

Audit Retention Plan

Archiving and Purging Degree Audits

- Background -

This fall, the UI will be upgrading u.achieve, the system that runs our degree audits.

As we reviewed the steps necessary for this upgrade, that many students have 100+ audits displayed, and the fact that we will be adding more program of study (POS) audits in the future, we realized that we need create an audit retention plan and begin proactive steps to archive and purge audits.

The audits that will be most impacted by campus users are HawkID audits and REGISTRAR_EOS audits.

- HawkID Audits -

HawkID audits are the primary audits used by students, advisors, and staff.

- Program of Study audits (majors, minors, certificates)
- What if? audits

These are audits associated with the HawkID of the requester (student, advisor, etc.).

Archiving and Purging Degree Audits

- REGISTRAR_EOS Audits -

REGISTRAR_EOS audits are audits that are run after grades are added to students' records each session.

- EOS = end of session

Moving forward, each sessions' EOS audits will be archived after 30 days.

Students will be able to view EOS audits even after they are archived.

- This will be similar to Orientation audits
- Orientation audits are accessible to students even though the student did not request the audit (i.e., they are not HawkID audits)
