Methods, examples, ethics, multicultural issues, problems of counseling research. Requirements: PhD enrollment. Same as CSED:7460.

PSQF:7465 Issues and Ethics in Professional Psychology 3 s.h.
Professional ethics; issues in professional practice of psychology.

PSQF:7470 Internship and Professional Issues
3 s.h.
Professional growth as clinician, internship application and interview processes, next steps in professional career, professional issues, interpersonal and counseling/professional competence, and goals for internship.

## PSQF:7476 Research in Educational Measurement and

 Statistics3 s.h.
Opportunity to learn and discuss psychometric and statistical theories and methodologies not covered in regular courses; critical concepts and skills necessary to conduct psychometric and statistical research; for motivated students interested in conducting their own research in educational measurement and statistics. Prerequisites: PSQF:6243 and (PSQF:6258 or PSQF:6262).
PSQF:7493 PhD Thesis in Psychological and Quantitative Foundations
PSQF:7500 Advanced Practical Experience in Couple and Family Therapy
Supervised experience in professional couple and family therapy; clinical or academic field placement and seminar; required for couple and family therapy students. Requirements: successful completion of couple and family therapy program comprehensive examination.

PSQF:7604 Scholarly Integrity and Responsible Conduct of Educational Research and Evaluation for Postdocs 0 s.h.
Students are introduced to and deepen their knowledge and skills in applying principles for the responsible conduct of educational research and evaluation and related social sciences; two modules addressing core areas identified by federal policy as minimal requirements for knowledge and skill in practice of research with scholarly integrity; format is discovery and discussion-presentation of background information for each topic is followed by discussion of case studies and other examples relevant to each topic; for postdoc associates.

## Educational Psychology, Minor

## Requirements

The undergraduate minor in educational psychology requires 15 s.h., including at least 12 s.h. earned at the University of Iowa and 12 s.h. earned in courses numbered 3000 or above. Students must maintain a grade-point average of at least 2.50 in all courses for the minor. Coursework in the minor may not be taken pass/nonpass. Transfer credit must be approved in order for it to count toward the minor. The minor is open to all students enrolled in an undergraduate degree program.

The minor provides an enriched background in educational psychology, educational testing, and research methods in education. Students earning the minor select a department advisor, who helps them choose appropriate coursework. It does not lead to certification for public school teaching.

Coursework for the minor in educational psychology must include 15 s.h. selected from the following list.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| PSQF:1075 | Educational Psychology and Measurement | 3 |
| PSQF:4106 | Child Development | 3 |
| PSQF:4111 | Human Motivation | 3 |
| PSQF:4120 | Psychology of Giftedness | 3 |
| PSQF:4133 | The Adolescent and Young Adult | 3 |
| PSQF:4134 | Parent-Teacher Communication | 1-3 |
| PSQF:4143 | Introduction to Statistical Methods | 3 |
| PSQF:4150 | Introduction to Educational Measurement | 3-4 |
| PSQF:4750 | Learning Environments: Design, Context, and Activity | 3 |
| PSQF:4760 | Participatory Learning and Media: Creating, Remixing, Making, and Education | 3 |
| PSQF:5165 | Introduction to Program and Project Evaluation | 3 |

Contact the Office of Student Services for more information about the minor.

## Psychological and Quantitative Foundations, MA

## Learning Outcomes

Graduate students will:

- gain course specific knowledge and skills as required to perform well in their specialties (as demonstrated by completing their required courses in their specialty/major area with a grade-point average of 3.00 or higher);
- demonstrate integrated substantive knowledge and skills that can be applied to solve novel professional-level problems (as demonstrated by completing their comprehensive examinations satisfactorily and by completing their thesis proposals with committee approval);
- demonstrate required clinical practice skills and researcher autonomy (as demonstrated by satisfactory completion of all required practicums and/or internships, and required thesis defenses/article submissions as appropriate for their degrees);
- demonstrate initial engagement with, and commitment to, professional ethics, professional development, lifelong learning, and service to the profession (as demonstrated by participation and engagement in the appropriate state, regional, and national organizations as appropriate for their degrees);
- demonstrate entry-level professional qualifications (as demonstrated by being qualified to take any licensing exams that are required for practice and/or employment); and
- be qualified for suitable employment or postdoctoral appointments upon graduation (as reported on annual Qualtrics surveys).

## Educational Measurement and Statistics

The Master of Arts program in psychological and quantitative foundations with an educational measurement and statistics subprogram requires a minimum of 30 s.h. of graduate credit along with passing a final examination, and is offered with or without thesis. For students completing a thesis, PSQF:7393 MA Thesis in Psychological and Quantitative Foundations (3 s.h.) is required. Students are expected to maintain a cumulative grade-point average of at least 2.75 .

The program provides students with basic knowledge of educational measurement and research methodology. Graduates find employment in large school systems, state departments of education, test publishing organizations, and research centers. The program also is appropriate for students who wish to broaden their knowledge of measurement and research methodology for personal development or professional improvement in the context of a concurrent PhD program in other areas.
The MA in psychological and quantitative foundations with an educational measurement and statistics subprogram requires the following work.

## Required Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Introduction to Statistical <br> Methods (or equivalent with <br> advisor approval) | 3 |
| PSQF:4143 | Quantitative Educational <br> Research Methodologies <br> (or equivalent with advisor <br> approval) | 3 |

PSQF:6243
PSQF:6246
PSQF:6255
PSQF:6257

Intermediate Statistical Methods
Design of Experiments
Construction and Use of 3
Evaluation Instruments
Educational Measurement and
Evaluation

## Required Concentration Areas

## Measurement

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least one of these: | Factor Analysis and Structural | 3 |
| PSQF:6249 | Equation Models |  |
| PSQF:6258 | Theory and Technique in <br> Educational Measurement | 3 |
| PSQF:6260 | Diagnostic Assessment | 3 |
| PSQF:6262 | Item Response Theory | 3 |
| PSQF:7355 | Seminar: Educational <br> Measurement and Evaluation | 3 |
| PSQF:7358 | Equating and Scaling of |  |
| PSQF:7375 | Educational Tests <br> Topics in Educational <br> Measurement and Statistics | 3 |
| PSQF:7455 | Generalizability Theory | 3 |

## Statistics

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| At least one of these: |  |  |
| PSQF:6248 | Research Synthesis and MetaAnalysis | 3 |
| PSQF:6250 | Computer Packages for Statistical Analysis | 3 |
| PSQF:6252 | Introduction to Multivariate Statistical Methods | 3 |
| PSQF:6254 | Causal Inference and Observational Designs | 3 |
| PSQF:6270 | Generalized Linear Models | 3 |
| PSQF:6271 | Longitudinal Multilevel Models | 3 |
| PSQF:6272 | Clustered Multilevel Models | 3 |
| PSQF:7355 | Seminar: Educational <br> Measurement and Evaluation | 3 |
| PSQF:7375 | Topics in Educational <br> Measurement and Statistics | 3 |

## Related Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: | Introduction to Program and | 3 |
| PSQF:5165 | Project Evaluation |  |
| PSQF:6200 | Educational Psychology | 3 |
| PSQF:6204 | Foundations of the Learning <br> Sciences | 3 |
| PSQF:6214 | Design of Learning <br> Environments: Theory, Practice, <br> and Method | 3 |
| PSQF:6281 | Cognitive Theories of Learning | 3 |

## Electives

Students choose 3 s.h. from any of the courses listed above or another course approved by the advisor.

## Final Examination

## Nonthesis

Nonthesis students must complete a written and an oral final examination at the end of their program of study. Students will work with their advisors to form a three-person final examination committee that is comprised of at least two faculty from the educational measurement and statistics subprogram. The exam will emphasize the required core courses of the degree program and provide students with the opportunity to demonstrate their depth of learning from the program. The exact details and format of the final exam will be determined by the final examination committee. Upon passing the written examination, students will then have an oral examination in which they will answer additional questions regarding their written responses or other relevant topics. Passing the oral examination completes the requirements for the final examination.

## Thesis

Thesis students will complete a written thesis and an oral final examination. The thesis should report the results of original research in a manuscript style that is suitable for potential submission for publication (submission for publication is not a thesis requirement). The topic, scope, and research plan should be approved in advance by a three-person committee that is comprised of at least two faculty from the educational measurement and statistics subprogram. Upon passing the thesis submission, students will then have an oral examination in which they will answer additional questions regarding their thesis or other relevant topics. Passing the oral examination completes the requirements for the final examination.

## Admission

Applicants must meet the admission requirements of the Graduate College. They should have a combined verbal and quantitative score of at least 300 on the Graduate Record Examination (GRE) General Test. Completion of at least one college mathematics course and experience as a teacher or researcher are desirable. Applicants who do not meet these requirements but who show offsetting evidence of superior ability may be granted conditional admission.

Applicants must submit a statement of purpose that explains how the educational measurement and statistics subprogram will help them accomplish their educational and vocational goals.

For information about admission dates, contact the educational measurement and statistics program coordinator.

## Learning Sciences and Educational Psychology

The Master of Arts program in psychological and quantitative foundations with a learning sciences and educational psychology subprogram has a strong emphasis on how theory and research inform the understanding of learners, learning, instruction, and the technology and environments in which learning and instruction occur. The program requires a minimum of $30 \mathrm{~s} . \mathrm{h}$. of graduate credit. Students are expected to maintain a cumulative grade-point average of at least 2.75. A thesis is not required.

The curriculum includes courses in the theories of the learning sciences, design of effective learning environments and technologies, and implementation of instructional design. Elective opportunities allow students to choose an interest area to develop a multidisciplinary specialization. Current areas include technology and media, learning in the disciplines, human development and motivation, and
measurement and evaluation. The capstone experience of the program is an internship/practicum/portfolio that allows students to apply knowledge of the learning sciences in a context of interest. Students develop a program of study in consultation with their advisor.

Full-time students typically take at least 9 s.h. each semester, with the option of additional summer session work; they usually complete the program in four semesters. Part-time students take 3-6 s.h. each semester; they usually complete the degree in two or three years.

Students may apply substitute equivalent coursework from another institution or department for required or recommended courses.

The MA in psychological and quantitative foundations with a learning sciences and educational psychology subprogram requires the following coursework.

## Required Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Educational Psychology |  |
| PSQF:6200 | Tools and External <br> Representations in Individual <br> and Social Learning | 3 |
| PSQF:6203 | Foundations of the Learning <br> Sciences | 3 |
| PSQF:6205 | Design of Instruction 3 <br> PSQF:6214 Design of Learning <br> Environments: Theory, Practice, <br> and Method <br> PSQF:6281 Cognitive Theories of Learning <br> PSQF:6299 MA Project: Portfolio/ <br> Internship/Practicum <br> One of these: Digital Media and Learning | 3 |
| PSQF:6208 | Online Instruction: Design and | 3 |
| PSQF:6215 | Facilitation | 3 |
|  |  |  |

## Electives

Elective opportunities allow a student to choose an area of interest to develop a multidisciplinary specialization. Students choose 6 s.h. from one of the following focus areas.

## Technology and Media

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PSQF:4760 | Participatory Learning and |  |
|  | Media: Creating, Remixing, <br> Making, and Education |  |
| PSQF:6211 | Universal Design and <br>  <br>  <br>  <br>  <br> Accessibility for Online <br> Instruction | 3 |
| PSQF:6216 | Tools and Utilities for Online <br> Teaching | 3 |
| Pne of these, if not taken as a required course above: |  |  |
| PSQF:6215 | Digital Media and Learning |  |
|  | Online Instruction: Design and | 3 |
|  | Facilitation | 3 |

Learning in the Disciplines

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EDTL:4630 | Psychology of Music | 3 |
| EDTL:5610 | Foundations of Music Education | 3 |

| EDTL:6267 | Seminar: Current Issues in Art <br> Education | 3 |
| :--- | :--- | :---: |
| EDTL:6315 | MA Seminar: English Education | 3 |
| EDTL:6483 | Multilingual Education and <br> Applied Linguistics | 3 |
| EDTL:6570 | Foundation of School STEM <br> Curriculum | 3 |
| EDTL:6757 | Learning in the Science <br> Classroom | 3 |
| EDTL:6758 | Writing in the Science <br> Classroom | 3 |
| EDTL:6833 | History and Foundations of <br> Social Studies Education | 3 |

Human Development and Motivation

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PSQF:4106 | Child Development | 3 |
| PSQF:4111 | Human Motivation | 3 |
| PSQF:4133 | The Adolescent and Young | 3 |
|  | Adult |  |
| PSQF:6206 | Advanced Child Development | 3 |
| PSQF:6213 | Advanced Lifespan | 3 |
|  | Development |  |

## Measurement and Evaluation

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PSQF:4143 | Introduction to Statistical | 3 |
|  | Methods | 3 |
| PSQF:4740 | Issues in K-12 Assessment | 3 |
| PSQF:5165 | Introduction to Program and | 3 |
|  | Project Evaluation | 3 |
| PSQF:6220 | Quantitative Educational | 3 |
| PSQF:6257 | Research Methodologies | 3 |

## Admission

Applicants must meet the admission requirements of the Graduate College, including the minimum grade-point average. Viable applicants should have a verbal score of at least 146 and a quantitative score of at least 149 on the Graduate Record Examination (GRE) General Test; successful applicants generally score higher (the GRE is optional)

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET).

Applications must include the following:

- University of Iowa application packet (and fee);
- a personal statement addressing the applicant's motivation for attending graduate school in general and the University of Iowa specifically, motivation for seeking advanced degree in learning sciences and educational psychology, and specific things the applicant has done that are relevant to the desire to attend and their potential success in graduate school;
- three academic or professional references who will be prompted by the admissions system to provide letters of recommendation; and
- either GRE General Test scores (preferred) or an academic or professional writing sample such as an academic paper (coursework or publication), project report, research proposal, or creative work that includes a written component; and
- for international applicants, TOEFL or other score as approved by the University of Iowa.

Following an initial review of the application, applicants may be asked to participate in a virtual interview with one or more faculty members. No preparation is required for this interview, it provides faculty members an opportunity to better understand the applicant's graduate school goals and provides applicants with an opportunity to ask questions about the program.

Admission decisions are announced approximately six weeks after the application deadline. Applicants who accept admission or financial aid and do not relinquish either one on or before April 15 should consider themselves committed and should not solicit or accept another offer. Offers made by the program after April 15 include the provision that the offer is void if the applicant has accepted and continues to hold a previous offer from another program listed in the American Psychological Association publication, Graduate Study in Psychology and Associated Fields. This policy is consistent with standards set by the association's Board of Educational Affairs.

Application deadline for fall entry is Jan. 15 with review beginning soon after. Application deadline for the spring entry is Oct. 1.
Applications after the deadline may not be considered for funding.

## Academic Plans

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Psychological and Quantitative Foundations, EdS

## Learning Outcomes

Graduate students will:

- gain course specific knowledge and skills as required to perform well in their specialties (as demonstrated by completing their required courses in their specialty/major area with a grade-point average of 3.00 or higher);
- demonstrate integrated substantive knowledge and skills that can be applied to solve novel professional-level problems (as demonstrated by completing their comprehensive examinations satisfactorily);
- demonstrate required clinical practice skills (as demonstrated by satisfactory completion of all required practicums and/or internships);
- demonstrate initial engagement with, and commitment to, professional ethics, professional development, lifelong learning, and service to the profession (as demonstrated by participation and engagement in the appropriate state, regional, and national organizations as appropriate for their degrees);
- demonstrate entry-level professional qualifications (as demonstrated by being qualified to take any licensing exams that are required for practice and/or employment); and
- be qualified for suitable employment upon graduation (as reported on annual Qualtrics surveys).

## Requirements

The educational specialist (EdS) program in psychological and quantitative foundations with a school psychology subprogram requires a minimum of $62 \mathrm{~s} . \mathrm{h}$. of graduate credit. Students are expected to maintain a cumulative grade-point average of at least 3.00.

The program provides coursework and supervised field experience in education and psychology. The curriculum includes courses in psychological foundations, psychoeducational foundations, school psychology, and research methods. Other requirements include practicum experiences, a written and oral portfolio, and a full-time yearlong EdS-level internship. Successful completion of the PRAXIS
II—School Psychology subject test 5403 is required for program completion.

The EdS in psychological and quantitative foundations includes the following coursework.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these (or equivalents): |  |  |
| PSQF:5219 | Foundations of Health Service/ School Psychology | 3 |
| PSQF:5900 | Psychometrics | 1 |
| PSQF:6213 | Advanced Lifespan Development | 3 |
| PSQF:6235 | Multicultural Counseling | 3 |
| PSQF:6238 | Assessment of Learning Differences | 3 |
| PSQF:6263 | Consultation Theory and Practice | 3 |
| PSQF:7237 | Beginning Practicum in School Psychological Service | 3 |
| PSQF:7310 | Intelligence Assessment | 3 |
| PSQF:7313 | Psychopathology in Childhood | 3 |

| PSQF:7315 | Social and Emotional <br> Assessment of Children and <br> Adolescents | 3 |
| :---: | :--- | ---: |
| PSQF:7337 | Advanced Practicum in School <br> Psychology | 6 |
| PSQF:7344 | Academic Interventions | 3 |
| PSQF:7437 | Internship in School Psychology <br> (Ed.S. field experience) | 4 |
| PSQF:7465 | Issues and Ethics in <br> Professional Psychology | 3 |
| CSED:5202 | Introduction to Group <br> Counseling | 3 |
| or CSED:5222 | Counseling Children and Adolescents in <br> Schools |  |
| EDTL:4900 | Foundations of Special <br> Education | 3 |
| EDTL:4950 | Behavioral and Social <br> Interventions | 3 |
| EDTL:5961 | Foundation of Applied Behavior <br> Analysis | 3 |
| EDTL:7953 | Seminar: Single Subject Design <br> Research | 3 |
| EPLS:4180 | Human Relations for the <br> Classroom Teacher | 3 |

## Admission

Applicants must meet the admission requirements of the Graduate College.

Preference is given to applicants with:

- an undergraduate major in psychology, education, or a related field;
- an undergraduate grade-point average (GPA) of 3.00 or higher;
- a graduate GPA of 3.00 or higher;
- related research experience; and
- an interest and experience working with children and adolescents in $\mathrm{K}-12$ settings.

The school psychology program does not have an official cutoff score for the Graduate Record Examination (GRE) General Test (the GRE is optional) and applicants are reviewed holistically.
Applicants should submit:

- a Graduate College application form;
- official transcripts for all previous college work;
- an official report of GRE General Test scores (the GRE is optional);
- a personal statement outlining career goals and reasons for seeking training in school psychology at the University of Iowa;
- three letters of recommendation from individuals who are qualified to assess the applicant's potential for completing the doctoral program; and
- an updated curriculum vitae or résumé.

The program encourages applicants from minoritized and other underrepresented groups to include persons from a wide range of backgrounds and academic preparation. Students begin the program in the fall. The application deadline is Dec. 1 ; admission decisions usually are made by March 1. Applicants are invited to campus for interviews before final selection.

## Psychological and Quantitative Foundations, PhD

## Learning Outcomes

Graduate students will:

- gain course specific knowledge and skills as required to perform well in their specialties (as demonstrated by completing their required courses in their specialty/major area with a grade-point average of 3.00 or higher);
- demonstrate integrated substantive knowledge and skills that can be applied to solve novel professional-level problems (as demonstrated by completing their comprehensive examinations satisfactorily and by completing their thesis proposals with committee approval);
- demonstrate required clinical practice skills and researcher autonomy (as demonstrated by satisfactory completion of all required practicums and/or internships, and required thesis defenses/article submissions as appropriate for their degrees);
- demonstrate initial engagement with, and commitment to, professional ethics, professional development, lifelong learning, and service to the profession (as demonstrated by participation and engagement in the appropriate state, regional, and national organizations as appropriate for their degrees);
- demonstrate entry-level professional qualifications (as demonstrated by being qualified to take any licensing exams that are required for practice and/or employment); and
- be qualified for suitable employment or postdoctoral appointments upon graduation (as reported on annual Qualtrics surveys).

## Counseling Psychology

The Doctor of Philosophy program in psychological and quantitative foundations with a counseling psychology subprogram requires a minimum of 100 s.h. of graduate credit. The program requires fulltime study. Students are expected to maintain a cumulative gradepoint average (GPA) of at least 3.00 .

The goal of the program is to prepare counseling psychologists who will promote psychology as a science and contribute to the advancement of the profession. The faculty endorses a scientist/ practitioner model of training and expects students to become competent researchers and proficient practitioners. Graduates find positions in a variety of settings, including higher education, counseling centers, clinics, private practice settings, and hospitals.

The program is fully accredited by the American Psychological Association. Students must show appropriate levels of emotional balance and interpersonal skills and act within the American Psychological Association's Ethical Principles of Psychologists. For more information, contact the program director.

The PhD in psychological and quantitative foundations with a counseling psychology subprogram requires the following work.

## Research Requirements

Four research courses are required; students must take at least two quantitative courses, one qualitative course, and six semesters of the supervised research course as follows.

## Basic Psychology

All students are required to have a thorough grounding in the basic discipline of psychology. This may be achieved through a minimum of $3 \mathrm{~s} . \mathrm{h}$. of credit in each of the following four areas: biological bases of behavior, cognitive-affective bases of behavior, social bases of behavior, and history and systems. Students complete an additional 6 s.h. in the area of individual differences.

## Counseling Psychology Core

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| PSQF:6225 | Introduction to Counseling Psychology Practice, Research, and Theory | 3 |
| PSQF:6235 | Multicultural Counseling | 3 |
| PSQF:6312 | Psychopathology Across the Lifespan | 3 |
| PSQF:7306 | Psychotherapy III: Work Psychology and Career Interventions | 3 |
| PSQF:7309 | Personality Assessment | 3 |
| PSQF:7310 | Intelligence Assessment | 3 |
| PSQF:7356 | Process and Outcomes in Counseling Psychotherapy | 3 |
| PSQF:7365 | Theories of Psychotherapy | 3 |
| PSQF:7434 | Practicum in Counseling Psychology | 3 |
| PSQF:7452 | Leadership, Consultation, and Supervision | 3 |
| PSQF:7453 | Advanced Practicum in Counseling Psychology (repeatable) | 3 |
| PSQF:7457 | Advanced Group Leadership Experience | 3 |
| PSQF:7465 | Issues and Ethics in Professional Psychology | 3 |

Internship and Professional Issues

Students must enroll in practica to reach a specified level of client contact, supervision, and additional experience hours. Practicum placements must have prior approval of the counseling psychology faculty. Students must successfully complete one semester of PSQF:7434 Practicum in Counseling Psychology before enrolling in PSQF:7453 Advanced Practicum in Counseling Psychology.

## Electives

Elective courses are determined in collaboration with the major advisor.

## Internship

Students spend a calendar year in an internship setting approved by the counseling psychology faculty. The faculty determines student readiness to apply for the internship based on completion of all required coursework, successful defense of comprehensive exams, and successful completion of practicum requirements. Internships usually require geographic relocation.

## Comprehensive Exam and Dissertation

The comprehensive examination consists of an oral and a written component. The exam includes research and practice elements. For more information, contact the program coordinator.
The dissertation research study is planned in collaboration with the student's major advisor. Dissertation credit ranges from 12 to 15 s.h.

## Admission

Applicants must meet the admission requirements of the Graduate College. Preference is given to applicants who have an undergraduate GPA above 3.00 and a graduate GPA above 3.50; an undergraduate major, minor, or substantial coursework in psychology; and previous research and counseling experience.

Applicants should submit a Graduate College application form, official transcripts of all previous college work, a personal statement outlining career goals and reasons for seeking advanced training in counseling psychology, and three letters of recommendation from individuals qualified to assess the applicant's potential for completing the doctoral program. The Graduate Record Examination (GRE) is optional. The faculty encourages applicants from a wide range of backgrounds and identities. Applicants with a BA or a more advanced degree are eligible to apply. The program typically accepts between seven and ten students each year.

Students begin the program in the fall. Application deadline is Dec. 1. Applicants are invited for interviews in February, and admission decisions are usually made by March 1.

The department is not admitting students to the couple and family therapy subprogram at this time.

The Doctor of Philosophy program in psychological and quantitative foundations with a couple and family therapy subprogram requires a minimum of 73 s.h. of graduate credit. Students are expected to maintain a cumulative grade-point average of at least 3.00 .

The program aims to prepare couple and family therapists for roles in academic and research settings. Using a social justice and a relational/systemic perspective, the program prepares students to become ethically and multiculturally responsive scholars, clinicians, supervisors, and educators. The program has five goals: to equip students to generate and disseminate social justice and relational/
to prepare effective couple and family therapy educators; to equip students with advanced couple and family therapy theoretical training for use in clinical and supervisory settings; to promote ethical practices of students in their scholarship, clinical, and educational endeavors; and to engender multicultural responsiveness of students in their scholarship, clinical, and educational endeavors.
Graduates are expected to have sufficient knowledge and skill to teach and conduct research at colleges and universities; supervise other professionals; and provide clinical services to individuals, couples, and families. Graduates also should have competencies to engage in and evaluate theory-based qualitative and/or quantitative research.
Requirements for the degree include coursework, a systematic review, a theory of change paper, an ethics autobiography paper, a comprehensive exam portfolio, an advanced practical experience, and a dissertation. Most students complete the program's required coursework in two or three years and take one or two years to complete the advanced practical experience and dissertation. The couple and family therapy faculty reviews each student annually; students must fulfill program requirements in order to continue in the program.
The PhD in psychological and quantitative foundations with a couple and family therapy subprogram requires the following.

## Research Requirement

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Research Methods in Couple |  |
| PSQF:5265 | and Family Therapy | 3 |
| PSQF:6243 | Intermediate Statistical Methods | 3 |
| PSQF:7331 | Qualitative Educational <br> Research Methods | 3 |
| PSQF:7459 | Seminar: Issues and Trends in <br> Counseling Research | 4 |
| PSQF:7460 | Seminar: Research in <br> Counseling | 3 |

## Advanced Research Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| PSQF:6244 | Correlation and Regression | 4 |
| PSQF:6246 | Design of Experiments | 3 |
| An advanced qualitative course | 3 |  |

## Theoretical and Clinical Core

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Advanced Couple and Family <br> Therapy | 3 |
| PSQF:5262 | Process and Outcomes in <br> Counseling Psychotherapy | 3 |
| PSQF:7356 | Advanced Practicum in Couple <br> and Family Therapy (must be <br> taken multiple times for total of <br> 9 s.h.) | 9 |
| PSQF:7389 | Seminar in Couple Intervention <br> Research | 3 |
| PSQF:7395 | Social Context and Family <br> Research | 3 |
| PSQF:7399 | Supervision in Couple and <br> Family Therapy | 3 |

Seminar in Child and
Adolescent Intervention Research

## Teaching Requirement

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Tools and Utilities for Online | 3 |
| PSQF:6216 | Teaching |  |
| PSQF:6217 | Seminar in College Teaching | 3 |
| PSQF:7380 | Practicum in College Teaching | 3 |
| EALL:7475 | PhD ePortfolio in College <br> Teaching | 3 |

## Ethics and Multicultural Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| PSQF:6235 | Multicultural Counseling | 3 |

## Comprehensive Examination

The comprehensive examination consists of a portfolio that a student has compiled during the program and its oral defense once coursework has been completed.

## Advanced Practical Experience

Students must complete a clinical, research, academic, and/or administrative experience.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PSQF:7500 | Advanced Practical Experience | 2 |
|  | in Couple and Family Therapy |  |
|  | (when topic is advanced <br> practical experience) |  |

## Dissertation

Work for the doctoral dissertation employs a student's independent skills in conducting original research. The dissertation process is supervised by a student's advisor. Depending on a student's research questions, the dissertation may require quantitative, qualitative, or mixed methods and may involve data collection or the secondary analysis of an existing data set. The thesis advisor and the examining committee approve the topic and procedures at a formal prospectus meeting. The final oral examination on the thesis is conducted by the examining committee.

Course \#
PSQF:7493
Title
PhD Thesis in Psychological and Quantitative Foundations

Hours

## Admission

Applicants to the program must meet the department's general admission requirements and the admission requirements of the Graduate College. They also must hold a master's degree in couple and family therapy or marriage and family therapy from a program that is accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE) or its equivalent.

Students are admitted for fall entry. All application materials should be received on or before Dec. 31, when the faculty begins evaluating applications. The program requires an interview with the faculty conducted in person or by telephone. Generally, the interview is scheduled once complete application materials have been received.

Educational Measurement and Statistics

The Doctor of Philosophy program in psychological and quantitative foundations with an educational measurement and statistics subprogram requires a minimum of 90 s.h. of graduate credit. Students are expected to maintain a cumulative grade-point average of at least 3.00 .

The program prepares students for senior professional positions in educational measurement, evaluation, and statistical methods. Graduates find employment in colleges and universities, state and federal agencies, large public and private school systems, test publishing firms, and research centers.
During the first year of graduate study, a student and the advisor plan a program of study that is appropriate for the student's interests and vocational objectives. The typical program involves advanced work in educational measurement, data analysis methods, research methodology, and educational psychology. Work in other University of Iowa departments is encouraged.

Students who concentrate in statistics and intend to teach at the college level take courses in the mathematical theory of statistics. Those who concentrate in educational measurement and evaluation take appropriate courses in curriculum, counseling, or higher education. All students are required to develop familiarity with computer programming techniques and equipment.
Students who enter the program without completing an MA thesis must complete a substitute project before taking the PhD comprehensive examinations.

After completing most of their coursework, students take the comprehensive examination, which typically consists of three 3hour written examinations on educational measurement, applied statistics, and program evaluation or approved substitute areas, such as educational psychology or mathematical statistics, in which a student has completed at least 9 s.h. of coursework. In place of one written examination, the student's committee may assign a project involving analytical and evaluative skills, or research creativity. The written examinations are followed by an oral examination in which the committee seeks further evidence of the student's command of the three fields. A single decision is made on all aspects of the comprehensive examination.

Work for the PhD concludes with the dissertation, which is included in the 90 s.h. required for the degree.

## Research Requirement

| Course \# <br> One of these: | Title | Hours |
| :--- | :--- | ---: |
| PSQF:6220 | Quantitative Educational <br> Research Methodologies | 3 |
| An equivalent course comparable in content and level <br> of rigor, such as EALL:5150 |  |  |

## Quantitative Requirements

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| This course: |  |  |
| PSQF:6243 | Intermediate Statistical Methods | 3 |
| Two of these: | Correlation and Regression | 4 |
| PSQF:6244 | Design of Experiments | 3 |
| PSQF:6246 | Nonparametric Statistical | 3 |
| PSQF:6247 | Methods | 3 |

| EDTL:7410 | Mixed Methods Research | 3 |
| EDTL:7751 | Advanced Qualitative Data Analysis | 3 |
| EDTL:7953 | Seminar: Single Subject Design Research | 3 |
| EPLS:5240 | Topics in Education (when topic is introduction to historical methodology) | arr. |

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have a combined verbal and quantitative score of at least 300 on the Graduate Record Examination (GRE) General Test and must hold an MA from an accredited institution. Applicants who do not hold an MA degree are automatically considered for admission to the MA program. At least one year of professional experience in teaching, research, or a related field is desirable. Applicants who expect to concentrate in statistics should have training in college mathematics through differential and integral calculus. Applicants
who do not meet these requirements but who show offsetting evidence of superior ability may be granted conditional admission.
Applicants must submit a statement of purpose that explains how the educational measurement and statistics subprogram will help them accomplish their educational and vocational goals.

For information about admission dates, contact the educational measurement and statistics program coordinator.

## Learning Sciences and Educational Psychology

The Doctor of Philosophy program in psychological and quantitative foundations with a learning sciences and educational psychology subprogram requires a minimum of 72 s.h. of graduate credit. Students are expected to maintain a cumulative grade-point average of at least 3.00.

The subprogram synthesizes core content and methods of educational psychology with training in the learning sciences. Educational psychology is characterized by empirical research and theory typical of the social and behavioral sciences. The learning sciences reflects an outgrowth of cognitive science. The field offers a multidisciplinary approach to understanding when, how, and why people learn in social and material contexts that include but are not limited to classrooms.
The learning sciences blends theories and methods from several disciplines, such as cognitive psychology, anthropology, instructional design, and more. Students will acquire the depth of knowledge and methodological sophistication necessary for original research that contributes to educational psychology and the learning sciences. They will develop and demonstrate their knowledge of learning theory and design principles in the context of research and design projects.

Students work closely with their advisor to develop a plan of study and define a program that matches their goals and interests. Those who begin the program after earning a master's degree or with coursework from another program may be able to waive some of the PhD program requirements.
The program of study includes substantive areas within the learning sciences and educational psychology, including courses in cognition, development, learning theory, and the design of instruction, learning environments, and learning technologies. Other learning opportunities include a design project in the second year, a precandidacy independent research project in which students design and carry out original research, a slate of research courses that meet the College of Education's research requirements, a minor area of a student's choice, and a dissertation in the student's area of interest.

## Research Requirement

The heart of educational psychology as a field is the creation, dissemination, and use of rigorous research to better understand and address educational issues. While many of the required courses address various aspects of the guiding principles set out by the National Research Council, students engage in the following coursework and research-related activities.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Quantitative Educational |  |
| PSQF:6220 | Research Methodologies | 3 |
| PSQF:6243 | Qualitative Educational <br> Research Methods | 3 |
| PSQF:7331 | Correlation and Regression | 3 |
| One of these: | Design of Experiments | 4 |
| PSQF:6244 |  | 3 |

| PSQF:6247 | Nonparametric Statistical | 3 |
| :--- | :--- | :--- |
| PSQF:6252 | Methods |  |
|  | Introduction to Multivariate | 3 |
|  | Statistical Methods |  |

## Research Project

Prior to candidacy and in consultation with a faculty member, students design, implement, and present an original research project. This experience provides the opportunity to conduct a pilot study that will strengthen their thesis in terms of methods, instruments, theoretical grounding, or focus of research question. Student presentations of their research are open to the public. Students are encouraged to submit their study results for broader dissemination at a local, regional, or national conference.

For students who have received approval to omit this requirement because of an empirical thesis that is acceptable to the learning sciences and educational psychology faculty, an additional research course may be required.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PSQF:6230 | Research in Educational | 3 |
|  | Psychology |  |

## Required Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| PSQF:6200 | Educational Psychology | 3 |
| PSQF:6203 | Tools and External Representations in Individual and Social Learning | 3 |
| PSQF:6204 | Foundations of the Learning Sciences | 3 |
| PSQF:6205 | Design of Instruction | 3 |
| PSQF:6214 | Design of Learning <br> Environments: Theory, Practice, and Method | 3 |
| PSQF:6281 | Cognitive Theories of Learning | 3 |
| PSQF:6299 | MA Project: Portfolio/ Internship/Practicum | 2 |
| PSQF:7493 | PhD Thesis in Psychological and Quantitative Foundations (minimum requirement) | 10 |

## Core Courses

The selection of core courses depends on a student's area of specialization. Students choose at least 9 s.h.; they should contact their advisor for additional approved courses.

## Cognition, Learning, and Development

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PSQF:6213 | Advanced Lifespan | 3 |
| PSQF:6275 | Development | Constructivism and Design of |
| PSY:6440 | Instruction | 3 |
|  | Developmental Cognitive <br> Neuroscience | 3 |

|  | Tools and Utilities for Online <br> Teaching | 3 |

## Seminar

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PSQF:7371 | Seminar in Learning Sciences <br> and Educational Psychology <br> (topics vary; may be repeated if <br> content is related to educational <br> psychology) | 3 |
|  |  |  |

## Electives

Students may take up to 6 s.h. of elective coursework. Students can take PSQF:6217 Seminar in College Teaching and/or additional research courses. Other courses may be included in consultation with their advisor.

## Minor Area

Students must complete a minimum of 12 s.h. that constitute a coherent program of coursework outside educational psychology and beyond the courses listed above. The minor area may be from a foundation discipline such as mathematics education, educational philosophy, or program evaluation. Courses must be numbered 5000 or above, can span across departments and colleges, and must be consistent with a plan approved by a student's advisor.

## Comprehensive Examination

The PhD comprehensive examination emphasizes competence and depth in one or more narrowly defined areas of research and theory. Students choose from three options in consultation with their advisor and with the approval of their examining committee that is composed of five faculty members. It does not necessarily include the same faculty members as the dissertation committee.
The options are a traditional comprehensive examination that includes foundational content in educational psychology and learning sciences, the student's minor area, and a specialty area of the student's choice; a review article; or an extended research activity. For details of each option's requirements, contact the Department of Psychological and Quantitative Foundations.

## Admission

Applicants must meet the admission requirements of the Graduate College, including the minimum grade-point average. They must have a verbal score of at least 150 and a quantitative score of at least 152
on the Graduate Record Examination (GRE) General Test; successful applicants usually score higher (the GRE is optional).
Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET).
Applicants who do not meet all admission requirements may be granted conditional admission on the basis of other evidence, such as high grade-point average, strong academic preparation, and highly supportive recommendations. Conditional admission is rare.
Applications must include the following:

- University of Iowa application packet (and fee);
- a personal statement addressing the applicant's motivation for attending graduate school in general and the University of Iowa specifically, motivation for seeking advanced degree in learning sciences and educational psychology, potential research interests, and specific things the applicant has done that are relevant to the desire to attend and their potential success in graduate school;
- three academic or professional references who will be prompted by the admissions system to provide letters of recommendation; and
- either GRE General Test scores (preferred) or an academic or professional writing sample such as an academic paper (coursework or publication), project report, research proposal, or creative work that includes a written component; and
- for international applicants, TOEFL or other score as approved by the University of Iowa.
Following an initial review of the application, applicants may be asked to participate in a virtual interview with one or more faculty members. No preparation is required for this interview, it provides faculty members an opportunity to better understand the applicant's graduate school goals and provides applicants with an opportunity to ask questions about the program.
Admission is for fall entry. Application deadline is Jan. 15; late applications might not be considered for funding. Review of applications begins soon after, when applicants who wish to be considered for fellowships and other awards are screened. Admission decisions are announced approximately six weeks after the application deadline.

Applicants who accept admission or financial aid and do not relinquish either one on or before April 15 may not solicit or accept another offer. Offers made by the program after April 15 include the provision that the offer is void if the applicant has accepted and continues to hold a previous offer from another program listed in the American Psychological Association publication Graduate Study in Psychology and Associated Fields. This policy is consistent with standards set by the association's Board of Educational Affairs.

## School Psychology

The Doctor of Philosophy program in psychological and quantitative foundations with a school psychology subprogram requires a minimum of $108 \mathrm{~s} . \mathrm{h}$. of graduate credit. Students are expected to maintain a cumulative grade-point average (GPA) of at least 3.00.
The primary mission of the school psychology program is to train health service psychologists to be outstanding ethical and multiculturally competent scientist practitioners who promote psychology as a profession and science for the betterment of the human condition. As such, the program places high emphasis on instilling attitudes and skills that are necessary for becoming critical consumers of research, active disseminators of research, and valuable contributors to the scientific foundations of the field. Students must
show appropriate levels of emotional balance and interpersonal skills, and act within the American Psychological Association's Ethical Principles of Psychologists and Code of Conduct.

Graduates from the school psychology program obtain positions as school service providers, private practitioners, faculty members, and psychologists in community mental health agencies, residential settings, and pediatric and psychiatric settings.
The APA Commission on Accreditation (APA-CoA) has approved the school psychology program's intent to apply application and voted to provide public notice of the program's intent to seek accreditation effective April 2, 2022. Although currently not APA accredited, the doctoral program has developed its course offerings, sequence, research, and practical experiences to be in line with standards that are set forth by the Standards of Accreditation for Health Service Psychology. The doctoral-level school psychology program will apply for accreditation as soon as possible but by no later than May 2025.
Students develop a plan of study in consultation with their academic advisors. Successful completion of the PRAXIS II—School Psychology subject test 5403 is required for program completion.

The PhD in psychological and quantitative foundations with a school psychology subprogram requires the following.

## Research Requirement

To receive credit for additional courses, students must obtain prior approval from their advisor and the school psychology program.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| PSQF:5199 | Topical Workshop in Psychological and Quantitative Foundations (when topic is introduction to school psychology research writing) | 1 |
| PSQF:5900 | Psychometrics | 1 |
| PSQF:6243 | Intermediate Statistical Methods | 3 |
| PSQF:7331 | Qualitative Educational Research Methods | 3 |
| PSQF:7342 | Research Project in School Psychology | 2-4 |
| EDTL:7953 | Seminar: Single Subject Design Research | 3 |
| One of these (or equivalent): |  |  |
| PSQF:6244 | Correlation and Regression (must take PSQF:6243 before this course) | 4 |
| PSQF:6246 | Design of Experiments (must take PSQF:6243 before this course) | 3 |

## Basic Psychology

Students are required to have a thorough grounding in the basic discipline of psychology, which may be achieved through earning a minimum of $3 \mathrm{~s} . \mathrm{h}$. in each of the following six areas: history and systems; and affective, biological, cognitive, developmental, and social bases of behavior. Students complete additional courses in individual differences and other course areas consistent with accreditation.

## Core Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these (or equivalents): |  |  |
| PSQF:5219 | Foundations of Health Service/ School Psychology | 3 |
| PSQF:6213 | Advanced Lifespan Development | 3 |
| PSQF:6235 | Multicultural Counseling | 3 |
| PSQF:6238 | Assessment of Learning Differences | 3 |
| PSQF:6263 | Consultation Theory and Practice | 3 |
| PSQF:6281 | Cognitive Theories of Learning | 3 |
| PSQF:6312 | Psychopathology Across the Lifespan | 3 |
| PSQF:7320 | History and Systems of Psychology | 3 |
| PSQF:7237 | Beginning Practicum in School Psychological Service (minimum of 150 hours required) | 3 |
| PSQF:7310 | Intelligence Assessment | 3 |
| PSQF:7315 | Social and Emotional <br> Assessment of Children and Adolescents | 3 |
| PSQF:7337 | Advanced Practicum in School Psychology (minimum of 750 hours required) | 15 |
| PSQF:7344 | Academic Interventions | 3 |
| PSQF:7367 | Social Psychology and Social Systems | 3 |
| PSQF:7390 | Supervision of School Psychology Practicum/ Internship | 3 |
| PSQF:7465 | Issues and Ethics in Professional Psychology | 3 |
| or EDTL:5963 | Ethics and Professional Conduct Analysts and Psychologists | havior |
| CSED:5202 | Introduction to Group Counseling | 3 |
| or CSED:5222 | Counseling Children and Adoles Schools |  |
| EDTL:4900 | Foundations of Special Education | 3 |
| EDTL:4950 | Behavioral and Social Interventions | 3 |
| EDTL:5961 | Foundation of Applied Behavior Analysis | 3 |
| EPLS:4180 | Human Relations for the Classroom Teacher | 3 |
| $\begin{aligned} & \text { PSY:5203 } \\ & \text { or PSY:6370 } \end{aligned}$ | Fundamental Neurobiology I <br> Principles of Neuropsychology | 3 |

Students must enroll in practicums to reach a specified level of client contact, supervision, and additional experience hours. Placements must have prior approval of the school psychology faculty. Students must successfully complete one semester of PSQF:7237 Beginning Practicum in School Psychological Service before enrolling in PSQF:7337 Advanced Practicum in School Psychology. Students must adhere to the most recent ethical principles and standards of the American Psychological Association.

## Elective Courses

Students earn a minimum of 6 s.h. in elective courses. These courses are determined in collaboration with the major advisor and could include the following courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EDTL:4975 | Explicit Instruction | 3 |
| EDTL:5966 | Advanced Topics in Applied <br> Behavior Analysis | 3 |
| PEDS:7264 | Clinical Applications of Applied <br> Behavior Analysis | 3 |

## Yearly and Comprehensive Portfolios

Students are required to complete yearly portfolio reviews, which include oral examinations. The comprehensive portfolio consists of an oral and a written component that includes research and practice elements. For more information, contact the program coordinator.

## Internship

Students spend a calendar year in an internship setting approved by the school psychology faculty. The faculty determines student readiness to apply for the internship based on completion of all required coursework, successful defense of comprehensive portfolio, and successful completion of practicum requirements. Internships may require geographic relocation.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| PSQF:7437 | Internship in School Psychology | 2 |

## Dissertation

Students complete a doctoral dissertation. The program has adopted a two article format. The dissertation research study is planned in collaboration with a student's major research advisor. Once students complete all coursework on their plan of study and successfully defend their comprehensive portfolio, they register for a total of $6 \mathrm{~s} . \mathrm{h}$. of dissertation credit. Students may register for additional dissertation credit until completion.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | PhD Thesis in Psychological | 6 |
| PSQF:7493 | and Quantitative Foundations | 6 |

## Admission

Applicants must meet the admission requirements of the Graduate College. Preference is given to applicants with an undergraduate major in psychology, education, or a related field; have an undergraduate GPA of 3.00 or higher; a graduate GPA of 3.00 or higher; related research experience; and an interest and experience working with children and adolescents in $\mathrm{K}-12$ settings. The school psychology program does not have an official cutoff score on the Graduate Record Examination (GRE), and applicants are reviewed holistically (the GRE is optional).

Applicants should submit a Graduate College application form official transcripts for all previous college work, an official report of GRE General Test scores (the GRE is optional), a personal statement outlining career goals and reasons for seeking training in school psychology at the University of Iowa, three letters of recommendation from individuals who are qualified to assess the applicant's potential for completing the doctoral program, and an updated curriculum vitae or résumé. The faculty encourages applicants from minoritized and other underrepresented groups to include persons from a wide range of backgrounds and academic preparation.

Students begin the program in the fall. The application deadline is Dec. 1; admission decisions usually are made by March 1. Applicants are invited to campus for interviews before final selection. The program admits up to 10 students each year.

## Academic Plans

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students entering with a bachelor's degree must work with their faculty advisor to complete 30 s.h. of appropriate graduate coursework to fulfill the MA requirements. Students entering with a master's degree from Iowa or an accredited institution with fewer than 30 s.h. of coursework must work with their faculty advisor to complete the needed appropriate graduate coursework to fulfill the MA requirements.
b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
c Satisfies a Discipline Specific Knowledge area requirement. Must be completed before taking the Comprehensive Exam.
d Take PSQF:6242 if planning to complete PSQF:7201; take PSQF:6243 if planning to complete either PSQF:6244 or PSQF:6246. Work with faculty advisor to determine appropriate research coursework and sequence.
e PSQF:6244 is typically offered in spring semesters; PSQF:6246 and PSQF:7201 are typically offered in fall semesters. Work with faculty advisor to determine appropriate research coursework and sequence.
f Course may be taken during any summer session.
g Work with faculty advisor for approval of selected elective coursework.
h Consists of oral and written components; includes research and practice elements. For more information contact the program coordinator.
i Dissertation defense.
j For students who have already successfully defended their dissertation.
k Students spend a calendar year in an internship setting approved by the counseling psychology faculty. The faculty determines student readiness to apply for the internship based on completion of all required coursework, successful defense of comprehensive exams, and successful completion of practicum requirements. Internships usually require geographic relocation.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
c Required for Social Psychology Certification in Iowa.
d Students completing the BCBA Certificate must take EDTL:5963 to meet APA and BCBA ethics requirements.
e Also meets requirements for BCBA Certificate.
f Work with faculty advisor to select appropriate elective coursework.
g Successful completion of the PRAXIS II-School Psychology subject test 5403 is required for program completion.
h Typically completed by the end of the fourth year; see the College of Education website for specifics.
i Dissertation defense.

## Talent Development

Chair, Department of Teaching and Learning

- Lia M. Plakans

## Coordinator, Talent Development

- Randolph W. Lange

Graduate certificate: talent development
Faculty: https://education.uiowa.edu/directory
Website: https://education.uiowa.edu/areas-study/continuing-education/certificates-and-endorsements/certificate-talentdevelopment

The purpose of the graduate Certificate in Talent Development is to increase understanding of talented individuals, the process of talent development and the creative process, and prepare advocates for talented individuals.

The Certificate in Talent Development is administered by the Department of Teaching and Learning [p. 1362] and is granted by the Graduate College.

## Programs

Graduate Program of Study

## Certificate

- Certificate in Talent Development [p. 1361]

## Talent Development, Graduate Certificate

## Requirements

The graduate Certificate in Talent Development requires 14 s.h. of credit and is offered fully online, or with hybrid and conventional courses. Students must maintain a grade-point average of at least 3.00 in work for the certificate. Required and elective courses must be taken on a graded basis. The capstone exploration is graded as satisfactory/unsatisfactory.

The certificate program is open to students enrolled in University of Iowa graduate degree programs and to individuals who are enrolled in the Graduate College as nondegree students.
Inquiries regarding approval for transfer credit of previously taken University of Iowa courses should be directed to the certificate supervisors at the Belin-Blank Center.

The Certificate in Talent Development requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Required Coursework | 6 |
| Elective Coursework | 6 |
| Capstone Exploration | 2 |

## Required Coursework

| Course \# | Title | Hours |
| :--- | :--- | ---: |

| PSQF:6281 | Cognitive Theories of Learning | 3 |

Students may take other 3000-level courses that focus on talent development concepts, in consultation with their advisor

## Capstone Exploration

The Certificate in Talent Development culminates with the opportunity for students to develop and complete a capstone exploration project relevant to a school or other context that focuses on an important topic or issue in talent development. Students must have a grade of B or higher in the required and elective courses to enroll in the capstone exploration.
The capstone exploration entails critical readings and a guided research project and presentation related to the concept of talent development. Projects require approval (and are supervised) by a Belin-Blank Center professional development team member. Readings will be discussed and determined in collaboration with the mentor. The capstone exploration project is shared in a public presentation immediately following completion of the research/independent study related to the capstone exploration. Students present their capstone exploration to a public forum (e.g., staff meeting, school board meeting, special evening event, public library); if the presentation cannot be at a public forum, an alternate forum will be agreed upon between the student and the Belin-Blank Center mentor. Students submit the final written report (with references and appendices) no later than 20 days after the public presentation.
For more information, visit Certificate in Talent Development on the College of Education website.

## Teaching and Learning

## Chair

- Lia M. Plakans

Undergraduate majors: art education (BA); elementary education (BA); English education (BA); mathematics education (BA); music education (BA); science education (BA); social studies education (BA); world language education (BA); science studies (BS, granted by the College of Liberal Arts and Sciences)
Graduate degrees: MA in teaching and learning; MAT in teaching and learning; MS in teaching and learning; PhD in teaching and learning

Faculty: https://education.uiowa.edu/directory
Website: https://education.uiowa.edu/about/administration/ department-teaching-and-learning
Department of Teaching and Learning programs prepare graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. All licensure programs are approved by the Iowa Department of Education.

Undergraduate students pursuing a BA with a major in art education, elementary education, English education, mathematics education, music education, science education, social studies education, or world language education, must satisfy the GE CLAS Core [p. 19] requirements.

Undergraduate students pursuing a BS with a major in science studies must meet the College of Liberal Arts and Sciences requirements for the Bachelor of Science degree, including the GE CLAS Core; see the College of Liberal Arts and Sciences Academic Policies Handbook.

The Department of Teaching and Learning offers, or jointly administers with departments in the College of Liberal Arts and Sciences, advanced degree programs in the following fields of professional interest: art education; English education; world/foreign language, multilingual, and English as a Second Language education; literacy, culture, and language education; mathematics education; music education; science education; social studies education; special education; STEM education; and teaching, leadership, and cultural competency.

## Graduate Degree Programs

The department offers graduate degree programs in three major areas: elementary education, secondary education, and special education.

## Elementary Education Programs

- art education (offered in the MA and MAT in teaching and learning); and
- teaching, leadership, and cultural competency (offered in the MA in teaching and learning).

## Secondary Education Programs

- art education (offered in the MA and MAT in teaching and learning);
- English education (offered in the MA and MAT in teaching and learning);
- world language and English as a Second Language (ESL) education (offered in the MA and MAT in teaching and learning);
- literacy, culture, and language education (offered in the PhD in teaching and learning);
- mathematics education (offered in the MA, MAT, and PhD in teaching and learning);
- science education (offered in the MS, MAT, and PhD in teaching and learning);
- social studies education (offered in the MA and MAT in teaching and learning);
- special education (offered in the MA and PhD in teaching and learning);
- STEM education (offered in the MS in teaching and learning); and
- teaching, leadership, and cultural competency (offered in the MA in teaching and learning).

The secondary education area also collaborates with the College of Liberal Arts and Sciences to offer an education option for graduate students earning an MS in mathematics; an MA and PhD in music with a concentration in music education; and a combined BA/MAT in teaching and learning with a science education subprogram for undergraduates majoring in biology, chemistry, environmental sciences, or physics. In addition, the area offers an ESL endorsement for individuals who are enrolled in a Department of Teaching and Learning graduate degree program or who are licensed in-service teachers.

In addition, the MA in music [p. 838] is administered by the School of Music (College of Liberal Arts and Sciences) in cooperation with the College of Education. The concentration in music education provides students with deeper insights into music, the theory and practice of music education, and the role of music in the school curriculum.
The PhD in music [p. 840] with concentration in music education prepares students for teaching, research, and administrative posts. Graduates find employment as college teachers of music education classes and activities; as band, chorus, and orchestra directors; and as administrators of music departments and schools of music. Some apply their skills in public schools as music supervisors, research and curriculum consultants, and directors of city or district school music programs. Doctor of Philosophy students whose concentration is music therapy enroll in the PhD program with concentration in music education. Modifications in the curricular requirements are made to reflect the professional knowledge and skills required for positions such as college teaching or advanced clinical or research positions in music therapy. Both programs are administered by the School of Music [p. 799] (College of Liberal Arts and Sciences) in cooperation with the College of Education.

## Special Education Program

- special education (offered in the MA and PhD in teaching and learning).
Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Graduate Certificates

The graduate Certificate in Applied Behavior Analysis is offered by the Department of Teaching and Learning. To learn more, see the Certificate in Applied Behavior Analysis [p. 1293] in the catalog.
The graduate Certificate in Talent Development is offered by the Department of Teaching and Learning. To learn more, see the Certificate in Talent Development [p. 1360] in the catalog.

## Programs

## Undergraduate Programs of Study

## Majors

- Major in Art Education (Bachelor of Arts) [p. 1376]
- Major in Elementary Education (Bachelor of Arts) [p. 1378]
- Major in English Education (Bachelor of Arts) [p. 1384]
- Major in Mathematics Education (Bachelor of Arts) [p. 1387]
- Major in Music Education (Bachelor of Arts) [p. 1390]
- Major in Science Education (Bachelor of Arts) [p. 1394]
- Major in Social Studies Education (Bachelor of Arts) [p. 1397]
- Major in World Language Education (Bachelor of Arts) [p. 1400]
- Major in Science Studies (Bachelor of Science) [p. 1403]

## Graduate Programs of Study

## Majors

- Master of Arts in Teaching and Learning [p. 1411]
- Master of Arts in Teaching in Teaching and Learning [p. 1416]
- Master of Science in Teaching and Learning [p. 1424]
- Doctor of Philosophy in Teaching and Learning [p. 1427]

## Financial Support

A limited number of teaching assistantships are available for graduate students. Assignments vary. Some involve supervising undergraduate majors enrolled in practicums; some involve teaching sections of undergraduate methods courses and supervising student teachers; others consist primarily of research activities. Graduate assistants may register for a maximum of 12 s .h. of credit per semester, but they must register for at least 6 s.h. per semester.

All assistantships are awarded on a competitive basis. Applicants must have been admitted to regular status in the Graduate College and to an advanced program in the College of Education. For information about assistantships, consult the College of Education advisor in the appropriate field.

## Courses

- Teaching and Learning Courses [p. 1363]
- Science Education Courses [p. 1375]

## Teaching and Learning Courses

## EDTL:1050 Opportunities in Education

2 s.h.
Introduction for underrepresented students to the teaching profession and its widely varied opportunities; faculty, students, recipients of awards in education; tours of Iowa City schools; reflection on and personal integration of class learning experiences, consideration of future plans.

## EDTL:1129 First-Year Seminar

1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

EDTL:2000 Big Ideas: Creativity for a Lifetime
3 s.h.
Exploration of what senior artists can teach about creativity and aging; interdisciplinary project-based collaborative learning opportunities that consider role of arts and creativity across a lifespan; essential skills necessary to be professionals in numerous careers including health, social work, education, humanities, and the arts; identification of ways for students to be more creative in their own lives and work. GE: Values and Culture. Same as ARTS:2000, ASP:2000, RHET:2000.
EDTL:2015 Teaching as a Human Endeavor 3 s.h.
Introduction to teaching with focus on role as a human endeavor including purposes, goals, and values; special attention to contemporary issues in teaching and learning with an overview of planning processes, role of settings, contexts, and differentiation; exploration of appropriate ways to study teaching across disciplines and under various professional standards.
EDTL:2073 Finding Your Comfort Zone: Secrets to Success 1,3 s.h.
Understanding the strengths and challenges of people with special needs; insights into unwritten "rules" of college life; optional practicum involves working hands-on with people who have multiple learning and cognitive disabilities; students with disabilities or those interested in learning more about disabilities are encouraged to enroll.

## EDTL:2111 Teaching Elementary Learners I: Pursuits and

 Reflection2 s.h.
Foundational support for future elementary teachers; development of an understanding of teaching with a humanizing orientation; use of inquiry, reflection, and collaboration to introduce UI teacher education core pursuits that center equity; focus on elementary education and learners through valuing identities and multiple perspectives, developing skills and supporting intellect, and critically reflecting on social and political implications of a teacher's role in education.
EDTL:2112 Teaching Elementary Learners II: Communities and Classrooms 2 s.h.
Foundational support for future elementary teachers; development of an understanding of teaching with a humanizing orientation; use of inquiry, reflection, and collaboration to delve into UI teacher education core principles through integration across disciplines; engagement in elevating and advocating for future elementary students' communities through respect and care; incorporates Teacher Education Program pre-admission requirements and individual interviews with elementary education faculty.
EDTL:2122 Creativity, Imagination, Play, and Human Development through the Arts
Theories related to human development and visual arts; use of visual arts to make meaning from experience; ways to integrate visual arts into everyday life; cognitive and physical processes involved in making, understanding, and looking at visual art through studio experiences; theories of cognitive development; role of visual art in education; introduction to art production, history, criticism, and aesthetics. GE: Literary, Visual, and Performing Arts.
EDTL:2155 Pursuing Core Principles in Elementary

## Education

2 s.h.
Supports future elementary teachers in developing a humanizing orientation toward elementary teaching across all content areas. Uses inquiry, reflection, and collaboration to introduce students to the University of Iowa teacher education core principles. Learn about the importance of valuing identities and multiple perspectives; developing skills and supporting intellect; and critically reflecting on the social and political implications of elementary education. Learn about the elementary education program and meet program faculty throughout the course.

## EDTL:2630 Introduction to the Psychology of Music 3 s.h.

 Processes by which people perceive, respond to, create, and use music in their daily lives; basic physics of musical stimuli, psychoacoustics of musical perception, principles of musical cognition, neurological and physiological responses to music, theories of musical learning and development, and social psychology of musical activity; previous musical performing experience helpful but not required. GE: Social Sciences. Same as MUS:2630.
## EDTL:2670 Peacebuilding, Singing, and Writing in a Prison Choir

Students sing with the Oakdale Community Choir inside the Iowa Medical and Classification Center as a service-learning component; students explore meanings of peacebuilding for themselves and community, and use their imaginations to consider new directions of peacebuilding through reading, reflecting, writing, inner peacebuilding, and communal peacebuilding projects; use of choral singing inside prisons to build peace, create positive social connections, transform attitudes toward healing approaches to justice, and inspire a sense of deep care within oneself and among others. GE: Diversity and Inclusion.

## EDTL:2821 Oral Interpretation

Weekly performances to develop and define communication skills for professional careers in teaching and business; poetry, prose, monologue, storytelling, duo interpretation, reader's theatre, and demonstration speeches. Same as COMM:2821.

## EDTL:2963 Monsters, Victims, and Villains: Changing Perceptions

Introduction to implementation of performance opportunities for special populations (defined as those with cognitive or physical disability) and underrepresented populations; students gain skills necessary to create radical opportunities for and implementation of performances including individuals with disabilities in theatre, dance, and music; students from different backgrounds experience collaborative artistic excellence while redefining audience expectations; historic background for perceptions of disability. GE: Diversity and Inclusion. Same as THTR:2605.
EDTL:3001 Introduction to Museum Studies 3 s.h. Overview of museum history, function, philosophy, collection, and curatorial practices; governance and funding issues; exhibition evaluation and audience studies; examples from Stanley Museum of Art, Museum of Natural History, Old Capitol Museum, and Medical Museum. GE: Social Sciences. Same as ANTH:3001, MUSM:3001, SIED:3001.

## EDTL:3002 Teaching and Learning Technologies <br> 2-3 s.h.

## EDTL:3059 Introduction to Education and the Regents

 Alternative Pathway to Iowa Licensure Program 4 s.h. Foundational knowledge and understanding of educational practices for teacher intern candidates in the Regents Alternative Pathway to Iowa Licensure (RAPIL) program; topics include students as learners, the instructional process, and assessment. Requirements: admission to the RAPIL program.
## EDTL:3060 Learning and Instruction for Today's

Classrooms 3 s.h.

First course in the Regents Alternative Pathway to Iowa Licensure program. Requirements: admission to the RAPIL program.

EDTL:3061 Assessment for Learning 3 s.h. Fourth course in the Regents Alternative Pathway to Iowa Licensure program. Requirements: admission to the RAPIL program.
EDTL:3062 Learning Communities
Fifth course in the Regents Alternative Pathway to Iowa Licensure program. Requirements: admission to the RAPIL program.

## EDTL:3063 Creating Classrooms Conducive to Teaching and Learning 3 s.h

 Third course in the Regents Alternative Pathway to Iowa Licensure program. Requirements: admission to the RAPIL program.EDTL:3064 Intern Seminar on Critical Issues in Education 3 s.h. Sixth course in the Regents Alternative Pathway to Iowa Licensure program. Requirements: admission to the RAPIL program.

## EDTL:3065 Methods in Teaching in the Secondary

 Classroom3 s.h.
Learn, identify, and implement effective content-specific secondary teaching methods with focus on active student engagement; students develop and enhance instructional planning/pedagogy with special emphasis on content-specific secondary teaching methods, including reading in content area; describe and implement process of pre-, formative, and summative assessment strategies, appropriately aligning them in the instructional design of secondary content lessons; taking specific steps toward improving professional dispositions.

## EDTL:3067 Regents Alternative Pathway to Iowa Licensure

 Clinical Field Experience IStudents co-teach under guidance of a cooperating teacher in a secondary classroom; active engagement in the classroom through whole and small group interactions; planning and teaching a series of lessons; reflection with a Regents Alternative Pathway to Iowa Licensure (RAPIL) evaluator. Corequisites: EDTL:3060.

## EDTL:3068 Regents Alternative Pathway to Iowa Licensure Clinical Field Experience II

Students co-teach under guidance of a cooperating teacher in a secondary classroom; active engagement in the classroom through whole and small group interactions; planning and teaching a series of lessons; reflection with a Regents Alternative Pathway to Iowa Licensure (RAPIL) evaluator. Corequisites: EDTL:3061.

## EDTL:3070 Regents Alternative Pathway to Iowa Licensure Elementary Practicum

Students co-teach under guidance of a cooperating teacher in an elementary classroom; active engagement in classroom through whole and small group interactions with students; planning and teaching at least two lessons; reflection with Regents Alternative Pathway to Iowa Licensure (RAPIL) evaluator; for RAPIL program candidates to complete a 40 -hour practicum to add K-8 licensure in art, physical education, music, or health to an already completed 5-12 endorsement in same content area.

## EDTL:3091 Secondary Education Program Orientation and Classroom Management <br> Overview including opportunities, policies and procedures,

 requirements and expectations, and services associated with the Teacher Education Program; characteristics of the classroom environment and their implications for organization and management; concepts and principles teachers can use when thinking about managerial tasks in the classroom; for prospective middle and secondary school teachers.EDTL:3095 Teaching Reading in Secondary Content Areas 1,3 s.h. Integration of reading strategies into secondary content areas for teacher candidates in secondary education.

## EDTL:3103 Assessment for Instructional Planning and

 PracticeFundamentals of using assessment data to make instructional planning decisions that preservice educators need in their advanced coursework and classrooms; practical application with curriculum-based procedures; emphasis on classroom-based procedures used to make educational decisions to plan instruction for students, particularly those who are experiencing academic difficulty. Requirements: admission to TEP.

## EDTL:3114 Parent-Child Relationships

Roles and relationships within and between families, culture, society; identify (family) resources and concerns based on children's development, abilities.

## EDTL:3115 Museum Education and Interpretation

Examination of the educational role of museums; educational theory, audience development, teaching strategies, accessibility, and evaluation within museum context; community-engaged project and collaboration with museum to develop curriculum and educational resources. Same as MUSM:3115.

## EDTL:3120 Methods and Materials: Music for the Classroom

## Teacher

Development of music skills, techniques, knowledge of methods and materials for teaching music to young children; for elementary education majors. Requirements: admission to TEP.
EDTL:3123 Reading and Responding to Children's Literature
Reading and teaching of children's literature; becoming more knowledgeable readers of children's literature; using children's literature in elementary classroom for aesthetic, personal, social, and critical purposes; wide range of literary texts in different genres and multiple ways readers might experience these texts given particular teaching approaches; ways in which readers interact with texts and with each other to make meaning as they read and discuss literature. Requirements: admission to elementary TEP.
EDTL:3127 Methods and Materials: Physical Education, Health, and Wellness

2-3 s.h.
Methods, curriculum. Requirements: admission to TEP.
EDTL:3128 Practicum in Physical Education 1 s.h.
Observation of elementary physical education teachers and classes; discussions and papers concerning these experiences; for students pursuing the K-8 Physical Education endorsement. Corequisites: EDTL:3127.

## EDTL:3130 Adaptive Physical Education for the Elementary

 Classroom TeacherCreate and deliver quality, inclusive physical education for students with mental, physical, or emotional disabilities; identify and evaluate the needs of disabled students, plan units and lessons with appropriate modifications for all learners, write an IEP, comply with IDEA in a physical education setting. Prerequisites: EDTL:3127.

## EDTL:3131 Movement Education

Movement education as a basis for psychomotor and cognitive development in children; summary of basic growth and motor development; in-depth instruction on theory and application of movement education curriculum, and practice on design and execution of movement education lessons.

## EDTL:3141 Elementary School Mathematics: Number and Operations

Problem-solving approach to current trends in math education and process of teaching math; current math content knowledge assessed at start and end of course; opportunities to strengthen number and operations content knowledge; how children in grades K-5 think about and learn math; core ideas of learning, teaching, planning, and assessing number and operations concepts and skills; research-based pedagogical strategies that help children develop math concepts and procedures. Requirements: admission to TEP.

3 s.h. EDTL:3142 Elementary School Mathematics: Geometry and Measurement 3 s.h.
Problem-solving approach to current trends in math education; current math content knowledge assessed at start and end of course; opportunities to strengthen geometry and measurement content knowledge; how children in grades K-5 think about and learn math; core ideas of learning, teaching, planning, and assessing geometry and measurement concepts and skills; research-based pedagogical strategies that help children in elementary school develop math concepts and procedures. Requirements: admission to TEP.

## EDTL:3143 Methods of Elementary Art and Field

Experiences 3 s.h.
Application of studio methods to teaching children in Saturday Children's Art Class Program. Same as ARTE:3143.

## EDTL:3146 Elementary School Mathematics: Data/Probability and Algebra <br> 3 s.h.

Problem-solving approach to current trends in math education and process of teaching math; current math content knowledge assessed at start and end of course; opportunities to strengthen data analysis/probability and algebra content knowledge; how grade K-5 children think about and learn math; core ideas of learning, teaching, planning, and assessing data/probability and algebra concepts and skills; research-based pedagogical strategies that help children develop math concepts and procedures. Requirements: admission to TEP.

EDTL:3160 Reading and Language Arts Methods for Primary Students in Grades K-3
Theoretical foundations and practical skills to become reflective professionals who can design and implement effective reading and language arts instruction; authentic formative assessment for economically, academically, culturally, racially, and linguistically diverse children in grades K-3; for preservice elementary teachers. Prerequisites: EDTL:3190 with a minimum grade of C- and EDTL:3002 with a minimum grade of C-. Requirements: admission to elementary TEP.

## EDTL:3161 Social Studies for the Elementary Classroom

 TeacherIndividual growth and change due to environment, economy, and technology; focus on developing teacher's understanding of social and behavioral sciences and how they relate to geography, history, and government in student's growth toward democratic citizenship; emphasis on need to develop intellectually stimulating curricula based on Iowa Core in behavioral science; lesson and curriculum development from research-based best practices in teaching social studies and driven by Iowa Core goals and objectives; technology as a teaching tool and focus of investigation in today's society. Prerequisites: EDTL:3002 with a minimum grade of C- and EDTL:3190 with a minimum grade of C-. Requirements: admission to elementary TEP.
EDTL:3163 Methods: Elementary School Mathematics 2-3 s.h. Content; techniques of teaching and means of assessment for K-6 mathematics. Prerequisites: EDTL:3190 with a minimum grade of C- and EDTL:3002 with a minimum grade of C- and (EDTL:3141 or MATH:1120). Corequisites: EDTL:3170 and EDTL:3174. Requirements: admission to TEP.
EDTL:3164 Reading and Language Arts Methods for Intermediate Students in Grades 3-6

3 s.h.
Theoretical foundations and practical skills to become reflective professionals who can design and implement effective reading and language arts instruction; authentic formative assessment for economically, academically, culturally, racially, and linguistically diverse children in grades 3-6; for preservice elementary teachers. Prerequisites: EDTL:3190 with a minimum grade of C- and EDTL:3002 with a minimum grade of C-. Requirements: admission to elementary TEP.

## EDTL:3165 Elementary Science Methods I

Meaningful and practical learning experiences to foster elementary science learning environments that engage learners in scientific practices and understanding of biological and chemical sciences; essential concepts; instruction to promote elementary student learning; learning, teaching, subject matter, curriculum, and assessment. Prerequisites: EDTL:3002 with a minimum grade of C - and EDTL:3190 with a minimum grade of C-.

## EDTL:3166 Elementary Science Methods II

Meaningful and practical learning experiences to foster elementary science learning environments that engage learners in scientific practices and understanding of physical and earth/space sciences; essential concepts; instruction to promote elementary student learning; learning, teaching, subject matter, curriculum, and assessment. Prerequisites: EDTL:3002 with a minimum grade of C- and EDTL:3190 with a minimum grade of C- and EDTL:3165.

## EDTL:3170 Elementary Classroom Management 1-3 s.h.

Activities, techniques, strategies, theories related to effective classroom management. Prerequisites: EDTL:3190 with a minimum grade of C- and EDTL:3002 with a minimum grade of C-. Corequisites: EDTL:3163 and EDTL:3174.

## EDTL:3172 Elementary Reading Practicum <br> 3-4 s.h.

Experience in teaching literacy to elementary students; opportunity to learn from an experienced teacher within a functioning classroom; supervisor with classroom experience mentors and supports students at practicum site; on-site practicum experiences preceded by on-campus seminar experience with practicum coordinator and supervisors; for preservice teachers. Prerequisites: EDTL:3002 with a minimum grade of C- and EDTL:3190 with a minimum grade of Cand EDTL:3160 and EDTL:3164. Corequisites: EDTL:4171.

## EDTL:3174 Elementary Math Practicum

Experience in teaching mathematics to elementary students; opportunity to learn from an experienced teacher within a functioning classroom; supervisor with classroom experience mentors and supports students at practicum site; on-site practicum experiences preceded by on-campus seminar experience with practicum coordinator and supervisors; for preservice teachers. Prerequisites: EDTL:3002 with a minimum grade of C- and EDTL:3190 with a minimum grade of C-. Corequisites: EDTL:3163 and EDTL:3170.

## EDTL:3180 Drama in the Classroom

3 s.h.
Theories of community, culture, identity in relation to language arts teaching and learning; emphasis on incorporating multiple literacies, both oral and print, into language arts curricula; action research involving oral literacy. Same as THTR:3610.
EDTL:3187 Early Literacy Instruction for Young Children $\mathbf{3}$ s.h. Service-learning involving lecture, class discussion, and student participation in an early literacy program for preschoolers; concepts and skills necessary to conduct story time groups with young children that target development of print knowledge; application of learning by reading to small groups of preschool children. Recommendations: CSD:3118. Same as CSD:3187.

## EDTL:3190 Orientation to Elementary Education 1-2 s.h.

Overview of elementary education expectations, including options for student teaching; classroom observation, lesson planning, performance indicators, InTASC standards, classroom management, information about mandatory child abuse reporting, blood-borne pathogens, professional ethics.

## EDTL:3204 Art Education Studio and Field Components 3 s.h.

 Art training related to processes of elementary and secondary school art teaching; studio methods applied to teaching children and adolescents. Requirements: concurrent enrollment in EDTL:3290 for Teacher Education Program student.EDTL:3205 Methods of Secondary Art and Field Experience 3 s.h. Art education theory and methods at secondary levels; art curriculum, unit, and lesson planning; evaluation, motivation, instructional materials; observational techniques.
EDTL:3290 Introduction and Practicum: Art 2-3 s.h. Practice of learning from an experienced art teacher in an art classroom and setting; observations in an art classroom side-by-side with experience and insight gained through participating and teaching in the Saturday Art Workshop Program. Requirements: admission to TEP.

## EDTL:3382 Language and Learning

2-3 s.h.
How language reflects and constructs learners' identities and cultures; readings related to oral and written language, native and second language development, linguistic diversity; discussion of the relationship of language theory to schools of language instruction. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. Same as ENGL:3190.
EDTL:3393 Reading and Teaching Adolescent Literature 3 s.h. Reading and evaluation of literature suitable for junior and senior high school students. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. Same as ENGL:3191.
EDTL:3492 Teaching Spanish Heritage Speakers 3 s.h.
Focus on cutting-edge research and methods to develop suitable language curriculum for Spanish heritage speakers (SHS); topics include bilingual development, sociolinguistics, language teaching, and heritage speakers' affective needs; use of these theories to help understand and apply best practices in teaching SHS; topics also help create best practices in teaching mixed language courses for second language and heritage students. Taught in Spanish. Requirements: at least one course taught in Spanish at the 2000 level or above. Same as SPAN:3192.
EDTL:3532 Introduction and Practicum: Mathematics 3 s.h. Experience designing and teaching lessons with varied instructional intent and use of multiple instructional strategies; study and practice methods of managing classroom learning environment; significant time spent in cooperating schools, on-campus meetings. Requirements: admission to TEP.
EDTL:3534 Methods: Middle School Mathematics 3 s.h.
Subject matter content, teaching and assessment techniques for grades 5-9 math; how students learn mathematics; mathematics curricular planning for all students.
EDTL:3605 Instrumental Techniques 2 s.h.
Same as MUS:3605.
EDTL:3610 Introduction and Practicum: Music 2 s.h.
Experience observing and assisting music teachers and students in elementary or secondary schools; at least one hour per week in the school plus on-campus class meetings. Requirements: admission to TEP.

EDTL:3620 Methods and Materials: General Music 3 s.h. Methods for teaching general music in elementary and secondary schools. Prerequisites: EDTL:3610.
EDTL:3635 Instrumental Conducting 3 s.h.
Advanced skills for instrumental conducting, score analysis, rehearsal techniques, literature selection. Prerequisites: MUS:3625. Same as MUS:3635.
EDTL:3640 Choral Methods
3 s.h.
Organization, implementation of effective choral music programs for all ages. Prerequisites: EDTL:3610. Same as MUS:3640.

EDTL:3645 Choral Conducting and Literature 3 s.h.
Advanced skills appropriate to choral conducting, analysis, literature selection studied and implemented to develop a secure approach to choral art; students preparing to teach in the elementary or secondary schools must register under EDTL:3645. Prerequisites: MUS:3625. Same as MUS:3645.

## EDTL:3650 Instrumental Methods and Materials

Elementary and secondary instrumental music methods course required for K-12 music teacher certification. Prerequisites: EDTL:3610. Same as MUS:3650.
EDTL:3715 Experiential Teaching and Learning 3 s.h. Introduction to practice of experiential learning and teaching; students create and lead experiential activities in formal and informal learning environments; exploration of factors that impact the value of an experience and assess impact; integration of multiple disciplines and perspectives in a collaborative manner; skills for processing and guiding reflection to determine outcomes of experiences; work collaboratively to design, plan, execute, and determine outcomes of an experience for a target population.
EDTL:3905 Teaching Deaf and Hard of Hearing Students 3-4 s.h. Issues in d/Deaf education; management techniques, communication strategies, teaching strategies, instructional materials, hands-on activities, assessments, parent involvement; use of technology, ethnic and cultural diversity, classroom management, pre-reading techniques, literacy development, educational program options. Taught in English and/or American Sign Language. Requirements: for 4 s.h. optionconcurrent enrollment in ASL:2002, if not taken as a prerequisite. Same as ASLE:3905.

## EDTL:3915 Introduction: Strategist I (Elementary)

1-2 s.h.
Teaching students with mild disabilities in elementary
resource placements; current trends and issues, basic and theoretical approaches, implications of federal and state statutes, multidisciplinary team approaches to providing appropriate educational programming; students complete a practicum with an elementary special education teacher. Requirements: admission to TEP.

## EDTL:4021 Science for High Ability Students

Unique challenges and opportunities confronted by teachers of students with above average ability and interest in science; theory and practice; development of program outlines for science programs.
EDTL:4022 Math Programming for High Ability Students 1 s.h. Unique challenges and opportunities confronted by teachers of highability students; theory and practice, development of program outlines for implementation. Same as PSQF:4122.
EDTL:4023 Twice-Exceptionality Support Seminar 1 s.h. Areas and issues that typically impact students diagnosed as twiceexceptional in college (specifically autism spectrum disorder); focus on navigating campus and services, communication skills (social and academic based), stress management, executive functioning skills, career and job seeking skills. Same as BBC:4023.

## EDTL:4024 Differentiating Projects with Technology 1 s.h.

Use of digital tools to enrich student presentations; PowerPoint slide shows, presentations uploaded to World Wide Web, interactive multimedia presentations via HyperStudio.
EDTL:4025 Differentiated Instruction for the Gifted 1 s.h.
Program options for K-12 gifted students; student abilities and needs linked with various curriculums; case studies, school materials.

## EDTL:4026 Reading for High-Ability Students

Purposes and methods of reading instruction, with focus on developmentally appropriate needs of high-ability readers; genres of literature, enriched and accelerated reading curricula, role of reading in social and emotional development of gifted students.

EDTL:4029 Developing Leadership Skills for Gifted and Talented Students, K-12

1 s.h.
EDTL:4032 Middle School Curriculum, Methods, and Practicum

3 s.h.
Junior high and middle school development compared; characteristics of exemplary programs, disciplinary and interdisciplinary trends; variety of teaching methods (group and individual); hands-on activities. Requirements: admission to TEP.
EDTL:4065 Social Studies for High-Ability Learners 1-2 s.h. Intersection of unique challenges presented by talented students and challenges of designing, implementing, and assessing quality inquirybased social studies instruction; background in social studies or social studies education not required.
EDTL:4066 Curriculum Concepts in Gifted Education 3 s.h. Analyzing and refining understanding of curriculum in context of: needs of gifted and talented students, rationale for and implementation of curriculum differentiation, and curriculum principles for and applications to gifted and talented; designed for preservice and inservice educators, as well as those interested in curriculum development, design, and delivery.
EDTL:4067 Conceptions of Talent Development 3 s.h.
Students review conceptions of talent development and explore possibilities for appropriate programming in specific fields across various stages in life; traditional opportunities in gifted education programs; stages of development in early childhood; development of knowledge and skills in addition to and beyond organized educational programs. Same as BBC:4067.
EDTL:4072 Thinking Skills 1 s.h.
Factors involved in teaching thinking skills as a total concept; the relationship of critical and creative thinking; review of published programs.

## EDTL:4073 Programming/Curriculum for High Ability

## Students

1 s.h.
Programming and curriculum for K-12 students identified as gifted or highly able; in-class differentiations, special projects for pullout programs, facilitating research projects, mentoring in advanced programming.
EDTL:4074 Differentiation at the Secondary Level 1 s.h. Importance of differentiation for gifted learners in middle school and high school; differentiation through advanced placement programs as well as broader perspectives on differentiation; essentials for differentiation understood and applied to a lesson that will be implemented with students.
EDTL:4075 Topics in Talented and Gifted Programming arr.
Examination of various topics that allow educators to implement strategies for helping high-potential students succeed in gifted/talented programs.

## EDTL:4083 Talented and Gifted Enhanced Field

 Experience1-3 s.h.
Experience working with and/or observing gifted students;
development of curricular materials; course is not the required practicum experience for talented and gifted (TAG) endorsement, but counts toward required total hours and provides a valuable learning opportunity to consider best practices for the age level students will be teaching.

## EDTL:4085 Current Readings and Research in Gifted

 Education1 s.h.
1 s.h. Research in the field of gifted education and talent development; applications of research to ensure best practices in providing services and programs for high-ability learners.

EDTL:4087 Seminar: Curriculum and Student Teaching 1-3 s.h. Discussions, role-playing, group and individual reports, analysis of critical incidents, classroom management, videotapes of student classroom performance pertinent to participants' student teaching experiences. Requirements: student teaching.

## EDTL:4089 Special Subject Area Student Teaching

Supervised teaching experience in a single subject in grades 1-6.

## EDTL:4091 Observation and Laboratory Practice in the

 Secondary SchoolStudent teaching experience in performing the duties of regular classroom teachers under supervision of experienced personnel in secondary schools.

## EDTL:4092 Observation and Laboratory Practice in the

 Secondary SchoolContinuation of EDTL:4091.
EDTL:4093 Teaching and Learning for a Global Perspective 3 s.h. Examination of conceptualizations and themes, along with theories, strategies, and resources that can inform teaching and learning for global competence education in all disciplines; teaching for prejudice reduction and education for informed and responsible global citizenship; creation of a standards-based curriculum project; designed for practicing teachers.

## EDTL:4096 Topics in Teaching and Learning

arr.
EDTL:4098 Costa Rica YOULEAD: Youth Outdoor University for Leadership, Environment, Self-Awareness Development 3 s.h. Project YOULEAD is a two-week intensive language and culture studies program in Costa Rica. Students are assigned to one of three sites in Costa Rica: Uvita, Cortes, or Puerto Jimenez. Students teach English to 20 students, ages 14-18, at the assigned site for the duration of the program, ending in a whole group day where all sites come together for a day of learning. Students are supported by two faculty/ staff at each site. Opportunities exist both inside and outside the classroom to engage in learning about Costa Rica's culture, history, and natural ecosystems. Group meetings occur daily after site visits to discuss, debrief, reflect, and plan for the next day.
EDTL:4137 Introduction to Educating Gifted Students 3 s.h.
Fundamental issues such as curriculum, counseling, family issues, gender and minority issues. Same as CSED:4137.
EDTL:4153 Gifted and General Education Collaboration 1 s.h.
Need for differentiated learning experiences throughout the school day for gifted students; how classroom teachers and gifted/talented resource teacher collaborate to provide appropriate instructional services to gifted students; collaborative models, planning process, and recommendations for both direct and indirect services.
Requirements: internet access.

## EDTL:4171 Diversity and Exceptionalities in Literacy Instruction

Elaborates on content from EDTL:3160 and EDTL:3164; issues in theoretically sound reading and writing assessment, instruction in K-8 classrooms where local, state, and national goals play increasing roles; reading and writing processes; teaching and learning of reading and writing; focus on role of language and conversation in learning, content area reading instructional strategies, classroom-based reading and writing assessment, special issues in teaching, and learning with textbooks. Prerequisites: EDTL:3190 with a minimum grade of Cand EDTL:3002 with a minimum grade of C- and EDTL:3160 and EDTL:3164.

EDTL:4187 Effective Teaching Strategies for the Elementary Teacher: Student Teaching Seminar
Provides student teachers with a structured, consistent forum to critically examine and engage in professional dialogue related to the process of becoming a teacher; draws on personal classroom experiences as well as theories and ideas about education studied throughout the teacher education program; guided by the InTASC Model Core Teaching Standards and the Iowa Teaching Standards, students study and discuss principles of effective teaching practice that lead to improved student achievement; as students work through components of planning, instruction, assessment, and lesson reflection, they complete a Teacher Performance Assessment (edTPA). Requirements: elementary education major in student teaching semester.
arr. EDTL:4188 Practicum in Teaching and Curriculum Development in Gifted Education

1-6 s.h.
Experience in developing course materials for classes offered through the Belin-Blank Center for Gifted Education. Same as CSED:4188.

## EDTL:4189 Practicum in Gifted/Talented Education 1 s.h

Experience developing course materials for classes offered through the Belin-Blank Center for Gifted Education.

EDTL:4190 Supervised Teaching in the Elementary School: Interactive Phase
arr.
Student teaching at the elementary level (K-9). Corequisites:
EDTL:4091. Requirements: application to the Office of Teacher Education and Student Services.

EDTL:4191 Supervised Teaching in the Elementary School: Preand Post-Active Phase arr Corequisites: EDTL:4190. Requirements: application to the Office of Teacher Education and Student Services.

EDTL:4192 Special Area Student Teaching arr.
Supervised teaching and observation in specific areas of elementary curriculum

EDTL:4193 Independent Study
arr.
Requirements: senior standing.
EDTL:4199 Program Models in Gifted Education 3 s.h.
Development and refinement of preservice and inservice educators' understanding of academic programs; needs of gifted and talented students, including diverse and often underrepresented groups of students; rationale for and implementation of a comprehensive program model for gifted students. Requirements: internet access.
EDTL:4314 Introduction and Practicum: Secondary English 3 s.h. Experience observing and assisting English or speech teachers and students in secondary schools; 12 hours per week in the school plus on-campus class meetings.
EDTL:4315 Learning to Teach Secondary English/Language Arts and Field Experience 3 s.h.
Organizational techniques, methods, materials for teaching high school English; experience in simulated teaching situations during laboratory sessions, integrated with lectures and discussions.
Prerequisites: EDTL:4314. Same as ENGL:4810.
EDTL:4355 Approaches to Teaching Writing 3 s.h.
Theories, practices, strategies, and history of writing and teaching writing. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative. Same as CNW:4355.

## EDTL:4392 Voice, Drama, and Debate in the Secondary

 SchoolsIntroduction to elements of classical and contemporary rhetoric, the art of debate, oral interpretation and public speaking, dramatic methods in the classroom, and theater management; important issues and vocabulary of drama and debate including literary, theatrical, pedagogical, and sociohistorical concepts and terms; importance of classical rhetorical strategies and their relevance in the political realm; students work through drama, the creative process of playwriting, acting, designing, and staging a play.

## EDTL:4393 Critical Media Studies and Production in Secondary Schools

Introduction to teaching media in secondary schools; preparation to teach critical media literacy, media law and ethics, forms of journalism writing, and production process; emphasis on essential role of media in a democratic society; exploration of instructional strategies and organization practices to guide secondary students to think critically as media consumers and producers; students write and produce their own texts and experience processes to strengthen understanding of learning standards for secondary media studentscommunication, collaboration, creativity, and critical thinking.
EDTL:4394 Secondary Reading Instruction 2-3 s.h.
Methods and materials used in teaching developmental reading in all junior and senior high school content areas. Prerequisites: EDTL:4314.

## EDTL:4406 World Language Practicum I

Skill development for teaching languages in the early grades; curriculum design, test creation, microteaching with inservice teachers. Prerequisites: EDTL:4410. Corequisites: EDTL:4416.
EDTL:4407 World Language Practicum II 3 s.h.
Practice in lesson design, classroom management techniques, evaluation skills during work with inservice foreign language teachers. Prerequisites: EDTL:4410. Corequisites: EDTL:4417.
EDTL:4410 Language, Power, and Multilingual Education 3 s.h.
Language learning and teaching in multicultural classroom with focus on pedagogy, policy, and equality for multilingual learners. Requirements: admission to TEP.
EDTL:4416 Learning to Teach Second Languages I
3 s.h.
Approaches, methods, and techniques of teaching the modalities of listening, speaking, reading, and writing in a second language. Corequisites: EDTL:4406.
EDTL:4417 Learning to Teach Second Languages II
Curriculum design, classroom management, student evaluation,
Curriculum design, classroom management, student evaluation, technology, using context to teach culture in second languages.
Prerequisites: EDTL:4410 or EDTL:6483. Corequisites: EDTL:4407.

## EDTL:4418 ESL Practicum I

4 s.h.
Skill development for teaching English as a second language; curriculum design, test creation, microteaching with inservice teachers.

EDTL:4467 Methods: ESL and Bilingual Education 4 s.h. Exploration of approaches, methods, and practices in teaching English to speakers of other languages in K-12 school settings; communicative and content-based approaches to language learning with practical application of theory and research; issues concerning linguistically diverse learners covered with pedagogical implications; skills in teaching approaches for English language learners; lesson and unit planning, materials evaluation and adaptation, and assessment for placement, diagnosis, exit, and evaluation of English language learners.

EDTL:4498 Language Structure for Teaching English Language Learners

4 s.h.
Exploration of theory, rules, and examples to gain practical understanding of the system of language structure; focus on working with English language learners from a variety of first language backgrounds in educational settings; principles of discourse, phonology, morphology, syntax, pragmatics, and semantics that build a framework for discussion of applications and analysis of student and teacher language; address English language learners' development in P-12 settings; strategies to evaluate learner language; increase awareness of language challenges for English language learners that can occur in spoken and written educational instruction and materials. Requirements: admission to TEP.

EDTL:4535 Methods: High School Mathematics 3 s.h.
Subject matter content, teaching and assessment techniques for grades 9-12 math; how students learn mathematics; mathematics curricular planning for all students. Prerequisites: EDTL:3534.

## EDTL:4565 Mathematics in Management and Social

## Sciences

3 s.h.
Various real life applications of modern mathematics including management, decision-making, issue of optimization, methods for optimal scheduling, voting methods, game theory, error checking, and other related strategies.
EDTL:4630 Psychology of Music 2-3 s.h.
Cognition of music, affective response, aesthetic response, musical
3 s.h. ability. Same as MUS:4630.
EDTL:4640 Introduction to Music Research 2-3 s.h.
Preparation for conducting research on music behavior.
EDTL:4750 Assessment in Science, Technology, Engineering, and Mathematics (STEM)

2 s.h.
Assessment used to evaluate teaching and learning in K-12 mathematics and science; formative and summative assessments; constructing assessment; methods to assess student knowledge in a classroom setting; culturally responsive assessment.
EDTL:4751 Learning in the Science, Technology, Engineering, and Mathematics (STEM) Classroom 2 s.h
Meaningful learning experiences in preparation to create effective science learning environments for secondary school age students and construct a vision as teachers of secondary science; opportunities to delve into contemporary learning theories and examine ways that learning theories explain the learning process as negotiated within a classroom.
EDTL:4752 Secondary Science Methods II with Field Experience
Developing, writing, and orally defending a robust researchbased framework for teaching science that includes student goals, student actions, content, materials, activities, teaching behaviors and strategies, contemporary learning theories, self-evaluation. Prerequisites: EDTL:4751.
EDTL:4753 Secondary Science Methods III with Field Experience
Articulating, experiencing, practicing a research-based framework for teaching science in the real world of students, schools, teaching. Prerequisites: EDTL:4752. Corequisites: EDTL:4779.

## EDTL:4768 Computer Science Methods <br> 3 s.h.

Introduction to issues and ideas related to instruction of computer science courses; how to integrate computer science learning into other content areas or content learning into computer science courses in meaningful ways; meets all requirements the Iowa Board of Educational Examiners have set forth for computer science methods courses including curriculum development, project-based methodologies, communication about computing, and digital citizenship.

## EDTL:4779 Secondary School Science Practicum <br> arr.

Supervised teaching experience in a single subject; secondary school setting.

## EDTL:4811 Introduction and Practicum: Secondary Social Studies

3 s.h.
Experience observing and assisting social studies teachers and students in secondary schools; nine hours per week in the school plus on-campus class meetings. Requirements: admission to TEP.

## EDTL:4870 Methods: Secondary Social Studies

Analysis of the teaching-learning process; organization of social studies content for teaching purposes; evaluation of learning procedures and new strategies; practicum work includes microteaching, computer-assisted modules, lesson plan development, writing test items.

EDTL:4900 Foundations of Special Education 3 s.h.
Students with disabilities, gifted and talented; strategies for effective treatment, collaboration between regular and special education teachers; remediation of academic, behavioral, social problems. GE: Diversity and Inclusion.
EDTL:4922 Supervised Teaching: Elementary Strategist I 6 s.h. Student teaching at the elementary level in a program for students with mild to moderate disabilities. Requirements: elementary education major.

## EDTL:4934 Parent-Teacher Communication <br> 1-3 s.h.

Realities of working with parents; interpersonal skills; options for parent support services. Same as PSQF:4134.

EDTL:4936 Home/School/Community Partnerships 3 s.h.
Issues related to collaboration among families, educators, community members in implementing school programs. Same as PSQF:4136.

## EDTL:4940 Characteristics of Disabilities

3 s.h.
Etiologies of mild/moderate disabilities; current educational trends; educational alternatives; importance of multidisciplinary team; psychological and social-emotional characteristics of individuals.
EDTL:4950 Behavioral and Social Interventions
3 s.h.
Individual behavioral management, behavioral change strategies, and social interaction strategies, methods, and techniques for individuals with exceptional learning needs.
EDTL:4967 Integrated Disability Studies Practicum 2 s.h. Hands-on, interactive experience to learn what is involved in working with young adult students with multiple learning and cognitive disabilities; four whole-group classroom sessions and required attendance at one UI REACH course.

## EDTL:4975 Explicit Instruction <br> 3 s.h.

Empirically supported methods for teaching reading and mathematics K-12 to students with mild-moderate disabilities; assessment and curricular adaptations to individual needs.
EDTL:4980 Special Education Literacy 3 s.h.
Curriculum and materials to teach reading explicitly; making instructional decisions about student progress, evidence-based practices, and strategies to teach reading to students with disabilities; pedagogical principles and practices to instruct a whole class, small group, or individuals; focus on essential knowledge and skills associated with assessment, instruction, intervention, and assistive technology for students with and at risk for disabilities in grades K-8; designing lesson plans that incorporate reading strategies, practices, and assistive technology within reading instruction.

EDTL:4984 Academic Skills for Students with Special Needs 3 s.h. Introduction to appropriate methodology for teaching academic skills to students with significant learning difficulties; how to teach students effectively regardless of the label that might be applied to them or the setting to which they might be assigned; effective application of classroom-based measurement, curriculum development, and instructional strategies for teaching academic skills to education students with special needs.

EDTL:4987 Introduction to Assistive Technology 3 s
How assistive technology can be used for attainment of goals in education or work. Same as CSED:4187.

EDTL:4990 Interdisciplinary Issues in Disabilities 1-3 s.h.
Critical issues related to interdisciplinary delivery of services to persons with developmental disabilities; observation and participation in staffing and consultation; opportunity for related community experiences.

## EDTL:5055 Academic Writing Workshop 3 s.h.

Drafting and workshopping academic papers including dissertations, proposals, manuscripts, conferences, and courses; discussions center on cross-disciplinary perspectives about academic writing processes and discourses; rhetorical considerations in academic writing; audience and readership within and across disciplines; clear and effective communication of data; writing choices, styles, and tones; students set writing goals and projects.

## EDTL:5080 Workshop: Teacher Training for Advanced

 Placement Courses 1-2 s.h.Focus on a particular academic content area. Same as BBC:5080.
EDTL:5081 Facilitating Student-Centered Discussions 3 s.h.
Support for educators who want to create classroom environments that prioritize student voice and democratic exchange of ideas; theoretical approaches to classroom discourse and dialogic teaching; how linguistic and racial power inform and constrain discussion; students analyze their current classroom discourse practices through theoretical lenses, including how teachers and students are informed by historically dominant discourse norms and ways that discussion topics and issues are labeled as controversial.

## EDTL:5083 Diagnostic Reading Instruction <br> 3 s.h.

Examination of research, policies, and practices related to reading assessments and intervention for school-aged children and adolescents; key focus on translating theoretical foundations of reading into practice of designing targeted interventions for students with varying strengths and weaknesses in core reading components; activities provide an understanding of underlying principles of diagnostic reading instruction and field-based practice in administering, scoring, and interpreting reading assessments; making data-based decisions about instruction for individual and small groups of students. Requirements: admission to MA in teaching, leadership, and cultural competency program.

EDTL:5085 Generation Innovation: Technology Integration in 21st-Century K-12 Schools 3 s.h Exploration of the technology that shapes 21st-century U.S. schools, curriculum, and teacher professional development; examination of ways in which technology integration and use shapes student learning and identity development. Requirements: admission to MA program in teaching, leadership, and cultural competency.

EDTL:5087 Anti-Oppressive Literature Instruction
Support for K-12 teachers in selecting, analyzing, and planning discussions about literary texts in support of anti-racist and antioppressive teaching and learning; educators and scholars committed to critical pedagogy and anti-racist and anti-oppressive education argue that reading and analyzing texts by and about people of color and historically marginalized groups is an essential part of equitable, democratic education; how education is never neutral; choosing an explicit anti-oppressive stance; recognizing literature's role in promoting equity and analyzing oppressive forces in education.

## EDTL:5090 Diversity and Identity in K-12 Schools

3 s.h.
Advanced seminar on diversity- and identity-related issues in K-12 education for practicing teachers and K-12 professionals; students engage in regular self-evaluation of practices and develop deeper understanding of racism, sexism, classism, and other forms of oppression as they relate to the practices of K-12 teachers and schools; curricular and pedagogical decision-making, relative to impact on student identity. Requirements: admission to master's in teaching, leadership, and cultural competency program.

## EDTL:5091 LGBTQ Topics in Education

3 s.h.
In spite of many challenges that lesbian, gay, bisexual, transgender, and queer-identified youth experience in U.S. K-12 schools, queer youth demonstrate agency and action as they create positive spaces and community for their identities; examination of the intersection of policy and practice with respect to queer identities at all levels of K-12 education; history of queerness in the U.S. with focus on the creation of the concept of compulsory heterosexuality and the manner in which this concept is reinforced in K-12 schools.

## EDTL:5095 Issues in U.S. Schools

3 s.h.
Addresses critical questions facing American public schools, including governance, policy structures, and practices that have influenced teachers' professional instruction and students' school learning experiences. Requirements: admission to the MA in teaching, leadership, and cultural competency program.
EDTL:5099 Conducting School-Based Action Research 3 s.h. Focus on teachers or administrators as change agents and researchers in schools/districts; scholarly approach to improving teaching and learning by way of an action research project. Requirements: completion of all MA in teaching, leadership, and cultural competency coursework.
EDTL:5104 Language Disorders in School-Aged Children 3 s.h. Emphasis on elementary grades; usually taken in conjunction with EDTL:4192, which provides approximately 70 hours of supervised clinical practice in elementary schools. Recommendations: primarily for communication sciences and disorders majors. Same as CSD:5104.

## EDTL:5222 Creativity, Imagination, Play, and Human

 Development Through the Arts3 s.h.
Theories related to human development and visual arts; use of visual arts to make meaning from experience; ways to integrate visual arts into everyday life; cognitive and physical processes involved in making, understanding, and looking at visual art through studio experiences; theories of cognitive development; role of visual art in education; introduction to art production, history, criticism, and aesthetics.
EDTL:5600 Graduate Music Education Workshop For inservice music teachers; topics vary. Same as MUS:5600.
EDTL:5601 Graduate Music Education Workshop II 1 s.h. Varied topics; for inservice music teachers. Same as MUS:5601.
EDTL:5610 Foundations of Music Education Curricula 3 s.h. Curriculum development, instructional materials, analysis of current teaching methods and techniques in school music programs; historical foundations of music education.

3 s.h. EDTL:5961 Foundation of Applied Behavior Analysis
Foundational knowledge in basic principles and philosophical assumptions of behavior analysis, behavioral terminologies, verbal operants, and measurement concepts; explicitly links theory of behavior to practical application (e.g., special education); one of seven courses needed to qualify for the Board Certified Behavior Analyst (BCBA) exam. Corequisites: EDTL:7953.
EDTL:5962 Function of Behaviors and Interventions 4 s.h.
Functional assessment/analysis and interventions designed to change behaviors; describing and implementing components of functional behavioral assessment; using results of a functional assessment to develop a program to teach appropriate behavior and/or decrease inappropriate behaviors; development of an instructional program to teach desired behaviors; third in a four-course sequence to prepare Chinese-speaking students to sit for the Board Certified Assistant Behavior Analyst ( BCaBA ) certification exam sponsored by the Behavior Analyst Certification Board (BACB). Prerequisites: EDTL:5961 and EDTL:7953.

## EDTL:5963 Ethics and Professional Conduct for Behavior

 Analysts and Psychologists 3 s.h.Issues related to ethical and professional conduct of behavior analysts and school psychologists; content aligned with BACB Professional Disciplinary and Ethical Standards and Guidelines for Responsible Conduct for Behavior Analysts, NASP principles of professional ethics, and APA ethical principles; ethical conduct considerations for professionals conducting research or providing services to vulnerable populations; one of seven courses meeting academic requirements for board certification as a behavior analyst; ethical practices relate to working with individuals with autism spectrum disorders, developmental disabilities, and behavioral/emotional disorders.
EDTL:5964 Behavior Analyst Practicum
1-4 s.h.
Development, implementation, and evaluation of techniques that produce behavior changes in clients; discussion of key issues related to techniques of applied behavior analysis; review of various theoretical, conceptual, historical, legal, and practical aspects of behavior analysis; provides a portion of the supervisory component as required by the Behavior Analyst Certification Board (BACB).
EDTL:5966 Advanced Topics in Applied Behavior Analysis 3 s.h. Behavior-change considerations, behavior-change systems, intervention, and issues related to implementation, management, and supervision; devotes specific attention to interventions commonly applied to individuals with developmental disabilities.

## EDTL:6015 PhD Seminar: Literacy, Culture, and Language Education

Exploration of theoretical and epistemological foundations in literacy, culture, and language education; exposure to diverse disciplinary and interdisciplinary foundations that inform literacy education, cultural studies, multilingual education, and social studies education; goal is for students to identify a disciplinary and interdisciplinary focus that will inform their research.
EDTL:6164 Early Literacy Development and Instruction 2-3 s.h. Understanding of early reading and writing experiences; relationship of reading to other communication areas; knowledge of instructional approaches, techniques, materials, assessment procedures; interrelationship of home and school experiences; identification of current and crucial issues and relevant research.

## EDTL:6165 Reading and Writing Across Intermediate Grades

Issues in teaching, learning, and assessment of students grades 4-9; fostering positive literate identities, literacy engagement, strategies for reading, writing, and critically responding to texts in a range of genres and formats and across content areas.

## EDTL:6167 Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms 3 s.h

Theoretical and practical organization of developmentally appropriate curricula and teaching methods to promote learning.
EDTL:6171 Advanced Reading Clinic Techniques 2-3 s.h. Instructional procedures for children and early adolescents with severe learning problems in reading; causes of reading disorders; educational prognosis for severely disabled readers. Corequisites: EDTL:6172.
EDTL:6172 Advanced Reading Clinic Practicum 2-3 s.h. Practice in selecting and using instructional procedures that address the needs and interests of struggling literacy learners, with emphasis on teaching to students' strengths; how to fit clinical teaching techniques into an overall literacy instructional program. Corequisites: EDTL:6171.

EDTL:6267 Seminar: Current Issues in Art Education 3-4 s.h. Analysis of literature in art education and related disciplines. Same as ARTE:6267.

## EDTL:6293 Individual Instruction

## EDTL:6315 MA Seminar: English Education

 arr.Significant developments in English education; primary and collateral readings. Same as ENGL:6315.

## EDTL:6393 Master's Thesis

EDTL:6400 Fundamentals of Second Language Assessment 3 s.h. How to write language tests; discussion of fundamental issues in development of new tests or selection of existing tests. Same as SLA:6503.

EDTL:6402 Second Language Program Management 3 s.h. Preparation for supervising, administering foreign language programs at all levels; for precollegiate language teachers and graduate students. Same as SLA:6504.

## EDTL:6403 Language Policy and Planning 3 s.h.

Theoretical foundations, research methods, and findings in language policy and planning research; consideration of local, national, and international language policies; multiple disciplinary perspectives on language policy including linguistics, political science, law, and sociology.

## EDTL:6409 Cultural Curriculum

3 s.h.
Culture's role in foreign/second language teaching; definition, pedagogy, assessment, and materials that allow culture to be taught and learned. Same as SLA:6970.
EDTL:6480 Graduate Seminar in Multilingual Education 3 s.h. Theoretical perspectives of pivotal research issues at the forefront of foreign language education; systems available to foreign language professionals for disseminating research. Same as SLA:6500.
EDTL:6483 Multilingual Education and Applied Linguistics 3 s.h. Introduction to research in language teaching and learning, drawing on theories and research in applied linguistics, sociolinguistics, anthropology, and psychology; students gain understanding of fundamentals in second language acquisition, educational linguistics, applied linguistics, and methods used in teaching and learning second/foreign languages; applications and implications of research considered when reviewing multilingual education policy and practice. Same as ASIA:6483, SLA:6506.

EDTL:6484 Bi/Multilingual Literacies 3 s.h. Critical sociocultural perspectives on literacy, including dynamic literacies people practice to read the word and the world; examination of theoretical, practical, and empirical research that discusses the political, ideological, cultural, and historical nature of bi/multilingual literacy learning. Same as SLA:6501.

## EDTL:6497 Principles of Course Design for Second Language Instruction 3 s.h.

 Contemporary views of second language curriculum design; guidelines necessary for the creation of prototypical curriculum units to be transposed into classroom-ready forms; for individuals interested in foreign language materials development. Same as SLA:6502.EDTL:6536 Teaching of Geometry 2-3 s.h. Current developments in teaching middle school/junior high and high school geometry; selection, organization of content; research on teaching and learning.

EDTL:6563 STEM Through Mathematical Modeling 3 s.h. Prepares potential STEM teachers or in-service teachers who want to develop integrated STEM learning environments to learn mathematical modeling as an interdisciplinary instructional approach; mathematical modeling practice to learn and teach mathematics, science, engineering, and technology focused on students' understanding of new concepts from an individual knowledge basis; engagement in problem-based learning where individuals develop conjectures, critique arguments, and revise ideas to reach conclusions; students will understand how people learn new concepts and how teachers should provide adequate learning environments for students to learn and understand the core concepts of STEM.

## EDTL:6570 Foundation of School STEM Curriculum 3 s.h

 Elementary and secondary background developments in school and science, technology, engineering, and mathematics (STEM) curriculum; definitions, historical perspectives, reform, theories of knowledge, implementation, evaluation, international perspectives, issues in STEM curriculum.EDTL:6600 Individual Projects in Music Education 1-2 s.h.
Projects of special concern to individual music teachers in public schools.
EDTL:6757 Learning in the Science Classroom 2-3 s.h.
Assumptions about learning and about learning theories and their impact on pedagogical actions; how some concepts are planned and implemented.

## EDTL:6758 Writing in the Science Classroom

Literacy in the science classroom; theoretical and pedagogical perspectives; practical classroom activities that lead to effective writing and increased learning.
EDTL:6759 Advanced Pedagogy
3 s.h.
Theoretical and practical perspectives on pedagogy; how to assess practice, provide feedback, and build learning pathways for teachers.
EDTL:6761 STEM Research and Leadership Seminar 3 s.h.
Broad overview of research supporting new and innovative teaching practices in STEM disciplines and integrated STEM learning; focus on relevant journals related to STEM learning and teaching; students will summarize, critique, and discuss a variety of research perspectives and articles and describe how the information relates to their current teaching; students explore ways to improve their STEM pedagogical and instructional practices and methods for assessing critical student outcomes; students develop awareness of research that provides a foundation for effective STEM teaching and learning and strategies for implementing research supported practices in STEM learning contexts of all types.

## EDTL:6762 STEM Experiential Learning

Overview of research supporting new and innovative teaching practices in STEM disciplines and integrated STEM learning; focus on problem-based and experiential learning curriculum, instruction, and assessment by engaging in authentic experiences and reflecting on how these influence practice and student learning; facilitates ability to solve real world STEM problems of interest to students and community through engagement with community partners; assists students to acquire and demonstrate 21 st-century competencies the STEM workplace identifies as critical; provides authentic, meaningful, and cross-curricular experience in facilitating student engagement in real-world situations.

## EDTL:6764 STEM Extracurricular Experience and Capstone

6 s.h.
Engages teachers in STEM experience outside the traditional classroom; provides 90-hour STEM inclusive experience coupled with a capstone project; engagement with STEM community leaders, business partners, or outreach leaders to develop a plan for participation in and investigation of a STEM related experience; may work with a STEM extracurricular activity in a school or university, a STEM related business or industry partner, or a STEM related grant funded project through a university; course completion is accomplished through a capstone sharing of their experience, how the experience has solidified their understanding of STEM, and how the experience will impact their classroom activities.

EDTL:6765 STEM Independent Research 3 s.h.
Opportunity to develop an independent research project and explore a STEM education question of personal interest; students design and carry out research in an authentic STEM learning environment, collect and analyze data, develop claims and conclusions based on their research, present findings, and develop a plan for utilizing findings to improve STEM education learning environments. Prerequisites: EDTL:6761.
EDTL:6766 Physical Science Topics in STEM Education 3 s.h. Increase knowledge of physical science content in a form that is relevant to education standards, such as Next Generation Science Standards (NGSS), and connected to engaging and contemporary issues in physical science; weekly expectations differentiated to provide opportunities for deepening knowledge of science; students gain insight into teaching science and work together to think critically on the conceptual basis of subject matter appropriate for learners in their context; for educators at all levels (e.g., elementary, secondary, informal settings).

## EDTL:6767 Systems Thinking in Biology and Integrated STEM Education

Preparation for potential STEM or in-service teachers who want to design integrated STEM learning environments and cultivate students' systems thinking skills; emphasis on computational modeling environments in biology education; how to craft problems based on principles derived from primary literature on systems thinking and STEM educational research; no programming experience required or expected. Recommendations: general background in biology, chemistry, and physics.

## EDTL:6833 History and Foundations of Social Studies

 EducationHistorical, philosophical, social foundations of social studies education; recent debates over content and instructional processes; student research proposals.

3 s.h. EDTL:6840 Theories and Perspectives in Global Education 3 s.h. Examination of theories and perspectives within global education that help to understand historical and contemporary social, political, economic, and cultural issues; relationship to international studies, international education, global cultures, human rights, social justice, and other areas; interaction with global educators who conduct research and/or teach in institutes of higher education around the world.

## EDTL:6841 Attaining a Global Perspective 2-3 s.h.

Rationales, conceptualizations, and themes in global perspectives in education, implications for curriculum change; elements of perspective consciousness, cultural universals, cultural diversity, cross-cultural awareness, global systems, global history, global issues; application and evaluation of ideas within fields of study and varied teaching situations.
EDTL:6906 Practicum with Exceptional Persons arr
Practicum experience with students with disabilities; experiences differ depending upon student's program of study.
EDTL:6909 Seminar: Graduate Supervised Teaching 1 s.h.
For students enrolled in graduate student teaching practicum. Requirements: special education major.
EDTL:6936 Special Education Administration 3 s.h. Builds a foundation of dispositions, knowledge, and skills for tasks performed by directors of special education, building leaders, and administrators, when supervising needs of special education students and economically and socially deprived students; knowledge and application of legal aspects, individual educational programs, and continuum of academic and social/emotional behavior supports; for prospective school administrative personnel. Same as EPLS:6236.

## EDTL:6950 Strategist I Student Teaching: Elementary

arr.
Student teaching in an elementary mild and moderate special education program.
EDTL:6951 Strategist I Student Teaching: Secondary arr.
Student teaching in a secondary mild and moderate special education program.
EDTL:6953 Strategist II Student Teaching: Elementary arr
Student teaching in K-8 learning disabilities or behavior disorders.
EDTL:6954 Strategist II Student Teaching: Secondary arr.
Student teaching in secondary learning disabilities or behavior disorders.
EDTL:7004 Schooling in the United States 3 s.h.
Governance, finance, and policy structures that have influenced teaching and learning in public schools.

EDTL:7008 Seminar: Research and Current Issues arr.
Review of literature, critical analysis of reported research, and study of current issues and problems for a specific curricular area; topics vary.

EDTL:7015 PhD Seminar in Language, Literacy, and Culture arr. Historical, recent research and theory in literacy education; topics vary.
EDTL:7033 Seminar on Teacher Education 3 s.h.
3 s.h. History, structure, and politics of teacher education; current practice and agendas for reform; new developments in teacher assessment.
EDTL:7040 Advanced Topics in Teaching and Learning arr. Topics vary.
EDTL:7070 Qualitative Research Methods in Teaching and Learning
Conceptual and practical exploration of qualitative research design methods, including data collection, analysis, and reporting; understanding proposal writing.

## EDTL:7071 Critical Discourse Analysis in Educational Research

Critical discourse analysis (CDA) as theory and method; social and power relations, identities, and knowledge through written, visual, and spoken texts in social settings, such as schools, families, communities; theoretical and methodological traditions of CDA in educational research; critical approaches to analyzing spoken, written, and visual texts. Prerequisites: EDTL:7070 or PSQF:7331 or EPLS:7373 or CSED:7338.
EDTL:7072 Advanced Methods of Literacy Research: Qualitative Data Analysis and Reporting 3 s.h.
Advanced course in traditional and contemporary qualitative data analysis methods and varied forms of reporting to understand, critique, and conduct research about literacy learning and teaching. Prerequisites: CSED:7338 or EDTL:7070 or EPLS:7373 or PSQF:7331.
EDTL:7073 Ethnographic Methods, Theories, and Texts 3 s.h. Practical and theoretical background for conducting ethnographic field studies in literacy, schooling, language, or a field of student's choice; methods, methodologies, and perspectives from anthropology, sociology, folklore, journalism, literary criticism, cultural, critical, and composition theory; read historical and contemporary ethnography, consider ethnographic forms of expression (films, graphics, fiction, poems); roles, responsibilities, and ethics of writer, reader, viewer, and informant; tools, methods, and writer's techniques to develop an ethnographic portfolio. Prerequisites: PSQF:7331 or EDTL:7070 or CSED:7338 or EPLS:7373. Same as CNW:7073.

## EDTL:7092 Field Service Project

arr.
Individual field service project in a specific curricular area; for advanced students.

## EDTL:7093 Research Project

arr.
Individual research projects in a specific curricular area; for advanced students.

## EDTL:7165 Reading Clinic: Supervision

arr.
Supervised experience in guiding and improving teacher performance in clinical practicums.

EDTL:7380 Practicum in College Teaching arr.
Supervised college teaching experience in courses related to major academic areas; collaboration with faculty course instructors.
EDTL:7385 Teaching and Learning in Higher Education 3 s.h. Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as CSED:7385, EPLS:7385, GRAD:7385, PSQF:7385.

## EDTL:7405 Research Methods in Literacy, Culture, and Language Education

3 s.h.
Overview of common research methods and paradigms used to study literacy, culture, and language teaching and learning and related fields; discussing readings and other texts by contemporary researchers; processing and applying concepts from qualitative, quantitative, and mixed methods research approaches; considering critical perspectives on educational research methods; designing a rigorous research study on a topic of student's choice; speaking and writing with confidence about research methods used in other studies.

## EDTL:7406 Proposal Writing for Second Language

Research
Procedures and techniques for writing research proposals at the doctoral level; written research proposal dealing with a question in second language teaching and learning.

EDTL:7410 Mixed Methods Research
Introduction to mixed methods research in education; knowledge and skills necessary to conduct mixed methods study; history and language of mixed methods research; identifying and processing arguments for and against mixed methods research; critical and justice-oriented perspectives on mixed methods research; strengths and weaknesses of published mixed methods studies; application of one or more mixed methods research designs to a research proposal. Requirements: formal introduction to quantitative and qualitative research methods, and familiarity with basic steps of research process. Recommendations: direct experience conducting research studies not required. Same as EPLS:7392.

## EDTL:7493 PhD Thesis

arr.
EDTL:7535 Seminar: Research in Mathematics Education arr. Analysis of current research, research methodology, curriculum developments in mathematics education; topics vary.
EDTL:7600 Seminar: Current Topics in Music Education 1-3 s.h. Major areas of professional and research interest.

EDTL:7640 Advanced Research in Music Education 3 s.h. Design, performance, analysis, and reporting of music research.

EDTL:7707 Research: Science Education
arr.
Planning of individual research projects by MS and PhD students.

## EDTL:7750 Seminar: Science Education 0-2 s.h.

Discussion of completed faculty and doctoral candidates' research, national issues, program features.

EDTL:7751 Advanced Qualitative Data Analysis 3 s.h.
Varied approaches to qualitative data analysis and philosophical foundations; analysis and interpretation of qualitative data; writing qualitative research findings. Prerequisites: EPLS:7373 or EDTL:7070 or PSQF:7331 or CSED:7338.

## EDTL:7755 Independent Study in Science Education Research <br> 2-3 s.h.

EDTL:7756 Research Apprenticeship in Science Education 3 s.h. Practical experiences in science education research in a collaborative, team-oriented environment; apprenticeship model of instruction in which students' participation in authentic tasks and their learning are mutually constitutive; engagement in actual research practices to produce an empirically based product; development of expertise with some aspect of research methodology determined by instructor; for graduate students with interests in research or development based in K-16 contexts.

## EDTL:7932 Field Service Project in Special Education Internship

Part- or full-time experience as an intern in school districts or area education agencies; develops skills in supervision and administration of special education.
EDTL:7943 Proseminar: Issues, Trends, and Research in Special Education

2-3 s.h.
Conceptual and practical development of research across special education and related disciplines; empirical review of the literature; focus on professional writing skills.

EDTL:7944 Proseminar: Issues, Trends, and Research in Special Education II

2-3 s.h.
3 s.h. Recent research from a variety of special education areas reviewed by students; simulated comprehensive examinations. Prerequisites: EDTL:7943.

```
EDTL:7945 Current Issues and Trends in Learning
Disabilities
3 s.h.
Readings and discussions of current issues and trends in learning disabilities (e.g., definition, prevalence, interventions, subtyping, assessment).
```

EDTL:7948 Contemporary Research in Behavioral

## Disorders

3 s.h.
In-depth analysis of current research in behavioral disorders; emphasis on evaluating its methodology and contribution to the field.
EDTL:7952 Seminar: Behavioral Assessment and Evaluation 3 s.h. Broadens skills of graduate students who engage in research with exceptional persons; research designs are usually taught in the Department of Psychological and Quantitative Foundations, but because of the nature of handicapping conditions and the low incidence of some handicaps, the single-subject design yields better research information. Same as PSQF:7352.
EDTL:7953 Seminar: Single Subject Design Research 3 s.h. Reviews of single subject research, development of student proposals; focus on special education, applied research.

## Science Education Courses

SIED:3001 Introduction to Museum Studies 3 s.h. Overview of museum history, function, philosophy, collection, and curatorial practices; governance and funding issues; exhibition evaluation and audience studies; examples from Stanley Museum of Art, Museum of Natural History, Old Capitol Museum, and Medical Museum. GE: Social Sciences. Same as ANTH:3001, EDTL:3001, MUSM:3001.

SIED:4102 Societal and Educational Applications of Earth Science and Environmental
arr.
Major ideas and principles of earth and environmental sciences; emphasis on common applications in today's world.
SIED:4103 Societal and Educational Applications of Biological

## Sciences

arr.
Basic conceptual themes of biology, how they have been derived; emphasis on a current social issue related to biology.
SIED:4105 Societal and Educational Applications of Physical Sciences
arr.
Major ideas of physics and how they have been derived; emphasis on how such ideas affect modern society.
SIED:4106 Societal and Educational Applications of Chemical Concepts arr. Principles of chemistry as applied in industry, communication, daily living.
SIED:4110 Exploring the Geology, Mining History, and Environmental Issues of the Colorado Rockies

3-4 s.h.
Basic concepts of physical geology, historical, and environmental geology of the Rocky Mountains in context of mineral exploration, mining, and environment; collection of a teaching suite of basic igneous, sedimentary, and metamorphic rocks and rock forming minerals; scientific/educational photography, field inquiry, and curriculum development projects; students spend 10 days probing the mountains of Colorado for clues to its geologic past including mountains, seas, and volcanic activity; knowledge is tested in the field along with connecting the geology of Colorado with future teaching employment locations.

## SIED:4115 Directed Study

SIED:4135 The Nature of Science 3-4 s.h.
Ideas on understanding and ways of thinking that are essential in a world shaped by science, technology, engineering, and mathematics; focus on increasing science literacy by examining the nature of science; comparison of characteristics specific to individual science disciplines; identification of great episodes and debates in history of science and habits that are essential for science literacy; scope and sequence of content and process skills for K-12 curriculum, instruction, and assessment.

## Art Education, BA

## Requirements

The Bachelor of Arts with a major in art education requires a minimum of 120 s.h., including a minimum of $48 \mathrm{~s} . \mathrm{h}$. in art professional education courses and a minimum of $33 \mathrm{~s} . \mathrm{h}$. in art education content courses. Students must maintain a grade-point average of at least 2.70 in professional education course requirements They also must complete the GE CLAS Core [p. 19]. The major requires admission to the Teacher Education Program (TEP). Application information can be obtained through the Office of Student Services.

Students must earn a BA in art [p. 103] or a BFA in art [p. 103] in the School of Art and Art History at the University of Iowa in order to earn the BA in art education; both degrees may be earned at the same time. Separate application to each degree program is required. Graduates who have earned one of these degrees at another institution and wish to earn the BA in art education should consult the Department of Teaching and Learning; additional coursework may be required.

The art major provides a foundation in art history as well as an understanding of the formal traditions and contemporary practices in studio art. Students take courses in the school's studio art programs, including animation, ceramics, graphic design, 3D design, drawing, intermedia, jewelry and metal arts, painting, photography, printmaking, and sculpture. Students also complete coursework in teacher licensure including student teaching.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Additional subject area endorsements can be completed in any 5-12 licensure program. Students who plan to teach art typically complete a program that prepares them for both elementaryand secondary-level licensure. For more information and an advisor, contact the Department of Teaching and Learning.

For initial licensure, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special site programs provide experience in districts with diverse populations and students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline for students planning to student teach the following fall semester is Nov. 15 and April 15 for the following spring semester.

The BA with a major in art education requires the following work.

## Professional Education Course Requirements

Students complete 48 s.h. from the following.

## Foundation Courses

Foundation courses may be completed before or after admission to the major.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | 3 |
| EDTL:4900 | Foundations of Special <br> Education | 3 |
| EPLS:3000 | Foundations of Education | 3 |

Educational Psychology and

## Additional Licensure Courses

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| All of these: | Creativity, Imagination, Play, <br> and Human Development <br> through the Arts | 3 |

| SCLP:2810 | Undergraduate Sculpture I | 3 |

## Electives

Students complete their major requirements with additional art or art history courses.

## Elementary Education, BA

Requirements
The Bachelor of Arts with a major in elementary education requires a minimum of 120 s.h., including at least 83 s.h. for the major. Students must complete all requirements for the elementary education major and the Teacher Education Program (TEP), including student teaching. Students who are pursuing the combined BA with the special education subprogram and the MA in teaching and learning with the special education subprogram must complete the requirements of the elementary education major plus the coursework required to complete the MA degree. All BA students must complete the GE CLAS Core [p. 19].

## Elementary Education Requirements

The BA with a major in elementary education requires the following work.

## Foundation Courses

Students may complete the foundation courses before being admitted to the major in elementary education, but the courses are not prerequisite to admission to the major.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Creativity, Imagination, Play, <br> and Human Development <br> through the Arts | 3 |
| EDTL:2122 | Foundations of Special <br> Education | 3 |
| EPLS:3000 | Foundations of Education |  |
| PSQF:1075 | Educational Psychology and <br> Measurement | 3 |

## First-Year Courses

New first-year students must take EDTL:2111 Teaching Elementary Learners I: Pursuits and Reflection and EDTL:2112 Teaching Elementary Learners II: Communities and Classrooms before full admission to the TEP. Transfer students and students changing colleges are not required to take EDTL:2111, but must take EDTL:2112.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Teaching Elementary Learners | 2 |
| EDTL:2111 | I: Pursuits and Reflection |  |
| EDTL:2112 | Teaching Elementary <br> Learners II: Communities and <br> Classrooms | 2 |

Courses for the Major

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| All of these: | Teaching and Learning <br> Technologies | 2 |
| EDTL:3002 | Assessment for Instructional <br> Planning and Practice | 3 |
| EDTL:3103 | Methods and Materials: Music <br> for the Classroom Teacher | 2 |
| EDTL:3120 | Reading and Responding to <br> Children's Literature | 3 |

| EDTL:3127 | Methods and Materials: <br> Physical Education, Health, and Wellness | 2 |
| :---: | :---: | :---: |
| EDTL:3160 | Reading and Language Arts Methods for Primary Students in Grades K-3 | 3 |
| EDTL:3161 | Social Studies for the <br> Elementary Classroom Teacher | 3 |
| EDTL:3163 | Methods: Elementary School Mathematics | 3 |
| EDTL:3164 | Reading and Language Arts Methods for Intermediate Students in Grades 3-6 | 3 |
| EDTL:3165 | Elementary Science Methods I | 3 |
| EDTL:3166 | Elementary Science Methods II | 3 |
| EDTL:3170 | Elementary Classroom Management | 2 |
| EDTL:3172 | Elementary Reading Practicum | 4 |
| EDTL:3174 | Elementary Math Practicum | 1 |
| EDTL:3190 | Orientation to Elementary Education | 2 |
| EDTL:4171 | Diversity and Exceptionalities in Literacy Instruction | 3 |
| EPLS:4180 | Human Relations for the Classroom Teacher | 3 |
| One of these: |  |  |
| STAT:1010 | Statistics and Society | 3 |
| STAT:1020 | Elementary Statistics and Inference | 3 |
| One of these: |  |  |
| EDTL:3141 | Elementary School <br> Mathematics: Number and Operations | 3 |
| MATH:1120 | Logic of Arithmetic | 4 |
| One of these: |  |  |
| EDTL:3142 | Elementary School <br> Mathematics: Geometry and Measurement | 3 |
| MATH:1140 | Mathematical Basis of Elementary Geometry | 3 |

## Student Teaching

Students seeking initial licensure must complete the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EDTL:4187 | Effective Teaching Strategies <br> for the Elementary Teacher: <br> Student Teaching Seminar | 3 |
| EDTL:4190 | Supervised Teaching in the <br> Elementary School: Interactive <br> Phase | 6 |
|  | Supervised Teaching in the <br> Elementary School: Pre- and <br> Post-Active Phase | 6 |

## Endorsements

Students have the option of completing an endorsement in one of the following areas: art, English, English as a Second Language (ESL), mathematics, middle school, reading, science, social studies, and special education (Instructional Strategist I: Mild/Moderate). Courses in the endorsement area may be taken pass/nonpass if they are offered
with the pass/nonpass option. Requirement lists for each endorsement area are available from the Department of Teaching and Learning.

The University of Iowa also offers an added endorsement in talented and gifted education.

## Transfer Students

Before they student teach, transfer students must complete the following courses at the University of Iowa.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Teaching and Learning |  |
| EDTL:3002 | Technologies <br> Orientation to Elementary <br> Education | 2 |
| EDTL:3190 | Reading and Responding to <br> Children's Literature | $1-2$ |
| A practicum | Reading and Language Arts <br> Methods for Primary Students <br> in Grades K-3 | 3 |
| EDTL:3123 | Social Studies for the <br> Elementary Classroom Teacher <br> EDTL:3160 | Methods: Elementary School <br> Mathematics |
| EDTL:3161 | Reading and Language Arts <br> Methods for Intermediate <br> Students in Grades 3-6 | 3 |
| EDTL:3164 | StL | 3 |

Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education Office of Student Services to contact all institutions where they have done professional preparatory work.

## TEP: Secondary Education

The College of Education offers the Teacher Education Program (TEP) in secondary education for undergraduate students in the College of Liberal Arts and Sciences. Students must complete all requirements for graduation from the College of Liberal Arts and Sciences, including the GE CLAS Core [p. 19] and the requirements for their majors (see College of Liberal Arts and Sciences [p. 17] in the catalog). They also must complete all requirements of the College of Education's TEP.

Licensure/certification requires a major of at least 30 s.h. of coursework in one of the secondary school subject areas listed below. Licensure/certification course requirements for each major are available from the Department of Teaching and Learning. Candidates for secondary school teaching licensure/certification also may receive approval to teach in additional subject areas by completing an approved program of 12-24 s.h. or more of coursework in those areas.
The College of Education offers secondary school teacher preparation programs in the following areas.

- Art
- Coaching ${ }^{1}$
- English
- English as a second language ${ }^{1}$
- Mathematics
- Middle school ${ }^{1}$
- Music
- Reading ${ }^{1}$
- Science, including biology, chemistry, physics, earth science, and 9-12 all science
- Social science, including anthropology, economics, geography, history, political science, psychology, and sociology
- All social sciences ${ }^{1}$
- Talented and gifted ${ }^{1}$
- World languages-Chinese, French, German, Italian, Japanese, Latin, Spanish
${ }^{1}$ Available as an additional approval area only; a major in one of the other areas is required for licensure.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Students planning to teach art or music typically complete a program that prepares them for both elementary- and secondary-level licensure.
Secondary teacher preparation programs in foreign language also offer a program that leads to licensure/certification as a subject matter specialist in grades $\mathrm{K}-8$. This $\mathrm{K}-8$ licensure/certification is available only in the same subject area as the secondary certification.
For more information and the name of an advisor, contact the Department of Teaching and Learning.

## Secondary Education Requirements

Undergraduates working toward licensure/certification to teach in secondary schools must complete the following requirements in addition to the requirements of their major. All coursework must be completed before student teaching.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| EDTL:3002 | Teaching and Learning Technologies (must be taken during student's first semester in the college) | 2 |
| EDTL:3091 | Secondary Education Program Orientation and Classroom Management | 3 |
| EDTL:3095 | Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college) | 1 |
| EDTL:4900 | Foundations of Special Education | 3 |
| EPLS:3000 | Foundations of Education | 3 |
| EPLS:4180 | Human Relations for the Classroom Teacher | 3 |
| PSQF:1075 | Educational Psychology and Measurement | 3 |
| One or more major field | ion and practicum courses in the | 2-3 |
| One or more field | of teaching courses in the major | 3-6 |
| One college- <br> MATH:0100 | ematics course, except 1005, or MATH:1210 |  |
| Student teach |  | 15 |
| For initial licensure in all subject areas, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 70-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special programs provide experience in districts with diverse populations, including Aldine, Texas (Houston area) and Rialto, |  |  |

California. In most program areas, students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline is Nov. 15 for students planning to student teach the following fall semester and Feb. 15 for students planning to student teach the following spring semester.

## Secondary Education Transfer Students

Transfer students must complete the following work before they student teach.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EDTL:3002 | Teaching and Learning <br> Technologies | $2-3$ |
| EDTL:3091 | Secondary Education Program <br> Orientation and Classroom <br> Management | 3 |
| EDTL:3095 | Teaching Reading in Secondary <br> Content Areas | 1 |

Appropriate methods courses
A practicum at the University of Iowa
All coursework in the major
Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education's Office of Student Services to contact all institutions where they have done professional preparatory work.

## Elementary Education with Special Education Subprogram Requirements

Elementary education students may pursue the BA in elementary education with a special education subprogram if they have been admitted to the MA in teaching and learning with a special education subprogram (K-8 instructional strategist I: mild/moderate with no thesis) and complete the MA degree.

It is appropriate for students who are currently enrolled in the Teacher Education Program (TEP) as undergraduates working toward a major in elementary education. Students who desire to pursue an MA degree, who are motivated to broaden their experience, and are inspired to serve students with disabilities are well suited for pursuing this combined program.
Students may complete both degrees in five years. In their last semester of undergraduate coursework, students enroll in two MA level courses in special education (EDTL:4950 Behavioral and Social Interventions and EDTL:4984 Academic Skills for Students with Special Needs) that count toward both degrees. Once they complete all BA requirements, students complete the remaining MA special education courses. They are then eligible for their student teaching field experience. Students compete two placements-one in general education elementary education and one in $\mathrm{K}-8$ special educationthus making them eligible for teaching licensure in both elementary education and special education.

The BA in elementary education with a special education subprogram and the MA in teaching and learning with a special education subprogram (K-8 instructional strategist I: mild/moderate with no thesis) requires the following work.

## Special Education Subprogram Foundation Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Creativity, Imagination, Play, | 3 |
| EDTL:2122 | and Human Development <br> through the Arts | 3 |

| EDTL:4922 | Supervised Teaching: <br> Elementary Strategist I | 6 |

## Combined Programs

## BA (Special Education Subprogram)/ MA in Teaching and Learning (Special Education Subprogram)

The combined BA in elementary education with a special education subprogram and the MA in teaching and learning with a special education subprogram (K-8 instructional strategist I: mild/moderate; nonthesis) program is available for students. Students are able to earn both degrees in less time than it would take to complete both degrees separately.

Students pay undergraduate tuition and fees during the combined undergraduate/graduate semester which is generally in the spring semester of their fourth year. In the following semester when they begin coursework for the MA, they pay graduate tuition and fees. For more information on the combined program, see "Elementary Education with Special Education Subprogram Requirements" under Requirements [p. 1378] in this section of the catalog.

## Admission

Applicants must:

- be a University of Iowa undergraduate student enrolled in the BA in elementary education TEP program;
- have completed at least 74 s.h.;
- have a grade-point average (GPA) of at least 3.25 (the admissions committee considers other aspects of an application when the undergraduate GPA is below 3.25); and
- submit a writing sample.

Applicants have the option to submit a Graduate Record Examination (GRE) General Test score. A score above 300 may bolster an application with an undergraduate GPA below 3.25

## Career Advancement

The BA program prepares students to teach kindergarten through grade 6. In Iowa, the elementary specialization areas are designated as kindergarten through grade 8 .

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Elementary Education, BA

Course Title Hours

## Academic Career

## Any Semester

The Academic Advising Center advises elementary education students during the first two semesters. Students are advised for success, based on academic strengths, and not necessarily for a four-year plan. Students are guided through the Teacher Education Program (TEP) application in EDTL:2112 Teaching Elementary Learners II.
GE CLAS Core: Students who need to complete the World Language requirement should consult with their academic advisor about when to add courses to plan of study. ${ }^{\text {a }}$

a To fulfill the GE CLAS Core requirement in World Languages, students must complete four years of a single world language
in high school or achieve fourth level of proficiency in a world language through coursework or an appropriate exam. See General Catalog for more information.
b Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
c The following foundation courses may be completed prior to admission to TEP, but are not prerequisites for admission: PSQF:1075, EDTL:2122, EDTL:4900, EPLS:3000.
d GE courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
e Complete the College of Education 10-hour pre-admission school field experience verification form available on the Teacher Education Program web page.
f Please see your advisor and the College of Education website for detailed application instructions and deadlines.
g Students have the option of completing added endorsements that certify them to teach areas of specialization in grades K-8. Consult an advisor, the General Catalog, or the College of Education website for more information.
h Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
i All coursework must be completed prior to student teaching.
j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## English Education, BA

## Requirements

The Bachelor of Arts with a major in English education requires a minimum of 120 s.h., including a minimum of 41 s.h. in English professional education courses and a minimum of 27 s.h. in English education content courses. Students must maintain a grade-point average of at least 2.70 in professional education course requirements. They also must complete the GE CLAS Core [p. 19]. The major requires admission to the Teacher Education Program (TEP). Application information can be obtained through the Office of Student Services.

Students must earn a BA in English [p. 402] or a BA in English and creative writing [p. 411] at the University of Iowa in order to earn the BA in English education; both degrees may be earned at the same time. Separate application to each degree program is required. Graduates who have earned one of these degrees at another institution and wish to earn the BA in English education should consult the Department of Teaching and Learning; additional coursework may be required.

The Department of English offers courses in literature, cultural studies, language, and critical and creative writing. In these courses, students read poetry, fiction, essays, criticism, and theory to acquire methods for understanding literature and culture and respond creatively to the texts. In addition to providing these essential elements of a liberal arts and sciences education, the department's courses can augment students' specialized interests in other fields. Students also complete coursework in teacher licensure including student teaching.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Additional subject area endorsements can be completed in any 5-12 licensure program. For more information and an advisor, contact the Department of Teaching and Learning.

For initial licensure, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60 -mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis.

Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline for students planning to student teach the following fall semester is Nov. 15 and April 15 for the following spring semester.
The BA with a major in English education requires the following work.

## Professional Education Course Requirements

Students must complete 41 s.h. from the following.

## Foundation Courses

Foundation courses may be completed before or after admission to the major.

| Course \# | Title | Hours |

a These majors include a BA in English or a BA in English and creative writing.
b Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
c Choose a math course that will satisfy the Teacher Education Program math requirement.
d GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
e Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
f Students majoring in English are not required to fulfill the GE CLAS Core Interpretation of Literature requirement but instead may substitute a Literary, Visual, and Performing Arts course excluding: DANC:1010 through DANC:2040, MUS:1001, and MUS:1020.
g Complete the College of Education 10-hour pre-admission school field experience verification form available on the Teacher Education Program web page.
h See General Catalog and degree audit for BA in English education Students also should consider requirements for the second degree when selecting these courses.
i Please see the College of Education website for detailed application instructions and deadlines. Admission is selective and a priority deadline exists.
j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Mathematics Education, BA

Requirements
The Bachelor of Arts with a major in mathematics education requires a minimum of 120 s.h., including 46 s.h. in mathematics professional education courses, and a minimum of 41-42 s.h. in mathematics education content courses for students earning the BA in mathematics or a minimum of 47-50 s.h. in mathematics education content courses for students earning the BS in mathematics. Students must maintain a grade-point average of at least 2.70 in professional education course requirements. They also must complete the GE CLAS Core [p. 19]. The major requires admission to the Teacher Education Program (TEP). Application information can be obtained through the Office of Student Services.

Students must earn a BA in mathematics [p. 777] (Program B) or a BS in mathematics [p. 783] (Program B) at the University of Iowa in order to earn the BA. in mathematics education; both degrees may be earned at the same time. Separate application to each degree program is required. Graduates who have earned one of these degrees at another institution and wish to earn the BA in mathematics education should consult the Department of Teaching and Learning; additional coursework may be required. Students also complete coursework in teacher licensure including student teaching.
An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Additional subject area endorsements can be completed in any 5-12 licensure program. For more information and an advisor, contact the Department of Teaching and Learning.
For initial licensure, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60 -mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special site programs provide experience in districts with diverse populations and students also may apply to student teach at international sites for the second half of the semester.
Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline for students planning to student teach the following fall semester is Nov. 15 and April 15 for the following spring semester.

The BA with a major in mathematics education requires the following work.

## Music Education, BA

## Requirements

The Bachelor of Arts with major in music education requires a minimum of 120 s.h., including a minimum of 44 s.h. in music professional education courses and 75-86 s.h. in the BM in music degree from the College of Liberal Arts and Sciences. Students must maintain a grade-point average of at least 2.70 in professional education course requirements. They also must complete the GE CLAS Core [ p .19 ]. The major requires admission to the Teacher Education Program (TEP). Application information can be obtained through the Office of Student Services.

Students must earn a BM in music [p. 825] with a performance subprogram of brass/woodwind, jazz, organ, percussion, piano, piano with teacher education, string, or voice at the University of Iowa in order to earn the BA in music education; both degrees may be earned at the same time. Separate application to each degree program is required. Graduates who have earned a bachelor's degree in music performance at another institution and wish to earn the BA in music education should consult the Department of Teaching and Learning; additional coursework may be required.

The BM with a major in music is intended for undergraduates who wish to major in music as part of a broad liberal arts education irrespective of specific career aspirations. The curriculum includes musicianship, performance, and electives. Students must audition and be accepted into a performance area. They develop musicianship, performance skills, and select from a wide variety of music electives.
An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Additional subject area endorsements can be completed in any 5-12 licensure program. Students who plan to teach music complete a program that prepares them for both elementary- and secondary-level licensure (i.e., K-12). For more information and an advisor, contact the Department of Teaching and Learning.

For initial licensure, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60 -mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special site programs provide experience in districts with diverse populations and students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline to complete the application in order to student teach occurs one year prior to the requested student teaching semester: Nov. 15 for the following fall semester and April 15 for the following spring semester.

The BA with a major in music education requires the following work.

## Professional Education Course Requirements

Students complete 44 s.h. from the following.

| STAT:1020 | Elementary Statistics and | 3 |
| STAT:1030 | Inference | 4 |

Any mathematics course (prefix MATH), except
MATH:0100, MATH:1005, or MATH:1210

## Music Education Content Courses

In addition to the requirements below, students complete other music courses that relate to their major field of study

Jazz (Piano) with Choral Emphasis Majors

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Choral Conducting and | 3 |
| EDTL:3645 | Literature |  |
| MUS:1120 | Secondary Performance - Voice <br> (taken twice for 1 s.h. each) | 2 |
| MUS:1510 | Diction for Singers I | 2 |
| MUS:2510 | Diction for Singers II | 2 |
| MUS:3625 | Techniques of Conducting | 2 |
| MUS:3659 | Class Strings (section 1) | 1 |
| MUS:3664 | Introduction to Wind and | 2 |
| 4 s.h. from these (courses may be repeated): |  |  |
| MUS:1176 | Voxman Chorale |  |
| MUS:3170 | Kantorei | 1 |
| MUS:3172 | Camerata Singers | 1 |

Jazz (String Bass) Majors

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| EDTL:3635 | Instrumental Conducting | 3 |
| MUS:3180 | Orchestra (taken four times for <br> 1 s.h. each) | 4 |
| MUS:3625 | Techniques of Conducting | 2 |
| MUS:3659 | Class Strings (taken three times <br> for 1 s.h. each) | 3 |
| MUS:3664 | Introduction to Wind and | 2 |
|  | Percussion Instruments |  |

## Jazz (Wind Instruments, Percussion, Piano, or

 Organ) with Band Emphasis Majors| Course \# <br> All of these: | Title | Hours |
| :--- | :--- | ---: |
| EDTL:3605 | Instrumental Techniques (taken <br> three times for 2 s.h. each; <br> students select appropriate topic <br> of flute/percussion, brass, or <br> woodwinds) | 6 |
| EDTL:3635 | Instrumental Conducting | 3 |
| MUS:1165 | Hawkeye Marching Band | 1 |
| MUS:3160 | Symphony Band/Concert Band <br> (taken four times for 1 s.h. each) | 4 |
| MUS:3625 | Techniques of Conducting | 2 |
| MUS:3659 | Class Strings (section 1) | 1 |
| MUS:3666 | Marching Band Techniques | 1 |

Piano or Organ with Choral Emphasis Majors

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Choral Conducting and | 3 |
| EDTL:3645 | Literature |  |
| MUS:1120 | Secondary Performance - Voice <br> (taken twice for 1 s.h. each) | 2 |
| MUS:1510 | Diction for Singers I | 2 |
| MUS:2510 | Diction for Singers II | 2 |
| MUS:3659 | Class Strings (section 1) | 1 |

| MUS:3664 | Introduction to Wind and <br> Percussion Instruments |
| :--- | :--- |

## Piano or Organ with String Emphasis Majors

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | 3 |
| EDTL:3635 | Instrumental Conducting | 2 |
| MUS:3664 | Introduction to Wind and |  |
|  | Percussion Instruments | 1 |

## String Instrument Majors

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| EDTL:3635 | Instrumental Conducting | 3 |
| MUS:3664 | Introduction to Wind and <br> Percussion Instruments | 2 |
| MUS:3659 | Class Strings (taken three times <br> for 1 s.h. each) | 3 |

## Voice Majors

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| EDTL:3645 | Choral Conducting and | 3 |
| MUS:1121 | Literature | 1 |
| MUS:2213 | Secondary Performance - Piano | 1 |
| MUS:3659 | Group Instruction in Piano III | 1 |
| MUS:3664 | Class Strings (section 1) | 2 |
|  | Introduction to Wind and |  |
|  | Percussion Instruments |  |

## Wind Instruments, Percussion, Piano, or Organ with Band Emphasis Majors

| Course \# <br> All of these: | Title | Hours |
| :--- | :--- | ---: |
| EDTL:3605 | Instrumental Techniques (taken <br> three times for 2 s.h. each; <br> students select appropriate topic <br> of flute/percussion, brass, or <br> woodwinds) | 6 |
| EDTL:3635 | Instrumental Conducting | 3 |
| MUS:1165 | Hawkeye Marching Band | 1 |
| MUS:1711 | Jazz Rhythms and Interpretation | 1 |
| IUS:3659 | Class Strings (section 1) | 1 |
| MUS:3666 | Marching Band Techniques | 1 |
| MUS:3760 | Jazz Band Techniques | 1 |

## Electives

Students consult their advisor and complete their major requirements with additional music courses.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
c Complete the College of Education 10-hour pre-admission school field experience verification form available on the Teacher Education Program web page.
d Please see the College of Education website for detailed application instructions and deadlines. Admission is selective and a priority deadline exists.
e This requirement may be met by a course required for the BM in music.
f GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
g Choose a course that will satisfy the Teacher Education Program math requirement.
h Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Science Education, BA

## Requirements

The Bachelor of Arts with major in science education requires a minimum of 120 s.h., including a minimum of 43 s.h. in science education professional education courses, completion of an approved College of Liberal Arts and Sciences science degree, and science education content courses. Students must maintain a grade-point average of at least 2.70 in professional education course requirements. They also must complete the GE CLAS Core [p. 19]. The major requires admission to the Teacher Education Program (TEP). Application information can be obtained through the Office of Student Services.

Students must earn one of these majors at the University of Iowa, with a minimum of 36 s.h., in order to earn the BA in science education: a BA in biology [p. 172], a BS in biology [p. 177], a BA in chemistry [p. 203], a BS in chemistry [p. 207], a BA in environmental sciences [p. 449], a BS in environmental sciences [p. 453], a BA in geoscience [p. 375], a BS in geoscience [p. 379], a BA in physics [p. 873], a BS in physics [p. 879], or a BS in science studies [p. 1403]; both degrees may be earned at the same time. Separate application to each degree program is required. Graduates who have earned one of these degrees at another institution and wish to earn the BA in science education should consult the Department of Teaching and Learning; additional coursework may be required.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Additional subject area endorsements can be completed in any 5-12 licensure program. For more information and an advisor, contact the Department of Teaching and Learning.

For initial licensure, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60 -mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special site programs provide experience in districts with diverse populations and students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline for students planning to student teach the following fall semester is Nov. 15 and April 15 for the following spring semester.

The BA with a major in science education requires the following work.

## Professional Education Course Requirements

Students complete 43 s.h. from the following.

## Foundation Courses

Foundation courses may be completed before or after admission to the major.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | 3 |
| EDTL:4900 | Foundations of Special |  |
|  | Education | 3 |
| EPLS:3000 | Foundations of Education | 3 |
| PSQF:1075 | Educational Psychology and <br> Measurement |  |

## Additional Licensure Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Teaching and Learning |  |
| EDTL:3002 | Technologies | 2 |
| EDTL:3091 | Secondary Education Program <br> Orientation and Classroom <br> Management | 3 |
| EDTL:3095 | Teaching Reading in Secondary <br> Content Areas | 1 |
| EPLS:4180 | Human Relations for the <br> Classroom Teacher | 3 |
| And all of these taken in this order: |  |  |
| EDTL:4750 | Assessment in Science, <br> Technology, Engineering, and <br> Mathematics (STEM) | 2 |
| EDTL:4751 | Learning in the Science, <br> Technology, Engineering, <br> and Mathematics (STEM) <br> Classroom | 2 |
| EDTL:4752 | Secondary Science Methods II <br> with Field Experience | 3 |
| EDTL:4753 | Secondary Science Methods III <br> with Field Experience | 3 |
| EDTL:4779 | Secondary School Science <br> Practicum | 2 |

## Student Teaching

Transfer students should consult their advisor since they must complete certain courses before they student teach.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| All of these: | Seminar: Curriculum and <br> EDTL:4087 | 3 |
| EDTL:4091 | Observation and Laboratory <br> Practice in the Secondary <br> School | 6 |
| EDTL:4092 | Observation and Laboratory <br> Practice in the Secondary <br> School | 6 |

## Mathematics Course

Students complete a college-level math course. Most students complete this course as a part of their GE CLAS Core [p. 19] requirement in Quantitative or Formal Reasoning. For questions about how the math course can be applied to the licensure requirement, see Academic Advising on the College of Education website.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| One of these: |  |  |
| CS:1110 | Introduction to Computer <br> Science | 3 |
| CS:1210 | Computer Science I: <br> Fundamentals | 4 |
| STAT:1010 | Statistics and Society | 3 |
| STAT:1020 | Elementary Statistics and | 3 |
| STAT:1030 | Inference | 4 |

Any mathematics course (prefix MATH), except
MATH:0100, MATH:1005, or MATH:1210

## Science Education Content Courses

Students select science courses that relate to their major field of study. In addition, students complete the broad field science block below:

## Broad Field Science Block

Students complete 12 s.h. from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | The Nature of Science | 4 |
| SIED:4135 | At least two of these: | 4 |
| SIED:4102 | Societal and Educational <br> Applications of Earth Science <br> and Environmental | 4 |
| SIED:4103 | Societal and Educational <br> Applications of Biological <br> Sciences | 4 |
| SIED:4105 | Societal and Educational <br> Applications of Physical <br> Sciences <br> Societal and Educational <br> Applications of Chemical <br> Concepts | 4 |

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Approved majors for the second degree include a BA in anthropology, a BS in anthropology, a BA in economics, a BS in economics, a BA in geography, a BS in geography, a BA in history, a BA in political science, a BS in political science, a BA in psychology, a BS in psychology, or a BA in sociology.
b Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
c GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
d This requirement may be met by a course required for the second degree.
e Complete the College of Education 10-hour pre-admission school field experience verification form available on the Teacher Education Program web page.
f Choose a course that will satisfy the Teacher Education Program math requirement.
g Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
h Please see the College of Education website for detailed application instructions and deadlines. Admission is selective and a priority deadline exists.
i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# World Language Education, BA 

## Requirements

The Bachelor of Arts with a major in world language education requires a minimum of 120 s.h., including a minimum of 48 s.h. in world language professional education courses and $30-36$ s.h. in world language education content courses. Students must maintain a grade-point average of at least 2.70 in professional education course requirements. They also must complete the GE CLAS Core [p. 19]. The major requires admission to the Teacher Education Program (TEP). Application information can be obtained through the Office of Student Services.

Students must earn one of these majors at the University of Iowa in order to earn the BA in world language education: a BA in Asian languages and literature [p. 151] with a Chinese or Japanese subprogram, a BA in French [p. 479], a BA in German [p. 555], a BA in Italian [p. 483], a BA in Russian [p. 156], a BA in Spanish [p. 1027], or a BA in classical languages [p. 244] with a Latin language emphasis; both degrees may be earned at the same time. Separate application to each degree program is required. Graduates who have earned one of these degrees at another institution and wish to earn the BA in world language education should consult the Department of Teaching and Learning; additional coursework may be required.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Additional subject area endorsements can be completed in any 5-12 licensure program. Secondary teacher preparation programs in world language also offer a program that leads to licensure as a subject matter specialist in grades $\mathrm{K}-8$. For more information and an advisor, contact the Department of Teaching and Learning.

For initial licensure, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60 -mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special site programs provide experience in districts with diverse populations and students also may apply to student teach at international sites for the second half of the semester.
Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline for students planning to student teach the following fall semester is Nov. 15 and April 15 for the following spring semester.

The BA with a major in world language education requires the following work.

## Professional Education Course Requirements

Students complete at least 48 s.h. from the following.

## Foundation Courses

Foundation courses may be completed before or after admission to the major.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Foundations of Special | 3 |
| EDTL:4900 | Education |  |

| EPLS:3000 | Foundations of Education | 3 |
| :--- | :--- | :--- |
| PSQF:1075 | Educational Psychology and | 3 |
|  | Measurement |  |

## Additional Licensure Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| EDTL:3002 | Teaching and Learning Technologies | 2 |
| EDTL:3091 | Secondary Education Program Orientation and Classroom Management | 3 |
| EDTL:3095 | Teaching Reading in Secondary Content Areas | 1 |
| EDTL:4406 | World Language Practicum I | 3 |
| EDTL:4407 | World Language Practicum II | 3 |
| EDTL:4410 | Language, Power, and Multilingual Education | 3 |
| EDTL:4416 | Learning to Teach Second Languages I | 3 |
| EDTL:4417 | Learning to Teach Second Languages II | 3 |
| EPLS:4180 | Human Relations for the Classroom Teacher | 3 |

## Student Teaching

Transfer students should consult their advisor since they must complete certain courses before they student teach.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Seminar: Curriculum and <br> EDTL:4087 | Student Teaching <br> Observation and Laboratory <br> Practice in the Secondary <br> School |
| EDTL:4091 | Observation and Laboratory <br> Practice in the Secondary <br> School | 6 |
| EDTL:4092 | Special Subject Area Student <br> Optional course: | 6 |
| EDTL:4089 | Teaching | $3-6$ |

## Mathematics Course

Students complete a college-level math course. Most students complete this course as a part of their GE CLAS Core [p. 19] requirement in Quantitative or Formal Reasoning. For questions about how the math course can be applied to the licensure requirement, see Academic Advising on the College of Education website.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: | Introduction to Computer <br> Science <br> CS:1110 | Computer Science I: <br> Fundamentals |
| STAT:1010 | Statistics and Society | 4 |
| STAT:1020 | Elementary Statistics and <br> Inference | 3 |
| STAT:1030 | Statistics for Business | 3 |
| Any mathematics course (prefix MATH), except |  |  |
| MATH:0100, MATH:1005, or MATH:1210 | 4 |  |

## World Language Education Content Courses

Students complete $30-36$ s.h. in an approved College of Liberal Arts and Sciences world language major.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## World Language Education, BA

## Course Title

d GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
e Complete the College of Education 10-hour pre-admission school field experience verification form available on the Teacher Education Program web page.
f Choose a course that will satisfy the Teacher Education Program math requirement.
g Please see the College of Education website for detailed application instructions and deadlines. Admission is selective and a priority deadline exists.
h Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
i Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Science Studies, BS

Science studies provides preparation in more than one discipline of science; a consideration of science from a philosophical, historical, and sociological perspective; an introduction to applied science (technology); and an education sequence.

Program planning in science studies requires the cooperation and involvement of a variety of university departments and colleges. Most of the program's requirements are drawn from courses offered by these varied academic units.

## Learning Outcomes

Students who major in science studies gain:

- knowledge in two or more areas of science;
- a specified proficiency in mathematics as a tool of science (with more mathematics study required for the physical science emphases than for the biological ones);
- a view of science from a historical, philosophical, and cultural perspective; and
- experience with the application of scientific knowledge.

## Research

Each faculty member in science studies is responsible for one or more areas of research. Major interests include studies of effective teaching and learning, science through writing, philosophy and sociology of science, individualized learning, social issues in science and technology, curriculum planning and development, professional development, intellectual development related to teaching and learning science, studies of effective use of hands-on activities, and evaluation and assessment of science instruction and programs.

## Programs and Projects

A wide range of funded programs provides ample opportunity for students to be involved in innovative development and research in science studies.

Science studies faculty members collaborate on a number of international research projects in many countries. Activities include faculty exchanges and cross-national studies.
International students enrich the opportunities for graduate studies in science studies. New international collaborative efforts are underway each year.

## Requirements

The Bachelor of Science with a major in science studies (awarded by the College of Liberal Arts and Sciences) requires a minimum of 120 s.h., including at least $48 \mathrm{~s} . \mathrm{h}$. of work for the major. Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].

The major in science studies is interdisciplinary. It is intended for students interested in education; it is not intended to prepare students for advanced study in one area of science. When graduates of the science studies program elect to pursue graduate study in a specific area of science, they often must complete additional coursework in that discipline after they are admitted to the Graduate College.

The science studies curriculum includes courses offered by science departments in the College of Liberal Arts and Sciences, science applications courses, and courses in the history, philosophy, and sociology of science.

The major offers five emphasis areas: all-science, biology, chemistry, earth science, and physics. The all-science emphasis area is open only to students who will earn teacher licensure and would like equal preparation in biology, chemistry, earth science, and physics. Students who choose the all-science emphasis area do not choose a secondary emphasis area. They must complete all requirements for teacher licensure in order to graduate in the all-science emphasis area.

Students who do not choose the all-science emphasis area may elect whether or not to earn teacher licensure. They choose a primary and a secondary emphasis area from biology, chemistry, earth science, and physics, acquiring depth in the primary emphasis area equivalent to six semesters of sequential study and preparation in the secondary area equivalent to four semesters of sequential study.

All science studies students must complete the requirements for their emphasis area(s) plus the broad field science block. Those who wish to earn teacher licensure also must complete the College of Education's Teacher Education Program (TEP), including the 47 s.h. professional education sequence; see "Teacher Licensure" below.

## Special Rules

The Science Studies Program may involve many faculty advisors and more than one college or department. Consequently, the following special rules apply to science studies students.

- At least 10 s.h. of graded credit in science must be earned at the University of Iowa.
- No credit from the CLEP Natural Science General Examination may be applied toward the major in science studies.
- Courses for the major may not be taken pass/nonpass. Grades from all courses applied toward the science studies major are used in computing a student's grade-point average in the major, both at the University of Iowa and overall.

Since mathematics forms an integral part of so many aspects of modern science, all-science emphasis area education students are urged to complete appropriate advanced courses in both pure and applied mathematics (including statistics and computer science) so that they may be qualified to do graduate work and quantitative research later.

The BS with a major in science studies requires the following coursework.

## All-Science Emphasis Area

Students who choose the all-science emphasis area do not choose a secondary emphasis area. They complete a minimum of 48 s.h. for the major, including at least 36 s.h. in the following coursework (at least 9 s.h. in each of the four science disciplines-biology, chemistry, earth science, and physics), and 12 s.h. in the broad field science block. They also must complete all requirements for teacher licensure (see "Teacher Licensure" below).

## Biology

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least 9 s.h. from these: |  |  |
| BIOL:1411 | Foundations of Biology | 4 |
| BIOL:1412 | Diversity of Form and Function | 4 |
| BIOL:2211 | Genes, Genomes, and the | 3 |
|  | Human Condition | 3 |
| BIOL:2673 | Ecology | 4 |
| BIOL:3172 | Evolution | 4 |
| HHP:3500 | Human Physiology | 3 |

## Chemistry

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least 9 s.h. from these: |  |  |
| CHEM:1110 | Principles of Chemistry I | 4 |
| CHEM:1120 | Principles of Chemistry II | 4 |
| CHEM:2021 | Fundamentals of Chemical | 3 |
|  | Measurements |  |
| CHEM:2210 | Organic Chemistry I | 3 |
| CHEM:220 | Organic Chemistry II | 3 |

## Earth Science

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least 9 s.h. from these: |  |  |
| EES:1030 | Introduction to Earth Science | $3-4$ |
| EES:1040 | Evolution and the History of | $3-4$ |
|  | Life |  |
| EES:1050 | Introduction to Geology | 4 |
| EES:1080 | Introduction to Environmental | $3-4$ |
|  | Science |  |
| EES:3070 | Marine Ecosystems and | 3 |
|  | Conservation |  |

## Physics

At least 9 s.h. chosen as follows.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least one of these: |  | $3-4$ |
| ASTR:1070 | Stars, Galaxies, and the <br> Universe |  |
| PHYS:1200 | Physics of Everyday Experience | 3 |

No more than one of these:

| PHYS:1511 | College Physics I | 4 |
| :--- | :--- | :--- |
| PHYS:1611 | Introductory Physics I | 4 |
| PHYS:1701 | Physics I | 4 |

No more than one of these:

| PHYS:1512 | College Physics II | 4 |
| :--- | :--- | :--- |
| PHYS:1612 | Introductory Physics II | 4 |
| PHYS:1702 | Physics II | 4 |

## Broad Field Science Block

Students complete 12 s.h. from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | The Nature of Science | 4 |
| SIED:4135 | At least two of these: |  |
| SIED:4102 | Societal and Educational <br> Applications of Earth Science <br> and Environmental | 4 |
| SIED:4103 | Societal and Educational <br> Applications of Biological <br> Sciences | 4 |
| SIED:4105 | Societal and Educational <br> Applications of Physical <br> Sciences | 4 |
| SIED:4106 | Societal and Educational <br> Applications of Chemical <br> Concepts | 4 |

## Biology Emphasis Area

Students who choose biology as their primary emphasis area complete a minimum of 50 s.h. for the major, including 25 s.h. in the following biology coursework plus at least 15 s sh. in a secondary emphasis area (chemistry, earth science, or physics) and $12 \mathrm{~s} . \mathrm{h}$. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

## Broad Field Science Block-Biology Emphasis Area

Students complete 12 s.h. from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | The Nature of Science | 4 |
| SIED:4135 | At least two of these: 4 <br> SIED:4102 Societal and Educational <br> Applications of Earth Science <br> and Environmental <br> SIED:4103 Societal and Educational <br> Applications of Biological <br> Sciences <br> SIED:4105 Societal and Educational <br> Applications of Physical <br> Sciences <br> SIED:4106 Societal and Educational <br> Applications of Chemical <br> Concepts 4 |  |

## Chemistry Emphasis Area

Students who choose chemistry as their primary emphasis area complete a minimum of 50 s.h. for the major, including 23 s.h. in the following chemistry coursework plus at least $15 \mathrm{~s} . \mathrm{h}$. in a secondary emphasis area (biology, earth science, or physics) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
|  <br> CHEM:1120 | Principles of Chemistry I-II | 8 |
| CHEM:2210 | Organic Chemistry I | 3 |

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Honors

## Honors in the Major

The science studies program offers outstanding students the opportunity to graduate with honors in the major. Honors students must maintain a cumulative University of Iowa grade-point average of at least 3.33 and fulfill other requirements; contact the Science Education program for more information about graduating with honors in the science studies major.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the science studies major.

## Career Advancement

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The Four-Year Graduation Plan is not available to students majoring in science studies.

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Science Studies, BS

- Biology Emphasis [p. 1406]
- Chemistry Emphasis [p. 1407]
- Earth Science Emphasis [p. 1408]
- Physics Emphasis [p. 1409]

|  | Total Hours | 1-133 |

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Enrollment in chemistry courses requires completion of a placement exam.
c Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
d Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
f Students must take two of the applications courses SIED:4102, SIED:4103, SIED:4105, or SIED:4106.
g Students must complete 15 semester hours in their secondary emphasis area.
h Choose from BMB:3110, BIOL:2723, BIOL:3233, or BIOL:3363. Some courses are offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b MATH:1850 and MATH:1860 are corequisites for required courses.
c Enrollment in math courses requires completion of a placement exam.
d Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
f Students must take two of the applications courses SIED:4102, SIED:4103, SIED:4105, or SIED:4106.
g Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
h Students must complete 15 semester hours in their secondary emphasis area.
i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Teaching and Learning, MA

## Learning Outcomes

Students will:

- demonstrate understanding of and ability to analyze theoretical concepts and research in their field of study;
- express ideas effectively in written and spoken communication;
- connect research to practice and practical questions in their professional context;
- effectively apply their knowledge and skills to their professional context; and
- demonstrate curiosity, inquiry, and critical and data-based decision making.

## Art Education

The Master of Arts in teaching and learning with an art education subprogram requires a minimum of 38 s.h. of graduate credit. Students must maintain a program grade-point average of at least 3.00.
The program prepares highly qualified teachers of art for elementary and secondary schools and community colleges. Its strong academic emphasis helps teachers who are creative artists to become highly literate in the history and language of art.
The MA in teaching and learning with an art education subprogram requires the following coursework.

## Requirements

$\left.\begin{array}{lrr}\text { Course \# } \quad \text { Title } & \text { Hours } \\ \text { One of these options: }\end{array}\right) 18$

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have completed the equivalent of the minimum coursework in art required for a University of Iowa BA or BFA in art and must have a license/certificate to teach art. Applications must include a representative portfolio of the applicant's work, consisting of eight digital reproductions of artwork and one example of written work, which may be a paper previously written for a course or an original paper.

## English Education

The Master of Arts in teaching and learning with an English education subprogram requires a minimum of 30 s.h. of graduate credit. Students must maintain a program grade-point average of at least 3.00.

The program is intended for experienced teachers of English. It provides opportunities for professional development and preparation for department chairs, supervisors of English, and curriculum specialists for secondary schools.
MA students specialize in English education and in one or two other areas. The other area(s) may include reading, writing, curriculum,
adolescent literature, or a literary area. Students and their advisors plan the program of study together. The only required course is EDTL:6315 MA Seminar: English Education.

## Comprehensive Examinations

Comprehensive examinations are developed in consultation with a student's advisor. Students ask three faculty members to serve on their committee. Faculty members may include professors outside of the College of Education. One of these faculty members, usually a student's advisor, serves as chair of the committee.

## Admission

Applicants must meet the admission requirements of the Graduate College. They should have taken extensive coursework in English and should have taught English for at least two years. Application should be made to the College of Education.

## Mathematics Education

The Master of Arts in teaching and learning with a mathematics education subprogram requires a minimum of $32 \mathrm{~s} . \mathrm{h}$. of graduate credit. Students must maintain a program grade-point average of at least 3.00.

The program provides students with advanced specialization in mathematics and education as a better foundation for $\mathrm{K}-12$ teaching.

## Required Courses

MA students take a minimum of 9 s.h. of coursework in mathematics approved by their advisor. They also take a minimum of four courses in mathematics education and three courses chosen in consultation with their advisor.

Students choose a cognate area, usually enrolling in three or more courses in the area. Suggested areas include educational psychology, educational statistics and measurement, history or philosophy of education, pure or applied mathematics, instructional design and technology, counselor education, curriculum, administration, and special education. Courses are chosen in consultation with a faculty member from their cognate area.

Students also complete a sufficient number of electives in mathematics and education, chosen with the approval of their advisor, to complete 32 s.h. of credit.

## Comprehensive Examination

Students take three two-hour comprehensive exams: one in mathematics education, the second in mathematics, and the third in their cognate area.

## Admission

Applicants must meet the admission requirements of the Graduate College. Except in unusual cases, they should hold a professional license/certificate to teach school mathematics.

## Multilingual Education

The Master of Arts in teaching and learning with a multilingual education subprogram requires a minimum of 33 s.h. of graduate credit. Students take at least 15 s.h. in multilingual education coursework, 9 s.h. in graduate language or linguistics courses, and 9 s.h. in elective coursework. They must earn 9 s.h. in courses numbered 5000 or above. Students must maintain a grade-point average of at least 3.00 while enrolled in the program. Candidacy for the master's degree is reevaluated annually.

The program is designed for students who would like to pursue a multilingual education specialization in teaching, including English as a Second Language (ESL) or English as a Foreign Language (EFL), bilingual and dual language education, or world language education, or in a related field (e.g., language laboratory directors, instructional materials designers, evaluation specialists, or assessment developers). It also offers enrichment in multilingual language pedagogical knowledge for practicing teachers. Students may design programs with a special focus.

The MA in teaching and learning with a multilingual education subprogram requires the following courses.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| This course: |  |  |
| EDTL:6483 | Multilingual Education and Applied Linguistics | 3 |
| At least 12 s.h. from these: |  |  |
| EDTL:6015 | PhD Seminar: Literacy, Culture, and Language Education | 3 |
| EDTL:6400 | Fundamentals of Second Language Assessment | 3 |
| EDTL:6402 | Second Language Program <br> Management | 3 |
| EDTL:6403 | Language Policy and Planning | 3 |
| EDTL:6409 | Cultural Curriculum | 3 |
| EDTL:6480 | Graduate Seminar in Multilingual Education | 3 |
| EDTL:6484 | Bi/Multilingual Literacies | 3 |
| EDTL:6497 | Principles of Course Design for Second Language Instruction | 3 |
| EDTL:7405 | Research Methods in Literacy, Culture, and Language Education | 3 |

Students may take other courses to meet this
requirement, in consultation with their advisor

## Target Language

In consultation with their advisor, students select at least 9 s.h. in graduate language or linguistics courses.

## Elective Courses

Students complete at least 9 s.h. in elective coursework chosen in consultation with their advisor.

## Master's Examination

Students take a written exam during the semester in which they plan to graduate. The exam covers multilingual education and two areas of specialization selected by a student. It is written by the graduate committee, which consists of at least three faculty members, two of whom must be from the multilingual education program area.

## Admission

Applicants must meet the admission requirements of the Graduate College and have prior teaching experience. Applicants should submit a statement of purpose explaining their graduate study goals and their commitment to multicultural education. International applicants should satisfy the English proficiency requirements as specified by the Graduate College.

## Social Studies Education

The Master of Arts in teaching and learning with a social studies education subprogram requires 38 s.h. of graduate credit. Students must maintain a program grade-point average (GPA) of at least 3.00 .
The program provides an opportunity for interdisciplinary work in education, history, social science, or related areas for classroom teachers, high school department chairs, supervisors, and others interested in advancing their competence in history and the social sciences and greater proficiency in teaching and supervision.

## Requirements

Students create a course of study in consultation with their advisor that aligns with their interests related to social studies education and/ or their profession. Students distribute the program's required 38 s.h. among three concentration fields in history or a social science (or related area), social studies and global education, and general education. At least 9 s.h. must be earned in history or a social science and in general education courses numbered 3000 or above. Students also must earn at least 9 s.h. in courses numbered 6000 or above offered through the social studies education program or a related area of education.

## Thesis Option

Students who choose the thesis option complete a research or investigative problem. If the thesis is research or investigation in history, social science, or a related area, the thesis director is a member of the appropriate department. If the thesis is an investigative problem in social studies education, the thesis director is a College of Education faculty member.

## Comprehensive Examination

Candidates select one faculty member from each concentration area to serve as a committee member responsible for creating and reviewing a question for the written exam. Committee members are selected in consultation with a candidate's advisor. The required comprehensive examination consists of three two-hour written exams, one on each of the three concentration fields.

## Admission

Applicants must meet the admission requirements of the Graduate College. They should have a bachelor's degree in education, history, or one of the social sciences from an accredited institution; a cumulative GPA of at least 3.00 ; a GPA of at least 3.00 in history and/or social science courses; and two letters of recommendation. Evidence of writing ability in a completed major paper or essay also is required. Typically, applicants are expected to hold a secondary teaching license/certificate.

## Special Education

The Master of Arts in teaching and learning with a special education subprogram requires a minimum of 32 s.h. of graduate credit. Students must maintain a program grade-point average (GPA) of at least 3.00.
The program prepares individuals to deliver appropriate levels of service to students with disabilities at the elementary and secondary levels, in either public or private settings. Applicants with a master's degree and special education certification may request admission in order to obtain an additional area of special education licensure/ certification (i.e., professional improvement). Students typically receive licensure/certification in at least one area upon completing the program. Contact the Department of Teaching and Learning for specific program requirements.

Special education programs are offered in K-8 and 5-12 Instructional Strategist I: Mild/Moderate, and K-12 Instructional Strategist II: BD/LD. These programs are designed to prepare graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. All teacher licensure/ certification programs are approved by the Iowa Department of Education. Students may need to complete additional courses or other requirements to meet state standards for teacher preparation, licensure, or endorsements.

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate GPA of at least 3.00 and/ or at least 3.00 on a minimum of 12 s.h. of graduate coursework. Applicants seeking initial teacher licensure must have at least 10 hours of documented experience in K-12 schools. Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL).

Application materials must include a completed Graduate College application form; copies of official transcripts for all college coursework; three current letters of recommendation; and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.

## Teaching, Leadership, and Cultural Competency

The Master of Arts in teaching and learning with a teaching, leadership, and cultural competency subprogram requires a minimum of 33 s.h. of graduate credit. Students must maintain a UI cumulative grade-point average (GPA) of at least 2.75 .
The program is offered completely online and prepares practicing teachers, school-based personnel, and those working with K-12 populations in community settings for the challenges facing U.S. schools and communities in particular. Special emphasis is placed on understanding how identities, including race, sexuality, linguistic background, socioeconomic status, gender identity, ethnicity, and residency status impact learning in the environment, and in particular, how traditional systems within schools have largely failed these populations. Students engage in these topics using up-to-date research and collaborative technologies under the guidance of a faculty member who has considerable experience supporting effective change in schools. Students who are changemakers and those motivated to serve and celebrate all students are encouraged to apply to this program.
Students take a 24 s.h. core, including courses in instructional leadership, cultural competency and diversity, assessment, technology, and curriculum; and 9 s.h. of elective coursework. Iowa teachers can apply their course credits toward their ongoing learning requirements for maintaining licensure. The program requirements also are aligned with the National Board for Professional Teaching Standards (NBPTS) certification process. Additionally, elective tracks are aligned with Iowa added endorsements in talented and gifted (TAG); science, technology, engineering, and math (STEM); and English as a Second Language (ESL).
The MA in teaching and learning with a teaching, leadership, and cultural competency subprogram requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| EDTL:5090 | Diversity and Identity in K-12 | 3 |

## Fall

Other courses in consultation with an advisor

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor's degree, a GPA of at least 3.00 in undergraduate coursework, a teaching license, or relevant significant teaching experience in $\mathrm{K}-12$ education. Applicants are asked to supply two letters of recommendation from individuals familiar with their work in schools or in an educational program. International applicants whose first language is not English must score at least 81 (internet-based) on the Test of English as a Foreign Language (TOEFL).

## Academic Plans

## Sample Plans of Study

Sample plans represent one way to complete a program of study Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
$b$ If students choose to take both of these classes due to interest, one may be counted as an elective.
c Students must complete at least 9 s.h. of elective coursework. See the General Catalog for list of approved courses.

## Teaching and Learning, MAT

## Learning Outcomes

Students will:

- demonstrate understanding of the central concepts, tools of inquiry, and structures of the discipline to be taught;
- plan discipline-specific and ethical instruction and assessment that reflect research and theory in education and their discipline;
- implement discipline-specific and ethical instruction and assessment using a variety of methods of teaching, instructional strategies, and pedagogical tools;
- demonstrate understanding of learner development and learning differences that vary across the cognitive, linguistic, social, emotional, and physical areas, as well as diverse cultures and communities; and
- express ideas effectively in written and spoken communication in collaboration with university and school professionals.

## Art Education

The Master of Arts in Teaching in teaching and learning with an art education subprogram requires a minimum of $58 \mathrm{~s} . \mathrm{h}$. of graduate credit. Students must maintain a program grade-point average (GPA) of at least 3.00.

The program is designed primarily for graduates of baccalaureate degree programs in art who would like to become teachers but have no previous coursework in education. It features advanced work in art along with the courses required for certification. Additional art coursework may be advised to render a student's degree equivalent to one from the University of Iowa and to fulfill licensure requirements. Successful completion of the program enables students to receive a credential to teach art in grades $\mathrm{K}-12$. Students may need to complete additional courses or other requirements to meet state standards for teacher preparation, licensure, or endorsements.

The MAT in teaching and learning with an art education subprogram requires the following work.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Teaching and Learning <br> Technologies | 2 |
| EDTL:3002 | Secondary Education Program <br> Orientation and Classroom <br> Management | 3 |
| EDTL:3091 | Teaching Reading in Secondary <br> Content Areas <br> Methods of Elementary Art and | 1 |
| EDTL:3095 | Field Experiences | 3 |
| EDTL:3143 | Art Education Studio and Field <br> Components | 3 |
| EDTL:3204 | Methods of Secondary Art and <br> Field Experience | 3 |
| EDTL:3290 | Introduction and Practicum: Art | 3 |
| EDTL:4087 | Seminar: Curriculum and <br> Student Teaching | 3 |
| EDTL:4091 | Observation and Laboratory <br> Practice in the Secondary <br> School | 6 |
| EDTL:4192 | Special Area Student Teaching | 6 |
| EDTL:4900 | Foundations of Special <br> Education | 3 |

| EDTL:5222 | Creativity, Imagination, Play, <br> and Human Development <br> Through the Arts (must be taken <br> during student's first semester in <br> the college) | 3 |
| :--- | :--- | :--- |
| EDTL:6267 | Seminar: Current Issues in Art <br> Education | 4 |
| EPLS:3000 | Foundations of Education | 3 |
| EPLS:4180 | Human Relations for the <br> Classroom Teacher | 3 |
| PSQF:6200 | Educational Psychology | 3 |
| Graduate-level coursework in art studio or art history or | 6 |  |

a related area (consult advisor)
The coursework in art studio or art history or a related field may contribute to licensure requirements. Other art licensure requirements may be taken prior to or in addition to the courses listed above. To be considered for a teaching assistant (TA) position, students must take EDTL:7380 Practicum in College Teaching for 1 s.h. after their first semester in the program and after completion of EPLS:3000 Foundations of Education, EPLS:4180 Human Relations for the Classroom Teacher, and PSQF:6200 Educational Psychology, and a course in creativity, imagination, and play: human development through art.

## Comprehensive Examination

Students complete comprehensive examinations before their student teaching semester. The comprehensive examination involves a reflective project supervised by art education faculty. The project encompasses issues explored throughout the course of study and can involve inquiry through studio work or practice. For deadlines, checklist, and instructions, see Graduate Exams on the Office of Student Services website.

## TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an MAT in teaching and learning with the art education subprogram.

## Admission

Applicants must meet the admission requirements of the Graduate College. They should have completed a baccalaureate degree program in art, equivalent to that which is offered through the College of Liberal Arts and Sciences at the University of Iowa, with an undergraduate GPA of at least 3.00. Candidates also must meet all Teacher Education Program (TEP) application requirements. Since the MAT is a credentialing program, candidates must not have qualified previously for a credential.

## English Education

The Master of Arts in Teaching in teaching and learning with an English education subprogram requires a minimum of 45 s.h. of graduate credit. Students must maintain a program grade-point average (GPA) of at least 3.00.

The program is designed for students who have an undergraduate degree in English and few or no professional education courses. Successful completion of the program enables students to receive a credential to teach English in secondary schools. Students may need
to complete additional courses or other requirements to meet state standards for teacher preparation, licensure, or endorsements.
The MAT in teaching and learning with an English education subprogram requires the following work.

## English

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Language and Learning | 3 |
| EDTL:3382 | Reading and Teaching <br> Adolescent Literature | 3 |
| EDTL:3393 | Approaches to Teaching <br> EDTL:4355 | 3 |
| EDTL:6315 | MA Seminar: English Education | arr. |

Students may take the following English courses as part of the MAT program or as part of their undergraduate program:
A course in Shakespeare
Three courses in American literature
A course in British literature
A course in nonfiction or creative writing, in addition to EDTL:4355

## Education

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| EDTL:3002 | Teaching and Learning Technologies (must be taken during student's first semester in the college) | 2 |
| EDTL:3091 | Secondary Education Program Orientation and Classroom Management | 3 |
| EDTL:4087 | Seminar: Curriculum and Student Teaching | 3 |
| EDTL:4091 | Observation and Laboratory Practice in the Secondary School | arr. |
| EDTL:4092 | Observation and Laboratory Practice in the Secondary School | arr. |
| EDTL:4314 | Introduction and Practicum: Secondary English (must be completed before enrollment in EDTL:4315 and EDTL:4394) | 3 |
| EDTL:4315 | Learning to Teach Secondary English/Language Arts and Field Experience | 3 |
| EDTL:4394 | Secondary Reading Instruction | 3 |
| EDTL:4900 | Foundations of Special Education | 3 |
| EPLS:3000 | Foundations of Education | 3 |
| EPLS:4180 | Human Relations for the Classroom Teacher | 3 |
| PSQF:6200 | Educational Psychology | 3 |

## Comprehensive Examination

The comprehensive examination involves a series of reflective projects supervised by English education faculty. The projects encompass issues explored throughout the course of study and involve integration of theory and practice.

## TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an MAT in teaching and learning (English education).

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have been granted a BA in English or the equivalent, with an undergraduate GPA of at least 3.00. They also must meet all Teacher Education Program (TEP) application requirements. Since the MAT is a credentialing program, candidates must not have qualified previously for a credential. Applicants are expected to have no more than 6 s.h. of coursework in professional education courses before admission.

## Mathematics Education

The Master of Arts in Teaching in teaching and learning with a mathematics education subprogram requires a minimum of 48 s.h. of graduate credit. Students must maintain a program grade-point average (GPA) of at least 3.00.

The program is designed primarily for students who decide they would like to become teachers and have already completed a BS or BA in mathematics. It features advanced work in mathematics along with the courses required for certification. It is a means by which students can obtain both a master's degree and certification. It is assumed that students have completed a baccalaureate degree in mathematics equivalent to one that would be completed at the
3 University of Iowa, but has no previous coursework in education. More coursework may be advised if there are mathematics courses a student has not taken as part of the undergraduate mathematics 3 baccalaureate degree program to render the student's degree equivalent to one from the University of Iowa.

Students may need to complete additional courses or other requirements to meet state standards for teacher preparation, licensure, or endorsements.

The MAT in teaching and learning with a mathematics education subprogram requires the following work.

## Education

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| The first three courses should be taken during the first <br> semester of registration: | 2 |  |
| EDTL:3002 | Teaching and Learning <br> Technologies <br> Secondary Education Program <br> Orientation and Classroom <br> Management | 3 |
| EDTL:3091 | Teaching Reading in Secondary <br> Content Areas | 1 |
| EDTL:3095 | Introduction and Practicum: <br> All of these: | Mathematics <br> Methods: Middle School <br> Mathematics |
| EDTL:3535 | Methods: High School <br> Mathematics | 3 |

| EDTL:4750 | Assessment in Science, Technology, Engineering, and Mathematics (STEM) | 2 |
| :---: | :---: | :---: |
| EDTL:4751 | Learning in the Science, Technology, Engineering, and Mathematics (STEM) Classroom | 2 |
| EDTL:4900 | Foundations of Special Education | 3 |
| EPLS:3000 | Foundations of Education | 3 |
| EPLS:4180 | Human Relations for the Classroom Teacher | 3 |
| PSQF:6200 | Educational Psychology | 3 |
| One additional graduate-level mathematics education course in consultation with an advisor |  |  |
| The following courses are taken concurrently and constitute the student teaching semester: |  |  |
| EDTL:4087 | Seminar: Curriculum and Student Teaching | 3 |
| EDTL:4091 | Observation and Laboratory Practice in the Secondary School | 6 |
| EDTL:4092 | Observation and Laboratory Practice in the Secondary School | 6 |
| Graduate Mathematics Requirements |  |  |
| Course \# | Title | Hours |
| At least one of these: |  |  |
| MATH:4050 | Introduction to Discrete Mathematics | 3 |
| MATH:4060 | Discrete Mathematical Models | 3 |
| MATH:4120 | History of Mathematics | 3 |

## Comprehensive Examination

The comprehensive exam includes a required two-part exam in mathematics and mathematics education. At the discretion of the examining committee, this exam may consist of two parts and is both written and oral. The mathematics and mathematics education comprehensive examinations will not duplicate course examinations, but will assess both mathematics education and the mathematics specialization area chosen by a student.

## Admission

Applicants must meet the admission requirements of the Graduate College. They also must meet all Teacher Education Program (TEP) application requirements. Candidates should have completed a baccalaureate degree program in mathematics equivalent to that which is offered through the College of Liberal Arts and Sciences at the University of Iowa. An undergraduate GPA of at least 3.00 is required for admission and must be maintained throughout the enrollment period.

## Combined Program

## BA in Mathematics/MAT

The College of Liberal Arts and Sciences and the College of Education offer students the opportunity to earn their Bachelor of Arts in Mathematics/Master of Arts in Teaching degree in education with a mathematics education subprogram in as little as five years.
The Combined BA/MAT (4+1) program is a seamless process whereby students can progress from undergraduate to graduate status.

The usual period of study for both the Bachelor of Arts and the Master of Arts in Teaching degree is six years. Through careful planning, many of the courses required for the MAT program can be taken during the undergraduate years, creating an opportunity to focus the fifth year of study on the comprehensive and student teaching requirements. Visit BA/MAT Mathematics Education on the College of Education website.

## Admission to Combined Program

Students are eligible to apply to the $4+1$ program during their sophomore or junior year if they have a cumulative GPA of at least 3.25 or if they meet special considerations. Application materials must include a completed application to the Teacher Education Program (TEP), two recommendations from University of Iowa faculty, a career plan describing how this program will enhance the student's scholarly and or career goals, and an unofficial transcript of student's prior work.

Students who submit completed applications will be notified within 30 days if they have been accepted into the program. The program accepts a limited number of students each year on a competitive basis. Once accepted into the program, a student meets with an advisor to select an advisory committee to plan a course of study.

During the sixth semester, a student in the program who has completed 80 s.h. of undergraduate work and maintained a 3.00 minimum GPA must apply to the Graduate College. Application to the Graduate College must include a completed Graduate College application form, a letter of application/statement of purpose, one additional letter of recommendation from a faculty member in the mathematics major, and Test of English as a Foreign Language (TOEFL) test scores for international students.

Students are granted undergraduate/graduate credit for coursework during the seventh semester; they begin paying graduate tuition during the eighth semester until completion of the program. The baccalaureate degree must be conferred at the end of the eighth semester or in the program's fourth year.

## Science Education

The Master of Arts in Teaching in teaching and learning with a science education subprogram requires a minimum of $48 \mathrm{~s} . \mathrm{h}$. of graduate credit. Students must maintain a program grade-point average (GPA) of at least 3.00.
The program is designed primarily for graduates of bachelor's degree programs in science who decide that they would like to become teachers. It features advanced work in science along with the courses required for certification, enabling students to earn a master's degree and teaching certification at the same time. It is assumed that students have completed considerable coursework in science (at least 56 s.h.) as undergraduates, but no previous coursework in education. Students' science coursework should be equivalent to that required by the University of Iowa Science Education program.

Students may need to complete additional courses or other requirements to meet state standards for teacher preparation, licensure, or endorsements.

The MAT in teaching and learning with a science education subprogram requires the following work.

## Professional Education Foundation Sequence

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| EDTL:3002 | Teaching and Learning Technologies (must be taken during student's first semester in the college) | 2 |
| EDTL:3091 | Secondary Education Program <br> Orientation and Classroom Management | 3 |
| EDTL:3095 | Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college) | 1 |
| EDTL:4900 | Foundations of Special Education | 3 |
| EPLS:3000 | Foundations of Education | 3 |
| EPLS:4180 | Human Relations for the Classroom Teacher | 3 |
| One of these: |  |  |
| PSQF:1075 | Educational Psychology and Measurement | 3 |
| PSQF:6200 | Educational Psychology | 3 |
| Science edu sequence: | rses taken in the following |  |
| EDTL:4750 | Assessment in Science, Technology, Engineering, and Mathematics (STEM) | 2 |
| EDTL:4751 | Learning in the Science, Technology, Engineering, and Mathematics (STEM) Classroom | 2 |
| EDTL:4752 | Secondary Science Methods II with Field Experience | 3 |
| These two taken concurrently: |  |  |
| EDTL:4753 | Secondary Science Methods III with Field Experience | 3 |
| EDTL:4779 | Secondary School Science Practicum | 2 |
| These three taken concurrently: |  |  |
| EDTL:4087 | Seminar: Curriculum and Student Teaching | 3 |
| EDTL:4091 | Observation and Laboratory Practice in the Secondary School | 6 |
| EDTL:4092 | Observation and Laboratory Practice in the Secondary School | 6 |

## Electives

A minimum of one graduate course in biology, chemistry, earth science, or physics is required. Students who have satisfied portions of the required science coursework listed above must take additional science coursework to meet the minimum requirement of 48 s.h. of credit.

## Comprehensive Examination

Students complete comprehensive examinations before their student teaching semester. Two written comprehensive exams, one in science
education and one in a science specialization area, are required. Students may not duplicate course examinations in these areas.

## TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an MAT in teaching and learning (science education).

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor's degree with a major or the equivalent in one of the sciences. A GPA of at least 3.00 is required for admission and must be maintained throughout the program.
Applicants must meet all Teacher Education Program (TEP) application requirements.

## Combined Program

## BA/MAT

College of Liberal Arts and Sciences students who want to teach science and are working toward a Bachelor of Arts degree with a major in biology, chemistry, environmental sciences, geoscience, or physics may apply to the combined Bachelor of Arts/Master of Arts in Teaching with a science education subprogram offered by the College of Liberal Arts and Sciences and the College of Education.
The combined program enables students to earn a BA and an MAT in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 19 s.h. of qualifying credit toward both degrees.

BA students are admitted to the combined program before their fourth year. They may begin taking education courses during their third year, but they may not earn graduate credit for them until their fourth and fifth years, after they have been admitted to the combined program. Students take 30 s.h. of coursework during the fifth year and must complete all remaining requirements for both degrees that year.

## Science Specialization (Broad Field Science Block)

The following courses are required for the undergraduate degree in science studies at the University of Iowa. They need not be repeated by MAT candidates who need one or more advanced courses in their major science area, or by students from other interdisciplinary science discipline programs that prepare teachers for grades 6-9.
\(\left.$$
\begin{array}{llr}\text { Course \# } & \text { Title } & \text { Hours } \\

Applications of Earth Science <br>

and Environmental\end{array}\right]\)| SIED:4103 |
| :--- | | Societal and Educational |
| :--- |
| Applications of Biological |
| Sciences |$\quad 4$

Education courses required for the combined program are listed under "Combined Program" above. Requirements for the BA degree are listed under the BA in biology [p. 172], BA in chemistry [p. 203], BA in environmental sciences [p. 449], BA in geoscience [p. 375], and BA in physics [p. 873] (College of Liberal Arts and Sciences) in the catalog.

## Social Studies Education

The Master of Arts in Teaching in teaching and learning with a social studies subprogram requires at least 47 s.h. of graduate credit. Students must maintain a program grade-point average (GPA) of at least 3.00.

The program provides an opportunity for interdisciplinary work in education, history, social science, or related areas. It is for students who have a bachelor's degree in history or a social science (or considerable coursework in one of the areas) and who wish to obtain a teaching license/certificate while earning the MAT degree. Students must apply to both the Graduate College and the College of Education.

## Requirements

Students should have completed considerable work in the social sciences and/or history as undergraduates. Students in the College of Education's Teacher Education Program (TEP) for secondary education in social studies may not apply credit they have earned as undergraduates in required licensure courses to the 38 s.h. required for the MAT, even though the credit counts toward state teaching licensure.

Students who completed EDTL:4811 Introduction and Practicum: Secondary Social Studies and/or EDTL:4870 Methods: Secondary Social Studies as undergraduate or postbaccalaureate students at the University of Iowa are required to retake these courses during the MAT program and before student teaching. Required teaching licensure coursework completed at other colleges or universities is reviewed on a case-by-case basis.
For licensure, students must complete 30 s.h. in a history or social science area; the 30 s.h. may include previous undergraduate and/ or graduate-level coursework. Required professional education coursework not completed as part of the baccalaureate degree must be completed for licensure.
Students also must complete 15 s.h. in an additional history or social science licensure area; previous undergraduate coursework may apply.
Of the total semester hours required for the MAT, students must earn at least 8 s.h. in courses numbered 6000 or above in social studies education and a minimum of 9 s.h. of graduate coursework in history or a social science area. Students should take at least one course taught by the instructor who will serve on the examining committee in the history or social science area.

Students must complete all of the following professional education courses, unless they completed some of them as part of their bachelor's degree. In such cases, the semester-hour requirement is reduced accordingly, but it never is below 47 s.h. Students may need to complete additional courses or other requirements to meet state standards for teacher preparation, licensure, or endorsements.

## Professional Education Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Teaching and Learning | 2 |
| EDTL:3002 | Technologies (must be taken <br> during student's first semester in <br> the college) |  |

| EDTL:3091 | Secondary Education Program <br> Orientation and Classroom <br> Management | 3 |
| :--- | :--- | :--- |
| EDTL:3095 | Teaching Reading in Secondary <br> Content Areas (must be taken <br> during student's first semester in <br> the college) | 1 |
| EDTL:4087 | Seminar: Curriculum and <br> Student Teaching | 3 |
| EDTL:4091 | Observation and Laboratory <br> Practice in the Secondary <br> School | 6 |
| EDTL:4092 | Observation and Laboratory <br> Practice in the Secondary <br> School | 6 |
| EDTL:4811 | Introduction and Practicum: <br> Secondary Social Studies | 3 |
| EDTL:4870 | Methods: Secondary Social <br> Studies | 3 |
| EDTL:4900 | Foundations of Special <br> Education | 3 |
| EPLS:3000 | Foundations of Education | 3 |
| EPLS:4180 | Human Relations for the <br> Classroom Teacher | 3 |
| PSQF:6200 | Educational Psychology | 3 |

## Comprehensive Examination

Candidates select one faculty member from each concentration area to serve as a committee member responsible for creating and reviewing a question for the written exam. Committee members are selected in consultation with a candidate's advisor. The required comprehensive examination consists of three two-hour written exams, one on each of the three concentration fields.

## TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an MAT in teaching and learning (social studies education).

## Admission

Applicants must meet the admission requirements of the Graduate College. They should have a bachelor's degree in education, history, or one of the social sciences from an accredited institution; a cumulative GPA of at least 3.00; a GPA of at least 3.00 in history and/or social science courses; and two letters of recommendation. Evidence of writing ability in a completed major paper or essay also is required.

## World Language Education

The Master of Arts in Teaching in teaching and learning with a world language education subprogram requires a minimum of 57 s.h. of graduate credit. Students must maintain a program grade-point average (GPA) of at least 3.00.

The program is designed for superior liberal arts and sciences graduates who have had few or no professional education courses. Successful completion of the program leads to elementary and/ or secondary teacher licensure. The MAT is available in Chinese, French, German, Japanese, Latin, Russian, and Spanish languages.

Students must take 24 s.h. of post-secondary coursework in their language of licensure to obtain their teaching license. This work can be taken prior to entry into this program as part of an undergraduate degree program. Students may need to complete additional courses or other requirements to meet state standards for teacher preparation, licensure, or endorsements.

The MAT in teaching and learning with a world language education subprogram requires the following work. Students also must complete at least 9 s.h. in graduate coursework either in the language department corresponding to their language of licensure or in world language teaching.

## Professional Education

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| All of these: | Teaching and Learning <br> Technologies (must be taken <br> during student's first semester in <br> the college) | 2 |
| EDTL:3002 | Secondary Education Program <br> Orientation and Classroom <br> Management | 3 |
| EDTL:3095 | Teaching Reading in Secondary <br> Content Areas (must be taken <br> during student's first semester in <br> the college) | 1,3 |
| EDTL:4900 | Foundations of Special <br> Education | 3 |
| EPLS:3000 | Foundations of Education <br> EPLS:4180 | Human Relations for the <br> Classroom Teacher |
| PSQF:6200 | Educational Psychology | 3 |

## World Language Teaching

Students complete these courses (at least 28 s.h.).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | World Language Practicum I |  |
| EDTL:4406 | World Language Practicum II | 3 |
| EDTL:4407 | Learning to Teach Second <br> Languages I | 3 |
| EDTL:4416 | Learning to Teach Second <br> Languages II | 3 |
| EDTL:4417 | Multilingual Education and <br> Applied Linguistics | 3 |
| EDTL:6483 | The following courses are taken concurrently and <br> constitute the student teaching semester: |  |
| EDTL:4087 | Seminar: Curriculum and <br> Student Teaching | 1,3 |
| EDTL:4091 | Observation and Laboratory <br> Practice in the Secondary <br> School | 6 |
| EDTL:4092 | Observation and Laboratory <br> Practice in the Secondary <br> School | 6 |

## K-12 Licensure

The K-12 licensure option requires the following course.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EDTL:4089 | Special Subject Area Student | $1-4$ |
|  | Teaching |  |

## Comprehensive Examination

A comprehensive examination is required. The examination reflects a candidate's depth and breadth of knowledge in world language education, including but not limited to theory and practice as well as knowledge of and proficiency in the target language and/or literature of the candidate's choice. The candidate and the advisor discuss the exam's content and format eight months before the exam.

## TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an MAT in teaching and learning (world language education).

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have been granted a bachelor's degree with a major or a strong concentration in a second language and must have an undergraduate GPA of at least 3.00. They also must meet all Teacher Education Program (TEP) application requirements.

## Academic Plans

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Successful completion of the program enables students to receive a credential to teach art in grades K-12; see General Catalog and College of Education website for specifics about K-12 licensure requirements. Students may need to complete additional courses or other requirements to meet state standards for teacher preparation, licensure, or endorsements. Students should work directly with their faculty advisor and the program administrator regarding fulfilling any of these requirements.
b Students wishing to be considered for a teaching assistant position must fulfill certain requirements and should work directly with their faculty advisor and the program administrator to determine those.
c Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
d Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
e Must be taken during the first year fall semester.
f May complete course in related area; work with faculty advisor to determine appropriate coursework.
g Completion of capstone project prior to beginning student teaching.

f Students must complete at least 9 s.h. in graduate coursework either in the language department corresponding to their language of licensure or in world language teaching; work with academic advisor to determine appropriate graduate elective courses and sequence.
g Consists of a comprehensive master's exam and completion of degree requirements.

## Teaching and Learning, MS

## Learning Outcomes

Students will:

- demonstrate understanding of and ability to analyze theoretical concepts and research in their field of study;
- express ideas effectively in written and spoken communication;
- connect research to practice and practical questions in their professional context;
- effectively apply their knowledge and skills to their professional context; and
- demonstrate curiosity, inquiry, and critical and data-based decision making.

## Science Education

The Master of Science in teaching and learning with a science education subprogram requires a minimum of $38 \mathrm{~s} . \mathrm{h}$. of graduate credit. Students must maintain a program grade-point average of at least 3.00.

The program is designed for teachers and supervisors (K-college) and professionals in related fields, such as medical education, college teaching, museum program management, and outreach programs. It is intended to provide experience in understanding teaching and learning and the research processes required to advance the field. Students complete coursework in four areas: science education, education, research, and science. Their individual programs of study are approved by the science education faculty.

The MS in teaching and learning with a science education subprogram requires the following coursework.

## Required Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| EDTL:6757 | Learning in the Science Classroom (no substitute for this course) | 3 |
| EDTL:6759 | Advanced Pedagogy (no substitute for this course) | 3 |
| EDTL:7755 | Independent Study in Science Education Research (taken two times for 3 s.h. each) | 6 |
| Two science with advisor biology (BIOL (CS), enviro (GEOG), he physics and | ourses chosen in consultation numbered 3000 and above in istry (CHEM), computer science ciences (ENVS), geography uman physiology (HHP), and (PHYS) may count. | 6 |
| A minimum of $12 \mathrm{~s} . \mathrm{h}$. chosen from these: |  |  |
| EDTL:6758 | Writing in the Science Classroom | 3 |
| CSED:7338 | Essentials of Qualitative Inquiry | 3 |
| PSQF:4143 | Introduction to Statistical Methods | 3 |
| PSQF:6200 | Educational Psychology | 3 |
| PSQF:6220 | Quantitative Educational Research Methodologies | 3 |
| PSQF:6275 | Constructivism and Design of Instruction | 3 |

| One additional qualitative or quantitative research |  |  |
| :--- | :--- | ---: |
| methods course chosen in consultation with advisor: |  |  |
| EDTL:6761 | STEM Research and Leadership <br> Seminar | 3 |
| EDTL:6765 | STEM Independent Research |  |
| EDTL:7040 | Advanced Topics in Teaching <br> and Learning | 3 |
| EDTL:7070 | Qualitative Research Methods <br> in Teaching and Learning |  |
| EDTL:7071 | Critical Discourse Analysis in <br> Educational Research | 3 |
| EDTL:7072 | Advanced Methods of Literacy <br> Research: Qualitative Data <br> Analysis and Reporting | 3 |
| EDTL:7093 | Research Project <br> Research Apprenticeship in <br> Science Education | 3 |
| EDTL:7956 | Seminar: Single Subject Design <br> Research | arr. |
| EPLS:7373 | Qualitative Research Design <br> and Methods | 3 |
| PSQF:4143 | Introduction to Statistical <br> Methods (if not used to satisfy <br> the 12 s.h. requirement above) | 3 |
| One of these: | Intermediate Statistical Methods | 3 |
| EDTL:7004 | Schooling in the United States | 3 |
| EDTL:7033 | Seminar on Teacher Education | 3 |

## Thesis

Students must complete a thesis, for which they earn 2-4 s.h. of credit.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EDTL:6393 | Master's Thesis | $2-4$ |

## Final Examination

A final oral examination is administered on campus in which candidates defend their thesis. This examination includes a critical inquiry into the purposes, methods, and results of the thesis research investigation.

The final examination is conducted by a committee of no fewer than three members of the graduate faculty. In some cases, the committee must include a member from outside science education; consult the department

## Admission

Applicants must meet the admission requirements of the Graduate College. They should hold an undergraduate major in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis. The department recommends that applicants have teaching licensure/certification unless they are preparing for careers in allied health, museums, or community colleges.

## STEM Education

The Master of Science in teaching and learning with a STEM education subprogram requires $36 \mathrm{~s} . \mathrm{h}$. of graduate credit. Students must earn a UI cumulative grade-point average (GPA) of at least 2.75 .

The program focuses on science, technology, engineering, and mathematics (STEM) education. The program includes coursework that may be used toward the K-12 STEM specialist endorsement.

Degree requirements include online coursework to fit the schedule of a practicing teacher. The STEM education subprogram is not a licensure program.

The MS in teaching and learning with a STEM education subprogram requires the following coursework.

## Required Courses <br> STEM Pedagogy Courses

Other courses in consultation with an advisor

## K-12 STEM Specialist Endorsement

The University of Iowa does not offer a state-approved program for the K-12 STEM Specialist endorsement. In addition to the master's degree, teachers must have met the requirements for a standard Iowa teaching license with endorsement in mathematics, science, engineering, industrial technology, or agriculture. They must demonstrate completion of 12 s.h. of science and 12 s.h. of mathematics content coursework (including computer science), which may include content coursework completed as part of this subprogram as well as other college-level courses. In addition, they must have completed 3 s.h. of engineering or technological design coursework not included in this subprogram; ENGR:1100 Introduction to Engineering Problem Solving and ENGR:1300 Introduction to Engineering Computing may be options for the requirement. Once the courses are completed, teachers may apply to the Board of Educational Examiners for transcript analysis and to add the endorsement. Students interested in pursuing the K-12 STEM Specialist Endorsement should notify their advisor upon admission to the program.

## Admission

Applicants must meet the admission requirements of the Graduate College. These include:

- a bachelor's degree from a regionally accredited American college or university or an equivalent degree from another country as determined by the Office of Graduate Admissions with an undergraduate major in a given science or mathematics area (or combination of science areas), science education, math education, or in elementary education with a science or math emphasis;
- a minimum GPA of 3.00 or the international equivalent as determined by the Office of Graduate Admissions; and
- international applicants whose first language is not English must score at least 81 (internet-based) with a minimum score of 600 on the Test of English as a Foreign Language (TOEFL) or a minimum International English Language Testing System (IELTS) score of 7.0 (with no subscore lower than 6.0).

Teaching licensure/certification is recommended for the MS and required if the candidate seeks the K-12 STEM specialist endorsement from the Board of Educational Examiners (BOEE).

e Taken twice for a total of 6 s.h.
f See the General Catalog for list of approved courses.

## Teaching and Learning, PhD

## Learning Outcomes

Students will:

- demonstrate understanding and application of research methods and methodological knowledge;
- demonstrate understanding of and ability to analyze theoretical concepts and research in their field of study;
- express ideas effectively in written and spoken communication;
- connect research to practice and practical questions in education; and
- plan, conduct, report on, and disseminate original research.

## PhD Required Research Courses

Students admitted to doctoral programs must complete the program's research requirements.

## Required Core Courses

All PhD students in the Department of Teaching and Learning must complete one or both of the following core courses, depending upon program requirements.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EDTL:7004 | Schooling in the United States | 3 |
| EDTL:7033 | Seminar on Teacher Education | 3 |

## Literacy, Culture, and Language Education

The Doctor of Philosophy in teaching and learning with a literacy, culture, and language education (LCLE) subprogram requires a
minimum of 73 s.h. of graduate credit. All students must maintain a program grade-point average (GPA) of at least 3.00 . Students may be able to use some coursework completed for their master's degree toward the PhD; most courses for the PhD should be numbered 5000 or above.

This interdisciplinary program brings together scholarly traditions and contemporary theory in multilingual education and applied linguistics, literacy and cultural studies, and social studies education. The program provides students with the necessary content area knowledge and research skills for independent research, program administration, and varied leadership positions in LCLE education. In consultation with their advisor, students create a program of study that fits their interests and professional aspirations.

The PhD in teaching and learning with a literacy, culture, and language education subprogram requires the following coursework.

## Required Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | PhD Seminar: Literacy, Culture, | 3 |
| EDTL:6015 | and Language Education |  |
| One of these: | Schooling in the United States | 3 |
| EDTL:7004 | Seminar on Teacher Education | 3 |
| EDTL:7033 |  |  |

## Disciplinary and Interdisciplinary Foundations

Students choose a disciplinary area in literacy education, multilingual education, or social studies education for their three foundational courses. They then select one or both of the other areas for their interdisciplinary foundation coursework.

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| All of these: |  |  |
| At least three courses in a chosen area of concentration | 9 |  |
| At least two courses in other areas of concentration | 6 |  |

## Research Methods

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| Both of these: | Qualitative Research Methods <br> in Teaching and Learning <br> EDTL:7070 <br> EDTearch Methods in Literacy, <br> Culture, and Language <br> Education | 3 |
| One of these: | Quantitative Policy Analysis for <br> Practitioners | 3 |
| PSQF:6241 | Intermediate Statistical Methods <br> (for students who utilize <br> quantitative methods in their <br> dissertation) | 3 |
| And: 6243 | Two additional advanced research methods courses <br> Tn quantitative, qualitative, or mixed methods in <br> consultation with their advisor | 3 |

## Electives

Students choose 27 s.h. of elective coursework in consultation with their advisor. Courses may be taken in any department and can be partially or completely unified as a cognate area of study.

## Comprehensive Examination

Upon completion of their coursework, students take their comprehensive exam. This is an opportunity for students to show a comprehensive understanding of the scholarship in the field. Successful completion of the exam identifies candidates who are ready for dissertation work.

## Dissertation

After students pass their comprehensive exam, they consult with their advisor to choose a dissertation committee with at least four faculty members who approve the dissertation proposal. After a successful defense of their dissertation, students conduct dissertation research in the following course.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EDTL:7493 | PhD Thesis | 10 |

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have earned a bachelor's degree with an undergraduate GPA of at least 3.00 on a 4.00 scale and earned a master's degree or completed significant graduate coursework. It is recommended that applicants have at least two years of teaching experience in a related field within or outside of the United States.

Application materials should include a statement of purpose, official transcripts from all institutions attended, a sample of academic writing, curriculum vitae, and three current letters of recommendation. International applicants whose first language is not English, and do not meet the waiver requirements, must submit official Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), or DuoLingo English Test (DET) scores.

Application deadline for fall is Jan. 5; the deadline for spring is Oct. 1.

## Mathematics Education

The Doctor of Philosophy in teaching and learning with a mathematics education subprogram requires a minimum of $80-90$ s.h. of graduate credit. Students must have a program grade-point average of at least 3.00 or higher in all graduate work in mathematics, all University of Iowa graduate work in mathematics, all graduate work, and all University of Iowa graduate work.

The program prepares supervisors, teacher education personnel, community college personnel, and researchers in mathematics education. It is administered by the College of Education. Students must update graduate coursework completed more than 10 years before admission to the program.

The PhD program in teaching and learning with a mathematics education subprogram requires the following coursework.

## Required Courses

Students must complete a minimum of $15 \mathrm{~s} . \mathrm{h}$. in qualitative and quantitative coursework, with at least $9 \mathrm{~s} . \mathrm{h}$. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed under PhD Research Requirements on the college's Graduate Student Life website.

## Core Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| EDTL:7004 | Schooling in the United States | 3 |
| EDTL:7033 | Seminar on Teacher Education | 3 |

In addition, students must complete an approved cognate area; see "Additional Requirements" below.
Students must complete a minimum of 24 s.h. of graduate work in the departments of Computer Science, Mathematics, and Statistics and Actuarial Science, as approved by their advisor. Electives are encouraged in the pure mathematics and applied mathematics sequences.
Students who completed their mathematics requirement at another institution must complete at least 6 s.h. of additional coursework in mathematics at the University of Iowa, chosen with advisor approval. They also must complete at least six courses in mathematics education.

## Additional Requirements

Students concentrate in two additional comprehensive examination areas in either the mathematical sciences or education. A minimum of three courses usually are required for a comprehensive examination area, but candidates should consult with faculty members in the areas selected to determine which courses they should take in order to adequately prepare for the examinations.

Students must complete a total of at least 36 s.h. in College of Education courses; this includes the coursework listed above. They must complete an approved cognate area; a partial list of potential cognate areas is available from the mathematics education program.

## Comprehensive Examination

Students take three written comprehensive examinations, one in mathematics education and two in other fields of education or mathematics; an oral examination follows the written examinations.

## Dissertation

Candidates complete a dissertation on a research problem in mathematics education. A prospectus of the proposed research must be presented to the dissertation committee before candidates undertake the study. Upon completion of the dissertation, candidates defend the dissertation in an oral examination. Students must earn dissertation credit in the following course.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EDTL:7493 | PhD Thesis | 10 |

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate major in mathematics or the equivalent, a current teaching license/certificate, and at least two years of teaching experience are strongly preferred. A faculty review committee makes admission decisions.

## Science Education

The Doctor of Philosophy in teaching and learning with a science education subprogram requires a minimum of 85 s.h. of graduate credit. Students must maintain a program grade-point average (GPA) of at least 3.00.

The program is designed for individuals who aspire to positions as college and university science educators; major supervisors in national, state, and local systems; teachers in small liberal arts colleges; instructors of general education science courses at major universities; research directors in science education; and professionals in medical and/or allied health education.

The PhD in teaching and learning with a science education subprogram requires the following coursework.

## Required Courses

Students in science education complete a minimum of 15 s.h. in qualitative and quantitative coursework, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed under PhD Research Requirements on the college's Graduate Student Life website. Course selections must be consistent with other requirements for the degree.

## Core Courses

All doctoral students in science education complete one or both of the following core courses. Students may not substitute other courses for these.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EDTL:7004 | Schooling in the United States | 3 |
| EDTL:7033 | Seminar on Teacher Education | 3 |

In addition, all doctoral students in the Department of Teaching and Learning complete an approved cognate area; see "Cognate Areas" under PhD Required Research Courses [p. 1427] in this section of the catalog.

## Science Education

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these (15 s.h.): | Learning in the Science <br> Classroom | 3 |
| EDTL:6757 | Writing in the Science <br> Classroom | 3 |
| EDTL:6759 | Advanced Pedagogy | 3 |
| Graduate-level science education courses chosen in <br> consultation with advisor | 6 |  |

## Education

Course \# Title Hours

Three courses chosen in consultation with advisor 9

## Research in Science Education

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these (21 s.h.): | Seminar: Science Education <br> (taken three times for 1 s.h. <br> EDTL:7750 | each) |
| EDTL:7755 | Independent Study in Science <br> Education Research (taken six <br> times for 3 s.h. each) | 18 |
|  |  |  |

## Science Area

Students complete a family of courses (total of 12 s.h.) in a major science area.

## Dissertation

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| EDTL:7493 | PhD Thesis | 10 |

## Admission

Applicants must meet the admission requirements of the Graduate College. They should have completed a bachelor's degree in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis; and have a cumulative GPA of at least 3.00 on undergraduate and graduate work. Applicants
must submit three letters of recommendation, a statement of purpose describing their reasons for pursuing graduate work and their goals for graduate study, and an example of their academic writing.

## Special Education

The Doctor of Philosophy in teaching and learning with a special education subprogram requires a minimum of 90 s.h. of graduate credit. Students must maintain a program grade-point average (GPA) of at least 3.00.

The program prepares students for teaching and research positions in higher education, and for curriculum, supervisory, and research positions in state and local education agencies. The program permits students to study and practice extensively in their special education interest area and in an interest area outside of special education.
The PhD curriculum includes an emphasis on research skills, all facets of special education, an approved cognate area, and at least one specialization area.

## Quantitative Research Requirements

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| Both of these: |  | 3 |
| PSQF:4143 | Introduction to Statistical |  |
| Methods |  |  |
| PSQF:6243 | Intermediate Statistical Methods | 3 |
| Two of these: | Research Process and Design | 3 |
| EPLS:6206 | Quantitative Educational | 3 |
| PSQF:6220 | Research Methodologies |  |
| PSQF:6244 | Correlation and Regression | 4 |
| PSQF:6246 | Design of Experiments | 3 |
| PSQF:6247 | Nonparametric Statistical | 3 |
| PSQF:6249 | Methods | Factor Analysis and Structural |
| PSQF:6252 | Equation Models | 3 |
|  | Introduction to Multivariate | 3 |
|  | Statistical Methods |  |

## Qualitative Research Requirements

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Seminar: Single Subject Design | 3 |
| EDTL:7953 | Research |  |
| One of these: | Mixed Methods Research | 3 |
| EDTL:7410 | Essentials of Qualitative Inquiry | 3 |
| CSED:7338 | Qualitative Research Design <br> and Methods | 3 |
| EPLS:7373 | Qualitative Educational <br> Research Methods | arr. |
| PSQF:7331 |  |  |

## Core Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| EDTL:7004 | Schooling in the United States | 3 |
| EDTL:7033 | Seminar on Teacher Education | 3 |

## Proseminar Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Proseminar: Issues, Trends, and <br> Research in Special Education | 3 |
| EDTL:7943 | Proseminar: Issues, Trends, and <br> Research in Special Education <br> II | 3 |

## Seminar Requirements

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Current Issues and Trends in <br> EDTL:7945 | Learning Disabilities |
| EDTL:7948 | Contemporary Research in <br> Behavioral Disorders | 3 |

## Practicum Requirement

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Practicum in College Teaching <br> (taken twice for 3 s.h. each) | 6 |
| EDTL:7380 |  |  |

## Cognate

Students complete a cognate or specialty area for at least 9 s.h. in consultation with their advisor.

## Competencies

Students work with their advisor to ensure they meet two core competencies: one in teaching and one in supervision.

## Comprehensive Examination

Students complete a three-part comprehensive examination that includes a qualifying exam I, a qualifying exam II, and a major area paper.

## Dissertation

Students complete a doctoral dissertation for at least 10 s.h.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| This course: |  |  |
| EDTL:7493 | PhD Thesis | arr. |

## Admission

Applicants must meet the admission requirements of the Graduate College. They must have a master's degree or equivalent in special education; those without an MA thesis must have completed an equivalent project. Applicants should have a graduate GPA of at least 3.50 and a combined verbal and quantitative score of at least 300 on the Graduate Record Exam (GRE) General Test. Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants should have at least one year of full-time teaching experience with exceptional children; several years are preferred.

Application materials must include a completed Graduate College application form, copies of official transcripts for all college coursework, an official report of Graduate Record Exam (GRE) General Test scores, three current letters of recommendation, and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.

## Academic Plans

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a The Teaching and Learning (Literacy, Culture, and Language Development) PhD requires students to have earned a master's degree prior to admission. Up to 34 s.h. can be transferred from a previously earned master's degree. This transfer credit can eliminate much of the first two years of coursework requirements at Iowa.
b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
d Students choose a disciplinary area in literacy education, multilingual education, or social studies education for their three foundational courses. They then select one or both of the other areas for their interdisciplinary foundation coursework.
e Students who utilize quantitative methods in their dissertation should take PSQF:6243.
f Work with academic advisor to determine quantitative, qualitative, or mixed methods coursework.
g Work with academic advisor to determine appropriate elective coursework and sequence.
h Taken upon completion of required coursework, typically during third year.
i Dissertation defense.

## UI REACH

## Director

- William Loyd Jr.

Faculty: https://education.uiowa.edu/directory
Website: https://education.uiowa.edu/reach

## Program of Study

UI REACH (Realizing Educational and Career Hopes) is a comprehensive transition certificate program for college students with intellectual, cognitive, and learning disabilities. UI REACH offers an integrated college experience in a caring and structured environment. UI REACH is a four-year program with early graduation options.
The UI REACH experience integrates academic skill building, career development, campus involvement, social development, and transition planning to create a dynamic collegiate experience. A few of the program offerings include:

- integrated, Big Ten University experience with on-campus residence hall living;
- person-centered goal planning to customize each student's college experience according to their interests and abilities;
- specialized and individualized support in the core areas of academics, career and transition, social growth, and student life;
- specialized core curriculum and electives delivered by College of Education instructors;
- inclusive academic learning opportunities including traditional classes for credit or audit;
- employment preparation and career development;
- integrated community-based internships and employment opportunities with local businesses;
- access to over 500 student organizations and numerous inclusive campus activities;
- on-call emergency 24-hour support;
- scholarships and other financial aid options;
- a four-year certificate with second- and third-year certificate options; and
- events around the country for current students, alumni, and families.
For more information, visit UI REACH on the College of Education website.

## Courses

## UI REACH Courses

## REA:0010 Social Skills I

1-2 s.h.
Basic interpersonal skills needed to succeed in academic, social, and employment environments; structured learning process for gaining discrete social skills necessary to initiate and maintain conversations in a variety of settings; awareness of feelings and cues in conversation to respond appropriately and have successful reciprocal interactions; lectures, modeling, role play, and practice in the community.

## REA:0020 Computers and Technology I

2 s.h.
Training in computer literacy and practical skills for computer use in everyday life; computer parts and functions, the Windows operating system, computer applications; use of the personal computer to improve personal, academic and workplace productivity; group discussion, demonstrations, and multimedia experience support diverse learning styles.

REA:0021 Computers and Technology II 2 s.h. Builds on REA:0020; fundamental computer competencies and strategies to simplify everyday life and enhance workplace performance; opportunity to improve practical skills for the workplace, communication with others, and daily life; tools for improving personal organization and communication and for meeting academic, entertainment, and workplace needs; group discussion, demonstration, independent exploration, and a multimedia experience support diverse learning styles.
REA:0022 Assistive Technology Applications 1 s.h.
How to access and employ current assistive technology applications to support lifelong learning, academic skill building, vocational experiences, and independent community living; how functional assistive technology and adaptive tools can maximize personal achievement and independence for individuals of varied abilities; students explore and operate assistive technology tools including, but not limited to, text readers, voice-to-text, cognitive aids, and navigation.
REA:0030 Health and Wellness I - Exploration 2 s.h. Importance of health and wellness, personal relationships, sexuality and making healthy choices; overview of health and wellness topics college students face-nutrition, substance use, risky behaviors, personal relationships, sexual health, mental health.
REA:0031 Health and Wellness II - Healthy Lifestyles
2 s.h.
Health and wellness personalized for students; help in assessing individual health and wellness decisions and behaviors to improve current and long-term health and wellness; small group discussion, individual assessments, real-life exploration, interactions with health educators, one-on-one student support; second in a series.

## REA:0040 Personal Finance

2 s.h.
Skills and strategies needed for managing personal finances and making informed spending decisions; initial focus on strategies for use while on a college campus and a larger goal of lifelong application; topics include budgeting, forms of payment, ATM use and etiquette, protecting yourself from financial fraud, differentiating needs and wants, comparison shopping, understanding discounts, tipping, and other personal finance topics needed for managing financial decisions while living independently.
REA:0041 Personal Finance and Math II
2 s.h.
Skills and knowledge needed for managing personal finances; banking, budgeting, insurance, how to be a good consumer; students plan for their financial future by studying paycheck information, actual income, and tax responsibility; research on independent living costs; second in a series.

REA:0045 Lifetime Literacy 1-3 s.h.
Students build writing and reading comprehension skills through text analysis and critical thinking; reading current events articles to construct argumentative and informational writing pieces; use of claim, evidence, and reasoning process to develop organized writing abilities.

REA:0050 Reading Strategies 2 s.h.
Building comprehension strategies and lifelong reading skills; using a novel to develop essential comprehension skills (e.g., summarizing, main ideas, prediction, inference, theme, sequencing); reading for enjoyment while sharpening skills that can be applied in broad reading applications.
REA:0062 Social Skills II
2 s.h.
Continuation of REA:0010; more advanced relationship skills that require self-regulation; self-awareness; applying skills for communicating under stress; structured learning process including repetitive practice and modeling as key components.

REA:0065 Independent Living Lab 0-1 s.h.
Development of independent living skills through a blended model of instruction and applied living in real-life settings; managing a living space independently; living in a shared room and community space; skill-building to manage cleaning, organization, and laundry independently.

## REA:0070 College Transition I: Introduction to Campus Living

Components of successful independent and community living; personal safety issues, effective communication skills for interacting with peers and college personnel, how to access broad community resources for living, work, and leisure; students develop a plan for personal daily routines; classroom activities, practical experiences on campus and in the community.

## REA:0072 College Transition II: Preparing for Independent Living Individual goal setting and planning for independent living after

 college; how to be interdependent and independent in the community, socially, in careers, and in educational settings; promoting selfawareness, self-advocacy, self-determination, and community engagement.
## REA:0073 Life Skills III - Transition Planning <br> 2 s.h.

Work on transition plan during spring semester of final yeargoal setting and planning for independent living after college; how to use daily living skills from college in students' planned home communities; using community resources and agencies; meeting basic needs; how to be interdependent and independent in student's home community; identification of transition team members; plan and lead transition meeting.
REA:0074 Household Management II 2-4 s.h.
Continuation of REA:0075; preparation for independent apartment living; experiential training, assessment to determine support needs; apartment living, personal care, value shopping and budgeting, preparing meals, successful community living.
REA:0075 Household Management I 1-4 s.h.
Independent living skills introduced in the life skills and health and wellness courses; hands-on experience in room care, clothing care, food/kitchen safety, meal planning and nutrition, food preparation, simple recipes, grocery shopping, event planning.

REA:0076 Community Leisure and Advocacy
Utilizing community resources while promoting self-advocacy and leadership; student support for transitioning from a university setting to community living; exploration of community resources related to recreation, entertainment, and independent living using multiple media sources for information gathering; field trips to investigate local resources; research related resources within students' home communities. Requirements: enrollment in UI REACH program.

## REA:0079 Service Learning

Classroom-based learning combined with community service; available resources and ways to better a community; assessment of community needs, research volunteer organizations, service-learning opportunities within the community.

## REA:0090 Current Events <br> 1-2 s.h.

Forum to increase knowledge and ability to comment on current events; voting and political process, civic responsibilities in the local and federal elections process, how students can participate; use of various forms of media (i.e., print, broadcast, internet) to develop critical thinking skills related to awareness of current events and their impact; personal safety issues; effective communication skills for interacting with peers and college personnel.

REA:0100 Career Exploration
3 s.h.
Opportunity to explore, enhance, or broaden work interests, skills, and potential career opportunities; interest inventories, review of vocational experiences, interactive employer presentations, informational interviews, job site experiences; focus on selfassessment of one's individual vocational strengths.

REA:0101 Job Search Strategies 2 s.h.
2 s.h. Fundamental skills for finding employment; creating a résumé, techniques for interviewing and networking, essentials for disclosure and workplace accommodations.

REA:0103 Job Search Strategies II 1 s.h.
Continuation of REA:0101; students update résumés and references; further development of interview skills with emphasis on selfadvocacy and advancement in the workplace.

REA:0110 Entrepreneurism
1 s.h.
Characteristics, advantages, and disadvantages of self-employment; basic aspects of forming a business; marketing; acquiring start-up funding and other resources; financial obligations and monitoring of funds required for a successful business; writing a business plan.

## REA:0200 Business Support Seminar

Aspects of careers in business support; office procedures, word processing skills, oral and written communication, records management, business terminology

## REA:0202 Education Career Seminar

Aspects of careers in education; additional training typically required for careers in education, child/student needs, lesson planning.
REA:0203 Health Services Seminar
Aspects of careers in health services; office procedures and equipment, customer service skills, terminology used in health care environments.

REA:0204 Hospitality Seminar
1 s.h.
Aspects of careers in hospitality; customer service skills, phone and counter etiquette, vocabulary used in the hospitality industry.
REA:0205 Human Services Seminar
1 s.h.
Aspects of careers in human services; types of human services environments, interpersonal relationships and boundaries, paperwork requirements, terminology commonly used in human services environments.

REA:0207 Marketing/Sales Seminar 1 s.h. Aspects of careers in marketing and sales; customer service skills, use of retail equipment, marketing techniques and the importance of product appearance, pricing and advertising, vocabulary used in a retail sales environment.

REA:0208 Parks and Natural Resources Seminar 1 s.h. Aspects of careers in parks and natural resources management; operation and maintenance of equipment, safety procedures, customer service skills, typical vocabulary for positions involving care and management of shrubs, trees, flowers, and turf.
REA:0209 Skilled Trades Seminar
1 s.h.
Aspects of careers in the skilled trades; occupational skill standards in specific skilled trades, apprenticeships or advanced training required, safety in the workplace, vocabulary typical for specific skilled-trade work environments.

REA:0210 Information/Technology Seminar
1 s.h.
Aspects of careers in information technology; occupational skill requirements and standards, knowledge of typical equipment employees must operate, safety in the workplace, typical vocabulary for information technology work environments.

REA:0251 Academics and Life Skills Exploration II 0-2 s.h. Builds on basic academic and/or life skills explored in REA:0250; UI REACH instructors and university faculty work together to enhance learning opportunities while providing explicit, interactive learning opportunities; progress monitoring, reflection, and focus on maintenance of basic academic and life skills; second of a two-part series.

## REA:0300 Internship Prep

arr.
Introduction to workplace readiness skills, job expectations, and workplace environments; participation in job shadowing, creating professional résumés, and use of career assessments and personcentered goals to identify a career path or area of interest.

## REA:0301 Internship Experience

 arr. Internship experience leading to increased independence in the workplace (e.g., more independent operation of equipment, socialization, workplace safety, problem solving, conflict management); opportunity to acquire additional workplace skills in the student's career emphasis area; employers and mentors guide students in fulfilling their job responsibilities; students maintain a journal and discuss their experience with their advisor or instructor; second of three consecutive internships.
## REA:0302 Internship III <br> arr.

Internship experience with opportunities to develop more advanced skills for independent communication, problem solving, and workplace performance in the student's career emphasis area; employers and mentors observe the student in the workplace; students maintain a journal and discuss their experience with their advisor or instructor; third of three consecutive internships.

## REA:0303 Internship Group arr.

Individualized community work experiences with periodic classroom seminars; building independent work skills, such as researching bus routes and emailing weekly journals; students, instructors, and employers evaluate student's work performance.

## REA:0304 Internship V <br> Continuation of REA:0303; community work experiences with

arr. periodic classroom seminars; emphasis on work skills in student's career area of choice; soft skills needed to be an independent worker.

## REA:0211 Culinary Arts Seminar

1 s.h. REA:0305 Career Capstone
Application of knowledge and skills developed during college experience in a hands-on, experiential format. Integration of external learning experiences and activities including interviews, job fairs, networking, career advancement opportunities, and related seminars. Individual or small group experiences include seminars, independent study, and/or service projects. Requirements: UI REACH fourth-year enrollment.
Aspects of careers in recreation, training and education requirements, tasks at work, and job prospects.

## REA:0215 Advanced Customer Service

Builds on previously learned customer service concepts with application to a wide range of careers; communication techniques through various modes, technology used in customer service, guest speakers, skill development, managing difficult customer situations, and other essential customer service skills.

## REA:0220 Digital Citizenship

Making informed choices regarding media and technology in a digital age; exploration of media balance and well-being, online communication and relationships, privacy and security, and the impact of a digital footprint; responsible decision-making and communication methods in an online world. Prerequisites: REA:0020.
REA:0250 Academics and Life Skills Exploration I 1-3 s.h. Expand basic academic and/or life skills with discovery, experiential learning, progress monitoring, and self-reflection; focus on strengthening foundational skills in practical academics and life skills; first of a two-part series.

1 s.h.
REA:0310 WorkKeys Lab 1-2 s.h.
Students build essential career-related skills using curriculum that is aligned with ACT WorkKeys National Career Readiness Certificate (NCRC) assessments; topics include reading for information and applied math skills. WorkKeys is a registered trademark of ACT, Inc.

## REA:0325 Computer and Technology Literacy I

2 s.h.
1 s.h. Self-paced course to improve personal, academic, and career computer literacy and skills; online learning modules and computer-based programs to increase computer skills; email and internet searching, online learning options, online banking and purchasing, Microsoft Office programs, and online career resources.

## REA:0501 Special Topics

arr.
Topics include leisure resources, current events, science, family life, consumerism, community involvement, self-determination, self-advocacy, leadership, assistive technology, mentoring; course assignments, instruction, and student assessment in classroom and/ or community settings; may be required or elective course.
$\qquad$ nd/
arr.
Different types of careers in the food industry; workplace skills and tasks; continuing training and education options; equipment and food safety; basic preparation steps, food presentation, place settings; field trips. Requirements: enrollment in UI REACH program.

1 s.h.

# College of Engineering 

## Dean

- Ann F. McKenna

## Associate Dean, Academic Programs

- Nicole M. Grosland

## Associate Dean for Graduate Programs, Research and Faculty

- H.S. Udaykumar

## Interim Associate Dean for Diversity, Equity, and Inclusion

- Sarah C. Vigmostad

## Undergraduate degree: BSE

Undergraduate certificates: artificial intelligence, modeling and simulation in engineering; naval science and technology; technological entrepreneurship

Graduate degrees: MS; PhD
Graduate certificates: artificial intelligence, modeling and simulation in engineering; sustainable water development

Website: https://engineering.uiowa.edu/
Engineers play an important role in modern society. They design and develop new and improved materials, products, and processes ranging from nanoparticles to antibiotics to major bridges and dams. Engineers are in demand across a broad spectrum of industry, spanning traditional fields such as mechanical and electrical engineering to the emerging fields of artificial intelligence and medicine. Engineers not only satisfy society's demand for improved performance, reliability, and safety of products, they also supply solutions for unforeseen societal consequences that may arise as the result of new technologies.
The College of Engineering has six academic departments: the Roy J. Carver Department of Biomedical Engineering [p. 1453], and the departments of Chemical and Biochemical Engineering [p. 1470], Civil and Environmental Engineering [p. 1492], Electrical and Computer Engineering [p. 1525], Industrial and Systems Engineering [p. 1545], and Mechanical Engineering [p. 1563].

Moreover, research and educational activities of the college are supported by four research centers and institutes: the Center for Bioinformatics and Computational Biology, the Iowa Institute for Biomedical Imaging, IIHR-Hydroscience and Engineering, and the Iowa Technology Institute.

## Programs

## Undergraduate Programs of Study

The College of Engineering offers the Bachelor of Science in Engineering [p. 1446] (BSE) with majors in biomedical [p. 1453], chemical [p. 1470], civil [p. 1492], computer science and engineering [ $p .1525$ ], electrical [p. 1525], environmental [p. 1492], industrial [p. 1545], and mechanical [p. 1563] engineering. For information about each BSE major, see the College of Engineering department sections in the catalog.

The college also offers combined undergraduate degree programs with the College of Liberal Arts and Sciences and the Tippie College of Business; a dual degree with the University of Northern Iowa; a combined BSE/master's degree program in each engineering
discipline; and combined BSE/master's degrees with the Department of Computer Science, the Department of Occupational and Environmental Health, and the School of Planning and Public Affairs (also see the graduate Certificate in Transportation Planning [p. 1704] in the Graduate College). For additional information, see "Combined and Dual Degrees" in the Bachelor of Science in Engineering, BSE [p. 1448] section of the catalog.

In addition, the College of Engineering offers the undergraduate Certificate in Artificial Intelligence, Modeling and Simulation in Engineering [p. 1444], a Certificate in Naval Science and Technology [p. 1583], and partners with the Tippie College of Business to offer a Certificate in Technological Entrepreneurship [p. 1588] for undergraduate engineering students.

## Graduate Programs of Study

The College of Engineering offers graduate degree programs, the Master of Science (MS) and Doctor of Philosophy (PhD), in biomedical engineering [p. 1453], chemical and biochemical engineering [p. 1470], civil and environmental engineering [p. 1492], electrical and computer engineering [p. 1525], industrial engineering [p. 1545], and mechanical engineering [p. 1563]. See the College of Engineering Graduate Studies website for an overview, and the department sections in the catalog for information about specific areas of research and study, admission and degree requirements, and financial support for the graduate programs. The College of Engineering also offers the graduate Certificate in Artificial Intelligence, Modeling and Simulation in Engineering [p. 1445], and a graduate Certificate in Sustainable Water Development [p. 1585].

## Facilities and Resources

## College of Engineering Facilities

## Seamans Center for the Engineering Arts and Sciences

The Seamans Center for the Engineering Arts and Sciences is home to the College of Engineering. In addition to classrooms, conference rooms, instructional laboratories, and faculty offices, the Seamans Center houses the Lichtenberger Engineering Library, the Hanson Center for Technical Communication, a machine shop, an electronic shop, student work spaces, computational facilities, and research laboratories. A number of classrooms and open spaces located throughout the building were designed to readily accommodate collaborative work.

## Engineering Student Services

The professional staff of Engineering Student Services administer student services for the College of Engineering, including advising, tutoring, student records, and global engineering. It also is the administrative home of Engineering Career Services and the Hanson Center for Technical Communication.

## Engineering Career Services

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing,
postgraduation outcome collection, and the university's online recruiting system, Handshake.

## Leadership, Ethics, and Professional Pathways (LEaPP)

The LEaPP Academy aims to provide students with the knowledge, skills, and perspectives that will enhance their long-term success, make them valuable leaders to the companies that employ them, and develop them as ethically and globally-aware citizens of the world.
LEaPP Scholars will complete a number of cocurricular activities to earn leadership, ethical thinking, \& professional development credentials. Individuals that complete the LEaPP Academy will receive collegiate accolades and be honored with graduation cords specific to the LEaPP Program. The LEaPP Academy is designed to be accessible no matter the semester or timeline in which a student joins; each piece is individualized and self-led to offer the best experience to each student based on their needs.

## Hanson Center for Communication

The Hanson Center for Communication is an endowed program that works closely with engineering faculty to train students in verbal and written communication throughout the curriculum. The center helps create, manage, and grade writing and presentation assignments and provides training to students, tutors, and faculty on best practices for communication. In addition, the Hanson Center for Communication is home to an innovative peer-training center that conducts hundreds of one-on-one and team tutoring sessions each year. The center helps review lab reports, topical papers, technical essays, and technical presentations each semester. Peer tutors are undergraduate students who have shown exceptional promise as communicators and provide individualized feedback throughout the writing and presentation process. In addressing global concerns (organization, clarity, and context), peer tutors help their fellow students transform rough drafts into persuasive, logical documents and presentations.

## Global Engineering

Many of today's top employers are seeking engineering graduates with global experiences and competencies who can effectively interact with colleagues and customers around the world. Successful engineers are able to communicate across cultures, work on diverse teams, and productively deal with issues and conflicts arising from difference.

University of Iowa engineering students have a variety of opportunities to study, pursue internships, or conduct research abroad. Students can enroll in credit-bearing courses in English to fulfill engineering or general education requirements or earn credits toward a minor in another discipline or world language. In addition to completing coursework abroad, engineering students can pursue experiential opportunities abroad, including global internships, conducting independent research in other countries, and volunteering. For more information, see Global Engineering on the College of Engineering website. The College of Engineering and International Programs support these endeavors by offering students a variety of scholarships and funding.

## Engineering Computer Services

Engineering Computer Services (ECS) provides spaces and technology administration for curricular, administrative, and research computing at the College of Engineering. The college has three dropin computer labs with 225 high-end Linux and Windows computer workstations with graphics processing unit (GPU) support, a 24-seat computer classroom, a 45-seat machine learning and virtual realitycapable computer classroom, and a 400 -seat virtual computer lab with GPU support that students can access from the internet. Numerous public domain and commercial engineering applications support the full range of engineering classes. Software is regularly upgraded, and
hardware is refreshed at least every four years. The college's computer labs are open 24 hours a day, every day of the year.

## Engineering Electronics Shop

The Engineering Electronics Shop (EES) is a full-service electronics facility that supports sales and service for the College of Engineering and the university. EES provides design, construction, repair, calibration, and preventive maintenance services for teaching and research laboratories. The shop maintains more than 10,000 parts in stock, including electronic components, computer and office supplies, and lockers for rent. The shop has laser cutting/etching equipment, 3D printers, and a poster-plotting service.

## Engineering Machine Shop

The Engineering Machine Shop (EMS) is a full-service, light manufacturing facility that supports curricular, research, and operational needs of the College of Engineering and the university. EMS provides professional design and fabrication services and gives students, staff, and faculty controlled access to a student shop that contains a variety of manufacturing equipment. The shop has a highresolution 3D scanner, commercial 3D printers, a waterjet, a full wood shop, welding, and multi-axis CNC machines.

## Lichtenberger Engineering Library

The Lichtenberger Engineering Library is a branch of the University of Iowa Main Library and is a center of engineering college activity. Its collection includes books (including required course textbooks), tools, equipment, and electronic resources to assist at any stage of research on projects both big and small. Staff are trained to help locate information and provide training on a wide variety of skills, including patent searching, data management, tool usage, and more.
The Engineering Library, located next to the Student Commons in the Seamans Center, provides access to computer workstations, quiet study in the lower level, and group study space where students may reserve a private room for their work. The Engineering Library also houses the Creative Space, a space for students to imagine, tinker, design, and create with virtual reality, 3D scanners, and more.

## NEXUS

The NEXUS Program is an art and engineering program. NEXUS promotes collaboration efforts between the College of Engineering and the art community by getting people and ideas together. The goal is to involve students in science, technology, engineering, arts, and mathematics (STEAM) projects throughout the university and the surrounding community. The program helps participants to think outside the box.

## College of Engineering Research Centers

## Center for Bioinformatics and Computational Biology

The Center for Bioinformatics and Computational Biology (CBCB) is a multidisciplinary research center dedicated to applying high performance networking and computing to basic life science and applied biomedical research. With faculty and students representing more than 20 traditional disciplines, the CBCB has contributed to the understanding of inherited human diseases, including blinding eye disease, cancer, deafness, diabetes, autism, schizophrenia, hypertension, obesity, and heart disease. For almost 20 years, the CBCB has been at the cutting edge of high-throughput molecular discovery and interpretation in transcriptomics, genomics, and proteomics. At the confluence of these efforts lies the current wavefront of personalized genomic medicine, in which the CBCB plays a central role in partnership with labs, centers, and institutes
across the university's Carver College of Medicine and basic science programs across campus. The CBCB also has been a center for industry start-ups and partnerships with numerous commercial enterprises. The center is jointly sponsored by the College of Engineering and the Carver College of Medicine.

## Iowa Institute for Biomedical Imaging

The Iowa Institute for Biomedical Imaging conducts research in the following areas: medical imaging (CT, MR, OCT, PET, SPECT, ultrasound, multimodality imaging), medical image analysis and computer-aided diagnosis; cardiovascular image analysis (angiography-intravascular ultrasound data fusion, MR image analysis of congenital heart disease, coronary CT image analysis, early detection of cardiovascular disease); pulmonary image analysis (CT and MR image analysis of the lung); cell image analysis (cell tracking, shape analysis); virtual surgery planning (augmented reality for surgical planning), cancer-related assessment of tumor progression/ regression, staging, general machine learning; and disease/treatment outcome prediction. The institute is sponsored by the College of Engineering and the Carver College of Medicine.

## IIHR-Hydroscience and Engineering

IIHR—Hydroscience and Engineering is a world-renowned center with more than 100 years of education, research, and public service focusing on hydraulic engineering and fluid mechanics. Based in the C. Maxwell Stanley Hydraulics Laboratory, a five-story red brick building on the banks of the Iowa River, IIHR is a unit of the College of Engineering. IIHR students, faculty members, research engineers and scientists, and staff work together to understand and manage one of the world's greatest resources-water. Students from around the world benefit from IIHR's comprehensive multidisciplinary approach, which includes basic fluid mechanics, laboratory experimentation, and computational approaches.
IIHR research activities include fluid dynamics (turbulent flows, vortex dynamics, ship hydrodynamics, biological fluid flow, atmospheric boundary layer, experimental and computational fluid dynamics); environmental hydraulics (river mechanics, hydraulic structures, fish passage, sediment management, heat disposal in water bodies and power productions, bioremediation of groundwater, computational hydraulics, water-quality monitoring); water and air resources (air pollution, hydroclimatology, hydrogeology, hydrology, hydrometeorology, remote sensing, water resources and basin-scale processes); environmental engineering and science (PCBs in the air and water, innovative ways of removing contaminants from the soil and water, ultra-fine particles of pollutants in the atmosphere, bioremediation strategies for persistent groundwater contaminants); and water sustainability (development of sound strategies and technological solutions to meet the challenges facing society's growing need for water resources). In 2009, the Iowa Flood Center was founded at IIHR as the only academic center devoted solely to flood-related research and education.

The University of Iowa's Water Sustainability Initiative (WSI) brought new interdisciplinary expertise to the institute in 2013 when WSI faculty members (based in the Colleges of Liberal Arts and Sciences, Engineering, and Public Health) affiliated with IIHR. The Iowa Geological Survey joined IIHR in 2014, bringing new expertise in Iowa's subsurface resources, groundwater modeling, innovative geophysical skills, and more.

Students gain hands-on experience through close cooperation with faculty and staff on research projects funded by industry, government, and other organizations.

## Iowa Technology Institute

The Iowa Technology Institute (ITI) conducts basic and applied research. The mission is to cultivate collaboration across disciplines, invent advanced technologies, and conduct trailblazing research in
design, simulation, and experimentation that enables a safer and more productive future. ITI provides a unique environment for research and development for faculty, graduate and undergraduate students, research fellows, and professional scientists. ITI spans more than 20 laboratories and centers, led by the Operator Performance Laboratory, the Virtual Soldier Research program, and the Atmospheric and Environmental Research Lab.

Research at ITI focuses on advanced manufacturing and materials, human modeling and simulation, aerospace technology, biotechnology, environment and energy, and systems and sensors. Scientists conduct experiments in flight testing, human performance, robotics, biomedical and biochemical research, machine learning, smart sensors, remote sensing, renewable energy, and modeling of environmental change.

ITI has a satellite office in Orlando, Florida, and has major contracts with the U.S. military and industry partners.

## High School Program <br> FIRST Tech Challenge

For Inspiration and Recognition of Science and Technology (FIRST) gives students the opportunity for real-world application of science, technology, engineering, and math (STEM) concepts. Students participate in an atmosphere that encourages team building, entrepreneurship, and sportsmanship. FIRST Tech Challenge (FTC) allows teams of students to be responsible for designing, building, and programming robots to compete in an alliance format against other teams. Teams are required to develop strategy and build robots based on sound engineering principles. Students learn about working in a team environment, effective communication skills, the ability to fail and succeed at the same time, and competing fairly while being supportive of their competition.

## Courses

The engineering course requirements for engineering majors are outlined in the respective catalog sections. Each undergraduate program builds upon a core program; see the Bachelor of Science in Engineering [p. 1446] in the catalog. Not all engineering core courses listed below are required for each engineering major. Core program courses are intended for College of Engineering students. Undergraduate students in other disciplines who wish to register for core engineering courses should complete a special permission form.

- Engineering Courses [p. 1438]
- Engineering and Information Technology Courses [p. 1440]

## Engineering Courses

ENGR:0000 Engineering Internships and Co-ops
For engineering students completing a semester-long internship experience while working 35-40 hours a week at a professional company.
ENGR:0001 Engineering Co-op
Multiple-semester cooperative education experience for students working 35-40 hours a week at a professional company.

## ENGR:0004 Engineering Academic Internship

Academic credit for engineering majors participating in the Cooperative Education and Internship Program. Requirements: for international students-F-1 or J-1 visa, engineering undergraduate standing, full-time internship offer letter in hand (at least 40 hours/week and one semester in length), internship approved by International Student and Scholar Services for F-1 Curricular Practical Training (CPT) or J-1 Academic Training (AT), concurrent registration in approved $3 \mathrm{~s} . \mathrm{h}$. distance education or evening course, and preapproval of internship by Engineering Career Services; noninternational students may be eligible on case-by-case basis.
ENGR:1000 Engineering Success for First-Year Students Introduction to engineering student life; electronic resources; keys to and skills for success; coping with adversity; selecting a major; advising; curriculum choices and career objectives; ethics; communication; internships and co-ops; job search skills.

## ENGR:1029 First-Year Seminar

arr.
Introduction to engineering fields of study; work closely with a faculty member or senior administrator; participation that eases the transition to college-level learning; cutting-edge research taking place in the College of Engineering.
ENGR:1100 Introduction to Engineering Problem Solving 3 s.h. Development and demonstration of specific problem solving skills; directed project or case study involving actual engineering problems and their solutions.

ENGR:1300 Introduction to Engineering Computing 3 s.h.
Engineering problem solving using computers; introduction to digital computations, problem formulation using a procedural highlevel language; structured, top-down program design methodology; debugging and testing; introduction to use of software libraries; examples from numerical analysis and contemporary applications in engineering. Corequisites: MATH:1550.

## ENGR:2110 Statics

2-3 s.h.
Vector algebra, forces, couples, moments, resultants of force couple systems; friction, equilibrium analysis of particles and finite bodies, centroids; applications. Prerequisites: MATH:1550. Corequisites:
MATH:1560 and PHYS:1611.

## ENGR:2120 Electrical Circuits

3 s.h.
Kirchhoff's laws and network theorems; analysis of DC circuits; first order transient response; sinusoidal steady-state analysis; elementary principles of circuit design; SPICE analysis of DC, AC, and transient circuits. Corequisites: MATH:2560.

## ENGR:2130 Thermodynamics

3 s.h.
Basic elements of classical thermodynamics including first and second laws, properties of pure materials, ideal gas law, reversibility and irreversibility, and Carnot cycle; control volume analysis of closed simple systems and open systems at steady state; engineering applications, including cycles. Prerequisites: PHYS:1611 and CHEM:1110. Corequisites: MATH:1560.

## ENGR:2510 Fluid Mechanics

4 s.h.
Fluid properties; hydrostatics; transfer of mass, momentum, and energy in control-volume and differential forms; dimensional analysis and similitude; laminar and turbulent flow in conduits; flow past bluff bodies and airfoils; engineering applications; experimental laboratories, computer simulation projects. Prerequisites: MATH:2560 and ENGR:2710. Corequisites: ENGR:2130.

## ENGR:2710 Dynamics

3 s.h. multiparticle systems, 2D motion of rigid bodies applications. Prerequisites: ENGR:2110 and MATH:1550.
arr. ENGR:2720 Materials Science 3 s.h.
Concepts and examples of selection and applications of materials used by engineers; mechanical, electrical, and thermal properties that govern a material's suitability for particular applications; lectures supplemented by laboratory experiments. Prerequisites: CHEM:1110. Corequisites: MATH:1550.

## ENGR:2730 Computers in Engineering 2-3 s.h.

Advanced programming; good software engineering techniques including pseudocode and documentation dynamic data structures, recursive programming, procedural and object-oriented computing, inheritance, and standard template library; C++. Prerequisites:
ENGR:1300.
ENGR:2750 Mechanics of Deformable Bodies 3 s.h.
Elementary theory of deformable bodies, stress, strain; axial, transverse, bending, torsion, combined and buckling loads; deflection of beam. Prerequisites: ENGR:2110. Corequisites: MATH:2560.
ENGR:2995 Introduction to Artificial Intelligence and Machine Learning in Engineering
Introduction to artificial intelligence (AI), machine learning, data science, and data driven problem solving across all engineering disciplines; topics include supervised and unsupervised learning, clustering, heuristics, feature selection, ethics of AI-fairness and privacy issues, and performance evaluation; first in a series. Prerequisites: ENGR:1300. Corequisites: MATH:2550. Requirements: practical knowledge of programming, rudimentary understanding of probability concepts, and sophomore standing.
ENGR:4000 Engineering Honors Seminar
Completion of an approved project under the supervision of a faculty member. Requirements: engineering honors and junior or higher standing.

## ENGR:4001 Leadership Seminar: Mediocrity is Not an Option

1 s.h.
Skills needed to gain competitive edge in professional world with understanding that mediocrity is not an option; importance of developing a career plan, power of networking, significance of soft skills, value of mentoring; participation in series of discussions and activities; deeper insight of strengths and weaknesses, how to enhance skills that employers desire, and become effective leaders in workplace; presentation by retired chief operating officer of a leading aerospace company.
ENGR:4010 Engineering Grand Challenges Program Fellow 0 s.h. The Engineering Grand Challenges Program is designed to prepare tomorrow's engineering leaders to solve the grand challenges facing society during the next century; through completion of components of the program, students have the opportunity to engage in research relating to their selected grand challenge, explore interdisciplinary coursework, gain an international perspective, engage in entrepreneurship, and give back to the community through service learning; for students who have been accepted as a fellow into the Engineering Grand Challenges Program and are working on completion of the program requirements. Requirements: acceptance to the Engineering Grand Challenges Program.

## ENGR:4011 Engineering Grand Challenges Program Scholar <br> 0 s.h.

The Engineering Grand Challenges Program is designed to prepare tomorrow's engineering leaders to solve the grand challenges facing society during the next century; through completion of components of the program, students have the opportunity to engage in research relating to their selected grand challenge, explore interdisciplinary coursework, gain an international perspective, engage in entrepreneurship, and give back to the community through service learning; for students who have been accepted as a scholar to the Engineering Grand Challenges Program and are working on completion of the program requirements. Requirements: acceptance to the Engineering Grand Challenges Program.

ENGR:4012 Engineering Grand Challenges Program Final 0 s.h. The Engineering Grand Challenges Program is designed to prepare tomorrow's engineering leaders to solve the grand challenges facing society during the next century; through completion of components of the program, students have the opportunity to engage in research relating to their selected grand challenge, explore interdisciplinary coursework, gain an international perspective, engage in entrepreneurship, and give back to the community through service learning; for students who have been accepted to the Engineering Grand Challenges Program and are in the final semester of completing the program requirements. Requirements: acceptance to the Engineering Grand Challenges Program.

## ENGR:5270 Finding Truth in a Sea of Big Data (and Social

 Media)1 s.h. How to detect and defuse misinformation from mainstream and social media; recognition of where misinformation occurs, what makes it misinformation, and provide statisticians or fellow scientists with a technical explanation of why a particular claim is nonsense; content is noncommittal of any political orientation since misinformation comes in all shapes and sizes from all corners of political spectrum. Requirements: engineering graduate standing.

## ENGR:7270 Engineering Ethics <br> 1 s.h.

Introduction to practical issues associated with being a responsible scientist; topics in responsible conduct of research in engineering and the sciences using case studies, presentations, and discussions with visiting speakers; conforms to mandates set by the Office of the Vice President for Research and the Graduate College to train graduate students and postdoctoral scholars/fellows in responsible conduct of research. Requirements: first-year graduate standing in College of Engineering.

## ENGR:7604 Engineering Ethics for Post Docs

Introduction to practical issues associated with being a responsible scientist; topics in responsible conduct of research in engineering and the sciences using case studies, presentations, and discussions with visiting speakers; conforms to mandates set by the Office of the Vice President for Research and the Graduate College to train graduate students and postdoctoral scholars/fellows in responsible conduct of research. Requirements: new postdoctoral research scholar/fellow in College of Engineering.

## Engineering and Information Technology Courses

EIT:5120 Modern Automation and Control
3 s.h.
Study of sensor, motors, control, process automation, and internet of things (IoT).

## EIT:5135 Modern Information Systems

Introduction to enterprise information systems; RESTful service model, cloud service models, data storage models, big data considerations, network basics, security and privacy considerations; blockchain technology and its applications.

## EIT:5150 Applied Artificial Intelligence

3 s.h.
Artificial Intelligence (AI), search and logic, data science and analysis, advanced machine learning and deep learning, digital manufacturing and design, signal processing and fault diagnosis, AI robotics and computer vision, and applications in engineering.

## EIT:5155 Cyber-Physical Systems 3 s.h.

Introduction to modern "smart" systems providing intelligent monitoring, control, and coordination of societal, environmental, and business infrastructure; layered architecture for, relevant applications of, and projects involving conceptual design of cyber-physical systems.

## EIT:5211 Machine Learning and Scientific Computing in

 EngineeringNumerical methods in scientific computing; root problems and optimization; linear algebraic equations; eigenvalue problems; numerical differentiation and integration; interpolation and curve fitting; initial value and boundary value problems; machine learning in regression, classification, and clustering problems; Python programming and scikit-learn packages.

## EIT:5216 Manufacturing Process and Modeling

Fundamental science, modeling, and simulation technologies in materials processing; essential knowledge in automation and control of manufacturing systems; material removal processes, forming, microfabrication, and nontraditional material processes; finite element modeling/simulation of material processes; automation and control of manufacturing systems and processes.

EIT:5220 Advanced Control Engineering 3 s.h. State-space representation of linear systems, equilibrium points, linearization, controllability, observability, stability, state feedback control, linear observer design, and separation principle.
EIT:5224 Mechanical Design and Realization 3 s.h.
Solid modeling, assemblies, drawings, geometric dimensioning and tolerancing, and basic engineering design process; use of analysis tools (e.g., Finite Element Analysis), fatigue and durability, optimization software.
EIT:5240 Kinematics of Modern Robotics 3 s.h.
Robotics motion, configuration space, and path planning.
EIT:5298 Mechanical Component Durability and Integrity Analysis
System and component design, stress analysis, static failure, fatigue, fracture mechanics, vibration, materials science, and product life cycle.

## EIT:5351 Cybersecurity

Taxonomy of security threats and attacks; chain-of-trust principle; authentication, access control, and security domains; perimeter security and defense in depth; cryptographic protocols; key management and distribution; security assessment, internet of things (IoT) security and privacy issues.
EIT:5352 Modern Database Systems
Introduction to contemporary database architectures: relational, key-value, document store, and graph-based; relative strengths and weaknesses of database architectures; enterprise scalability issues; data aggregation and visualization; project work involving use of modern database systems (e.g., MySQL, Redis, MongoDB, Neo4j).

## EIT:5353 Big Data and Machine Learning

 3 s.h.Storage, management, and analysis of very large data sets; distributed file systems and object stores; MapReduce framework for processing large data sets; machine learning techniques; classification and clustering; pattern recognition; projects involving big data and machine learning frameworks (e.g., Apache Hadoop).

## EIT:5380 Software Engineering Methods, Tools, and

 FrameworksModern agile software development practices for cloud and webbased applications using state-of-the-art software engineering languages, tools, and technologies; software as a service (SaaS) architecture; software testing; introduction to enterprise application development frameworks; team-based project.

## EIT:5381 Enterprise Software Engineering

3 s.h.
Modern DevOps practices and toolchains for enterprise information systems; scalable architecture; cloud services (e.g., SaaS, PaaS, LaaS); load balancing/autoscaling; identity management and security; performance monitoring and tuning; continuous integration and hot deployment.

EIT:5382 Human-Computer Interaction Design and User

## Experience

3 s.h.
Principles and guidelines for design and evaluation of humancomputer interactions (HCI); design methodologies (e.g., participatory design, low- and high-fidelity prototyping); user interface technologies (e.g., input and output devices, interaction styles); quantitative and qualitative evaluation of user interfaces (e.g., expert reviews, usability testing).

## Engineering and Information Technology, MS

The rapid expansion of computer, information, and advanced manufacturing technology throughout all segments of business and industry is creating challenges for companies that seek to keep pace with the latest technological and engineering advancements. The MS in engineering and information technology program is intended to provide a rigorous, yet broadly accessible platform for practicing BSlevel engineers and bachelor's degree graduates from other related disciplines to obtain advanced training in contemporary engineering and information technology areas.

Rather than focusing in one area, the MS program provides a breadth of exposure to areas that are key to the design, implementation, and manufacturing of complex, smart systems. This exposure includes coursework in software engineering, networking, cloud computing, machine learning, robotics, advanced manufacturing, testing/quality assurance, and associated legal, regulatory, environmental, and ethical issues.

The MS in engineering and information technology is administered by the College of Engineering.

## Requirements

Applications for the MS in engineering and information technology are not being accepted at this time.

The Master of Science program in engineering and information technology requires $30 \mathrm{~s} . \mathrm{h}$. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00. Students are allowed up to 6 s.h. of approved transfer credit.

Students work with an academic advisor to formulate a plan of study. The degree requires $12 \mathrm{~s} . \mathrm{h}$. of core courses and 18 s.h. in a subprogram-information technology or mechanical engineering.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must have a bachelor's degree in engineering, computer science, or a related field and an undergraduate grade-point average (GPA) of at least 3.00 . Those whose GPA is slightly below 3.00 may be considered for admission. No Graduate Record Examination (GRE) General Test scores are required.

Those whose first or official language is not English must score as follows on the Test of English as a Foreign Language (TOEFL): a score of 550 or higher on the paper-based (PBT) version or a score of 81 or higher on the internet-based (iBT) version.

# Artificial Intelligence, Modeling and Simulation in Engineering 

Chair, Department of Mechanical Engineering

- Ching-Long Lin

Undergraduate certificate: artificial intelligence, modeling and simulation in engineering

Graduate certificate: artificial intelligence, modeling and simulation in engineering

Faculty: https://engineering.uiowa.edu/people/me-people/me-faculty
Website: https://me.engineering.uiowa.edu/
Artificial intelligence (AI) is a technology that mimics human intelligence to perform complex tasks. Machine learning is a subfield of AI that uses statistical methods to learn from data without being explicitly programmed. Deep learning is a main subset of machine learning that uses multi-layered neural networks to learn from data.
Modeling and simulation in engineering is a field that uses mathematical models as a basis for simulations to generate data analyzed for product and system design. Modeling and simulation is a knowledge-based approach that develops models to generate data, while machine learning is a data-based approach that learns from data to generate models.

The artificial intelligence, modeling and simulation (AIMS) program teaches students:

- the importance of uncertainty quantification in all methods;
- the various combinations of machine learning with modeling and simulation; and
- the notion of using hybrid models toward the design of intelligent complex machines.
The certificate is administered by the Department of Mechanical Engineering [p. 1563].

## Programs

## Undergraduate Program of Study

## Certificate

- Certificate in Artificial Intelligence, Modeling and Simulation in Engineering [p. 1444]

## Graduate Program of Study

## Certificate

- Certificate in Artificial Intelligence, Modeling and Simulation in Engineering [p. 1445]

## Artificial Intelligence, Modeling and Simulation in Engineering, Certificate

## Requirements

The undergraduate Certificate in Artificial Intelligence, Modeling and Simulation in Engineering (AIMS) requires a minimum of 18 s.h. of credit. Students must earn a grade-point average of at least 2.00 in coursework for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

Students are strongly encouraged to participate in at least one workshop related to Python, R, or high-performance and parallel computing offered by the Information Technology Services Research Services (ITS-RS) department; see Upcoming Workshops on the ITS-Research Services website. Students are also encouraged to participate in the HACKUIOWA hackathon organized by the UI Hydroinformatics Lab.

Mechanical engineering students may use the certificate as a tailored engineering focus area by adding at most two additional eligible courses. In addition, mechanical engineering students may earn the Certificate in Artificial Intelligence, Modeling and Simulation in Engineering while they complete the mechanical engineering design, the manufacturing, or the robotics and autonomous systems focus area for their major.
Students may petition to substitute an appropriate related course for a required or elective course in consultation with the AIMS undergraduate certificate director. See Artificial Intelligence, Modeling and Simulation (AIMS) Certificate Programs on the College of Engineering website for more information.
The Certificate in Artificial Intelligence, Modeling and Simulation in Engineering requires the following coursework.

## Required Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Scientific Computing and <br> ME:4111 | Machine Learning |
| ME:4150 | Artificial Intelligence in <br> Engineering | 3 |

## Elective Courses

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| Three of these: | Computer-Aided Engineering |  |
| ME:4110 | Engineering Design <br> Optimization | 3 |
| ME:4112 | Manufacturing Processes <br> Simulations and Automation | 3 |
| ME:4116 | Finite Element Analysis | 3 |
| ME:4117 | Advanced Linear Control <br> ME:4120 | Systems <br> Computational Naval <br> ME:4175 |
| ME:5143 | Computational Fluid and <br> Thermal Engineering | 3 |
|  | Cymamics | 3 |
|  |  | 3 |

| ME:5170 | Data-Driven Analysis in <br> Engineering Mechanics | 3 |
| :--- | :--- | :---: |
| ME:5300 | Uncertainty Quantification and <br> Design Optimization | 3 |

## Capstone Course

Students must complete a capstone design project on an approved topic related to the certificate.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| One of these: | Mechanical Engineering Design <br> Project | 3 |
| ME:4086 | Individual Investigations: <br> Mechanical Engineering | 3 |
| ME:4098 |  |  |

# Artificial Intelligence, Modeling and Simulation in Engineering, Graduate Certificate 

## Requirements

The graduate Certificate in Artificial Intelligence, Modeling and Simulation in Engineering (AIMS) requires a minimum of 15 s.h. of credit. Students must earn a grade-point average of at least 3.00 in coursework for the certificate. The certificate program is most appropriate for University of Iowa graduate students enrolled in the College of Engineering and open to graduate students from other disciplines.

Students are strongly encouraged to participate in at least one workshop related to Python, R, or high performance and parallel computing offered by the Information Technology Services Research Services (ITS-RS) department; see Upcoming Workshops on the ITS-Research Services website. Students are also encouraged to participate in the HACKUIOWA hackathon organized by the UI Hydroinformatics Lab.

The Certificate in Artificial Intelligence, Modeling and Simulation in Engineering requires the following coursework.

## Required Courses

Students must complete at least two of the following courses but may choose to complete all three courses as part of the certificate.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least two of these: | Data-Driven Analysis in |  |
| ME:5170 | Engineering Mechanics | 3 |
| ME:5300 | Uncertainty Quantification and <br> Design Optimization <br> Me:6255 | Multiscale Computational <br> Science and Engineering |

Students select courses from the following list to reach a total of 12 s.h. of credit when combined with two or all three of the courses listed above. Students may petition to substitute other relevant graduatelevel courses for the courses below in consultation with the AIMS faculty advisor.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least one of these: |  | 3 |
| ME:4117 | Finite Element Analysis | 3 |
| ME:4150 | Artificial Intelligence in <br> Engineering | 3 |
| ME:4175 | Computational Naval <br> Hydrodynamics |  |
| ME:5143 | Computational Fluid and <br> Thermal Engineering | 3 |
| ME:6240 | Probabilistic Inference and <br> Estimation for Mechanical <br> Systems 7256 | Computational Solid Mechanics |
| ME:7257 | Probabilistic Mechanics and <br> Reliability | 3 |
|  |  | 3 |
|  |  | 3 |

ME:7269
Computational Fluid Dynamics and Heat Transfer

## Elective Course

In addition to the following courses, students may count a graduatelevel course from another College of Engineering department or an independent investigation opportunity not listed below in consultation with the AIMS faculty advisor.
$\left.\begin{array}{llc}\begin{array}{ll}\text { Course \# } & \text { Title } \\ \text { One of these: }\end{array} & \text { Hours } \\ \text { ME:6198 } & \text { Individual Investigations: } \\ \text { Mechanical Engineering }\end{array}\right]$ arr.

# Bachelor of Science in Engineering 

## Undergraduate major: BSE

## Website: https://engineering.uiowa.edu/

The Bachelor of Science in Engineering (BSE) degrees with majors in biomedical, chemical, civil, electrical, environmental, industrial, and mechanical engineering are accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET). The computer science and engineering program is accredited by the EAC and the Computing Accreditation Commission (CAC) of ABET.
Each program has its own set of articulated educational objectives, while all programs are designed to ensure that graduates possess the following at the time of graduation:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors;
- an ability to communicate effectively with a range of audiences;
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions; and
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Computer science and engineering majors will be able to do each of the following as they relate directly to computing:

- analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions;
- design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline;
- communicate effectively in a variety of professional contexts;
- recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles;
- function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline; and
- apply computer science theory and software development fundamentals to produce computing-based solutions.
Each program emphasizes a broad understanding of fundamental principles common to all engineering disciplines and provides students with the opportunity to specialize in a selected engineering discipline. All programs build on the university's research strengths.
Program flexibility is provided by a curriculum in which each student develops engineering competency within a particular academic program and complements it with a tailored thematic option in support of chosen career objectives-for example, engineering practice, project management, research, and development.

This section of the catalog provides information about requirements that all BSE students must fulfill, regardless of their engineering major, as well as admission information.

Engineering students may earn more than one BSE degree. They also may combine undergraduate degree programs to earn a BSE and a degree in the College of Liberal Arts and Sciences or the Tippie College of Business, or a combined BSE/MS in urban and regional planning, or a combined BSE/MS in engineering; see "Combined and Dual Degrees" in the Bachelor of Science in Engineering, BSE [p. 1448] section of the catalog.

## Undergraduate Majors, Minors, and Certificates

## Majors

The College of Engineering has six departments and offers eight undergraduate BSE majors. View the BSE majors under each of the College of Engineering departments in the catalog.

## Minors

The College of Engineering does not offer a minor. Engineering students may earn minors in a number of programs offered by other undergraduate colleges at the University of Iowa. For descriptions of minors and their requirements, view Find Your Program on the General Catalog website and select "undergraduate minors."

## Certificates

The College of Engineering offers three undergraduate certificate programs. Engineering students also may earn certificates offered by colleges across the university. The College of Engineering partners with the Tippie College of Business to offer the Certificate in Technological Entrepreneurship [p. 1588], which is tailored specifically for engineering students who intend to start and operate their own business or who would like to understand and learn about managing innovation in business environments. The college also offers the Certificate in Artificial Intelligence, Modeling and Simulation in Engineering [p. 1444] and the Certificate in Naval Science and Technology [p. 1583]. Other certificates of particular interest to engineering students include the Certificate in International Business [p. 1192] (Tippie College of Business) and the Certificate in Sustainability [p. 2102] (University College). For descriptions of certificates and their requirements, view Find Your Program on the General Catalog website and select "certificates."

## Cooperative Education and Internship Program

The Cooperative Education and Internship Program supports students as they explore and develop their careers through periods of professional practice. These are professional, engineering-related experiences in business, industry, education, or government that are recognized by the College of Engineering. Experiences range from 10 -week summer internships to multiterm co-ops. Students find co-ops and internships in several ways, including career fairs, job search websites, applying directly through the company's website, networking, personal connections, and Handshake (the University of Iowa's primary online recruiting system).

All students in the College of Engineering are eligible to participate in the co-op and internship program upon completion of one full semester at the university. Students are encouraged to begin their search early so that they may acquire a co-op or internship experience starting the summer after their first or second year. Students complete co-op and internship assignments at many companies around the country.

Internships and co-ops may be documented on the transcript when students follow the appropriate registration steps. For further details, see Engineering Career Services on the College of Engineering website.

## Programs

## Undergraduate Program of Study

## Major

- Bachelor of Science in Engineering [p. 1448]

## Policies

Students can view academic policies on the College of Engineering Current Students web page.

## Admission

First-year students are eligible for direct admission into the College of Engineering if they achieve a score of at least 265 on the Regent Admission Index (RAI), have a cumulative high school grade-point average of at least 3.33 , and meet the high school course requirements.

Engineering high school course requirements include:

- four years of English/language arts;
- four years of mathematics (including two years of algebra, one year of geometry, and one year of higher math such as precalculus or equivalent);
- two years of a single world language;
- three years of natural science, preferably with at least one year of chemistry and at least one year of physics; and
- two years of social studies.

Grades of A or B in all high school math and science courses are highly recommended.

Students who are unsure whether to pursue a degree in engineering or a degree in liberal arts and sciences are strongly encouraged to begin in engineering if they meet the admission requirements.
Students who fall short of the engineering admission requirements may enroll in the College of Liberal Arts and Sciences and be designated as Engineering Interest students. They may apply to transfer into the College of Engineering for the following semester once they have successfully completed MATH:1550 Engineering Mathematics I: Single Variable Calculus (or equivalent), and either CHEM:1110 Principles of Chemistry I or PHYS:1611 Introductory Physics I.

More information about admission and the College of Engineering is available; see First-Year Students on the College of Engineering website.

## Transfer Applicants

Transfer applicants must have completed the same high school unit requirements as entering first-year students and must submit an official high school transcript as well as a transcript of college work undertaken at other institutions. Collegiate coursework may be used to correct high school deficiencies.
Transfer students must have completed, with a grade of B-minus or higher, MATH:1550 Engineering Mathematics I: Single Variable Calculus (or equivalent), and either CHEM:1110 Principles of Chemistry I or PHYS: 1611 Introductory Physics I (the first semester of chemistry designed for majors or the first semester of calculusbased physics) or their equivalents.

Grades earned in additional math, science, and engineering courses (ideally all As and Bs) and overall grade-point average also are considered in transfer applications. Transfer courses completed with a grade below a C-minus are not accepted by the College of Engineering and will not satisfy degree requirements.
Information about admission requirements for transfer students is available on the college's website.

# Bachelor of Science in Engineering, BSE 

## Requirements

The Bachelor of Science in Engineering (BSE) requires a minimum of 128 s.h. of credit. Students must be enrolled as a UI College of Engineering student for the last 30 s.h. of work toward the degree, or 45 of the last $60 \mathrm{~s} . \mathrm{h}$., or a total of 90 s.h. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

Engineering students earn the BSE degree in one of eight undergraduate programs of study (majors): biomedical engineering [ p .1453 ], chemical engineering [ p .1470 ], civil engineering [p. 1492], computer science and engineering [p. 1525], electrical engineering [p. 1525], environmental engineering [p. 1492], industrial engineering [p. 1545], or mechanical engineering [p. 1563].
The collegiate curriculum requires all students to complete a minimum of 24 s.h. of mathematics and basic sciences; $7 \mathrm{~s} . \mathrm{h}$. of core engineering; and 19 s.h. of general education courses (including RHET: 1030 Rhetoric and 15 s.h. of additional electives). Collegiate courses are typically completed early in a student's undergraduate program, thereby allowing students to change programs during the first semesters without a loss in course credit.
These foundational courses serve as prerequisites or corequisites for more advanced coursework in the major. Each major has several focus areas consisting of required and elective courses that provide students the flexibility to tailor their studies to their career interests. Each major culminates in a capstone senior design project.

## Collegiate Curriculum Requirements

All students in the College of Engineering are required to complete the following courses as part of their collegiate curriculum.

| Requirements | Hours |
| :--- | :--- |
| Mathematics and Basic Sciences | 24 |
| Engineering Core | 7 |
| General Education | 19 |

## Mathematics and Basic Sciences

Students complete a minimum of 24 s.h. in mathematics and basic sciences. Courses with the option of a laboratory component must be taken with the lab. Students should refer to the individual departmental section in the catalog for information about fulfilling the statistics requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CHEM:1110 | Principles of Chemistry I (with <br> lab) | 4 |
| MATH:1550 | Engineering Mathematics I: <br> Single Variable Calculus | 4 |
| MATH:1560 | Engineering Mathematics II: <br> Multivariable Calculus | 4 |
| MATH:2550 | Engineering Mathematics III: <br> Matrix Algebra | 2 |
| MATH:2560 | Engineering Mathematics IV: <br> Differential Equations | 3 |
| PHYS:1611 | Introductory Physics I (with lab) | 4 |
| Statistics course (options depend on major) | 3 |  |

## Engineering Core

The engineering core consists of two engineering courses and an engineering success seminar required by all undergraduate programs in the College of Engineering.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGR:1000 | Engineering Success for First- | 1 |
| ENGR:1100 | Year Students | 3 |
| ENGR:1300 | Introduction to Engineering <br> Problem Solving | Introduction to Engineering <br> Computing |

## General Education

Students are required to complete 19 sh. of general education courses; for more information, see General Education Component [p. 1448] in this section of the catalog.

## First- and Second-Semester Plan of Study

The majority of the collegiate curriculum can be completed in the first two semesters.

## First Semester

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGR:1000 | Engineering Success for First- <br> Year Students | 1 |
| ENGR:1100 | Introduction to Engineering |  |
|  | Problem Solving | 3 |
| CHEM:1110 | Principles of Chemistry I | 4 |
| MATH:1550 | Engineering Mathematics I: | 4 |
| RHET:1030 | Single Variable Calculus | 4 |
| Rhetoric | 4 |  |
| Total Hours |  | $\mathbf{1 6}$ |

## Second Semester

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGR:1300 | Introduction to Engineering <br> Computing | 3 |
| MATH:1560 | Engineering Mathematics II: <br> Multivariable Calculus | 4 |
| MATH:2550 | Engineering Mathematics III: <br> Matrix Algebra | 2 |
| PHYS:1611 | Introductory Physics I | 4 |
| General education or major requirement course | $3-4$ |  |
| Total Hours |  | $\mathbf{1 6 - 1 7}$ |

## Major Courses and Focus Areas

The curriculum for each BSE major is described in each of the departmental sections of the catalog. Each program has a number of focus areas that are designed to help students achieve exposure to and depth of study in an area that is complimentary to their major. The focus areas enable students to gain technical skills consistent with their career goals. Moreover, these electives may contribute to earning a minor and/or certificate.

## General Education Component

The General Education Component promotes understanding of and appreciation for arts, community, culture, and learning through coursework.

Students who enter the College of Engineering with a BA or BS degree are considered to have satisfied the General Education Component.
Students who enroll in a combined degree program in the College of Engineering and with the College of Liberal Arts and Sciences or with the Tippie College of Business must complete all requirements for both degrees, including all general education requirements. Students are encouraged to complete a course for the Engineering Be Creative requirement that will satisfy a general education requirement for the second college; see Engineering Be Creative section below.

## General Education Areas

Students are required to complete 19 sh. of the General Education Component as outlined below. Some focus areas in certain majors may recommend or require specific courses to fulfill the General Education Component. Credit may be earned by examination; consult the College of Engineering.

- Rhetoric [p. 1449] (4 s.h.)
- Engineering Be Creative [p. 1449] (3 s.h.)
- Diversity, Equity, and Inclusion [p. 1450] (3 s.h.)
- Approved Course Subjects [p. 1450] (9 s.h.)

Rhetoric

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| RHET:1030 | Rhetoric | 4 |

Transfer students should refer to the Rhetoric section of the GE CLAS Core [p. 19] (College of Liberal Arts and Sciences) in the catalog for information about how transfer credit may affect the Rhetoric requirement.

## Engineering Be Creative

Students must complete at least 3 s.h. selected from the courses listed below. Note that not all courses are offered every semester. Some courses will have sections designated for students with a major in the College of Engineering.

If a course has prerequisites listed, students wishing to take the course for the Engineering Be Creative requirement will need to request that prerequisites be waived by completing the "Request Prerequisite Special Permission" form on MyUI. This form should be completed several weeks prior to registration. Contact the College of Engineering for more information.
The following courses satisfy the Engineering Be Creative requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ANIM:2125 | Introduction to Animation | 3 |
| ARTS:1060 | Elements of Digital | 3 |
| ARTS:1510 | Photography | 3 |
| ARTS:1520 | Design Fundamentals | 3 |
| CERM:2010 | Ceramics I: Handbuilding | 3 |
| CINE:1100 | The Art of Smartphone | 3 |
| CINE:1150 | Filmmaking | 3 |
| CINE:1834/ | Introduction to Screenwriting <br> for Nonmajors | 4 |
| CNW:1620 $: 1834$ | Modes of Film and Video <br> Production | 3 |
| CNW:2680 | Introduction to Creative | 3 |
|  | Nonfiction | 3 |

| CNW:2700 | The Art and Craft of Personal Writing | 3 |
| :---: | :---: | :---: |

## Diversity, Equity, and Inclusion

Students complete at least 3 s.h. from the GE CLAS Core areas of Diversity and Inclusion or Values and Culture.
The College of Engineering will accept transfer credit for the Diversity, Equity, and Inclusion requirement. Students enrolled in other University of Iowa undergraduate degree programs should be aware that transfer credit may not be accepted for similar requirements in other colleges.

## Approved Course Subjects

Students complete 9 s.h. of coursework from any of the course subjects below.

## College of Law

Students may choose from University of Iowa Center for Human Rights [p. 1726] courses (prefix HRTS); view the courses and descriptions in the corresponding College of Law section of the catalog.

## College of Liberal Arts and Sciences

Students may choose from courses in the following areas:
African American studies [p. 31] (prefix AFAM); aging and longevity studies [p. 42] (prefix ASP); American Sign Language [p. 48] (prefix ASL or ASLE); American studies [p. 51] (prefix AMST); anthropology [p. 66] (prefix ANTH); Arabic [p. 473] (prefix ARAB);
art and art history [p. 91] (prefix ANIM, ARTE, ARTH, ARTS, BKAT, DSGN, DRAW, INTM, MTLS, PHTO, PNTG, PRNT, SCLP, or TDSN) with the exception of ceramics;
Asian and Slavic languages and literatures [p. 143] (prefix ASIA,
CHIN, JPNS, KORE, or RUSS) with the exception of South Asian studies;
cinematic arts [p. 215] (prefix CINE);
classics [p. 233] (prefix CLSA, CLSG, or CLSL);
communication sciences and disorders [p. 261] (prefix CSD); communication studies [p. 277] (prefix COMM); creative nonfiction writing [p. 388] (prefix CNW); creative writing [p. 388] (prefix CW); criminology, law and justice [p. 996] (prefix CRIM); critical cultural competence [p. 331] (prefix CCCC); dance [p. 333] (prefix DANC);
digital arts [p. 938] (prefix DIGA);
disability studies [p. 361] (prefix DST);
English [p. 388] (prefix ENGL);
event planning [p. 469] (prefix EVNT);
French [p. 473] (prefix FREN);
gender, women's, and sexuality studies [p. 493] (prefix GWSS);
geography [p. 519] (prefix GEOG);
German [p. 552] (prefix GRMN); global health studies [p. 562] (prefix GHS); history [p. 634] (prefix HIST); international studies [p. 690] (prefix IS); Italian [p. 473] (prefix ITAL); journalism and mass communication [p. 709] (prefix JMC); Latin American studies [p. 739] (prefix LAS); Latina/o/x studies [p. 745] (prefix LATS); linguistics [p. 748] (prefix LING);
medieval studies [p. 792] (prefix MDVL); museum studies [p. 795] (prefix MUSM); music [p. 804] (prefix MUS);

Native American and Indigenous studies [p. 846] (prefix NAIS); philosophy [p. 855] (prefix PHIL); political science [p. 900] (prefix POLI);
Portuguese [p. 1019] (prefix PORT);
psychology [p. 919] (prefix PSY);
religious studies [p. 943] (prefix RELS);
rhetoric [p. 962] (prefix RHET) numbered 2000 or above;
social justice [p. 493] (prefix SJUS);
social work [p. 977] (prefix SSW);
sociology [p. 996] (prefix SOC);
Spanish [p. 1019] (prefix SPAN);
sport and recreation management [p. 581] (prefix SRM);
sport studies [p. 51] (prefix SPST);
Swahili [p. 473] (prefix SWAH);
theatre arts [p. 1074] (prefix THTR);
therapeutic recreation [p. 581] (prefix TR);
world languages, literatures and cultures [p. 365] (prefix CL or
WLLC); and
writing [p. 763] (prefix WRIT).
View the courses and descriptions in the corresponding College of Liberal Arts and Sciences section of the catalog.

## Graduate College

Students may choose from courses in urban and regional planning [p. 1678] (prefix URP) in the School of Planning and Public Affairs; view the courses and descriptions in the corresponding Graduate College section of the catalog.

## Tippie College of Business

Students may choose from courses in economics [p. 1157] (prefix ECON), entrepreneurship [p. 1175] (prefix ENTR), management and entrepreneurship [p. 1198] (prefix MGMT), and marketing [p. 1208] (prefix MKTG); view the courses and descriptions in the corresponding Tippie College of Business section of the catalog.

## University College

Students may choose from courses in aerospace studies [p. 2040] (prefix AERO), leadership studies [p. 2066] (prefix LS), and military science [p. 2074] (prefix MILS); view the courses and descriptions in the corresponding University College section of the catalog.

## Combined and Dual Degrees

## BSE and Undergraduate Degrees

## BSE/BBA

The College of Engineering and the Tippie College of Business offer a combined degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (BBA) from the Tippie College of Business and a Bachelor of Science in Engineering (BSE) from the College of Engineering.

Students in the combined program must complete all requirements for both degrees, including all general education requirements. They must enroll in appropriate mathematics and engineering courses early in their course of study in order to complete the program in a timely way. Because courses in natural sciences, mathematics, humanities, and social sciences count toward the BBA and the BSE, students may count a single course toward both degrees.

Students usually meet the degree requirements of both colleges in about five years; the time required depends on a student's choice of major study areas. Students should consult their advisors about whether the second-grade-only option is available to them. They are assigned two advisors, one in the Tippie College of Business Undergraduate Program Office and the other in their College of Engineering major department.

To enter the combined degree program, students must have approval from both colleges and must be admitted to both colleges. Interested students should contact the Student Development Center. For information about the BBA, including requirements for the degree, see the Bachelor of Business Administration, BBA [p. 1126] (Tippie College of Business) in the catalog.

## BSE/Liberal Arts and Sciences Degree

Students may earn two University of Iowa bachelor's degrees in a combined program in the College of Engineering and the College of Liberal Arts and Sciences. Successful candidates are awarded a BSE (Bachelor of Science in Engineering) by the College of Engineering and a BA (Bachelor of Arts), BS (Bachelor of Science), BFA (Bachelor of Fine Arts), or BM (Bachelor of Music) by the College of Liberal Arts and Sciences.

Students in combined degree programs must complete all requirements for both degrees, including the College of Liberal Arts and Sciences GE CLAS Core [p. 19] and the College of Engineering General Education Component. Students are encouraged to complete a course for the Engineering Be Creative requirement that also will satisfy a GE CLAS Core requirement. See General Education Component [p. 1448] in this section of the catalog.

Students in the combined program usually are able to meet the degree requirements of both colleges in about five academic years. The exact length of time necessary to complete the program is determined by the major areas of study selected in each college. Students who enter the combined degree program are assigned two faculty advisors, one in their major department in the College of Engineering and the other in their major department in the College of Liberal Arts and Sciences.

To enter the combined degree program, students must be admitted to both the College of Engineering and the College of Liberal Arts and Sciences and must have College of Engineering approval to enter the combined degree program. Combined degree program applicants must meet the high school course or unit requirements for admission to each of the two colleges.
It is crucial that students enroll in the proper mathematics and engineering courses early in their course of study to expedite the completion of the program. The specific engineering courses taken by each student vary according to one's engineering major. Since courses in natural sciences, mathematics, humanities, and social sciences are accepted for credit by both colleges, students may be able to count a particular course toward both degrees.
Contact the Student Development Center for information about specific requirements. To learn about liberal arts and sciences majors, visit College of Liberal Arts and Sciences [p. 17] in the catalog and select majors of interest in the departments.

## BS/BSE Dual Degree with Northern Iowa

The 3+2 dual degree program leads to a BS in applied physics from the University of Northern Iowa (UNI) and a BSE from the University of Iowa. It requires approximately three years of study at UNI followed by approximately two years of study at Iowa. There is no guarantee that students can complete the $3+2$ degree in five years.

Students interested in the program are guaranteed admission to the University of Iowa portion of the program if they have a gradepoint average of at least 3.00 (B average) in all coursework and in the chemistry, mathematics, and physics courses required by the University of Northern Iowa physics department.

During the first three years of the program, students complete at least 90 s.h. of coursework at the University of Northern Iowa. They must successfully complete courses in each of the following areas: chemistry, mathematics through differential equations, physics to satisfy the applied physics major requirements, and courses to satisfy the general education requirements. Credit for courses passed with a
grade of C or higher is transferred to the University of Iowa as credit for equivalent coursework.

At the University of Iowa, students complete the BSE requirements that were current at the time of their admission to the UI College of Engineering. Coursework completed at the University of Iowa is transferred to the University of Northern Iowa and applied toward the requirements for that institution's BS in applied physics.
When transferring to Iowa from UNI, students must submit applications for admission, housing, and financial aid to the University of Iowa by the university's established deadlines.

## BSE and Graduate Degrees

## BSE/MS Programs in Engineering

Engineering students may be eligible to enroll in one of the College of Engineering's combined BSE/MS programs, which allow students to begin working toward a master's degree in engineering while they are completing their bachelor's degree. The combined programs, which are offered by each of the college's departments, permit students to count certain courses toward both degrees, completing both programs in less time than they would need to complete them separately. See "Combined Programs" in each department's BSE sections of the catalog.

## BSE in Biomedical Engineering (Biomechanics and Biomaterials Track)/MS in Occupational and Environmental Health (Industrial Hygiene Subprogram)

BSE students majoring in biomedical engineering in the biomechanics and biomaterials track who are interested in earning a Master of Science in occupational and environmental health with an industrial hygiene subprogram may apply to the combined BSE/MS program offered by the College of Engineering and the College of Public Health. The combined program permits students to count a limited amount of credit toward the requirements of both degrees, enabling them to begin the study of public health before they complete the bachelor's degree. See the MS in occupational and environmental health Undergraduate to Graduate (U2G) information on the Department of Occupational and Environmental Health (College of Public Health) website.

## BSE in Civil Engineering/MS in Urban and Regional Planning

The College of Engineering and the School of Planning and Public Affairs offer the combined Bachelor of Science in Engineering in civil engineering/Master of Science in urban and regional planning. The program, which is completed in five years, is designed for students who wish to pursue a public or private sector career in planning, a field that encompasses the development of alternatives to improve the quality of life in cities and regions.

For additional information on the BSE in civil engineering [p. 1500], see that section of the catalog. For more information about the graduate degree, see the MS in urban and regional planning [p. 1689] (Graduate College) in the catalog. Contact Engineering Student Services for information about applying to the combined program.

## BSE in Computer Science and Engineering/ MCS

The College of Engineering and the Department of Computer Science (College of Liberal Arts and Sciences) offer a combined BSE in computer science and engineering/Master of Computer Science for computer science and engineering undergraduate students.

The combined degree program allows students to count a limited amount of credit toward both degrees. For more information, see the Master of Computer Science, MCS [p. 323] in the catalog.

## Honors

## Honors in Engineering

Outstanding undergraduate students who demonstrate exceptional accomplishment through research, directed independent study, teaching internships, or other approved nondegree enrichment activities may graduate with honors in engineering. They must maintain a University of Iowa grade-point average of at least 3.33, complete an honors project with a faculty member, and participate in a college-wide honors seminar with faculty members and other honors students. Successful completion of the honors requirements leads to a BSE with honors, which is noted on the student's transcript. See Engineering Honors Program on the College of Engineering website for details.

## University of Iowa Honors Program

In addition to honors in engineering, undergraduate students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

## Career Advancement

Engineering is a well-respected profession that is used as a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors consistently rank among the top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). On average, 93$98 \%$ of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

# Roy J. Carver Department of Biomedical Engineering 

Chair<br>- Kim L. Blackwell<br>Undergraduate major: biomedical engineering (BSE)<br>Graduate degrees: MS in biomedical engineering; PhD in biomedical engineering

Faculty: https://engineering.uiowa.edu/bme/people
Website: https://engineering.uiowa.edu/bme
The past half century has seen tremendous growth of technological activity in biology and medicine. As engineers increasingly have become involved with projects in the life and health sciences, biomedical engineering has emerged to bridge the gap between these sciences and engineering.
The Roy J. Carver Department of Biomedical Engineering fosters interdisciplinary activities across departments and colleges and maintains strong ties with the Carver College of Medicine and the Colleges of Dentistry, Nursing, and Public Health. The department strives to provide a well-rounded and superior engineering education that attracts outstanding students at both the undergraduate and graduate levels; to conduct high-quality research that enables faculty members and students to keep pace with and initiate new developments; and to serve government, industry, and institutions worldwide by making the department's facilities and faculty expertise accessible.
Department faculty members have teaching and research expertise in areas related to cardiovascular and fluid biomechanics, musculoskeletal biomechanics, biomaterials and tissue engineering, bioinstrumentation, biosystems, biomedical imaging, biological signal analysis, bioinformatics and computational biology, respiratory and pulmonary engineering, and other allied fields. Several faculty members have joint appointments with the Carver College of Medicine, the College of Dentistry, or the College of Public Health. Biomedical engineering undergraduates and graduate students collaborate with faculty members and their colleagues on research problems in the life and health sciences.

## Programs

Undergraduate Program of Study

## Major

- Major in Biomedical Engineering (Bachelor of Science in Engineering) [p. 1459]
Graduate Programs of Study

## Majors

- Master of Science in Biomedical Engineering [p. 1465]
- Doctor of Philosophy in Biomedical Engineering [p. 1467]

Facilities

## Undergraduate Teaching Laboratories

Seven dedicated undergraduate teaching laboratories are associated with the required and elective courses in biomedical engineering: the Bioimaging and Bioinformatics Laboratory; the Biomechanics and Biomaterials Laboratory; the Carver Biomechanics and Mechanobiology Laboratory; the Carver Cellular Engineering Laboratory; the Carver Medical Device Design Laboratory; the Senior Design Laboratory; and the Systems, Instrumentation, and Data Acquisition Laboratory.

## Bioimaging and Bioinformatics Laboratory

The Bioimaging and Bioinformatics Laboratory provides computer and experimental equipment to allow students to become familiar with biomedical imaging hardware and software for biomedical image analysis. The laboratory has four lab benches with computers for teamwork, two desktop ultrasound machines, and two desktop magnetic resonance imaging devices. In addition, the lab has 12 sets of in-house-built optics laboratory kits that use light sources and semitranslucent objects to simulate basic x-ray physics. Students are introduced to concepts such as image magnification as it relates to source-object distance (SOD)/source-image distance (SID), depth-dependent magnification, ideal point source verses parallel beam source effects, and projection image formation with lack of depth information artifacts. An instructor workstation and computer projector are available for presentations and software demonstrations. The lab is used primarily for the core course BME:2210 Bioimaging and Bioinformatics, the elective course BME:5210 Medical Imaging Physics, and for senior design projects.

## Biomechanics and Biomaterials Laboratory

The Biomechanics and Biomaterials Laboratory is equipped to perform experiments relating to the cardiovascular and human musculoskeletal systems as well as the various properties of biomaterials. The laboratory houses a table-top material testing machine; two cone-and-plate viscometers; compact stress-strain devices for characterizing cardiovascular tissues; goniometers; human structures biomechanical modeling sets and associated sensors; digital still, video, and motion-capture cameras for kinematic analysis; a ski binding tester; a drop tower for impact testing; digital calipers; various skeletal/bone models; an assortment of hand tools; and dissecting tools. The lab is used for the course BME:2500 Biomaterials and Biomechanics, elective courses in cardiovascular and musculoskeletal biomechanics, and senior design projects.

## Carver Biomechanics and Mechanobiology Laboratory

The Carver Biomechanics and Mechanobiology Laboratory (CBML) is a shared resource in the Roy J. Carver Department of Biomedical Engineering with a mission to enhance teaching, training, and research in the field of biomechanics and mechanobiology. Biomechanics and mechanobiology involve the study of how cells, fluids, tissues, and organs respond to physical forces. The lab contributes to the understanding of cardiovascular disease, cancer metastasis, wound healing, medical device function, and stem cell therapies.

The lab houses a planar biaxial stress-strain test apparatus, a pulse duplicator apparatus for characterizing blood flow through mechanical and tissue heart valves, a micron-resolution particle image velocimetry (micro-PIV) system for quantifying flow and particle dynamics at the microscale, a stent crimper for characterizing vascular stent designs, a multimode plate reader for quantifying cell activity and extracellular matrix (ECM) remodeling, a lyophilizer for quantifying elastin and collagen content in soft tissue samples, a micromanipulator
for performing micropipette aspiration studies, and a controlled microscope room for imaging live cells over long durations. The lab is used for courses in cardiovascular biomechanics and cellular engineering, other elective courses, and senior design projects.

## Carver Cellular Engineering Laboratory

This laboratory trains students in cell culture and biochemical analysis techniques as a foundation for future work in quantitative cell-based studies. Students learn basic cell culture techniques, protein and nucleic acid analysis, as well as techniques for studying the effects of engineered materials on cellular systems.
Major equipment in the lab includes laminar flow hoods, cell culture incubators, centrifuges, spectrophotometers, an ultracold freezer, protein and nucleic acid electrophoresis equipment, thermal cyclers, microscopes, an automated microplate reader, and various support apparatus used in cell-based studies. This teaching lab is used for the courses BME:2400 Cell Biology for Engineers and BME:5421 Cell Material Interactions.

## Carver Medical Device Design Laboratory

The Carver Medical Device Design Laboratory provides a space for students to gather to collaborate on the design of medical implants, fixtures for testing such implants, and software for modeling, analyzing, and optimizing the function of these devices. Space and equipment are provided for progressing from a back-of-the napkin sketch to a finalized computer-aided design (CAD) model and through multiple iterations of physical prototypes.
A variety of tools and equipment are available such as a micro 24 laser system, a benchtop milling machine, a bandsaw and lathe, a soldering station, an expanded plasma cleaner, a micro pulse arc welder, and five computer workstations. The lab was established to serve students with an interest in medical device design and in required and elective courses in the areas of biomaterials, biomechanics (cardiovascular and musculoskeletal), and the senior design sequence.

## Senior Design Laboratory

The Senior Design Laboratory provides a collaborative atmosphere for student groups as they create working prototypes. It has computer workstations, project workspace, and storage space for the development of senior design projects. In addition, a variety of tools and equipment are available in the lab, including electronics measurement devices, soldering tools, Dremel tools, miscellaneous sample medical equipment, and other resources for students. It is used by students taking BME:4910 Biomedical Engineering Senior Design I and BME:4920 Biomedical Engineering Senior Design II.

## Systems, Instrumentation, and Data Acquisition Laboratory

The Systems, Instrumentation, and Data Acquisition Laboratory is equipped to measure biomedical variables of clinical and physiological interest, to design and build electronic instrumentation, and to conduct modeling experiments in physiology. The lab is designed to give practice in designing and building electronic circuits to measure, acquire, and analyze signals; and acquire and analyze images. It is used for the elective courses BME:2200 Systems, Instrumentation, and Data Acquisition and BME:4710 Medical Device Design Studio, for biomeasurements and biological systems analysis, and senior design projects.

## Research Facilities and Laboratories

## Bioinformatics and Computational Biology

 LaboratoryThe Center for Bioinformatics and Computational Biology is wired for high-speed networking (100-megabit and gigabit ethernet,
hardwired and wireless). It includes two dedicated Linux clusters, 126 computing systems, 178 CPUs, more than 20 terabytes of RAM, and 250 terabytes of disk space. Computer resources include a dedicated experimental, reconfigurable computer cluster of 18 Linux systems ( 36 CPUs) connected with a dedicated, switched, copper Gigabit Ethernet intranet and a second dedicated computer server cluster of 16 Linux systems ( 32 CPUs) connected with a dedicated, switched, fiber-optic Gigabit Ethernet intranet. An additional 78 computers are used as compute servers, web servers, database servers, file servers, workstations, laptops, and for other developmental and experimental needs.

## Biomechanics of Soft Tissues Laboratory

The Biomechanics of Soft Tissues Laboratory (BioMOST) houses ViVitro Pulse duplicating left-heart simulating flow loop system, mechanical extension testers, durability testers for accelerated testing of valves, flow loop with programmable pump, resisters and compliance chambers, optical micrometer, a furnace for nitinol shape memory alloy stent fabrication, and the Vascular Simulations Replicator (a portable realistic angio-suite friendly blood flow simulator). The lab also houses high-end image and data processing workstations.

## Bioinspired and Bioengineered Microsystems Laboratory

The Bioinspired and Bioengineered Microsystems Lab is interested in exploiting bioinspired and multidisciplinary approaches (cellular, material, and bioengineering) to help understand respiratory diseases and develop effective treatments and accessible diagnostic tests to benefit patients. Structural and proteinaceous materials, such as silk fibroin, are a central research focus, as these materials enable aqueous and ambient processing, facilitate host-implant integration, and exhibit rare immunogenicity, a promising alternative to most synthetic polymers.
The laboratory is equipped with major equipment for material and bioengineering research, including a Leica Stellaris 5 confocal microscopy, a Cellink Inkcredible 3D printer, an Eppendorf 5804R centrifuge, a Laurell spin coater, an OptiMelt Automated Melting Point System, a Class 100 vertical laminar chamber, and a SpectraMax iD3 microplate detection system. The lab also has access to other shared equipment, including a biosafety hood, CO2 incubators, a chemical fume hood, $-80^{\circ} \mathrm{C}$ and $-20^{\circ} \mathrm{C}$ freezers, a fridge, an ice machine, a Thermofisher Barnstead water purification system, and a Tuttnauer 2540 E autoclave.

## Carver Laboratory for Regenerative Engineering and Translational Science

The Carver Laboratory for Regenerative Engineering and Translational Science is a state-of-the-art multi-investigator wet laboratory devoted to cell and tissue-based research. The laboratory is a transformational space that enables the biomedical engineering faculty and students (graduate and undergraduate research assistants) to interact with one another by bringing together investigators with similar yet varying fields of study, all with an emphasis on cellular and tissue engineering. The laboratory has a direct impact on training graduate students and contributes to numerous research projects across campus. The laboratory has been designed to be responsive to current and future needs; to encourage interaction among engineers, scientists, and physicians from various disciplines; to help recruit and retain qualified faculty and students; and to facilitate partnerships and development.
The laboratory is equipped with major equipment to synthesize and characterize biomaterials, including a chemical fume hood, rotary evaporator, freeze-dryer, rheometer, and several light-based curing systems. To enable growth, maintenance, and characterization
of mammalian cells, the lab also houses biosafety cabinets, incubators, a transfection system, automated cell counter, low-volume spectrophotometer, microplate reader, thermal cyclers, quantitative polymerase chain reaction $(\mathrm{PCR})$ instruments, electrophoresis units, and a gel imaging system. The dedicated microscope room includes an atomic force microscope and several fluorescent microscopes, which are equipped with confocal and live cell imaging capabilities.

## Collaborative Computational Laboratory

The Collaborative Computational Laboratory is a shared research computing resource. Research focus areas include computational fluid dynamics, medical image analysis, magnetic resonance imaging, machine learning, and artificial intelligence. Desktop computers, compute servers, and access to the campus research data storage and high performance computing cluster are available through the lab.

## Computational Biomolecular Engineering Laboratory

The Computational Biomolecular Engineering Laboratory, located in the Bowen Science Building, is a collaboration between the Roy J. Carver Department of Biomedical Engineering and the Department of Biochemistry and Molecular Biology. It includes eight workstations used to simulate biomolecular phenotypes in the context of understanding the genetics of hearing loss, rare renal diseases, and vision loss. Heavy use is made of the University of Iowa Argon compute cluster, including dedicated availability of 30 compute nodes, 50 Nvidia graphics processing units (GPUs), and 100 terabytes of backed-up storage. The lab distributes a high performance physics-based molecular simulation code called Force Field X (FFX) that is being used to produce a family of protein structures for genes associated with hearing loss, available in the Deafness Variation Database. The software also is being used to predict how pharmaceuticals crystalize (i.e., into drug tablets) and to understand their thermodynamic properties (e.g., solubility).

## Large Scale Digital Cell Analysis Laboratory

The Large Scale Digital Cell Analysis System (LSDCAS) is an automated microscopy system designed to perform non-perturbing live cell imaging. LSDCAS has been used in studies designed to determine mechanisms of cell death following treatment with anticancer therapies. Current studies involve the adaptation of the LSDCAS technology toward the development of automatic singlecell analysis techniques to be used in drug discovery. LSDCAS consists of two computer-controlled inverted Hoffman modulation contrast microscopes outfitted with environmental control chambers, motorized stages, shutters, focusing systems, and high-resolution digital camera systems.
LSDCAS is housed in a dedicated microscopy room that provides the dark environment necessary for systems that operate around the clock automatically recording cell growth and other phenomena. LSDCAS data is stored and analyzed using a data center consisting of an 8 processor Linux server with 16 gigabytes of RAM, a 30 terabyte hardware RAID storage system, and a 30 terabyte robotic tape backup system. Web application software and many other programs provide robust analysis capabilities for the large variety of data produced by the system. The LSDCAS code base contains over one hundred thousand lines of program code developed over the past two decades to provide automatic single cell analysis capabilities of general interest in cell biology. In addition, the lab has equipment and technologies generally used in cell and molecular biology, including protein and nucleic acid gel electrophoresis analysis systems, real-time reverse transcription polymerase chain reaction (RT-PCR) systems, cell culture incubators, a laminar flow cell culture biosafety cabinet, a chemical fume hood, $-80^{\circ} \mathrm{C}$ freezer, other refrigerators and freezers, an ice machine, water purification system, autoclave, and many other tools, reagents, and devices.

## Orthopedic Biomechanics Laboratory

The Orthopedic Biomechanics Laboratory occupies 20 rooms on the ground floor of Westlawn. It is configured primarily for macroscopic-level physical testing of musculoskeletal constructs (e.g., bones, articular joints, orthopedic implants) and for corresponding computational modeling. The physical testing area includes a multipurpose wet lab, a multipurpose dry lab, a surgical preparation room, a mechanical testing room, a machine shop, and a specimen storage area. The computational modeling area is arranged around eight separate workstation seats in two adjoining partially partitioned areas. Adjacent to these core operational areas are offices for faculty, research staff, students, and fellows; a secretarial/reception area; a conference room; and a library.

## Regenerative Engineering Laboratory

The Regenerative Engineering Laboratory inhabits over 1,000 square feet of the Pappajohn Biomedical Discovery Building. The lab is fully equipped to support research at the interface of materials, engineering, and cell biology. The Biosafety Level 2 (BSL-2) cell culture room in the lab has two Panasonic cell culture incubators, two Thermo Scientific biological safety cabinets, a fluorescent microscope, $37^{\circ} \mathrm{C}$ bead bath, and centrifuges. A separate four-color fluorescence microscope also is available. The fully automated Leica DMI6000 captures four-color fluorescence images at up to 63x magnification. A built-in z-motor and post-acquisition analysis software allows for the capture and analysis of three-dimensional z-stacks.

The chemistry part of the lab is equipped for biodegradable particle synthesis and analysis. In addition to a fume hood, sink, and laboratory counters, the lab has an analytical grade Mettler Toledo XS64 balance, water bath sonicator, homogenizer, syringe pumps, and a LabConco $-86^{\circ} \mathrm{C}$ Cascade Lyophilizer. To support long term storage of the reagents required for the molecular biology and chemistry portions of the lab, a variety of cold storage options are available including $4^{\circ} \mathrm{C},-20^{\circ} \mathrm{C},-80^{\circ} \mathrm{C}$, and $-130^{\circ} \mathrm{C}$.

## Respiratory Dynamics Laboratory

The Respiratory Dynamics Laboratory is located in the Seamans Center. The facility houses equipment for isolated lung preparation and imaging, including a laminar flow clean bench, a dissecting microscope, an isolated organ perfusion system, purpose-built mechanical ventilators, and a high-resolution x-ray micro-CT scanner. The lab maintains an array of supplies and equipment for electropneumatic control and measurement of respiratory gas flows and pressures. The facility also includes pressurized air and vacuum outlets, a chemical fume hood, biosafety cabinet, ice machine, water purification system, and cold storage at $4^{\circ} \mathrm{C},-20^{\circ} \mathrm{C}$, and $-80^{\circ} \mathrm{C}$.

## Spine Biomechanics Research Laboratory

The Spine Biomechanics Research Laboratory is equipped for interdisciplinary research. The lab's MTS Bionix servohydraulic testing equipment (with extended columns) permits application of uniaxial tension or compression together with axial torsion under displacement or load control. The lab also has a fully automated threedimensional motion measuring system. These devices are used to test mechanical properties of biomechanical joints and tissues, and for biomechanical evaluation of the performance of surgical treatment modalities. Other equipment includes digital cameras, surgical tools, and sensors (i.e., linear variable differential transformers, six-degrees-of-freedom load cell, pressure transducers, digital inclinometers).
A biaxial biomechanical culture system is available for application of controlled compression and/or shear forces onto the intervertebral disc during culture in order to investigate the disc's biological responses to mechanical loads. This culture system is used in conjunction with an incubator in which cells and tissues can be cultured. Basic equipment for histology and immunohistochemical analyses includes
a microtome, ovens, a microscope, and glassware for chemical processes.

## Courses <br> Biomedical Engineering Courses

For current and planned course offerings, visit MyUI on the University of Iowa website.

These advanced courses are offered infrequently depending on the research focus of currently enrolled graduate students: BME:6415 Advanced Biomechanics and Modeling of Soft Tissues and BME:6610 Spine Mechanics.
BME:1010 First-Year Forum 1 s.h.
Presentations by faculty, graduate students, collaborators from the Carver College of Medicine, and Colleges of Dentistry and Law; may include visits to laboratories and industries.

BME:2010 Professional Seminar: Biomedical Engineering 1 s.h. Professional aspects of biomedical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Requirements: sophomore or higher standing.
BME:2200 Systems, Instrumentation, and Data Acquisition 4 s.h. Introduction to engineering art and science of modeling, acquisition, and analysis of data collected from living systems; modeling of physiological and biological systems; concepts of analog circuit design, with emphasis on circuits for collecting data for biomedical applications using operational amplifiers, active filters, conversion, and interface to microcomputers; patient safety; clinical circuits; analysis of data using time domain and Fourier domain techniques and models; time domain sampling, and Nyquist sampling theorem. Prerequisites: ENGR:2120. Corequisites: HHP:3500, and BIOS:4120 or STAT: 3510 .

## BME:2210 Bioimaging and Bioinformatics

Introduction to bioinformatics and biomedical imaging; computer algorithms, machine learning, databases and SQL, the web and web servers, ethics, computer security, genome technology, public warehouses of biological data; medical imaging hardware and software for acquisition and analysis of medical images, especially those collected from X-ray, CT, MR, and ultrasound systems; medical imaging system physics, including interaction of energy with tissue, concepts of image spatial and temporal resolution; applications of filtering, enhancement, and image processing for analysis of medical images. Prerequisites: ENGR:1300 and BIOL:1411. Corequisites: BIOS:4120 or STAT:3510.

## BME:2260 Quantitative Physiology

3 s.h.
Introduction to core concepts in human physiology, homeostatic regulation, and structure-function relationships across cellular and organ systems; emphasis on analytical and quantitative methods including topics from dynamical systems, systems analysis, feedback, and control; students use mathematical modeling and computational simulation (MATLAB) to explore sensitivity analysis and emergent phenomena in complex physiological systems. Prerequisites: CHEM:1120 and BIOL:1411 and MATH:2560 and ENGR:1300.
BME:2400 Cell Biology for Engineers
3 s.h.
Introduction to fundamental concepts in quantitative cell biology from an engineering perspective. Prerequisites: BIOL:1411. Corequisites: BIOS:4120 or STAT:3510.

BME:2500 Biomaterials and Biomechanics 4 s.h.
Introduction to mechanics and materials in biological systems; principles of mechanics (stress, strain, motion, fluid flow) presented and used to characterize behavior of biological entities (tendon/ ligament, bone and cartilage, blood, blood vessels, heart); principles of material science; role of biomaterials (metals, polymers, ceramics) in medical devices. Prerequisites: ENGR:2110. Corequisites: HHP:3500, and BIOS:4120 or STAT:3510.

BME:2710 Engineering Drawing, Design, and Solid Modeling
Introduction to methods and principles used by engineers to define and describe geometry and topology of engineered components; use of Parametric Technology's Creo Pro (formerly ProEngineer) 3D computer-aided design software; emphasis on elements of design; basic commands used in parametric design to develop spatial visualization skills and the ability to create and understand 3D solid parametric design for assembly and 3D drawing documentation; creation of 3D assemblies and detailed drawings from art of design to part utilization of solid modeling techniques.
BME:3710 Medical Device Design: The Fundamentals 3 s.h. Introduction to medical device design process; project-based; development of prototyping and fabrication skills needed for engineering design projects, safety, communication, and teamwork; focus on physical rehabilitation science and assistive technologies; preparation for senior design course sequence. Prerequisites: BME:2500 and BME:2710. Requirements: junior standing.
BME:3998 Individual Investigations: Biomedical Engineering arr. Individual projects for biomedical engineering undergraduate students, such as laboratory study, engineering design projects, analysis and simulation of an engineering system, computer software development, research.

BME:4310 Computational Biochemistry 3 s.h.
Introduction to biomolecular modeling and computer simulation techniques; biomolecular structure and molecular driving forces; principles of structural optimization and conformational sampling; applications to biomolecular phenotypes; scripting and molecular visualization in PyMol, setting up and running molecular dynamics simulations using VMD and NAMD, performing refinement of X-ray diffraction data sets using Phenix, and executing Poisson-Boltzmann electrostatic calculations using APBS. Prerequisites: (MATH:1560 or MATH:1860) and CHEM:1120. Recommendations: BMB:3110 or BMB:3120. Same as BMB:4310.

BME:4314 Introduction to Synthetic Biology in the Lab 4 s.h. Introduction to theory and practice of large-scale design goals of synthetic biology in which various types of DNA instructions, known from decades of research and discovery on specific biological systems, are taken out of context and used to execute various novel tasks designed to solve real-world problems; basic laboratory instruction in standardized construction techniques for stringing together off-the-shelf DNA components that are then introduced into organisms capable of executing the instructional set; controlled experiments to investigate the degree of variability exhibited by engineered genetic constructs. Prerequisites: BIOL:1411. Same as BIOL:4314.

BME:4710 Medical Device Design Studio 3 s.h. Intermediate medical device design geared towards electromechanical design and techniques; builds on foundational knowledge acquired in BME:3710 and BME:2200; focus on advanced prototyping skills including solid modeling, proper electrical component selection, integrating electrical components into hardware design, and testing electro-mechanical device against industry standards. Prerequisites: BME:2200 and BME:2500 and BME:2710 and BME:3710.

BME:4910 Biomedical Engineering Senior Design I
Individual or group work on a creative design project involving current problems in biomedical engineering; interdisciplinary projects involving biomedical engineering and health sciences faculty members; first semester of a year-long senior capstone design project. Prerequisites: BIOS:4120 or STAT:3510. Requirements: senior standing.
BME:4920 Biomedical Engineering Senior Design II 4 s.h.
Second semester of a year-long senior capstone design project begun in BME:4910. Prerequisites: BME:4910.

## BME:5010 Seminar in Biomedical Engineering

Presentation of recent advances in biomedical engineering.
Requirements: graduate standing.

## BME:5101 Biomaterials and Implant Design

3 s.h.
Introduction to material and mechanical considerations underlying a broad range of medical implants; emphasis on understanding factors involved in orthopedic device design; major classes of biomaterials; considerations that underlie implant design, use, failure; contemporary areas of biomaterials and implant development. Prerequisites:
ENGR:2750 and BME:2500.

## BME:5200 Biomedical Signal Processing

Application of signal processing methods (e.g., Fourier, Laplace, z-transforms) to biomedical problems, such as analysis of cardiac signals, circadian rhythm, the breathing cycle; computer simulation lab. Same as IGPI:5212.

## BME:5210 Medical Imaging Physics

Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210. Same as ECE:5470, IGPI:5206.

## BME:5251 Advanced Biosystems

s.h.

Biological systems unique to systems analysis; operation under nonequilibrium conditions; tools for systems analysis developed from models of systems at equilibrium (i.e., mechanical systems); fundamental difference between biological and mechanical systems that impact systems analysis; expand knowledge of linear systems and begin work with nonlinear systems; various modeling and analysis approaches useful in biomedical and biomedical engineering research. Prerequisites: BME:2200. Same as IGPI:5251.

## BME:5335 Computational Bioinformatics

Introduction to computational methods used in genomics, genome analysis, biological sequence analysis, sequence database search, expression analysis, and biological network analysis; in-depth coverage of principal genome science challenges and contemporary solutions. Prerequisites: (BIOS:4120 or STAT:2020 or STAT:3510) and (CS:5110 or ENGR:1300).

BME:5340 Contemporary Topics in Biomedical Engineering 3 s.h. New and emerging areas of biomedical engineering and related fields; specific content varies.

## BME:5421 Cell Material Interactions

3 s.h.
Current thought and techniques in the engineering and assessment of biomaterials. Prerequisites: BME: 2400 .

## BME:5430 Biotransport

3 s.h.
Energy, mass, and momentum transport in living systems; processes essential for understanding how physiological systems function from molecular level through scale of tissues and organs; fluid mechanics and physiological flows, mass transport, biochemical kinetics and reactions, bioheat transfer; conservation laws; various biological applications. Prerequisites: BME:2500.

4 s.h. BME:5431 Biofabrication for Tissue Engineering 3 s.h.
Understanding the principles and approaches of advanced biofabrication for tissue engineering and regenerative medicine. Biofabrication relies on the use of biological materials and cells to create bioengineered tissue to regenerate or repair diseased or injured tissues and organs, such as respiratory bioengineering. Emphasis is on the fundamental mechanisms, processing conditions, and bioinspired strategies of biofabrication, additive approaches, the integration of molecular sciences, and tissue-level micro-physiological systems. Prerequisites: ENGR:2110 and BME:2400 and BME:2500.
BME:5435 Systems Biology for Biomedical Engineering
3 s.h.
Although systems biology is comprised of both experimental and computational aspects, focus is on computational aspects; introduction to deterministic models of biochemical reaction networks; development and application of mathematical models of reaction networks using systems of nonlinear ordinary differential equations; numerical techniques employed to study system stability and perform simulations in realistic biological contexts. Prerequisites: BME:2400 and BME:2200.

## BME:5441 Numerical and Statistical Methods for

 Bioengineering3 s.h.
Mathematics and computation as indispensable tools needed to model and explain complex phenomena relevant to biomedical engineering problems; introduction to concepts from linear algebra, differential equations, probability and statistics, nonlinear model regression, optimization, numerical integration, and other numerical methods, all using Matlab. Prerequisites: MATH:2560 and MATH:2550.

## BME:5445 Stem Cells in Regenerative Engineering

3 s.h.
Discovery and history of stem cells, how they are defined and grouped, and various techniques for their isolation, creation, culture, and characterization; focus on current state of stem cells in medical research and treatment of human disease, as well as future outlook of their use; particular emphasis placed on practical knowledge that students may find useful as they pursue careers in cellular and tissue engineering. Prerequisites: BME:2400 or BIOL:2723.
BME:5451 Research Methods in Cellular Engineering
Statistical approaches and principles of assays routinely used in cell engineering; design of experiments and statistical approaches commonly used to analyze biological data including $t$-tests and oneand two-way ANOVAs, taking into consideration the constraints of cellular engineering research; students design, execute, and analyze data collected from actual experiments; review of recently published literature and analysis of public data sets to understand how each assay and test contributes to understanding of cellular phenotype.
Prerequisites: BIOL:1411 and (STAT:3510 or BIOS:4120).
BME:5460 Principles of Microfluidics
3 s.h.
Microfluidics (i.e., lab-on-a-chip) has become a powerful tool for biomedical research; examination of history, theory, design, fabrication, and function of microfluidic systems; state-of-the-art technologies and real-life biomedical applications; microfluidicrelated career opportunities in academia and industry; hands-on fabrication and operation of microfluidic devices. Prerequisites: BME:2500.
BME:5510 Cardiovascular Engineering
Mechanics-forces and motion-at the heart of the cardiovascular system; fluid and solid mechanics inherent to the motion of the heart, valves, arteries, and veins, and how they facilitate the flow of blood; how to use mechanics to understand and diagnose the severity of cardiovascular disease states and to design implants and devices. Prerequisites: BME:2500.

BME:5525 Cardiopulmonary Design and Modeling
Cardiac and pulmonary systems central to all aspects of human health and diseases that affect these systems can have deadly consequences; physiologic fluid mechanics critical to tissue/organ function, transport, homeostasis, and disease progression; diseases that afflict cardiopulmonary system; focus on role of fluid mechanics in how diseases develop, progress, and are treated; use of computational modeling tools to simulate disease conditions and understand challenges of designing devices and interventions. Prerequisites: ENGR:2510 and BME:2500.

BME:5540 Quantitative Studies of Respiratory and Cardiovascular Systems
Quantitative physiological aspects of respiratory and cardiovascular systems; classical models of these systems are considered including lumped element models, branching tree structures, and distributed parameter models to predict wave propagation in compliant walled tubes filled with compressible or incompressible fluids; development of extensive computer models to simulate the behavior of these systems in frequency- and time-domains, under various conditions of health and disease. Prerequisites: BME:2200 and HHP:3500.

BME:5610 Musculoskeletal Biomechanics 3 s.h.
Principles of solid mechanics applied to analytical, experimental investigation of biological systems; emphasis on applications in kinesiology of human musculoskeletal system. Prerequisites: BME:2500 and ENGR:2750.

## BME:5620 Introduction to Applied Biomedical Finite Element Modeling

Introduction to finite element modeling as applied to biomechanicsrelated applications. Prerequisites: ENGR:2750 and BME:2500.
BME:5630 Kinetics of Musculoskeletal Systems
Principles of kinematics; kinetics applied to analytical and experimental investigation of musculoskeletal systems; mathematical foundations for kinematic and kinetic analyses; examples of mathematical modeling of human movements. Prerequisites: ENGR:2710.

BME:5640 Ergonomics of Occupational Injuries 3 s.h. Epidemiology, surveillance systems, ergonomics, biomechanics, physiology, psychology, legal aspects, and cost control. Prerequisites: BME:2500. Corequisites: ENGR:2750.

## BME:5715 Advanced Medical Device Design Studio 3 s.h.

Continuation of BME:3710 and BME:4710; biomedical engineering project based; focus on advanced prototyping and manufacturing techniques of mechanical and electromechanical medical devices; implementation of design controls and testing to medical industry standards for quality and safety; development of project management skills and communication within a team; final course in medical device design sequence. Prerequisites: BME:2200 and BME:2500 and BME:2710 and BME:3710 and BME:4710.

BME:5720 Optimization of Structural Systems 3 s.h. Advanced topics; optimization of structural topology, shape, and material; finite dimensional dynamic response optimization, sensitivity analysis, distributed parameter systems; projects. Same as CEE:5236.
BME:5998 Individual Investigations: Biomedical Engineering arr. Individual projects for biomedical engineering graduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.
BME:5999 Research: Biomedical Engineering MS Thesis arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of the requirements for the MS with thesis in biomedical engineering. Requirements: graduate standing.

3 s.h.
3 s.h. BME:6225 Communicating Science
Writing and speaking about biomedical engineering and science research; key principles of writing with clarity and cohesion; practice applying these principles on a piece of research writing students are currently working on; review of best practices for presenting research to peers and at conferences; students share their work with peers through writing and presentations.
BME:6230 Principles of Magnetic Resonance Imaging 3 s.h. MRI is a powerful and versatile imaging modality capable of providing a wide variety of contrast mechanisms and visualizing soft tissues in detail; principles of MRI from a signal processing perspective; MATLAB programming, literature readings, final project, visits to MRI research scanner facility, guest lectures from leading MRI experts; MRI concepts, interpretation of commonly used pulse sequences in clinical MRI, and emerging trends in MRI. Prerequisites: BME:5210 or BME:5200 or ECE:5460. Recommendations: familiarity with digital signal processing.

BME:6415 Advanced Biomechanics and Modeling of Soft Tissues

3 s.h.
Application of continuum mechanics and modeling to study of biological tissues and biomaterials.
BME:6610 Spine Mechanics 3 s.h.
Biomechanics applied to mechanics of the human spine; clinical aspects; state-of-the-art in spine research; basic engineering principles for biomechanical analysis. Prerequisites: BME:5610.

BME:7999 Research: Biomedical Engineering PhD Dissertation arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for PhD with thesis in biomedical engineering.

## Biomedical Engineering, BSE

The major in biomedical engineering builds on the foundation provided by the BSE core requirements, preparing students for the challenges and opportunities associated with careers in the profession.

## Focus Areas

All BSE students complete a focus area within their chosen major. Students majoring in biomedical engineering select one of four preapproved focus areas: bioimaging, biomechanics and biomaterials, cellular engineering, or computational bioengineering. Each focus area may be designated pre-medicine by completing a specific set of electives.

## Bioimaging

Bioimaging represents the acquisition, processing, and visualization of structural or functional images of living systems. Medical imaging and image processing are integral to the extraction of anatomical and biological information from the systems level down to the molecular level with the goal of clinically seeking to reveal, diagnose, or examine diseases, as well as to the study of normal anatomy and physiology.

## Biomechanics and Biomaterials

Biomechanics is the study of structure and function. It is the application of principles from classical mechanics to problems in biological systems. This focus area emphasizes cardiovascular and/ or musculoskeletal biomechanics. The study of biomaterials plays an important role in the design of implants and surgical instrumentation for both cardiovascular and musculoskeletal applications.

## Cellular Engineering

Cellular engineering involves the application of engineering principles to problems in cellular and molecular biology, particularly as they relate to human health. The goal of this focus area is to equip students with the quantitative tools necessary to understand, manipulate, and control cellular and subcellular processes for a range of biomedical applications, including those related to stem cells, tissue engineering, and regenerative medicine.

## Computational Bioengineering

Computational bioengineering is an interdisciplinary field that develops methods and software tools for modeling and understanding biological data and systems that are typically represented by large amounts of data. Computational bioengineering is a combination of computer science, statistics, informatics, and engineering to analyze and interpret biological and genomic data. It is used for the identification of candidate genes to better understand the genetic basis of disease, unique adaptations, and differences between populations.

## Educational Objectives

The department provides undergraduate students with a contemporary education in a multidisciplinary field of engineering. Its objective is to produce graduates who:

- advance the biomedical field through the responsible analysis and design of devices, systems, processes, and policies that improve human health;
- pursue a wide range of career options, including those in industry, academia, and medicine; and
- collaborate on multidisciplinary teams and become leaders in their chosen field.

Requirements
The Bachelor of Science in Engineering (BSE) with a major in biomedical engineering requires a minimum of 129 s.h. of credit, plus two 1 s.h. departmental seminars. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1448] in the catalog. Students completing the major in biomedical engineering fulfill the collegiate statistics requirement by completing BIOS:4120 Introduction to Biostatistics or STAT:3510 Biostatistics.

The program has been designed carefully to enable students to satisfy the entrance requirements of the Graduate [p. 1589] College.

The major in biomedical engineering includes the following departmental seminars.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BME:1010 | First-Year Forum | 1 |
| BME:2010 | Professional Seminar: <br> Biomedical Engineering <br> (typically taken in the second <br> year) | 1 |

The major in biomedical engineering requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Collegiate Curriculum | 50 |
| Major Requirements | 46 |
| Focus Area | $33-34$ |

## Major Requirements

Major requirements include a set of common courses (38 s.h.) and two capstone design courses (8 s.h.).

## Common Courses

Students in the bioimaging or computational bioengineering focus areas may choose between ENGR:2130 Thermodynamics or ENGR:2995 Introduction to Artificial Intelligence and Machine Learning in Engineering.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Systems, Instrumentation, and |  |
| BME:2200 | Data Acquisition (with lab) <br> Bioimaging and Bioinformatics <br> (with lab) | 4 |
| BME:2260 | Quantitative Physiology <br> or HHP:3500 | Human Physiology |
| BME:2400 | Cell Biology for Engineers <br> (with lab) | 3 |
| BME:2500 | Biomaterials and Biomechanics <br> (with lab) | 3 |
| BIOL:1411 | Foundations of Biology | 4 |
| CHEM:1120 | Principles of Chemistry II | 4 |
| ENGR:2110 | Statics | 4 |
| ENGR:2120 | Electrical Circuits | 4 |
| ENGR:2130 | Thermodynamics | 2 |
|  |  | 3 |

Introductory Physics II (with lab)

## Capstone Design Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Biomedical Engineering Senior | 4 |
| BME:4910 | Design I | 4 |
| BME:4920 | Biomedical Engineering Senior <br> Design II | 4 |

## Focus Area

Students must select focus area courses according to guidelines established by the Roy J. Carver Department of Biomedical Engineering. Biomedical engineering students choose one of four preapproved focus areas: bioimaging [ p .1460 ], biomechanics and biomaterials [p. 1460], cellular engineering [p. 1461], or computational bioengineering [p. 1461]. For details about focus areas and their requirements, visit Curriculum Focus Areas on the department's website.
Each focus area has a group of four required courses (12-13 s.h.) and a list of suggested electives ( 21 s.h.).

## Pre-Medicine Focus Area Electives

Students who choose to pursue pre-medicine can select any focus area and take five of the following courses (16-17 s.h.) as their additional electives.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Five of these: | Biochemistry | 3 |
| BMB:3110 | Diversity of Form and Function | 4 |
| BIOL:1412 | Fundamental Genetics | 4 |
| BIOL:2512 | Organic Chemistry I | 3 |
| CHEM:2210 | Organic Chemistry II | 3 |
| CHEM:2220 | Organic Chemistry Laboratory | 3 |

## Bioimaging

## Required Bioimaging Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| BME:5210/ | Medical Imaging Physics | 3 |
| ECE:5470/IGPI:5206 |  | 3 |
| ECE:3330/IGPI:3330 | Introduction to Software Design | 3 |
| ECE:5480/IGPI:5480 | Digital Image Processing | 3 |
| ENGR:2730 | Computers in Engineering |  |

Bioimaging Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: |  |  |
| BME:5200/IGPI:5212 | Biomedical Signal Processing | 3 |
| BME:5251/IGPI:5251 | Advanced Biosystems | 3 |
| ECE:5330/IGPI:5331 | Graph Algorithms and | 3 |
| ECE:5450/IGPI:5450 | Combinatorial Optimization |  |
| ECE:5490 | Multi-Dimensional Image | 3 |
|  | Analysis Tools and Techniques | 3 |

## 4 Additional Electives-Bioimaging

The following courses are suggested additional electives for the bioimaging focus area. Students are encouraged to consult their academic advisor when selecting electives.

| Course \# Title | Hours |
| :---: | :---: |
| At least 15 s.h. from these: |  |
| BME:5340Contemporary Topics in <br> Biomedical Engineering | 3 |
| BME:5441 Numerical and Statistical <br> Methods for Bioengineering | 3 |
| CS:2210 Discrete Structures | 3 |
| CS:2230 Computer Science II: Data <br>  Structures | 4 |
| ECE:5460/IGPI:5460 Digital Signal Processing | 3 |
| MATH:3800/CS:3700 Introduction to Numerical Methods | 3 |
| Additional courses from the "Bioimaging Electives" list above | 3 |
| Courses from the "Pre-Medicine Focus Area Electives" list above | 3-4 |

## Biomechanics and Biomaterials

## Required Biomechanics and Biomaterials Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | 4 |
| ENGR:2510 | Fluid Mechanics | 3 |
| ENGR:2710 | Dynamics | 3 |
| ENGR:2720 | Materials Science | 3 |
| ENGR:2750 | Mechanics of Deformable <br>  Bodies |  |

Biomechanics and Biomaterials Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: | Engineering Drawing, Design, <br> and Solid Modeling | 3 |
| BME:2710 | Biomaterials and Implant <br> Design | 3 |
| BME:5510 | Cardiovascular Engineering <br> BME:5525 | Cardiopulmonary Design and <br> Modeling |
| BME:5610 | Musculoskeletal Biomechanics | 3 |

## Additional Electives-Biomechanics and Biomaterials

The following courses are suggested additional electives for the biomechanics and biomaterials focus area. Students are encouraged to consult their academic advisor when selecting electives.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least 15 s.h. from these: |  |  |
| BME:3710 | Medical Device Design: The <br> Fundamentals | 3 |

| CS:3330 | Algorithms | 3 |
| CS:5350 | Design and Analysis of Algorithms | 3 |
| ECE:5800/CS:5800 | Fundamentals of Software Engineering | 3 |
| ECE:5995 | Contemporary Topics in Electrical and Computer Engineering (when topic is applied machine learning) | 3 |
| Additional courses from the "Computational Bioengineering Electives" list above |  | 3 |
| Courses from the "Prelist above | -Medicine Focus Area Electives" | 3-4 |

Combined Programs

## Undergraduate to Graduate (U2G Programs)

Bachelor of Science in Engineering students in biomedical engineering may pair their degree with an Undergraduate to Graduate (U2G) program, which allows the student to earn a bachelors and masters degree in five years of study. BME undergraduates are eligible to apply for the below U2G graduate programs and any other participating U2G programs. See the Undergraduate to Graduate (U2G) website for available programs.

## BSE/MS in Biomedical Engineering

The College of Engineering offers a combined Bachelor of Science in Engineering/Master of Science for biomedical engineering undergraduate students who intend to earn an MS in biomedical engineering. Students admitted to this program are allowed to apply up to 12 s.h. of graduate coursework towards both the BSE and MS degree requirements, and attend and participate in the departmental graduate seminar. Students may begin to work on their coursework or master's thesis starting as early as the summer following the junior year of undergraduate studies.

Students applying to the BSE/MS program in biomedical engineering must meet the following criteria at the time of application:

- a minimum of 80 s.h. completed towards their BSE degree;
- a cumulative grade-point average of 3.50 or higher; and
- identification of a research mentor if pursuing a thesis master's degree.

## BSE/MPH (Occupational and Environmental Health Subprogram)

The combined BSE in biomedical engineering/MPH with the occupational and environmental health subprogram enables undergraduate students majoring in biomedical engineering to begin work toward the MPH degree while completing their bachelor's degree. Students may count 15 s.h. of credit toward both the BSE and the MPH degree requirements. See the Master of Public Health, MPH [p. 1964] (occupational and environmental health subprogram) in the catalog.

## BSE/MS in Electrical and Computer Engineering

BSE students majoring in biomedical engineering who are interested in earning a Master of Science in electrical and computer engineering may apply to the combined BSE/MS program offered by the College of Engineering. The combined program permits students to count a limited amount of credit toward the requirements of both degrees. See the MS in electrical and computer engineering [p. 1541] in the catalog.

## BSE (Biomechanics and Biomaterials Track)/MS in Occupational and Environmental Health (Industrial Hygiene Subprogram)

BSE students majoring in biomedical engineering in the biomechanics and biomaterials track who are interested in earning a Master of Science in occupational and environmental health with an industrial hygiene subprogram may apply to the combined BSE/MS program offered by the College of Engineering and the College of Public Health. The combined program permits students to count a limited amount of credit toward the requirements of both degrees, enabling them to begin the study of public health before they complete the bachelor's degree. See the MS in occupational and environmental health Undergraduate to Graduate (U2G) information on the Department of Occupational and Environmental Health (College of Public Health) website.

## Career Advancement

BSE graduates with a major in biomedical engineering may pursue career opportunities in biomedical industries, such as design and development of biomedical instrumentation, diagnostic aids, life support systems, prosthetic and orthotic devices, and man-machine systems; or they may pursue traditional career opportunities in industry, such as those rooted in mechanical or electrical engineering disciplines. Other career options are available in government (Food and Drug Administration, Environmental Protection Agency, National Institutes of Health, Veterans Affairs). Some biomedical engineering graduates elect to continue formal education in engineering, medicine, or law. On average, $93-98 \%$ of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.
Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.
internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

j Students select a course from one of two GE CLAS Core areas: Diversity and Inclusion or Values and Culture.
k Students majoring in biomedical engineering select one of four preapproved focus areas: bioimaging, biomechanics and biomaterials, cellular engineering, or computational bioengineering. Each focus area consists of a group of four required courses (12-13 s.h.), two focus area-specific elective courses ( 6 s.h.), and additional suggested electives (15 s.h.). See General Catalog or consult an advisor for more information.
1 See General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI.
mStudents who choose to pursue pre-medicine can select any focus area and take five of the following courses as their additional electives: BMB:3110, BIOL:1412, BIOL:2512, CHEM:2210, CHEM:2220, or CHEM:2410.
n Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Biomedical Engineering, MS

Graduate study in biomedical engineering prepares students to use contemporary methods at an advanced level during a professional career in engineering design, development, and research.

Each student's course of study is based on individual background, career objectives, and sound academic practice. An individual program for each student may be developed from courses offered by the Roy J. Carver Department of Biomedical Engineering and other departments, especially mechanical engineering, electrical engineering, physiology, mathematics, and biological sciences. Students who want a more general program may combine emphases, while those who want some specialization in a particular field can achieve their goals through the combination of departmental courses and appropriate electives from other departments in the College of Engineering and the university.

## Learning Outcomes

By completing the graduate curriculum in biomedical engineering, students will be able to:

- demonstrate broad knowledge of the field of biomedical engineering and deep knowledge in their specific area of study;
- communicate complex technical ideas concisely and effectively to both general and specialized audiences through verbal, visual, and written formats;
- formulate research questions, pose testable hypotheses, employ methods that enhance the reproducibility of research, and apply critical thinking skills to produce solutions to complex engineering problems that intersect with biology and human health; and
- operate with professionalism and under standards of ethical conduct.

## Requirements

The Master of Science program in biomedical engineering requires a minimum of 30 s.h. of graduate credit, with or without thesis. Students who choose the nonthesis program must earn at least 6 s.h. of credit in courses numbered 5000 or above. Those who choose the thesis program may count no more than 6 s.h. of thesis research and writing credit toward the degree. Students must maintain a cumulative gradepoint average of at least 2.75 in all work for the degree. The MS may be a terminal degree or a step toward the PhD.
A tentative plan of study for each student is determined through consultation with an advisor. An MS committee of at least three faculty members, including at least two tenure-track biomedical engineering faculty is required. All thesis students must successfully complete the final examination administered by their committee. There is no oral or written exam required for the nonthesis master's degree.
All MS students (thesis or nonthesis) must successfully complete the Graduate Core Courses as part of their graduate curriculum. Students are expected to complete them during their first year of study. Additionally, students are required to complete 18 s.h. of graduatelevel coursework in the College of Engineering over the course of their studies. BSE/MS fast track students may include courses taken during year four and/or year five.

## Graduate Core Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGR:7270 | Engineering Ethics | 1 |
| HHP:3500 | Human Physiology | 3 |

| ME:5113 | Mathematical Methods in <br> Engineering (or equivalent <br> graduate mathematics course; <br> approval of academic advisor <br> required before registering) |
| :--- | :--- |

Depending upon a student's performance in Graduate Core Courses and the nature of their research project, the student's examining committee may specify additional coursework to be completed to satisfy the Graduate Core Courses requirement.

Graduate Core Courses may be substituted by other equivalent courses at the discretion of the student's examining committee. Equivalent coursework taken as part of a student's undergraduate or graduate studies prior to starting the MS program at the University of Iowa may satisfy one or more of the Graduate Core Courses requirements. Students who wish to request a substitution or a waiver of HHP:3500 Human Physiology must submit a core course substitution or waiver form. Forms may be obtained from the graduate program coordinator.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants who have earned a baccalaureate or postbaccalaureate degree in engineering or in the mathematical or physical sciences with a grade-point average (GPA) of at least 3.00 are eligible to be considered for admission to the Master of Science program.

Reference letters, research interests, previous graduate GPA, and other factors may be considered in admission decisions.

## Financial Support

Research assistant positions are available on a variety of research projects, and a limited number of teaching assistant positions may be available. Selection of recipients is usually based on scholastic achievement and research interest. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on a student's potential contribution to the teaching and research goals of the department. Students who fulfill their research assistant responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new awards.

## Career Advancement

Biomedical engineers with MS degrees can pursue career opportunities in the health care industry in the fields of biomedical devices, diagnostic equipment, and software. Graduates have started careers in research, design, development, sales, and entrepreneurship, and they advance to administrative and leadership positions in their organizations. Graduates also have careers with health care providers, such as in hospitals, or use their biomedical engineering expertise to advance careers in medicine and law. Faculty mentors assigned to graduate students aid in their professional development. Students are exposed to opportunities through seminar speakers who have relevant expertise that are invited to campus.
The Graduate College offers numerous career advancement opportunities and professional development programs for graduate students. Ongoing program offerings, news, and announcements can be found under Grad Success Center on the Graduate College website.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
c All students must complete this course during first year fall semester; does not count toward the total hours required for the degree.
d Course substitution or waiver allowed upon approval.
e Or equivalent graduate level mathematics course; advisor approval required prior to registration.
f 18 s.h. must be graduate coursework at the 5000 level or above from the College of Engineering or courses from the approved elective list; work with faculty advisor to determine appropriate graduate coursework and sequence.
g Completion of all degree requirements.

## Biomedical Engineering, PhD

Graduate study in biomedical engineering prepares students to use contemporary methods at an advanced level during a professional career in engineering design, development, and research.

Each student's course of study is based on individual background, career objectives, and sound academic practice. An individual program for each student may be developed from courses offered by the Roy J. Carver Department of Biomedical Engineering and other departments, particularly mechanical engineering, electrical engineering, physiology, mathematics, and biological sciences. Faculty members in the department have teaching and research expertise in cardiovascular and fluid biomechanics, musculoskeletal biomechanics, biomaterials and tissue engineering, bioinstrumentation, biosystems, biomedical imaging, biological signal analysis, bioinformatics and computational biology, pulmonary engineering, and other allied fields.

PhD programs may center on any one of the previously described areas through the choice of appropriate coursework and research topic.

## Learning Outcomes

By completing the graduate curriculum in biomedical engineering, students will be able to:

- demonstrate broad knowledge of the field of biomedical engineering and deep knowledge in their specific area of study;
- communicate complex technical ideas concisely and effectively to both general and specialized audiences through verbal, visual, and written formats;
- formulate research questions, pose testable hypotheses, employ methods that enhance reproducibility of research, and apply critical thinking skills to produce solutions to complex engineering problems that intersect with biology and human health; and
- operate with professionalism and under standards of ethical conduct.

## Requirements

The Doctor of Philosophy program in biomedical engineering requires a minimum of 72 s.h. of graduate work, including acceptable transfer credit. At least 42 s.h. must be earned in formal coursework taken after the BSE is awarded, and at least 12 s.h. must be earned through research and the thesis. Students who enter with an MS may count a maximum of 30 s.h. of approved transfer credit toward the PhD , but they must earn 39 s.h. of graduate credit at the University of Iowa, including at least $12 \mathrm{~s} . \mathrm{h}$. in research and the thesis. Based on a student's research progress, examination results, or other measures, the graduate committee may require additional formal coursework to strengthen perceived areas of weakness.

All PhD students must successfully complete the Graduate Core Courses as part of their graduate curriculum. Students are expected to complete them during their first year of study. Additionally, students must complete 18 s.h. of graduate-level coursework in the College of Engineering over the course of their studies. Medical scientist training program students are required to complete $12 \mathrm{~s} . \mathrm{h}$. of graduate-level coursework in the College of Engineering.

## Graduate Core Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGR:7270 | Engineering Ethics | 1 |
| HHP:3500 | Human Physiology | 3 |

| ME:5113 | Mathematical Methods in |
| :--- | :--- |
| Engineering (or equivalent |  |
| graduate mathematics course; |  |
| approval of academic advisor |  |
| required before registering) |  |

Depending upon a student's performance in Graduate Core Courses and the nature of their research project, the student's examining committee may specify additional coursework to be completed to satisfy the Graduate Core Courses requirement.

Graduate Core Courses may be substituted by other equivalent courses at the discretion of the student's examining committee. Equivalent coursework taken as part of a student's undergraduate or graduate studies prior to starting the biomedical engineering graduate program at the University of Iowa may satisfy one or more of the Graduate Core Courses requirements. Students who wish to request a substitution or a waiver of HHP:3500 Human Physiology must submit a core course substitution or waiver form. Forms may be obtained from the graduate program coordinator.

Admission to the PhD program is conditional until students successfully complete a qualifying examination. The biomedical engineering faculty administers the exam and decides whether a student's performance on it is adequate for admission to the PhD program.

Admission to PhD candidacy requires a grade-point average (GPA) of at least 3.00 on all graduate work at the University of Iowa. Upon completion of the coursework specified in the plan of study and with the required GPA and the advisor's recommendation, students are admitted to the comprehensive examination by their committee.
Having satisfactorily completed these examinations, students usually have only to complete and defend their dissertation at the final examination. Requirements for the PhD generally can be completed in about three years beyond the master's degree.

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical engineering in a combined degree program offered by the Carver College of Medicine and the College of Engineering. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
Reference letters, research interests, previous graduate grade-point average, and other factors may be considered in admission decisions.
Admission to the Doctor of Philosophy in biomedical engineering is conditional until students successfully complete a qualifying examination.

## Financial Support

Research assistant positions are available on a variety of research projects, and a limited number of teaching assistant positions may be available. Selection of recipients is usually based on scholastic achievement and research interest. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on a student's potential
contribution to the teaching and research goals of the department. Students who fulfill their research assistant responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new awards.

## Career Advancement

Biomedical engineers with PhDs can pursue career opportunities in the health care industry in the fields of biomedical devices, diagnostic equipment, and software. Graduates have started careers in research, design, development, sales, and entrepreneurship, and they advance to administrative and leadership positions in their organizations. Graduates also have careers with health care providers, such as in hospitals, or use their biomedical engineering expertise to advance careers in medicine and law. In addition, PhD graduates have careers in academia or at research institutions where they advance understanding of human health. Faculty mentors assigned to graduate students aid in their professional development. Students are exposed to opportunities through seminar speakers who have relevant expertise that are invited to campus.

The Graduate College offers numerous career advancement opportunities and professional development programs for graduate students. Ongoing program offerings, news, and announcements can be found under Grad Success Center on the Graduate College website.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Biomedical Engineering, PhD

Course Title Hours
Academic Career
Any Semester
72 s.h. must be graduate level coursework; graduate
transfer credits allowed upon approval. More information
is included in the General Catalog and on department
website. $^{\text {a }}$
Graduate College program GPA of at least 3.00 is required.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
c Does not count toward the total hours required for the degree.
d Course substitution or waiver allowed upon approval.
e Or equivalent graduate level mathematics course; advisor approval required prior to registration.
f 18 s.h. must be graduate coursework at the 5000 level or above from the College of Engineering or courses from the approved elective list; work with faculty advisor to determine appropriate graduate coursework and sequence.
g Dissertation defense.

# Chemical and Biochemical Engineering 

Interim Chair

- Jun Wang

Undergraduate major: chemical engineering (BSE)
Graduate degrees: MS in chemical and biochemical engineering; PhD in chemical and biochemical engineering
Faculty: https://engineering.uiowa.edu/cbe/cbe-people
Website: https://engineering.uiowa.edu/cbe
Chemical and biochemical engineers combine engineering principles with knowledge of mathematics and specific sciences-chemistry, the biological sciences, and physics-to develop and operate processes that convert raw materials into products that benefit society. For example, biochemical engineers might develop and operate processes to convert switchgrass into biofuels or to mass produce an antibiotic.

Chemical and biochemical engineers engage in a wide variety of activities that benefit the global community. Chemical engineering has served as a foundational discipline for many industries and applications, including the development of fuel cells, solar energy, and bio-renewable fuels (e.g., biodiesel or ethanol); pharmaceutical manufacturing, rechargeable batteries, and new materials; and green technologies for decarbonation and combating global climate change through air pollution control and precision agriculture.
Chemical engineering distinguishes itself from other engineering professions with its reliance on chemical reactions and physicochemical transformations to produce a wide variety of important materials and products. Biochemical engineers are involved in a wide variety of industrial biocatalytic, fermentation, and cell culture processes that generate products ranging from the high fructose corn syrup in soft drinks to recombinant human insulin.
As part of their training, chemical and biochemical engineers learn ethical design and a respect for the larger issues in any design, such as community health, employee safety, and the global implications of the design. The University of Iowa's curriculum emphasizes chemical process safety and environmentally conscious chemical engineering design.

## Programs

Undergraduate Program of Study

## Major

- Major in Chemical Engineering (Bachelor of Science in Engineering) [p. 1476]

## Graduate Programs of Study

## Majors

- Master of Science in Chemical and Biochemical Engineering [p. 1486]
- Doctor of Philosophy in Chemical and Biochemical Engineering [p. 1489]

Facilities

## Undergraduate Core

Materials Science Laboratory

The Materials Science Laboratory allows students in ENGR:2720 Materials Science to further explore the concepts they learn in the classroom. It is equipped with tensiometers, hardness testers, an Izod impact tester, a contact angle goniometer, and heat treatment/sintering furnaces to characterize and examine the mechanical properties in a variety of materials. Optical microscopes, metallography specimen kits, and crystallography packages are used to facilitate understanding of structure-property relationships.

## Required Undergraduate Laboratories

## Chemical Engineering Laboratory

The Chemical Engineering Laboratory provides hands-on instruction for undergraduate students in CBE:3150 Thermodynamics/Transport Laboratory and CBE:3155 Chemical Reaction Engineering/ Separations Laboratory. It is equipped for student experimentation in thermodynamics, fluid flow, heat transfer, mass transfer, chemical reaction engineering, and separations. All key equipment pieces in the lab, such as a distillation column, a wiped film evaporator, and multiple heat exchangers are constructed of transparent materials, allowing students to visually inspect the inner workings of this equipment. Additional equipment includes a fluid friction apparatus, a jacketed kettle, and a membrane gas separator. Students study this equipment using state-of-the-art portable analytical equipment such as densitometers, polarimeters, and refractometers.
Additionally, a wide array of small equipment is available to support laboratory projects and demonstrations in chemical engineering courses, and for use by students performing independent investigations or student groups competing in national chemical engineering contests.

## Chemical Process Safety Laboratory

The Chemical Process Safety Laboratory is an integral part of CBE:3125 Chemical Process Safety. It is equipped with two MiniFlash automatic flash point testers (closed cup), an advanced reactive system screening tool (ARSST), a minimum ignition energy (MIE) apparatus, a flammability chamber, a modified Hartmann tube, a Hartmann bomb, a liquid conductivity apparatus, a powder chargeability apparatus, a powder volume resistivity apparatus, a Van de Graaff generator, two high impedance electrometers, a field meter, a Faraday cage, and relief sizing software. This equipment is used in a series of experiments to demonstrate principles of flammability, reactivity, explosions, relief valve sizing, and electrostatics relevant to industry.

## Biochemical Engineering Laboratory

The Biochemical Engineering Laboratory is an integral part of CBE:3205 Introduction to Biochemical Engineering. It is equipped with two controlled New Brunswick BioFlo/CelliGen 115 bioreactors, electrophoresis apparatus, and a thermocycler. This equipment is used for recombinant DNA experiments and to study the growth and metabolism of microorganisms.

## Process Control Laboratory

The Process Control Laboratory is a modern, computer-based instructional laboratory that is integral to CBE:4105 Process Dynamics and Control in Design. The lab consists of computer control of a shell-and-tube heat exchanger and a level-and-flow control process rig with state-of-the art industrial control interfaces.

The Computer Control Laboratory offers an ensemble of learning experiences with the same equipment. Additional laboratories provide instruction in the use of process simulators that provide analogies and better insight into the control process. Topics include determination of the gain and time constants for single-capacitance systems; determination of gain, time constant, and damping factor of second-order processes; determination of open-loop and closed-loop response to step-and-ramp changes in input for single-capacitance and multicapacitance processes; approximations of multicapacitance systems as first- and second-order processes with dead time; analysis of instrumentation characteristics and transfer functions; tuning and optimization of feedback control parameters (P, PI, PID); system identification through frequency response methods; and determination of system stability.

Experimental arrangements in the lab are simple enough in design to be easily understood, yet complicated enough to help students appreciate system characteristics inherent in industrial processes (e.g., large time lags and error in parameter estimation).

## Graduate Facilities and Laboratories

The department offers a wide variety of facilities to support and develop research activities.

## Air Pollution Computational, Field, and Laboratory Studies

The department maintains extensive facilities for computational, field, and laboratory studies of air pollution, carbon cycle gases, aerosols, and nanoparticles at the Center for Global and Regional Environmental Research (CGRER). The center occupies 5,000 square feet of lab and office space on the fourth floor of the Iowa Advanced Technology Laboratories.
CGRER houses one R2 ImmersaDesk Portable Large Scale Visualization System and is linked on campus to two more R2 ImmersaDesk units.
The center's computer laboratory for environmental and spatial data analysis provides numerous Windows and UNIX workstations, sophisticated software packages, and workstations and a file server necessary to run intensive visualization programs. The network backbone is university supported with high-speed wireless throughout. A variety of digital environmental databases and an extensive library of documentation and related references are available. There are 4 Beowulf Linux clusters on site and Linux clusters of 4, 16, 18, and 20 nodes for large computations and data assimilation. CGRER retains 15 TB of redundant storage and 50 TB of total storage; local storage space is scalable and expandable. A variety of software packages and programming languages are available for data analysis and display, including ArcInfo, ArcView, NCAR Graphics, MATLAB, S-PLUS, and Vis5D, as well as geographical information software. The Esri software suite is part of a university-wide site license.
Laboratory and field equipment includes aerosol samplers, including scanning mobility particle sizers for aerosols from 3 nanometer to 1 micron with time resolution to 30 seconds; aerosol particle sizers for aerodynamic measurements of in situ particles with time resolution to 1 second; and varied condensation particle counters for measuring total particle counts. Several hygroscopic tandem differential mobility analyzers are used, as well as varied aerosol generation devices and unique aerosol inlets for relative humidity ( RH ) and temperature modification and control. Cloud droplet number can be measured in the lab or in the field using a Droplet Measurement Technologies cloud condensation nuclei detector. Advanced computer control of instruments is available through LabVIEW.
Selected instruments are field deployable in a custom air-conditioned trailer. Through collaboration with the IIHR-Hydroscience and Engineering, access to micrometeorology sensors, 1D and 2D elastic
and Raman lidar, and gas sensors is available, including multichannel ammonia monitors.

## Biochemical Engineering

Biochemical engineering laboratories provide facilities for preparation of biological media and cultivation of organisms as well as for separation and analysis of biomolecules. This equipment includes biological incubators and floor incubator shakers, agitated and airlift bioreactors, light microscopes, autoclaves, Vi-Cell cell counter, thermocycler for polymerase chain reaction (PCR) amplification of DNA, high- and low-speed centrifuges, UV-Vis spectrophotometers, a lyophilizer, biological safety cabinets, and an anaerobic glove box. Phase-contrast and epifluorescence microscopes, gel electrophoresis systems, gas chromatography units with flame ionization and electron capture detectors, and several high performance liquid chromatography systems with refractive index and photodiode array detectors are available for characterization of microorganisms and constituent biomolecules.
Through collaborative research agreements, graduate students also have access to specialized facilities for electron microscopy, largescale fermentation, protein structure, recombinant DNA research, and tissue culture/hybridoma; the Flow Cytometry Facility; and the High Resolution Mass Spectrometry Facility.

## Biomedical Engineering

The biomedical engineering laboratories house particle technology equipment including microemulsion equipment for drug encapsulation, sonicators, benchtop scale spray dryers, laser diffraction particle sizer, zetapotentiometer; DNA preparation equipment, gel electrophoresis apparatus; interfacial stress rheometer, surface tensiometer, UV-Vis/fluorescent plate reader, high performance liquid chromatograph, luminometer, lyophilizer, custom-built simulated cough machine, microscopes, incubators, wet chemistry equipment, rotary shakers, incubated plate shakers, autoclave, centrifuges, and laboratory computers. Cell culture and bacterial culture facilities are housed adjacent to the laboratories.
Graduate students also have access to core research facilities including the Central Microscopy Research Facility, Flow Cytometry Facility, Iowa Institute of Human Genetics, Electron Spin Resonance Facility, Nuclear Magnetic Resonance Facility, High Resolution Mass Spectrometry Facility, and the Center for Gene Therapy.

## Computer Facilities

The departmental computer facilities contain a variety of laptops, desktop workstations, and printers. The department is supported by the college's Engineering Technology Center, which maintains a large network of high performance Linux and Windows workstations along with extensive commercial and public domain software. The department also has access to the university's central high performance research computing facility through ITS-Research Services. The University of Iowa also has access to the ACCESS and Blue Waters national supercomputing resources and is a founding member of the Great Lakes Consortium for Petascale Computing. Locally-hosted long-term data storage services are available.

## Fundamentals and Applications of Photopolymerization

The Photopolymerization Center was established to advance fundamental understanding of the kinetics and mechanisms of photopolymerizations. To this end, the center provides unique opportunities for collaborations by industrial and academic investigators to explore photopolymerization processes and develop novel applications based on photopolymerizations.
The center provides equipment and instrumentation for the characterization of photopolymerization systems on the molecular,
microscopic, and macroscopic levels. Center researchers pursue understanding of fundamental photophysical and photochemical processes involved in the photoinitiation reaction, characterization of high-speed propagation and termination kinetics that lead to the polymer structure, and evaluation of material properties through the course of the photopolymerization reaction. Both radical and cationic photopolymerizations are studied with state-of-the-art experimental techniques to elucidate the complex chemical and physical mechanisms that control the initiation, propagation, and termination of the active centers.

## Courses

## Chemical and Biochemical Engineering Courses

CBE:0000 Chemical Engineering Internship/Co-op 0 s.h.
Chemical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

## CBE:1000 CBE Departmental Seminar

1 s.h.
Introduction to the profession and the department; presentations by guest speakers, visits to laboratories and industries.

## CBE:1180 First-Year Seminar <br> 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.
CBE:2030 Energy and Society 3 s.h.
History of energy development and use throughout the world; how energy has affected the development of human societies; societal impact of engineering advances; current state of energy consumption worldwide, including distribution of energy sources, global variations in consumption, advantages and disadvantages of current energy sources; role of fossil fuel consumption in global climate change, potential scenarios for the future of energy.
CBE:2040 Environment, Energy, and Climate Change 3 s.h. Traditional concerns (e.g., pollution and conservation of energy resources) with clear, scientific explanations; Earth's dynamic processes and response to natural and human-induced stresses; link between energy and climate; reasons why we need to support reducing emissions and build a clean and sustainable environment.

## CBE:2050 Severe and Unusual Weather

Basic weather concepts behind severe weather phenomena and essential safety information; how weather events cause billions of dollars in damage and thousands of casualties; winter storms can impact half of the nation, paralyzing the transportation network with icy roads and wind driven snow; tornadoes can strike within minutes tearing apart homes; hurricanes can destroy entire communities with strong winds, heavy rain, and deadly storm surge; how understanding severe weather and knowing what to do before, during, and after an event can significantly reduce injury, deaths, and property damage. Same as CEE:2050.

## CBE:2105 Process Calculations

Fundamental principles of chemical process analysis, including material and energy balances for single-unit and multiple-unit processes, analysis of reactive and nonreactive systems, introduction to equations of state, thermodynamics of multiphase systems. Prerequisites: MATH:1550.

CBE:2110 Computational Tools for Chemical Engineers 2 s.h.
Numerical methods for solving systems of linear and nonlinear equations, nonlinear regression, multivariable calculus, and ordinary differential equations using chemical engineering examples. Prerequisites: MATH:1550. Corequisites: MATH:1560.
CBE:3000 Professional Seminar: Chemical Engineering 1 s.h.
Professional aspects of chemical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Prerequisites: CBE:2105. Requirements: sophomore standing.
CBE:3020 Applied Statistics for Chemical and Natural Resources Engineering

3 s.h.
Statistical and computational (Python programming) analysis of weather and climate data, univariate and multivariate statistics, hypothesis testing, statistical forecasting, forecast verification, timeseries analysis, trend analysis, and principal component analysis.
CBE:3105 Chemical Engineering Thermodynamics 3 s.h.
Applications of thermodynamic principles to chemical and physical processes; prediction of material properties; phase and chemical equilibria applied to mixtures and reacting systems. Prerequisites: ENGR:2130. Corequisites: CBE:2105.
CBE:3109 Fluid Flow 2 s.h.
Fundamentals of fluid flow, including fluid statics, fluid rheology, laminar and turbulent flow in pipes, external flow, flow through packed beds, fluidized beds, pumps and compressors, boundary layer theory, potential flow, dimensional analysis, and Navier Stokes Equations. Corequisites: CBE:2105.
CBE:3113 Heat and Mass Transfer 3 s.h.
Fundamentals of heat and mass transfer including heat exchanger design; conductive, convective, and radiative heat transfer; mechanisms of diffusional and convective mass transfer. Prerequisites: MATH:2560 and CBE:2105. Recommendations: CBE:3109.

## CBE:3117 Separations

3 s.h.
Solution of industrial problems including design of distillation, extraction, absorption, adsorption, drying, membrane processes, and mechanical separations. Prerequisites: CBE:2105 and CBE:3105. Corequisites: CBE:3113.
CBE:3120 Chemical Reaction Engineering 3 s.h.
Application of chemical reaction kinetics to design of chemical reactors: batch reactors, mixed flow reactors, plug flow reactors; reversible and irreversible single reactions; parallel, series, and mixed reactions; temperature and pressure effects on reactor design; heterogeneous catalysis; transport in porous catalysts. Prerequisites:
MATH:2560. Corequisites: CBE:3105. Recommendations:
CBE:3113.
CBE:3125 Chemical Process Safety
Application of transport phenomena, thermodynamics, chemical kinetics to study of safety, health, loss prevention; government regulations, toxicology/industrial hygiene, relief sizing, runaway reactions, toxic release and dispersion models, source models, fires and explosions, risk assessment, hazard identification, case studies and accident investigation, incorporation of safety into design; laboratory experiments. Prerequisites: CBE:3105 and CBE:3109. Corequisites: CBE:3113.
CBE:3150 Thermodynamics/Transport Laboratory 3 s.h.
Error analysis, propagation of errors, experimental design, data collection techniques, report writing, oral presentations, laboratory safety; laboratory investigations of thermodynamics, fluid flow, heat transfer, fluid rheology. Prerequisites: CBE:3105 and CBE:3113. Recommendations: STAT:2020 or CBE:3020.

## CBE:3155 Chemical Reaction Engineering/Separations Laboratory

Experimental design, data collection techniques, report writing, oral presentations; laboratory investigations of chemical reaction engineering and separations; experiments with plug flow and batch reactors, distillation, evaporation, membrane separation. Prerequisites: CBE:3117. Corequisites: CBE:3120. Recommendations: STAT:2020.
CBE:3205 Introduction to Biochemical Engineering 3 s.h.
Biochemistry, cellular biology, recombinant DNA and hybridoma technologies; emphasis on engineering aspects of biotechnology, including enzyme kinetics, cell growth kinetics, transport phenomena in bioreactors, bioreactor design, bioseparations, formulation and sterilization of growth media, commercial applications of biotechnology. Prerequisites: CBE:2105. Corequisites: CBE:3109. Recommendations: CBE:3120.

## CBE:3415 Statistical and Computational Analysis of Weather and

 Climate Data3 s.h.
Statistical and computational (Python programming) analysis of weather and climate data, univariate and multivariate statistics, hypothesis testing, statistical forecasting, forecast verification, timeseries analysis, principal component analysis, trend analysis, and cluster analysis. Requirements: senior or graduate standing.
CBE:3998 Individual Investigations: Chemical Engineering arr. Individual projects for chemical engineering undergraduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.
CBE:4105 Process Dynamics and Control in Design 3 s.h.
Theory and application of process dynamics to the design of chemical process control systems; mathematical models of unit operations, transfer functions, feedback and feed-forward control, stability, instrumentation, digital control systems; computer methods, including simulation and commercial software use; laboratory focus on process analysis and design. Prerequisites: MATH:2560 and CBE:2105 and CBE:3109. Corequisites: CBE:3120.
CBE:4109 Chemical Engineering Process Design I 2 s.h. Engineering economics of process evaluation, including time value of money and bases for cost estimation; preliminary design of chemical process plants using computer-aided engineering. Prerequisites: CBE:3109 and CBE:3113 and CBE:3117. Corequisites: CBE:3120 and CBE:3125.

## CBE:4110 Chemical Engineering Process Design II

 3 s.h.Capstone chemical engineering course; design and optimization of chemical process plants; application of process calculations, thermodynamics, kinetics, process synthesis, energy efficiency in separations, heat-exchanger network synthesis, physical property estimation, safety, computer-aided design, unit operations theory, process control, and economics. Prerequisites: CBE:4109. Recommendations: CBE:4105 and CBE:3205.
CBE:4125 Advanced Chemical Process Safety
3 s.h.
Chemical process safety including qualitative and quantitative hazard analysis, risk and consequence analysis, human factors and operator error, incident investigation, management of change procedures, interlocks and safety instrumented systems, layer of protection analysis, dust hazard analysis, and process safety management. Prerequisites: CBE:3125.
CBE:4195 Senior Enriching Activities Seminar
Aspects of chemical engineering education, including multidisciplinary team skills, understanding the impact of engineering practice locally and globally. Corequisites: CBE:4110. Requirements: completion of enriching activity.
CBE:4410 Sustainable Systems
3 s.h.
New and emerging concepts in sustainable systems design and assessment. Same as CEE:4107.

CBE:4420 Environmental Chemistry
3 s.h.
3 s.h. Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisites: CHEM:1120. Same as CEE:4150.
CBE:4459 Air Pollution Control Technology 3 s.h.
Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Same as CEE:4159, IGPI:4159.
CBE:4460 Process and Design for Satellites and Environmental Sensors
Exploration of how to design, develop, and implement science instruments, sensor networks, and satellite mission; emphasis on atmospheric sensors for planetary atmospheres; disciplines required, how to build a team, developing science requirements, developing instrument requirements, development and management of interface controls, workflow tracking, quality assurance verification, and resolving hardware/design problems; considerations needed by a principal investigator, instrument manager, instrument scientist, plan manager, or systems engineer to pursue a major instrument, mission development, industrial plan development, or expansion.
CBE:5000 Seminar in Chemical and Biochemical Engineering

1 s.h.
Presentation and discussion of recent advances and research in chemical and biochemical engineering by guest lecturers, faculty, students. Requirements: graduate standing.
CBE:5100 Graduate Professional Development Seminar 1 s.h. Seminar participants work with a faculty member to select and attend eight hours of approved seminars and professional development trainings at the University of Iowa; final meeting of participants is held to share notable seminars; typical seminar series include College of Engineering lectures, departmental and research center graduate seminars, chemical and biochemical engineering professional seminar series, and Center for Teaching and Learning offerings. Requirements: master's standing in chemical and biochemical engineering.

## CBE:5104 Introduction to Literature Review and Technical Writing

Review of technical literature, how to contribute to it; produce and present orally a peer-reviewed-journal-quality review article; brainstorming, group writing, research ethics, plagiarism. Recommendations: nonthesis track graduate standing.

## CBE:5105 Introduction to Literature Review and Proposal Writing

Tools for reviewing literature, skills for critical reading of publications, training in successful proposal writing; experience drafting a proposal that can be used as a starting point for the PhD comprehensive.
CBE:5110 Intermediate Thermodynamics 3 s.h.
Fundamental principles of thermodynamics as applied to phase equilibrium; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Requirements: CBE:3105 or ME:3040 or graduate standing. Same as ME:5210.

## CBE:5115 Transport Phenomena I

3 s.h.
Unified treatment of momentum, mass, energy transport in chemical engineering problems; use of vector and tensor notations in expressing equations of continuity, motion, energy.

## CBE:5120 Data Science in Chemical and Engineering

 SystemsTheory and application of numerical methods and data driven algorithms towards understanding chemical processes; scientific computing in Python programming language; numerical solutions to differential equations; nonlinear and constrained optimization; data preprocessing and visualization; dimensionality reduction and clustering; supervised machine learning.

## CBE:5140 Mathematical Methods in Engineering 3 s.h.

Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: MATH:2550 and MATH:2560. Same as CEE:5513, ME:5113.

## CBE:5199 Contemporary Topics: Chemical and Biochemical Engineering

Research techniques for graduate students in chemical and biochemical engineering.

## CBE:5210 Bioseparations

3 s.h.
Unit operations used to isolate and purify biologically derived chemicals, including flocculation, filtration, centrifugation, extraction, adsorption, chromatography, precipitation, crystallization, electrophoresis and cell disruption for intracellular product recovery.

## CBE:5300 Drug Delivery Devices <br> 3 s.h.

Why drug delivery devices are needed and how they are regulated; review of several clinical device categories (inhalation, transdermal, implantable) and preclinical technologies on the horizon.

## CBE:5310 Polymer Science and Technology <br> 3 s.h.

Uses and properties of industrially important polymeric materials; polymer chemistry, polymer structure, characterization, and polymer processing. Prerequisites: CHEM:2210 or CHEM:2230.

## CBE:5315 Polymer Chemistry 3 s.h.

Monomer reactivity and polymerization reactions; step, radical, ionic, and ring-opening polymerizations. Prerequisites: CHEM:2220.
CBE:5390 Photopolymerization Topics 1 s.h.
Seminars presented by faculty members, research assistants, students.
CBE:5405 Green Chemical and Energy Technologies 3 s.h.
Strategies for pollution prevention for chemical processes studied at macroscale (industrial sector), mesoscale (unit operations), and microscale (molecular level); case studies. Prerequisites: CBE:2105.

## CBE:5410 Electrochemical Engineering

Fundamentals of electrochemical engineering; various applications; focus on processes and systems that transform chemical energy into electrical energy (e.g., batteries, fuel cells) and vice versa (e.g., electrolyzers, oxygen generators for medical applications); electrochemical engineering in an increasingly important role in energy, chemical, environmental, and biomedical sectors.

## CBE:5412 Atmospheric Modeling 3 s.h.

Model equations and approaches for atmospheric dynamics and chemistry; numerical methods for radiative, chemical, and aerosol rates; parameterization of subgrid-scale processes; model evaluation and inverse modeling.

## CBE:5415 Satellite Image Processing and Remote Sensing of

 Atmosphere3 s.h.
Introduction to principles of atmospheric radiation and techniques for satellite image processing; hands-on experience with data calibration, image registration and enhancement, noise filtering and (supervised and unsupervised) multi-spectral classification of satellite imageries; various satellite sensors used for monitoring of different atmospheric processes and constituents. Same as IGPI:5415.

## CBE:5417 Physical Meteorology and Atmospheric Radiative

 3 s.h. TransferPhysical processes for weather and climate including radiative transfer, cloud and precipitation formation, and atmospheric electricity; theory of scattering by atmospheric particles (e.g., clouds, aerosols, molecules), atmospheric radiative transfer equations, and numerical techniques and tools to solve these equations. Requirements: senior or graduate standing. Same as IGPI:5417.

CBE:5425 Atmospheric Chemistry and Physics 3 s.h.
Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources, and removal processes. Corequisites: CBE:3120. Same as CEE:5115.
CBE:5466 Optical Components, Alignment, and Instrumentation for Remote Sensing 3 s.h.
Explore optical components including lenses, mirrors, beam splitters, fiber optics, and filters, and optical assemblies including beam expanders, interferometers, and laser cavities; assess and align optical assemblies using metrology equipment including collimators, autocollimators, and wavemeters; hands-on laboratory work. Work with optics, optical devices, and metrology equipment; learn how to handle, work with, and assess optics and optical components and how to align complex assemblages of components in a sensor. Recommendations: basic or introductory physics course with applications to atmospheric chemistry.
CBE:5740 Engineering Principles of Drug Delivery
Fundamental concepts in drug delivery from an engineering perspective: delivery mechanisms; materials and formulations for drug delivery; drug modifications (prodrugs, PEGylation); engineering principles of controlled release and targeted delivery (nanoparticles, microparticles, polymer and lipid based systems); quantitative understanding of drug transport; significance of biodistributions and pharmacokinetic models; toxicity issues; immune responses.

## CBE:5875 Perspectives in Biotechnology

1 s.h.
Topics related to careers in biotechnology with an emphasis on preparing graduate students for careers outside of academia; discussions led by a series of guest speakers from leading biotech industries; understanding the societal impact of basic research; participation in round-table discussions; and presentation of student research findings. Requirements: graduate standing and good academic standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BMB:5875, CEE:5875, CHEM:5875, MICR:5875, PHAR:5875.
CBE:5998 Individual Investigations: Chemical and Biochemical Engineering
Individual projects for chemical and biochemical engineering graduate students; may include laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

CBE:5999 MS Thesis Research: Chemical and Biochemical Engineering
arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for MS with thesis in chemical and biochemical engineering. Requirements: graduate standing.

## CBE:6145 Diffusive Transport

3 s.h.
Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies; analytical and numerical solution techniques; inverse heat conduction; multiphase and multicomponent systems. Prerequisites: ME:5145. Same as ME:6245.

CBE:6415 Advanced Satellite and Remote Sensing of
Atmosphere 3 s.h.

Cloud masking and retrieval of cloud properties from satellites, aerosol detection and retrievals, Earth radiation energy budget, land and/or ocean remote sensing, microwave remote sensing, wind retrieval, multi-sensor intercomparison and validation, optimization and inversion theory; hands-on projects.
CBE:6435 Advanced Atmospheric Radiative Transfer 3 s.h.
Theory of scattering by atmospheric particles (e.g., clouds, aerosols, molecules), atmospheric radiative transfer equations, and techniques to solve these equations for solar and terrestrial radiation; numerical experiments with Mie scattering, T-matrix calculation, and radiative transfer models.
CBE:7999 Research: Chemical and Biochemical Engineering PhD Dissertation arr.
Experimental and/or analytical investigation of an approved topic for
PhD in chemical and biochemical engineering.

## Chemical Engineering, BSE

The major in chemical engineering provides a broad education at the leading edge of technology. It emphasizes fundamental concepts, problem solving, laboratory techniques, and communication skills. The biological sciences join physics, chemistry, and mathematics as foundation disciplines for chemical engineering.

The sophomore, junior, and senior years emphasize chemical engineering courses such as process calculations, computational tools for chemical engineers, fluid flow, chemical engineering thermodynamics, heat and mass transfer, separations, chemical reaction engineering, chemical process safety, chemical engineering laboratories, biochemical engineering, process dynamics and control, and process design. Experience in instrumentation, analysis, and design is obtained through an integrated laboratory program. Routine use is made of computer-based data analysis, simulation, and design.

## Focus Areas

Chemical engineering students may gain a depth of knowledge related to a career path through their selection of science, engineering, and general education courses. Several preapproved focus areas may help students define potential careers; the focus area enables students to gain depth of knowledge in a career path. Students meet with their chemical engineering academic advisor to discuss career options and develop a plan for choosing electives based on their career interests. The department offers preapproved focus areas in biochemical engineering; business; chemical process engineering; computation, data science, and machine learning; energy and environment; entrepreneurship; oil and gas engineering; pharmaceuticals; polymers; pre-medicine; safety and health; and sustainability. Students may prefer to develop an individualized focus area, which is subject to approval by the department's curriculum committee.

## Biochemical Engineering

This focus area allows students to choose from a selection of courses that combine concepts of biology, biochemistry, and engineering. Biochemical engineers combine knowledge of these three areas to manufacture products of biological nature, including fermentation products and pharmaceuticals. Students often go on to work in the biotechnology and pharmaceutical industries as production leaders or researchers.

## Business

This focus area consists of eight courses from the Tippie College of Business. Students gain foundational business knowledge on topics including finance, economics, accounting, marketing, law, and management. Past students have applied their integrated business and technical knowledge to many different settings including manufacturing plants, consulting, and corporate offices.

## Chemical Process Engineering

Process engineering is the design, optimization, and operation of systems that transform raw materials into valuable products. Process engineers are involved with products, including foods and beverages, electronic materials, metals, plastics, fuels, building materials, and pharmaceutics.
Since chemical process engineering spans many aspects of engineering, business, applied math, and science, students can choose from a broad selection of engineering, math, and science courses. This focus area provides ample room for customization and opportunities to tailor to individualized interests. Students who do not declare a specific focus area are automatically placed in chemical process engineering.

## Computation, Data Science, and Machine Learning

This focus area is for students who intend to blend advanced computation and programming with their chemical engineering degree. This area is customizable based on student interest areas, and can accommodate introductory training in cyber-physical systems, remote sensing, advanced simulation, supply chain management, in silico chemistry and biology, bioinformatics, software design, nextgeneration controls, machine learning, and artificial intelligence.

## Energy and Environment

Students who are passionate about the environment should consider this focus area. Courses prepare students to solve environmental challenges and to revolutionize energy systems. Topics include air pollution, climate change, clean and renewable energy, environmental regulations, and sustainable systems.

## Entrepreneurship

This focus area allows students to focus on the process of succeeding in the world of startups, innovation, business ownership, and new products. The area is well-suited for students who intend to start and operate their own business. It also serves students interested in gaining a better understanding of managing innovation in an existing business environment. The wide range of electives permits students to tailor business courses best suited to their individual interests.

## Oil and Gas Engineering

Meant for students interested in pursuing careers in oil and gas engineering, this focus area explores foundational elements of chemistry, geology, petrochemical refining, and environmental science. The course plan offers several recommendations put in place by experienced advisors with petrochemical backgrounds. Often viewed as the birth of chemical engineering, the petroleum industry provides a host of challenging and lucrative opportunities for chemical engineers. This path provides a unique and focused introduction to the field.

## Pharmaceuticals

Chemical and biochemical engineering is central to the design, formulation, and manufacturing of pharmaceutical products. Students who are passionate about medical applications can align their chemical engineering skills toward a career in pharmaceuticals by choosing this focus area. The curriculum features biology, drug delivery, and the mechanisms and chemistry of drug interactions. Course options span many departments besides chemical and biochemical engineering, including biomedical engineering, biochemistry and molecular biology, pharmacy, and pharmacology.

## Polymers

This focus area enables students to study the development of chemical compounds by polymerization, including combining small molecules into engineered networks to produce valuable plastics and other advanced materials. The program is well suited for students who intend to use their knowledge to design new materials; it also serves students interested in gaining a better understanding of the links between molecular scale structure and macroscopic scale properties.

## Pre-Medicine

Concepts of chemical engineering are naturally applicable to the processes in living organisms. This focus area enables students to apply these concepts to gain a deeper understanding of the atoms and molecules that comprise living organisms, and the pathways through which they operate. This program is for students who intend to use
their knowledge to gain acceptance to post-graduate education in the medical field.

## Safety and Health

This focus area prepares students to prevent incidents and accidents in chemical and pharmaceutical manufacturing, particularly those resulting from the unintentional release of hazardous materials and energy into the environment; and provide a safe and healthy workplace by preventing injuries and hazards in the workplace environment.

## Sustainability

This focus area covers the most important and current topics in environmental science, societal impacts, energy usage, and natural systems. Courses prepare students to understand and discuss these topics as they relate to chemical engineering.

## Educational Objectives

The chemical engineering program produces graduates with a strong foundation of scientific and technical knowledge who are equipped with problem-solving, teamwork, and communication skills that will serve them throughout their careers consistent with the following educational objectives. Within a few years following graduation, graduates will:

- attain careers as practicing chemical engineers in fields such as biotechnology, chemicals, computation, energy, environmental engineering, food processing, microelectronics, pharmaceuticals, or polymers/advanced materials;
- pursue advanced studies in disciplines such as business, chemical engineering, dentistry, environmental engineering, law, medicine, or pharmaceuticals; or
- assume professional leadership roles.

The following methods and strategies are used in the chemical engineering undergraduate program to achieve these program educational objectives:

- foster a unique and personalized undergraduate experience by leveraging the advantages of a small college atmosphere within a comprehensive liberal arts and research university;
- provide a diverse, inclusive, and equitable environment for all students;
- enrich the undergraduate experience through cultural diversity, international opportunities, and/or experiential learning;
- provide a solid foundation and understanding of the fundamental principles of mathematics, science, and engineering;
- provide students with experience in learning and applying tools, and analyzing and interpreting data, to solve theoretical and openended chemical engineering problems;
- provide students with opportunities to participate in collaborative teams;
- develop students' written and oral communication skills to a wide range of audiences;
- provide students with opportunities to design and conduct chemical engineering experiments and to design systems, components, and chemical processes to meet specific needs and constraints;
- provide a contemporary grounding in ethical and professional responsibility, including global, economic, environmental, safety, and societal impacts of engineering decisions; and
- instill the desire and the understanding of the need for lifelong learning.

Requirements
The Bachelor of Science in Engineering with a major in chemical engineering requires a minimum of $129 \mathrm{~s} . \mathrm{h}$. of credit, plus five 1 s.h. seminars and one 0 s.h. seminar. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1448] in the catalog. Students completing the major in chemical engineering fulfill the collegiate statistics requirement by completing CBE:3020 Applied Statistics for Chemical and Natural Resources Engineering, STAT:2020 Probability and Statistics for the Engineering and Physical Sciences, or STAT:3510 Biostatistics. Some focus areas may suggest or require specific courses to fulfill the General Education Component of the collegiate curriculum; see "Focus Area" below.

Students are required to participate in at least one enriching activity, which may include a research experience, a cooperative education or internship experience, study abroad, completion of the Certificate in Technological Entrepreneurship [p. 1588], or other approved experiences.

The major in chemical engineering includes the following departmental seminars.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CBE:1000 | CBE Departmental Seminar <br> (typically taken in the first year) | 1 |
| CBE:3000 | Professional Seminar: Chemical <br> Engineering (taken four times <br> for 1 s.h. each) | 4 |
| CBE:4195 | Senior Enriching Activities <br> Seminar | 0 |

The major in chemical engineering requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Collegiate Curriculum | 50 |
| Major Requirements | 64 |
| Focus Area | 15 |

## Major Requirements

Major requirements include a set of common courses ( 53 s.h.), an advanced chemistry or biochemistry course ( $3 \mathrm{~s} . \mathrm{h}$.), an advanced science course ( 3 s.h.), and two capstone design courses ( 5 s.h.).
Common Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| CBE:2105 | Process Calculations | 3 |
| CBE:2110 | Computational Tools for <br> Chemical Engineers | 2 |
| CBE:3105 | Chemical Engineering |  |
|  | Thermodynamics | 3 |
| CBE:3109 | Fluid Flow | 2 |
| CBE:3113 | Heat and Mass Transfer | 3 |
| CBE:3117 | Separations | 3 |
| CBE:3120 | Chemical Reaction Engineering | 3 |
| CBE:3125 | Chemical Process Safety | 3 |
| CBE:3150 | Thermodynamics/Transport | 3 |
|  | Laboratory |  |

| CBE:3155 | Chemical Reaction Engineering/ Separations Laboratory | 3 |
| :---: | :---: | :---: |
| CBE:3205 | Introduction to Biochemical Engineering | 3 |
| CBE:4105 | Process Dynamics and Control in Design | 3 |
| CHEM:1120 | Principles of Chemistry II | 4 |
| CHEM:2210 <br> or CHEM:2230 | Organic Chemistry I Organic Chemistry I for Majors | 3 |
| $\begin{aligned} & \text { CHEM:2220 } \\ & \text { or CHEM:2240 } \end{aligned}$ | Organic Chemistry II Organic Chemistry II for Majors | 3 |
| CHEM:2410 <br> or CHEM:2420 | Organic Chemistry Laboratory Organic Chemistry Laboratory for Majors | 3 |
| ENGR:2130 | Thermodynamics | 3 |
| ENGR:2720 | Materials Science | 3 |

## Advanced Chemistry or Biochemistry Course

Some focus areas may suggest or require a specific course; see "Focus Area" below. Students select a course considered advanced for the minor in chemistry [p. 211] (College of Liberal Arts and Sciences) or one of the following courses in the Department of Biochemistry and Molecular Biology (Carver College of Medicine).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMB:3110 | Biochemistry | 3 |
| BMB:3120 | Biochemistry and Molecular | 3 |
|  | Biology I |  |
| BMB:3130 | Biochemistry and Molecular | 3 |

Acceptable courses from the Department of Chemistry (College of Liberal Arts and Sciences) include but are not limited to the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CHEM:3110 | Equilibria and Electrochemistry | 3 |
| CHEM:3120 | Spectroscopy and Separations | 3 |
| CHEM:4430 | Principles of Physical | 3 |
|  | Chemistry | 3 |
| CHEM:4431 | Chemical Thermodynamics | 3 |
| CHEM:4432 | Quantum Mechanics and | 3 |

## Advanced Science Course

Students select an advanced science-based course either within or outside of the College of Engineering. Appropriate subject areas could include biochemistry and molecular biology (prefix BMB), biology (prefix BIOL), chemistry (prefix CHEM), microbiology and immunology (prefix MICR), and physics (PHYS). Some focus areas may suggest or require a specific course; see "Focus Area" below. Students may consult an advisor or visit the Department of Chemical and Biochemical Engineering website for more information.

Acceptable courses include but are not limited to the following.
Consult an academic advisor for approval to take a course not on this list.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CBE:4420 | Environmental Chemistry | 3 |
| CBE:5315 | Polymer Chemistry | 3 |
| CBE:5425 | Atmospheric Chemistry and | 3 |
|  | Physics |  |
| BIOL:4213 | Bioinformatics | 4 |
| BME:2400 | Cell Biology for Engineers | 3 |

| CEE:5440 | Foundations of Environmental Chemistry and Microbiology | 3 |
| :---: | :---: | :---: |
| EES:4520 | Isotope Geochemistry | 3 |
| PHYS:3741 | Introduction to Quantum Mechanics I | 3 |
| Advanced chemistry and biochemistry courses in the areas listed above |  | 3 |
| The following courses do not fulfill this requirement. |  |  |
| Course \# | Title | Hours |
| CBE:5210 | Bioseparations | 3 |
| CBE:5310 | Polymer Science and Technology | 3 |
| CBE:5405 | Green Chemical and Energy Technologies | 3 |
| CBE:5410 | Electrochemical Engineering | 3 |
| BIOL:1411 | Foundations of Biology | 4 |
| BIOL:1412 | Diversity of Form and Function | 4 |
| PHYS:1612 | Introductory Physics II | 4 |

Courses used to satisfy the engineering electives requirements for a focus area

## Capstone Design Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Chemical Engineering Process <br> CBE:4109 | Design I <br> Chemical Engineering Process <br> Design II |

## Focus Area

Students must select focus area courses according to guidelines established by the Department of Chemical and Biochemical Engineering. The department offers preapproved focus areas in biochemical engineering [p. 1478]; business [p. 1479]; chemical process engineering [p. 1479]; computation, data science, and machine learning [p. 1479]; energy and environment [p. 1480]; entrepreneurship [p. 1480]; oil and gas engineering [p. 1481]; pharmaceuticals [p. 1481]; polymers [p. 1482]; pre-medicine [p. 1482]; safety and health [p. 1483]; and sustainability [p. 1483].

Students may prefer to develop a custom-tailored focus area, which is subject to approval by the department's curriculum committee. Visit the Department of Chemical and Biochemical Engineering website for detailed descriptions of preapproved focus areas and guidelines for tailored focus areas.

Focus areas in chemical engineering consist of content area courses (12 s.h.) and a free elective course (3 s.h.); carefully selected courses may contribute to earning a minor and/or certificate. Some focus areas also may suggest or require specific courses to fulfill the General Education Component of the collegiate curriculum, the chemical engineering major's advanced chemistry or biochemistry requirement, and/or the major's advanced science requirement.

Students who do not declare a specific focus area are automatically placed in chemical process engineering.

## Biochemical Engineering

Students in the biochemical engineering focus area are encouraged to complete BMB:3110 Biochemistry to satisfy the chemical engineering major's advanced chemistry/biochemistry or advanced science requirement.

## Required Biochemical Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| CBE:5210 | Bioseparations | 3 |

## Biochemical Electives

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| 9 s.h. from these: |  |  |
| CBE:3998 | Individual Investigations: Chemical Engineering | arr. |
| CBE:5875/ <br> BMB:5875/ <br> CEE:5875/ <br> CHEM:5875/ <br> MICR:5875/ <br> PHAR:5875 | Perspectives in Biotechnology | 1 |
| BIOL:1411 | Foundations of Biology | 4 |
| BIOL:1412 | Diversity of Form and Function | 4 |
| BMB:3120 | Biochemistry and Molecular Biology I | 3 |
| BMB:3130 | Biochemistry and Molecular Biology II | 3 |
| BMB:3140 | Experimental Biochemistry | 2 |
| BME:2400 | Cell Biology for Engineers | 3 |
| BME:5430 | Biotransport | 3 |
| CHEM:4850/ <br> PHAR:4850 | Upstream Biotechnology Processes | 2 |
| MICR:2157 | General Microbiology | 3 |
| MICR:2158 | General Microbiology Laboratory | 2 |

In addition to the courses listed above, students may select courses with prefix BIOL, BMB, CHEM, or MICR numbered 3000 or above. Advisor approval is required for courses that center on experiential learning, such as research (e.g., MICR:4161 Undergraduate Research in Microbiology), science communication (e.g., CHEM:4000 Scientists and Writers), service learning (e.g., BIOL:4806 Service Learning in Biology), or teaching internships/practica (e.g., BMB:3800 Biochemistry Teaching Practicum).

## Free Elective-Biochemical Engineering Focus Area

Students are required to select an additional course of their choice and should consult with an academic advisor for assistance in selection as needed.

## Business

The business focus area requires the following courses to fulfill the collegiate curriculum General Education Component approved course subjects requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| ECON: 1100 | Principles of Microeconomics | 4 |
| ECON:1200 | Principles of Macroeconomics | 4 |
| MKTG:3000 | Introduction to Marketing | 3 |

## Required Business Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  | 3 |
| FIN:3000 | Introductory Financial | 3 |
| ISE:2500 | Engineering Economy | 3 |

## Business Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Three of these: | Introduction to Financial |  |
| ACCT:2100 | Accounting | 3 |
| ACCT:2200 | Managerial Accounting <br> Analytics and Data | 3 |
| MGMT:2000 | Visualization |  |
| MGMT:2100 | Introduction to Law | 3 |

## Free Elective-Business Focus Area

Students are required to select an additional course of their choice and should consult with an academic advisor for assistance in selection as needed. Students interested in completing the minor in business administration [p. 1132] (Tippie College of Business) are especially encouraged to complete all four courses listed under "Business Electives" above.

## Chemical Process Engineering

Students choose 12 s.h. from a broad selection of engineering, math, and science courses numbered 3000 or above. Students are encouraged to complete MATH:4820 Optimization Techniques and should consult academic advisors for additional course selection.
Students who do not declare a specific focus area are automatically placed in chemical process engineering.

## Computation, Data Science, and Machine Learning

## Computation, Data Science, and Machine Learning Electives

| Course \# | Title | Hours |

| ENGR:2995 | Introduction to Artificial Intelligence and Machine Learning in Engineering | 3 |
| ME:4048 | Energy Systems Design | 4 |
| OEH:6710 | Human Toxicology and Risk Assessment | 3 |

In addition to the courses listed above, students may select courses with prefix CHEM, EES, GEOG, or OEH numbered 3000 or above. Advisor approval is required for courses that center on experiential learning, such as research (e.g., GEOG:3992 Undergraduate
Research), science communication (e.g., CHEM:4000 Scientists and Writers), or practical experiences/field trip courses (e.g., EES:3001 Third-Year Field Trip for Earth and Environmental Sciences).

## Free Elective-Energy and Environment Focus Area

Students are required to select an additional course of their choice and should consult with an academic advisor for assistance in selection as needed.

## Entrepreneurship

## Required Entrepreneurship Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| FIN:3000 | Introductory Financial | 3 |
|  | Management | 3 |

## Entrepreneurship Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 9 s.h. from these: |  | 3 |
| ENTR:2000 | Entrepreneurship and |  |
|  | Innovation | 3 |

An approved course with prefix ENTR that counts 3
toward the technological entrepreneurship certificate

## Free Elective-Entrepreneurship Focus Area

Students are required to select an additional course of their choice and should consult with an academic advisor for assistance in selection as needed. It is recommended that students choose a course with prefix ENTR that counts toward the Certificate in Technological Entrepreneurship [p. 1588].

## Oil and Gas Engineering

The following courses are prerequisites for many of the oil and gas engineering focus area courses. Due to their introductory nature, they do not count toward the focus area's content requirements, but one of the two may be counted as the focus area free elective.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CEE:1030/EES:1030 | Introduction to Earth Science | $3-4$ |
| EES:1050 | Introduction to Geology | 4 |
| The following courses are recommended to students in the oil and |  |  |
| gas engineering focus area to fulfill part of the collegiate curriculum |  |  |
| General Education Component approved course subjects requirement. |  |  |
| Course \# | Title | Hours |
| Both of these: |  |  |
| GEOG:1115/ | The History of Oil | 3 |
| EES:1115/ |  |  |
| ENVS:1115/ |  |  |
| HIST:1115 |  |  |
| GEOG:3780/ | U.S. Energy Policy in Global | 3 |
| GHS:3780/ | Context |  |
| HIST:3240/ |  |  |
| POLI:3431 |  |  |

Students in this focus area are encouraged to select courses for the chemical engineering major's advanced science requirement from the following list.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EES:3110/ | Chemical Evolution of the | 3 |
| ENVS:3110 | Oceans |  |
| EES:4490 | Elements of Geochemistry <br> (recommended for students <br> specializing in petroleum) | 3 |
| EES:4630 | Hydrogeology (recommended <br> for students specializing in <br> petroleum) | 4 |
| EES:4640 | Contaminant Hydrogeology |  |

## Required Oil and Gas Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| CBE:5405 | Green Chemical and Energy <br> Technologies | 3 |

## Oil and Gas Electives

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| 9 s.h. from these: |  |  |
| CBE:5199 | Contemporary Topics: Chemical and Biochemical Engineering | arr. |

## Pharmaceuticals

## Required Pharmaceuticals Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least one of these: |  | 3 |
| PCOL:2220 | Drug Use and Abuse | 3 |
| PCOL:3101 | Pharmacology I: A Drug's |  |

## Pharmaceuticals Electives

Students select from the engineering, pharmaceutics, and science courses listed below to reach a total of 12 s.h. when combined with either or both of the courses listed above

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| CBE:3998 | Individual Investigations: Chemical Engineering | arr. |
| CBE:5210 | Bioseparations | 3 |
| CBE:5300 | Drug Delivery Devices | 3 |
| CBE:5740 | Engineering Principles of Drug Delivery | 3 |
| BIOL:1411 | Foundations of Biology | 4 |
| BMB:3110 | Biochemistry | 3 |
| BMB:3120 | Biochemistry and Molecular Biology I | 3 |
| BMB:3140 | Experimental Biochemistry | 2 |
| BME:4310/ <br> BMB:4310 | Computational Biochemistry | 3 |
| BME:5421 | Cell Material Interactions | 3 |
| BME:5430 | Biotransport | 3 |
| CHEM:3110 | Equilibria and Electrochemistry | 3 |
| CHEM:3120 | Spectroscopy and Separations | 3 |
| CHEM:3430 | Analytical Measurements | 3 |
| ENGR:2995 | Introduction to Artificial Intelligence and Machine Learning in Engineering | 3 |
| HHP:1300 | Fundamentals of Human Physiology | 3 |
| OEH:6450 | Aerosol Technology | 3 |
| PCOL:3102 | Pharmacology II: Mechanisms of Drug Action | 3 |
| PHAR:4146 | Drug Disposition and Pharmacokinetics | 2 |
| PHAR:4501 | Basic Principles of Toxicology | 3 |
| PHAR:4537 | Principles of Drug Metabolism | 3 |
| PHAR:4736 | Properties of Dosage Forms I | 3 |
| PHAR:4737 | Properties of Dosage Forms II | 3 |
| PHAR:4741 | Immunology and Immunotherapies | 2 |
| PHAR:4800 | Chemical and Biophysical Properties of Drugs | 1 |
| PHAR:5521 | High Throughput Screening for Pharmaceutical and Biomedical Sciences | 1 |
| A course with | HEM numbered 3000 or above | 3 |

Advisor approval is required to select additional chemistry courses that center on experiential learning, such as research (e.g., CHEM:3994 Undergraduate Research) or science communication (e.g., CHEM:4000 Scientists and Writers)

## Free Elective-Pharmaceuticals Focus Area

Students are required to select an additional course of their choice and should consult with an academic advisor for assistance in selection as needed.

## Polymers

## Required Polymers Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  | 3 |
| CBE:5310 | Polymer Science and <br> Technology |  |

## Polymers Electives

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| 9 s.h. from these: |  |  |
| CBE:3998 | Individual Investigations: Chemical Engineering | arr. |
| CBE:5199 | Contemporary Topics: Chemical and Biochemical Engineering | arr. |
| CBE:5300 | Drug Delivery Devices | 3 |
| CBE:5390 | Photopolymerization Topics | 1 |
| CBE:5740 | Engineering Principles of Drug Delivery | 3 |
| BME:2500 | Biomaterials and Biomechanics | 4 |
| BME:5421 | Cell Material Interactions | 3 |
| CHEM:4372 | Advanced Organic Chemistry | 3 |
| CHEM:5118 | Nanomaterials | 3 |
| ME:5146 | Modeling of Materials Processing | 3 |
| ME:5167/CEE:5137 | Composite Materials | 3 |
| Engineering, math, or or above | science courses numbered 3000 |  |

## Free Elective-Polymers Focus Area

Students are required to select an additional course of their choice and should consult with an academic advisor for assistance in selection as needed.

## Pre-Medicine

Students in this focus area are encouraged to complete the major's advanced chemistry or biochemistry and advanced science requirements by completing either the sequence $\mathrm{BMB}: 3120$ Biochemistry and Molecular Biology I and BMB:3130 Biochemistry and Molecular Biology II to satisfy both requirements, or BMB:3110 Biochemistry to satisfy one of the two requirements

The following courses are recommended to students in the premedicine focus area to fulfill the collegiate curriculum General Education Component approved course subjects requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| PSY:1001 | Elementary Psychology | 3 |
| PSY:2130 | Advanced Psychology for Pre- | 3 |
| SOC:1010 | Medical Track | $3-4$ |

## Required Pre-Medicine Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| BIOL:1411 | Foundations of Biology | 4 |
| BIOL:1412 | Diversity of Form and Function | 4 |
| PHYS:1612 | Introductory Physics II | 4 |

## Free Elective-Pre-Medicine Focus Area

Students are required to select an additional course of their choice and should consult with an academic advisor for assistance in selection as needed.

## Safety and Health

Students in this focus area are encouraged to complete OEH:6710 Human Toxicology and Risk Assessment to satisfy the chemical engineering major's advanced science requirement.

The following courses are recommended to students in the safety and health focus area as part of the collegiate curriculum General Education Component.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Approved Course Subjects |  |  |
| GHS:3560 | Global Garbage and Global Health | 3 |
| $\begin{aligned} & \text { GHS:3760/ } \\ & \text { GEOG:3760 } \end{aligned}$ | Hazards and Society | 3 |
| Diversity and Inclusion |  |  |
| HHP:1045 | Diversity and Inclusion in Healthy Living | 3 |
| Required Safety and Health Course |  |  |
| Course \# | Title | Hours |
| This course: |  |  |
| CBE:4125 | Advanced Chemical Process Safety | 3 |

## Safety and Health Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 9 s.h. from these: |  | 3 |
| CBE:4459/CEE:4159/ | Air Pollution Control |  |
| IGPI:4159 | Technology | 3 |
| CEE:4158/OEH:4920 | Solid and Hazardous Wastes | 3 |
| CPH:3200 | Death at Work: Case Studies of |  |
|  | Workplace Safety and Health | 3 |
| ISE:4175 | Safety Engineering | 3 |
| OEH:5410 | Occupational Safety | 3 |
| OEH:5620 | Occupational Health | 3 |
| OEH:6420 | Methods in Exposure Science | 3 |
| OEH:6440 | Control of Occupational |  |
|  | Hazards | 3 |
| OEH:6450 | Aerosol Technology | 4 |
| OEH:6720 | Advanced Toxicology |  |

## Free Elective-Safety and Health Focus Area

Students are required to select an additional course of their choice and should consult with an academic advisor for assistance in selection as needed.

## Sustainability

Students in the sustainability focus area are encouraged to complete CBE:5425 Atmospheric Chemistry and Physics to satisfy the chemical engineering major's advanced science requirement.

Students in this focus area are required to complete the following courses to fulfill the collegiate curriculum's General Education Component.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Be Creative |  |  |
| CNW:2740 | The Art and Craft of Writing about the Environment | 3 |
| Approved Course Subjects |  |  |
| ENGL:1510 | Introduction to Environmental Literature | 3 |
| or JMC: 1800 | Twenty-first-Century Science: E Communication in the Digital Ag | ental |
| GEOG:1070 | Contemporary Environmental Issues | 3 |
| GEOG:2013/ <br> BUS:2013/ <br> SUST:2013/ <br> URP:2013 | Introduction to Sustainability | 3 |
| Sustainability Electives |  |  |
| It is recommended that students choose courses that contribute to completing the Certificate in Sustainability [p. 2102] (University College). |  |  |
| Course \# | Title | Hours |
| 12 s.h. from these: |  |  |
| CBE:4410/CEE:4107 | Sustainable Systems | 3 |
| A course that counts to Sustainability | oward the Certificate in | 3-4 |
| A science or engineering course numbered 3000 or above |  |  |
| May include one of these: |  |  |
| EES:1080/ <br> ENVS:1080 | Introduction to Environmental Science | 3-4 |
| EES:1085/ <br> ENVS:1085 | Fundamentals of Environmental Science | 4 |

## Free Elective-Sustainability Focus Area

Students are required to select an additional course of their choice and should consult with an academic advisor for assistance in selection as needed. It is recommended that students choose a course that contributes to completing the Certificate in Sustainability [p. 2102] (University College).

## Combined Programs

## BSE/MS in Chemical and Biochemical Engineering

The College of Engineering offers a combined Bachelor of Science in Engineering/Master of Science for chemical engineering undergraduate students who intend to earn an MS in chemical and biochemical engineering. BSE/MS students may count 12 s.h. of coursework (typically advanced chemistry sequences and electives) toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the BSE, and they typically complete the MS one year later.
To be admitted to the degree program, students must have a cumulative grade-point average of at least 3.25, and must apply to the Graduate College for acceptance into the program before starting their final two semesters. Visit Undergraduate to Graduate (U2G) Programs on the Department of Chemical and Biochemical Engineering website to learn more.

## BSE/MS in Civil and Environmental Engineering

Bachelor of Science in Engineering students majoring in chemical engineering who are interested in earning a Master of Science in civil and environmental engineering may apply to the combined BSE/ MS program offered by the College of Engineering. The combined program enables undergraduate students to begin work on the MS while completing their BSE. Students admitted to the program may count 9 s.h. of coursework toward both the BSE and the MS degree requirements. They also may count an additional 3 s.h. toward the MS degree requirements before they have been awarded the BSE. For more information, see the MS in civil and environmental engineering [p. 1511] in the catalog.

## Career Advancement

Chemical and biochemical engineers work in a wide range of industries, including petroleum and specialty chemical production, polymer and plastic production, food processing, energy, microelectronics production, pharmaceutical production, biochemical processing, and environmental compliance. Potential jobs include production, process development, plant design and construction, and fundamental research. Many experienced chemical and biochemical engineers move through management ranks to highlevel administrative positions. On average, $93-98 \%$ of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.
The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE).
Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.
Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

| Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall) ${ }^{q}$ |  |  |
|  | Hours | 15 |
|  | Total Hours | 134 |
| a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change. |  |  |
| b Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change. c Enrollment in math courses requires completion of a placement exam. |  |  |
| d Enrollment in chemistry courses requires completion of a placement exam. |  |  |
| e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change. |  |  |
| f Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change. |  |  |
| g See General Catalog for list of approved course subjects. Some focus areas recommend or require specific courses. See General Catalog, chemical and biochemical engineering website, or consult your advisor. |  |  |
| h CHEM:2210 typically is offered in fall, spring, and summer sessions. CHEM:2230 typically is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change. |  |  |
| i Students select a course from one of two GE CLAS Core areas: Diversity and Inclusion or Values and Culture. Some focus areas recommend or require specific courses. See General Catalog, chemical and biochemical engineering website, or consult your advisor. |  |  |
| j CBE:3020 typically is offered in spring semesters only. STAT:2020 typically is offered in fall, spring, and summer sessions. STAT:3510 |  |  |

typically is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.
k CHEM:2220 typically is offered in fall, spring, and summer sessions. CHEM:2240 typically is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
1 CHEM:2410 typically is offered in fall, spring, and summer sessions. CHEM:2420 typically is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
mSee General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI. Some focus areas may require specific courses to fulfill this requirement.
n Students select one of many preexisting focus areas or work with an advisor to develop a custom focus area. Focus areas require 12 s.h. specific to their content area and a 3 s.h. elective course. Some focus areas may also suggest or require specific courses to fulfill the General Education Component, advanced chemistry, or advanced science courses. Students who do not declare a specific focus area are automatically placed in chemical process engineering. See General Catalog or consult an advisor for more information.
o The advanced chemistry/biochemistry course must have a course subject of CHEM or BMB. Some focus areas may suggest or require specific courses to fulfill the advanced chemistry requirement. See General Catalog or consult an advisor for more information.
p Students select an advanced science-based course either within or outside of the College of Engineering. Appropriate subject areas could include biochemistry and molecular biology (prefix BMB), biology (prefix BIOL), chemistry (prefix CHEM), microbiology and immunology (prefix MICR), and physics (PHYS). Some focus areas may suggest or require specific courses to fulfill the advanced science requirement. See General Catalog or consult an advisor for more information.
q Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Chemical and Biochemical Engineering, MS 

The Department of Chemical and Biochemical Engineering provides a stimulating academic community where students engage in a highly personalized learning and research environment. The graduate program provides qualified students with deeper and broader training than is possible at the undergraduate level. The Master of Science program provides students with opportunities to obtain specialized knowledge and expertise through advanced coursework in chemical engineering and related disciplines, to engage in interdisciplinary research opportunities (thesis option), and to impact their communities through service learning.

Faculty within the department have focused research projects in biological and pharmaceutical systems, clean energy and water, air quality and climate, polymers and advanced materials, quantum chemical simulation, machine learning, and remote sensing; see Graduate Program on the Department of Chemical and Biochemical Engineering website.

## Learning Outcomes

Graduates will:

- demonstrate a mastery of advanced chemical engineering concepts;
- effectively communicate scientific concepts and/or research results in both written and oral formats to scientific and general audiences;
- demonstrate knowledge of and commitment to safe and ethical behavior through adherence to best safety practices and academic integrity principles; and
- demonstrate the ability to serve as a STEM ambassador through outreach and service activities.
Students completing the program with thesis will additionally demonstrate the abilities to:
- perform independent research on an original topic in chemical engineering; and
- critically identify and solve research problems, summarize disciplinary information, and evaluate research findings.

## Requirements

The Master of Science program in chemical and biochemical engineering requires a minimum of 30 s.h. in approved graduate courses with or without thesis, plus $3-5$ s.h. of required seminars (nonthesis and Undergraduate to Graduate students complete 3 s.h.; thesis students complete $3-5$ s.h.). Students who pursue the thesis option may earn up to 6 s.h. in CBE:5999 MS Thesis Research: Chemical and Biochemical Engineering. All students must maintain a cumulative grade-point average of at least 3.00.
Students who receive assistantships, fellowships, or other awarded financial support are expected to pursue an advanced degree with thesis.

Students entering with a degree other than chemical engineering may need to take additional coursework to attain proficiency in core areas of chemical engineering.
The MS with a major in chemical and biochemical engineering requires the following coursework.

## Core Courses

Students must maintain a GPA of at least 3.25 in the five core courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Introduction to Literature |  |
| CBE:5105 | Review and Proposal Writing | 3 |
| CBE:5110 | Intermediate Thermodynamics | 3 |
| CBE:5115 | Transport Phenomena I | 3 |
| CBE:5120 | Data Science in Chemical and <br> Engineering Systems | 3 |

## Kinetics

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| CBE:3205 | Introduction to Biochemical | 3 |
| CBE:5315 | Engineering | 3 |
| CBE:5425 | Polymer Chemistry | 3 |

## Breadth Requirement

Students take a 3 s.h. course taught in the Department of Chemical and Biochemical Engineering (prefix CBE) in an area outside their prior graduate degree training and research specialization area.

## Electives

Students supplement the core curriculum with electives tailored to their interests.

## Additional Requirements

All thesis students must take ENGR:7270 Engineering Ethics during their first semester and CBE:5000 Seminar in Chemical and Biochemical Engineering each semester in residence. Nonthesis students must take CBE:5100 Graduate Professional Development Seminar in each of their final two semesters in the program.
Students in the nonthesis program may petition for entry into the thesis program or the PhD program by requesting a change of status through the Graduate College. The request is reviewed by the Graduate Admissions Committee. If approved by the committee, the request is forwarded to the chemical and biochemical engineering faculty for final approval. Students then are assigned to research advisors as though they are newly admitted graduate students. For a detailed description of program requirements, see Graduate Program on the Department of Chemical and Biochemical Engineering website.
All students must pass a final examination.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must provide the following.

- Completed application form.
- Unofficial transcript(s). If admitted, official transcripts are required before enrollment. For international students, all academic records should bear the original stamp or seal of the institution and the signature of a school official. Documents not in English must be accompanied by a complete, literal, English translation, certified by the issuing institution.
- Official Graduate Record Examination (GRE) General Test scores (verbal and quantitative) from Educational Testing Services (the university's institutional code is 6681).
- Statement of purpose.
- Three letters of recommendation.
- Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores for applicants whose first language is not English.

Admission to the department is competitive and is based on an applicant's previous coursework, research, and/or industrial experience. The admissions committee looks for evidence that an applicant has demonstrated qualities such as creativity, self-initiative, dedication, and perseverance exhibited by successful master's degree students.
Applicants must have earned a four-year baccalaureate degree (BS or BSE) in chemical engineering or a related science or engineering discipline, such as chemistry, biochemistry, biological engineering, environmental science, atmospheric science, materials science, mathematics, and physics.
Applicants are expected to have a cumulative grade-point average (GPA) of at least 3.00 on a 4.00 scale in work for their undergraduate degree. Applicants through the Undergraduate to Graduate (U2G) BS/ MS program must have a cumulative GPA of at least 3.25 on a 4.00 scale.

## Financial Support

Full financial support is available to admitted MS thesis students in the form of teaching assistantships, research assistantships, and fellowships. The department provides up to two years of support for all full-time MS thesis students who are making normal progress toward the degree, exhibit satisfactory performance in all duties, and maintain appropriate professional conduct. Students admitted to the nonthesis MS or Undergraduate to Graduate (U2G) programs are not guaranteed department financial support.

## Career Advancement

Chemical and biochemical engineers work in a wide range of industries, including petroleum and specialty chemical production, polymer and plastic production, food processing, energy, microelectronics production, pharmaceutical production, biochemical processing, and environmental compliance. Potential jobs include production, process development, plant design and construction, and fundamental research. The engineering profession also is a foundation for a variety of careers in medicine, law, government, and consulting. Many experienced chemical and biochemical engineers move through management ranks to high-level administrative positions. Faculty mentors assigned to graduate students aid in their professional development. Students are exposed to opportunities through seminar speakers who have relevant expertise and are invited to campus.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development. Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

The Graduate College offers numerous career advancement opportunities and professional development programs for graduate students. For ongoing program offerings, news, and announcements, see Grad Success Center on the Graduate College website.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Must be completed during first semester.
c Choose one course from CBE:3205 (offered every spring), CBE:5315 (offered fall of even years), or CBE:5425 (offered spring of even years).
d Work with faculty advisor to determine appropriate graduate coursework and sequence.
e CBE:5110 is typically offered spring of even years and CBE:5115 is typically offered spring of odd years.
f Students take a 3 s.h. course taught in the Department of Chemical and Biochemical Engineering (prefix CBE) in an area outside their prior graduate degree training and research specialization area.
g Students must take this course in each of their final two semesters in the program; credit earned does not count toward the 30 s.h. required to complete the degree.

# Chemical and Biochemical Engineering, PhD 

The Department of Chemical and Biochemical Engineering provides a stimulating academic community where students engage in a highly personalized learning and research environment. The graduate program provides qualified students with deeper and broader training than is possible at the undergraduate level. The Doctor of Philosophy program provides students with opportunities to obtain specialized knowledge and expertise through advanced coursework in chemical engineering and related disciplines, to engage in interdisciplinary research opportunities, and to impact their communities through service learning. The department emphasizes research, since most opportunities for graduates are in research and development.
Faculty within the department have focused research projects in biological and pharmaceutical systems, clean energy and water, air quality and climate, polymers and advanced materials, quantum chemical simulation, machine learning, and remote sensing; see Graduate Program on the Department of Chemical and Biochemical Engineering website.

## Learning Outcomes

Graduates will:

- demonstrate a mastery of advanced chemical engineering concepts;
- effectively communicate scientific concepts and/or research results in both written and oral formats to scientific and general audiences;
- demonstrate the ability perform independent research on an original topic in chemical engineering;
- demonstrate the ability to critically identify and solve research problems, summarize disciplinary information, and evaluate research findings;
- demonstrate knowledge of and commitment to safe and ethical behavior through adherence to best safety practices and academic integrity principles; and
- demonstrate the ability to serve as a STEM ambassador through outreach and service activities.

## Requirements

The Doctor of Philosophy program in chemical and biochemical engineering requires a minimum of 72 s.h. of graduate credit. However, the degree is granted primarily on the basis of research achievement rather than on the accumulation of semester hours. Students must maintain a cumulative grade-point average (GPA) of at least 3.25.
All students must complete a core curriculum, which consists of one course each in transport phenomena, chemical thermodynamics, chemical reaction kinetics, technical communication, and data science plus five additional courses (total of 30 s.h.).
Students entering with a degree other than chemical engineering may need to take additional coursework to attain proficiency in core areas of chemical engineering.
The PhD with a major in chemical and biochemical engineering requires the following coursework.

## Core Courses

Students must complete the five core courses with a minimum GPA of 3.50 .

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| CBE:5105 | Introduction to Literature Review and Proposal Writing | 3 |
| CBE:5110 | Intermediate Thermodynamics | 3 |
| CBE:5115 | Transport Phenomena I | 3 |
| CBE:5120 | Data Science in Chemical and Engineering Systems | 3 |

Kinetics

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| CBE:3205 | Introduction to Biochemical | 3 |
| CBE:5315 | Engineering | 3 |
| CBE:5425 | Polymer Chemistry | 3 |

## Breadth Requirement

Students take a 3 s.h. course taught in the Department of Chemical and Biochemical Engineering (prefix CBE) in an area outside their prior graduate degree training and research specialization area.

## Electives

Students supplement the core curriculum with electives tailored to their research area.

## Additional Requirements

All students are required to take ENGR:7270 Engineering Ethics during their first semester and CBE:5000 Seminar in Chemical and Biochemical Engineering every semester in residence. Students earn the remainder of credit for the degree in elective courses and research.
In addition to a minimum GPA in the five core courses, students are required to pass a comprehensive examination before they can become candidates for degree. The comprehensive examination is the presentation and defense of the candidate's research proposal. These examinations are arranged by members of the examining committee and may be repeated at the committee's discretion. Comprehensive examination policies are published in the Manual of Rules and Regulations on the Graduate College website. A final examination, which is a defense of the thesis, completes the doctoral program.

For a detailed description of program requirements, see Graduate Program on the Department of Chemical and Biochemical Engineering website.

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in chemical and biochemical engineering in a combined degree program offered by the College of Engineering and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must provide the following.

- Completed application form.
- Unofficial transcript(s). If admitted, official transcripts will be required before enrollment. For international students, all academic records should bear the original stamp or seal of the institution and the signature of a school official. Documents not in English must be accompanied by a complete, literal, English translation, certified by the issuing institution.
- Official Graduate Record Examination (GRE) General Test scores (verbal and quantitative) from Educational Testing Services (the university's institutional code is 6681).
- Statement of purpose.
- Three letters of recommendation.
- Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores for applicants whose first language is not English.
Admission to the department is competitive and is based on an applicant's previous coursework, research, and/or industrial experience. The admissions committee looks for evidence that an applicant has demonstrated qualities such as creativity, self-initiative, dedication, and perseverance exhibited by successful PhD or master's degree students.

Applicants must have earned a four-year baccalaureate degree (BS or BSE) in chemical engineering or a related science or engineering discipline, such as chemistry, biochemistry, biological engineering, environmental science, atmospheric science, materials science, mathematics, and physics. An MS is not a prerequisite for admission to the PhD program. Applicants to the PhD program are expected to have a cumulative grade-point average of at least 3.00 on a 4.00 scale in work for their undergraduate degree.

## Financial Support

Full financial support is available to admitted PhD students in the form of teaching assistantships, research assistantships, and fellowships. The department provides up to five years of support for all full-time PhD students that are making satisfactory progress toward the degree and maintain appropriate professional conduct.

## Career Advancement

The PhD program is designed to equip students with the skills to pursue a career in industry, academia, or government. Faculty and alumni mentors assigned to graduate students aid in their professional development. Students are exposed to opportunities through seminar speakers who have relevant expertise and are invited to campus.
The Graduate College offers numerous career advancement opportunities and professional development programs for graduate students. For ongoing program offerings, news, and announcements, see Grad Success Center on the Graduate College website.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# Civil and Environmental Engineering 

## Chair

- A. Allen Bradley Jr.

Undergraduate majors: civil engineering (BSE); environmental engineering (BSE)
Graduate degrees: MS in civil and environmental engineering; PhD in civil and environmental engineering
Faculty: https://engineering.uiowa.edu/people/cee-people
Website: https://cee.engineering.uiowa.edu/
Civil and environmental engineering is one of the three largest fields of engineering. It traditionally has been concerned with infrastructure facilities that are both large in scale and essential to modern life. Civil and environmental engineering projects include transportation systems and their components, such as bridges, highways, public transit systems, railways, harbors, airports, and seaports; large-scale structures and office buildings that provide enclosed working and living space; and environmental and hydraulic systems that provide clean water and air, including filtration plants and distribution systems for municipal and industrial water supplies, wastewater treatment plants, dams, levees, and irrigation systems.
Growth areas of civil and environmental engineering include water sustainability, infrastructure development, construction management, computer-aided design, hazardous waste management, and engineered environmental systems. In the future, civil and environmental engineers will be called upon to design structures for earth, prevent erosion and sedimentation of rivers, predict effects of global climate change on the environment, provide modern and efficient transportation systems, and ensure the quality of our air, surface waters, and groundwaters.
In planning and design, civil and environmental engineers work with other engineers, architects, landscape architects, planners, economists, financiers, sociologists, lawyers, and other specialists as members of the design team. Some civil and environmental engineers work in engineering offices; others may be called upon to construct or supervise outdoor projects they have designed. These field assignments, many of which are in remote and fascinating parts of the world, are particularly appealing to many civil and environmental engineers. There also is significant potential for entrepreneurial work by civil and environmental engineers as they start their own companies.

In addition to the degree programs offered by the Department of Civil and Environmental Engineering, the department also participates in two Graduate College programs: Applied Mathematical and Computational Sciences [p. 1600], an interdisciplinary doctoral program; and Transportation Planning [p. 1703], a graduate certificate program.

## Certificates

## Sustainable Water Development

The graduate Certificate in Sustainable Water Development trains science, technology, engineering, and mathematics (STEM) students to address future challenges of water scarcity and variability while also meeting the food and energy demands of Earth's growing population. The Department of Civil and Environmental Engineering administers the certificate program; see the Certificate in Sustainable Water Development [p. 1585] in the catalog.

## Related Certificate: Transportation Planning

The graduate Certificate in Transportation Planning focuses on the varied and complex problems of transportation and on interdisciplinary approaches to addressing them. The Departments of Civil and Environmental Engineering, Industrial and Systems Engineering, Mechanical Engineering (College of Engineering), and Economics (Tippie College of Business); and the School of Planning and Public Affairs (Graduate College) participate in the program.
The certificate is coordinated by the School of Planning and Public Affairs; see the Certificate in Transportation Planning [p. 1704] in the catalog.

## Programs

## Undergraduate Programs of Study

## Majors

- Major in Civil Engineering (Bachelor of Science in Engineering) [p. 1500]
- Major in Environmental Engineering (Bachelor of Science in Engineering) [p. 1507]

## Graduate Programs of Study

## Majors

- Master of Science in Civil and Environmental Engineering [p. 1511]
- Doctor of Philosophy in Civil and Environmental Engineering [p. 1516]

## Facilities

## Undergraduate Teaching Laboratories

## Environmental Engineering Teaching Laboratory

Located at the Water Plant, this laboratory is designed to provide undergraduate students hands-on experience in water laboratory testing and analysis. It serves several program-required and elective courses with a laboratory component.

## Engineering Fluids Laboratories

The Engineering Fluids Laboratories comprise a trio of rooms. The Fluids Fundamentals Lab includes recently built equipment and ones that have been around for decades. The Advanced Measurements Lab includes some of the larger experimental devices, such as a wind tunnel and a towing tank. The third laboratory, the Fluids Workshop, is a space in which students can perform their experiments.

## Hydraulics Laboratory

The Hydraulics Laboratory experimental facilities include flumes and pipe systems to perform experiments on open-channel and closedconduit flows. Instruments are available for measuring various flow quantities such as discharge, pressure, velocity, and temperature.

## Computer-Aided Design (CAD) Lab

The CAD Lab contains 17 work stations, all connected to the engineering computer network, that allow students to access AutoCAD, Pro/ENGINEER, and a full complement of structural, hydraulic, transportation, and environmental software to support work on engineering design projects.

## Soils Laboratory

The teaching laboratory contains state-of-the art equipment to provide hands-on experience to students and allows them to sharpen their skills on soil properties and characterization, soil stability, soil strength, consolidation/compaction for highway embankments, and foundations of structures. The teaching lab is an air-conditioned, temperature-controlled laboratory with an extensive number of different types of equipment. It is used twelve times throughout the year to perform four teaching sessions to groups of third-year students.

## Structures, Mechanics, and Materials Laboratory

The Structures, Mechanics, and Materials Laboratory is a teaching lab where students conduct experiments to quantify the physical and mechanical properties of construction materials. Equipment is available to test metals, aggregates, concrete, and asphalt.

## Graduate Laboratories

## Structures, Mechanics, and Materials

Facilities for computations, materials testing, geotechnical experiments, and small-scale structural testing are available for research and teaching. Faculty, staff, and students in structures, mechanics, and materials (SMM) have access to the computing resources of the Engineering Technology Center and the Iowa Technology Institute (ITI). Both centers continuously update their computing facilities to maintain pace with the rapidly changing field.
A wide range of experimental facilities are available for testing structural materials such as Portland cement concrete, asphalt, metals, timber, and composites. These facilities include several loading frames (purely uniaxial, purely torsional, and axial-torsional) that are available with computer-based control and data collection systems. Facilities for creep testing, triaxial soil testing, and high-cycle fatigue testing also are available. The laboratories have a variety of ovens and other facilities for preparation and treatment of test specimens.

Four well-equipped physical testing laboratories are dedicated to SMM teaching and research: the Civil Materials Laboratory, Soil Mechanics Laboratory, Plasticity Laboratory, and the Asphalt Laboratory. The Civil Materials Laboratory currently has a small-scale single-degree-of-freedom shaker table. Faculty, staff, and students have access through ITI to a six-degree-of-freedom man-rated shaker table with 4,000-pound payload and a 12-camera Vicon motioncapture system.

## Transportation Engineering

The department's Asphalt Laboratory is equipped with a set of Superpave testing equipment and asphalt mixture performance testing equipment which can measure dynamic modulus and flow number of asphalt mixtures. The lab has a Hamburg wheel tracking device for measuring the moisture sensitivity of asphalt mixtures; asphalt foaming equipment for mix design of cold in-place recycled asphalt using foamed asphalt; and equipment for Marshall mix design, indirect tensile strength test, and volumetric analysis of asphalt mixtures. The Asphalt Laboratory is one of the department's group of laboratories for testing the strength behavior of other materials.

## Water and the Environment

The teaching and research functions of the department are closely connected to the research activities of IIHR-Hydroscience and Engineering. The institute houses some of the most modern research facilities in the world, including a 100-meter towing tank, a wave basin facility for ship hydrodynamics research, several flumes, an array of field instrumentation for hydrologic experiments, extensive laboratory space for hydraulic modeling, state-of-the-
art instrumentation for flow measurements and visualization, and comprehensive computational facilities.

Research related to ecohydraulics and the environment takes place at the Lucille A. Carver Mississippi Riverside Environmental Research Station. IIHR—Hydroscience and Engineering operates the 250-square-foot facility, which is located on the Mississippi River near Muscatine, Iowa. The station provides engineers and biological scientists with an ideal facility in which to examine the multifaceted ecohydraulic processes of the upper Mississippi. It is equipped with water quality laboratories, research boats, and a seminar room.

The Environmental Engineering and Science Laboratories provide state-of-the-art facilities, equipment, and expertise to support both undergraduate and graduate-level instruction and research. The labs support research in contaminant fate and transport in various media (air, water, soil, plants, and microbes), drinking water disinfection and distribution, wastewater treatment, geochemical-contaminant interactions, bioremediation, and phytoremediation. They also provide resources for analytical chemistry, electrochemistry, molecular biology, microscopy, computer modeling, and simulated environments on the bench- and pilot-scale levels.

The Environmental Engineering and Science Laboratories are affiliated with the university's Center for Health Effects of Environmental Contamination, Center for Global and Regional Environmental Research, and the Environmental Health Sciences Research Center, an affiliate of the National Institute of Environmental Health Sciences (NIEHS).

## Courses

## Civil and Environmental Engineering Courses

## CEE:1010 Introduction to Careers in Environmental

 Engineering 0 s.h.Past, present, and future roles of environmental engineers in society; introduction to the discipline's historical roots and early visionary leaders in sanitation engineering and public health; growth during the environmental movement, and current role of environmental engineers in modern society as stewards for clean air, water, and energy; range of career opportunities available to environmental engineering majors, particularly in the emerging role of ambassadors for sustainable development.
CEE:1030 Introduction to Earth Science 3-4 s.h.
Relationships between plate tectonics, geologic time, and the rock cycle with volcanoes and igneous, sedimentary, metamorphic rocks; fossils; radioactive isotopes; landscape evolution; mountain building; natural resources; their impacts on civilization. GE: Natural Sciences with Lab; Natural Sciences without Lab. Same as EES:1030.

CEE:1031 Introduction to Earth Science Laboratory 1 s.h. Laboratory component of EES:1030. Requirements: completion of 3 s.h. in EES:1030 or CEE:1030. GE: Natural Sciences Lab only. Same as EES:1031.
CEE:2010 Civil and Environmental Engineering Professional Practice and Ethics 1 s.h.
Practical issues associated with civil engineering practice; topics may include safety and OSHA regulations, engineering specifications/ building codes, contracts, liability, and ethics; role that a professional engineering license plays in the student's career and professional/ ethical obligations that come with it; history of civil engineering and development of civil practice in the United States.

## CEE:2015 Civil Engineering Tools

2 s.h.
Tools and methods used in civil engineering career: AutoCAD, programming, project estimating, heavy equipment productivity estimation, and earthwork estimation.

CEE:2050 Severe and Unusual Weather
Basic weather concepts behind severe weather phenomena and essential safety information; how weather events cause billions of dollars in damage and thousands of casualties; winter storms can impact half of the nation, paralyzing the transportation network with icy roads and wind driven snow; tornadoes can strike within minutes tearing apart homes; hurricanes can destroy entire communities with strong winds, heavy rain, and deadly storm surge; how understanding severe weather and knowing what to do before, during, and after an event can significantly reduce injury, deaths, and property damage. Same as CBE:2050.

## CEE:2240 Digital Drafting with AutoCAD

Basic principles of 2D and 3D computer-aided drafting; use of AutoCAD software to draw plans, elevations, and sections for objects and interior spaces. Prerequisites: ARTS:1510 and ARTS:1520 and (CERM:2010 or SCLP:2810 or TDSN:2210 or MTLS:2910). Same as TDSN:2240.

## CEE:3001 Leadership Skills for Engineers

Survey of leadership ideas and principles as applied to situations commonly encountered in civil engineering practice, especially as they relate to challenges that beginning engineers face; speakers in selected engineering professions provide context and examples; exercises on leadership principles. Requirements: junior standing in civil and environmental engineering.

## CEE:3002 Technical Communication in Civil and Environmental Engineering

Development of communication skills through writing and oral presentations; impact of engineering solutions in a global, economic, environmental, and societal context; writings and presentations on current or historical engineering solutions; exposure to professionals with significant experiences to share in these areas. Requirements: junior standing.

## CEE:3003 Project Management Skills

1 s.h.
Review and extension of civil and environmental engineering project management skills in preparation for capstone senior design course; project scheduling, cost estimating, contract types, construction phasing; review for Fundamentals of Engineering Exam (FE) and practice tests in four subdisciplinary areas. Requirements: senior standing.

## CEE:3142 Quality Control

3 s.h.
Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisites: STAT:2020 or BAIS:9100 or (STAT:3100 and STAT:3101 and STAT:3200). Same as ISE:3600, STAT:3620.

## CEE:3155 Principles of Environmental Engineering

Water supply and treatment processes; wastewater treatment processes; processes for air pollution control, groundwater remediation; solid and hazardous waste management. Prerequisites: CHEM:1110.

CEE:3328 Fluvial Geomorphology
3 s.h.
Hydrologic principles, stream channel processes, and fluvial geomorphology within drainage basin systems; spatial and temporal variations in water distribution, analysis of hydrological data, flow mechanisms, sediment transport, forecasting procedures, hydrograph construction, modeling. Requirements: EES:3020 or another 3000level geology or hydraulics course. Same as EES:3380.
CEE:3371 Principles of Hydraulics and Hydrology
3 s.h.
Hydraulics of pressure conduits and open channels, dimensional analysis, flow measurements, hydraulic machinery, laboratory. Prerequisites: ENGR:2510.

4 s.h.

3 s.h. CEE:3430 Water Treatment
4 s.h.
Physical, chemical, and biological processes and operations to remove and treat chemical and pathogenic pollutants and protect human and environmental health; relevant to drinking water, municipal wastewater, water reuse, stormwater, industrial process water, agricultural wastewater; modern technologies and appropriate designs for the developing world; theory and applications; hands-on laboratory. Prerequisites: CEE:3155 and ENGR:2510.

CEE:3530 Geomechanics
4 s.h.
Identification and classification of earth materials; hydraulic and mechanical properties of soils; soil improvement; laboratory testing. Prerequisites: ENGR:2750.
CEE:3533 Principles of Structural Engineering 4 s.h.
Fundamental principles of structural analysis applied to statically determinate and indeterminate structures, continuous beams, trusses, and frames; external and internal equilibrium, compatibility of deformation, influence lines, virtual work; parallel use of classical and matrix formulation; slope deflection, flexibility and stiffness methods; use of computers. Prerequisites: ENGR:2750.
CEE:3586 Civil Engineering Materials
3 s.h.
Structure, strength and failure, durability, deformation, practice, and processing for primary construction materials systems, including steel, aluminum, concrete, asphalt, fiber-reinforced composites, masonry, timber. Prerequisites: ENGR:2750.
CEE:3763 Principles of Transportation Engineering 3 s.h.
History of transportation modes, new transport technologies, traffic operations and control, economic evaluation of transport alternatives, transportation planning, roadway design and construction, route location, preventive maintenance strategies. Requirements: sophomore standing.

CEE:3783 Surveying and Remote Sensing 3 s.h.
Engineering surveying measurements, methods, computations. Prerequisites: ENGR:1100.
CEE:3790 Resilient Infrastructure and Emergency Response 3 s.h. Concepts of resilient cities with specific emphasis on role of infrastructure and built environment; risk analysis, hazard mitigation and emergency response to various threats; resiliency through good design.

CEE:3996 Civil and Environmental Engineering: Engineering Project

1 s.h.
Support for student learning associated with an engineering project; students work as a team to design and fabricate a product; student projects are often associated with a contest or competitions (e.g., steel bridge, concrete canoe).

## CEE:3997 Engineering Service Project <br> 1-3 s.h.

Provides support of student learning associated with a variety of international engineering service projects facilitated by the Department of Civil and Environmental Engineering; service projects are usually designed and built as part of an Engineers Without Borders USA and/or a Bridges to Prosperity (Continental Crossings) approved program; active involvement by students in these organizations required.

## CEE:3998 Individual Investigations: Civil Engineering

arr.
Individual projects for civil engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

## CEE:4102 Groundwater

Groundwater quality and quantity; Darcy's Law, 2D flow equation, unsaturated zone, contaminant transport, redox reactions, drinking water quality, bioremediation; laboratories in permeameter testing, porous media grain size analysis, pump testing, monitoring well installation.

## CEE:4104 Groundwater Modeling

Groundwater flow and contaminant transport modeling; numerica methods, applications of groundwater modeling to water supply, groundwater resources evaluation, remediation design using software; GMS (MODFLOW, MODPATH, and MT3D). Prerequisites: MATH:1860 and EES:4630. Same as EES:4660.

## CEE:4107 Sustainable Systems

New and emerging concepts in sustainable systems design and assessment. Same as CBE:4410.

## CEE:4118 Statistical Methods in Water and the Environment

Basic methods required for data analysis and interpretation of processes related to water and the environment; emphasis on formulating questions, choosing appropriate statistical tools for a given problem, drawing appropriate conclusions from analyses; concepts related to statistical inference and common probabilistic models, linear regression, non-parametric statistics; how to perform these analyses using R programming language; introduction to statistical methods through use of hands-on analyses with real data. Prerequisites: STAT:2020 and MATH:2560.

## CEE:4119 Hydrology

Overview of fundamental processes in water cycle, including precipitation, evaporation, infiltration, and runoff; quantitative approaches for predicting streamflow and design discharges; applications to flood hazard assessment and stormwater management. Prerequisites: ENGR:2510.

CEE:4135 Structural Modeling and Health Monitoring 3 s.h.
Measurements, structural modeling, structural analysis, stiffness method, trusses and frames, structural testing, modal analysis. Prerequisites: CEE:3533 and ENGR:2750.

## CEE:4150 Environmental Chemistry

3 s.h.
Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisites: CHEM:1120. Same as CBE:4420.

CEE:4157 Environmental Engineering Design
3 s.h.
Application of physical, chemical, and biological operations and processes to the design of water and wastewater treatment systems; applications in solid and hazardous waste treatment. Prerequisites: CEE:3155.

## CEE:4158 Solid and Hazardous Wastes

3 s.h.
Sources, characteristics, collection, disposal of solid and hazardous wastes; environmental impacts of hazardous waste management; resource recovery systems. Requirements: for OEH:4920OEH:4240. Same as OEH:4920.

## CEE:4159 Air Pollution Control Technology <br> 3 s.h.

Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Same as CBE:4459, IGPI:4159.

CEE:4160 Introduction to Bridge Engineering
Bridge engineering and design; history of the bridge; factors that affect bridge design; bridges according to use (e.g., road, rail, pedestrian and bicycle) and type (e.g., suspension, cable stay, truss); how sustainability concepts may impact bridge design; substantial design exercise. Prerequisites: CEE:3533.

## CEE:4162 Structural Systems for Buildings

Detailed analysis and design of gravity and lateral force resisting systems for buildings; roof, floor, and bearing wall gravity systems; steel braced frames, steel and concrete moment frames, and masonry and timber shear walls lateral systems; introduction to tall building structures. Prerequisites: CEE:3533.

CEE:4164 Design of Wood Structures
3 s.h.
Framing layout and analysis of wood frame structures for gravity and lateral loads; design of structural members for bending, axial load, and shear, including joists, beams, columns, engineered lumber, bearing walls, shear walls, and diaphragms; introduction to connection design. Prerequisites: CEE:3533.

3 s.h. CEE:4176 Transportation Research Methods and Analysis 3 s.h. Methods for measuring current and future transportation demand based on changes in population, preferences, built environment, and changing policy objectives; survey design and analysis; basics of travel demand modeling. Same as URP:4262.
CEE:4180 Fundamentals of Atmospheric Science 3 s.h.
Review of fundamental principles in atmospheric sciences needed for study of interdisciplinary topics involving the Earth's atmosphere; understanding weather and climate processes to address problems in engineering; hydrometeorology of rainfall and its measurement by remote sensing; impact of climate anomalies and climate change on water resources; exchange of water, energy, and chemicals at the landatmosphere boundary; forecasting of atmospheric chemistry and air quality. Prerequisites: ENGR:2510.
3 s.h. CEE:4187 Statistics for Experimenters 3 s.h.
Application of statistical techniques to evaluate data derived from experimental samples designs; use of spreadsheets, statistical software; design and analysis of experiments; regression analysis; model building; practical applications. Same as OEH:4540.

## CEE:4317 Remote Sensing <br> 3 s.h.

Fundamentals of electromagnetic waves, atmospheric radiative transfer, passive remote sensing, weather radar, hydrologic application of remote sensing.
CEE:4370 Open Channel Flow and Sediment Transport 3 s.h. In-depth analysis of governing flow equations; steady uniform flow in channels of different resistance and cross section; flow control sections; specific energy considerations; analysis and computation of gradually varied profiles and spatially varied flow effected by lateral outflow and inflow; unsteady flow; flood routing. Prerequisites: CEE:3371.

## CEE:4371 Water Resources Engineering <br> 3 s.h.

lanning and economics of varied water resources projects stochastic basis for design; flood damage mitigation, reservoirs, river morphology, economic analysis of water projects, urban water requirements, water supply, hydroelectric power systems, river navigation; contemporary civil-engineering problems and issues associated with water infrastructure development. Corequisites: CEE:3371.

CEE:4374 Water Resource Design
3 s.h.
Prerequisites to storm water management systems design, including design flows and rates; analysis and design of storm sewers, detention basins, street and highway drainage facilities, culverts, dams, spillways, measures for energy dissipation; review of wastewater transfer systems and design. Prerequisites: CEE:3371.

## CEE:4385 International Perspectives in Water Sciences and

 ManagementInternationalization and water, with focus on a country or a world region; intensive, in-depth exposure to complex issues that affect planning and execution of water projects in large-scale watersheds.
CEE:4506 Design of Concrete Structures
Fundamental analysis and design of reinforced concrete members and structures, flexure, shear, bond, continuity, beams, one-way slab system; columns. Prerequisites: CEE:3533.

## CEE:4511 Scientific Computing and Machine Learning

Numerical methods in scientific computing; root problems and optimization; linear algebraic equations; eigenvalue problems; numerical differentiation and integration; interpolation and curvefitting; initial value and boundary value problems; machine learning in regression, classification, and clustering problems; Python programming and packages. Prerequisites: MATH:2560. Same as ME:4111.

## CEE:4512 Engineering Design Optimization

Engineering design projects involving modeling, formulation, and analysis using optimization concepts and principles; linear and nonlinear models, optimality conditions, numerical methods. Prerequisites: ENGR:2110 and MATH:2550. Requirements: junior standing. Same as ME:4112.

## CEE:4515 Computer-Aided Engineering

3 s.h.
Computational engineering modeling and simulation, geometric modeling, grid generation, finite-element and finite-volume methods, uncertainty analysis, optimization, engineering applications.
Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as ME:4110.

## CEE:4532 Fundamentals of Vibrations

3 s.h.
Vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, and arbitrary excitation; modal analysis; applications. Prerequisites: ENGR:2750. Same as ME:4153.

## CEE:4533 Finite Element I

3 s.h.
One- and two-dimensional boundary value problems; heat flow, fluid
flow, torsion of bars; trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisites: ENGR:2750. Same as IGPI:4115.

## CEE:4535 Design of Steel Structures <br> 3 s.h.

Concepts and procedures in steel design; LRFD (load and resistance factor design) methodology for beams/columns; analysis and design of indeterminate structures. Prerequisites: CEE:3533.

## CEE:4539 Foundations of Structures 3 s.h.

Application of soil mechanics to analysis of structural foundations; slope stability analysis; bearing capacity and settlement of shallow and deep foundations; retaining structures, braced cuts, reinforced earth structures; usage of computational models; subsurface exploration methods. Prerequisites: CEE:3530.

## CEE:4560 Pavement Engineering

3 s.h.
Fundamental design principles; characterization and testing of asphalt and concrete paving materials; stresses and stain development within pavement structure; basic principles of mechanistic-empirical pavement design procedures. Prerequisites: CEE:3763.

## CEE:4730 Transportation Infrastructure Construction and

 ManagementAnalytical methods for developing transportation infrastructure construction and management systems; e-construction, transportation infrastructure condition evaluation, performance modeling, maintenance and rehabilitation optimization, asset management, development of transportation infrastructure construction and management system; application of information technology and mobile computing to solving transportation infrastructure construction and management problems. Prerequisites: CEE:3763.

CEE:4762 Design of Transportation Systems 3 s.h. Overview of different modes within transportation systems; concepts of sustainability and livability in transportation system design; derivation of standards for geometric design of highways; roundabout design; cross-sectional and longitudinal geometric design of highways. Prerequisites: CEE:3763.
CEE:4763 Traffic Engineering
3 s.h.
Design of traffic control devices; evaluation and analysis of intersections and transportation networks using appropriate computer software. Prerequisites: CEE:3763.

3 s.h. CEE:4850 Project Design and Management in Civil Engineering
Design of civil engineering systems, individual and team design projects oriented toward the solution of local problems, project management, construction management, contracts, budgeting, bidding. Corequisites: CEE:3003. Requirements: final semester.

CEE:5083 Introduction to Comp Flow in Pipes and Channels 3 s.h. General review of numerical methods in hydraulics (finite-difference, finite-element, and method of characteristics); stability and accuracy of numerical schemes; steady free surface flows; flow transients in pipelines and channels. Prerequisites: ME:5160.
CEE:5095 Career Paths in Sustainable Water Development 0 s.h. Introduction to different career paths in the food, energy, and water (FEW) sector; speakers from a variety of different careersincluding researchers, professors, entrepreneurs, consultants, and civic, professional, and global engineers-discuss their own career paths as well as current opportunities in their fields; students prepare individual development plans that identify their preferred career (i.e., training) path, a plan of study (i.e., path coursework), mentors, and their preferred research area. Requirements: graduate standing in sustainable water development program.
CEE:5096 Water, Energy, and Food Nexus Seminar
Invited presentations on research, policy, economics, and social drivers of water, energy, and food in the 21st century.

## CEE:5097 Coaching Seminar on Communicating Water

 SciencePresentation of student research on water, energy, and food in the 21st century; students receive live, immediate feedback from their peers and faculty coaches on best practices to improve their oral communication skills.

CEE:5098 Graduate Seminar in Structures, Materials, Mechanics, and Transportation

0 s.h.
Presentation and discussion of recent advances and research in structures, mechanics, materials, and transportation engineering by guest lecturers, faculty, and students. Requirements: graduate standing.

## CEE:5100 Cultural Competence for Sustainable Water

 Development Engineers0 s.h.
Skills needed to be culturally responsive to a wide range of communities in which sustainable water development engineering students interact with during their professional careers; series of three workshops; focus on how to identify cultural strengths that support development in underserved, resource-constrained communities; how to engage, build trust, and bridge differences with diverse stakeholders; how to conduct culturally sensitive interviews; how to communicate effectively across culture; preparation for Capstone Community Engagement project. Requirements: graduate standing in sustainable water development program.

## CEE:5110 Managing and Sharing Your Research Data

 1 s.h.Overview of essential practices in managing the data you collect and generate during research. Topics include file organization; documenting your work and lab notebooks; optimizing spreadsheet data and cleanup tools; reproducibility; funder and publisher requirements; and conclude with how and where to share and publish data, from choosing a repository to creating a data record, including licensing, ownership, preservation of access, reuse, and citation. Applicable for any student currently doing research, or planning to do so. Same as OEH:5110.
CEE:5115 Atmospheric Chemistry and Physics 3 s.h Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources, and removal processes. Corequisites: CBE:3120. Same as CBE:5425.

## CEE:5137 Composite Materials <br> 3 s.h.

Mechanical behavior of composite materials and their engineering applications; composite constituents (fibers, particles, matrices) and their properties and behavior; macromechanical behavior of composite laminae; micromechanical predictions of composite overall properties; classical lamination theory; composite beams and plates. Prerequisites: ENGR:2750. Same as ME:5167.
CEE:5151 Building Future Leaders in Sustainable Development

3 s.h.
Focus on competencies needed to translate training and research into action for social good; topics include ethics, cultural competency, collaboration and team science, use-inspired design, and engagement. Same as SDG:5100.
CEE:5156 Physical and Chemical Environmental Processes 3 s.h.
Theory of physical and chemical operations and processes in water and wastewater treatment, including fundamental aspects of process dynamics; lectures, laboratory. Prerequisites: CEE:4150. Corequisites: CEE:3155.

## CEE:5179 Continuum Mechanics arr.

Mechanics of continuous media; kinematics of deformation, concepts of stress and strain; conservation laws of mass, momentum and energy; constitutive theories; boundary and initial value problems. Prerequisites: ENGR:2750 or ENGR:2510. Same as ME:5179.

## CEE:5225 Communicating Data Through Stories

3 s.h.
How to communicate science effectively and responsively with multiple audiences from peers and professors to potential employers, policymakers, and the lay public; focus on speaking about science clearly and vividly in ways that can engage varied audiences, especially those outside the student's own field; connecting and finding common ground with an audience, defining goals, identifying main points, speaking without jargon, explaining meaning and context, using storytelling techniques and multimedia elements. Same as GRAD:5225, SDG:5225.

## CEE:5236 Optimization of Structural Systems

3 s.h.
Advanced topics; optimization of structural topology, shape, and material; finite dimensional dynamic response optimization, sensitivity analysis, distributed parameter systems; projects. Same as BME:5720.
CEE:5310 Informatics for Sustainable Systems 3 s.h.
Introduction to fundamental and advanced environmental informatics concepts and procedures including automated data collection, data management, data transformations, and processing to support modeling and analysis; scientific visualization of environmental data to support management of food, energy, and water (FEW) resources; sustainability in FEW systems. Same as IGPI:5311, URP:5310.
CEE:5350 Watershed Hydrology and Ecosystem Processes 3 s.h. Introduction to hydrologic and ecosystem processes within a watershed; description of water, energy, and nutrient cycling in watersheds; focus on hydrologic and water-quality issues in agricultural Midwest; watershed modeling techniques, ecosystem goods and services, and selected case studies in watershed and ecosystem management problems. Requirements: graduate standing.

## CEE:5369 Intermediate Mechanics of Fluids

Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisites: ENGR:2510. Same as ME:5160.

CEE:5372 Experimental Methods in Fluid Mechanics and Heat Transfer

3 s.h.
Hands-on experience in methodology of conducting experiments in fluid mechanics and heat transfer from design to data acquisition and processing; essential theoretical elements, experimental methodologies, data acquisition systems, uncertainty analysis; wide variety of instruments for fundamental and applied experimentation; work in small groups; design, implement, test, and report an experiment in area of interest. Same as ME:5162.
CEE:5380 Fluid Flows in Environmental Systems 3 s.h. Introduction to environmental fluid flows and transport processes with focus on application and developing a language of environmental fluid mechanics; topics include physical and mathematical description of conservation and transport laws, statistical techniques for analyzing environmental flow data, scaling and similarity, stratification, turbulent flux measurement and modeling, environmental boundary conditions; application to surface waters and the planetary boundary layer; applied project involving collection and analysis of environmental flow data.
CEE:5390 PCBs in the Environment
3 s.h.
Polychlorinated biphenyls (PCBs) as potent carcinogens and linked to metabolic syndrome, autism, learning disabilities, hearing loss, and neurological disorders; how these compounds become to be such ubiquitous environmental pollutants; what the impact of their presence is; how sites are remediated and exposures reduced; indepth examination through literature review, laboratory experiments, computational modeling, final written reports, and presentations. Recommendations: laboratory experience.

## CEE:5410 Politics and Economics of the Food, Energy, Water

 Nexus 3 s.h.Focus on the relationships between food, energy, and water resources; current and future political and economic frameworks that shape the food, energy, and water nexus.

## CEE:5440 Foundations of Environmental Chemistry and Microbiology

3 s.h.
Investigation of chemical and biological processes at the food-energy-water nexus; example topic areas include biogeochemical cycling of nutrients, biomass conversion, resource recovery from wastewater, removing pollutants from drinking water sources, water reuse, engineered natural treatment systems, pollutant transformation and control, treatment of process waters. Requirements: undergraduate senior standing or graduate standing.

## CEE:5460 Water Quality and Flow

3 s.h.
Laboratory and field experiments to promote student learning of flowdependent movement and associated environmental transformation of surface water and groundwater pollutants; exploration of water quality and flow fundamentals needed to design and numerically model treatment reactors for small-community wastewater, urban storm water, and agricultural runoff; emphasis on engineered solutions that couple water quality and flow considerations as potential mitigations for adverse effects on natural water cycle caused by floods and other natural and human-influenced phenomena.
CEE:5513 Mathematical Methods in Engineering
3 s.h.
Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: MATH:2550 and MATH:2560. Same as CBE:5140, ME:5113.

CEE:5540 Intermediate Mechanics of Deformable Bodies 3 s.h.
Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: ENGR:2750. Same as ME:5150.

## CEE:5549 Fracture Mechanics

Three-dimensional stress states, definition and criteria for failure, nominal and local yield phenomena, linear elastic and elastic plastic fracture mechanics, plane stress and plane strain fracture toughness, J-Integral, crack opening displacement, environmental assisted cracking, fatigue crack growth, fail safe, and damage tolerant design. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as ME:5159.

## CEE:5678 Application Simulation to Transportation

Transportation system management and traffic engineering; application of real-time simulation and visualization. Prerequisites: CEE:3763 or CEE:4763. Same as URP:5678.

## CEE:5875 Perspectives in Biotechnology

Topics related to careers in biotechnology with an emphasis on preparing graduate students for careers outside of academia; discussions led by a series of guest speakers from leading biotech industries; understanding the societal impact of basic research; participation in round-table discussions; and presentation of student research findings. Requirements: graduate standing and good academic standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BMB:5875, CBE:5875, CHEM:5875, MICR:5875, PHAR:5875.

## CEE:5990 Structural Engineering Practicum A <br> 2 s.h.

Students select a design project and develop two or more alternative design concepts in consultation with a three-member advisory committee consisting of at least one faculty member and one design professional; entire design process documented in a written report. Prerequisites: CEE:4506 and CEE:4535.

## CEE:5991 Structural Engineering Practicum B

Detailed design development of one of the concepts developed in CEE:5990; students perform detailed design calculations using applicable structural analysis and design software, produce professional quality structural plans including connection details, and defend design to a three-member advisory committee. Prerequisites: CEE:5990.

## CEE:5993 Community-Centered Problem Solving and Design

3 s.h.
Analysis, evaluation, and modeling of food-energy-water systems (FEWS) development challenges faced by resource-constrained communities in developed and developing countries; design and development of appropriate solutions to address disparities in FEWS and anticipate social, economic, political, technological, human health, and environmental impacts of these interventions; communication with a diverse suite of stakeholders using modern forms of media intended for public engagement and dissemination of research impacts; demonstration of cultural responsiveness consistent with social and economic realities of resource-limited communities.

## CEE:5998 Individual Investigations: Civil and Environmental Engineering

Individual projects for civil and environmental engineering graduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

## CEE:5999 Research: Civil and Environmental Engineering MS Thesis

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the MS with thesis in civil and environmental engineering. Requirements: graduate standing.

CEE:6223 Environmental Boundary Layers
Fundamentals of environmental boundary layer dynamics and thermodynamics of natural and engineered systems; atmospheric boundary layers and aquatic surface layer dynamics; land-atmosphere interaction, air-water exchange, and turbulent transport in aquatic ecosystems; turbulence, surface energy balance, spectral analysis, similarity theory; flow over homogeneous and heterogeneous surfaces, thermal stratification effects, measurement, simulation of turbulent and surface fluxes; applications to environmental modeling, urban meteorology, ecosystem dynamics, renewable energy; recent and current research topics. Prerequisites: ENGR:2510.

CEE:6225 Communicating Science 3 s.h.
Writing and speaking about environmental engineering and science research; key principles of writing with clarity and cohesion, and practice applying these principles on a piece of research writing that students are currently working on; review best practices for presenting research to peers and at conferences; students are required to share their work with peers through writing and presentations. Recommendations: graduate standing in earth and environmental sciences; MS students must be thesis option.

CEE:6250 Environmental Biotechnology 3 s.h. Environmental biotechnology utilizes microorganisms to improve sustainability of human society; basic concepts and quantitative tools needed for microbiological processes to behave in ways that are understandable, predictable, and unified; application of these fundamental principles to a variety of modern applications. Prerequisites: CEE:5440.

CEE:6253 Environmental Organic Chemistry 3 s.h.
Environmental factors that govern processes that determine fate of organic chemicals in natural and engineered systems; knowledge of chemical fate applied toward quantitatively assessing environmental behavior of organic chemicals; holistic view on physical-chemical properties of organic compounds, including aspects of gas-solid partitioning, bioaccumulation, and transformations in the atmosphere.
CEE:6255 Environmental Biotechnology and Bioremediation 3 s.h. Concepts in molecular microbial ecology and bioremediation; microbial diversity and genetics, evolution of biodegradation pathways, application of quantitative PCR , high-throughput amplicon and metagenomic and transcriptomic sequencing, proteomics, stable isotopes; bioremediation research and practice.

## CEE:6299 Advanced Topics in Water and the

## Environment

Advanced topics or areas of study not formally offered in other civil and environmental courses; topics include environmental engineering and science, hydraulics, hydrology, water resources, and sustainable water development.

CEE:6310 Analytical Methods in Mechanical Systems 3 s.h.
Vector and function spaces; functionals and operators in Hilbert spaces; calculus of variations and functional analysis with application to mechanics; Ritz and Galerkin methods. Prerequisites: ME:5113. Same as ME: 6214.

CEE:6376 Viscous Flow
3 s.h.
Equations of viscous flow; classical analytical and numerical solutions; flow regimes and approximations; laminar boundary layers -equations, solution methods, applications; stability theory and transition; incompressible turbulent flow-mean-flow and Reynoldsstress equations, modeling, turbulent boundary layers and free shear flows. Requirements: for ME:6260—ME:5160; for CEE:6376CEE:5369. Same as ME:6260.

CEE:6520 Watershed Sedimentation
3 s.h.
Exploration of rich and complex field of sediment transport, geomorphology, and contaminant transport; associated physical, chemical, and biological processes with associated mathematical modeling; investigation of current topics not covered elsewhere, including physical processes affecting stability/mobility, transport, and fate of soil/sediments; lack of general understanding in development of fine-scale sedimentary structure in different systems, particularly contamination and contamination release; suspension effects on turbulent flows. Prerequisites: CEE:4370.

## CEE:6532 Finite Element II

3 s.h.
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as IGPI:6216, ME:6215.

CEE:6599 Advanced Topics in Infrastructure Systems 1-3 s.h.
Advanced topics or areas of study not formally offered in other structures and transportation courses; topics may include one or more areas (e.g., structural dynamics, advanced structural systems, earthquake engineering, sustainable systems).

## CEE:7250 Advanced Fracture Mechanics

3 s.h.
Fracture of modern engineering materials; linear-elastic fracture; computational methods; functionally graded materials; elastic-plastic fracture; multiscale fracture and fatigue crack initiation. Prerequisites: ME:5113 and (ME:5159 or CEE:4533). Same as ME:7250.
CEE:7999 Research: Civil and Environmental Engineering PhD

## Dissertation

 arr.Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the PhD in civil and environmental engineering.

## Civil Engineering, BSE

## Educational Objectives

Within a few years of graduation, graduates of the Bachelor of Science in Engineering (BSE) program in civil engineering will:

- be productive and contributing members of the civil engineering profession as practitioners, entrepreneurs, researchers, or teachers;
- be engaged in learning, understanding, and applying new ideas as the field develops;
- pursue advanced studies, if qualified and interested; and
- promote the safety, health, and welfare of the public and the environment through professional practice and civic leadership.

## Requirements

The Bachelor of Science in Engineering with a major in civil engineering requires a minimum of 129 s.h. of credit. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1448] in the catalog. Students completing the major in civil engineering fulfill the collegiate statistics requirement by completing STAT:2020 Probability and Statistics for the Engineering and Physical Sciences. Some focus areas may suggest or require specific courses to fulfill the General Education Component of the collegiate curriculum; see "Focus Area" below.

The major in civil engineering requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Collegiate Curriculum | 50 |
| Major Requirements | 58 |
| Focus Area | $21-22$ |

## Major Requirements

Major requirements include a set of common courses (45 s.h.), four professional skills courses ( 4 s.h.), two design courses ( 6 s.h.), and one capstone design course ( 3 s.h.).

## Common Courses

$\left.\begin{array}{llr}\text { Course \# } & \text { Title } & \text { Hours } \\ \text { All of these: } & & \\ \hline \text { CEE:1030 } & \begin{array}{l}\text { Introduction to Earth Science } \\ \text { (no lab required) }\end{array} & 3 \\ \text { CEE:2015 } & \text { Civil Engineering Tools } & 2 \\ \text { CEE:3155 } & \begin{array}{l}\text { Principles of Environmental } \\ \text { Engineering }\end{array} & 4 \\ \text { CEE:3371 } & \begin{array}{l}\text { Principles of Hydraulics and } \\ \text { CEE:3530 }\end{array} & \text { Heomechanics }\end{array}\right] 3$

| ENGR:2710 | Dynamics | 3 |

| This course: | Project Design and Management <br> in Civil Engineering | 3 |
| CEE:4850 |  |  |

## Focus Area

Students must select focus area courses according to guidelines established by the Department of Civil and Environmental Engineering. Civil engineering students may choose from several standard focus areas developed by the department or create an individual focus area tailored to their interests.

Standard focus areas are offered in the broad field of civil practice [p. 1501] and in the four technical areas: environmental engineering [p. 1501]; hydraulics and water resources [p. 1501]; structures, mechanics, and materials [p. 1502]; and transportation engineering [p. 1503]. Other areas of focus include management [p. 1502], pre-architecture [p. 1502], and urban and regional planning [p. 1503]. To see guidelines related to tailored focus areas, visit Civil Engineering Focus Areas on the Department of Civil and Environmental Engineering website.

Focus areas in civil engineering consist of content area courses, design courses, and elective courses; carefully selected elective courses may contribute to earning a minor and/or certificate. Some focus areas also may suggest or require specific courses to fulfill the
design requirement of the major curriculum or the General Education Component of the collegiate curriculum.

## Civil Practice

Students complete five civil and environmental engineering electives ( 15 s.h.) and two additional elective courses ( 6 s.h.).

## Civil and Environmental Engineering Electives

Students complete 15 s.h. in civil and environmental engineering electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) not already taken for the major numbered 3000 or above.

It is recommended that students select from the following courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CEE:3783 | Surveying and Remote Sensing | 3 |
| CEE:3790 | Resilient Infrastructure and | 3 |
| Emergency Response |  |  |
| CEE:4102 | Groundwater | 3 |
| CEE:4119 | Hydrology | 3 |
| CEE:4158/OEH:4920 | Solid and Hazardous Wastes | 3 |
| CEE:4159/CBE:4459/ | Air Pollution Control | 3 |
| IGPI:4159 | Technology |  |
| CEE:4371 | Water Resources Engineering | 3 |
| CEE:4539 | Foundations of Structures | 3 |
| CEE:4763 | Traffic Engineering | 3 |

## Additional Electives-Civil Practice

Students complete 6 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) numbered 3000 or above and not already taken for the major, or pre-approved courses taken outside of the College of Engineering. Students should consult with an academic advisor.

The following courses are suggested electives in the civil practice focus area.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGR:2120 | Electrical Circuits | 3 |
| ENGR:2730 | Computers in Engineering | 3 |
| ENGR:2995 | Introduction to Artificial | 3 |
|  | Intelligence and Machine |  |
| ISE:2500 | Learning in Engineering | 3 |

## Environmental Engineering

Students complete one required course ( 4 s.h.), four focus area electives ( 12 s.h.), and two additional elective courses ( 6 s.h.).
Students in the environmental engineering focus area are required to complete CEE:4157 Environmental Engineering Design as one of their design courses for the civil engineering major. The second design course may be selected from the approved list; see "Design Courses" above.

## Required Environmental Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| CEE:3430 | Water Treatment | 4 |

## Environmental Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Four of these: |  |  |
| CEE:4102 | Groundwater | 3 |

| CEE:4107/CBE:4410 | Sustainable Systems | 3 |
| :--- | :--- | :--- |
| CEE:4119 | Hydrology | 3 |
| CEE:4150/CBE:4420 | Environmental Chemistry | 3 |
| CEE:4158/OEH:4920 | Solid and Hazardous Wastes | 3 |
| CEE:4159/CBE:4459/ Air Pollution Control | 3 |  |
| IGPI:4159 | Technology |  |

## Additional Electives-Environmental Engineering

Students complete 6 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) numbered 3000 or above and not already taken for the major, or pre-approved courses taken outside of the College of Engineering. Students should consult with an academic advisor.

The following courses are suggested electives in the environmental engineering focus area.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGR:2120 | Electrical Circuits | 3 |
| ENGR:2730 | Computers in Engineering | 3 |
| ENGR:2995 | Introduction to Artificial | 3 |
|  | Intelligence and Machine |  |
| ISE:2500 | Learning in Engineering | 3 |

## Hydraulics and Water Resources

Students complete two required courses ( 6 s.h.), three focus area electives ( $9-10$ s.h.), and two additional elective courses ( 6 s.h.).
Students in the hydraulics and water resources focus area are required to complete CEE:4374 Water Resource Design as one of their design courses for the civil engineering major. The second design course may be selected from the approved list; see "Design Courses" above.

## Required Hydraulics and Water Resources Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: |  |  |
| CEE: 4119 | Hydrology | 3 |
| CEE: 4371 | Water Resources Engineering | 3 |

## Hydraulics and Water Resources Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Three of these: |  |  |
| CEE:3430 | Water Treatment | 4 |
| CEE:3783 | Surveying and Remote Sensing | 3 |
| CEE:4102 | Groundwater | 3 |
| CEE:4107/CBE:4410 | Sustainable Systems | 3 |
| CEE:4157 | Environmental Engineering | 3 |
| CEE:4180 | Design | 3 |
| CEE:4370 | Fundamentals of Atmospheric | 3 |

## Additional Electives-Hydraulics and Water Resources

Students complete 6 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) numbered 3000 or above and not already taken for the major, or pre-approved courses taken outside of the College of Engineering. Students should consult with an academic advisor.

The following courses are suggested electives in the hydraulics and water resources focus area.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGR:2120 | Electrical Circuits | 3 |
| ENGR:2730 | Computers in Engineering | 3 |
| ENGR:2995 | Introduction to Artificial | 3 |
|  | Intelligence and Machine |  |
|  | Learning in Engineering | 3 |

## Management

Students complete five required courses ( 15 s.h.) and two additional elective courses ( 6 s.h.). Students in the management focus area must complete the minor in business administration [p. 1132] in the Tippie College of Business; this typically requires additional coursework outside of the civil engineering major.

## Required Management Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Introduction to Financial | 3 |
| ACCT:2100 | Accounting |  |
| ACCT:2200 | Managerial Accounting <br> Analytics and Data | 3 |
|  | Visualization |  |
| FIN:3000 | Introductory Financial | 3 |
| or ISE:2500 | Management | Engineering Economy |
| MGMT:2100 | Introduction to Management |  |
| MKTG:3000 | Introduction to Marketing | 3 |
|  | Strategy | 3 |

## Additional Electives-Management

Students complete 6 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) numbered 3000 or above and not already taken for the major. Students should consult with an academic advisor

The following courses are suggested electives in the management focus area.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CEE:3783 | Surveying and Remote Sensing | 3 |
| CEE:3790 | Resilient Infrastructure and | 3 |
|  | Emergency Response |  |
| CEE:4102 | Groundwater | 3 |
| CEE:4119 | Hydrology | 3 |
| CEE:4158/OEH:4920 | Solid and Hazardous Wastes | 3 |
| CEE:4159/CBE:4459/ Air Pollution Control | 3 |  |
| IGPI:4159 | Technology |  |
| CEE:4371 | Water Resources Engineering | 3 |
| CEE:4539 | Foundations of Structures | 3 |
| CEE:4763 | Traffic Engineering | 3 |

## Pre-Architecture

Students complete one required course (3 s.h.), one pre-architecture elective ( 3 s.h.), two structures electives ( 6 s.h.), one civil and environmental engineering elective ( 3 s.h.), and two art electives ( 6 s.h.). Students in the pre-architecture focus area must complete the minor in art [p. 126] in the College of Liberal Arts and Sciences; this typically requires additional coursework outside of the civil engineering major.

Students in the pre-architecture focus area are required to take CEE:4506 Design of Concrete Structures as one of their design courses for the civil engineering major. The second design course may be selected from the approved list, with the exception of CEE:4535 Design of Steel Structures; see "Design Courses" above.

## Required Pre-Architecture Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| TDSN:2210 | Introduction to 3D Design | 3 |

## Pre-Architecture Elective

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| ANIM:2125 | Introduction to Animation | 3 |
| DRAW:2310 | Life Drawing I | 3 |
| DSGN:2500 | Graphic Design I | 3 |
| PHTO:2600 | Photography I | 3 |
| PNTG:2410 | Painting I | 3 |
| PRNT:2610 | Introduction to Printmaking | 3 |

## Structures Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: |  |  |
| CEE: 4164 | Design of Wood Structures | 3 |
| CEE:4535 | Design of Steel Structures | 3 |
| CEE:4539 | Foundations of Structures | 3 |

Civil and Environmental Engineering Elective

| Course \# $\quad$ Title | Hours |
| :--- | ---: |
| One of these: | 3 |
| A third structures course | 3 |
| An additional design course | 3 |

An additional course with prefix CEE numbered 3000
3
or above

## Art Electives

Students complete 6 s.h. in additional electives chosen from courses that count toward the art minor in the College of Liberal Arts and Sciences. Students should consult with an academic advisor.

The following courses are suggested electives in the pre-architecture focus area.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CEE:2240/ | Digital Drafting with AutoCAD | 3 |
| TDSN:2240 |  |  |
| CERM:2010 | Ceramics I: Handbuilding | 3 |
| INTM:2710/ | Introduction to Intermedia | 3 |
| CINE:2869 |  |  |
| MTLS:2910 | Introduction to Jewelry and | 3 |
| SCLP:2810 | Metal Arts | 3 |
| TDSN:2250 | Undergraduate Sculpture I | 3 |

## Structures, Mechanics, and Materials

Students complete CEE:4535 Design of Steel Structures, four focus area electives ( $12 \mathrm{~s} . \mathrm{h}$.), and two additional elective courses ( $6 \mathrm{~s} . \mathrm{h}$.).

Students in the structures, mechanics, and materials focus area are required to take CEE:4506 Design of Concrete Structures as one of their design courses for the civil engineering major. The second design
course may be selected from the approved list; see "Design Courses" above.

## Required Structures, Mechanics, and Materials Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| CEE:4535 | Design of Steel Structures | 3 |

Structures, Mechanics, and Materials Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 12 s.h. from these: |  | 3 |
| CEE:3783 | Surveying and Remote Sensing | 3 |
| CEE:4135 | Structural Modeling and Health <br> Monitoring | 3 |
| CEE:4160 | Introduction to Bridge | 3 |
| CEE:4162 | Engineering | 3 |
| CEE:4164 | Structural Systems for Buildings | 3 |
| CEE:4511/ME:4111 | Design of Wood Structures <br> Scientific Computing and <br> Machine Learning | 3 |

CEE:4512/ME:4112 Engineering Design 3
CEE:4532/ME:4153 Fundamentals of Vibrations 3
CEE:4533/IGPI:4115 Finite Element I 3
CEE:4539 Foundations of Structures 3
CEE:5179/ME:5179 Continuum Mechanics arr.
CEE:5236/BME:5720 Optimization of Structural 3 Systems
CEE:5540/ME:5150 Intermediate Mechanics of Deformable Bodies

## Additional Electives-Structures, Mechanics, and Materials

Students complete 6 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) numbered 3000 or above and not already taken for the major, or pre-approved courses taken outside of the College of Engineering. Students should consult with an academic advisor.
The following courses are suggested electives in the structures, mechanics, and materials focus area.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGR:2120 | Electrical Circuits | 3 |
| ENGR:2730 | Computers in Engineering | 3 |
| ENGR:2995 | Introduction to Artificial | 3 |
|  | Intelligence and Machine |  |
| ISE:2500 | Learning in Engineering | 3 |

## Transportation Engineering

Students complete five focus area electives ( 15 s.h.), and two additional elective courses ( 6 s.h.).

Students in the transportation engineering focus area are required to take CEE:4762 Design of Transportation Systems as one of their design courses for the civil engineering major. The second design course may be selected from the approved list; see "Design Courses" above.

## Transportation Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 15 s.h. from these: |  | 3 |
| CEE:3142/ISE:3600/ | Quality Control |  |
| STAT:3620 | Surveying and Remote Sensing | 3 |
| CEE:3783 | Resilient Infrastructure and |  |
| CEE:3790 | Emergency Response | 3 |
| CEE:3998 | Individual Investigations: Civil | arr. |
| CEE:4160 | Introduction to Bridge | 3 |
| CEE:4176/URP:4262 | Engineering | Transportation Research <br> Methods and Analysis |
| CEE:4560 | Pavement Engineering | 3 |
| CEE:4730 | Transportation Infrastructure <br> Construction and Management | 3 |
| CEE:4763 | Traffic Engineering | 3 |
| CEE:5678/URP:5678 | Application Simulation to | 3 |
|  | Transportation | 3 |

## Additional Electives-Transportation Engineering

Students complete 6 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) numbered 3000 or above and not already taken for the major, or pre-approved courses taken outside of the College of Engineering. Students should consult with an academic advisor.
The following courses are suggested electives in the transportation engineering focus area.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENGR:2120 | Electrical Circuits | 3 |
| ENGR:2720 | Materials Science | 3 |
| ENGR:2730 | Computers in Engineering | 3 |
| ENGR:2995 | Introduction to Artificial | 3 |
|  | Intelligence and Machine |  |
| ISE:2500 | Learning in Engineering | 3 |

## Urban and Regional Planning

Students complete two required courses ( 6 s.h.), three focus area electives ( 9 s.h.), and two additional elective courses ( 6 s.h.).
Students planning to pursue the combined Bachelor of Science in Engineering/Master of Science program in urban and regional planning should complete URP:6202 Land Use Planning: Law and Practice and URP:6203 The Making of Cities: Histories and Theories of Planning. These courses can be counted toward the collegiate curriculum General Education Component approved course subjects requirement. See Combined Programs [p. 1504] in this section of the catalog.

## Required Urban and Regional Planning Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: |  |  |
| URP:6201/ | Analytic Methods II | 3 |
| PBAF:6201 |  |  |
| URP:6205/ | Economics for Policy Analysis | 3 |

## Urban and Regional Planning Electives

$\left.\begin{array}{llr}\text { Course \# } & \text { Title } & \text { Hours } \\ \text { Three of these: } & & 3 \\ \text { CEE:4176/URP:4262 } & \text { Transportation Research } \\ \text { Methods and Analysis }\end{array}\right)$

## Additional Electives-Urban and Regional Planning

Students complete 6 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) numbered 3000 or above and not already taken for the major. Students should consult with an academic advisor.

The following courses are suggested electives in the urban and regional planning focus area.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CEE:3783 | Surveying and Remote Sensing | 3 |
| CEE:3790 | Resilient Infrastructure and | 3 |
| CEE:4102 | Emergency Response | 3 |
| CEE:4119 | Groundwater | 3 |
| CEE:4158/OEH:4920 | Solid and Hazardous Wastes | 3 |
| CEE:4159/CBE:4459/ | Air Pollution Control | 3 |
| IGPI:4159 | Technology |  |
| CEE:4371 | Water Resources Engineering | 3 |
| CEE:4539 | Foundations of Structures | 3 |
| CEE:4763 | Traffic Engineering | 3 |

## Combined Programs

## BSE/MS in Civil and Environmental Engineering

The College of Engineering offers the combined Bachelor of Science in Engineering/Master of Science program for civil engineering undergraduate students who intend to earn an MS in civil and environmental engineering. BSE/MS students may attend the departmental graduate seminar and work on a master's thesis or research project while they are still undergraduates. They may count a limited amount of coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the BSE, and they are expected to complete the MS one year later.
To be admitted to the degree program, students must have completed at least 80 s.h. and have a cumulative grade-point average (GPA) of at least 3.25. They must submit an application form to the Department of Civil and Environmental Engineering, along with a letter stating their proposed area of specialization and the name of a department faculty member willing to be their primary MS advisor. Graduate Record Examination (GRE) General Test scores are not required for the degree program.

Applications are due by May 15.

## BSE/MS in Urban and Regional Planning

The College of Engineering and the School of Planning and Public Affairs offer the combined Bachelor of Science in Engineering/Master of Science program in urban and regional planning. The program, which is completed in five years, is designed for students who wish to pursue a public or private sector career in planning, a field that encompasses the development of alternatives to improve the quality of life in cities and regions.
Graduates are technically oriented professionals who have a clear understanding of policy development and implementation, which they apply to civil and industrial engineering problems. They fill positions such as public works director, transportation engineer, and public utilities staff member.

Each student in the combined program has two advisors, one in civil engineering and one in planning and public affairs. Students enroll in the College of Engineering for their first four years in the program and in the Graduate College for their fifth year. They follow the standard curriculum of their BSE program during the first two years and begin adding courses from the planning and public affairs program during the third year. Successful students receive a BSE at the end of the fourth year and an MS in urban and regional planning at the end of the fifth year.
Students in the combined program must maintain a cumulative GPA of at least 3.00 in order to graduate with an MS in urban and regional planning.

For more information, see the MS in urban and regional planning [p. 1689] (Graduate College) in the catalog. Contact Engineering Student Services for information about applying to the combined program.

## Career Advancement

When it comes to building the nation's infrastructure or protecting the natural environment, civil engineers are at the forefront. They not only design roads, bridges, and structures, provide clean drinking water, and protect people from natural hazards like flooding or earthquakes, they also engage with the public to create a more sustainable future. On average, $93-98 \%$ of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.
Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be
discussed with an academic advisor. For additional sample plans, see MyUI.

questions on appropriate timing, contact your academic advisor or Graduation Services.

## Environmental Engineering, BSE

## Educational Objectives

Within a few years of graduation, graduates of the Bachelor of Science in Engineering (BSE) program in environmental engineering will:

- be productive and contributing members of the environmental engineering profession as practitioners, entrepreneurs, researchers or teachers;
- be engaged in learning, understanding, and applying new ideas as the field develops;
- pursue advanced studies, if qualified and interested; and
- promote the safety, health, and welfare of the public and the environment through professional practice and civic leadership.

## Requirements

The Bachelor of Science in Engineering with a major in environmental engineering requires a minimum of 130 s.h. of credit. At the time of graduation, students must have a cumulative gradepoint average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.
All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1448] in the catalog. Students completing the major in environmental engineering fulfill the collegiate statistics requirement by completing STAT:2020 Probability and Statistics for the Engineering and Physical Sciences. The focus area may require specific courses to count toward the General Education Component of the collegiate curriculum; see "Focus Area" below.
The major in environmental engineering requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Collegiate Curriculum | 50 |
| Major Requirements (including one 0 s.h. course) | 65 |
| Focus Area | 15 |

## Major Requirements

Major requirements include a set of common courses (58 s.h.), five professional skills courses ( 4 s.h., including one 0 s.h. course), and one capstone design course ( 3 s.h.).

## Common Courses

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| All of these: |  |  |
| CEE:1030 | Introduction to Earth Science <br> (no lab required) | 3 |
| CEE:3155 | Principles of Environmental <br> Engineering (with lab) <br> CEE:3371 | Principles of Hydraulics and <br> Hydrology |
| CEE:3430 | Water Treatment (with lab) | 3 |
| CEE:4102 | Groundwater | 4 |
| CEE:4150 | Environmental Chemistry | 3 |
|  |  | 3 |

| CEE:4157 | Environmental Engineering <br> Design | 3 |
| :--- | :--- | :--- |
| CEE:4158 | Solid and Hazardous Wastes | 3 |
| CEE:4159 | Air Pollution Control <br> Technology | 3 |
| CEE:4374 | Water Resource Design | 3 |
| BIOL:1411 | Foundations of Biology | 4 |
| CHEM:1120 | Principles of Chemistry II | 4 |
| CHEM:2210 | Organic Chemistry I (no lab | 3 |
| ENGR:2110 | required) | 2 |
| ENGR:2130 | Statics | 3 |
| ENGR:2510 | Thermodynamics | 4 |
| ENGR:2710 | Fluid Mechanics | 3 |
| ENGR:2720 | Dynamics | 3 |

## Professional Skills

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Introduction to Careers in |  |
| CEE:1010 | Environmental Engineering | 0 |
| CEE:2010 | Civil and Environmental <br> Engineering Professional <br> Practice and Ethics | 1 |
| CEE:3001 | Leadership Skills for Engineers | 1 |
| CEE:3002 | Technical Communication <br> in Civil and Environmental | 1 |
| CEE:3003 | Engineering |  |
|  | Project Management Skills | 1 |

## Capstone Design Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| CEE: 4850 | Project Design and Management <br> in Civil Engineering | 3 |

## Focus Area

Students must select focus area courses according to guidelines established by the Department of Civil and Environmental Engineering. Environmental engineering students may choose from a standard focus area developed by the department (environmental or public health) or create an individual focus area tailored to their interests. For a description of the standard focus area options and guidelines for tailored focus areas in environmental engineering, see Environmental Engineering Focus Areas on the Department of Civil and Environmental Engineering website.
Focus areas in environmental engineering consist of content area courses and electives; carefully selected elective courses may contribute to earning a minor and/or certificate.

## Environmental

Students in the environmental focus area complete two content area courses ( $6 \mathrm{~s} . \mathrm{h}$.) and three additional electives ( 9 s.h.).

## Environmental Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: |  | 3 |
| CEE:4107/CBE:4410 | Sustainable Systems | 3 |
| CEE: 4119 | Hydrology | 3 |
| CEE: 4371 | Water Resources Engineering |  |

## Additional Electives-Environmental Focus Area

Students complete 9 s.h. in additional electives. These electives may include any Department of Civil and Environmental Engineering course (prefix CEE) not already taken for the major numbered 3000 or above.

The following courses are additional suggested electives in the environmental focus area.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CPH:3500/GHS:3500 | Global Public Health | 3 |
| ECON:3625/ | Environmental and Natural | 3 |
| URP:3135 | Resource Economics |  |
| ENGR:2120 | Electrical Circuits | 3 |
| ENGR:2730 | Computers in Engineering | 3 |
| ENGR:2995 | Introduction to Artificial | 3 |
|  | Intelligence and Machine |  |
|  | Learning in Engineering |  |
| GEOG:2050 | Foundations of GIS | 4 |
| GEOG:3210/ | Health, Work, and the | 3 |
| CPH:3400 | Environment |  |
| LAW:8992 | Water Law | arr. |
| OEH:4240 | Global Environmental Health | 3 |

## Public Health

Students in this focus area complete one required course ( $3 \mathrm{~s} . \mathrm{h}$. ), three focus area electives ( 9 s.h.), and one additional elective ( 3 s.h.).

Students in the public health focus area are required to complete the undergraduate certificate in public health in the College of Public Health [p. 1946]. The public health focus area requires CPH:1400 Fundamentals of Public Health as part of the collegiate curriculum General Education Component.

## Required Public Health Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Public Health Science: Inquiry | 3 |
| CPH:1600 | and Investigation in Public |  |
|  | Health |  |

## Public Health Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Three of these: | Social and Psychological <br> Determinants of Health: <br> Changing Behavior, Improving <br> CPH:1800 <br> Health | 3 |
| CPH:2400 | The U.S. Health System in a <br> Global Context | 3 |
| CPH:3400/ | Health, Work, and the <br> GEOG:3210 | Environment |
| CPH:3500/GHS:3500 | Global Public Health | 3 |

## Additional Elective-Public Health Focus Area

Students complete 3 s.h. in additional elective(s). The following courses are suggested electives in the public health focus area. Students can view courses applicable for the Certificate in Public Health [p. 1963] in the College of Public Health section of the catalog.

CPH:2220
Building a Healthier Tomorrow: Public Health Methods to Minimize Disease and Pollutant Exposures
CPH:4200
Agriculture, Food Systems, and

## CPH:4220/GHS:4530/ Global Road Safety

OEH:4530
Courses that count toward the undergraduate Certificate
in Public Health

## Combined Programs

## BSE/MS in Civil and Environmental Engineering

The College of Engineering offers a Bachelor of Science in Engineering/Master of Science program for environmental engineering undergraduate students who intend to earn an MS in civil and environmental engineering. BSE/MS students may attend the departmental graduate seminar and work on a master's thesis or research project while they are still undergraduates. They may count a limited amount of coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the BSE, and they are expected to complete the MS one year later.

To be admitted to the degree program, students must have completed at least 80 s.h. and have a cumulative grade-point average of at least 3.25. They must submit an application form to the Department of Civil and Environmental Engineering, along with a letter stating their proposed area of specialization and the name of a department faculty member willing to be their primary MS advisor. Graduate Record Examination (GRE) General Test scores are not required for the fasttrack degree program.

Applications are due by May 15 .

## Career Advancement

Environmental engineers apply engineering principles to design systems that control pollution and protect public health. Environmental engineers restore air, soil, and water quality at contaminated sites, and develop systems that convert waste into clean energy. Environmental engineering addresses the complex food, energy, and water issues of the 21 st century. On average, $93-98 \%$ of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

| Course \# | Title | Hours |
| :--- | :--- | ---: |

(typically in February for spring, September for fall) ${ }^{k}$

| Hours | $\mathbf{1 5}$ |
| :--- | ---: |
| Total Hours | $\mathbf{1 3 0}$ |

a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.
b Typically this course is offered in fall and spring semesters. Check
MyUI for course availability since offerings are subject to change.
c Enrollment in math courses requires completion of a placement exam.
d Enrollment in chemistry courses requires completion of a placement exam.
e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
f Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
g See General Catalog for list of approved course subjects. Some focus areas may require specific courses that may be taken for General Education Component credit.
h Students select a course from one of two GE CLAS Core areas: Diversity and Inclusion or Values and Culture.
i Students select a standard focus area developed by the department or create an individual focus area tailored to their interests. Focus areas require 15 s.h. and consist of content area courses and additional electives; carefully selected elective courses may contribute to earning a minor and/or certificate. Some focus areas
may require additional courses that may be taken for General Education Component credit. See the General Catalog or consult an advisor for more information.
j See General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI.
k Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Civil and Environmental Engineering, MS 

Graduate study in civil and environmental engineering prepares students for professional careers and further study. The principal concentration areas are environmental engineering and environmental science; hydraulics, hydrology, and water resources; structures, mechanics, and materials; sustainable water development; and transportation.

## Research and Study Areas

## Structures, Mechanics, and Materials

The structures, mechanics, and materials curriculum is designed for students who wish to gain knowledge and skill in the mechanics of solids and structures that they can apply to civil infrastructure systems and other fields. The program concentrates on developing appropriate methodologies for tackling broad, complex issues related to civil infrastructure systems, and on educating engineers in the implementation and application of methodologies to actual engineering projects. Faculty members have expertise in structural engineering, design optimization, solid mechanics, and computational methods.

## Transportation Engineering

The transportation engineering curriculum is geared toward students interested in developing specialized knowledge and skills applicable to the diverse set of issues associated with transportation. Faculty members have expertise in traffic engineering, infrastructure management systems, pavement engineering, advanced construction materials, dynamic load and pavement simulation, optimal design, winter highway maintenance, real-time simulation, human factors, intelligent sensors, nondestructive testing, transportation planning, and travel demand modeling.

## Water and the Environment

The water and the environment graduate program focuses on both fundamental and applied aspects of environmental systems and processes across a range of scales. The water and the environment program offers unique opportunities for students to actively participate in the research, analysis, and design aspects of real-world problems. There are three areas of specialization: environmental engineering and science; hydraulics, hydrology, and water resources; and sustainable water development.

The environmental engineering and science curriculum provides a comprehensive base of coursework and research in the areas of air and water quality management; environmental chemistry and microbiology; natural systems modeling; and processes for water supply, pollution control, and solid and hazardous waste management.

The hydraulics, hydrology, and water resources curriculum is associated with IIHR-Hydroscience and Engineering, a worldrenowned research institute, where senior staff members of the institute are professors in the program. IIHR offers unique curriculum opportunities in laboratory and field-scale experimentation, and in mathematical modeling with IIHR's high-speed computer facilities.
The sustainable water development curriculum is focused on training interdisciplinary professional engineers, researchers, educators, and those who are ready to meet the water resource challenges of communities most in need. Community service and professional development experiences complement innovative research at the food, energy, and water nexus.
Across all specialization areas within water and the environment, interdisciplinary research and study are conducted with programs
including the Center for Global and Regional Environmental Research, the Center for Health Effects of Environmental Contamination, the Center for Hydrologic Development, the Iowa Flood Center, the Iowa Superfund Research Program, the Hazardous Substances Research Center, and the Center for Biocatalysis and Bioprocessing; the departments of Chemical and Biochemical Engineering (College of Engineering), Earth and Environmental Sciences, Geographical and Sustainability Sciences (College of Liberal Arts and Sciences), Microbiology and Immunology (Carver College of Medicine), and Occupational and Environmental Health (College of Public Health); and the School of Planning and Public Affairs (Graduate College). Other areas of interdisciplinary focus include groundwater contamination, biotechnology, global climate change, and hazardous substances.

## Learning Outcomes

## Students will gain an ability to:

- apply principles of engineering and science for problem solving to meet societal needs;
- communicate effectively with a range of audiences;
- make ethical and professional judgments that consider the global, economic, environmental, and societal contexts of their decisions and proposed engineering solutions; and
- conduct research through the use of modern research tools and methodologies (thesis students only).

## Requirements

The Master of Science program in civil and environmental engineering requires a minimum of 30 s.h. of graduate credit for thesis students; 31 s.h. for nonthesis students. The program enables students to concentrate in one or more areas of their choice. Students must maintain a cumulative grade-point average of at least 2.75 .

The thesis option requires a minimum of 25 s.h. (eight courses) with the remaining $5 \mathrm{~s} . \mathrm{h}$. obtained in CEE:5999 Research: Civil and Environmental Engineering MS Thesis.
With the approval of their advisor, students develop a study plan that satisfies the requirements of their chosen curriculum. Students must pass an oral examination and, in some program options, a written examination.

Consult the department's Graduate Program Resources web page for more detailed information about the MS program in civil and environmental engineering.

## Core Courses

All students must successfully complete the civil and environmental graduate core courses for their area of focus. Students are expected to complete these courses during their first year of study.

## Elective Courses

Students choose elective courses from any academic area that strengthens their knowledge in their area of focus and provides needed research topic training. Individual Investigations: Civil and Environmental Engineering (CEE:5998) is not considered a suitable elective.

## Seminars

All full-time students are required to register for and participate in a seminar in their respective program of study; this includes CEE:5096 Water, Energy, and Food Nexus Seminar for areas that fall under the water and the environment curriculum (environmental engineering, environmental science, hydraulics, sustainable water development, and water resources), or CEE:5098 Graduate Seminar
in Structures, Materials, Mechanics, and Transportation for students in transportation engineering or structures, mechanics and materials. Depending on the program of study, there may be additional seminar requirements.

## Ethics Course

Students must enroll in ENGR:7270 Engineering Ethics.

## Thesis

Students may earn up to 5 s.h. of research credit in CEE:5999 Research: Civil and Environmental Engineering MS Thesis. A total of 3 s.h. may be taken on a graded basis at the discretion of the advisor.

## Combined Programs

## MS (Sustainable Water Development Subprogram)/MS in Urban and Regional Planning

The Department of Civil and Environmental Engineering and the School of Planning and Public Affairs collaborate to offer a combined Master of Science in civil and environmental engineering with a sustainable water development subprogram/Master of Science in urban and regional planning.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, see the MS in urban and regional planning [p. 1689] (Graduate College) in the catalog.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Each of the program's curricula is flexible; students may be admitted from all disciplines of engineering as well as from the mathematical and basic sciences.

Applicants should have a cumulative undergraduate grade-point average (GPA) of at least 3.00. Those with GPAs slightly lower should contact the department.

Beginning with fall 2022 applicants, Graduate Record Examination (GRE) General Test scores are no longer required.

## Financial Support

A significant number of research assistantships are available on a variety of research projects, and a limited number of teaching assistantships may be available. Selection of recipients usually is based on scholastic achievement and research interest.

## Career Advancement

Current and projected demand for MS graduates is excellent. Graduates are placed in advanced technical positions in industry, consulting firms, or government, or they may continue their graduate study. On average, 93-98\% of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.
Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide
opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

# Civil and Environmental Engineering, PhD 

Graduate study in civil and environmental engineering prepares students for professional careers and further study. The principal concentration areas are environmental engineering and environmental science; hydraulics, hydrology, and water resources; structures, mechanics, and materials; sustainable water development; and transportation.

## Research and Study Areas

## Structures, Mechanics, and Materials

The structures, mechanics, and materials curriculum is designed for students who wish to gain knowledge and skill in the mechanics of solids and structures that they can apply to civil infrastructure systems and other fields. The program concentrates on developing appropriate methodologies for tackling broad, complex issues related to civil infrastructure systems, and on educating engineers in the implementation and application of methodologies to actual engineering projects. Faculty members have expertise in structural engineering, design optimization, solid mechanics, and computational methods.

## Transportation Engineering

The transportation engineering curriculum is geared toward students interested in developing specialized knowledge and skills applicable to the diverse set of issues associated with transportation. Faculty members have expertise in traffic engineering, infrastructure management systems, pavement engineering, advanced construction materials, dynamic load and pavement simulation, optimal design, winter highway maintenance, real-time simulation, human factors, intelligent sensors, nondestructive testing, transportation planning, and travel demand modeling.

## Water and the Environment

The water and the environment graduate program focuses on both fundamental and applied aspects of environmental systems and processes across a range of scales. The water and the environment program offers unique opportunities for students to actively participate in the research, analysis, and design aspects of real-world problems. There are three areas of specialization: environmental engineering and science; hydraulics, hydrology, and water resources; and sustainable water development.
The environmental engineering and science curriculum provides a comprehensive base of coursework and research in the areas of air and water quality management; environmental chemistry and microbiology; natural systems modeling; and processes for water supply, pollution control, and solid and hazardous waste management.
The hydraulics, hydrology, and water resources curriculum is associated with IIHR-Hydroscience and Engineering, a worldrenowned research institute, where senior staff members of the institute are professors in the program. IIHR offers unique curriculum opportunities in laboratory and field-scale experimentation, and in mathematical modeling with IIHR's high-speed computer facilities.
The sustainable water development curriculum is focused on training interdisciplinary professional engineers, researchers, educators, and those who are ready to meet the water resource challenges of communities most in need. Community service and professional development experiences complement innovative research at the food, energy, and water nexus.
Across all specialization areas within water and the environment, interdisciplinary research and study are conducted with programs
including the Center for Global and Regional Environmental Research, the Center for Health Effects of Environmental Contamination, the Center for Hydrologic Development, the Iowa Flood Center, the Iowa Superfund Research Program, the Hazardous Substances Research Center, and the Center for Biocatalysis and Bioprocessing; the departments of Chemical and Biochemical Engineering (College of Engineering), Earth and Environmental Sciences, Geographical and Sustainability Sciences (College of Liberal Arts and Sciences), Microbiology and Immunology (Carver College of Medicine), and Occupational and Environmental Health (College of Public Health); and the School of Planning and Public Affairs (Graduate College). Other areas of interdisciplinary focus include groundwater contamination, biotechnology, global climate change, and hazardous substances.

## Learning Outcomes

Students will gain an ability to:

- apply critical thinking skills and principles of engineering and science to solve problems that address societal needs;
- communicate effectively with a range of audiences;
- make ethical and professional judgments that consider the global, economic, environmental, and societal contexts of their decisions and proposed engineering solutions; and
- conduct original research that advances discovery through the use of modern research tools and methodologies.

## Requirements

The Doctor of Philosophy program in civil and environmental engineering requires a minimum of $72 \mathrm{~s} . \mathrm{h}$. of graduate coursework, including at least 43 s.h. in formal coursework. Students may count a maximum of 29 s.h. in CEE:7999 Research: Civil and Environmental Engineering PhD Dissertation toward the degree. Students must maintain a cumulative grade-point average of at least 3.00.

Students may count up to 24 s.h. from the MS in civil and environmental engineering or from another qualified graduate program toward the PhD with departmental approval.
All students usually need at least three years of full-time graduate study to complete the degree. They must pass a qualifying examination and must pass a written and oral comprehensive examination before they may be formally admitted to PhD candidacy; the comprehensive examination usually is taken after all required coursework has been completed. Students devote one year to the preparation of a dissertation that contributes to knowledge in the field; they must defend their dissertation successfully in a final examination.

Consult the department's Graduate Program Resources web page for more detailed information about the PhD program in civil and environmental engineering.

## Core Courses

Students must successfully complete the appropriate civil and environmental graduate core courses for their area of focus. They are expected to complete core courses during their first year of study.

## Elective Courses

Students should choose elective courses from any academic area that strengthens their knowledge in their area of focus and provides needed research topic training. Independent study, such as CEE:5998 Individual Investigations: Civil and Environmental Engineering, is not considered a suitable elective.

## Seminars

All full-time students are required to register for and participate in seminars in their respective program of study; this includes CEE:5096 Water, Energy, and Food Nexus Seminar for areas that fall under the water and the environment curriculum (environmental engineering, environmental science, hydraulics, sustainable water development, and water resources) or CEE:5098 Graduate Seminar in Structures, Materials, Mechanics, and Transportation for students in transportation engineering or structures, mechanics and materials. Depending on the program of study, there may be additional seminar requirements.

## Ethics Course

Students must enroll in ENGR:7270 Engineering Ethics.

## Dissertation

Students must complete a dissertation and may apply up to 29 s.h. in CEE:7999 Research: Civil and Environmental Engineering PhD Dissertation toward the degree. A total of 6 s.h. may be taken on a graded basis at the discretion of the advisor.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
Each of the program's curricula is flexible; students may be admitted from all disciplines of engineering as well as from the mathematical and basic sciences.

Applicants should have a graduate grade-point average (GPA) of at least 3.00 . Those with GPAs slightly lower should contact the department.

Beginning with fall 2022 applicants, Graduate Record Examination (GRE) General Test scores are no longer required.

## Financial Support

A significant number of research assistantships are available on a variety of research projects, and a limited number of teaching assistantships may be available. Selection of recipients usually is based on scholastic achievement and research interest.

## Career Advancement

Graduates are placed in advanced technical positions in academia, industry, consulting firms, or government.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

## Academic Plans

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Civil and Environmental Engineering, PhD

- Environmental Engineering Subprogram [p. 1517]
- Environmental Science Subprogram [p. 1518]
- Hydraulics Subprogram [p. 1519]
- Structures, Mechanics and Materials Subprogram [p. 1520]
- Sustainable Water Development Subprogram [p. 1521]
- Transportation Subprogram [p. 1522]
- Water Resources Subprogram [p. 1523]

# Electrical and Computer Engineering 

## Chair

- Er-Wei Bai

Undergraduate majors: computer science and engineering (BSE); electrical engineering (BSE)

Graduate degrees: MS in electrical and computer engineering; PhD in electrical and computer engineering
Faculty: https://engineering.uiowa.edu/people/ece-people
Website: https://ece.engineering.uiowa.edu/
Electrical engineers and computer engineers make vital contributions to nearly all facets of modern society through their work in areas such as the internet of things (IoT), artificial intelligence, deep learning, computer systems, software applications, medical imaging, robotics, wireless communications, and fiber optics. From smart technologies to high-definition television, cellular telephones, and computer networks, the contributions of electrical and computer engineers are constantly reinventing the world.
Many benefits that have sprung from electrical and computer engineering technology now are taken for granted-noninvasive imaging of the brain and other internal organs, astonishing views of the solar system's outer planets, and wireless telecommunications. Electrical and computer engineers also play crucial roles in major emerging technologies, such as driverless vehicles, smart cities, and human genomics.
As the United States strives to retain or enlarge its share of national and international markets, electrical and computer engineers will play a more important role in fostering innovation, increasing productivity, and creating intelligent systems to improve the quality of life for residents.

Electrical and computer engineers work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, television, and power industries, and many graduates pursue entrepreneurial ventures.

## Programs

Undergraduate Programs of Study

## Majors

- Major in Computer Science and Engineering (Bachelor of Science in Engineering) [p. 1531]
- Major in Electrical Engineering (Bachelor of Science in Engineering) [p. 1535]

## Graduate Programs of Study

## Majors

- Master of Science in Electrical and Computer Engineering [p. 1541]
- Doctor of Philosophy in Electrical and Computer Engineering [p. 1543]

Research and Study Areas

## Augmented Reality and Multimodal Sensing

The department is actively involved in research to advance augmented reality and virtual reality systems, particularly regarding their underlying multimodal imaging and sensing techniques. Work in this area relies on mathematics, instrumentation, software engineering, computer vision, and computer graphics to design and engineer novel methodologies and systems for sensing, virtually replicating, understanding, and then augmenting the world around us. This is an interdisciplinary research area that encompasses fields such as: 3D/4D surface imaging and measurement, 3D/4D data compression and communication, real-time computer vision, computer-aided surgeries, machine learning, computer graphics, human-computer interaction, multimedia on mobile devices, and computer-aided design. In addition to advancing the basic science within those fields, departmental researchers are pursing various applications of their work via collaborations with the Carver College of Medicine [p. 1729], the Public Digital Arts faculty cluster, the Iowa Initiative for Artificial Intelligence, the Iowa Institute for Biomedical Imaging, and the Iowa Technology Institute.

## Bioinformatics and Computational Biology

The Center for Bioinformatics and Computational Biology (CBCB) is a multidisciplinary research enterprise that encompasses numerous laboratories and collaborates with many graduate programs on campus. Graduate students may earn the Certificate in Informatics [p. 1660] (Graduate College), to augment their PhD training in disciplines ranging from molecular biology to biochemistry to computer science to engineering.

The Coordinated Laboratory for Computational Genomics, a CBCB affiliate, engages in a broad range of research activities that complement the Human Genome Project. Members of the laboratory develop new hardware and software techniques for analysis and annotation of genomic sequence, its transcription and translation, and the proteome. Other efforts are aimed at systematic capture and curation of phenotypic information acquired from massive databases of clinical information derived from collaborations with the Carver College of Medicine. The goal of these projects is to elucidate the mechanisms of human disease and develop promising new methods for cures and treatments.

The laboratory's facilities include more than 200 workstations, three Linux clusters, and access to the National Science Foundation (NSF) TeraGrid and other high performance computing facilities. Projects in the laboratory frequently involve cutting-edge genomic and proteomic instruments such as the Roche 454 next-generation sequencing platform and several high-throughput gene expression (microarray) measurement platforms.

## Computer Systems

High performance computing research involves development of collaborative and parallel computing environments and associated software tools, and use of these facilities and tools in varied application domains, including image processing and computational biology. Current work in networking focuses on protocols and layer-integration schemes that support high performance wireless networking, and on control and coordination of mobile ad hoc networks. Current research facilities in these areas include several large cluster computers and an experimental asynchronous transfer mode (ATM) network.

Departmental facilities that support this work include Linux and Windows workstations and server nodes that provide college-wide networked computer services. Advanced computing facilities also are available at national supercomputing centers and federal laboratories.

## Control Systems and Systems Theory

Control systems and systems theory use feedback to improve the predictability and efficiency of engineered systems ranging from electronic amplifiers to vehicle guidance systems, manufacturing processes, communication channels, and the internet. Work in control systems and systems theory draws heavily on results from mathematics, physics, and computer science to model the systems that are to be controlled and to implement feedback controllers.

Current research emphasizes optimal, adaptive, digital, robust, and stochastic control and the control of discrete event dynamical systems. Recent work has concerned the estimation, identification, and robust control of linear and nonlinear dynamical systems; set membership identification; control over wireless communication channels; coordinated fault tolerant control of unmanned vehicles; use of control theory to analyze distributed computing, communications, and manufacturing systems; interplay between communications and control; design of fast digital controllers using subband coding; and multirate control systems.

Research in control systems and systems theory is supported by extensive computing resources and collaborations with local industry, the Driving Safety Research Institute, the Iowa Technology Institute, and the Carver College of Medicine [p. 1729].

## Nanoscale Electronics and Spintronics

Nanotechnology is the branch of technology that deals with dimensions that are 10,000 times smaller than the width of the hair. Nanoscience and nanotechnology involve the ability to see and to control individual atoms and molecules. Utilizing the nanofabrication and nanoimaging facilities available on campus, nanoscale transistors, optical circuits, biosensors, and solar cells are being developed. Departmental researchers are pursuing experimental, theoretical, and large-scale computational approaches.

## Optoelectronics

Current research topics are optical and electronic properties of semiconductors, semiconductor devices, electro-optics, nonlinear optics, nonlinear wave propagation in plasmas, nanotechnology, and medical devices. This research is at the interface of optical engineering, materials engineering, quantum physics, and electromagnetics.
Much work is done in collaboration with other University of Iowa departments, including the departments of Physics and Astronomy, Chemistry (College of Liberal Arts and Sciences), Internal Medicine, and Neurosurgery (Carver College of Medicine). Facilities include two molecular beam epitaxy reactors (in physics and astronomy), a microfabrication laboratory with nanometer resolution capabilities, electrical characterization capability to 22 GHz , several Ti-sapphire lasers, a mid-infrared optical parametric oscillator, and plasma equipment for nonlinear wave plasma interaction studies.
Examples of current projects are the design and fabrication of diode lasers and light-emitting diodes based on the bandgap engineering of antimony and arsenic-based III-V compound semiconductors, phase control of laser arrays, development of an all-optical power equalizer, characterization of quantum well devices, nonlinear waveguide devices, development of a noncontact method to measure transport properties, plasma and optical soliton excitation and propagation, development of cellular probes, gas sensors, and a laser scalpel for medical research.

## Signal and Image Processing

Research in image processing and basic and applied signal processing is supported by a digital signal processing laboratory and an image analysis laboratory. Collaborative research with faculty in the departments of Radiology, Neurology, Psychiatry, Internal Medicine, Ophthalmology and Visual Sciences, Radiation Oncology (Carver College of Medicine), and the Roy J. Carver Department of Biomedical Engineering is directed at quantitative analysis of medical images.
In the area of signal processing, current projects include analysis and design of efficient adaptive algorithms for signal processing, efficient coding and transmission of speech, speech processing aids for the hearing impaired, robust equalization of uncertain channels, application of neural networks to communications systems, multirate signal processing, and subband coding and channel equalization.

Image processing and analysis projects include development of novel methods for image segmentation, image registration, computer-aided detection and diagnosis, early identification of disease patterns from medical image data, computer-aided surgical planning, virtual and augmented reality medical image visualization, building anatomic atlases, and a broad range of translational medicine projects focusing on research and clinical applications of the novel methods. The areas of interest span all scales, from molecules to cells to small animals to humans, and cover a broad range of organ systems and targeted diseases. The spectrum of medical imaging modalities used for research and applications in image processing and analysis is equally broad, encompassing all existing modalities, including X-ray, CT, MR, PET, SPECT, and OCT.

The Medical Image Analysis Labs consist of several specialized facilities for digital image processing. They are equipped with state-of-the-art devices for data storage, transfer, visualization, and analysis. High-capacity data storage devoted to image processing research offers more than 35 TB of online hard disk space. An augmented reality medical image visualization lab serves as a high performance collaborative resource for the Iowa Institute for Biomedical Imaging. The institute makes additional resources available to image processing research, including small and large animal as well as human research scanning facilities, and provides a backbone for interdisciplinary medical image analysis research to electrical and computer engineering graduate students and faculty.

## Wireless Communication Systems

The department is engaged in research using wireless sensor networks (WSNs), which consist of spatially distributed autonomous devices that use sensors to cooperatively monitor physical or environmental conditions such as temperature, sound, vibration, pressure, motion, and pollutants at different locations. WSNs are used for environment and habitat monitoring, health care applications, home automation, and traffic control. Current research includes the application of WSNs, traditional telemetry, and commercial cellular communication infrastructure for geosciences data collection (e.g., rainfall, water quality, soil moisture).
Another important research interest involving distributed sensor networks is the distributed control of power systems, especially requirements of the next-generation electric grid with smart metering and distributed generation using small-scale wind and solar generators. Research on WSNs also includes the design of cooperative communication techniques for energy efficient WSNs and issues of localization, network organization, and control.
Research activities in communication systems focus on design and analysis of receivers for digital wireless communications, especially the development of effective and practical receivers for multiple-user wireless cellular systems in multipath channels. Topics of research include the design, analysis, and experimental demonstration of large-
scale distributed multiple-input multiple-output (MIMO) arrays for communication sensing and electronic warfare; precision interference cancellation techniques using feedback control; and synchronization and channel estimation for massive MIMO Base Stations.

## Facilities

## Undergraduate Core

Electrical and computer engineering provides core instruction for the college in electrical circuits, electronics, instrumentation, and computers. A key part of this core teaching responsibility lies in providing students with an early opportunity to use engineering laboratory instrumentation.

## Undergraduate Laboratories

The department's undergraduate laboratories include facilities for the study of the internet of things (IoT), electrical and electronic circuits, wireless communication, power and sustainable energy, signals and systems, embedded systems, measurement automation, communication systems, control systems, image processing, robotics, and optics. The laboratories are equipped with modern equipment, including digital oscilloscopes, computer-controlled virtual instrumentation, and software and hardware for embeddedsystems development.

## Graduate Facilities and Laboratories

The department has laboratories intended primarily for graduate research in the areas of virtual and augmented reality, deep learning, big data, bioinformatics, image processing, software engineering, electro-optics, control systems, medical imaging and image analysis, large-scale intelligent systems, and wireless communication. Linux, Macintosh, and Windows workstations and server nodes provide college-wide networked computing support. Through cooperative arrangements, advanced computing facilities at national supercomputing centers, federal laboratories, and other universities are available for graduate research.

## Electrical and Computer Engineering Courses

## ECE:1000 First-Year Seminar

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

## ECE:2400 Linear Systems I <br> 3 s.h.

Introduction to continuous and discrete time signals and systems with emphasis on Fourier analysis; examples of signals and systems; notion of state and finite state machines; causality; linearity and time invariance; periodicity; Fourier transforms; frequency response; convolution; IIR and FIR filters, continuous and discrete Fourier transforms; sampling and reconstruction; stability. Prerequisites: ENGR:2120 and MATH:2560.

ECE:2410 Principles of Electronic Instrumentation 4 s.h. Principles of analog signal amplification, signal conditioning, filtering; operational amplifier circuit analysis and design; principles of operation of diodes, bipolar transistors, field effect transistors; discrete transistor amplifier analysis and design; laboratory included. Prerequisites: ENGR:2120 and PHYS:1612 and MATH:2560.

ECE:3000 Electrical and Computer Engineering Professional Seminar
Professional aspects of electrical and computer engineering, and computer science, presented through lectures and discussions by guest speakers, field trips, and panel discussions. Requirements: junior standing.
ECE:3320 Introduction to Digital Design 3 s.h.
Modern design and analysis of digital switching circuits; combinational logic; sequential circuits and system controllers; interfacing and busing techniques; design methodologies using medium- and large-scale integrated circuits; lab arranged.
Requirements: sophomore standing.
ECE:3330 Introduction to Software Design $\mathbf{3}$ s.h
Design of software for engineering systems; algorithm design and structured programming; data structures; introduction to objectoriented programming in JAVA; applications to engineering problems; lab arranged. Prerequisites: ENGR:2730. Same as IGPI:3330.
ECE:3350 Computer Architecture and Organization 3 s.h.
Basic concepts; computer evolution, register transfer level design, simulation techniques, instruction sets (CISC and RISC), assembly language programming, ALU design, arithmetic algorithms and realization of arithmetic functions, hardwired and microprogrammed control, memory hierarchies, virtual memory, cache memory, interrupts and DMA, input/output; introduction to high performance techniques, pipelining, multiprocessing; introduction to hardware description languages (Verilog, VHDL); students design and simulate a simple processor. Prerequisites: ENGR:2730 and ECE:3320.

ECE:3360 Embedded Systems 3 s.h.
Microprocessors and microcontrollers as components in engineering systems; embedded system design processes; microcontroller/ microprocessor architecture; interrupts and traps; memory and device interfacing; low-level and high-level software design for embedded systems; examples of embedded system architecture and design; fundamentals of operating systems; tasks and processes; context switching and scheduling; memory and file management, interprocess communication; device drivers. Prerequisites: ENGR:2730 and ECE:3320. Corequisites: ECE:2410.
ECE:3400 Linear Systems II
3 s.h.
Builds on concepts from ECE:2400 towards application in digital signal processing; lab exercises, hands-on term project; review of key linear systems concepts; MATLAB basics, tools, and functions for digital signal processing; discrete time systems, difference equations in digital signal processing; Fourier analysis of discrete time signals; transient, steady-state, and frequency response of discrete time, linear time-invariant (LTI) systems; Z-transform analysis; sampling theorem and aliasing; power spectral density and periodograms; recording and processing of sound and music; finite impulse response (FIR) and infinite impulse response (IIR) filters; designing and using filters in MATLAB. Prerequisites: ECE:2400.

## ECE:3410 Electronic Circuits

4 s.h.
Design and analysis of FET and BJT amplifiers; low, midrange, highfrequency analysis; difference amplifiers; feedback amplifiers; SPICE simulation; power amplifiers; digital logic families. Prerequisites: ECE:2410 and ECE:2400.

ECE:3500 Communication Systems
3 s.h.
Introduction to analog and digital communications, with an emphasis on modulation and noise analysis; Fourier analysis, probability theory, random variable and processes, AM, FM, pulse-coded modulation, binary digital modulation, SNR analysis of AM and FM, BER analysis of digital modulation schemes. Prerequisites: ECE:2400.

## ECE:3540 Communication Networks

3 s.h.
Communication networks, layered network architectures, applications, network programming interfaces (e.g., sockets), transport, congestion, routing, data link protocols, local area networks, emerging high-speed networks, multimedia networks, network security, internet protocol; technology examples. Prerequisites: ENGR:2730. Corequisites: STAT:2020.

## ECE:3600 Control Systems

3 s.h.
Fundamental concepts of linear feedback control, mathematical modeling, transfer functions, system response, feedback effects, stability, root-locus and frequency response analysis and design, compensation, lab arranged. Prerequisites: ECE:2400.

## ECE:3700 Electromagnetic Theory 3 s.h.

Electric and magnetic forces, Maxwell's equations, wave propagation; applications, including radiation, transmission lines, circuit theory. Prerequisites: MATH:3550 and PHYS:1612.

## ECE:3720 Semiconductor Devices

Fundamentals of semiconductor physics and devices; principles of the p-n junction diode, bipolar transistor, field effect transistor. Prerequisites: ECE:3410 and PHYS:1612 and PHYS:2704.

## ECE:3995 Undergraduate Contemporary Topics in Electrical and Computer Engineering <br> 3 s.h.

New topics or areas of study not offered in other electrical and computer engineering courses; based on faculty/student interest; not available for individual study.
ECE:3998 Individual Investigations: Electrical Engineering arr. Individual projects for electrical engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

## ECE:4720 Introductory Optics

3 s.h.
Wave motion and superposition, electromagnetic theory, photons, propagation of light, geometrical and physical optics, interference, diffraction, polarization, and Fourier optics; optical components, devices, and systems. Prerequisites: (PHYS:1512 or PHYS:2703 or PHYS:1612) and (MATH:1560 or MATH:1860). Same as PHYS:4720.

## ECE:4728 Introductory Solid State Physics

Phenomena associated with solid state; classification of solids and crystal structures, electronic and vibrational properties in solids; thermal, optical, magnetic, dielectric properties of solids. Prerequisites: PHYS:3741. Same as PHYS:4728.

## ECE:4880 Principles of Electrical and Computer Engineering Design

Design problems requiring integration of subject matter from other required electrical and computer engineering courses. Prerequisites: ECE:2410 and ENGR:2730. Requirements: senior standing.

## ECE:4890 Senior Electrical and Computer Engineering

 Design3 s.h.
Individual or team project; demonstration of completed project and formal engineering report. Prerequisites: ECE:4880 and (3 of the following are required: ECE:3330, ECE:3350, ECE:3360, ECE:3400, ECE:3500, ECE:3600, CS:3330). Requirements: completion of three required subprogram courses.

## ECE:5000 Graduate Seminar: Electrical and Computer Engineering

Presentation and discussion of recent advances and research in electrical and computer engineering by guest lecturers, faculty, students. Requirements: graduate standing.

ECE:5320 High Performance Computer Architecture 3 s.h. Problems involved in designing and analyzing current machine architectures using hardware description language (HDL) simulation and analysis, hierarchical memory design, pipeline processing, vector machines, numerical applications, multiprocessor architectures and parallel algorithm design techniques; evaluation methods to determine relationship between computer design and design goals. Prerequisites: ECE:3350 or CS:3620. Same as CS:5610.

ECE:5330 Graph Algorithms and Combinatorial Optimization
Combinatorial optimization problems; time complexity; graph theory and algorithms; combinatorial optimization algorithms; complexity theory and NP-completeness; approximation algorithms; greedy algorithms and matroids. Prerequisites: ECE:3330. Same as IGPI:5331.

ECE:5410 Advanced Circuit Techniques 3 s.h
Advanced circuit techniques and principles; analog circuit design including amplifiers, oscillators, multipliers, modulators, phase-locked loops, active filters, switching power supplies, analog to digital and digital to analog converters; lab activities include circuit simulation, design, printed circuit board (PCB) layout and fabrication, assembly, and testing. Prerequisites: ECE:3410.

## ECE:5415 Radio Frequency Electronics

3 s.h.
Active and passive devices and transmission line structures at radio frequencies; analysis and design of radio frequency electronic circuits including amplifiers, mixers, multipliers, detectors, radio frequency filters, and oscillators using scattering parameters and the Smith chart; impedance matching, noise and distortion, and power amplifiers; laboratory projects include designing, simulating, building, and testing a radio frequency amplifier and other components used in a radio receiver or transmitter. Prerequisites: ECE:3410 and ECE:3700.

ECE:5420 Power Electronics
3 s.h.
Fundamental concepts and design techniques of power electronics circuits; switching power pole and various switch-mode DC to DC power conversion topologies; feedback control of switch-mode DC to DC power supplies; diode rectification of AC utility power and Power Factor Control (PFC) circuits; electromagnetic concepts and design of high-frequency inductors and transformers; electrically isolated switch-mode DC power supply topologies and soft-switching DCDC converters and inverters; techniques for synthesis of DC and lowfrequency AC sinusoidal voltages. Prerequisites: PHYS:1611 and ENGR:2120 and MATH:2560. Requirements: junior standing.

## ECE:5430 Electric Drive Systems <br> 3 s.h.

Basic characteristics of DC and AC electric motors and their associated power electronics interfaces; applications of electric machines and drives that are essential for wind turbines, electric and hybrid-electric; emphasis on vehicles; electric machines in context of overall drives and associated applications; space-vector theory used to analyze electric machines and drives; DC motor/generator characteristics and control; AC single phase and three-phase motor characteristics and feedback control, including AC synchronous and induction motors. Prerequisites: ENGR:2120 and PHYS:1611 and MATH:2560. Requirements: junior standing.
ECE:5450 Machine Learning
3 s.h.
Fundamentals of machine learning theory including regression, classification, neural networks, clustering, and principal component analysis; engineering applications. Prerequisites: ECE:2400 or BME:2200. Same as IGPI:5450.

## ECE:5455 Statistical Foundations of Inference and Machine

 LearningBasic strategies to cope with noise in measurements with three objectives at core of most machine learning tasks-hypothesis testing (where one must choose between various hypotheses), parameter estimation (where multiple parameters whose values define how a system will behave must be estimated from noisy measurements), and filtering (where a noisy music signal must be cleaned up); topics include probability and statistics, random variables and signals, hypothesis testing, parameter estimation, discrete- and continuoustime random processes, and optimal filtering; assignments, written exams, and projects. Prerequisites: STAT:2020 and ECE:2400.

## ECE:5460 Digital Signal Processing

3 s.h.
Theory, techniques used in representing discrete-time signals; system concepts in frequency and sampling domains; FIR and IIR digital filter theory, design and realization techniques; theory, application of discrete Fourier transforms/FFT. Prerequisites: ECE:3400. Same as IGPI:5460.

## ECE:5470 Medical Imaging Physics

3 s.h.
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210. Same as BME:5210, IGPI:5206.

## ECE:5480 Digital Image Processing

3 s.h.
Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image pre-processing, edge detection, filtering; image segmentation. Prerequisites: ECE:2400 or BME:2200. Same as IGPI:5480.

## ECE:5490 Multi-Dimensional Image Analysis Tools and Techniques

3 s.h.
Broad exposure to common tools of medical imaging analysis in commercial, clinical, and research settings, including algorithm development (using C+++ and ITK), rapid prototyping (SimpleITK, nipype, ipython notebook), statistical analysis (R), machine learning (scikit-learn, keras/tensorflow) and reproducible science tools (python, git, bash); special emphasis on big data challenges associated with volume, velocity, and veracity; real-world settings for problems include image-guided robotic surgery, dose treatment planning, and image analysis. Prerequisites: ECE:5480 and (ECE:3330 or CS:2820).

## ECE:5500 Digital Communications

Random processes, source coding, digital transmission at baseband, optimum receiver design for Gaussian noise, error probability and power spectrum analysis, signal design for bandlimited channels, digital carrier modulation, bandwidth/energy/error probability tradeoffs, coding for error detection and correction. Prerequisites: STAT:2020 and ECE:3500.

ECE:5520 Introduction to Information and Coding Theories $\mathbf{3}$ s.h. Quantitative measure of information; source encoding; error detecting codes; block and convolutional codes, design of hardware and software implementations; Viterbi decoding. Prerequisites: ECE:3500 and STAT:2020.

## ECE:5525 Cryptography

3 s.h.
Introduction to cryptography, steam ciphers and block ciphers, data encryption standards, public key cryptosystems, digital signatures, message authentication codes, hash functions, and key management. Prerequisites: MATH:2550 and ENGR:2730.

## ECE:5550 Internet of Things

3 s.h.
Internet of things (IoT) describes the evolution of the internet to intelligent devices, sensors, actuators, controllers, and other types of internet-enabled components; soon, IoT-based applications will enable seminal advances in a wide range of areas including health and lifestyle, transportation, smart cities, environment, energy, agriculture, and industry; topics include IoT logical and physical structure, IoT-enabled internet services, IoT devices/platforms/ endpoints, IoT application domains, IoT security and privacy issues, and IoT data analytic; case studies and projects focused on design and implementation of a working IoT application. Prerequisites: ENGR:2730. Requirements: background in computer networks or embedded systems.

## ECE:5600 Control Theory

 3 s.h.State space approach; controllability, observability, canonical forms, Luenberger observers, feedback control via pole placement, stability, minimal realization and optimal control. Prerequisites: ECE:3600.

## ECE:5620 Electric Power Systems

 3 s.h.Overview of electric power systems; single phase and three-phase representations of electric power signals and electromagnetic concepts; AC transmission lines and underground cables, power flow in a power system network, AC power transformers, High Voltage DC (HVDC) power transmission, electric power distribution, synchronous generators, voltage regulation and stability, power system transients and dynamic stability, control of interconnected power systems, transmission line faults, transient over-voltages and surge protection. Prerequisites: PHYS:1611 and ENGR:2120 and MATH:2560. Requirements: junior standing.
ECE:5630 Sustainable Energy Conversion
3 s.h.
Overview of sustainable energy conversion technologies; thermal energy conversion; Carnot and Rankine cycles; solar resource and raw energy availability, PV solar cell characteristics, solar panel construction, Maximum Power Point (MPP) tracking and utility grid interface; wind energy conversion resource and available energy, wind turbine configurations, electrical power interface electronics; ocean energy conversion tidal and wave resources and conversion technologies; tidal basin containment conversion and tidal current turbine systems. Prerequisites: ENGR:2120 and PHYS:1611 and MATH:2560. Requirements: junior standing.
ECE:5640 Computer-Based Control Systems 3 s.h.
Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisites: ECE:5600. Same as IGPI:5641.

ECE:5700 Advanced Electromagnetic Theory
3 s.h.
Time varying fields; plane wave propagation, reflection, refraction; waves in anisotropic media transmission lines, impedance matching, Smith chart; metallic and dielectric wave guides; resonators; antennas, antenna arrays. Prerequisites: ECE:3700.
ECE:5780 Optical Signal Processing 3 s.h.
Linear systems description of optical propagation; diffraction and angular plane wave spectrum; lenses as Fourier transformers, lens configurations as generalized optical processors; lasers, coherence, spatial frequency analysis; holography; convolvers, correlators, matched filters; synthetic aperture radar; optical computing. Requirements: for ECE:5780—ECE:3700; for PHYS:4820— PHYS:3812. Same as PHYS:4820.

## ECE:5790 Electro Optics

3 s.h.
Wave equation solutions; optical birefringence; finite beam propagation in free space, dielectric waveguides and fibers; optical resonators; nonlinear phenomena; electro-optic, acousto-optic modulation; optical detection, noise; application to communication systems. Requirements: for ECE:5790—ECE:3700; for PHYS:4726— PHYS:3812. Same as PHYS:4726.

ECE:5800 Fundamentals of Software Engineering
Problem analysis, requirements definition, specification, design, implementation, testing/maintenance, integration, project management; human factors; management, technical communication; design methodologies; software validation, verification; group project experience. Prerequisites: CS:2820 or ECE:3330. Same as CS:5800.

ECE:5810 Formal Methods in Software Engineering 3 s.h.
Models, methods, and their application in all phases of software engineering process; specification methods; verification of consistency, completeness of specifications; verification using tools. Prerequisites: ECE:3330 or CS:2820. Recommendations: CS:4350. Same as CS:5810.

ECE:5820 Software Engineering Languages and Tools 3 s.h. Modern agile software development practices for cloud and webbased applications, using state-of-the-art software engineering languages, tools, and technologies; agile software development practices, software-as-a-service (SAAS), and the Ruby on Rails Development Framework. Prerequisites: ECE:3330 or CS:2820. Same as CS:5820.

## ECE:5830 Software Engineering Project

Team software development project using concepts and methodologies learned in earlier software engineering classes; practical aspects of large-scale software development. Prerequisites: ECE:5820. Same as CS:5830.
ECE:5840 Software Security
3 s.h.
Principles of computer security with emphasis on software development and deployment; cryptographic tools, authentication, access control, database and datacenter security, malicious software, denial of service attacks, firewalls, intrusion detection and prevention, buffer overflow attacks, and software and operating system security; case study investigations using hands-on tools. Prerequisites: ECE:3330 or CS:2820.

## ECE:5845 Modern Databases 3 s.h.

Introduction to contemporary database architectures including relational, key-value, document-store, and graph databases; SQL, normalization; NoSQL models; relative strengths and weaknesses of database architectures; enterprise scalability issues; projects involving use of modern database systems (e.g., Postgres/MySQL, Redis, MongoDB, Neo4J). Prerequisites: ENGR:2730 or CS:2230.

## ECE:5995 Contemporary Topics in Electrical and Computer Engineering

New topics or areas of study not offered in other electrical and computer engineering courses; based on faculty/student interest; not available for individual study.

## ECE:5998 Individual Investigations: Electrical and Computer Engineering arr.

Individual projects for electrical and computer engineering graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

## ECE:5999 Research: Electrical and Computer Engineering MS

 Thesisarr.
Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for MS degree with thesis in electrical and computer engineering. Requirements: graduate standing.
ECE:7470 Image Analysis and Understanding 3 s.h.
Mathematical foundations and practical techniques of digital image analysis and understanding; image segmentation (from edges and regions), object description (from boundaries, regions, scale, scale insensitive descriptions, 3D shape, texture) pattern recognition (statistical and syntactic methods, cluster analysis), image understanding (knowledge representation, control strategies, matching, context, semantics), image analysis and understanding systems; lab arranged. Prerequisites: ECE:5480. Same as IGPI:7470.

3 s.h.
3 s.h. ECE:7480 Advanced Digital Image Processing 3 s.h.
Advanced local operators (scale-space imaging, advanced edge detection, line and corner detection), image morphology (binary/ gray scale operators, morphological segmentation and watershed), digital topology and geometry (binary/fuzzy digital topology, distance functions, skeletonization), color spaces, wavelets and multiresolution processing (Haar transform, multi-resolution expansions, wavelet transforms in one or two dimensions, fast wavelet transform, wavelet packets), image registration (intensity correlation, mutual information, and landmark-based deformable registration methods). Prerequisites: ECE:5460 and ECE:5480. Same as IGPI:7480.

## ECE:7720 Semiconductor Physics <br> 3 s.h.

Electronic, optical, and materials properties of semiconductors. Prerequisites: PHYS:4728 and PHYS:5742. Same as PHYS:7720.

## ECE:7930 Seminar: Plasma Physics

arr.
Current research. Same as PHYS:7930.
ECE:7999 Research: Electrical and Computer Engineering PhD
Thesis
arr.
Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for PhD in electrical and computer engineering.

## Computer Science and Engineering, BSE

The Bachelor of Science in Engineering (BSE) program in computer science and engineering combines the technical content of a computer science degree and a computer engineering degree in a single degree program. The program curriculum is jointly taught by faculty from the Department of Electrical and Computer Engineering and the Department of Computer Science (College of Liberal Arts and Sciences). The program provides students with a strong theoretical and conceptual understanding of the principles underlying computer software and hardware along with the engineering analysis, design, and multidisciplinary teamwork skills needed to develop large and complex systems containing both software and hardware components.
The computer science and engineering program encompasses the technical rigor of a Bachelor of Science program in computer science and a Bachelor of Science program in computer engineering. This major is jointly accredited in computer science and computer engineering by the Accreditation Board for Engineering and Technology (ABET). Graduates gain the foundational knowledge provided by a computer science education together with the critical thinking, problem-solving, and system design skills at the heart of a computer engineering curriculum.

The major provides technical depth and breadth as well as flexibility and the opportunity for students to customize their programs according to their own goals and interests. Students choose one of several focus areas according to the type of job or research they plan to pursue; students also have the opportunity to work with their academic advisor to build a focus area plan that adheres to their goals and interests. Students select a focus area to personalize their curriculum and to prepare them for certain jobs or research study they intend to seek.

In their senior year, students complete a two-semester capstone design sequence culminating in the development and implementation of a significant, original project. The capstone design experience emphasizes teamwork, professionalism, open-ended problem solving, and the ability to work within real-world constraints and engineering standards.

## Educational Objectives

Graduates of the computer science and engineering program will:

- exhibit leadership and vision in contributing to the computingrelated technical and policy decisions of industry, government, and research enterprises;
- demonstrate computing skills and problem-solving abilities that permit them to contribute in a variety of technical, business, and academic careers;
- thrive in diverse, global, and multidisciplinary environments;
- possess the ability to communicate effectively and participate collaboratively in interactions with other computing and engineering professionals; and
- understand the importance of participating in lifelong learning activities that enhance their professional and personal development.

## Requirements

The Bachelor of Science in Engineering (BSE) with a major in computer science and engineering requires a minimum of 128 s.h. of credit, plus one 1 s.h. departmental seminar. At the time of graduation, students must have a cumulative grade-point average of at least 2.00
in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1448] in the catalog. Students completing the major in computer science and engineering fulfill the collegiate statistics requirement by completing STAT:2020 Probability and Statistics for the Engineering and Physical Sciences.

The major in computer science and engineering includes ECE:3000 Electrical and Computer Engineering Professional Seminar, typically taken in the third year.

The major in computer science and engineering requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Collegiate Curriculum | 50 |
| Major Requirements | 58 |
| Focus Area | 20 |

## Major Requirements

Major requirements include a set of common courses (52 s.h.) and two capstone design courses ( 6 s.h.).

## Common Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| ECE:2400 | Linear Systems I | 3 |
| ECE:2410 | Principles of Electronic | 4 |
|  | Instrumentation | 3 |
| ECE:3320 | Introduction to Digital Design | 3 |
| ECE:3330 | Introduction to Software Design | 3 |
| ECE:3350 | Computer Architecture and |  |
|  | Organization | 3 |
| ECE:3360 | Embedded Systems | 3 |
| ECE:3540 | Communication Networks | 4 |
| CS:1210 | Computer Science I: |  |
|  | Fundamentals | 3 |
| CS:2210 | Discrete Structures | 4 |
| CS:2230 | Computer Science II: Data |  |
| CS:3330 | Structures | 3 |
| CS:3620 | Algorithms | 3 |
| CS:3820 | Operating Systems | 3 |
| ENGR:2120 | Programming Language |  |
| ENGR:2730 | Concepts | 3 |
| PHYS:1612 | Electrical Circuits | Computers in Engineering |

## Capstone Design Courses

In their senior year, students complete a two-semester capstone design sequence culminating in the development and implementation of a significant, original project.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Principles of Electrical and <br> Computer Engineering Design | 3880 | | Senior Electrical and Computer |
| :--- |
| Engineering Design |$\quad 3$

## Focus Area

Students must select focus area courses according to guidelines established by the Department of Electrical and Computer Engineering. A number of established focus areas are available, and students also may work with their academic advisor to create a customized plan tailored to their goals and interests.
Students complete a minimum of 17 s.h. in elective courses for the focus area (typically six courses) and one complementary theory elective course ( 3 s.h.). Carefully selected elective and general education courses may contribute to earning a minor and/or certificate, including the Certificate in Sustainability [p. 2102] (University College) or the Certificate in Technological Entrepreneurship [p. 1588].

For a complete list of focus areas and course selection guidelines, see Focus Areas on the Department of Electrical and Computer Engineering website. Although general guidelines and requirements for elective courses are listed below, course recommendations for specific focus areas differ. While some courses may apply to more than one focus area requirement, a single course may only count once toward completing a focus area.

## Electrical and Computer Engineering Electives

Students choose two focus area electives from courses with prefix ECE not already required for the major. Students must consult an academic advisor and gain approval from the undergraduate curriculum chair to count ECE:5998 Individual Investigations: Electrical and Computer Engineering toward this requirement.

| Course \# Title | Hours |
| :--- | ---: |
| Both of these: |  |
| Technical course in the Department of Electrical and | $3-4$ |
| Computer Engineering numbered ECE:3400 or above, |  |
| excluding ECE:3998, ECE:5000, and ECE:5999 | 3 |
| Advanced course in the Department of Electrical and |  |
| Computer Engineering numbered ECE:5001-ECE:5995 |  |

## Computer Science Electives

Students choose two focus area electives from computer science courses not already required for the major. At least one course must be considered advanced for the elective (numbered CS:4330 and above), as defined in the table below.

Students may be able to complete computer science courses not listed here; students should consult an academic advisor and see Approved Computer Science Elective Courses on the Department of Electrical and Computer Engineering website for more information.

| Course \# | Title | Hours |
| :--- | ---: | ---: |
| Two of these: |  | 3 |
| CS:3700/MATH:3800 Introduction to Numerical |  |  |
| Methods |  |  |$\quad 3-4$

## Additional Electives

Students select additional courses to reach a minimum of 17 s.h. in focus area electives. Courses may be from the electrical and computer engineering (prefix ECE) or computer science (prefix CS) categories above, or they may be chosen from outside of those lists with approval of an academic advisor.

## Theory Elective

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  | 3 |
| ECE:5330/IGPI:5331 | Graph Algorithms and <br> Combinatorial Optimization | 3 |
| ECE:5450/IGPI:5450 | Machine Learning | 3 |
| ECE:5520 | Introduction to Information and |  |
| Coding Theories | 3 |  |
| ECE:5525 | Cryptography | 3 |
| ECE:5810/CS:5810 | Formal Methods in Software | 3 |
| CS:4330 | Engineering | 3 |
| CS:4350 | Theory of Computation | 3 |
| CS:4720/MATH:4820 | Logic in Computer Science | 3 |
| CS:5340 | Limits of Computation | 3 |
| CS:5360 | Randomized Algorithms | 3 |
| CS:5370 | Computational Geometry | 3 |
| CS:5430 | Machine Learning | 3 |
| CS:5620 | Distributed Systems and | 3 |
| CS:5850 | Algorithms | 3 |
| CS:5860 | Programming Language | 3 |
|  | Foundations | 3 |

## Double Major in Computer Science and Engineering/Electrical Engineering

Students may earn a double major in computer science and engineering (CSE) and electrical engineering (EE). They must satisfy all requirements of the electrical track of the EE major and all requirements of the CSE major.

## Combined Programs

## BSE/MS in Electrical and Computer Engineering

The College of Engineering offers a Bachelor of Science in Engineering/Master of Science for computer science and engineering undergraduate students who intend to earn an MS in electrical and computer engineering. BSE/MS students may take up to 12 s.h. of graduate-level coursework and do thesis-level research while they are still undergraduates. They may count 9 s.h. of graduate coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the BSE, and they normally complete the MS one year later.

To be admitted to the degree program, students must have completed at least 80 s.h., must have a cumulative grade-point average of at least 3.25, and must submit a letter of application to the chair of the Department of Electrical and Computer Engineering. For more information, see Joint BS/MS Degree Program Undergraduate to Graduate (U2G) on the Department of Electrical and Computer Engineering website.

## BSE/MCS

The College of Engineering and the Department of Computer Science (College of Liberal Arts and Sciences) offer a combined Bachelor of Science in Engineering/Master of Computer Science for computer science and engineering undergraduate students.

The combined degree program allows students to count a limited amount of credit toward both degrees. For more information, see the Master of Computer Science, MCS [p. 323] in the catalog.

## Career Advancement

Students who earn a major in computer science and engineering work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, television, and power industries, and many graduates pursue entrepreneurial ventures.

The major also prepares students for further study in many areas demanding computational and engineering skill sets.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Computer Science and Engineering, BSE

a Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change. b Enrollment in math courses requires completion of a placement exam.
c Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.
d Enrollment in chemistry courses requires completion of a placement exam.
e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
f See General Catalog for list of approved course subjects.
g Students select a course from one of two GE CLAS Core areas: Diversity and Inclusion or Values and Culture.
h See General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI.
i Students choose two focus area electives from computer science courses not already required for the major. At least one course must be considered advanced for the elective; see General Catalog for criteria. See the Department of Electrical and Computer Engineering website or consult an advisor for more information.
j Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
k Students select additional courses to reach a minimum of 17 s.h. in focus area electives. See General Catalog, the Department of Electrical and Computer Engineering website, or consult an advisor for more information.
1 Students choose two focus area electives from courses with prefix ECE not already required for the major. One must be a course numbered 3400 or above. At least one of the two must be numbered between 5001-5995. Students must consult an academic advisor and gain approval from the undergraduate curriculum chair to count ECE:5998 toward this requirement. See General Catalog, the Department of Electrical and Computer Engineering website, or consult an advisor for more information.
mSee General Catalog for list of approved courses. Specific recommendations vary based on focus area.
n Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Electrical Engineering, BSE

Electrical engineers develop technologies and systems for a wide variety of applications ranging from telecommunications to medical imaging. They play a central role in the design and implementation of any technology that is powered by electricity as well as the generation and distribution of electric power. Topics covered in the electrical engineering curriculum include: design of electronic circuits, communication systems, control systems, and semiconductor devices. Students may opt to specialize in any of these areas as well as others that include electrical power generation and distribution, medical image processing, computer systems, or design of micro- and nanoscale optical and electronic devices.
The major provides technical depth and breadth as well as flexibility and the opportunity for students to customize their programs according to their own goals. Students choose one of several focus areas according to the type of job or research they plan to pursue. More than 20 focus areas are available; see Focus Areas on the Department of Electrical and Computer Engineering website. Students also have the opportunity to work with their academic advisor to build a focus area plan that adheres to their goals and objectives. Focus areas allow students to personalize their curriculum and to prepare them for the jobs or research they intend to pursue.
In their senior year, students complete a two-semester capstone design sequence culminating in a significant, original project.

## Educational Objectives

Graduates of the electrical engineering program will:

- exhibit leadership and vision in contributing to the technical and policy decisions of industry, government, and research enterprises;
- demonstrate problem-solving abilities that permit them to contribute in a variety of technical, business, and academic careers;
- thrive in diverse, global, and multidisciplinary environments;
- possess the ability to communicate effectively and participate collaboratively in interactions with engineers and other professionals; and
- understand the importance of participating in lifelong learning activities that enhance their professional and personal development.

## Requirements

The Bachelor of Science in Engineering (BSE) with a major in electrical engineering requires a minimum of 128 s.h. of credit. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.
The curriculum is built on a common core of electrical and computer engineering courses taken by all students. Beginning in their sophomore year, students select either the electrical or computer curricular track and begin taking more specialized courses. The electrical track is intended to provide a broad background in electrical engineering concepts and practice that prepares students for graduate study or electrical engineering careers in a wide range of industries and organizations. The computer track provides focus and depth for students preparing for graduate study, or a career in computer hardware or software engineering. Students begin taking track and focus area elective courses in their third year.
All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor
of Science in Engineering, BSE [p. 1448] in the catalog. Students completing the major in electrical engineering fulfill the collegiate statistics requirement by completing STAT:2020 Probability and Statistics for the Engineering and Physical Sciences.

The major in electrical engineering requires the following coursework. Students pursuing the computer track complete 52 s.h. in major requirements and 26-27 s.h. in a focus area. Students pursuing the electrical track complete 55 s.h. in major requirements and 23-24 s.h. in a focus area.

| Requirements | Hours |
| :--- | :--- |
| Collegiate Curriculum | 50 |
| Major Requirements, including chosen track | $52-55$ |
| Focus Area | $23-27$ |

## Major Requirements

Major requirements include a set of common courses ( 29 s.h.), required courses within one of two tracks ( $16 \mathrm{~s} . \mathrm{h}$. in the computer track, 19 s.h. in the electrical track), one departmental seminar (1 s.h.), and two capstone design courses ( 6 s.h.).

## Common Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| ECE:2400 | Linear Systems I | 3 |
| ECE:2410 | Principles of Electronic | 4 |
|  | Instrumentation | 3 |
| ECE:3320 | Introduction to Digital Design | 3 |
| ECE:3360 | Embedded Systems | 3 |
| ECE:3700 | Electromagnetic Theory | 3 |
| ENGR:2120 | Electrical Circuits | 3 |
| ENGR:2730 | Computers in Engineering | 3 |
| MATH:3550 | Engineering Mathematics V: |  |
|  | Vector Calculus | 4 |
| PHYS:1612 | Introductory Physics II (with |  |

## Tracks

Beginning in the second year of study, students select either the electrical or computer curricular track and begin taking more specialized courses. The options for breadth and depth courses in the focus area are in part informed by the track a student is completing; see "Focus Area" below.

## Computer Track Required Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| ECE:3330 | Introduction to Software Design | 3 |
| ECE:3350 | Computer Architecture and <br> Organization | 3 |
| CS:2210 | Discrete Structures | 3 |
| CS:2230 | Computer Science II: Data |  |
| CS:3330 | Structures | 4 |
|  | Algorithms | 3 |

## Electrical Track Required Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| ECE:3400 | Linear Systems II | 3 |
| ECE:3410 | Electronic Circuits | 4 |
| ECE:3500 | Communication Systems | 3 |

| ECE:3600 | Control Systems | 3 |
| :--- | :--- | :--- |
| ECE:3720 | Semiconductor Devices | 3 |
| PHYS:2704 | Physics IV | 3 |

## Departmental Seminar

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| ECE:3000 | Electrical and Computer | 1 |
|  | Engineering Professional |  |

## Capstone Design Courses

In their final year of study, students complete a two-semester capstone design sequence culminating in the development and implementation of a significant, original project. The capstone design experience emphasizes teamwork, professionalism, open-ended problem solving, and the ability to work within real-world constraints and engineering standards.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Principles of Electrical and <br> ECE: 4880 | Computer Engineering Design |
| ECE: 4890 | Senior Electrical and Computer <br> Engineering Design | 3 |

## Focus Area

Students must select focus area courses according to guidelines established by the Department of Electrical and Computer Engineering. A number of established focus areas are available, and students also may work with their academic advisor to create a customized plan tailored to their goals and objectives. Focus areas allow students to personalize their curriculum and to prepare them for the jobs or research they intend to pursue.
Focus areas in the electrical engineering major consist of one breadth elective (3-4 s.h.), one depth elective (3 s.h.), two Department of Electrical and Computer Engineering courses (prefix ECE) numbered above 5000 ( 6 s.h.), two technical electives that align with the focus area ( $6-7$ s.h.), and additional elective courses ( 5 s.h.). Students completing the computer track take an additional elective course (34 s.h.) in the Department of Electrical and Computer Engineering (prefix ECE); see "Additional Electives" below.

The options for breadth and depth courses in the focus area are in part informed by the track a student is completing-computer or electrical. Carefully selected elective and general education courses may contribute to earning a minor and/or certificate, including the Certificate in Sustainability [p. 2102] (University College) or the Certificate in Technological Entrepreneurship [p. 1588] (College of Engineering). Students who take an additional advanced math course meet the requirements for a minor in mathematics [p. 788] (College of Liberal Arts and Sciences). Students on the computer track who take an additional approved computer science course (prefix CS) meet the requirements for a minor in computer science [p. 321] (College of Liberal Arts and Sciences).

For a complete list of focus areas and course selection guidelines, see Focus Areas on the Department of Electrical and Computer Engineering website. Although general guidelines and requirements for elective courses are listed below, course recommendations for specific focus areas differ. While some courses may apply to more than one focus area requirement, a single course may only count once toward completing a focus area.

## Breadth Elective

Students in the computer track must choose their breadth elective from the list of required electrical track courses. Students in the electrical track must choose their breadth elective from the list of required computer track courses. See "Tracks" above. Students in either track may instead use ECE:3540 Communication Networks as their breadth elective.

## Depth Elective

The depth elective must be an advanced course, normally numbered 4000 or above, in a subject area within a student's track.

## Computer Track

Options for the computer track include the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ECE:5320/CS:5610 | High Performance Computer | 3 |
|  | Architecture | 3 |
| ECE:5450/IGPI:5450 | Machine Learning | 3 |
| ECE:5460/IGPI:5460 | Digital Signal Processing | 3 |
| ECE:5480/IGPI:5480 | Digital Image Processing | 3 |
| ECE:5525 | Cryptography | 3 |
| ECE:5800/CS:5800 | Fundamentals of Software | 3 |
| ECE:5810/CS:5810 | Engineering |  |
|  | Formal Methods in Software | 3 |
| ECE:5840 | Engineering | 3 |
| ECE:5845 | Modern Databases | 3 |
| CS:4400 | Database Systems | 3 |
| CS:4420 | Artificial Intelligence |  |

## Electrical Track

Options for the electrical track include the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ECE:5320/CS:5610 | High Performance Computer | 3 |
|  | Architecture | 3 |
| ECE:5410 | Advanced Circuit Techniques | 3 |
| ECE:5415 | Radio Frequency Electronics | 3 |
| ECE:5455 | Statistical Foundations of |  |
|  | Inference and Machine Learning | 3 |
| ECE:5480/IGPI:5480 | Digital Image Processing | 3 |
| ECE:5500 | Digital Communications | 3 |
| ECE:5600 | Control Theory | 3 |
| ECE:5620 | Electric Power Systems | 3 |
| ECE:5640/IGPI:5641 | Computer-Based Control |  |
| ECE:5700 | Systems | 3 |
|  | Advanced Electromagnetic |  |

## Advanced Electrical and Computer Engineering Electives

Students complete at least two Department of Electrical and Computer Engineering courses (prefix ECE) numbered above 5000. Specific recommendations vary based on focus area.

## Additional Electives

Students select additional courses from the focus area categories above or from a list of suggested electives for their specific focus area. Additional electives for students pursuing the computer track total at least 14 s.h. (typically five courses) while electrical track electives total at least 11 s.h. (typically four courses).

Students may select courses in the Department of Electrical and Computer Engineering (prefix ECE) not already taken for the major. Courses not listed here may be able to count toward the focus area requirements; students should consult an academic advisor.

While course recommendations for specific focus areas differ, the following is a list of potential elective courses for either track.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| ACCT:2100 | Introduction to Financial Accounting | 3 |
| ACCT:2200 | Managerial Accounting Analytics and Data Visualization | 3 |
| BUS:2013/ <br> GEOG:2013/ <br> SUST:2013/ <br> URP:2013 | Introduction to Sustainability | 3 |
| CEE:4107/CBE:4410 | Sustainable Systems | 3 |
| CHEM:1120 | Principles of Chemistry II | 4 |
| CHEM:2220 | Organic Chemistry II | 3 |
| CHEM:2410 | Organic Chemistry Laboratory | 3 |
| ENGR:2130 | Thermodynamics | 3 |
| ENTR:2000 | Entrepreneurship and Innovation | 3 |
| ENTR:3100 | Entrepreneurial Finance | 3 |
| ISE:2500 | Engineering Economy | 3 |
| ISE:4172 | Big Data Analytics | 3 |
| MATH:3800/CS:3700 | Introduction to Numerical Methods | 3 |
| MATH:4040 | Matrix Theory | 3 |
| MATH:4200 | Complex Variables | 3 |
| STAT:4143/ PSQF:4143 | Introduction to Statistical Methods | 3 |
| STAT:4520/ <br> IGPI:4522/ <br> PSQF:4520 | Bayesian Statistics | 3 |
| STAT:4580/ <br> DATA:4580/ <br> IGPI:4580 | Data Visualization and Data Technologies | 3 |

## Double Major in Electrical Engineering/ Computer Science and Engineering

Students may earn a double major in electrical engineering (EE) and computer science and engineering (CSE). They must satisfy all requirements of the electrical track of the EE major and all requirements of the CSE major.

## Combined Programs

## BSE/MS in Electrical and Computer Engineering

The College of Engineering offers a Bachelor of Science in Engineering/Master of Science for electrical engineering undergraduate students who intend to earn a MS in electrical and computer engineering. BSE/MS students may take up to $12 \mathrm{~s} . \mathrm{h}$. of graduate-level coursework and do thesis-level research while they are still undergraduates. They may count 9 s.h. of graduate coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the BSE, and they normally complete the MS one year later.

To be admitted to the degree program, students must have completed at least 80 s.h., must have a cumulative grade-point average of at least 3.25, and must submit a letter of application to the chair of the Department of Electrical and Computer Engineering. For more information, see Joint BS/MS Degree Program Undergraduate to Graduate (U2G) on the Department of Electrical and Computer Engineering website.

## Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors consistently rank among the top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). Electrical engineers find employment everywhere smart technology is employed. On average, 93-98\% of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.
Electrical engineers work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, television, and power industries.
Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other careerdevelopment programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

g See General Catalog for list of approved course subjects.
h Students select a course from one of two GE CLAS Core areas: Diversity and Inclusion or Values and Culture.
i See General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI.
j Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
k Students in the computer track complete two technical electives that align with the focus area (6-7 s.h.), one elective with prefix ECE (3-4 s.h.), and two additional electives ( 5 s.h.). Additional electives may be selected from the breadth, depth, or ECE elective lists or from a list of suggested electives for the specific focus area. Consult the Department of Electrical and Computer Engineering website or an academic advisor for more information.
1 Students in the computer track take ECE:3540 or choose their track breadth elective from the list of required electrical track courses. Specific recommendations vary based on focus area. See General Catalog for full list of approved courses; see Department of Electrical and Computer Engineering website or consult an advisor for more information about your specific focus area.
mStudents complete at least two courses with prefix ECE numbered above 5000. Specific recommendations vary based on focus area. Consult the Department of Electrical and Computer Engineering website or an academic advisor for more information.
n The depth elective must be an advanced course, normally numbered 4000 or above, in a computer-related subject area; it is typically an ECE course. Specific recommendations vary based on focus area.

See Department of Electrical and Computer Engineering website or consult an advisor for more information.
o Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

a Students in the electrical track complete eight focus area courses including: one breadth elective (3-4 s.h.); one depth elective (3 s.h.); two courses with prefix ECE numbered above 5000 ( 6 s.h.); two technical electives ( 6 s.h.); and two additional elective courses (at least 5 s.h.). See General Catalog and Department of Electrical and Computer Engineering website or consult an advisor for more information.
b Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change.
c Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.
d Enrollment in math courses requires completion of a placement exam.
e Enrollment in chemistry courses requires completion of a placement exam.
f Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
g See General Catalog for list of approved course subjects.
h Students select a course from one of two GE CLAS Core areas: Diversity and Inclusion or Values and Culture.
i Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
j Students in the electrical track complete two technical electives that align with the focus area (6-7 s.h.) and two additional electives (5 s.h.). Additional electives may be selected from the breadth, depth, or ECE elective lists or from a list of suggested electives for the specific focus area. Consult the Department of Electrical and Computer Engineering website or an academic advisor for more information.
k See General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI.
1 Students complete at least two courses with prefix ECE numbered above 5000. Specific recommendations vary based on focus area. Consult the Department of Electrical and Computer Engineering website or an academic advisor for more information.
mStudents in the electrical track take ECE:3540 or choose their track breadth elective from the list of required computer track courses. Specific recommendations vary based on focus area. See General Catalog for full list of approved courses; see Department of Electrical and Computer Engineering website or consult an advisor for more information about your specific focus area.
n The depth elective must be an advanced course, normally numbered 4000 or above, in an electrical-related subject area; it is typically an ECE course. Specific recommendations vary based on focus area. See Department of Electrical and Computer Engineering website or consult an advisor for more information.
o Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

# Electrical and Computer Engineering, MS 

The Department of Electrical and Computer Engineering stimulates excellence in scholarship and research through close contact with the faculty and programs tailored to fit students' individual needs.
Students select an advisor and, with the advisor, plan an individual program bounded only by the broad guidelines of the Graduate College and the program. The department maintains close interdisciplinary ties with other University of Iowa departments, especially with the departments of Physics and Astronomy and Computer Science (College of Liberal Arts and Sciences); the Roy J. Carver Department of Biomedical Engineering and the departments of Industrial and Systems Engineering and Mechanical Engineering (College of Engineering); and the Carver College of Medicine. Principal areas of graduate study include medical image analysis, signal and image processing, control systems and systems theory, wireless communications, waves and materials, computer systems, and computational genomics. View principal areas of study under Research and Study Areas [p. 1525] in the Electrical and Computer Engineering section of the catalog.

## Learning Outcomes

Students will:

- demonstrate a broad knowledge of electrical and computer engineering topics;
- be able to analyze electrical and computer engineering problems and apply their knowledge to solve them; and
- demonstrate professional skills of effective communication and ethical conduct in professional, social, and scholarly activities.

In addition to the learning outcomes listed above, students who complete a thesis will:

- demonstrate a mastery of concepts in their specific area of study;
- be able to employ experimental methods to investigate and generate reports for research-oriented problems; and
- demonstrate leadership in professional, social, and scholarly activities.

## Requirements

The Master of Science program in electrical and computer engineering requires 30 s.h. of graduate credit with or without thesis. Either option may precede PhD study. MS students must maintain a cumulative grade-point average of at least 3.00.
Thesis students must complete at least 12 s.h. from an approved list of electrical and computer engineering courses and 6 s.h. in ECE:5999 Research: Electrical and Computer Engineering MS Thesis. Nonthesis students must complete at least 18 s.h. from an approved list of electrical and computer engineering courses; they may count no more than 3 s.h. of independent study toward the degree. For a list of approved courses, see the Department of Electrical and Computer Engineering Graduate Handbook on the department's Graduate Program Information website. Courses required for the BSE in electrical engineering do not count toward the MS requirements.

Students who plan to satisfy thesis requirements must successfully complete a final examination, which is conducted by a committee of at least three faculty members. The final examination consists of an oral defense of the thesis.

## Software Engineering Subprogram

A software engineering subprogram is available to both thesis and nonthesis students. Both thesis and nonthesis options require a minimum of 30 s.h. of graduate credit. All rules for additional credit and the MS final examination are the same as for the MS without the subprogram. Successful completion of the subprogram results in a degree designation that specifies the software engineering subprogram on a student's transcript.

The software engineering subprogram requires the following coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ECE:5320 | High Performance Computer <br> Architecture | 3 |
| ECE:5330 | Graph Algorithms and <br> Combinatorial Optimization | 3 |
| ECE:5800 | Fundamentals of Software <br> Engineering | 3 |
| ECE:5810 | Formal Methods in Software <br> Engineering | 3 |
| ECE:5830 | Software Engineering <br> Languages and Tools | 3 |

In addition to the courses listed above, thesis students complete another 3 s.h. of approved coursework and 6 s.h. in ECE:5999 Research: Electrical and Computer Engineering MS Thesis; nonthesis students complete another 9 s.h. of approved coursework. Students who complete one or more required courses as an undergraduate can substitute courses from the list of approved electrical and computer engineering courses; see the list of approved courses in the Department of Electrical and Computer Engineering Graduate Handbook on the department's Graduate Program Information website.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
Applicants must have a grade-point average (GPA) of at least 3.00 on all electrical and computer engineering, mathematics, and physics coursework. Those with a GPA between 2.75 and 3.00 in electrical and computer engineering, mathematics, and physics coursework may be admitted on probation, if warranted by other aspects of their academic records.

Students with baccalaureate degrees in related areas (e.g., physics, mathematics, and computer science) may be admitted on conditional status. They may be required to complete additional coursework, without earning graduate credit, before being granted regular status.
Each application is reviewed individually. Extenuating circumstances may permit deviations from the usual standards.

## Financial Support

A number of fellowships, traineeships, assistantships, scholarships, and industrial grants are available to graduate students who qualify. These are awarded on a competitive basis.

## Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Electrical engineers find employment everywhere smart technology is
employed. On average, $93-98 \%$ of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other careerdevelopment programming each semester.
Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

# Electrical and Computer Engineering, PhD 

The Department of Electrical and Computer Engineering stimulates excellence in scholarship and research through close contact with the faculty and programs tailored to fit students' individual needs.
Students select an advisor and, with the advisor, plan an individual program bounded only by the broad guidelines of the Graduate College and the program. The department maintains close interdisciplinary ties with other University of Iowa departments, especially with the departments of Physics and Astronomy and Computer Science (College of Liberal Arts and Sciences); the Roy J. Carver Department of Biomedical Engineering and the departments of Industrial and Systems Engineering and Mechanical Engineering (College of Engineering); and the Carver College of Medicine. Principal areas of graduate study include medical image analysis, signal and image processing, control systems and systems theory, wireless communications, waves and materials, computer systems, and computational genomics. View principal areas of study under Research and Study Areas [p. 1525] in the Electrical and Computer Engineering section of the catalog.

## Learning Outcomes

Graduates will:

- demonstrate a detailed knowledge of electrical and computer engineering topics and a mastery of advanced concepts within their specific area of study;
- master the analytical and methodological skills needed to identify, evaluate, and analyze novel discovery in their areas of specialization;
- be able to employ experimental methods to investigate and generate reports for research-oriented problems; and
- demonstrate professional skills, including concise and effective communication of complex technical ideas to both general and specialized audiences through verbal, visual, and written formats; leadership in their field of study; and ethical conduct in professional, social, and scholarly activities.

## Requirements

The Doctor of Philosophy program in electrical and computer engineering requires a minimum of 72 s.h. of graduate credit. At least 45 s.h. must be earned in formal coursework (not in thesis work or other independent study), including 30 s.h. from an approved list of electrical and computer engineering courses. For the list of approved courses, see the Department of Electrical and Computer Engineering Graduate Handbook on the department's Graduate Program Information website. Each student's study plan must be approved by the student's advisor and by the graduate committee. Students must maintain a cumulative grade-point average (GPA) of 3.25 or higher in all graduate coursework.

Students take a qualifying examination and a comprehensive examination. Then they must successfully complete a research program that includes a minimum of 18 s.h. of PhD research and culminates in the preparation of a thesis. Finally, the candidate must present a successful oral defense of the thesis.

## Qualifying Process

Acceptance to the PhD program requires successful completion of the PhD qualifying process. The qualifying process consists of two parts-an examination and a course breadth requirement. The halfday written exam is given once a year, late in the spring semester. It
covers two subjects chosen by a student from a list of nine. Students normally are expected to take the qualifying examination within the first 30 s.h. of their graduate studies. A cumulative GPA of at least 3.25 is required for admittance to the exam. Students who fail the examination may retake it only once the next time it is offered.
To complete the breadth requirement, students must take two courses associated with the same list of nine subjects that the examination is drawn from and complete the courses with grades of at least A-minus. The breadth courses must not duplicate the subjects chosen for the examination and must be completed within the fourth semester of graduate study.

## Comprehensive Examination

Following successful completion of the qualifying examination and invitation to the PhD program, a student must complete the twopart comprehensive examination. The first part is a written research proposal that includes a thorough literature survey providing the motivation and background for the proposal. The second part is an oral examination.
Students must pass the qualifying examination before they may take the comprehensive exam, and they must complete the comprehensive exam no later than three calendar years after passing the qualifying exam. Students who fail to meet this deadline must retake the qualifying exam. The qualifying exam and the comprehensive exam may not be taken in the same semester.

## Thesis

The final requirement for completion of the PhD program is the preparation and successful defense of the thesis. This must be completed no sooner than six months but no longer than three years after completion of the comprehensive examination.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must have a grade-point average of at least 3.25 on all electrical and computer engineering, mathematics, and physics coursework.

Each application is reviewed individually. Extenuating circumstances may permit deviations from the usual standards.

## Financial Support

A number of fellowships, traineeships, assistantships, scholarships, and industrial grants are available to graduate students who qualify. These are awarded on a competitive basis.

## Career Advancement

Engineering is a well-respected profession that is used as a foundation for a variety of careers in industry, medicine, law, government, and consulting.
Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester. Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

# Industrial and Systems Engineering 

## Chair

- Yong Chen

Undergraduate major: industrial engineering (BSE)
Graduate degrees: MS in industrial engineering; PhD in industrial engineering
Faculty: https://engineering.uiowa.edu/people/ise-people
Website: https://engineering.uiowa.edu/ise
The Department of Industrial and Systems Engineering offers undergraduate and graduate degrees and research programs in industrial and systems engineering.
Industrial and systems engineering encompasses analysis, design, and implementation of systems through optimal use of resources-human, material, energy, information, and financial. Systems may range from small units to extremely large operations. The industrial engineer must be skilled in mathematics, physical sciences, management, and human relations; and understands and designs solutions for the complexities of manufacturing, computer systems, economics, optimization, human behavior, and systems analysis and design.

## Programs

Undergraduate Program of Study

## Major

- Major in Industrial Engineering (Bachelor of Science in Engineering) [p. 1550]

## Graduate Programs of Study

- Doctor of Philosophy in Industrial Engineering [p. 1559]

## Facilities

The following facilities and laboratories are operated by faculty in the Department of Industrial and Systems Engineering, and may employ undergraduate and graduate students. For information about laboratories affiliated with core courses coordinated by other College of Engineering departments, see those departmental catalog sections.

## Additive Manufacturing-Integrated Product Realization Laboratory

Researchers at Additive Manufacturing-Integrated Product Realization Laboratory (AMPRL) focus on studying how material-forming processes that occur in nature can be utilized to enable next-generation additive manufacturing (AM) technologies. Current research includes the design and development of next-generation AM technologies, AM process modeling and optimization, and the advancement of novel applications of new AM technologies. The lab applies its technological developments in a diverse array of fields, including tissue engineering, sensing, energy harvesting, and robotics. The lab is furnished with state-of-the-art material preparation, processing, and characterization equipment, as well as several custom 3D printers invented and developed by the group.

## Design for Manufacturing Laboratory

The Design for Manufacturing Laboratory provides students with experience in computer-aided design and computer-aided manufacturing (CAD/CAM) systems. It is equipped with 4-axis computer numerical control (CNC) mills (Haas and Tormach), CNC router (Techno-CNC), CNC metal lathe (Haas and Techno-CNC), drill press, plastic injection molder, thermoforming machine, band saw, disc sander, bench grinder, polishing wheel, hand drill, sandblasting cabinet, press, foot shear, and welding station. The lab has the latest software technology, including Pro/ENGINEER and Rhinoceros.

## Driving Safety Research Institute

The Driving Safety Research Institute (DSRI) is home to the nation's first and largest public simulator of its kind in the world. For the last 25 years, the University of Iowa has conducted advanced research and development in support of saving lives, improving quality of life, advancing technology, and improving the efficiency and productivity of the automotive and supporting industries. Most importantly, DSRI serves as a place where students can learn firsthand about how innovation occurs in science and engineering.
From drug research to automated vehicles, DSRI is dedicated to engaging in a broad, holistic approach. Faculty, staff, and students at DSRI collaborate with nearly all UI colleges in their automotive safety research. Human factors research at DSRI is funded by government agencies and industry leaders for the public and private sectors. DSRI supports undergraduate, graduate, and doctoral students in driving research studies. Many of these studies include the use of the DSRI miniSim, a portable, high performance driving simulator based on DSRI state-of-the-art driving simulation technology developed through decades of research. In-house workstations and computers equipped with software such as MATLAB, Visual Studio, R, and SAS are available to students with approved access to the facility.
Automated vehicle technology is revolutionizing transportation and mobility, unlike any other technology of the past several decades. Vehicles, and their underlying technologies, are changing at a rapid pace. Many of the advanced driver assistance technologies and vehicle safety systems have been in research and development programs at the UI. The UI specializes in driver performance and behavior and how to optimally design the user interface of such systems. As vehicles become increasingly automated, the College of Engineering is leading a number of advanced research projects in automated and connected vehicles, funded by government and industry. Together with industry partners, the automated vehicles division is being built with a broad range of capabilities. These vehicles will be used to collect data for research programs funded through industry and government contracts.

## Graphical Representation of Knowledge Lab (GROK)

The GROK Lab develops technologies to help scientists and doctors improve their understanding and control of complex systems such as robots, distributed sensor networks, and augmented-reality systems. The lab designs and builds software, electronic circuits, and mechanical devices that create or modify complex systems and that extend scientists' understanding of how to make these systems perform their intended tasks better.

The lab has a variety of software development platforms and manufacturing tools, including computer numerical control (CNC) machines and supplies for casting and molding, as well as a suite of equipment for circuit design, testing, and assembly. The GROK lab has developed technologies used by NASA to control robots exploring South America and Mars. Its most recent projects have focused on using distributed wireless sensor networks to monitor factory-related health hazards and on developing surgical simulators to better train orthopedic surgeons.

## Human Analytics Laboratory

The Human Analytics Laboratory (HAL) investigates human behavioral operations in complex systems with the developmental foci of human factors metrology, behavioral data analytics, and operations management. The HAL lab seeks the discovery and application of knowledge of human behavior to improve systems, learning, operations, and performance.

## Information and Cognitive Systems Research Group

Research in the Information and Cognitive Systems Research Group focuses on the design and analysis of cognitive work and information systems in real-world domains. The current emphasis is on cognitive work in health care systems.

The research group conducts studies in usability testing, process mapping, cognitive walkthroughs, dynamic systems simulation, and interface design, prototyping, and evaluation. The research facility houses state-of-the-art qualitative field data collection equipment and data analysis tools, programming tools for dynamic systems simulations, and design, prototyping, and usability testing hardware and software tools for interface and display design. The facility also employs data modeling tools and diagramming tools.

## Intelligent Systems Laboratory

The Intelligent Systems Laboratory conducts research in data science and computational intelligence leading to applications in manufacturing, energy, service industry, and health care. The current project focuses on smart manufacturing, digital industry, cloud and edge modeling, service manufacturing, and autonomous systems. Many of the intelligent manufacturing concepts pursued globally have originated in the laboratory. The pioneering research has been marked with the publication of the textbook Intelligent Manufacturing Systems (Prentice Hall) and the Journal of Intelligent Manufacturing.

## Laboratory for IoT-Enabled Data Analytics and System Informatics

The lab utilizes high-performance computing workstations to model uncertainty quantifications and complex variable relationships. The aim is to develop engineering-guided statistical techniques to facilitate the interpretability, real-time monitoring, and root cause analysis of complex systems. The lab focuses on developing and applying data analytics tools to various promising areas including advanced manufacturing systems, driver simulation and monitoring systems, and water and hydrology modeling systems. The research in the group requires algorithm development, hardware design, theoretic analysis, and simulation and emulation.

## Operator Performance Laboratory

The Operator Performance Laboratory (OPL) is a flight test organization at the University of Iowa. The lab specializes in civilian and military flight testing and assessment of technologies in operational contexts, such as flight in degraded visual environments and GPS-denied environments. Quantification of data link and sensor performance for manned and unmanned aircraft in such an operational context is an area of focus. OPL develops, tests, and evaluates helmetmounted displays (HMDs), synthetic vision systems, live virtual constructive (LVC) training systems, physiological-based workload measurement systems, pilot spatial orientation enhancement systems, and embedded flight simulation capabilities.

Unmanned aircraft operations include test flights supporting commercial unmanned aircraft systems (UAS) autonomy, 5th- and 6th-generation manned-unmanned teaming (MUMT) concepts, and the extension of LVC toward MUMT. The OPL team developed the Cognitive Assessment Tool Set (CATS), which is able to accurately
quantify human cognitive workload using a flight-approved sensor package. CATS has been used in many flight tests as the data collection and analysis tool for pilot behavior in real-world flight environments. OPL pioneered the development and testing of LVC technology that blends ground-based battlespace simulations with airborne testbeds equipped with radar and weapons simulators that can employ simulated ordnance for effect in distributed simulation environments. This capability has been demonstrated many times, including at the Interservice/Industry Training Simulation Education Conference. In 2004, the OPL team developed and tested a synthetic vision system that was subsequently commercialized by Dynon Avionics under the brand name Skyview. This system has sold over 10,000 units and is flying in thousands of aircraft.

OPL has performed many flight test projects on its fleet of aircraft, exceeding a total 2,400 flight hours of developmental test and evaluation and operational test and evaluation data collection. OPL has 10 instrumented research aircraft. These include two L-29 fighter jet trainers, two MI-2 twin-turbine helicopters, one A-36 Bonanza, one Cessna 172, three TBM 3M UAS (62lbs), and one Vapor 55 (55 $\mathrm{lbs})$. The OPL L-29s are the only tactical jet research aircraft that are equipped with the F-35 HMD. The OPL MI-2 is a one-of-a-kind sensor platform with a conformal HMD using full-color symbology showing threats and obstacles acquired by its suite of onboard sensors. Each OPL aircraft also is a flight simulator. Additionally, the OPL has a Boeing 737-800 full flight deck simulator, an unmanned aerial vehicle (UAV) ground control station simulator, a fast jet simulator, and deployable command and control (C2) bus as well as a C2 high mobility multipurpose wheeled vehicle for use as a forward command node in rugged terrain. OPL has an extensive telemetry infrastructure that is deployable. OPL's flight support system also is deployable using mobile tool control, spares, jigs, and jacks, among other means.

## Courses

## Industrial and Systems Engineering Courses

## ISE:1000 First-Year Seminar

0-1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
ISE:2000 Industrial Engineering Sophomore Seminar 0 s.h. Curriculum and profession; ethics and professionalism in classroom and workplace. Requirements: sophomore or transfer standing in engineering.
ISE:2360 Design for Manufacturing 3 s.h. Fundamentals of design, engineering graphics, and manufacturing processing; computer graphics using Pro/ENGINEER for CAD and CAM; typical industrial processes, including casting, welding, machining, forming; laboratory exercises and projects. Corequisites: ENGR:2720.

3 s.h.
Basic concepts of engineering economy: time value of money, cash flow equivalence, depreciation, tax considerations, continuous cash flows, cost accounting overview; main analysis techniquespresent worth, uniform annual cost, rate of return, benefit/cost ratio, replacement and break-even analysis. Corequisites: STAT:2020.
ISE:3000 Professional Seminar: Industrial Engineering 0 s.h.
Professional aspects of industrial engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Requirements: junior standing.

ISE:3300 Manufacturing Systems
Manufacturing and logistics systems, supply chain management, MRP/ERP systems, lean manufacturing, concurrent engineering, value stream mapping and six sigma. Offered spring semesters. Prerequisites: ISE:2360 and ISE:3700.

## ISE:3350 Process Engineering <br> Methodologies, algorithms, and tools for processing modeling,

3 s.h. analysis, and reengineering; modeling issues in product and component design, product and process modularity, quality, reliability, and agility. Prerequisites: ISE:3700.

## ISE:3400 Human Factors

3 s.h.
Design of human-machine systems; development of optimum work environments by applying principles of behavioral science and basic knowledge of human capacities and limits. Offered fall semesters. Prerequisites: PSY:1001.

## ISE:3450 Ergonomics

3 s.h.
Ergonomic design of jobs and products in an industrial and consumer market setting; principles of good design, examples of poor design; consequences of poor job and product design; principles of work sampling, usability studies, performance rating, sizing and planning of workstations, hand tool design, ergonomic design in transportation; related group project.

## ISE:3500 Information Systems Design

3 s.h.
Structure and design of computer-based information systems; concepts of information systems, decision-making; computer hardware, software, data structures; methods for determining system requirements; designing, implementing, evaluating, managing information systems; applied projects. Prerequisites: ENGR:1300.

## ISE: 3600 Quality Control

3 s.h.
Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisites: STAT:2020 or BAIS:9100 or (STAT:3100 and STAT:3101 and STAT:3200). Same as CEE:3142, STAT:3620.

## ISE:3610 Stochastic Modeling

3 s.h.
Fundamental probabilistic models and applications of industrial engineering; overview of probability and distributions, stochastic processes and Markov chains, queuing theory, inventory theory, decision theory under uncertainty, and elements of risk management. Prerequisites: STAT:2020. Corequisites: ISE:3700.

## ISE:3660 Data Analytics with R

Basics of data analytics and data mining; how to implement a variety of popular data mining methods in R to tackle business and engineering problems; focus on process of turning raw data into intelligent decisions and algorithms commonly used to build predictive models and find relevant patterns in data. Prerequisites: STAT:2020.

## ISE:3700 Operations Research

Operations research models and applications; emphasis on deterministic model (linear programming, duality). Offered fall semesters. Prerequisites: MATH:2550. Corequisites: STAT:2020.

## ISE:3750 Digital Systems Simulation

3 s.h.
Simulation modeling and analysis; emphasis on construction of models, interpretation of modeling results; input and output analysis; hands-on usage of ARENA simulation software, manufacturing, health care, and service. Offered spring semesters. Prerequisites: ISE:3610 and ISE:3700.

3 s.h. ISE:3760 Applied Linear Regression
3 s.h.
Regression analysis with focus on applications; model formulation, checking, and selection; interpretation and presentation of analysis results; simple and multiple linear regression; logistic regression; ANOVA; polynomial regression; tree models; bootstrapping; handson data analysis with computer software. Prerequisites: STAT:2020 or STAT:2010 or STAT:3120. Same as DATA:3200, IGPI:3200, STAT:3200.

ISE:3998 Individual Investigations: Industrial Engineering arr. Independent projects in industrial engineering for undergraduate students, including laboratory study, an engineering design project, analysis and simulation of an engineering system, computer software development, CAD/CAM applications, or research.

## ISE:4116 Manufacturing Processes Simulations and

 AutomationMaterial processing, metal cutting theories, forming, micro/nano fabrication, programmable logic controller, computer numerical controllers, discrete control system, DC and AC servo motors, Command generation. Prerequisites: ME:2300 or ISE:2360. Same as ME:4116.
ISE:4172 Big Data Analytics 3 s.h.
Principles of data mining and machine learning in context of big data; basic data mining principles and methods-pattern discovery, clustering, ordering, analysis of different types of data (sets and sequences); machine learning topics including supervised and unsupervised learning, tuning model complexity, dimensionality reduction, nonparametric methods, comparing and combining algorithms; applications of these methods; development of analytical techniques to cope with challenging and real "big data" problems; introduction to MapReduce, Hadoop, and GPU computing tools (Cuda and OpenCL). Prerequisites: STAT:2020 or BAIS:9100. Requirements: basic programming skills in C, C++, Java, or Python; knowledge of Matlab, Octave, or R; and knowledge of a word processor. Recommendations: ISE:3760 and CS:4400 and CS:3330 and MATH:2550.

## ISE:4175 Safety Engineering

3 s.h.
Systems safety principles and methods, occupational safety, product safety and liability, accident investigation and prevention methods and analysis, hazard analysis, and standards and regulations.

## ISE:4600 Industrial Engineering Design Project

1-4 s.h.
Projects involving product and related operational system design in an industrial or service organization; associated entrepreneurial or intrapreneurial planning. Corequisites: ISE:2500 and ISE:3300 and ISE:3350 and ISE:3400 and ISE:3450 and ISE:3500 and ISE:3600 and ISE:3750, if not taken as prerequisites. Requirements: completion of all ISE coursework.
ISE:4620 Design of Experiments for Quality Improvement 3 s.h. Development of skills necessary to efficiently and effectively design and analyze experiments for quality improvement; topics include experiment planning, design, and statistical analysis of the results; experimentation is beneficial in all phases of industrial processes including new product design, process development, and manufacturing process improvement; students develop successful experiments that can lead to reduced development lead time, enhanced process performance, and improved product quality. Prerequisites: STAT:2020. Requirements: junior (third year) standing.

## ISE:4900 Introduction to Six Sigma

Six Sigma techniques for the DMAIC cycle (Define, Measure, Analyze, Improve, Control); what is needed for data collection (process inputs and outputs, measurement tools), conduct analysis (hypothesis testing, process capability studies), and conduct process improvement studies (design of experiments, response surface methodology); overview of Six Sigma, process and project management skills; application of the DMAIC model to a real-life improvement projection (a "learn-by-doing" approach). Prerequisites: ISE:3600.
ISE:5000 Graduate Seminar: Industrial Engineering 1 s.h.
Recent advances and research in industrial engineering presented by guest lecturers, faculty, students. Requirements: graduate standing.

## ISE:5310 Advanced Computational Design and

## Manufacturing

Provides understanding and practical experience in application of computational techniques to solve design and manufacturing problems; introduction to underlying concepts behind 3D geometry representations, algorithms, and underlying mathematical foundations essential to solving a wide variety of problems in computer-aided design (CAD), computer-aided manufacturing (CAM), and computeraided engineering (CAE); hands-on computational skills working on team-based course projects. Requirements: knowledge of basic C/C++ programming concepts.

## ISE:5420 Automated Vehicle Systems

Overview of vehicle technologies (HAV) and advanced driver assistance systems (ADAS) including a historical perspective, testing, policy and regulation, algorithm design, and human factors. Recommendations: ISE:3400.

## ISE:5460 User Experience Design

Introduction to user experience (UX) research and design fundamentals; UX design as a critical first step in user research, designing products and services for users (e.g., digital, physical, hybrid), and validating products and services; UX theory, methods, and design; examination of user research techniques to facilitate UX design; UX design to achieve user engagement when using products and services; how demand for UX professionals has increased;
lectures, readings, hands-on UX design activities, and UX design project.

## ISE:5520 Renewable Energy

Introduction to different sources of renewable energy generation including wind, solar, fuel cells, and bioenergy; design of energy solutions for different stand-alone applications (i.e., factories, data centers, hospitals) and system-wide solutions powering transportation systems, cities, or states; application-specific topics such as energy storage, control of energy generators, operations and maintenance, performance optimization, equipment health monitoring, predictive engineering, and integration of renewable energy with a grid.

## ISE:5620 Design of Experiments

3 s.h.
Principles and methods of statistical design of experiments for product and process improvement; students develop skills necessary for planning, analysis, and optimization of experimental data, which can be applied across various fields of research including engineering, medicine, and the physical sciences. Prerequisites: STAT:2020.
ISE:5650 Mechatronics Engineering for Smart Device Design3 s.h. Introduction to basic mechatronics system components and design principles using mechatronics to meet functionality requirements of products, processes, and systems; lab-oriented assignments and team-based projects presented with innovative case studies in diverse application domains; labs require students to use a micro-controller kit to finish hardware development assignments; for students who plan to have a career in areas such as product development, robotics, design and manufacturing automation, technology management and innovations. Prerequisites: ENGR:2120 and ISE:2360.

Modeling methodologies, analysis, and optimization of digital enterprise models; autonomous building of models from data stores; introduction to different application-as-a-service models embedded in edge, fog, and cloud architectures and solutions; science of process modeling and analysis illustrated with case studies. Prerequisites: ISE:3700.

ISE:5740 Design and Analysis of Computer Experiments $\mathbf{3}$ s.h. Introduction to basic concepts of computer experiments; differences between computer and physical experiments; three technical contents including parametric and nonparametric prediction/inference models for computer experiments, space filling design for computer experiments, and criterion-based experiment design. Requirements: coding capability in at least one popular software (e.g., R, MATLAB, Python). Recommendations: STAT:4540, BAIS:9100 or MBA:8150, ISE:6790, or coding capability in R, MATLAB, or Python.
ISE:5995 Contemporary Topics in Industrial Engineering arr. New topics or areas of study not offered in other industrial engineering courses; topics based on faculty/student interest.

ISE:5998 Individual Investigations: Industrial Engineering arr. Individual projects for industrial engineering graduate students: laboratory study, engineering design, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.
ISE:5999 Research: Industrial Engineering MS Thesis arr Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for MS with thesis in industrial engineering. Requirements: graduate standing.

## ISE:6211 Human Factors in Healthcare Systems

Solving human factors problems in health care work systems; cognitive systems engineering, interface design, health care productivity, patient safety; specific research including decisionmaking, information transfer, and communication; discrete event and dynamic systems simulation modeling; human computer interaction; health information technology/systems; usability; business models of organizational, technical, and social elements of health care systems.

## ISE:6220 Cognitive Engineering

Cognitive engineering principles; decision-making and judgment; distributed cognition; cognitive work; human system interaction; cognitive work analysis; situated action and ecological models; mental models and representation; cognitive engineering methods and applications.
ISE:6300 Innovation Science and Studies
Innovative typology and sources, classical innovation models, measuring innovation, innovation discovery from data, evolutionary computation in innovation, innovation life cycle.
ISE:6350 Computational Intelligence
Concepts, models, algorithms, and tools for development of intelligent systems; data mining, expert systems, neural networks for engineering, medical and systems applications. Same as NURS:6900.
ISE:6380 Deep Learning
Basic principles of deep neural networks for various engineering applications; skill sets to design and implement deep learning algorithm for engineering applications; essential topics of deep learning for its practical use and exploring diverse methods and architectures for different types of applications.

ISE:6410 Research Methods in Human Factors Engineering 3 s.h. Logic and methods for research and for analysis and evaluation of complex human-machine systems; advanced techniques for enhancement of human interaction with advanced information technology; emphasis on cognitive task analysis techniques for innovative design, understanding of how technology affects safety, performance, user acceptance.

ISE:6420 Human/Computer Interaction 3 s.h.
Development of projects using human factors principles in the design of computer interfaces.

## ISE:6450 Human Factors in Aviation <br> 3 s.h.

Measuring, modeling, and optimizing human visual performance; display design for optimal legibility, research in visibility, legibility, conspicuity, and camouflage; visibility model development.

## ISE:6460 The Design of Virtual Environments

Development of techniques for designing and creating threedimensional representations of information for simulation, scientific visualization, and engineering; emphasis on human factors issues, software.

ISE:6480 Unmanned Aircraft Systems
3 s.h.
Applications and research in unmanned aircraft systems (UAS) with focus on engineering aspects; new era of aviation and how UAS are fast emerging as a disruptive technology in aviation; applications ranging from film production, photography, precision agriculture, remote sensing, and infrastructure inspections to military applications; problem space of UAS from a variety of angles including engineering controls design, data links, UAS types, human factors, regulatory aspects.

## ISE:6600 Linear Programming

3 s.h.
Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Requirements: calculus and linear algebra. Same as BAIS:6600, IGPI:6600.
ISE:6650 Human Analytics and Behavioral Operations 3 s.h. Introduction to several quantitative applications related to determining workforce size, skills-sets, and multifunctionality in service and manufacturing systems, based on measurable quality and productivity performance at the intersection of human factors engineering and production planning; modeling and solving problems in a context of speed and accuracy trade-off; models include learning, forgetting, teamwork, fatigue, procrastination, and individual difference measures.

## ISE:6760 Pattern Recognition for Financial Data 3 s.h.

Modeling and harvesting useful information and patterns for financial data; topics include basic concepts of financial data, financial data visualization, modeling and forecasting of financial time series, seasonal models, volatility models, value at risk, principal component analysis, and factor models.

## ISE:6780 Financial Engineering and Optimization

3 s.h.
Quantitative methods of modeling various financial instruments (i.e., stocks, options, futures) and tools for measurement and control of risks inherent to financial markets; fundamentals of interest rates; options and futures contract valuation, including weather and energy derivatives; risk management and portfolio optimization; emphasis on modeling and solution techniques based on optimization and simulation approaches traditional to industrial engineering and operations research. Recommendations: basic knowledge of probability and statistics, numerical methods, and optimization.

## ISE:6790 Advanced Data Analytics and Informatics

3 s.h.
Advanced analytics techniques (i.e., linear mixed effects model, Gaussian process model, Bayesian analytics); team project on selected data analytics topics from Kaggle using real industrial data for performance demonstration; emphasis on understanding methodology and technology applications; application of each analytics technique on various industrial data context. Recommendations: STAT:4540 or MBA:8150; working knowledge of important discrete and continuous distributions, joint distributions, linear regression, random process, hypotheses testing, and analysis of variance; and programming capability in any language ( e.g., Matlab, R, Python).

ISE:6810 Advanced Topics on Additive Manufacturing
3 s.h.
Review of critical challenges facing 3D printing; emphasis on techniques and practical experience in developing novel additive manufacturing processes and applications; topics include 3D content creation and preparation, CAD systems for additive manufacturing, additive manufacturing processes, fabrication speed and improvements, rapid tooling and indirective processes.

## ISE:7998 Special Topics in Industrial Engineering

arr.
ISE:7999 Research: Industrial Engineering PhD Dissertation arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for PhD in industrial engineering.

## Industrial Engineering, BSE

The major in industrial engineering requires a strong foundation of courses in engineering science, mathematics, design, manufacturing, social science, and humanities. Advanced work includes specialty courses in human factors and ergonomics, management, information systems, manufacturing, quality control, and operations research. Design is an integral part of the undergraduate program; all students complete a comprehensive design experience.

The Department of Industrial and Systems Engineering offers a host of options for each engineering student. From the undergraduate engineering degree, a dual Undergraduate to Graduate (U2G) degree, focus areas, and extracurricular activities, there are many options available to explore and develop professional skills. The industrial and systems engineering undergraduate program emphasizes a broad education in engineering fundamentals and the opportunity for indepth learning in a focus area.

## Focus Areas and Specialized Opportunities

As part of the mission to help students be engineers and something more, the Department of Industrial and Systems Engineering offers a variety of focus area options so that students can pursue specialized interests. Industrial engineering focus areas include big data analytics, computer and information systems, design and manufacturing, entrepreneurship, human factors and ergonomics, management, and an option to tailor a focus area to an individual student's interests.

## Big Data Analytics

Big data analytics is the process of examining big data in an effort to uncover hidden patterns, unknown correlations, and other useful information- $95 \%$ of the data in the world today has been created in the last two years alone. This data comes from everywhere: sensors used to gather climate information, posts to social media sites, digital pictures and videos, purchase transaction records, and cell phone GPS signals to name a few.

## Computer and Information Systems

Industrial engineers have a natural role to play in this field by using quantitative system analysis, manufacturing system knowledge, and human factors skills to help design and refine computer systems that are becoming ever more complex. The field offers substantial opportunities for technical skill development, travel, and interaction with a diverse range of professionals.

## Design and Manufacturing

Many graduates find careers in manufacturing industries that include the use of computer-aided design and manufacturing, virtual and physical prototyping, 3D design, design and simulation of manufacturing processes, and manufacturing systems. They find employment in diverse industries, including the supplier manufacturing industry (e.g., John Deere, Caterpillar, Rockwell Collins, Raytheon, Boeing), health care (e.g., Johnson \& Johnson, Zimmer), software, and the information industry (e.g., Pro/Engineer, CATIA, SolidWorks, AutoCAD).

## Entrepreneurship

Entrepreneurship allows engineering students to explore venture capital, marketability of products, and technology transfer. They gain exposure to understanding sound business practice, acquire team-building skills in both small and large companies, understand the entrepreneurial approach to acquiring and managing resources, learn how to create a business plan, and obtain valuable contacts and networking opportunities with businesses and industries.

## Human Factors and Ergonomics

The human factors and ergonomics focus area represents an increasingly important engineering specialty. The dramatic increase in netcentric computer technology makes system performance increasingly dependent on the match between system characteristics and human capabilities. Graduates find employment in diverse industries that include health care (e.g., GE, Medtronics, Guidant), original equipment manufacturer (OEM) and supplier manufacturing industry (e.g., Rockwell Collins, Boeing, John Deere, Caterpillar), computer systems (e.g., Microsoft, Intel, IBM), the government (e.g., NHTSA, NTSB, NASA, the Department of Defense), and consulting (e.g., Accenture, Battelle). Human factors considers cognitive characteristics, and ergonomics considers physical characteristics. This focus area provides advanced education in psychology, systems, statistics, and biomechanics.

## Management

Industrial engineers are often assigned managerial tasks, project management, and financial assessments as they relate to project budgets, cost calculations, and optimization criteria. This focus area prepares students for a career in business management.

## Tailored

Students work with an advisor to tailor a program that is specific to their individual needs. For more information about guidelines for tailored focus areas, see EFAs and Specialized Opportunities on the Department of Industrial and Systems Engineering website.

## Student Organizations

Student organizations can have an enormous impact on an undergraduate student's career. The College of Engineering is home to a number of student organizations and clubs. Popular organizations for industrial and systems engineering students include the Institute of Industrial and Systems Engineers (IISE) and the Human Factors and Ergonomics Society (HFES).

## Undergraduate Resources

Undergraduate resources are available to students to pursue research, access professional services available in the college and across the university, and participate in or view sports and arts events on campus and around town.

## Scholarships

A variety of engineering scholarships and funding opportunities are available to industrial and systems engineering students.

## Accreditation

The undergraduate program in industrial engineering is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET).

## Educational Objectives

The following educational objectives of the program are defined in conjunction with the accreditation process.

Within a few years of graduation, industrial engineering graduates will:

- continue learning;
- lead and inspire others; and
- engage in the community and society.

## Requirements

The Bachelor of Science in Engineering (BSE) with a major in industrial engineering requires a minimum of 129 s.h. of credit, including two 0 s.h. seminars. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.
All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1448] in the catalog. Students completing the major in industrial engineering fulfill the collegiate statistics requirement by completing STAT:2020 Probability and Statistics for the Engineering and Physical Sciences. Students within the department also are required to take PSY:1001 Elementary Psychology to fulfill part of the BSE collegiate curriculum General Education Component approved course subjects requirement.
The major in industrial engineering requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Collegiate Curriculum | 50 |
| Major Requirements (includes two 0 s.h. seminars) | 58 |
| Focus Area | $21-26$ |

## Major Requirements

Major requirements include a set of common courses ( 40 s.h.), at least $11 \mathrm{~s} . \mathrm{h}$. in engineering fundamentals elective courses, a systems elective ( 3 s.h.), two departmental seminars ( 0 s.h.), and one capstone design course (4 s.h.).

## Common Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| ISE:2360 | Design for Manufacturing | 3 |
| ISE:2500 | Engineering Economy | 3 |
| ISE:3300 | Manufacturing Systems | 3 |
| ISE:3350 | Process Engineering | 3 |
| ISE:3400 | Human Factors | 3 |
| ISE:3450 | Ergonomics | 3 |
| ISE:3500 | Information Systems Design | 3 |
| ISE:3600 | Quality Control | 3 |
| ISE:3610 | Stochastic Modeling | 3 |
| ISE:3660 | Data Analytics with R | 3 |
| ISE:3700 | Operations Research | 3 |
| ISE:3750 | Digital Systems Simulation | 3 |
| PHYS:1612 | Introductory Physics II (with | 4 |
|  | lab) |  |

## Engineering Fundamentals

Students who are required to complete ENGR:2730 Computers in Engineering as part of their focus area must select a different course to fulfill the engineering fundamentals requirement.

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| At least 11 s.h. from these: |  |  |
| ENGR:2110 | Statics | 2 |
| ENGR:2120 | Electrical Circuits | 3 |
| ENGR:2130 | Thermodynamics | 3 |
| ENGR:2710 | Dynamics | 3 |
| ENGR:2720 | Materials Science | 3 |

| ENGR:2730 | Computers in Engineering | 3 |
| :--- | :--- | :--- |
| ENGR:2750 | Mechanics of Deformable | 3 |
| ENGR:2995 | Bodies | 3 |
|  | Introduction to Artificial |  |
|  | Intelligence and Machine |  |
| Learning in Engineering |  |  |

## Systems Elective

Students who complete ENGR:2730 Computers in Engineering or ISE:4900 Introduction to Six Sigma as part of their focus area must select a different course to fulfill their systems elective or work with their academic advisor for an appropriate substitution.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| ISE:4172 | Big Data Analytics | 3 |
| ISE:4175 | Safety Engineering | 3 |
| ISE:4900 | Introduction to Six Sigma |  |
| ENGR:2730 | Computers in Engineering |  |
| A course with prefix ISE numbered 5000 or above | 3 |  |
| Departmental | Seminars | 3 |
| Course \# | Title | 3 |
| Both of these: | Industrial Engineering <br> ISE:2000 | Sophomore Seminar <br> Professional Seminar: Industrial <br> Engineering (taken in the third |
| ISE:3000 | year) | 0 |

## Capstone Design Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| ISE:4600 | Industrial Engineering Design | 4 |
|  | Project |  |

## Focus Area

Students must select focus area courses according to guidelines established by the Department of Industrial and Systems Engineering. Focus areas include big data analytics [p. 1551], computer and information systems [p. 1552], design and manufacturing [p. 1552], entrepreneurship [p. 1553], human factors and ergonomics [p. 1553], management [p. 1553], and an option to tailor a focus area to an individual student's interests. For more information about focus area options and guidelines for tailored focus areas, see EFAs and Specialized Opportunities on the Department of Industrial and Systems Engineering website.

Focus areas in the industrial engineering major include content area courses and electives; carefully selected elective courses may contribute to earning a minor and/or certificate.

## Big Data Analytics

Students in the big data analytics focus area complete four required courses ( $12 \mathrm{~s} . \mathrm{h}$. ), two focus area electives ( $6-7 \mathrm{~s} . \mathrm{h}$. ), and one math or science elective (3-4 s.h.).

## Required Big Data Analytics Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| BAIS:3500 | Data Mining | 3 |
| ECE:5450/IGPI:5450 | Machine Learning | 3 |
| All of these: |  |  |

| ENGR:2730 | Computers in Engineering | 3 |
| :--- | :--- | :--- |
| STAT:4540/ | Statistical Learning | 3 |
| BAIS:4540/ |  |  |
| DATA:4540/ |  |  |
| IGPI:4540 |  | 3 |
| STAT:4580/ | Data Visualization and Data |  |
| DATA:4580/ | Technologies |  |
| IGPI:4580 |  |  |

## CS:5800/ECE:5800

Fundamentals of Software

## Design and Manufacturing

Students in the design and manufacturing focus area complete two required courses ( 6 s.h.), three focus area electives ( $9-12$ s.h.), one math or science elective ( $3-4$ s.h.), and one advanced engineering elective (3-4 s.h.).

## Required Design and Manufacturing Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: |  | 3 |
| ISE:4172 | Big Data Analytics | 3 |

## Advanced Engineering Elective-Design and Manufacturing

Students select one course numbered 3000 or above from any department in the College of Engineering (prefix BME, CBE, CEE, ECE, ISE, or ME).

## Entrepreneurship

Students in the entrepreneurship focus area complete three required courses ( 9 s.h.), two technological entrepreneurship courses ( 6 s.h.), one advanced elective ( 3 s.h.), and one math or science elective (3-4 s.h.).

## Required Entrepreneurship Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | 3 |
| ISE:4900 | Introduction to Six Sigma | 3 |
| ENTR:2000 | Entrepreneurship and |  |
|  | Innovation | 3 |

## Technological Entrepreneurship Certificate Courses

Students select two courses that count toward the Certificate in Technological Entrepreneurship [p. 1588] for a total of 6 s.h.

## Advanced Elective

| Course \# | Hitle | Hours |
| :--- | ---: | ---: |
| One of these: | 3 |  |
| A course numbered 3000 or above with prefix BME, |  |  |
| CBE, CEE, ECE, ISE, or ME | 3 |  |
| A course numbered |  |  |
| BAIS, BUS, ECON, ENTR, FIN, MGMT, or MKTG |  |  |

## Math or Science Elective-Entrepreneurship

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| BIOL:1411 | Foundations of Biology | 4 |
| CHEM:1120 | Principles of Chemistry II | 4 |
| MATH:3550 | Engineering Mathematics V: | 3 |

| MATH:3800/CS:3700 | Introduction to Numerical <br> Methods | 3 |
| :--- | :--- | ---: |
| PHYS:2704 | Physics IV | $3-4$ |
| STAT:3210 | Experimental Design and |  |
|  | Analysis | 3 |

## Human Factors and Ergonomics

Students in the human factors and ergonomics focus area complete three required courses (10 s.h.), one math or science elective (3 s.h.), one engineering elective ( $3-4$ s.h.), and two general electives (6-7 s.h.).

Required Human Factors and Ergonomics Courses
Course \# Title Hours

| All of these: |  | 3 |
| :--- | :--- | :--- |
| PSY:2601 | Introduction to Cognitive <br> Psychology | 4 |
| PSY:2701 | Introduction to Behavioral <br> Neuroscience | 3 |
| PSY:2811 | Research Methods and Data <br> Analysis in Psychology I | 3 |

Math or Science Elective-Human Factors and Ergonomics

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| STAT:3200 | Applied Linear Regression | 3 |

| STAT:3210 | Experimental Design and <br> Analysis | 3 |
| :--- | :--- | :--- |
| STAT:4143/ | Introduction to Statistical | 3 |
| PSQF:4143 | Methods |  |

## Engineering Elective

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| ISE:4175 | Safety Engineering | 3 |
| ISE:5420 | Automated Vehicle Systems | 3 |
| ISE:5460 | User Experience Design | 3 |
| ISE:6220 | Cognitive Engineering | 3 |
| ISE:6410 | Research Methods in Human | 3 |
| ISE:6450 | Factors Engineering |  |
| BME:2500 | Human Factors in Aviation | 3 |
| BME:5640 | Biomaterials and Biomechanics | 4 |
|  | Ergonomics of Occupational | 3 |
|  | Injuries |  |

## General Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: |  |  |
| PSY:3040 | Psychology of Learning | 3 |
| PSY:3620 | Human Memory | 3 |
| PSY:4020 | Laboratory in Psychology | 4 |
| OEH:4310 | Occupational Ergonomics: | 3 |
|  | Principles |  |

## Management

Students in the management focus area complete five required courses ( 15 s.h.), one math or science elective (3-4 s.h.), and one advanced engineering elective ( 3 s.h.).

## Required Management Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Introduction to Financial |  |
| ACCT:2100 | Accounting |  |
| ACCT:2200 | Managerial Accounting <br> Analytics and Data | 3 |
|  | Visualization |  |
| MGMT:2000 | Introduction to Law | 3 |
| MGMT:2100 | Introduction to Management | 3 |
| MKTG:3000 | Introduction to Marketing | 3 |
|  | Strategy |  |

## Math or Science Elective-Management

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  | 4 |
| BIOL:1411 | Foundations of Biology | 4 |
| CHEM:1120 | Principles of Chemistry II | 4 |
| MATH:3550 | Engineering Mathematics V: |  |
| Vector Calculus |  |  |
| MATH:3800/CS:3700 | Introduction to Numerical |  |
|  | Methods |  |
| PHYS:2704 | Physics IV | 3 |
| STAT:3210 | Experimental Design and | 3 |
|  | Analysis | $3-4$ |
|  |  |  |

## Advanced Engineering Elective-Management <br> Students select one course numbered 3000 or above from any department in the College of Engineering (prefix BME, CBE, CEE, ECE, ISE, or ME).

## Tailored

Students work with their advisor to tailor a program that is specific to their individual needs.

## Combined Programs

## BSE/MS in Industrial Engineering

The College of Engineering offers a combined Bachelor of Science in Engineering/Master of Science program for industrial engineering undergraduate students who intend to earn an MS in industrial engineering.

Undergraduate students at the University of Iowa who have completed more than 80 s.h. and have a grade-point average higher than 3.25 may apply for admission to the Undergraduate to Graduate (U2G) program designed to accelerate the attainment of an MS in industrial engineering degree. Students typically complete their MS within one year of their BSE degree.

Students meet with their academic advisor, complete a plan, and submit an application for the MS program of study to the Graduate College. Graduate Record Examination (GRE) General Test scores are not required for University of Iowa students. Students continue to follow the industrial and systems engineering curriculum as planned with their advisor.

Students may take up to $12 \mathrm{~s} . \mathrm{h}$. of graduate coursework in the last year of undergraduate studies to be counted toward both degrees, attend the program's graduate seminar, and optionally work with a faculty member on a master's thesis project while they are still undergraduates.

Interested students should discuss the Undergraduate to Graduate (U2G) program with their advisor during their third year of study. Applications should be submitted to the department before the start of their fourth year.

## Career Advancement

Industrial and systems engineers have many opportunities for employment and service in industrial, government, research, and public service organizations. Employment opportunities are among the most varied in the engineering field. Industrial and systems engineers hold positions as advisors to management or may participate directly in management decisions. Representative job titles include industrial engineer, manufacturing engineer, systems analyst, quality specialist, operations research analyst, internal consultant, human factors specialist, supervisor, and manager. Industrial and systems engineers are employed by manufacturing and energy firms, wind turbine manufacturers, government agencies, and service organizations such as airlines, banks, hospitals, health care groups, and consulting companies.

People are often surprised to learn the impact and breadth of the industrial engineering profession, which is one of the three largest areas of engineering employment, according to the Bureau of Labor Statistics. Yet, only 5\% of all engineers are trained specifically for this specialty, according to the American Society for Engineering Educators (ASEE). It is one of the more gender-diverse engineering degrees: $34.1 \%$ of industrial engineering bachelor's degrees are awarded to women, compared to $24 \%$ of all engineering bachelor's degrees, according to the ASEE.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including engineering career fairs and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

|  | Hours | 16 |
|  | Total Hours | 29-130 |
| a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change. |  |  |
| b Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change. <br> c Enrollment in math courses requires completion of a placement exam. <br> d Enrollment in chemistry courses requires completion of a placement exam. <br> e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change. |  |  |
|  |  |  |

f Students select a course from one of two GE CLAS Core areas: Diversity and Inclusion or Values and Culture.
g Students complete at least 11 s.h. in engineering fundamentals courses, selected from the following: ENGR:2110, ENGR:2120, ENGR:2130, ENGR:2710, ENGR:2720, ENGR:2730, ENGR:2750, and ENGR:2995. Students who are required to complete ENGR:2730 as part of their focus area must select a different course to fulfill the engineering fundamentals requirement. See General Catalog or consult an advisor for more information.
h Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
i Students select one of several standard focus areas or tailor a focus area to individual interests. Focus areas require at least 21 s.h. and consist of content area courses and electives. Carefully selected elective courses may contribute to earning a minor and/ or certificate. See General Catalog or consult an advisor for more information.
j See General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI.
k See General Catalog for list of approved course subjects.
1 Students complete one systems elective (3 s.h.), selected from the following: ISE:4172, ISE:4175, ISE:4900, ENGR:2730, or a course with prefix ISE numbered 5000 or above. Students who are required to complete ENGR:2730 or ISE:4900 as part of their focus area must select a different course to fulfill the systems elective requirement. See General Catalog or consult an advisor for more information.
mPlease see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Industrial Engineering, MS

## Research and Study

The MS in industrial engineering program supports two major paths: one focusing on courses and one on research and a thesis. The first path is intended primarily for students who wish to advance their technical knowledge and move toward a career in industry. The second path also is a good choice for students interested in industry, but it is targeted more toward developing independent research skills and writing, and it also can support future graduate work.
Both paths expect some diversity of technical skills in three major areas which include systems, human factors, and analytics. The systems area emphasizes the design, construction, and analysis of complex systems with interdependent parts that include people and machines. The human factors area emphasizes the interaction of people with systems, and includes the study and analysis of people's cognitive and physical limitations. The analytics area emphasizes the application of mathematical formulas, including statistical approaches, as well as algorithmic and computational approaches to deriving knowledge from data. Each area is supported by several faculty members and many faculty members support multiple areas; see Facilities [p. 1545] in the Department of Industrial and Systems Engineering section of the catalog to learn more about each research lab and its activities.

## Learning Outcomes

## Without Thesis

Students will:

- demonstrate a broad knowledge of the field of industrial and systems engineering and deep knowledge in their specific area of study;
- identify and analyze problems of value to industry and society;
- apply contemporary methodologies for solving problems valued by industry and society;
- demonstrate project and team management skills and initiative; and
- demonstrate ethical and professional behavior.

## With Thesis

Students will:

- demonstrate a broad knowledge of the field of industrial and systems engineering and deep knowledge in their specific area of study;
- identify and analyze problems of value to industry and society;
- transform knowledge into applications valued by industry and society;
- demonstrate collaborative and communication skills;
- demonstrate project and team management skills; and
- demonstrate ethical and professional behavior.

## Requirements

The Master of Science program in industrial engineering requires a minimum of 30 s.h. of graduate credit. Students must maintain a cumulative grade-point average higher than 3.25 to earn the degree.
In addition, students must enroll in ENGR:7270 Engineering Ethics, typically in the first or second semester of enrollment. ISE:5000 Graduate Seminar: Industrial Engineering must be taken in the first two consecutive semesters of enrollment, and one semester (fall or spring) in subsequent academic years. More information
about graduate seminar requirements can be found in the Graduate Student Handbook on the Department of Industrial and Systems Engineering Graduate Program website. Credit in ISE:5000 and ENGR:7270 may not be applied toward the 30 s.h. of required coursework.

## Breadth Requirement

All students must successfully complete at least one approved graduate-level course in each of three focus areas-analytics, human factors, and systems. Those with a relevant academic background in these areas may be excused from this requirement by the director of graduate studies.
For more detailed information about program requirements and focus area courses, see the Graduate Student Handbook on the Department of Industrial and Systems Engineering website.

## Analytics

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  | 3 |

| ISE:6350 | Computational Intelligence | 3 |
| ISE:6810 | Advanced Topics on Additive | 3 |
|  | Manufacturing |  |

## Master of Science Degree Without Thesis

The MS in industrial engineering without thesis requires at least 21 s.h. in Department of Industrial and Systems Engineering courses (prefix ISE), including the 9 s.h. breadth requirement and at least 12 s.h. of graduate-level courses at the 5000 level or above. Courses offered by other College of Engineering departments or courses from other colleges may be selected with the consent of the academic advisor to fulfill some or all of the remaining 9 s.h.

## Master of Science with Thesis

Nonthesis students may petition for entry into the MS thesis program or the PhD program by requesting a change of status through the department. Typically, students make this request at the invitation of a faculty member who is ready to serve as a student's research advisor. The request is then reviewed by the Graduate Admissions Committee. The committee forwards approved requests to the department chair, who may authorize a change of status petition from the department to the Graduate College.
Students are encouraged to write their thesis as a publishable journal article and submit the article for publication. The thesis option consists of a minimum of $21 \mathrm{~s} . \mathrm{h}$. of coursework, including the $9 \mathrm{~s} . \mathrm{h}$. breadth requirement, and up to 9 s.h. of research. Students pursuing the thesis option are permitted to enroll in ISE:5999 Research: Industrial Engineering MS Thesis. Up to 9 s.h. in the thesis course may count toward the graduate-level course requirement. In addition, students must submit the Final Examination: Advanced Degree form, complete a Report of Thesis Approval, and submit a copy of their thesis to the Graduate College by following the published guidelines and deadlines.

## Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations on the Graduate College website.

Admission to the graduate program is competitive and based on an applicant's previous coursework, research, and industrial experience. The general admission standards are intended to maintain the quality of the graduate program and to ensure sufficient preparation required for timely degree completion. Specific admission standards may be waived by the Graduate Admissions Committee when other evidence of competence is compelling. These standards are minimum standards, and meeting these standards does not ensure admission to the program; admitted students typically exceed these standards.

Applicants are expected to have a minimum cumulative grade-point average of 3.00 on a 4.00 scale, and have earned a BSE in industrial engineering degree or in a related science or engineering discipline. Applicants are not required to submit the results of their Graduate Record Examination (GRE) General Test.
International applicants whose first language is not English are required to submit the results of their Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), or Duolingo English Test (DET). Applicants who have completed a post-secondary degree at an English-speaking institution may request a waiver of this requirement. A minimum TOEFL score of 100, a minimum IELTS score of 7 , or a minimum DET score of 105 is required for admission.

Applicants must arrange to have three letters of recommendation sent to the department online through the University of Iowa Office of Admissions website. The letters should be completed by persons who are well acquainted with the applicant and the ability of the applicant to undertake graduate work in industrial or systems engineering.
While the department considers applications at any time, first consideration is given to students who have their application materials, including their application, transcripts, English language test scores (DET, IELTS, or TOEFL), and the required letters of recommendation, completed by the admission priority deadline as found on the Iowa Graduate Admissions website. The director of graduate admissions is responsible for overseeing the graduate recruiting activities and the admissions procedures in the department. The director serves as the point of initial contact between prospective graduate students and the department, and maintains a record of each qualified applicant in the departmental office. The director, in consultation with the Graduate Admissions Committee and the department chair, screens applicants and ultimately determines which applicants are extended offers of admission.

## Applicants with Degrees Not in Industrial or Systems Engineering

The department encourages students with degrees in other scientific disciplines, such as computer science, mathematics, physics, or other engineering disciplines, to apply for admission. Some students may have already completed MS degrees; however, these students are expected to attain proficiency in specified core areas of industrial and systems engineering equivalent to entering graduate students who hold a BSE degree in industrial engineering. The background of each student admitted to the program with a degree other than in industrial or systems engineering is reviewed by the faculty members. These proficiencies are intended to ensure that each admitted graduate student is able to fully participate in all industrial and systems engineering discipline areas at some level, even while advanced courses in certain areas may not be immediately accessible to all graduate students. The director of graduate studies specifies in writing any remedial courses required of a student.

## Degree Program Selection

Unless otherwise specified, graduate students in the Department of Industrial and Systems Engineering are enrolled in the MS nonthesis program. If a student and faculty member have jointly agreed a student may pursue the MS with thesis option, the student may be admitted into the thesis track.

## Financial Support

Many graduate students who are actively engaged in research receive financial support through a combination of research and teaching assistantships and fellowships. Decisions about research assistantships are made by the individual faculty members and the department.
Support is available on a semester or academic year basis. Stipends
are approximately $\$ 25,000$ (half-time or 20 hours per week) for an academic year of graduate study. Other levels of support are possible. If an award is made, nonresident students usually qualify for tuition at the resident rate, at approximately $\$ 10,000$ per academic year. Normally stipends are not immediately awarded to international applicants, but after admission and enrollment, an application can be made. Preference for graduate student support is given to PhD students.

Students should direct questions about the availability of financial support to faculty members in their primary area of study. Awards and reappointments are highly competitive and are based upon a student's academic record, prior performance, the ability to serve, and an assessment of the student's potential contribution to the research and teaching goals of the program.

For more information about departmental scholarships and funding opportunities, see Graduate Scholarships on the Department of Industrial and Systems Engineering website.

## Career Advancement

Industrial and systems engineers have many opportunities for employment and service in industrial, government, research, and public service organizations such as airlines, banks, hospitals, health care groups, and consulting companies. Employment opportunities are among the most varied in the engineering field. Industrial and systems engineers hold positions as advisors to management or may participate directly in management decisions. Representative job titles include industrial engineer, manufacturing engineer, systems analyst, quality specialist, operations research analyst, internal consultant, human factors specialist, supervisor, and manager.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

|  | Total Hours | 34 |

a Must include at least 12 s.h. of graduate-level courses at the 5000 level or above. All students must also select one graduate-level ISE course from each of three focus areas: analytics, human factors, and systems.
b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
d Students must enroll in ENGR:7270, typically in the first or second semester of enrollment; does not count towards total semester hours for the degree.
e ISE:5000 must be taken in the first two consecutive semesters of enrollment, and one semester (fall or spring) in subsequent academic years; does not count towards total semester hours for the degree.
f See the General Catalog for list of approved courses.
$g$ Work with faculty advisor to determine appropriate graduate elective coursework and sequence.

## Industrial Engineering, PhD

## Research and Study

The PhD in industrial engineering program is intended for students who wish to prepare themselves for a career creating and cultivating new knowledge. In addition to a broad selection of technical research courses, the program emphasizes original research under the close supervision of a faculty member. Students develop an individualized research project that typically includes the design and analysis of experimental or theoretical work or the invention of new processes, techniques, or devices, which ultimately leads to original publications in the academic literature. The training is appropriate for people seeking a career in academia or in research and development in industry.

The coursework requires some diversity of technical skills in three major areas which include systems, human factors, and analytics. The systems area emphasizes the design, construction, and analysis of complex systems with interdependent parts that include people and machines. The human factors area emphasizes the interaction of people with systems, and includes the study and analysis of people's cognitive and physical limitations. The analytics area emphasizes the application of mathematical formulas, including statistical approaches, as well as algorithmic and computational approaches to deriving knowledge from data. Each area is supported by several faculty members, and many faculty members support multiple areas; see Facilities [p. 1545] in the Department of Industrial and Systems Engineering section of the catalog to learn more about each research lab and its activities.

## Learning Outcomes

Students will:

- demonstrate a broad knowledge of the field of industrial and systems engineering and deep knowledge in their specific area of study;
- identify and solve problems of value to industry and society;
- demonstrate independent thinking and forge new paths to discovery;
- make meaningful and novel contributions to knowledge in a single or multiple domains;
- disseminate research results to the research and application community;
- demonstrate the ability to lead interdisciplinary teams in pursuit of research; and
- demonstrate ethical and professional behavior.

## Requirements

The Doctor of Philosophy program in industrial engineering requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.50 to earn the degree. At least 36 s.h. must be taken in Department of Industrial and Systems Engineering courses (prefix ISE), including at least 24 s.h. in graduate-level courses numbered ISE:5000 and above.
Students must enroll in ENGR:7270 Engineering Ethics, typically in the first or second semester of enrollment. ISE:5000 Graduate Seminar: Industrial Engineering must be taken in the first two consecutive semesters of enrollment, and one semester (fall or spring) in subsequent academic years. More information about Graduate Seminar requirements can be found in the Graduate Student Handbook on the Department of Industrial and Systems Engineering Graduate Program website. Credit in ISE:5000 and ENGR:7270 may be applied toward the 72 s.h. of required coursework.

Students must successfully complete coursework in each of three focus areas: see "Breadth Requirement" below. The academic advisor and/or examining committee may decide a student must complete other requirements such as additional coursework or the acquisition of specific skills. The actual amount of coursework required is determined with the advice and consent of the academic advisor. Students who earned an MS at the University of Iowa may have satisfied this requirement.
Students are typically expected to have completed three academic years of residence at the University of Iowa, or two years if they already hold a recognized Master of Science. For students who earned an MS at the University of Iowa, no more than 36 s.h. from the MS may be counted toward the PhD . For students who earned an MS from another institution, a maximum of 30 s.h. may be transferred toward the doctoral program. The director of graduate studies reviews the transcripts of new students to determine which requirements have been met from previous coursework.
Excellence in research is the principal requirement for the degree. It is expected that the PhD dissertation research project represents an original and significant contribution to the body of knowledge in the field. At least one accepted research article in a peer-reviewed journal as first author with the research advisor as a co-author, in addition to the presentation of the research in a departmental seminar, are requirements. Submission of three, first-authored papers and at least one research presentation at a national conference is typical. In addition, students must fulfill the qualifying requirement, pass the comprehensive examination, submit the Final Examination: Advanced Degree form, complete a Report of Thesis Approval, and submit a copy of their thesis to the Graduate College by following the published guidelines and deadlines.

## Breadth Requirement

Students must successfully complete at least 6 s.h. in approved courses numbered 5000 or above offered by the Department of Industrial and Systems Engineering in each of the three focus areas -analytics, human factors, and systems. Students with a relevant academic background in these areas may be excused from the breadth requirement with the approval of the director of graduate studies. Approved courses are listed below.

## Analytics

| Course \# | Title | Hours |

| ISE:6350 | Computational Intelligence | 3 |
| ISE:6810 | Advanced Topics on Additive <br> Manufacturing | 3 |

## Qualifying Exam

Students interested in pursuing a PhD are initially admitted as MS nonthesis students until they have completed the qualifying examination. This is typically achieved within their first three semesters if beginning the program without an MS, or within the first two semesters if beginning the program with an MS. Once the exam is passed, students are formally admitted to the PhD program. The purpose of this qualifier is to determine a student's proficiency in research and scholarship.

## Comprehensive Examination

The general rules for the administration of the PhD comprehensive examination are contained in the policies and procedures of the Graduate College. The tradition in the department is for the comprehensive examination to consist of a written and oral component. Students write and submit a comprehensive examination document, usually called the dissertation research proposal, to each member of the examination committee two weeks before the examination date. During the examination, students make a roughly 30 -minute presentation on the content of the research proposal. Committee members may ask questions regarding the proposal before, during, or after the oral presentation. Having satisfactorily completed the comprehensive examination, students are accepted as a candidate for the PhD .

## Final Examination (Dissertation Defense)

Each student must defend the completed dissertation in the final examination, which is conducted by the examining committee.

## En Passant Option

Students admitted to the PhD program may elect to earn their MS through the en passant option, with the permission of their PhD committee. This option allows students to write an English-language manuscript as the first author and submit it to a peer-reviewed research journal in lieu of writing the MS thesis. With this option, students, in conjunction with their academic advisor, author a paper that serves as the foundation for the PhD research. The decision to
select this option must be made before the qualifying examination. The committee may determine, based on the published or submitted scholarship to peer-reviewed journals, that the presentation of a separate research thesis is not necessary. In this case, up to 9 s.h. in ISE:5999 Research: Industrial Engineering MS Thesis may be counted towards the nonthesis option. Students choosing the en passant option generally receive an MS without the thesis designation.
For more detailed information about program requirements, see Graduate Student Handbook on the Department of Industrial and Systems Engineering Graduate Program website.

## Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations on the Graduate College website.

Admission to the graduate program is competitive and based on an applicant's previous coursework, research, and industrial experience. The general admission standards are intended to maintain the quality of the graduate program and to ensure sufficient preparation required for timely degree completion. Specific admission standards may be waived by the Graduate Admissions Committee when other evidence of competence is compelling. These standards are minimum standards, and meeting these standards does not ensure admission to the program; admitted students typically exceed these standards.

Applicants are expected to have a minimum cumulative grade-point average of at least 3.00 on a 4.00 scale, and have earned a BSE in industrial engineering degree or in a related science or engineering discipline. Applicants are not required to submit the results of the Graduate Record Examination (GRE) General Test.
International applicants whose first language is not English are required to submit the results of their Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), or Duolingo English Test (DET). Applicants who have completed a post-secondary degree at an English-speaking institution may request a waiver of this requirement. A minimum TOEFL score of 100 , a minimum IELTS score of 7 , or a minimum DET score of 105 is required for admission.
Applicants must arrange to have three letters of recommendation sent to the department online through the University of Iowa Office of Admissions website. The letters should be completed by persons who are well acquainted with the applicant and the ability of the applicant to undertake graduate work in industrial or systems engineering.
While the department considers applications at any time, first consideration is given to students who have their application materials, including their application, transcripts, English language test scores (DET, IELTS, or TOEFL), and the required letters of recommendation, completed by the admission priority deadline as found on the Iowa Graduate Admissions website. The director of graduate admissions is responsible for overseeing the graduate recruiting activities and the admissions procedures in the department. The director serves as the point of initial contact between prospective graduate students and the department, and maintains a record of each qualified applicant in the departmental office. The director, in consultation with the Graduate Admissions Committee and the department chair, screens applicants and ultimately determines which applicants are extended offers of admission.

## Applicants with Degrees Not in Industrial or Systems Engineering

The department encourages students with degrees in other scientific disciplines, such as computer science, mathematics, physics, or other engineering disciplines, to apply for admission. Some students may
have already completed MS degrees; however, these students are expected to attain proficiency in specified core areas of industrial and systems engineering equivalent to entering graduate students who hold a BSE degree in industrial engineering. The background of each student admitted to the program with a degree other than in industrial or systems engineering is reviewed by the faculty members. These proficiencies are intended to ensure that each admitted graduate student is able to fully participate in all industrial and systems engineering discipline areas at some level, even while advanced courses in certain areas may not be immediately accessible to all graduate students.

## Financial Support

Many graduate students who are actively engaged in research receive financial support through a combination of research and teaching assistantships and fellowships. Decisions about research assistantships are made by the individual faculty members and decisions about teaching assistantships are made by the department. Support is available on a semester or academic year basis. Stipends are approximately $\$ 25,000$ (half-time or 20 hours per week) for an academic year of graduate study. Other levels of support are also possible. If an award is made, nonresident students usually qualify for tuition at the resident rate, at approximately $\$ 10,000$ per academic year. Typically stipends are not immediately awarded to international applicants, but after admission and enrollment, an application can be made. Preference for graduate student support is given to PhD students.

Students should direct questions about the availability of financial support to faculty members in their primary area of study. Awards and reappointments are highly competitive and are based upon a student's academic record, prior performance, the ability to serve, and an assessment of the student's potential contribution to the research and teaching goals of the program.

For more information about departmental scholarships and funding opportunities, see Graduate Scholarships on the Department of Industrial and Systems Engineering website.

## Career Advancement

Industrial and systems engineers have many opportunities for employment and service in industrial, government, research, and public service organizations. Employment opportunities are among the most varied in the engineering field. Industrial and systems engineers are employed by manufacturing and energy firms, government agencies, and service organizations such as airlines, banks, hospitals, health care groups, and consulting companies.

The PhD is a gateway toward careers of learning and creation. Employers typically hire people with doctorates to run laboratories, create research directions, and supervise other engineers at the boundaries of knowledge. PhD-level researchers generally enjoy great freedom and tailored work environments as they explore and learn to help create new visions of tomorrow. A PhD opens up academic, research, and entrepreneurial possibilities limited only by one's drive and creativity. Positions are often found through announcements in trade journals, international conferences, and specialized job-posting services. Students often work with faculty to identify and apply for appropriate positions. It is rare that students do not find an appropriate position before completing their thesis.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be
discussed with an academic advisor. For additional sample plans, see MyUI.

# Mechanical Engineering 

## Chair

- Ching-Long Lin

Undergraduate major: mechanical engineering (BSE)
Graduate degrees: MS in mechanical engineering; PhD in mechanical engineering

Faculty: https://engineering.uiowa.edu/people/me-people
Website: https://me.engineering.uiowa.edu
The Department of Mechanical Engineering offers distinct undergraduate and graduate degrees and research programs in mechanical engineering. It also is the administrative home of the undergraduate Certificate in Naval Science and Technology, and the undergraduate and graduate Certificates in Artificial Intelligence, Modeling and Simulation in Engineering.

Mechanical engineering is broadly concerned with the energy, manufacturing, and design of machines. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of a wide variety of devices, machines, and systemsincluding complex human-machine systems-for energy conversion, biofuel production, environmental control, materials processing, transportation, materials handling, and other purposes. Major subspecialties of mechanical engineering include thermal-fluids engineering and mechanical systems engineering.

Thermal-fluid phenomena occur in many engineering systems and devices such as aircraft; automobiles; off-road vehicles; ships; gas turbines; heat exchangers; material processes; heating, ventilating, airconditioning, and refrigerating systems; hydraulic and wind turbines; airbag inflators; fuel cells; biofuel processes; environmental control devices; and biomedical systems.

Machines and mechanical systems are the foundations of human technology. Mechanical systems are found in mechanical engineering systems and devices such as manufacturing equipment, medical equipment, ground vehicles, heavy equipment, farm equipment, aircraft, ships, home appliances, packaging machinery, wind turbine blades and gearboxes, robots, and biomedical systems.

Mechanical engineers find a wide variety of career opportunities in industry, government, and education. Mechanical engineers form an integral part of most industries, including aerospace firms, energy companies, automobile manufacturers, health care providers, foodand metal-processing industries, petroleum refineries, electronic and computer manufacturers, heavy construction and agricultural vehicle manufacturers, wind turbine manufacturers, thermal comfort equipment firms, farm equipment firms, and consulting companies.

## Certificates

## Artificial Intelligence, Modeling and Simulation in Engineering

The Department of Mechanical Engineering offers the undergraduate and graduate certificate programs in Artificial Intelligence, Modeling and Simulation in Engineering; see Artificial Intelligence, Modeling and Simulation in Engineering [p. 1443] in the catalog.

## Naval Science and Technology

The Department of Mechanical Engineering offers the undergraduate certificate program in Naval Science and Technology; see the Certificate in Naval Science and Technology [p. 1583] in the catalog.

## Related Certificate: Transportation Planning

The graduate Certificate in Transportation Planning focuses on the varied and complex problems of transportation and on interdisciplinary approaches to addressing them. The departments of Civil and Environmental Engineering, Industrial and Systems Engineering, Mechanical Engineering (College of Engineering), and Economics (Tippie College of Business); and the School of Planning and Public Affairs (Graduate College) participate in the program.
The certificate is coordinated by the School of Planning and Public Affairs; see the Certificate in Transportation Planning [p. 1704] in the catalog.

## Programs

Undergraduate Program of Study

## Major

- Major in Mechanical Engineering (Bachelor of Science in Engineering) [p. 1570]

## Graduate Programs of Study

## Majors

- Master of Science in Mechanical Engineering [p. 1576]
- Doctor of Philosophy in Mechanical Engineering [p. 1579]

## Facilities

## Undergraduate Instruction

## Departmental Instructional Facilities

The Department of Mechanical Engineering maintains five laboratories for undergraduate student learning, which consist of the Advanced Manufacturing Laboratory; the Control, Automation, and Robotics Laboratory; the Engineering Manufacturing Laboratory; the Ralph and Barbara Stephens Experimental Engineering Laboratory; and two design project laboratories developed to facilitate collaboration on senior design projects and communication with project sponsors.

## Advanced Manufacturing Laboratory

The Advanced Manufacturing (AM) Laboratory supports the elective mechanical engineering undergraduate course ME:4116 Manufacturing Processes Simulations and Automation. The laboratory includes a variety of machine tools and instruments for students to practice nontraditional material processes and controls. Facilities and instrumentation include a three-axis CNC laser cutter (Bodor laser), an ultrasonic metal seam welder (Branson), an ultrasonic metal spot welder (Branson), and a 25 -programmable logic controller (Divelbiss). The facility uses the latest software technology, such as Abaqus, MATLAB, and EZ Ladder.

## Control, Automation, and Robotics Laboratory

The Control, Automation, and Robotics (CAR) Laboratory is located in the Seamans Center for the Engineering Arts and Sciences and is managed by the Department of Mechanical Engineering. It provides students with experience in advanced control, robotics, and autonomous systems. The lab is equipped with one industrial 6 -axis robotic arm, two Kuka mobile robots (KMR iiwa and KMP) with collaborative robotic arms, a desktop computer, two Roboception cameras, one co-act and one suction grippers, and four Quanser rotary servo base units. The facility has the latest software technology, such as LabVIEW and KUKA.Sim. The Quanser units are used in the laboratory assignments in ME:3600 Control of Mechanical

Engineering Systems, while the robotic systems are used in ME:4140 Modern Robotics and Automation. In fall 2019, two control laboratories were developed based on two Quanser base units. The control laboratories were developed and tested in CAR and set up to accommodate a large class size. Later, two additional base units and three accessory modules were purchased to expand the control laboratories. In addition, the robotics systems are used in ME:4111 Scientific Computing and Machine Learning and ME:4150 Artificial Intelligence in Engineering to assist in the instruction of relevant course materials. The CAR laboratory also is used by students who have permission to work in the lab on honors and research projects.

## Design Project Laboratories

The department also maintains two design project laboratories to support student teamwork on capstone design projects: the Design Lab and the MEDP/PEDE room. The Design Lab supports students taking the ME:4086 Mechanical Engineering Design Project and ME:4186 Enhanced Design Experience sequence in the Program for Enhanced Design Experience (PEDE) and Virtual International Project Teams (VIPT), whereas the MEDP/PEDE room is occupied by students completing the single-semester ME: 4086 Mechanical Engineering Design Project (MEDP) course, as well as for PEDE and VIPT students. The Design Lab contains four workstations with large monitors for collaborative design and analysis activities, as well as tables and chairs for group discussions. An integrated teleconferencing room is enclosed with glass windows so students can communicate with project sponsors. The teleconferencing room contains a 4K LED smart TV connected to a desktop computer, as well as a video camera, microphone and speaker, and a speaker phone for video conferencing and phone calls. The MEDP/PEDE room contains six computer workstations with four large computer monitors and two large TV monitors. There are four additional tables without workstations, two mobile whiteboards, and a sofa and mobile chairs for project design and collaborative activities.

## Engineering Manufacturing Laboratory

The Engineering Manufacturing Laboratory is located in the Seamans Center for the Engineering Arts and Sciences. The laboratory provides students with experience in advanced CAD/CAM systems. It is managed by the Department of Mechanical Engineering and the Department of Industrial and Systems Engineering. The lab is equipped with three-axis CNC mills (Haas and Tormach), a CNC router (Techno-CNC), a CNC lathe (Haas), a drill press, a plastic injection molder, thermoforming machine, a band saw, a disc sander, a bench grinder, polishing wheel, hand drill, sandblasting cabinet, a press, and a three-in-one shear/break/roll machine. The facility has the latest software technology, such as Creo Parametric and Rhinoceros 4.0. The machinery is used in laboratory assignments in ME:2300 Manufacturing Processes. The room is extensively used near the end of each semester for the course project. It also is used by students who have permission to work in the lab on their honors and research projects.

## Ralph and Barbara Stephens Experimental Engineering Laboratory

The Ralph and Barbara Stephens Experimental Engineering Laboratory supports required mechanical engineering undergraduate courses ME:3351 Engineering Instrumentation and ME:4080 Experimental Engineering.

## Collegiate Instructional Facilities

## Fluid Mechanics Laboratories

The College of Engineering and IIHR-Hydroscience and Engineering have a long history of excellence in fluid mechanics education dating back to the 1920s, when IIHR developed the fluids laboratory as a hands-on learning environment for fluids-related
disciplines within the College of Engineering. The long success of the institute's education program is due in large part to a new curriculum emphasizing scientific principles rather than merely practice in manipulating equipment.

IIHR is now modernized, expanded, and was relocated to the laboratory facilities, which were distributed throughout IIHR research facilities at the south end of the campus to the new Seamans Center Annex, where it occupies a 3,300 square foot laboratory suite. The laboratory suite comprises three distinct, but connected laboratory spaces. The Fluids Fundamentals Laboratory houses experiments that directly support formal laboratory instruction in College of Engineering courses. Through the lab-development project, existing experimental facilities were modernized, refurbished, installed, and additional experiments were developed. The laboratory has a large, reconfigurable open space in which different experiments and furnishings can be set up to support a variety of instructional activities.

The Fluids Workshop is the venue through which students can advance to independent and inquiry-driven, course-related, and extracurricular projects. The lab also supports the activities of College of Engineering student organizations. Advanced measurement instrumentation, computational hardware, and resources for developing experiments are available to students in the lab. Tables around the perimeter of the room contain additional PCs and Linux workstations for numerical computations, data analysis, and visualization.

The Advanced Measurements Laboratory houses major facilities supporting both instructional and inquiry-driven student activities. It contains three facilities that have been upgraded and relocated through this project: the vertical wind tunnel, the visualization water channel, and a towing tank whose functionality has been expanded to also serve as an open channel flume. The laboratory, which is also designed to facilitate the safe use of laser-based instrumentation, is located behind the two front laboratories and is accessible from both rooms.

The fluids laboratories support formal laboratory activities for several courses, including ENGR:2510 Fluid Mechanics taken by students in the biomedical, civil and environmental, and mechanical engineering departments; CEE:3371 Principles of Hydraulics and Hydrology; CEE:5380 Fluid Flows in Environmental Systems; ME:4125 Biomimetic Fluid Dynamics; and ME:4176 Experimental Naval Hydrodynamics.

Additionally, it has been used as a resource in many other courses, including BME:4920 Biomedical Engineering Senior Design II, ECE:4890 Senior Electrical and Computer Engineering Design, ME:4080 Experimental Engineering, ME:4086 Mechanical Engineering Design Project, ME:4098 Individual Investigations: Mechanical Engineering, and ME:4186 Enhanced Design Experience.

## Graduate Facilities

## Fluid Mechanics

The program in fluid mechanics is conducted in close collaboration with IIHR—Hydroscience and Engineering. The equipment available to graduate students includes several wind tunnels and hydraulic flumes, an environmental flow facility, towing tank, two special low-temperature flow facilities for investigation of ice phenomena, hot-wire and laser anemometer systems, particle-image velocimetry systems, and computer-based data acquisition systems. Facilities available in the department include a flow visualization and imaging system with charge-coupled devices (CCD) camera and a low-speed wind tunnel. IIHR and College of Engineering shops provide the necessary support. In addition to using in-house workstations and computers, the department's faculty members and students make extensive use of supercomputers at national centers.

## Mechanical Systems

Computer-based simulation research activities in the mechanical systems area are carried out mainly in the Iowa Technology Institute. It maintains a variety of high-performance computer systems in support of its technology research and development efforts. General computing services are supported by a number of Linux and Windows application servers connected to centralized file servers. Computer-aided design/computer-aided engineering (CAD/CAE), software development, virtual prototyping, and virtual environment development applications are hosted on numerous high-performance workstations. Standard desktop, multimedia, and office productivity applications are hosted on a network of more than 40 workstations.

## Thermal Sciences

Facilities for research in the thermal sciences and systems consist of a low-pressure combustion chamber, a high-pressure continuous flow combustion chamber, a high-pressure chamber for atomization study, a test rig for heat transfer to near supercritical fluids, a diffusion flame test rig, an enclosed laminar flame test rig, air atomization spray apparatus, test stands for melting and solidification studies, various optical measurement systems, and two fuel cell test rigs. Laser-based diagnostics (e.g., laser-induced fluorescence, imaging, and laser Doppler anemometry) are available for solidification, turbulent flow, heat transfer, and combustion studies. Flow visualization and imaging by CCD camera are available for the study of complex fluid motion and heat convection, and combustion flows.

## Courses <br> Mechanical Engineering Courses

ME:1000 First-Year Seminar
0-1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

ME:2020 Mechanical Engineering Program Seminar 0 s.h. Introduction to the mechanical engineering profession and curriculum; ethics and professionalism in classroom and workplace; mentorship program and professional societies; visits to laboratories and local companies.
ME:2200 Introduction to Mechanical Engineering Design 2 s.h. Solid modeling, assemblies, drawings, and Geometric Dimensioning and Tolerancing (GD\&T); basic engineering design process; introduction to engineering standards, product liability, and ethics. Prerequisites: ENGR:1100.

## ME:2300 Manufacturing Processes

3 s.h.
Fundamentals of design, engineering graphics, and manufacturing processing; computer graphics using Pro/ENGINEER for CAD and CAM; typical industrial processes including casting, welding, machining, and forming; laboratory exercises and projects. Corequisites: ENGR:2720 and (ME:2200 or BME:2710).

## ME:3040 Thermodynamics II

3 s.h.
Power and refrigeration cycles; mixtures of gases, psychometric mixtures; availability; thermodynamics of combustion and chemical equilibrium. Prerequisites: ENGR:2130.

## ME:3045 Heat Transfer

3 s.h.
Principles of heat transfer by conduction, convection, radiation; analytical and numerical methods of solution; applications to engineering problems. Prerequisites: MATH:3550 and ENGR:2510 and ENGR:1300.

ME:3052 Mechanical Systems
4 s.h.
Topics in mechanical behavior and failure of materials; materials selection in design; stress and deflection analysis; static failure theories; fatigue and durability in design; fracture, statistical, and reliability considerations; introduction to finite element analysis using commercial software packages; standards, product liability, engineering ethics. Prerequisites: ENGR:2750. Corequisites: ENGR:2720 and ME:2300 and STAT:2020.

ME:3091 Professional Seminar: Mechanical Engineering 0 s.h.
Professional aspects of mechanical engineering: presentations, student/faculty interaction, professional society involvement, panel discussions, plant trip. Prerequisites: ME:2020.
ME:3351 Engineering Instrumentation 2 s.h.
Basic elements of measuring circuits (bridges, voltage dividers, shunts, transformers); laboratory instrumentation (oscilloscopes, multimeters, power supplies, signal generators); amplifiers; frequency response principles; sensors; data acquisition, signal processing, filtering using Labview. Prerequisites: PHYS:1612 and ENGR:2120.
ME:3600 Control of Mechanical Engineering Systems 3 s.h. Introduction to fundamental control theory and robot manipulators. Prerequisites: MATH:2560 and ENGR:2710.
ME:4024 Product Design and Realization 3 s.h.
Design principles and methods to develop 3D part models and assemblies; emphasis on use of mechanical engineering design principles and functional requirements through the complete design process using PTC Creo Parametric; for students with a basic knowledge of computer-aided design (CAD). Prerequisites: ME:2200 or ME:2300. Corequisites: ENGR:2750.
ME:4048 Energy Systems Design
4 s.h.
Principles and design of energy conversion systems, including solar, wind, and geothermal power systems; design of thermal-fluid system components, modeling and simulation of systems, optimization techniques; design projects. Prerequisites: ME:3045.
ME:4055 Mechanical Systems Design 3 s.h.
Kinematics of mechanisms, dynamics and vibration of machines, cam and gear, machine elements, computer-aided analysis of machines. Prerequisites: ENGR:2710 and ME:3052.
ME:4080 Experimental Engineering
4 s.h.
Principles of physical measurements; standards calibration, estimation of error; static and dynamic performance of measuring systems; laboratory experience, experiment planning, report writing. Prerequisites: ME:3351 and ME:3045 and ME:3052.
ME:4086 Mechanical Engineering Design Project 3 s.h.
Application of mechanical, thermal, fluid systems design; student or team design projects initiated at various levels in the design process and carried through to higher levels; emphasis on synthesis, written and oral communication. Corequisites: ME:4048 or ME:4055.
ME:4098 Individual Investigations: Mechanical Engineering arr. Individual projects for mechanical engineering undergraduate students; laboratory study; engineering design project; analysis, synthesis, simulation of an engineering system; computer software development, research.
ME:4110 Computer-Aided Engineering
3 s.h.
Computational engineering modeling and simulation, geometric modeling, grid generation, finite-element and finite-volume methods, uncertainty analysis, optimization, engineering applications. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as CEE:4515.

## ME:4111 Scientific Computing and Machine Learning

Numerical methods in scientific computing; root problems and optimization; linear algebraic equations; eigenvalue problems; numerical differentiation and integration; interpolation and curvefitting; initial value and boundary value problems; machine learning in regression, classification, and clustering problems; Python programming and packages. Prerequisites: MATH:2560. Same as CEE:4511.

## ME:4112 Engineering Design Optimization

Engineering design projects involving modeling, formulation, and analysis using optimization concepts and principles; linear and nonlinear models, optimality conditions, numerical methods. Prerequisites: ENGR:2110 and MATH:2550. Requirements: junior standing. Same as CEE:4512.

## ME:4116 Manufacturing Processes Simulations and Automation

Material processing, metal cutting theories, forming, micro/nano fabrication, programmable logic controller, computer numerical controllers, discrete control system, DC and AC servo motors, Command generation. Prerequisites: ME:2300 or ISE:2360. Same as ISE:4116

## ME:4117 Finite Element Analysis

Trusses and frames; Rayleigh-Ritz methods; 2D and 3D elasticity problems; heat transfer, thermo-mechanical coupling; transient problems; use of commercial software for applications in analysis and design of mechanical engineering systems. Prerequisites: ENGR:2750.

## ME:4120 Advanced Linear Control Systems

3 s.h.
Overview of system modelling and classical control design tools and methods, and bridges those with state-space approach for analysis and control of linear systems in the time domain; topics include linearization, root locus, Bode diagrams, Nyquist criteria, robustness margins, lead-lag compensators, observability and controllability, state-space realizations, internal stability and input-output stability, pole-placement, observers and reduced order observers, separation principle, performance limitations, linear quadratic regulator and its guaranteed margins, and optimal estimation. Prerequisites: ME:3600.

## ME:4125 Biomimetic Fluid Dynamics

Study and development of engineered systems that mimic the structure and function of biological systems; overview of the fluid dynamic principles that govern locomotion by swimming or flapping flight; equations of motion, fundamentals of aerodynamics; analytical models of force generation for swimming and flight; parameters governing effective locomotion; experimental and numerical studies to understand the present state of the art, challenges, and important questions. Prerequisites: ENGR:2510.

## ME:4140 Modern Robotics and Automation

Introduction to basics of robotics and automation; mechanical design development and manufacturing of smart and automated devices, components, and systems; principles of robotic motion and kinematics; introduction to process automation through system requirement identification, equipment integration, sensors, actuation, and logical control; fundamentals of design, analysis, and manufacturing to meet functionality requirements of products, devices, and systems using the principles of mechatronics to develop smart and automated products. Prerequisites: ENGR:2710.

## ME:4145 Industrial Internet of Things (IIoT)

Introduction to process automation through system requirement identification, equipment integration, sensors, actuation, and logical control; fundamentals of design, analysis, and manufacturing to meet functionality requirements of products, devices, and systems using principles of mechatronics to develop smart and automated products; integration of advanced networking and monitoring into device control and automaton. Corequisites: ME:3351.

3 s.h. ME:4150 Artificial Intelligence in Engineering 3 s.h.
Artificial intelligence, computational intelligence, data science and engineering, machine intelligence, digital manufacturing and design, intelligent machining, fault diagnosis, autonomy, robotics; applications in mechanical engineering. Prerequisites: ME:4111.
ME:4153 Fundamentals of Vibrations 3 s.h.
Vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, and arbitrary excitation; modal analysis; applications. Prerequisites: ENGR:2750. Same as CEE:4532.
ME:4160 Engines and Power Plants
Fundamental principles of thermodynamics applied to areas of particular interest in mechanical engineering; power plants and refrigeration cycles, internal combustion engine cycles, gas mixtures and combustion, mixing processes and pollutant formation, and hybrid power systems. Prerequisites: ENGR:2130.
ME:4175 Computational Naval Hydrodynamics 3 s.h.
Simulations based on relevant vessels and propellers will be used to introduce the use of computational fluid dynamics for the analysis of surface and underwater marine craft performance, while also introducing naval hydrodynamics concepts related to resistance, propulsion, maneuvering, and seakeeping; an educational version of the naval hydrodynamics code REX will be freely distributed and used in the class. Prerequisites: ENGR:2510.
ME:4176 Experimental Naval Hydrodynamics 3 s.h.
Introduction to experimental methods for measurement of propeller thrust performance and resistance of surface vessels and underwater marine craft; present and expand on fundamental concepts related to fluid mechanics, measurement methods, and uncertainty analysis in a context that focuses on naval science and technology challenges; students work with models of relevant vessels and propellers in a dedicated towing tank facility. Prerequisites: ENGR:2510.
ME:4186 Enhanced Design Experience 2-3 s.h.
Experience working in teams on industry-sponsored design and product development projects scheduled for production; emphasis on practical experience with the complete design process, from conceptualization through prototyping, evaluation, testing, and production; written and oral communication. Prerequisites: ME:4086.
ME:4200 Modern Engineering Materials for Mechanical Design

3 s.h.
Overview of design approaches for different engineering materials (i.e., metals, polymers, ceramics); topics include manufacturing processes, smart and advanced functionalities for applications in emerging engineering fields, theoretical models describing mechanical behavior, failure mechanisms, and design criteria; introduction to composite materials; computer lab activities focus on finite element method (FEM) simulations of materials with different mechanical properties. Prerequisites: ME:3052.
ME:5113 Mathematical Methods in Engineering 3 s.h. Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: MATH:2550 and MATH:2560. Same as CBE:5140, CEE:5513.
ME:5114 Nonlinear Control in Robotic Systems 3 s.h.
Nonlinear analysis and control systems theory; focus on Lyapunovbased analysis methods and associated design techniques; introduction to definitions of stability for autonomous and nonautonomous systems leading to a Lyapunov framework, and based on the developed Lyapunov-based analysis tools, basic and advanced design tools for contemporary engineering problems are presented, including state-of-the-art techniques. Prerequisites: ME:3600 or ME:4120 or CBE:4105 or ECE:3600.

ME:5120 Vehicle System Dynamics

## 3 s.h.

Introduction to principles and basic procedures used in analysis of vehicle system dynamics and design; topics include tire mechanics, longitudinal and cornering tire force characteristics, steady-state and transient vehicle cornering responses, vehicle stability control, ride comfort, suspension design, off-road vehicle mobility, tiresoil interaction, and vehicle performance evaluations. Prerequisites: ENGR:2710.

ME:5143 Computational Fluid and Thermal Engineering 3 s.h.
Governing equations of fluid flow and heat transfer; basic numerical techniques for solution of the governing equations; estimation of accuracy and stability of the approximations; boundary conditions; grid generation; applications to flows and heat transfer in engineering systems; familiarity with software for analysis and design of thermofluids systems. Prerequisites: ME:3045.
ME:5145 Intermediate Heat Transfer
3 s.h.
Steady and unsteady conduction; forced and natural convection; surface and gaseous radiation; condensation and evaporation; analytical and numerical methods and applications. Prerequisites: ME:3045.
ME:5146 Modeling of Materials Processing
3 s.h.
Manufacturing processes for metals, polymers, semiconductors; processing by casting, solidification, crystal growth, polymer molding and extrusion, welding, heat treating, application of optical (laser) and electronmagnetic energy; processes that use momentum, heat, mass transfer principles; measurement and instrumentation for materials processing; current topics in materials processing. Corequisites: ME:3045.

## ME:5149 Propulsion Engineering

3 s.h.
Opportunity to develop basic understanding and knowledge of rocket and airbreathing propulsion systems; relevant terminology and analysis techniques, parameteric cycle analysis for ideal engines, offdesign analysis methods, problem-solving methodology. Prerequisites: ENGR:2130. Requirements: graduate standing.
ME:5150 Intermediate Mechanics of Deformable Bodies 3 s.h.
Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: ENGR:2750. Same as CEE:5540.

## ME:5154 Intermediate Kinematics and Dynamics

Kinematic and dynamic analysis of mechanical systems; computational kinematics, Lagrangian dynamics, principle of virtual work in dynamics, constrained dynamics, spatial dynamics. Prerequisites: ENGR:2710.

## ME:5159 Fracture Mechanics

3 s.h.
Three-dimensional stress states, definition and criteria for failure, nominal and local yield phenomena, linear elastic and elastic plastic fracture mechanics, plane stress and plane strain fracture toughness, J-Integral, crack opening displacement, environmental assisted cracking, fatigue crack growth, fail safe, and damage tolerant design. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as CEE:5549.

## ME:5160 Intermediate Mechanics of Fluids 3 s.h.

Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisites: ENGR:2510. Same as CEE:5369.

ME:5162 Experimental Methods in Fluid Mechanics and Heat Transfer
Hands-on experience in methodology of conducting experiments in fluid mechanics and heat transfer from design to data acquisition and processing; essential theoretical elements, experimental methodologies, data acquisition systems, uncertainty analysis; wide variety of instruments for fundamental and applied experimentation; work in small groups; design, implement, test, and report an experiment in area of interest. Same as CEE:5372.

## ME:5167 Composite Materials

3 s.h.
Mechanical behavior of composite materials and their engineering applications; composite constituents (fibers, particles, matrices) and their properties and behavior; macromechanical behavior of composite laminae; micromechanical predictions of composite overall properties; classical lamination theory; composite beams and plates. Prerequisites: ENGR:2750. Same as CEE:5137.
ME:5170 Data-Driven Analysis in Engineering Mechanics 3 s.h.
Exposure to machine learning approach of problem solving; modular course structure containing four or five modules, each concentrating on a particular class of problem; theories and techniques relevant to a class of problems taught in corresponding module. Prerequisites: ENGR:2750 and ME:4111.

## ME:5179 Continuum Mechanics

 arr.Mechanics of continuous media; kinematics of deformation, concepts of stress and strain; conservation laws of mass, momentum and energy; constitutive theories; boundary and initial value problems. Prerequisites: ENGR:2750 or ENGR:2510. Same as CEE:5179.
ME:5195 Contemporary Topics in Mechanical Engineering arr. New topics in fluid and thermal sciences and mechanical systems not covered in other courses; topic and coverage determined by student/ faculty interest. Requirements: junior standing.
ME:5210 Intermediate Thermodynamics
3 s.h.
Fundamental principles of thermodynamics as applied to phase equilibrium; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Requirements: CBE:3105 or ME:3040 or graduate standing. Same as CBE:5110.

## ME:5300 Uncertainty Quantification and Design

 Optimization3 s.h.
Analytical and computational methods for uncertainty quantification for a design optimization of mechanical and structural systems; brief review of probability theory, second-moment analysis, reliability analysis, robust design optimization, and reliability-based design optimization; use of commercially available software suites. Prerequisites: ENGR:2750 and STAT:2020. Corequisites: ME:3052.
ME:6115 Cooperative Autonomous Systems 3 s.h.
How to enable ground, marine, and aerial robotic platforms to perform cooperative tasks autonomously in complex real-world environments; theoretical topics include numerical approximation, optimal control, nonlinear analysis and control, game theory, and graph theory; project-based activities in a laboratory environment; focus on design and implementation of motion planning, tracking, collision avoidance, and cooperative control algorithms for autonomous vehicles. Prerequisites: ME:3600 or ME:4120 or CBE:4105 or ECE:3600.

## ME:6120 Mechatronics, Measurement, and Wearable Robotics

From accelerometers in phones, heart rate monitors in watches, fitness trackers, and smart clothing to robotic surgery and assistive devices, wearable sensors and robotics are increasingly all around us; introduction to different sensors, signals, and processing techniques needed to study movement; practical applications and scientific principles of sensors and actuators; work with real-world data; development of key research skills in literature review and experiment design through theoretical, programming, and hands-on coursework, presentations, and projects. Prerequisites: ME:3351 and ME:3600 and ME:5154.

## ME:6130 Novel Artificial Muscles and Sensors for Evolving

 Robotics
## Overview of novel smart materials-based actuators (i.e., artificial

 muscles) and sensors used in modern robotics (i.e., soft robotics, bioinspired robotics, assistive robotics); evolution from conventional actuators/sensors to novel actuators/sensors based on smart, flexible, and compliant materials; working mechanism, theoretical models, manufacturing, and applications for each type of artificial muscle/ sensor; lab demonstrations and activities involve manufacturing and testing of some artificial muscles and smart sensors.
## ME:6191 Graduate Seminar: Mechanical Engineering

Presentation and discussion of recent advances and research in mechanical engineering by guest lecturers, faculty, students.
ME:6198 Individual Investigations: Mechanical Engineering arr. Individual project in mechanical engineering, for department graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

## ME:6199 Research: Mechanical Engineering MS Thesis arr.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for MS with thesis in mechanical engineering.
ME:6214 Analytical Methods in Mechanical Systems 3 s.h. Vector and function spaces; functionals and operators in Hilbert spaces; calculus of variations and functional analysis with application to mechanics; Ritz and Galerkin methods. Prerequisites: ME:5113. Same as CEE:6310.

ME:6215 Finite Element II
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as CEE:6532, IGPI:6216.

## ME:6216 Laser Materials Processing

Proficient engineering background involved in laser processing and manufacturing; fundamentals and operation principles for various types of laser systems, laser optics, principles of laser-matter interactions, laser-induced thermal and thermo-mechanical effects; emerging areas of laser applications (e.g., microscale and nanoscale laser processing, ultrafast laser processing) and related energy transport analyses; video demonstrations. Prerequisites: ME:3045 and MATH:3550.

## ME:6217 Advanced Modeling and Simulation for

 ManufacturingHow materials often behave in a complicated manner involving deeply coupled effects among stress/stain, temperature, and microstructure during a manufacturing process; modeling and prediction of material processes based on a metallo-thermomechanical coupled analysis; focus on heat transfer modeling in material processes, fundamental mechanics aspects required for material processing analysis, and microstructural evolution modeling in material processes. Prerequisites: CEE:4533 and ME:3045.

3 s.h. 3 s.h.

ME:6240 Probabilistic Inference and Estimation for Mechanical 3 s.h. Systems 3 s.h.
Theory and application of common techniques for probabilistic inference and estimation including types of estimators; Bayesian, Kalman, and Particle filtering; various motion and measurement models; and algorithms for simultaneous localization and mapping (SLAM). Prerequisites: ME:4120. Requirements: some level of exposure to probability and statistics, linear algebra, and 3D rigid body dynamics.

ME:6245 Diffusive Transport 3 s.h.
Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies; analytical and numerical solution techniques; inverse heat conduction; multiphase and multicomponent systems. Prerequisites: ME:5145. Same as CBE:6145.
ME: 6255 Multiscale Computational Science and Engineering 3 s.h. Computational modeling of engineering materials ranging from molecular to continuum scales, molecular dynamics and Monte Carlo methods, nanoscale continuum modeling, scale-coupling methods. Prerequisites: ME:4117.

ME:6260 Viscous Flow
3 s.h.
Equations of viscous flow; classical analytical and numerical solutions; flow regimes and approximations; laminar boundary layers -equations, solution methods, applications; stability theory and transition; incompressible turbulent flow-mean-flow and Reynoldsstress equations, modeling, turbulent boundary layers and free shear flows. Requirements: for ME:6260—ME:5160; for CEE:6376CEE:5369. Same as CEE:6376.
ME:6261 Multibody System Dynamics
3 s.h.
Introduction to principles of analytical and computational dynamics for rigid and flexible multibody systems; spatial kinematics and dynamics of rigid body systems, numerical solution procedures for multibody dynamics analysis, and flexible multibody dynamics. Prerequisites: ME:5154.

## ME:6262 Inviscid Flow

3 s.h.
Derivation of governing equations for fluid flow; general theorems for motion of inviscid, incompressible flows; solution techniques for two- and three-dimensional irrotational flows; forces and moments acting on immersed bodies; vortex kinematics and dynamics; steady and unsteady aerodynamic theory. Prerequisites: ME:5160.

ME:6263 Compressible Flow
Compressible flow behavior; 1D unsteady flow and appropriate use of x-t diagrams; 2D flows and use of the method of characteristics; Burgers' Equation and its properties.

ME:6265 Multiscale Computational Science and Engineering3 s.h. Introduction to basic concepts of numerical techniques at nano/micro/ macro scales in various science and engineering disciplines; emphasis on recently developed hierarchical and concurrent multiscale methods; exposure to forefront of computational science and engineering. Prerequisites: ME:4117.

## ME:6278 Nonlinear Elasticity 3 s.h

Nonlinear elasticity theory; modern applications in biomechanics; vectors and tensors, constitutive theory of elastic material, some exact solutions of boundary value problems, inverse deformation relations, stability of elastic material, theories of tissue adaptive response. Prerequisites: ME:5150. Requirements: elementary linear elasticity.

## ME:6320 Fluid-Structure Interactions

Foundations of fluid-structure interactions (FSI) with focus on hydro-electric responses of flexible structures in dense fluids; structural dynamics and fluid dynamics are too often characterized as distinct disciples and this dichotomous mindset fails to recognize the important effects that dynamics fluid loads exert upon structural vibrations and vice-versa; students are equipped with knowledge to approach modern FSI problems; foundations of theoretical FSI, experimental methods, and computational approaches. Prerequisites: (ME:5160 or ME:4125) and (ME:4153 or ME:5154).
ME:6725 Microfabrication and Thin Film Materials
3 s.h.

3 s.h. ME:7269 Computational Fluid Dynamics and Heat Transfer 3 s.h. Development of numerical and algebraic approximations for elliptic, parabolic, hyperbolic partial differential equations; finite-volume, spectral, pseudo-spectral, Galerkin techniques; stability of numerical methods; CFL condition; stiff problems; adaptive grid generation and boundary-fitted coordinates; numerical solutions for one- and twodimensional compressible and incompressible fluid flow and heat transfer problems. Prerequisites: ME:4111 and ME:5160.

ME:7299 Research: Mechanical Engineering PhD Dissertationarr. Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for PhD in mechanical engineering.

Microfabrication and nanofabrication techniques and thin film materials growth used to create micro-, nano-, and optoelectronic devices that underlie modern technology; introduction to microfabrication techniques, physics, and chemistry; growth and properties of thin film materials upon which fabrication is performed; review of materials science; introduction to vacuum science and technology; survey of micro- and nano-devices; examination of thin film growth and deposition science, plasma etching and sputtering, micro- and nano-patterning and characterization, and film nucleation, growth, structure, and properties. Prerequisites: PHYS:2704 or CHEM:4430 or ME:3040. Recommendations: background in thermal and statistical physics, introductory quantum mechanics, and introductory chemistry. Same as PHYS:6725.

## ME:7248 Combustion Theory 3 s.h.

Laminar flame theory; turbulent combustion; spray combustion; thermal ignition; pollutant formation, oxidation; combustion diagnostics. Prerequisites: ME:5145 and ME:5160.

## ME:7250 Advanced Fracture Mechanics

 3 s.h.Fracture of modern engineering materials; linear-elastic fracture; computational methods; functionally graded materials; elastic-plastic fracture; multiscale fracture and fatigue crack initiation. Prerequisites: ME:5113 and (ME:5159 or CEE:4533). Same as CEE:7250.

## ME:7256 Computational Solid Mechanics 3 s.h.

Advanced computational methods for nonlinear and dynamic analysis of solids, structures; new space- and time-discretization methods for problems, including highly nonlinearities, large deformation, contact/ impact conditions. Prerequisites: ME:5113 and CEE:4533.

## ME:7257 Probabilistic Mechanics and Reliability <br> 3 s.h.

Stochastic and reliability analysis of mechanical systems; computational methods for structural reliability; random eigenvalue problem; random field and stochastic finite element methods. Prerequisites: CEE:4533 and ME:5113.

## ME:7266 Interfacial Flows and Transport Processes <br> 3 s.h.

Physics of fluid interfaces and numerical techniques to simulate interface dynamics; interfacial flow coupled with thermal-fluid transport, from molecular interactions to continuum approximations; development of computer code segments to track and represent interface-flow interactions. Prerequisites: ME:5145 and ME:5160.
ME:7267 Multiphase Flow and Transport 3 s.h.
Thermodynamic and mechanical aspects of interfacial phenomena and phase transitions; nucleation, phase-change, species transport, particulate flows, liquid-vapor systems, solidification, porous media. Prerequisites: ME:5145 and ME:5160.

## ME:7268 Turbulent Flows 3 s.h.

Origin; need for modeling, averages, Reynolds equations, statistical description; experimental methods and analysis; turbulence modeling; free shear layers and boundary layers; complex shearflows; development of computational strategies; recent literature on theory and applications, chaos phenomena. Prerequisites: ME:5160.

## Mechanical Engineering, BSE

The major in mechanical engineering lays a foundation in the basic disciplines of mathematics, physics, and chemistry and in the engineering sciences of statics, dynamics, thermodynamics, mechanics of deformable bodies, mechanics of fluids and transfer processes, materials science, and electrical sciences. An understanding of these sciences enables mechanical engineers to design parts of systems and understand whole systems, plan the production and use of energy, plan and operate industrial manufacturing facilities, and design automatic control systems for machines and other mechanical systems.
Mechanical engineering students develop an awareness of social and humanistic issues relating to business, environment, government, history, language, religion, and international relations. They also acquire an appreciation of professional and ethical responsibilities.

## Educational Objectives

Within a few years of graduation, graduates of the mechanical engineering program will:

- have successful careers in engineering and beyond and will have assumed professional roles of increasing responsibility and impact;
- have acquired new knowledge and expertise through professional development opportunities or advanced education; and
- be engaged in workplace, professional, or civic communities.

Graduates from the Department of Mechanical Engineering BSE program will be prepared to effectively contribute as engineers in a diverse and multidisciplinary work environment. They will have the ability to:

- identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
- apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare as well as global, cultural, social, environmental, and economic factors;
- communicate effectively with a range of audiences;
- recognize ethical and professional responsibilities in engineering situations and make informed judgments that consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
- function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
- develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions; and
- acquire and apply new knowledge as needed, using appropriate learning strategies.

## Requirements

The Bachelor of Science in Engineering with a major in mechanical engineering requires a minimum of 130 s.h. of credit. At the time of graduation, students must have a cumulative grade-point average of at least 2.00 in all college work used to complete degree requirements and in all UI coursework in order to be awarded the BSE.

All BSE students are required to take the same collegiate curriculum. For information about these collegiate requirements, see the Bachelor of Science in Engineering, BSE [p. 1448] in the catalog. Students completing the major in mechanical engineering fulfill the collegiate statistics requirement by completing STAT:2020 Probability and Statistics for the Engineering and Physical Sciences.

The major in mechanical engineering requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Collegiate Curriculum | 50 |
| Major Requirements (includes two 0 s.h. seminars) | 59 |
| Focus Area | 21 |

## Major Requirements

Major requirements include a set of common courses ( 56 s.h.), two departmental seminars ( 0 s.h.), and one capstone design course (3 s.h.).

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| All of these: |  |  |
| ME:2200 | Introduction to Mechanical | 2 |
|  | Engineering Design | 3 |
| ME:2300 | Manufacturing Processes | 3 |
| ME:3045 | Heat Transfer | 4 |
| ME:3052 | Mechanical Systems | 2 |
| ME:3351 | Engineering Instrumentation | 3 |
| ME:3600 | Control of Mechanical |  |
|  | Engineering Systems | 4 |
| ME:4048 | Energy Systems Design | 3 |
| ME:4055 | Mechanical Systems Design | 4 |
| ME:4080 | Experimental Engineering | 2 |
| ENGR:2110 | Statics | 3 |
| ENGR:2120 | Electrical Circuits | 3 |
| ENGR:2130 | Thermodynamics | 4 |
| ENGR:2510 | Fluid Mechanics | 3 |
| ENGR:2710 | Dynamics | 3 |
| ENGR:2720 | Materials Science | 3 |
| ENGR:2750 | Mechanics of Deformable | 3 |
| MATH:3550 | Bodies | 4 |
| PHYS:1612 | Engineering Mathematics V: | 4 |
|  | Vector Calculus |  |
|  | Introductory Physics II (with | 3 |

## Departmental Seminars

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: | Mechanical Engineering <br> ME:2020 | Program Seminar |
| ME:3091 | Professional Seminar: <br> Mechanical Engineering | 0 |

## Capstone Design Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Mechanical Engineering Design <br> Me: $: 4086$ | 3 |

## Focus Area

Students must select focus area courses according to guidelines established by the Department of Mechanical Engineering. The mechanical engineering program offers a variety of focus area options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests.

Standard focus areas are offered in energy and environment [p. 1571], manufacturing [p. 1571], mechanical engineering design [p. 1572], and robotics and autonomous systems [p. 1572]. For guidelines regarding tailored focus areas, see ME Focus Areas on the Department of Mechanical Engineering website.
Focus areas in mechanical engineering consist of required courses, focus area electives, and additional electives; carefully selected elective courses may contribute to earning a minor and/or certificate.

## Energy and Environment

Students in the energy and environment focus area complete one required course ( 3 s.h.), two focus area electives ( 6 s.h.), and four additional electives (12 s.h.).

## Required Energy and Environment Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| ME:5145 | Intermediate Heat Transfer | 3 |
| ME:5160/CEE:5369 | Intermediate Mechanics of | 3 |

## Energy and Environment Electives

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Two of these: |  |  |
| ME:4111/CEE:4511 | Scientific Computing and Machine Learning | 3 |
| ME:4160 | Engines and Power Plants | 3 |
| ME:5145 | Intermediate Heat Transfer | 3 |
| ME:5149 | Propulsion Engineering | 3 |
| ME:5160/CEE:5369 | Intermediate Mechanics of Fluids | 3 |
| CEE:4107/CBE:4410 | Sustainable Systems | 3 |

## Additional Electives-Energy and Environment

In addition to the courses listed below, students also may select courses not already taken from the list of approved energy and environment electives.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 12 s.h. from these: |  | 3 |
| ME:4024 | Product Design and Realization | 3 |
| ME:4125 | Biomimetic Fluid Dynamics | 3 |
| ME:4175 | Computational Naval <br> Hydrodynamics | $2-3$ |
| ME:4186 | Enhanced Design Experience | 3 |
| ME:5143 | Computational Fluid and <br> Thermal Engineering |  |
| ME:5210/CBE:5110 | Intermediate Thermodynamics | 3 |
| CBE:5405 | Green Chemical and Energy <br> Technologies | 3 |
| CBE:5415/IGPI:5415 | Satellite Image Processing and <br> Remote Sensing of Atmosphere | 3 |
| CBE:5417/IGPI:5417 | Physical Meteorology and <br> Atmospheric Radiative Transfer | 3 |
| CEE:3371 | Principles of Hydraulics and <br> Hydrology | 3 |
| CEE:4102 | Groundwater |  |
| CEE:4159/CBE:4459/ | Air Pollution Control <br> Technology | 3 |
| CEE:5159 | Fluid Flows in Environmental | 3 |
| ECE:5620 | Systems <br> Electric Power Systems | 3 |

| ISE:2500 | Engineering Economy | 3 |
| :--- | :--- | :--- |
| May include one of these: |  |  |
| EES:1080/ | Introduction to Environmental | 3 |
| ENVS:1080 | Science |  |
| EES:1290 | Energy and the Environment | 3 |

## Manufacturing

Students in the manufacturing focus area complete two required courses ( 6 s.h.), two focus area electives ( 6 s.h.), and three additional electives ( 9 s.h.).

## Required Manufacturing Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | ME:4111/CEE:4511 | Scientific Computing and <br> Machine Learning |
| And one of these: | 3 |  |
| ME:4116/ISE:4116 | Manufacturing Processes <br> Simulations and Automation | 3 |
| ME:4140 | Modern Robotics and <br> Automation | 3 |
| ME:5146 | Modeling of Materials <br> Processing | 3 |

## Manufacturing Electives

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Two of these: |  |  |
| ME:4024 | Product Design and Realization | 3 |
| ME:4116/ISE:4116 | Manufacturing Processes Simulations and Automation | 3 |
| ME:4140 | Modern Robotics and Automation | 3 |
| ME:4145 | Industrial Internet of Things (IIoT) | 3 |
| ME:4200 | Modern Engineering Materials for Mechanical Design | 3 |
| ME:5146 | Modeling of Materials Processing | 3 |
| ME:5167/CEE:5137 | Composite Materials | 3 |
| ME:5170 | Data-Driven Analysis in Engineering Mechanics | 3 |

## Additional Electives-Manufacturing

In addition to the courses listed below, students also may select courses not already taken from the list of approved manufacturing electives.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 9 s.h. from these: |  | 3 |
| ME:4110/CEE:4515 | Computer-Aided Engineering | 3 |
| ME:4112/CEE:4512 | Engineering Design <br> Optimization | 3 |
| ME:4117 | Finite Element Analysis | 3 |
| ME:4150 | Artificial Intelligence in | 3 |
| ME:4153/CEE:4532 | Fundamentals of Vibrations | $2-3$ |
| ME:4186 | Enhanced Design Experience | 3 |
| ME:5114 | Nonlinear Control in Robotic <br> Systems | 3 |
| ME:5143 | Computational Fluid and | 3 |
| ME:5145 | Thermal Engineering | 3 |

| ME:5159/CEE:5549 | Fracture Mechanics | 3 |
| :--- | :--- | :--- |
| ME:5300 | Uncertainty Quantification and <br> Design Optimization | 3 |
| BME:5620 | Introduction to Applied <br> Biomedical Finite Element <br> Modeling | 3 |
| ECE:5550 | Internet of Things | 3 |
| ISE:3300 | Manufacturing Systems | 3 |
| ISE:3600/CEE:3142/ | Quality Control | 3 |
| STAT:3620 | Operations Research | 3 |
| ISE:3700 | Design of Experiments for <br> Quality Improvement | 3 |
| ISE:4620 | Introduction to Six Sigma | 3 |

## Mechanical Engineering Design

Students in the mechanical engineering design focus area complete two required courses ( 6 s.h.), two focus area electives ( 6 s.h.), and three additional electives ( 9 s.h.).

## Required Design Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Both of these: |  | 3 |
| ME:4111/CEE:4511 | Scientific Computing and <br> Machine Learning | 3 |
| ME:4186 | Enhanced Design Experience | 3 |

Students in the mechanical engineering design focus area are required to apply for a yearlong design experience comprised of ME:4086 (see "Capstone Design Course" above) in the fall and ME:4186 in the spring. Students who are not accepted or who are unable to take the yearlong set of courses are required to replace ME:4186 with an additional design elective; see "Design Electives" below.

## Design Electives

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Two of these: |  |  |
| ME:4024 | Product Design and Realization | 3 |
| ME:4110/CEE:4515 | Computer-Aided Engineering | 3 |
| ME:4112/CEE:4512 | Engineering Design | 3 |
| ME:4117 | Optimization | 3 |
| ME:5143 | Finite Element Analysis | 3 |
| ME:5170 | Computational Fluid and <br> Thermal Engineering | 3 |
| ME:5300 | Data-Driven Analysis in |  |
|  | Engineering Mechanics |  |

## Additional Electives-Mechanical Engineering Design

In addition to the courses listed below, students also may select courses not already taken from the list of approved design electives.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 9 s.h. from these: |  | 3 |
| ME:4116/ISE:4116 | Manufacturing Processes <br> Simulations and Automation |  |
| ME:4120 | Advanced Linear Control |  |
| ME:4125 | Systems | 3 |
| ME:4140 | Biomimetic Fluid Dynamics | 3 |
|  | Modern Robotics and <br> Automation | 3 |

| ME:4145 | Industrial Internet of Things <br> (IloT) | 3 |
| :--- | :--- | ---: |
| ME:4150 | Artificial Intelligence in <br> Engineering | 3 |
| ME:4153/CEE:4532 | Fundamentals of Vibrations | 3 |
| ME:4175 | Computational Naval <br> Hydrodynamics | 3 |
| ME:4200 | Modern Engineering Materials <br> for Mechanical Design | 3 |
| ME:5114 | Nonlinear Control in Robotic <br> Systems | 3 |
| ME:5120 | Vehicle System Dynamics | 3 |
| ME:5145 | Intermediate Heat Transfer | 3 |
| ME:5149 | Propulsion Engineering | 3 |
| ME:5150/CEE:5540 | Intermediate Mechanics of <br> Deformable Bodies | 3 |
| ME:5154 | Intermediate Kinematics and |  |
| ME:5159/CEE:5549 | Dynamics | Fracture Mechanics |

## Robotics and Autonomous Systems

Students in the robotics and autonomous systems focus area complete two required courses ( 6 s.h.), two focus area electives ( 6 s.h.), and three additional electives ( 9 s.h.).

## Required Robotics and Autonomous Systems Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Both of these: |  |  |
| ME:4111/CEE:4511 | Scientific Computing and Machine Learning | 3 |
| ME:4120 | Advanced Linear Control Systems | 3 |

Robotics and Autonomous Systems Electives

| Course \# <br> Two of these: | Title | Hours |
| :--- | :--- | ---: |
| ME:4116/ISE:4116 | Manufacturing Processes <br> Simulations and Automation <br> Modern Robotics and <br> Automation | 3 |
| ME:4140 | Industrial Internet of Things <br> (IIoT) | 3 |

| ENGR:2730 | Design Optimization | 3 |
|  | Internet of Things | 3 |

## Combined Programs

## BSE/MS in Mechanical Engineering

A Bachelor of Science/Master of Science combined degree program is available for qualified University of Iowa undergraduate students. This allows students to complete an MS in two or three semesters after completion of their BSE degree. Those in the combined degree program receive a BSE when all requirements have been completed, and then become MS students in the Department of Mechanical Engineering (ME).

The Undergraduate to Graduate (U2G) combined degree program is primarily intended for students interested in pursuing the MS without thesis. However, the MS thesis option can be pursued in instances where students have been conducting research under the supervision of an ME faculty member since, at least, the summer following their junior year, and an ME faculty member is willing to advise them and serve as committee chair for their final exam.

Interested students should discuss the combined degree program with their advisor during their third year. Applications should be submitted during the second semester of their third year and before the start of their fourth year (two-semester blended model); see the U2G Program on the Department of Mechanical Engineering website. However, single-semester admits are allowed and must adhere to the application deadlines and other program requirements.

Accepted students are expected to have a minimum University of Iowa cumulative grade-point average (GPA) of at least of 3.25, and maintain this GPA throughout their time in the program. Undergraduate students whose UI cumulative GPA falls below this minimum are removed from the combined program.

Students may contact any ME faculty member to inquire about participation in the U2G combined degree program, research opportunities, and financial support.

## Program Benefits

Students may apply up to 12 s.h. of graduate-level coursework toward both their BSE and MS degrees. However, credit may not be applied to courses taken prior to admission to the combined degree program. Mechanical engineering courses eligible for graduate credit have a prefix of ME and are numbered 4100 or above, except for ME:4186

Enhanced Design Experience. The courses selected must fulfill MS coursework requirements and be applicable to BSE electives.

Students who select the thesis option can begin work on their MS thesis research with a faculty advisor during their fourth year of undergraduate studies.

Graduate Record Examination (GRE) General Test scores are not required for admission to the combined degree program. Students are assessed undergraduate tuition and fees until their BSE has been conferred; then, students are assessed graduate tuition and fees, and they may be eligible for graduate assistantships.

## Financial Support

Departmental funding preference is given to PhD students. Students can discuss financial support possibilities with their advisor.

## BSE/MS in Civil and Environmental Engineering

The combined BSE in mechanical engineering/MS in civil and environmental engineering enables undergraduate students majoring in mechanical engineering to begin work toward the MS in civil and environmental engineering while completing the bachelor's degree. Students admitted to the program may count 9 s.h. of coursework toward both the BSE and MS degree requirements. They also may count an additional $3 \mathrm{~s} . \mathrm{h}$. toward the MS degree requirements before they have been awarded the BSE. See the MS in civil and environmental engineering [p. 1511] in the catalog.

## Career Advancement

Engineering is a well-respected profession that is used as a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors consistently claim several of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). On average, $93-98 \%$ of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

| Course | Title | Hours |
| :---: | :---: | :---: |
| First Year |  |  |

|  | Hours | 16 |
|  | Total Hours | 131 |
| a Typically this course is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change. |  |  |
| b Enrollment in chemistry courses requires completion of a placement exam. |  |  |
| c Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change. |  |  |
| d Enrollment in math courses requires completion of a placement exam. |  |  |
| e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change. |  |  |
| f See General Catalog for list of approved course subjects. |  |  |
| g Students select a course from one of two GE CLAS Core areas: Diversity and Inclusion or Values and Culture. |  |  |
| h Typically this course is offered in spring semesters only. Check |  |  |
| i ME:2300 typically is offered in fall and spring sessions; STAT:2020 typically is offered in fall, spring, and summer sessions. Check MyUI for course availability since offerings are subject to change. |  |  |
| j Students select one of the preapproved standard focus areas or design a tailored focus area. Focus areas require at least 21 s.h. of coursework and consist of required course and electives. See General Catalog or consult an advisor for more information. |  |  |
| k See General Catalog for list of approved courses. Students who intend to enroll in a Be Creative course with prerequisites must request a waiver by completing the Request Prerequisite Special Permission form on MyUI. |  |  |
| 1 Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any |  |  |

questions on appropriate timing, contact your academic advisor or Graduation Services.

## Mechanical Engineering, MS

## Research

The mechanical engineering graduate program in the College of Engineering emphasizes in-depth learning and research. In collaboration with faculty across campus, the mechanical engineering faculty are currently researching a diverse range of topics within the field. For more information, see the Department of Mechanical Engineering website.

## Design and Uncertainty Quantification

The Design and Uncertainty Quantification focus area is concerned with the design optimization of complex mechanical systems in the presence of uncertainty. The focus area emphasizes developments of sound theoretical foundation, novel computational methods and algorithms, and modern software tools aimed at creating state-of-the-art engineering design of automotive, aerospace, naval, nuclear, and biomedical systems. Current areas of excellence include artificial muscles and smart materials design, ship hydrodynamics, design sensitivity analysis, uncertainty quantification, and reliability-based design optimization.

## Fluid Dynamics

The Fluid Dynamics focus area covers a wide variety of topics with the flow of liquids and gases as the common denominator. The graduate program in fluid dynamics emphasizes fundamental principles and applications, and the numerical and experimental techniques used to obtain and analyze fluid flows. Areas of concentration include computational fluid dynamics, experimental fluid dynamics, medical flows, naval hydrodynamics, biologically inspired air and underwater vehicles, multiphase flows, cavitation and ventilation, and fluid-structure interaction and turbulence, among others.

## Heat Transfer and Combustion

The Heat Transfer and Combustion focus area applies to real-world systems in manufacturing and materials processing, propulsion, energy production, and other areas. The graduate program emphasizes fundamental principles and techniques required for experimental and theoretical research. Current areas of research include solidification of materials, metal casting, 3D printing, laser-materials interaction, power plants and propulsion devices such as automobile and aircraft engines, energy conservation and production, energy storage, complex reactive materials, and machine learning in computational modeling and simulation.

## Manufacturing and Materials

The Manufacturing and Materials focus area involves fundamental materials processing science, technological advancement in manufacturing applications, and the development of new manufacturing processes and new material functions. Current and emerging thrust areas include solidification, metal casting, laser materials processing, micro- and nanofabrication, joining, ultrasonic welding, machining, microstructure evolution, manufacturing process modeling and simulation, artificial muscles, artificial camouflage, smart materials, and material characterizations. These research activities are well supported by federal and state agencies and the manufacturing industry.

## Robotics, Controls, and Autonomous Systems

Robotics, Controls, and Autonomous Systems (RCAS) are concerned with the modeling, analysis, design, and control of dynamic systems. The graduate program in RCAS emphasizes fundamental principles and techniques of robotics, control theory, and artificial intelligence.

Areas of concentration include computational intelligence, dynamic autonomous systems, cyber-physical systems, and networked robotic systems with potential applications in self-driving cars; medical and assistive robots for surgery and rehabilitation; industrial co-robots for human-robot collaboration; and uncrewed aerial, ground, and underwater vehicles.

## Solid Mechanics and Multibody Dynamics

Solid Mechanics and Multibody Dynamics are concerned with the behavior of solid materials and flexible bodies, especially their deformation, motion, and stress responses under the action of applied loads. The graduate program in solid mechanics and multibody dynamics emphasizes the theoretical foundations and problem-solving techniques for engineering applications. Current research focuses of the faculty include multiscale mechanics of materials, biomechanics, vehicle dynamics, computational mechanics, multibody dynamics, and optimization.

## Learning Outcomes

Graduates will:

- have a broad knowledge of mechanical engineering topics and advanced knowledge in their specific area of study;
- be able to analyze engineering problems and apply their knowledge to solve them, and thesis option graduates able to solve research-oriented problems; and
- develop professional skills that include effective communication, leadership, and ethical conduct in professional, social, and scholarly activities.

## Requirements

The Master of Science program in mechanical engineering requires a minimum of $30 \mathrm{~s} . \mathrm{h}$. of coursework and research, including a minimum of 12 s.h. in mechanical engineering courses (prefix ME) numbered 5000 or above. Students must maintain a cumulative gradepoint average of at least 3.00 in graduate work used to satisfy their requirements to earn the degree. The course plan should be approved by their advisor prior to registration each semester. All students choose either a thesis or nonthesis program.

The requirements for the MS may be completed within one calendar year. However, students with assistantship duties or other constraints may take up to two calendar years to complete their degree. Students must complete ENGR:7270 Engineering Ethics during their first fall semester in the program. They must register for ME: 6191 Graduate Seminar: Mechanical Engineering each fall and spring semester until successful completion of their final examination or thesis defense; credit in these courses does not substitute for regular coursework or research credit hours. For students who select the thesis option, normally 6 s.h., and no more than 9 s.h. of credit for thesis research is counted toward degree requirements in ME:6199 Research: Mechanical Engineering MS Thesis.

Thesis students must be successful in their final examination. The exam is administered by a student's committee, which consists of at least three faculty members, including at least one with a primary appointment in the Department of Mechanical Engineering. The nonthesis option does not include a final exam.

## Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations on the Graduate College website.

Applicants who have earned a baccalaureate or master's degree in engineering curriculum or in the mathematical or physical sciences are eligible to be considered for admission to graduate study in mechanical engineering. To be considered for regular admission, applicants must have a grade-point average (GPA) of at least 3.00 on a 4.00 scale in all previous college-level work.

## Minimum Requirements for Admission

Graduate Record Examination (GRE) General Test Requirements
GRE scores have been waived for applications to begin the program in the fall 2023 and spring 2024 semesters.

## International Student Requirements

Requirements include a TOEFL score of 550 or higher on the paperbased test (PBT) or a score of 81 or higher on the internet-based test (iBT). Alternatively, an International English Language Testing System (IELTS) score of 7 is required.
Newly admitted graduate students who present TOEFL scores below 600 on the PBT or below 100 on the iBT are required to complete an English Proficiency Evaluation on campus before their first registration for classes. IELTS test takers, regardless of score, are required to take an on-campus English Proficiency Evaluation.
There is no conditional admission for graduate students whose TOEFL scores are below 550 on the PBT, below 81 on the iBT, or below 6.5 on the IELTS.

Applicants with lower GPAs and/or GRE or TOEFL test scores may be considered for conditional admission under exceptional circumstances. Those admitted conditionally must achieve regular standing within one semester (excluding summer sessions) after admission by attaining a GPA of at least 3.00 on their first 9 s.h. at the University of Iowa. The Graduate College cancels registration for the subsequent semester for students who have not submitted their GRE and/or TOEFL scores by the end of the first semester after admission.
Some of the requirements may be waived in select cases when other components of the application are particularly outstanding. Satisfaction of the requirements does not guarantee admission.

## Applying for Admission

Refer to the Graduate Admissions website for information about applying for graduate studies.

## Graduate Application Deadlines

Applications for fall: Jan. 15 (application deadline), March 1 (admission decision).

Applications for spring: Sept. 1 (application deadline), Oct. 1 (admission decision).

All requirements must be fulfilled by the respective deadline dates. Applicants who apply after a deadline date must be sponsored by a mechanical engineering faculty member for a deadline waiver.

## Financial Support

Financial support is available to MS students, primarily through graduate assistantships in teaching or research from the Department of Mechanical Engineering, the Driving Safety Research Institute, IIHR -Hydroscience and Engineering, and the University of Iowa Technology Institute. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on a student's potential contribution to the teaching and research goals of the department. Students who fulfill their assistantship responsibilities and continue to make
satisfactory progress toward their degree objective receive preference in new assistantship awards. Decisions about research and teaching assistantships are made by individual faculty members. Students should direct questions about the availability of financial support to faculty members in their primary area of study.
Students with assistantship appointments of one-quarter-time or more must register for a minimum of $9 \mathrm{~s} . \mathrm{h}$. during fall and spring semesters until they have completed 30 s.h. of coursework and research beyond the baccalaureate degree.

## Career Advancement

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Mechanical Engineering, PhD

## Research

The mechanical engineering graduate program in the College of Engineering emphasizes in-depth learning and research. In collaboration with faculty across campus, the mechanical engineering faculty are currently researching a diverse range of topics within the field. For more information, see the Department of Mechanical Engineering website.

## Design and Uncertainty Quantification

The Design and Uncertainty Quantification focus area is concerned with the design optimization of complex mechanical systems in the presence of uncertainty. The focus area emphasizes developments of sound theoretical foundation, novel computational methods and algorithms, and modern software tools aimed at creating state-of-the-art engineering design of automotive, aerospace, naval, nuclear, and biomedical systems. Current areas of excellence include artificial muscles and smart materials design, ship hydrodynamics, design sensitivity analysis, uncertainty quantification, and reliability-based design optimization.

## Fluid Dynamics

The Fluid Dynamics focus area covers a wide variety of topics with flow of liquids and gases as the common denominator. The graduate program in fluid dynamics emphasizes fundamental principles and applications, and the numerical and experimental techniques used to obtain and analyze fluid flows. Areas of concentration include computational fluid dynamics, experimental fluid dynamics, medical flows, naval hydrodynamics, biologically inspired air and underwater vehicles, multiphase flows, cavitation and ventilation, and fluidstructure interaction and turbulence, among others.

## Heat Transfer and Combustion

The Heat Transfer and Combustion focus area applies to real-world systems in manufacturing and materials processing, propulsion, energy production, and other areas. The graduate program emphasizes fundamental principles and techniques required for experimental and theoretical research. Current areas of research include solidification of materials, metal casting, 3D printing, laser-materials interaction, power plants and propulsion devices such as automobile and aircraft engines, energy conservation and production, energy storage, complex reactive materials, and machine learning in computational modeling and simulation.

## Manufacturing and Materials

The Manufacturing and Materials focus area involves fundamental materials processing science, technological advancement in manufacturing applications, and the development of new manufacturing processes and new material functions. Current and emerging thrust areas include solidification, metal casting, laser materials processing, micro- and nanofabrication, joining, ultrasonic welding, machining, microstructure evolution, manufacturing process modeling and simulation, artificial muscles, artificial camouflage, smart materials, and material characterizations. These research activities are well supported by federal and state agencies and the manufacturing industry.

## Robotics, Controls, and Autonomous Systems

Robotics, Controls, and Autonomous Systems (RCAS) are concerned with the modeling, analysis, design, and control of dynamic systems. The graduate program in RCAS emphasizes fundamental principles and techniques of robotics, control theory, and artificial intelligence. Areas of concentration include computational intelligence, dynamic
autonomous systems, cyber-physical systems, and networked robotic systems with potential applications in self-driving cars; medical and assistive robots for surgery and rehabilitation; industrial co-robots for human-robot collaboration; and uncrewed aerial, ground, and underwater vehicles.

## Solid Mechanics and Multibody Dynamics

Solid Mechanics and Multibody Dynamics are concerned with the behavior of solid materials and flexible bodies, especially their deformation, motion, and stress responses under the action of applied loads. The graduate program in solid mechanics and multibody dynamics emphasizes the theoretical foundations and problem-solving techniques for engineering applications. Current research focuses of the faculty include multiscale mechanics of materials, biomechanics, vehicle dynamics, computational mechanics, multibody dynamics, and optimization.

## Learning Outcomes

Graduates will:

- have extensive knowledge of mechanical engineering topics and mastery of advanced concepts in their specific area of study;
- be able to identify, formulate, analyze, and solve research problems, thereby advancing knowledge through creative scholarship; and
- develop professional skills that include effective communication, leadership, and ethical conduct in professional, social, and scholarly activities.

## Requirements

The Doctor of Philosophy program in mechanical engineering requires 72 s.h. of graduate credit, including a minimum of 42 s.h. in mechanical engineering courses (prefix ME) with at least 12 s.h. selected from courses numbered 6000 or above. Students also must complete a minimum of 12 s.h. in thesis research in ME:7299 Research: Mechanical Engineering PhD Dissertation. A maximum of 30 credits of transfer credit may be applied toward the degree and coursework requirements. Students must maintain a cumulative gradepoint average higher than 3.25 to earn the degree.

To be formally admitted to the PhD program, students must pass the qualifying examination. Information regarding the details of the qualifying exam procedure can be obtained from the Department of Mechanical Engineering website.

Students must complete ENGR:7270 Engineering Ethics during their first fall semester of enrollment. They must register for ME:6191 Graduate Seminar: Mechanical Engineering each fall and spring semester until successful completion of their final examination or thesis defense; credit in these courses does not substitute for regular coursework or research credit hours. They must have their course plan approved by their advisor prior to registration each semester.

## Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations on the Graduate College website.

## Minimum Requirements for Admission Graduate Record Examination (GRE) General Test Requirements

GRE scores have been waived for applications to begin the program in the fall 2022 and spring 2023 semesters.

## International Student Requirements

Requirements include a TOEFL score of 550 or higher on the paperbased test (PBT) or a score of 81 or higher on the internet-based test (iBT). Alternatively, an International English Language Testing System (IELTS) score of 7 is required.

Newly admitted graduate students who present TOEFL scores below 600 on the PBT or below 100 on the iBT are required to complete an English Proficiency Evaluation on campus before their first registration for classes. IELTS test takers, regardless of score, are required to take an on-campus English Proficiency Evaluation.
There is no conditional admission for graduate students whose TOEFL scores are below 550 on the PBT, below 81 on the iBT, or below 6.5 on the IELTS.

Applicants with lower grade-point averages (GPAs) and/or GRE or TOEFL test scores may be considered for conditional admission under exceptional circumstances. Those admitted conditionally must achieve regular standing within one semester (excluding summer sessions) after admission by attaining a GPA of at least 3.00 on their first 9 s.h. at the University of Iowa. The Graduate College cancels registration for the subsequent semester for students who have not submitted their GRE and/or TOEFL scores by the end of the first semester after admission.

Some of the requirements may be waived in select cases when other components of the application are particularly outstanding. Satisfaction of the requirements does not guarantee admission.

## Other Requirements

Students must have earned a minimum GPA of at least 3.00 on a 4.00 scale, submit three letters of recommendation, unofficial transcripts (with official transcripts submitted if accepted), and a statement of purpose.

## Applying for Admission

Refer to the University of Iowa Graduate Admissions website for information about applying for graduate studies.

## Graduate Application Deadlines

Applications for fall: Jan. 15 (application deadline), March 1 (admission decision).

Applications for spring: Sept. 1 (application deadline), Oct. 1 (admission decision).

All requirements must be fulfilled by the respective deadline dates. Applicants who apply after a deadline date must be sponsored by a mechanical engineering faculty member for a deadline waiver.

## Financial Support

Financial support is available to PhD students, primarily through graduate assistantships in teaching or research from the Department of Mechanical Engineering, the Driving Safety Research Institute, IIHR -Hydroscience and Engineering, and the University of Iowa Technology Institute. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on a student's potential contribution to the teaching and research goals of the department. Students who fulfill their assistantship responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new assistantship awards.
Students with assistantship appointments of one-quarter-time or more must register for a minimum of 9 s.h. during fall and spring semesters until they have completed 72 s.h. of coursework and research beyond the baccalaureate degree. Once they meet these minimums, students
must register for a graduate seminar each semester until they have successfully completed their final examination or thesis defense. All registrations should accurately reflect the amount and type of work undertaken, the use of university facilities, and the amount of consultation with the faculty.

## Career Advancement

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. Engineering Career Services partners with the Pomerantz Career Center to facilitate on-campus interviewing, postgraduation outcome collection, and the university's online recruiting system, Handshake.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students may design their program around a particular research and study area; see General Catalog and ME website for specifics.

Work with faculty advisor to determine appropriate graduate level coursework and sequence.
b A minimum of $42 \mathrm{~s} . \mathrm{h}$. (not including thesis research) must be from courses taken beyond the BS degree. Of these a minimum of 12 s.h. must be from Mechanical Engineering courses numbered 6000 or higher. Students may also select Mechanical Engineering courses numbered 4100 or higher except for ME:4186 which is not eligible for graduate credit.
c Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
d Complete two qualifying exam courses during first two semesters in the program; must take ME:5113 plus one graduate level course in a focus area with a grade of A-minus or higher in each. Focus area courses are chosen in consultation with the faculty advisor from a specified list. More information is found in the General Catalog and on department website.
e Must be completed during first semester.
f Credit for this course does not substitute for regular coursework or research credit hours.
g Attendance required every fall and spring semester until degree completion.
h Work with academic advisor to determine elective graduate coursework and sequence.
i Submit dissertation prospectus to the exam committee not later than two weeks before the comprehensive exam.
j Oral exam to be completed after passing the qualifying exam and upon completion of coursework in the specified area of study no later than 28 months after entering the doctoral program. The exam will focus on the dissertation prospectus and related areas.
k Complete a minimum $12 \mathrm{~s} . \mathrm{h}$. of credit in thesis research.
1 Dissertation defense.

## Naval Science and Technology

Chair, Department of Mechanical Engineering<br>- Ching-Long Lin

## Undergraduate certificate: naval science and technology

Website: https://me.engineering.uiowa.edu/undergraduate/certificate-naval-st

Naval science and technology has a tremendous impact upon defense, world commerce, and energy production. The U.S. Navy is expanding its fleet to the largest size in nearly 20 years. Approximately $90 \%$ of world trade is carried by sea. The number of offshore solar, wind, and wave energy installations continues to increase.
The underlying science and technology challenges demand a workforce with a strong foundation in the engineering sciences related to fluid flow, computational and experimental methods, autonomous systems, and control. The Certificate in Naval Science and Technology introduces students to the principles of naval hydrodynamics, including propulsion, resistance, maneuvering, and seakeeping, as well as the fundamentals of autonomous systems, including control systems, robotics, and artificial intelligence.

Students who complete the certificate will work in a unique learning community where they will have an opportunity to contribute to projects of interest to the Navy and its supporting industry, and learn about potential career paths.

The Certificate in Naval Science and Technology is administered by the Department of Mechanical Engineering [p. 1563].

## Learning Objectives

The Certificate in Naval Science and Technology is built on eight learning objectives. The first six learning objectives are focused on providing students with strong technical and leadership skills and an understanding of marine systems enabling them to work effectively in naval science and technology and other technology-intensive fields. Specifically, students will achieve the following.

- Demonstrate a foundation in the fundamentals of fluid mechanics and naval hydrodynamics.
- Use advanced numerical methods and/or measurement techniques to solve fluid-flow problems and design systems involving naval hydrodynamics.
- Demonstrate a foundation in the fundamentals of control theory and artificial intelligence, including optimal control, tracking, planning, machine learning, and reinforcement learning.
- Use simulators and experiments to evaluate, simulate, and design autonomous naval systems.
- Develop potential for continued growth and leadership in a complex and multidisciplinary technical environment.
- Demonstrate organization and communication skills needed to manage open-ended projects.
The final two learning objectives focus on understanding the challenges faced by the Navy and helping students to identify related career paths.
- Recognize and address current science and technology challenges faced by the Navy.
- Be able to make decisions about career paths in the Navy, its contractors, and supporting industry.

## Programs

Undergraduate Program of Study

## Certificate

- Certificate in Naval Science and Technology [p. 1583]

## Naval Science and Technology, Certificate

## Requirements

The undergraduate Certificate in Naval Science and Technology requires 18 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in work for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

All of the certificate courses have prerequisites; students must complete all of a course's prerequisites before they may register for the course. Prerequisites do not count toward the 18 s.h. required for the certificate.

Mechanical engineering students may use the certificate as a tailored engineering focus area by adding an additional eligible course. In addition, mechanical engineering students may earn the Certificate in Naval Science and Technology while they complete either the design or the robotics and autonomous systems focus area for their major. For examples of combined plans of study, visit Naval Science and Technology Certificate on the Department of Mechanical Engineering website. College of Engineering students earning the certificate are advised by the Department of Mechanical Engineering.
The Certificate in Naval Science and Technology requires the following coursework.

## Naval Hydrodynamics Courses

In certain circumstances, if it is not possible for students to complete two of these courses, they may request permission to take ME:5143 Computational Fluid and Thermal Engineering instead of ME:4175 Computational Naval Hydrodynamics.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least two of these: |  | 3 |
| ME:4125 | Biomimetic Fluid Dynamics | 3 |
| ME:4175 | Computational Naval <br> Hydrodynamics | 3 |
| ME:4176 | Experimental Naval <br> Hydrodynamics |  |

## Autonomous Systems and Machine Learning Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| At least two of these: |  | 3 |
| ME:4111/CEE:4511 | Scientific Computing and <br> Machine Learning | 3 |
| ME:5114 | Nonlinear Control in Robotic <br> Systems <br> Cooperative Autonomous <br> Systems 6115 | Sy |

## Capstone Course

Students must complete either a capstone design project on an approved naval science and technology topic or an independent investigation involving research or testing of a system related to naval hydrodynamics. If a student chooses, both courses may be completed for credit toward the certificate.

| Course \# <br> One or both of these: | Title | Hours |
| :--- | :--- | ---: |
| ME:4098 | Individual Investigations: <br> Mechanical Engineering <br> (students must register for at <br> least 3 s.h.) | arr. |
| ME:4186 | Enhanced Design Experience <br> (subject to approval of <br> application for capstone design <br> path; ME: 4086 is a prerequisite <br> course) | 3 |

## Electives

Students select the remainder of the 18 s.h. required for the certificate from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ME:4116/ISE:4116 | Manufacturing Processes <br> Simulations and Automation | 3 |
| ME:4120 | Advanced Linear Control <br> Systems | 3 |
| ME:4140 | Modern Robotics and <br> Automation | 3 |
| ME:4150 | Artificial Intelligence in <br> Engineering <br> Modern Engineering Materials <br> for Mechanical Design | 3 |
| ME:4200 | Computational Fluid and <br> Thermal Engineering | 3 |
| ME:5143 | Intermediate Mechanics of | 3 |
| ME:5160/CEE:5369 | Fluids | 3 |

## Sustainable Water <br> Development

## Chair, Department of Civil and Environmental

## Engineering

- A. Allen Bradley Jr.

Graduate certificate: sustainable water development
Website: https://cee.engineering.uiowa.edu/graduate-program/ sustainable-water-development-graduate-certificate

The Certificate in Sustainable Water Development trains science, technology, engineering, and mathematics (STEM) graduate students to address future challenges of water scarcity and variability while also meeting the food and energy demands of Earth's growing population. The certificate leverages a unique learning environment focused on water sustainability that extends beyond any one discipline, department, or college.

The Certificate in Sustainable Water Development is administered by the Department of Civil and Environmental Engineering [p. 1492].

## Programs

Graduate Program of Study

## Certificate

- Certificate in Sustainable Water Development [p. 1585]

## Sustainable Water Development, Graduate Certificate

## Requirements

The graduate Certificate in Sustainable Water Development requires 15 s.h. of credit, including at least 9 s.h. earned at the University of Iowa. The 5000 -level courses required for the certificate must be taken at the University of Iowa. Students must maintain a grade-point average of at least 2.50 in work for the certificate. The certificate is open to graduate students currently enrolled at the University of Iowa who are completing a degree program.
The Certificate in Sustainable Water Development requires the following coursework.

## Required Courses

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| All of these: | Water, Energy, and Food <br> Nexus Seminar (taken for two <br> semesters) | 0 |
| CEE:5350 | Watershed Hydrology and <br> Ecosystem Processes | 3 |
| CEE:5410 | Politics and Economics of the <br> Food, Energy, Water Nexus | 3 |

## Admission

Students must:

- be in a relevant science, technology, engineering, or mathematics (STEM) field;
- submit their University of Iowa transcript;
- have a graduate grade-point average (GPA) higher than 3.00 if in doctoral program or a GPA higher than 2.75 if in master's program;
- submit their résumé or curriculum vitae;
- provide a statement of purpose of 500 words or less about their core research and training program, and why the certificate program will benefit their training and goals for career placement; and
- provide a letter of endorsement from their advisor.

Admission to the certificate program is competitive. Applications are accepted on a rolling basis and are reviewed by the Sustainable Water Development Program; applications can be submitted online along with pertinent materials. Students receive an email after an admission decision has been made.

## Technological <br> Entrepreneurship

Undergraduate certificate: technological entrepreneurship
Website: https://engineering.uiowa.edu/academics/first-year-students/ programs-study-majors-minors-and-certificates/technological
The College of Engineering partners with the John Pappajohn Entrepreneurial Center in the Tippie College of Business to offer the Certificate in Technological Entrepreneurship.

The program is intended for students who would like to develop an understanding of how to manage innovation in business environments as well as those who plan to start and operate their own businesses.
Students who complete the certificate program are able to:

- gain exposure to understanding sound business thinking;
- employ a more innovative and creative mindset in problem solving;
- learn how to create a business plan as skillfully as solving difficult engineering equations;
- understand the entrepreneurial approach to acquiring and managing resources;
- acquire team-building skills critical in both small and large companies;
- get insights in how to bridge engineering and business problems; and
- obtain valuable contacts and network opportunities with successful, thriving businesses and industries.
The Certificate in Technological Entrepreneurship is administered by the College of Engineering [p. 1436].

## Programs

## Undergraduate Program of Study

## Certificate

- Certificate in Technological Entrepreneurship [p. 1588]

## Technological <br> Entrepreneurship, Certificate

## Requirements

The undergraduate Certificate in Technological Entrepreneurship requires a minimum of $18 \mathrm{~s} . \mathrm{h}$. of credit. Students must complete at least $12 \mathrm{~s} . \mathrm{h}$. of the $18 \mathrm{~s} . \mathrm{h}$. required for the certificate at the University of Iowa or in approved study abroad courses. They must maintain a grade-point average (GPA) of at least 2.00 in work toward the certificate.

The certificate program is open to Bachelor of Science in Engineering students who have earned at least $45 \mathrm{~s} . \mathrm{h}$. of credit toward the BSE and have a University of Iowa GPA of at least 2.75. Students must be granted the BSE and complete all certificate requirements in order to receive the certificate.

Students must declare their intention to pursue the certificate on MyUI and must apply for admission; visit Technological Entrepreneurship Certificate on the College of Engineering website for more information.

Certificate students study how the entrepreneurial process relates to technology-based businesses. The program is intended for students who would like to develop an understanding of how to manage innovation in business environments as well as those who plan to start and operate their own businesses.

The Certificate in Technological Entrepreneurship requires the following coursework.

## Foundation Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| ISE:2500 | Engineering Economy | 3 |
| Entrepreneurship Core | Hours |  |
| Course \# | Title |  |
| Both of these: | Entrepreneurship and | 3 |
| ENTR:2000 | Innovation |  |
| ENTR:3100 | Entrepreneurial Finance | 3 |

## Entrepreneurship Course in the Major

| Course \# <br> One of these, depending on a student's engineering <br> major: | Title | Hours |
| :--- | :--- | :---: |
| BME:4910 | Biomedical Engineering <br> Senior Design I (biomedical <br> engineering majors) | 4 |
| CBE:4109 | Chemical Engineering Process <br> Design I (chemical engineering <br> majors) | 2 |
| CEE:4850 | Project Design and Management <br> in Civil Engineering (civil and <br> environmental engineering <br> majors) | 3 |
| Senior Electrical and Computer <br> Engineering Design (electrical <br> and computer science <br> engineering majors) | 3 |  |

## Entrepreneurship Electives

Students customize their programs with their choice of electives. They must earn sufficient elective credit to complete the 18 s.h. required for the certificate.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| BME:4920 | Biomedical Engineering Senior Design II | 4 |
| ENTR:3200 | Entrepreneurial Marketing | 3 |
| ENTR:3350 | Entrepreneurial Strategy | 3 |
| ENTR:3400 | Strategic Management of Technology and Innovation | 3 |
| ENTR:3500 | Social Entrepreneurship | 3 |
| ENTR:3550 | Commercializing New Technology I | 3 |
| ENTR:3575 | Commercializing New Technology II | 3 |
| ENTR:3595 | Nonprofit Organizational Effectiveness I | 3 |
| ENTR:3600 | E-Commerce Strategies for Entrepreneurs | 3 |
| ENTR:3700 | Sustainable Product Innovation and Management | 3 |
| ENTR:4000 | Topics in Entrepreneurship | 3 |
| ENTR:4100 | International Entrepreneurship, Culture, and Social Impact | 1-3 |
| ENTR:4200 | Entrepreneurship: Business Consulting | 3 |
| ENTR:4300 | Launching an Entrepreneurial Venture | 3 |
| ENTR:4400 | Managing the Growth Business | 3 |
| ENTR:4460 | Entrepreneurship and Global Trade | 3 |
| ENTR:4510 | Arts Leadership Seminar | 3 |
| ENTR:4900 | Academic Internship | 1-9 |
| Any entrepre certificate ad | course (prefix ENTR), with proval |  |

# Graduate College 

## Dean

- Amanda H. Thein

## Associate Dean

- Michelle L. Campo

## Assistant Deans

- Heidi Arbisi-Kelm, Jennifer Teitle

Website: https://grad.uiowa.edu
The University of Iowa has been a leading center of advanced study for more than a century. Presently, the Graduate College accounts for nearly one-fifth of the university's total enrollment. This high ratio reflects the breadth of the university's graduate programs and resources, the strength of a graduate faculty with a long tradition of personal and professional concern for students, and the opportunities afforded graduate students for involvement, recognition, and support.
The Graduate College is responsible for the review and approval of proposals for new graduate programs and for the periodic survey and evaluation of existing programs. Through its administration of scholarship, fellowship, and research assistantship funds, the college encourages research and strengthening of departments. Additionally, the college works with the other colleges and departments of the university to formulate policies concerning the selection, supervision, and support of graduate students.

The faculty of the Graduate College is made up of all university tenure-track faculty members at the ranks of assistant professor, associate professor, and professor. The Graduate Council, elected from and by the graduate faculty, is the executive committee of the graduate faculty and is advisory to the dean of the Graduate College.

## Manual of Rules and Regulations

The current edition of the Manual of Rules and Regulations is available on the college's website.

## Academic Affairs Office

The Academic Affairs Office (AAO) is responsible for supporting graduate student academic progress and success. Have a question? AAO can help. AAO oversees graduate student degree progress and completion, assists with student academic concerns, and provides support for graduate students' completion of their thesis or dissertation. AAO works broadly across campus by coordinating with graduate programs and campus partners to manage and uphold the rules and standards of graduate education with a focus on academic excellence, student success, and evidence-based initiatives to shape and improve students' experiences.

## Office of Graduate Diversity, Equity, and Inclusion

The Office of Graduate Diversity, Equity, and Inclusion is dedicated to providing academic assistance to graduate students from underrepresented populations across graduate programs, building a sustainable practice of inclusion that nourishes and attracts underrepresented graduate students campuswide, and fostering community-building through individual and group activities focused on successful academic progress.

## Graduate Student Success

The Graduate College takes a holistic approach to graduate student and postdoctoral scholar preparation. Whether a student's goal is a
career in academe, industry, government, or elsewhere, professional development can expand one's options and make a student more marketable to employers. The Graduate Student Success Office can help graduate students in the realms of:

- communication;
- research and publication;
- diversity;
- funding;
- teaching;
- leadership;
- careers; and
- wellness.

## Research Resources

Many of the university's diverse research activities are centrally administered by the Office of the Vice President for Research, which has a cooperative relationship with the Graduate College.

## Graduate Student Senate

The Graduate Student Senate is the university's graduate student body representative organization. Representatives are elected annually from each university department that has a graduate degree program. The senate's primary purpose is to serve the interests of the graduate student body in matters affecting its welfare. The senate advises the dean of the Graduate College on matters pertaining to the college.

## Programs

## Degrees Offered

The Graduate College confers the Master of Arts (MA), Master of Science (MS), Master of Accountancy (MAc), Master of Arts in Teaching (MAT), Master of Computer Science (MCS), Master of Fine Arts (MFA), Master of Health Administration (MHA), Master of Public Affairs (MPAff), Master of Public Health (MPH), Specialist in Education (EdS), Master of Science in Nursing (MSN), Master of Social Work (MSW), Doctor of Philosophy (PhD), Doctor of Education (EdD), Doctor of Musical Arts (DMA), Doctor of Nursing Practice (DNP), Doctor of Physical Therapy (DPT), and Doctor of Audiology (AuD) degrees.
The college currently confers degrees in the following major fields.
Accounting: MAc ${ }^{2}$
Actuarial Science: MS ${ }^{2}$
African American World Studies: MA ${ }^{3}$
American Studies: MA ${ }^{1}$, PhD
Anatomy and Cell Biology: $\mathrm{MS}^{3}, \mathrm{PhD}^{3}$ (see Biomedical Science)
Anthropology: $\mathrm{MA}^{1}$, PhD
Applied Mathematical and Computational Sciences: PhD
Art: MA ${ }^{1}$, MFA
Art History: $\mathrm{MA}^{1}, \mathrm{PhD}$
Asian Civilizations: $\mathrm{MA}^{3}$
Astronomy: MS ${ }^{1}$
Athletic Training: MS ${ }^{1}$
Biochemistry and Molecular Biology: MS, PhD
Biology: $\mathrm{MS}^{3}, \mathrm{PhD}^{3}$ (see Integrated Biology)
Biomedical Engineering: MS ${ }^{1}$, PhD
Biomedical Science: MS ${ }^{1}$, PhD
Biostatistics: MS ${ }^{1}$, PhD
Book Arts: MFA
Business Administration: $\mathrm{MA}^{1}, \mathrm{PhD}$
Business Analytics: MS
Chemical and Biochemical Engineering: $\mathrm{MS}^{1}, \mathrm{PhD}$
Chemistry: $\mathrm{MS}^{1}, \mathrm{PhD}$

Civil and Environmental Engineering: MS ${ }^{1}$, PhD
Classics: MA ${ }^{1}$, PhD
Clinical Investigation: $\mathrm{MS}^{1}$
Communication Studies: MA ${ }^{1}$, PhD
Community and Behavioral Health: PhD
Computer Science: $\mathrm{MS}^{1}, \mathrm{MCS}^{2}, \mathrm{PhD}$
Counselor Education, MA, PhD
Criminology: PhD
Dance: MFA
Data Science: MS
Dental Public Health: MS
Economics: MA ${ }^{1}$, PhD
Education: MA ${ }^{1}$, $\mathrm{MAT}^{2}$, EdS ${ }^{2}$, PhD
Educational Policy and Leadership Studies: MA ${ }^{1}$, EdD ${ }^{2}$, EdS ${ }^{2}$, PhD
Electrical and Computer Engineering: MS ${ }^{1}$, PhD
Elementary Education: MA, PhD
Engineering and Information Science, $\mathrm{MS}^{2}$
English: MA ${ }^{1}$, MFA, PhD
Epidemiology: $\mathrm{MS}^{1}$, PhD
Film and Video Production: MA ${ }^{1}$, MFA
Film Studies: MA ${ }^{1}$, PhD
Finance: $\mathrm{MS}^{1}$
Free Radical and Radiation Biology: $\mathrm{MS}^{3}, \mathrm{PhD}^{3}$ (see Biomedical
Science)
French and Francophone World Studies: MA ${ }^{1}$, PhD
Genetics: PhD
Geography: MA ${ }^{1}$, PhD
Geoscience: MS ${ }^{1}$, PhD
German: MA ${ }^{3}$
Greek: MA ${ }^{1}$
Health and Human Physiology: MS ${ }^{1}$, PhD
Health Management and Policy: MHA ${ }^{2}$
Health Services and Policy Research: MS ${ }^{2}$
Health Services and Policy: PhD
History: MA ${ }^{1}$, PhD
Human Toxicology: MS, PhD
Immunology: PhD
Industrial Engineering: $\mathrm{MS}^{1}{ }^{1} \mathrm{PhD}$
Informatics: MS ${ }^{1}, \mathrm{PhD}$
Integrated Biology: $\mathrm{MS}^{1}, \mathrm{PhD}$
Integrative Physiology: $\mathrm{PhD}^{3}$ (see Health and Human Physiology)
Interdisciplinary Studies: MA ${ }^{1}$, MFA, MS ${ }^{1}$, PhD
Latin: MA ${ }^{1}$
Library and Information Science: MA ${ }^{1}$
Linguistics: MA ${ }^{1}$, PhD
Literary Translation: MFA
Mass Communication: MA, PhD
Mathematics: $\mathrm{MS}^{1}$, PhD
Mechanical Engineering: MS ${ }^{1}$, PhD
Microbiology: MS, PhD
Molecular and Cellular Biology: $\mathrm{PhD}^{3}$ (see Biomedical Science)
Molecular Biology: $\mathrm{PhD}^{3}$ (see Biomedical Science)
Molecular Physiology and Biophysics: $\mathrm{MS}^{3}, \mathrm{PhD}^{3}$ (see Biomedical Science)
Music: MA ${ }^{1}$, DMA, PhD
Neuroscience: PhD
Nursing: MSN ${ }^{1}$, DNP, PhD
Occupational and Environmental Health: MS ${ }^{1}$, PhD
Oral Science: MS, PhD
Orthodontics: MS
Pathology: MS
Pharmacology: $\mathrm{MS}^{3}, \mathrm{PhD}^{3}$ (see Biomedical Science)
Pharmacy: MS ${ }^{1}$, PhD
Philosophy: MA ${ }^{1}$, PhD
Physical Rehabilitation Science: MA ${ }^{1}$, PhD
Physical Therapy: DPT
Physics: MS ${ }^{1}$, PhD
Political Science: MA ${ }^{1}$, PhD

Psychological and Quantitative Foundations: MA ${ }^{1}$, EdS ${ }^{2}$, PhD
Psychology: MA ${ }^{1}$, PhD
Public Affairs: MPAff ${ }^{2}$
Public Health: MPH ${ }^{2}$
Religious Studies: MA ${ }^{1}$, PhD
Science Education: MS ${ }^{1}$, MAT $^{2}, \mathrm{PhD}$
Second Language Acquisition: $\mathrm{PhD}^{3}$
Secondary Education: MA, MAT, PhD
Social Work: MSW ${ }^{1}$, PhD
Sociology: MA ${ }^{1}$, PhD
Spanish: MA ${ }^{1}$, PhD
Spanish Creative Writing: MFA
Special Education: MA ${ }^{1}$, PhD
Speech and Hearing Science: PhD
Speech Pathology and Audiology: MA ${ }^{1}$, AuD
Sport and Recreation Management: MA
Statistics: $\mathrm{MS}^{1}, \mathrm{PhD}$
Stomatology: MS ${ }^{3}$
Strategic Communication: MA ${ }^{2}$
Sustainable Development: MS
Teaching and Learning: $\mathrm{MA}^{1}, \mathrm{MAT}^{2}, \mathrm{PhD}$
Theatre Arts: MFA
Translational Biomedicine: $\mathrm{MS}^{2}$
Urban and Regional Planning: MS ${ }^{1}$
${ }_{2}^{1}$ Degree offered with or without thesis
${ }_{3}^{2}$ Nonthesis degree
${ }^{3}$ Student entry suspended

## Interdisciplinary Degree Programs

The Graduate College participates in a number of University of Iowa interdisciplinary degree programs. Detailed information about the following master's and doctoral degree programs is provided later in these Graduate College sections of the catalog: Applied Mathematical and Computational Sciences [p. 1600], Genetics [p. 1634], Human Toxicology [p. 1638], Immunology [p. 1643], Informatics [p. 1647], Molecular Medicine [p. 1672], Neuroscience [p. 1674], Sustainable Development [p. 1695], and Translational Biomedicine [p. 1699].
In addition to the degree programs listed above, the graduate faculty has authorized the awarding of interdisciplinary master's and doctoral degrees. Students seeking approval for interdisciplinary master's and doctoral programs must previously have been admitted to and enrolled in a departmental program in the Graduate College. See sections X.A. and XII.D. in the Manual of Rules and Regulations on the college's website.

## Combined Programs

## Combined Programs Offered Through the Graduate College

Various combined programs have been developed whereby students work simultaneously toward two degrees. Consult the appropriate Catalog sections for more information. Established combined graduate programs include, but may not be limited to, the following.

## BA in Biology, Chemistry, Environmental Sciences, Geoscience, Physics/MAT (Science Education Subprogram)

The combined BA/MAT program with a science education subprogram is open to any major, but typically draws most frequently from students majoring in biology, chemistry, environmental sciences, geoscience, or physics, allowing them to begin work toward the

MAT while completing the bachelor's degree. Students admitted to the program may count 19 s.h. of credit toward both the BA and MAT degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Education; see Biology [p. 167], Chemistry [p. 198], Environmental Sciences [p. 447], Geoscience [p. 375], or Physics and Astronomy [p. 868] and the Master of Arts in Teaching, MAT [p. 1418] (science education subprogram) in the catalog.

## BA in Biology/MPH (Epidemiology Subprogram) or MS in Epidemiology

The combined BA in biology/MPH with an epidemiology subprogram and the combined BA in biology/MS in epidemiology program enable Bachelor of Arts students majoring in biology to begin work toward the MPH or MS while completing the bachelor's degree. University of Iowa students admitted to the MPH program may count 17 s.h. of credit toward both the BA and the MPH degree requirements. University of Iowa students admitted to the MS program may count 15 s.h. of credit toward both the BA and the MS degree requirements. Students admitted to either program may also maximize their selection of upper-level classes for advanced training in epidemiology. Coe College, Cornell College, Grinnell College, and Luther College students admitted to the MPH program may enroll in University of Iowa graduate level courses to count toward the MPH degree while they are simultaneously completing the bachelor's degree. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Public Health; see the Master of Public Health, MPH [p. 1964] (epidemiology subprogram) and the MS in epidemiology [p. 2003] in the catalog.

## BA in Elementary Education (Special Education Subprogram)/MA in Teaching and Learning (Special Education Subprogram)

The combined BA/MA program with a special education subprogram enables students to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the BA and MA degree requirements. Offered by the Graduate College and the College of Education; see the MA in teaching and learning [p. 1411] (special education subprogram) in the catalog.

## BA in Geography (Geographic Information Science Track) or BS in Geography/MS in Informatics (Geoinformatics Subprogram)

The combined BA in geography with a geographic information science track or BS in geography/MS in informatics with a geoinformatics subprogram enables undergraduate students majoring in geography to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 12 s.h. toward both the BA or BS and MS degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Geographical and Sustainability Sciences [p. 518] and the MS in informatics [p. 1653] (geoinformatics subprogram) in the catalog.

## BA in German/MA in German

The combined BA/MA program in German enables undergraduate students majoring in German to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the BA and MA degree requirements. They also have the opportunity for early entrance into advanced courses in German. Offered by the Graduate College and the College of Liberal Arts and Sciences; see German [p. 551] in the catalog.

## BA in Linguistics/MA in Linguistics (TESL Subprogram)

The combined BA/MA program in linguistics with a TESL subprogram enables students majoring in linguistics to begin work toward the MA while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of advanced coursework toward both the BA and MA degree requirements and may take selected graduate-level courses before they have been awarded the BA degree. They also may gain experience teaching English as a second language (ESL) at the college level early in their graduate careers. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Linguistics [p. 748] in the catalog.

## BA in Mathematics/MAT (Mathematics Education Subprogram)

The combined BA/MAT with a mathematics education subprogram enables Bachelor of Arts students majoring in mathematics to begin work toward the MAT while completing the bachelor's degree. Students admitted to the program may count 18 s.h. of credit toward both the BA and MAT degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Education; see the Master of Arts in Teaching, MAT [p. 1416] (mathematics education subprogram) in the catalog.

## BA in Psychology/MPH (Community and Behavioral Health Subprogram)

The combined BA in psychology/MPH with a community and behavioral health subprogram enables Bachelor of Arts students majoring in psychology to begin work toward the MPH while completing the bachelor's degree. University of Iowa students admitted to the program may count 15 s.h. of credit toward both the BA and MPH degree requirements. Coe College, Cornell College, Grinnell College, and Luther College students admitted to the MPH program may enroll in University of Iowa graduate level courses to count toward the MPH degree while they are simultaneously completing the bachelor's degree. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Public Health; see the Master of Public Health, MPH [p. 1964] (community and behavioral health subprogram) in the catalog.

## BA or BS in Computer Science/MCS

The combined BA or BS in computer science/MCS program enables undergraduate students majoring in computer science to begin work toward the MCS while completing the bachelor's degree. University of Iowa students admitted to the program may count 12 s.h. of coursework, typically advanced technical courses and electives, toward both the bachelor's and the MCS degree requirements. Grinnell College students admitted to the program may transfer Grinnell College coursework that articulates to 6 s.h. of graduate level credit toward University of Iowa MCS degree requirements. Grinnell College students admitted to the MCS program may enroll in University of Iowa graduate level courses to count toward the MCS degree while they are simultaneously completing the bachelor's degree. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Computer Science [p. 296] in the catalog.

## BA or BS in Environmental Policy and Planning/MS in Urban and Regional Planning

The combined BA or BS in environmental policy and planning/MS in urban and regional planning program enables undergraduate students majoring in environmental policy and planning to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 18 s.h. of credit toward both the BA or BS and MS degree requirements. Offered by the Graduate College and
the College of Liberal Arts and Sciences; see Environmental Policy and Planning [p. 434] and the MS in urban and regional planning [ p . 1689] in the catalog.

## BA or BS in Informatics/MS in Informatics

The combined BA or BS in informatics/MS in informatics program enables students majoring in informatics to begin work toward the MS while completing the bachelor's degree. Offered by the Graduate College and the College of Liberal Arts and Sciences; see the MS in informatics [p. 1653] in the catalog.

## BA or BS in Mathematics/MS in Data Science

The combined BA or BS in mathematics/MS in data science program enables students majoring in mathematics to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the BA or BS and MS degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see the MS in data science in the catalog.

## BA or BS in Public Health/MPH (Policy Subprogram)

The combined BA or BS in public health/MPH with a policy subprogram enables students majoring in public health to begin work toward the MPH while completing the bachelor's degree. University of Iowa students admitted to the program may count 15 s.h. of credit toward both the BA or BS and MPH degree requirements. Coe College, Cornell College, Grinnell College, and Luther College students admitted to the MPH program may enroll in University of Iowa graduate level courses to count toward the MPH degree while they are simultaneously completing the bachelor's degree. Offered by the Graduate College and the College of Public Health; see the Master of Public Health, MPH [p. 1964] (policy subprogram) in the catalog.

## BA or BS/MA in Library and Information Science

The combined BA or BS/MA in library and information science program enables undergraduate students to begin work toward the MA while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the BA or BS and MA degree requirements. Offered by the Graduate College; see the MA in library and information science [p. 1666] in the catalog.

## BA or BS/MPAff

The combined BA or BS/MPAff program enables undergraduate students to begin work toward the MPAff while completing the bachelor's degree. Students admitted to the program may count 15 s.h. of credit toward both the BA or BS and MPAff degree requirements. Offered by the Graduate College; see the Master of Public Affairs, MPAff [p. 1685] in the catalog.

## BA or BS/MS in Business Analytics (Career Subprogram)

The combined BA or BS/MS in business analytics with a career subprogram allows the following undergraduate students majoring in actuarial science (BS); applied physics (BS); biology (BA or BS); chemistry (BA or BS); computer science (BA or BS); criminology, law and justice (BA); data science (BS); economics (BA or BS); English (BA); English and creative writing (BA); enterprise leadership (BA); ethics and public policy (BA); history (BA); informatics (BA or BS); interdepartmental studies (BA); journalism and mass communication (BA); linguistics (BA); mathematics (BA or BS); physics ( BA or BS ); political science ( BA or BS ); psychology (BA or BS); sociology (BA); and statistics (BS) to begin work toward the MS in business analytics while completing their undergraduate
degree. Students admitted to the program may count 14 s.h. of credit toward both the BA or BS and MS degree requirements. This provides students with the opportunity to complete both degrees in less time than it would take them to complete the degrees separately. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Tippie College of Business; see the MS in business analytics (career) [p. 1141] in the catalog.

## BA or BS/MS in Finance

The combined BA or BS/MS in finance program allows the following undergraduate students majoring in actuarial science (BS); applied physics (BS); biology (BA or BS); chemistry (BA or BS); computer science (BA or BS); criminology, law and justice (BA); data science (BS); English (BA); English and creative writing (BA); enterprise leadership (BA); ethics and public policy (BA); history (BA); informatics (BA or BS); interdepartmental studies (BA); journalism and mass communication (BA); linguistics (BA); mathematics (BA or BS); physics (BA or BS); political science (BA or BS); psychology (BA or BS); sociology (BA); and statistics (BS) to begin work toward the MS in finance while completing their undergraduate degree. Students admitted to the program may count 16 s.h. of credit toward both the BA or BS and MS degree requirements. This provides students with the opportunity to complete both degrees in less time than it would take them to complete the degrees separately. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Tippie College of Business; see the MS in finance [p. 1187] in the catalog.

## BBA/MS in Business Analytics (Career Subprogram)

The combined BBA/MS in business analytics with a career subprogram enables undergraduate students majoring in accounting, business administration, economics, finance, management, business analytics and information systems, and marketing to begin work on the MS while completing the Bachelor of Business Administration degree. Students admitted to the program may count 14 s.h. of credit toward both the BBA and MS degree requirements. Students can complete both degrees in less time than it would take them to complete them separately. Offered by the Graduate College and the Tippie College of Business; see the MS in business analytics (career) [ p . 1141] in the catalog.

## BBA/MS in Finance

The combined BBA/MS in finance program allows undergraduate students majoring in business administration to begin work toward the MS while completing the Bachelor of Business Administration degree. Students admitted to the program may count 16 s.h. of credit toward both the BBA and MS degree requirements. The program provides students with the opportunity to complete both degrees in five years instead of six. Offered by the Graduate College and the Tippie College of Business; see the MS in finance [p. 1187] in the catalog.

## BS in Biochemistry/PhD in Biochemistry

The combined BS in biochemistry/PhD in biochemistry program enables Bachelor of Science students majoring in biochemistry to begin work toward the PhD while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the BS and PhD degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Carver College of Medicine; see the Department of Biochemistry and Molecular Biology in the catalog.

## BS in Exercise Science/MS in Athletic Training

The combined BS in exercise science/MS in athletic training program enables students majoring in exercise science to begin work toward
the MS while completing the bachelor's degree. Students admitted to the program may count $21 \mathrm{~s} . \mathrm{h}$. of credit toward both the BS and MS degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Carver College of Medicine; see the MS in athletic training [p. 1819] in the catalog.

## BS in Statistics/MPH (Biostatistics Subprogram) or MS in Biostatistics

The combined BS in statistics/MPH with a biostatistics subprogram and the combined BS in statistics/MS in biostatistics program enable Bachelor of Science students majoring in statistics to begin work toward the MPH or MS while completing the bachelor's degree. University of Iowa students admitted to the MPH program may count 15 s.h. of credit toward both the BS and the MPH degree requirements. University of Iowa students admitted to the MS program may count $15 \mathrm{~s} . \mathrm{h}$. of credit toward both the BS and the MS degree requirements. Coe College, Cornell College, Grinnell College, and Luther College students admitted to the MPH program may enroll in University of Iowa graduate level courses to count toward the MPH degree while they are simultaneously completing the bachelor's degree. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Public Health; see the BS in statistics [p. 1054], Master of Public Health, MPH [p. 1964] (biostatistics subprogram), and MS in biostatistics [p. 1982] in the catalog.

## BS in Statistics/MS in Statistics

The combined BS/MS in statistics program enables undergraduate students majoring in statistics to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the BS and MS degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Statistics and Actuarial Science in the catalog.

## BS in Therapeutic Recreation/MS in Health and Human Physiology (Child Life Subprogram)

The combined BS in therapeutic recreation/MS in health and human physiology with a child life subprogram enables undergraduate students majoring in therapeutic recreation to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count $12 \mathrm{~s} . \mathrm{h}$. of credit toward both the BS and MS degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Health and Human Physiology [p. 581] in the catalog.
BSE in Biomedical Engineering/MPH (Occupational and Environmental Health Subprogram) or MS in Occupational and Environmental Health (Industrial Hygiene Subprogram)
The combined BSE in biomedical engineering/MS in occupational and environmental health with an industrial hygiene subprogram enables undergraduate students majoring in biomedical engineering to begin work toward the MPH or MS in occupational and environmental health while completing the bachelor's degree. University of Iowa students admitted to the MPH program may count 15 s.h. of credit toward both the BSE and the MPH degree requirements. University of Iowa students admitted to the MS program may count 15 s.h. of credit toward both the BSE and the MS degree requirements. Coe College, Cornell College, Grinnell College, and Luther College students admitted to the MPH program may enroll in University of Iowa graduate level courses to count toward the MPH degree while they are simultaneously completing the bachelor's degree.

Offered by the Graduate College, the College of Engineering, and the College of Public Health; see the BSE in biomedical engineering [p. 1459], Master of Public Health, MPH [p. 1964] (occupational and environmental health subprogram), and the MS in occupational and environmental health [p. 2028] (industrial hygiene subprogram) in the catalog.

## BSE in Biomedical Engineering/MS in Biomedical Engineering

The combined BSE/MS in biomedical engineering program enables undergraduate students majoring in biomedical engineering to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the BSE and MS degree requirements. They also may attend and participate in the departmental graduate seminar and work on a master's thesis or research project before they have been awarded the BSE degree. Offered by the Graduate College and the College of Engineering; see the Roy J. Carver Department of Biomedical Engineering [p. 1453] in the catalog.

## BSE in Chemical Engineering/MS in Chemical and Biochemical Engineering

The combined BSE in chemical engineering/MS in chemical and biochemical engineering program enables undergraduate students majoring in chemical engineering to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of coursework, typically advanced chemistry sequences and electives, toward both the BSE and MS degree requirements. Offered by the Graduate College and the College of Engineering; see Chemical and Biochemical Engineering [p. 1470] in the catalog.

## BSE in Chemical Engineering/MS in Civil and Environmental Engineering

The combined BSE in chemical engineering/MS in civil and environmental engineering program enables undergraduate students majoring in chemical engineering to begin work toward the MS in civil and environmental engineering while completing the bachelor's degree. Students admitted to the program may count 9 s.h. of coursework toward both the BSE and MS degree requirements. They also may count an additional 3 s.h. toward the MS degree requirements before they have been awarded the BSE degree. Offered by the Graduate College and the College of Engineering; see the BSE in chemical and biochemical engineering [p. 1476] and the MS in civil and environmental engineering [ p .1511 ] in the catalog.

## BSE in Civil Engineering/MS in Civil and Environmental Engineering

The combined BSE in civil engineering/MS in civil and environmental engineering program enables undergraduate students majoring in civil engineering to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 9 s.h. of coursework toward both the BSE and MS degree requirements. They also may count an additional 3 s.h. toward the MS degree requirements before they have been awarded the BSE degree. They may attend and participate in the departmental graduate seminar and work on a master's thesis or research project before they have been awarded the BSE degree. Offered by the Graduate College and the College of Engineering; see Civil and Environmental Engineering [p. 1492] in the catalog.

## BSE in Civil Engineering/MS in Sustainable Development

The combined BSE in civil engineering/MS in sustainable development program enables undergraduate students majoring in civil engineering to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the BSE and MS degree requirements. Offered by the Graduate College and the College of Engineering; see the BSE in civil and environmental engineering [ p .1500 ] and the MS in sustainable development in the catalog.

## BSE in Civil Engineering/MS in Urban and Regional Planning

The combined BSE in civil engineering/MS in urban and regional planning program enables undergraduate students majoring in civil engineering to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 18 s.h. of credit toward both the BSE and MS degree requirements. They also may attend and participate in the departmental graduate seminar and work on a master's thesis or research project before they have been awarded the BSE degree. Offered by the Graduate College and the College of Engineering; see the BSE in civil and environmental engineering [p. 1500] and the MS in urban and regional planning [ p .1689 ] in the catalog.

## BSE in Electrical Engineering/MS in Electrical and Computer Engineering

The combined BSE in electrical engineering/MS in electrical and computer engineering program enables undergraduate students majoring in electrical engineering to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 9 s.h. toward both the BSE and MS degree requirements. They also may count an additional 3 s.h. toward the MS degree requirements and engage in thesis-level research before they have been awarded the BSE degree. Offered by the Graduate College and the College of Engineering; see Electrical and Computer Engineering [p. 1525] in the catalog.

## BSE in Industrial Engineering/MS in Industrial Engineering

The combined BSE/MS in industrial engineering program enables undergraduate students majoring in industrial engineering to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of coursework toward both the BSE and MS degree requirements. They also may attend one of the department's graduate seminars and work on master's thesis research before they have been awarded the BSE degree. Offered by the Graduate College and the College of Engineering; see Industrial and Systems Engineering [p. 1545] in the catalog.

## BSE in Mechanical Engineering/MS in Civil and Environmental Engineering

The combined BSE in mechanical engineering/MS in civil and environmental engineering program enables undergraduate students majoring in mechanical engineering to begin work toward the MS in civil and environmental engineering while completing the bachelor's degree. Students admitted to the program may count 9 s.h. of coursework toward both the BSE and MS degree requirements. They also may count an additional 3 s.h. toward the MS degree requirements before they have been awarded the BSE degree. Offered by the Graduate College and the College of Engineering; see the BSE in mechanical engineering [p. 1570] and the MS in civil and environmental engineering [p. 1511] in the catalog.

## BSE in Mechanical Engineering/MS in Mechanical Engineering

The combined BSE/MS in mechanical engineering program enables undergraduates majoring in mechanical engineering to begin work toward the MS while completing the bachelor's degree. Students admitted to the program may count 12 s.h. toward both the BSE and MS degree requirements. They also may attend a graduate seminar and participate in master's thesis research before they have been awarded the BSE. Offered by the Graduate College and the College of Engineering; see Mechanical Engineering [p. 1563] in the catalog.

## BSN in Nursing (RN Subprogram)/DNP in Nursing

The combined BSN in nursing (RN subprogram)/DNP in nursing program enables students to begin work toward the DNP while completing the bachelor's degree. Students admitted to the program may count 9 s.h. of credit toward both the BSN and DNP degree requirements. Offered by the Graduate College and the College of Nursing, see the Bachelor of Science in Nursing, BSN [p. 1892] (nursing-RN subprogram) and the Doctor of Nursing Practice, DNP [p. 1903] in the catalog.

## $\mathrm{AuD} / \mathrm{PhD}$ in Speech and Hearing Science

The combined $\mathrm{AuD} / \mathrm{PhD}$ in speech and hearing science program is designed for students who would like to practice audiology and hold a faculty position at a university. Students admitted to the program work concurrently toward the Doctor of Audiology and the Doctor of Philosophy; they may count 30 s.h. toward the requirements of both degrees. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Communication Sciences and Disorders [p. 260] in the catalog.

## Graduate Degrees/Certificates in Business Fundamentals, Finance, Leadership, Marketing

Students can pursue a professional Certificate in Business Fundamentals, Finance, Leadership, or Marketing concurrently with their graduate degree. With graduate program approval, students may count up to 9 s.h. from a professional certificate toward their graduate degree. With approval from the professional certificate program, students may count up to 3 s.h. from any graduate degree program toward their certificate. Offered by the Graduate College and Graduate Management Programs (Tippie College of Business), see the professional Certificates in Business Fundamentals [p. 1221], Finance [p. 1223], Leadership [p. 1227], or Marketing [p. 1228] in the catalog.

## JD/Graduate Degrees

The College of Law and several Graduate College programs and schools have developed combined programs in which students pursue the Juris Doctor (JD) degree and a graduate degree concurrently. Offered by the Graduate College and the College of Law; see the Manual of Rules and Regulations on the Graduate College website and the Juris Doctor, JD [p. 1720] in the catalog.

## MA in French and Francophone World Studies/MFA in Literary Translation

The Department of French and Italian and the Literary Translation Program collaborate to offer a combined Master of Arts in French and Francophone World Studies and a Master of Fine Arts in Literary Translation. Students interested in writing in its different formscreative, academic, and translation-will find the University of Iowa to be the ideal place to develop their talents and an attractive option for more diversified career preparation. A separate application and admission to each degree program is required. For more information,
review the admissions requirements for French and Francophone World Studies and Literary Translation. Students in the combined program earn both degrees by completing a minimum of 60 s.h. of coursework, fewer semester hours than if each degree was completed separately. Qualified students may be eligible for up to three years of full funding for a teaching assistant (TA) position.

## MA in Library and Information Science/ Certificate in Book Studies/Book Arts and Technologies

The combined MA in library and information science and Certificate in Book Studies/Book Arts and Technologies prepares students for careers in special collections librarianship. Students admitted to the program receive training in the management of varied types of special collections, such as rare books, manuscripts, archives, graphics, music, and ephemera. Offered by the Graduate College; see the MA in library and information science [p. 1666] and the Certificate in Book Studies/Book Arts and Technologies [p. 1629] in the catalog.

## MA in Library and Information Science/MFA in Book Arts

The combined MA in library and information science/MFA in book arts program allows graduate students with strong interests in the physical book to acquire training in the book arts, book history, and material book studies. The earned expertise in the production and legacy of the book as a physical artifact combined with expertise in library and information science can be an asset for those focused on careers in special collections libraries and archives. Students in the combined program earn both degrees by completing fewer semester hours than if each degree was completed separately. Offered by the Graduate College; see the MA in library and information science [p. 1666] and the MFA in book arts [p. 1627] in the catalog.

## MD/PhD (Medical Scientist Training Program)

The combined Doctor of Medicine/Doctor of Philosophy program prepares students for careers in academic medicine, with emphasis on basic and clinical research. Offered by the Graduate College and the Carver College of Medicine; see Medical Scientist Training Program [p. 1784] in the catalog.

## Certificates

The Graduate College also participates with other University of Iowa colleges in offering the following graduate certificates.

## Adult Gerontology Acute Care Nurse Practitioner

The Certificate in Adult Gerontology Acute Care Nurse Practitioner is a program for post-master's Advanced Practice Registered Nurse degree students who would like to pursue a second specialty. See the Certificate in Adult Gerontology Acute Care Nurse Practitioner [p. 1919] in the catalog.

## Adult Gerontology Primary Care Nurse Practitioner

The Certificate in Adult Gerontology Primary Care Nurse Practitioner is a program for post-master's Advanced Practice Registered Nurse degree students who would like to pursue a second specialty. See the Certificate in Adult Gerontology Primary Care Nurse Practitioner [p. 1920] in the catalog.

## African American Studies

The Certificate in African American Studies is a program that increases intellectual knowledge and understanding of African American culture and experience. See the Certificate in African American Studies [p. 41] in the catalog.

## Aging and Longevity Studies

The Aging and Longevity Studies Program is a multidisciplinary certificate program administered by the College of Liberal Arts and Sciences in cooperation with other University of Iowa colleges. The program is designed to complement graduate degree programs or to serve as a stand-alone nondegree program for students with academic, professional, research, or service career interests in aging. See the Certificate in Aging and Longevity Studies [p. 47] in the catalog.

## Agricultural Safety and Health

The Certificate in Agricultural Safety and Health is a postbaccalaureate program for practicing health care professionals serving rural areas and for health professions students who intend to practice in rural areas. The program is designed to help rural health professionals address safety and health issues in farm settings. See the Certificate in Agricultural Safety and Health [p. 1978] in the catalog.

## Applied Behavior Analysis

The Certificate in Applied Behavior Analysis develops skills in behavioral intervention and intensive instruction. The course sequence contributes to eligibility for certification as a board-certified behavior analyst (BCBA). See the Certificate in Applied Behavior Analysis [p. 1293] in the catalog.

## Artificial Intelligence, Modeling and Simulation in Engineering

The Certificate in Artificial Intelligence, Modeling and Simulation (AIMS) in Engineering offers graduate students enrolled in the College of Engineering an opportunity to specialize in artificial intelligence, machine learning, deep learning, modeling and simulation, and uncertainty quantification. UI graduate students from other disciplines also may apply. See the Certificate in Artificial Intelligence, Modeling and Simulation in Engineering [p. 1445] in the catalog.

## Biostatistics

The Certificate in Biostatistics is open to students in University of Iowa graduate degree programs outside biostatistics and to individuals admitted to the Graduate College as nondegree students. The certificate program enables students to add a formal biostatistics emphasis to their degree programs. Students who complete the certificate in conjunction with a graduate degree may count a maximum of 6 s.h. of certificate credit toward their graduate degree. See the Certificate in Biostatistics [p. 1988] in the catalog.

## Book Studies/Book Arts and Technologies

The Certificate in Book Studies/Book Arts and Technologies is designed to be completed in one year. The program is open to students who are enrolled in a graduate degree program at the University of Iowa as well as to students enrolled in the Graduate College with nondegree status. See the Certificate in Book Studies/Book Arts and Technologies [p. 1629] in the catalog.

## Business Analytics

The Certificate in Business Analytics is open to students in University of Iowa graduate degree programs and to individuals admitted to the Graduate College as nondegree students. The certificate program is designed for working professionals and addresses a growing need to manage and analyze the rapidly increasing amount of data that is available to support business decision-making. See the Certificate in Business Analytics [p. 1149] in the catalog.

## Cognitive Science of Language

The Certificate in Cognitive Science of Language is designed to complement doctoral study. The certificate program is open to University of Iowa PhD students in linguistics, neuroscience, psychology, and speech and hearing science. PhD students in other disciplines may petition to be permitted to earn the certificate. Students must complete a formal application to enter the certificate program; they should contact the program's coordinator before they apply. See the Certificate in Cognitive Science of Language [p. 1631] in the catalog.

## College Teaching

The Certificate in College Teaching complements discipline-oriented graduate programs and prepares students for careers in postsecondary education. The program is open to graduate students working toward a PhD or other terminal graduate degree. See the Certificate in College Teaching [p. 1633] in the catalog.

## Emerging Infectious Disease Epidemiology

The Certificate in Emerging Infectious Disease Epidemiology is a postbaccalaureate program designed to meet the training needs in emerging infectious disease of international public health professionals as well as University of Iowa graduate students. Applicants to the program must hold a bachelor's degree. See the Certificate in Emerging Infectious Disease Epidemiology [p. 1995] in the catalog.

## Family Nurse Practitioner

The Certificate in Family Nurse Practitioner is a program for postmaster's Advanced Practice Registered Nurse degree students who would like to pursue a second specialty. See the Certificate in Family Nurse Practitioner [p. 1921] in the catalog.

## Gender, Women's, and Sexuality Studies

The Certificate in Gender, Women's, and Sexuality Studies is open to students enrolled in graduate degree programs. See the Certificate in Gender, Women's, and Sexuality Studies [p. 517] in the catalog.

## Global Health Studies

The Certificate in Global Health Studies is open to graduate and professional students, except for those in the College of Pharmacy who have earned the PharmD degree-they are awarded the undergraduate certificate. Students must maintain a grade-point average of at least 3.00 in work for the certificate. See the Certificate in Global Health Studies [p. 579] in the catalog.

## Health Systems

The Certificate in Health Systems is built on the foundational courses from the Doctor of Nursing Practice (DNP) with a health systems subprogram. The certificate is available to post-master's degree students seeking additional preparation in the area of health systems/
administration. See the Certificate in Health Systems [p. 1922] in the catalog.

## Healthcare Management

The Certificate in Healthcare Management provides foundational business and leadership skills to physicians, nurses, and other clinicians, and managers. See the Certificate in Healthcare Management [p. 2023] in the catalog.

## Informatics

The Certificate in Informatics requires a variable amount of graduate credit, depending on the student's choice of subprogram. The certificate program is designed for students enrolled in University of Iowa graduate degree programs who wish to study informatics as a complement to their degree program and for nondegree students who are interested in increasing their knowledge of informatics. See the Certificate in Informatics [p. 1660] in the catalog.

## Institutional Research and Effectiveness

The Certificate in Institutional Research and Effectiveness (IRE) is offered with hybrid and conventional courses. The certificate program prepares professionals to use data for institutional decision-making, reporting, and accountability in higher education and $\mathrm{K}-12$ contexts. This certificate amends and complements students' competence in other areas (business affairs, information technology, student affairs, development, among other areas) to prepare them with the skills and capabilities to use data for educational improvement, accountability, quality, and equity. See the Certificate in Institutional Research and Effectiveness [p. 1329] in the catalog.

## K-12 Equity and Inclusion

The Certificate in K-12 Equity and Inclusion is offered with hybrid and conventional courses. The certificate program offers educational professionals or nondegree-seeking students currently working in K 12 schools, districts, and area education agencies expertise in equity and inclusion to better support the needs and interests of a diversifying K-12 student population. See the Certificate in K-12 Equity and Inclusion [p. 1331] in the catalog.

## Literary Translation

The Certificate in Literary Translation includes coursework in translation practice and techniques. Translation workshops and coursework in translation theory also are central to the certificate program as they are essential to the training of literary translators. See the Certificate in Literary Translation [p. 1105] in the catalog.

## Native American and Indigenous Studies

The Native American and Indigenous Studies Program offers an interdisciplinary certificate program focusing on the histories, cultures, languages, arts, religious traditions, political and social organizations, economies, geographies, literatures, and contemporary legal and political concerns of Native Americans of the United States as well as other Indigenous peoples of the Western Hemisphere. See the Certificate in Native American and Indigenous Studies [p. 850] in the catalog.

## Online Teaching

The Certificate in Online Teaching is designed to prepare students for the realities of online teaching and to help them expand their career options. The certificate is open to students in University of Iowa graduate degree programs and to individuals admitted to the Graduate

College as nondegree students. See the Certificate in Online Teaching [p. 1333] in the catalog.

## Pediatric Nurse Practitioner-Acute Care

The Certificate in Pediatric Nurse Practitioner-Acute Care is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty. See the Certificate in Pediatric Nurse Practitioner-Acute Care [p. 1923] in the catalog.

## Pediatric Nurse Practitioner-Primary Care

The Certificate in Pediatric Nurse Practitioner-Primary Care is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty. See the Certificate in Pediatric Nurse Practitioner-Primary Care [p. 1924] in the catalog.

## Psychiatric/Mental Health Nurse Practitioner

The Certificate in Psychiatric/Mental Health Nurse Practitioner is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty. See the Certificate in Psychiatric/Mental Health Nurse Practitioner [p. 1925] in the catalog.

## Public Digital Humanities

The Certificate in Public Digital Humanities is open to all University of Iowa graduate students in good academic standing. Students take a theory and practice course, and select elective coursework to suit their disciplinary or technical needs. See the Certificate in Public Digital Humanities [p. 1694] in the catalog.

## Public Health

The Certificate in Public Health is designed to improve public health practice and public health workforce capacity in Iowa and the upper Midwest. It is intended primarily for individuals in public health practice, those in the workforce, and those interested in strengthening their knowledge and skills in basic public health competencies. See the Certificate in Public Health [p. 1976] in the catalog.

## Special Collections Librarianship

The Certificate in Special Collections Librarianship includes coursework that introduces students to the core theories supporting the collection and management of rare books, archival records, and manuscript collections. See the Certificate in Special Collections Librarianship [p. 1671] in the catalog.

## Sustainable Water Development

The Certificate in Sustainable Water Development trains science, technology, engineering, and mathematics (STEM) graduate students to address future challenges of water scarcity and variability while also meeting the food and energy demands of Earth's growing population. See the Certificate in Sustainable Water Development [p. 1584] in the catalog.

## Talent Development

The Certificate in Talent Development requires 14 s.h. of graduate credit. The certificate is open to students in University of Iowa graduate degree programs and to individuals admitted to the Graduate College as nondegree students. The purpose of the certificate is to
increase understanding of talented individuals, the process of talent development and the creative process, and prepare advocates for talented individuals. In addition to coursework, students design a culminating original project aligned with a career objective or personal interest. Students may use the coursework embedded in the certificate to apply to the State of Iowa Gifted and Talented teaching endorsement. To learn more or apply, see the Certificate in Talent Development [p. 1360] in the catalog.

## Translational and Clinical Investigation

The Certificate in Translational and Clinical Investigation is designed for clinicians who seek advanced training in clinical methodology and applied patient-oriented research skills. Students in the certificate program must be practicing academic clinicians who have completed doctoral training. See the Certificate in Translational and Clinical Investigation [p. 2037] in the catalog.

## Transportation Planning

The Certificate in Transportation Planning includes a choice of coursework in traffic engineering, transportation and land use planning, design of transportation systems, transportation demand analysis, transportation policy and planning, as well as other transportation areas. Students may earn the certificate in conjunction with an MS or PhD in civil and environmental engineering or with an MS in urban and regional planning.

Individuals working toward degrees in other transportation-related disciplines are encouraged to apply to the Transportation Planning Program. Depending on a student's background, additional coursework in statistics, computer programming, simulation, mathematics, and operations research may be required for the certificate. Credit earned in these courses may not be applicable to the student's degree program. See the Certificate in Transportation Planning [p. 1704] in the catalog.

## Financial Support

Approximately half of the university's graduate students receive some form of university-administered financial assistance. For eligibility requirements and application procedures, see "Section VII. Graduate Appointments" in the Manual of Rules and Regulations on the college's website. The following are the primary sources of assistance. For a more complete description of funding available to graduate students, see the Graduate College website.

## Teaching and Research Assistantships

Teaching and research assistantships are available in most departments, but they prioritize doctoral students. Assistantship stipends are awarded for quarter-time, one-third-time, and half-time academic-year appointments and quarter-time, one-third-time, and half-time fiscal-year appointments; assistantships of $25 \%$ or higher also are eligible for tuition scholarships. Assistants (one-quartertime or more) pay resident tuition rates for fee purposes. See the Graduate College website for a more complete description of graduate assistantship benefits.

## Iowa Arts Fellowships

Iowa Arts Fellowships are for University of Iowa graduate students entering MFA programs. Typical stipends are for the academic year, with all tuition and a percentage of mandatory fees paid, plus a health insurance allowance, for one academic year (the remaining years of support must be provided by the appointing program). There are no departmental service obligations while holding the first-year fellowship.

## Iowa Performance Fellowships

Iowa Performance Fellowships are for first-year DMA candidates in a performance area of music. Recipients are nominated by the School of Music. Awards include academic-year fellowships, summer fellowships, and tuition and a percentage of mandatory fees paid (fellow is responsible for the remainder of fees). The School of Music provides a one-quarter-time research assistantship in years two and three.

## Graduate College Iowa Recruitment Fellowships

Iowa Recruitment Fellowships program enhances departmental recruitment packages by offering the most accomplished new doctoral students a stipend supplement for up to five years and stipend support for up to four summer sessions (academic year graduate assistants) or a stipend supplement for the entire fiscal year (fiscal year graduate assistants). Tuition scholarships are to be paid during the academic years (fall, spring) by the appointing unit, while the Graduate College provides up to $1 \mathrm{~s} . \mathrm{h}$. of tuition and benefits for the summer sessions. Recipients are nominated by their department.

## Graduate College Summer Fellowships

Graduate College Summer Fellowships are for advanced doctoral students who have completed their comprehensive exams, are working to complete their dissertations, and do not otherwise have funding for the summer session. Awards provide a summer stipend and up to 1
s.h. of tuition. Awardees must enroll in a summer session.

## T. Anne Cleary International Research Fellowships

The T. Anne Cleary International Research Fellowships are for doctoral students who have completed all pre-dissertation requirements, including the comprehensive examination, and who will use the fellowship for international dissertation research. The monetary amounts may vary and are meant to supplement other research funds. PhD students in any discipline may apply.

## Ballard and Seashore Dissertation Fellowships

Ballard and Seashore Dissertation Fellowships are one semester fellowships for PhD candidates who have completed all doctoral degree requirements except their dissertation. Recipients are nominated by their departments. Fellowships provide monetary amounts for the semester plus tuition and a percentage of mandatory fees paid for up to 2 s.h. and a health insurance allowance.

## Post-Comprehensive Research Fellowships

The post-comprehensive research awards program provides an opportunity for advanced PhD students to benefit from protected and supported time to pursue their scholarly research activities. The one semester award is intended to recognize students with distinguished academic achievement during their early graduate training. These achievements should be evident from a combination of outstanding academic performance in coursework, as well as early scholarly research activities. Students who have held teaching assistantships in the previous two semesters or do not have other sources of assistantship/fellowship funds will have priority. Awardees will receive a stipend. The Graduate College also supports up to 2 s.h. of tuition, a percentage of the mandatory fees, and a health insurance allowance. Recipients are nominated by their department.

## Scholarships

Scholarships typically provide partial tuition.

## Graduate Student Travel Awards

Graduate student travel awards provide reimbursement for travel by students who present research and scholarship results to professional conferences. Awards are competitive across disciplines and vary. Funds are administered by the Graduate Student Senate and the Graduate College.

## Other Sources

For other sources of financial support, contact the Office of Student Financial Aid.

Many departments offer additional support through traineeships, parttime employment in research, or part-time teaching appointments.
The Office of the Vice President for Research maintains a library of information on public and private agencies that provide funds for research and graduate study. Much material has been collected concerning awards for overseas study.

## Courses

Most Graduate College courses are offered by the college's programs and schools. They are listed and described in the corresponding Catalog sections.

The college also offers the following nondepartmental courses.

## Graduate College Courses

#### Abstract

GRAD:0006 SROP Scholars Program 0 s.h. GRAD:5225 Communicating Data Through Stories 3 s.h. How to communicate science effectively and responsively with multiple audiences from peers and professors to potential employers, policymakers, and the lay public; focus on speaking about science clearly and vividly in ways that can engage varied audiences, especially those outside the student's own field; connecting and finding common ground with an audience, defining goals, identifying main points, speaking without jargon, explaining meaning and context, using storytelling techniques and multimedia elements. Same as CEE:5225, SDG:5225.

GRAD:5800 Writing for National Fellowships arr. Process of writing applications for nationally competitive fellowship opportunities; completion of a fellowship application portfolio for a specific fellowship opportunity.
GRAD:6000 PhD Postcomprehensive Registration 1 s.h.
GRAD:6001 Master's Final Registration 1 s.h.
Requirements: master's degree candidate.
GRAD:6002 Doctoral Continuous Registration 1 s.h.
Requirements: doctoral degree candidate who has passed comprehensive examinations.

GRAD:6003 Doctoral Final Registration 1 s.h.
Requirements: doctoral degree candidate in final session of enrollment.
GRAD:6217 Seminar in College Teaching 1-3 s.h.
Preparation for college teaching; for graduate students planning to teach. Same as PSQF:6217.

GRAD:6300 Writing for Learned Journals
1-4 s.h.
Seminar that supports graduate students in bringing written work to publishable form; analysis of target journals' audiences, interests, and citation politics; submission and the publication process; response to reader reports and criticism; best writing and research practices; discussion of knowledge cultures and discourses in disciplines and the contemporary academy. Same as AMST:6300, GWSS:6300, RHET:6330.

## GRAD:6313 Studio Summer Fellowship

1 s.h.
Investigation of and reflection on digital scholarly collaboration, production, and promotion. Same as ULIB:6313.
GRAD:6500 Digital Humanities Independent Study arr. Independent study for students working toward their public digital humanities certificate.

GRAD:6510 Introduction to Programming 1 s.h.
How computer programming has quickly become a valuable skill across a diverse range of professions and academic disciplines; programming impacts on an increasingly large segment of professional activity—from analyzing text, visualizing data, creating maps, or developing web applications; knowledge of how to read and write code as a valuable literacy in modern mediated life; introduction to computer programming; students write simple programs of their own design (e.g., automate repetitive tasks, perform calculations on data, accept and process user input).
GRAD:6515 Basic Data Handling in Microsoft Excel 1 s.h. Introduction to managing and examining spreadsheet data for humanities and social sciences; basic data types, organizing data records, creating summary reports and simple charts, tips and tricks for letting Microsoft Excel do the tedious parts; prior experience working with data or Microsoft Excel not required.
GRAD:6520 Data Visualization Basics
1 s.h.
Hands-on introduction to basics of data visualization-working with data, analyzing and designing clear and functional visualizations, and developing simple data visualizations in Excel and Python or R; basic static plots (e.g., scatterplots, histograms, line graphs); brief introduction to geographic maps and network graphs.

GRAD:6521 Scholarly Communication and Journal

## Publishing

1 s.h.
Process of publishing a scholarly journal; several scholarly journals are published locally through Iowa Research Online (IRO); for graduate students interested in academic journal publishing as well as scholarly communication more broadly.

## GRAD:6522 Digital Exhibits: Effective Design and

 Development1 s.h.
Practical technical skills for building digital exhibits; theoretical concepts; how digital exhibits are distinct from physical exhibits; values included in digital storytelling; management of digital exhibit life cycle; main concepts and topics of effective digital exhibit development including storytelling, structuring materials, digitization, metadata application, copyright, and fair use; students gain experience using digital exhibit software, Omeka, for importing and managing content and creating collections and exhibits.

GRAD:6530 Open Source Web Mapping for Beginners 1 s.h. Maps are high-impact visual representations that can make complex ideas more comprehensible and enhance persuasive power of academic arguments; wide range of open source data and scripting libraries that are increasingly available to scholars who wish to present their data in interactive online maps; introduction to basic workflows and scripting for open web mapping with JavaScript, HTML, and CSS.

GRAD:6540 Careers Beyond Academia
1 s.h.
Preparation to search for and apply to a variety of careers outside of academia that allow students to use their digital scholarship and digital skills training; opportunities and challenges faced when transitioning to careers adjacent to and beyond academic environments in which students have become familiar with in their graduate training.
GRAD:6550 Design Fundamentals in Digital Scholarship 1 s.h. Exploration of the role of design in communication while empowering students to grow more comfortable verbalizing the visual; students more accurately describe design elements, produce basic promotional assets, and assess legibility, navigability, and accessibility.
GRAD:6551 Promoting Your Scholarship
1 s.h.
Exploration of ways to communicate research clearly and effectively; investigation of social media platforms as a means of promoting research; promotional material design basics; online portfolio design and differences between curriculum vitae and résumé; experimentation with scholarship presentation; introduction to a variety of forms from press releases and pitches to interdisciplinary conferences and social media.

GRAD:6590 Digital Humanities Capstone arr. Application and practice of classroom experience to a specific project under guidance from a faculty member and project team leader. Prerequisites: CLAS:7290. Requirements: admission to public digital humanities certificate program, an approved certificate plan of study on file, completion of $12 \mathrm{~s} . \mathrm{h}$. of approved coursework, and good standing in all required certificate coursework.

## GRAD:6800 CIC Scholar <br> arr.

GRAD:6801 Regents Exchange Program
arr.
GRAD:6997 Graduate/Professional Transfer
arr.
GRAD:6998 Undergraduate Transfer
GRAD:6999 Resident/Fellow/Post-Doctoral
arr.

GRAD:7280 Obermann Center for Advanced Studies Special Topics Seminars 1-3 s.h.
Active participation and engagement in a major program, such as the annual Humanities Symposium; readings on interdisciplinary histories, contexts, and theoretical perspectives that frame featured events; work of artists, scholars, and researchers participating in the program. Requirements: admission to Graduate College.
GRAD:7285 Obermann Center Professional Development Seminar

1 s.h.
Active participation and engagement in a series of classes dedicated to connecting public engagement, research, and teaching; readings and media viewings that frame course topics; production of a short film, marketing materials, grant, and syllabi relevant to public engagement project. Requirements: admission to Graduate College and completion of Obermann Graduate Institute on Engagement and the Academy.
GRAD:7385 Teaching and Learning in Higher Education 3 s.h. Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as CSED:7385, EDTL:7385, EPLS:7385, PSQF:7385.

## GRAD:7400 Practicum in College Teaching

arr.
Supervised college teaching experience; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations. Requirements: admission to the graduate certificate in college teaching program.
GRAD:7601 Postdoctoral Research Scholar 0 s.h.
Requirements: postdoctoral standing.
GRAD:7602 Postdoctoral Research Fellow 0 s.h.
Requirements: postdoctoral standing.

# Applied Mathematical and <br> Computational Sciences 

Chair

- Laurent O. Jay (Mathematics)

Graduate degree: PhD in applied mathematical and computational sciences

Faculty: https://amcs.uiowa.edu/faculty-research
Website: https://amcs.uiowa.edu/
Applied mathematical scientists formulate scientific concepts and problems in mathematical terms; solve the resulting mathematical problems using analytical and computational methods; and discuss, interpret, and evaluate the solutions. They explore areas of mathematical application and develop mathematical theories in new areas.

## Applied Mathematical and Computational Sciences, PhD

The PhD program in applied mathematical and computational sciences is autonomous, broadly based, and interdisciplinary. It is designed to help students achieve a command of theoretical and applied mathematics and obtain basic knowledge in another area (e.g., in physics, engineering, operations research, chemistry, computer science, economics, statistics, geography, or in the biological, medical, or social sciences). The program is flexible; students can concentrate on applied mathematics, such as differential equations and numerical analysis, or on other applicable techniques in mathematics. Scientific computing is an important part of applied mathematics, so it is often a part of student training and dissertation research. Prospective students should have a desire to apply mathematical techniques or theory to relevant problems in an outside area.

## Learning Outcomes

Students will gain:

- proficiency in core applied mathematics subjects and broad knowledge in mathematics;
- proficiency in computer programming/scientific computing;
- excellent knowledge in at least one application area outside mathematics;
- ability to communicate knowledge and research work to various audiences; and
- ability to carry out research and work independently at a professional level.

## Requirements

The Doctor of Philosophy program in applied mathematical and computational sciences (AMCS) requires a minimum of 72 s.h. of graduate credit.

## Course of Study

Faculty members can help each student plan a course of study that is consistent with the student's background, interests, and goals.

These individual plans are designed to help students develop expertise in methods of applied mathematics and build a good foundation in related topics of mathematics. The individual plans also provide sufficient knowledge in an outside area to enable students to use mathematical techniques in that area.

Students may arrange their study plans to earn a master's degree from another department after they complete part of their plan. Students find suitable thesis problems and supervisors with the help of the faculty.

## Required Courses in Core Areas

Students must successfully complete these three core course sequences in the first two years of graduate study.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | 6 |
| MATH:5200 \& | Introduction to Analysis I-II | 6 |
| MATH:5210 | Nonlinear Dynamics with | 6 |
| MATH:5600 \& | Numerical Methods - <br> Introduction to Partial <br> Differential Equations |  |

## Outside Area Courses

Students must take and pass PhD -level courses in areas in which mathematics is applied: one preparation course in the first two years and then two advanced courses outside of mathematics at the 6000level or above.

## Advanced Mathematics Course Requirement

In order to establish a solid foundation in mathematics, students must successfully pass two more courses numbered MATH:5000 to MATH:5999 and complete at least 12 s.h. of graduate mathematics courses numbered MATH:6000 to MATH:7799, with the exception of seminar courses. The courses should be chosen to obtain mathematical breadth and must be approved by the AMCS chair.

## Comprehensive Examination

Students complete a comprehensive examination that covers their outside research area within three and a half years after beginning graduate study. The examination is typically based on the outside area courses and/or directed readings.

## Admission

Applicants must carefully follow the applied mathematical and computational Sciences (AMCS) application procedures and they must meet the Graduate College Admission Requirements on the Iowa Graduate Admissions website. Those interested in applying may also view Admissions on the Graduate College website.

To be prepared for graduate-level coursework in applied mathematics, applicants should have a bachelor's or master's degree with a strong mathematics or computational component.
Applications for fall admission are due on Jan. 15. For more information about the academic program, contact the chair of the Applied Mathematical and Computational Sciences Program. The Manual of Rules and Regulations on the Graduate College website also can provide additional information.

## Financial Support

Financial support in the form of teaching assistantships is provided to every student admitted. Students may apply to various fellowships during their study. Research assistantships for qualified applicants also may be available from certain graduate advisors. Summer support is generally available to students.

## Career Advancement

Career opportunities for applied mathematicians include positions in colleges, universities, governmental laboratories, business, industry, and consulting firms.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Students must pass (grade of B-minus or higher in each course) all three core course sequences (or be exempted) in the first two years of graduate study.
c Taken in August.
d Students must take and successfully pass two MATH courses numbered 5000-5999, and complete at least 12 s.h. of MATH courses numbered 6000-7799 with the exception of the seminars. Work with faculty advisor to determine appropriate graduate coursework and receive departmental approval.
e Students must take and pass PhD level courses in areas in which mathematics is applied: one preparation course in the first two years and then two advanced courses outside of mathematics at the 6000 level or above.
f Work with faculty advisor to determine appropriate graduate coursework and sequence.
g Dissertation defense.

## Biomedical Science

## Director

- Prabhat Goswami

Graduate degrees: MS in biomedical science; PhD in biomedical science
Website: https://medicine.uiowa.edu/biomed/
The University of Iowa Biomedical Science Program is a firstyear umbrella program that provides students the opportunity to explore multiple disciplines prior to affiliating with one of seven PhD programs.
The first year curriculum is tailored to enhance a student's education goals for the PhD program(s) in which they are most interested. Students choose from more than 280 laboratories for three different research rotations. At the end of the first year, students select their thesis laboratory and graduate program. Successful completion culminates with a PhD in biomedical science and affiliation with a respective subprogram.
Students select from one of seven subprograms:

- cancer biology [p. 1607];
- cell and developmental biology [p. 1609];
- experimental pathology [p. 1610] (direct admit only);
- free radical and radiation biology [p. 1612];
- molecular medicine [p. 1613];
- molecular physiology and biophysics [p. 1615]; or
- pharmacology [p. 1616].

Visit the Biomedical Science Program website for more information.

## Programs

Graduate Programs of Study

## Majors

- Master of Science in Biomedical Science [p. 1605]
- Doctor of Philosophy in Biomedical Science [p. 1606]

## Admission

The Biomedical Science Program is sufficiently flexible to accommodate students with a relatively wide range of backgrounds. Students with a bachelor's degree in any of the biological, biochemical, engineering, or physical sciences who have a strong desire to pursue a research-oriented career are encouraged to apply. Students must have:

- a bachelor's degree from a regionally accredited American college or university or an equivalent degree from another country as determined by the Office of Admissions; and
- a minimum grade-point average of 3.00 or higher or the equivalent from another country as determined by the Office of Admissions.

## Facilities

Biomedical science researchers benefit from state-of-the-art core research facilities and research support facilities. Much of the research is interdisciplinary, with collaborations coordinated through major research centers, institutes, and programs. The main biomedical research campus consists of over half a million square feet in seven buildings that connect directly with University of Iowa Hospitals \&

Clinics through tunnels and skywalks. The interconnectedness of the campus facilitates basic and translational collaboration across the entire college.

## Financial Support

Students receive stipend and tuition support. Continued support beyond the first year is guaranteed, provided that satisfactory progress toward degree completion is accomplished. Sources of support include departmental funds, training grants, research grants, and individual fellowships. Several offices on campus provide support for graduate trainees seeking to obtain prestigious fellowship awards to support their training.

## Career Advancement

The Biomedical Science Program prepares students for successful careers as researchers, educators, and future leaders in the international biomedical workforce. The core biomedical science curriculum has elements that highlight career diversity for PhD students and professional development for scientific careers. In addition, the Grad Success Center in the Graduate College provides opportunities for further development and one-on-one guidance for those searching for jobs and navigating pathways into scientific careers.

## Courses

- Biomedical Science Courses [p. 1603]
- Cancer Biology Courses [p. 1603]

## Biomedical Science Courses

BMED:5207 Principles of Molecular and Cellular Biology 3 s.h. Structure of DNA, RNA, and Protein; DNA replication, genetic and epigenetic regulation; RNA production and processing; protein production and post-translation modification; cellular membranes and trafficking; cytoskeleton and regulation of cell junctions and migration; signal transduction and regulation of cell cycle and apoptosis; didactic lectures and group discussion of primary research publications.
BMED:5208 Topics in Principles of Molecular and Cellular Biology 1 s.h. Research literature discussion that parallels subjects discussed in BMED:5207. Corequisites: BMED:5207.
BMED:7270 Scholarly Integrity/Responsible Conduct of Research I

0 s.h.
Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/ mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/ mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/ animal subjects). Requirements: successful completion of CITI online training (greater than $80 \%$ score for each module) and enrollment in Graduate College degree-seeking program. Recommendations: minimum first-year graduate standing (PhD, MS/MA), and involvement in mentored research activities (extramurally or intramurally funded).

## BMED:7271 Scholarly Integrity/Responsible Conduct of Research II

Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/ mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/ mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/ animal subjects). Requirements: successful completion of CITI online training (greater than $80 \%$ score for each module) and enrollment in Graduate College degree-seeking program. Recommendations: minimum of first-year graduate standing ( $\mathrm{PhD}, \mathrm{MS} / \mathrm{MA}$ ) and involvement in mentored research activities (extramurally or intramurally funded).

## BMED:7604 Scholarly Integrity/Responsible Conduct of Research

 I0 s.h.
Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/ mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/ mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects); meets responsible conduct of research training obligation for postdocs and faculty holding an NIH K award. Requirements: successful completion of CITI online training (greater than $80 \%$ score for each module).

## BMED:7605 Scholarly Integrity/Responsible Conduct of Research II

Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/ mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/ mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects); meets responsible conduct of research training obligation for postdocs and faculty holding an NIH K award. Requirements: successful completion of CITI online training (greater than $80 \%$ score for each module).

## BMED:7777 Biomedical Science Seminar

1 s.h.
Foundational professional development in writing and oral presentation skills; presentations from local and visiting professors focusing on career pathways for biomedical scientists; students practice presenting their research in rotation presentations with detailed feedback.

BMED:7888 Biomedical Science Research arr.
Research experience in biomedical science graduate program faculty member's lab; students rotate in three labs during their first year to provide a range of biomedical research experience before choosing a dissertation research mentor.

## Cancer Biology Courses

CBIO:3310 Practical Data Science and Bioinformatics 3 s.h.
Understanding how to access large biological data sets and use them to answer biological questions is an important skill for researchers; immersive introduction to computational handling of data; how to access and analyze publicly available data; critically evaluate data quality and analysis in context of measuring gene expression; basic coding in R/RStudio, plotting and data display, fitting and regression, statistical inference, statistical models, downloading and data wrangling; basic introduction to machine learning (clustering); for students with no computational background. Prerequisites: BIOL:1411 with a minimum grade of C - and BIOL: 1412 with a minimum grade of C-. Requirements: college algebra. Recommendations: BMB:3110, or BMB:3120 and BMB:3130, or other upper-level life sciences courses. Same as BMB:3310, MMED:3310.
CBIO:5000 Experimental Methodologies 2 s.h. Practical experience in common laboratory methods including polymerase chain reaction (PCR), western blotting, immunostaining, cell culture, and bioinformatics. Requirements: admission to cancer biology graduate program.
CBIO:5500 Topics in Cancer Biology
1 s.h.
Discussion and presentation of new scientific literature in cancer biology fields; how to evaluate and critically interpret scientific literature, data, and conclusions; journal club format. Requirements: admission to cancer biology graduate program.
CBIO:6000 Seminar: Cancer Research 1 s.h.
Attendance at seminar presentations of cutting-edge science in the field of cancer biology; presentations by experts in the field and trainees. Requirements: admission to cancer biology graduate program.

CBIO:6500 Research in Cancer Biology arr.
Research experience through research rotations and conduction of dissertation research in cancer research laboratories. Requirements: admission to cancer biology graduate program.
CBIO:7000 Clinical Connections
1 s.h.
Shadowing experiences arranged with clinicians who are treating cancer patients at University of Iowa Hospitals \& Clinics.
Requirements: admission to cancer biology graduate program.
CBIO:7500 Crafting a Scientific Proposal
1 s.h.
Training in areas of scientific writing and development of a scientific proposal; students develop a proposal related to, but not identical to, the proposal for the comprehensive exam. Requirements: admission to cancer biology program.

## Biomedical Science, MS

There is no direct admission to the MS program in biomedical science.
Students interested in biomedical science are considered for PhD admission only. Visit the PhD in biomedical science [p. 1606] in this section of the catalog for information about the PhD degree program.

## Biomedical Science, PhD

The Biomedical Science Program optimizes students' mobility and their ability to explore several graduate programs during their first academic year before affiliating with a specific biomedical science subprogram-cancer biology, cell and developmental biology, experimental pathology (direct admit only), free radical and radiation biology, molecular medicine, molecular physiology and biophysics, or pharmacology.

Students thrive in a collaborative environment in which they explore subprograms by performing three research rotations in the laboratories of any of the biomedical science faculty, regardless of their departmental or program affiliation. Biomedical science students are advised regarding course selections, research rotations, and registration by a designated faculty academic advisor. Students can tailor their choice of electives based on their interests.

Following completion of the first year, it is expected that students will be able to select a research laboratory and subprogram affiliation. The specific subprogram students choose for thesis training determines their curriculum for subsequent years.

## Core Curriculum

## First Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: | Introduction to Biostatistics | Basic Biostatistics and |
| BIOS:4120 | Experimental Design | 3 |
| PCOL:5204 | Principles of Molecular and <br> Cellular Biology | 1 |
| All of these: | Topics in Principles of <br> BMED:5207 | Molecular and Cellular Biology <br> Biomedical Science Seminar |
| BMED:5208 | Biomedical Science Research | 1 |
| BMED:7777 |  | arr. |
| BMED:7888 |  |  |

## First Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:7777 | Biomedical Science Seminar | 1 |
| BMED:7888 | Biomedical Science Research | arr. |
| MMED:6260 | Methods for Molecular and <br> Translational Medicine | 1 |
| PATH:5270/ | Pathogenesis of Major Human | 3 |
| IGPI:5270/ | Diseases |  |
| MMED:5270 | Mastering Reproducible Science |  |
| PHAR:6504 |  | 1 |
| Elective course(s) |  |  |

## Admission

Applicants must have a baccalaureate degree from a regionally accredited U.S. college or university, or an equivalent degree from another country as determined by the Office of Admissions. They also must have an undergraduate grade-point average of at least 3.00. Applicants must meet the admission requirements of the Graduate College.

Appropriate preparation includes a one year, college-level course in biology, chemistry (inorganic and organic), and mathematics through calculus.

## Learning Outcomes

## Core Learning Outcomes

Students will:

- demonstrate expertise in foundational aspects of molecular and cellular biology, particularly in a human biomedical context;
- develop hypotheses and experimental methods that can be used to explore questions in molecular biology;
- apply knowledge of biomedical science to human disease through translational research paradigms;
- describe fundamental techniques, statistical methods, and core principles of rigor and reproducibility in biomedical science;
- describe the range of career pathways in the sciences for the biomedical PhD;
- develop proficiency in reading and interpreting scientific literature; and
- develop skills in written and oral communication of scientific work.

## Cancer Biology

Students will:

- master foundational knowledge in cancer biology and demonstrate an in-depth knowledge in their area of emphasis;
- understand and apply the scientific method, design experiments and conduct research utilizing team-based collaboration, knowledge of current literature, and current laboratory methods;
- gain an appreciation of clinical management and therapeutic approaches to treat cancer;
- develop advanced skills in scientific writing and oral presentations in order to effectively communicate research progress and goals;
- exhibit and foster the highest ethical standards in the areas of education, publication, and scientific inquiry; and
- publish at least one first author paper and write a grant application.

## Cell and Developmental Biology

Students will:

- master foundational knowledge in cellular and developmental biology;
- engage in designing and executing experiments to test scientific hypotheses;
- critically evaluate scientific findings;
- communicate scientific findings effectively to diverse audiences;
- exhibit and foster ethics in the areas of education, publication, and scientific inquiry; and
- become an effective teacher of the biological sciences.

## Experimental Pathology

Students will:

- demonstrate subject matter expertise in basic cell and molecular biology, biostatistics/bioinformatics, and pathobiology/ mechanisms of human disease;
- understand and apply scientific method allowing for the appropriate development and testing of hypotheses, problem solving, and utilization of current literature and contemporary laboratory approaches;
- understand and apply the need to conduct research using a teambased approach, including ongoing input from the thesis mentor/ committee as well as peers within the laboratory and graduate program environment;
- understand and apply the key principles of carrying out research and interpreting results using the highest ethical standards; and
- acquire the ability to effectively communicate research goals, approaches and results using both written and oral means.

## Free Radical and Radiation Biology

## Students will:

- demonstrate comprehensive knowledge of foundational principals in free radical and radiation biology, a clear understanding of all free radical and radiation biology course material, and a thorough knowledge of the literature in their area of major emphasis;
- demonstrate a functional comprehension of scientific research, such as use of relevant literature, the formulation of a hypothesis, hypothesis testing, data interpretation, and the lucid presentation of the research in both written and oral form;
- acquire and develop classroom and laboratory teaching skills;
- acquire advanced scientific writing and communication skills competing at the national level for visibility in scholarly activities and funding opportunities;
- produce research results worthy of publication in high impact peer-reviewed journals relevant to the field of study; and
- participate in career development and networking activities at the local, regional, and national levels.

## Molecular Medicine

Students will gain knowledge in:

- tracks for specialized coursework-demonstrate broad-base understanding of one of three tracks selected by students in their second year of studies (metabolic disorders, cardiovascular biology, or molecular and cellular medicine);
- oral and written presentation of scientific data-demonstrate proficiency in scientific writing as evidenced by external fellowship application requirement; organize, defend, and communicate ideas effectively in scientific oral presentations and settings; opportunities to present posters, full-length seminar presentations, short-form data blitzes, lay audience elevator pitches; comprehensive exam; on-topic or off-topic NRSA-style research proposal that is orally defended to a comprehensive exam committee comprised of subject-matter experts; scientific editing and research communication core; and service promoted to students to get one-on-one instruction in scientific editing, focused especially on grant writing;
- experimental design—instruction on experiment design provided by their mentor, experiences in the critical thinking course, and in the basic biostatistics and experimental design course;
- proficiency in research-three laboratory rotations before affiliating to lab, conduct research in a responsible and ethical manner, carry out an in-depth research project, and contribute intellectually and technically to all parts of its development, execution, and analysis; and
- professional skills development-journal clubs, course in critical thinking, and career development series.

## Molecular Physiology and Biophysics

Students will:

- demonstrate a basic knowledge of physiology and biophysics that will serve as the foundation for the student's academic, scholarly, and research endeavors;
- exhibit the necessary practical, methodological, and technical expertise to perform original experimental work in an area of physiological research;
- gain professional skills required for successful academic or research-based careers, including skills in publishing, grant writing, presentation, and teaching; and
- acquire knowledge and respect for principles of biomedical research ethics.

## Pharmacology

Students will:

- identify important research problems through development of subject matter expertise related to pharmacology, and critical evaluation of the current state of knowledge in that area of expertise;
- formulate valid and testable hypothesis and/or research questions, and then plan feasible experiments to address them;
- conduct, analyze, and interpret independent original research that contributes new knowledge to the field of pharmacology;
- effectively communicate research results to a range of audiences in both written and oral formats; and
- conduct all aspects of research and communication of results with the highest ethical standards.

## Cancer Biology

The Doctor of Philosophy in biomedical science with a cancer biology subprogram requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree.

Students enter the molecular medicine subprogram through the Biomedical Science Program. The Biomedical Science Program is designed to provide students maximum flexibility during the first year of graduate studies to take a course of study compatible with several programs while completing research rotations. At the end of the first year, students choose a subprogram affiliation. The cancer biology subprogram provides training in many areas of research-cell biology, genetics, immunology, and cell metabolism, among othersthat are necessary to understand the complexities of cancer etiology and treatment.
The subprogram does not offer a master's degree. Cancer biology is affiliated with the Holden Comprehensive Cancer Center, which was founded in 1980 and has been designed as a National Cancer Institute NCI-Designated Cancer Center since 2000.

The curriculum is a sequence of required and elective courses that provides students with advanced knowledge in current concepts related to molecular, cellular, and genetic processes that contribute to the development and treatment of cancer. It also provides specialized training in experimental methodology used to study cancer in a laboratory setting. Cancer biology prepares students for a variety of career paths in academic, clinical, and industry environments that deal with the study and/or treatment of cancer.
Students gain clinical exposure by shadowing oncologists. They are expected to have a solid background in chemistry, mathematics, and the biological sciences. They should have completed undergraduate coursework in introductory biology and chemistry, biochemistry, genetics, organic chemistry, physical chemistry, and calculus; and previous coursework in cancer biology is desirable. Deficiencies in a particular area, as determined by the Graduate Studies Committee, can be remedied by completion of appropriate courses.

Selection of a PhD mentor (thesis advisor) is normally finalized near the end of the spring semester of a student's first year of study. The deadline for selection is determined by the Biomedical Science Program.
Students are required to complete the core courses listed below prior to their comprehensive examination. Students who wish to take
the comprehensive examination should first make arrangements in consultation with their mentor, the program director, and the Student Advisory Committee. The exam is typically completed during the second summer of study

The PhD in biomedical science with a cancer biology subprogram requires the following coursework.

## Core Cancer Biology Curriculum

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:7270 | Scholarly Integrity/Responsible <br> Conduct of Research I | 0 |
| BMED:7271 | Scholarly Integrity/Responsible <br> Conduct of Research II | 0 |

| CBIO:7500 | Crafting a Scientific Proposal | 1 |
| Elective |  | 3 |

## Second Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:7271 | Scholarly Integrity/Responsible <br> Conduct of Research II | 0 |
| CBIO:5500 | Topics in Cancer Biology | 1 |
| CBIO:6000 | Seminar: Cancer Research | 1 |
| CBIO:6500 | Research in Cancer Biology | 6 |
| Elective |  | 1 |

## Additional Requirements

## Laboratory Rotations

In order to gain more widespread experience in cancer biology research and to aid in selecting a laboratory home and thesis project, students perform three laboratory rotations prior to selection of a thesis advisor. Laboratory rotations are normally carried out in research laboratories of the cancer biology faculty. A rotation can be completed with a faculty member outside the cancer biology program with permission of the program director.

Three rotations, 12 weeks in length, begin in the fall semester of the first year. The goal of the rotations is to gain a comprehensive view of the mentor's research program, to gain exposure to experimental methods used in the mentor's lab, and to learn about the mentoring styles of faculty members.

## Teaching

The cancer biology program does not require teaching. Students with an interest in teaching experience are encouraged to discuss their career plans with their mentor and/or the program director.

## Publication Requirements

Students are required to have a minimum of one first-author publication in a peer-reviewed journal prior to graduation. The article must be formally accepted and be in-press status or published prior to graduation. A co-first-authored, peer-reviewed publication will count toward this requirement.

## Comprehensive Examination

Students are eligible to take the comprehensive examination when they are in good academic standing as defined by the Graduate College-the student has completed all program core courses with a grade of at least $B$ or have a non-letter grade of pass.

## Written Examination

The comprehensive exam is on-topic, meaning the subject should be a student's current research being conducted in the mentor's lab. Students normally take the comprehensive exam during the second spring or summer of their enrollment in the program. They submit a written exam, if that is acceptable to the comprehensive examination committee, and then prepare for an oral examination.

## Oral Examination

The purpose of the oral examination is to determine whether the student's written submission adequately represents the student's knowledge. A student may be queried on issues beyond the scope of the written proposal to allow the committee to determine the student's general depth of knowledge.

## Final Examination

The thesis committee is selected by each student after the successful completion of the comprehensive examination. Students are eligible for their oral thesis defense after completing $72 \mathrm{~s} . \mathrm{h}$. of coursework, publication of at least one primary author manuscript or be in-press
status, and with consent of the thesis committee. The procedures are the same as for the comprehensive examination.

## Combined Programs <br> PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical science (cancer biology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Cell and Developmental Biology

The Doctor of Philosophy in biomedical science with a cell and developmental biology subprogram requires 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree. They gain admission to graduate training laboratories in the Department of Anatomy and Cell Biology, Interdisciplinary Graduate Programs, or through direct admission into a specific laboratory.

The PhD in biomedical science with a cell and developmental biology subprogram requires the following coursework.

## Core Cell and Developmental Biology Curriculum

## First Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:5207 | Principles of Molecular and <br> Cellular Biology | 3 |
| BMED:5208 | Topics in Principles of <br> Molecular and Cellular Biology | 1 |

| BMED:7777 | Biomedical Science Seminar | 1 |
| :--- | :--- | ---: |
| BMED:7888 | Biomedical Science Research | arr. |
| PCOL:5204 | Basic Biostatistics and <br> Experimental Design | 1 |

Elective course(s)

## First Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:7777 | Biomedical Science Seminar | 1 |
| BMED:7888 | Biomedical Science Research | arr. |
| MMED:6260 | Methods for Molecular and <br> Translational Medicine | 1 |
| PATH:5270/ | Pathogenesis of Major Human | 3 |
| IGPI:5270/ | Diseases |  |
| MMED:5270 |  |  |
| Elective course(s) |  |  |

## Second Year, Fall

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| BMED:7270 | Scholarly Integrity/Responsible Conduct of Research I | 0 |
| ACB:5206 | Graduate Research in Cell and Developmental Biology | rr. |
| ACB:5224 | Graduate Seminar in Cell and Developmental Biology | 0-1 |
| ACB:6220/ <br> MMED:6220/ <br> MPB:6220 | Mechanisms of Cellular Organization | 3 |
| ACB:6237 | Critical Thinking in <br> Biochemistry and Molecular Biology | 1 |
| ACB:6239 | Critical Thinking in Cell Biology | 1 |
| ACB:6248 | Critical Thinking in Development | 1 |
| Elective (option |  |  |

## Second Year, Spring

| Course \# <br> All of these: | Title | Hours |
| :--- | :--- | ---: |
| BMED:7271 | Scholarly Integrity/Responsible <br> Conduct of Research II | 0 |
| ACB:5206 | Graduate Research in Cell and <br> Developmental Biology | arr. |
| ACB:5224 | Graduate Seminar in Cell and <br> Developmental Biology | $0-1$ |
| ACB:6238 | Critical Thinking in Genetics | 1 |
| ACB:6249 | Critical Thinking in Cellular <br> Physiology | 1 |
| ACB:6250 | Critical Thinking in Scientific <br> Writing and Presentations | 1 |

Elective (optional)

## Electives

Elective course offerings change each year and are determined shortly before the semester begins. Examples of elective courses offered in the past five years that would be acceptable for students in the cell and developmental biology subprogram follow.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BIOL:4333 | Genes and Development | 3 |
| GENE:6150 | Genetic Analysis of Biological | 3 |
| MMED:6226/ | Systems | Cell Cycle Control |
| ACB:6226/MPB:6226 |  | 1 |
| MMED:6227/ | Cell Fate Decisions | 1 |
| ACB:6227/MPB:6227 |  |  |
| PCOL:6225 | Growth Factor Receptor |  |
|  | Signaling | 1 |

## Additional Requirements

## Laboratory Rotations

The faculty advisor, along with the biomedical sciences program director, assists students in the process of selecting their initial laboratory rotation during the first year. The first of three 10 -week rotations begins the first week of the fall semester. Students may choose any biomedical science program faculty member laboratory for the remaining two laboratory rotations, depending upon availability of positions and mutual interest of students and host faculty. Students have the option of joining the cell and developmental biology subprogram after their three rotations.

## Teaching

Students are required to complete a teaching requirement ( 3 s.h.). They may teach in a combination of 1 or 2 s.h. courses, or one 3 s.h. course. Teaching requirements must be met prior to the final thesis defense and graduation. Most students meet the requirement in the third year after completion of the comprehensive exam. A student must earn a satisfactory report from the course director in order to receive credit for the teaching requirement.

## Publication Requirements

It is expected that a student will have contributed as an author to at least one research publication. The publication must demonstrate primary authorship and be at the accepted phase of the publication process. The number of publications and their quality, content, and impact is established by the thesis committee.

## Seminar Presentations

Students present their thesis research annually in the cell and developmental biology seminar series in a 30-minute presentation. Evaluation critique by faculty and students is provided.

## Comprehensive Examination

The comprehensive examination must be taken before the fall semester of a student's third year.

## Written Examination

A written proposal follows the form of a standard National Institutes of Health (NIH) R01 research grant and covers the area of the research proposed for the student's anticipated thesis dissertation. One aim area should be completely of the student's own design, with no input from the thesis advisor.

## Oral Examination

The oral examination of the student's research proposal lasts approximately two to three hours. The exam begins with a brief student presentation on the proposed research project. Questions during the examination may come from the proposal, the thesis research, or other general areas of cell and developmental biology.

## Thesis Defense

The five-member thesis committee serves as an advisory body for the preparation of the thesis. The candidate and the committee should meet yearly; however, the candidate, the thesis advisor, or the committee can request a meeting at any time. In the subultimate committee meeting, committee members review the material that is expected to be incorporated into the thesis. The final draft of the thesis is due to the committee two weeks before the final examination. The final examination takes the form of a seminar presented to the program, with questions, comments, and discussion following. After the seminar, the candidate meets with the committee for the final thesis defense.

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical science (cell and developmental biology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784]
(Carver College of Medicine) in the catalog.

## Experimental Pathology

The Doctor of Philosophy in biomedical science with an experimental pathology subprogram requires a minimum of $72 \mathrm{~s} . \mathrm{h}$. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree. The subprogram provides students with advanced knowledge of disease pathogenesis at the genetic, molecular, cellular, and systems levels. It also teaches cutting edge research skills enabling graduates to investigate the basis of disease and lay the foundation for novel and improved therapies.

The curriculum is a sequence of required and elective courses with the goal of providing students a foundation in current cellular and molecular biology, in-depth knowledge of disease pathogenesis, and specialty content in the area of their thesis work.

The experimental pathology subprogram only accepts direct admits at this time. All admitted students will have already identified a faculty mentor and laboratory upon entering the subprogram. Accordingly, students in experimental pathology do not perform rotations, but begin developing a thesis project with their mentor at the onset of their PhD training. Consistent with the direct admission policy, Medical Science Training Program (MSTP or MD/PhD) students may join the experimental pathology PhD subprogram. Admission also is considered for off-cycle or spring semester.

The PhD in biomedical science with an experimental pathology subprogram requires the following coursework.

## Core Experimental Pathology

 Curriculum| Course \# | Title | Hours |
| :--- | :--- | :---: |

## Electives

The following are possible elective choices. Electives are determined by the area of thesis research.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| FRRB:7001/ | Molecular and Cellular Biology | 3 |
| PATH:7001 | of Cancer |  |
| GENE:6150 | Genetic Analysis of Biological | 3 |
|  | Systems |  |

## Comprehensive Examination

The comprehensive examination is generally taken in the spring semester of the second year of study. Students with advanced standing (medical scientist training program students or those with an MS) may choose to take the examination in the fall semester of their second year.

The comprehensive examination is off-topic. The focus of the proposal is in the field of a student's research. To determine the topic, each of the five comprehensive exam committee members choose a recent high-profile paper in the area of the student's research interests, but not directly related to the dissertation project. After examining the papers, the student chooses one and makes it the subject of the comprehensive exam.

The student then prepares and submits a two-page, single-spaced abstract to the committee. The abstract should include the background/ rationale, the significance of the question being asked, and an outline of the specific aims. Upon approval of the abstract, the student is given permission to prepare a full proposal based on the NIH R21 format. Specifically, the proposal should be seven single-spaced pages and must include significance, innovation, rationale, and experimental approach. The proposal is then defended orally in front of the entire committee.

## Final Examination

The dissertation committee consists of the mentor and four additional faculty. Students are required to select and meet with their committee
by the end of the first fall semester of their second year, and at least yearly thereafter.
Upon meeting all requirements, students may then defend their dissertation/final exam. Two weeks prior to the defense, students must provide the entire committee with a completed draft of their dissertation. On the day of the defense, students present a public seminar of their dissertation work. This is then followed by defense of the dissertation before the entire dissertation committee. A final version of the dissertation is prepared based on suggested edits provided by the committee. After final approval by the research advisor and committee, the dissertation is submitted to the Graduate College.
For more information, see the Experimental Pathology PhD Graduate Program on the Department of Pathology website.

## Free Radical and Radiation Biology

The Doctor of Philosophy in biomedical science with a free radical and radiation biology subprogram is interdisciplinary and requires 72 s.h. of graduate credit. Students must maintain a cumulative gradepoint average of at least 3.00 to earn the degree. The possibility exists for a major emphasis in radiation biology or redox biology with a focus on cancer or degenerative diseases associated with aging. Although students with diverse academic backgrounds may enter the program, each student should have a science background which includes at least two years of chemistry, including organic chemistry; one year of physics; two years of biology; and mathematics, including at least one semester of calculus.

The PhD in biomedical science with a free radical and radiation biology subprogram requires the following coursework.

## Typical Curriculum

## First Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:5207 | Principles of Molecular and <br> Cellular Biology | 3 |
| BMED:5208 | Topics in Principles of <br> Molecular and Cellular Biology | 1 |
| BMED:7777 | Biomedical Science Seminar | 1 |
| BMED:7888 | Biomedical Science Research | arr. |
| FRRB:5000 | Radiation Biology | 4 |
| PCOL:5204 | Basic Biostatistics and <br>  Experimental Design | 1 |

## First Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:7777 | Biomedical Science Seminar | 1 |
| BMED:7888 | Biomedical Science Research | arr. |
| FRRB:7000 | Redox Biology and Medicine | 4 |
| MMED:6260 | Methods for Molecular and | 1 |
|  | Translational Medicine |  |
| PATH:5270/ | Pathogenesis of Major Human | 3 |
| IGPI:52700 | Diseases |  |
| MMED:5270 |  |  |
| PHAR:6504 | Mastering Reproducible Science | 1 |

## Second Year, Fall

| Course \# | Title | Hours |

| MICR:6201/ <br> IMMU:6201 | Graduate Immunology (spring) | 3 |
| OEH:6710 | Human Toxicology and Risk Assessment (spring) | 3 |

| PATH:8133 | Introduction to Human <br> Pathology for Graduate Students <br> (fall) | $3-4$ |
| :--- | :--- | ---: |
| PCOL:6225 | Growth Factor Receptor |  |
| PSQF:6217/ Signaling <br> GRAD:6217 Seminar in College Teaching <br> (fall and spring) | 1 |  |

## Additional Requirements

## Laboratory Rotations

Graduate students rotate through at least three different free radical and radiation biology laboratories during their first academic year with primary and secondary faculty.

## Seminar and Journal Clubs

Students must enroll in one seminar for credit once a year for three years as well as a thesis defense seminar. Students should not register for the seminar during their first academic year.

Students enrolled for research credit are required to submit a research report to their advisor on the last day of class each semester. The report is evaluated and graded by the advisor. The report, written in a form that is appropriate for a peer-reviewed publication, should define the goals, aims, and objectives for the specific semester, and describe the progress made by the student toward completion of the research objectives.
Topics in Free Radical Biology and Medicine (FRRB:6006) and Topics in Radiation and Cancer Biology (FRRB:6008) must be taken at least two times.

## Publication Requirements

Students must submit at least one first-author manuscript prior to the thesis defense. All PhD students are expected to have co-author publications prior to graduation and these publications should include first authorship.

## Grant Writing Opportunities

National Institutes of Health (NIH) research grant proposals (i.e., F30, F31) and/or equivalent grant submissions are encouraged based on a student's work. The free radical and radiation biology program will provide resources and critiques of the application prior to submission. Students should review the instructions provided in the NIH publication, PHS-398, available from the National Institutes of Health website.

## Comprehensive Examination

Students who have successfully completed four semesters since enrollment must take their comprehensive exam no later than February of their third year in the program. Students need to maintain full-time status (minimum of 9 s.h. per semester) prior to their comprehensive examination. The comprehensive examination includes both a written and an oral presentation on the topic of the student's dissertation research. The written proposal needs to be organized following the National Institutes of Health guidelines for an R01 application. Students are encouraged to consult with their mentors and members of their PhD advisory/examination committee as they develop their research hypothesis and specific aims; this should be limited to one page. Once the hypothesis and aims page has been approved by the committee, the mentor and committee members will not have any input into the development and writing of the rest of the proposal. If appropriate, students are allowed a second attempt at the comprehensive examination. A second attempt needs to be completed no later than August of the same year as the first attempt of the comprehensive examination.

The written proposal is typically 14 pages, which includes an abstract (half-page summary, as a separate page); the hypothesis and aims (one page), body of proposal (12 pages), and references not included in the page count. A title page (not included in the page count) with only administrative information, such as the title of proposal, name of the student, date of examination, and other such information is encouraged. The proposal should be prepared as single-spaced text, in 11-point Arial font.

## Final Examination

The final examination is a defense of the thesis and explanation of the scientific principles involved, given in a public seminar and closed door oral exam, with committee members. The student's research must be summarized in the format required by the Graduate College.

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical science (free radical and radiation biology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Molecular Medicine

The Doctor of Philosophy in biomedical science with a molecular medicine subprogram provides interdisciplinary training in the concepts and methodologies fundamental to the investigation of biological processes and molecular mechanisms that relate to human disease. The PhD requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree.

Students enter the molecular medicine subprogram through the Biomedical Science Program. The Biomedical Science Program is designed to provide students maximum flexibility during the first year of graduate studies to take a course of study compatible with several programs while completing research rotations. At the end of the first year, students choose a subprogram affiliation.
The curriculum is a sequence of required and elective courses, which provides students with broad exposure to areas including molecular biology, cell biology, biochemistry, and integrative sciences. It ensures a comprehensive exposure to conceptual and experimental aspects of molecular and cellular biology and of translational studies. Sufficient flexibility is provided so that students can adapt the program to permit specialization in their own area of interest. Faculty members are involved in a variety of research projects involving molecular and cellular biology and molecular medicine.
The PhD in biomedical science with a molecular medicine subprogram requires the following coursework.

## Typical Curriculum

First Year
See the Core Curriculum [p. 1606] at the beginning of the PhD in biomedical science section of the catalog for a typical first-year schedule.

## Second Year

Students select coursework from the following three track areas: metabolic disorders, cardiovascular biology, and molecular and cellular medicine (general).

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:7270 | Scholarly Integrity/Responsible <br> Conduct of Research I | 0 |
| MMED:6280 | Critical Thinking in Molecular <br> Medicine | 1 |
| MMED:7290 | Seminars in Molecular <br> Medicine | 1 |
| Electives |  | $1-3$ |

Students select coursework from the following three track areas: metabolic disorders, cardiovascular biology, and molecular and cellular medicine (general).

## Metabolic Disorders

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMB:7253 | Introduction to Metabolism | 1 |
| BMB:7255 | Metabolism II | 1 |
| MMED:6230 | Pathogenesis of Metabolic and <br> Cardiovascular Disorders | 3 |
| MMED:6280 | Critical Thinking in Molecular <br> Medicine | 1 |
| MMED:7310 | Translational Medicine <br> Education Rounds (taken fall <br> and spring semesters) | 1 |
|  |  |  |

## Cardiovascular Biology

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| MMED:6230 | Pathogenesis of Metabolic and <br> Cardiovascular Disorders | 3 |
| MMED:6280 | Critical Thinking in Molecular <br> Medicine | 1 |
| MMED:7310 | Translational Medicine <br> Education Rounds (taken fall <br> and spring semesters) | 1 |
| Elective |  | 3 |

## Molecular and Cellular Medicine (General)

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| MMED:6220/ <br> ACB:6220/MPB:6220 | Mechanisms of Cellular Organization | 3 |
| MMED:6280 | Critical Thinking in Molecular Medicine | 1 |

| Related coursework from list in the molecular medicine Graduate Student Guidelines |  | 2 |
| 3 s.h. from these: |  |  |
| MMED:3310/ <br> BMB:3310/ <br> CBIO:3310 | Practical Data Science and Bioinformatics | 3 |
| MMED:6226/ <br> ACB:6226/MPB:6226 | Cell Cycle Control | 1 |
| MMED:6227/ <br> ACB:6227/MPB:6227 | Cell Fate Decisions (elective, 1s.h. maximum) | 1 |
| PCOL:6225 | Growth Factor Receptor Signaling | 1 |
| Elective |  | 1 |

## Additional Requirements

## Laboratory Rotations

To ensure that students obtain early involvement in laboratory research, they are required to register for research credits and complete three laboratory rotations during their first year of graduate study. In general, these rotations are in laboratories of three different molecular medicine faculty members. In some cases, if approved by the molecular medicine program, students may be allowed to complete two of their rotations in the same laboratory.

## Teaching

Students are required to complete a teaching requirement (3 s.h.). They may teach in a combination of 1 or 2 s.h. courses, or one 3 s.h. course. This teaching requirement must be met prior to the final dissertation defense and graduation. It is recommended that teaching occur in the third year following completion of the comprehensive examination.

## Publication Requirements

Students are required to have a minimum of one first-author publication in a peer-reviewed journal. The article must be formally accepted and be in-press status or be published prior to graduation. A co-first-authored, peer-reviewed publication will count toward this requirement.

## External Fellowship Application Requirement

Students are required to submit a fellowship to an external funding agency (i.e., National Institutes of Health, American Heart Association) within one year of completing their comprehensive examination or by a date that is mutually agreed upon by the student, the dissertation advisor, and the molecular medicine program.

## Comprehensive Examination

Students are expected to complete the comprehensive examination, both written and oral components, before the beginning of their third year. The preliminary specific aims document can be submitted to the comprehensive examination committee any time after approval of the dissertation plan, but must be submitted before April 1. The committee evaluation of the specific aims will be returned to the student within one week. A rejected specific aims must be revised and resubmitted within three weeks. The committee then has one week to evaluate the resubmitted specific aims. The specific aims must be accepted by a majority vote of the committee before a student can proceed with development of a full proposal. Only two rounds of submission are allowed.

Following acceptance of the specific aims, a student must submit the written proposal within six weeks. The committee has two weeks to review the written document. The oral presentation to defend the written proposal should be scheduled as soon after the two weeks as possible or at the convenience of the committee. It is expected that all examinations will be completed by July 15 , in advance of the end of the student's second year.
The detailed Molecular Medicine Graduate Student Guidelines is located under Program Information on the Molecular Medicine Program website.

## Final Examination

The five-member thesis committee serves as an advisory body for preparation of the thesis. It is expected that a student meet with the committee annually, although the candidate, thesis advisor, or the committee can request a meeting at any time. The final examination takes the form of a seminar presented to the program followed by a final thesis defense with committee members. The student is required
to present a complete copy of the thesis to the thesis committee members at least two weeks prior to the final defense date.

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical science (molecular medicine subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

Molecular Physiology and Biophysics
The Doctor of Philosophy in biomedical science with a molecular physiology and biophysics subprogram offers opportunities for training and research. The degree requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average (GPA) of at least 3.00 to earn the degree.

Students enter the molecular physiology and biophysics subprogram through the Biomedical Science Program. The Biomedical Science Program is designed to provide students maximum flexibility during the first year of graduate studies to take a course of study compatible with several programs while completing research rotations. At the end of the first year, students choose a subprogram affiliation.
Students join an active group of faculty members and advanced students at a time of expanding interdisciplinary biomedical research at the University of Iowa. Faculty in the Department of Molecular Physiology and Biophysics have a strong research focus on the cellular, molecular, and physical mechanisms of physiological processes.
The PhD in biomedical science with a molecular physiology and biophysics subprogram requires the following coursework.

## Typical Curriculum

## First Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:5207 | Principles of Molecular and <br> Cellular Biology | 3 |
| BMED:5208 | Topics in Principles of <br> Molecular and Cellular Biology | 1 |
| BMED:7777 | Biomedical Science Seminar | 1 |
| BMED:7888 | Biomedical Science Research | arr. |
| PCOL:5204 | Basic Biostatistics and <br> Experimental Design | 1 |
| Elective course(s) |  |  |

## First Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:7777 | Biomedical Science Seminar | 1 |
| BMED:7888 | Biomedical Science Research | arr. |
| MMED:6260 | Methods for Molecular and <br> Translational Medicine | 1 |
| PATH:5270/ | Pathogenesis of Major Human | 3 |
| IGPI:5270/ | Diseases |  |
| MMED:5270 |  |  |
| Elective course(s) |  |  |

Second Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:5207 | Principles of Molecular and <br> Cellular Biology | 3 |
| BMED:7270 | Scholarly Integrity/Responsible <br> Conduct of Research I | 0 |
| MPB:5153 | Graduate Physiology | 4 |
| MPB:6302 | Research Physiology and <br> Biophysics | 6 |

## Second Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:7271 | Scholarly Integrity/Responsible <br> Conduct of Research II | 0 |
| MMED:6226/ | Cell Cycle Control (elective) | 1 |
| ACB:6226/MPB:6226 | Cell Fate Decisions (elective) | 1 |
| MMED:6227/ | ACB:6227/MPB:6227 | Research Physiology and <br> Biophysics <br> MPB:6302 |
| Growth Factor Receptor <br> Signaling | 2 |  |

## Elective Coursework Options

Any elective preapproved by the director of graduate studies can be used to meet the elective requirement. A total of 9 s.h. of elective coursework is required.
The most common elective options are the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| GENE:6150 | Genetic Analysis of Biological <br> Systems | 3 |
| IGPI:5270/ | Pathogenesis of Major Human <br> MMED:5270/ | Diseases |
| PATH:5270 | Mechanisms of Cellular | 3 |
| MPB:6220/ | Organization |  |
| ACB:6220/ | Fundamental Neurobiology I | 3 |
| MMED:6220 |  | 3 |
| NSCI:5653/ |  |  |
| Additional Requirements |  |  |
| Plan of Study |  |  |

In consultation with the director of graduate studies, each newly admitted student formulates a plan of study to be completed before the comprehensive examination. This plan should include projected dates for completion of the comprehensive examination as well as provision for removal of deficiencies. Before completing the comprehensive exams, the normal course load is 15 s.h. each semester.

## Required Courses

It is the intention of the department to have a curriculum that allows coursework to be mostly completed within the first year, though in some instances additional coursework in subsequent years is required. The core curriculum represents a minimum of required classes; although with advice of the director of graduate studies and thesis advisor, some students may benefit from completing additional coursework.

Requests for waiver of required courses or change of course registration must be approved by the director of graduate studies after consultation with the faculty and the chair of the department.

## Evaluation of Progress

Students must meet progress requirements of the Department of Molecular Physiology and Biophysics and the Graduate College. To meet departmental requirements, students must earn a grade of $B$ or higher in MPB:5153 Graduate Physiology and BMED:5207 Principles of Molecular and Cellular Biology (B-minus or lower constitutes a non-passing grade), a grade of satisfactory (S) for BMED:7270 Scholarly Integrity/Responsible Conduct of Research I, and a GPA of at least 3.00 in all elective coursework (a grade below B, but above D-minus, is permissible for individual electives, so long as the GPA of all combined electives taken during the graduate program remains higher than 3.00).

All core curriculum courses receiving a letter grade must be satisfactorily completed prior to taking the comprehensive exam. According to Graduate College regulations, students cannot take a comprehensive exam in a semester in which they are on academic probation.

## Comprehensive Examination

Students admitted directly to the doctoral program are required to complete the comprehensive examination by June 30 of the second year in the program.

## Workshop

All postcomprehensive students are required to present a workshop on the progress of their thesis research once per year. Students should consult with the workshop coordinator to arrange presentation dates. Precomprehensive students also are encouraged to present workshops, though it is not required. Students have an option to present a full or half workshop (typically 45 or 20 minutes, respectively).

## Teaching

Experience in teaching is an important part of a student's academic training. To attain adequate teaching proficiency, students receive teaching assignments after successful completion of the comprehensive exam and in subsequent years as warranted. Individual assignments depend on the teaching needs of the department.
Examples of teaching assignments include running review sessions in a graduate physiology course, formal lectures, participating in small group conferences, assisting in computer simulations, or bench mentoring of summer students. These teaching assignments are made by the director of graduate studies in consultation with appropriate course directors. Thesis advisors with specific suggestions concerning teaching assignments that would be particularly beneficial to the individual circumstances of a particular student are encouraged to share them with the director of graduate studies for consideration. However, final discretion for approval lies with the director of graduate studies who must preapprove all assignments.

## Research Publication

It is expected that thesis research will result in findings that are of sufficient quality and completeness to warrant publication in good quality peer-reviewed journals. At least one first-author peerreviewed research paper should be accepted for publication prior to the PhD thesis defense. The published paper or a letter from an editor indicating acceptance should be provided to the director of graduate studies before scheduling a final exam date. In certain cases, a firstauthor research manuscript might be written, but not yet accepted by a journal at the time a final PhD thesis exam is scheduled. In this case, the first-author requirement may be satisfied if trainees submit their manuscript to the preprint server for biology, bioRxiv.

## Combined Programs <br> PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical science (molecular physiology and biophysics subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Pharmacology

The Doctor of Philosophy in biomedical science with a pharmacology subprogram requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree.

Qualified students who are interested in earning the Doctor of Medicine along with the PhD may apply to the Medical Scientist Training Program [p. 1784] in a combined MD/PhD program. Students have the opportunity to tailor their curriculum with courses that enhance their educational goals. They take a combination of graduate courses that include seminar courses.
The PhD in biomedical science with a pharmacology subprogram requires the following coursework.

## Core Pharmacology Curriculum

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:5207 | Principles of Molecular and <br> Cellular Biology | 3 |
| BMED:7270 | Scholarly Integrity/Responsible <br> Conduct of Research I | 0 |
| BMED:7271 | Scholarly Integrity/Responsible <br> Conduct of Research II | 0 |
| MPB:5153 | Graduate Physiology | 4 |
| PCOL:5130 | Fundamentals of Pharmacology | 3 |
| PCOL:5204 | Basic Biostatistics and <br> Experimental Design | 1 |
| PCOL:6203 | Pharmacology for Graduate | 5 |
| PCOL:6210 | Students <br> Receptors and Cell Signaling | 3 |
| PCOL:6250 | Advanced Problem Solving in <br> Pharmacological Sciences | 1 |

## Typical Curriculum

## First Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:5207 | Principles of Molecular and <br> Cellular Biology | 3 |
| BMED:5208 | Topics in Principles of <br> Molecular and Cellular Biology | 1 |
| BMED:7777 | Biomedical Science Seminar | 1 |
| BMED:7888 | Biomedical Science Research | arr. |
| MPB:5153 | Graduate Physiology | 4 |
| PCOL:5204 | Basic Biostatistics and <br> Experimental Design | 1 |

## Thesis Defense and Presentation

Students complete a thesis defense with their committee. Once this test is completed they must schedule a public thesis presentation.

## First Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:7777 | Biomedical Science Seminar | 1 |
| BMED:7888 | Biomedical Science Research | arr. |
| MMED:6260 | Methods for Molecular and <br> Translational Medicine | 1 |
| PATH:5270/ | Pathogenesis of Major Human | 3 |
| IGPI:5270/ | Diseases |  |
| MMED:5270 | Fundamentals of Pharmacology | 3 |
| PCOL:5130 | Advanced Problem Solving in | 1 |
| PCOL:6250 | Pharmacological Sciences |  |

## Second Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:7270 | Scholarly Integrity/Responsible <br> Conduct of Research I | 0 |
| PCOL:6015 | Topics in Pharmacology and <br> Neuroscience | 1 |
| PCOL:6080 | Pharmacology Seminar | 1 |
| PCOL:6090 | Graduate Research in <br> Pharmacology | arr. |
| PCOL:6203 | Pharmacology for Graduate <br> Students | 5 |

## Second Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMED:7271 | Scholarly Integrity/Responsible <br> Conduct of Research II | 0 |
| PCOL:6015 | Topics in Pharmacology and <br> Neuroscience | 1 |
| PCOL:6080 | Pharmacology Seminar | 1 |
| PCOL:6090 | Graduate Research in <br> Pharmacology | arr. |
| PCOL:6210 | Receptors and Cell Signaling | 3 |

## Additional Requirements

## Laboratory Rotations

Newly admitted students complete three 12 -week laboratory rotations by the end of the second semester.

## Seminar and Journal Clubs

In subsequent semesters, students enroll in PCOL:6015 Topics in Pharmacology and Neuroscience and PCOL:6080 Pharmacology Seminar.

## Comprehensive Examination

The comprehensive examination process normally begins during the fourth semester and is completed during the fifth semester in the program. The exam consists of writing and defending a research proposal in an area not directly related to work being conducted by the student or in the laboratory of the student's mentor(s). During the oral defense, the Comprehensive Exam Committee may pose questions related to the written proposal and also may ask questions to determine whether the student has broad knowledge in the pharmacological sciences.

## Publication

A first-authored manuscript derived from a student's thesis research must be accepted for publication before the PhD is granted.

## Final Examination

The final oral examination is a defense of the thesis and is conducted by the Thesis Committee, typically immediately after a thesis seminar.

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biomedical science (pharmacology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Academic Plans

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students complete three 12 -week laboratory rotations by the end of the second semester.
b During the first two semesters, all registered students enroll in BMED:5208 and BMED:7777. In subsequent semesters, students enroll in PCOL:6015 and PCOL:6080.
c Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
d Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
e Register for the indicated credit hours of BMED:7888 if taking the courses exactly as listed on the plan for this semester. If enrolling for additional courses, adjust BMED:7888 credit hours to bring total up to 15 s.h.
f Taking this course now allows for coursework completion in an optimal timeframe.
g Register for the indicated credit hours of PCOL:6090 if taking the courses exactly as listed on the plan for this semester. If enrolling for additional courses, adjust PCOL:6090 credit hours to bring total up to 15 s.h.
$h$ The comprehensive examination process normally begins during the fourth semester and is completed during the fifth semester in the program.
i Dissertation defense.

# Center for the Book 

## Director

- Julia A. Leonard (Interdisciplinary Programs)

## Associate Director

- Sara A. Langworthy (Interdisciplinary Programs)

## Graduate degree: MFA in book arts

Graduate certificate: book studies/book arts and technologies
Faculty: https://uicb.uiowa.edu/faculty-and-staff-0
Website: https://uicb.uiowa.edu/
The University of Iowa Center for the Book represents a community of faculty, staff, students, and local book specialists with interests in all facets of book production, distribution, and use. Some members of the center actively research the history and circulation of the book, examining the role of books in cultural and historical processes. They also look at how changes in book production affect the way books are viewed as artifacts. Specialists in book arts and technologies study the history and technique of book crafts, including letterpress printing, typography, calligraphy, papermaking, and bookbinding. Others engage in the conservation or production of books, including artists' books and literary fine press publications.

The center offers classes; sponsors lectures, seminars, and workshops; and encourages the exchange of ideas among individuals with interests in the book. A wide range of perspectives on the book as an aesthetic, cultural, and historical artifact is provided by associated faculty, staff, and graduate students in the schools of Art and Art History, and Library and Information Science; the departments of History and English; the University of Iowa Libraries; the Creative Writing Program (Iowa Writers' Workshop); and other areas. This interdisciplinary membership and the center's facilities combine to provide an exceptional environment for studying the history of the book, its evolution, and its future.

Graduate students may earn a master's degree or a graduate certificate through the Center for the Book. Undergraduate students may add dimension to their majors in English, art, journalism, history, and other disciplines by taking Center for the Book courses in book arts and book studies. They also may include an emphasis on book arts or on cultural and historical aspects of the book in the interdepartmental studies major.

## Programs

Graduate Programs of Study

## Major

- Master of Fine Arts in Book Arts [p. 1627]

## Certificate

- Certificate in Book Studies/Book Arts and Technologies [p. 1629]

## Courses

UICB:2110 Introduction to Book Arts
3 s.h.
Topics related to artist books, hand bookbinding, letterpress printing, papermaking, and lettering arts. GE: Engineering Be Creative. Same as BKAT:2110.
UICB:2190 The Book in Global History
3 s.h.
Introduction to history of the book and book arts in diverse global contexts; histories of visual and verbal media, cross-cultural exchange, and the book's impact across time and space; hands-on work with historical books and book arts including papermaking, woodblock and letterpress printing, and binding. GE: Historical Perspectives. Same as ENGL:2901, HIST:2190.
UICB:2600 Graphic Design II
3 s.h.
Fundamentals of typography as a core element in visual communication; introduction to historical typographic practices as well as modern modes of designing with type. Prerequisites: ARTS:1510 and ARTS:1520. Corequisites: DSGN:2500. Same as DSGN:2600.

UICB:2900 Book Design for Publishing
3 s.h.
Introduction to the major aspects of book design, including
typography, layout, standard industry software, discussion of trends in the field. Same as ARTS:2900, ENGL:2900, WRIT:2900.

UICB:3140 Literature and the Book 3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Varies by semester. Same as ENGL:3140.

UICB:3142 Topics in Book History
3 s.h.
Authorship, publishing, and so forth within specific historical and cultural contexts. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Varies by semester. Same as ENGL:3142.

UICB:3280 Elements of Book Art
3 s.h.
Overview of book art process and techniques for nonmajors; introduction to traditional bookbinding skills, nontraditional book structures, and content development for artist books. GE: Engineering Be Creative. Same as BKAT:3280.

UICB:3380 Letterpress
Introduction to letterpress printing; metal type, relief printing, page layout, and basic typography; basic use of Vandercook Proof Press; experimentation with diverse letterpress techniques. GE: Engineering Be Creative. Same as BKAT:3380.

UICB:3900 Special Project for Undergraduates arr. Independent study.

UICB:3980 American Print Culture
Exploration of a wide range of imagery printed and published in the United States during 19th century (1776-1900); fine art original prints, popular imagery in periodicals and illustrated books, scholarly literature, history of evolving technologies, variety of printed work; shifting reputation of printed art and its makers. Same as ARTH:3980.

## UICB:4100 Paperworks

3 s.h.
Conceptual and methodological approaches to 2D and 3D paper works; creation of works that couple unique properties of paper-pulp medium with personal visual ideas and clarity of intent; contemporary issues in paper pulp, medium's relationship to larger art and craft contexts. GE: Engineering Be Creative. Same as BKAT:4100.

## Center for the Book Courses

UICB:2100 Creative Writing for Book Arts 3 s.h.
Creative writing in context of book arts; text and image, typography, visual sequence, graphic narrative; zines, chapbooks, broadsides, and artist's books.

UICB:4150 Introduction to Book Studies 3 s.h.
Theory and practice of book studies; meanings of word and image in the book format; comparative study of other media, applied study of the codex as physical artifact. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Varies by semester. Same as ENGL:4150, SLIS:4150.

UICB:4205 Bookbinding I: Materials and Techniques 3 s.h.
Hands-on introduction to materials and techniques commonly used in bookbinding. Same as BKAT:4205.
UICB:4210 Boxes and Enclosures
3 s.h.
Hands-on techniques for a variety of book enclosures; appropriateness, aesthetic issues concerning box design; Japanese wraparound case, drop-spine box, hinged and lidded boxes, slipcase; technical skill development. Prerequisites: UICB:4205. Same as BKAT:4210.

## UICB:4270 Bookbinding II

Builds on skills acquired in UICB:4205; projects to complete six bindings based on historical and contemporary models; sewing styles, board attachments, endband types; nonadhesive and casebound structures, varied materials and binding styles, their effects on structure, aesthetic considerations, further development of solid binding skills; historical development of particular binding practices. Prerequisites: UICB:4205. Same as BKAT:4270.

## UICB:4280 Artists' Books

3 s.h.
Exploration of the book as a form for artistic expression; emphasis on conceptual development; relationship between content, form, and structure; how a book's structure and design can enhance and integrate part of the work's meaning. Prerequisites: UICB:4205 or BKAT:4205. Same as BKAT:4280.

## UICB:4290 Historical Book Structures

3 s.h.
Historical development of book structures examined through surviving examples, construction of historical models. Prerequisites: UICB:4205.
UICB:4300 Letterpress I
3 s.h.
Mechanics of letterpress printing, typography, and design as applied to hand set metal type and edition printing; printing on a Vandercook proof press; introduction to photopolymer plates and methods of illustration related to edition printing, historical aspects of printing technology, typecasting, type classification; role of letterpress in modern private press and contemporary artist books. Same as ARTS:4300.

UICB:4340 Digital Design for Artists' Books 3 s.h.
Introduction to concepts, techniques, and technologies used to design and produce artists' books with personal computers and graphic design software. GE: Engineering Be Creative. Same as ARTS:4340.

## UICB:4380 Letterpress II

3 s.h.
Builds on skills acquired in UICB:4300; students produce an editioned letterpress printed chapbook or artist book, a poster for a public event, and an image built from metal type; exploration of hand-set metal, digital typesetting, printing from photopolymer plates, and pressure printing; press mechanics and operation; publication philosophies, manuscript acquisition, and topics specific to literary fine press and artist books; historical and contemporary context for literary fine press publications and artist book work. Prerequisites: UICB:4300. Same as ARTS:4380.

UICB:4390 Book and Publication Design
3 s.h.
Students plan, design, and produce a book using Adobe Creative Suite; page layout software, typography, page layout and design, book formatting, handling of image files, preparation of materials for print and other contemporary book media; history of book design, book design in contemporary publishing; visit to University of Iowa Libraries Special Collections. Prerequisites: DSGN:2600 or UICB:4300. Same as ARTS:4390.

UICB:4400 History of Western Letterforms 3 s.h.
History of Western letterforms, with focus on tools, materials, techniques; the major hands, their place in history, their influence on modern times; creation of letterforms using appropriate tools; handson approach with emphasis on understanding rather than mastery. Same as ARTS:4400.
UICB:4405 Introduction to Calligraphy Intensive 3 s.h.
Intensive, basic broad pen calligraphy; Roman capitals, lowercase Roman and italic lettering.
UICB:4415 Introduction to Classical Calligraphy 3 s.
Basic calligraphy with focus on the hands modern classic typefaces Basic calligraphy with focus on the hands modern classic typefaces
are inspired by (e.g., Roman capitals, lowercase Roman, italic). GE: Engineering Be Creative. Same as ARTS:4415.
UICB:4420 Introduction to Medieval Calligraphy 3 s.h.
Basic calligraphy covering several medieval hands collectively known as blackletter, from heavily vertical Textura to florid Gothic Cursive.
UICB:4490 Advanced Studies in Letter Arts 3 s.h.
Special topics and advanced projects in calligraphy and letter arts. Prerequisites: UICB:4400 or UICB:4415 or UICB:4420. Same as ARTS:4490.
UICB:4910 The Book in the Middle Ages
3 s.h.
Relation of text, decoration, function, creators, and audience in different genres of medieval manuscript books 400-1500 A.D. Same as HIST:4422, SLIS:4910.
UICB:4920 The Book in Early Modern Europe 3 s.h.
History of the book and communication in Europe 1400-1800; production, distribution, and use of texts in cultural context. Same as HIST:4429, SLIS:4920.
UICB:4930 Topics in Material Analysis
3 s.h.
Analysis and description of physical book artifacts and their
component parts (parchment, paper, bookbinding) and allied
specialties (the lettering arts, printing and illustration techniques); reading, writing, presentations. Same as HIST:4430.

## UICB:5110 Papermaking I: East Asia, Nepal, and Contemporary

## Practice

3 s.h.
History, technique, and aesthetics of East Asian and Nepalese papermaking, along with their respective contemporary practices. Same as BKAT:5110.

## UICB:5130 Papermaking I: Central Asia, Europe, and

 Contemporary Practice3 s.h.
Foundational papermaking; history, technique, and aesthetics of Central Asian, Islamicate, and European papermaking; respective contemporary practices. Same as BKAT:5120.
UICB:5140 Papermaking II: Contemporary Papermaking 3 s.h. Contemporary papermaking studio practice and conceptual considerations; focus on nontraditional techniques and crossdisciplinary use of paper fibers and handmade paper; handmade paper as a form of artistic expression. Prerequisites: UICB:4100 or BKAT:4100 or UICB:5110 or BKAT:5110 or UICB:5130 or BKAT:5120. Same as BKAT:5140.
UICB:5170 Papermaking III: The Papermakers 3 s.h.
Students hone skills, drawing inspiration from papermaking societies, and conduct hands-on production and research. Prerequisites:
UICB:4100 or UICB:5110 or UICB:5130 or UICB:5140 or
BKAT:4100 or BKAT:5110 or BKAT:5120. Same as BKAT:5170.

UICB:5180 Advanced Projects in Paper
1-3 s.h.
Advanced independent projects undertaken in a classroom setting; collaborative group discussions to plan, implement, troubleshoot, and evaluate student projects. Prerequisites: UICB:5110 or UICB:5130 or BKAT:5110 or BKAT:5120. Same as BKAT:5180.
UICB:5210 Bookbinding III
3 s.h.
Bookbinding structures based on historical and contemporary models; differences in various binding practices, how these differences affect function, why the styles developed; experience choosing appropriate structures for particular uses; emphasis on fine tuning skills and techniques required for advanced binding practices; sewn endbands, rounding and backing, sewing on varied supports, board attachments, and covering methods. Prerequisites: (UICB:4205 or BKAT:4205) and (UICB:4270 or BKAT:4270). Requirements: for UICB:5210 —UICB:4205 and UICB:4270; for BKAT:5210—BKAT:4205 or BKAT:4270 or UICB:4205 or UICB:4270. Same as BKAT:5210.

UICB:5220 Book Conservation
3 s.h.
Practical methods, materials assessment, conservation history and evolution. Prerequisites: UICB:4270. Same as SLIS:5535.

UICB:5280 Bookbinding IV 3 s.h.
Advanced studies in bookbinding; fine binding styles, leather paring and tooling, advanced finishing techniques, refining skills; continued look at differences in regional binding practices, how these differences affect function, and why particular styles developed. Prerequisites: UICB:5210.

## UICB:5330 Letterpress III: Imagemaking arr.

Advanced work in alternative and innovative letterpress technologies as they apply to imagemaking processes for fine press printing; topics include pressure printing, photopolymer from nondigital negatives, explorations of type-high surfaces, monoprints on the Vandercook, and applying hand work to editioned prints; students complete a series of print exercises for each process, a small printed book sketch, and a longer format editioned artist book. Prerequisites: UICB:4380. Same as ARTS:5330.

UICB:5340 Letterpress III: The Handprinted Book 3 s.h. Advanced work in fine press book design; exploration of problems in hand-printing books, choice of manuscript, editing, design, typesetting, proofreading, printing and binding; histories of printing and of the book, emphasis on 20th- and 21st-century book design and literature; issues of book design and production related to letterpress printing. Prerequisites: UICB:4380. Same as ARTS:5340.

UICB:5380 Letterpress IV: Advanced Projects 3 s.h.
Development and/or production of one substantial project; focus on acquiring or creating a text and/or other content; project development; range of print techniques available in letterpress printing; issues involved in producing editioned artist books or fine press work; opportunity to expand existing printing; classroom setting augments work sessions with in-progress critiques, readings, and visits to special collections. Prerequisites: UICB:5330 or UICB:5340.
UICB:5520 Studies in Book History and Technologies 0-3 s.h. Topics related to production, distribution, and consumption of books through history and into the future. Same as SLIS:5520.

## UICB:5530 Preservation Management 3 s.h.

Responsible stewardship of collections, integration of preservation into libraries and archives systems, maximizing limited resources, establishing preservation priorities, and advocacy; appropriate care of books, paper, photographs, time-based media (e.g., audio, video, film), and born-digital objects; lectures, discussions, student presentations, and hands-on activities; for students who will be responsible for managing collections. Same as SLIS:5530.
UICB:5540 Topics in Book Arts
Focus on particular techniques and concepts in the book arts and related fields.

UICB:5550 Special Project for Graduate Students Independent study.

## UICB:5600 Reading Culture: History and Research in Print and Digital Media 3 s.h.

What reading means, and what it means to read, have changed with time and place; cultural study of books and reading to evaluate strategies and resources involved in crafting historical interpretations of books and their readers; consideration of ways that reading has always been interdependent with other media, from needlework to social media; how researchers locate and interpret primary source material to study reading culture, and how cultural heritage organizations promote their holdings to researchers. Same as SLIS:5600.

| UICB:6100 Book Studies Proseminar | $\mathbf{1 - 3}$ s.h. |
| :--- | ---: |
| UICB:6370 Topics in Book Studies | $\mathbf{3}$ s.h. |
| Topics relevant to book studies and special collections. Same as |  |
| SLIS:6370. |  |
| UICB:6510 Book Art Seminar: History, Practice, and <br> Critique |  |
| 3 s.h. |  |

Art-historical introduction to book arts (printing, bookbinding, papermaking and paperworks, artist bookwork, lettering arts, literary fine press and fine press artist books); influences and origins, contemporary practice, critical considerations; locating field through lenses of fine art, craft, and book history; weekly readings, observational analyses, hands-on exercises; archival research in the University of Iowa Libraries Special Collections; final research, analytical, and/or critical project.

UICB:6520 Graduate Book Arts Workshop 3 s.h Development of artwork and studio practice; readings and research in contemporary theory and practice; analysis of visual language; integration of creative activities and critical thinking in student's own art practice and analysis of contemporary work in book arts; group and individual critiques, studio assignments, presentations, discussions.
UICB:6540 MFA Thesis Hours
arr.

## Book Arts, MFA

The MFA degree focuses on book arts as a hands-on practice, as a creative medium, and as a historical and cultural phenomenon. Its principal objectives are to provide aesthetic and scholarly contexts for the making of creative work and for the study of book history, arts, and technologies. It also offers a structured program in bookrelated disciplines for graduate students interested in studio arts, in librarianship, and in literary and cultural history.

## Learning Outcomes

Students will learn:

- breadth of hands-on and contextual (studio, art historical, cultural) experience with art, craft, and design disciplines within the book arts;
- depth of study within one or more craft disciplines within the book arts;
- sustained, project-based problem solving accomplished through art-making;
- proficiency in hand skills (scale: competence, proficiency, excellence/mastery);
- interdisciplinary synthesis of studio art, scholarly practice, and material analysis;
- critical thinking within and across these book-based disciplines; and
- professional development and exposure to career tracks.

## Requirements

The Master of Fine Arts program in book arts requires a minimum of 60 s.h. of graduate credit, including a thesis. Students complete core courses and work with a faculty advisor to design an individualized curriculum spanning several studio practice disciplines: artist book work, bookbinding, lettering arts, digital book work, papermaking, or letterpress printing. The degree culminates with the successful completion of a thesis.
The MFA requires the following coursework.

## Studio Requirements

Courses from the areas below should be selected in consultation with an advisor.

## Required Core Electives

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Three of these (9 s.h.): |  |  |
| UICB:4205/ | Bookbinding I: Materials and | 3 |
| BKAT:4205 | Techniques |  |
| UICB:4300/ | Letterpress I | 3 |
| ARTS:4300 |  |  |
| UICB:4400/ | History of Western Letterforms | 3 |
| ARTS:4400 |  |  |
| UICB:4415/ | Introduction to Classical | 3 |
| ARTS:4415 | Calligraphy |  |
| UICB:5110/ | Papermaking I: East Asia, | 3 |
| BKAT:5110 | Nepal, and Contemporary |  |
|  | Practice |  |
| UICB:5130/ | Papermaking I: Central Asia, | 3 |
| BKAT:5120 | Europe, and Contemporary |  |
|  | Practice |  |

## Graduate Book Arts Workshop

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| UICB:6520 | Graduate Book Arts Workshop | 9 |
|  | (must be taken three times for a <br> total of 9 s.h.) |  |

## Book Art Seminar

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| UICB:6510 | Book Art Seminar: History, <br> Practice, and Critique | 3 |

## Studio Practice Electives

| Course \# Title | Hours |
| :--- | ---: |
| Studio practice courses | 15 |

## Scholarly Inquiry and Material Analysis Requirement

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Two of the following, or students may request to use related courses approved by the head of the scholarly inquiry or material analysis area (6 s.h.): |  |  |
| UICB:3140/ <br> ENGL:3140 | Literature and the Book | 3 |
| UICB:3142/ <br> ENGL:3142 | Topics in Book History | 3 |
| UICB:3980/ <br> ARTH:3980 | American Print Culture | 3 |
| UICB:4150/ <br> ENGL:4150/ <br> SLIS:4150 | Introduction to Book Studies | 3 |
| UICB:4910/ <br> HIST:4422/SLIS:4910 | The Book in the Middle Ages | 3 |
| UICB:4920/ <br> HIST:4429/SLIS:4920 | The Book in Early Modern Europe | 3 |
| UICB:4930/ <br> HIST:4430 | Topics in Material Analysis | 3 |
| UICB:5600/ <br> SLIS:5600 | Reading Culture: History and Research in Print and Digital Media | 3 |
| UICB:6100 | Book Studies Proseminar | 3 |

## Additional Electives

| Course \# $\quad$ Title | Hours |  |
| :--- | ---: | ---: |

| Course \# | Title |  |
| Can be taken for a maximum of 6 s.h.: | arr. |  |

## Combined Programs

## MFA/MA in Library and Information Science

The Center for the Book and the School of Library and Information Science offer a combined Master of Fine Arts in book arts/Master of Arts in library and information science. The combined degree
program allows students with strong interests in the book arts, book history, and material book studies to also gain expertise in library and information science. The degrees provide book artists and librarians with credentials reflecting a depth of skills and knowledge that have been used to secure positions in special collections libraries and archives. Students in the combined program earn both degrees by completing fewer semester hours than if each degree was completed separately.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, see the MA in library and information science [p. 1666] in the catalog.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. Visit Admissions on the Center for the Book website for more information.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Book Arts, MFA

## Course Title

Hours

## Academic Career

## Any Semester

60 s.h. of graduate level coursework must be completed; graduate transfer credits allowed upon approval. More information is included in the General Catalog and on department website. ${ }^{\text {a }}$
Graduate College program GPA of at least 3.00 is required. b

Work with academic advisor to determine appropriate graduate coursework and sequence.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
c Choose three courses for a total of 9 s.h. from UICB:4205, UICB:4300, UICB:4400, UICB:4415, UICB:5110, UICB:5130.
d Complete a total of 15 s.h. of studio practice elective courses.
Work with academic advisor to determine appropriate graduate coursework and sequence; see department website for specifics.
e Choose two courses for a total of 6 s.h. from UICB:3140,
UICB:3142, UICB:3980, UICB:4150, UICB:4910, UICB:4920, UICB:4930, UICB:5600, UICB:6100.
f Must be taken three times for a total of 9 s.h.
g Complete a total of $15 \mathrm{~s} . \mathrm{h}$. of additional elective courses. Work with academic advisor to determine appropriate graduate coursework and sequence; see department website for specifics. Up to 6 s.h. allowed for thesis credit.
h Hours may be required for this additional elective if fewer than 6 s.h. of thesis credits are completed.
i Maximum of 6 s.h. of thesis credit allowed.

## Book Studies/Book Arts and Technologies, Graduate Certificate

## Requirements

The graduate Certificate in Book Studies/Book Arts and Technologies requires 18 s .h. of graduate credit and is designed to be completed in one year. The program is open to students who are enrolled in a graduate degree program at the University of Iowa as well as to students enrolled in the Graduate College with nondegree status.

The program requires the following coursework. Students should consult their advisor concerning course choices.

| Requirements | Hours |
| :--- | :--- |
| A studio practice course | 3 |
| A scholarly inquiry or material analysis course | 3 |
| UI Center for the Book electives | 12 |

## Certificate and Degree Opportunities

Separate application to each program is required.

## Certificate/MA in Library and Information <br> \section*{Science}

The Center for the Book and the School of Library and Information Science enable students to earn the Certificate in Book Studies/Book Arts and Technologies and an MA in library and information science [p. 1666]. Admission deadline is Feb. 1 for the following fall.
The programs offer multiple pathways into professional engagement with artifacts, such as rare and artist books, available in archives and libraries. Students select courses that enable them to gain skills and knowledge in areas of service such as conservation, cataloging, instruction, and outreach. Completion of the two programs requires 51 sh. of credit. Students must take at least 27 s.h. of library and information science courses and 15 s.h. of book arts, studies, and technologies courses. The remaining 9 s.h. may be taken in either School of Library and Information Science (prefix SLIS) or Center for the Book (prefix UICB) courses or from another unit, with approval of the School of Library and Information Science.

## Certificate/MFA in Art

The Center for the Book and the School of Art and Art History enable students to earn the Certificate in Book Studies/Book Arts and Technologies and an MFA in art [p. 134]. Students may wish to earn the MFA in a studio art area (printmaking, drawing and painting, design, etc.) in combination with the 18 s.h. certificate. If accepted to both programs, students are advised and matriculate through both programs independently. Most, if not all, of the 18 s.h. of elective coursework required for the MFA may be applied toward the Center for the Book certificate. It is possible for a student to earn both credentials in the same amount of time required to earn the MFA.
Admissions advisors in both areas of study assist interested students in discerning whether the Center for the Book MFA in book arts or the School of Art and Art History MFA in art and the certificate option is most appropriate to a student's background and career goals. In large part, this is determined by the degree to which books and book arts are central to the applicant's chosen path.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. Visit Admissions on the Center for the Book website for more information.

## Cognitive Science of Language

Chair, Psychological and Brain Sciences

- Mark S. Blumberg

## Coordinator, Cognitive Science of Language

- Robert M. McMurray (Psychological and Brain Sciences)

Graduate certificate: cognitive science of language
Faculty: https://cogscilang.grad.uiowa.edu/people
Website: https://cogscilang.grad.uiowa.edu
The scientific study of language is larger than any one field, due in part to the broad diversity in forms and uses of language. The Cognitive Science of Language Program uses an interdisciplinary approach to the study of language, helping to prepare language scientists who are conversant in multiple domains.

## Programs

## Graduate Program of Study

## Certificate

- Certificate in Cognitive Science of Language [p. 1631]

## Cognitive Science of Language, Graduate Certificate

## Requirements

The graduate Certificate in Cognitive Science of Language requires a minimum of $12-15$ s.h. of graduate credit. Designed to complement doctoral study, the certificate program is open to University of Iowa PhD students in linguistics, neuroscience, psychology, and speech and hearing science. PhD students in other disciplines may petition to be permitted to earn the certificate. Students must complete a formal application to enter the certificate program; they should contact the program's coordinator before they apply.

The certificate program ensures that students have training in interdisciplinary approaches to the study of language along with a strong theoretical grounding in their PhD discipline. Certificate students work with their PhD advisor and the certificate program's coordinator to develop an individual plan of study that complements their degree program and career interests. In order to be granted the Certificate in Cognitive Science of Language, students must complete all of the requirements of their PhD program as well as all of the certificate requirements.
Certificate students must participate in the cognitive science of language proseminar, a two-semester (6 s.h.) survey course on the five major disciplines within the language sciences-psychology, formal linguistics, neuroscience, communication disorders, and computational approaches. They also must complete three courses on cognitive science or language outside their field of study. Students can choose from the approved courses in the lists below, or they can petition the program for other courses. Students may enroll in the proseminar and three additional courses before or concurrently with other courses in their programs.

Students must include a faculty member from the Cognitive Sciences of Language Program on their PhD comprehensive and dissertation exam committees.
The Certificate in Cognitive Science of Language requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Proseminar | 6 |
| Disciplinary Courses | $6-9$ |

## Proseminar

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Both of these: |  |  |
| PSY:6101/CSD:6101/ | Cognitive Science of Language | 3 |
| LING:6101 | Proseminar I |  |
| PSY:6102/CSD:6102/ | Cognitive Science of Language | 3 |
| LING:6102 | Proseminar II |  |

## Disciplinary Courses

Students take at least 6-9 s.h. from the following lists (typically three courses).

## Communication Sciences and Disorders

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CSD:3116/ | Basic Neuroscience for Speech | 3 |
| LING:3116 | and Hearing | $1-3$ |

| CSD:4145 | Developmental Language | 3 |
| :--- | :--- | ---: |
| Disorders |  |  |
| CSD:5146 | Neurogenic Disorders of <br> Language | 3 |
| CSD:5233 | Aphasia | 2 |
| CSD:5256 | Anatomy and Physiology of | $3-4$ |
| CSD:5282 | Hearing | 2 |
|  | Phonological Development and <br> CSD:6230 | Disorders |
| CSD:6538 | Psychoacoustics | 2 |
|  | Advanced Topics in Speech, <br> Language, and Hearing <br> Research | 1 |

## Linguistics

$\left.\begin{array}{llr}\text { Course \# } & \text { Title } & \text { Hours } \\ \text { LING:3030 } & \text { Child Language-Linguistic } & 3 \\ \text { Lerspectives } \\ \text { LING:4090 } & \text { Practical Phonetics } \\ \text { LING:5010/SLA:5010 } & \text { Introduction to Syntax (requires } \\ \text { a corequisite course which does } \\ \text { not count toward the certificate) }\end{array}\right)$

## Psychological and Brain Sciences

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PSY:3670/LING:3670 | Language Processes | 3 |
| PSY:7610 | Seminar: Cognitive Psychology | $2-3$ |

## Spanish and Portuguese

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| SPAN:4100/ | Introduction to Spanish | 3 |
| SLA:4301 | Phonology |  |
| SPAN:4150/ | Introduction to Spanish Syntax | 3 |
| SLA:4300 |  | 3 |
| SPAN:6110/ | Spanish Phonology |  |
| SLA:6303 |  | 3 |
| SPAN:6120/ | Spanish Syntax |  |
| SLA:6304 |  | 3 |
| SPAN:6150/ | Topics in Spanish Language |  |
| SLA:6301 | Acquisition |  |

## College Teaching

## Director

- Mitchell J. Kelly (Psychological and Quantitative Foundations)

## Graduate certificate: college teaching

Website: https://education.uiowa.edu/areas-study/continuing-education/certificates-and-endorsements/certificate-college-teaching

The certificate program in college teaching provides coursework and supervised experiences that prepare graduate students for careers in postsecondary education.

The Certificate in College Teaching is administered by the Graduate College.

## Programs

Graduate Program of Study

## Certificate

- Certificate in College Teaching [p. 1633]

## College Teaching, Graduate Certificate

## Requirements

The graduate Certificate in College Teaching requires a minimum of 12 s.h. of graduate credit. Previous teaching experience does not count toward certificate requirements.

The certificate program is open to all University of Iowa students enrolled in a PhD or other terminal degree program.
Students apply to the certificate program on the Office of Graduate Teaching Excellence (OGTE) website.

The Certificate in College Teaching requires the following coursework. Courses selected from the categories below can be completed in any order at any time.

## Category 1

Category 1 coursework provides an overview of basic instructional issues and methods in college teaching. The work requires students to engage in discipline-specific thinking as they consider their own teaching situations.

Students choose two courses (minimum of 6 s.h. required) from the following.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Students must take at least one of these: |  |  |
| EPID:7200 | Teaching in Epidemiology | 3 |
| GRAD:7385/ <br> CSED:7385/ <br> EDTL:7385/ <br> EPLS:7385/ <br> PSQF:7385 | Teaching and Learning in Higher Education | 3 |
| $\begin{aligned} & \text { GRAD:6217/ } \\ & \text { PSQF:6217 } \end{aligned}$ | Seminar in College Teaching | 3 |
| PSQF:6205 | Design of Instruction | 3 |
| PSQF:6417 | Introduction to Postsecondary STEM Teaching | 1,3 |
| RHET:5352 | Seminar: Topics in Teaching and Professional Development | 3 |
| SOC:7010 | Teaching Sociology | 3 |
| Students may take one of these: |  |  |
| JMC:5600 | Teaching Media Writing, Production, and Design (must complete the series of three, 5week, 1 s.h. sections to count) | 3 |
| PSQF:6203 | Tools and External Representations in Individual and Social Learning | 3 |
| PSQF:6211 | Universal Design and Accessibility for Online Instruction | 3 |
| PSQF:6214 | Design of Learning <br> Environments: Theory, Practice, and Method | 3 |
| PSQF:6215 | Online Instruction: Design and Facilitation | 3 |
| PSQF:6216 | Tools and Utilities for Online Teaching | 3 |
| RHET:7940 | Public Speaking for Academics | 3 |

## Category 2

Category 2 requires students to complete practicum courses under the guidance of two different professors. Prior or current experience as a teaching assistant does not count toward this requirement.
Students enroll in one of the following courses twice, with each enrollment supervised by a different faculty member. Students earn a total of 3 s.h. for the two enrollments. They can enroll in two practicums with two different professors in the same semester or they can complete practicum experiences in separate semesters.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| CSED:7380 | Internship in Teaching | $1-3$ |
| EDTL:7380 | Practicum in College Teaching | $1-3$ |
| EPLS:7380 | Practicum in College Teaching | $1-3$ |
| GRAD:7400 | Practicum in College Teaching <br> (faculty member must | $1-3$ |
|  | be outside the College of |  |
| PSQF:7380 | Education) |  |
|  | Practicum in College Teaching | $1-3$ |

## Category 3

For Category 3, students develop a full portfolio that demonstrates their skills and competencies in teaching, research, and service. The portfolio requires sample syllabi, a statement of teaching philosophy, samples of assignments and student work, and reflective essays on critical issues in teaching in higher education. The portfolio artifacts are reviewed and evaluated by the course instructor.

Category 3 requires the following course.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EALL:7475 | PhD ePortfolio in College | 3 |
|  | Teaching |  |

## Genetics

## Chair

- Daniel F. Eberl (Biology)

Graduate degree: PhD in genetics
Faculty: https://genetics.grad.uiowa.edu/people/faculty
Website: https://genetics.grad.uiowa.edu
Prospective doctoral students in genetics should have a strong undergraduate background in science, including courses in general genetics, organic chemistry, biochemistry and molecular biology, introductory physics, and mathematics, as well as a strong commitment to genetic research and teaching. Students are able to make up deficiencies in a particular area during their first year of graduate study.

## Programs

## Graduate Program of Study

## Major

- Doctor of Philosophy in Genetics [p. 1635]

## Courses

## Genetics Courses

GENE:4213 Bioinformatics
2,4 s.h.
Overview of bioinformatics topics, including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BMB:3120 or MICR:3170 or BIOL:2512 or BMB:3110. Recommendations: grade of B-plus or higher in BIOL:2512 or graduate standing. Same as BIOL:4213, IGPI:4213.

GENE:6150 Genetic Analysis of Biological Systems 3 s.h. Genetic techniques and approaches for analysis of biological processes; comparison of strengths, weaknesses of a variety of experimental systems.

## GENE:6200 Special Topics in Genetics

 1 s.h.Focus is on a broad topic of central importance to genetics and biology as a whole; invited speakers are distinguished researchers from institutions across the country and within the University of Iowa, their work grounded in genetics, and cover diverse topics using a wide range of genetic model systems and approaches; seminar series. Same as ACB:6200.

## GENE:6210 Seminars in Genetics

 1 s.h.Attendance at weekly forum and presentation of research data to foster oral communication, presentation skills, and collaboration.

GENE:6234 Basic Biostatistical Methods with Genetics Applications 1 s.h.
Introduction to terminology, fundamental concepts, and methods of biostatistics as applied to genetic research; genetic investigation examples used to illustrate statistical approaches. Same as BIOS:6234.

## Genetics, PhD

## Learning Outcomes

The PhD in genetics will:

- develop students' ability to learn relevant literature, and to design and complete successful experiments with rigor and reproducibility;
- develop students' ability to communicate concepts, present and publish scientific data, and interact with diverse audiences;
- facilitate students as they acquire teaching skills and develop teaching effectiveness in the classroom and in the laboratory; and
- prepare students for diverse careers in the discipline.

## Requirements

The Doctor of Philosophy program in genetics requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of 3.00 . The program is designed to promote collaborative investigation and intellectual interaction among students and faculty participants affiliated with several different departments.
Students who enroll in the PhD program are encouraged to obtain a broad background in genetics, including molecular, population, and human genetics. Within this context, course requirements are flexible enough to permit students to tailor their formal coursework to their individual needs. All students are required to do some teaching as part of their development as future scientists and faculty members.

Students have the option to declare a PhD emphasis in computational genetics.

All students enrolled in the program are required to take the following courses.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| GENE:6150 | Genetic Analysis of Biological Systems | 3 |
| GENE:6200 | Special Topics in Genetics (seminar) | 1 |
| GENE:6210 | Seminars in Genetics | 1 |
| GENE:6234 | Basic Biostatistical Methods with Genetics Applications | 1 |
| BMED:5207 | Principles of Molecular and Cellular Biology | 3 |
| BMED:7270 | Scholarly Integrity/Responsible Conduct of Research I | 0 |
| BMED:7271 | Scholarly Integrity/Responsible Conduct of Research II | 0 |
| One of these: |  |  |
| GENE:7191 | Human Molecular Genetics | 3 |
| BIOL:3172 | Evolution | 4 |
| BIOL:3713 | Molecular Genetics | 4 |
| BIOL:4333 | Genes and Development | 3 |
| And these: |  |  |
| Elective coursework in molecular and microbial genetics, cell and development genetics, human genetics, or computational genetics |  | 8 |
| Seminar courses approved by the program |  | 5 |

Even more important than formal coursework is the opportunity to do significant research in genetics. Research interests of the participating faculty include virtually all areas of genetics, ranging from bacteriophage genetics to human medical genetics. In each area
of genetics, there is a group of faculty members who have closely related interests.

The university is strong in several related disciplines, including microbial physiology, enzymology, virology, protein biochemistry and molecular biology, computational genetics, and developmental and cell biology, all of which contribute significantly to the overall training program.
In addition to completing research and coursework, students must pass a comprehensive examination, usually at the end of their second year in the program.

## Associated Courses

Credit earned in the following courses may be counted toward the PhD in genetics. Not all courses are offered every year.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| GENE:4213 | Bioinformatics | 4 |
| BIOL:4386 | Introduction to Scientific Computing for Biologists | 3 |
| BIOS:7330 | Advanced Biostatistical Computing | 3 |
| BIOS:7700 | Problems/Special Topics in Biostatistics | arr. |
| BMB:4310 | Computational Biochemistry | 3 |
| BME:5335 | Computational Bioinformatics | 3 |
| CS:5430 | Machine Learning | 3 |
| EPID:5241 | Statistical Methods in Epidemiology | 4 |
| EPID:6250 | Genetics and Epidemiology | 3 |
| FRRB:7001 | Molecular and Cellular Biology of Cancer | 3 |
| IGPI:6480 | Knowledge Discovery | 3 |
| MICR:6268 | Biology and Pathogenesis of Viruses | 2 |
| MMED:6220 | Mechanisms of Cellular Organization | 3 |
| MMED:6226 | Cell Cycle Control | 1 |
| MMED:6227 | Cell Fate Decisions | 1 |
| NSCI:7235 | Neurobiology of Disease | 3 |
| PCOL:6225 | Growth Factor Receptor Signaling | 1 |
| STAT:4580 | Data Visualization and Data Technologies | 3 |

## PhD and Dental Scientist Training Program

PhD students in genetics who have earned a DDS degree may be candidates for advanced training programs in dentistry. For information, contact the College of Dentistry.

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in genetics in a combined degree program offered by the Carver College of Medicine and the Graduate College. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Admission

Prospective students should have a strong undergraduate science background and a strong commitment to research in genetics. Previous coursework should include general genetics, biochemistry, organic chemistry, and introductory physics and mathematics. However, deficiencies can be rectified during the first year as a graduate student.

Students who want to apply online should view the Interdisciplinary Graduate Program in Genetics website. For additional information, see the program website.
Students generally begin graduate work in the fall semester.
Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

All students receive a financial stipend of $\$ 33,000$ plus tuition for the 2023-24 academic year. Financial support comes from training grants, research assistantships, teaching assistantships, scholarships, individual research grants, or other departmental or college funds. All students are required to teach as part of their development as future scientists and faculty members.

See Funding on the Interdisciplinary Graduate Program in Genetics website and Cost and Funding on the Graduate Admissions website for more information.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than
the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
c If needed, adjust the number of semester hours for GENE:7301 so total enrollment equals $15 \mathrm{~s} . \mathrm{h}$.
d Counts toward the 5 s.h. seminar degree requirement.
e Choose from: BIOL:3172, BIOL:3713, BIOL:4333, GENE:7191, or take an equivalent course with advisor approval.
f Take 8 s.h. from coursework in molecular and microbial genetics, cell and development genetics, human genetics, or computational genetics. Work with faculty advisor to select appropriate courses from approved list.
g Program seminar followed by the dissertation defense.

## Human Toxicology

## Director

- Peter S. Thorne (Occupational and Environmental Health/Civil and Environmental Engineering)

## Director, Graduate Studies

- Jong Sung Kim (Occupational and Environmental Health)

Graduate degrees: MS in human toxicology; PhD in human toxicology

Faculty: https://toxicology.grad.uiowa.edu/faculty
Website: https://toxicology.grad.uiowa.edu
Toxicology is the study of how biological, chemical, physical, and radiological agents affect living organisms and the ecosystem, and how to prevent or lessen the adverse effects of those agents. The Human Toxicology Program prepares toxicologists to identify and assess environmental exposures, identify mechanisms by which toxicants affect homeostasis or induce disease, identify interventions to prevent adverse effects, and estimate acceptable levels of exposure to protect public health.

The program is interdisciplinary, involving the Graduate College, the College of Public Health, the Carver College of Medicine, and the colleges of Engineering, Liberal Arts and Sciences, and Pharmacy.

The Graduate College supports the Human Toxicology Program Students receive support from the Iowa Superfund Research Program, the Environmental Health Sciences Research Center, and other faculty research grants

## Programs

## Graduate Programs of Study

## Majors

- Master of Science in Human Toxicology [p. 1639]
- Doctor of Philosophy in Human Toxicology [p. 1641]

## Facilities

Training is conducted primarily in laboratories and teaching facilities of the departments and colleges of Human Toxicology Program faculty members. These are among the best-equipped laboratories on campus. Together with the university's central research facilities, they provide access to the most up-to-date research equipment and expertise.

## Courses

## Human Toxicology Courses

TOX:7171 Special Problems in Toxicology
arr
Didactic material that may include tutorial, seminar, or facultydirected research work; or a special topic.

TOX:7173 Professional Development in Toxicology
Presentations and discussion on professional development topics including toxicology research methods and analysis, grant writing, proposal development, oral presentation skills, networking, and creating a portfolio framework that can be used after graduation.
TOX:7180 Toxicology Research Seminar
Contemporary research topics

Thesis or dissertation research; seminar preparation

## Human Toxicology, MS

## Learning Outcomes

Students will be able to:

- demonstrate an in-depth knowledge of the principles of toxicology, including metabolism, toxicity, risk assessment, and specific expertise related to the area of their thesis (molecular biology, in vitro and/or in vivo techniques, analytical methods);
- apply the knowledge and skills of toxicology to conduct independent and innovative research;
- demonstrate high ethical and professional standards and responsible conduct in research; and
- synthesize the knowledge and skills of toxicology to succeed as a professional in diverse toxicology careers.

## Requirements

The Master of Science program in human toxicology requires a minimum of 39 s.h. of graduate credit and a thesis. Students must maintain a cumulative grade-point average of at least 3.00.
The program is designed for students who wish to pursue a master's degree as a second degree or through part-time study, particularly those who perform toxicologists' functions in their jobs and who need additional training.

Entering students should have backgrounds in the biological, engineering, and physical sciences and should have completed courses in introductory chemistry and biology, and organic chemistry.

After entering the program, students work with their mentor to choose an advisory committee, which meets at least once a semester to help them explore their research interests. The committee also provides consultation on coursework and research activities and serves as the committee for the final examination (thesis defense).

The Human Toxicology Program is flexible. Students work with their advisory committees to plan a course of study tailored to their individual interests and goals within the field of toxicology.

## Required Courses

MS students with a major in human toxicology must successfully complete the following coursework as part of their course of study.

| Course \# |  |  |
| :--- | :--- | ---: |
| One of these: | Title | Hours |
| OEH:6710 | Human Toxicology and Risk <br> Assessment | 3 |
| PHAR:6501 | Principles and Mechanisms of <br> Chemical Toxicology | 3 |
| And all of these: | Professional Development in <br> TOX:7173 | Toxicology <br> (encollment is required each <br> semester) |
| TOX:7180 | Scholarly Integrity/Responsible <br> Conduct of Research I | arr. |
| BMED:7270 | Advanced Toxicology | $0-1$ |
| OEH:6720 | Advarch |  |

Upon successful completion of all requirements, including the thesis and its oral defense, students are awarded the Master of Science degree.

## Admission

Prospective students may apply to the program via a centralized application system; see Admission Information on the Human Toxicology Program website.
Completed applications should be submitted by Jan. 1; applications submitted after that date are reviewed as they are received and are considered for any remaining openings.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
c Students register for 0 s.h. until they present their thesis defense, and then should register for $1 \mathrm{~s} . \mathrm{h}$
d Choose from interdisciplinary coursework with advisor approval.
e Thesis defense.

## Human Toxicology, PhD

## Learning Outcomes

Students will be able to:

- demonstrate an in-depth knowledge of the principles of toxicology, including metabolism, toxicity, risk assessment, and specific expertise related to the area of their dissertation (molecular biology, in vitro and/or in vivo techniques, analytical methods);
- apply the knowledge and skills of toxicology to conduct independent and innovative research;
- demonstrate high ethical and professional standards and responsible conduct in research; and
- synthesize the knowledge and skills of toxicology to succeed as a professional in diverse toxicology careers.

## Requirements

The Doctor of Philosophy program in human toxicology requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00.

The program is designed for students with backgrounds in the biological, engineering, and physical sciences. Entering students should have solid training in science, including courses in introductory chemistry and biology, and organic chemistry; knowledge of biochemistry and molecular biology also is useful. Students may remedy deficiencies by taking appropriate courses during their first year of graduate study.
Students begin the program with three two-month rotations in the laboratories of participating faculty members in order to identify a mentor. After the first year, the mentor assumes financial responsibility for the student. With advice from the mentor, each student chooses an advisory committee, which meets at least once a semester to help the student explore the student's research interests. The committee also provides consultation on coursework and research activities and serves as the committee for the comprehensive examination and the final examination (dissertation defense).
The Human Toxicology Program is flexible. Students work with their advisory committees to plan a course of study tailored to their individual interests and goals within the field of toxicology.

PhD students in human toxicology must successfully complete the following coursework as part of their course of study.

| Course \# <br> One of these: | Title | Hours |
| :--- | :--- | ---: |
| OEH:6710 | Human Toxicology and Risk <br> Assessment | 3 |
| PHAR:6501 | Principles and Mechanisms of <br> Chemical Toxicology | 3 |
| And all of these: | Professional Development in <br> Toxicology | arr. |
| TOX:7173 | Toxicology Research Seminar <br> (enrollment is required each <br> semester) | $0-1$ |
| BIOS:4120 | Introduction to Biostatistics |  |
| BIOS:5120 | Regression Modeling and <br> ANOVA in the Health Sciences | 3 |

| BMED:7270 | Scholarly Integrity/Responsible <br> Conduct of Research I (must be <br> completed within first two years <br> of graduate study) | 0 |
| :--- | :--- | :--- |
| OEH:6720 | Advanced Toxicology | 4 |

After successfully completing the comprehensive examination, usually at the end of the second year of graduate study, the student advances to PhD candidacy. Students devote all of their time to dissertation research and writing. Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded the Doctor of Philosophy degree.

## Combined Programs

## PhD/MD

Students may work toward the PhD and the Doctor of Medicine in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Admission

Prospective students may apply to the program via a centralized application system; see Admission Information on the Human Toxicology Program website.

Completed applications are encouraged to be submitted by Dec. 1, but applications after that date are given full consideration. Applications submitted after March 1 are reviewed when received and are considered for any remaining openings.
Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

Doctoral students in human toxicology receive stipends and tuition support from University of Iowa sources, including internal fellowships and graduate research assistantships, and from nonuniversity sources, such as training grants from the National Institutes of Health (NIH).

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Immunology

## Director

- Kevin L. Legge (Microbiology and Immunology/Pathology)

Graduate degree: PhD in immunology
Faculty: https://immuno.grad.uiowa.edu/people/faculty
Website: https://immuno.grad.uiowa.edu/
The Immunology Program provides interdisciplinary training in the concepts and methodologies of basic and applied immunology. Faculty members are involved in a variety of research projects dealing with the immune system at all levels-structural, functional, cellular, biochemical, and molecular. Students take coursework in immunology and related disciplines and are directly involved in laboratory research throughout their study.

## Programs

## Graduate Program of Study

## Major

- Doctor of Philosophy in Immunology [p. 1644]

## Facilities

Training is conducted in laboratories and teaching facilities of the Carver College of Medicine departments of Internal Medicine, Microbiology and Immunology, Otolaryngology-Head and Neck Surgery, Pathology, Pharmacology, Urology, and the Stead Family Department of Pediatrics; and the College of Public Health Department of Epidemiology. Faculty laboratories and central research core facilities provide students with access to state-of-the-art research equipment.

## Courses

## Immunology Courses

IMMU:2040 Summer Undergraduate IDGP Research 0 s.h.
IMMU:6201 Graduate Immunology 3 s.h
Immune cell ontogeny, activation, and function of T lymphocytes and B lymphocytes; innate immune effector mechanisms; major histocompatibility complex; antigen presentation; thymocyte positive and negative selection; signaling of T lymphocytes and B lymphocytes; emphasis on experimental methods for analysis of these processes and how they have led to current advanced concepts in immunology. Prerequisites: MICR:3147 or MICR:6247. Requirements: for IMMU:6201—college biology, general chemistry, and introductory immunology courses; for MICR:6201—courses in college biology, genetics, general chemistry, and introductory immunology. Recommendations: for IMMU:6201-courses in biochemistry and genetics; for MICR:6201—biochemistry course. Same as MICR:6201.

## IMMU:6211 Immunology Seminar

 1 s.h. Requirements: immunology graduate standing.IMMU:6221 Rigor and Reproducibility in Immunology 1 s.h. Principles and concepts in rigor and reproducibility; rigorous experimental practices in immunology and study design including concepts in redundancy (e.g., replication, validation, generalization, perturbation, consistency), controls, authentication of key reagents and resources, biological variables, recognition of error, avoidance of logical traps, and intellectual honesty. Prerequisites: IMMU:6201.

IMMU:6231 Research in Immunology arr. Laboratory research. Requirements: immunology graduate standing.
IMMU:6241 Writing a Scientific Proposal
2 s.h.
How to write a scientific proposal. Prerequisites: IMMU:6201. Requirements: enrollment in immunology graduate program.

IMMU:6247 Graduate Immunology and Human Disease 4 s.h. Important principles and key concepts in immunology with a focus on the involvement of the immune system in disease pathogenesis; overview of innate and adaptive immune systems and their functions at cellular and molecular levels; learning enhanced by case-based, small-group discussion and writing exercises. Same as MICR:6247.

IMMU:7221 Advanced Topics in Immunology 3 s.h.
In-depth analysis of selected areas. Prerequisites: IMMU:6201 or MICR:6201. Same as MICR:7207.

## Immunology, PhD

## Learning Outcomes

Students will:

- develop the ability to think critically and work collaboratively;
- develop the ability to evaluate data and scientific literature;
- develop the ability to problem solve, expand technical skills, and design rigorous and reproducible experiments;
- develop the ability to communicate their scientific findings and knowledge via both written and oral methods to a variety of audiences; and
- prepare for independent careers as leaders, investigators, and educators in cutting-edge research, teaching, and service in basic and applied immunology.

## Requirements

The Doctor of Philosophy in immunology requires 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree. The program provides interdisciplinary training in the concepts and methodologies of basic and applied immunology.

Students complete coursework in immunology and related disciplines, and are directly involved in laboratory research throughout their study. Immunology graduate courses are offered not only to teach students the current concepts and paradigms within the field, but to emphasize the scientific approaches and methods used to attain this understanding.
The PhD with a major in immunology requires the following coursework.

## Core Curriculum

| Course \# | Title | Hours |

## Additional Requirements

## Laboratory Rotations

Prior to selecting a laboratory for dissertation work, students are expected to perform three laboratory rotations, with each rotation lasting approximately 12 weeks in duration. During the first semester, students should become acquainted with the research interests of the faculty members in the immunology program. This learning process is facilitated by faculty presentations in IMMU:6211 Immunology Seminar during the fall semester. Students also are encouraged to meet with specific faculty to discuss their research programs. This enables students to make an informed decision about their laboratory rotations, with the guidance and approval of their advisor and the graduate studies committee.
At the latest, students should begin their first rotation within the first week of graduate study. Medical Science Training Program (MSTP) students and students with MS degrees that included a researchbased dissertation may be excused from one rotation. Students having difficulty choosing a laboratory for dissertation work may perform a fourth rotation.

The rotations are graded either satisfactory or unsatisfactory. This grade is based upon a number of criteria including attendance and work habits. When not in classes or seminars, students are expected to spend the remaining portion of the day in the laboratory. Without a strong commitment to the rotation project, it is difficult to fulfill the purpose and aims of the rotation. A satisfactory grade is required in each of the laboratory rotations. If a satisfactory grade is not received in one of the rotations, an additional rotation is assigned. Failure to receive a satisfactory grade in the extra rotation results in the student being placed on academic probation. Following each rotation, an evaluation is given to each student by the faculty member and submitted to the graduate studies committee.

## Teaching

Students complete a teaching requirement lasting one semester. A variety of courses are available in several departments, and the program leadership place students in courses based upon interest, expertise, and scheduling.

## Publication Requirements

It is expected that the dissertation project be of sufficient breadth, depth, and novelty to result in first-author research publications in high quality peer-reviewed journals. A minimum of one peer-reviewed paper must be published or in press prior to the completion of the PhD . In addition, a second publication, in which the student is a coauthor on a peer-reviewed article, a review, or book chapter must be published or in press prior to the completion of the degree. Students are not permitted to schedule a dissertation defense until it has been demonstrated that both of these requirements have been met.

## Comprehensive Examination

The comprehensive examination is generally taken in the spring semester of the second year of study. MSTP students or students entering the program with an MS may choose to take the examination in the fall semester of their second year.

Students taking the comprehensive examination prepare a single abstract of an original research proposal. The examination committee determines if the abstract topic is appropriate as nonoverlapping, and if the abstract is scientifically sound to potentially serve as the basis for a defensible research proposal. After the abstract is accepted, students are given four weeks to complete and submit the written comprehensive examination proposal. The oral defense is scheduled 10-14 days after the exam is submitted, depending on availability of the committee members. The comprehensive exam is written in the form of a NIH-style pilot grant proposal based on the abstract and instructions from the comprehensive examination. A detailed student handbook is available on the Interdisciplinary Graduate Program in Immunology website.

## Final Examination

The five members of the thesis committee serve as an advisory body for preparation of the thesis. The committee meets with each student to review the material that they expect to be incorporated into the thesis. Although meetings with the committee should be yearly, the candidate, thesis advisor, or the committee can request a meeting at any time. A final draft of the thesis must be given to all members of the committee two weeks before the final examination.

The final examination takes the form of a seminar presented to the program. This presentation is announced according to Graduate College policy. Questions, comments, and discussion follow. After the seminar, the candidate meets with the committee for the final thesis defense. In some cases revisions may be required. The degree is not awarded until the thesis is signed.

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in immunology in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Admission

For information regarding admission and application procedures, visit the Interdisciplinary Graduate Program in Immunology website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

Tuition and fees are paid for, and students receive a competitive stipend as well as health and dental benefits. Continued support beyond the first year is guaranteed, provided that progress toward degree completion of requirements is satisfactory. Sources of support include departmental funds, training and research grants, and individual fellowships. Visit Funding on the Interdisciplinary Graduate Program in Immunology website for information on financial support.

## Academic Plans <br> Sample Plan of Study

Sample plans represent one way to complete a program of study Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
c Work with faculty advisor to determine appropriate graduate elective coursework and sequence.
d Program seminar followed by the dissertation defense.

## Informatics

## Chair

- Juan Pablo Hourcade (Computer Science/Nursing)

Graduate degrees: MS in informatics; PhD in informatics
Graduate certificate: informatics
Faculty: https://cs.uiowa.edu/people
Website: https://informatics.grad.uiowa.edu/
The Interdisciplinary Graduate Program in Informatics (IGPI) was proposed in 2006, largely motivated by the increasing amount of research at the intersection of computational disciplines and the humanities, arts, and the natural, biological, health, and social sciences. The proposal to establish the program emphasized the rapid changes brought about by information technology and how they in turn changed approaches across a wide variety of disciplines. Among these changes were the ability to ask different types of questions and analyze information at scales not previously possible.

The program aimed to fill a gap in training for practitioners and researchers who could provide a bridge between computing and other disciplines. IGPI graduates would receive training in core computational and statistical topics and combine it with coursework in a cognate area.

Changes in computing and how it affects society and scholarship make informatics even more relevant today than it was in 2006. One of the key changes has been in the increasing ubiquity of computer devices that facilitate communication and information access. These trends clearly point toward a near future where most people will be able to communicate with most other people around the world, as well as access any information, anytime, anywhere. The main barriers are likely to be political instead of technological. These changes mean that computers are directly affecting the way most people perceive the world, remember information, pay attention, communicate, learn, and make decisions.

This ubiquity means that it is becoming increasingly difficult to exercise one's basic rights and fulfill basic needs without using interactive technologies. People use computers to vote, to stay informed, and to express and share opinions. In addition, people use computers to ride public transportation, get money from banks, and pay for groceries. Hence, there are increased responsibilities in the design of computing systems, as well as the need to study their impact on society.

One final trend that is germane to informatics is the increasing availability and low cost of digital storage and processing, together with the wide availability and use of sensors, digital instruments, and other forms of capturing digital data. The result has been a tremendous growth in the amount of data available to scientists, businesses, and government. These changes have brought about the need for novel analysis techniques, for researchers and practitioners who can understand the data and these techniques, as well as the need to design these systems so they can enable new discoveries and insights while safeguarding privacy.

This world, where computers are playing a vital role not only in academic disciplines, but in society at large, calls for practitioners and researchers who can understand computing and also interface with other fields. IGPI was developed to fill this gap. The program is interdisciplinary, involving the Graduate College, the Carver College of Medicine, the Tippie College of Business, and the Colleges of Dentistry, Engineering, Liberal Arts and Sciences, Nursing, Pharmacy, and Public Health. Students may pursue a Master of Science degree in informatics (with one of three cognates in geoinformatics, health informatics, or human-computer interaction)
or a PhD in informatics. University of Iowa graduate students in other programs may elect to earn a Certificate in Informatics in addition to their main program of study. All three programs complete the same core courses, with flexible electives which allow students to focus on the subarea of greatest interest to them.

Geoinformatics provides methods and technologies needed to measure, store, analyze, manage, and visualize information about phenomena occurring on or near the earth's surface. It is an increasingly essential technology for understanding and managing the complex world.

Health informatics uses contemporary information technologies to improve the storage, organization, retrieval, and evaluation of health information in order to support clinical, clinical research, and public health applications.
The human-computer interaction cognate is intended for students interested in designing useful and usable technologies. The cognate's courses provide an interdisciplinary foundation including psychology, sociology, and engineering.

## Programs

## Graduate Programs of Study

## Majors

- Master of Science in Informatics [p. 1653]
- Doctor of Philosophy in Informatics [p. 1657]

## Certificate

- Certificate in Informatics [p. 1660]

## Informatics Courses

## IGPI:3011 Identifying and Developing a Global Health

 ProjectReview of major components of global health related research process; preparation for a local or international project which addresses a global health issue in a systematic way. Same as GHS:3010.
IGPI:3050 Geospatial Programming 3 s.h.
Introduction to geospatial programming with Python; programming basics, data structures, and algorithms; spatial data models and structures; vector-based and raster-based geoprocessing; automating GIS tasks and models; spatial libraries (e.g., ArcPy, GeoPandas, GDAL, PySAL). Prerequisites: GEOG:2050. Same as GEOG:3050.

## IGPI:3100 Introduction to Mathematical Statistics I 3 s.h

 Descriptive statistics, probability, conditional probability, discrete and continuous univariate and multivariate distributions, sampling distributions. Prerequisites: MATH:1860 or MATH:1560. Same as STAT:3100.IGPI:3101 Introduction to Mathematical Statistics II 3 s.h.
Point and interval estimation, testing statistical hypotheses, simple regression, nonparametric methods. Prerequisites: STAT:3100. Same as STAT:3101.

IGPI:3120 Probability and Statistics
4 s.h.
Models, discrete and continuous random variables and their distributions, estimation of parameters, testing statistical hypotheses. Prerequisites: MATH:1560 or MATH:1860. Same as DATA:3120, STAT:3120.

Regression analysis with focus on applications; model formulation, checking, and selection; interpretation and presentation of analysis results; simple and multiple linear regression; logistic regression; ANOVA; polynomial regression; tree models; bootstrapping; handson data analysis with computer software. Prerequisites: STAT:2020 or STAT:2010 or STAT:3120. Same as DATA:3200, ISE:3760, STAT:3200.

## IGPI:3212 Bioinformatics for Beginners <br> 3 s.h.

Overview of bioinformatics topics including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics, and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BIOL:2512 or BIOL:2211 or BMB:3120 or MICR:3170. Same as BIOL:3212.

## IGPI:3314 Genomics

3 s.h.
Major areas of genomics including genome sequencing, assembly, and annotation; evolutionary genomics, metagenomics, functional genomics, and computational genomics; synthetic biology and genome engineering. Prerequisites: BIOL:1412 and (BIOL:2211 or BIOL:2512 or BIOL:2723). Same as BIOL:3314.

## IGPI:3330 Introduction to Software Design

Design of software for engineering systems; algorithm design and structured programming; data structures; introduction to objectoriented programming in JAVA; applications to engineering problems; lab arranged. Prerequisites: ENGR:2730. Same as ECE:3330.

## IGPI:3500 Introduction to Environmental Remote Sensing 3 s.h.

 Basic concepts and principles of remote sensing; sources of data; georegistration; digital processing and classification of remotely sensed images for extraction of environmental information; linkage of remote sensing techniques with GIS analysis. Same as GEOG:3500.
## IGPI:3510 Biostatistics

3 s.h.
Statistical concepts and methods for the biological sciences; descriptive statistics, elementary probability, sampling distributions, confidence intervals, parametric and nonparametric methods, one-way ANOVA, correlation and regression, categorical data. Requirements: MATH:0100 or MATH:1005 or ALEKS score of 30 or higher. Same as STAT:3510.
IGPI:3520 GIS for Environmental Studies 3 s.h.
Students learn new, more advanced techniques for the representation and study of human and natural systems using geographic information systems (GIS); application of this new knowledge to environmental management and problem solving. Prerequisites: GEOG:2050. Same as GEOG:3520.

## IGPI:3540 Geographic Visualization

3 s.h.
Concepts and techniques that underlie cartographic representation, interaction, and geovisualization; map symbolization and visual variables; spatiotemporal visualization, multivariate mapping, interactive cartography, animation, geovisual analytics, 3D visualization, virtual and augmented reality. Prerequisites: GEOG:1050. Same as GEOG:3540.
IGPI:4100 Mathematical Statistics I 3 s.h.
Probability, conditional probability, random variables, distribution and density functions, joint and conditional distributions, various families of discrete and continuous distributions, mgf technique for sums, convergence in distribution, convergence in probability, central limit theorem. Prerequisites: MATH:2850 and MATH:2700. Same as STAT:4100.

IGPI:4101 Mathematical Statistics II
3 s.h.
Transformations, order statistics, point estimation, sufficient statistics, Rao-Blackwell Theorem, delta method, confidence intervals, likelihood ratio tests, applications. Prerequisites: STAT:4100. Same as STAT:4101.
IGPI:4115 Finite Element I 3 s.h.
One- and two-dimensional boundary value problems; heat flow, fluid flow, torsion of bars; trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisites: ENGR:2750. Same as CEE:4533.

IGPI:4150 Health and Environment: GIS Applications 3 s.h. Introduction to how geographic information systems (GIS) and spatial statistics are used in the study of patterns of health and disease in space and time. Same as GEOG:4150, GHS:4150.

IGPI:4159 Air Pollution Control Technology
Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Same as CBE:4459, CEE:4159.

## IGPI:4200 Statistical Methods and Computing

Methods of data description and analysis using SAS; descriptive statistics, graphical presentation, estimation, hypothesis testing, sample size, power; emphasis on learning statistical methods and concepts through hands-on experience with real data. Recommendations: graduate standing in non-statistics or less quantitative major. Same as STAT:4200.
IGPI:4213 Bioinformatics 2,4 s.h.
Overview of bioinformatics topics, including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BMB:3120 or MICR:3170 or BIOL:2512 or BMB:3110. Recommendations: grade of B-plus or higher in BIOL:2512 or graduate standing. Same as BIOL:4213, GENE:4213.

## IGPI:4373 Molecular Evolution: Genes, Genomes, and

 Organisms 3 s.h. Theory underlying phylogenetic analysis with application of these methods to molecular data sets; analysis of multigene data, organellar, and nuclear genome sequences to reconstruct the history of cells.Prerequisites: BIOL:3172 with a minimum grade of C-. Same as BIOL:4373.

## IGPI:4500 Advanced Remote Sensing 4 s.h.

Theory and practice of remote sensing and digital image processing; practical applications to human-environment interactions.
Requirements: GEOG:3500 or EES:3100 or CEE:3783. Same as GEOG:4500.

IGPI:4520 GIS for Environmental Studies: Applications 3 s.h.
Project-driven course to advance student knowledge of geographic information systems (GIS); application of GIS to environmental change analysis, environmental assessment, hazard/risk analysis, and environmental decision-making. Prerequisites: GEOG:3520. Same as GEOG:4520.

## IGPI:4522 Bayesian Statistics

 3 s.h.Bayesian statistical analysis, with focus on applications; Bayesian and frequentist methods compared; Bayesian model specification, choice of priors, computational methods; hands-on Bayesian data analysis using appropriate software; interpretation and presentation of analysis results. Prerequisites: STAT:3200 and (STAT:3101 or STAT:4101 or STAT:3120). Same as PSQF:4520, STAT:4520.

## IGPI:4540 Statistical Learning

Introduction to supervised and unsupervised statistical learning, with a focus on regression, classification, and clustering; methods will be applied to real data using appropriate software; supervised learning topics include linear and nonlinear (e.g., logistic) regression, linear discriminant analysis, cross-validation, bootstrapping, model selection, and regularization methods (e.g., ridge and lasso); generalized additive and spline models, tree-based methods, random forests and boosting, and support-vector machines; unsupervised learning topics include principal components and clustering. Requirements: an introductory statistics course and a regression course. Recommendations: prior exposure to programming and/ or software, such as R, SAS, and Matlab. Same as BAIS:4540, DATA:4540, STAT:4540.
IGPI:4580 Data Visualization and Data Technologies 3 s.h. Introduction to common techniques for visualizing univariate and multivariate data, data summaries, and modeling results; how to create and interpret these visualizations and assess effectiveness of different visualizations based on an understanding of human perception and statistical thinking; data technologies for obtaining and preparing data for visualization and further analysis; students learn how to present results in written reports and use version control to manage their work. Requirements: an introductory statistics course and a regression course. Recommendations: prior exposure to basic use of statistical programming software (e.g., R or SAS) as obtained from a regression course strongly recommended. Same as DATA:4580, STAT:4580.

## IGPI:4581 Introduction to Geographic Databases

3 s.h.
Introduction to basic building blocks of spatial database design, spatial data models, structures, relationships, queries (SQL), indexing, and geoprocessing; design and construction of various types of spatial databases, including relational and big data approaches such as ArcGIS geodatabase, PostGIS/PostgreSQL, and MongoDB. Prerequisites: GEOG:2050. Same as GEOG:4580.

## IGPI:4740 Large Data Analysis <br> 3 s.h.

Current areas that deal with problem of big data; techniques from computer science, mathematics, statistics; high performance and parallel computing, matrix techniques, cluster analysis, visualization; variety of applications including Google PageRank, seismology, Netflix-type problems, weather forecasting; fusion of data with simulation; projects. Prerequisites: (CS:1210 with a minimum grade of C- or ENGR:2730 with a minimum grade of C-) and (MATH:3800 or MATH:3800) and (STAT:3200 or STAT:3200 or STAT:3200). Same as CS:4740, MATH:4740, STAT:4740.

## IGPI:5001 Introductory Methodology

3-4 s.h.
Introduction to quantitative techniques in political science; set theory, probability distributions, estimation, testing; emphasis on acquiring mathematical skills for more advanced quantitative work in political science. Requirements: MA or PhD standing in political science. Same as POLI:5001.

## IGPI:5015 Independent Study

arr.

## IGPI:5055 Geospatial Programming

3 s.h.
Introduction to geospatial programming with Python; programming basics, data structures, and algorithms; spatial data models and structures; vector- and raster-based geoprocessing; automating GIS tasks and models; spatial libraries (e.g., ArcPy, GeoPandas, GDAL, PySAL). Same as GEOG:5055.

## IGPI:5110 Introduction to Informatics

3 s.h.
Fundamentals of computer science: algorithms, complexity, relational databases, systems concepts, programming in Python. Same as CS:5110.

3 s.h. IGPI:5120 Regression Modeling and ANOVA in the Health Sciences 3 s.h.
Continuation of BIOS:4120; correlation, simple and multiple linear regression, confounding, interactions, model selection, single and multiple factor ANOVA (analysis of variance) models, contrasts, multiple comparisons, nested and block designs; introduction to mixed models; for non-biostatistics majors. Offered spring semesters. Prerequisites: BIOS:4120. Same as BIOS:5120, STAT:5610.

## IGPI:5130 Applied Categorical Data Analysis 3 s.h.

Analysis of proportions, risk measures, and measures of association; Mantel-Haenszel method; logistic regression for binary responses and for matched data; logistic regression for multi-category responses; analysis of count data (Poisson regression and negative binomial regression); analysis of clustered data (generalized estimating equations and generalized linear mixed effects model); special topics include the application of propensity score methods; designed for nonbiostatistics majors. Offered fall semesters. Prerequisites: BIOS:5120. Same as BIOS:5130.

## IGPI:5199 Applied Statistics I

4 s.h.
Descriptive statistics, basic inferential methods (confidence intervals, chi-square tests); linear models (regression and ANOVA modelsspecification and assumptions, fitting, diagnostics, selection, testing, interpretation); nonlinear models, logistic regression. Prerequisites: STAT:3101. Corequisites: STAT:4100 or STAT:5100. Requirements: facility with matrix algebra. Same as STAT:5200.
IGPI:5206 Medical Imaging Physics 3 s.h.
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210. Same as BME:5210, ECE:5470.

## IGPI:5211 Genes, Genomes, and the Human Condition Graduate

 LectureOrganization, expression, and evolution of genes in context of genomes; focus on human genome; distribution and transmission of variation in human population. Recommendations: BIOL:1411 highly recommended. Same as BIOL:5211.

IGPI:5212 Biomedical Signal Processing 3 s.h.
Application of signal processing methods (e.g., Fourier, Laplace, z-transforms) to biomedical problems, such as analysis of cardiac signals, circadian rhythm, the breathing cycle; computer simulation lab. Same as BME:5200.
IGPI:5220 Principles of Public Health Informatics 3 s.h.
Systematic applications of information science, computer science, and technology to public health practice, research, and learning; methods of disease surveillance, data collection, analysis, and reporting with health informatics. Offered fall semesters. Same as EPID:5200.

## IGPI:5251 Advanced Biosystems

3 s.h.
Biological systems unique to systems analysis; operation under nonequilibrium conditions; tools for systems analysis developed from models of systems at equilibrium (i.e., mechanical systems); fundamental difference between biological and mechanical systems that impact systems analysis; expand knowledge of linear systems and begin work with nonlinear systems; various modeling and analysis approaches useful in biomedical and biomedical engineering research. Prerequisites: BME:2200. Same as BME:5251.

## IGPI:5270 Pathogenesis of Major Human Diseases 3 s.h.

Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Offered spring semesters of even years. Same as MMED:5270, PATH:5270.

## IGPI:5310 Research Data Management

Introduction to data management techniques and problems encountered in gathering and processing data from biomedical investigations; introduction to SAS, techniques taught in SAS; designed for non-biostatistics majors. Offered fall and spring semesters. Recommendations: prior programming experience with C , C++, Python, Java, or other. Same as BIOS:5310, STAT:5810.

## IGPI:5311 Informatics for Sustainable Systems 3 s.h.

Introduction to fundamental and advanced environmental informatics concepts and procedures including automated data collection, data management, data transformations, and processing to support modeling and analysis; scientific visualization of environmental data to support management of food, energy, and water (FEW) resources; sustainability in FEW systems. Same as CEE:5310, URP:5310.

## IGPI:5331 Graph Algorithms and Combinatorial

## Optimization

3 s.h.
Combinatorial optimization problems; time complexity; graph theory and algorithms; combinatorial optimization algorithms; complexity theory and NP-completeness; approximation algorithms; greedy algorithms and matroids. Prerequisites: ECE:3330. Same as ECE:5330.

## IGPI:5400 Computing in Statistics

R ; database management; graphical techniques; importing graphics into word-processing documents (e.g., LaTeX); creating reports in LaTeX; SAS; simulation methods (Monte Carlo studies, bootstrap, etc.). Prerequisites: CS:1210 and STAT:3200 and (STAT:3120 or STAT:3101 or STAT:4101). Corequisites: STAT:5100 and STAT:5200 if not already completed. Same as DATA:5400, STAT:5400.

## IGPI:5415 Satellite Image Processing and Remote Sensing of Atmosphere

 3 s.h.Introduction to principles of atmospheric radiation and techniques for satellite image processing; hands-on experience with data calibration, image registration and enhancement, noise filtering and (supervised and unsupervised) multi-spectral classification of satellite imageries; various satellite sensors used for monitoring of different atmospheric processes and constituents. Same as CBE:5415.

## IGPI:5417 Physical Meteorology and Atmospheric Radiative

Transfer
Physical processes for weather and climate including radiative transfer, cloud and precipitation formation, and atmospheric electricity; theory of scattering by atmospheric particles (e.g., clouds, aerosols, molecules), atmospheric radiative transfer equations, and numerical techniques and tools to solve these equations.
Requirements: senior or graduate standing. Same as CBE:5417.

## IGPI:5436 Electronic Structure and Informatics in

## Chemistry

3 s.h.
Basic principles of molecular electronic structure theory; molecular structure and reactivity; molecular orbital theory; density functional theory; introduction to informatics and data science; how
calculations can be used to enhance experimental research projects. Recommendations: CHEM:4432. Same as CHEM:5436.

## IGPI:5450 Machine Learning

Fundamentals of machine learning theory including regression, classification, neural networks, clustering, and principal component analysis; engineering applications. Prerequisites: ECE:2400 or BME:2200. Same as ECE:5450.

## IGPI:5460 Digital Signal Processing <br> 3 s.h.

Theory, techniques used in representing discrete-time signals; system concepts in frequency and sampling domains; FIR and IIR digital filter theory, design and realization techniques; theory, application of discrete Fourier transforms/FFT. Prerequisites: ECE:3400. Same as ECE:5460.

3 s.h. IGPI:5480 Digital Image Processing
Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image pre-processing, edge detection, filtering; image segmentation. Prerequisites: ECE:2400 or BME:2200. Same as ECE:5480.

IGPI:5510 Biostatistical Computing 2 s.h.
Introduction to computer programming using SAS and R statistical software packages; programming language syntax, constructs, procedures, and techniques for data management, data analysis, and statistical programming commonly encountered in biostatistics; designed for first-year biostatistics majors. Offered fall semesters. Corequisites: BIOS:5710. Same as BIOS:5510.
IGPI:5540 Geographic Visualization
3 s.h.
Concepts and techniques that underlie cartographic representation, interaction, and geovisualization; map symbolization and visual variables; user-centered design, map use and usability engineering; web mapping, spatiotemporal visualization, multivariate mapping, interactive cartography, animation, geovisual analytics, 3D visualization, virtual and augmented reality. Same as GEOG:5540.

## IGPI:5641 Computer-Based Control Systems

Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisites: ECE:5600. Same as ECE:5640.

IGPI:5710 Biostatistical Methods I
4 s.h.
Probability distributions, moments, estimation, parametric and nonparametric inference for one-sample and two-sample problems, analysis of frequency data; emphasis on use of computers; designed for first-year biostatistics majors. Offered fall semesters. Requirements: two semesters of calculus. Same as BIOS:5710.

IGPI:5720 Biostatistical Methods II
4 s.h.
Continuation of BIOS:5710; multi-factor ANOVA (analysis of variance), multiple comparisons, orthogonal contrasts, linear regression and correlation, regression diagnostics and remedial measures, model selection, and mixed models; designed for firstyear biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5710. Requirements: one semester of linear algebra. Same as BIOS:5720.
IGPI:5730 Biostatistical Methods in Categorical Data 3 s.h.
Estimation of proportions, rates, risks, relative risks, and odds ratios; Mantel-Haenszel method; logistic regression (including ordinal logistic regression and multi-category nominal logistic regression); Poisson regression and negative binomial regression; methods for correlated or clustered data (conditional logistic regression, generalized estimating equations, and mixed effects models); special topics include an introduction to generalized linear models and likelihood-based inferential techniques in this framework; designed for first-year biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5510 and BIOS:5710. Corequisites: BIOS:5720. Same as BIOS:5730.
3 s.h. IGPI:6140 Digital Environments and Library Users 3 s.h. Methods and models for building digital libraries; organization with metadata; standards such as those for object identifiers, open access, building cross-linkages between collections; automatic harvesting of content. Same as SLIS:6140.

IGPI:6155 Information Visualization
3 s.h.
Introduction to theories, techniques, and examples of information visualizations for different presentations of data. Prerequisites: SLIS:5020. Same as SLIS:6155.

IGPI:6210 Applied Survival Analysis
3 s.h.
Nonparametric, parametric, and semi-parametric methods for time-to-event data; types of censoring; Kaplan-Meier estimation; Cox proportional hazards models, including methods for assessing adequacy of the proportional hazards assumption; time varying covariates; sample size calculations for comparison of two or more groups; focus on analysis of real data sets and examples using statistical software. Offered spring semesters. Prerequisites: BIOS:5120 or BIOS:5720. Same as BIOS:6210.
IGPI:6216 Finite Element II
3 s.h.
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as CEE:6532, ME:6215.
IGPI:6310 Introductory Longitudinal Data Analysis 3 s.h.
Introduction to statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; focus on applications and computer software methods for ANOVA based methods, hierarchical linear models, linear mixed models, correlated regression models, generalized estimating equations, and generalized linear mixed models. Offered fall semesters. Prerequisites: BIOS:5120 or STAT:3200. Same as BIOS:6310, STAT:6550.
IGPI:6420 Advanced Database Management and Big Data 3 s.h.
Advanced database management topics; basics of semi-structured data and web services; how to retrieve real-world big data sets from web services; use of SQL and PL/SQL to analyze data in relational databases; big data related topics (e.g., Hadoop, Hive). Same as BAIS:6420.

## IGPI:6480 Knowledge Discovery

3 s.h.
Knowledge discovery process including data reduction, cleansing, and transformation; advanced modeling techniques from classification, prediction, clustering, and association; evaluation and integration. Same as BAIS:6480.

## IGPI:6490 Information Policy and Ethics

Recent developments in production, use, and organization of information have created new opportunities and raised ethical challenges that demand responses from information professionals; exploration of major ethical frameworks and their relevance for addressing ethical issues arising in information-intensive environments; practice-based assignments that provide opportunities for students to apply ethical theories to key ethical issues faced in various information-intensive contexts. Same as SLIS:6490.
IGPI:6501 Seminar in Spatial Analysis and Modeling 1-3 s.h. Research themes in spatial analysis, GIScience, simulation, remote sensing. Same as GEOG:6500.

## IGPI:6510 Readings in Informatics

arr.
Topics not covered in other courses; individual study.

## IGPI:6515 Independent Study

arr.

## IGPI:6520 Research for Dissertation

arr.
Requirements: PhD candidacy.

## IGPI:6530 Environmental and Spatial Statistics

3 s.h.
Geostatistics kriging, variogram estimation, trend estimation, sampling design, extensions to river networks and the globe, lattice data analysis, analysis of spatial point patterns. Prerequisites: STAT:4101 and STAT:3200. Same as STAT:6530.
IGPI:6600 Linear Programming
3 s.h.
Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Requirements: calculus and linear algebra. Same as BAIS:6600, ISE: 6600.

IGPI:6610 Statistical Methods in Clinical Trials 3 s.h.
Survey of statistical methods commonly used in clinical trials; primary focus on methodologic perspective for the design, conduct, analysis, and interpretation of all phases of clinical trials; logistical and operational aspects of conducting multisite clinical trials; designed for biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5720. Requirements: familiarity with SAS and R programming. Same as BIOS:6610.

## IGPI:6650 Causal Inference $\mathbf{3}$ s.

Causal inference overview, emphasis on inference in observational research; conceptual issues (e.g., counterfactuals, causal graphs, timevarying treatments/confounding), methods (e.g., inverse probability weighting, doubly robust estimators), and related applications (e.g., causal mediation analysis, quantitative bias analysis); for advanced biostatistics or epidemiology students. Prerequisites: (BIOS:5720 and BIOS:5730) or (EPID:6400 and EPID:5241 and EPID:5610). Same as BIOS:6650, EPID:6655.

IGPI:6700 Discrete Optimization 3 s.h. Introduction to modeling and solving discrete optimization problems; integer programming, network flows, dynamic programming.
Prerequisites: BAIS:6600. Same as BAIS:6700.
IGPI:7000 Business Analytics Topics 3 s.h.
Same as BAIS:7000.
IGPI:7210 Survival Data Analysis 3 s.h.
Types of censoring and truncation; survival function estimation; parametric inference using exponential, Weibull, and accelerated failure time models; nonparametric tests; sample size calculation; Cox regression with stratification and time-dependent covariates; regression diagnostics; competing risks; topics may include analysis of correlated survival data and/or recurrent events; designed for biostatistics and statistics majors. Offered fall semesters of odd years. Prerequisites: BIOS:5720 and ((STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101)). Same as BIOS:7210, STAT:7570.

## IGPI:7310 Longitudinal Data Analysis

3 s.h. Statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; includes ANOVA based methods, hierarchical linear models, linear mixed models, error structures, generalized estimating equations, and generalized linear mixed models; may include Bayesian approaches; designed for biostatistics and statistics majors. Offered spring semesters of odd years. Prerequisites: (BIOS:5720 and STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101). Same as BIOS:7310.
IGPI:7400 Computer Intensive Statistics
3 s.h.
Computer arithmetic, random variate generation, numerical optimization, numerical linear algebra, smoothing techniques, bootstrap methods, cross-validation, MCMC, EM and related algorithms; other topics per student/instructor interests. Prerequisites: (BIOS:5710 or STAT:5200) and STAT:3101. Requirements: proficiency in Fortran or C or C++ or Java. Same as STAT:7400.
IGPI:7470 Image Analysis and Understanding 3 s.h.
Mathematical foundations and practical techniques of digital image analysis and understanding; image segmentation (from edges and regions), object description (from boundaries, regions, scale, scale insensitive descriptions, 3D shape, texture) pattern recognition (statistical and syntactic methods, cluster analysis), image understanding (knowledge representation, control strategies, matching, context, semantics), image analysis and understanding systems; lab arranged. Prerequisites: ECE:5480. Same as ECE:7470.

## IGPI:7480 Advanced Digital Image Processing

3 s.h.
Advanced local operators (scale-space imaging, advanced edge detection, line and corner detection), image morphology (binary/ gray scale operators, morphological segmentation and watershed), digital topology and geometry (binary/fuzzy digital topology, distance functions, skeletonization), color spaces, wavelets and multiresolution processing (Haar transform, multi-resolution expansions, wavelet transforms in one or two dimensions, fast wavelet transform, wavelet packets), image registration (intensity correlation, mutual information, and landmark-based deformable registration methods). Prerequisites: ECE:5460 and ECE:5480. Same as ECE:7480.

IGPI:7600 Advanced Biostatistics Seminar 0-3 s.h.
Current topics; supervised experience in reading and interpreting
biostatistical literature. Same as BIOS:7600.

## Informatics, MS

The MS in informatics is a non-research, course-based program for students who wish to enhance their careers with advanced knowledge of informatics. The coursework combines core informatics courses with cognate courses in one of these areas: geoinformatics, health informatics, or human-computer interaction.

## Learning Outcomes

Students will exhibit:

- understanding of computational thinking concepts,
- experience in software development,
- expertise in data analytics methods,
- comprehension of and practice applying human-centered computing concepts,
- awareness of professional ethics, and
- domain-specific knowledge and skills related to the cognate area.

## Requirements

The Master of Science program in informatics requires a total of 31 s.h. of graduate credit, including 19 s.h. of core courses and 12 s.h. of coursework in a chosen subprogram: geoinformatics, health informatics, or human-computer interaction. Students must maintain a Graduate College Program grade-point average of at least 3.00.
The non-research, course-based program is for students who wish to enhance their careers with advanced knowledge of informatics. Students must also complete the requirements for the degree as described in the Manual of Rules and Regulations, Section X, on the Graduate College website.

The MS with a major in informatics requires the following coursework.

## Core Courses

All students complete the following core courses.

## Programming

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Introduction to Informatics | 3 |
| CS:5110/IGPI:5110 <br> One of these: | Programming Languages and <br> Tools | 3 |
| CS:3210 | Topics in Computer Science I | 3 |
| CS:3980 | Geospatial Programming <br> (required for geoinformatics <br> cognate) | 3 |
| IGPI:5055 | Title | Hours |
| StatisticS | Introduction to Biostatistics <br> (required for health informatics <br> Course \# | cognate) |
| BIOS:4120 | Introduction to Statistical <br> Methods | 3 |
| STAT:4143/ | MSQF:4143 |  |

## Data Science

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| BAIS:6480/IGPI:6480 Knowledge Discovery <br> STAT:4540/ Statistical Learning <br> BAIS:4540/  <br> DATA:4540/  <br> IGPI:4540  <br> An approved course (consult advisor) 3 <br> Databases  <br> Course \# Title |  |  |
| One of these: Database Systems <br> CS:4400 Introduction to Geographic <br> GEOG:4580/ Databases (required for <br> IGPI:4581 geoinformatics cognate) |  |  |

Human Factors

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: | Research Methods in Human- <br> Computer Interaction | 3 |
| CS:4500 | Human-Computer Interaction <br> for Computer Science | 3 |
| CS:4510 | Geographic Visualization <br> (required for geoinformatics <br> cognate) | 3 |

## Ethics

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| CS:5980 | Topics in Computer Science III | 1 |

## Subprograms

Students choose one of three subprograms and complete the requirements.

## Geoinformatics Subprogram

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| GEOG:3500/ <br> IGPI:3500 | Introduction to Environmental Remote Sensing | 3 |
| GEOG:3520/ <br> IGPI:3520 | GIS for Environmental Studies | 3 |
| GEOG:3570 | Light Detection and Ranging (LiDAR): Principles and Applications | 3 |
| GEOG:4150/ | Health and Environment: GIS | 3 |
| GHS:4150/IGPI:4150 | Applications |  |

## Health Informatics Subprogram

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| Four of these: | Introduction to Scientific <br> Computing for Biologists | 3 |
| BIOL:4386 | Regression Modeling and |  |
| BIOS:5120/ | ANOVA in the Health Sciences | 3 |
| IGPI:5120/ |  |  |

| B:3310/ | Practical Data Science and | 3 |
| :---: | :---: | :---: |
| CBIO:3310/ | Bioinformatics (recommended |  |
| MMED:3310 | for students with a biology background) |  |
| BME:5335 | Computational Bioinformatics | 3 |
| CS:4470 | Health Data Analytics | 3 |
| EPID:4400 | Epidemiology I: Principles | 3 |
| IGPI:5220/EPID:5200 | Principles of Public Health Informatics | 3 |
| Human-Comp | ter Interaction Subp |  |
| Course \# | Title | Hours |
| Three of these: |  |  |
| PSQF:6243/ STAT:6513 | Intermediate Statistical Methods | 3 |
| PSY:3060 | Sensation and Perception | 3 |
| An approved elective ( | (consult director) | 3 |
| One of these: |  |  |
| CS:4500 | Research Methods in HumanComputer Interaction (if not taken to satisfy Human Factors requirement) | 3 |
| CS:4510 | Human-Computer Interaction for Computer Science (if not taken to satisfy Human Factors requirement and if have not taken CS:2520) | 3 |
| ISE:6211 | Human Factors in Healthcare Systems | 3 |
| ISE:6220 | Cognitive Engineering | 3 |

For more information about the Master of Science requirements, see the Interdisciplinary Graduate Program in Informatics website.

## Combined Programs

## MS (Health Informatics Subprogram)/ PharmD

The purpose of the combined program is to provide an opportunity for professional students in the College of Pharmacy to receive formal training in health informatics in addition to training in pharmacotherapy and health care. Students completing the degree program receive an MS in informatics with the health informatics subprogram (without thesis) from the Graduate College and a PharmD from the College of Pharmacy. Students develop special expertise in information technology, including management of electronic health records, health information exchange standards, electronic prescribing, medication management, decision support, and other competencies.
The combined program requires a total of 34 s.h. beyond the bachelor's degree. Courses that can be used to count toward both programs include 19 s.h. of core courses, 6 s.h. of courses from the health informatics cognate, and 9 s.h. from the PharmD curriculum selected from the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PHAR:8250 | Applications of Pharmacy <br> Practice I | 2 |
| PHAR:8255 | Discovery II: Design and <br> Methods | arr. |
| PHAR:8265 | Applications of Pharmacy <br> Practice II | 2 |

| PHAR:8374 | Applications of Pharmacy <br> Practice III | 2 |
| :--- | :--- | ---: |
| PHAR:8375 | Advanced Topics in Health <br> Services | 2 |
| PHAR:8378 | Pharmacy Law and Ethics | 2 |

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. It is recommended that students apply to the Graduate College for admission to the MS program before entering the spring semester of their first year in the pharmacy program. For more information, see Doctor of Pharmacy, PharmD [p. 1935] in the College of Pharmacy section of the catalog.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They also must meet the admission requirements of the informatics subprogram they want to enter; see PhD and MS Admission on the program's website.

## Academic Plans

## Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Informatics, PhD

The PhD in informatics emphasizes preparation for research, teaching, and scholarly endeavor in academic settings or private, industrial, or governmental laboratories. Students focus on applying informatics research to a field of choice (e.g., health, biology, human-computer interaction, geography, design).

## Learning Outcomes

Students will exhibit:

- broad, up-to-date knowledge of informatics topics including computational thinking, software development, data analytics, human-centered computing concepts, and professional ethics;
- domain-specific knowledge and skills related to the field of application of informatics research;
- fluency at reading, analyzing, synthesizing, and communicating research; and a
- thorough understanding of relevant research methods and ability to conduct original research that contributes to the field of informatics.

## Requirements

The Doctor of Philosophy program in informatics requires at least 72 s.h. of graduate credit. A total of 19 s.h. of core courses are required plus an additional 12 s.h. of courses approved by a student's committee. The remaining 41 s.h. may be completed with additional coursework or through reading or research hours. Students must maintain a program grade-point average of at least 3.00.

It requires completion of coursework, satisfactory performance on the qualifying exam, comprehensive exam, and the proposal, plus the production and formal defense of a dissertation describing original research results.

Students select an advisor from among the program faculty. On the rare occasion when students choose a PhD advisor who is outside the program, a co-advisor from the program faculty must be designated.

The PhD with a major in informatics requires the following coursework.

## Core Courses

Students complete a total of 19 s.h. in core coursework. The student's advisor and the rest of the student's committee consisting of at least two other faculty select remaining courses ( $12 \mathrm{~s} . \mathrm{h}$. minimum) for a total of at least $31 \mathrm{~s} . \mathrm{h}$. of coursework.

## Elective Core Coursework

| Course \# $\quad$ Title | Hours |
| :--- | ---: | ---: |
| Coursework selected in consultation with advisor and | 12 |
| committee |  |

## Electives

The remaining 41 s.h. may be completed with additional coursework or through reading or research hours.

## Comprehensive Examination

PhD students must pass a comprehensive examination at or near completion of their coursework requirements. Students prepare a 20 30 page survey/discussion (along the lines of the introduction and literature review from an eventual thesis) for distribution to their faculty committee, followed at least two weeks later by a 20-40 minute oral presentation, and a question/answer session.
Students may request that the MS be granted at the time of the comprehensive exam. The MS without thesis is awarded upon successful completion of the comprehensive exam but may, at the examination committee's discretion, be awarded even if students do not pass the exam. Students also may choose to complete the thesis requirements and be awarded an MS with thesis.

## Dissertation

Students complete dissertation coursework in consultation with their advisor

Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded the Doctor of Philosophy degree.

For more information about the Doctor of Philosophy requirements, see the Interdisciplinary Graduate Program in Informatics website.

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in informatics in a combined degree program offered by the Carver College of Medicine and the Graduate College. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Admission

Students applying to the PhD program do not need a master's degree prior to admission. Students who hold a master's degree upon entering the PhD program may apply to use transfer credit from their master's degree courses toward their PhD program requirements.

Students applying to the PhD program who are not selected for admission are automatically considered for admission to the MS program if they do not already hold a master's degree.
Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website. They also must meet the admission requirements of the informatics program; see PhD and MS Admission on the program's website.

## Career Advancement

The program emphasizes preparation for research, teaching, and scholarly endeavor in academic settings or private, industrial, or governmental laboratories.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

f Typically completed six months prior to final oral exam
(dissertation defense).
g Dissertation defense.

## Informatics, Graduate Certificate

## Requirements

The graduate Certificate in Informatics requires 19 s.h. of graduate credit. Students must earn a grade-point average of at least 3.00 in certificate coursework. The certificate program is designed for students enrolled in University of Iowa graduate degree programs who wish to study informatics as a complement to their degree program and for nondegree students who are interested in increasing their knowledge of informatics.
The Certificate in Informatics requires the following coursework.

## Required Courses

For more information about certificate requirements, see the Interdisciplinary Graduate Program in Informatics website.

## Admission

Certificate program applicants may be degree or nondegree graduate students. Applicants who are enrolled in a University of Iowa graduate degree program must be in good academic standing in their program.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## International Writing Program

## Director

- Christopher Merrill

Faculty: https://iwp.uiowa.edu/about-iwp/iwp-staff
Website: https://iwp.uiowa.edu
The International Writing Program (IWP) conducts a unique fall residency program for established writers from outside the United States, and a summer writing program for American and international high school students. During spring semester, IWP may offer courses related to the program's general mission, including collaborative distance learning courses for writing students overseas.

## Residency Program

Each fall the International Writing Program assembles a community of poets, fiction writers, essayists, playwrights, and journalists for a 10 week residency on campus. Participants range from emerging talents to writers who are among their countries' leading literary figures and writers of world stature. For most, their time in the program is their first, or their first extended, stay in the United States.
At the University of Iowa, they live and interact with each other while working on writing and translation projects and participating in public events. Throughout their residency, they present their work in IWP:3191 International Literature Today and IWP:5205 International Translation Workshop, and participate as guests in many other courses on campus. They also meet with the public through readings, panel discussions, a film series, and other presentations.
Since 1967 over 1,600 writers from over 160 countries have participated in the program.
International Writing Program participants are supported by the U.S. Department of State, through bilateral agreements with many countries, by grants from cultural institutions and governments abroad, and by private funds. The program does not provide grants for writers.

For more information, contact the International Writing Program.

## Summer Program

## Between the Lines

Between the Lines is a creative writing and cultural exchange summer program for American and international high school students. Students explore creative writing and world literature in a multilingual, multicultural environment, attend writing workshops, and participate in a literature seminar and a series of master classes.
Between the Lines offers two sessions for participants who are 15-18 years old:

- Between the Lines: Peace and the Writing Experience brings together young writers from the U.S. and select countries along the historic Silk Road land route for a two-week creative writing residency. The program is supported by the Bureau of Education and Cultural Affairs at the U.S. Department of State.
- Between the Lines: Identity and Belonging is sponsored through grant funds provided by the Doris Duke Foundation for the Islamic Art (DDFIA) Building Bridges Program. The two-week session, free for all participants, brings together Americans who are Muslims and Americans who are non-Muslims. Those who are first- or second-generation immigrants, from refugee communities, low-income households, or marginalized positions are particularly encouraged to apply.

International students are nominated for Peace and the Writing Experience by embassies in their home countries. American students may apply directly to IWP for both sessions; candidates must complete an online application, submit samples of their creative work, a statement of purpose, and respond to two writing prompts. Contact Between the Lines for more information.

## Courses

## International Writing Program Courses

IWP:1009 Undergraduate Internship arr.

Professional experience for students interested in arts management and international literature. Requirements: undergraduate standing, minimum of 36 s.h. of coursework, and consultation with IWP director.

IWP:1102 On Campus Independent Study
arr.
Independent study arranged in collaboration with instructor.
IWP:3191 International Literature Today 1,3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature. Same as ENGL:3595, TRNS:3191, WLLC:3191.
IWP:3210 Comparative Arts
3 s.h.
Cultural and aesthetic issues arising from side-by-side investigation of several art forms, including literature, cinema, painting, music, opera, architecture; periods, schools, styles, and their theories. Taught in English. Same as ASIA:3210, FREN:3210, WLLC:3210.

IWP:5205 International Translation Workshop 1,3 s.h.
International writers pair with University of Iowa translators to write new works of poetry and fiction in English; second-language fluency not required for international writers. Same as TRNS:5210.
IWP:6635 Crossing Borders Seminar
2-3 s.h.
Taught in English. Same as AFAM:6635, ANTH:6635, COMM:6635, ENGL:6635, FREN:6142, GEOG:6635, GRMN:6635, HIST:6135, POLI:6635, SPAN:6904.

IWP:7460 Translation Workshop 3 s.h.
Requirements: at least one world language. Same as TRNS:7460.

# Library and Information Science 

## Director

- Lucilia (Lucy) Santos Green

Graduate degree: MA in library and information science
Graduate certificate: special collections librarianship
Faculty: https://slis.uiowa.edu/faculty-and-staff
Website: https://slis.uiowa.edu/
Library and information science is an interdisciplinary field of study that centers on the documentation that records our stories, memory, history, and knowledge. Library and information science professionals serve as custodians of printed materials, records, photographs, audiovisual materials, and ephemera, in both analog and digital form. Librarians and other information professionals collect, organize, preserve, and provide access to these materials and are the stewards of the knowledge that they contain. The School of Library and Information Science connects people to the resources that they need to understand their histories, communities, and the world around them. The school advocates for free and open access to these resources and train folks to use these materials to better themselves and society as lifelong learners.

The school offers the MA in library and information science and a variety of dual degrees and certificates to specialize in these areas of librarianship, including joint offerings with the UI Center for Book, the public digital humanities program, Special Collections at the University of Iowa Main Library, and a school librarian endorsement for licensed $\mathrm{K}-12$ teachers. In addition, the degree may be pursued while completing other degrees at the University of Iowa, including other master's and PhD degrees. Undergraduates at the University of Iowa also may apply for the Undergraduate to Graduate (U2G) degree program and complete their baccalaureate degree in combination with the MA in library and information science.

## Student Organizations and Activities

All MA students in the school are automatically members of LISSO, the Library and Information Science Student Organization, which also serves as the student chapter of the American Library Association. LISSO sponsors various activities, such as speaker series, workshops, brown bag lunches, and social events. Participation in LISSO events provides students with significant opportunities for professional and extracurricular growth. Students are encouraged to join other state and national professional organizations.

## Honor Society

The Beta Beta Theta Chapter of Beta Phi Mu, the international honor society for library and information science, is located at the University of Iowa. Each year new members are chosen from the top $25 \%$ of the preceding year's graduating class. To be eligible for membership, graduates must achieve a grade-point average of at least 3.75, demonstrate professional promise, and be recommended by the faculty.

## Related Certificate

## Certificate in Book Studies/Book Arts and Technologies

Students may apply to earn the Certificate in Book Studies/Book Arts and Technologies. The program requires 15 additional s.h. of graduate credit through the University of Iowa Center for the Book for students
who are enrolled in the joint Library and Information Sciences MA/ Certificate in Book Studies/Book Arts and Technologies program. For more information, see the MA and Certificate in Book Studies [p. 1668] in the catalog.

## Programs

## Graduate Programs of Study

## Major

- Master of Arts in Library and Information Science [p. 1666]

## Certificate

- Certificate in Special Collections Librarianship [p. 1671]

## Facilities

The School of Library and Information Science is housed in the south wing of the university's Main Library, in a setting that promotes community among students, faculty, and staff and provides easy access to resources of the University of Iowa Libraries. Facilities are provided for the varied instructional and research activities of the school.

The school includes classrooms dedicated for use by School of Library and Information Science faculty and students. These rooms include a wired workstation technology classroom with Windows and Macintosh computers fully equipped for videoconferencing, and seminar classrooms with videoconferencing systems and large highdefinition screens.

## Gunther Commons

Gunther Commons, a state-of-the-art collaboratory equipped with workstations, is the school's combined student center and technology lab. Individuals and teams of students gather in the collaboratory to work on course assignments and to gain experience with specialized software that supports the latest teaching technologies. Students have access to Windows and Macintosh computers, with gigabit access to the campus network and wireless service throughout the Main Library.

## University of Iowa Libraries

All of the resources of the University of Iowa Libraries are available to the school's students and faculty. The system contains more than 4 million volumes in the Main Library and six departmental libraries.

The web-based catalog provides access to books and periodicals, electronic indexes, and full-text databases held by the university libraries. In addition, InfoHawk+ provides online resource access to selected internet and CD-ROM resources arranged by subject and academic discipline. Wireless internet access is available in the Main Library.
The school benefits with proximity to the Learning Commons. It encompasses the majority of public space on the first floor of the Main Library. The Learning Commons is a technology-infused, comfortable and flexible learning space, and an academic and information help center.

The third floor of the Main Library houses the map collection, Special Collections, and University Archives, including the Iowa Women's Archives.

## Other Libraries

Students have access to a variety of libraries through field trips, practicum experience, and personal use: the State Historical Society of Iowa library in Iowa City; the Iowa City, Coralville, and Cedar Rapids public and school libraries; the Augustana, Coe, Cornell,

Mount Mercy, and Grinnell college libraries; and the Herbert Hoover Presidential Library and Museum in West Branch.

## Other Resources

The second floor of the University Capitol Centre houses the instructional services and campus services departments of the university's Information Technology Services. It provides instructional and research computing facilities and services for the university community. All university students, staff, and faculty may use the center's computers for university-related research, thesis preparation, and class work. Instructional Technology Centers provide campuswide access to the university's academic computing resources and the internet.

## Courses

## Library and Information Science Courses

## SLIS:4150 Introduction to Book Studies

Theory and practice of book studies; meanings of word and image in the book format; comparative study of other media, applied study of the codex as physical artifact. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Varies by semester. Same as ENGL:4150, UICB:4150.

## SLIS:4910 The Book in the Middle Ages

3 s.h.
Relation of text, decoration, function, creators, and audience in different genres of medieval manuscript books 400-1500 A.D. Same as HIST:4422, UICB:4910.

## SLIS:4920 The Book in Early Modern Europe

3 s.h.
History of the book and communication in Europe 1400-1800; production, distribution, and use of texts in cultural context. Same as HIST:4429, UICB:4920.
SLIS:5010 Libraries, Culture, and Society
1-3 s.h.
Role of libraries and information agencies in society; major issues including information policy, professional ethics, literacy, diversity, technology, and pedagogy. Requirements: admission to library and information science.
SLIS:5020 Foundations of Computing
3 s.h.
Introduction to historical, cultural, and practical roles of digital technology in libraries and information centers; application of thinking and research in digital inequality, user experience, and tech support to hands-on assignments; evaluation of emerging technology based on institutional and user needs. Requirements: admission to library and information science.

## SLIS:5030 Information Organization <br> 3 s.h.

Introduction to information organization, the systems and standards used in libraries and information centers to describe and organize documents and records for optimal stewardship and retrieval; handson experience in creating media (e.g., LibGuides, Omeka galleries) and encoding XML documents; preparation for further practice in cataloging, metadata, preservation, and retrieval. Requirements: admission to library and information science.

SLIS:5041 College and University Libraries
3 s.h.
Focus on praxis of academic librarianship-the way theories and ideas are applied and embodied in day-to-day work of librarians and organization of academic libraries; exploration of different types of academic libraries and their goals, functions, services, and contexts in which they operate; different types of academic librarianship; development of a preparedness for engaging complexities of academic library work as it progresses the goals of higher education; for students interested in academic librarianship, archives, and special collections. Requirements: admission to library and information science program.
SLIS:5042 Public Libraries
3 s.h.
Modern public libraries were founded on principles of equality, democracy, intellectual freedom, and public good; exploration of the historical development of public libraries and current issues related to their management and operations; practical projects and observation of library operations; opportunity to apply classroom learning to realworld work; for students interested in working in a public library or archives. Requirements: admission to library and information science program.

SLIS:5044 School Library Media Administration 3 s.h.
How to create and deliver a program that focuses on teaching responsibilities of school librarians and their collaborative role in the school; examination of research, standards, curricular frameworks, information process, and inquiry models; administrative and leadership roles of teacher librarian including policy and procedure development, budgeting, and program evaluation; development of a functional library program plan.
SLIS:5200 Innovation and Technology Methodology 3 s.h. Power of technology to connect, communicate, create, convince, and collaborate within library setting; development of a personal philosophy and network within the innovative technology realm; introduction to a variety of multimedia tools; creation of projects on multiple platforms.
SLIS:5220 Resources for Children
3 s.h.
Children's literature and librarianship are entwined, interdisciplinary fields that now encompass everything from storytelling to new media, reflecting the field's service to a population spanning from newborns to 14 -year-olds; survey of issues that youth librarians must understand by studying a progression of ages and developmental stages, issues of professional practice, and elements of genre and media for young people, anchored by books and media suited to these ages; strategies and resources that youth services professionals can use for creating responsive services and collections in the 21st century.

## SLIS:5230 Resources for Young Adults <br> 3 s.h.

Examination of topics related to populations served by youth service departments (i.e., societal issues and informational needs) and the ways libraries meet needs of young adults; immersion into the world of young adults and how this relates to recreational reading and information seeking needs; how to evaluate and select from a variety of fiction, nonfiction, print, digital, and web-based resources; how to guide young adults to become competent, critical consumers and producers of information while creating a welcoming environment that celebrates diversity.

## SLIS:5240 Resources for Adults <br> 3 s.h.

Role of public libraries in meeting adults' informational and recreational needs; popular culture materials, reader's advisory services, lifelong learning.

SLIS:5520 Studies in Book History and Technologies 0-3 s.h. Topics related to production, distribution, and consumption of books through history and into the future. Same as UICB:5520.

## SLIS:5530 Preservation Management

Responsible stewardship of collections, integration of preservation into libraries and archives systems, maximizing limited resources, establishing preservation priorities, and advocacy; appropriate care of books, paper, photographs, time-based media (e.g., audio, video, film), and born-digital objects; lectures, discussions, student presentations, and hands-on activities; for students who will be responsible for managing collections. Same as UICB:5530.

## SLIS:5535 Book Conservation

Practical methods, materials assessment, conservation history and evolution. Prerequisites: UICB:4270. Same as UICB:5220.

## SLIS:5600 Reading Culture: History and Research in Print and Digital Media

What reading means, and what it means to read, have changed with time and place; cultural study of books and reading to evaluate strategies and resources involved in crafting historical interpretations of books and their readers; consideration of ways that reading has always been interdependent with other media, from needlework to social media; how researchers locate and interpret primary source material to study reading culture, and how cultural heritage organizations promote their holdings to researchers. Same as UICB:5600.

SLIS:5630 Introduction to Special Collections and Archives 3 s.h. Introduction to history of collecting in special collections and key areas of praxis (e.g., appraisal, arrangement and description, preservation, reference and access, outreach).

## SLIS:5700 Cultural Heritage

Increased use of digital technologies in collection, organization, dissemination, and use of heritage resources that generate intellectual, social, technological, legal, and ethical challenges to-and opportunities for-the heritage practice; exploration of challenges and opportunities, as well as their impact on the heritage profession; students become familiar with key heritage-related concepts and topics, apply them to a concrete project, and write a report of their findings.

## SLIS:6020 Literacy and Learning

3 s.h.
Learning and literacy theory relevant to work in information services; how librarians can help people process information and use it to form understanding and create new knowledge. Prerequisites: SLIS:5010.

## SLIS:6040 Media Production Workshop

Hands-on workshop to familiarize students with media production software and methods common to work in libraries and information centers; students may produce media including websites, apps, podcasts, videos, infographics, and tweets; studio course with emphasis on peer assistance and feedback.

## SLIS:6115 Information and Inquiry 3 s.h.

Inquiry is a knowledge-building activity-we inquire when we ask questions, search for information in databases, or conduct research -and in all these cases we need and use information; exploration of how librarians can help patrons acquire high-quality information by engaging with online academic databases, reference resources, and relevant research; practice-based assignments provide opportunities for students to search in academic databases, interview reference librarians, and conduct research.

## SLIS:6130 Community Engagement

Community engagement is the process of asking, listening to, and empowering individuals, organizations, and partners to build relationships and move toward common goals that benefit and improve a community; exploration of applications for community engagement; opportunity for students to explore community engagement principles through practical experiences; for students interested in library programming and outreach, or work in a library or archives. Requirements: admission to library and information science program.

SLIS:6140 Digital Environments and Library Users 3 s.h
Methods and models for building digital libraries; organization with metadata; standards such as those for object identifiers, open access, building cross-linkages between collections; automatic harvesting of content. Same as IGPI:6140.

## SLIS:6145 Digital Preservation and Stewardship

 3 s.h.Libraries, archives, and collecting institutions of all kinds now care for digital materials alongside analog collections; introduction to practices related to preservation and continued stewardship of born-digital and digitized materials; assessment and application of standards for creation and maintenance of digital collections across a variety of library and information science contexts; for students who will manage digital collections in their practice, including those interested in digital humanities.
SLIS:6150 Information Behavior
People seek, gather, and use information in various contexts; exploration of patterns of information behavior to develop a better understanding of personal and sociocultural aspects of human information needs and practices in contexts; practice-based assignments that provide opportunities for students to research an information activity or phenomenon, a type of information, or a particular user group; how librarianship is about understanding and serving information needs of various communities.
SLIS:6155 Information Visualization
Introduction to theories, techniques, and examples of information visualizations for different presentations of data. Prerequisites: SLIS:5020. Same as IGPI:6155.
SLIS:6170 Management, Teams, and Leadership 3 s.h.
Managers, teams, and leaders are critical for effective operations of libraries and information centers; exploration of principles and practices of organizational management, human resources, financial management, budgeting, communications, policy making, and strategic planning; strategies for cultivating and supporting inclusive, culturally competent organizations and structured approaches for planning and evaluating library programs and services; practical assignments that prepare students to work in libraries and archives. Requirements: admission to library and information science program.

## SLIS:6250 Cataloging and Classification

Introduction to various systems used to describe materials and information in library catalogs; principles of organizing catalog information for effective retrieval; standards used across libraries, archives, and museums including Anglo-American Cataloguing Rules (AACR2), Resource Description and Access (RDA), Dewey Decimal System, and Library of Congress Classification; knowledge and skills needed to begin work as professional catalogers in a diverse range of libraries.

## SLIS:6255 Rare Books Cataloging

3 s.h.
Application of cataloging standards to rare books and other special collections materials; hands-on cataloging of rare books and visits to local collections; critical skills and confidence necessary to begin cataloging rare, special, and unusual books using accepted standards from the field; for students interested in archives and special collections librarianship.

## SLIS:6330 Collection Development

Collecting is a core library activity that includes various types of media collected from traditional print to digital media; focus on curating an inclusive collection that is accessible to all library patrons; examination of the life cycle of a resource within the library from understanding intellectual freedom policies to identification of resource needs, selection and acquisition, promotion and use, to deselection; collection development across library settings and how collection development relates to instruction in libraries. Prerequisites: SLIS:5010 and SLIS:5030.

SLIS:6335 Metadata Theories and Applications
3 s.h. SLIS:6521 Distance and Online Education: Practicum in Library and Information Centers 3 s.h.
Supervised field experience in selected libraries and information centers; emphasis on application of theory to practice; at least 120 hours of fieldwork. Prerequisites: SLIS:5010 and SLIS:5020 and SLIS:5030 and SLIS:6170 and SLIS:6115. Requirements: minimum of 15 s.h. of SLIS coursework.
SLIS:6530 School Library Media Practicum 3 s.h.
Field experience in an elementary and a secondary school library program for a total of 40 hours; discussion of various program components including delivery of library's instructional program, collaborative efforts, integration of information literacy skills and technology to support learning, and administrative and operational tasks involved in managing a school library program; students facilitate a lesson at both sites and complete a project that supports library instruction. Prerequisites: SLIS:5044.

## SLIS:6570 Independent Study

1-3 s.h.
Formal contract between student and faculty member. Requirements: formal proposal.
SLIS:6571 Distance and Online Education: Independent
Study Formal contract between student and faculty member; opportunity to pursue in-depth research in a particular area of interest that does not duplicate an existing course in the curriculum; students meet with faculty member to design a plan of study and submit a bibliography and description of the final project. Requirements: formal proposal.
SLIS:6580 Thesis
SLIS:6900 Introduction to Legal Research for Library and
Information Science Students s.h.
3 s.h.

Introducing students without legal training to the concepts and tools necessary to provide basic legal research assistance in an academic, public, or special library; structure of the U.S. legal system, reading and understanding legal citations, and free and subscription legal research resources; ethics of providing legal research assistance to non-lawyers. Corequisites: SLIS:5010.

## Library and Information Science, MA

Students who pursue the Master of Arts in library and information science gain an understanding of the foundations of the library and information professions, including the history of the fields, ethical and philosophical concerns, and principles of stewardship for a variety of forms of documentation and records. Students are taught the theory and practice of strategic management within information organizations, preparing them for careers and leadership in a broad variety of information organizations. They gain the knowledge needed to anticipate future trends in information access and organization. Students study the close relationship between research and practice. Finally, students become knowledgeable about the factors that underlie users' information needs and appropriate strategies to assist them.
The MA in library and information science has held continuous accreditation from the American Library Association since 1971. The degree prepares students to work in public libraries, K-12 school libraries, academic libraries, archives, and special collections.

The School of Library and Information Science combines online education with on-campus instruction and collaboration allowing online students to participate in real time learning experiences with their campus classmates. Both full- and part-time enrollment options are available for on-campus or virtual coursework. For more information about the online program option, see Online MA in LIS on the School of Library and Information Science website.

## Learning Outcomes

## Gateway Knowledge

Students will understand the historical, social, cultural, and civic contexts of various library and information service roles in the United States, and students will internalize key values of the profession such as intellectual freedom, information equality, and community well-being. Students will also learn best practices in professional communication and development.

## Information Resources

Students will understand the lifecycle of recorded knowledge and information from creation to use and the best practices for developing collections-including acquisition, selection, purchasing, processing, storage, and deselection-with special attention to emerging formats and genres of information resources.

## Lifelong Learning and Continuing Education

Students will understand that lifelong learning and continuing education are organizational goals for libraries and information centers to provide as well as professional goals for library and information workers to seek out. Students will understand best practices for professional development and also best practices for teaching and learning in libraries and information centers.

## Management and Administration

Students will understand best practices for project and team management, strategic planning and communication, organizational workflows and assessment, library advocacy and development, and community partnerships and engagement.

## Organization of Recorded Knowledge and Information

Students will understand how to evaluate, represent, and organize information and knowledge across cultures and communities as well
as how to devise, maintain, and use systems of organization in both physical and digital environments toward efficient discovery and retrieval by diverse users.

## Reference and User Services

Students will understand the techniques for discovering, retrieving, evaluating, and synthesizing information from diverse sources, and students will understand methods for learning and describing the information needs of various users and communities and how libraries and information centers can work with these communities toward meeting their needs.

## Research and Evidence-Based Practice

Students will understand the methods of intervention-oriented research and assessment methods in libraries and information centers, and students will recognize, evaluate, and apply the different types of evidence that information professionals use to measure the success of services, practices, and facilities.

## Information Equity

Students will understand that a central value of libraries and information centers is to mitigate information inequality, and students will endeavor to improve library and information practices through informed, respectful, and inclusive interventions that recognize and centralize social difference across race, gender, sexuality, (dis)ability, socioeconomic status, nationality, religion, age, education, literacy, and other vectors.

## Technological Knowledge and Skills

Students will understand and identify the technological infrastructure that enables library and information services, and students will be able to evaluate existing and emerging technologies toward inclusive and effective practice.

## Requirements

The Master of Arts in library and information science requires 36 s.h. of graduate credit. Students must maintain a minimum grade-point average of 3.00 and earn a grade of B-minus or higher in each of their required courses and a grade of C or higher in their elective courses. Courses may be repeated one time if a student receives a grade below the stated threshold. If the second completion does not result in a minimum qualifying grade, the student will be ineligible to complete the MA in library and information science at the University of Iowa.

See the School of Library and Information Science Handbook on the School of Library and Information Science website for further details.
Students may apply a maximum of 12 s.h. of graduate transfer credit from non-University of Iowa institutions, in library and information science or related areas toward the degree, subject to applicable rules and approval by the admissions committee. Approval is based on the course's content, currency, and applicability to a student's program.

The program may be completed on campus or in a mostly synchronous distance mode, and is designed to be completed in two years with enrollment of 9 s.h. during each of the fall and spring semesters. The School of Library and Information Science strongly recommends that students not register for more than 12 s.h. during fall and spring semesters and 8 s.h. during summer sessions. The program also may be completed through part-time study.

The curriculum includes two levels of coursework. Core courses consist of five required courses that provide a solid grounding for all successive coursework. Students select elective coursework consisting of seven courses for 21 s.h. or a combined electives course total of 21 s.h. based on their areas of interest. This two-level arrangement
allows students to concentrate in an area that most closely matches their professional goals.
A thesis option is available for students who seek additional research experience; students must be enrolled in the on-campus option to do a thesis.
The MA with a major in library and information science requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Core Courses | 15 |
| Electives | 21 |

## Core Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| SLIS:5010 | Libraries, Culture, and Society (taken in student's first semester) | 3 |
| SLIS:5030 | Information Organization | 3 |
| SLIS:6115 | Information and Inquiry | 3 |
| SLIS:6170 | Management, Teams, and Leadership | 3 |
| One of these: |  |  |
| SLIS:5020 | Foundations of Computing | 3 |
| SLIS:6040 | Media Production Workshop | 3 |
| SLIS:6140 | Digital Environments and Library Users | 3 |
| SLIS:6335 | Metadata Theories and Applications | 3 |

## Electives

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| With their advisor's guidance, students select seven courses for 21 s.h. or a combined course total of 21 s.h. from these: |  |  |
| SLIS:4150 | Introduction to Book Studies | 3 |
| SLIS:4910 | The Book in the Middle Ages | 3 |
| SLIS:4920 | The Book in Early Modern Europe | 3 |
| SLIS:5041 | College and University <br> Libraries | 3 |
| SLIS:5042 | Public Libraries | 3 |
| SLIS:5044 | School Library Media Administration | 3 |
| SLIS:5200 | Innovation and Technology Methodology | 3 |
| SLIS:5220 | Resources for Children | 3 |
| SLIS:5230 | Resources for Young Adults | 3 |
| SLIS:5520 | Studies in Book History and Technologies | 0-3 |
| SLIS:5530 | Preservation Management | 3 |
| SLIS:5535 | Book Conservation | 3 |
| SLIS:5600 | Reading Culture: History and Research in Print and Digital Media | 3 |
| SLIS:5630 | Introduction to Special Collections and Archives | 3 |
| SLIS:6020 | Literacy and Learning | 3 |
| SLIS:6130 | Community Engagement | 3 |

| SLIS:6140 | Digital Environments and Library Users | 3 |
| :---: | :---: | :---: |
| SLIS:6145 | Digital Preservation and Stewardship | 3 |
| SLIS:6150 | Information Behavior | 3 |
| SLIS:6250 | Cataloging and Classification | 3 |
| SLIS:6255 | Rare Books Cataloging | 3 |
| SLIS:6330 | Collection Development | 3 |
| SLIS:6335 | Metadata Theories and Applications | 3 |
| SLIS:6345 | Stewardship of Information and Collections | 3 |
| SLIS:6350 | Archives: Theory and Practice | 3 |
| SLIS:6355 | Advanced Topics in Special Collections | 3 |
| SLIS:6370 | Topics in Book Studies | 3 |
| SLIS:6411 | Humanities Librarianship: Inquiry, Learning, and Knowledge | 3 |
| SLIS:6490 | Information Policy and Ethics | 3 |
| SLIS:6520 | Practicum in Libraries and Information Centers | 3 |
| SLIS:6530 | School Library Media Practicum | 3 |
| SLIS:6570 | Independent Study | 1-3 |
| SLIS:6580 | Thesis | 0-6 |

## Specializations

To earn the degree, students do not need to select an area of specialization. However, programs often are designed around particular career goals, and the school offers courses in the following specialized focus areas that students may choose to take to prepare them for working in a specific area of library and information science.

## Public Libraries

Public libraries provide informational, educational, and recreational materials and a wide range of services for a diverse clientele. Although public libraries receive the bulk of their funding from local taxes, they also may be organized on a regional or statewide cooperative basis. The variety of uses, services, materials, and organizational structures of public libraries makes this a challenging area of librarianship. Public librarians need to develop skills in analyzing the communities they serve, designing comprehensive marketing plans to meet their needs, implementing the plans in a costeffective way, and evaluating the success of their efforts.

## Academic Libraries

The academic library, whether in a community college, a four-year college, or a university, provides information services in support of the parent institution's teaching, research, and public service missions. These services include instruction in the use of the library and its resources. Management skills and subject or language competence often are required. Since librarians in this setting usually are considered academic faculty members, a second master's or other advanced degree is recommended.

## School Librarian

School librarians provide instruction to students in accessing, evaluating, and using information; collaborate with teachers on the use of resources in instruction; provide leadership in the use of instructional and information technologies for technology-enabled student learning; offer reading guidance; provide reference service;
and manage the library media center. In the state of Iowa, school librarians are referred to as teacher librarians.

The University of Iowa offers a state-approved program leading to endorsement as Teacher Librarian $\mathrm{K}-12$. In order to fulfill state requirements for this endorsement, students must hold or be eligible for a teaching license and must complete a designated sequence of courses that leads both to certification and to the MA degree.
Licensed teachers employed in Iowa schools may enroll in a distance education program that leads to an MA in library and information science and endorsement for school librarianship. Contact the School of Library and Information Science for details.

Students who are interested in school libraries but lack a valid Iowa teaching license may earn licensure as a teacher librarian by completing 30 s.h. in the College of Education. The Master of Arts in library and information science with teacher licensure requires 66 s.h. of credit. Students must apply and be admitted to both programs.

## Combined Programs

## Undergraduate Degree/MA

Students working on an undergraduate degree at the University of Iowa who are interested in earning an MA in library and information science may apply to a combined undergraduate degree and MA degree program. The Undergraduate to Graduate (U2G) program enables students to begin work on the MA degree as they complete their baccalaureate degree and complete both degrees in five years. Students admitted to the program may count $12 \mathrm{~s} . \mathrm{h}$. toward both their undergraduate degree and the MA degree.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program.

For more information, visit Undergraduate to Graduate (U2G) on the Graduate College website.

## MA/JD

The School of Library and Information Science and the College of Law offer a combined Master of Arts/Juris Doctor program. Students in the combined program may apply a limited amount of credit toward both degrees, thereby completing the combined program with fewer semester hours than if each degree was completed separately. Students enroll in law courses their first year and begin taking School of Library and Information Science courses in their second year.
Separate application to each degree program is required. For more information about the JD, see Juris Doctor, JD [p. 1720] (College of Law) in the catalog. Elective courses also are available through the College of Law for students who wish to specialize in law librarianship but who do not want to pursue the JD.

## MA/MFA in Book Arts

The School of Library and Information Science and the Center for the Book offer a combined Master of Arts/Master of Fine Arts in book arts. The combined program allows students with strong interest in the physical book to acquire training in the book arts, book history, and material book studies. The earned expertise in the production and legacy of the book as a physical artifact combined with expertise in library and information science can be an asset for those focused on careers in special collections libraries and archives.

Students in the combined program earn both degrees by completing fewer semester hours than if each degree was completed separately. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to
the combined degree program. For more information, see the MFA in book arts [p. 1627] in the catalog.
Students interested in a librarianship career with a more general interest in the physical book should consider the book studies, book arts and technologies/library and information science certificate program; see "Certificate Opportunities" under Requirements [p. 1666] in this section of the catalog.

## MA/Certificate in Book Studies/Book Arts and Technologies

The Center for the Book and the School of Library and Information Science (SLIS) collaborate to offer the book studies/book arts and technologies/library and information science program. The combined program enables students to earn an MA in library and information science and a Certificate in Book Studies/Book Arts and Technologies. It requires admission to the School of Library and Information Science MA program and the Center for the Book certificate program.

The MA/Certificate in Book Studies/Book Arts and Technologies offers multiple pathways into professional engagement with artifacts available in archives and libraries, such as rare and artist books. Students select courses that enable them to gain skills and knowledge in areas of service such as conservation, cataloging, instruction, and outreach. The combined program requires $51 \mathrm{~s} . \mathrm{h}$. of coursework. Students take 27 s.h. of SLIS courses; 15 s.h. of book arts, studies, and technologies courses; and the remaining 9 s.h. may be taken in either SLIS or Center for the Book coursework, or from another unit with approval from the SLIS advisor.
Admission deadline is Feb. 1 for fall entry. For more information, see the Certificate in Book Studies/Book Arts and Technologies [p. 1629] in the catalog.

## Admission

Applicants begin the admission process by submitting an online graduate application through the Office of Admissions. Applicants then receive a HawkID and can upload the remaining application documents through MyUI. Transcripts of all academic work, a written statement of purpose and goals, a résumé or curricula vitae, and three letters of recommendation are required. Applicants to the teacher librarian program are asked to include a copy of their current teaching certificate. The admission committee considers each applicant's letters of recommendation, statement of purpose, résumé or curricula vitae, and other appropriate criteria, as well as an applicant's grade-point average. Applicants for admission to the MA program should have a grade-point average of at least 3.00 on a 4.00 scale. Graduate Record Examination (GRE) General Test scores are not required. Admission is competitive.

Applicants whose first language is not English must score at least 81 (internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants with TOEFL scores below 100 on the internetbased test are required by the university to take an English Proficiency Test if admitted to the program. In place of TOEFL, the school also accepts International English Testing System (IELTS) scores of 7.0 or higher, with no subscore below 6.0. Applicants who submit IELTS scores are required to take an on-campus English proficiency evaluation.

Completed applications should be received by Feb. 1 for priority consideration for fall admission. Decisions of the admissions committee are announced approximately six weeks after the application deadline. Late applications are considered if places are still available. Financial aid often is not available for late applicants. Admitted students are assigned a faculty advisor for program planning during their first semester.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

The School of Library and Information Science typically offers limited partial-tuition scholarships and graduate assistantships. To be considered for scholarships or assistantships, applicants must meet the MA program's grade-point average requirement for admission; see Admission [p. 1668] in this section of the catalog. At the discretion of the admissions committee, limited graduate assistantships may be offered to incoming students based on academic merit and prior experience. In addition, available assistantships in School of Library and Information Science and in other programs and departments throughout the university are advertised as they become available; students should apply for specific assistantships.

To learn more about available opportunities, view the School of Library and Information Science website for information on departmental scholarships. Part-time employment usually is available in the University of Iowa Libraries or other campus units.

Applications for student loans, work-study eligibility, or other financial assistance should be submitted directly to the university's Office of Student Financial Aid.

## Career Advancement

School of Library and Information Science graduates have many options for employment. Alumni hold positions in public, school, special, and academic libraries as well as other information settings. They serve in varied roles, such as information consultant, database manager, library administrator, webmaster, network coordinator, cataloger, children's librarian, school library media specialist, and archivist.

The school shares announcements of national and international job opportunities through an electronic mailing list. In addition, the Library and Information Science Student Organization (LISSO) sponsors talks by speakers versed in areas of librarianship as well as workshops on résumé writing, social media networking, and interviewing. Internships and other opportunities provide students with hands-on experience that may enhance their job prospects.

For recent information on library and information science placement, see the Library Research Service (LRS) website and the annual Placement and Salaries 2022 report on the Library Journal website.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Library and Information Science, MA

Title
Hours

## Academic Career

## Any Semester

36 s.h. of graduate level coursework must be completed; up to 12 s.h. of graduate transfer credits allowed upon approval. More information is included in the General Catalog and on department website. ${ }^{\text {a }}$
Graduate College program GPA of at least 3.00 is required.

Students must earn a grade of B- or higher in each of the five required core courses and a C or higher in their elective courses.
Students may design their program around particular career goals such as Public Librarianship, Information Processes, Medical Librarianship, Youth Services, Archives and Media, and Academic Librarianship by working with their advisor to determine coursework and sequence.
Students may pursue select degrees, certificates or a certification simultaneously in less time than would be required to complete the programs of study independently. c

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
c Students can complete a combined degree with the SLIS MA and either a Juris Doctor or the Book Arts MFA, or may consider the SLIS MA with the Book Studies/Book Arts and Technologies certificate, Informatics certificate, or Public Digital Humanities certificate. The SLIS MA may also be combined with the School Library Media certification.
d SLIS core course.
e Course should be taken during the first semester of the program.
f Students must take one course from SLIS:5020, SLIS:6040, SLIS:6140, SLIS:6335.
g Students must complete seven courses ( 21 s.h.) of SLIS elective graduate coursework in an area of professional specialization. Work with an academic advisor to determine coursework and sequence.

Additional information can be found in the General Catalog and on department website.
h Course should be taken during the second semester of the program.
i Course can be taken in either year one or two based on individual schedule.

## Special Collections Librarianship, Graduate Certificate

## Requirements

The graduate Certificate in Special Collections Librarianship requires 15 s.h. of coursework.

The certificate develops students' skills in a variety of areas suitable to work in special collections, archives, and cultural heritage settings. Students take an introductory course and select four additional courses, one from each of the areas of study: material culture research and analysis; care and use of collections; arrangement, description, and cataloging; and digital curation and stewardship. Students may choose to complete an approved practicum in special collections.

The Certificate in Special Collections Librarianship requires the following coursework.

## Required Course

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| SLIS:5630 | Introduction to Special <br> Collections and Archives | 3 |

## Areas of Study

Students take four courses for a total of $12 \mathrm{~s} . \mathrm{h}$., one from each of the areas listed below.

## Material Culture Research and Analysis

Courses in this area offer students knowledge of primary source literacies and research skills that can be applied to the care, use, and interpretation of unique and distinct collections and supporting the researchers who work with them.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: | The Book in Early Modern <br> Europe | 3 |
| SLIS:4920 | Reading Culture: History and <br> Research in Print and Digital <br> Media | 3 |
| SLIS:6411 | Humanities Librarianship: <br> Inquiry, Learning, and <br> Knowledge | 3 |

## Care and Use of Collections

Courses in this area explore the role of the special collections practitioner in the balance between providing access and promoting use of collections and the preservation practices that ensure the longterm safety and stewardship of unique and distinct collections.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: | Preservation Management | 3 |
| SLIS:5530 | Digital Preservation and <br> Stewardship | 3 |
| SLIS:6145 | Metadata Theories and <br> Applications | 3 |

## Arrangement, Description, and Cataloging

Courses in this area explore contemporary descriptive practices for special collections and archives with a focus on user discovery.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: | Rare Books Cataloging <br> (summer session only) | 3 |
| SLIS:6255 | Archives: Theory and Practice | 3 |

## Digital Curation and Stewardship

Courses in this area investigate the selection, acquisition, development, preservation, and delivery of digitized and born-digital collections.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  |  |
| SLIS:5530 | Preservation Management | 3 |
| SLIS:6140 | Digital Environments and | 3 |

## Practicum

Students can choose to satisfy 3 s.h. for the certificate with an approved practicum in special collections. Placements must be approved as a special collections placement.

For more information, see the School of Library and Information Science website.

## Molecular Medicine

## Director

- Matthew J. Potthoff (Neuroscience and Pharmacology)

Faculty: https://medicine.uiowa.edu/mcb/faculty
Website: https://medicine.uiowa.edu/mcb/
The Molecular Medicine Program provides interdisciplinary training in the concepts and methodologies fundamental to the investigation of biological processes and molecular mechanisms that relate to human disease.

The program provides the curriculum for the molecular medicine subprogram for the Doctor of Philosophy in biomedical science. It is a sequence of required and elective coursework, which provides students with broad exposure to areas, including molecular biology, cell biology, biochemistry, and integrative sciences. The curriculum ensures comprehensive exposure to conceptual and experimental aspects of molecular and cellular biology and of translational studies. Sufficient flexibility is provided so that students can adapt the program to allow specialization in their own area of interest. See the PhD in biomedical science [p. 1606] (molecular medicine subprogram) in the Graduate College section of the catalog.

Faculty members are involved in a variety of research projects involving molecular and cellular biology and molecular medicine.

## Programs

## Graduate Programs of Study

## Majors

- Doctor of Philosophy in Molecular and Cellular Biology
- Doctor of Philosophy in Molecular Biology

Students interested in doctoral studies in molecular medicine should apply under the umbrella program in Biomedical Science [p. 1603] (select molecular medicine subprogram). Direct application to the PhD in molecular and cellular biology and the PhD in molecular biology is not currently being considered.

## Facilities

Training is conducted primarily in laboratories and teaching facilities of the Carver College of Medicine Stead Family Department of Pediatrics and the departments of Anatomy and Cell Biology, Biochemistry and Molecular Biology, Internal Medicine, Microbiology and Immunology, Molecular Physiology and Biophysics, Neurology, Neuroscience and Pharmacology, Obstetrics and Gynecology, Ophthalmology and Visual Sciences, Otolaryngology-Head and Neck Surgery, Pathology, Psychiatry, Radiation Oncology, and Surgery; and the College of Liberal Arts and Sciences departments of Biology and Chemistry. Faculty laboratories and central research facilities available to students provide access to the most up-to-date research equipment.

## Courses

## Molecular Medicine Courses

MMED:3310 Practical Data Science and Bioinformatics 3 s.h. Understanding how to access large biological data sets and use them to answer biological questions is an important skill for researchers; immersive introduction to computational handling of data; how to access and analyze publicly available data; critically evaluate data quality and analysis in context of measuring gene expression; basic coding in R/RStudio, plotting and data display, fitting and regression, statistical inference, statistical models, downloading and data wrangling; basic introduction to machine learning (clustering); for students with no computational background. Prerequisites: BIOL:1411 with a minimum grade of C - and BIOL:1412 with a minimum grade of C-. Requirements: college algebra. Recommendations: BMB:3110, or BMB:3120 and BMB:3130, or other upper-level life sciences courses. Same as BMB:3310, CBIO:3310.

MMED:5270 Pathogenesis of Major Human Diseases 3 s.h.
Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Offered spring semesters of even years. Same as IGPI:5270, PATH:5270.

MMED:6220 Mechanisms of Cellular Organization
3 s.h.
Current understanding of basic cell biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BMB:3130. Same as ACB:6220, MPB:6220.
MMED:6226 Cell Cycle Control
1 s.h.
Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Same as ACB:6226, MPB:6226.

MMED:6227 Cell Fate Decisions
1 s.h.
Cellular fate decisions including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Same as ACB:6227, MPB:6227.

MMED:6230 Pathogenesis of Metabolic and Cardiovascular Disorders

## 3 s.h.

Students focus on metabolic and cardiovascular diseases-the leading cause of morbidity and mortality in the United States; introduction to major subclasses of metabolic and cardiovascular diseases, definition of pathogenesis and clinical features of diseases, and exploration of methodologies used to study diseases; course format includes lecture, critical examination of literature, and demonstration of experimental models.

MMED:6250 Mechanisms of Parasitism Journal Club 1 s.h. Reviews of recent publications in molecular parasitology research and thesis research by training grant or journal club students; for students pursuing graduate thesis research in microbiology or a related discipline. Same as MICR:6250.

## MMED:6260 Methods for Molecular and Translational

 Medicine 1 s.h.Basic and advanced scientific techniques used to integrate biological questions in molecular and translational medicine; particularly useful for comprehensive exam preparation.
MMED:6280 Critical Thinking in Molecular Medicine 1 s.h. Opportunity to work closely with participating faculty to gain skill in critical reading of research literature and facility in presenting material to an audience. Requirements: advanced graduate standing.

MMED:7290 Seminars in Molecular Medicine 1 s.h.
Research findings in molecular biology. Requirements: molecular and cellular biology graduate standing.
MMED:7305 Molecular Medicine Research arr.
Requirements: molecular and cellular biology graduate standing.
MMED:7310 Translational Medicine Education Rounds
1 s.h.
Students obtain clinical insights into their area of specialty in biomedical research through selection of a clinical mentor to complement the expertise of their research mentor; clinical mentors provide students with case studies, clinical scenarios, and physician shadowing opportunities which may allow students to gain new perspectives and insight into applications of biomedical research.
Requirements: enrollment in Molecular Medicine Program,
completion of rotations, and selection of a research mentor.
MMED:8115 Molecular Physiology 4 s.h. Principles of human physiology, organ systems, cell function. Offered
fall semesters.

## Neuroscience

## Chair

- Daniel T. Tranel (Neurology/Psychological and Brain Sciences)

## Graduate degree: PhD in neuroscience

Faculty: https://neuroscience.grad.uiowa.edu/people/faculty
Website: https://neuroscience.grad.uiowa.edu
The Neuroscience Program provides an interdisciplinary and interdepartmental approach to graduate education and research training in the structure, function, and development of the nervous system and its role in cognition and behavior. Students obtain training at all levels of the nervous system, from cellular/molecular to the behavioral/cognitive.

## Programs

## Graduate Program of Study

## Major

- Doctor of Philosophy in Neuroscience [p. 1675]

## Facilities

Training is conducted primarily in the laboratories and teaching facilities of the Carver College of Medicine graduate departments of Anatomy and Cell Biology, Biochemistry and Molecular Biology, Internal Medicine, Molecular Physiology and Biophysics, Neurology, Neuroscience and Pharmacology, and Psychiatry; the College of Liberal Arts and Sciences departments of Biology, Communication Sciences and Disorders, Health and Human Physiology, and Psychological and Brain Sciences; and the Neuroscience Program.

Students use faculty laboratories and central research facilities for ultrastructural analysis; histochemistry and immunocytochemistry; electrophysiology; fluorescence-activated cell sorting; cellular and subcellular biochemistry; cell, tissue, and organ culture; operant and classical conditioning; molecular biology; behavioral genetics; neural substrates of complex behavior; brain-behavior relationships in humans; neuropsychology; and functional neuroimaging (PET, fMRI).

## Courses

## Neuroscience Courses

## NSCI:5212 Foundations in Behavioral and Cognitive

## Neuroscience

 4 s.h.Concepts, methods, and findings in behavioral and cognitive neurosciences. Prerequisites: BIOL:3253. Same as PSY:5212.

## NSCI:5365 Seminar: Neuropsychology and Neuroscience

 arr. Clinical neuropsychology and cognitive neuroscience: cuttingedge research from scientific journals, case presentations in clinical neuropsychology, and current research. Same as NEUR:5365, PSY:5365.
## NSCI:5653 Fundamental Neurobiology I

Neurobiology from molecular/cellular to systems levels, including cell biology of the neuron; membrane electrophysiology; synaptic transmission and plasticity, functional neuroanatomy, sensory, motor and autonomic systems; emotion, memory, sleep, language, attention and cognition, neuronal development; focus on systems and developmental neurobiology; first in a two-semester sequence. Same as BIOL:5653, PSY:5203.

NSCI:5654 Fundamental Neurobiology II
3 s.h.
Neurobiology from molecular/cellular to systems levels, including cell biology of the neuron; membrane electrophysiology; synaptic transmission and plasticity; functional neuroanatomy, sensory, motor and autonomic systems; emotion, memory, sleep, language, attention and cognition, neuronal development; focus on molecular/ cellular neurobiology and neurophysiology; second in a two-semester sequence. Prerequisites: BIOL:5653 or NSCI:5653 or PSY:5203. Same as BIOL:5654, PSY:5205.
NSCI:5658 Fundamental Neurobiology I Discussion 2 s.h.
Discussion of selected papers, including classics from neurobiology literature; coordinated with BIOL:5653 lecture material. Same as BIOL:5658, PSY:5204.

NSCI:5659 Fundamental Neurobiology II Discussion 2 s.h.
Discussion of selected papers, including classics from neurobiology literature; coordinated with BIOL:5654 lecture material. Same as BIOL:5659, PSY:5206.

## NSCI:6050 Advanced Quantitative Training for Neuroscience

Review of statistical inference, type-I errors, statistical power, measurement reliability issues in context of between-/within-subjects t-tests, ANOVAs, correlations, and regressions with attention to causality and generalizability; multiple linear regression, model building, model testing, confounding/mediation, interactions; mixed models with nested/crossed, fixed/random factors, and repeated measure designs. Offered spring semesters. Prerequisites: PSY:5050.
NSCI:6265 Neuroscience Seminar
0-1 s.h.
Research presentations. Same as ACB:6265, BIOL:6265, MPB:6265, PSY:6265.

NSCI:7235 Neurobiology of Disease
Broad, thematic understanding of disease mechanisms in neurobiological disorders. Prerequisites: ACB:6252. Same as NEUR:7235.

NSCI:7301 Directed Study in Neuroscience
arr.
NSCI:7305 Neuroscience Research
arr.
Requirements: neuroscience graduate standing.

## Neuroscience, PhD

For information about predoctoral training opportunities in neuroscience, contact the Neuroscience Program.

## Learning Outcomes

Graduates will:

- achieve a broad and deep knowledge base in neuroscience spanning the subdisciplines from cell/molecular to systems/ cognitive neuroscience;
- achieve a high proficiency in research theory, design, and practice, including the ability to apply appropriate quantitative methods and statistical approaches, design and carry out the research with rigor and reproducibility, and incorporate responsible conduct in all phases of the research;
- develop strong oral and written communication skills so that they can be conversant with neuroscientists in any area of the field and can bring a broad interdisciplinary perspective to their own research;
- develop teaching effectiveness in formal and informal settings and establish credentials in teaching excellence; and
- provide impactful service to the program, institution, and scientific community, and understand the value of providing engaging outreach to society to prepare them for effective entry into the workforce and society.

## Requirements

The Doctor of Philosophy program in neuroscience requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative grade-point average of 3.00 . The program's curriculum is designed around three tracks: molecular/cellular, developmental/ systems, and cognitive/behavioral. Following broad-based instruction in a core curriculum, students specialize in one of the tracks.
Within a framework of core, track-specific, and elective courses, students pursue a program of study individually designed according to their undergraduate training and graduate research goals. After enrolling in the Neuroscience Program, entering students consult with the advisory committee regarding their level of preparation for the program's required courses.

The Student Advisory Committee meets with all first- and secondyear graduate students once each semester, helping students explore their research interests and select faculty mentors for the required laboratory rotations. Each student is expected to complete three rotations in faculty laboratories before selecting a thesis advisor. Rotations ordinarily last 12 weeks but may last from 8 to 16 weeks. Under special circumstances, two rotations may be in the same laboratory, an arrangement that permits a student to learn a variety of techniques and approaches before settling down to work on the dissertation project. Students usually choose a dissertation lab at the end of their first year.

## Background Requirements

Successful students will have demonstrated preparedness for graduate training in neuroscience by completing a bachelor's degree and substantive prior research experience in one or more of the following areas: biochemistry, general physiology, cell biology, and statistics. Didactic coursework in quantitative methods, statistics, and/or computer programming also is beneficial.

## Neuroscience Core

The following courses form the core of the neuroscience graduate curriculum.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| NSCI:5653 | Fundamental Neurobiology I | 3 |
| NSCI:7235 | Neurobiology of Disease | 3 |
| ACB:6252 | Functional Neuroanatomy | arr. |
| BMED:7270 | Scholarly Integrity/Responsible <br> Conduct of Research I | 0 |
| BMED:7271 | Scholarly Integrity/Responsible <br> Conduct of Research II | 0 |
| PSY:6370 | Principles of Neuropsychology | 3 |
| One statistics course <br> In addition, students register for the following two <br> courses each semester: | $3-4$ |  |
| NSCI:6265 | Neuroscience Seminar |  |
| NSCI:7305 | Neuroscience Research | $0-1$ |

## Electives

Elective requirements may be met by completing 8 s.h. from a list of courses offered by the departments of Anatomy and Cell Biology, Biology, Molecular Physiology and Biophysics, Neuroscience and Pharmacology, Psychological and Brain Sciences, and other departments as appropriate. With permission of the Student Advisory Committee, students may satisfy the elective requirement wholly or in part by registration in the following courses.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| NSCI:5212 | Foundations in Behavioral and Cognitive Neuroscience | 4 |
| NSCI:5365 | Seminar: Neuropsychology and Neuroscience | arr. |

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in neuroscience in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants apply to the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

## Financial Support

All students receive a financial stipend of $\$ 33,000$ plus tuition for the 2023-24 academic year. Financial support comes from training grants, research assistantships, teaching assistantships, scholarships, individual research grants, or other departmental or college funds. All students are required to teach as part of their development as future scientists and faculty members.

The Neuroscience Program is committed to supporting its graduate students for their entire training period. Students normally are supported in the first year by the program. After that, support is expected to come from a student's primary research mentor. Occasionally, advanced students are supported through teaching assistantships.
See Financial Support on the Interdisciplinary Graduate Program in Neuroscience website and Cost and Funding on the Graduate Admissions website for more information.

## National Institutes of Health Training Grant

The Neuroscience Program is supported by a training grant from the National Institutes of Health (NIH). The grant provides stipend and tuition support for a select group of first- and second-year graduate students.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

| a This Interdisciplinary graduate program is designed within a framework of core, track-specific, and elective courses. Students pursue a program of study individually designed according to their undergraduate training and graduate research goals. The curriculum is designed around three tracks: molecular/cellular, developmental/systems, and cognitive/behavioral; following broadbased instruction in a core curriculum, students specialize in one of the tracks. |  |  |
| b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information. |  |  |
| c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA. |  |  |
| d Each student is expected to complete three rotations in faculty laboratories before selecting a dissertation advisor. Rotations ordinarily last 12 weeks but may last from 8 to 16 weeks. Under special circumstances, two rotations may be in the same laboratory, an arrangement that permits a student to learn a variety of techniques and approaches before settling down to work on the dissertation project. |  |  |
| Biology, Molecular Physiology and Biophysics, Neuroscience and Pharmacology, Psychological and Brain Sciences, and other departments with approval. |  |  |
| f Work with faculty advisor to select an appropriate course. g Dissertation defense. |  |  |

# Planning and Public Affairs 

## Director

- Lucie Laurian

Graduate degrees: MPAff; MS in urban and regional planning
Faculty: https://sppa.uiowa.edu/faculty-staff
Website: https://sppa.uiowa.edu/
Planning and public affairs encompasses the development and implementation of public policies that improve the quality of life in cities, regions, states, and nations as well as protects the environment and sustains the earth. Concentration areas for the MS in urban and regional planning include economic development, geographic information systems (GIS), land use and environmental planning, housing and community development, and transportation. Focus is on analytical urban planning, public policy, and sustainability. Concentration areas for the Master of Public Affairs include public and nonprofit management, and public policy.
The School of Planning and Public Affairs is a campus leader in community engagement and hosts the Iowa Initiative for Sustainable Communities (IISC) through which students from disciplines across campus provide key answers to important sustainability questions for communities in Iowa.

## Related Certificate

## Transportation Planning

The Transportation Planning Program offers the Certificate in Transportation Planning. The program focuses on the varied and complex problems of transportation and on interdisciplinary approaches to addressing them. The departments of Civil and Environmental Engineering, Industrial and Systems Engineering, Mechanical Engineering (College of Engineering), Economics (Tippie College of Business), and the School of Planning and Public Affairs (Graduate College) participate in the program.

The certificate is coordinated by the School of Planning and Public Affairs. See the Certificate in Transportation Planning [p. 1704] (Graduate College) in the catalog.

## Programs

## Graduate Programs of Study

## Majors

- Master of Public Affairs [p. 1685]
- Master of Science in Urban and Regional Planning [p. 1689]

## Courses

Planning and Public Affairs Courses

- Urban and Regional Planning Courses [p. 1678]
- Public Affairs Courses [p. 1682]

## Urban and Regional Planning Courses

URP:1001 How to Change the World
1-2 s.h.
Have you ever wondered what it would take to solve our biggest societal problems (e.g., pollution, hunger, homelessness, access to health care)? Often the answer is through public policy-the programs, rules, and laws meant to guide society; introduction to public policy through case studies and examples of people and institutions that have truly changed the world; activities designed to help students change the world around them.

## URP:1030 Climate Leadership and Justice

Preparation for engaged students to lead on climate change in their communities; understanding climate change causes and impacts, consideration of intergenerational justice and equity in climate adaptation and mitigation; application of best practices in climate policies and planning; supporting community and business resilience and capacity building. Same as PBAF:1030.
URP:2013 Introduction to Sustainability 3 s.h.
Introduction to sustainability knowledge, skills, and habits as a means to shape one's vision of a sustainable citizen; emphasis on basic skills of literacy, applied math, and finding information; traditional sustainability knowledge areas related to society, economy, and environment; intersecting themes (e.g., informed consumerism, ecoeconomics, and livable environments). GE: Sustainability. GE: Social Sciences. Same as BUS:2013, GEOG:2013, SUST:2013.
URP:2020 Environment and Society: Sustainability, Policy, and Politics

3 s.h.
How society balances its needs against those of the natural environment when addressing modern challenges like climate change, conservation, and energy crises; exploration of sustainability through the lens of U.S. environmental policy and politics; application of fundamental theories of public policy to answer questions-when do environmental problems become policy problems; what economic, social, and political forces shape environmental policy decisions; and what are the consequences of environmental policies for individuals and organizations? GE: Sustainability. GE: Social Sciences. Same as PBAF:2020.

URP:2056 The Splendor of Cities 3 s.h.
Exploration and journey through space and time of global citiesLondon in the 1600 s, Paris in the 1800s, and New Delhi in the 20th century-by use of videos and documentaries; how cities form and grow in response to social, political, cultural, and economic forces. Same as PBAF:2056.
URP:3001 Planning Livable Cities
Development of livable cities in the United States; economic, physical, environmental, and political forces that shape their growth; impact of planning, how it shapes the future of cities. Same as GEOG:3920.

## URP:3134 Regional and Urban Economics 3 s.h.

Theory of location and regional development; central place theory; why cities exist and trade with one another; models of land use patterns, rents; empirical tests of models; policy applications. Prerequisites: ECON:1100. Same as ECON:3640.
URP:3135 Environmental and Natural Resource Economics 3 s.h. Environmental and resource use problems; efficient mechanisms and other policies for environmental protection, management of common property resources. Prerequisites: ECON:1100 and ECON:1200. Same as ECON:3625.

URP:3217 Negotiation and Conflict Resolution 3 s.h.
Strategies of successful negotiation across a wide range of conflict situations; keys to success in peacefully resolving conflicts; personal, professional, legal, and political negotiations; apologizing; mediation as alternative to litigation; analysis of conflict characteristics to determine optimal negotiation strategies; development of negotiation interpersonal skills; practice negotiating under real world scenarios. Prerequisites: RHET:1030 or RHET:1040 or RHET:1060. Same as PBAF:3217, RHET:3009.

## URP:3350 Transportation Economics

Overview of transportation markets-intercity, rural, urban; transportation modes-rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Recommendations: ECON:1100 and ECON:1200. Same as ECON:3750, GEOG:3940.

## URP:4170 Megacities Seminar <br> 1-3 s.h.

Global historical, political, economic, urban, and cultural aspects of megacity development; planning methods to address contemporary and emerging issues; critical analysis of peer-reviewed literature and computational simulations; topics include urban sprawl, poverty and inequality, economies, food scarcity, population growth, governance models, environmental and health concerns, sustainability.
URP:4225 Applied GIS for Planning and Policy Making 3 s.h.
Analysis of Census of Population and Housing data using GIS software; data and analytical needs of urban planners; coverage of GIS topics to plan functions of GIS and spatial analysis, varied GIS software in a planning organization; structure of the census.

## URP:4243 The Land Development Process

How land is developed; analysis of site suitability, preparation of subdivision plan, site plan review, development approval process, infrastructure and site preparation, negotiating local development politics; field trips.

## URP:4245 Growth Management

3 s.h.
Causes and consequences of urban sprawl, shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges.
URP:4253 Designing Sustainable and Healthy Cities 1-3 s.h. Principles and practical elements of urban design for sustainable and healthy cities; general urban design background for policy makers and planners; impacts of urban design for environmental sustainability, community health, and well-being; physical, mental, social, and environmental health as affected by urban form, air and water quality, green spaces, and climate change impacts.

## URP:4256 Environmental Policy

3 s.h.
Environmental policy formation and politics; comparative international perspective on the United States' experience.

## URP:4260 Transportation Policy and Planning

3 s.h.
Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues.
URP:4262 Transportation Research Methods and Analysis 3 s.h. Methods for measuring current and future transportation demand based on changes in population, preferences, built environment, and changing policy objectives; survey design and analysis; basics of travel demand modeling. Same as CEE:4176.

## URP:4265 Planning Sustainable Transportation

Theories and methods of exerting public control over passenger and freight transportation; social and environmental regulation; effects of changing finance, regulation, and pricing policies including privatization, tolls, and impact fees.

URP:4266 Transportation, Urban Form, and Sustainability $\mathbf{3}$ s.h. Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, and travel behavior modeling; current policies that influence travel behavior and urban form.

URP:4271 Housing Policy
Recent housing policy initiatives at federal, state, and local levels.

## URP:4273 Community Development Through Creative

## Placemaking

Examination of practices, ideas, and techniques for community development in small to large communities; particular focus on creative placemaking, in which planners and the public strategically shape the physical and social character of a neighborhood, town, city, or region around arts and cultural activities; application of this approach to a specific community project; for students in the arts, humanities, social sciences, and planning and public affairs.

URP:4280 Planning for Disaster Mitigation and Recovery 2-3 s.h. Types of disasters that communities face; what role planners play, what role should they play; importance of hazard mitigation and planning for post-disaster recovery; where planners' unique skills play the most significant roles in aiding a community to redesign a safer future.

## URP:4295 Economic Development Policy <br> 3 s.h.

Analysis of policies and programs at national, regional, state, and local levels that address problems of economic growth, development, decline.

URP:4297 Financing Economic Development for Poverty Alleviation

3 s.h.
How public policies in general, and planning practices in particular, have an impact on an individual's likelihood of becoming poor, remaining poor, and getting out of poverty; how land use, housing, transportation, and economic development policies affect distribution and accessibility of jobs, education, housing, and public services.
URP:4750 Environmental Impact Analysis
3 s.h.
In-depth exposure to the history and evolution of the U.S
Environmental Impact Assessment (EIA) process; discussion of major court cases; ecological, economic, and political aspects of current environmental controversies; exposure to real-world scenarios that are crucial to understanding the EIA process in action; field trips to six or seven environmental control facilities in Iowa City and neighboring areas. Prerequisites: GEOG:1070. Same as GEOG:4750.

## URP:4752 Eight Generation Planning: Envisioning Regenerative Cities 3 s.h.

Star Trek tells us that Captain Kirk will be born in Iowa in 2228, what should cities look like in that year? Students envision and design great regenerative cities in the age of Anthropocene-the period we are in which features substantial human influence on climate and the environment; exploration of contemporary philosophies and urban strategies for sustainability, resilience, post-scarcity abundance, human well-being, social inclusiveness, and justice in an era of rapid changes in society, technology, climate, and environment.
URP:5310 Informatics for Sustainable Systems 3 s.h. Introduction to fundamental and advanced environmental informatics concepts and procedures including automated data collection, data management, data transformations, and processing to support modeling and analysis; scientific visualization of environmental data to support management of food, energy, and water (FEW) resources; sustainability in FEW systems. Same as CEE:5310, IGPI:5311.
URP:5678 Application Simulation to Transportation
3 s.h.
Transportation system management and traffic engineering; application of real-time simulation and visualization. Prerequisites: CEE:3763 or CEE:4763. Same as CEE:5678.

## URP:5679 Landscape Planning and Design

1,3 s.h.
Introduction to landscape architecture; natural processes and human/ nature relations; history of landscape architecture including major forms and designs in eastern and western civilizations; urban gardens (e.g., industrialization, garden cities, parks, streetscapes, roof gardens, etc.); components of landscapes (e.g., land, soils, water, plants, climate); landscape planning (e.g., regional level, urban, zonal scales); landscape design process.

## URP:5800 Environmental Economics and Policy 3 s.h.

Reasons why markets fail in environmental realm (e.g., externalities, common pool resources, club goods, public goods); ecosystem services and techniques used for their valuation; revealed and stated preferences; cost-benefit analysis and role in policy-making process; tools to address environmental market failures, particularly command and control, taxes and subsidies, and mitigation markets; focus on air pollution, climate change, and water-related policies. Same as GEOG:5800, PBAF:5800.

## URP:6200 Analytic Methods I 1-3 s.h.

Data science, statistics, quantitative reasoning, study design and analysis for planning and policy; applied quantitative and qualitative research, surveys, public participation; data sharing and data management for reproducibility and accessibility. Same as PBAF:6200.

URP:6201 Analytic Methods II 3 s.h.
Integration of methods with the planning process; application of multiple regression, population estimation and projection, survey methods, time series analysis, industrial growth and change; presentation of results to decision makers and the public. Prerequisites: URP:6200. Same as PBAF:6201.

## URP:6202 Land Use Planning: Law and Practice

Legal, social foundations of land use planning; comprehensive planning, zoning and subdivision review; legal aspects of land use, environmental planning; ordinance drafting; staff report writing; citizen participation.

## URP:6203 The Making of Cities: Histories and Theories of Planning <br> 1,3 s.h.

Histories and dynamics of urban change in Western cities as a reflection of social, cultural, economic, and environmental forces; alternative city planning philosophies, perspectives, and ethics relevant to planners and policy makers; special attention to how urban planning intersects with racism and social justice, as well as climate change and sustainability.

## URP:6205 Economics for Policy Analysis <br> 1,3 s.h.

Principles of economics, concepts and techniques of microeconomic analysis, market failures, role of government in the economy, tax policy, income inequality, and program evaluation. Same as PBAF:6205.

URP:6208 Program Seminar
1 s.h.
Planning, administrative, and policy processes; roles of planners, public policy analysts, and administrators; professional ethics and standards. Same as PBAF:6208.
URP:6209 Sustainable Communities Lab I 3 s.h.
Experience working on a two-semester project involving a current planning issue, usually for a client. Requirements: urban and regional planning graduate standing. Same as SDG:6000.
URP:6210 Sustainable Communities Lab II 3 s.h.
Continuation of URP:6209. Prerequisites: URP:6209. Requirements: urban and regional planning graduate standing. Same as SDG:6210.

## URP:6211 Community Outreach Practicum

1-3 s.h.
Application of planning skills to community work by nonprofit organizations in local area; urban planners contributing to their communities; community outreach.

URP:6225 Applied GIS for Planning and Policy Making 1-3 s.h. Analysis of U.S. Census data using GIS software; data and analytical needs for urban planning and public policy making; coverage of GIS topics including spatial analysis of social science and environmental problems, site selection; graphical display of results, including online maps; development of models in GIS. Same as PBAF:6225.

URP:6229 Practicum 1-5 s.h.
Full-time internship of at least five months with a planning-related organization. Requirements: urban and regional planning graduate standing.

URP:6233 Public Finance and Budgeting 3 s.h.
Local budgeting process and revenue instruments available for local governments to finance their infrastructure; local budgeting process, mechanics of property tax and other revenue sources, connection between taxation and land use, economic development, growth management, and transportation; issues regarding financing K-12 public schools. Same as PBAF:6233.

URP:6240 Public Management
3 s.h.
Public management in a democratic society; balancing of administrative and democratic values and interests; examination of institutional, political, organizational, and ethical context of public management and policy making; students acquire important management, leadership, and decision-making skills, as well as reflect on their values and behaviors with regard to administration and public service, particularly in a diverse and changing society; service in public sector contrasted with service in private and nonprofit sectors. Same as PBAF:6240.

URP:6242 Planning and City Administration
1 s.h.
Relationship of planners and other local government personnel; how planning fits into city management; city management view of local political process, provision of city services, finance and budgeting, human resources, intergovernmental relations, how meetings are run, dealing with the public.
URP:6243 The Land Development Process 1,3 s.h.
How land is developed; analysis of site suitability, preparation of subdivision plan, site plan review, development approval process, infrastructure and site preparation, negotiating local development politics; field trips. Prerequisites: URP:6202.
URP:6245 Growth Management 3 s.h.
Causes and consequences of urban sprawl, shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges. Same as PBAF:6245.

## URP:6249 Sustainability Seminar

Focus of increasing interest for planning students and practicing planners; involves environmental effects, economy, social justice; discussion and investigation of sustainability practice applied to local and regional efforts of public and private entities; greater awareness and understanding of the effectiveness and resource requirements of local activities addressing sustainability; presentations by the instructor, local tours, guest lectures.

URP:6253 Designing Sustainable and Healthy Cities 1-3 s.h. Principles and practical elements of urban design for sustainable and healthy cities; general urban design background for policy makers and planners; impacts of urban design for environmental sustainability and for community health and well-being; physical, mental, social, and environmental health as they are affected by urban form, air and water quality, green spaces and climate change impacts. Same as PBAF:6253.

URP:6256 Environmental Policy
3 s.h.
Environmental policy formation and politics; comparative international perspective on the United States' experience. Same as PBAF: 6256.

## URP:6257 Environmental Management

Environmental best management practices for sustainable management of natural resources; open space and habitat protection, prairie and wetland restoration, water supplies management, natural hazard mitigation, farmland protection. Same as PBAF:6257.
URP:6258 Systems and Scenario Thinking
Quantitative and qualitative methods for complex dynamic systems; participatory modeling; systems thinking, integrated assessment, and scenario planning; decision-making, policy development, and evaluation; nonlinear dynamics of cities, materials, energy, and human-environment relationships; numerical modeling; historical and contemporary roles of human activities in the Earth system. Same as PBAF:6258.

URP:6260 Transportation Policy and Planning
3 s.h. Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues. Same as PBAF:6260.
URP:6263 Special Topics in Transportation Planning Introduction to a topic in transportation planning not covered in depth in other course offerings. The topics will rotate based on instructor and student interests, but may include areas such as public transportation, freight, and airport planning. Regardless of the topic area, students will learn about current topics in the field and analytical techniques, with a focus on increasing the sustainability and equity of transportation systems.

URP:6265 Planning Sustainable Transportation 3 s.h.
Theories and methods of exerting public control over passenger and freight transportation; social and environmental regulation; effects of changing finance, regulation, and pricing policies, including privatization, tolls, impact fees. Same as GEOG:6264, PBAF:6265.
URP:6266 Transportation, Urban Form, and Sustainability 3 s.h. Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, travel behavior modeling; current policies that influence travel behavior and urban form. Same as PBAF:6266.

## URP:6268 Freight Transportation Planning 3-4 s.h.

Freight transportation planning in the United States; surface modes, primarily trucking and rail, as well as trade-offs in bulk movements by inland waterways and pipelines; comparison with recent developments in policy, planning, and practice for surface transportation in other developed economies (e.g., Europe).
URP:6270 Transportation Planning Studio 3 s.h.
Community-engaged transportation planning project administered through the Iowa Initiative for Sustainable Communities; application of transportation planning knowledge to produce a plan or study, and presentation of results to a client. Prerequisites: URP:6266.

URP:6271 Housing Policy 3 s.h.
Recent housing policy initiatives at federal, state, and local levels. Same as PBAF:6271.

## URP:6273 Community Development Through Creative Placemaking

3 s.h.
Examination of practices, ideas, and techniques for community development in small to large communities; particular focus on creative placemaking, in which planners and the public strategically shape the physical and social character of a neighborhood, town, city, or region around arts and cultural activities; students and faculty apply this approach to a specific community project; for students in the arts, humanities, social sciences, and planning and public affairs. Same as PBAF:6273.

3 s.h. URP:6277 Affordable Housing Finance
3 s.h.
Financing development or rehabilitation of affordable housing; lowincome housing tax credits, the housing finance system and current regulatory issues, mortgage discrimination, improving financing for rental housing.
URP:6278 Nonprofit Organizational Effectiveness I 3 s.h. Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fundraising. Same as HMP:6360, MGMT:9150, PBAF:6278, RELS:6070, SPST:6010, SSW:6247.
URP:6279 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: for HMP:6365-HMP:6360 or MGMT:9150. Same as HMP:6365, MGMT:9160, PBAF:6279, RELS:6075, SPST:6020, SSW:6248.

3 s.h. URP:6280 Planning for Disaster Mitigation and Recovery 2-3 s.h. Types of disasters that communities face; what role planners play, what role should they play; importance of hazard mitigation and planning for post-disaster recovery; where planners' unique skills play the most significant roles in aiding a community to redesign a safer future. Same as PBAF:6280.
URP:6282 Grant Writing 1-2 s.h. Same as PBAF:6282, SSW:6282.

URP:6290 Economic Impact Assessment 3 s.h.
Economic impact and growth analysis, including economic base, income expenditure, input-output analysis; use of economic impact analysis in a cost-benefit context; industrial location and mobility theory with statistics applications. Prerequisites: URP:6205.
URP:6295 Economic Development Policy 3 s.h.
Business and industrial locations, theories of regional growth and development, tools for regional economic analysis, economic impacts of COVID-19, development strategies in increasingly knowledgedriven and globalizing regional economies, economic development finance and policy, and economic development planning process. Same as PBAF:6295.

## URP:6297 Financing Economic Development for Poverty

 Alleviation3 s.h.
How public policies in general, and planning practices in particular, have an impact on an individual's likelihood of becoming poor, remaining poor, and getting out of poverty; how land use, housing, transportation, and economic development policies affect distribution and accessibility of jobs, education, housing, and public services. Same as PBAF:6297.

URP:6305 Readings arr.
URP:6315 Independent Study in Planning 1-6 s.h.
Research and analysis of a special planning problem; opportunity to apply knowledge in area of specialization.
URP:6320 Introduction to Graphic Communications 2 s.h. Visual communication techniques through use of print and digital media; how to graphically convey concepts and information to a variety of audiences; basic design principles to build a foundation in graphic communication; relationships between various software packages; advantages and shortcomings of various digital tools; development of professional graphic media that is beautiful and effective.
URP:6325 Thesis: Urban and Regional Planning
arr.

## URP:6330 Developing Graphic Content

1 s.h.
Skills necessary to develop graphic content utilized by professionals in the field of urban and regional planning; students learn to use programs such as SketchUp, LayOut, Google Earth, and Lumion; produce maps, diagrams, experiential perspectives, renderings, and other visuals; and convey a variety of ideas pertaining to the urban environment.

URP:6335 Internship
2 s.h.
Work in a planning or related agency or nonprofit organization.
URP:6340 Public Policy Analysis
Rationales and goals of public policy; major steps, key methods, and tools in policy analysis; professional delivery of policy recommendations. Same as PBAF:6340.

URP:6400 Sustainable Development: The Kerala Experience 3 s.h. Exploration of student interests in social entrepreneurship, global health, microfinance, cultural production, environmental sustainability, or other development issues in India; varied disciplinary perspectives (i.e., public health, business, social work, geography, art); student work with Indian NGOs employing a diverse variety of techniques to address social problems such as child labor, health care for the poor, illiteracy, and disability services. Winter session. Same as PBAF:6400.

## Public Affairs Courses

PBAF:1001 How to Change the World 1-2 s.h.
Have you ever wondered what it would take to solve our biggest societal problems (e.g., pollution, hunger, homelessness, access to health care)? Often the answer is through public policy-the programs, rules, and laws meant to guide society; introduction to public policy through case studies and examples of people and institutions that have truly changed the world; activities designed to help students change the world around them. Same as URP:1001.

## PBAF:1030 Climate Leadership and Justice

Preparation for engaged students to lead on climate change in their communities; understanding climate change causes and impacts, consideration of intergenerational justice and equity in climate adaptation and mitigation; application of best practices in climate policies and planning; supporting community and business resilience and capacity building. Same as URP:1030.

## PBAF:2020 Environment and Society: Sustainability, Policy, and Politics <br> 3 s.h.

How society balances its needs against those of the natural environment when addressing modern challenges like climate change, conservation, and energy crises; exploration of sustainability through the lens of U.S. environmental policy and politics; application of fundamental theories of public policy to answer questions-when do environmental problems become policy problems; what economic, social, and political forces shape environmental policy decisions; and what are the consequences of environmental policies for individuals and organizations? GE: Sustainability. GE: Social Sciences. Same as URP:2020.

## PBAF:2056 The Splendor of Cities

3 s.h.
Exploration and journey through space and time of global citiesLondon in the 1600 s, Paris in the 1800 s, and New Delhi in the 20th century-by use of videos and documentaries; how cities form and grow in response to social, political, cultural, and economic forces. Same as URP:2056.

PBAF:3117 Bureaucratic Politics and Public Administration 3 s.h. Examination of bureaucracy from political, theoretical, and practical perspectives; what we mean by "bureaucracy" and how it developed over time; political control of bureaucracy; how bureaucracy performs its tasks, including behavior of bureaucrats; role of nonprofit service delivery in modern bureaucracy; how bureaucracy affects American policy and politics. Same as POLI:3117.

PBAF:3217 Negotiation and Conflict Resolution 3 s.h.
Strategies of successful negotiation across a wide range of conflict situations; keys to success in peacefully resolving conflicts; personal, professional, legal, and political negotiations; apologizing; mediation as alternative to litigation; analysis of conflict characteristics to determine optimal negotiation strategies; development of negotiation interpersonal skills; practice negotiating under real world scenarios. Prerequisites: RHET:1030 or RHET:1040 or RHET:1060. Same as RHET:3009, URP:3217.
PBAF:3560 Public Policy and Persuasion
3 s.h.
Students build their skill set in policy analysis, formation, and communication through a social justice lens; engagement in service learning projects in one Iowa community, where work done directly impacts that community's ability to make changes; development of effective writing and oral presentation styles that can be adapted to different audiences; focus on homelessness policy using social policy and social justice concepts to explore work of policy makers who have "right-sized" existing systems to serve communities in crisis and propose solutions to systemic problems that disadvantage marginalized populations. Prerequisites: RHET:1030 or RHET:1040 or RHET:1060. Same as POLI:3560, RHET:3560, SJUS:3560.
PBAF:3570 Poverty Policy
3 s.h.
How poverty is regulated and addressed in the United States, and by federal, state, and local governments; particular focus on programs including Temporary Assistance for Needy Families (TANF), Section 8 housing, Medicaid, and Medicare; how these systems have changed over time; current models and innovations that have emerged in practice. Same as GHS:3570, POLI:3570.
PBAF:3580 Native American Public Policy 3 s.h.
Exploration of ways that Native nations govern themselves, including the relationship between these sovereign entities and the U.S. government; topics include Indian Child Welfare Act, membership and enrollment, income and taxation, crime and justice; how these systems have changed over time; current practices and innovations that have emerged within different tribes.
PBAF:4205 Economics for Policy Analysis 1-3 s.h. Principles of economics, concepts and techniques of microeconomic analysis, market failures, role of government in the economy, tax policy, income inequality, and program evaluation.
PBAF:4233 Public Finance and Budgeting
Local budgeting process and revenue instruments available for local governments to finance their infrastructure; local budgeting process, mechanics of property tax and other revenue sources, connection between taxation and land use, economic development, growth management, and transportation; issues regarding financing K-12 public schools.
PBAF:4239 Organizational Dynamics and Leadership 3 s.h.
Examination of organizational theories and their applications including organizational structures, cultures, and behavioral characteristics as well as issues on management, ethics, and communication; role of a leader in public and nonprofit organizations involves organizing, controlling, planning, and motivating others for their excellent performance; use of articles, cases, and discussions to appreciate the effects of organization dynamics and leadership on organizational performance; students develop and hone their personal leadership philosophies.

PBAF:4340 Public Policy Analysis 3 s.h.
Rationales and goals of public policy; major steps, key methods, and tools in policy analysis; professional delivery of policy recommendations.

## PBAF:5111 American Public Policy

Introduction to study of public policy in the United States; development of analytical skills necessary to better understand and explain contemporary policy debates and public policy decisionmaking that takes place at the local, state, and national levels in the United States; topics include a mix of theoretical approaches and substantive policy areas to better understand how policy is made, manipulated, and maintained; examination of demands and supports, institutional, and environmental variables that drive American public policy. Same as POLI:5111.
PBAF:5117 Bureaucratic Politics and Public Administration 3 s.h. Examination of bureaucracy from political, theoretical, and practical perspectives; what we mean by "bureaucracy" and how it developed over time; political control of bureaucracy; how bureaucracy performs its tasks, including behavior of bureaucrats; role of nonprofit service delivery in modern bureaucracy; how bureaucracy affects American policy and politics. Same as POLI:5117.

## PBAF:5120 Public Policy Process

Theoretical and practical approaches to policy formation, adoption, implementation, and analysis; builds on theories of organizations, institutions, and interest group dynamics; important substantive policy areas (e.g., environmental, energy, housing, fiscal, infrastructure) that strengthen understanding of contemporary policies; application of theoretical and analytical tools to actual policy domains.

## PBAF:5200 American State Politics

Approaches to analysis of political behavior in American state governments; emphasis on cultures, parties, actors, processes, issues. Same as POLI:5200.

## PBAF:5800 Environmental Economics and Policy <br> 3 s.h.

Reasons why markets fail in environmental realm (e.g., externalities, common pool resources, club goods, public goods); ecosystem services and techniques used for their valuation; revealed and stated preferences; cost-benefit analysis and role in policy-making process; tools to address environmental market failures, particularly command and control, taxes and subsidies, and mitigation markets; focus on air pollution, climate change, and water-related policies. Same as GEOG:5800, URP:5800.

## PBAF:6200 Analytic Methods I

1-3 s.h.
Data science, statistics, quantitative reasoning, study design and analysis for planning and policy; applied quantitative and qualitative research, surveys, public participation; data sharing and data management for reproducibility and accessibility. Same as URP:6200.

## PBAF:6201 Analytic Methods II

Integration of methods with the planning process; application of multiple regression, population estimation and projection, survey methods, time series analysis, industrial growth and change; presentation of results to decision makers and the public. Prerequisites: URP:6200. Same as URP:6201.

## PBAF:6205 Economics for Policy Analysis

Principles of economics, concepts and techniques of microeconomic analysis, market failures, role of government in the economy, tax policy, income inequality, and program evaluation. Same as URP:6205.

## PBAF:6208 Program Seminar

1 s.h.
Planning, administrative, and policy processes; roles of planners, public policy analysts, and administrators; professional ethics and standards. Same as URP:6208.

## PBAF:6210 Public Affairs Capstone

4 s.h.
Students work on a community, state, federal, or nonprofit-based project with focus on research and development of policy proposals and management action steps. Requirements: MPAff graduate standing.

3 s.h. PBAF:6211 Public Affairs Capstone I
1 s.h.
Students work on a community, state, federal, or nonprofit-based project focused on research and development of policy proposals and management action steps.
PBAF:6225 Applied GIS for Planning and Policy Making 1-3 s.h. Analysis of U.S. Census data using GIS software; data and analytical needs for urban planning and public policy making; coverage of GIS topics including spatial analysis of social science and environmental problems, site selection; graphical display of results, including online maps; development of models in GIS. Same as URP:6225.

PBAF:6233 Public Finance and Budgeting 3 s.h.
Local budgeting process and revenue instruments available for local governments to finance their infrastructure; local budgeting process, mechanics of property tax and other revenue sources, connection between taxation and land use, economic development, growth management, and transportation; issues regarding financing K-12 public schools. Same as URP:6233.
PBAF:6238 Public Human Resource Management 1 s.h.
Fundamental human resource management principles; application to a variety of human resource issues in public and nonprofit organizations including recruitment, employee development and evaluation, compensation and benefits, diversity, performance management systems, health/safety systems, and employee relations.

PBAF:6239 Organizational Dynamics and Leadership 3 s.h.
Examination of organizational theories and their applications including organizational structures, cultures, and behavioral characteristics as well as issues on management, ethics, and communication; role of a leader in public and nonprofit organizations involves organizing, controlling, planning, and motivating others for their excellent performance; use of articles, cases, and discussions to appreciate the effects of organization dynamics and leadership on organizational performance; students develop and hone their personal leadership philosophies.

PBAF:6240 Public Management
3 s.h.
Public management in a democratic society; balancing of administrative and democratic values and interests; examination of institutional, political, organizational, and ethical context of public management and policy making; students acquire important management, leadership, and decision-making skills, as well as reflect on their values and behaviors with regard to administration and public service, particularly in a diverse and changing society; service in public sector contrasted with service in private and nonprofit sectors. Same as URP:6240.
PBAF:6241 Strategic Management of Public and Nonprofit Organizations
Application of well-known concepts of strategic planning and management to public and nonprofit organizations; topics include environmental assessment, mission identification, strategic issue identification, strategy formulation, strategic budgeting, strategic management and human relations, information technology and strategic management, performance measurement, strategic communication, strategic management and collaboration, strategic management and politics.

PBAF:6245 Growth Management
3 s.h.
Causes and consequences of urban sprawl, shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges. Same as URP:6245.

PBAF:6253 Designing Sustainable and Healthy Cities $\quad 1-3$ s.h Principles and practical elements of urban design for sustainable and healthy cities; general urban design background for policy makers and planners; impacts of urban design for environmental sustainability and for community health and well-being; physical, mental, social, and environmental health as they are affected by urban form, air and water quality, green spaces and climate change impacts. Same as URP:6253.

## PBAF:6256 Environmental Policy

Environmental policy formation and politics; comparative international perspective on the United States' experience. Same as URP:6256.

## PBAF:6257 Environmental Management

Environmental best management practices for sustainable management of natural resources; open space and habitat protection, prairie and wetland restoration, water supplies management, natural hazard mitigation, farmland protection. Same as URP:6257.

## PBAF:6258 Systems and Scenario Thinking 3 s.h.

Quantitative and qualitative methods for complex dynamic systems; participatory modeling; systems thinking, integrated assessment, and scenario planning; decision-making, policy development, and evaluation; nonlinear dynamics of cities, materials, energy, and human-environment relationships; numerical modeling; historical and contemporary roles of human activities in the Earth system. Same as URP:6258.
PBAF:6260 Transportation Policy and Planning
Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues. Same as URP:6260.
PBAF:6265 Planning Sustainable Transportation
Theories and methods of exerting public control over passenger and freight transportation; social and environmental regulation; effects of changing finance, regulation, and pricing policies, including privatization, tolls, impact fees. Same as GEOG:6264, URP:6265.
PBAF:6266 Transportation, Urban Form, and Sustainability 3 s.h. Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, travel behavior modeling; current policies that influence travel behavior and urban form. Same as URP:6266.

## PBAF:6271 Housing Policy

Recent housing policy initiatives at federal, state, and local levels. Same as URP:6271.

## PBAF:6273 Community Development Through Creative

 PlacemakingExamination of practices, ideas, and techniques for community development in small to large communities; particular focus on creative placemaking, in which planners and the public strategically shape the physical and social character of a neighborhood, town, city, or region around arts and cultural activities; students and faculty apply this approach to a specific community project; for students in the arts, humanities, social sciences, and planning and public affairs. Same as URP:6273.
PBAF:6278 Nonprofit Organizational Effectiveness I 3 s.h. Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fundraising. Same as HMP:6360, MGMT:9150, RELS:6070, SPST:6010, SSW:6247, URP:6278.

3 s.h. 3 s.h.

PBAF:6279 Nonprofit Organizational Effectiveness II 3 s.h. Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: for HMP:6365-HMP:6360 or MGMT:9150. Same as HMP:6365, MGMT:9160, RELS:6075, SPST:6020, SSW:6248, URP:6279.

PBAF:6280 Planning for Disaster Mitigation and Recovery 2-3 s.h. Types of disasters that communities face; what role planners play, what role should they play; importance of hazard mitigation and planning for post-disaster recovery; where planners' unique skills play the most significant roles in aiding a community to redesign a safer future. Same as URP:6280.
PBAF:6282 Grant Writing 1-2 s.h. Same as SSW:6282, URP:6282.

## PBAF:6295 Economic Development Policy <br> 3 s.h.

Business and industrial locations, theories of regional growth and development, tools for regional economic analysis, economic impacts of COVID-19, development strategies in increasingly knowledgedriven and globalizing regional economies, economic development finance and policy, and economic development planning process. Same as URP:6295.

## PBAF:6297 Financing Economic Development for Poverty Alleviation <br> 3 s.h.

How public policies in general, and planning practices in particular, have an impact on an individual's likelihood of becoming poor, remaining poor, and getting out of poverty; how land use, housing, transportation, and economic development policies affect distribution and accessibility of jobs, education, housing, and public services. Same as URP:6297.

PBAF:6335 Internship
1-3 s.h.
Internship; 240 hours of public affairs work with a public or nonprofit organization.
PBAF:6340 Public Policy Analysis 3 s.h.
Rationales and goals of public policy; major steps, key methods, and tools in policy analysis; professional delivery of policy recommendations. Same as URP:6340.

## PBAF:6400 Sustainable Development: The Kerala

 Experience3 s.h.
Exploration of student interests in social entrepreneurship, global health, microfinance, cultural production, environmental sustainability, or other development issues in India; varied disciplinary perspectives (i.e., public health, business, social work, geography, art); student work with Indian NGOs employing a diverse variety of techniques to address social problems such as child labor, health care for the poor, illiteracy, and disability services. Winter session. Same as URP:6400.

## Master of Public Affairs, MPAff

One of the enduring grand challenges is how we collectively, creatively, and democratically respond to key challenges facing our communities, nation, and the world. Among these challenges are environmental change, including an increased incidence and intensity of disasters such as flooding, sea level rise, and wildfires attributable to climate change; health care; an aging population; addiction; inadequate infrastructure; inequality; unaffordable housing; racism; transportation; immigration; economic development; and public safety.
In response, the Master of Public Affairs program trains future leaders to systematically and creatively address these and other challenges in the coming years. With its interdisciplinary public affairs infrastructure-representing colleges, departments, and centers across campus-the University of Iowa is a leader in public affairs locally and nationally. The program educates public affairs leaders who will creatively and knowledgeably address society's most critical issues and contribute to addressing the grand challenges of the 21st century.

## Learning Outcomes

## Ability to Lead and Manage in Public Governance

- Understand public administration and management theories and practices.
- Apply public administration and management theories and practices to achieve the goals of public and nonprofit organizations.
- Understand budgeting, financing, and human resource management in public and nonprofit organizations.
- Develop leadership and team-building skills.

## Ability to Participate in, and Contribute to, the Public Policy Process

- Understand the policymaking process in the institutional and market context.
- Identify key stakeholders in the policy process and understand their interactions with the public policy process.
- Conduct policy analysis and make policy recommendations.

## Ability to Analyze, Synthesize, Think Critically, Solve Problems, and Make Evidence-Informed Decisions in a Complex and Dynamic Environment

- Properly frame policy problems, policy goals, and policy alternatives.
- Collect, analyze and report data, and apply economic, statistical and spatial analysis methods in data analysis.
- Synthesize quantitative and qualitive evidence to inform policymaking.

## Ability to Articulate and Apply a Public Service Perspective

- Recognize competing values in public interest and engage the general public in decision-making.
- Understand the importance of accountability in public administration.
- Apply professional codes of ethics in policy analysis, policymaking, and administering policy.

## Ability to Communicate and Interact Productively with a Diverse and Changing Workforce and Society at Large

- Understand the changing demographics and values of society and the implications of these changes for public service and public policymaking.
- Value and identify ways to engage and represent the public in the public sector.
- Develop oral, writing, and media skills for effective communication with diverse stakeholders.

## Ability to Pursue Sustainable Outcomes Through Public Policy, Public Administration, and Public Management (Program-Specific Competency)

- Understand complex interactions between public, private, and nonprofit organizations and the role of these organizations within human and natural systems.
- Articulate and apply a sustainability perspective (the implementation of policies, processes, and practices that meet the needs of the present without compromising the ability of future generations to meet their own needs) to public administration, management, and policy.
- Analyze real-world problems through multidisciplinary perspectives and work collaboratively to solve problems.

## Requirements

The graduate Master of Public Affairs (MPAff) requires a minimum of 42 s.h. of credit. Students must earn a grade of B-minus or higher in all core and concentration area courses and must maintain a gradepoint average of at least 3.00 in courses required for the degree.

The required curriculum includes eight core courses, an internship, electives (including those taken within a concentration area), a one-semester capstone project, and an internship. Courses are offered by the School of Planning and Public Affairs (Graduate College), the departments of Management and Entrepreneurship (Tippie College of Business), Civil and Environmental Engineering (College of Engineering), Educational Policy and Leadership Studies (College of Education), Geographical and Sustainability Sciences, Political Science, Sociology and Criminology, the MA in strategic communication program in the School of Journalism and Mass Communication (College of Liberal Arts and Sciences), the College of Public Health, and the Larned A. Waterman Iowa Nonprofit Resource Center (College of Law).

The Master of Public Affairs requires the following work.

## Core Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | Bureaucratic Politics and Public | 3 |
| PBAF:5117 | Administration |  |
| PBAF:6200 | Analytic Methods I | 3 |
| PBAF:6205 | Economics for Policy Analysis | 3 |
| PBAF:6208 | Program Seminar | 1 |
| PBAF:6225 | Applied GIS for Planning and | 1 |
| PBAF:6233 | Policy Making | 3 |

| PBAF:6240 | Public Management | 3 |
| :--- | :--- | :--- |
| One of these: |  |  |
| PBAF:5120 | Public Policy Process | 3 |
| PBAF:6340 | Public Policy Analysis | 3 |

## Concentration Area

Students complete a total of 15 s.h. in consultation with their advisor, with at least $9 \mathrm{~s} . \mathrm{h}$. in coursework taken in the public and nonprofit management or public policy concentration area, and 6 s.h. in coursework from any of the two concentration areas or other courses as deemed appropriate. Students further develop in their concentration area by applying the concepts and skills gained in core coursework.

Students in the public policy concentration complete one of the required courses as well as an additional 6 s.h. within the public policy concentration.

Public and Nonprofit Management Concentration

## Nonprofit Management

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| LAW:8753 | Nonprofit Organizations: <br> Structure, Governance, and <br> Strategy | 3 |
|  | Nonprofit Organizations: <br> Advocacy, Collaboration, and <br> Fundraising | 3 |
| MGMT:3500 | Nonprofit Organizational <br> Effectiveness I |  |
| MGMT:3600 | Nonprofit Organizational <br> Effectiveness II | 3 |
|  | Nonprofit Ethics and <br> Governance | 3 |
|  | MGMT:4600 | 3 |

## Public Management

| URP:6266 | Planning Sustainable <br>  | Transportation <br> and Sustainability |

## Capstone Course

Students take the public affairs capstone course, typically in their final semester. They work on a community, state, federal, or nonprofit project in which they focus their efforts on an analysis of a contemporary public policy problem, research, development of policy proposals, and recommended action steps. This is done in tandem with the university's Iowa Initiative for Sustainable Communities (IISC), that for ten years has been providing public consultation to communities in Iowa.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| PBAF:6210 | Public Affairs Capstone | 4 |

## Internship Course

Students are required to complete an approved internship with a public agency or a nonprofit organization. They engage in 240 hours of internship work under the supervision of a public affairs professional.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| PBAF:6335 | Internship | 3 |

## Final Examination

An oral and written exam constitute the final examination. If the oral exam is passed, then the written exam does not need to be taken.

## Combined Programs

## Undergraduate Degree/MPAff

Students working on an undergraduate degree program in the Tippie College of Business or the Colleges of Education, Engineering, Liberal Arts and Sciences, and Public Health who are interested in earning the Master of Public Affairs degree may apply to a combined undergraduate degree/MPAff graduate degree program. The Undergraduate to Graduate (U2G) program enables students to begin work on the MPAff degree as they complete their baccalaureate degree. Combined degree programs enable students to earn both degrees in less time than it would take to earn the two degrees separately.
Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, visit Undergraduate to Graduate (U2G) on the Graduate College website.

## Admission

Admission requires an undergraduate degree and fulfillment of the minimum requirements of the Graduate College.
The priority deadline for funding consideration is Jan. 15 for fall admission. Funding for those who submit materials after these dates is considered only as funding permits. Applications for admission are accepted until July 15; April 15 for international students. For spring admission, applications are accepted until Dec. 1.

To apply, follow the directions on the Graduate Admissions website. Applicants can apply online and upload all supporting materials. International students without a U.S. degree or whose first language is not English must submit official Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), or Duolingo English Test (DET) scores before admission and then funding decisions can be made. All students requesting funding also must complete and upload the Funding Application/ Award Form.

## Financial Support

Students receive financial support from the program primarily from teaching or research assistantships and from contract or grantfunded assistantships. Assistantships typically require 13-20 hours of work per week under the direction of a faculty member and are accompanied by a tuition scholarship.
Students initiate applications for financial support, and awards are made on the basis of merit, experience, and interests. Assistantships may be renewed for a total of up to four semesters.

Fellowships are offered to new students and awarded as a flat sum of money. There is no work requirement for a fellowship.
Students applying for financial support are encouraged to submit application materials and requests for support by Jan. 15 for fall enrollment and Nov. 1 for spring enrollment. Students who apply after Jan. 15 (fall or spring) are considered as remaining funds permit.

## Career Advancement

Graduates land positions in professional policy analytical and/or managerial service in the public and nonprofit sectors. The degree builds knowledge and skills in a mix of topics that includes policy, economics, statistics, research, and management and prepares students for professions that influence public policy through analysis, application, or management. They have a number of career choices available, many of which lead to executive positions in federal, state, and local governments, or in nonprofit agencies.
Example positions in the local, state, federal, nonprofit, and private sectors include:

- local-government specialist leading to a city manager, community health director, or public housing manager;
- state-program manager for a state housing authority or a policy analyst/program manager for a variety of state agencies;
- federal—presidential management fellow, or starting as a GS-9 position in the federal government in a variety of federal agencies;
- nonprofit-program director leading to a nonprofit organization director; and
- public, private, and nonprofit-public and government relations specialist, lobbyist, or elected official.

The School of Planning and Public Affairs provides career assistance efforts for both internship and post-graduation job seekers. It offers job information access and one-on-one advising support from the school's career services coordinator.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Students complete a total of 15 s.h. in consultation with their advisor, with at least 9 s.h. in coursework taken in the public and nonprofit management or public policy concentration area, and 6 s.h. in coursework from any of the two concentration areas or other courses as deemed appropriate. Students in the public policy concentration complete one of the required courses as well as an additional 6 s.h. within the public policy concentration.
c Work with faculty advisor to complete an approved internship with a public agency or nonprofit organization; 240 hours of internship work required under the supervision of a public affairs professional.
d Typically taken in final semester.
e Consists of both oral and written components.

## Urban and Regional Planning, MS

The MS in urban and regional planning is a two-year degree program fully accredited by the Planning Accreditation Board. It is built on the premise that planners must be educated in methods of policy analysis and that there is a common body of knowledge, represented in the core curriculum, that provides a solid foundation for all specializations in the field.

A wide range of educational backgrounds provide good preparation for graduate study in urban and regional planning. Students with undergraduate majors such as environmental policy and planning, architecture, anthropology, public policy, geographic information science, business administration, economics, engineering, communication studies, finance, geography, education, marketing, political science, sociology, history, journalism, and English currently study in the school. With an increasingly diverse student body and a low student-faculty ratio, the School of Planning and Public Affairs is committed to creating an environment that is inclusive and welcoming of all students. Approximately 20 full-time students and some parttime students are enrolled, and about $20 \%$ are international students.
The common core of courses and the design of the facilities allow students to get to know each other quickly. Students interact closely with faculty members in the classroom, in informal conversation, and while working on research projects. Students and faculty also collaborate in the second year capstone courses, URP:6209 Sustainable Communities Lab I and URP:6210 Sustainable Communities Lab II, to prepare plans and reports for communities throughout Iowa. This work is supported by the university's Iowa Initiative for Sustainable Communities, which was created by the School of Planning and Public Affairs.
Graduate students working toward a master's degree in urban and regional planning may elect to pursue one of the combined degree programs offered by the school in collaboration with the Colleges of Education, Engineering, Law, and Public Health, the Department of Geographical and Sustainability Sciences, and the School of Social Work.

## Learning Outcomes

## General Planning Knowledge

The comprehension, representation, and use of ideas and information in the planning field, including appropriate perspectives from history, social science, and the design professions:

- purpose and meaning of planning-appreciation of why planning is undertaken, impact of planning;
- planning theory-appreciation of the behaviors and structures available to bring about sound planning outcomes;
- planning law-appreciation of the legal and institutional contexts within which planning occurs;
- human settlements and history of planning-understanding of growth and development of places over time and space;
- the future-understanding relationships between past, present, and future in planning domains, potential for intervention; and
- global dimensions-appreciation of interactions, flows of people and materials, cultures, differing approaches to planning.

## Planning Skills

Use and application of knowledge to perform specific tasks required in the practice of planning:

- research—tools for assembling and analyzing information from practice, scholarship, from primary/secondary sources;
- written, oral, and graphic communication-ability to prepare clear, accurate, compelling text, graphics, maps for presentations;
- quantitative and qualitative methods-data collection, analysis, modeling tools for forecasting, analysis, and projects/plans design;
- plan creation and implementation-tools for sound plan formulation, adoption, and implementation and enforcement;
- planning process methods-tools for stakeholder involvement, community engagement, and working with diverse communities; and
- leadership-tools for attention, formation, strategic decision making, team building, and organizational/community motivation.

## Values and Ethics

Values inform ethical and normative principles used to guide planning in a democratic society:

- professional ethics and responsibility-appreciation of key issues of planning ethics, public decision-making, research, and client representation (AICP Code of Ethics);
- governance and participation-appreciation of the roles of officials, stakeholders, community members in planned change;
- sustainability and environmental quality-appreciation of natural resource, how to create sustainable futures;
- growth and development-appreciation of economic, social, and cultural factors in urban and regional growth and change; and
- social justice-appreciation of equity concerns in planning.

## Requirements

The Master of Science program in urban and regional planning requires a minimum of 45 s.h. of graduate credit. The 45 s.h. required to complete the degree must include a minimum of 34 s.h. in the School of Planning and Public Affairs. Students must earn a grade of B-minus or higher in all core and concentration area courses and must maintain an overall program grade-point average of at least 3.00.
The graduate curriculum is based on the philosophy that planners must develop the theoretical and analytic skills that will permit them to analyze social problems and evaluate public policies. Planners also must cultivate professional skills such as report writing, oral presentation, computer use, and team management in order to work effectively in various organizational and political environments.

Work for the master's degree includes core courses, an area of concentration, electives, and capstone courses. A final examination is required. A thesis is not required, although students may petition to write one. Students are encouraged to complete an approved internship or practicum.
The MS with a major in urban and regional planning requires the following work.

## Core Curriculum

The core curriculum helps students develop an understanding of the institutions-social, economic, political, administrative, and legal systems-that provide the context for policy analysis and that constrain public choices. It also promotes development of the ability to identify social goals and normative criteria for evaluating public policies, as well as the analytic skills to perform such investigations.
The core requires a minimum of 24 s.h., including an advanced economic methods course. The advanced economics methods course usually is taken during the first three semesters. Early core courses are drawn primarily from traditional disciplines, particularly economics and statistics, and include an introduction to land use planning and to theories and practice of planning. As students proceed through
the curriculum, increasing emphasis is placed on the development of critical judgment and insight, achieved through the application of theory and methods to realistic planning problems and case studies.

The core curriculum includes the following courses; students may request a waiver of selected core courses on the basis of previous coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  |  |
| URP:6200 | Analytic Methods I | 3 |
| URP:6201 | Analytic Methods II | 3 |
| URP:6202 | Land Use Planning: Law and <br> Practice | 3 |
| URP:6203 | The Making of Cities: Histories <br> and Theories of Planning | 3 |
| URP:6205 | Economics for Policy Analysis | 3 |
| URP:6208 | Program Seminar | 1 |
| URP:6225 | Applied GIS for Planning and <br> Policy Making (students may <br> choose the 1 or 3 s.h. option) | 1,3 |
|  | The Land Development Process |  |
| URP:6243 | Systems and Scenario Thinking | 1 |
| URP:6258 |  |  |

Advanced Economic Methods
And this course:
URP:6233
Public Finance and Budgeting
3

## Concentration Area

Beginning in the second semester, students choose a concentration area and develop it by applying the concepts and skills developed in the core. Currently, the school's faculty and course offerings support five concentration areas: transportation planning, housing and community development, economic development, land use and environmental planning, and geographic information systems.
Students complete at least 9 s.h. of courses in their concentration area and 6 s.h. in additional elective coursework. Courses offered by other university departments and programs may supplement those offered by the School of Planning and Public Affairs.
Students may combine two concentration areas. Examples of combined areas are environmental and economic development planning, and transportation and community development planning. Students also may design other concentration areas, subject to faculty approval. For example, they may specialize in health services planning with appropriate coursework in the departments of Health Management and Policy or Occupational and Environmental Health, or in human services planning with courses in the School of Social Work.

## Capstone Courses

Students complete the following two capstone courses, usually during the third and fourth semesters. Students who complete a practicum are exempt from this requirement.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| URP:6209 | Sustainable Communities Lab I | 3 |
| URP:6210 | Sustainable Communities Lab II | 3 |

## Internship

Students are encouraged to complete an internship in a planning agency or related organization. To earn 2 s.h. of credit for the internship, students must submit a brief paper summarizing and evaluating their experience. Internships usually are paid staff positions
and are completed during the summer between the first and second years or during the academic year.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| URP:6335 | Internship | 2 |

## Practicum

An extended internship, consisting of at least five months of fulltime employment in a planning-related organization, may qualify as a practicum. A practicum generally takes place during summer after the first year and into the fall semester of the second year. It carries 5 s.h. of credit and substitutes for the internship and the capstone courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: |  |  |
| URP:6229 | Practicum | $1-5$ |

## Thesis

A thesis is not required, although students may petition to write one. Students may register for up to 6 s.h. of thesis credit. In addition, they may take up to 8 s.h. of readings to develop a thesis topic and prepare a literature review.

| Course \# | Title | Hours |
| :--- | :--- | :---: |
| This course: |  |  |
| URP:6325 | Thesis: Urban and Regional | arr. |
|  | Planning |  |

## Final Exam

A final exam is required for all students. An oral and written examination constitutes the final exam for students who do not write a thesis. If the oral examination is passed, then the written examination does not need to be taken.

## Combined Programs

The School of Planning and Public Affairs participates in several combined degree programs, in which students work toward an MS in urban and regional planning at the same time they work toward another degree. Combined degree programs enable students to earn both degrees in less time than it would take to earn the two degrees separately.

## Undergraduate Degree/MS

Students working on an undergraduate degree program in the Tippie College of Business or the Colleges of Education, Engineering, Liberal Arts and Sciences, and Public Health who are interested in earning the MS in urban and regional planning may apply to a combined undergraduate degree/MS graduate degree program. The Undergraduate to Graduate (U2G) program enables students to begin work on the MS as they complete their baccalaureate degree. Combined degree programs enable students to earn both degrees in less time than it would take to earn the two degrees separately.
Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, visit Undergraduate to Graduate (U2G) on the Graduate College website.

## Graduate Degrees/MS

See "Two Master's Degrees" under Master's Degrees in the Manual of Rules and Regulations on the Graduate College website for information on earning concurrent master's degrees. The following combined degree programs are available.

- JD/MS; see Juris Doctor, JD [p. 1720] (College of Law) in the catalog.
- MS in civil and environmental engineering with a sustainable water development subprogram/MS; see the MS in civil and environmental engineering [p. 1511] (College of Engineering) in the catalog.
- MS in occupational and environmental health/MS; see the MS in occupational and environmental health [p. 2028] (College of Public Health) in the catalog.
- MSW/MS; see the Master of Social Work, MSW [p. 988] (College of Liberal Arts and Sciences) in the catalog.
- MA in educational policy and leadership studies with a higher education and student affairs subprogram; see the MA in educational policy and leadership studies (College of Education) in the catalog.

Requirements for each combined degree program can vary. The minimum requirements for the urban and regional planning part of any combined degree include completion of at least 35 s.h. in School of Planning and Public Affairs courses (prefix URP), the core and capstone courses, 9 s.h. of a concentration, and the master's degree final examination. In the case of two master's degrees, all programs require at least 60 s.h. of credit.

Students who wish to enter a combined degree program must apply to the two degree programs separately; they must be admitted to both programs before they may be admitted to the combined program. Other combined degrees may be possible. Contact the admissions coordinator at the School of Planning and Public Affairs for more information about combined degree programs.

## Admission

Admission to the School of Planning and Public Affairs requires an undergraduate degree and fulfillment of the minimum requirements of the Graduate College. For fall admission, prospective students should submit complete materials to Graduate Admissions by Jan. 15 if funding is requested. Funding for those who submit materials after these dates is considered only as funding permits. Applications for admission are accepted until July 15; April 15 for international students. For spring admission, the deadline is Nov. 1 if funding is requested. Applications are accepted until Dec. 1.

To apply, follow the directions on the Graduate Admissions website. Applicants can apply online and upload all supporting materials. International students without a U.S. degree or whose first language is not English must submit official Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), or Duolingo English Test (DET) scores before admission and then funding decisions can be made. All students requesting funding also must complete and upload the Funding Application/ Award Form.

## Financial Support

Students in the School of Planning and Public Affairs receive financial support from the program primarily from teaching or research assistantships and from contract or grant-funded assistantships. Assistantships typically require 13-20 hours of work per week under the direction of a faculty member and are accompanied by a tuition scholarship.

Students initiate applications for financial support, and awards are made on the basis of merit, experience, and interests. Assistantships may be renewed for a total of up to four semesters.

Fellowships are offered to new students and are awarded as a flat sum of money. There is no work requirement for a fellowship.

Students applying for financial support are encouraged to submit application materials and requests for support by Jan. 15. Students who apply after that date are considered only as remaining funds permit.

## Career Advancement

Today's planners find themselves in demand for such diverse jobs as sustainability coordinator and planner, environmental analyst/planner, land use planner, transportation planner, community development planner, zoning coordinator, water resources planner, community organizer, economic development planner, recycling coordinator, planning director, neighborhood planner, state legislative analyst, planning consultant, and nonprofit project manager or director.

Recent graduates have taken positions with city, metropolitan, and regional planning agencies; state and federal government; nonprofit organizations; and private consulting firms. They work in all geographic regions of the United States and in countries around the world.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
c Students are encouraged to complete an internship in a planning agency or related organization. To earn $2 \mathrm{~s} . \mathrm{h}$. of credit for the internship, students must submit a brief paper summarizing and evaluating their experience.
d An extended internship, consisting of at least five months of fulltime employment in a planning-related organization, may qualify as a practicum. It carries $5 \mathrm{~s} . \mathrm{h}$. of credit and substitutes for the internship and the capstone courses.
e Students must complete at least 9 s.h. in one of the following concentration areas: Transportation Planning, Housing and Community Development, Economic Development, Land Use and Environmental Planning, or Geographic Information Systems. Work with faculty advisor to determine appropriate coursework and sequence.
f Capstone coursework; grade of B-minus or better required.
g Complete at least 6 s.h. of electives. Work with faculty advisor to determine appropriate coursework and sequence.
$h$ If the oral examination is passed, then the written examination does not need to be taken.

## Public Digital Humanities

## Advisor

- Thomas Keegan (English)

Graduate certificate: public digital humanities
Faculty: https://www.lib.uiowa.edu/studio/people/
Website: https://www.lib.uiowa.edu/studio/pdh-certificate/
The Certificate in Public Digital Humanities welcomes students with no prior training in the digital humanities. The certificate program offers credentials to graduate students who plan to incorporate digital technology into their future research, teaching, or careers. Students learn interdisciplinary ways of conceiving of their own and other's digital work, while exploring digital tools that underlie many humanistic and social scientific research projects. Students also learn important skills such as how to manage an original project, collaborate with digital humanities scholars and practitioners across different departments, programs, units, and centers, participate in teams, and communicate technical information to a nonspecialist audience.

The certificate provides crucial training and education for the $21 \mathrm{st}-$ century humanist interested in the intersection between technology and research.
The Certificate in Public Digital Humanities is administered by the Graduate [p. 1589] College.

## Sustainable Development

## Director

- David M. Cwiertny (Chemical and Biochemical Engineering/ Chemistry/Civil and Environmental Engineering)

Graduate degree: MS in sustainable development
Website: https://sdg.grad.uiowa.edu/
First introduced in the Brundtland Report of 1987, Our Common Future, the principle of sustainable development calls for meeting the needs of society today without compromising the ability of future generations to meet their own needs. Today, the United Nations Sustainable Development Goals (UN SDGs) provide a blueprint for sustainable development that addresses global challenges including climate change, access to clean water, healthy air, safe and reliable energy, long-term economic well-being, equity, responsibility to other species, and conflict over limited resources.

Through training centered on the UN SDGs, the sustainable development program prepares students for technical and/or policy leadership roles in the private or public sector to advance the sustainable development of communities in Iowa, across the United States, and around the world. Leveraging existing strengths at the University of Iowa in the areas of resource sustainability and engagement for sustainable communities, the sustainable development program is built on coursework, community-engaged projects, and professional development experiences that culminate in the MS in sustainable development.

This program of study aims to train the next generation of sustainability professionals for career placement opportunities at state and federal agencies, national laboratories, policy think tanks, nongovernmental organizations (NGOs), and in the private sector.

## Programs

## Graduate Program of Study

## Major

- Master of Science in Sustainable Development [p. 1696]

## Courses

## Sustainability Development Goals Courses

SDG:4000 The United Nations Sustainable Development Goals: A Blueprint for a Sustainable Future 3 s.h. Establishment of baseline competencies among students from diverse backgrounds; introduction to the United Nations sustainable development goals framework; foundational concepts for sustainable development (e.g., life-cycle analysis, systems thinking, data processing, visualization). Same as GEOG:4000.

## SDG:5100 Building Future Leaders in Sustainable

## Development

3 s.h.
Focus on competencies needed to translate training and research into action for social good; topics include ethics, cultural competency, collaboration and team science, use-inspired design, and engagement. Same as CEE:5151.

SDG:5225 Communicating Data Through Stories 3 s.h.
How to communicate science effectively and responsively with multiple audiences from peers and professors to potential employers, policymakers, and the lay public; focus on speaking about science clearly and vividly in ways that can engage varied audiences, especially those outside the student's own field; connecting and finding common ground with an audience, defining goals, identifying main points, speaking without jargon, explaining meaning and context, using storytelling techniques and multimedia elements. Same as CEE:5225, GRAD:5225.

SDG:6000 Sustainable Communities Lab I 3 s.h.
Experience working on a two-semester project involving a current planning issue, usually for a client. Requirements: urban and regional planning graduate standing. Same as URP:6209.
SDG:6210 Sustainable Communities Lab II 3 s.h. Continuation of URP:6209. Prerequisites: URP:6209. Requirements: urban and regional planning graduate standing. Same as URP:6210.

## SDG:6325 Thesis: Sustainable Development

1-5 s.h.

## Sustainable Development, MS

This interdisciplinary program equips students with higher-order learning skills as well as more practical, applied preparation for a variety of careers in sustainable development. The program's goal is to produce trainees with not only the fundamental and theoretical understanding expected from more traditional graduate degree recipients, but also the highly marketable, professional skills of someone graduating from an applied field of study.

## Learning Outcomes

Graduates will be able to:

- analyze problems, conduct research, and make policy recommendations on topics related to the United Nations Sustainable Development Goals (UN SDGs), and anticipate the social, economic, political, technological, human health, and environmental impacts of their proposed interventions;
- communicate science effectively and responsively with diverse audiences, from technical peers to potential employers, policymakers and the public, as well as communicate across modern forms of media intended for public engagement and dissemination of advances toward sustainable development goals; and
- demonstrate qualities essential to thrive across a range of careers, including interpersonal skills (e.g., collaboration, teamwork, and cultural competence), problem-solving abilities (e.g., inquiry, critical thinking, and creativity) and professional strengths (e.g., work ethic, responsible conduct, management, and leadership).

## Requirements

The interdisciplinary Master of Science program in sustainable development requires a total of 30 s.h. of graduate credit to earn the degree without thesis. Students may choose to earn the degree with thesis. All students must maintain a cumulative grade-point average of at least 2.75 .

With the approval of their faculty advisors, students develop a study plan that satisfies the requirements of their chosen curriculum. All students must successfully complete the core courses and take two analytical and methods courses plus elective coursework that is focused around one of the United Nations Sustainable Development Goals (UN SDGs).
The thesis option requires completion of a project with a program partner (e.g., a community, nongovernmental organization (NGO), public agency, or private sector partner) and culminates in a required project portfolio.
Some grants also require students to complete a responsible conduct of research or research ethics course (ENGR:7270 Engineering Ethics). Students should check with the program director to determine whether this requirement applies to them.

The MS with a major in sustainable development requires the following coursework.

## Core Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: | The United Nations Sustainable | 3 |
| SDG:4000/ | Development Goals: A <br> Blueprint for a Sustainable <br> Future |  |
| CEE:5151/SDG:5100 | Building Future Leaders in <br> Sustainable Development | 3 |

CEE:5225/
GRAD:5225/
Communicating Data Through

SDG:5225
URP:6209/SDG:6000 Sustainable Communities Lab I 3
URP:6210 Sustainable Communities Lab II 3

## Analytical and Methods Courses

Students choose two courses (at least 6 s.h.) offered by supporting programs. The courses provide students with training in analytical competencies necessary for sustainable development, including spatial analysis, statistics, informatics, data management, and decision analysis.

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| Two of these: |  |  |
| CEE:5310/IGPI:5311/ | Informatics for Sustainable | 3 |
| URP:5310 | Systems |  |
| CEE:5460 | Water Quality and Flow | 3 |
| GEOG:3050/ <br> IGPI:3050 | Geospatial Programming | 3 |

| GEOG:4580/ <br> IGPI:4581 | Introduction to Geographic Databases | 3 |
| $\begin{aligned} & \text { URP:6200/ } \\ & \text { PBAF:6200 } \end{aligned}$ | Analytic Methods I | 3 |
| $\begin{aligned} & \text { URP:6225/ } \\ & \text { PBAF:6225 } \end{aligned}$ | Applied GIS for Planning and Policy Making | 3 |
| $\begin{aligned} & \text { URP:6258/ } \\ & \text { PBAF:6258 } \end{aligned}$ | Systems and Scenario Thinking | 3 |

## Electives

Students complete at least 9 s.h. in elective coursework structured around the 2030 Sustainable Development Goals (SDGs). Students are required to focus on one SDG and complete three courses in that specialization area to provide depth in one area.

## Affordable and Clean Energy

| Course \# | Title | Hours |

| Admission |  | 3 |

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations and the Graduate College Admission Requirements on the Graduate College website and the sustainable development admission requirements.

Prospective students must hold a baccalaureate degree or the equivalent from an accredited institution with preparation appropriate for advanced study in the field of sustainability. Students with an undergraduate degree in natural and social sciences, technology, engineering, and/or mathematics will be well prepared to thrive in this interdisciplinary degree program. The program is intentionally designed to be inclusive for students coming from different and diverse academic backgrounds given the broad range of perspectives and expertise that are needed in moving society closer toward sustainable development goals.
Application materials must include:

- one- or two-page self-statement describing an applicant's interest in the sustainable development program, how formal and informal experiences make the applicant a good fit for the program, and how the applicant can uniquely contribute to the program; the statement should briefly discuss the career path(s) the applicant intends to pursue upon completion of the degree;
- a résumé; and
- three letters of recommendation.

Applicants whose first language is not English must submit official test scores to verify English proficiency. They can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Duolingo English Test (DET).

## Career Advancement

Graduates can obtain employment across a variety of sectors that intersect with sustainability and sustainable development, including jobs in public service at the local, state, or federal level in all areas related to the environment (e.g., watershed management coordinators, state natural resource departments, and sustainability directors for cities across the United States, analysts and scientists at governmental agencies such as the U.S. Department of Agriculture or the U.S. Environmental Protection Agency. Graduates may find employment in the private sector as consultants for industries seeking to improve the sustainability of their operations and processes (e.g., sustainable
supply chain, waste management, minimization, and sustainability reporting, metric development, and management).

Graduates are better qualified for positions in the private sector including chief sustainability officer, director of sustainability, and sustainability project manager or coordinator. Opportunities also exist for careers in global development, working internationally with nongovernmental organizations (NGOs), and other organizations that strive to advance sustainable development goals worldwide, particularly in resource-constrained areas of the developing world. In addition, degree recipients are well positioned to pursue additional graduate studies toward a PhD, MBA, or JD degree

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Sustainable Development, MS

Course
Academic Career
Any Semester
30 s.h. must be graduate level coursework; graduate transfer credits allowed upon approval. More information is included in the General Catalog and on department website. ${ }^{\text {a, }}$ b
Graduate College program GPA of at least 2.75 is required.
c

a This interdisciplinary program equips students with higher-order learning skills as well as more practical, applied preparation for a
variety of careers in sustainable development. The program's goal is to produce trainees with not only the fundamental and theoretical understanding expected from more traditional graduate degree recipients, but also the highly marketable, professional skills of someone graduating from an applied field of study.
b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
d Work with faculty advisors to select appropriate coursework from an approved list; refer to the General Catalog for more information.
e Students choose two courses (at least 6 s.h.) offered by supporting programs.
f Some grant funded students are also required to complete a responsible conduct of research or research ethic course (ENGR:7270); students should check with the SDG Program Director to determine whether this requirement applies to them.
Hours
g Students complete at least 9 s.h. in elective course coursework structured around the 2030 Sustainable Development Goals (SDGs). Students are required to focus on one SDG and complete three courses in that specialization area to provide depth in one area.
h Completion of all coursework.

## Translational Biomedicine

## Executive Dean

- Patricia L. Winokur

## Education Director

- Donna A. Santillan (Obstetrics and Gynecology)

Graduate degree: MS in translational biomedicine
Website: https://icts.uiowa.edu/
The Translational Biomedicine Program offers training in translational biomedicine, biostatistics, ethics, and in various elective areas while providing time to conduct mentored research under the direction of an interdisciplinary team. It is specifically tailored to clinicians in medicine, nursing, pharmacy, dentistry, and psychology, as well as to PhD researchers conducting translational research in the biomedical sciences.

## Related Programs

## Certificate

The Department of Epidemiology and the Institute for Clinical and Translational Science offer the graduate certificate program in translational and clinical investigation; see the Certificate in Translational and Clinical Investigation [p. 2037] (College of Public Health) in the catalog.

## Master of Science

The Department of Epidemiology (College of Public Health) offers an MS in clinical investigation [p. 2000] which may be a good alternative to the Translational Biomedicine Program.

## Programs

## Graduate Program of Study

## Major

- Master of Science in Translational Biomedicine [p. 1700]

## Facilities

Training is conducted mainly in the laboratories and teaching facilities of the Carver College of Medicine and the College of Public Health. The university's Institute for Clinical and Translational Science is available for research training. The program also is linked with the Carver College of Medicine's graduate training program in clinical research.

## Courses

## Translational Biomedicine Courses

## TBM:5000 Translational Biomedical Research

 arr.Student research guided by mentor.
TBM:5001 Introduction to Translational Biomedicine 3 s.h. Basis for clinical and translational research; introduction to principles of experimental design for patient- and population-oriented research; approaches available to clinical and translational investigators (e.g., statistics, questionnaires, ethics, imaging, information technology); infrastructure that supports clinical and translational investigators at the University of Iowa and nationally; for early-career clinicians/ scientists and established investigators. Requirements: enrollment in translational biomedicine MS program.

TBM:5002 Critical Thinking and Communication: Study Design and Commercialization

1 s.h.
Various study design methodologies and process of commercialization; presentations of current projects. Requirements: candidacy for MS in translational biomedicine.
TBM:5003 Critical Thinking and Communication: Scientific Writing and Presentation Strategies
Grant development and journal writing process; development of effective scientific presentations.
TBM:5004 Critical Thinking and Communication: Career Development and the Funding Process 1 s.h. Introduction to a variety of career development awards and their requirements; opportunity to work on personal career development grant applications.

TBM:5005 Critical Thinking and Communication: Leadership, Team Science, and Community Engagement

1 s.h.
Leadership skills for managing and developing a research team; leading and organizing a team; managing and sharing resources with other faculty and fellows; finding, hiring, and keeping good people; leading productive meetings; delegation strategies, resources and tools for quality community engagement; information on applying and teaching leadership skills to mentees.

## Translational Biomedicine, MS

## Learning Outcomes

The goals of the MS program in translational biomedicine are to:

- promote interaction and collaboration among researchers across the translational research spectrum;
- enrich understanding of T1 research (laboratory), T2 research (application to evidence-based practice), T3 research (implementation and dissemination), and T4 research (population studies and policy development) for basic and clinical scientists to expand the relevance of their work in these areas; and
- develop skills in ethical decision-making, scientific leadership, team building, networking, and research program management.

## Requirements

The Master of Science program in translational biomedicine (TBM) requires a minimum of 34 s.h. of graduate credit plus a final project. Students must maintain a cumulative graduate grade-point average of at least 3.00 in all UI coursework. The plan of study for students in the two-year program is tailored to their scientific goals and interests.

The program is designed to teach members of scientific teams how to move biomedical discoveries into clinical applications and beyond. It is tailored for individuals who have completed doctoral-level training in one area of biomedicine and wish to apply their expertise to the translational research spectrum. The program admits individuals who hold medical or graduate degrees (e.g., MD, DO, DDS, DNP, PhD, PharmD, DVM, or the equivalent) and are employed by the University of Iowa at the faculty ranks of associate professor, assistant professor, instructor/associate, fellow physician, or postdoctoral scholar/fellow.

The MS with a major in translational biomedicine requires the following coursework.

## Core Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| TBM:5000 | Translational Biomedical Research | 9 |
| TBM:5001 | Introduction to Translational Biomedicine | 3 |
| TBM:5002 | Critical Thinking and Communication: Study Design and Commercialization | 1 |
| TBM:5003 | Critical Thinking and Communication: Scientific Writing and Presentation Strategies | 1 |
| TBM:5004 | Critical Thinking and Communication: Career Development and the Funding Process | 1 |
| TBM:5005 | Critical Thinking and Communication: Leadership, Team Science, and Community Engagement | 1 |
| BIOS:4120 | Introduction to Biostatistics | 3 |
| EPID:4400 | Epidemiology I: Principles | 3 |
| EPID:6950 | Clinical Research Ethics | 2 |
| One of these: |  |  |
| BIOS:5120 | Regression Modeling and ANOVA in the Health Sciences | 3 |

## Electives

Students must earn a minimum of 6 s.h. in graduate-level elective coursework pertinent to their educational goals. Electives may be selected from the lists below, or students may obtain approval for other courses with program administration approval.

## Biostatistics

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BIOS:5130 | Applied Categorical Data <br> Analysis | 3 |
| BIOS:5310 | Research Data Management | 3 |
| BIOS:6210 | Applied Survival Analysis | 3 |
| BIOS:6310 | Introductory Longitudinal Data | 3 |
| BIOS:7600 | Analysis | $0-3$ |

## Device Development

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BME:5101 | Biomaterials and Implant <br> Design | 3 |
| BME:5640 | Ergonomics of Occupational <br> Injuries | 3 |

## Drug Discovery

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PCOL:4130 | Drug Mechanisms and Actions | 3 |
| PCOL:5135 | Principles of Pharmacology | 1 |
| PCOL:5136 | Pharmacogenetics and <br> Pharmacogenomics | 1 |
| PCOL:6203 | Pharmacology for Graduate <br> Students |  |
| PCOL:6250 | Advanced Problem Solving in <br> Pharmacological Sciences | 5 |
| PHAR:5512 | Drug Discovery and <br> Mechanisms | 1 |

## Epidemiology

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| EPID:5214 | Meta-Analysis of <br> Epidemiologic Studies | 3 |
| EPID:5241 | Statistical Methods in <br> Epidemiology | 4 |
| EPID:5500 | Introduction to Clinical <br> Epidemiology | 3 |
| EPID:5560 | Biomarkers in Epidemiology |  |
| EPID:5610 | Intermediate Epidemiology <br> Data Analysis with SAS and R | 3 |
| EPID:6400 | Epidemiology II: Advanced <br> Methods | 3 |
| EPID:6900 | Design of Intervention and <br> Clinical Trials | 4 |
|  |  | 3 |

## Genetics

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ACB:6200 | Special Topics in Genetics | 1 |
| BIOL:3373 | Human Population Genetics and | 3 |
|  | Variation |  |
| BIOL:3713 | Molecular Genetics | 4 |

| BIOL:5412 | Fundamental Genetics - <br> Graduate Lecture | 3 |
| :--- | :--- | ---: |
| GENE:6150 | Genetic Analysis of Biological <br> Systems | 3 |
| GENE:7191 | Human Molecular Genetics | 3 |
| MMED:6250 | Mechanisms of Parasitism <br> Journal Club | 1 |
| PCOL:5136 | Pharmacogenetics and <br> Pharmacogenomics | 1 |

## Informatics

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BIOL:4213 | Bioinformatics | 2,4 |
| BIOL:4386 | Introduction to Scientific | 3 |
|  | Computing for Biologists |  |
| CS:5110 | Introduction to Informatics | 3 |
| IGPI:3314 | Genomics | 3 |

## Innovation

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ENTR:2000 | Entrepreneurship and | 3 |
|  | Innovation | $2-3$ |
| ENTR:9400 | Evaluating Innovation |  |
| Opportunities | 1 |  |
| MED:8073 | Biomedical Innovation | 4 |

## Neuroscience

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BIOL:2753 | Introduction to Neurobiology | 3 |
| NSCI:5212 | Foundations in Behavioral and | 4 |
|  | Cognitive Neuroscience |  |
| NSCI:5653 | Fundamental Neurobiology I | 3 |
| PSY:6370 | Principles of Neuropsychology | 3 |

## Final Project

In addition to completion of the $34 \mathrm{~s} . \mathrm{h}$. in required coursework, scholars must submit a final project. The project may be in one of the following formats.

- A complete grant application for a K01, K08, K23, R01, R03, R21, a U.S. Department of Veterans Affairs career development award, or the equivalent. The R03 completed as part of the required grant writing course may not be submitted as the final project.
- An original research manuscript that is of acceptable quality for a peer-reviewed biomedical journal (the paper can be ready for submission, under review, or already published). The manuscript must contain the following components: a structured abstract; an introductory section that adequately frames the research question addressed; and a methodology section that sufficiently describes the following elements (study design, study sample, data collection strategies and sources, data elements, and data analysis), results of the study, and a discussion including a description of the relationship of the current findings to prior relevant research and/or policy implications of the findings and methodological limitations.

## Admission

The Translational Biomedicine Program welcomes applicants who have diverse educational and scientific backgrounds and varied research interests. Applicants must have a strong interest and
background in a health science profession and knowledge of basic sciences and medicine.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Translational biomedicine applicants must:

- have a doctoral-level degree in a biomedical discipline (e.g., MD, DO, DDS, DNP, PhD, PharmD, DVM, or the equivalent);
- be employed by the University of Iowa as an associate professor, assistant professor, instructor/associate, a fellow physician, or a postdoctoral scholar/fellow;
- be engaged in scientific research with a University of Iowa mentor who has funding from a peer-reviewed source (e.g. National Institutes of Health, National Science Foundation, and so forth);
- hold a bachelor's degree from a regionally accredited American college or university or an equivalent degree from an international institution, as determined by the University of Iowa Office of Admissions; and
- have a grade-point average of at least 3.00 or the international equivalent, as determined by the University of Iowa Office of Admissions.

Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL), a score of at least 7.0 with no subscore lower than 6.0 on the International English Language Testing System (IELTS), or a score of at least 105 on the Duolingo English Test (DET).
Applicants must submit a curriculum vitae, a statement of research interest and career goals, and three letters of recommendation. One letter must be from the applicant's UI research mentor; the program recommends that the second be a letter of support from the applicant's department chair.

Students and their mentors must guarantee sufficient time for coursework and research. The program does not require a specific percent effort, but successful candidates would likely devote $50-75 \%$ of their time to a combination of coursework and research.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
b Complete one of the following formats: a complete grant application (K01, K08, K23, R01, R03, R21, or VA career award) or an original research manuscript ( $>2500$ words) of published or in-publishable quality for a peer-reviewed journal. Additional requirements apply.
c Elective coursework pertinent to educational goals and background may be selected from specific lists in Biostatistics, Device Development, Drug Discovery, Epidemiology, Genetics, Informatics, Innovation, and Neuroscience. Program administration approval required for other courses.

# Transportation Planning 

Director, School of Planning and Public Affairs

- Lucie Laurian

Coordinator, Transportation Planning

- Steven Spears (Planning and Public Affairs)

Graduate certificate: transportation planning
Faculty: https://sppa.uiowa.edu/faculty-staff
Website: https://sppa.uiowa.edu/
Transportation is vital to modern society. The United States, like other nations, faces many critical transportation problems and issues. The highway system is reaching an advanced stage of its life cycle, transportation finance is unsustainable, public transit operating deficits are growing, the quality of transportation available to many citizens is unacceptably low, serious inequities exist between transportation modes, and extensive changes are called for in traditional transportation institutions. New approaches to financing the nation's road system are badly needed.

Transportation engineers and planners draw on a number of skills to respond to the challenges they face. They must analyze and forecast the movement of people and goods within and between cities; identify effective and efficient means for providing desired transportation services; price these services properly; and evaluate the impact that transportation changes have on land use, environmental quality, economic activity, the local or regional economy, and various subgroups within society.
The graduate Certificate in Transportation Planning is designed for:

- practitioners in planning, engineering, and other fields who want to increase their transportation planning expertise; and
- graduate students at the University of Iowa or other institutions with an interest in the field.

The Certificate in Transportation Planning is coordinated by the School of Planning and Public Affairs [p. 1678].

## Programs

## Graduate Program of Study

## Certificate

- Certificate in Transportation Planning [p. 1704]

## Transportation Planning, Graduate Certificate

## Requirements

The graduate Certificate in Transportation Planning requires 12 s.h. of credit. Students must maintain a Graduate College major program grade-point average of at least 3.00 for the certificate.

In order to cover the variety of topics needed for professionals in transportation planning, the certificate curriculum includes transportation planning history, policy, analytic methods, and the relationship between travel, city form, and urban design. For the capstone course, students undertake a real-world transportation project in collaboration with a community partner through the Iowa Initiative for Sustainable Communities.

The first course in the certificate program introduces students to fundamentals of urban planning history, theory, and the symbiotic relationship between transportation systems, urban form, and sustainability. Elective courses deepen knowledge through specialization in areas of policy, travel behavior analysis, and traffic safety. Students complete the capstone project as their last course to earn the certificate.

The certificate may be completed in one calendar year or completed over a two-year span if students complete one transportation course per semester. This option accommodates part-time students and those currently enrolled in a two-year master's degree program at the University of Iowa.

Courses are taught primarily in hybrid or online formats. Some elective courses are offered on campus only; however, the certificate may be completed entirely online by selecting courses available in that format. Courses are taught by faculty members in the School of Planning and Public Affairs and the College of Public Health.
The Certificate in Transportation Planning requires the following work.

## Required Coursework

| Course \# | Title | Hours |
| :--- | :--- | :--- |
| This course (completed first): |  |  |
| URP:6266 | Transportation, Urban Form, <br> and Sustainability | 3 |
| Two of these: | Transportation Research | 3 |
| URP:4262 | Methods and Analysis |  |
| URP:6233 | Public Finance and Budgeting | 3 |
| URP:6260 | Transportation Policy and <br> Planning | 3 |
| CPH:4220 | Global Road Safety | 3 |
| And this course: | Transportation Planning Studio | 3 |
| URP:6270 | (consult advisor) |  |

Master of Science in urban and regional planning students may apply to the certificate program through the Graduate College. See Planning and Public Affairs [p. 1678] in the catalog for information about graduate study and degree requirements in the school.

## College of Law

## Dean

- Kevin K. Washburn

## Associate Deans

- Carin N. Crain, Thomas P. Gallanis, Emily A. Hughes, Robert T. Miller, Adrien K. Wing

## Assistant Deans

- Collins B. Byrd, Jill De Young, Gordon S. Tribbey

## Director, Law Library

- Carissa J. Vogel

Undergraduate certificate: human rights
Professional degrees: JD; LLM; MSL; SJD
Faculty: https://law.uiowa.edu/faculty-and-scholarship/meet-ourfaculty
Website: https://law.uiowa.edu
The University of Iowa College of Law is the oldest law school west of the Mississippi River. Founded in 1865 as the Iowa Law School, the college is a charter member of the American Association of Law Schools and an American Bar Association-approved law school.
The College of Law is part of Iowa City's unique cultural community. Students, faculty, and staff work together in a friendly, relaxed, and productive environment that puts students' needs first.

A longstanding commitment to inclusion and diversity is a source of pride for the College of Law, which was one of the first schools in the nation to grant a law degree to a woman (1873) and to an African American (1879). Diversity is central to the college's educational philosophy and to its core mission of preparing culturally proficient graduates who are capable of intellectual inquiry, critical and reflective thinking, and engagement.

Iowa's challenging law school curriculum carefully balances substantive courses, perspective offerings, examination of ethical values and professionalism, and experiential programs, including a highly active in-house legal clinic. The college's low student-tofaculty ratio and the faculty's open-door policy ensure that students have opportunities for interaction and collaboration with their law professors.

The college's writing program-one of the strongest among law schools nationwide-is integral to all students' academic experience. During both semesters of their first year, students take a small-section course in legal analysis, writing, and research. During the second and third years, they complete four additional writing units. Among opportunities for completing the writing requirement is to work on one of the law school's four student-run scholarly journals: Iowa Law Review; Journal of Corporation Law; Journal of Gender, Race \& Justice; and Transnational Law \& Contemporary Problems.

## Programs

## Undergraduate Program of Study

- Certificate in Human Rights (under University of Iowa Center for Human Rights [p. 1726])

## Professional Programs of Study

- Juris Doctor [p. 1720]
- Master of Laws [p. 1723]
- Master of Studies in Law [p. 1724]

The Master of Studies in Law program is not accepting graduate students at this time.

- Doctor of Juridical Science [p. 1725]

## Facilities

## Facilities and Resources

## Boyd Law Building

The Willard L. Boyd Law Building exemplifies Iowa's continuing commitment to legal education and the legal profession. The building's large, circular structure reflects the special character of the Iowa law school and allows the college to operate in a physical environment in which every square foot of space is designed to promote the college's academic and professional programs.
Among the building's facilities are classrooms, the Levitt Auditorium, the Law Library; faculty and administrative offices, offices for the college's cocurricular programs, meeting rooms, and a bookstore. The first floor features the Lauridsen Family Law Commons, a renovation project completed in 2016. This space provides ample areas for studying, including two conference rooms, two seminar rooms, and the Court Café. The third floor of the Boyd Law Building is where the college's clinical law programs are located. This suite functions as a teaching law firm, offering ease of access, usability, and visibility.

## Law Library

The centerpiece of the Boyd Law Building is the University of Iowa Law Library. The Law Library has one of the most comprehensive collections of legal materials in the country, containing more than 1.4 million separately cataloged titles. A particular strength of the library is its collection of U.S. legal materials. The Law Library also holds an exceptionally strong collection of materials in foreign, comparative, and international law, including a print collection comprising more than 280,000 volumes and over 1,500 serials and subscriptions.

## Research Centers and Programs

Participation in research centers and outreach programs is an important part of the College of Law's service to professional and civic communities.

## Iowa Innovation, Business and Law Center

The Iowa Innovation, Business and Law Center is an interdisciplinary teaching and research venture that brings together faculty members who teach and study problems of business, technology, innovation, regulation, and legal policy from diverse perspectives. The center's purpose is twofold: first, it offers an innovative curriculum and outstanding legal training in areas pertaining to government regulation of entrepreneurship, innovation, and management of resources; second, it encourages creative individual and collaborative interdisciplinary research in these areas.

## Labor Center

The University of Iowa Labor Center provides educational programs and research support to Iowa's working people and their organizations. Since 1951, the Labor Center has acted as a bridge between the university and Iowa's labor community.

## Larned A. Waterman Iowa Nonprofit Resource Center

The Larned A. Waterman Iowa Nonprofit Resource Center offers information and assistance from across the University of Iowa to help Iowa's charitable nonprofit organizations become more effective in building their communities.

## Law, Health Policy and Disability Center

The Law, Health Policy and Disability Center is a leader in law, technology, education, and research focused on improving the quality of life for persons living with disabilities. Based at the University of Iowa College of Law, the center concentrates on public policy and its impact on persons with disabilities, emphasizing employment, selfdetermination, and self-sufficiency.

## National Health Law and Policy Resource Center

The National Health Law and Policy Resource Center, founded in 1981, promotes laws and public policies that foster and facilitate accessible, affordable, and quality health services and related services for all Americans, particularly members of vulnerable and disadvantaged populations. The center provides a nonpartisan forum for informed dialogue between academics, practitioners, and public policy makers based on the best available data and information about important health law and policy issues.

## University of Iowa Center for Human Rights

The University of Iowa Center for Human Rights was founded in 1999 as an outgrowth of the university's year-long commemoration celebrating the 50th anniversary of the Universal Declaration of Human Rights. Based in the College of Law, the center engages in human rights teaching, scholarship, and public engagement.

## Courses <br> - Law Courses [p. 1706] <br> - Law Study Abroad Courses [p. 1719]

The following courses are those offered by the College of Law during the past four academic years and those scheduled to be offered during the coming academic year. See Courses and Curriculum on the College of Law website for a list of College of Law courses defined by Interpretation 509-1 of the American Bar Association Standards for the Approval of Law Schools.

## Law Courses

LAW:4800 Undergraduate Clinical Law Internship Program arr. Students learn about law school experience and legal careers through intensive training in a range of lawyering skills and collaboration with teams of law students on actual client matters; students enrolled in the Center for Environmental Law and Policy work with law students representing a nonprofit or other entity using nonlitigation means to advance social or economic justice; students enrolled in the Federal Criminal Defense Clinic work as investigators with law students representing indigent criminal defendants in the Northern District of Iowa; involves weekly seminars and team supervision, biweekly undergraduate supervision meetings.

## LAW:8006 Civil Procedure

Procedure before trial; commencement of a suit; subject matter jurisdiction; jurisdiction over the person and venue; pleadings, motion practice, including summary judgment, simple joinder of parties and claims in determining scope and size of the lawsuit; pretrial discovery procedures, the trial, claim and issue preclusion.

LAW:8010 Constitutional Law I
Constitutional allocation of governmental powers; doctrine of judicial review and nature of judicial function in constitutional cases; relationships among several branches of national government; the federal system, including powers delegated to national government, powers reserved to states, and intergovernmental immunities; role of judicial process in structuring limits within which society operates; institutional development of legal system, relationship among institutions within the system.

## LAW:8017 Contracts

Law that governs the otherwise unregulated sector of the economy and concerns the making and enforcement of promises, usually as part of a bargain; basics-formation of agreements, consideration, invalidating causes, parol evidence and interpretation, conditions, remedies; roles of promises and promissory exchanges in a modern economy; limitations the law places on freedom of contract.
LAW:8022 Criminal Law
3 s.h.
Basic understanding of substantive criminal law; underlying premises of and justifications for criminal law; emphasis on general doctrines that dictate the minimum elements necessary to impose criminal liability, essential requirements of culpable conduct (an actus reus, or guilty act), blameworthy mental state (a mens rea or guilty mind); rape, homicide, causation, attempt, conspiracy, accomplice liability; various defenses to criminality, such as self-defense, duress, intoxication, insanity, diminished capacity.
LAW:8026 Introduction to Law and Legal Reasoning 1 s.h. Basic concepts and intellectual skills necessary for understanding the first-year curriculum.

LAW:8027 Introduction to Legal Theory and Perspectives on the Law 1 s.h. Introduction to foundational legal theories and perspectives on the law necessary for understanding the law and law school curriculum.

## LAW:8028 Advanced Bar Preparation

3 s.h.
Extended bar preparation for third-year law students that supplements regular bar exam course; provides strong conceptual understanding of the most highly tested principles of law across three or four subjects; flexible and robust analytical framework to solve bar exam problems from multiple choice to essay questions; preparation to learn skills to study for bar exam following law school graduation.
LAW:8032 Legal Analysis Writing and Research I 2 s.h. Structured development of effective skills in legal analysis, writing, and research; first of a two-semester sequence.
LAW:8033 Legal Analysis Writing and Research II 3 s.h.
Structured development of effective skills in legal analysis, writing, and research; second of a two-semester sequence. Prerequisites: LAW:8032.
LAW:8037 Property 4 s.h.
Concept of private property as one of legal system's basic foundations; development of Anglo-American property law with changing currents of economic, social, political thought; understanding decision-making by courts in common-law tradition, legislative enactments; origins of property rights; possession and ownership; capacity of property law to recognize a wide range of interest configurations; ease and reliability in conveyance of property interests commercially, gratuitously; function of public recording; role of adverse possession, long-standing property relationships; responsiveness of property law to social change illustrated by modern reforms in landlord-tenant act.

## LAW:8046 Torts

4 s.h.
Development of tort principles; civil responsibility for harms to tangible personal and property interests; roles of legislatures, judges, juries; intentional harms, negligence, and strict liability considered from perspectives of jurisprudence, economics, and moral philosophy.

## LAW:8105 Administrative Law

Formal and informal procedures, processes, and functions of state and federal administrative agencies; legislative, executive, and judicial control of their actions; nature and definition of administrative agencies; permissible delegation of authority to administrative agencies; scope of agency authority; agencies' right to obtain information from members of the public; citizens' right to obtain information in agencies' possession; definition and types of administrative rules; rule-making procedure; agency discretion to make law by rule or adjudication; right to a trial-type hearing before an agency; parties' specific rights in an administrative hearing, including notice, open or closed hearing, right to counsel, evidence, nature and exclusivity of the record; agency decision-making process, including role of hearing officers, separation of functions and bias of decision makers, nature of opinion required; judicial review of administrative action, including reviewability of agency action, primary jurisdiction of agencies, exhaustion of administrative remedies, standing, scope of judicial review, mechanics of judicial review.

## LAW:8121 Advanced Legal Research Methods in Specialized Subjects

1 s.h.
Legal research methods in specific legal practice and research areas; specific topic rotates each year (litigation and ADR legal research, business and tax legal research, federal legislative history legal research, legal history research); students work with real-world examples to improve research skills related to a particular legal subject.

## LAW:8123 Advanced Legal Research

Builds on LAW:8032 and LAW:8033; in-depth exploration of American legal resources; current print and electronic resources that help students develop better, more efficient search techniques and select the most effective formats for their research; opportunity to review the basic sources of legal information, use varied techniques to access legal information, develop personal strategies for managing information; advanced training in LEXIS, WESTLAW, the internet; nonlegal information sources important to the legal community.

## LAW:8125 State Legal Research <br> 1 s.h.

Legal resources available for a particular state; exploration of current print and electronic resources, particularly low-cost electronic resources such as FastCase and the internet are explored for purposes of developing better, more efficient search techniques; selection of the most effective formats for research; sources of legal information; techniques for accessing legal information.

LAW:8146 Antitrust Law 3 s.h.
Laws dealing with restraints of trade, monopolization and mergers; history of these laws and their development in the courts; current doctrine and its underlying legal and economic theories; analytical tools of trade: sufficiency of economic efficiency as the measure of justice.

## LAW:8153 Applied Evidence

2 s.h.
Opportunities to apply the rules of evidence; use of mock case problems presenting evidentiary issues that attorneys in real practice would address by filing motions in limine; students are enabled to more fully comprehend the reasoning and rationale behind the rules, and appreciate the intricacies of applying the rules to a set of facts; focus on pretrial evidentiary litigation and specific rules of evidence. Prerequisites: LAW:8460.

3 s.h. LAW:8158 Arbitration Principles and Practice 2-3 s.h.
Introduction to law of arbitration and essential skills and procedures involved in its practice; role of arbitration in modern conflict resolution in various settings in which it is used; conceptual framework and explanatory theories for analysis of issues frequently encountered in arbitration; statutory and contractual grounds for arbitration (e.g., labor relations, employment, consumer and commercial transactions); development of skills and understanding of procedure through use of problems and exercises simulating common arbitration scenarios in which students participate as lawyers, arbitrators, and parties.
LAW:8164 Art, Law, and Ethics 3 s.h. How law and ethics apply to individuals and institutions concerned with visual arts. Same as MUSM:4045.
LAW:8166 Art Law and the Business of Art 2 s.h.
Overview of significant legal, ethical, and business issues in the art market.

## LAW:8186 Bankruptcy

3-4 s.h.
Students study the rights of individuals and entities under the federal bankruptcy laws from the perspective of both debtors and creditors; there are three types of bankruptcy proceedings-liquidation bankruptcy for consumers and businesses (Chapter 7), consumer reorganization, known as "wage earner's plans" (Chapter 13), and business reorganization (Chapter 11); students survey foundational topics relevant to all these forms of bankruptcy-in general, equal weight given to both consumer and business bankruptcies; attention given to some of the intricacies of business reorganizations towards the end of the course.

## LAW:8189 Banking Law

Overview of various bank and nonbank financial institutions (including national banks and state banks) and federal regulation of these institutions; examination of goals and policies behind bank and nonbank financial institution regulations to determine whether these goals and policies are achieved by the regulations; attention given to recent developments in regulation of bank and nonbank financial institutions.
LAW:8194 Basic Federal Income Taxation 3-4 s.h.
Operation, policies, principles of federal income tax, including gross income, deductions, property dispositions, tax accounting, assignment of income among family members, time value of money, leveraging.
LAW:8216 Civil Procedure in Pre-Trial Theory and Practice arr. The law of pleadings and other pretrial matters presented in LAW:8006; hypothetical case developed from interview to pleading to early pretrial stages; experience drafting relevant pleadings and motions. Prerequisites: LAW:8006.
LAW:8218 Civil Rights Law
3 s.h.
Civil rights law; constitutional litigation brought under Section 1983 to enforce the 4th, 8th, and 14th Amendments, specifically exploring prisoners' rights, police abuse, and substantive Due Process claims; examination of Reconstruction Era civil rights statutes (Sections 1981 and 1982) and modern federal statutes prohibiting discrimination such as Title VII and the Americans with Disabilities Act (ADA); cuttingedge civil rights issues such as affirmative action, sexual harassment, and racial identity; interpretive and strategic challenges that arise in civil rights litigation.
LAW:8224 Client Counseling
1-2 s.h.
Immersion in practice skills fundamental to any attorney-client relationship-interviewing and counseling; exploration of critical unseen factors which impact interviewing and counseling (e.g., selfawareness, cultural competence, bias, beliefs about the role of the lawyer in an attorney-client relationship); introduction and critique of three models of representation including traditional or regnant lawyering, client-centered lawyering, and rebellious or democratic lawyering.

## LAW:8230 Commercial Leasing

Commercial leasing is perhaps the most important part of the real estate business, and more lawyers practice in the area of commercial leasing than any other real estate area; focus on legal doctrine and foundational skills related to a commercial leasing legal practice. Prerequisites: LAW:8017 and LAW:8037.
LAW:8237 Comparative Corporate Governance
Today's global economy has resulted in a proliferation of multinational corporations, where frequently the parent corporation is governed by the law of one country, and one or more subsidiaries are governed by the laws of other countries; comparative assessment of advantages and disadvantages to incorporating in a particular country; focus on corporations considering mergers, acquisitions, or joint ventures with corporations outside of their own jurisdiction; and consideration of reasons why a corporation might form a subsidiary under the law of another jurisdiction.

## LAW:8241 Comparative Constitutional Law 2-3 s.h.

Comparative focus on the United States Constitution with particular emphasis on the Constitution of France and the freedom of expression in areas such as libel law, hate speech, and more; suitably tailored writing component to help students master course material while also improving their own expressive abilities.

## LAW:8263 Comparative Law <br> 2-3 s.h.

Comparative study of origins, development, and principal features of the world's main legal systems; common and civil law traditions; historical development of the main legal systems, their sources, ideologies, techniques; subjects important to international legal practice (e.g., international judicial assistance, application of foreign law in American courts; in-depth study of modern legal systems of the United States, Britain, France, Germany, Japan, Russia; introduction to other legal traditions, including preliterate tribal law, traditional Chinese and Islamic law.

## LAW:8265 English Law and Literature 2-5 s.h.

Exploration of relationships between English law and English literature at historical, practical, imaginative, and theoretical levels; students read novels, short stories, plays, poems, and nonfiction works-the earliest piece written by Geoffrey Chaucer in 1387 and most recent piece written by a barrister working in London in 2018; selections intended to provide a diverse cross-section of English literary writings that engage with and are shaped by English law.

## LAW:8266 English and European Legal History

Introduction to English and European legal history; exploration of historical anthropology of law, and, in particular, how written law evolved from custom; development of a single European legal order (medieval England); law of marriage, sexual relations, property and women's rights in comparative perspective; continental and English law.

## LAW:8267 English Law and Literature II

1 s.h.
Advanced topics in English law and literature to be taught during the London Law Program; for students who have previously completed the LAW:8265. Prerequisites: LAW:8265.

## LAW:8272 Conflict of Laws

2-3 s.h.
Examination of legal problems created when a transaction or relationship has associations with more than one state or nation; students examine questions of judicial jurisdiction (which state's or nation's courts should hear a case?), choice of law (which state's or nation's laws should determine the outcome of a case?), and enforcement of judgments (when will a state or nation enforce the judicial judgments of a different state or nation?).

3 s.h. LAW:8278 First Amendment: Freedom of Expression and Religion 3 s.h.
Examination of the First Amendment's legal protections for freedom of expression and religion; students pursue topics at greater depth than possible in required constitutional law courses; topics include historical roots of these freedoms to current controversies over their scope (i.e., regulation of online misinformation about public health and elections, or whether religious objectors should have exemptions from antidiscrimination laws).
LAW:8280 Constitutional Law II 3 s.h.
Limits on governmental power imposed by the national constitution for protection of individuals; protection of life, liberty, and property by due process and equal protection; freedom of expression and association; religious freedom and the guarantee against establishment of religion; 1st and 14th Amendments.

## LAW:8288 Consumer Finance Law <br> 2-3 s.h.

Consumer spending drives the economy; system of consumer finance -the way in which consumers consumption is financed; focus on empirical state of household finances, psychology and sociology of consumer finance, business of consumer finance, and regulation and political economy of consumer finance.

## LAW:8301 Copyrights

3-4 s.h.
Federal law of copyrights, primarily the Copyright Act of 1976; emphasis on copyright protections affecting new technologies, such as videotape, computer hardware and software, electronic data transfer, cable television rebroadcast; ability of legal concepts to keep pace with technological developments. Recommendations: LAW:8643.

## LAW:8307 Corporate Finance

1-3 s.h.
Introduction to fundamental principles of corporate finance, including financial statement analysis, valuation of corporate securities and of businesses, capital structure decisions, portfolio theory, and efficient capital markets hypothesis; focus on financial and accounting aspects of corporate decisions than with any particular body of law. Prerequisites: LAW:8331.
LAW:8309 Principles of Corporate Finance
1 s.h.
Fundamental concepts of corporate finance and accounting as accepted by the courts and applied in matters relating to securities regulation and disputes arising from mergers and acquisitions: cash versus accrual accounting; how to read and interpret schedules and disclosures contained in a company's balance sheet, income statement, and statement of cash flows; how to interpret and apply various financial ratios derived from a company's financial statements; how to understand, calculate, and apply net present value principles to evaluate investment opportunities; how to calculate equity values using the CapM equation.
LAW:8318 Corporate Governance and Control 1-4 s.h
Principal issues in creation of appropriate governance and control systems for large publicly held corporations; questions of corporate structure, shareholder voting rights, duties of directors, derivative suits, indemnification and transfers of control viewed from perspective of Delaware's statutory and common law. Recommendations: LAW:8331.
LAW:8320 Corporate and Partnership Taxation 4 s.h. Introduction to the federal tax treatment of business entities, analysis of statutory and regulatory materials, and discussion of significant business tax reform proposals.

## LAW:8322 Corporate Taxation

Influence of tax considerations on the structure of corporate transaction, from a merger to a restructuring to a securities offering; examination of primary Internal Revenue Code provisions that affect corporations and their shareholders; corporate formations, dividends, redemptions, liquidations, taxable asset and stock acquisitions, tax-free reorganizations; analysis of statutory and regulatory materials; tax reform proposals. Prerequisites: LAW:8194. Corequisites: LAW:8331.
LAW:8329 Comparative Criminal Procedure
Study abroad program.
LAW:8331 Business Associations 3-4 s.h.
Structure, characteristics of both large publicly and closely held corporations; distribution of powers among management, directors, shareholders; fiduciary duties that limit those powers; enforcement of such duties by shareholder suits; may include basic principles of agency, partnership, and limited partnership law.
LAW:8342 Topics in Criminal Law Practice
1-3 s.h.
Substantive and procedural aspects of criminal law not covered in regular College of Law criminal law and criminal procedure courses; students divided into teams (prosecutors and defense attorneys); hands-on exercises designed to reflect substantive criminal law and procedure discussion; jury selection, jury instructions, pretrial motions, client and witness interviews, depositions, investigation; ethical considerations for prosecutors and defense attorneys, including prosecutorial discretion in charging decisions and conflicts of interest. Prerequisites: LAW:8022.
LAW:8348 Criminal Procedure: Adjudication 3-4 s.h.
Adjudicatory phases of the criminal justice system: indictments and the charging process, preliminary hearings, applications for release on bail and pretrial detention, processes of discovery, guilty pleas, jury selection, conduct of criminal trials, sentencing proceedings and post-trial motions, appellate review, collateral remedies; focus on constitutional rights, specifically the Fifth, Sixth, Eighth, and Fourteenth Amendments; statutory provisions, rules of criminal procedure.
LAW:8350 Criminal Procedure: Investigation 3-4 s.h.
Guarantees and rights of the Fourth, Fifth, and Sixth Amendments to the U.S. Constitution against police and prosecutorial practices designed to investigate and prove criminal cases; protection against unreasonable searches and seizures, guarantee against extraction of involuntary confessions, privilege against self-incrimination constraints upon securing confessions (i.e., Miranda doctrine), due process protection against unreliably suggestive identification procedures, right to counsel, protection against inculpatory admissions and identification practices; exclusionary rules and remedies that enforce constitutional guarantees.

## LAW:8362 Critical Race Theory

arr.
Race relations and racial discrimination in America from perspectives of the Critical Race Theory movement (CRT); affirmative action, hate speech, queer theory, voting rights, postmodernism, liberalism, Asian-critical theory, Latin-critical theory, federal Indian law, critical white studies; critical race feminism-essentialism, motherhood, lawbreaking, employment law, sexual harassment, global issues.

## LAW:8373 Secured Transactions

3 s.h.
Article 9 of the Uniform Commercial Code; establishment and perfection of security interests pursuant to credit sales contracts; problems focusing on the interface between Article 9 and federal bankruptcy law, Article 9 and real property security; priority disputes among collateral claimants; rules related to default and rights after default; emphasis on developing an understanding of and facility with a code-based statutory scheme.
arr. LAW:8374 Debt Transactions
4 s.h.
Examination of laws and practices of modern lending; procedures for collection of unsecured debts including enforcement of judgments, exemptions, prejudgment remedies, fraudulent conveyances, and statutory liens; examination of secured transactions that involve both real property (mortgages) and personal property (security interests governed by Article 9 of the Uniform Commercial Code); equal weight given to consumer and commercial transactions.

LAW:8375 Iowa Debt Collection Law 1 s.h.
Examination of legal procedures for judicial enforcement of unsecured debts; complements secured transactions coverage of consensual liens in personal property (security interests) and Iowa real estate finance law coverage of consensual liens in real estate (mortgages). Requirements: no prior enrollment in LAW:8374.

## LAW:8376 Iowa Real Estate Finance Law <br> 1 s.h.

Examination of performance and enforcement of payment obligations secured by interests in real property (i.e., mortgages, land contracts); complements secured transactions coverage of consensual liens in personal property (security interests) and Iowa debt collection law coverage of legal procedures for judicial enforcement of unsecured debts. Requirements: no prior enrollment in LAW:8374.
LAW:8380 Entrepreneurship Law and Ethics 3 s.h.
Concepts underlying the role of lawyers in entrepreneurial decisionmaking and professional legal contexts; students gain a perspective of the life cycle of a startup financing deal, exposure to types of problems that arise over the course of a deal that jeopardizes its successful completion, and an opportunity to identify and reflect on ethical considerations that face modern transactional lawyers in the entrepreneurial world.
LAW:8392 Youth Law and Juvenile Courts 3 s.h.
Examine the criminal legal system, juvenile courts, and their impact on youth.

## LAW:8399 Election Law

 3 s.h.The Supreme Court has long declared that the right to vote is fundamental, because it is preservative of all other rights; the right to vote in theory and practice, with focus on its relationship to racial and economic justice; what has been done and what should be done to move us closer to the ideal of political equality; proper role of unelected judges in our democracy; history of the right to vote, "one person, one vote" principle, Voting Rights Act, partisan gerrymandering, voter identification, voter registration, political parties, and campaign finance.
LAW:8415 Employment Discrimination
Legal prohibitions against discrimination in employment on the basis of race, sex, national origin, age; focus on Title VII of the Civil Rights Act of 1964; procedural and remedial problems, elementary issues of proof.
LAW:8421 Employment Law
3-4 s.h.
Legal rights of employers and employees in private workplaces that do not have unions-which is more than $90 \%$ of work settings; hiring, minimum wage, independent contractors, termination, workplace privacy, employment-related intellectual property issues, covenants not to compete, occupational safety and health, and unemployment eligibility set into a context of historical origins, new developments, and contemporary trends.

## LAW:8423 ERISA: The Basics

2 s.h.
Fundamental requirements, plans and programs covered by the Employee Retirement Income Security Act of 1974 (ERISA) as amended; for students who are interested in employee benefit plans and roles of the Internal Revenue Service (IRS), U.S. Department of Labor, U.S. Government Accountability Office, and Pension Benefit Guaranty Corporation in the regulation of ERISA.

## LAW:8433 Environmental Law <br> 2-3 s.h.

Role of the legal system in addressing problems of environmental disruption, with special emphasis on air, water, hazardous waste pollution.

## LAW:8434 Wildlife and Habitat Conservation Law

 1 s.h. Introduction to the law of species and habitat protection, focusing on animals and plants located in the Macbride Nature Recreation Area, managed by UI WILD.
## LAW:8436 Energy Law and Policy

3 s.h.
Introduction to law and policy of energy generation, transmission, and distribution; focus on public utility regulation, energy efficiency and renewable energy mandates, wholesale and retail electricity markets.

## LAW:8437 Environmental Disaster Law and Policy 3 s.h.

Introduction to law and policy of environmental disasters, including climate change; complex web of United States laws related to prevention, mitigation, response, and recovery from "natural" disasters.

## LAW:8444 Estate Planning 2-3 s.h.

Introduction to will drafting, use of powers of attorney, and advance directives-topics frequently taught in courses on trusts and estates; taxes that can be imposed on the transfer of money or other property by gift (gift tax), at death (estate tax), and by certain generation skipping transfers (generation-skipping tax); interrelationship of these taxes with each other and with the income tax. Prerequisites: LAW:8194. Recommendations: LAW:8981.

## LAW:8452 European Union Law

2-3 s.h.
Law of the European Union; EU legal and institutional structure; role of the European Court of Justice in elaborating constitutional and administrative law for the EU on the basis of treaties and legislation; principle of free movement; progress of European integration.

## LAW:8456 Survey of Iowa Law

Survey of Iowa law; Iowa constitutional law, torts, criminal law, and other subjects; students gain an appreciation of unique aspects of Iowa law as well as exposure to common areas of law that attorneys practicing in Iowa are likely to encounter; may involve guest lectures from practitioners, judges, elected officials, or other visitors.

## LAW:8460 Evidence

Rules of evidence developed in common-law courts and under statutes; judicial notice; examination of witnesses; privilege and competence; remote and prejudicial evidence; hearsay; burden of proof and presumptions; roles of judge and jury.
LAW:8467 Family Law 3-4 s.h.
Creation, dissolution of marriage and parent-child relationships; lawyer's practical approach to family law problems combined with a broader view of how the law might treat those problems in light of findings from social and behavioral sciences.

## LAW:8481 Federal Courts <br> 3-4 s.h.

Role of the federal courts in our federal system of government; the federal courts' original and appellate jurisdiction; Supreme Court review of state courts' judgments; Congress' power to strip the federal courts of jurisdiction; development of federal common law; federal writ of habeas corpus; abstention doctrines; state sovereign immunity; federal remedies against state and local action; and Congress' power to create non-Article III adjudicative tribunals. Prerequisites: LAW:8006 and LAW:8010.

## LAW:8497 Federal Criminal Practice

 2 s.h.
## Introduction to each step in the criminal process together with

 instruction in advocacy skills required for the effective practice of law; complete chronology of a typical federal criminal case, from grand jury investigation through post-trial motions; importance of strategic thinking. Prerequisites: LAW:8350.LAW:8498 Federal Sentencing Advocacy 1-2 s.h.
Examination of federal sentencing scheme and procedures; application to a mock criminal case from which students draft a sentencing memoranda and present mock oral sentencing arguments to instructor; effective written and oral advocacy in federal sentencing proceedings.
LAW:8504 Corporate Crimes
1-3 s.h.
Introduction to corporate criminal law; black letter doctrines of corporate liability and sentencing; Department of Justice policies and practices that shape the course of corporate prosecutions; criminal statutes that are of frequent concern for corporations, including those that address false claims, securities fraud, bribery, and mail and wire fraud; developments occurring in this evolving area of law.

## LAW:8513 Foreign Comparative and International Legal Research <br> 1-2 s.h.

Treaty research, locating and identifying documents from international organizations and tribunals, legal research in selected jurisdictions outside the United States; variety of print and electronic sources; research methods in foreign and international law.

## LAW:8558 Genetics and the Law

Introduction to legal issues raised by genetic and genomic technologies; genetic privacy, uses and abuses of genetic testing, prenatal diagnosis, mandatory screening, genetic discrimination, regulation of genetic research, DNA banking, research on stored tissue samples, ownership of genetic material and information, and provision of genetic services including informed consent, disclosure, and duties to family members at risk for genetic disease.
LAW:8562 Health Law 2-3 s.h.
Major areas of concern in health law; tension between quality, access, costs; may include malpractice, quality control, health care financing, access (insurance, Medicare, and Medicaid), licensing, bioethics (end-of-life decisions, informed consent, surrogacy, organ transplantation).

## LAW:8563 Global Health Law

3 s.h.
Examination of legal, economic, social, ethical, and political aspects of global health; emergence of global health law commencing with acknowledgment of the human right to the highest attainable standard of health; establishment of the World Health Organization; use of international treaties and other understandings to address cross-border disease threats, including bilateral and multilateral assistance to lowincome countries; increasing adoption by countries, including the United States, of a standard core of public health laws.
LAW:8566 Health Care Financing and Delivery 2-3 s.h.
Major areas of concern in health law with focus on health care
financing and delivery, health care organizations, fraud and abuse, and antitrust.

## LAW:8567 Health Care Quality and Regulation

 3 s.h.Major areas of concern in health law with focus on quality and patient experiences; tension between quality, access, and costs; may include malpractice, quality control, licensing, and bioethics (i.e., end-of-life decisions, informed consent, surrogacy, organ transplantation).
LAW:8570 Human Rights in the World Community 1-3 s.h. Introduction to established and developing legal rules, procedures, and enforcement mechanisms that govern protection of international human rights; liberal western and developing world notions of human rights, recent examples of human rights controversies worldwide; international human rights of women.

LAW:8575 Seminar: Approaches to Human Rights 3 s.h. Engagement with historical events, philosophical narratives, legal cases, institutional reports, lived experiences, and theoretical works to study origins, functions, and history of the discourse on human rights; application of a systems thinking framework to events involving treatment of women, Indigenous peoples, disabled persons, racial and ethnic groups, and other disempowered social groups across cultures and throughout history; examination of writings that attempted to explain key historical events and ideas relevant to human rights. Same as RELS:6710.
LAW:8577 Immigration Law and Policy 1-3 s.h.
Legal, historical, social, philosophical, and policy foundations of immigration control; modern debate over immigration; criteria and procedures that govern admission of non-U.S. citizens to the United States for permanent residence and temporary visits; deportation criteria and processes; national security and civil liberties implications of immigration policy; refugees and political asylum; undocumented migrants; acquisition, loss, and significance of U.S. citizenship; focus on U.S. law with introduction to perspectives from comparative and international law; experience analyzing varied fact problems that require strategic decision-making and interpretation of complex statutory provisions.

## LAW:8584 Insurance Law

1-3 s.h.
State regulation of insurance, adverse selection and moral hazard, risk classification and rate regulation, and insurance contracts; emphasis on life, long-term care, and disability insurance; may include health insurance, reinsurance, and other types of insurance; focus on social and economic underpinnings of insurance.

## LAW:8593 Federal Indian Law

arr.
Specialized body of law allocating power and authority in Indian country that has grown up around native American peoples and their reservations; sovereignty, jurisdiction, federal Indian policy, tribal self-government.

## LAW:8594 Interest-Based Negotiation for Lawyers

2-3 s.h.
Theory and practice of an approach to negotiation, known as interestbased or problem-solving negotiation; focus of this negotiation model is not on positions of disputants, but interests that underlie these positions; interest-based negotiators attempts to generate options that satisfy, at least minimally, interest of all parties and can lead agreements from which all parties realize some gains; emphasis on acquisition and enhancement of skills necessary to apply this negotiation approach; in-class exercises. Requirements: no prior enrollment in LAW:8720.
LAW:8615 International Commercial Arbitration arr.
Formation and enforcement of agreements to enter arbitration in order to settle international business disputes; process of arbitrating an international business dispute; recognition and enforcement of arbitral awards.
LAW:8622 International Environmental Law
3 s.h.
Laws and institutions developed by the international community to deal with international environmental problems, including those of the atmosphere (acid rain, ozone depletion, radioactive fallout, climate change), hydrosphere (land-based sea pollution, sea-based vessel pollution, transboundary groundwater diversion), lithosphere (hazardous waste disposal, toxic pollutants, decertification), biosphere (driftnet fishing, endangered elephants, loss of tropical rainforests).

## LAW:8629 Taxation of International Business

## Transactions

2-3 s.h.
Introduction to United States aspects of international taxation and international tax policy issues; how the U.S. taxes foreign persons on income they derive from U.S. sources; taxation of U.S. persons on their worldwide income; U.S. bilateral tax treaty network under which many of the statutory rules regarding the taxation of foreigners are modified or supplanted; solving problems that illustrate the operation of the Code and regulations. Prerequisites: LAW:8194.

LAW:8631 International Trade Law: Basic Norms and Regulations

3 s.h.
Basic norms and legal framework of international trade as expressed in the GATT/WTO regime and U.S. trade laws; issues raised by regional trade blocs such as NAFTA; controversies such as the economic and philosophical justifications for, and objections to, free trade from a variety of perspectives.
LAW:8643 Introduction to Intellectual Property 1,3-4 s.h. Introduction to some of the most important intellectual property rules; goals and theories underlying these rules; common ways in which ideas may be protected-from basic form of protection (secrecy and trace secrecy) to exclusive rights granted over inventions (patents) and creative works (copyright), and concluding with rights related to market-based identities (trade and service marks); brief exploration of ways in which debates over intellectual property rights have permeated modern culture.
LAW:8644 Information Privacy Law
3 s.h.
Every day when we go about the world, we share bits of data about us. Who can amass that data, who can use it, and for what ends? Introduction to information privacy law and policy; law of information privacy; students address statutory, common law, regulatory, and constitutional provisions that determine how governments and private actors collect, store, process, and use information.
LAW:8645 Introduction to Quantitative and Computational Legal Reasoning 3 s.h.
Basic principles of probability, statistics, and computational reasoning (including elementary programming) for law students; emphasis on mathematically modest intuition, practical skills, and legal applications; introductory level, no mathematical background beyond high school algebra is assumed. Requirements: no substantial preexisting computer programming or statistical background.
LAW:8649 Foundations of International Law 1-3 s.h. Introduction to fundamentals of international law; focus on aspects of international law that concern interests in the United States; survey of sources, methodology, and major doctrines of international law within framework of understanding diverse jurisprudential approaches; international law's relationship to U.S. domestic law and institutions; procedural aspects of international law involving international institutions, including the International Court of Justice; foundation course for students interested in international trade, business, family law, human rights, environmental law, and an interest in European Union law.
LAW:8658 Jurisprudence $\mathbf{2 - 3}$ s.h.
Exploration of questions central to jurisprudence by looking at positions that have been adopted by legal positivist, natural law theory, and sociological models of jurisprudence (i.e., is there more to legal argument than the strategic battle for a favorable judicial ruling? How would one have to conceive of legal reasoning if one were a judge? Are there right answers to legal questions? Do they presuppose a necessary connection between law and morality? Is any exchange of pros and cons merely a spectacle created in order to hide from the dumbfounded public that legal reasoning does not really matter?); comparative dimension provided in readings with background in civil law.

## LAW:8660 Justice101

1 s.h. Immersive course on Fourth Amendment rights; students are equipped with tools necessary to teach Justice 101 curriculum to the community-at-large with a goal to increase student and community awareness of what is allowed and prohibited during different types of contact with law enforcement; focus on changes in power dynamics in four situations where interactions are most likely to occur-walking in the street, traveling in a vehicle, at school, and at home.

## LAW:8670 Labor Law <br> 3-4 s.h.

How national labor law regulates labor relations in the private sector; law relating to unionized employees and firms; right of employees to organize into unions; limits of concerted activities by employees; scope and provisions of collective bargaining; enforcement of the collective bargaining agreement; rights of individual employees in collective units and in labor organizations; lawyer's role in dealing with judicial, administrative, and arbitral tribunals involved in enforcing labor law; lawyer's role in complex interrelationships between policy, statute, judicial, and administrative decisions.

## LAW:8671 Worker Rights on the Front Lines: Workplace

 Experiences with ADA, FMLA, and Workers' Compensation 1 s.h. Development of a detailed understanding of two federal statutes, Family and Medical Leave Act (FMLA) and Americans with Disabilities Act (ADA), and one state statute, Iowa Workers' Compensation.
## LAW:8673 Land Use

Zoning, comprehensive planning, provision of services, subdivision development ordinances, and their role in construction of local community; mechanics of various procedural devices, including those for changing zoning restrictions through variances, rezonings, contract and conditional zonings, initiative and referendum process, agreements by cities and developers pursuant to platting processes; coordination of control efforts; theory and doctrinal investigations contrasted with actual problems and results.

## LAW:8677 Accounting, Tax, and Business Considerations for Lawyers <br> 1-3 s.h.

Accounting, tax, and business considerations for lawyers and why these are important considerations for lawyers; changes occurring in today's business models; discussions on choosing a legal structure for a business; financial statements basics, detailed example of a financial statement, and discussion on accounting basics expanded; advanced topics in accounting to allow some background on these topics.

## LAW:8680 Law and Economics

arr.
Introduction to economics analysis of law; how economic reasoning is used to explain and predict the effects of legal rules; fundamental areas of American law (e.g., property, contracts, torts, criminal law); use of economic efficiency as a normative criterion for evaluating legal rules; efficiency compared to various moral concepts to evaluate such rules.

## LAW:8698 Law in the Muslim World

2-3 s.h.
International and comparative law issues relevant to countries in the Muslim world; legal cultures, institutions, rules, actors, processes of several jurisdictions including Afghanistan, Saudi Arabia, Iran, Iraq, Algeria, Nigeria, Palestine, Pakistan; Islamic sharia law as practiced in Sunni and Shiite countries; the role of church versus state, fundamentalism versus secularism, as manifested in the legal system; tension between communitarianism and individualism in modern constitutionalism; intertwining of customary and religious legal practices; first, second, and third generations of human rights; international law on issues such as terrorism, self-determination; women's rights, including polygamy, divorce, child custody, inheritance. Requirements: junior or senior standing.

## LAW:8709 Introduction to French Law 1-3 s.h.

Introduction to laws of France, characteristic features, and role of main institutions; civil law, contacts, tort, family law, commercial law, criminal law, labor law; visits to a French law school, Paris Court, and Ecole of Magistrature National (ENM), the National Judge School in Bordeaux. Summer abroad program.
LAW:8712 Legislation 2-3 s.h.
Issues related to legislation and legislative process; introduction to legislation, legislative process, legislative advocacy, statutory interpretation, and statutory drafting; students gain an understanding of the role of lawyers in legislative process and formation of public policy.

LAW:8720 Mediation: Theory and Practice
2-4 s.h.
Essential characteristics; comparison of mediation with litigation and other alternative dispute resolution processes; stages of mediation; confidentiality; enforceability of agreement; ethical problems, particularly lawyer-mediator; student role playing; short writing assignments.

LAW:8726 Mergers and Acquisitions
Significant legal and financial aspects of business combination transactions; transaction documents (e.g., stock purchase agreements, asset purchase agreements, merger agreements); valuation of companies and pricing of deals; legal and financial considerations affecting the structuring of deals; tender offers and their regulation under the Williams Act, tender offer rules; fiduciary duties of target board, including Revlon duties and the Unocal standard; anti-takeover devices (e.g., poison pills and staggered boards, deal protection devices, freezeout transactions); state anti-takeover statutes. Prerequisites: LAW:8331.

LAW:8728 Start-Up and Emerging Companies 3 s.h.
Exposure to myriad legal issues and obstacles faced by start-ups and emerging companies and the lawyers who represent them.
LAW:8742 Negotiations
1-3 s.h.
Nature and theory of negotiations, diverse rhetorics (including the rhetoric of legal argument) relevant to conduct of negotiations, conflict between ethics and effectiveness; readings from game theory, social psychology, anthropology, rhetoric and ethics.

## LAW:8753 Nonprofit Organizations: Structure, Governance, and Strategy <br> 3 s.h.

Focused examination of internal operations of nonprofit organizations; introduction to historical conditions that generated an incredible expansion of diverse and complex organizations that make up the nonprofit sector in the U.S., as well as a multitude of contemporary, real-world obstacles and opportunities leaders and managers navigate within their organizations; topics include issues of accountability, board governance, budgeting, financial management, leadership, strategic planning, taxation, and more; what is a nonprofit organization and what makes a nonprofit organization effective; development of valuable skills necessary to improve the performance of nonprofit organizations.

## LAW:8755 Nonprofit Organizations: Advocacy, Collaboration, and Fundraising

Broad overview of the role nonprofit organizations play in building and enhancing communities; focused examination of the external operations of these organizations; students explore numerous threads that connect nonprofit organizations to outside individuals and entities and are presented with a multitude of contemporary, real-world obstacles and opportunities that leaders and managers navigate outside their organizations; topics focus on issues of advocacy, government relations, fundraising, leadership, marketing, partnerships, public relations, volunteerism, and more.

## LAW:8763 Patent Law

2-4 s.h.
All aspects of U.S. patent law; patent claims, adequacy of disclosure, statutory subject matter, validity, inequitable conduct, infringement, remedies, varied specialized doctrines; focus on recent pronouncements from the Court of Appeals for the Federal Circuit. Recommendations: LAW:8643.

## LAW:8765 Licensing

1 s.h.
Licensing covers a broad range of business arrangements among commercial stakeholders; much of licensing law practice falls into the transactional category including matters pertaining to online commerce, music, intellectual property, research and development, joint ventures, distribution, OEM, manufacturing, services, and other agreements; contractual arrangements that are shaped by scope and nature of underlying assets and rights; limiting doctrines in business practices that are relevant to a transactional attorney.

## LAW:8789 Private Companies

3 s.h.
Successful business lawyers are expected to advise clients about the business entity most suitable for their needs and then customize it to fit specific requirements of their business strategy; general focus on one entity -the corporation-and a brief introduction to agency law and general partnerships; a wide number of popular business entities receive little to no coverage and this gap is filled with an introduction to structure and substance of private company forms including limited partnership, limited liability partnership (LLP), and limited liability company (LLC). Prerequisites: LAW:8331.
LAW:8791 Professional Responsibility
2-3 s.h.
Inquire into the public and private professional responsibility of lawyers as informed by the American Bar Association's Model Rules for Professional Conduct (the template for nearly every state bar's ethics rules) and by other areas of substantive law touching on the legal profession. Examine the convergence and divergence of personal values, professional values, and ethical and professional standards, in order to apply them to professional dilemmas and conflicts.

## LAW:8796 Property II

3 s.h.
Continuation of LAW:8037; limits on landowner's use of property by private agreements, judicial actions, public regulations; problem areas (servitudes, nuisance, eminent domain); constitutional limits on government activities adversely affecting private property, community planning, zoning, other forms of local land use control; discrimination related to land development, housing; effectiveness of private ordering, judicial decisions, legislative enactments, administrative processes for resolving conflicts over use of land resources; relationships between law and other disciplines in forging solutions to land use issues; law as instrument for achieving societal objectives regarding land use.
LAW:8798 Real Estate Transactions
3 s.h.
Examination of acquisition, financing, and development of real estate; topics include listing agreements, purchase agreements, conveyancing, real estate finance and security instruments, foreclosure, mechanics' liens, and forms of real estate development, including homeowners/ condominium associations and other kinds of common interest communities.

## LAW:8819 Judicial Remedies

3 s.h.
The law of remedies is the working tool kit for civil litigators, offering various ways to redress a given wrong; remedies to be examined include compensatory damages, injunctive orders, restitution, declaratory judgment, contempt, garnishment, asset tracing, punitive damages, and methods to preserve assets before judgment; cases are drawn from diverse substantive fields, including tort, contract, intellectual property, civil rights, administrative, antitrust, attorneys' fees, and constitutional law.

## LAW:8856 Securities Regulation

arr.
Examination of law regulating the issuance and sale of securities (i.e., stocks, bonds, other investment vehicles) in the United States; topics include initial public offerings (IPOs), regulation of stock exchanges, private placements of stock, securities fraud litigation, and insider trading law; relevant statutes are the Securities Act of 1933 and the Securities Exchange Act of 1934. Corequisites: LAW:8331.

## LAW:8857 Market Regulation

3 s.h.
Examination of how capital markets are regulated; primary emphasis on secondary markets which trade on national stock exchanges, rather than on primary market activity such as initial public offerings (IPOs). Prerequisites: LAW:8331.

LAW:8877 Sex-Based Discrimination
2-3 s.h.
Survey of sex-based discrimination and legal responses in the United States and worldwide; American context-constitutional guarantees and various statutory guarantees, including Title VII of the Civil Rights Act of 1964 and Title IX of the Education Amendments of 1972; global context-examination of various regions of the world, emphasis on France, South Africa, and countries with majority Muslim populations; issues involving customary law, affirmative action/quotas, and constitutional reform.
LAW:8879 Sports Law 2-3 s.h.
Various legal issues relating to the structure and operation of amateur and professional sports industries; topics include labor law and collective bargaining in professional sports, history and status of collective bargaining efforts by college athletes, antitrust law as applied to professional and intercollegiate sports, the NCAA enforcement process, Title IX as applied to intercollegiate sports, the NCAA principle of amateurism and legal challenges, representation of professional athletes and negotiation of sports contracts.
LAW:8880 Baseball Salary Arbitration
1-3 s.h.
Major league baseball salary arbitration process that sports agents, attorneys, and team executives participate in, presided over by panels of lawyer arbitrators; students develop written and oral advocacy skills while participating in mock salary arbitration hearings; three students are chosen to represent the UI College of Law at the Tulane University Law School International Baseball Arbitration Competition in mid-January.
LAW:8881 College Athletics Infractions Process 1-2 s.h. Moot court competition involving college athletics rules violations; the National Collegiate Athletic Association (NCAA) processes major rules infractions (e.g., recruiting violations) through a hearing process that is similar to an administrative law proceeding; NCAA infractions process; participation in mock hearings.
LAW:8891 State and Local Taxation
2-3 s.h.
Limitations on state taxing powers under the United States Constitution, including Commerce, Due Process, and Privileges and Immunities Clauses; subnational jurisdictions, particularly states with an emphasis on sales tax and corporate income taxes, gross receipts taxes, and excise taxes; issues relating to ecommerce.
LAW:8929 Taxation of Partnerships
2-3 s.h.
Introduction to federal tax treatment of partnerships and limited liability companies, the most common business entities in use in the United States today; classification of entities as partnerships for federal tax purposes; formation of partnership and subsequent contributions to partnership capital; flow-through tax treatment of partnership operations; tax-sensitive allocations of items of partnership income, deduction, credit and loss; partnership distributions and related tax-sheltering strategies, liquidation or sale of partnership interests; death or retirement of partners, tax treatment of partnerships compared with S corporations. Prerequisites: LAW:8194.

## LAW:8933 Tax Practice and Procedure

Issues relating to proper tax liability of a taxpayer, not necessarily how the IRS collects taxes and administers tax laws; judicial deference to agency guidance; procedural issues related to examination and filing of returns and payment of taxes; attorneyclient and other privilege matters; ethical issues related to tax practice; IRS investigatory powers; IRS assessment and collection procedures; assignment of problems and discussion of current issues in tax policy. Corequisites: LAW:8194.

## LAW:8936 Estate and Gift Tax

## 1-3 s.h.

Justification for wealth taxation, effectiveness of current law, and alternative methods of wealth taxation; two key wealth transfer taxes -estate tax and gift tax; emphasis on identification of tax base and taxpaying unit; may include income tax effects which flow from an individual's death, income taxation of grantor trusts, and related income tax issues. Corequisites: LAW:8194.

## LAW:8937 Cybercrime and Security <br> 3 s.h.

Global reach of the internet, low cost of online activity, and relative anonymity of users has contributed to a wide escalation in cybercrime and in cybersecurity concerns; fast-evolving subject areas with discussion of current developments and events.

## LAW:8938 Technology in Law Practice

Introduction to selected technologies that affect modern law practice including cloud computing, document preparation tools and techniques, e-discovery tools and issues, practice management, professional responsibility concerns, legal project management, courtroom technology, and legal research analytics.
LAW:8954 Trademarks and Unfair Competition Law 3 s.h. Law of unfair competition with primary emphasis on trademarks; subjects include policies underlying unfair competition law, creation and establishment of trademark and trademark-like rights, enforcement of those rights, non-trademark concepts of false advertising, rights in one's persona, and the intersection of the First Amendment and trademark law; practical aspects of trademarks including mechanics of the federal registration process; for students who have an interest in trademark and unfair competition law, both specifically and as part of a broader business law practice.

## LAW:8981 Trusts and Estates I 1-4 s.h.

Law of succession and trusts; topics include policy basis of inheritance and the changing character of intergenerational wealth transfer; intestate succession; the requirements for executing and revoking wills; the rise of will substitutes; spousal protection against disinheritance; the creation, modification, and termination of trusts; the particular rules applicable to charitable trusts; the fiduciary duties of trustees; the nature of a beneficiary's interest in trust, the range of the trustee's discretion, and the rights of a beneficiary's creditors; recurring construction problems and pitfalls in drafting.

## LAW:8987 Veterans Benefits Law 2-3 s.h.

Theory of veterans' benefits law and introduction to skills necessary to represent veteran clients at every stage of the U.S. Department of Veterans Affairs (VA) adjudication process; how many veterans struggle to navigate the complex VA benefits system without assistance of counsel; law that governs administration and adjudication of these benefits; fundamental law of VA claims adjudication process; dispute resolution and federal agency litigation practice; what is required to effectively represent veterans in their appeals for much needed benefits.

## LAW:8992 Water Law

Legal schemes for securing and using water rights in surface water and groundwater for private and public uses in the United States; riparian and prior appropriation doctrines of water allocation, groundwater management regimes, federal water management and regulation, and interstate and transboundary allocation devices; evolving role of science, economics, and policy in water allocation law; does not address issues of water quality, which are covered in environmental law.

## LAW:9010 Appellate Advocacy I

 1 s.h.Experience based on an assigned fictitious case: writing an appellate brief asserting the client's position, and arguing the case before a panel of students, faculty, community attorneys. Prerequisites: LAW:8032 and LAW:8033.

LAW:9011 Client-Centered Public Defense Advocacy 1-3 s.h. Introduction to core elements of court-appointed representation in criminal courts.

## LAW:9021 Van Oosterhout Baskerville Moot Court

 Competition1 s.h.
Single-elimination tournament culminating in the final four advocates arguing before a panel of judges; advocates write a portion of the brief, argue for and against the issue they briefed. Prerequisites: LAW:9010.

LAW:9028 Jessup Moot Court Competition Team 1-2 s.h.
Participation as team member in Jessup International Moot Court Competition; preparation of memorials in fall, travel to February regional rounds; travel to international competition in Washington, D.C., for top two teams. Prerequisites: LAW:9010.

LAW:9033 National Moot Court Competition Team 1 s.h. Participation by third-year students as law school's representatives in the National Moot Court Competition. Requirements: placement as one of four finalists in LAW:9021.

## LAW:9034 National Moot Court Tutorial <br> 2 s.h.

For students participating in the National Moot Court competition; provides a problem and a substantial record, which provide basis for appellate brief and oral argument competition; integrates teaching of substantive law with development of oral and written advocacy skills in preparation and application for the national competition.
LAW:9037 Advanced Moot Court Competition Team 1 s.h. Advanced Moot court team; members are top advocates from previous year's Van Oosterhout/Baskerville competition. Fall of third year.

LAW:9038 Jessup International Moot Court Competition 1 s.h. Participation by second-year students in intramural regional- and national-level moot court competition in international law; intensive criticism in appellate brief writing and oral argument. Prerequisites: LAW:9010.
LAW:9041 Vis International Moot Court
1-3 s.h.
Participation for up to four students in the Vis International Moot Court, an annual international moot competition concerning international commercial arbitration under the Vienna Convention on the International Sale of Goods (CISG); under close supervision of instructor, students prepare two briefs, one for the claimant and one for the respondent, are mooted repeatedly by instructor and practicing attorneys (often alumni of the competition), and then participate in multiple rounds of moot court competition in the United States and, ultimately, either Hong Kong or Vienna. Recommendations: one course in international arbitration or international business transactions.

LAW:9046 Moot Court Board
1-3 s.h.
Experience as member of the Moot Court Board administering the Appellate Advocacy Program, researching appellate cases used in the program, judging appellate arguments. Requirements: membership based on performance in LAW:9010.

LAW:9055 Jury Focus Groups 1 s.h. Role of the jury in civil and criminal court systems; how lawyers can use jury focus groups to learn more about their cases.
LAW:9060 Trial Advocacy 1-2 s.h.
Opportunities to develop and refine skills used in preparation and trial of civil and criminal cases; students are "on their feet" during most class sessions, practicing the arts of voir dire, opening statement, direct and cross examination, introduction of exhibits, use of expert testimony, and closing argument; the course culminates with a fullscale trial, from filing of pretrial motions to rendering of a jury verdict conducted by student co-counsel; students receive extensive criticism on the effectiveness of their classroom and final performances, and all class sessions are frequently recorded for review and critiqued by instructors and fellow students. Prerequisites: LAW:8460.
LAW:9061 Advanced Trial Advocacy - Stephenson Competition

1-2 s.h.
Review and expansion of topics presented in the initial trial advocacy course; preparation and application of these principles in the Stephenson trials; introduction to additional advanced problems such as the evidentiary issues raised in the trial problem. Corequisites: LAW:9060.

LAW:9062 Trial Advocacy Board
Administration of Trial Advocacy Program and Stephenson Competition; research and writing in connection with trial problems and readings used in program; critique of performances of trial problems. Prerequisites: LAW:8460 and LAW:9060.
LAW:9066 Stephenson Trial Advocacy Team
arr.
Student participation as College of Law representatives in Stephenson Trial Advocacy Competition. Prerequisites: LAW:9061.

## LAW:9115 Law Review

1-2 s.h.
Performance of substantive tasks to produce a first-rate scholarly journal; writing a substantial note; comprehensive legal research experience; analysis of complex legal issues with enhanced criticalreasoning skills and command of the legal standard, The Bluebook citation system; selection of students that transfer to UI College of Law after their first year and rising second-year students is based on the Write-On Competition.

## LAW:9118 Student Journal Editor - Law Review

Experience on the Iowa Law Review editorial staff: managing production, overseeing business operations, administering student writing program, selecting and editing articles for publication, supervising student research and writing. Eligibility based on previous writing for the journal. Prerequisites: LAW:9115.

## LAW:9124 Journal of Corporation Law

1-2 s.h.
Experience editing articles and writing commentaries for The Journal of Corporation Law, a student-operated scholarly publication that examines subjects of current importance to businesses and the bar.
LAW:9127 Student Journal Editor - Journal of Corporate Law

## Experience on The Journal of Corporation Law editorial staff:

 managing production, overseeing business operations, administering student writing program, selecting and editing articles for publication, supervising student research and writing. Eligibility based on previous writing for the journal. Prerequisites: LAW:9124.
## LAW:9142 Transnational Law and Contemporary Problems Journal <br> 1-2 s.h. <br> Experience researching and writing on issues in international and comparative law for the journal Transnational Law \& Contemporary Problems. Requirements: second- or third-year law standing.

LAW:9145 Student Journal Editor - TLCP Journal arr.
Experience researching, writing, and editing on issues in international and comparative law for the journal Transnational Law \& Contemporary Problems. Requirements: second- or third-year law standing.
LAW:9163 Journal of Gender, Race and Justice 1-2 s.h.
Academic year experience on The Journal of Gender, Race \& Justice: writing two journal pieces, including a recent development and a note or a comment, and performing office duties. Requirements: second- or third-year law standing.
LAW:9166 Student Journal Editor - Gender, Race and Justice arr. Experience on The Journal of Gender, Race \& Justice editorial staff: managing student writing program, overseeing business operations and production, selecting symposium topic and participants, selecting and editing all publications pieces; eligibility based on writing and editing experience.
LAW:9302 Clinical Law Program: Internship
arr.
Experience working directly with faculty members on cases and inhouse program; full participation in interviewing, fact investigation, negotiation, courtroom proceedings.

LAW:9303 Advanced Clinical Law Internship arr.
Continued representation of a specific client or matter; or continued representation of clients in the practice group in which students worked their first semester, but with more ownership and greater independence; opportunity to serve as mentors to new clinical law internship students. Prerequisites: LAW:9302.
LAW:9320 Field Placement: District of Columbia Program arr. Students work closely with attorneys and enroll in a weekly seminar with other externs in the Washington, DC, area; through seminar and field work, students examine the role of attorneys in the nation's capital, witness the function of administrative agencies and the process of federal lawmaking, and engage in self-evaluation and reflection on field work.

## LAW:9322 Field Placement: Judicial

 arr.Close work with a federal district court judge or state appellate judge conducting research and drafting a wide variety of legal memoranda, orders, and opinions; assist in hearings and perform other duties generally associated with a judicial clerkship; weekly meetings with a faculty supervisor to discuss student's work in chambers; participation in biweekly classroom discussions.

## LAW:9324 New York Pro Bono Scholars Program

 arr.Students spend 12 weeks working full time in a pro bono placement while also completing an academic component at their law school; students are permitted to take the New York bar examination in February of their final year of study before they graduate; after successful completion of the program and any other graduation requirements, students are admitted to practice as soon as practicable after they receive their JD degree (typically in June).

## LAW:9331 Field Placement: General

 arr.Students earn credit working closely with attorneys in a wide range of placements; field placements designed so that students are directly involved in activities characteristically performed by attorneys in a real-world setting; some placements routinely offered and arranged by the law school, others by students and approved by faculty; some placements are local and students take them along with their other classes; other placements are full time, located across the country and around the world; in addition to fieldwork, students are enrolled in a seminar with other externs.

## LAW:9332 Field Placement: Advanced

 arr.Students appear in court, advise clients, or engage in other lawyering tasks; skills topics tailored to student interest and selected to cover material not explored in the general field placement course; students develop and and teach a class on a lawyering skill topic of their choice for the general field placement course.
LAW:9335 Summer Legal Placement 1-3 s.h. Externship opportunities for direct involvement in activities characteristically performed by attorneys (e.g., research and writing, document drafting, client interviewing and counseling, fact investigation, negotiations, court appearances); in-depth exposure to as many facets of the actual practice of law as practicable in each externship.

## LAW:9423 Tutorial

 arr.Different types of pedagogical techniques.
LAW:9429 Intellectual Property Advocacy
1-4 s.h.
Integrates teaching of substantive intellectual property law with development of oral and written advocacy skills in intellectual property field; builds on earlier learning in preparation for practice of law.
LAW:9436 Sexuality and the Law
3 s.h.
The field of sexuality studies can cover everything from sexual knowledge, beliefs, attitudes, values, and behaviors of individuals to sexual cultures, identities, and communities; focus on social, economic, political, and cultural dimensions of sexuality.

LAW:9444 Tutorial for Foreign-Trained Lawyers
1 s.h.
Introduction to the legal system and legal educational system of the United States; particular emphasis on those aspects of the U.S. system that present a strong contrast with other countries' legal systems, whether from civil or common law traditions; for foreign-trained law students (LLM, JD, or SJD) who have not earned a U.S.-based JD or U.S.-based LLM degree that includes an introduction to U.S. law and legal system.

## LAW:9455 Medical Tutorial for Law Students

Participation on medical and/or surgical rounds under supervision of attending physician; didactic sessions on legal, medical, and ethical issues arising from the clinical experience, and issues such as peer review, credentialing, quality assurance, cost containment, AIDS, reproductive technology; recent developments in medical technologies. Cosponsored by Carver College of Medicine

## LAW:9460 SJD Tutorial

Thesis work under supervision of Doctor of Juridical Science (SJD) committees; dissertation committee chairs conduct an irregular series of meetings to learn about and discuss issues common to research and writing of each thesis involved; students develop full thesis proposals and draft individual chapters; forum provided for workshopping student work and development of students' abilities to discuss and critique legal scholarship; for all SJD students during their two semesters of residency at the College of Law.

## LAW:9473 Writing Tutorial

Writing project on a subject or topical area specified by the supervising faculty member; group meetings; writing tutorial.
LAW:9478 Advanced Legal Writing: Writing Center 2 s.h.
Qualities of good legal writing including predictive, persuasive, and academic writing; how to teach those skills to others. Requirements: College of Law writing center tutor.
LAW:9486 Directed Research and Writing
Research and writing project unrelated to any substantive course, supervised by a faculty member.

## LAW:9490 Independent Research Project

Work under faculty supervision; research.

## LAW:9491 Independent Research and Writing

Independent research and writing under thesis advisor/committee chair. Requirements: SJD enrollment.

## LAW:9503 Advanced Immigration Law and Policy

Examination of issues arising out of contemporary problems of immigration law and policy; topics vary, may include critical analysis of initiatives for national, state, and local immigration reform; traditional class-based component, experiential component, advanced legal research component, and rigorous writing requirement. Requirements: LAW:8577 or legal clinic experience.

LAW:9508 Environmental, Social, and Governance Basics 2-3 s.h. By developing an awareness of Environmental, Social, and Governance (ESG) issues confronting society, students will be better positioned to advise a range of clients on a range of issues. Students will also be better prepared to draft a range of documents at the intersection of law and ESG, such as corporate disclosure documents, model legislation, and policy statements.

## LAW:9509 Advanced Problems in International Environmental Law <br> arr

Research and writing seminar exploring selected topics that may be encountered in practice; topics vary.

LAW:9510 Climate Change Law and Policy
Introduction to law and policy related to climate change; seminar readings provide an overview of laws and policies that seek to mitigate climate change and adapt to its effects; fundamentals of climate science including scientific knowledge regarding impacts of climate change and obstacles to effective communication about climate science; various private and public responses to climate change at local, state, federal, and international levels; exploration of different trends in climate change litigation.
LAW:9528 Advanced Topics in International Law arr. Contemporary problems of public international law and policy; issues arising from armed conflict, use of force, pacific settlement of disputes; human rights law and policy (individual civil, political, economic, social, and cultural rights; group rights such as selfdetermination, development, environment, peace); trade and development; environmental law and policy (e.g., climate change, species extinction, pollution).
LAW:9545 Tax Policy
2-4 s.h.
Tools to evaluate existing and proposed changes to state and federal tax systems; evaluation of tax systems through numerous perspectives whether economic, philosophical, or comparative, depending on student interest; specific attention to tax policy proposals that command popular and congressional attention; students write a policy paper that evaluates a current tax policy proposal. Requirements: prior or concurrent enrollment in any tax course.

## LAW:9554 Compliance, Ethics, and Risk Management arr.

Public and private organizations-including corporations, nonprofits, universities, and government agencies-are responsible for ensuring that their personnel comply with legal and regulatory requirements; organizations must find mechanisms to develop strategies and cultures of compliance; students develop an understanding of the field of organizational compliance and issues that compliance professionals are responsible for overseeing, establish a strong foundation in behavioral and traditional legal ethics, and develop persuasive arguments regarding strengths and weaknesses of compliance efforts undertaken by organizations. Corequisites: LAW:8331.

## LAW:9556 Constitutional Theory: Originalism and Its

3 s.h.
Originalism is ascendant, at least at the Supreme Court, but there is widespread disagreement about what originalism is, what it would require of judges, and whether originalist methods are justified; exploration of scholarship supporting different forms of originalism. Prerequisites: LAW:8010 or LAW:8280.

## LAW:9558 Corporate Boards Seminar

Simulation of seven meetings of a board of directors of a hypothetical company; students act as board members facing a discrete issue of corporate governance and take turns acting as chair of the board or as general counsel, leading the board of directors though a discussion of the issues; focus on the normal functioning of United States publicly listed companies, as well as on the duties of directors in times of crisis or significant change to the corporation. Prerequisites: LAW:8331.

## LAW:9573 Cultural Property/Heritage

arr.
Concept of cultural property, measures for its protection, impact of these measures on the transfer of cultural items; traditional art and architecture, biological and fossil material, human remains; contexts in which issues have arisen, such as stolen cultural property, property acquired during armed conflict and in colonial settings, and property collected in the field or excavated; international, national, and state law, including UNESCO convention on illicit transfer of cultural property, U.S. Archaeological Resources Protection Act, Native American Graves Protection and Repatriation Act; how developing professional ethics codes affect the concept of cultural property.

## LAW:9582 Deals

Economic structure of complex commercial transactions as memorialized in agreements including bank credit facilities, indentures, underwriting agreements, other documents governing equity financings and financings involving convertible or preferred securities, venture capital agreements, securitization documents, business combination agreements, joint venture and shareholders agreements, limited liability company operating agreements, project finance documents; commercial agreements and how sophisticated parties order their private relationships to achieve efficient results. Prerequisites: LAW:8331.

## LAW:9591 Family Law in the World Community

Family law from a global perspective; treatment of family law problems in varied legal systems; application of international treaties and conventions to issues such as child custody, adoption and foster care, education and child labor, juvenile crime and punishment, child trafficking and exploitation, migrant and refugee children, child soldiers.

## LAW:9630 Leadership in Higher Education

3 s.h.
Introduction to leadership in higher education; readings provide an overview of leadership skills needed to navigate some of the most pressing issues in higher education; students consider the role of professional schools operating within a larger university; discussion topics may include academic freedom, diversity/equity/inclusion, and intercollegiate athletics; assessment and development of individual leadership skills while analyzing policy questions associated with institutional responses to everyday decision-making and crisis management.

## LAW:9631 Higher Education and the Law

Introduction to the most pressing legal issues facing colleges and universities today: free speech on campus; academic freedom and tenure; diversity; student discipline; student privacy, safety, and well-being; Title IX; and intercollegiate athletics; a major goal is to consider the policy questions associated with institutional responses to these legal issues.
LAW:9635 Happiness and the Law
3-4 s.h.
Happiness, law, and public policy; lawyer and client relationship; how to be a happy lawyer; pedagogical mix of Socratic discussion of readings and experiential components through which students experiment with mindfulness techniques and constructing an actionable and personal career-life plan that takes into account themes explored; additional experiential exercises.
LAW:9639 History of Regulation of Smoking and Tobacco arr. Regulation of smoking and tobacco use; history, beginning with 19th and early 20th centuries; state statutes and case law; OSHA, EPA, and FDA regulations; class action litigation, involvement of law firms in formulating tobacco company strategies, use of medical studies, economic history of the tobacco industry.
LAW:9645 Race, Class, and Education 2-3 s.h. Education plays a crucial role in sustaining a democratic society, and as such, it is critical to understand and be able to critique legal and public policy choices that shape educational systems; exploration of issues of equity, access, and reform in American education, particularly as pertains to race and class.

## LAW:9681 Elder Law

arr.
With the aging population, elder law has become one of the fastest growing areas of law practice; examination of legal, policy, and planning issues related to aging in America; topics include planning for incapacity, guardianship, end-of-life planning (advance medical directives), social security, Medicare and Medicaid, planning for catastrophic illness and long-term care, elder abuse and neglect; exploration of ethical issues dealing with elderly and adult children of elderly.
arr. LAW:9701 International Criminal Law
arr.
Available legal responses to ISIS; topics include the law of genocide, war crimes (including gender crimes), crimes against humanity, terrorism, human trafficking, money laundering, the International Criminal Court, and alternatives to prosecution including national truth commissions; strengths and weaknesses of international criminal law as a response to mass atrocity; practical considerations that limit and permit the effective functioning of this burgeoning legal experiment.

## LAW:9708 International and Comparative Labor and

 Employment Lawarr. Survey of labor and employment laws and norms developed and promulgated by the International Labor Organization (ILO), the European Union, free trade agreements, and corporate codes; comparative focus on laws of the United States, Germany, and China -three leading world economies with vastly different labor and employment law systems; how to make informed questions, including to local counsel, when cross-border, employment-related legal issues are encountered; why countries have different systems of labor and employment protection despite the fact that they all try to solve similar problems; how the United States is, or is not, unique.
LAW:9723 Seminar on Islamic Law and Government
3 s.h.
Islamic legal and political legacy from formative period until modern time; critical analysis of logic and context of development; development of jurisprudential, legal, and political literature; overview of theories and practices of governance in Islam beginning with Caliphate system and ending with modern nation-state models. Same as RELS:6723.
arr. LAW:9739 Topics in the Philosophy of Law
arr.
Opportunity to explore certain questions in law and philosophy at greater depth; topics vary, ranging from foundational questions to issues with strong practical implications for public policy; readings specifically selected to fit topic area.
LAW:9770 Latinx and the Law 3 s.h.
Exploration of legal and theoretical issues relevant to Latina/o/x people in the United States; topics include role of law in defining Latinx identity, legal histories of Latinx subgroups (e.g., Mexican Americans, Puerto Ricans, Cuban Americans), legal regulation of language and accent, immigration and citizenship law, and antidiscrimination law.

## LAW:9804 Legislative Redistricting Seminar

3 s.h.
Examination of redistricting-the process of drawing lines for legislative elections in the United States; issues of the Census; vote dilution; one person, one vote; the Voting Right Act; partisan and racial gerrymandering; special purpose districts; theories of democracy inevitably play a significant role in discussions, and political science often informs evidence at the heart of disputes about election law.
LAW:9805 Hot Topics in Iowa Law and Legislation 3 s.h. Exploration of recent developments and hot topics in Iowa state law, including recently passed legislation and legislation being considered by the Iowa legislature.
LAW:9811 Law of War, Peace, and Military Affairs arr.
How does the law seek to restrain use of force in armed
conflict? When may sovereign states lawfully take up arms? Once war begins, what methods may states and soldiers employ? How does and should the law of war deal with non-state actors, notably terrorists and private military contractors? Must the world reassess its answers to these questions in light of geostrategic developments since $9 / 11$ ? When and why is a soldier's obedience to illegal orders an acceptable excuse? Is the Nuclear Non-Proliferation Treaty a success or failure?

## LAW:9820 The Law of Low-Wage Workers 3 s.h

Exploration of how traditional labor and employment law might be insufficient to properly protect low-wage workers; focus on alternative representational institutions (e.g., worker centers) and the special role that federal, state, and local law enforcement agencies and attorneys general play in this area; special concerns of particular groups of lowwage workers (e.g., agriculture, meatpacking, the "gig" economy, households/domestic work); may include immigrant and prison labor. Prerequisites: LAW:8421 or LAW:8670 or LAW:8415.

## LAW:9826 LLM Seminar

Basic research and analytical methodologies for the international and comparative law fields; workshop approach to project proposals, drafts.

## LAW:9829 Media Law

3 s.h.
Overview of law that applies to mass media, citizen media, and social media; how law has attempted to define "the Media," and how it has distinguished between distribution platforms in treatment of media rights and obligations; American press and notions of press freedom at time of founding; tracking evolution of law governing injuries inflicted by speakers beginning with common-law treatment of libel and slander to constitutionalization of those torts; examination of law that applies to various journalistic tools; problems of jurisdiction and choice of law posed by online news; examining market influence on content; comparing American system with other countries approaches to media law.

## LAW:9830 Housing Law and Policy

3 s.h.
Examination of how housing laws and policies in this country have fallen short of realizing the Housing Act's lofty ideal; exploration of challenges and tradeoffs inherent in developing effective legal solutions to the housing crisis through class discussions and exercises, research papers, and moderated presentations by housing professionals -from community organizers to legal aid lawyers to real estate developers and public officials.

## LAW:9834 Transportation Law and Policy

3-4 s.h.
Transportation plays an outsized and understudied role in day-to-day life, economy, and society; law plays a similarly vital and underappreciated role in determining transportation policy; introduction to the law and policy of transportation.

## LAW:9860 Inside-Out: Social Justice Issues and Critical Theory

Use of Inside-Out model; law students (outside students) co-learn with incarcerated students (inside students) at the Iowa Medical and Classification Center (IMCC), also known as Oakdale, a medium security state prison and the site for the University of Iowa Liberal Arts Beyond Bars (UI LABB) program; analysis and discussion of current social justice issues through a critical legal theory lens (i.e., critical race theory, feminist legal theory, LatCrit, ClassCrits, queer theory, critical disability theory).

## LAW:9861 Current Social Justice Issues and Critical Theory Perspectives 2-4 s.h.

Use of critical theories as a tool to examine current social justice issues; creation of a learning environment that adheres to the values of critical legal theories-which is non-hierarchical, values expression in all forms from a broad range of authors/creators, and disrupts traditional understanding of the classroom.

## LAW:9863 Patent Prosecution Seminar <br> 3-4 s.h.

Drafting seminar on patent application preparation and prosecution; student drafting exercises and presentations on advanced patent law topics; administrative rules and procedures governing practice before the U.S. Patent and Trademark Office; for students who plan to practice patent law. Prerequisites: LAW:8643.

LAW:9865 Intellectual Property Scholarship Seminar 3-4 s.h
Exploration of major themes in intellectual property law scholarship through juxtaposition of classic and contemporary intellectual property law articles.

## LAW:9871 Privacy Law and Technology <br> 3-4 s.h.

We have become, wittingly or not, compulsive data makers; every day we shed reams of personal information that those who have an interest in empowering, monetizing, manipulating, or suppressing us are eager to acquire; this dynamic is redrawing the line between what it means for information to be private/public, personal/commercial, ours/theirs; privacy law and technology serves an interdisciplinary introduction to technologies, laws, and policies that shape how that information is collected, who has access to it, and what it can reveal about us; class sessions alternate between focusing on legal frameworks and the technologies they implicate.
LAW:9873 Contract Drafting Boot Camp
1 s.h.
Contracts are an essential part of the practice of law for transactional lawyers who draft contracts, and litigators who often argue about what contracts mean; introduction to the parts of a contract and the principles of contract drafting in a week-long intensive simulation; students consider doctrine, theory, skills, and ethics associated with contract drafting, and engage in multiple contract drafting exercises. Requirements: no prior, current, or future enrollment in LAW:9874.
LAW:9874 Principles of Contract Drafting
2-3 s.h.
Principles of drafting business contracts; focus on structure of contracts, how to draft each of the parts of a business contract, and how to translate the needs of the business into clear and understandable contractual language; examination of typical business contracts (e.g., nondisclosure agreements, letters of intent, purchase agreements, and other types of agreements); students complete drafting exercises and a series of larger contract drafting projects.

LAW:9875 Judicial Opinion Drafting
Introduction to duties and responsibilities of judicial clerkships; writing bench memoranda and draft opinions at trial and appellate levels.

LAW:9882 Public Health Law
Introduction to scope, function, and history of governmental activities and programs encompassed by public health regimes (primarily in the United States); legal and constitutional powers and duties of states to create prerequisites for health of population as a whole; limitations on exercise of that power to restrict individuals interests (inter alia) in liberty, autonomy, privacy, and property; tensions and conflicts that arise when collective action on behalf of public/common good constrains what the state deems to be acceptable risks triggered by actions of private individuals.

## LAW:9883 Health Disparities and the Law

Examination of relationship between race, racism, health disparities, and law; use of readings, video clips, and class discussions to trace history of racism in health care and development of scientific racism; how race became incorporated into our systems of law and governance; how race can lead to disparities in exposure to health hazards and diagnosis and treatment of illness.

## LAW:9886 Reconstruction and the Constitution

After the Civil War, during Reconstruction, Congress enacted the 13th, 14th, and 15th Amendments that changed the constitutional course of the nation and took place during the period of most progressive reform in U.S. history; students address: How do these amendments fit together? Where did the language of these amendments come from? How did these relate to the Dred Scott case? How did this constitutional change occur? What was necessary for this reform to come about? What was necessary legally? What was necessary in terms of social context for this progressive reform to occur? How do these amendments relate to the Bill of Rights and the 17th Amendment for women's suffrage? Prerequisites: LAW:8010.

LAW:9912 Selected Issues in Family Law
In-depth look at an issue or set of issues in family law; relevant cases, statutes, scholarship; class visits or on-the-job observations with community members who play roles in the family law process being examined.

LAW:9936 Selected Topics in Immigration Law
Issues arising out of contemporary problems of immigration law and practice; topics may include immigration enforcement policy, draft immigration legislation, initiating representation, bond hearings, suppression/other motions practice, defensive asylum/related claims, appellate practice, "know your rights" counseling, establishing powers of attorney/other forms of legally binding substitute decision-making pertaining to family members/property/other assets, identifying and working with local resources/community organizations that can assist with or reinforce goals of individual client representation; may involve guest speakers/field trips to local nonprofits/government agencies.
Recommendations: no specialized knowledge of immigration law is presupposed and no prior immigration law courses required.

## LAW:9950 SJD Continuous Enrollment

Intended for SJD students working on their dissertation with no mandatory classes left to take; continuous registration is a College of Law policy and students should register for continuous registration only if they are not going to register for any other tuition and feeassessing courses. Requirements: SJD enrollment, completion of required coursework, and promotion to candidacy.

## LAW:9959 Supreme Court Seminar

Supreme Court practice, procedure, jurisdiction; the art of opinion writing; in-depth analysis of cases on the court's pending docket; writing briefs, conducting research, conferencing cases, assigning and preparing opinions, and persuading colleagues; preparation of an opinion.

## LAW:9965 Empirical Analysis of Crime and Criminal Justice Policy

Selected readings of social science articles on criminal justice system; basic concepts needed to become educated consumers of empirical research in general.
LAW:9989 Litigation for Decarceration
Analysis and discussion of recent criminal-legal reforms aimed at reducing the number of individuals who are imprisoned in the federal system.

## LAW:9990 Wrongful Convictions and the American Criminal Justice System arr.

 Over 300 innocent persons in the United States have been exonerated through DNA evidence after being convicted of crimes they did not commit since 1989; how wrongful convictions occur, how they are remedied, how future injustices can be prevented; introduction to criminal appeals and postconviction proceedings; examination of cases of wrongful convictions; common factors that contribute to conviction of innocent; challenges of proving innocence under statutory and constitutional law; how the system can be reformed to prevent wrongful convictions.
## Law Study Abroad Courses

LWAB:8230 France Summer Program: Paris and Arcahon arr. Intensive coursework in France taught by professors from Iowa and France; program begins in Paris where students visit courts and a law school with speakers including prominent judges and lawyers; students then travel to Arcachon for remainder of stay. Five-week courses in May and June.

## LWAB:8360 Law Study Abroad at KoGuan Law School of

 Shanghai Jiao Tong University arr.Exchange student study abroad program at KoGuan Law School of Shanghai Jiao Tong University.
arr. arr.

3 s.h.

2-3 s.h.
LWAB:8825 London Law Program
2-3 s.h.
London Law Program is open to second- and third-year law students who spend ten days taking classes in the heart of London; students visit parliament, the UK supreme court, the Inns of Court, and attend a symposium at Oxford University as part of their coursework; each course offered includes a strong comparative dimension. Winter session.
LWAB:9215 Law Study Abroad at Beijing Normal University arr. Exchange Student study abroad program at Beijing Normal University, Beijing, China.

LWAB:9223 Law Study Abroad at Catolica University arr.
Exchange student study at the University of Católica in Lisbon, Portugal.
LWAB:9226 Law Study Abroad at Radboud University Nijmegen
arr.
Exchange student study at Radbound University in Nijmegen,
Netherlands.
1 s.h. LWAB:9230 Law Study Abroad at Ewha Womens University arr. Exchange student study at Ewha Womens University in Seoul, South Korea.

LWAB:9234 Law Study Abroad at Korea University arr. Exchange student study at Korea University in Seoul, South Korea.

## LWAB:9238 Law Study Abroad at National University

Ireland
arr.
arr. Exchange student study at National University Ireland, Galway, Ireland.

## LWAB:9242 Law Study Abroad at Pontifica Comillas

University arr.

Exchange student study at Pontifica Comillas University, Madrid, Spain.
LWAB:9244 Law Study Abroad at the University of Vienna arr. Exchange student study abroad program at the University of Vienna, Austria.

LWAB:9246 Law Study Abroad at the University of Pristina arr. Exchange student study at the University of Pristina, Kosovo.

LWAB:9300 Law Study Abroad at Zhejiang University

## Guanghau Law School

arr.
Students enroll in classes linked to Zhejiang University's LLM
programs and earn up to 15 credits, choosing from a variety of courses taught in English; students with adequate fluency also can take law courses taught in Chinese; exchange program is for one semester, and students can make arrangements with Zhejiang University for an additional semester to complete an LLM.
LWAB:9301 Law Study Abroad at University of Zagreb arr. Exchange student study abroad at University of Zagreb in Croatia.

## Juris Doctor, JD

The Juris Doctor (JD) is a professional degree awarded by the College of Law. The University of Iowa College of Law is approved by the Council of the Section of Legal Education and Admissions to the Bar of the American Bar Association.

The first year of the JD program offers the personal connection and attention students need to develop a strong intellectual foundation for legal thinking and writing. The College of Law has one of the lowest student-to-faculty ratios of any law school. Professors have an open-door policy, and they serve as models for the kind of highly collaborative, rigorously professional behavior that prepares students to serve as counselor to their clients. Students get intensive, individualized instruction from legal writing faculty; the College of Law is one of the few law schools in the nation with a full-time faculty dedicated solely to a student's growth as a legal writer.

In the second and third years, students focus on the areas of law that most interest them, drawing from a rich menu of mainstream, specialized, and clinical courses. Students have access to a wide array of experiential learning opportunities, including participating in moot court competitions; taking the lead with real clients through field placement and clinical law programs; and writing for one of the four student-run scholarly journals. The field placement program, in particular, provides a wide range of placements for students still in law school. Students have worked in U.S. District Courts, legal aid centers, federal public defenders' offices, and nongovernmental organizations (NGOs) around the world. Students also may add distinction to their résumés by participating in study abroad or exchange programs.

Details about applications and admission to the program are available on the College of Law website.

## Cocurricular and Extracurricular Programs

Students enrich their course of study by participating in the college's cocurricular and extracurricular programs which include Moot Court, the Trial Advocacy Program, and four student-produced journals.

## Moot Court

In the Moot Court appellate advocacy programs, students draft appellate briefs, build expertise with citation form, develop research skills, and strengthen their persuasive abilities through oral arguments.

## Trial Advocacy

The Trial Advocacy Program is a student-run, faculty-supervised program in which students develop and refine skills used to prepare and try civil and criminal cases. The heart of the program is LAW:9060 Trial Advocacy, a course taught by law school faculty, federal and state judges, and experienced trial attorneys. Students are on their feet during most class sessions, practicing the arts of jury selection, opening statement, direct and cross examination, introduction of exhibits, use of expert testimony, and closing argument. The course culminates with a full-scale trial-from the filing of pretrial motions to the rendering of a jury verdict-conducted by student co-counsel before a visiting judge and a jury of laypersons.

The Stephenson Competition is named after Judge Roy L. Stephenson, a U.S. District Court and Eighth Circuit Court of Appeals judge and a 1940 graduate of the College of Law. Students who demonstrate superior ability in advocacy skills during the trial advocacy courses participate in a series of mock trials judged by local members of the bench and bar. Individuals selected from the competition represent the University of Iowa in the national trial competition.

## Iowa Law Review

Since its inception in 1915, the Iowa Law Review has served as a scholarly legal journal, noting and analyzing developments in the law and suggesting future paths for the law to follow. Students have managed the review since 1935, editing and publishing articles by professors and students. To learn more, visit the Iowa Law Review website.

## Journal of Corporation Law

The Journal of Corporation Law is the nation's oldest and most cited student-published legal periodical specializing in corporate law. The journal's scope includes antitrust, intellectual property, labor law, securities, taxation, employment discrimination, insurance, products liability, and regulated industries, as well as traditional corporate topics. Selected articles submitted by practitioners and academics are published in each of four annual issues. See the Journal of Corporation Law website.

## Journal of Gender, Race \& Justice

The Journal of Gender, Race \& Justice pushes the boundaries of legal scholarship and theory in its focus on social justice issues. The journal hosts a symposium at the College of Law every third year, bringing together nationally renowned legal scholars and practitioners to discuss the relationships among the law and race, gender, sex, sexual identity, economic class, ability, and other identity characteristics. The journal publishes an annual volume of legal works that includes symposium papers, papers from conferences outside the college, and articles written by Iowa law students. To learn more, visit the Journal of Gender, Race \& Justice website.

## Transnational Law \& Contemporary Problems

Transnational Law \& Contemporary Problems addresses issues and problems that transcend traditional political boundaries, that are of interest to the international and comparative law community, and that are not commonly found in other journals and reviews. One issue takes the form of a symposium addressing specific topics; this issue has a guest editor who is a legal scholar noted for work on the symposium topic. The second issue is submission based. Every other year the journal organizes and sponsors a symposium on a contemporary international issue; past topics include climate change, the European Union's sovereign debt crisis, and war crimes. For more information, visit the Transnational Law \& Contemporary Problems website.

## Requirements

The Juris Doctor (JD) requires a minimum of 88 s.h. to earn the degree. To be eligible for a JD degree, students must meet the credit hour requirements, meet the length of study requirements, achieve a cumulative grade-point average of at least 2.10 , take and complete all required courses, satisfy the writing requirements, and satisfy the experiential course requirement.

## First-Year Curriculum

The first-year curriculum emphasizes development of analytical skills, a sense of the role of legal institutions in society, and essential writing skills. Each course in the first-year curriculum shares these emphases and conveys substantive knowledge about a particular area of the law.

First-year students take the following courses.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| First Year, Fall |  |  |
| LAW:8017 | Contracts | 4 |

| LAW:8026 | Introduction to Law and Legal <br> Reasoning | 1 |
| :--- | :--- | ---: |
| LAW:8032 | Legal Analysis Writing and <br> Research I | 2 |
| LAW:8037 | Property | 4 |
| LAW:8046 | Torts | 4 |
| First Year, Spring |  | 4 |
| LAW:8006 | Civil Procedure | 3 |
| LAW:8010 | Constitutional Law I | 3 |
| LAW:8022 | Criminal Law | 3 |
| LAW:8033 | Legal Analysis Writing and |  |
| Elective | Research II | 3 |

The two-semester sequence LAW:8032 and LAW:8033, Legal Analysis Writing and Research (LAWR), is designed to equip students with effective skills in legal analysis, writing and oral communication (oral advocacy), and research.

## Second- and Third-Year Curriculum

Second- and third-year courses cover the range of specialties within the legal profession, allowing students to explore and follow their professional interests in a particular career specialization, to write for one of the school's four student-run scholarly journals, to pursue combined degrees in law-related graduate programs, or to simply obtain the widest possible exposure to the legal landscape.

All second- and third-year students must complete the following work.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| LAW:8280 | Constitutional Law II | 3 |
| LAW:8791 | Professional Responsibility | 3 |

Experiential course requirement
Four writing units beyond the writing requirements of the first year

## Combined Programs

## JD/Graduate Degrees

Some students want to explore areas beyond the law, whether it is to maximize their skill sets for future careers, gain in-depth knowledge in a second subject matter, or simply to broaden their minds. Combined degree programs allow students to pursue two degrees simultaneously, taking advantage of synergies between degree requirements while gaining significant exposure to a second area of study. Juris Doctor students may pursue combined degree programs with most graduate and professional programs at the University of Iowa. Students may earn a JD degree and another graduate or professional degree in a shorter amount of time than if the two degrees were pursued independently.

## Admissions Qualification

To pursue a combined degree, students must apply to and be accepted separately into the JD program and another graduate or professional program. Students typically seek admission to the second degreegranting program after matriculation at the College of Law by applying to the graduate program of interest during their first year of law school. In some cases it is possible to apply to both programs simultaneously. Students who have already begun graduate work at the University of Iowa may apply to the College of Law. Once students have been accepted into the JD program and another graduate or professional program, they must obtain the permission of the associate dean for student affairs or the dean of the College of Law to be classified as a combined degree candidate. Prospective
students interested in a combined degree program should contact the admissions offices of both programs to discuss the proposed program of study.

Students who wish to pursue a combined degree program and obtain admission into one college but not the other may enter the college in which they were admitted. However, they are not granted combined degree status. Likewise, combined degree students who terminate work toward one of the degree programs may typically continue to work toward the other degree.

## Admissions Procedures

Prospective combined degree students must submit separate applications to the College of Law and the graduate program of interest. They must take the Law School Admission Test (LSAT) and comply with all College of Law admissions requirements. Students also must meet the admission requirements of the other graduate program by taking tests such as the Graduate Record Examination (GRE) General Test or the Graduate Management Admission Test (GMAT). Prospective students should inform the Admissions Offices of both programs that they are applying to a combined degree program to confirm the admissions requirements for the other program.
Students interested in a combined degree program at the beginning of their legal studies should indicate they are seeking a combined degree on their application. Students who are admitted to both colleges will receive separate letters of admission from those colleges as well as an official notification of being admitted to the combined degree program from the Office of Admissions.
Admission information for the Juris Doctor (JD) is available on the College of Law Admissions page. For information about other graduate programs of interest, visit Academics on the University of Iowa home page.

## Shared Credit Policies

Students enrolled in a combined degree program must satisfy the semester hours and course requirements that all students must satisfy for each degree separately. However, they have the option of using credit for some courses toward both degrees. These courses are typically electives in each discipline. For example, students enrolled in a combined JD/MPH program may be able to count the family law and introduction to U.S. health care system courses toward the graduation requirements of both the JD and MPH degrees.
The amount of shared credit that may be applied toward both programs of study varies by program. Generally, combined degree program students may apply up to 12 s.h. earned in their second program of study toward the JD provided that the courses satisfy the College of Law policy on non-law courses. The JD/MPH degree permits up to $12 \mathrm{~s} . \mathrm{h}$. of specific College of Law courses to count toward MPH graduation requirements. Some degree programs allow students to count up to 6 s.h. of College of Law courses toward a nonlaw degree. Details on the Graduate College policy may be found in the Manual of Rules and Regulations on the Graduate College website. Prospective students should check with their graduate or professional program of interest to determine the law semester hours that count for both programs as well as other rules or restrictions concerning counting of courses toward both degrees with the College of Law.
Additional details about College of Law graduation requirements and other policies may be found in the College of Law Student Handbook. Students considering a combined degree program should be aware that the first-year program in the College of Law consists of required courses and they typically may not take courses outside the College of Law.

## Student Tuition Assessment Policy

Students in a JD and a graduate/professional degree combined program are assessed tuition at the College of Law rate if the tuition in the other college is lower than in the College of Law, except for any semester or summer session in which they are not enrolled in any law courses and none of the semester hours being earned in other colleges are applied toward their JD degree. All combined degree students pursuing a JD degree are assessed at least six semesters of law school tuition.

## Master of Laws, LLM

The Master of Laws (LLM) is designed for two types of students, those who could benefit from either the legal practice or the research track.

## Legal Practice Track

This track is for foreign-trained jurists who seek a comparative introduction to, and specific training in, aspects of United States law and legal institutions, and a path to state bar admission. Students benefit from the College of Law's legal analysis, writing, and research course, and core courses including contracts, property, torts, and professional responsibility. An extended orientation provides an introduction to United States law.

## Research Track

This track is for foreign-trained jurists or graduates of JD programs in the United States who wish to deepen their understanding of law and are interested in research. The program encourages close collaboration with renowned experts in comparative law; anti-competition law; law and economics; law and society; international law, including the law pertaining to international business transactions and/or human rights; and business and innovation.

The LLM program admits fewer applicants so that students receive substantial attention from the faculty. Admission is competitive. All applicants must present evidence of high academic potential and strong recommendations, especially from law professors who supervised their work in classes or seminars.

## Requirements

The Master of Laws program requires that students successfully complete a minimum of $24 \mathrm{~s} . \mathrm{h}$. of credit, as approved by their faculty advisor. Coursework is selected from the College of Law's general course offerings and from LLM-specific courses.

## Required Courses

| Course \# | Title | Hours |
| :---: | :---: | :---: |
| All of these: |  |  |
| LAW:8026 | Introduction to Law and Legal Reasoning | 1 |
| Two faculty | writing units | 1-4 |
| Two first-year courses, including at least one of these: |  |  |
| LAW:8017 | Contracts | 4 |
| LAW:8037 | Property | 4 |
| LAW:8046 | Torts | 4 |
| May include one of these: |  |  |
| LAW:8006 | Civil Procedure | 4 |
| LAW:8010 | Constitutional Law I | 3 |
| LAW:8022 | Criminal Law | 3 |

## Legal Practice Track

This track is open to foreign-trained lawyers who do not have a JD earned in the United States. Students enroll in the LLM orientation to the U.S. legal system course in two parts; a course in professional legal writing; a course in professional responsibility; and at least two basic bar exam courses, such as contracts, torts, or constitutional law. This track is designed to qualify students to take the bar exam in states that allow graduates of LLM programs to complete the bar exam.

## Research Track

This track is open to both foreign-trained students and students who hold a JD degree earned in the United States. LLM students without a JD degree must take the LLM orientation to the U.S. legal system course in August before the start of the fall semester. Students take the LLM seminar, a research and writing course in which they write a research paper on a topic chosen with the approval of their advisor. This track is especially suitable for those seeking to enter into an academic career or one that primarily involves policy formulation or research.

Students who earned a JD in the United States and international students who have been trained in another common-law jurisdiction, whose English competence is sufficiently high, and who choose the research track are required to undertake a more ambitious research project intended to lead to the production of a publishable paper. Others suitably qualified also may attempt the longer research paper with their advisor's approval.

With the exception of the LLM orientation course and the LLM seminar, courses are taken with other JD students from law course offerings, especially offerings on U.S., international, and comparative law. This method of instruction ensures a very effective comparative experience through broad contact with U.S. law students and professors, and U.S.-trained students similarly benefit from close contact with foreign-trained lawyers.

## Master of Studies in Law, MSL

The Master of Studies in Law program has been suspended and is not accepting graduate students at this time. The suspension of this program was approved by the Board of Regents, State of Iowa in spring 2023.

The Master of Studies in Law (MSL) degree is primarily intended to educate students and professionals in other fields who do not wish to practice law but who need to recognize and respond effectively to legal issues arising in their work. Individuals who have completed their BA or BS degree may choose to better position themselves in the job market. Others may be on an established career path but seek to increase their skill set and enhance mobility and promotion opportunities.

The MSL program provides professionals with an overview of the legal system as a whole, as well as an introduction to some of the legal issues that they are likely to confront in their fields. Students take existing courses in the College of Law alongside JD students

The degree may be completed in as little as one year of full-time study or in not more than four years of part-time study. The MSL program does not qualify graduates to practice law.

## Requirements

The Master of Studies in Law program requires 30 s.h. of credit. With law school approval, MSL students may take up to 9 s.h. in related coursework from other colleges across campus. Students complete common requirements and customize their curriculum based on interest. Students also may choose to pursue a specialty track such as the law and public policy track or the business and innovation track.

## Common Requirements

All students must take the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| LAW:8026 | Introduction to Law and Legal <br> Reasoning | 1 |
| At least one College of Law writing seminar, |  |  |
| independent study, or tutorial |  |  |
| Two first-year courses required of JD students, |  |  |
| including at least one of these: |  |  |
| LAW:8017 | Contracts | 2 |
| LAW:8037 | Property |  |
| LAW:8046 | Torts | 4 |

## Admission

Applicants must submit an application for admission; a short statement detailing their reasons for pursuing the MSL degree; a current résumé; official transcripts from all institutions students have attended; two letters of recommendation; and an official ACT, SAT, Graduate Record Examination (GRE) General Test, Graduate Management Admission Test (GMAT), or Law School Admission Test (LSAT) score.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) or the Duolingo English Test (DET).

Application materials are reviewed by the MSL Faculty Oversight Committee.

## Doctor of Juridical Science, SJD

The Doctor of Juridical Science (SJD) program is intended for students who wish to conduct original and advanced legal research in law under faculty supervision.

## Requirements

The Doctor of Juridical Science program includes five requirements for earning the SJD degree.

## Year of Residency

Doctor of Juridical Science students must spend at least one academic year (two semesters) in residence in the SJD program at the College of Law.

Students must complete 18 s.h. of credit during their first year of residency; students who have not earned an LLM degree complete 24 s.h. They must enroll in the SJD tutorial ( 5 s.h. each semester; 10 s.h. total) to conduct research and writing under the supervision of their SJD dissertation committee. The work in the SJD tutorial focuses on formulating a detailed dissertation proposal, beginning research for and writing of portions of the dissertation, and completing one or more chapters.
Students are expected to write a dissertation of publishable quality making a significant and original contribution to legal scholarship. The dissertation should be a book-length manuscript or a series of related articles of equivalent intellectual ambition and scope.
The balance of the required 18 s.h. will be earned through research and writing related to a student's dissertation, supervised by the student's SJD chair. However, at the discretion of a student's SJD committee, some of the semester hours may be allocated to courses or seminars that the committee feels a student needs to strengthen their ability to write a successful dissertation.

## Admission to SJD Candidacy

Admission to candidacy is a formal step that must be achieved before a student has the right to continue in the SJD program to complete a dissertation and is determined by the student's committee on the basis of the work done during the student's year of residency in the program.

As part of the assessment process, the SJD committee holds an oral examination toward the end of a student's year of residency that focuses on the work the candidate has completed on the dissertation, the candidate's general knowledge and understanding in relation to the subject matter of the dissertation, and the candidate's further plans for completion of the dissertation. If the committee is not able to admit the student to SJD candidacy at the conclusion of the first year of residency, the committee may give an extension of up to one calendar year if it finds a sufficient basis to believe that the student likely will be able to satisfy the necessary standard within that time.

## Presentation of Dissertation Work

Each student is required to make at least one substantive presentation of dissertation work at a meeting of the SJD tutorial to a specially constituted group of faculty, or in a public meeting, as arranged with the student's SJD committee.

## Completion of the Dissertation

Students admitted to SJD candidacy continue to enroll in 1 s.h. of dissertation credit, which provides access to university resources,
including the Law Library. However, students admitted to SJD candidacy are free to complete their dissertations wherever they wish. In any event, they must continue to coordinate with their committee and continue to register each fall and spring semester as an SJD candidate in the college.

## Oral Defense of the Dissertation

Before a student's SJD committee decides whether to approve the student's completed dissertation, the student must successfully defend the dissertation in an oral defense led by the committee. A student must complete the dissertation and have it approved by the committee within five calendar years from the date of admission to SJD candidacy.

## Admission

To be admitted to the SJD program, students typically first complete the LLM degree at the University of Iowa or a similar master's-level degree at another law school, either in the United States or at an English-language law school with academic standards equivalent to those of highly ranked United States LLM programs. In appropriate circumstances, the admissions committee will consider applications from excellent students without an English-language master's-level degree who wish to proceed directly to work on their SJD degree. All applicants must show strong evidence of scholarly research and writing abilities.

For more information, visit the SJD application process website.

# University of Iowa Center for Human Rights 

## Director, Center for Human Rights

- Adrien K. Wing

## Director, Human Rights Certificate Program

- Brian R. Farrell

Undergraduate certificate: human rights
Faculty: https://uichr.uiowa.edu/academics/faculty
Website: https://uichr.uiowa.edu/
The University of Iowa Center for Human Rights administers the Certificate in Human Rights, the only undergraduate credential awarded by the College of Law.

The Certificate in Human Rights involves an integrated, specific course of study that includes an introduction to foundational concepts in human rights as they have been informed by political, ethical, moral, legal, and historical thought. Through the curriculum, students explore specific, pressing human rights topics from interdisciplinary perspectives, identify solutions to global challenges, learn to translate foundational human rights concepts into effective advocacy, and strengthen their ability to communicate with academic and nonacademic audiences.

Human rights purport that all people deserve to live life with dignity; that human beings are owed the protection of these rights simply because they are human. Universal human rights apply to all equally and without discrimination. They encompass civil and political rights; economic, social, and cultural rights; and apply to both individuals and groups. The rights set forth in human rights doctrines, such as the Universal Declaration of Human Rights, are interrelated, interdependent, and indivisible.

The University of Iowa Center for Human Rights prepares students to apply human rights concepts to their professional career or field of study. Students learn to appreciate the value of empathy, social responsibility, and engaged global citizenship.

Students have opportunities to apply for funding to support summer rights-related internships, participate in an annual student academic conference and essay contest, and gain hands-on experience through center internships.

## Programs

## Undergraduate Program of Study

## Certificate

- Certificate in Human Rights [p. 1727]

## Courses

## University of Iowa Center for Human

## Rights Courses

HRTS:2115 Introduction to Human Rights
3 s.h
Analysis and evaluation of the international human rights program; relationship between human rights and international law. Same as IS:2115.

## HRTS:2902 The Arts and Human Rights

1-3 s.h.
Examination of emerging human rights issues in the arts from an interdisciplinary and international perspective. Same as IS:2902.

## HRTS:2903 Technology and Human Rights <br> 1-3 s.h.

Examination of emerging human rights issues in technology from an interdisciplinary and international perspective. Same as IS:2903.
HRTS:2907 Literature and Human Rights
1-3 s.h.
Examination in human rights in literature from an interdisciplinary and international perspective. Same as IS:2907.

HRTS:2908 Governance and Human Rights
1-3 s.h.
Examination of emerging human rights related to governance issues from an interdisciplinary and international perspective. Same as IS:2908.

## HRTS:2909 Human Rights Lab

1-3 s.h
Discussion-based examination of emerging human rights issues from an interdisciplinary and international perspective. Same as IS:2909.
HRTS:3904 Business, Labor, and Human Rights 1-3 s.h.
Examination of emerging human rights issues in labor and business from an interdisciplinary and international perspective. Same as IS:3904.
HRTS:3905 Topics in Human Rights 1-3 s.h.
Examination of emerging human rights issues from an interdisciplinary and international perspective. Same as IS:3905.
HRTS:3906 Global Crises and Human Rights 3 s.h.
Exploration of human rights in context of global challenges; multidisciplinary; topics may include military conflict, nuclear war, human trafficking, environmental disasters, and other international human rights crises.

## HRTS:3910 Human Rights Advocacy

3 s.h.
Theoretical foundations and critical issues for international human rights advocacy and international humanitarian movements. Same as IS:3910.
HRTS:3920 Advocacy in Action: From the Classroom to Congress (Washington, D.C.)

3 s.h.
Supervised internship; focus on field-based advocacy grounded in human rights frameworks; includes required three-day field experience in Washington, D.C.

## Human Rights, Certificate

## Learning Outcomes

Students who earn the Certificate in Human Rights will be able to:

- critically analyze real-world global challenges from a human rights perspective;
- articulate creative and effective solutions to real-world global challenges from interdisciplinary perspectives by applying human rights principles, advocacy strategies, and tactics grounded in the basic concepts of human dignity, nondiscrimination, equality, diversity, and pluralism;
- identify and trace the impact of the major events that have led to the formation of contemporary human rights concepts, norms, and institutions;
- explain the historical underpinnings of international human rights advocacy and international institutions that emerged in response to doctrines of racial superiority, inequality, discrimination, imperialism, and conflict during the 20th century;
- apply human rights frameworks to other fields of study, including the student's primary major and professional work;
- integrate concepts from other fields of study into their human rights coursework;
- critically analyze the major scholarly debates about human rights, past and present;
- articulate justifications of human rights frameworks and regimes as well as critiques of discourses on, and approaches to, human rights;
- explain foundational international human rights legal concepts and the interpretation and application of norms as well as the limits of the law in advancing human rights;
- identify human rights violations based on existing international human rights legal frameworks;
- identify the basic operational functions of international and domestic legal regimes involved with the promulgation, promotion, and protection of modern human rights standards;
- analyze and evaluate the relationship of human rights to individuals, governments, corporations, and civil society organizations, and analyze and evaluate the role of each in the promotion and protection of human rights and in relation to other social priorities;
- identify specific target audience(s) with the capacity to raise awareness about and mitigate human rights abuses, and to effectively communicate desired actions and outcomes to these diverse audiences in both academic and/or nonacademic settings; and
- develop critical thinking, reading, listening, writing, research, and analytical skills.

## Requirements

The undergraduate Certificate in Human Rights requires 18 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in certificate coursework. They may count a maximum of $6 \mathrm{~s} . \mathrm{h}$. of transfer credit toward the certificate with approval from the certificate program's faculty advisory group.

The certificate may be earned by any student admitted to the University of Iowa who is not enrolled in a UI graduate or professional degree program. Undergraduate to Graduate (U2G) students may earn the certificate when the undergraduate classification is primary.
Individuals should declare their intent to earn the certificate in MyUI.

The Certificate in Human Rights requires the following coursework.

## Foundations in Human Rights

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| All of these: |  | 3 |
| HRTS:2115/IS:2115 | Introduction to Human Rights | 3 |
| HIST:3108 | History of Human Rights | 3 |
| PHIL:3430 | Philosophy of Human Rights | 3 |

## Contemporary Global Issues in Human Rights

HRTS:2909/IS:2909 Human Rights Lab is repeatable. Other contemporary global issues courses are repeatable if the topic differs.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| 6 s.h. from these: |  |  |
| HRTS:2903/IS:2903 | Technology and Human Rights | $1-3$ |
| HRTS:2907/IS:2907 | Literature and Human Rights | $1-3$ |
| HRTS:2908/IS:2908 | Governance and Human Rights | $1-3$ |
| HRTS:2909/IS:2909 | Human Rights Lab | $1-3$ |
| HRTS:3904/IS:3904 | Business, Labor, and Human | $1-3$ |
|  | Rights | $1-3$ |
| HRTS:3905/IS:3905 | Topics in Human Rights | 3 |
| HRTS:3906 | Global Crises and Human |  |

## Human Rights in Practice

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| One of these: |  | 3 |
| HRTS:3910/IS:3910 | Human Rights Advocacy | 3 |
| HRTS:3920 | Advocacy in Action: From <br> the Classroom to Congress <br> (Washington, D.C.) |  |

## Career Advancement

The Certificate in Human Rights teaches students to explore topics from interdisciplinary perspectives, identify solutions to global challenges, translate foundational concepts into effective advocacy, and strengthen their ability to communicate with diverse audiences. The certificate not only bolsters the skillsets of students who transition directly to a career following graduation, but it also benefits students bound for law school or other professional or graduate studies. Students enroll in the certificate program from undergraduate departments and majors across the University of Iowa.
Certificate program graduates currently have careers:

- creating legislative policy;
- working for human rights nongovernmental organizations (NGOs);
- coordinating services for people who are homeless;
- advocating for domestic abuse survivors;
- designing K-12 curriculums;
- creating international development programs for governmental agencies, such as the U.S. Agency for International Development (USAID);
- producing print and broadcast news; and
- resettling refugees and asylum seekers.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Undergraduate majors: medical laboratory science (BS); nuclear medical technology (BS); radiation sciences (BS)

Undergraduate certificate: EMT paramedic program
Professional degrees: MCA; MCN; MD; MPA

Graduate degrees: MA; MME; MS; DPT; PhD
Website: http://medicine.uiowa.edu/
The Roy J. and Lucille A. Carver College of Medicine is an integral part of the University of Iowa. It contributes to the education of thousands of university students, is home to ground-breaking research in a wide array of disciplines, and provides a statewide health care resource.

The Carver College of Medicine is the only college in Iowa that offers a curriculum leading to the Doctor of Medicine. It also offers a Bachelor of Science in medical laboratory science, nuclear medicine technology, and radiation sciences (see "Undergraduate Programs of Study" under Programs [p. 1729] in this section of the catalog). It offers Master of Science and Doctor of Philosophy degrees in several disciplines, the Master in Medical Education, and the Doctor of Physical Therapy (see "Graduate Programs of Study" under Programs [p. 1729] in this section of the catalog). In addition, the Carver College of Medicine offers professional degrees: the Doctor of Medicine, the Master of Clinical Anatomy, the Master of Clinical Nutrition, the Master of Physician Assistant Studies (see "Professional Programs of Study" under Programs [p. 1729] in this section of the catalog).
Doctor of Medicine and other health sciences students have a number of opportunities to gain experience in medical clinics, community hospitals, and a major academic medical center. MD graduates may pursue further training in the specialties of family medicine, internal medicine, surgery, and pediatrics at one of 13 University of Iowaaffiliated residency programs in six Iowa cities. The college also participates in the education of students in the colleges of Dentistry, Nursing, Pharmacy, and Public Health and in the life sciences and health-related programs of the colleges of Liberal Arts and Sciences and Engineering, and the Graduate College.

Health professionals from throughout the Midwest take part in the college's year-round continuing medical education programming, updating their knowledge and skills through refresher courses, clinics, and conferences. The college also offers a variety of services that support Iowa physicians and community hospitals.

In addition to providing education and resources for physicians and other health care organizations, the college addresses broad public issues of distribution and organization of health care services. Its faculty members advise and serve on national, state, and regional health planning councils, health boards, and various health agencies.

Accredited by the Liaison Committee on Medical Education of the American Medical Association and the Association of American Medical Colleges, the Carver College of Medicine meets the requirements of all state licensing boards. Its MD diploma admits the holder to all privileges granted to graduates of all medical colleges before such boards. All other professional programs administered by the college are accredited by their respective accrediting bodies.

## Doctor of Medicine (MD)

The Doctor of Medicine is a four-year program that prepares students to practice primary care medicine and to pursue further education and training in specialized areas of medicine. For a description of the MD curriculum and information about admission to the program, financial support, and academic rules and procedures, see Doctor of Medicine [p. 1766] in the catalog.

## Programs

## Undergraduate Programs of Study

The Carver College of Medicine offers a Bachelor of Science with majors in medical laboratory science, nuclear medicine technology, and radiation sciences. See Medical Laboratory Science
[p. 1781], Nuclear Medicine Technology [p. 1805], and Radiation Sciences [p. 1846] in the catalog. In addition, the college offers an undergraduate certificate; see the EMT Paramedic Program [p. 1733] in this section of the catalog.

## Graduate Programs of Study

The Carver College of Medicine offers graduate programs leading to the MS in athletic training (see the Department of Orthopedics and Rehabilitation [p. 1815]), the MS and PhD in biochemistry (see the Department of Biochemistry and Molecular Biology [p. 1746]), the MS and PhD in microbiology (see the Department of Microbiology and Immunology [p. 1786]), the MS in pathology (see the Department of Pathology [p. 1822]), the Doctor of Physical Therapy and the PhD in physical rehabilitation science (see the Department of Physical Therapy and Rehabilitation Science [p. 1826]), and the Master in Medical Education (see the Medical Education Program [p. 1778]). Departmental participation and teaching leads to the Graduate College's MS and PhD in biomedical science [p. 1603] with cell and developmental biology, free radical and radiation biology, molecular physiology and biophysics, and pharmacology subprograms.

The college also offers a combined MD/PhD degree through the Medical Scientist Training Program [p. 1784]; see Combined Programs [p. 1768] in the Doctor of Medicine section of the catalog.
Many of the college's faculty members participate in the Graduate College's interdisciplinary programs in genetics [p. 1634], immunology [p. 1643], molecular medicine [p. 1672], and neuroscience [p. 1674].

## Professional Programs of Study

The Carver College of Medicine offers the Doctor of Medicine [p. 1767] degree, the Master of Clinical Nutrition [p. 1764] (MCN), the Master of Physician Assistant Studies [p. 1837] (MPA), and the Master of Clinical Anatomy [p. 1742] (MCA).

## Undergraduate Rules and Procedures

Undergraduate study in the Carver College of Medicine is guided by the following academic rules and procedures.

## Health Insurance, Immunizations

All health professions students are required to provide proof of health insurance coverage annually. Contact the University Benefits Office or visit its website.

All health sciences students must show proof of health examinations and screenings annually. For more information, contact Student Health and see Student Requirements and Forms on its website.

## Application for Degree

Students who want to be considered for graduation must submit a Degree Application with the Office of the Registrar through MyUI before the deadline for the session in which the degree is to be conferred. Students who have fulfilled the requirements for a minor or a certificate must indicate this on the degree application form filed through MyUI so that completion of the requirements for the minor or certificate can be verified and noted on their transcript.

## Academic Recognition

The University of Iowa and the Carver College of Medicine recognize academic achievement every fall and spring semester.

## Graduation with Distinction

Graduating students may be recognized for their scholastic achievement upon recommendation by their academic program and with the dean's approval. Graduation with distinction, high distinction, or highest distinction is determined by both the cumulative and the University of Iowa grade-point average (GPA). Highest distinction requires a GPA of 3.85 or higher; high distinction requires a GPA of 3.75 to 3.84 ; and distinction requires a GPA of 3.65 to 3.74 .

To graduate with distinction, students must have completed a minimum of 60 s.h. of graded coursework at the University of Iowa. Both S (satisfactory) and A-F (letter) grades are included in the total semester hour total. However, S grades are not calculated into the grade-point average.
Students graduating with distinction have a notation added to their transcript and diploma. To be recognized for distinction, students must have completed 45 of their final 60 s.h. and earned the required gradepoint average before their final semester of graduation.

## Dean's List

Undergraduate students who achieve a GPA of 3.50 or higher on 12 s.h. or more of University of Iowa graded coursework during a given semester or summer session and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean's List for that semester. Students may qualify for the Dean's List with fewer than 12 s.h. of graded credit if deemed appropriate by the college.

## President's List

University of Iowa undergraduate students who achieve a GPA of 4.00 on 12 s.h. or more of University of Iowa graded coursework and who have no semester hours of I (incomplete) or O (no grade reported) for two consecutive semesters (excluding summer sessions) are recognized by inclusion on the President's List.

## Financial Support

Students are eligible to apply for undergraduate financial aid. Scholarships, grants, loans, and part-time job placement are administered by the university's Office of Student Financial Aid. Parttime work in related areas is sometimes available.

## Registration, Credit, Grading

## Registration

Information about tuition and fees, registration, and deadlines is available from the Office of the Registrar. Students who add or drop a course after registration or who register late may be assessed a fee. Each course dropped after the deadline results in a W (withdrawn) on the transcript (see Changes in Registration below). Students are not allowed to register for full-semester courses after the second week of the semester or the first week of the summer session. Students must register for off-cycle courses before the first day of the course.
The maximum permitted registration for fall and spring semesters is 18 s.h. per semester. The maximum registration for summer session varies: 4 s.h. for the four-week sub-session; 9 s.h. for the eight-week sub-session; 9 s.h. for the six- and eight-week sub-sessions combined; 12 s.h. for the four-week sub-session and the eight-week sub-session; and 12 s.h. for the four-, six-, eight-, and twelve-week sub-sessions combined. Students may register for a maximum of 16 s.h. of fall semester or spring semester coursework during early registration. Students must obtain permission from the head of the division to register for more than the maximum semester hours allowed.

## Changes in Registration

Students may change their registration on MyUI. After the start of the semester, students should view Changes in Registration for information on how to change their schedule of courses and the permissions that are required.
Courses may be added with the approval of the advisor at any time during the first one-fifth of the course. They may be dropped at any time during the first two-thirds of the course. Approval is required from the dean of the Carver College of Medicine for all other changes in registration and is granted only in extraordinary circumstances. Students are assigned a mark of W (withdrawn) for any course dropped after the first one-fifth of the course. Students whose drop of one or more courses results in a registration of 0 s.h. for the semester must follow the procedure for withdrawal from the university instead of the add/drop procedure.
Students who have registered for courses offered for variable or arranged credit may change the number of semester hours with the signatures of the instructor, the advisor, and the head of the division at any time before the end of the first two-thirds of the course.
Other changes in registration (such as to audit for zero credit) may be made only during the first one-fifth of the course.
It is the student's responsibility to obtain the required permissions and to understand any consequences that may happen by processing the drop. Information regarding permissions and consequences will be posted on MyUI, but the student should contact their advisor with any questions. See Drop or Withdraw Tuition Responsibility on the Office of the Registrar website.

The Course Deadlines look-up on the Office of the Registrar website provides course specific deadlines. The cut-off time for obtaining any permissions on deadline days is 4:30 p.m. Students have until 11:59 p.m. to process a drop in MyUI if they have obtained all required permissions by 4:30 p.m.

## Withdrawal of Registration

Removing all courses from a schedule (even if only registered for one course) is considered a withdrawal of registration. Students may withdraw their registration without academic penalty at any time before the end of the first four-fifths of the course, but no credit is subsequently given. Later withdrawal results in automatic assignment of an F. Students who withdraw are not reinstated after the deadline for that session.
It is the student's responsibility to obtain the required permissions and to understand any consequences that may happen by processing the withdrawal. Information regarding permissions and consequences will be posted on MyUI, but the student should contact their advisor with any questions. See Drop or Withdraw Tuition Responsibility on the Office of the Registrar website.

## Auditing Courses

Students may register to audit a course with approval of the appropriate program director and course instructor. In addition to obtaining these signatures, students must register for zero credit in the course to be audited. The mark of AUS (audit successful) is assigned if a student's attendance and performance are satisfactory; if they are unsatisfactory, the mark of AUU (audit unsuccessful) is assigned. Courses completed with a mark of AUS do not meet any college requirement and carry no credit toward graduation. Auditing may not be used as a second-grade-only option. Tuition will be assessed for audited courses.

## Courses Offered by Other University of Iowa Colleges

Students who enroll in courses offered by other University of Iowa colleges are governed by those colleges' rules in matters regarding the courses. See Cross-College Enrollment and Records Policy on the College of Liberal Arts and Sciences website.

## In-Residence Requirement

The in-residence requirement may be met by earning the final consecutive 30 s.h. in residence at the University of Iowa, or 45 of the last 60 s.h. in residence, or an overall total of 90 s.h. in residence.
Nonresident instruction includes coursework and correspondence study at other colleges, universities, and institutions. Undergraduate coursework in other University of Iowa colleges counts toward inresidence requirements.
Because the Carver College of Medicine partners with Allen College for the medical laboratory science major, students are not held to the University of Iowa in-residence requirement.

## Duplication and Regression

Duplication occurs when students take the same course more than once or when they take a course that duplicates the content of a course they already have completed satisfactorily. Regression occurs when students take a course that is less advanced or at a lower level than one in the same subject that they already have completed satisfactorily. Duplication and regression are assessed by the registrar. Semester hours earned by duplication or regression do not count toward graduation.

## Minimum Grade Requirement

Students must earn a semester, UI, and overall cumulative GPA of at least 2.00 after admission to the Carver College of Medicine. Students enrolled in a program that uses the pass/fail/honors grading system must pass all courses required to complete the program.

Radiation sciences students must earn a C or higher in all didactic, lab, and clinical radiation sciences courses. A final course grade of Cminus or below is a failing grade for the program and the BS degree with a major in radiation sciences or nuclear medicine technology.

## Grading Procedures

Grading procedures vary from program to program. Students should consult individual program policy statements and course syllabi for information.

## Pass/Nonpass

Students may have the option of taking elective courses pass/ nonpass ( $\mathrm{P} / \mathrm{N}$ ) with the permission of the course instructor and/or the department offering the course. Students may register for the P/ N grading option from the first day of classes until the last day for undergraduates to add a course; see Academic Calendar on the Office of the Registrar website.
To register for a P/N course, the student must print the Grading Option Change Form, have it signed by the course instructor and the academic advisor, and submit the completed form to the UI Service Center before the published deadline.

Semester hours graded P/N are not used in computing a student's grade-point average. Semester hours graded $P$ count toward graduation; those graded N do not. The college accepts a maximum of 15 s.h. of University of Iowa credit graded P toward the bachelor's degree, and it accepts a maximum of 30 s.h. of credit graded P and/ or S from all sources (UI and transfer credit) toward the bachelor's
degree. Students must be in good academic standing to be eligible for the pass/nonpass option.

## Satisfactory/Fail or Satisfactory/ Unsatisfactory

A number of courses only use satisfactory/fail (S/F) or satisfactory/ unsatisfactory (S/U) grading. All students registered for these courses receive a grade of S, F, or U. Students do not need special forms or permission in order to register for $\mathrm{S} / \mathrm{F}$ or $\mathrm{S} / \mathrm{U}$ courses.

Semester hours graded S or U are not used in computing a student's grade-point average, but semester hours graded F are used in gradepoint average computation. Semester hours graded S count toward graduation; semester hours graded F or U do not.
Students may use coursework graded $S$ to fulfill General Education Program requirements and/or the requirements of their major, a minor, or a certificate. The college accepts a maximum of 15 s.h. of University of Iowa credit graded S toward the bachelor's degree, and it accepts a maximum of 30 s.h. of credit graded $P$ and/or $S$ from all sources (UI and transfer credit) toward the bachelor's degree.

## Second-Grade-Only Option

Repeating courses for the second-grade-only option is only allowed in extraordinary circumstances. Students must obtain permission from the instructor, program director, and, potentially, the associate dean of medical education and professional programs.
If the second-grade-only is approved, both grades remain on the permanent record, but only the second one is used to calculate gradepoint average and credit earned. Students using the second-gradeonly option for courses that are not part of their major must follow the procedure for the college that offers the course.
Since many courses, labs, and internships are prerequisites to others, it may not be possible to repeat a course.
On the permanent record, the second-grade-only option appears as a pound symbol (\#), showing that the first grade has been replaced by the second grade in grade-point average calculations, and that only the hours from the second registration have been counted as hours earned.
Students must request the second-grade-only option before the last day of class in order for the second grade to appear on the next grade report. The request also may be made after the close of the semester. The second-grade-only option cannot be applied to coursework for which a student has already been awarded a UI degree.

## Incomplete

A grade of I (incomplete) may be reported if the reasons for inability to finish the course satisfactorily are acceptable to the program director and the course instructor. There also must be evidence that the coursework will be finished within a reasonable length of time, usually by the end of the next academic session. Incompletes not removed by the deadline for submission of final grades for the next session result in the assignment of a grade of F. A student must work with the instructor so that an incomplete grade may be rectified by official action.

## Reports to Students

Instructors notify any student whose work falls below the minimum acceptable level once the problem is recognized. Grades are reported on a student's transcript, following university protocol.

If a student is earning a grade below a C at midterm, the course instructor will submit the grade to the Office of the Registrar. The midterm notification serves as a warning to the student that their academic status is at risk.

## Degrees and Minors

## Two Bachelor's Degrees

Students who want to earn two bachelor's degrees, each from a different college, must communicate the request to their academic advisor, who will then contact the university's Office of Admissions. Interested students must complete the degree requirements for both majors, including the residency requirements.

## Second Bachelor's Degree

Students who already hold a bachelor's degree and wish to earn an additional bachelor's degree must complete at least 30 s.h. consecutively in the Carver College of Medicine and must meet college and program degree requirements. Individuals interested in earning a second bachelor's degree must apply for admission to the degree program at the university's Office of Admissions.

## Minors

Students graduating from the Carver College of Medicine may earn a minor or minors in any degree-granting department or program in the college outside of their major department or in another college of the university by meeting that department's requirements for the minor.

## Academic Progress, Probation, Dismissal

Students are expected to maintain satisfactory academic and professional standards and to demonstrate reasonable progress toward the Bachelor of Science. Students who fail to maintain satisfactory academic progress or professional standards of behavior as determined by their program may be placed on academic and/or programmatic probation or dismissed from the program. Probation serves as a warning that students will not graduate unless their academic performance and/or professional behavior improves.
Continued unsatisfactory scholarship or unprofessional behavior may result in dismissal from a program. Students dismissed from a program may reapply for admission through the regular, established program admissions process, following review by a faculty committee, at least four months before the requested date of readmission.
Students may be placed on Carver College of Medicine academic probation if their semester, UI, or overall cumulative grade-point average drops below 2.00. Entering students may be admitted on academic probation if they fail to meet the minimum stated standards for admission. Students who are admitted on academic probation, restored to good standing, and then fail to maintain the minimum required grade-point average are subject to dismissal.
Students placed on probation or dismissed from a program are notified in writing; copies are saved in their files. An academic probation notation is placed on the transcript.
To be restored to good standing, radiation sciences students placed on Carver College of Medicine academic probation must earn a semester, UI, and overall cumulative GPA of at least 2.00 within one of the following time frames.

- Full-time students ( 12 s.h. or more in a semester): by the end of the next semester they register for. All coursework completed during the semester will be included in gradepoint average calculations.
- Part-time students (less than 12 s.h. in a semester): by the end of the next two or three semesters (the length of time it takes to complete at least 12 s.h. of coursework).

All coursework completed during this time frame will be included in grade-point average calculations.

Students on academic probation who fail to meet the grade-point average requirement in the designated time frame for restoration to good standing are subject to dismissal from the program.
Failing a course while on academic probation may result in dismissal from the program.
Students on programmatic probation are restored to good standing upon evidence that the requirements detailed in the probation notification document(s) have been satisfied, as determined by the program director and/or the promotions committee.
Any offense against good order committed by a student in a classroom, clinical setting, or laboratory may be dealt with by the instructor or referred to the program director. The instructor reports in writing any disciplinary action taken against a student to the program director. Repeated or exceptional instances are reported to the promotions committee and/or the dean.

## Academic Misconduct

## Plagiarism and Cheating

All cases of plagiarism and cheating in the Carver College of Medicine are reported to the dean with a statement of relevant facts. The instructor, program director, or promotions committee may submit recommendations for appropriate disciplinary action.
The individual instructor may reduce the student's grade, including assignment of the grade of F in the course. A report of this action is sent to the student, the program director, and the dean.

The promotions committee, dean, or a faculty committee appointed by the dean, may impose the following or other penalties, as the offense warrants: disciplinary probation, requirement of additional hours for the degree, suspension from the program for a period of time, or expulsion from the program.

## Appeals Procedure

Students who would like to appeal a decision should follow their program's appeals procedure.

## EMT Paramedic Program

## Emergency Medical Technology (EMT) Paramedic Program

## Website: https://uihc.org/paramedic-education-program

This nationally accredited 1,200-hour program leads to national and Iowa certification as a paramedic. The full-time academy program which begins each spring, consists of 16 weeks of intensive classroom training at University of Iowa Hospitals \& Clinics (UIHC), four to five days a week. A part-time program which begins in the fall semester meets every third weekday for two semesters and is based on a fire service work schedule. A second segment consists of 320 hours of supervised clinical experience in a hospital setting. The third segment is a minimum of 360 hours of a supervised paramedic field internship with a paramedic-level ambulance service. Field internships are available at a number of approved sites in Iowa.
Students obtain credentials in advanced cardiovascular life support, advanced medical life support, geriatric education for EMS, pediatric advanced life support, pediatric education for prehospital professionals, and prehospital trauma life support.
The program is conducted twice each year. The full-time academy begins in January and the part-time program begins in August.

## Goal

The goal of UIHC Emergency Medical Services Learning Resources Center (EMSLRC) paramedic program is to prepare competent entrylevel paramedics in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains with or without exit points at the advanced emergency medical technician, emergency medical technician, and/or emergency medical responder levels.

## Curriculum

The program adheres to the National Emergency Medical Services Education Standards as defined by the National Highway Traffic Safety Administration (NHTSA). Students who successfully complete the program are eligible for the National Registry paramedic examination.
All students enroll in the courses EMTP:3101 Emergency Medical Technician - Paramedic I and EMTP:3102 Emergency Medical Technician - Paramedic II.

## Accreditation

The University of Iowa Health Care Emergency Medical Services Learning Resource Center (EMSLRC) Paramedic Program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon the recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP).
The University of Iowa Health Care EMSLRC is approved by the Iowa Department of Public Health Bureau of Emergency and Trauma Services as an EMS training program (\#018).

## Facilities

The Carver College of Medicine consists of twelve buildings containing 1.6 million square feet of space with one building (College of Medicine Administration Building) dedicated to administrative departments only. The other eleven buildings house research activities which include research centers, programs and institutes, as well as the Core Research Facilities which are a collection of centralized laboratories dedicated to developing and providing state-of-the-art research resources to facilitate biomedical research. They are available on a fee-for-service basis to the entire health sciences community along with outside entities.
The Medical Education Research Facility houses medical education space and research laboratories, including the Holden Comprehensive Cancer Center and the Institute for Vision Research. It also contains the college's four learning communities. The communities group students who are at different stages in their medical education, encouraging peer-to-peer learning and emphasizing leadership and community service. Each learning community features small-group rooms, study and social spaces, computer workstations, a kitchen area, and staff offices. The Medical Education Research Facility also houses the Performance-Based Assessment Program, which evaluates students' clinical and communication skills by reviewing simulated physician-patient encounters recorded in mock patient examination suites.

Students acquire clinical skills experience at University of Iowa Hospitals \& Clinics, the VA Iowa City Health Care, and in affiliated hospitals and ambulatory care centers throughout Iowa. University of Iowa Hospitals \& Clinics serves as a tertiary care center for Iowa and portions of adjoining states. Many patients are referred to University of Iowa Hospitals \& Clinics for care and treatment not available in their home communities.

Eckstein Medical Research Building is the home of the Iowa Institute of Human Genetics Genomics Division, Viral Vector Core Facility, Flow Cytometry Facility, and the Biomedical Research Store.

The five basic science departments are housed in the Bowen Science Building and include the departments of Anatomy and Cell Biology, Biochemistry and Molecular Biology, Microbiology and Immunology, Molecular Physiology and Biophysics, and Neuroscience and Pharmacology.

The Medical Education Building houses research and educational space for the Department of Physical Therapy and Rehabilitation Science. It also houses research space for the Department of Psychiatry and is the home of the Office of Consultation and Research in Medical Education (OCRME). OCRME is staffed by education specialists from a range of disciplines who serve the faculty, staff, and administrators in all Carver College of Medicine programs. The office provides educational consultation, initiates and cooperates in educational research endeavors, and conducts faculty development activities.

There are teaching laboratories located in the Medical Education Building, the Bowen Science Building, and the Medical Research Facility.
Other buildings that house a wide range of College of Medicine departments, administration, and research activities are the Carver Biomedical Research Building, Westlawn, Medical Laboratories, the Medical Research Facility, the Medical Research Center, and the Multi-Tenant Facility.

The newest building, completed in 2014, is the Pappajohn Biomedical Discovery Building. The Iowa Neuroscience Institute is located on the first and second floors of the building. Third and fourth floors house the Fraternal Order of Eagles Diabetes Research Center and the Abboud Cardiovascular Research Center, on the fifth floor is the Auditory Research Group, and on the sixth floor is the Lung Biology and Cystic Fibrosis Research Center. The Iowa Institute for Biomedical Imaging is on the lower basement levels housing the 7 Tesla MRI scanner (one of few such devices in the U.S.), 3T along with several smaller devices, and a 3D visualization lab. All researchers in this building are chosen by the Pappajohn Biomedical Institute in which scientists from across the university collaborate to explore high-risk/high-yield scientific questions in the life sciences with the goal of advancing treatments for a wide array of human diseases.

## Interdisciplinary Programs and Centers

The college's interdisciplinary programs and centers draw strength from college faculty members and the facilities available to them, without regard to departmental units or to the distinction between graduate and postgraduate training. For more information, contact the vice dean for research.

The following centers are subdivisions of the Carver College of Medicine.

## Alzheimer's Disease Research Center

The Alzheimer's Disease Research Center studies Alzheimer's disease and related neurological conditions from the viewpoint of neuroanatomy, neuroimaging, neuropsychology, and neurochemistry. The center's purposes are to improve the diagnosis and treatment of these conditions, to disseminate information on new research to the public, and to contribute to a better understanding of the neural basis of cognition.

## Carver Genetic Testing Laboratory

The John and Marcia Carver Nonprofit Genetic Testing Laboratory provides genetic testing for rare eye diseases, especially diseases so rare that commercial tests are unavailable for them. The laboratory's
test results provide information to patients and their families while keeping the tests affordable.

## Holden Comprehensive Cancer Center

The Holden Comprehensive Cancer Center (HCCC) coordinates the efforts of University of Iowa faculty and staff in research, education, and clinical programs related to all aspects of cancer. The HCCC is recognized by the National Cancer Institute as an NCI-designated cancer center and has comprehensive status, a designation that recognizes the depth and breadth of interdisciplinary cancer research activity taking place at the University of Iowa.

## UI Heart and Vascular Center

The UI Heart and Vascular Center coordinates research and training programs related to cardiovascular diseases. It encompasses several programs: Program Project Grant on Integrative Neurobiology of Cardiovascular Function, Program Project Grant on Cerebral Blood Vessels, Program Project Grant on Oxidative Mechanisms in Vascular Disease, Program Project Grant on Genetic and Signaling Mechanisms in the Central Regulation of Blood Pressure, Program Project Grant on Airway Physiology and Pathophysiology in a Porcine CF Model, Program Project Grant on Gene Therapy for Cystic Fibrosis Lung Disease, a Leducq Foundation Consortium grant, and a Cystic Fibrosis Foundation research and development program. It also coordinates several training programs and a program of other interdisciplinary research supported by a number of individual project grants. The center occupies two floors of cardiovascular research laboratories and administrative offices in the Medical Research Center.

## Courses

- Carver College of Medicine Courses [p. 1734]
- EMT-Paramedic Program Courses [p. 1737]
- Orthoptics Teaching Program Course [p. 1738]

Most Carver College of Medicine courses are offered by the college's departments and programs. They are listed and described in the corresponding General Catalog sections. The college also offers the following nondepartmental courses.

## Carver College of Medicine Courses

MED:1100 Introduction to Health Care Professions
Introduction to current U.S. health care system and changes that are likely in the near future; information about distinct health care professions grouped by discipline (e.g., nursing, pharmacy, public health), and less traditional career pathways in health care fields; how health care professionals across disciplines coordinate to deliver better health care; instruction by prominent health care faculty at the University of Iowa; for students considering a career in the health care field.
MED:3740 End-of-Life Care for Adults and Families 3 s.h.
End-of-life issues in care of adults, older adults, and their families. Same as ASP:3740, NURS:3740.
MED:5416 Foundations in Healthcare Ethics 3 s.h.
Major ethical traditions, ideas, and frameworks that have shaped contemporary approaches to healthcare ethics in morally pluralistic Western cultures; four prominent frameworks in healthcare ethics include virtue based, principle based, circumstance based, and consequence based that emphasize four aspects of ethical decision-making-agent, action, context, and outcome.
MED:8001 Medical Elective arr.
MED:8003 Clinical Clerkships
arr.
MED:8005 Medical Student Research Fellowships
0 s.h.

MED:8010 Introduction to Medical Education at Iowa 0 s.h. Introduction to first-year fall courses; advanced concepts in anatomy, biochemistry, cell biology, and clinical reasoning skills; for MD students.

## MED:8021 Community Health Outreach I

0-1 s.h.
Presentations and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

## MED:8022 Community Health Outreach II

Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.
MED:8023 Community Health Outreach III
1-2 s.h.
Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

MED:8028 Introduction to U.S. Health Care System 1 s.h.
Structure, function, and finance of U.S. health care system; access, cost, quality, finance mechanisms, reform process.

## MED:8029 Disruptive Forces in Medicine

1 s.h.
Exploration of the pathogenesis of COVID-19 and its impact on medicine at University of Iowa Hospitals \& Clinics; students gain perspective and knowledge about the virus, its impact on medical practice, and future consequences; mechanisms of COVID-19 pathogenesis; racial and social inequities highlighted by the pandemic; insight into clinical challenges (i.e., telemedicine); best practices for patient education and clinician safety in different fields. Requirements: MD enrollment.
MED:8031 Reproductive and Gynecological Health Seminar 1 s.h. Education on reproductive and gynecological health topics, service opportunities, and mentorship. Requirements: MD standing.

## MED:8033 Clinical Skills for Responding to Sexual Violence 1 s.h.

Training that focuses specifically on epidemiology, screening, clinical presentation, initial evaluation, and medical management of sexual violence and interpersonal violence victimization; opportunity to apply preclinical and/or concurrent coursework to true-to-reality, clinically relevant, and medically complex health problems with sexual violence as the underlying cause; development of communication and clinical skills necessary to address sexual and interpersonal violence in a clinical setting. Requirements: MD standing or physician assistant standing or enrollment in degreeseeking graduate or health professional program.

MED:8070 The Examined Life: Writing and Medicine 1 s.h. Literature, essays, poetry; discussion of participants' writing; students prepare portfolios of their own writing.

## MED:8071 Career Life Planning

1 s.h.
Students' individual interests, values, and decision-making processes important in selecting a specialty, engaging in the match process, and integrating oneself into the medical profession; personal career development, culture and climate in which physicians work and learn.

## MED:8073 Biomedical Innovation

1 s.h.
Introduction to all phases of medical device/technology
development; development of knowledge of entire medical innovation process through didactic sessions, faculty, interactions, and interdisciplinary collaboration; interdisciplinary approach; research and development of a novel medical device, therapy, or model of care. Requirements: MD enrollment.

MED:8074 Research Skills Seminar 1 s.h.
Seminar series designed to bridge gap from undergraduate and medical student experiences to research during residency and beyond; topics include identification of projects and mentors, leadership, collaboration, translation, evidence-based medicine, project development, statistical analysis, presentation, publication, and career progression.

## MED:8076 Bioethics and Humanities Seminar

1 s.h.
Broad range of topics in bioethics and medical humanities, including philosophical principles, clinical ethics, research ethics, medical professionalism, narrative ethics, and historical and cultural aspects of medicine. Requirements: enrollment in Carver College of Medicine humanities distinction track.
MED:8077 Personal-Professional Compass
1 s.h.
Provides help for medical students to understand, articulate, and integrate personal and professional values and goals while making their way through medical school; promote student growth as humanistic professionals through written reflections on personal experience, readings from medicine and the humanities, and discussions with peers and mentors; preparation to write an authentic and compelling personal statement for residency applications. Requirements: MD enrollment.
MED:8081 Global Health Issues I
Core issues in the current field of global health, including history of global health, health and development, social determinants of health, measuring health and disease, disparities in the American health care system, poverty and health, gender issues and reproductive health, child health, immigrant and migrant health issues, and introduction of major players in global health. Requirements: MD enrollment.

## MED:8082 Global Health Issues II

1 s.h.
Core issues in the current field of global health, including health care as a human right, why the Third World is the Third World, communicable disease issues, outbreaks and pandemics, noncommunicable issues, malnutrition and obesity, cultural context of health care, violence as a health issue, and emergency response and transition to development. Prerequisites: MED:8081. Requirements: MD enrollment.

MED:8083 Global Cross-Cultural Elective
arr.
Cross-cultural medical program with focus on health care problems of a domestic or international community; individually arranged.

## MED:8084 Global Health Seminar

1 s.h.
Presentations by faculty members, university special guests, and alumni on their current work in global medicine/global health; implementation of global health concepts. Requirements: MD enrollment.

## MED:8121 Clinical and Professional Skills I

3 s.h.
Introduction to concepts of clinical reasoning, communication, physical examination, and evidence-based clinical practice; principles of biomedical ethics; early clinical interactions and placement of classroom experiences into context of patient care through the Early Clinical Experiences (ECE) program; interaction with students from other health sciences colleges to explore the interprofessional approach to caring for patients. Requirements: MD enrollment.
MED:8122 Medicine and Society I
3 s.h.
Delivery of individual disease prevention/health promotion services; introduction to social determinants of health; influence and impact of culture and community on health care; community resources; application of health and risk assessment to individual patients and self. Requirements: MD enrollment.

## MED:8123 Foundations of Cellular Life

Genetics, embryology, molecular biology, biochemistry, cell biology and histology; molecular events required for cellular life; how cells grow and interact to form basic tissues of human body; necessary framework to explore six mechanisms of health and disease. Requirements: MD enrollment.

MED:8124 Mechanisms of Health and Disease I 8 s.h.
Normal and healthy processes within and among mechanisms of oxygenation, metabolism, and genetics/development; first in a series on multisystem mechanisms of health and disease. Requirements: MD enrollment.
MED:8131 Clinical and Professional Skills II 4 s.h. Interpersonal skills, lifelong learning, interviewing skills, physical examination skills, ethical issues in patient care, and basic approach to patients in terms of prevention, treatment, and follow-up care. Second in a sequence during preclinical semesters of medical school and continuing as an integrated strand throughout curriculum. Requirements: MD enrollment.

## MED:8132 Medicine and Society II <br> 4 s.h.

Knowledge and skills related to health promotion and disease prevention from a medicine and society perspective, including impact of behavior, environment, culture, and socioeconomics; identification of major public health problems associated with mechanisms of health and disease. Second in a sequence during preclinical semesters of medical school and continuing as an integrated strand throughout curriculum. Requirements: MD enrollment.

## MED:8133 Mechanisms of Health and Disease II

Normal and healthy processes within and among mechanisms of Immunology/Inflammation, locomotion/integument, and neuropsychiatry; second in a series on mechanisms of health and disease. Requirements: MD enrollment.
MED:8134 Mechanisms of Health and Disease III 11 s.h.
Abnormalities or disruptions leading to disease within and among mechanisms of oxygenation, metabolism, and genetics/development; third in a series on multisystem mechanisms of health and disease. Requirements: MD enrollment.

## MED:8199 First-Year Special Study

arr.
First-year special study. Requirements: MD enrollment.
MED:8221 Clinical and Professional Skills III
Advanced clinical reasoning skills through focused patient encounters and interactions with special patient populations; emphasis on integration and use of concepts for cost conscious, patient-centered, interdisciplinary care. Requirements: MD enrollment.

## MED:8222 Medicine and Society III

4 s.h.
Health services organization and delivery; emphasis on community dimensions of medical practice and patient safety. Requirements: MD enrollment.
MED:8223 Mechanisms of Health and Disease IV 10 s.h.
Abnormalities or disruptions leading to disease within and among mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry; fourth in a series on multisystem mechanisms of health and disease. Requirements: MD enrollment.

## MED:8224 Mechanisms of Health and Disease Keystone <br> 7 s.h.

Transition between classroom instruction in mechanisms of health and disease and clinical practice; foundational information from mechanisms of health and disease sequence approached from perspective of what is commonly encountered in clinics; application of information to making diagnostic and management decisions of common important clinical problems. Requirements: MD enrollment.

5 s.h. MED:8301 Community-Based Primary Care
Introduction; clinical activities, work with community agencies and resources, didactic and conferences. Requirements: MD enrollment.

MED:8320 Transition to Clerkships 1-2 s.h
Two weeks of skills training prior to start of core clinical clerkships. Requirements: MD or MPA enrollment.
MED:8401 Medicine, Literature, and Writing
arr.
Insights, freedom, joy, responsibilities, and challenges of a life in medicine; reading, discussion, individual creative writing.

MED:8403 Teaching Skills for Medical Students 4 s.h.
Practical teaching techniques; opportunity for students to develop teaching skills before they become medical residents.
MED:8404 Advanced Teaching Skills for Medical Students 2 s.h. Opportunity to expand knowledge and experience in medical education; investigation of medical education in students' specialty of interest through literature research and interaction with faculty; primary focus is to design and successfully complete a faculty approved project. Prerequisites: MED:8403. Requirements: fourthyear MD enrollment.
MED:8405 Leadership for Future Physicians 2 s.h.
Formal training in multiple aspects of leadership; offers future leaders in health science specialties an earlier opportunity to consider leadership abilities and perspectives; for fourth-year medical, physician assistant, nursing, pharmacy, public health, and dental students. Requirements: health science enrollment.
MED:8410 Quality Improvement and Patient Safety 2 s.h. Students work with faculty and staff involved in quality improvement and patient safety (QI/PS) at University of Iowa Hospitals \& Clinics (UIHC); readings, didactic sessions, and hands-on activities to advance knowledge and practice of QI/PS in health care; activities include review of ongoing QI/PS projects at UIHC, application of QI/ PS methodologies to project development and analysis, individual and team-based simulations, interdisciplinary collaboration and communication, participating in conferences related to QI/PS, and reflecting on these experiences with peers.

MED:8411 Foundational Science and Drug Therapy 2 s.h. Advanced medical students partner with advanced pharmacy students and work together to devise evidence-based treatments for patients suffering from common illnesses; foundational science concepts from each student's respective discipline-including mechanisms of health and disease and principles of pharmacokinetics and pharmacodynamics-are used to design and explain proposed treatments; two weeks, case-based.
MED:8412 Improvisation: A Life Skill 4 s.h.
Drawing from interpersonal communication techniques, experiences that help students communicate more empathically with their patients, patients' families, and other health care team members in order to create a safe and trusting exchange.
MED:8413 Oaths and Ethics 4 s.h.
History and purpose of medical oaths; medical oaths compared with professional codes; content of medical oaths in terms of ethical principles and virtues; review of ethical values communicated in ethics-related seminars at University of Iowa Hospitals \& Clinics; students write a medical oath that crystallizes their own most important professional commitments.

Second-year special study. Requirements: MD enrollment.

## MED:8414 Health Policy Advocacy Des Moines

Health policy advocacy experience in Des Moines while Iowa Legislature is in session; students choose an area of interest in health policy advocacy and work with senior legislators, policy advisors, state health department representatives, or advocates of various professional organizations involved in advocacy efforts for health policy; students receive prior approval regarding which health policy issue they want to work on and which individual or professional organization they plan to work with during their onsite experience. Requirements: MD enrollment.
MED:8415 Financial Management for Rising Interns 2 s.h.
Foundational concepts of personal financial management; topics include personal budgeting, educational loan management, investing, risk management and mitigation, medical practice investment, taxation, and additional relevant areas of interest for rising resident physicians. Requirements: MD enrollment.

## MED:8416 Foundations in Healthcare Ethics

3 s.h.
Major ethical traditions, ideas, and frameworks that have shaped contemporary approaches to healthcare ethics in morally pluralistic Western cultures; four prominent frameworks in healthcare ethics include virtue based, principle based, circumstance based, and consequence based that emphasize four aspects of ethical decision-making-agent, action, context, and outcome.
MED:8470 Self-Directed Learning in Advanced Clinical Topics 0 s.h.
Online learning modules on advanced clinical topics; for students in MD program.
MED:8480 Global Health Clerkship
Cross-cultural medical program at an international site; focus on health care problems of a specific community; individual educational objectives set in advance.
MED:8499 Individually Arranged Medicine Elective arr. Individually arranged elective through the Office of Student Affairs and Curriculum.

MED:9701 Instructional Design and Technology 3 s.h. Skills and techniques necessary for analysis, design, development, implementation, and evaluation of effective instruction.
MED:9702 Clinical Teaching in Medical Education 3 s.h. Principles and methods for teaching individuals and small groups in outpatient and inpatient settings. Prerequisites: MED:9701 or PSQF:6205. Recommendations: educational psychology course.
MED:9703 Educational Research and Evaluation
Research design and program evaluation; approaches relevant to medical education.

MED:9711 Teaching Methods in Medical Education 3 s.h.
Principles and methods for teaching in large and small classrooms. Recommendations: educational psychology course.
MED:9712 Introduction to Educational Measurement in Medical Education

3 s.h.
Classical test theory; overview of medical education assessment methods; practical information for designing and critiquing assessments.

MED:9713 Assessment in Medical Education
3 s.h.
Medical education assessment methods; research methods and
literature that support current practices; research project. Prerequisites: MED:9712.

MED:9714 Current Issues in Medical Education
3 s.h. Selected issues, policies, and research.
MED:9720 Portfolio Project
Production of individual student portfolios used to integrate knowledge across courses; capstone activity.

4 s.h. MED:9721 Study in Faculty Development
3 s.h.
Academic credit for approved project or other assigned activities for students in the Teaching Scholars program.

MED:9722 Independent Study
MED:9724 Leadership in Medicine
Introduction to basic leadership and management theories pertaining to a health care setting; focus on the history of leadership development, various components of leadership, and how these components can be used to be a successful leader/administrator.
Requirements: Master in Medical Education degree program enrollment.
MED:9725 Simulation in Medical Education 3 s.h.
Appropriate use of various types of simulation in medical education; how to design, deliver, and debrief a simulation activity; literature supporting use of simulation in medical education. Requirements: Master in Medical Education degree program enrollment.
MED:9726 Curriculum Development in Medical Education 3 s.h.
Curriculum development using knowledge and experience gained from MED:9701 and MED:9711; identify an area/topic for creation of curriculum; conduct a needs assessment to identify topics and/ or components of curriculum; create a plan with curriculum goals, learning objectives, and methods for evaluation; develop preliminary planning and aspects of implementation and evaluation phases of the model.

MED:9727 Teaching and Assessing Communication Skills in Medical Education

3 s.h.
Explores broad issues related to both teaching and assessing clinicianpatient communication skills in medical education; review literature on best practices in clinician-patient communication and on teaching and/or assessing skills among medical learners; explore observation and feedback as key technique in addressing communication skills through observation of peers and learners; video recording of interactions with patients.

## Hospital Certificate Programs of Study

The following courses are conducted by University of Iowa Hospitals \& Clinics staff.

## EMT-Paramedic Program Courses

EMTP:3101 Emergency Medical Technician - Paramedic I 0 s.h.
Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Requirements: certification as an emergency medical technician-basic.
EMTP:3102 Emergency Medical Technician - Paramedic II 0 s.h. Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Requirements: admission to emergency medical technician paramedic program.
EMTP:3103 Emergency Medical Technician - Paramedic III 0 s.h. Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations.
Requirements: admission to emergency medical technology paramedic program.

## Orthoptics Teaching Program Course

OTP:4902 Orthoptics Program 0 s.h.
Clinical science of binocular vision, ocular motility, and related eye disorders; practical, theoretical training in the Department of Ophthalmology and Visual Sciences two-year program; written, oral and practical national board examinations required at completion.
Requirements: bachelor's degree with specific class recommendations.

## Anatomy and Cell Biology

## Chair

- John F. Engelhardt

Professional degree: MCA
Faculty: https://medicine.uiowa.edu/acb/profile
Website: https://medicine.uiowa.edu/acb/
The Department of Anatomy and Cell Biology performs three major functions. It teaches human anatomy to students preparing for careers in the health care professions; provides advanced courses, teaching experience, and research training to graduate students preparing for careers in academic research and related scientific fields; and conducts original research on the biological basis of cellular functions and human disease processes.

## Preclinical Study

The department contributes to the preclinical education of health care professionals by providing major courses in gross anatomy, cell biology, histology, and neuroscience.

## Graduate Study

The department offers the cell and developmental biology [p. 1609] subprogram for a PhD in biomedical science in the Biomedical Science Program [p. 1603]. It also participates in the Carver College of Medicine's Medical Scientist Training Program [p. 1784] and the Graduate College's Molecular Medicine [p. 1672], Immunology [p. 1643], Genetics [p. 1634], and Neuroscience [p. 1674] Programs. On occasion, students are directly admitted to a Department of Anatomy and Cell Biology laboratory by arrangement with the laboratory director.

## Professional Study

The Department of Anatomy and Cell Biology offers a professional degree, the Master of Clinical Anatomy [p. 1742] (MCA).

## Programs

## Graduate Programs of Study

## Majors

- Master of Science in Anatomy and Cell Biology
- Doctor of Philosophy in Anatomy and Cell Biology

Students interested in doctoral studies in cell and developmental biology should apply under the umbrella program in Biomedical Science [p. 1603] (select cell and developmental biology subprogram). Direct applications to the MS and PhD in anatomy and cell biology are not currently being considered.

## Professional Program of Study

Major

- Master of Clinical Anatomy [p. 1742]

## Facilities

The department occupies more than 35,000 square feet in the Bowen Science Building on the University of Iowa health sciences campus. The building houses modern teaching facilities and well-equipped research laboratories. The most modern instrumentation is available, including facilities and equipment for digital microscopic imaging,
confocal microscopy, molecular biological techniques, tissue culture, and protein chemistry. Other specialized equipment (e.g., electron microscopes, mass spectrophotometers) is available in other facilities. Through collaborative programs with the Holden Comprehensive Cancer Center and the Abboud Cardiovascular Research Center, faculty and students also have access to outstanding research facilities throughout the university's health sciences campus.

## Courses

## Anatomy and Cell Biology Courses

ACB:3110 Principles of Human Anatomy 3 s.h.
Gross and microscopic human anatomy; systemic approach to regional anatomy with emphasis on clinical relevance; optional tutorial sessions. Offered fall semesters. Requirements: pharmacy, prenursing, or associated medical sciences major.

ACB:3122 Independent Study in Anatomy and Cell Biology arr.
Projects arranged with department faculty members.
ACB:5108 Human Anatomy 5 s.h.
Regional dissection, lectures, demonstrations; areas important to physical therapists, particularly the upper and lower extremities. Offered fall semesters. Requirements: physical therapy and rehabilitation science enrollment.

ACB:5203 Gross Human Anatomy for Graduate Students 5-6 s.h. Regional dissection, lectures, demonstrations, tutorials, discussions, seminars; clinically relevant areas of anatomical radiology, surface anatomy with clinical correlations. Requirements: enrollment in Master of Clinical Anatomy program.

## ACB:5206 Graduate Research in Cell and Developmental Biology

arr.
Individual laboratory research training in anatomical sciences.

## ACB:5210 General Histology Online

Histology of all tissues of human body starting with basic tissues and working through systems of the body; linked in sequence to ACB:5203 so that students learn about related content at the same time in anatomy and histology; recorded lectures, online modules, and extensive use of Virtual Microscope. Requirements: enrollment in Master of Clinical Anatomy program.
ACB:5218 Microscopy for Biomedical Research arr.
Basic microscopy methods for research including optics, preparation, and analysis of biomedical specimens; light, fluorescence, confocal, transmitting electron, scanning electron, atomic force microscopes, elemental analysis; immunochemistry and stereology techniques; individualized laboratory instruction. Prerequisites: BIOL:2723. Same as BIOL:5218, MICR:5218.

## ACB:5224 Graduate Seminar in Cell and Developmental

 BiologyCurrent research, literature. Requirements: cell and developmental biology graduate standing.
ACB:6000 Human Anatomy for Advanced Practice 4 s.h.
Integrated study of interrelationships between anatomic structure and physiological function in health and disease at various points in the lifespan; mechanisms governing and supporting cellular, organ, and system function; internal milieu; relationship of study to clinical assessment of functional integrity of individual organ systems utilizing pertinent objective and subjective data; implications of pathophysiology for anesthesia and implications of anesthesia for pathophysiology; foundation for clinical practicums and courses in nurse anesthesia. Requirements: completion of an undergraduate human anatomy and physiology course and admission to anesthesia nursing program. Same as NURS:6000.

## ACB:6200 Special Topics in Genetics

Focus is on a broad topic of central importance to genetics and biology as a whole; invited speakers are distinguished researchers from institutions across the country and within the University of Iowa, their work grounded in genetics, and cover diverse topics using a wide range of genetic model systems and approaches; seminar series. Same as GENE:6200.

ACB:6220 Mechanisms of Cellular Organization 3 s.h.
Current understanding of basic cell biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BMB:3130. Same as MMED:6220, MPB:6220.

ACB:6226 Cell Cycle Control 1 s.h. Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Same as MMED:6226, MPB:6226

ACB:6227 Cell Fate Decisions
1 s.h.
Cellular fate decisions including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Same as MMED:6227, MPB:6227.

## ACB:6237 Critical Thinking in Biochemistry and Molecular Biology

How nucleic acids, proteins, lipids, and carbohydrates interact to influence the function of cells and tissues; how molecules drive signaling pathways and cellular processes essential for biological functions; based on research publications.

## ACB:6238 Critical Thinking in Genetics

Current topics in molecular and classical genetics; emphasis on genetic underpinnings of disease; based on primary research publications.

ACB:6239 Critical Thinking in Cell Biology 1 s.h.
Understanding subcellular organization and intercellular
communication; emphasis on critical thinking and primary research publications.
ACB:6248 Critical Thinking in Development 1 s.h.
Current topics in molecular basis of vertebrate development; based on primary research publications.
ACB:6249 Critical Thinking in Cellular Physiology 1 s.h.
Control of physiological systems at the cellular level; emphasis on regulation by molecular signaling pathways; literature based.

## ACB:6250 Critical Thinking in Scientific Writing and

 Presentations1 s.h.
Scientific grant writing, particularly specific aims development, and oral presentations. Requirements: second-year standing in cell and developmental biology graduate program.

## ACB:6252 Functional Neuroanatomy

arr.
Basic principles of neuroanatomy and neurophysiology; emphasis on human central nervous system; laboratory emphasis on anatomical study of spinal cord and brain. Offered spring semesters. Requirements: physical therapy and rehabilitation science enrollment or graduate standing. Same as PTRS:6253.

ACB:6265 Neuroscience Seminar
0-1 s.h.
Research presentations. Same as BIOL:6265, MPB:6265, NSCI:6265, PSY:6265.

1 s.h. ACB:7001 Teaching and Learning in the Anatomical Sciences
Strategies involved in anatomical sciences education including interactive lecturing, dissection, peer teaching/learning, plastination, virtual microscopy, simulation, case presentation, and assessment techniques; recorded lectures and online modules. Requirements: enrollment in Master of Clinical Anatomy program.
3 s.h. ACB:7002 Seminar in Anatomical Sciences
1 s.h.
Opportunity to discuss peer-reviewed anatomical, clinical, and education research articles as related to issues of teaching in anatomical sciences; student- and/or faculty-led presentations prompt further discussion of various in-depth studies that focus on bringing current information into the classroom. Requirements: enrollment in Master of Clinical Anatomy program.
ACB:7010 Anatomy Through Imaging 2 s.h.
Exploration of anatomy through basic imaging techniques; online modules and in-class activities; focus on identification of normal structures through application of anatomical concepts. Requirements: enrollment in Master of Clinical Anatomy program.

ACB:7020 Human Embryology Online
Major events of embryologic development in humans; more of a morphologic focus than a molecular focus, including important molecular concepts of development; backstory of adult human anatomy and how various birth defects occur. Offered spring semesters. Prerequisites: ACB:5203 or ACB:8101 or ACB:5108. Requirements: enrollment in Master of Clinical Anatomy program.
ACB:7227 Anatomic Study for Teaching 2-3 s.h. Experience completing a detailed dissection of a region of the human body; opportunity to create models depicting anatomical concepts. Requirements: enrollment in Master of Clinical Anatomy program.

1 s.h. ACB:7400 Practicum in College Teaching for Master of Clinical Anatomy

1-4 s.h.
Supervised college teaching experience; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations. Recommendations: enrollment in Master of Clinical Anatomy program.
ACB:8101 Medical Gross Human Anatomy 5 s.h.
Complete dissection of the body with regional emphasis stressing relationships to the living system; clinically relevant areas of radiologic imaging, surface anatomy, embryology, and clinical correlations; anatomical knowledge through lectures, small group work, independent activities. Offered fall semesters. Requirements: MD or MPA enrollment.

## ACB:8120 Human Gross Anatomy for Dental Students 6 s.h.

Exploration of gross anatomy of human body including thorax, abdomen, and upper limb; extensive focus on head, neck, and neuroanatomy; regional and systemic approaches; course sequence and assessment blended with general histology for dental students; cadaveric dissections closely follow lecture sequence; emphasis on correlations to dental practice. Offered spring semesters. Requirements: DDS enrollment.

ACB:8121 General Histology for Dental Students 4 s.h.
Microscopic study of cells, fundamental tissues, and organ systems; emphasis on tooth-related structures. Offered spring semesters. Requirements: DDS enrollment or anatomy and cell biology graduate standing.

## ACB:8401 Advanced Human Anatomy

arr.
Regional dissection of the body with emphasis on systems relevant to student's specialty interests; discussion, reading, clinically relevant imaging, embryology. Offered spring semesters. Requirements: fourth-year MD enrollment or graduate standing.

ACB:8402 Teaching Elective in Regional Anatomy 2,4 s.h.
Students expand knowledge and experience in medical education; investigation of educational pedagogy in a laboratory setting coupled with self-directed learning of anatomical content relevant to professional development; preparation, design, and implementation of four teaching interactions with year one medical, dental, and physician assistant (M1/D1/PA1) students; designing a classroom exercise (e.g., interactive lecture, learning activity, computer-based study module) that helps bridge the basic science content with clinical procedure. Requirements: MD standing and enrollment in teaching distinction track.

ACB:8405 Advanced Clinical Neuroanatomy 2 s.h.
Focused training in interpretation of cross-sectional neuroanatomy at a level far exceeding what is currently taught in preclinical curriculum; builds on prior training in diagnostic neuroimaging of the human brain during first and second phases of the medical curriculum, producing postgraduate year one (PGY-1) level of readiness interpreting structural brain images; core knowledge and skills of neurological examination applied within context of clinical problems. Requirements: MD enrollment.

ACB:8498 Special Study On Campus arr.
Anatomy research on campus; individually arranged. Requirements:
MD enrollment.

# Master of Clinical Anatomy, MCA 

The mission of the professional degree program, Master of Clinical Anatomy (MCA), is to provide clinically relevant content knowledge coupled with experiential learning activities for developing skills in teaching, education research, and enhancing advancement to professional health care programs. Graduates will be able to:

- demonstrate knowledge of the anatomical sciences (neuroanatomy, gross anatomy, and histology) at a level necessary for instruction within a professional program;
- design and deliver effective instructional activities appropriate for a cadaveric dissection course;
- design and deliver effective instructional activities appropriate for individual, small group, large group, and laboratory settings;
- evaluate the effectiveness of educational instruction using both formative and summative methods; and
- practice effective methods of self-reflection on the nature, quality, and impact of instructional activities for learning.

## Requirements

The professional Master of Clinical Anatomy (MCA) program requires a minimum of 32 s.h. of work that is distributed between required ( 25 s.h.) and elective ( $7 \mathrm{~s} . \mathrm{h}$.) coursework. Students must maintain a grade-point average of at least 3.25 . The program is designed so that students can complete the requirements in a year and a half and provides clinically relevant content coupled with experiential learning activities to develop skills in teaching and educational research. A portion of the curriculum is offered online to complement classroom and laboratory learning.

Students with a degree in a specific biological science (e.g., genetics) for which no formal coursework in basic gross anatomy has been completed may be required to take a prerequisite undergraduate anatomy course.
The Master of Clinical Anatomy requires the following coursework.

## Required Courses

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ACB:5203 | Gross Human Anatomy for |  |
| Graduate Students |  |  |$\quad 5$

## Electives

Students select at least 7 s.h. in elective coursework.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ACB:5206 | Graduate Research in Cell and <br> Developmental Biology (may <br> earn 1-3 s.h. in addition to <br> required course above) | $1-3$ |
| ACB:7010 | Anatomy Through Imaging |  |
| ACB:7020 | Human Embryology Online | 2 |
| ACB:7400 | Practicum in College Teaching <br> for Master of Clinical Anatomy <br> (may earn 1-2 s.h. in addition to <br> required course above) | 2 |
|  | Advanced Human Anatomy |  |
| ACB:8401 | Teaching Elective in Regional <br> Anatomy | $1-2$ |
| GRAD:7385 | Aneaching and Learning in <br> Migher Education | 2 |
| MED:8403 | Teaching Skills for Medical <br> Students | 4 |
| PSQF:6205 | Design of Instruction |  |
| Other coursework with MCA program approval | 3 |  |

## Research/Education Project

Students successfully present their research/education project in November of their second year.

## Capstone Project

The capstone project is the final formal piece of assessment that students are required to pass in order to graduate from the MCA program. It represents the integration of the anatomical sciences in terms of both teaching and research as a culmination of studies in gross anatomy, neuroanatomy, histology, and embryology. The capstone project tells the story of each student's unique experience of learning and development in the anatomical sciences, providing evidence of a student's integrated understanding of the anatomical sciences. It allows students to demonstrate the skills that they have developed on their journey through the production and submission of an original body of work.
Once the capstone project proposal has been approved by the advisory committee in September of their second year, students must complete the project with the anticipation of providing a final oral presentation in December that addresses the following:

- question/problem identification,
- anatomical sciences integration,
- project development, and
- impact (goal) reflection.

## Admission

Applicants must:

- have a BA or BS degree with a strong science background;
- have a grade-point average of at least 3.00 ;
- have an external performance exam from the last five years, such as MCAT (minimum score of 500 or pre-2015 exam scores greater than 27) or Graduate Record Examination (GRE) General Test (score above the 50th percentile with verbal score of at least 150 and math score of at least 150);
- submit a Test of English as a Foreign Language (TOEFL) score (only the iBT-Internet-Based Test is accepted with a total score of 93 and a speaking score of 26) and the test must have been taken within the last two years, or submit a current acceptable score from the International English Language Testing System
(IELTS) if an international applicant and if English is not student's first language;
- provide three letters of reference/support;
- submit a personal statement; and
- be available for an interview with the MCA faculty.

Application deadline is May 31.
For detailed application instructions and forms, visit the Department of Anatomy and Cell Biology website.

## Career Advancement

Graduates are prepared for a variety of anatomical sciences education settings that include advanced professional study, faculty/lectureship positions in medicine, and allied health care fields at community colleges. Some will want to continue their studies within a health care profession, others may want to prepare for college-level teaching, and others may want to pursue a career in anatomical sciences.

## Anesthesia

## Chair

- Cynthia Wong

Faculty: https://medicine.uiowa.edu/anesthesia/profile
Website: https://medicine.uiowa.edu/anesthesia/
Since its inception, the Department of Anesthesia at the University of Iowa has educated more than 400 anesthesiologists, and at least 18 former residents have served as heads of departments of anesthesiology at American medical colleges.

The department has been, and continues to be, well-represented on editorial boards of major anesthesia journals. It provides refresher course lectures for the annual meeting of the American Society of Anesthesiologists, has physician-researchers who are recognized by the National Institutes of Health as independently funded principal investigators, provides many board examiners for the oral exams of the American Board of Anesthesiology, and has earned high national ranking because of these and other objective accomplishments.

The department coordinates the Anesthesia Nursing Program, a collaboration between the Carver College of Medicine and the College of Nursing. The program, which is open to nurses who hold a bachelor's degree, prepares nurse anesthetists to serve rural hospitals in Iowa and nationwide. The curriculum provides intensive training in didactic and clinical anesthesia and includes diverse clinical experience as well as classroom instruction, seminars, and clinical case conferences. For more information, see the Doctor of Nursing Practice [p. 1903] (College of Nursing) section of the catalog.

## MD Training

The Department of Anesthesia introduces second-year medical students to anesthesia as a specialty; helps third-year students develop concepts and technical skills related to resuscitation, airway management, and care of the unconscious patient; and offers fourthyear students intensive study in the specialty.
The department offers the following courses for medical students. For course descriptions and prerequisite information, see Courses [p. 1744] in this section of the catalog.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| ANES:8301 | Clinical Anesthesia | 2 |
| ANES:8401 | Clinical Anesthesia Senior | arr. |
| ANES:8402 | Surgical and Neurosciences <br> Intensive Care | arr. |
| ANES:8403 | Chronic Pain Management | 2 |
| ANES:8495 | Intensive Care Off Campus | arr. |
| ANES:8497 | Research in Anesthesia | arr. |
| ANES:8498 | Anesthesia On Campus | arr. |
| ANES:8499 | Anesthesia Off Campus | arr. |

## Residency

## Postgraduate and Residency Program

The department's postgraduate and residency program involves diverse clinical experiences, seminars and teaching conferences, and ongoing research activities that help postgraduate students and residents develop the knowledge and skills required of an anesthesia specialist.

## Courses

## Anesthesia Courses

ANES:6004 Scientific Principles for Anesthesia Practice 4 s.h. Applicable chemical and physical properties of molecules important in anesthesia; technological principles and equipment used to safely deliver those molecules to patients and monitor patients during anesthesia; topics include basic chemical and physical calculations, properties of substances in solution, measurement, behavior of gases and other fluids, effects of heat transfer, and the specific chemistry of inhaled and intravenous anesthetics and adjuvant drugs. Corequisites: NURS:6006. Same as NURS:6004.

ANES:6006 Pharmacology of Anesthesia Practice 3 s.h.
Builds on content from foundational graduate pharmacology course; focus on safe prescribing, administration, and management of medications used to provide general, regional, or local anesthesia and analgesia for all patient populations across lifespan undergoing varied surgical, obstetrical, or other procedures in any health care setting. Prerequisites: PCOL:6204 with a minimum grade of B-.
Requirements: enrollment in anesthesia nursing program. Same as NURS:6006.
ANES:6007 Basic Principles of Anesthesia Practice 5 s.h.
Overview and integration of anesthetic agents and techniques; patient assessment, preoperative airway evaluation, anesthetic planning, principles of fluid management, and arterial blood gas interpretation; principles of general and regional anesthesia and techniques as they pertain to each surgical specialty; Occupational, Safety and Health Administration (OSHA), The Joint Commission (TJC), and institutional regulations and requirements pertinent to anesthesia practice. Prerequisites: NURS:6004 with a minimum grade of B- and NURS:6006 with a minimum grade of B-. Same as NURS:6007.

ANES:6010 Advanced Principles of Anesthesia Practice I 4 s.h. Special needs and intraoperative anesthetic management of complex patient populations and those with advanced pathologic states; anesthetic techniques for specific surgical subspecialties including pediatrics, obstetrics, neurosurgery, cardiac, vascular, thoracic, transplant, trauma, EENT, dental, and aesthetic or reconstructive procedures; pertinent pathophysiology and anesthetic monitoring and management techniques; clinical case conferences provide opportunities to discuss perianesthetic complications and challenges. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as NURS:6010.
ANES:6012 Advanced Principles of Anesthesia Practice II 1 s.h. Acute and chronic pain treatment modalities for all patients presenting for a variety of medical or surgical procedures across the lifespan. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as NURS:6012.

ANES:6050 Introductory Clinical Anesthesia 2 s.h. Initial mentorship in clinical anesthesia; development of basic clinical skills needed for a career as nurse anesthetist; application and integration of theoretical knowledge in clinical setting. Prerequisites: NURS:6004 and NURS:6006. Corequisites: NURS:6007. Same as NURS:6050.

ANES:6051 Clinical Anesthesia I
Mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialities including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6050 or ANES:6050. Corequisites: NURS:6010. Same as NURS:6051.

| ANES:6052 Clinical Anesthesia II 2 s.h. | ANES:8498 Anesthesia On Campus |
| :---: | :---: |
| Additional mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialities including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6051 or ANES:6051. Same as NURS:6052. | Well defined research project relating to anesthesia; arranged by student with departmental approval. <br> ANES:8499 Anesthesia Off Campus <br> Knowledge development in anesthesia work and monitor use; ability to identify respiratory, cardiovascular, and neurologic effects of anesthetic agents; skill in airway management; basic skills in general, |
| ANES:6053 Advanced Clinical Anesthesia 2 s.h. | spinal, epidural, and peripheral nerve block anesthesia. |
| Mentored clinical anesthesia at selected sites; development of advanced clinical skills and critical thinking by providing anesthesia for all surgical specialties and invasive diagnostic procedures in all anesthetizing locations; providing anesthesia for all patients in all settings, including on call emergency surgeries. Prerequisites: NURS:6052. Same as NURS:6053. |  |
| ANES:6054 Obstetrical Anesthesia 2 s.h. Experience delivering analgesia and anesthesia for parturients during labor and delivery process. Prerequisites: NURS:6052. Same as NURS:6054. |  |
| ANES:6055 Rural Anesthesia <br> Opportunity to develop experience providing anesthesia and associated health care services at UI-affiliated clinical sites in rural settings. Prerequisites: NURS:6052. Same as NURS:6055. |  |

## ANES:8007 Medical Student Fellowships in Anesthesia (Externships) <br> Anesthesia call team clinical experience. Requirements: MD standing

 in anesthesia externship.ANES:8301 Clinical Anesthesia 2 s.h.
Clinical instruction in perioperative care of the surgical patient; preoperative evaluation, consideration of coexisting medical problems, intraoperative care, postoperative management; basic airway management; introduction to clinical management of acute and chronic pain; case conferences, simulator training.
ANES:8401 Clinical Anesthesia Senior arr.
Advanced clinical experience in anesthesia management of surgical patients with coexisting medical problems; clinical experience in various forms of anesthesia; general, regional (spinal, epidural, peripheral nerve block) anesthesia; practical experience in airway management; mask ventilation, endotracheal intubation, LMA placement, other alternative airway techniques; medical management of surgical patient under anesthesia; pharmacology, cardiovascular and pulmonary physiology; case conferences.
ANES:8402 Surgical and Neurosciences Intensive Care arr. Evaluation and treatment of critically ill neurological and postsurgical patients; evaluation of pulmonary function, ventilator management, monitoring and management of hemodynamics, fluid balance, acid-based problems, acute kidney injury, acute neurological events, and advanced monitoring techniques.
ANES:8403 Chronic Pain Management 2 s.h.
How to interview and assess patients with pain, work with a multidisciplinary team to determine the type of pain and/or diagnosis, and develop a multimodal treatment plan; readings, classroom discussions, and experiential activities.

## ANES:8495 Intensive Care Off Campus

arr.
Evaluation and treatment of seriously ill patients in an intensive care unit (other than University of Iowa Hospitals and Clinics); artificial ventilation, evaluation of pulmonary function, monitoring of cardiovascular status, fluid balance and acid base problems, advance monitoring techniques. Prerequisites: ANES:8401. Requirements: 4 s.h. of ANES:8401.

ANES:8497 Research in Anesthesia
arr.
Medical research, clinical or laboratory projects; individual study.

# Biochemistry and Molecular Biology 

## Interim Chair

- Kris A. DeMali

Undergraduate major: biochemistry and molecular biology (BA, BS)

Graduate degrees: MS in biochemistry and molecular biology; PhD in biochemistry and molecular biology

Website: https://medicine.uiowa.edu/biochemistry-molecular-biology/
Biochemistry is the study of basic chemical processes that occur in and govern all living systems. Nearly all areas of the life sciences engage in biochemical research.

The Department of Biochemistry and Molecular Biology offers undergraduate and graduate degrees, and determines the curricula for those programs. Undergraduate students majoring in biochemistry and molecular biology receive their degrees (Bachelor of Arts or Bachelor of Science) from the College of Liberal Arts and Sciences. The Master of Science and the Doctor of Philosophy degrees are awarded by the Graduate College.

## Faculty and Research

The department's faculty members supervise research in biochemistry; molecular, cellular, developmental, computational, and structural biology. Their work is supported by grants from the National Institutes of Health (NIH), the National Science Foundation (NSF), the American Heart Association, the American Cancer Society, the Muscular Dystrophy Association (MDA), and other sources. To learn more about the department's faculty members and areas of research, visit the Department of Biochemistry and Molecular Biology website.

## Programs

## Undergraduate Programs of Study

## Majors

- Major in Biochemistry and Molecular Biology (Bachelor of Arts) [p. 1749]
- Major in Biochemistry and Molecular Biology (Bachelor of Science) [p. 1752]

## Graduate Programs of Study

## Majors

- Master of Science in Biochemistry and Molecular Biology [p. 1755]
- Doctor of Philosophy in Biochemistry and Molecular Biology [p. 1756]

## Facilities

The Department of Biochemistry and Molecular Biology occupies 36,700 square feet on the fourth floor of the Bowen Science Building, 3,500 square feet on the third floor of the Medical Education Research Facility, 2,000 square feet in the Eckstein Medical Research Building, and 1,450 square feet on the fourth floor of the Pappajohn Biomedical Discovery Building in the Fraternal Order of Eagles Diabetes Research Center on the university's health sciences campus. It has a number of well-equipped research laboratories and other departmental
facilities, including the Biochemistry Stores, the Mattill Biochemistry Reading Room, and the Heath Conference Room.
The department makes available a number of shared instruments, including an Applied PhotoPhysics stopped flow spectrometer SX20; a Jasco spectropolarimeter, model J815; a Horiba fluorlog-3 spectrofluorometer; and a Beckman Coulter ultra XLI analytical centrifuge.
Faculty, staff, and students in the department have access to a variety of shared Carver College of Medicine resources, including the Protein Crystallography Facility, the Iowa Institute of Human Genetics Genomics Division (DNA Facility), the Nuclear Magnetic Resonance Facility, the Proteomics Facility, the Flow Cytometry Facility, the Viral Vector Core Facility, the Small Animal Imaging Core Facility, and the Genome Editing Facility. The university also supports resources such as the Central Microscopy Research Facilities and the High Throughput Screening Facility.

## Courses

## Biochemistry and Molecular Biology Courses

BMB:3110 Biochemistry
3 s.h.
One-semester survey of basic concepts in modern biochemistry and molecular biology; emphasis on application of biochemical concepts to human metabolism; appropriate for students who plan to pursue a career in health care or want an overview of biochemistry as a discipline. Requirements: one year each of college-level biology and chemistry. Recommendations: one semester of organic chemistry.
BMB:3120 Biochemistry and Molecular Biology I
3 s.h.
Physical and chemical foundations of biochemistry, structure of biological molecules, catalysis, transport, and oxidative reactions in biology; first of two-semester sequence that concludes with $\mathrm{BMB}: 3130$. Requirements: two semesters of general chemistry and one of organic chemistry. Recommendations: BIOL:1411, BIOL:1412, and an additional organic chemistry course.
BMB:3130 Biochemistry and Molecular Biology II 3 s.h. Molecular principles of photosynthesis and biosignaling; metabolism of lipids, amino acids, and nucleic acids; DNA replication, transcription, and protein translation; team-taught, didactic lecture style; second of a two-semester comprehensive biochemistry sequence. Prerequisites: $\mathrm{BMB}: 3120$ with a minimum grade of C-.

## BMB:3140 Experimental Biochemistry

2 s.h.
Use of modern instruments and techniques to fractionate, identify, and characterize constituents of biochemical systems. Prerequisites: BMB:3120 with a minimum grade of C-. Requirements: two semesters of general chemistry and one semester of organic chemistry.
BMB:3150 Development of Senior Research Project 2 s.h. Preparation for biochemistry majors pursuing a senior research project in BMB:4999; communicating technical information through writing and speaking; presenting scientific journal articles and writing experimental protocols; developing detailed proposal for one-year senior research project. Prerequisites: BMB:3120 or BMB:3140 or $\mathrm{BMB}: 3130$. Requirements: biochemistry major, and junior or senior standing.

BMB:3310 Practical Data Science and Bioinformatics
Understanding how to access large biological data sets and use them to answer biological questions is an important skill for researchers; immersive introduction to computational handling of data; how to access and analyze publicly available data; critically evaluate data quality and analysis in context of measuring gene expression; basic coding in R/RStudio, plotting and data display, fitting and regression, statistical inference, statistical models, downloading and data wrangling; basic introduction to machine learning (clustering); for students with no computational background. Prerequisites: BIOL:1411 with a minimum grade of C - and BIOL:1412 with a minimum grade of C-. Requirements: college algebra. Recommendations: BMB:3110, or BMB:3120 and BMB:3130, or other upper-level life sciences courses. Same as CBIO:3310, MMED:3310.

## BMB:3800 Biochemistry Teaching Practicum

 arr.Training for qualified junior or senior undergraduates majoring in biochemistry or a related field to contribute to undergraduate courses; interns may hold review sessions, offer regular office hours, draft questions for homework or exams, assist in proctoring exams, assist students in a laboratory setting, and help with course implementation; guidance from the faculty director and instructors in each course; interns are expected to work approximately three hours per week for each semester hour of credit earned. Requirements: completion of a course covering the same or equivalent material with a grade of B or higher, and must arrange for a short interview with the appropriate course director prior to registration.

## BMB:3993 Undergraduate Biochemistry Research

Preparation for BMB:4999; directed research with a biochemistry faculty member; experience in an active biochemistry research lab, learning and performing experiments relevant to current projects in that lab, including exposure to scientific literature; arranged in advance by student and biochemistry faculty member.

BMB:4240 Biophysics and Advanced Biochemistry
3 s.h.
Principles and experimental approaches used to study macromolecular structure, stability, and function; ligand binding and macromolecular interactions; enzyme kinetics and mechanisms; X-ray crystallography and NMR spectroscopy; single molecule and other biophysical approaches. Prerequisites: BMB:3120 and BMB:3130 with a minimum grade of C -. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.

## BMB:4310 Computational Biochemistry

3 s.h.
Introduction to biomolecular modeling and computer simulation techniques; biomolecular structure and molecular driving forces; principles of structural optimization and conformational sampling; applications to biomolecular phenotypes; scripting and molecular visualization in PyMol, setting up and running molecular dynamics simulations using VMD and NAMD, performing refinement of X-ray diffraction data sets using Phenix, and executing Poisson-Boltzmann electrostatic calculations using APBS. Prerequisites: (MATH:1560 or MATH:1860) and CHEM:1120. Recommendations: BMB:3110 or BMB:3120. Same as BME:4310.

BMB:4999 Advanced Undergraduate Biochemistry Research arr. Advanced directed research with a biochemistry faculty member; work on an individualized research project relevant to research goals of that lab; learning related scientific literature and presentation of research results; arranged in advance by student and biochemistry faculty member and taken after completion of core biochemistry curriculum. Prerequisites: BMB:3120 with a minimum grade of Band BMB:3130 with a minimum grade of B - and BMB:3140 with a minimum grade of $\mathrm{B}-$ and $\mathrm{BMB}: 3150$ with a minimum grade of B -. Requirements: BMB:3993 or URES:3994 or HONR:3994 or prior research experience or lab practicum.
BMB:5215 Directed Readings for Graduate Students

BMB:5240 Biophysics and Advanced Biochemistry
3 s.h.
Principles and experimental approaches used to study macromolecular structure, stability, and function; ligand binding and macromolecular interactions; enzyme kinetics and mechanisms; Xray crystallography and NMR spectroscopy; single molecule and other biophysical approaches. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.

## BMB:5244 Molecular Recognition

1 s.h.
Focus on determinants in protein small molecule binding, particularly involving pharmaceutically relevant enzymes and receptors; how modern structure-based drug discovery is greatly aided by ability to employ protein structures in discovery and design of certain classes of drugs; structural approaches for predicting and improving drug affinity and selectivity, which have made a lasting impact across a number of diseases; important contemporary topics include in-depth lectures on fragment based drug discovery (FBDD), use and pitfalls of in silico docking and other screening methods, and emergence of covalent drugs. Requirements: introductory course in biochemistry. Same as PHAR:5542.

## BMB:5261 Research Techniques

1-6 s.h.
Laboratory rotation for first-year graduate students in biochemistry.

## BMB:5282 Seminar

0-2 s.h.
How to evaluate reports of scientific investigations critically; techniques for presenting scientific information.
BMB:5875 Perspectives in Biotechnology
1 s.h.
Topics related to careers in biotechnology with an emphasis on preparing graduate students for careers outside of academia; discussions led by a series of guest speakers from leading biotech industries; understanding the societal impact of basic research; participation in round-table discussions; and presentation of student research findings. Requirements: graduate standing and good academic standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as CBE:5875, CEE:5875, CHEM:5875, MICR:5875, PHAR:5875.

BMB:7251 Introduction to Protein Structures 1 s.h.
Basics of protein structures and amino acids; module covers chapters 1-5 of Lehninger's Principles of Biochemistry. Recommendations: first-year graduate standing in biosciences or physical sciences.

## BMB:7252 Enzymes, Carbohydrates, Nucleic Acids, Lipids, and

 Membranes1 s.h.
Basics of enzyme kinetics and enzyme mechanisms, carbohydrates, nucleic acids, and lipids; module covers chapters $6,7,8$, and 10 of Lehninger's Principles of Biochemistry. Recommendations: first-year graduate standing in biosciences or physical sciences.
BMB:7253 Introduction to Metabolism 1 s.h.
Introduction to metabolism including bioenergetics of metabolic reactions, biochemical signaling, and the basics of carbohydrate metabolism (glycolysis, gluconeogenesis, the pentose phosphate pathway). Module covers chapters $11,12,13$, and 14 of Lehninger's Principles of Biochemistry. Recommendations: first-year graduate standing in biosciences or physical sciences.

BMB:7254 Metabolism I
1 s.h.
Glycogen metabolism, the citric acid cycle, and amino acid and fatty acid catabolism. Module covers chapters $15,16,17$, and 18 of Lehninger's Principles of Biochemistry. Recommendations: first-year graduate standing in biosciences or physical sciences.
BMB:7255 Metabolism II
1 s.h.
Oxidative phosphorylation, photosynthesis, the synthesis of nitrogencontaining compounds (amino acids, nucleotides), and principles of hormonal regulation of metabolic pathways. Recommendations: firstyear graduate standing in biosciences or physical sciences.

## BMB:7256 Molecular Biology

1 s.h.
Chromosomal organization, DNA replication, gene expression, RNA processing, and translation; can be taken alone or as part of BMB:3130; for graduate students who wish to refresh or advance their knowledge of the central dogma of molecular biology
Recommendations: first-year graduate standing in biosciences or physical sciences.
BMB:7292 Research Biochemistry
arr.
Thesis research.
BMB:8101 Biochemistry for Dental Students 3 s.h.
Biochemical concepts and application to clinical problems.
Requirements: CHEM:2210 and DDS enrollment. Recommendations:
CHEM:2220.

## Biochemistry and Molecular Biology, BA

To maximize student flexibility, the curriculum for the BA with a major in biochemistry and molecular biology is identical to the BS degree in the first two years of study.

## Requirements

The Bachelor of Arts with a major in biochemistry and molecular biology requires a minimum of 120 s.h., including 58 s.h. of work for the major. Students must maintain a grade-point average (GPA) of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].
The biochemistry and molecular biology major for the Bachelor of Arts degree provides a rigorous education in biochemical concepts and practice in the laboratory while giving students flexibility to specialize in additional disciplines or to obtain clinical volunteer experience. The BA program is intended for most students majoring in biochemistry and molecular biology, including those with pre-medicine, prepharmacy, pre-dental, and other pre-health professions interests. It also is appropriate for students earning more than one major.

Qualified students may graduate with honors in the biochemistry and molecular biology major; see "Honors in the Major" under Honors [p. 1749] in this section of the catalog.
The BA with a major in biochemistry and molecular biology requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Common Requirements | 49 |
| Additional Requirements | 9 |

## Common Requirements

Students complete the following during their first three years.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMB:3120 \& | Biochemistry and Molecular | 6 |
| BMB:3130 | Biology I-II |  |
| BMB:3140 | Experimental Biochemistry | 8 |
| BIOL:1411- <br> BIOL:1412 | Foundations of Biology - | Diversity of Form and Function |$\quad 8$

$\begin{array}{cll}\text { or PHYS:1611 } & \text { Introductory Physics I } & \\ \text { PHYS:1512 } & \text { College Physics II } & 4 \\ \text { or PHYS:1612 } & \text { Introductory Physics II } & \end{array}$
If students take PHYS:1612 Introductory Physics II, they must take the course with the lab component.

## Additional Requirements

In addition to the common requirements listed above, students must complete the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Biophysics and Advanced <br> Biochemistry | 3 |
| And these: | B240 | 6 | and molecular biology advisor

Students intending to earn advanced degrees in the biological or health sciences are advised to earn at least 4 s.h. in BMB:3993 Undergraduate Biochemistry Research or BMB:4999 Advanced Undergraduate Biochemistry Research. There are no prerequisites for BMB:3993. The course involves experience in an active biochemistry and molecular biology research lab, which must be arranged ahead of time with a supervising faculty member. Students may make arrangements directly with the faculty member, or they may request assistance from an undergraduate advisor. Credit earned in BMB:3993 does not count toward the major, but it does count toward the minimum of 120 s.h. required to graduate.
Before students register for BMB:4999 Advanced Undergraduate Biochemistry Research, they must have completed BMB:3120 Biochemistry and Molecular Biology I, BMB:3130 Biochemistry and Molecular Biology II, BMB:3140 Experimental Biochemistry, and BMB:3150 Development of Senior Research Project, with a grade of B-minus or higher in each course. Students also are required to have prior research experience, such as in BMB:3993 Undergraduate Biochemistry Research, URES:3994 Undergraduate Research and Creative Projects, or HONR:3994 Honors Research Practicum, and permission of the instructor.

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in the major. They must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33 and a GPA of at least 3.33 in work for the major. They must earn 6 s.h. in BMB:4999 Advanced Undergraduate Biochemistry Research and present their research results in a honors thesis written in the form of a journal article and in an oral report given at a special open departmental seminar.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the biochemistry and molecular biology major.

## Career Advancement

Biochemistry and molecular biology graduates with bachelor's degrees often work as research assistants in industry, government, education, or health services; teach in secondary schools; or go on to advanced study in medicine, dentistry, or other areas. The program offers solid preparation for careers in biochemistry, medicine, biology, chemistry, dentistry, research, or related sciences. About one-third of biochemistry and molecular biology majors go on to study medicine; others enter graduate programs or professional degree programs.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.
Before the third semester begins: CHEM:1110 Principles of Chemistry I, CHEM:1120 Principles of Chemistry II, and two semesters of advanced math (e.g., Calculus I, Calculus II, or Biostatistics).
Before the fifth semester begins: BIOL:1411 Foundations of Biology, BIOL:1412 Diversity of Form and Function, CHEM:2210 Organic Chemistry I or CHEM:2230 Organic Chemistry I for Majors, CHEM:2220 Organic Chemistry II or CHEM:2240 Organic Chemistry II for Majors, and CHEM:2410 Organic Chemistry Laboratory or CHEM:2420 Organic Chemistry Laboratory for Majors.

Before the seventh semester begins: PHYS:1611 Introductory Physics I or PHYS: 1511 College Physics I, PHYS: 1612 Introductory Physics II or PHYS:1512 College Physics II, BMB:3120 Biochemistry and Molecular Biology I, BMB:3130 Biochemistry and Molecular Biology II, BMB:3140 Experimental Biochemistry, a science elective, and at least 90 s.h. earned toward the degree.
Before the eighth semester begins: BMB:4240 Biophysics and Advanced Biochemistry and a science elective.
During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

## Biochemistry and Molecular Biology, BA

## Biochemistry and Molecular Biology, BS

To maximize student flexibility, the curriculum for the BS with a major in biochemistry and molecular biology is identical to the BA degree in the first two years of study.

## Requirements

The Bachelor of Science with a major in biochemistry and molecular biology requires a minimum of 120 s.h., including 70 s.h. of work for the major. Students must maintain a grade-point average (GPA) of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 19].
All students majoring in biochemistry and molecular biology are initially placed in the Bachelor of Arts degree program. Students in good academic standing can switch to the Bachelor of Science degree program after completing one semester of organic chemistry (CHEM:2230 Organic Chemistry I for Majors or CHEM:2210 Organic Chemistry I). Students who wish to change their degree program to the Bachelor of Science should do so by sending an email from their UI email account to clas-undergrad@uiowa.edu.

The biochemistry and molecular biology major for the Bachelor of Science degree is intended primarily for students planning careers in research. The BS program prepares students to pursue graduate degrees, such as an MS, PhD , or a combined MD/PhD program, or to work as research technicians. The BS program requires 12-14 s.h. more credit in science and laboratory electives than the BA program does.

Qualified students may graduate with honors in the biochemistry and molecular biology major; see "Honors in the Major" under Honors [p. 1753] in this section of the catalog.
The BS with a major in biochemistry and molecular biology requires the following coursework.

| Requirements | Hours |
| :--- | :--- |
| Common Requirements | 49 |
| Additional Requirements | 21 |

## Common Requirements

Students complete the following during their first three years.

| Course | Title |  |
| :---: | :---: | :---: |
|  <br> BMB:3130 | Biochemistry and Molecular Biology I-II | 6 |
| BMB:3140 | Experimental Biochemistry | 2 |
| BIOL:1411- <br> BIOL:1412 | Foundations of Biology - <br> Diversity of Form and Function | 8 |
|  <br> CHEM:1120 | Principles of Chemistry I-II | 8 |
| $\begin{aligned} & \text { CHEM:2210 } \\ & \text { or CHEM:2230 } \end{aligned}$ | Organic Chemistry I <br> Organic Chemistry I for Majors | 3 |
| $\begin{aligned} & \text { CHEM:2220 } \\ & \text { or CHEM:2240 } \end{aligned}$ | Organic Chemistry II <br> Organic Chemistry II for Majors | 3 |
| $\begin{aligned} & \text { CHEM:2410 } \\ & \text { or CHEM:2420 } \end{aligned}$ | Organic Chemistry Laboratory Organic Chemistry Laboratory for Majors | 3 |
| MATH:1850 | Calculus I | 4 |
| or MATH:1550 | Engineering Mathematics I: Single Variable Calculus |  |
| or MATH:1460 | Calculus for the Biological Sciences |  |

| MATH:1860 | Calculus II | 4 |
| :---: | :--- | :---: |
| or MATH:1560 | Engineering Mathematics II: Multivariable |  |
|  | Calculus |  |
| or STAT:3510 | Biostatistics |  |
| or BIOS:4120 | Introduction to Biostatistics | 4 |
| PHYS:1511 | College Physics I |  |
| or PHYS:1611 | Introductory Physics I | 4 |
| PHYS:1512 <br> or PHYS:1612 | College Physics II |  |
|  | Introductory Physics II |  |

If students take PHYS:1612 Introductory Physics II, they must take the course with the lab component.

## Additional Requirements

In addition to the common requirements listed above, students must complete the following.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| This course: | Biophysics and Advanced <br> Biochemistry | 3 |
| And one of these: | Principles of Physical |  |
| CHEM:4430 | Chemistry | 3 |
| CHEM:4431 | Chemical Thermodynamics |  |
| CHEM:4432 | Quantum Mechanics and <br> Chemical Kinetics | 3 |
| One of these options: | Advanced Undergraduate | 3 |
| BMB:4999 | Biochemistry Research | 6 |
|  |  | 6 |

Advanced laboratory courses 6
And:
Advanced science electives, approved by biochemistry 9 and molecular biology advisor

Students are encouraged to begin research by taking BMB:3993 Undergraduate Biochemistry Research, which has no prerequisites. The course involves experience in an active biochemistry and molecular biology research lab, which must be arranged ahead of time with a supervising faculty member. Students may make arrangements directly with the faculty member, or they may request assistance from an undergraduate advisor. Credit earned in BMB:3993 does not count toward the major, but it does count toward the minimum of 120 s.h. required to graduate.
Before students register for BMB:4999 Advanced Undergraduate Biochemistry Research, they must have completed BMB:3120 Biochemistry and Molecular Biology I, BMB:3130 Biochemistry and Molecular Biology II, BMB:3140 Experimental Biochemistry, and BMB:3150 Development of Senior Research Project, with a grade of B-minus or higher in each course. Students also are required to have prior research experience, such as in BMB:3993 Undergraduate Biochemistry Research, URES:3994 Undergraduate Research and Creative Projects, or HONR:3994 Honors Research Practicum, and permission of the instructor. Students can only count 6 s.h. in BMB:4999 toward their requirements for the degree.

## Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.
To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Apply on the College of Education
website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

## Combined Programs

## BS/PhD in Biochemistry and Molecular Biology

The combined Bachelor of Science/Doctor of Philosophy in the biochemistry and molecular biology program permits students to transition into the PhD program during their senior year and to count 12 s.h. of credit toward both the BS and PhD requirements. The combined program provides a research-intensive experience and shortens the training time for students interested in pursuing independent biochemistry research careers. Students in the program receive financial support during the second half of their senior year and throughout their PhD study.

Students must be pursuing a Bachelor of Science with a major in biochemistry and molecular biology, and by the beginning of their senior year they must:

- have 108 s.h. of undergraduate credit;
- have a minimum grade-point average of 3.50 ;
- have completed four semesters of research experience (summer research counts as one semester); and
- have completed BMB:3120 Biochemistry and Molecular Biology I, BMB:3130 Biochemistry and Molecular Biology II, and BMB:3140 Experimental Biochemistry.

Students interested in the combined program should speak with their academic advisor and the biochemistry and molecular biology honors advisor during their first year or at the beginning of their sophomore year. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, contact the Department of Biochemistry and Molecular Biology.

## Honors

## Honors in the Major

Students have the opportunity to graduate with honors in the major. They must maintain a cumulative University of Iowa grade-point average (GPA) of at least 3.33 and a GPA of at least 3.33 in work for the major. They must earn 6 s.h. in BMB:4999 Advanced Undergraduate Biochemistry Research and present their research results in a honors thesis written in the form of a journal article and in an oral report given at a special open departmental seminar.

## University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the university's honors program.

Membership in the UI Honors Program is not required to earn honors in the biochemistry and molecular biology major.

## Career Advancement

Biochemistry and molecular biology graduates with bachelor's degrees often work as research assistants in industry, government, education, or health services; teach in secondary schools; or go on to advanced study in medicine, dentistry, or other areas. The program offers solid preparation for careers in biochemistry, medicine, biology, chemistry, dentistry, research, or related sciences. About one-third of
biochemistry and molecular biology majors go on to study medicine; others enter graduate programs or professional degree programs.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Academic Plans

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the third semester begins: CHEM:1110 Principles of Chemistry I, CHEM: 1120 Principles of Chemistry II, and two semesters of advanced math (e.g., Calculus I, Calculus II, or Biostatistics).

Before the fifth semester begins: BIOL:1411 Foundations of Biology, BIOL:1412 Diversity of Form and Function, CHEM:2210 Organic Chemistry I or CHEM:2230 Organic Chemistry I for Majors, CHEM:2220 Organic Chemistry II or CHEM:2240 Organic Chemistry II for Majors, and CHEM:2410 Organic Chemistry Laboratory or CHEM: 2420 Organic Chemistry Laboratory for Majors.

Before the seventh semester begins: PHYS:1611 Introductory Physics I or PHYS: 1511 College Physics I, PHYS: 1612 Introductory Physics II or PHYS:1512 College Physics II, BMB:3150 Development of Senior Research Project, one semester of BMB:3993 Undergraduate Biochemistry Research for students planning to take BMB:4999 Advanced Undergraduate Biochemistry Research, BMB:3120 Biochemistry and Molecular Biology I, BMB:3130 Biochemistry and Molecular Biology II, BMB:3140
Experimental Biochemistry, two science electives, and at least 90 s.h. earned toward the degree.
Before the eighth semester begins: BMB:4240 Biophysics and Advanced Biochemistry or CHEM:4430 Principles of Physical Chemistry or CHEM:4431 Chemical Thermodynamics or CHEM:4432 Quantum Mechanics and Chemical Kinetics, a science elective, and at least 3 s.h. of BMB:4999 Advanced Undergraduate Biochemistry Research.

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

CLAS Core: World Languages Fourth Level

a Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
b Fulfills a major requirement and may fulfill a GE requirement.
c Enrollment in chemistry courses requires completion of a placement exam.
d Enrollment in math courses requires completion of a placement exam.
e Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
f GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
g Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
$h$ Students are required to complete 9 s.h. in advanced science electives approved by biochemistry advisor.
i Students must complete BMB:4240 and one course from CHEM:4430, CHEM:4431, CHEM:4432.
j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Graduation Services.

## Biochemistry and Molecular Biology, MS

Students admitted to graduate study in biochemistry and molecular biology usually pursue the Doctor of Philosophy.

## Requirements

The Master of Science program in biochemistry and molecular biology requires a minimum of 30 s.h. of graduate credit, thesis research, and a thesis. See the PhD in biochemistry and molecular biology [p. 1756] in this section of the catalog for information about the graduate curriculum.

## Admission

Most graduate students in biochemistry and molecular biology work toward a Doctor of Philosophy. Applicants who wish to earn a master's degree must contact the Department of Biochemistry and Molecular Biology before they apply.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

# Biochemistry and Molecular Biology, PhD 

## Requirements

The Doctor of Philosophy in biochemistry and molecular biology requires a minimum of $72 \mathrm{~s} . \mathrm{h}$. of graduate credit ( $34 \mathrm{~s} . \mathrm{h}$. of coursework and 38 s.h. of research). Students must maintain a cumulative grade-point average of at least 3.00 to earn the degree. Qualified students interested in earning the Doctor of Medicine along with the PhD may apply to the Medical Scientist Training Program [p. 1784], which offers a combined MD/PhD program.

Students have the opportunity to tailor their curriculum with courses that enhance their educational goals. They take a combination of graduate-level courses that include a first-year laboratory research rotation course, and seminar courses.

The PhD with a major in biochemistry and molecular biology requires the following coursework.

## Core Curriculum

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMB:5261 | Research Techniques | $1-6$ |
| BMB:5282 | Seminar | $0-2$ |
| BMED:7270 | Scholarly Integrity/Responsible <br> Conduct of Research I | 0 |
| BMED:7271 | Scholarly Integrity/Responsible <br> Conduct of Research II | 0 |
| Biophysical chemistry coursework (typically students <br> take 6 s.h.) | $3-6$ |  |
| Four molecular medicine courses | $6-8$ |  |

Additional courses offered by the Department of
Biochemistry and Molecular Biology and other departments, as appropriate for each student

## Typical Curriculum

## First Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMB:5240 | Biophysics and Advanced <br> Biochemistry | 3 |
| BMB:5261 | Research Techniques | 4 |
| BMB:5282 | Seminar | 2 |
| BMED:5207 | Principles of Molecular and <br>  Cellular Biology | 3 |

## First Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMB:5261 | Research Techniques | 4 |
| BMB:5282 | Seminar | 2 |
| MMED:6226/ | Cell Cycle Control | 1 |
| ACB:6226/MPB:6226 | Cell Fate Decisions | 1 |
| MMED:6227/ |  |  |
| ACB:6227/MPB:6227 |  |  |
| Electives |  |  |

## Second Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMB:5282 | Seminar | 1 |
| BMB:7292 | Research Biochemistry | arr. |
| BMED:7270 | Scholarly Integrity/Responsible <br> Conduct of Research I | 0 |
| Electives |  |  |

## Second Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMB:7292 | Research Biochemistry | arr. |
| BMED:7271 | Scholarly Integrity/Responsible <br> Conduct of Research II | 0 |
| BMB:5282 | Seminar | $0-2$ |
| Electives |  |  |

## Examples of Elective Coursework

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| BMB:3110 | Biochemistry | 3 |
| BME:2210 | Bioimaging and Bioinformatics | 4 |
| BME:4310/ | Computational Biochemistry | 3 |
| BMB:4310 | Principles of Molecular and | 3 |
| BMED:5207 | Cellular Biology |  |
| MMED:6220/ | Mechanisms of Cellular |  |
| ACB:6220/MPB:6220 | Organization |  |
| PCOL:5204 | Basic Biostatistics and <br> Experimental Design | 3 |
| PCOL:6225 | Growth Factor Receptor <br> Signaling | 1 |
| PCOL:6210 | Receptors and Cell Signaling | 1 |

## Additional Requirements

## Laboratory Rotations

Students rotate through at least three different laboratories during their first academic year; they enroll in BMB:5261 Research Techniques. The laboratory rotations are approximately ten weeks each. At the conclusion of each rotation, a student meets with an advisory committee of three faculty members. A student is required to present the research and training completed during that rotation. The advisory committee writes a short evaluation of the student's performance and assigns a grade for the laboratory work. The evaluation and grade becomes part of the student's departmental record.

## Teaching

Students participate in the formal teaching programs of the department for at least one semester. First-year students as well as students who are within a year of receiving their PhD degree are usually not asked to teach. Teaching may take a variety of forms, including tutoring, leading discussions and laboratory groups, correcting examinations, preparing teaching materials, and lecturing.

## Thesis Research Proposal

During the fall semester of the second year, students in collaboration with their thesis advisor prepare a detailed thesis proposal that describes the proposed research to be conducted for the dissertation as part of BMB:5282 Seminar.

## Comprehensive Examination

The comprehensive examination has two parts: a written proposal and an oral defense of the proposal. The examination must be taken before June 30 of the second year.

## Written Report of Comprehensive Examination

Students receive their topic by March 1 and their written examination is submitted to their committee by April 22. The written proposal should have a cover page followed by no more than 20 pages. For more information, a detailed guide is located in the Department of Biochemistry and Molecular Biology Graduate Student Manual.
Oral Presentation of Comprehensive Examination
Questions during the oral examination may come from the examination proposal, the PhD thesis proposal, or other general areas of biochemistry and molecular biology. To pass the oral comprehensive examination, students must perform satisfactorily both in defense of the examination proposal and in answering general biochemistry and molecular biology questions that are germane to the proposal or that are important for a full understanding of the proposed experiments and their interpretation.

## The Fifth-Semester Seminar

After successful completion of the comprehensive examination, usually the fall semester of the third year (the fifth semester), students update and revise the written PhD thesis proposal prepared during the fall semester of the second year (prior to the comprehensive examination), and present a seminar on the thesis research to the department at one of the weekly biochemistry and molecular biology workshops.

## The Fourth-Year Workshop

In the fourth year, during fall or spring, students are asked to present at one of the Department of Biochemistry and Molecular Biology's weekly workshops. The presentation is based on their research.

## The Fifth-Year Retreat

The Department of Biochemistry and Molecular Biology holds a yearly retreat where students and faculty present their current research. Students in their fifth year may be asked to give an oral presentation at the retreat.

## Final Examination

The five member PhD thesis committee serves as an advisory body for preparation of the thesis. This committee meets with students to review the material that is expected to be incorporated in the thesis. Although meetings of the candidates with the committee should be yearly, the candidates, thesis advisor, or the committee can request a meeting at any time. A final draft of the thesis must be given to all members of the committee two weeks before the final examination. The final examination takes the form of a seminar presented to the department. This presentation is announced according to Graduate College policy. Questions, comments, and discussion then follow. After the seminar, candidates meet with their committee for the final thesis defense. The PhD is not awarded until the thesis is signed. In some cases, revisions may be required.

## Combined Programs

## PhD/MD

Students may work toward the Doctor of Medicine degree and a PhD in biochemistry and molecular biology in a combined degree program offered by the Department Biochemistry and Molecular Biology and the Carver College of Medicine. Applicants must
be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1784] (Carver College of Medicine) in the catalog.

## Admission

Applicants must have a baccalaureate degree from a regionally accredited U.S. college or university, or an equivalent degree from another country as determined by the Office of Admissions. Those who apply must have an undergraduate grade-point average of at least 3.00. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.
Appropriate preparation includes one-year, college-level courses in organic and physical chemistry, biology, physics, and mathematics through calculus. Students are expected to have had one or more introductory courses in biochemistry.

## Financial Support

Students admitted to the PhD program in biochemistry and molecular biology routinely receive a stipend and tuition support.

## Career Advancement

Graduates have secured a variety of career positions, including in academic institutions and the government, and as scientists, physicians, lecturers, and science educators. Some go on to pursue postdoctoral or additional training, and others land jobs in business and industry.

## Academic Plans

## Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students are also required to complete at least one semester of formal teaching experience as a TA.
b Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
c Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
d During the first academic year, students register for BMB:5261 and rotate through three different laboratories (approximately ten weeks each) unless they have satisfied this requirement in part by previous equivalent research experience. At the end of each laboratory rotation, the student will prepare a written report and present an oral summary of the research project to the Rotation Advisory Committee.
e Work with faculty advisor to determine appropriate graduate elective coursework and sequence.
f The comprehensive examination has two parts: a written proposal and an oral defense of the proposal. The examination must be taken before June 30 of the second year.
g Dissertation defense.

# Cardiothoracic Surgery 

## Chair

\author{

- Kalpaj Parekh
}

Interim Director, Perfusion Technology

- Shahna Helmick

Undergraduate certificate: perfusion technology
Website: https://medicine.uiowa.edu/perfusion/
The University of Iowa cardiothoracic surgery program is the third oldest program of its kind in the United States. Since its establishment in 1948 as a division within the Department of Surgery, it is now its own department providing operative interventions for patients with diseases of the chest and performing a broad range of the most current and innovative surgical procedures.
Cardiothoracic surgery's facilities are located at University of Iowa Hospitals \& Clinics. Each year cardiothoracic surgeons at the hospitals perform more than 500 adult and pediatric heart surgeries, including coronary bypasses, transplants, and placement of mechanical cardiac assist devices; minimally invasive procedures such as mitral valve replacement and epicardial lead placement; and more than 600 general thoracic surgeries with emphasis on esophageal and lung diseases. Preparations are underway for providing coronary artery bypass grafting using robotics.

The Perfusion Technology Program is a $20-$ month program of study. For more information about the Perfusion Technology Program, visit the Perfusion Technology Program website.

## Programs

## Undergraduate Program of Study Certificate

- Certificate in Perfusion Technology [p. 1761]

## Residency

Iowa's cardiothoracic surgery residency program was established in 1948 and is fully accredited by the Accreditation Council for Graduate Medical Education (ACGME). It is the only cardiothoracic surgery training program in Iowa. One resident is accepted into the two-year fellowship program each year. Cardiothoracic surgery was approved by the ACGME to start a six-year integrated thoracic residency. Medical students begin the program after they graduate from medical school. A new resident enters the program each year.

## Facilities

Cardiothoracic surgery has specialty laboratories in gastric motility, analytical chemistry, transplantation, tissue culture, surgical bacteriology, shock, and cardiac bypass. These facilities permit study of experimental procedures such as heart valve replacement in large animals and heterotopic heart transplantation in mice and rats.

## Courses

- Cardiothoracic Surgery Courses [p. 1759]
- Perfusion Technology Courses [p. 1759]

## Cardiothoracic Surgery Courses

## CTS:8401 Advanced Inpatient Subinternship in Cardiothoracic <br> Surgery

arr.
Participation in diagnosis, preoperative, operative, and postoperative care of thoracic and cardiac patients; attendance at division conferences; students assume responsibility and act as an intern; may concentrate interest in cardiac surgery or thoracic surgery; diagnosis and management of patients on an inpatient service under close supervision by an upper-level resident/fellow and faculty member.

## CTS:8497 Research in Cardiothoracic Surgery

Work on a short- or long-term research project arranged with instructor; may involve clinical material or laboratory; students organize and complete a project, finishing with a publishable manuscript.
CTS:8498 Cardiothoracic Surgery On Campus arr.
Clinical clerkship individually arranged by student with department
Clinical clerkship individually arranged by student with department approval.
CTS:8499 Cardiothoracic Surgery Off Campus 4 s.h. Individually arranged by student with approval of department to rotate outside of University of Iowa Hospitals \& Clinics. Requirements: MD enrollment.

## Perfusion Technology Courses

PERF:4161 Instrumentation in Perfusion Technology 3 s.h. Electrical circuitry, filters, pressure transducers, thermistors, cardiac output computers, fluid dynamics, intra-aortic balloon pumps, blood gas analyzers. Requirements: Perfusion Technology Program enrollment.
PERF:4162 Pathophysiology of Perfusion Technology 5 s.h.
Hemostasis, acid base physiology, gas transfer, heart anatomy, heart embryology, congenital cardiac defects. Requirements: Perfusion Technology Program enrollment.
PERF:4163 Clinical Experience I
2 s.h.
Perfusion in operating room: patient workup, observation, and reporting on extracorporeal setup, surgical procedure. Requirements: Perfusion Technology Program enrollment.
PERF:4164 Clinical Experience II
3 s.h.
Continuation of PERF:4163; setup of extracorporeal circuit; ancillary duties of perfusionist. Requirements: Perfusion Technology Program enrollment.
PERF:4165 Clinical Experience III
12 s.h.
Continuation of PERF:4164; management of cardiopulmonary bypass system. Requirements: Perfusion Technology Program enrollment.

## PERF:4166 Clinical Experience IV

12 s.h.
Continuation of PERF:4165; emphasis on supply maintenance, perfusion department management. Requirements: Perfusion
Technology Program enrollment.
PERF:4167 Perfusion Seminar 1 s.h.
Ethics in perfusion. Requirements: Perfusion Technology Program enrollment.
PERF:4168 Research in Perfusion
1 s.h.
From topic selection to manuscript. Requirements: Perfusion Technology Program enrollment.

PERF:4169 Clinical Experience V
12 s.h.
Continuation of PERF:4166. Requirements: Perfusion Technology
Program enrollment.
PERF:4170 Principle and Practice of Perfusion Technology 6 s.h. Hypothermia, hemodilution, left heart bypass, dialysis, ultrafiltration, membrane and bubbler oxygenation. Requirements: Perfusion Technology Program enrollment.

PERF:4171 Devices in Perfusion Technology 3 s.h.
Components of extracorporeal circuit; in vitro laboratory evaluation of components. Requirements: Perfusion Technology Program enrollment.

## Perfusion Technology, Certificate

## Requirements

The undergraduate Certificate in Perfusion Technology requires 70 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in work for the certificate. The certificate is a $20-$ month program that spans over five semesters. The program is accredited by the Commission on Accreditation of Allied Health Education Programs upon the recommendation of the Accreditation Committee for Perfusion Education (AC-PE). Students are awarded the certificate upon successful completion of the program making them eligible to take the American Board of Cardiovascular Perfusion certification exam.

Three to five students are accepted annually and begin the program the fall semester. During the first two semesters of the program, students pursue a core curriculum that provides a solid scientific base while the second year (three semesters) is reserved for the completion of an independent research project, clinical training in the operation of the heart-lung machine, and learning ancillary procedures such as blood salvaging, circulatory support, and artificial hearts.

The Certificate in Perfusion Technology requires the following work.

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| PERF:4161 | Instrumentation in Perfusion | 3 |
|  | Technology | 5 |
| PERF:4162 | Pathophysiology of Perfusion <br> Technology | 5 |
| PERF:4163 | Clinical Experience I | 2 |
| PERF:4164 | Clinical Experience II | 3 |
| PERF:4165 | Clinical Experience III | 12 |
| PERF:4166 | Clinical Experience IV | 12 |
| PERF:4167 | Perfusion Seminar (taken five <br> times for 1 s.h. each) | 5 |
| PERF:4168 | Research in Perfusion (taken <br> four times for 1 s.h. each) | 4 |
| PERF:4169 | Clinical Experience V | 12 |
| PERF:4170 | Principle and Practice of <br> Perfusion Technology | 6 |
| PERF:4171 | Devices in Perfusion | 3 |
| PATH:8133 | Technology | Introduction to Human |
| Pathology for Graduate Students | $\mathbf{7 0}$ |  |

## Prerequisites

The following coursework is required before admission to the certificate program:

- baccalaureate degree;
- chemistry, including biochemistry or organic chemistry (9 s.h.);
- human anatomy and physiology (7 s.h.);
- physics (4 s.h.);
- precalculus (5 s.h.) or calculus; and
- statistics (3 s.h.).

## Admission

Admission to the program is based on the decision of the Admissions Committee. Decisions are based upon a combination of grade-point average, references, an essay, and interview scores.
For information about application materials, see Admissions on the Perfusion Technology Program website.

Applications must be submitted by Nov. 1.

## Dermatology

## Chair

- Janet A. Fairley

Faculty: https://medicine.uiowa.edu/dermatology/profile
Website: https://medicine.uiowa.edu/dermatology/
The Department of Dermatology instructs MD students and trains dermatology residents in the care of patients with skin diseases. It also provides researchers with an opportunity to develop their skills in dermatology.

## MD Training

The Department of Dermatology rotation is one of seven selective courses offered to third- and fourth-year medical students. Students spend two weeks in the clinic and attend several one-hour lectures. They see a good cross-section of patients, including those receiving primary or tertiary care at University of Iowa Hospitals \& Clinics, Iowa River Landing, and VA Iowa City Health Care.

Varied electives are open to fourth-year MD students, including further clinical experience, dermatologic research, and special studies.

## Courses

## Dermatology Courses

DERM:8301 Clinical Dermatology
2 s.h.
Basic dermatology; lectures, independent study, clinical experience. Requirements: third-year MD enrollment.
DERM:8401 Dermatology Elective
arr
Advanced clinical experience, dermatologic surgery, special assignments. Requirements: fourth-year MD enrollment.

DERM:8497 Research in Dermatology arr.
General principles of medical research; clinical or laboratory projects; individual study.
DERM:8498 Dermatology On Campus arr.
Clinical clerkship; individually arranged by student with departmental approval.
arr.

## Dietary

## Executive Dean

- Patricia L. Winokur

## Graduate degree: MCN

Website: https://uihealthcare.org/education/university-iowa-master-clinical-nutrition-program

The dietary program is committed to patient care through dietitian service, research, and education.

Graduate-level courses for the Master of Clinical Nutrition degree are administered by the Carver College of Medicine and the College of Public Health.

## Programs

## Graduate Program of Study

## Major

- Master of Clinical Nutrition [p. 1764]

## Courses

## Dietary Courses

DIET:9101 Advanced Medical Nutrition Therapy I 3 s.h.
Nutritional impact on health and disease as it relates to physiology and biochemistry with an emphasis on medical nutrition therapy and the relationship to various disease states. Requirements: enrollment in Master of Clinical Nutrition program.
DIET:9102 Advanced Medical Nutrition Therapy II 3 s.h. Continuation of DIET:9101; review of the nutritional impact on health and disease as it relates to physiology and biochemistry with an emphasis on medical nutrition therapy and the relationship to various disease states. Requirements: enrollment in Master of Clinical Nutrition program.

## DIET:9200 Nutrition Assessment

 3 s.h.Study of nutrition assessment methods including dietary intake, anthropometric and biochemical measures, as well as nutrition focused physical examination; utilization of nutrition care process including nutrition assessment, diagnosis, interventions, monitoring, and evaluation with individuals, groups, or populations. Requirements: enrollment in Master of Clinical Nutrition program.

## DIET:9300 Critical Care and Nutrition Support

Advanced enteral and parenteral nutrition in an acute care setting; indications, calculations, potential complications, and ethical consideration of nutrition support. Requirements: enrollment in Master of Clinical Nutrition program.

## DIET:9400 Pediatric Nutrition

Examination of physiological, biochemical, and nutritional aspects of disease processes relevant to infants and children up to 18 years of age; emphasis on evidence-based medical nutrition therapy for a variety of disease states. Requirements: enrollment in Master of Clinical Nutrition program.
DIET:9501 Supervised Experiential Learning I
Supervised hands-on training at the bedside in inpatient units, and in outpatient clinics, communities, and food service management; completion of coursework specific to Registered Dietitian and Nutritionist (RDN) training while learning in field (e.g., ServSafe certification, diet meals, event planning, professional issues and trends). Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9502 Supervised Experiential Learning II
3 s.h.
Supervised hands-on training at the bedside in inpatient units, and in outpatient clinics, communities, and food service management; completion of coursework specific to Registered Dietitian and Nutritionist (RDN) training while learning in field (e.g., legislative and regulatory issues, research seminar, clinical rounds, Commission on Dietetic Registration portfolio development, RDN licensure and credentialing). Requirements: enrollment in Master of Clinical Nutrition program.
DIET:9600 Management in Foods and Nutrition
3 s.h.
Application of the principles of health care management as it pertains to food and nutrition including budgeting, cost control, and financial analysis; clinical coding and billing; quality and performance improvement measures; human resource management; and operating plan development. Requirements: enrollment in Master of Clinical Nutrition program.

## Master of Clinical Nutrition, MCN

The Master of Clinical Nutrition program inspires and educates students to be leaders in clinical nutrition through innovative and interprofessional graduate education as a Registered Dietitian Nutritionist (RDN).

The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND).

## Requirements

The graduate Master of Clinical Nutrition (MCN) requires 36 s.h. of credit. Students must maintain a cumulative grade-point average of at least 2.50 in major coursework. The degree requires no thesis.

The MCN is a $20-$ month program of study. After successful completion of the program, students earn the degree and receive a verification statement that provides eligibility to take the Commission on Dietetic Registration (CDR) entry-level registration examination for dietitians.

The Master of Clinical Nutrition requires the following work.

## First Year, Fall

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| DIET:9101 | Advanced Medical Nutrition | 3 |
|  | Therapy I | 3 |
| DIET:9200 | Nutrition Assessment | 2 |
| EPID:6360 | Nutrition Intervention in <br> Clinical Trials Research | 3 |
| EPID:6370 | Nutrition Intervention in <br> Research Lab |  |

## First Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| DIET:9102 | Advanced Medical Nutrition | 3 |
|  | Therapy II | 2 |
| EPID:6330 | Global Nutrition Policy | 2 |
| EPID:6350 | Nutritional Epidemiology | 3 |
| HHP:6310 | Advanced Sport and Exercise |  |

First Year, Summer

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| DIET:9300 | Critical Care and Nutrition | 3 |
|  | Support |  |

| Second Year, Fall |  |  |
| :--- | :--- | ---: |
| Course \# | Title | Hours |
| DIET:9501 | Supervised Experiential <br> Learning I |  |
| DIET:9600 | Management in Foods and <br> Nutrition | 3 |

## Second Year, Spring

| Course \# | Title | Hours |
| :--- | :--- | ---: |
| DIET:9400 | Pediatric Nutrition | 3 |
| DIET:9502 | Supervised Experiential | 3 |

## Supervised Experiential Learning

All supervised experiential learning occurs on campus at University of Iowa Hospitals \& Clinics, with the exception of community nutrition which occurs in the greater Iowa City community. The rotation schedule is developed according to the following guidelines.

- Clinical dietetics (disordered eating, oncology, cardiology, critical care, pediatrics, and outpatient counseling): 21 weeks.
- Food service management (clinical management, food service, production, business and finance, patient services, and event planning): 8 weeks.
- Community nutrition: 5 weeks.

## Admission

Applicants to the MCN program must either have completed a Didactic Program in Dietetics (DPD) or meet the course requirements listed below:

- have a baccalaureate degree from a regionally accredited institution in the United States;
- have a minimum cumulative grade-point average (GPA) of at least 3.00 on a 4.00 scale;
- have a cumulative science GPA of at least 3.20 or a science GPA of at least 3.20 on the most recently completed biological and chemical science coursework;
- submit Graduate Record Examination (GRE) General Test scores to the University of Iowa from Educational Testing Services (ETS) and have a minimum test score at the 25th percentile or higher on each section (verbal, quantitative, and analytical writing) taken within the last 10 years;
- have health care or food service work experience in the field;
- submit three recommendation letters (one from a collegiate academic reference, one from a health care or food service experience supervisor, and one from anyone in an academic or work setting); and
- meet education requirements (see below).

Applicants whose first language is not English must submit official test scores to verify English proficiency. They can do this by submitting official test scores for the Test of English as a Foreign Language (TOEFL). In order to review an application, official TOEFL scores must be received from Educational Testing Service. Only the iBT (internet-based test) is accepted. A minimum total score of 93 and a speaking score of 26 is necessary for entry into the program.

## Education Requirements

## Biological Sciences Coursework

- At least one semester of biology (animal or human) or general zoology.
- An animal, exercise, or human physiology course.
- An animal or human anatomy course.
- At least two additional courses in natural sciences. Examples of courses include cell biology, genetics, immunology, microbiology, molecular biology, pharmacology, embryology, endocrinology, histology, or neuroscience.

## Chemical Sciences Coursework

- At least one semester of inorganic chemistry.
- At least one semester of organic chemistry.
- An introductory or general biochemistry course.

## Statistical Sciences Coursework

- A general statistics or biostatistics course.

## Professional Coursework

- At least one nutrition course such as introductory nutrition, lifespan nutrition, advanced nutrition, or medical nutrition therapy.

## Recency of Education Requirements

Additional courses in dietetic or a related area are required to update a degree that was completed five or more years prior to the current application deadline. The number of required credits is outlined below:

- 5-10 years ( $3 \mathrm{~s} . \mathrm{h}$. of medical nutrition therapy or clinical nutrition).
- 10 or more years ( $3 \mathrm{~s} . \mathrm{h}$. of medical nutrition therapy, 3 s.h. of physiology, 3 s.h. of biochemistry).

## Application Process

Application should be made through the Master of Clinical Nutrition program. All materials for the application, including official Graduate Record Examination (GRE) scores, three recommendations, and college transcripts, must be received by June 1.

Official GRE scores, as well as Test of English as a Foreign Language (TOEFL) scores, should be sent to the University of Iowa using GRE Code 6681.

The University of Iowa online application for admission requires a nonrefundable application fee of $\$ 60$ for U.S. applicants and $\$ 100$ for international applicants.

## Financial Support

The estimated tuition and expenses for the program are listed on the University of Iowa Health Care website; visit the Master of Clinical Nutrition Program Tuition and Expenses web page.

Students should contact the Office of Student Financial Aid for information concerning monetary assistance.

## Career Development

The Master of Clinical Nutrition program prepares students to be competent as a registered dietitian nutritionist (RDN).
According to the Occupational Outlook Handbook released by the U.S. Department of Labor Statistics, the employment of registered dietitians and nutritionists is projected to grow $7 \%$ from 2021 to 2031 about as fast as the average for all occupations.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

## Doctor of Medicine

Professional degree: MD
Website: https://medicine.uiowa.edu/md/
The Doctor of Medicine is a professional degree awarded by the Carver College of Medicine. The college is accredited by the Liaison Committee on Medical Education of the American Medical Association and the Association of American Medical Colleges and meets the requirements of all state licensing boards. Its MD diploma admits the holder to all privileges granted to graduates of all medical colleges before such boards.

## Major

- Doctor of Medicine [p. 1767]

## Academics Rules and Procedures

## Student Promotion

The Carver College of Medicine has established promotion policies and procedures to ensure that each of its graduates has adequate skills, knowledge, judgment, ethical standards, and personal integrity to assume the responsibilities of a medical doctor. The student promotions committee, made up of seven faculty members and two students, performs these duties with the cooperation, advice, and judgment of course directors, faculty members, students, and administrators.

The committee recommends specific actions to be taken when a student's skills, knowledge, judgment, or ethical behavior is in any way considered consistently marginal or unsatisfactory. Possible recommendations include dismissal of the student from the college, suspension for a specified period of time, requiring the student to repeat all or any part of the curriculum on academic probation, and allowing the student to continue on academic probation with a full or partial course load. The committee's recommendations are forwarded for action to the executive dean of the Carver College of Medicine.
Specific information about student promotion policies and procedures is available from the Office of Student Affairs and Curriculum and is online in the Student Handbook.

## Leaves of Absence, Withdrawal, Reinstatement

The Carver College of Medicine has established policies regarding leaves of absence, dropping courses, withdrawal from the college, and reinstatement to the college. Information about each of these policies is available on the college's Office of Student Affairs and Curriculum website and is published annually in the Student Handbook.

## Disputes and Complaints

Student complaints concerning actions of faculty members or departments are pursued first through mechanisms established in the Carver College of Medicine. These procedures allow the greatest flexibility for all concerned in resolving a conflict. They are intended for situations such as grading disputes, alleged academic dishonesty, alleged dishonesty during a clinical rotation, alleged unethical or unprofessional conduct, and perceived discrimination or harassment.

Complaints regarding sexual harassment are handled confidentially in accordance with university policy and procedures; see the university's Sexual Harassment Policies.

For information about the established informal mechanisms, contact the Office of Student Affairs and Curriculum or see the Student Handbook.

## Requirements

The Doctor of Medicine is a full time, four-year program that prepares students to practice primary care medicine and to pursue further education and training in specialized areas of medicine. The program admits 152 new students each year. The MD curriculum is built on a triple-helix model whose three strands extend through all four years of medical school: the clinical and professional skills strand, the mechanisms of health and disease strand, and the medicine and society strand.

Clinical experiences begin during the first few weeks of medical school, and clinical clerkships start after just three semesters of preclinical instruction. By the end of the fifth semester, students have completed all of their core requirements and have the remaining three semesters to tailor their educational experience in preparation for their selected specialty.

Students complete in-depth clinical coursework and serve clinical clerkships primarily at University of Iowa Hospitals \& Clinics, the VA Iowa City Health Care, and the Des Moines Area Medical Education Consortium. Students also may have opportunities to gain experience in private medical offices and community hospitals.
Students are required to pay a minimum of eight semesters of full-time tuition. At the conclusion of medical school, students will match into a residency program and complete their training in a chosen specialty.

## Preclinical Curriculum (Phase I)
