |
| One of these: |  | 4 |
| EES:1030 | Introduction to Earth Science | 4 |
| EES:1050 | Introduction to Geology | 4 |

One or both of these:

| EES:1040 | Evolution and the History of <br> Life <br> EES:3210 | Principles of Paleontology |
| :--- | :--- | :--- |
| At least three of these: | 3 |  |
| EES:3300 | Sedimentary Geology |  |
| EES:3360 | Soil Genesis and <br> Geomorphology | 4 |
| EES:3380 | Fluvial Geomorphology | 3 |
| EES:3500 | Igneous and Metamorphic <br> Petrology | 3 |
| EES:3840 | Structural Geology |  |
| EES:4630 | Hydrogeology | 4 |
| And: | 4 |  |
| Earth and environmental sciences electives numbered | 4 |  |
| EES:3000 or above |  | 12 |

## Mathematics

Students must complete the following coursework in mathematics.

> Course \# Title Hours

College-level mathematics (may include computer 10
science and statistics), excluding MATH:1210

## Chemistry

Students must complete at least two college-level chemistry courses as a sequence, as follows. Chemistry courses numbered below CHEM:1070 General Chemistry I do not count toward this requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these sequences: |  |  |
| CHEM: $1070 \&$ | General Chemistry I-II | 6 |
| CHEM: 1080 |  | 8 |
| CHEM: $1110 \&$ | Principles of Chemistry I-II | 8 |
| CHEM:1120 |  |  |

## Field Requirement

To complete the major, students must have field experience. They may take at least 4 s.h. of EES: 1179 Geology of National Parks: Preparation and Planning and EES: 1180 Geology of National Parks: Field Trip, and/or EES:3160 Field Trip to satisfy this requirement. Either EES:1179 and EES:1180, or EES:3160, may be repeated and/ or combined to fulfill the necessary semester hours. Or they may take one semester of EES:2831 Geologic Field Methods or the Iowa Lakeside Laboratory [p. 2063] session for 3 s.h.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least 4 s.h. from these: | 3 |  |
| EES:1179-EES:1180 | Geology of National Parks: <br> Preparation and Planning - <br> Geology of National Parks: <br> Field Trip |  |
| EES:3160 | Field Trip | 2 |

Or 3 s.h. from one of these:
EES:2831 Geologic Field Methods 3
One natural science session at Iowa Lakeside 3

Laboratory for a minimum of 3 s.h.

## Independent Research Option for Geoscience Majors

A junior or senior who is ready to pursue independent research for credit in geoscience may assist a faculty member or graduate student with a current research project in EES:2190 Directed Study or may initiate a small-scale project involving a combination of field, laboratory, and library investigation in EES:3190 Directed Study. Independent study is encouraged and may lead to an honors thesis in EES:4999 Honors Thesis in Geoscience or a senior thesis in EES:4990 Senior Thesis in Geoscience that may be published subsequently.

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Combined Programs

## BA/MAT

Students interested in pursuing a graduate degree in teaching may apply to the combined Bachelor of Arts/Master of Arts in Teaching with a science education subprogram offered by the College of Liberal Arts and Sciences and the College of Education. The combined program enables students to earn a BA in geoscience and an MAT in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 19 s.h. of qualifying credit toward both degrees. For more information, see Science Education [p. 1418] in the Master of Arts in Teaching (College of Education) section of the catalog. Interested students should consult an advisor.

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in the major. Departmental honors students must maintain a cumulative grade-point average (GPA) of at least 3.33 in all University of Iowa coursework and in all geoscience courses. Students must complete a senior thesis, registering in EES:4999 Honors Thesis in Geoscience. They must obtain approval of their honors thesis contract from their advisor and the department's undergraduate committee, and they must earn a grade of B or higher in EES:4999.

## National Honor Society

The department sponsors a chapter of Sigma Gamma Epsilon National Honor Society for the Earth Sciences. Students with an overall GPA of at least 2.80 and at least 3.20 in geoscience courses are considered for membership after they have completed a minimum of $16 \mathrm{~s} . \mathrm{h}$. of coursework in geoscience. Consult the departmental honors advisor for more information.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University
of Iowa Honors Program; visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the geoscience major.

## Career Advancement

The BA in geoscience is designed to prepare students for employment after graduation or for admission to graduate study in an allied field of earth and environmental sciences, such as public policy, environmental engineering, law, business, archaeology, or science education. Nearly all University of Iowa geoscience graduates gain employment or move on to graduate programs following the completion of their degree.

Graduates are typically employed in environmental corporations or consulting agencies; nongovernmental organizations; law firms; and local, state, and federal agencies, in career fields that include education, conservation, urban planning, natural resources, and water resource management.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

These checkpoints show the range of required coursework. The major requires field trip experiences, many of which take place during breaks in or between semesters or during the summer session. These checkpoints do not include the field trip requirements.
Before the third semester begins: competence in math through trigonometry and the first required chemistry course.
Before the fifth semester begins: three to five courses in the major, including the remainder of the chemistry requirement and continuation of the mathematics requirement.

Before the seventh semester begins: 7-11 courses in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: 10-14 courses in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Geoscience, BA

Course Title Hours
Academic Career

## Any Semester

Research: students are strongly encouraged to be active participants in research within the department.

While only one field course is required, students are encouraged to participate in additional field experiences, whenever possible.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Fulfills a major requirement and may fulfill a GE requirement.
c Students must complete 10 s.h. in college-level mathematics courses (may include computer science and statistics). Students should choose at least one course that will also complete the Quantitative or Formal Reasoning GE CLAS Core requirement.
d GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
e If EES: 1040 is chosen, it must be taken with the lab for 4 s.h.
f Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
g Recommended but not required to complete Geoscience BA degree requirements.
h Choose from EES:3300, EES:3360, EES:3380, EES:3500, EES:3840, or EES:4630.
i To complete the major, students must have field experience. They may take at least 4 s.h. of EES:1179/EES:1180 and/or EES:3160 to satisfy this requirement. Either EES:1179/EES:1180 or EES:3160 may be repeated and/or combined to fulfill the necessary semester hours. Or they may take one semester of EES:2831 or the Iowa Lakeside Laboratory session for 3 s.h.
j Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
k Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any
questions on appropriate timing, contact your academic advisor or Graduation Services.

## Geoscience, BS

The BS in geoscience offers students an extensive and comprehensive background in the Earth sciences and related scientific disciplines, and is geared toward a career in the geosciences. Strengths of the department include environmental geology, geochemistry, geophysics, paleontology, stratigraphy, tectonics, basin analysis, surficial processes, petrology, and volcanology. Students gain extensive field experience and training and are able to integrate field studies and analytical research, with knowledge gained in the classroom. Opportunities are provided for local, regional, and international field experiences as well as for individual research projects.

## Learning Outcomes

Geoscience BS graduates will:

- understand the structure, composition, and physical processes of the Earth;
- understand the coevolution of the Earth-life system;
- have the ability to interpret the geologic record in the field;
- understand how to assess and utilize our natural resources in a sustainable manner; and
- develop a quantitative analytical skill set to integrate the diverse array of Earth sciences and related disciplines.

## Requirements

The Bachelor of Science with a major in geoscience requires a minimum of 120 s.h., including at least 76 s.h. of work for the major (at least 45 s.h. in earth and environmental sciences courses and at least 31 s.h. in supporting disciplines). Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. Transfer students must complete a minimum of 15 s.h. of coursework in the Department of Earth and Environmental Sciences.

The department recommends that students fulfill the GE CLAS Core World Languages requirement with French, German, Russian, or Spanish and the Social Sciences requirement with approved coursework in economics, geography, or anthropology.
The BS with a major in geoscience requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Earth and Environmental Sciences Courses | $45-50$ |
| Mathematics Courses | $11-12$ |
| Chemistry Courses | 8 |
| Physics Courses | 8 |
| Biology Course | 4 |
| Independent Research Option |  |

## Chemistry

Students must complete at least 8 s.h. of college-level chemistry, including the following sequence or equivalent courses or more advanced courses. Chemistry courses numbered below CHEM:1110 Principles of Chemistry I do not count toward this requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CHEM: $1110 \&$ | Principles of Chemistry I-II | 8 |
| CHEM:1120 |  |  |

## Physics

Students must complete at least 8 s.h. of college-level physics, as follows. Physics courses numbered below PHYS:1511 College Physics I do not count toward this requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these sequences: |  |  |
| PHYS:1511- | College Physics I-II | 8 |
| PHYS:1512 |  | 8 |
| PHYS:1611- | Introductory Physics I-II | 8 |
| PHYS:1612 |  |  |

## Biology

Students must complete at least one biology course that includes a laboratory (4 s.h.). Students with an interest in paleontology
are encouraged to take BIOL:1411 Foundations of Biology and BIOL:1412 Diversity of Form and Function.
Course \# Title Hours

One biology course (includes a lab)

## Recommended Electives

All students should take elective courses from the following groups in order to broaden their undergraduate experience and prepare themselves for graduate study or professional employment. Students who have clear career goals are advised to take three or more elective courses from the group that fits their needs most closely. Students also may seek a broad education in geoscience by choosing elective courses from a number of groups.

## Independent Research Option

A junior or senior who is ready to pursue independent research for credit in geoscience may assist a faculty member or graduate student with a current research project EES:2190 Directed Study or may initiate a small-scale project involving a combination of field, laboratory, and library investigation in EES:3190 Directed Study. Independent study is encouraged and may lead to an honors thesis in EES:4999 Honors Thesis in Geoscience or a senior thesis in EES:4990 Senior Thesis in Geoscience that may be published subsequently.

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in the major. Departmental honors students must maintain a cumulative grade-point average (GPA) of at least 3.33 in all University of Iowa coursework and in all geoscience courses. Students must complete a senior thesis, registering in EES:4999 Honors Thesis in Geoscience. They must obtain approval of their honors thesis contract from their advisor and the department's undergraduate committee, and they must earn a grade of B or higher in EES:4999

## National Honor Society

The department sponsors a chapter of Sigma Gamma Epsilon National Honor Society for the Earth Sciences. Students with an overall GPA of at least 2.80 and at least 3.20 in geoscience courses are considered for membership after they have completed a minimum of 16 s.h. of coursework in geoscience. Consult the departmental honors advisor for more information.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the geoscience major.

## Career Advancement

The BS in geoscience is designed to prepare students for immediate employment after graduation or for admission to graduate study in earth and environmental sciences. Degree recipients also have been employed in the ancillary fields of public policy, environmental engineering, law, business, archaeology, science education, museum curation, and other allied fields. Nearly all University of Iowa geoscience graduates gain employment or move on to graduate programs following the completion of their degree.

Employment opportunities for graduates are typically in environmental corporations and consulting agencies; natural resource corporations; local, state, and federal agencies, such as geological surveys, educational institutions, conservation agencies, museums, and departments of urban planning, natural resources, and water resource management; nonprofit organizations; research institutions; and ecotourism. Companies such as ExxonMobil recruit Iowa graduates on campus.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

These checkpoints show the range of required coursework. The major requires field trip experiences, many of which take place during breaks in or between semesters or during the summer session. These checkpoints do not include the field trip requirements.

Before the third semester begins: competence in math through trigonometry and the first required chemistry course.

Before the fifth semester begins: three to five courses in the major, including the remainder of the chemistry requirement and continuation of the mathematics requirement.

Before the seventh semester begins: 7-11 courses in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: 10-14 courses in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Geoscience, BS

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b EES:1050 is preferred.
c Fulfills a major requirement and may fulfill a GE requirement.
d Enrollment in chemistry courses requires completion of a placement exam.
e Enrollment in math courses requires completion of a placement exam.
f Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
g Recommended but not required to complete Geoscience BS degree requirements.
h GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
i Choose from a MATH course numbered 2000 or above, a CS course numbered 1110 or above, a STAT course numbered 2010 or above, or EES:3100 (if the EES courses are not used to satisfy the earth and environmental sciences electives requirement).
j Choose from EES:3210, EES:4490, EES:4630, EES:4790, or EES:4800.
k Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
1 Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Geoscience, Minor

## Requirements

The undergraduate minor in geoscience requires a minimum of 15 s.h. in earth and environmental sciences courses, including 12 s.h. in courses considered advanced for the minor offered by the Department of Earth and Environmental Sciences at the University of Iowa. EES:2410 Mineralogy, EES:2831 Geologic Field Methods, and all earth and environmental sciences courses numbered 3000 or above are considered advanced for the minor. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.
College-level courses in mathematics, physics, chemistry, and biology usually are required as collateral work for geoscience students. Those seeking a minor in geoscience should be sufficiently prepared in the areas of supporting sciences before they take advanced courses in geoscience.
Recommended advanced courses in earth and environmental sciences that deal with important areas of earth materials and earth processes are as follows.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EES:2410 | Mineralogy | 4 |
| EES:2831 | Geologic Field Methods | 3 |
| EES:3020 | Earth Surface Processes | 3 |
| EES:3060 | Ecology and Natural History of | 3 |
|  | Iowa |  |
| EES:3070 | Marine Ecosystems and | 3 |
|  | Conservation |  |
| EES:3080 | Introduction to Oceanography | 2 |
| EES:3100 | Earth and Planetary Remote | 4 |
|  | Sensing | 3 |
| EES:3210 | Principles of Paleontology | 4 |
| EES:3300 | Sedimentary Geology | 3 |
| EES:3360 | Soil Genesis and | 3 |
| EES:3380 | Geomorphology | 3 |
| EES:3390 | Fluvial Geomorphology | 3 |
| EES:3500 | Integrated Watershed Analysis | 4 |
|  | Igneous and Metamorphic | 3 |
| EES:3840 | Petrology | 4 |
| EES:4490 | Structural Geology | 3 |
| EES:4790 | Elements of Geochemistry | 3 |
| EES:4800 | Applied Environmental | 3 |
| EES:4820 | Geology | 3 |
|  | Global Geophysics | 3 |

## Geoscience, MS

The MS in geoscience is regarded by most hiring agencies as the working degree. The master's program in geoscience prepares students for employment in industry or for doctoral study.

## Learning Outcomes

Graduates will demonstrate the ability to:

- develop subject matter expertise and broad knowledge in the field of geoscience;
- conduct research under the direction of a faculty member and interact successfully with other members of a research team;
- effectively communicate research findings in both written and oral formats;
- conduct all aspects of research and teaching with the highest ethical standards; and
- be prepared for career options in academia, industry, government, or other relevant fields.

## Requirements

The Master of Science program in geoscience requires a minimum of 30 s.h. of graduate credit. Students may count up to 8 s.h. of research credit toward the 30 s.h. required for the degree. They must earn at least 24 s.h. toward the degree in University of Iowa courses taken after they enroll in the program. Throughout their graduate study, students must maintain a grade-point average (GPA) of at least 3.00 in all coursework required for their degree and in all graduate-level geoscience coursework. Students whose GPA drops below 3.00 are placed on academic probation.

All entering students are required to enroll in EES:7270 Geologic Orientation, Scholarly Integrity, and Responsible Conduct of Research during the fall semester of their first year in the graduate program. Students also must complete EES:5010 Geoscience Seminar Series each semester until they defend their thesis.

During the second semester of study, each student should propose an advisory committee of at least three faculty members to the department chair for approval. Thesis students are responsible for obtaining their advisory committee's approval of a suitable program of coursework and for satisfactory development of research plans as outlined in a thesis proposal, which should be completed and approved by the department chair before the end of the second semester of fulltime study. The thesis typically has depth and breadth similar to those of a published research paper. Thesis students must deliver a half-hour public presentation of their thesis, followed by an oral defense.
Students are encouraged to present their research at local, regional, national, or international meetings. The department provides partial funding for travel to such meetings.
Detailed information about graduate degree requirements and timelines for making satisfactory progress toward a degree is available; see Graduate Student Guidelines on the Department of Earth and Environmental Sciences Graduate Program website.

All geoscience graduate students must meet the admission and degree requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website (particularly sections IX, X, and XII). They also should acquaint themselves with the university calendar.

Career Advancement

Career opportunities are readily available for geoscience graduates. Professional geologists work in resource companies, environmental corporations, educational institutions, conservation agencies, urban planning, state and federal geological surveys, and government resource and research organizations. Companies such as ExxonMobil routinely recruit Iowa graduates on campus.
The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the

Graduate College website and the Manual of Rules and Regulations
for more information.
b Complete during first year fall semester.
c Complete each semester until degree completion.
d Courses selected should reflect the individual needs, interests and talents of the student; work with faculty advisor to determine appropriate graduate elective coursework and sequence.
e Maximum total of $8 \mathrm{~s} . \mathrm{h}$. for thesis research credit allowed.
f Consists of a half-hour public presentation of thesis followed by an oral defense.

## Geoscience, PhD

A PhD in geoscience is designed to bring students to the forefront of a specialized area of geoscience for future employment in higher education or in industry or government research.

## Learning Outcomes

Graduates will demonstrate the ability to:

- develop broad knowledge in the field of geoscience and identify important research problems through the development of subject matter expertise;
- develop a research framework including testable hypotheses, and conduct original independent research that contributes new knowledge to the field of study;
- effectively communicate research findings in both written and oral formats;
- conduct all aspects of research and teaching with the highest ethical standards; and
- be prepared for career options in academia, industry, government, or other relevant fields.

## Requirements

The Doctor of Philosophy program in geoscience requires a minimum of 72 s.h. of graduate credit. The PhD requires a dissertation, which has the approximate research content of three published papers. Throughout their graduate study, PhD students must maintain a gradepoint average (GPA) of at least 3.00 in all coursework required for their degree and in all graduate-level geoscience coursework. Students whose GPA drops below 3.00 are placed on academic probation.

Students usually enter the program with established fields of interest and a research advisor already selected. Under exceptional circumstances, a student may be admitted to the PhD program without an established field of interest.

Entering students must consult with a research advisor or the department's director of graduate study before they enroll in courses. By the first month of their second semester of doctoral study, all students must select an advisor. Each student also must select a thesis topic and forward it to the department chair for approval by the end of the first month of the second semester of doctoral study.
Within broad limits, students should select courses that reflect their individual needs, interests, and talents; their advisor and advisory committee must approve their course selections.
During the second semester of doctoral study, each student should propose an advisory committee of at least five faculty members to the department chair for approval. Before the end of the second semester, students must obtain their committee's approval of a suitable plan of study to be submitted to the department chair for approval. In consultation with the advisor and other faculty members, each doctoral candidate prepares a formal dissertation proposal approved by their committee and submitted to the department chair for approval by the end of the candidate's third semester of doctoral study.
Students are required to include in their plan of study at least $18 \mathrm{~s} . \mathrm{h}$. of regular coursework taught by tenured or tenure-track faculty members in the Department of Earth and Environmental Sciences. Students must earn the 18 s.h. after being admitted to and enrolling in the PhD program. Directed study and research credit do not count toward the required 18 s.h.

All entering students are required to enroll in EES:7270 Geologic Orientation, Scholarly Integrity, and Responsible Conduct of Research during the fall semester of their first year in the graduate program. Students must enroll in EES:5010 Geoscience Seminar Series each
semester they are registered until they successfully defend their dissertation, or for two consecutive semesters after the semester in which they pass their comprehensive examination, whichever comes first.
After earning their first 24 s.h. of graduate credit, students must be enrolled at least two consecutive semesters in full-time study (at least 9 s.h. per semester) at the University of Iowa; or they must be enrolled three consecutive semesters for at least 6 s.h. per semester at the university, during which time they hold at least a one-quarter-time assistantship that is certified by the department as contributing to their doctoral program.
Students should complete most of their coursework before taking the comprehensive examination, which consists of both written and oral portions and which must be passed before the end of the fourth semester of doctoral study.

Once candidates have passed the comprehensive examination, they are required to register each semester until they receive the degree. Those who have completed their plan of study may register for GRAD:6002 Doctoral Continuous Registration or GRAD:6003 Doctoral Final Registration.

Students must submit their written dissertation to the committee at least two weeks before the final examination. All candidates must deliver a one-hour public presentation associated with the dissertation defense. They also are required to submit a manuscript presenting the results of their graduate research to a refereed journal or other publication approved by the department chair before they may defend their dissertation.

Students are encouraged to present their research at local, regional, national, or international meetings. The department provides partial funding for travel to such meetings.
Detailed information about graduate degree requirements and timelines for making satisfactory progress toward a degree is available; see Graduate Student Guidelines on the Department of Earth and Environmental Sciences Graduate Program website.

## Admission

All geoscience graduate students must meet the admission and degree requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website (particularly sections IX, X, and XII). They also should acquaint themselves with the university calendar.

## Career Advancement

The doctoral degree is required for college and university faculty positions and for some research positions in industry.

Career opportunities are readily available for geoscience graduates. Professional geologists work in resource companies, environmental corporations, educational institutions, conservation agencies, urban planning, state and federal geological surveys, and government resource and research organizations.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## English

## Chair

- Blaine Greteman

Undergraduate majors: English (BA); English and creative writing (BA)

## Undergraduate minor: English

Graduate degrees: MA in English; MFA in English (creative writing, nonfiction writing); PhD in English

Faculty: https://english.uiowa.edu/people
Website: https://english.uiowa.edu
The Department of English offers courses in literature, cultural studies, language, and critical and creative writing. In these courses, students read poetry, fiction, essays, criticism, and theory to acquire methods for understanding literature and culture and respond creatively to the texts. In addition to providing these essential elements of a liberal arts and sciences education, the department's courses can augment students' specialized interests in other fields. Visit the Department of English website to learn more about courses and upcoming events.
Many undergraduate and graduate students enroll in the department's degree programs. Most PhD students in English are preparing for careers as teachers and scholars, and many MFA students in the creative writing program and the nonfiction writing program are preparing for lives as published writers. The BA and MA programs provide valuable training for careers in a variety of fields. Students who have earned English degrees from the University of Iowa write for advertising firms, newspapers, the entertainment industry and book publishers; teach in primary and secondary schools; practice law and medicine; work in business, industry, and nonprofits; and participate in state and federal government. Many students who earn a BA go on to pursue an MFA in creative writing fields. As much as possible, each student's course of study is arranged to meet individual needs and objectives.
The Department of English participates in several of the university's interdisciplinary units: the departments of American Studies, Cinematic Arts, and Gender, Women's, and Sexuality Studies; the African American Studies and Native American and Indigenous Studies programs; and the Center for the Book.

## Creative Writing Programs

For the past 75 years, the University of Iowa has been a national leader in all areas of creative writing. The university offers graduate degrees in creative writing, with specializations in fiction, nonfiction, and poetry. Undergraduate students may declare a major in English and creative writing. All qualified undergraduates in other majors may enroll in many of the creative writing courses offered by the Department of English.
View creative writing courses (prefixes CW, CNW, and ENGL) under Courses [p. 388] in this section of the catalog. See which ones are offered in certain semesters by searching for course subjects CW, CNW, and ENGL on MyUI.

## GE CLAS Core

Students earning a degree from the College of Liberal Arts and Sciences must satisfy the Interpretation of Literature GE CLAS Core [p. 19] requirement. Most students take ENGL:1200 The Interpretation of Literature; however, English majors should substitute a course from the Literary, Visual, and Performing Arts area of the GE CLAS Core, excluding MUS:1001 Group Piano I: NonMusic Majors, MUS:1020 Performance Instruction for Nonmajors,
and DANC:1010 Beginning Tap through DANC:2040 Majors Intermediate Contemporary Movement Practices.

The pass/nonpass option is available only for students in the College of Engineering with the consent of a student's advisor and the instructor.

## Department of English Opportunities

Several periodicals are published under the department's aegis. The Iowa Review, Walt Whitman Quarterly Review, and Philological Quarterly offer opportunities for especially qualified graduate students to work as research assistants or editorial associates, and pursue some undergraduate volunteer opportunities.

The Department of English, the Nonfiction Writing Program, and the Iowa Writers' Workshop sponsor a rich and extensive series of readings and lectures by poets, fiction writers, and scholars, all open to students in the department.
The English Society, a student organization for those focusing on literatures in English, creative writing, and related areas, is open to all students and organizes events of interest throughout the year. The Department of English also collaborates with Alpha Tau Iota, the University of Iowa chapter of Sigma Tau Delta, the International English Honors Society. Sigma Tau Delta's central purpose is to confer distinction for high achievement in English language, literature, and writing.

The Association of Graduate Students in English sponsors social and intellectual events during the year and provides a forum for student opinion. All graduate students in the department are members.

## Programs

## Undergraduate Programs of Study Majors

- Major in English (Bachelor of Arts) [p. 402]
- Major in English and Creative Writing (Bachelor of Arts) [p. 411]
Minor
- Minor in English [p. 416]

## Graduate Programs of Study

## Majors

- Master of Arts in English [p. 417]
- Master of Fine Arts in English (creative writing) [p. 419]
- Master of Fine Arts in English (nonfiction writing) [p. 420]

## Facilities

The University of Iowa Libraries collection is strong in all areas of English and American literature. Partly because of the influence of the Iowa Writers' Workshop, University Libraries has particular strengths in 20th-century fiction and poetry, including manuscript collections of 20th-century authors.

## Courses

- English Courses [p. 389]
- Creative Nonfiction Writing Courses [p. 397]
- Creative Writing-Writers' Workshop Courses [p. 399]

## English Courses

Individual descriptions for most English courses are not included because content and emphasis may vary considerably from one semester to the next. For detailed descriptions of each semester's courses, visit the university's MyUI website.

English department courses are open to all undergraduates who have satisfied the rhetoric requirement. Undergraduates are encouraged to complete the required course ENGL:2010 Foundation of the English Major: Histories, Literatures, Pleasures as soon as they declare the English major. Students also are encouraged to take a required course in reading and writing about a genre (ENGL:2012-ENGL:2016) at an early stage in their studies.

Courses ENGL:4000 English Honors Seminar, ENGL:4040
Undergraduate Honors Project, and ENGL:4010 Special Project for Undergraduates may be repeated. Most courses with the prefix ENGL may not be repeated. Occasionally, with written consent from the department's Undergraduate Advising Office, a student may repeat a course if the course's subject matter is different from that of a course the student already has taken.

## ENGL:1000 First-Year Seminar

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th/21stCentury Literature.
ENGL:2191 Modern Fiction
3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th/21stCentury Literature.
ENGL:2192 Postmodern Fiction 3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th/21stCentury Literature.
ENGL:2193 Literature, Culture, and Women 3 s.h English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Varies by semester. Same as GWSS:2193.

## ENGL:2194 Lyric Structures

## 3 s.h.

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th/21stCentury Literature

## ENGL:2206 Classical and Biblical Literature

3 s.h
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century.

ENGL:2216 Selected Works of the Middle Ages 3 s.h. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century.

## ENGL:2236 Selected Early Authors

3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century.

## ENGL:2309 Selected British Authors Before $1900 \quad 3$ s.h.

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 18th/19th-Century Literature.

ENGL:2310 Selected British Authors After $1900 \quad 3$ s.h.
English majors and English and Creative Writing majors may apply the following course to the area and/or period requirement. AREA:
Modern British Literature and Culture. PERIOD: 20th/21st-Century Literature.

## ENGL:2329 Topics in Modern British Literature Before 1900

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 18th/19th-Century Literature.

ENGL:2330 Topics in Modern British Literature After 19003 s.h. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 20th/21st-Century Literature.

ENGL:2338 Eighteenth-Century British Literature 3 s.h. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Modern British literature and Culture. PERIOD: 18th/19th-Century Literature.

## ENGL:2348 British Romanticism

3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 18th/19th-Century Literature.
ENGL:2359 Victorian Literature
3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 18th/19th-Century Literature.

ENGL:2360 Twentieth-Century British Literature 3 s.h. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 20th/21st-Century Literature.

ENGL:2361 Twenty-first-Century British Literature 3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 20th/21st-Century Literature.

ENGL:2369 Topics in British Culture and Identity 3 s.h.
How culture and identity of British society are created and reflected through literature and other discursive systems; focus on a specific topic and area. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: Varies by semester.

ENGL:2409 Selected American Authors Before 1900 3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th/19th-Century Literature.

ENGL:2410 Selected American Authors After 1900 2-3 s.h. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th/21st-Century Literature.

## ENGL:2420 American Literary Classics <br> 3 s.h.

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: Varies by semester.
ENGL:2425 American Poetry
3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: Varies by semester.
ENGL:2438 American Novel Before $1900 \quad 3$ s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th/19th-Century Literature.

## ENGL:2440 American Novel After $1900 \quad 3$ s.h.

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th/21st-Century Literature.

ENGL:2450 American Short Story
3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: Varies by semester.

ENGL:2463 Topics in African American Literature 3 s.h. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th/21st-Century Literature. English and Creative Writing majors may apply this course to the Multiethnic American Literature and Culture requirement. Same as AFAM:2463.
ENGL:2465 Selected African American Authors 3 s.h. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th/21st-Century Literature. English and Creative Writing majors may apply this course to the Multiethnic American Literature and Culture requirement. Same as AFAM:2465.

ENGL:2475 Asian American Literature
3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th/21st-Century Literature. English and Creative Writing majors may apply this course to the Multiethnic American Literature and Culture requirement.

Interdisciplinary study of contemporary American women writers whose works depict the shaping force of race, class, gender, and sexuality on individuals, families, and communities.
ENGL:3510 Topics in Transnational Literature 3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature.

ENGL:3515 Topics in Postcolonial Studies 3 s.h. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature.

## ENGL:3520 Literature and Culture of the 20th and 21st

 CenturyEnglish majors and English and Creative Writing majors may apply this course to the following area and/or period requirement.
AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature.
ENGL:3525 Literature and Culture of the Americas 3 s.h. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Culture. PERIOD: 20th/21st-Century Literature.
ENGL:3530 Caribbean Literature and Culture 3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Culture. PERIOD: 20th/21st-Century Literature.

## ENGL:3532 Modernist Women Writers <br> 3 s.h.

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature.

## ENGL:3535 Topics in Literature and Culture of the

Americas 3 s.h.

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature. Same as LAS:3535.
ENGL:3540 Literature of the Indian Subcontinent 3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature.

## ENGL:3550 African Literature

3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature. Same as AFAM:3550.
ENGL:3555 Topics in African Cinema
3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature. Same as AFAM:3555.

## ENGL:3570 Transnational and Postcolonial Writing by Women

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement.
AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature. Same as GWSS:3570.

ENGL:3580 Identity and Social Issues
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: Varies by semester.
ENGL:3595 International Literature Today 1,3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature. Same as IWP:3191, TRNS:3191, WLLC:3191.

ENGL:3721 Writers' Seminar: Fiction 3 s.h.
In-depth exploration and analysis of creative works in fiction.
Requirements: English major, admission to Undergraduate Creative Writing track, or English and Creative Writing major.

## ENGL:3722 Writers' Seminar: Poetry

In-depth exploration and analysis of creative works in poetry. Requirements: English major, admission to Undergraduate Creative Writing track, or English and Creative Writing major.

## ENGL:3723 Writers' Seminar: Nonfiction

Rigorous exploration and analysis of a range of nonfiction creative works. Requirements: English major, admission to Undergraduate Creative Writing track, or English and Creative Writing major.

## ENGL:3724 Writers' Seminar: Literary Translation

Rigorous exploration and analysis of a range of creative works in literary translation. Requirements: English major, admission to Undergraduate Creative Writing track, or English and Creative Writing major.
ENGL:3725 Writers' Seminar: Playwriting 3 s.h.
Rigorous exploration and analysis of a range of creative works in drama. Requirements: English major, admission to Undergraduate Creative Writing track, or English and Creative Writing major.
ENGL:3850 Undergraduate Translation Workshop 3 s.h.
Translation exercises, discussion of translation works in progress; alternative strategies for translation projects. Same as CLSA:3979, TRNS:3179.
ENGL:4000 English Honors Seminar
English majors and English and Creative Writing majors may apply this course to varied area and/or period requirements. Requirements: undergraduate standing and English major GPA of 3.33.
ENGL:4001 Honors Seminar: American Literature, 20th/21st

## Century

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th/21st Century Literature. Requirements: undergraduate standing and English major GPA of 3.33.

## ENGL:4002 Honors Seminar: British Literature, 20th/21st

 CenturyEnglish majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Modern British Literature and Culture. PERIOD: 20th/21st Century Literature. Requirements: undergraduate standing and English major GPA of 3.33.

ENGL:4003 Honors Seminar: Literary Theory and

3 s.h.

3 s.h.

3 s.h.

3 s.h.
3 s.h. Interdisciplinary Studies, 20th/21st Century 3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th/21st Century Literature. Requirements: undergraduate standing and English major GPA of 3.33 .

## Creative Nonfiction Writing Courses

Courses CNW:6654 Forms of the Essay, CNW:6650 Readings in Nonfiction, CNW:6610 Essay Writing Workshop, and CNW:6620 Nonfiction Writing Workshop may be repeated. Others may be repeated with the consent of the instructor and the director of graduate studies.
Course CNW:1620 Introduction to Creative Nonfiction does not count toward the English major or minor.
Course CNW:3630 Advanced Nonfiction Writing has a prerequisite.
Course CNW:4631 Advanced Essay Workshop requires the consent of the instructor (see course description on MyUI).

CNW:1620 Introduction to Creative Nonfiction 3 s.h.
Exploration of creative nonfiction genres through readings, discussion, and writing exercises; introduction to workshop environment. GE: Engineering Be Creative; Literary, Visual, and Performing Arts.

CNW:2680 The Art and Craft of Creative Nonfiction 3 s.h.
How we tell stories-every time people talk about themselves, someone they know, places visited or events experienced; creation of a story with intention to entertain and inform a particular audience; how to create compelling, thought-provoking, and resonant texts from raw material of daily life; exploration of three fundamentals of great storytelling-taking emotional and intellectual risks, being imaginatively rigorous, and revising, revising, revising. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.
CNW:2700 The Art and Craft of Personal Writing 3 s.h.
Moments of wonder, confusion, and blips in memory that can reveal deep and complicated truths in life; different kinds of personal writing with focus on strategies that writers employ to create rich and compelling stories; character, scene, voice, point of view, suspense, and timing. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.
CNW:2710 The Art and Craft of Food Writing 3 s.h. Vivid prose that evokes memories, moods, places, and events; creating a visceral bond with readers as powerful as in any other art form; basics of food writing; how to heighten awareness of physical world through exercises that focus on sensory details. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing.
CNW:2720 The Art and Craft of Writing About Culture 3 s.h. Writing about the culture surrounding us-literature, songs, movies, magazines, television, food, concerts, theater, commercials, billboards, comic books, internet, museums, sports, architecture; readings, field trips, and multiple approaches to writing. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.
CNW:2730 The Art and Craft of Science Writing 3 s.h.
Introduction to science writing; development of a clear and engaging prose style through readings and workshops. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.

## CNW:2740 The Art and Craft of Writing about the

## Environment

Tradition of nature writing and how it has inspired writers, artists, and activists to find more complicated and daring interpretations of what constitutes an environment; reading and writing that challenges assumptions and pushes boundaries of environmental writing and nonfiction. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.

CNW:2760 The Art and Craft of Writing for Social Change $\mathbf{3}$ s.h. How nonfiction writers have responded to tumultuous social, political, and cultural topics of their day through reading and writing. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing.
CNW:2770 The Art and Craft of Writing for New Media 3 s.h. Fundamental elements of new media; readings that celebrate and challenge today's newest experiments in podcasts, video games, internet, Twitter feeds, and Tumblr narratives; crafting and critiquing texts in these media. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.
CNW:2780 The Art and Craft of Writing About Sports 3 s.h. Introduction to sports writing through reading and writing. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.

CNW:2790 The Art and Craft of Humor Writing 3 s.h.
How comedy functions as one of many tools writers have at their disposal through reading and writing. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.
CNW:2820 The Art and Craft of the Literary Essay 3 s.h. Different forms of the essay-reviews, memoirs, profiles, travelogues, journalism, cultural criticism-through readings and writing. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing.

## CNW:2830 The Art and Craft of Immersion Journalism

3 s.h.
Immersion in fieldwork, leading to nonfiction writing; writer-in-residence for a particular place, institution, or organization; observation and exploration of everything that happens within those boundaries. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.
CNW:2840 The Art and Craft of Travel Writing $\mathbf{3}$ s.h.
How to capture a journey's details and sensations through explorations of character, scene, point of view, and timing; why a person does not need to be a world traveler to become a compelling "writer about place"; readings, field trips, multiple approaches to workshopping. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.
CNW:2850 The Art and Craft of Writing About Politics 3 s.h. How to observe and reveal complex personalities, relationships, beliefs, and histories that underlie political events and races; strong emphasis on how to gather field research and shape it into compelling literary prose; Iowa's unique role in political theater. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.

CNW:2910 Writing for Applications and Awards 3 s.h.
Practical exploration of how to prepare applications for fellowships, awards, grants, and graduate schools; emphasis on composing and revising personal statements, project narratives, funding proposals; fundamentals of how to clearly, concisely, and compellingly present ideas to specialized and general audiences. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.

CNW:2991 Publishing I: Introduction to Literary Publishing 3 s.h. Introduction to major aspects of book and literary publishing, including evaluating submissions, copy editing, production calendars, and planning marketing campaigns; discussion of industry trends. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. Same as WRIT:2991.

CNW:2992 Publishing II: Advanced Literary Publication 3 s.h. Hands-on experience of entire literary publishing process including reading submissions, selecting texts, editing, layout and design, marketing and promotion, and book release. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. Prerequisites: CNW:2991. Same as WRIT:2992.

CNW:3600 Issues in Creative Nonfiction 3 s.h Exploration and discussion of a single topic in creative nonfiction through a variety of reading assignments and creative writing exercises. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing.
CNW:3630 Advanced Nonfiction Writing
3 s.h.
Essay writing; focus on workshop environment. Prerequisites: CNW:2830 or CNW:2720 or CNW:2840 or CNW:2710 or CNW:2700 or CNW:2760 or CNW:2910 or CNW:2780 or CNW:2850 or CNW:2730 or CNW:2740 or CNW:2770 or CNW:2820 or CNW:2680 or CNW:2790. Requirements: undergraduate standing.
CNW:3632 Prose Style
Sentences: how they work, what they do; how sentences can help writing, expand understanding of prose style, stretch options. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative. Same as WRIT:3632.
CNW:3633 Personal Writing 3 s.h.
CNW:3640 Writing for Business 3 s.h.
Foundational skills for careers in the humanities including building portfolios, résumés, cover letters, and interview skills for job searches; professional communication and protocol; and exploring career opportunities. GE: Engineering Be Creative.
CNW:3660 Multimedia Writing
3 s.h.
Multidisciplinary sessions mixing media production, creative nonfiction, and literary theory; topics ranging from hypertext authoring and electronic magazine publishing to sound art and digital video; principles and practices of writing for alternative media, theoretical understanding of how various media frame the situation; radio essay, video essay, interactive animation, web authoring, electronic magazine publishing.

CNW:3661 Film and Writing
3 s.h.
Writers' introduction to digital video; compelling forms of nonfiction filmmaking from the film essay to the environmental documentary; how to convert texts into film, conduct interviews, and shoot and edit digital video.

## CNW:3663 Radio and Writing

 3 s.h.Writing with sound; introduction to radio essays and documentaries with focus on digital audio; analyze key radio works and essayists; produce voiceovers, record interviews, mix music, edit sound and spoken texts in making radio art.

## CNW:3664 Writing About Science

Writing about science and technology from neurobiology to astrophysics; exploration of classic literary nonfiction on the sciences; focus on various stylistic practices for making complex topics compelling for a general audience and developing a clear and readable prose style.

CNW:4355 Approaches to Teaching Writing 3 s.h.
Theories, practices, strategies, and history of writing and teaching writing. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative. Same as EDTL:4355.
CNW:4631 Advanced Essay Workshop
3 s.h.
Experience working on new nonfiction projects, drafting and preparing one piece throughout a semester; individualized work to promote understanding of and creation in genres of nonfiction writing. Requirements: undergraduate standing and successful completion of one CNW course.

## CNW:4635 Advanced Creative Nonfiction Writing

3 s.h.
Close work with faculty and peers on advanced creative nonfiction writing projects. Requirements: one 2000- or 3000-level CNW course.

## CNW:4690 Undergraduate Project in Nonfiction Writing <br> arr.

CNW:5375 Teaching in a Writing Center
Seminar/practicum to prepare graduate students to teach in the University of Iowa Writing Center or similar settings; seminar component on writing and reading processes, tutoring strategies, English-as-a-second-language issues; practicum experience tutoring in the Writing Center. Same as RHET:5375.

## CNW:6600 Teaching Nonfiction

3 s.h.
Theories and practices of teaching nonfiction writing; writing workshop approaches, strategies to encourage response and revision, connections between reading and writing, diversity of form, language, and assessment.

## CNW:6610 Essay Writing Workshop 4 s.h.

## CNW:6620 Nonfiction Writing Workshop

Intensive workshop focusing on student work; students will have an essay critiqued and a conference with the advisor; wide-ranging discussion dealing with various aspects of this multi-faceted genre and new trends in contemporary nonfiction.
CNW:6630 Graduate Thesis Workshop
4 s.h.
Thesis work in supportive workshop environment. Prerequisites: CNW:6610 and CNW:6620.
CNW:6650 Readings in Nonfiction
3 s.h.

## CNW:6654 Forms of the Essay

CNW:6656 Approaches to Nonfiction
Investigation into forms of nonfiction writing.

## CNW:6660 Twenty-first-Century Nonfiction

## CNW:6666 Performance and Profession

Making and maintaining a writing career, with lessons on navigating the writer's job market; developing cover letters and curriculum vitaes, interviewing, finding an agent, negotiating with publishers, handling social media, and delivering a reading.

CNW:6670 Overseas Writing Workshop

3 s.h. CNW:7073 Ethnographic Methods, Theories, and Texts 3 s.h.
Practical and theoretical background for conducting ethnographic field studies in literacy, schooling, language, or a field of student's choice; methods, methodologies, and perspectives from anthropology, sociology, folklore, journalism, literary criticism, cultural, critical, and composition theory; read historical and contemporary ethnography, consider ethnographic forms of expression (films, graphics, fiction, poems); roles, responsibilities, and ethics of writer, reader, viewer, and informant; tools, methods, and writer's techniques to develop an ethnographic portfolio. Prerequisites: PSQF:7331 or EDTL:7070 or CSED:7338 or EPLS:7373. Same as EDTL:7073.

CNW:7900 Special Project in Nonfiction Writing
CNW:7950 Thesis in Nonfiction Writing

## Creative Writing-Writers' Workshop

 CoursesCourse CW:1800 Creative Writing Studio Workshop does not count toward the English major or minor

CW:1200 Creative Writing for Non-Native English Speakers 3 s.h. Designed to help non-native English speakers who would like to learn more about creative writing; guided readings and creative writing exercises in fiction, poetry, and creative nonfiction, with special emphasis on the interests of writers from diverse backgrounds; creative writing as a means of self-expression, while improving writing and speaking skills in a friendly, supportive environment.

## CW:1800 Creative Writing Studio Workshop

 3 s.h.Experience reading and writing fiction, poetry, and personal narrative in a workshop setting; study of published work and critical discussion from a writer's standpoint; critique of class members' work. GE: Literary, Visual, and Performing Arts.

## CW:2100 Creative Writing

Guidance in the process of writing fiction and poetry; writing as exploration; development of students' critical skills as readers; application of new knowledge and skills to students' own writing. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.
CW:2600 Special Topics Workshop
3 s.h.
Writing workshops on special topics (e.g., writing weird tales, world building, writing place); students dive into the intricacies of craft in context of a particular topic, practice a particular set of skills, and develop new creative work.
CW:2870 Fiction Writing
3 s.h.
Analysis of works of accomplished fiction writers; critique of class members' short stories, in writing and in class; discussion of how class members use language, characterization, point of view, other elements of fiction in their work. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.

CW:2875 Poetry Writing 3 s.h.
Careful writing of poems, reading of poetry by class members as well as established poets; supportive workshop context. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative.

## CW:3000 Writing and Reading Romance Fiction <br> 3 s.h.

How constraints and parameters in which romance fiction is created are a useful lens through which to explore the layers of craft and technique that underlie all great creative writing; opportunity to hone understanding of genre; exploration of specific craft techniques; development of a broader understanding of the fiction landscape.

## CW:3002 Writing and Reading Young Adult Fiction

0,3 s.h.
Constraints and parameters in which young adult fiction is created and a useful lens through which to explore the layers of craft and technique that underlie all great creative writing; opportunity for students to hone their understanding of genre, explore specific craft techniques, and develop a broader understanding of the fiction landscape.
CW:3003 Writing and Reading Science Fiction 3 s.h.
Science fiction literature as an ongoing conversation about the possible; exploration of world boundaries we have by imagining worlds that we don't (yet); alien encounters that consider ways we react to beings we see as unlike ourselves; alternate histories to illuminate what might have been; transhumanist fiction to explore what we may become; issues of composition and craft that underlie all effective fiction; students write and revise works of science fiction and engage in constructive discussion of each other's work. GE: Engineering Be Creative.
CW:3004 Writing and Reading Fantasy Fiction 3 s.h.
Exploration of rules and boundaries of fantasy writing; interrogation of strategies and approaches that make writing fantasy distinct from other genres of fiction.

## CW:3005 Professional and Creative Business

## Communication

3 s.h.
Solid foundation for creative and professional communication in today's modern work world; exploration of techniques, strategies, and craft of writing résumés, letters of interest, email and its related etiquette, and organization of ideas into presentable form; semesterlong creative project that builds a bridge between office and the world using modern technology and social media; readings and discussions of literature to better understand issues of ethics, leadership, conflict, moral judgment, decision-making, and human nature; how to navigate and succeed in business or any professional field. GE: Engineering Be Creative. Same as INTD:3005, WRIT:3005.

## CW:3105 The Art of Writers' Journals

Introduction to literary art of journal writing through close readings of celebrated writers' journals, fiction related to journaling, and a series of journaling exercises; students build skills in communication, observation, voice, and literary expression.

## CW:3107 Creative Writing for the Health Professions

3 s.h.
GE: Engineering Be Creative. Same as INTD:3107.
CW:3215 Creative Writing and Popular Culture 3 s.h.
Creative writing through the lens of popular culture; topics include television, film writing, adaptations, commercials, advertising, magazines, newspapers, comic books, song lyrics, billboards, and backs of cereal boxes. GE: Engineering Be Creative. Same as INTD:3300.
CW:3218 Creative Writing for New Media 3 s.h.
Prepares creative writers for evolving marketplace of electronic text and media; experience writing in varied media (e.g., internet, ebooks, video games, mobile devices, emergent social narratives). GE: Engineering Be Creative. Same as INTD:3200.
CW:3400 Working Writers in Conversation 3 s.h.
Exposure to work of established contemporary writers who plan to visit the University of Iowa campus; students engage with each writer directly through class visits and reading attendance.

## CW:3870 Advanced Fiction Writing

3 s.h.
Analysis of accomplished fiction writers' work; critique of class members' short stories, in writing and in class; discussion of how class members use language, characterization, point of view, other elements of fiction in their work. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. Prerequisites: CW:2870.

CW:3875 Advanced Poetry Writing
3 s.h.
Writing poems, reading poetry by class members and established poets; workshop context. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. Prerequisites: CW:2875.
CW:4745 The Sentence: Strategies for Writing 3 s.h.
Writing dynamic, cogent, and grammatically correct sentences;
effectively communicating ideas; writing with clarity and confidence; review of grammar and various types of sentences; building complexity by adding adverbial, subordinate, and connective clauses to simple sentences; how rhythm, syntax, and word order expand the meaning of a sentence; application and appreciation. GE: Engineering Be Creative. Same as WRIT:4745.
CW:4751 Creative Writing for the Musician
3 s.h.
Better writing by focused appreciation of classical and popular music; musical forms and storytelling; music as a source of inspiration, performance of free-form writing exercises set to different soundtracks; what music can teach about language; scansion; methods for applying musical techniques in word form; how punctuation and grammar create rhythm; tone and diction used to create and modify dynamics of prose; multimedia project incorporating written, visual, and audio storytelling techniques. GE: Engineering Be Creative.

## CW:4760 The Art of Revision: Rewriting Prose for Clarity and

 ImpactWriting and rewriting of short stories and essays; specific choices to help writing reach its full potential; examination of first drafts and making strategic or radical decisions on what needs to happen in subsequent drafts in order for writing to better match original intentions; students gain insight from peers on where first drafts are succeeding or falling short, and write second and third drafts of short stories and personal narratives; structural and aesthetic choices. GE: Engineering Be Creative. Same as WRIT:4760.
CW:4870 Undergraduate Writers' Workshop: Fiction arr
English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing.
CW:4875 Undergraduate Writers' Workshop: Poetry arr.
English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing.
CW:4885 Undergraduate Writers' Seminar
Exploration of literature to develop substance and craft; craft sessions designed around topic chosen by instructor; modeled after Iowa Writers' Workshop graduate reading seminars. Prerequisites: ENGL:2020.
CW:4894 Undergraduate Project in Creative Writing arr.
English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing.

CW:4897 Novel Writing
3 s.h.
Introduction to the process of writing a novel through focused lessons on character, perspective, plot, scene, and dialogue; organizing a longer work; creating notes and sections of a novel with progression towards completing a draft. Requirements: creative writing or fiction writing course.

| CW:7810 Form of Fiction | 3 s.h. |

## English, BA

The English major provides instruction in and opportunities for writing in all of its classes. The department also offers an honors program in which students work closely with a faculty member to complete a major critical or creative project. See Honors [p. 408] in this section of the catalog.

Students interested in the English major should consult the academic advisor in the English undergraduate advising office.

## Learning Outcomes

The goal is for students who graduate from the Department of English to demonstrate the skills of reflective reading, critical thinking, effective speaking, compelling writing, and engaged citizenship.

## Reflective Readers

- Analyze literary and cultural texts through close reading.
- Gain broad knowledge of several fields of literature.
- Grasp formal elements of key literary genres.
- Learn to read comparatively to illuminate aesthetic, social, and cultural contributions of texts.

## Critical Thinkers

- Approach texts with a spirit of critical inquiry and flexibility.
- Formulate productive questions.
- Use textual evidence to support individual interpretations.
- Draw upon several different critical approaches to literature in English.

## Effective Speakers

- Express opinions about the texts they read through discussion and written assignments.
- Listen respectfully to others' opinions.
- Work in class-whether through active listening or discussion-to learn by synthesizing a range of texts, insights, and opinions.

## Compelling Writers

- Express their ideas in clear, fluent, and lively prose.
- Organize their ideas effectively.
- Use textual evidence to illustrate and support their insights and arguments.
- Demonstrate the ability to write in different modes that are appropriate to particular contexts.
- Engage properly with relevant scholarship and creative work.
- Use research skills that include an understanding of methods, technology, and conventions.

## Engaged World Citizens

- Communicate respect and understanding for the literatures and cultures of diverse historical periods, geographical regions, and cultures.
- Explore ethical issues raised by literature.
- Reflect on the ways that literature addresses issues of social justice.
- Use reading, speaking, and writing skills to engage with the ethical concerns raised by literature in their daily and professional lives.

## Requirements

The Bachelor of Arts with a major in English requires a minimum of 120 s.h., including at least 36 s.h. (usually 12 courses) of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].
Students must earn at least 21 s.h. of credit for the major at the University of Iowa. Transfer students may count a maximum of 15 s.h. of approved transfer credit toward the major.

Students majoring in English should not use ENGL:1200 The Interpretation of Literature to fulfill the GE CLAS Core Interpretation of Literature requirement. They may substitute a course from the Literary, Visual, and Performing Arts area of the GE CLAS Core, excluding these: DANC:1010 through DANC:2040, MUS:1001 Group Piano I: Non-Music Majors, and MUS:1020 Performance Instruction for Nonmajors.

Only courses numbered above 2000 count toward the English major. The following courses do not count toward the English major.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CNW:1620 | Introduction to Creative | 3 |
| CW:1800 | Nonfiction |  |
|  | Creative Writing Studio <br> Courses numbered ENGL:1000-ENGL:1999 | 3 |
|  |  |  |

Students may count up to 6 s.h. earned in courses in creative writing (prefix CW ) toward the English major.
All English majors must complete ENGL:2010 Foundation of the English Major: Histories, Literatures, Pleasures, as well as one course in reading and writing about a genre (ENGL:2012-ENGL:2016).

Other coursework for the major is divided into six areas and three historical periods. Along with two introductory courses, students must complete a total of six area courses (see "Areas" below) and six historical period courses (see "Historical Periods" below). Most courses (except those in the creative writing and nonfiction writing list) satisfy both an area and a historical period requirement, so students generally fulfill the historical period requirements as they complete the area requirements. This allows them to choose additional elective coursework to complete the major.

Each course's area and period designations are included in its course description, which is provided in the comprehensive list of Department of English courses; see Courses [p. 388] in this section of the catalog. A course's area and/or period designation may vary by semester; consult MyUI for semester-specific course information. Additional information about courses is available on the Department of English website and from the academic advisor.

Students also must complete at least one multiethnic literature and culture course.

For more information about teaching English in elementary and/or secondary schools, see "Teacher Licensure" below. Students who plan to teach English in schools should consult with an advisor in the College of Education as early as possible; contact the Office of Student Services. The BA in English education [p. 1384] requires that students choose particular courses in the English major in order to meet all related requirements; both degrees may be earned at the same time. Separate application to each degree program is required.

Students pursuing the BA in English can choose to complete requirements for the publishing track; see "Publishing Track" below for information.

The BA with a major in English requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Introductory Courses | 6 |
| Area/Historical Period Courses | 21 |
| Multiethnic Literature and Culture Requirement (can be <br> satisfied with a 3 s.h. course from another area) |  |
| Electives | 9 |

## Introductory Courses

All English majors must complete two introductory courses and are encouraged to enroll in them as soon as they declare the major. Students must take ENGL:2010 as well as one reading and writing about a genre course (ENGL:2012-ENGL:2016).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Foundation of the English <br> Major: Histories, Literatures, <br> Pleasures | 3 |
| One of these: | Reading and Writing About the <br> Novel | 3 |
| ENGL:2012 | Reading and Writing About <br> Poetry | 3 |
| ENGL:2013 | Reading and Writing About the <br> Short Story <br> ENGL:2014 | Reading and Writing About <br> Drama <br> ENGL:2015 | | Reading and Writing About the |
| :--- |
| Essay |

## Areas

Students must complete at least one course (3 s.h.) from each of the following six areas.

- Literary Theory and Interdisciplinary Studies [p. 403]
- Medieval and Early Modern Literature and Culture [p. 403]
- Modern British Literature and Culture [p. 403]
- American Literature and Culture [p. 404]
- Transnational Literature and Postcolonial Studies [p. 404]
- Nonfiction and Creative Writing [p. 405]

## Literary Theory and Interdisciplinary Studies

## Area Determined by Course Content

The following course's area is designated either as literary theory and interdisciplinary studies or as modern British literature and culture, depending on course context, which varies by semester. Consult MyUI for the semester-specific area designation.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGL:3010 | Children's Literature | 3 |

## Historical Periods

Students must complete at least two courses from each of the following three historical periods.

- Early Literatures Through the 17th Century [p. 405]
- Literature of the 18th/19th Century [p. 406]
- Literature of the 20th/21st Century [p. 406]

## Early Literatures Through the 17th Century

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGL:2206 | Classical and Biblical Literature | 3 |
| ENGL:2216 | Selected Works of the Middle <br> Ages | 3 |
| ENGL:2236 | Selected Early Authors | 3 |
| ENGL:3216 | Topics in Medieval and <br> Renaissance Literature | 3 |
| ENGL:3226 | Literature and Culture of the <br> Middle Ages | 3 |
| ENGL:3228 | Literature and Culture of the <br> Restoration | 3 |
| ENGL:3236 | Literature and the Culture of the <br> Renaissance | 3 |

| Interdisciplinary Studies |  |  |

## Multiethnic Literature and Culture Requirement

Students must complete at least one course (3 s.h.) from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGL:2463 | Topics in African American <br> Literature | 3 |
| ENGL:2465 | Selected African American <br> Authors | 3 |
| ENGL:2475 | Asian American Literature | 3 |
| ENGL:3441 | Native American Literature | 3 |
| ENGL:3444 | Literatures of the American <br> Peoples | 3 |
| ENGL:3455 | Jewish American Literature | 3 |
| ENGL:3459 | African American Literature <br> Before 1900 | 3 |
| ENGL:3460 | African American Literature <br> After 1900 | 3 |
| ENGL:3461 | Twenty-First Century African <br> American Literature | 3 |
| ENGL:3462 | African American Drama <br> ENGL:3465 | African American <br> Autobiography |
| ENGL:3467 | Latina/o/x Literatures and <br> Cultures | 3 |
|  | Alta |  |

The following courses may fulfill the Multiethnic Literature and Culture requirement depending on course content, which varies by semester; consult MyUI for semester-specific information.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGL:2409 | Selected American Authors | 3 |
| Before 1900 | $2-3$ |  |
| ENGL:2410 | Selected American Authors |  |
|  | After 1900 | 3 |
| ENGL:3160 | Literary Genres and Modes | 3 |
| ENGL:3431 | American Novel Since 1945 | 3 |
| ENGL:3440 | American Drama Since 1900 | 3 |
| ENGL:3450 | American Regional Literatures | 3 |
| ENGL:4150 | Introduction to Book Studies | 3 |
| ENGL:4720 | Advanced Creative Writing: |  |

## Publishing Track

The world of publishing includes many different careers: editors, designers, agents, even sales representatives. Students who are interested in these careers may wish to pursue the publishing track. By selecting courses carefully, students may complete the track without adding additional semester hours to their total credit required for graduation.
Courses range across print and digital media, exposing students to the history and practice of literary publishing while developing their skills in editing, proofreading, and writing with clarity and purpose. Internships and hands-on class learning offer students the opportunity to produce their own publications and gain practical experience.

Students in the publishing track must complete the following.

## Literary Publishing

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these (6 s.h.):  <br> CNW:2991 Publishing I: Introduction to <br>  Literary Publishing | 3 |  |
| CNW:2992 | Publishing II: Advanced <br> Literary Publication | 3 |

Editing, Book Design, or Revision

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these (3 s.h.): |  |  |
| ENGL:2900 | Book Design for Publishing | 3 |
| ENGL:2901 | The Book in Global History | 3 |
| ENGL:3145 | Editorial Practice | 3 |
| ENGL:3148 | Literary Editing | 3 |
| CNW:3632 | Prose Style | 3 |

## History of the Book and the Publishing Industry

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these (3 s.h.): |  | 3 |
| ENGL:3140 | Literature and the Book | 3 |
| ENGL:3142 | Topics in Book History | 3 |
| ENGL:3181 | Digital Media and Poetics | 3 |
| ENGL:3182 | Digital Cultures and Literacies | 3 |

## Career Preparation

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these (1-3 s.h.): |  |  |
| ENGL:2040 | English at Work | 1 |
| ENGL:4010 | Special Project for <br> Undergraduates | arr. |
| CCP:1201 | Academic Internship | $1-3$ |

Students should consult the department's advisor for information about completing the English major with the publishing track.

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in English and thereby enhance their course of study through honors seminars. All those interested in taking honors coursework are welcome to apply to the English Honors Program as soon as they qualify. The process begins with an online application; visit English Honors Programs on the Department of English website.

Students take three honors seminars and must achieve a University of Iowa grade-point average (GPA) of at least 3.33 and a major GPA of at least 3.50 .

Each year the department offers between four and six scholarship and criticism seminars covering a wide range of subjects, authors, and methods. Limited to 16 students, honors seminars carry 3 s.h. of credit, meet three hours each week, and encourage class discussions that are lively and knowledgeable. Substantial reading and research are required and culminate in a 15-20 page essay. Students register for ENGL:4001 Honors Seminar: American Literature, 20th/21st Century through ENGL:4009 Honors Seminar: Medieval and Early Modern Literature, Early Literature/17th Century. These courses cover different areas and historical periods, with possible focal points in American literature, British literature, literary theory, or transnational studies.
The third of the three honor seminars may be replaced with ENGL:4040 Undergraduate Honors Project, a capstone project. For this independent study option, interested students should seek out possible mentors in their junior year.
To register for a scholarly seminar, students are encouraged to have a University of Iowa GPA of at least 3.33 . In addition, they must have completed three English courses (not including introductory courses in nonfiction or creative writing) with an English major GPA of at least 3.33; ENGL:2010 Foundation of the English Major: Histories, Literatures, Pleasures; and ENGL:2012 Reading and Writing About the Novel through ENGL:2016 Reading and Writing About the Essay, and a departmental course of their choosing.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.
Membership in the UI Honors Program is not required to earn honors in the English major.

## Career Advancement

The English major prepares students for a wide variety of career paths including teaching, medicine, law, graduate school, and jobs in the private and nonprofit sector where writing, organization, research, and communication is highly valued. Within a year of graduation, over $92 \%$ of Department of English students are employed or in graduate programs.
The department's advisor helps guide students in their career path. The Department of English partners with the Pomerantz Career Center to introduce career development strategies and offer resources to help students find internships and jobs. For more information, students are encouraged to explore Careers and Opportunities on the Department of English website or enroll in the 1 s.h. course, ENGL:2040 English at Work.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan.
Before the fifth semester begins: at least two courses in the major.
Before the seventh semester begins: at least four more courses (total of six) in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: at least two more courses (total of eight) in the major.

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Iowa Degree in Three

University of Iowa majors who are strongly motivated can graduate with a degree in three years under the Iowa Degree in Three. The program is available to students who can complete more semester hours each term than they would on the Four-Year Graduation Plan.

Students sign an agreement during their first semester of enrollment; meet with an advisor at least once a semester to review their plans and progress; take courses during summer sessions, if necessary; meet specific course checkpoints; and maintain the grade-point average required for the major.
Students are allowed to bring Advanced Placement (AP), College Level Examination Program (CLEP), or transfer credit upon admission to reduce the number of semester hours required for their degree. They should consult their advisor about the program.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses
c Students majoring in English are not required to fulfill the GE CLAS Core Interpretation of Literature requirement but instead may substitute a Literary, Visual, and Performing Arts course excluding: DANC:1010 through DANC:2040, MUS:1001, and MUS:1020.
d Major courses can be taken in any order as long as ENGL:2010 is taken before any 3000 -level-course.
e Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
f Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
g Students may count up to 6 s.h. earned in courses with prefix CW toward the major.
h Students may consult with their advisor if they wish to complete an independent study or special project.
i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## English and Creative Writing, BA

The major enables students to experience the historical, traditional, and innovative aspects of literature in English and the relationship between critical reading and creative writing. The major provides the transferable skills important for a liberal arts major, including the ability to think deeply and creatively, read complex texts with comprehension, and master writing and speaking skills at an advanced level.

The English and creative writing major introduces students to the wealth of resources associated with the University of Iowa and the Iowa City writing communities. For over 75 years, the Department of English and the University of Iowa Writers' Workshop have been leaders in the area of writing. The MFA offered by the Nonfiction Writing Program and administered by the Department of English has been voted the top MFA program in creative nonfiction in the United States. Likewise, the MFA program in the Writers' Workshop is annually noted as the top graduate program in the country.
The international reputation of writing at Iowa is boosted by synergy across colleges, with the International Writing Program hosting published writers each fall from countries around the world and each spring traveling to other countries, taking Iowa writing on the road. This synergy helps the university and Iowa City draw writers of all ages and nationalities to its writing community. The community is bolstered by the strong readings series offered by the Nonfiction Writing Program, the Writers' Workshop, and Prairie Lights Books, with hundreds of readings archived by the Iowa Digital Library, creating a resource for future writers and scholars.

The status of Iowa City as a UNESCO City of Literature also has enriched the writing community, with people from across the Midwest visiting the city during the annual Book Festival. The Massive Open Online Courses (MOOCs) offered by the Department of English, "Every Atom: Walt Whitman's Song of Myself" and "Walt Whitman and the Civil War," as well as the International Writing Program's online series called "How Writers Write," have enrolled thousands of students and adult learners from around the world, enhancing the reputation of the University of Iowa as the "Writing University." The Iowa Summer Writing Festival, Iowa Young Writers' Studio, the Certificate in Writing, the Center for the Book, the Iowa Playwrights Workshop, and the Iowa Youth Writing Project all help to turn Iowa City into a destination for writers, who are drawn to the city for its heritage and for its current community of writers.

## Learning Outcomes

The goal is for students who graduate from the Department of English to demonstrate the skills of reflective reading, critical thinking, effective speaking, compelling writing, and engaged citizenship.

## Reflective Readers

- Analyze literary and cultural texts through close reading.
- Gain broad knowledge of several fields of literature.
- Grasp formal elements of key literary genres.
- Learn to read comparatively to illuminate aesthetic, social, and cultural contributions of texts.

## Critical Thinkers

- Approach texts with a spirit of critical inquiry and flexibility.
- Formulate productive questions.
- Use textual evidence to support individual interpretations.
- Draw upon several different critical approaches to literature in English.

## Effective Speakers

- Express opinions about the texts they read through discussion and written assignments.
- Listen respectfully to others' opinions.
- Work in class-whether through active listening or discussion-to learn by synthesizing a range of texts, insights, and opinions.

## Compelling Writers

- Express their ideas in clear, fluent, and lively prose.
- Organize their ideas effectively.
- Use textual evidence to illustrate and support their insights and arguments.
- Demonstrate the ability to write in different modes that are appropriate to particular contexts.
- Engage properly with relevant scholarship and creative work.
- Use research skills that include understanding of methods, technology, and conventions.

## Engaged World Citizens

- Communicate respect and understanding for the literatures and cultures of diverse historical periods, geographical regions, and cultures.
- Explore ethical issues raised by literature.
- Reflect on the ways that literature addresses issues of social justice.
- Use reading, speaking, and writing skills to engage with the ethical concerns raised by literature in their daily and professional lives.

## Requirements

The Bachelor of Arts in English and creative writing requires a minimum of 120 s.h., including at least 42 s.h. of work for the major. Of the 42 s.h., at least 36 s.h. must be selected from the Department of English courses (prefix ENGL, CNW, CW). Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19]. Transfer students must earn at least 30 s.h. work for the major at the University of Iowa.
Students earning a major in English and creative writing may not earn a major in English.
For more information about teaching in elementary and/or secondary schools, see "Teacher Licensure" below. Students who plan to teach in elementary and/or secondary schools should consult with an advisor in the College of Education as early as possible; contact the Office of Student Services. The BA in English education [p. 1384] requires that students choose particular courses in the English and creative writing major in order to meet all related requirements; both degrees may be earned at the same time. Separate application to each degree program is required.

Students pursuing the BA in English and creative writing can choose to complete the requirements for the publishing track; see "Publishing Track" below for information.
Only courses numbered above 2000 count toward the English and creative writing major. The following courses do not count toward the major.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CNW:1620 | Introduction to Creative | 3 |
|  | Nonfiction |  |

$\left.\begin{array}{ll|}\text { CW:1800 Creative Writing Studio } \\ \text { Workshop }\end{array}\right]$

Electives (prefix ENGL, CNW, or CW courses)
3

## Introductory Courses

Students complete both of the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGL:2010 | Foundation of the English <br> Major: Histories, Literatures, <br> Pleasures | 3 |
| ENGL:2020 | Foundations of Creative <br> Writing: Craft, Practice, <br> Pleasure | 3 |
|  |  |  |

## Literature Core Courses

Core courses help students to learn and practice critical reading and analysis, to understand the relation of literature to history and culture, and introduce students to the context and tradition of literature written in English.

The area and historical periods for English courses are identified under English Courses [p. 388] in this section of the catalog and in the MyUI course descriptions. Since most courses satisfy both an area requirement and a historical period requirement, most students complete these requirements with the same courses.

## Area Requirement

A minimum of $3 \mathrm{~s} . \mathrm{h}$. must be completed from each of the following five areas of English literary study for a minimum total of 15 s.h. of coursework:

- American literature and culture;
- literary theory and interdisciplinary studies;
- medieval and early modern literature and culture;
- modern British literature and culture; and
- transnational literature and postcolonial studies.

## Historical Period Requirement

A minimum of 3 s.h. from each of the following three historical periods in English literary study (total of 9 s.h.) must be completed:

- early literatures through the 17th century;
- 18th/19th-century literature; and
- 20th/21st-century literature.

## Multiethnic Literature and Culture Requirement

Students must complete at least one course (3 s.h.) from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGL:2463 | Topics in African American | 3 |
| ENGL:2465 | Literature |  |
| Selected African American | 3 |  |
| ENGL:2475 | Authors | Asian American Literature |

| ENGL:3441 | Native American Literature | 3 |
| :--- | :--- | :--- |
| ENGL:3444 | Literatures of the American <br> Peoples | 3 |
| ENGL:3455 | Jewish American Literature | 3 |
| ENGL:3459 | African American Literature <br> Before 1900 | 3 |
| ENGL:3460 | African American Literature <br> After 1900 | 3 |
| ENGL:3461 | Twenty-First Century African <br> American Literature | 3 |
| ENGL:3462 | African American Drama <br> ENGL:3465 | African American <br> Autobiography <br> Latina/o/x Literatures and <br> Cultures |

The following courses may fulfill the Multiethnic Literature and Culture requirement depending on course content, which varies by semester; consult MyUI for semester-specific information.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGL:2409 | Selected American Authors | 3 |
| Before 1900 |  |  |
| ENGL:2410 | Selected American Authors | $2-3$ |
|  | After 1900 | 3 |
| ENGL:3160 | Literary Genres and Modes | 3 |
| ENGL:3431 | American Novel Since 1945 | 3 |
| ENGL:3440 | American Drama Since 1900 | 3 |
| ENGL:3450 | American Regional Literatures | 3 |
| ENGL:4150 | Introduction to Book Studies | 3 |
| ENGL:4720 | Advanced Creative Writing: | 3 |
|  | Special Topic |  |

## Creative Writing Core Courses

The creative writing core provides courses in a range of literary genres. Students choose a minimum of 9 s.h. in electives and a minimum of 9 s.h. in advanced courses, as listed below. Students also can count any course from the "Advanced Requirements" list below as an elective (where appropriate) if they take more than the three required advanced courses.

## Creative Writing Electives

The creative writing electives give students flexible choices to focus on fiction, nonfiction, poetry, or other genres of writing, and allow students to experiment across genres. Courses focus on the particulars of craft, tradition, and innovation. Many of the courses are repeatable, enabling students to further develop in a particular writing form. Some of these courses have prerequisites.
Students must select a minimum of 9 s.h. from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Courses numbered CNW:2680-CNW:4999 |  |  |
| Courses numbered CW:2000-CW:4999 |  |  |
| CINE:3361 | Screenwriting: Short Form | 3 |
| CINE:3367 | Screenwriting: Long Form | 3 |
| COMM:2077 | Writing and Producing | 3 |
|  | Television | 3 |
| SPAN:3060 | Introductory Workshop on |  |
|  | Creative Writing in Spanish | 3 |
| THTR:2301 | Playwriting I | 3 |
| THTR:3301 | Playwriting II | $1-3$ |
| THTR:3310 | Undergraduate Playwriting |  |
|  | Workshop |  |

| THTR:3320 | Writing for Film | 3 |
| :--- | :--- | :--- |
| THTR:3325 | Iowa Writers' Room | 3 |
| TRNS:3179 | Undergraduate Translation | 3 |
|  | Workshop | 3 |
| WLLC:2473 | Cinderella | 3 |
| WLLC:3208 | Classical Chinese Literature |  |
|  | Through Translation |  |

## Advanced Requirements

Students must first complete the two introductory courses —ENGL:2010 Foundation of the English Major: Histories, Literatures, Pleasures and ENGL:2020 Foundations of Creative Writing: Craft, Practice, Pleasure-before they enroll in advanced courses. Advanced courses give students flexible choices so they can focus on fiction, nonfiction, poetry, or other genres of writing, and provide the opportunity to experiment across genres. Courses focus on the particulars of craft, tradition, and innovation. Most of the advanced courses are repeatable and most have prerequisites.
Students must select a minimum of 9 s.h. in advanced creative writing courses from the following.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| ENGL:4011 | Honors Seminar: Creative Writing | 3 |
| ENGL:4012 | Honors Seminar in Fiction | 3 |
| ENGL:4013 | Honors Seminar in Poetry | 3 |
| ENGL:4014 | Honors Seminar in Creative Nonfiction | 3 |
| ENGL:4020 | Honors Thesis Workshop | 3 |
| ENGL:4030 | Undergraduate Honors Project in Creative Writing | 1-3 |
| ENGL:4720 | Advanced Creative Writing: Special Topic | 3 |
| ENGL:4721 | Advanced Writers' Seminar: Fiction | 3 |
| ENGL:4722 | Advanced Writers' Seminar: Poetry | 3 |
| ENGL:4723 | Advanced Writers' Seminar: Nonfiction | 3 |
| ENGL:4724 | Advanced Writers' Seminar: Literary Translation | 3 |
| ENGL:4725 | Advanced Writers' Seminar: Playwriting | 3 |
| CNW:4631 | Advanced Essay Workshop | 3 |
| CNW:4635 | Advanced Creative Nonfiction Writing | 3 |
| CW:4870 | Undergraduate Writers' Workshop: Fiction | arr. |
| CW:4875 | Undergraduate Writers' Workshop: Poetry | arr. |
| CW:4885 | Undergraduate Writers' Seminar | arr. |
| CINE:4377 | Advanced Screenwriting I | 4 |
| CINE:4378 | Advanced Screenwriting II | 4 |
| THTR:3310 | Undergraduate Playwriting Workshop | 1-3 |
| THTR:6310 | Special Topics in Playwriting | 3 |

## Publishing Track

The world of publishing includes many different careers: editors, designers, agents, and even sales representatives. Students who are interested in these careers may wish to pursue the publishing track. By selecting courses carefully, students may complete the track without
adding additional semester hours to their total credit required for graduation.
Courses range across print and digital media, exposing students to the history and practice of literary publishing while developing their skills in editing, proofreading, and writing with clarity and purpose. Internships and hands-on class learning offer students the opportunity to produce their own publications and gain practical experience.
Students in the publishing track must complete the following.

## Literary Publishing

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these (6 s.h.): |  |  |
| CNW:2991 | Publishing I: Introduction to |  |
| Literary Publishing | 3 |  |
| CNW:2992 | Publishing II: Advanced <br> Literary Publication | 3 |

## Editing, Book Design, or Revision

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these (3 s.h.): |  |  |
| ENGL:2900 | Book Design for Publishing | 3 |
| ENGL:2901 | The Book in Global History | 3 |
| ENGL:3145 | Editorial Practice | 3 |
| ENGL:3148 | Literary Editing | 3 |
| CNW:3632 | Prose Style | 3 |

## History of the Book and the Publishing Industry

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these (3 s.h.): |  |  |
| ENGL:3140 | Literature and the Book | 3 |
| ENGL:3142 | Topics in Book History | 3 |
| ENGL:3181 | Digital Media and Poetics | 3 |
| ENGL:3182 | Digital Cultures and Literacies | 3 |
| ENGL:4150 | Introduction to Book Studies | 3 |
| Career Preparation |  |  |
| Course \# | Title |  |
| One of these (1-3 s.h.): |  |  |
| ENGL:2040 | English at Work |  |
| ENGL:4010 | Special Project for | 1 |
|  | Undergraduates | arr. |
| CCP:1201 | Academic Internship | $1-3$ |

Students should consult the department's advisor for information about completing the English and creative writing major with the publishing track.

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.
To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in English and creative writing and thereby enhance their course of study through honors seminars. All those interested in taking honors coursework are welcome to apply to the English Honors Program as soon as they qualify. The process begins with an online application; visit English Honors Programs on the Department of English website.
Students take three honors seminars and must achieve a University of Iowa grade-point average (GPA) of at least 3.33 and a major GPA of at least 3.50.

Each year the department offers between four and six creative writing seminars covering a wide range of genres, modes, and styles. Small and often workshop-oriented, these honors courses are open only to English and creative writing majors who have completed at least 24 s.h. of college-level work. Seminars are limited to 16 students, carry 3 s.h. of credit, and meet three hours each week.

Two of the three honors seminars are chosen from these selective admission courses. Early in the previous semester, those interested apply with a portfolio of their creative work; no minimum GPA is required, and decisions are made in time for preregistration. Successful applicants then register for ENGL:4011 Honors Seminar: Creative Writing through ENGL:4014 Honors Seminar in Creative Nonfiction. Students may apply for only one seminar per semester.
The second of the two creative writing seminars may be replaced by ENGL:4030 Undergraduate Honors Project in Creative Writing, a capstone project. For this independent study option, interested students should seek out possible mentors in their junior year.

The third required honors course is a scholarship and criticism seminar chosen from courses numbered ENGL:4001 Honors Seminar: American Literature, 20th/21st Century through ENGL:4009 Honors Seminar: Medieval and Early Modern Literature, Early Literature/17th Century, courses that offer a wide range of subjects, authors, methods, and eras. Limited to 16 students, these courses also carry 3 s.h. of credit, meet three hours each week, and encourage class discussions that are lively and knowledgeable. Substantial reading and research are required and culminate in a $15-20$ page essay.

To register for a scholarly seminar, honors students in English and creative writing are encouraged to have a University of Iowa GPA of at least 3.33. They also must have completed at least three courses: ENGL:2010 Foundation of the English Major: Histories, Literatures, Pleasures; ENGL:2020 Foundations of Creative Writing: Craft, Practice, Pleasure; and a third departmental course of their choosing.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the English and creative writing major.

## Career Advancement

The English and creative writing major prepares students for a wide variety of career paths including teaching, medicine, law, graduate school, and jobs in the private and nonprofit sector where writing, organization, research, and communication is highly valued. Within a year of graduation, over $92 \%$ of Department of English students are employed or in graduate programs.

The department's advisor helps guide students in their career path. The Department of English partners with the Pomerantz Career Center to introduce career development strategies and offer resources to help students find internships and jobs. For more information, students are encouraged to explore Careers and Opportunities on the Department of English website, or enroll in the 1 s.h. course, ENGL:2040 English at Work.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan.

Before the fifth semester begins: at least six courses in the major, including ENGL:2010 Foundation of the English Major: Histories, Literatures, Pleasures; ENGL:2020 Foundations of Creative Writing: Craft, Practice, Pleasure; and an approved introduction to creative writing course (consult advisor).

Before the seventh semester begins: at least four more courses in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: at least two more courses in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## English, Minor

## Requirements

The undergraduate minor in English requires a minimum of 15 s.h. in English courses, including 12 s.h. in courses taken at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass. Students may count a maximum of 3 s.h. of approved transfer credit toward the minor. Before taking courses for the minor, students must complete the GE CLAS Core [p. 19] requirement, ENGL:1200 The Interpretation of Literature.

The minor must include at least 6 s.h. in literature courses numbered ENGL:2100 through ENGL:4810; the remaining 9 s.h. may be selected from additional courses in literature and from most courses in writing (prefixes CNW and CW), with a maximum of 6 s.h. earned in courses with the prefix CW.
Only courses numbered above 2000 count toward the English minor. The following courses do not count toward the English minor.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CNW:1620 | Introduction to Creative | 3 |
| CW:1800 | Nonfiction | 3 |
|  | Creative Writing Studio <br> Courses numbered | Workshop |

Students may declare the English minor on MyUI. In order for the minor to be recorded, students must indicate completion of the minor on their degree application.

Students who would like help declaring the minor or in planning how to meet its requirements may stop by the Department of English advising office or schedule an appointment with an advisor by contacting the English department's front desk administrator.

## English, MA

The Master of Arts program in English introduces students to the professional study of literature.

The MA is appropriate for students who would like graduate training in English and who may have an undergraduate major in a different field or who may intend to earn a PhD at another institution. Students interested in careers in any area of book studies (professional writing, editing, web design, or publishing) may wish to earn the MA as a terminal degree, as may teachers seeking to enhance their credentials or students pursuing intellectual growth unrelated to a specific career.

MA and PhD students in English mix freely in graduate courses, share the same access to faculty, and meet the same standards of quality in their work.

## Exam for the Master of Arts in Teaching

The department administers the English component of the exam for the Master of Arts in Teaching (MAT) in coordination with the College of Education. MAT students should contact the Department of Teaching and Learning (College of Education) for information.

## Learning Outcomes

- Historical knowledge: comprehensive historical knowledge of literary history, reflected in courses taken across a range of literary periods and national/international traditions.
- Critical theory and approaches: rigorous study of critical methodologies and interpretive strategies.
- Research skills: familiarity with library research into secondary scholarship on primary texts, archival research methods, and field research, where applicable.
- Writing skills: proficiency in writing means publishable-quality writing at the academic level (e.g., what one would expect from an article placed in a scholarly journal).
- Teaching skills: ideally, students will move from foundationsbased grading positions under the supervision of tenure track faculty (introduction to the major) to rhetoric/composition coursework (rhetoric), and then on to literary analysis-focused courses (general education literature). Students learn to build their own syllabi, develop a teaching portfolio, and manage their own courses independently.
- Professional development: this includes conference presentations, curriculum vitae and résumé building, and teaching statements, along with exposure to career tracks, both academic (e.g., tenure track jobs, liberal arts colleges, community colleges, etc.) and alternative professions (e.g., digital humanities, humanities organizations, publishing, etc.).

## Requirements

The Master of Arts program in English requires a minimum of 31 s.h. of graduate credit. The program's focus is literary studies. Students may receive credit for up to 6 s.h. of transfer courses toward the MA degree. They must maintain a cumulative University of Iowa gradepoint average of at least 3.00 . Students who wish to transfer to Iowa's PhD program must complete two semesters or $15 \mathrm{~s} . \mathrm{h}$. of coursework in literature (whichever is completed first) before applying for admission to the doctoral program.

## Coursework

Each student must take seven English courses numbered 5000 or above as indicated below. Applicable transfer courses must be approved by the director of graduate study in English.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| ENGL:5000 | Introduction to Graduate Study | 3 |
| One course in criticism and theory numbered 5000 or above |  |  |
| Four readings or seminar courses numbered 5000 or above, chosen from the following five eras of British, American, and/or Anglophone literature and culture: pre-1500, 1500-1660, 1660-1800, 1800-1900, 20th and 21 st centuries |  |  |
| One of these: |  |  |
| ENGL:5990 | MA Portfolio in Literary Studies | arr. |
| ENGL:5999 | MA Thesis in Literary Studies | arr. |

Elective courses constitute less than half of the total credit for the degree and may be chosen from graduate courses both in and outside the English department. Students may wish to explore opportunities for interdisciplinary study, language study, experience in theory and practice of writing, or specialization in a field of literary scholarship.

Department of English graduate courses are repeatable with the written approval of the department's director of graduate studies.

Completion of the MA requires either a thesis or a portfolio. Students submit a written description of their choice to the director of the program before the semester in which they plan to graduate.

## MA Thesis

Students who choose to write a thesis must submit a brief prospectus approved by a thesis director before they register for thesis credit and at least one semester before they submit the thesis. The thesis committee consists of the thesis director, the director of the MA program, and one other faculty member. The thesis is evaluated by the committee as either satisfactory or unsatisfactory.

A copy of the thesis must be presented to the Graduate College for approval. For detailed information about Graduate College deadlines and policies, see the Manual of Rules and Regulations on the Graduate College website.

## Portfolio

Near the end of their coursework, students who do not choose the thesis option must submit a portfolio of work to the MA examination committee, which consists of the director of the MA program and two other English faculty members. All three read the full portfolio. To pass, the candidate must have a majority vote of the committee members.

Students take the first step toward preparing to submit a portfolio by meeting with the director of the MA program to discuss the portfolio, early during the semester in which they plan to graduate. After fulfilling all distribution and eligibility requirements and clearing all incomplete grades, students present the director with a draft of the portfolio's introductory statement. Students planning to graduate at the end of the fall semester should present the statement by the first week of October; those who plan to graduate at the end of the spring semester should present the statement by the first week of March. Once the director approves the statement, the student must submit three copies of the full portfolio; the submission deadline is Nov. 1 for students planning to graduate at the end of the fall semester and April 1 for those who will graduate at the end of the spring semester.

The work in the portfolio should demonstrate the student's knowledge of literature as a broad historical and theoretical inquiry. Students submit approximately 50 pages ( 12,500 words) of their best work, along with a self-reflective introductory statement of five to seven pages. The body of the portfolio should contain revised versions of papers originally produced for classes. The introduction should detail the student's trajectory in the program and the literary-critical or methodological skills gained. It also should explain the contents of the portfolio, contextualize each paper, and give a brief overview of the writing. Students are expected to describe the research methods used in assembling their portfolios and the critical practices that ground their work.

## Admission

Applications and all supporting documents for graduate admission must be submitted electronically by Dec. 14. Applicants should submit their applications and supporting materials to the University of Iowa Office of Admissions website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Career Advancement

The Master of Arts in English degree helps prepare students for careers in professional writing, editing, web design, and publishing. It also is desirable for teachers seeking to enhance their credentials.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Numbered 5000 or above; ENGL:6000 Introduction to Contemporary Theory recommended.
c English readings or seminar course numbered 5000 or above, chosen from the following five eras of British, American, and/ or Anglophone literature and culture: pre-1500, 1500-1660, 1660-1800, 1800-1900, 20th and 21st centuries.
d May be chosen from graduate coursework in English (numbered 5000 or above), or outside the department (numbered 3000 or above).
e Students may wish to explore opportunities for interdisciplinary study, language study, experience in theory and practice of writing, or specialization in a field of literary scholarship. Work with faculty advisor to determine appropriate coursework and sequence.
f Submit portfolio to the MA examination committee.

## English (creative writing),

## MFA

The Master of Fine Arts in English with a creative writing subprogram features advanced courses in writing fiction and poetry. Students in creative writing study at the Iowa Writers' Workshop, renowned as a pioneer in teaching writers since its founding in 1936.

## Learning Outcomes

Graduates will:

- develop expertise in the art of writing through practical, immersive engagement with techniques and principles of craft in fiction or poetry;
- build deep knowledge and broad appreciation of the literary landscape through immersive engagement with diverse literary traditions;
- gain practical experience teaching literature, rhetoric, and/or creative writing at the college level;
- create and revise a significant body of top-level creative work in fiction or poetry;
- develop a strong individual artistic vision; and
- gain exposure to a wide range of career options in both academic and non-academic literary disciplines.

## Requirements

The Master of Fine Arts program in English with a creative writing subprogram requires a minimum of 48 s.h. of graduate credit. Students must maintain a cumulative University of Iowa grade-point average of at least 3.00. The degree is offered through the Creative Writing Program (Iowa Writers' Workshop), a two-year residency program that culminates in a creative thesis, such as a novel, a collection of stories, or a book of poetry.

Throughout the program, workshop students craft their manuscripts and engage in an exchange of ideas about writing and reading with each other and with the renowned teacher-authors who make up the workshop's faculty.

Admission to the program is competitive.
For details about the MFA in English (creative writing) and about the Iowa Writers' Workshop, see Creative Writing (Iowa Writers' Workshop) [p. 329] in the catalog.

## English (nonfiction writing), MFA

The Master of Fine Arts in English with a nonfiction writing subprogram (emphasis in creative nonfiction) is offered through the Nonfiction Writing Program, one of the few programs in the nation that offers a full range of graduate courses in nonfiction.

## Learning Outcomes

Students will:

- develop a common understanding and appreciation of the history and range of traditions of nonfiction writing including forms such as the essay, lyric essay, memoir, journalism, and experimental writing;
- explore and practice the range of narrative strategies, prose styles, and approaches to stylistic analysis through workshop courses;
- develop familiarity and experience with a range of research skills necessary to support the rigorous practice of nonfiction, including major theoretical approaches, and engage in reading-intensive discussions exploring new fields of nonfiction, including new writing technologies and media;
- develop an individual teaching philosophy and practical skills for teaching creative nonfiction writing, including designing courses for different audiences, crafting syllabi, producing exercises, maintaining vibrant classroom discussions, and learning helpful strategies for providing constructive feedback to the writing of others;
- engage in outreach programs making nonfiction expertise and instruction available to various audiences through master classes and other public formats;
- develop an understanding of the practical aspects of a writer's professional life, including an understanding of the basic operations of the publishing world and the necessary protocols leading to publication; and
- craft a long-form project in nonfiction; write a thesis of at least 75 pages of publishable-quality prose, the capstone of a graduate student's career in the Nonfiction Writing Program.

## Requirements

The Master of Fine Arts program in English with a nonfiction writing subprogram requires a minimum of 48 s.h. of graduate credit taken at the University of Iowa. Students must maintain a cumulative University of Iowa grade-point average of at least 3.00. The program is designed for accomplished students and writers of literary nonfiction; most complete it in three years.
In addition to coursework, students are required to complete a thesis. The thesis may be a single extended piece of nonfiction, a collection of shorter nonfiction pieces, or a collection of essays. Whatever the project, the thesis is expected to be of publishable quality. The program culminates in a thesis of at least 75 pages. Students have plentiful room in their schedules to take advantage of a variety of electives offered by the English department and all other University of Iowa departments.
Department of English graduate courses are repeatable with the written approval of the department's director of graduate studies.
The MFA in English with a nonfiction writing subprogram requires the following.

| Course \# Title | Hours |
| :--- | :--- | :--- |
| All of these: |  |

All of these:
Workshops numbered CNW:6610 to CNW:6630

| Seminars numbered CNW:6650 to CNW:6660 | 15 |  |
| :--- | ---: | ---: |
| Two courses numbered 3000 or above from any <br> department  | 6 |  |
| CNW:6666 | Performance and Profession | 3 |
| CNW:7950 | Thesis in Nonfiction Writing | $4-8$ |

For more information, consult the director of the Nonfiction Writing Program.

## Admission

Applications and all supporting documents for graduate admission must be submitted electronically by Dec. 14. Applicants should submit their applications and supporting materials to the University of Iowa Office of Admissions website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

Graduate scholarships, fellowships, and teaching and research assistantships are awarded on a competitive basis. The department strives to provide three years of support for students who maintain good standing, which requires a University of Iowa grade-point average of at least 3.00, full-time enrollment, and satisfactory progress through the program.
Financial aid applications are considered only from students who have applied or been admitted to a degree program in the Graduate College. Applications and all necessary supporting material must be submitted by the end of January for the following academic year. Forms are available from the Department of English Graduate Studies Office.

## Career Advancement

NWP Alum on the Department of English website provides information about Nonfiction Writing Program graduates.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## English, PhD

The Doctor of Philosophy program in English is designed as preparation for the teaching, publishing, and administrative service required of a career in academia or academic-adjacent fields, and to provide depth of study in the field of English. Concentrations are offered in areas such as literary history and critical theory, as well as interdisciplinary areas such as cultural studies, pedagogy, and the digital humanities.

The department now offers a streamlined version of the PhD that incorporates book studies, including a certificate from the Center for the Book [p. 1624].

## Learning Outcomes

- Historical knowledge: comprehensive historical knowledge of literary history, reflected in courses taken across a range of literary periods and national/international traditions.
- Critical theory and approaches: rigorous study of critical methodologies and interpretive strategies.
- Research skills: familiarity with library research into secondary scholarship on primary texts, archival research methods, and field research, where applicable.
- Writing skills: proficiency in writing publishable academic work of high quality (e.g., what one would expect from an article placed in a scholarly journal).
- Teaching skills: ideally, students will move from foundationsbased grading positions under the supervision of tenure track faculty (introduction to the major) to rhetoric/composition coursework (rhetoric), and then on to literary analysis focused courses (general education literature). Students learn to build their own syllabi, develop a teaching portfolio, and manage their own courses independently.
- Professional development: preparing conference presentations, curriculum vitae, résumés, and teaching statements, as well as gaining exposure to career tracks, both academic (e.g., tenure track jobs, liberal arts colleges, community colleges, etc.) and alternative professions (e.g., digital humanities, humanities organizations, publishing, etc.)

## Requirements

The Doctor of Philosophy program in English requires a minimum of 72 s.h. of graduate credit. Students may receive credit for up to 18 s.h. of transfer courses. They must maintain a cumulative University of Iowa grade-point average of at least 3.00. Concentrations are offered in areas such as literary history and critical theory, as well as interdisciplinary areas such as cultural studies and transnational studies.

Of the minimum 72 s.h. required for the degree, at least 51 s.h. must be in graded coursework numbered 3000 or above. Of those, at least 30 s.h. must be in English courses numbered 5000 or above, 21 s.h. in courses numbered 3000 or above may be taken in the Department of English or in another unit, and 9 s.h. taken in independent studies related to a comprehensive exam. The remaining $12 \mathrm{~s} . \mathrm{h}$. of postcomprehensive courses numbered 3000 or above may be taken as graded or independent study coursework.

The book studies specialization requires 72 s.h. in courses numbered 3000 or above. Of those, at least 24 s.h. must be in English courses numbered 5000 or above, 15 s.h. must be in Center for the Book courses numbered 4000 or above (see Center for the Book [p. 1624] in the Graduate College section of the catalog), 12 s.h. in courses numbered 3000 or above may be taken in the Department of English or in another unit, and 9 s.h. taken in independent studies related to a comprehensive exam. The remaining $12 \mathrm{~s} . \mathrm{h}$. of post-
comprehensive courses numbered 3000 or above may be taken as graded or independent study coursework.
Students must gain formal admission to PhD candidacy by a vote of the Graduate Steering Committee, usually during the third semester of doctoral study.

Students complete coursework in literature and culture of any four of these historical periods, as expressed in texts of the Englishspeaking and -writing world (usually but not always British or American): pre-1500, 1500-1660, 1660-1800, 1800-1900, 20th and 21 st centuries. They also complete three seminars in the Department of English at the University of Iowa.

Students also must fulfill the program's world language requirement, usually by taking a standardized test or completing an advanced undergraduate course numbered 3000 or above in a language other than English.

The comprehensive examination consists of the following: a portfolio of five scholarly questions based on a period of literary history (usually British or American), a review essay and annotated bibliography in a special area of interest, two course syllabi or alternate materials pertaining to an academic-adjacent career, an article to be submitted for publication, and an introduction to the portfolio that synthesizes its parts in preparation for a two-hour oral exam.

A dissertation is required. Students present their prospectus formally to a faculty committee and must undergo a final exam defending the dissertation.

All doctoral candidates are strongly advised to gain teaching experience, preferably in the College of Liberal Arts and Sciences Department of Rhetoric and in GE CLAS Core [p. 19] literature courses.

For application forms and a complete description of the PhD program, contact the department's graduate program academic coordinator.

## Admission

Applications and all supporting documents for graduate admission must be submitted electronically by Dec. 14. Applicants should submit their applications and supporting materials to the University of Iowa Office of Admissions website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

Graduate scholarships, fellowships, and teaching and research assistantships are awarded on a competitive basis. The department strives to provide five years of support for students who enter with an MA and six years of support for students who enter with a BA. Students must be in good standing, which requires a University of Iowa grade-point average of at least 3.00, full-time enrollment, and satisfactory progress through the program.

Financial aid applications are considered only from students who have applied or been admitted to a degree program in the Graduate College. Applications and all necessary supporting material must be submitted by the end of January for the following academic year. Forms are available from the Department of English Graduate Studies Office.

## Career Advancement

Most PhD graduates seek employment at colleges and universities. Although the Department of English cannot guarantee such employment, it does supply vigorous assistance. Because there is no
certainty that all doctoral graduates in English will find continuing academic employment, it is valuable to remain open to the opportunity of jobs outside the profession of teaching. A number of graduates are finding employment in academic administration, the digital humanities, business, and government.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# English as a Second Language 

## Director

- Melissa Meisterheim

Faculty: https://esl.uiowa.edu/people
Website: https://esl.uiowa.edu/
The University of Iowa offers English as a Second Language (ESL) instruction in three distinct, but related, programs: ESL credit classes, the Iowa Intensive English Program (IIEP), and the Teaching Assistant Preparation in English program (TAPE).

These programs meet the needs of students whose first language is not English. ESL credit classes help students raise their English proficiency so they can complete a degree successfully. IIEP provides intensive instruction for students who must raise their English proficiency to gain admission to a university or college. TAPE helps students improve their oral competence in English so they may assume classroom teaching responsibilities.

English as a Second Language is one of the academic units in the Division of World Languages, Literatures and Cultures [p. 365].

## Programs

## ESL Credit Program

English as a Second Language credit classes bridge the gap between full-time language instruction and full-time academic work, serving students who have taken the English Proficiency Evaluation (EPE) and who have been found to need additional English language support. ESL courses are offered to help students increase their proficiency in four skill areas: reading, writing, speaking, and listening. A course in grammar also is available. Each course offers 3 s.h. of credit, which undergraduates may count as elective credit toward graduation. Courses are taught by ESL lecturers and by teaching assistants pursuing advanced degrees in linguistics.
Courses taken to meet the College of Liberal Arts and Sciences English proficiency requirement must be completed with a grade of C or higher. If a student earns a grade of C -minus or lower in an ESL course, the course must be retaken in order for the student to fulfill the ESL course requirement. An ESL course must be taken for a letter grade and may not be taken pass/nonpass or satisfactory/ unsatisfactory. Students are not allowed to drop ESL courses once the semester begins. A student held for ESL courses may not enroll in a rhetoric course until the ESL requirement is completed.
Visit the ESL Credit Program website for more information.

## Iowa Intensive English Program (IIEP)

The Iowa Intensive English Program (IIEP) serves students who have not yet achieved the language proficiency needed to compete successfully in a degree program. The program welcomes international students preparing to enter universities and colleges in the United States as well as other adults who want to improve their English skills. Conditional admission to the University of Iowa is possible for undergraduate students. For more details regarding conditional admission, visit International Students on the Office of Admissions website.

IIEP offers intensive English instruction and a cultural, social, and academic orientation to the United States. Instruction emphasizes proficiency in spoken and written English, which is crucial to college and university work. Grammar and the basic language skills of writing, reading, listening comprehension, and speaking are taught each day at all levels, from beginning through advanced. Instruction is by full-time professional ESL instructors.

Each IIEP student receives 20-22 hours of classroom instruction each week ( 27 hours per week in summer). IIEP students have full access to all university facilities. Field trips and cultural and social experiences are integral parts of the program.

International students admitted to the IIEP receive a certificate of eligibility (Form I-20), which enables them to apply for a student visa at the nearest U.S. consulate or embassy. Application materials are available from the ESL Programs Office and on the Iowa Intensive English Program website.

## Teaching Assistant Preparation in English (TAPE)

The Teaching Assistant Preparation in English program (TAPE) is designed for graduate students whose first language is not English, who need additional work on English communication, and who will hold teaching assistantships while enrolled at the University of Iowa. Only students who need the program and who have sufficient competence in English to profit from it are eligible. TAPE courses are open to graduate students who have been evaluated for TA certification and to others if space is available. Students are taught by full-time professional ESL instructors.

## Courses

- English as a Second Language Courses [p. 425]
- Iowa Intensive English Program Courses [p. 426]
- Teaching Assistant Preparation in English Courses [p. 427]

## English as a Second Language Courses

The following courses are for students whose first language is not English. Courses taken to meet the College of Liberal Arts and Sciences English proficiency requirement may not be taken pass/ nonpass. English as a Second Language (ESL) courses may not be taken as satisfactory/unsatisfactory. In order to enroll in ESL courses, students must take the English Proficiency Evaluation (EPE) or receive consent from the ESL office.

## ESL:1000 First-Year Seminar

1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

## ESL:1005 ESL Special Topics

1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings). Same as CLAS:1005.

## ESL:1006 Independent Study in Academic Language and Skill

## Support

Academic language skills and resources to achieve academic success including writing, effective reading strategies, vocabulary building, listening and note taking, speech fluency and clarity; exploration of study skills and strategies; cultural expectations in U.S. academic settings including academic integrity; culture shock; time management skills; techniques to stay motivated and manage stress; overcoming barriers to student success; assignments emphasize demonstration of language skill development and self-reflection. Requirements: completion of all ESL requirements.

ESL:1650 College Success for International Students 1 s.h. Skills and resources to help international students achieve academic success; reflection on academic habits and experiences; exploration of study skills and strategies; cultural expectations in U.S. academic settings including academic integrity; culture shock and immigration issues that can impact international students at the UI; development of techniques for time management and goal setting; techniques to stay motivated and manage stress; overcoming barriers to student success; discussions and assignments emphasize self-reflection on class topics including time management, study skills, and cultural identity. Same as CLAS:1650, CSI:1650.

## ESL:4100 English as a Second Language: Academic Oral Skills

3 s.h.
Speaking skills for the U.S. academic setting and society; pronunciation, grammar, vocabulary; structured opportunity to develop fluency.

## ESL:4130 English as a Second Language: Academic Listening Skills

Development of listening skills for students whose first language is not English; focus on listening skills necessary for success in a U.S. academic setting; academic lectures, note-taking skills, fast-paced classroom discussions. Requirements: undergraduate standing.
ESL:4160 English as a Second Language Grammar 3 s.h. English structure; troublesome grammar patterns.
ESL:4180 English as a Second Language: Academic Writing and Grammar for Undergraduates

4 s.h.
Exploration of iterative steps of drafting and revising academic writing; emphasis on the need to ultimately produce writings that communicate clearly and meet required standards; process oriented; students improve writing fluency (comprehensibility and cohesion) and their ability to select from a variety of appropriate grammatical functions (at word and clausal level) to produce a fluent and accurate result to succeed in all requirements of academic writing and communication.

ESL:4190 English as a Second Language: Academic Writing 3 s.h. Complex grammatical constructions, discourse considerations, formal vocabulary use expected of university students; organization styles, types of argumentation, analytic methods used in academic writing. Requirements: undergraduate standing.

## ESL:4200 English as a Second Language: Academic Reading Skills

Increasing reading speed and comprehension of university-level writing and vocabulary; exercises, discussion, and note-taking assignments to develop critical analysis skills.
ESL:6000 English as a Second Language: Writing Skills for Graduate Students
Discourse considerations; styles of organization, types of argumentation, methods of analysis expected of graduate students.
ESL:6200 English as a Second Language: Academic Writing and Grammar for Graduates
Students learn how to be confident, fluent, and independent writers, and become proficient with conventions and requirements of academic writing in their respective disciplines; selection of appropriate grammatical functions-at the word and clausal level-for success in academic communication.

## Iowa Intensive English Program Courses

These courses are for students whose first language is not English. The Iowa Intensive English Program (IIEP) primarily serves students on conditional admission, those who have not yet been admitted to the University, and those who score below 80 (internet-based) on the Test of English as a Foreign Language (TOEFL).

IIEP:0001 Iowa Intensive English Program Orientation Acquaint new intensive English students with Iowa City, the university, and the intensive English program; policies and procedures, classroom expectations, and cultural differences. Requirements: enrollment in intensive English program.

## IIEP:0115 Iowa Intensive English Communication Skills:

 Beginning0 s.h.
Focus on aural comprehension, spoken English, and American attitudes, values, and customs; practice giving and receiving information; learn language more quickly in a comfortable, familiar environment; understand and accept cultural differences; gain positive feelings toward American culture; provides link between classroom and community; interview Americans, class discussions.
IIEP:0135 Iowa Intensive English Reading: Beginning 0 s.h.
Comprehensive reading curriculum designed to help students become effective readers; variety of skills and opportunities to practice many strategies while reading different kinds of written material (i.e., newspapers, magazines, schedules, documents, textbooks, correspondence, literature); emphasis on learning by doing; eclectic teaching approach.
IIEP:0145 Iowa Intensive English Grammar: Beginning 0 s.h.
Correct use of the grammatical structures of English; learning grammar in a systematic and logical way; extensive practice to meet the goal of communicative competence in English.
IIEP:0155 Iowa Intensive English Writing: Beginning 0 s.h. Personal and formal writing; experiment with varied forms of writing, from journal entries and letters to critiques, essay examinations, and short papers that involve use of the library; students read and respond to each other's writing, and in the process become more aware of their own strengths and weaknesses as writers.

## IIEP:0170 Iowa Intensive English: Communication Skills for Professionals <br> Listening and speaking skills for international professionals; conversational fluency, language for professional interactions (e.g., discussions and presentations). <br> IIEP:0215 Iowa Intensive English Communication Skills: Low Intermediate

Focus on aural comprehension, spoken English, and American attitudes, values, and customs; practice giving and receiving information; learn language more quickly in a comfortable, familiar environment; understand and accept cultural differences; gain positive feelings toward American culture; provides link between classroom and community; interview Americans, class discussions.
IIEP:0235 Iowa Intensive English Reading: Low Intermediate 0 s.h.
3 s.h. Comprehensive reading curriculum designed to help students become effective readers; variety of skills and opportunities to practice many strategies while reading different kinds of written material (i.e., newspapers, magazines, schedules, documents, textbooks, correspondence, literature); emphasis on learning by doing; eclectic teaching approach.

## IIEP:0245 Iowa Intensive English Grammar: Low

 Intermediate0 s.h.
Correct use of the grammatical structures of English; learning grammar in a systematic and logical way; extensive practice to meet the goal of communicative competence in English.

## IIEP:0255 Iowa Intensive English Writing: Low

Intermediate
0 s.h.
Personal and formal writing; experiment with varied forms of writing, from journal entries and letters to critiques, essay examinations, and short papers that involve use of the library; students read and respond to each other's writing, and in the process become more aware of their own strengths and weaknesses as writers.

## IIEP:0315 Iowa Intensive English Communication Skills:

 IntermediateFocus on aural comprehension, spoken English, and American attitudes, values, and customs; practice giving and receiving information; learn language more quickly in a comfortable, familiar environment; understand and accept cultural differences; gain positive feelings toward American culture; provides link between classroom and community; interview Americans, class discussions.
IIEP:0335 Iowa Intensive English Reading: Intermediate 0 s.h. Comprehensive reading curriculum designed to help students become effective readers; variety of skills and opportunities to practice many strategies while reading different kinds of written material (i.e., newspapers, magazines, schedules, documents, textbooks, correspondence, literature); emphasis on learning by doing; eclectic teaching approach.

IIEP:0345 Iowa Intensive English Grammar: Intermediate 0 s.h. Correct use of the grammatical structures of English; learning grammar in a systematic and logical way; extensive practice to meet the goal of communicative competence in English.

IIEP:0355 Iowa Intensive English Writing: Intermediate 0 s.h. Personal and formal writing; experiment with varied forms of writing, from journal entries and letters to critiques, essay examinations, and short papers that involve use of the library; students read and respond to each other's writing, and in the process become more aware of their own strengths and weaknesses as writers.

## IIEP:0415 Iowa Intensive English Communication Skills: High Intermediate 0 s.h.

 Spoken English and American attitudes, values, and customs; practice giving and receiving information; learn language more quickly in a comfortable, familiar environment; understand and accept cultural differences; gain positive feelings toward American culture; provides link between classroom and community; interview Americans, class discussions.
## IIEP:0435 Iowa Intensive English Reading: High

Intermediate
0 s.h.
Comprehensive reading curriculum designed to help students become effective readers; variety of skills and opportunities to practice many strategies while reading different kinds of written material (i.e., newspapers, magazines, schedules, documents, textbooks, correspondence, literature); emphasis on learning by doing; eclectic teaching approach.

## IIEP:0455 Iowa Intensive English Writing: High Intermediate <br> 0 s.h.

Personal and formal writing; varied forms of writing, from journal entries and letters to critiques, essay examinations, and short papers that involve use of the library; students read and respond to each other's writing, and in the process become more aware of their own strengths and weaknesses as writers.

IIEP:0465 IIE Listening Skills: High Intermediate 0 s.h.
Listening skills needed for academic success; note taking and listening skills associated with small group discussions and everyday conversations.

## IIEP:0515 Iowa Intensive English Communication Skills:

 Advanced0 s.h.
Spoken English and American attitudes, values, and customs; practice giving and receiving information; learn language more quickly in a comfortable, familiar environment; understand and accept cultural differences; gain positive feelings toward American culture; provides link between classroom and community; interview Americans, class discussions.

IIEP:0535 Iowa Intensive English Reading: Advanced 0 s.h.
0 s.h. Comprehensive reading curriculum designed to help students become effective readers; variety of skills and opportunities to practice many strategies while reading different kinds of written material (i.e., newspapers, magazines, schedules, documents, textbooks, correspondence, literature); emphasis on learning by doing; eclectic teaching approach.

## Teaching Assistant Preparation in English Courses

The Teaching Assistant Preparation in English (TAPE) program is designed for prospective teaching assistants whose first language is not English and who need additional work on English communication skills. Entry to the program is determined by a test.
TAPE:5100 Pronunciation, Fluency Building, and Culture 0 s.h. Attain greater fluency for teaching by making short presentations and participating in natural interactions about U.S. culture; intensive work on pronunciation to help future teaching assistants attain maximum intelligibility.

TAPE:5220 TA Preparation in English: Pronunciation 0 s.h. Intensive work toward maximum intelligibility; emphasis on stress, timing, intonation.
TAPE:5300 TA Preparation in English: Presentation Skills 0 s.h. Intelligibility of speech and clarity of expression in presenting and responding; practice in videotaped lectures.

TAPE:5330 TA Preparation in English: Orientation 0 s.h.
Student expectations, typical teacher/student relationships, basic
classroom management at the university.

# Enterprise Leadership 

Director, Division of Interdisciplinary Studies

- Cornelia C. Lang (Physics and Astronomy)

## Codirectors, Enterprise Leadership

- David K. Hensley, Cornelia C. Lang

Undergraduate major: enterprise leadership (BA)
Website: https://iowajpec.org/ba-enterprise-leadership
The enterprise leadership major is designed for students seeking to develop a unique skill set that prepares them to pursue professional career and entrepreneurial opportunities across a broad spectrum of industries and types and sizes of organizations. The major integrates applied entrepreneurship and business courses with advanced coursework in leadership, professional communications, and culture and diversity. It also includes a capstone requirement for students to gain real-world experience and demonstrate their ability to apply entrepreneurial approaches to solve business and societal challenges.

Students have access to a variety of cocurricular programming to hone their skills; network with successful alumni, entrepreneurs, and business leaders; and pursue the creation of a new venture. Students will learn from a cadre of faculty who have built and led successful organizations and have the unique ability to teach theory and practice. Enterprise leadership majors will develop problem-solving, critical thinking, innovation and creativity, leadership, teamwork, and communications skills-all demanded by small to large businesses as well as not-for-profit and governmental organizations.

The major in enterprise leadership is offered jointly by the College of Liberal Arts and Sciences and the John Pappajohn Entrepreneurial Center in the Tippie College of Business. The degree is awarded by the College of Liberal Arts and Sciences.

Enterprise Leadership is one of the academic units in the Division of Interdisciplinary Programs [p. 364].

## Programs

# Undergraduate Program of Study 

## Major

- Major in Enterprise Leadership (Bachelor of Arts) [p. 430]

## Enterprise Leadership, BA

Enterprise leadership is an interdisciplinary major that focuses on developing entrepreneurial management, leadership, and professional communication skills. The major promotes problem solving, critical thinking, creativity, and innovation through understanding how to strategically address complex issues to meet consumer and organizational needs. Students also learn how to effectively communicate, build and lead diverse teams, and understand how social and cultural issues impact organizational effectiveness.

## Learning Outcomes

Students will:

- develop an entrepreneurial mindset to successfully identify, evaluate, and seize upon opportunities throughout their professional careers;
- understand the role of creativity, innovation, and management practices across the functional areas of businesses and organizations;
- develop a personal leadership approach that promotes effective teamwork, encourages diverse perspectives, and yields ethical solutions that create sustainable social and economic value;
- demonstrate critical thinking and problem-solving skills to strategically address complex issues and develop innovative, holistic, and sustainable solutions;
- demonstrate effective written and oral communication skills to professionally communicate and present information and recommendations in a clear, logical, and persuasive manner;
- understand the value and impact of contributions from diverse populations on businesses, organizations, and communities; and
- develop a global mindset by understanding the key economic, social, and cultural issues that impact local, national, and international entrepreneurship.

## Requirements

The Bachelor of Arts with a major in enterprise leadership requires a minimum of 120 s.h., including a minimum of 43 s.h. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

The BA in enterprise leadership may be earned at the Iowa City campus or online; more online courses are added each year. Students who wish to enroll in an online course should register in an EX section.

Students may use transfer coursework to fulfill Entrepreneurship and Business Core requirements in place of ENTR:1350 Foundations in Entrepreneurship and ENTR:2000 Entrepreneurship and Innovation. A minimum of $27 \mathrm{~s} . \mathrm{h}$. toward the major must be taken at the University of Iowa.

Students may count a maximum of 6 s.h. earned for another major or minor toward the BA in enterprise leadership, with the exception of the business administration minor. Enterprise leadership majors may count a maximum of three courses toward their major and a business minor.

Enterprise leadership majors may not earn the Certificate in Entrepreneurial Management.

The BA with a major in enterprise leadership requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Foundation Courses | $9-11$ |
| Entrepreneurship and Business Core | 16 |
| Leadership Courses | 6 |
| U.S. Cultural Diversity Course | $3-4$ |
| Communication Courses | 6 |
| Capstone Experience | 3 |

## Foundation Courses

Foundation courses introduce students to the basic skills, tools, and concepts they will need for the major.

## Mathematics or Statistics

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| One of these: |  |  |

## Capstone Experience

Students engage in an entrepreneurial leadership experience and apply their knowledge and skills through a business consulting/field
study project or internship with an external business or nonprofit organization. The capstone experience should be related to a student's career goals and involve the development and application of professional business skills such as project management; market research, analysis, and planning; financial management and forecasting; operations management; sales; organizational leadership; or professional business communications. Students also may choose to plan and launch their own business to meet the capstone requirement.
Students are encouraged to complete multiple capstone courses to enhance their professional development and strengthen their professional résumé.

The John Pappajohn Entrepreneurial Center offers two innovative final-year experiences. The courses ENTR:3800 Entrepreneurial Leadership Academy I and ENTR:3850 Entrepreneurial Leadership Academy II provide selected students with an advanced study of leadership, communications, and project management and include an advanced management consulting project. The courses ENTR:3550 Commercializing New Technology I and ENTR:3575 Commercializing New Technology II provide selected students with an advanced opportunity to learn the process of identifying technology solutions, developing business models, and preparing business plans and pitch decks.
Students may take ENTR:3575 Commercializing New Technology II and/or ENTR:3850 Entrepreneurial Leadership Academy II to meet the capstone experience requirement.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| At least 3 s.h. from these: |  |  |

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in the major. Students must earn a minimum of 46 s.h. of work for the major. They must maintain a University of Iowa cumulative grade-point average (GPA) of 3.50 and a GPA of at least 3.50 in all coursework for the major. Students must earn at least 6 s.h. of honors or honorsdesignated coursework for the major. They also must complete an honors thesis in ENTR:4999 Honors Thesis in Entrepreneurial Studies by creating original research in partnership with a full-time faculty member. In addition, students must complete the capstone experience required for the major.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University
of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.
Membership in the UI Honors Program is not required to earn honors in the enterprise leadership major.

## Career Advancement

Enterprise leadership students develop a solid foundation in entrepreneurial management, leadership, and professional communication skills that prepare them for a variety of career opportunities or to start their own business. Students are able to apply their innovative problem-solving and critical thinking skills to contemporary issues, develop strategies to seize opportunities, and build and lead successful teams.
Graduates find rewarding careers in general management, business analysis, business development, marketing and professional communications, management consulting, general or project management, sales, financial management, and as founders or executives in start-up businesses. Students are prepared to become entrepreneurial-minded leaders in large corporations, small- to medium-sized businesses, and nonprofit organizations.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan.

Before the fifth semester begins: six courses in the major.
Before the seventh semester begins: four more courses in the major and at least 90 s.h. earned toward the degree.
Before the eighth semester begins: four more courses in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Fulfills a major requirement and may fulfill a GE requirement.
c GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
d Students should choose a mathematics or statistics requirement that will also complete the GE: Quantitative or Formal Reasoning requirement; see the General Catalog for list of approved courses.
e Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
f Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
g This course or experience is recommended not required.
h See the General Catalog for list of approved courses.
i Students must complete at least 6 s.h. in leadership courses; see the General Catalog for list of approved courses.
j Students must complete both oral and written communication courses (3.s.h. each for a total of 6 s.h.); see the General Catalog for lists of approved courses.
k Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Environmental Policy and <br> Planning 

Chair, Department of Geographical and Sustainability Sciences

- David A. Bennett

Coordinator, Environmental Policy and Planning

- Silvia Secchi (Geographical and Sustainability Sciences)

Undergraduate major: environmental policy and planning (BA, BS)
Undergraduate minor: environmental policy and planning
Faculty: https://clas.uiowa.edu/geography/people/faculty
Website: https://clas.uiowa.edu/geography/undergraduate-program/ environmental-policy-and-planning-ba-bs

As a society, we depend on and value the environment for basic services such as food production, climate regulation, and recreation. In turn, societies have a significant impact on the environment, which can have significant economic and quality of life impacts. Environmental problems are, therefore, often difficult to resolve because they are embedded in a complex mesh of economics, politics, culture, and behavior. In order to address environmental problems in the future, society needs citizens who understand the human dimensions of these issues. The purpose of the major and minor in environmental policy and planning is to provide students with an opportunity to concentrate on the related social science and policy dimensions of environmental problems.

Environmental policy and planning programs integrate a group of courses to comprise a coherent approach to the study of the human dimensions of environmental problems.

The undergraduate programs of study in environmental policy and planning are administered by the Department of Geographical and Sustainability Sciences [p. 518].

## Programs

## Undergraduate Programs of Study

## Majors

- Major in Environmental Policy and Planning (Bachelor of Arts) [p. 435]
- Major in Environmental Policy and Planning (Bachelor of Science) [p. 440]
Minor
- Minor in Environmental Policy and Planning [p. 445]

## Environmental Policy and Planning, BA

## Learning Outcomes

Students who earn a degree in environmental policy and planning will be able to:

- critically analyze complex environmental problems to identify how they result from interactions among the physical environment and human societies, economies, and political systems;
- identify ways in which humans impact and are impacted by the environment;
- identify key stakeholders and sources of information in the natural and social sciences to consider in developing solutions to environmental problems;
- explain the role of policy and planning in addressing environmental issues locally, regionally, and globally;
- work collaboratively in interdisciplinary teams to design approaches to managing environmental problems; and
- identify and implement key tools and methods for environmental planning and policy making.

## Requirements

The Bachelor of Arts with a major in environmental policy and planning requires a minimum of 120 s.h., including at least $49-56$ s.h. of work for the major. Transfer students must complete at least $21 \mathrm{~s} . \mathrm{h}$. of work for the major in residence at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

The major in environmental policy and planning concentrates on the social science and policy dimensions of environmental problems, which often are caused by people and may have significant economic effects. Environmental issues are embedded in an array of complex issues. Planners and policy makers must understand the human dimensions of these factors in order to solve environmental problems.

The environmental policy and planning major is interdisciplinary; it draws courses from geographical and sustainability sciences, anthropology, economics, political science, history, and other disciplines. Work for the major includes introductory courses, methods courses, intermediate courses, and one of two tracks: the planning track or the policy track.

Students who earn a second major in anthropology, geography, political science, or history must complete a minimum of $12 \mathrm{~s} . \mathrm{h}$. of coursework in the second major that they do not also count toward the major in environmental policy and planning. The 12 s.h. of courses must be offered by the second major's administrative home: anthropology (prefix ANTH), geographical and sustainability sciences (prefix GEOG), or political science (prefix POLI). This requirement applies whether students earn the same degree (BA or BS) with both majors or earn a BA with one major and a BS with the other. However, honors students in environmental policy and planning may count their honors thesis credit toward this 12 s.h. requirement.

Students may not use a course to satisfy more than one requirement for the major.

The BA with a major in environmental policy and planning requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Introductory Courses | $17-18$ |
| Intermediate Courses | 12 |
| Methods Courses | $7-8$ |
| Capstone Courses/Research Project | $1-6$ |
| Track Courses | 12 |

## Capstone Course/Research Project

Students complete a capstone course or research project requirement. Capstone or research project courses are typically taken by students during their senior year. Students who choose GEOG:3992 must make arrangements with a faculty advisor.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  | 1 |
| ENVS:3010/ | Interdisciplinary Environmental |  |
| EES:3010/ | Seminar |  |
| GEOG:3003 | Undergraduate Research <br> (consult advisor) | 1 |
| GEOG:3992 |  |  |

Honors students choose from the following options.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  | 2 |
| ANTH:4995 | Honors Research Seminar | 3 |
| GEOG:4995 | Honors Thesis | 3 |
| POLI:4601 | Honors Senior Thesis | 3 |
| Or both of these: |  |  |
| HIST:3995 | History Honors Research | 3 |
| HIST:3996 | Seminar | Honors Thesis |

## Tracks

Students choose either the planning track or the policy track and complete their track's required coursework.

## Planning Track

The planning track requires 12 s.h. Some of these courses have prerequisites; students must complete all of a course's prerequisites
before they may register for the course or seek permission from the instructor.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| One of these: |  |  |

Combined Programs

## BA/MS in Urban and Regional Planning

Students majoring in environmental policy and planning who are interested in earning a master's degree in urban and regional planning may apply to the combined BA/MS program offered by the College of Liberal Arts and Sciences and the School of Planning and Public Affairs. The program enables students to begin the study of urban and regional planning before they complete their bachelor's degree. Students are able to complete both degrees in less time than if they were to complete the two degrees separately.
Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information about the urban and regional planning program, see the MS in urban and regional planning [p. 1689] in the Graduate College section of the catalog.

## Honors

Graduating with departmental honors and graduating with university honors are two opportunities available to high-achieving undergraduate students, each with specific and distinct requirements. Some students pursue both options while others pursue one or the other. Membership in the University of Iowa Honors Program is encouraged, though not required, to earn honors in the major.

## Honors in the Major

Within the College of Liberal Arts and Sciences, each major develops its own requirements to achieve honors in the major. To graduate with honors in environmental policy and planning, students must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33 and a GPA of at least 3.33 in all work for the major. They must be admitted to the department's honors program by the first semester of their senior year or earlier.

Honors students pursue study beyond the typical undergraduate level. They work under the direction of a faculty member to conduct original research and then prepare and present an honors thesis based on their research. The thesis is reviewed by a committee of at least three faculty members. Students earn credit for the thesis by registering for ANTH:4995 Honors Research Seminar, GEOG:4995 Honors Thesis or POLI:4601 Honors Senior Thesis; or HIST:3995 History Honors Research Seminar and HIST:3996 Honors Thesis.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University
of Iowa Honors Program; visit Honors at Iowa to learn about the university's honors program.
Membership in the UI Honors Program is not required to earn honors in the environmental policy and planning major.

## Career Advancement

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.
Before the third semester begins: one introductory course in the major.
Before the fifth semester begins: four courses in the major.
Before the seventh semester begins: eight courses in the major and at least 90 s.h. earned toward the degree.
Before the eighth semester begins: 11 courses in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues;
Literary, Visual, and Performing Arts; or Values and Culture.
b Fulfills a major requirement and may fulfill a GE requirement.
c Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
d Consider choosing a course that also fulfills the GE CLAS Core Quantitative or Formal Reasoning requirement.
e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
f Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
g Choose from GEOG:3400, GEOG:3780, HIST:3230, POLI:1400, or POLI:3111.
h Choose from CNW:2740, JMC:1800, RHET:3560, or RHET:3700.
i If not previously completed through EPP major statistics requirement.
j Choose from ENVS:3010 or GEOG:3992. Honors students choose from ANTH: 4995, GEOG:4995, POLI:4601, or both HIST: 3995 and HIST: 3996.
k Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Environmental Policy and Planning, BS

## Learning Outcomes

Students who earn a degree in environmental policy and planning will be able to:

- critically analyze complex environmental problems to identify how they result from interactions among the physical environment and human societies, economies, and political systems;
- identify ways in which humans impact and are impacted by the environment
- identify key stakeholders and sources of information in the natural and social sciences to consider in developing solutions to environmental problems;
- explain the role of policy and planning in addressing environmental issues locally, regionally, and globally;
- work collaboratively in interdisciplinary teams to design approaches to managing environmental problems; and
- identify and implement key tools and methods for environmental planning and policy making.

## Requirements

The Bachelor of Science with a major in environmental policy and planning requires a minimum of 120 s.h., including at least 55-62 s.h. of work for the major. Transfer students must complete at least $21 \mathrm{~s} . \mathrm{h}$. of work for the major in residence at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19]

The major in environmental policy and planning concentrates on the social science and policy dimensions of environmental problems, which often are caused by people and may have significant economic effects. Environmental issues are embedded in an array of complex issues. Planners and policy makers must understand the human dimensions of these factors in order to solve environmental problems.

The environmental policy and planning major is interdisciplinary; it draws courses from geographical and sustainability sciences, anthropology, economics, political science, history, and other disciplines. Work for the major includes introductory courses, methods courses, intermediate courses, and one of two tracks: the planning track or the policy track.

Students who earn a second major in anthropology, geography, political science, or history must complete a minimum of 12 s.h. of coursework in the second major that they do not also count toward the major in environmental policy and planning. The $12 \mathrm{~s} . \mathrm{h}$. of courses must be offered by the second major's administrative home: anthropology (prefix ANTH), geographical and sustainability sciences (prefix GEOG), or political science (prefix POLI). This requirement applies whether students earn the same degree (BA or BS) with both majors or earn a BA with one major and a BS with the other. However, honors students in environmental policy and planning may count their honors thesis credit toward this 12 s.h. requirement

Students may not use a course to satisfy more than one requirement for the major

The BS with a major in environmental policy and planning requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Introductory Courses | $17-18$ |
| Intermediate Courses | 12 |
| Methods Courses | $13-14$ |
| Capstone Course/Research Project | $1-6$ |
| Track Courses | 12 |

## Combined Programs

## BS/MS in Urban and Regional Planning

Students majoring in environmental policy and planning who are interested in earning a master's degree in urban and regional planning may apply to the combined BS/MS program offered by the College of Liberal Arts and Sciences and the School of Planning and Public Affairs. The program enables students to begin the study of urban and regional planning before they complete their bachelor's degree. Students are able to complete both degrees in less time than if they were to complete the two degrees separately.
Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information about the urban and regional planning program, see the MS in urban and regional planning [p. 1689] in the Graduate College section of the catalog.

## Honors

Graduating with departmental honors and graduating with university honors are two opportunities available to high-achieving undergraduate students, each with specific and distinct requirements. Some students pursue both options while others pursue one or the other. Membership in the University of Iowa Honors Program is encouraged, though not required, to earn honors in the major.

## Honors in the Major

Within the College of Liberal Arts and Sciences, each major develops its own requirements to achieve honors in the major. To graduate with honors in environmental policy and planning, departmental honors students must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33 and a GPA of at least 3.33 in all work for the major. They must be admitted to the department's honors program by the first semester of their senior year or earlier.
Honors students pursue study beyond the typical undergraduate level. They work under the direction of a faculty member to conduct original research and then prepare and present an honors thesis based on their research. The thesis is reviewed by a committee of at least three faculty members. Students earn credit for the thesis by registering for ANTH:4995 Honors Research Seminar, GEOG:4995 Honors Thesis or POLI:4601 Honors Senior Thesis; or HIST:3995 History Honors Research Seminar and HIST:3996 Honors Thesis.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University
of Iowa Honors Program; visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the environmental policy and planning major.

## Career Advancement <br> The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.
Before the third semester begins: one introductory course in the major.

Before the fifth semester begins: five courses in the major.
Before the seventh semester begins: eight courses in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: 12 courses in the major.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall) ${ }^{\text {i }}$

| Hours | $\mathbf{1 3 - 1 5}$ |
| :--- | ---: |
| Total Hours | $\mathbf{1 2 0 - 1 2 9}$ |

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Fulfills a major requirement and may fulfill a GE requirement.
c Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
d GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
e Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
f Choose from GEOG:3400, GEOG:3780, HIST:3230, POLI:1400, or POLI:3111.
g Choose from CNW:2740, JMC:1800, RHET:3560, or RHET:3700.
h Choose from ENVS:3010 or GEOG:3992. Honors students choose from ANTH: 4995, GEOG:4995, POLI:4601, or both HIST: 3995 and HIST: 3996.
i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.
